- Cyber-Security Engineering and Development
- Digital Business
- Full-Stack Software Engineering
- User Experience Design
- Data Science and Machine Learning Systems Engineering

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the Restricted Electives course list below. (p. 693)		16
Complete 12 semester hours from the Other Electives course list below. (p. 693)		12

PROJECT OPTION

Code	Title	Hours
INFO 7945	Master's Project	4
Complete 24 semester hours from the Electives course list below. A minimum of 16 semester hours must be INFO courses.		24

THESIS OPTION

Code	Title	Hours
INFO 7945	Master's Project	4
INFO 7990	Thesis	4
Complete 20 semester hours from the Electives course list below. A minimum of 16 semester hours must be INFO courses.		20

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing Committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS Thesis to ProQuest.

Restricted Electives Course List

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6000 to qualify for co-op experience:		
ENCP 6000	Career Management for Engineers	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Information Systems, MSIS (Boston)

We offer cutting-edge expertise in a variety of courses that combine technological advances and business practices. We stress creative and inventive approaches to problem solving, which necessitates empowering students so that they can take charge of their own software projects to become originally productive. Our information systems program (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-insy/>) is as much an art as a science. It bypasses mechanical learning and highlights the value and excitement of engineering thinking that gets things done efficiently as well as imaginatively. We balance theory and practice, on the premise that they are always intertwined and interdependent.

We seek to provide a basic foundation for our students and then seek to push them to new heights to advance their information technology skills in a way that keeps up and, better yet, exceeds the necessarily fast pace of this progressive field. It is not for us just a question of not being left behind; we strive to be at the forefront of software innovation in an effort to transform contemporary society even more radically than technology has already done—to take gigantic strides in business, medicine, education, and security.

The program offers a wide range of courses that reflect current and future industry trends:

- Cryptocurrency and Smart Contract Engineering
- Engineering of Big-Data Systems
- Business Intelligence and Data Analytics
- Cybersecurity Engineering and Development
- Digital Business

- Full-Stack Software Engineering
- User Experience Design
- Data Science and Machine Learning Systems Engineering

Gordon Institute of Engineering Leadership

MASTER'S DEGREE IN INFORMATION SYSTEMS WITH GRADUATE CERTIFICATE IN ENGINEERING LEADERSHIP

Students may complete a master's degree in Information Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 semester hours of advisor-approved information systems technical courses. For students who enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to this program's elective requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

Options

Complete one of the following options. Students may also choose to complete the Optional Concentration in Medical Software Engineering (p. 694) and apply concentration coursework to restricted electives or other electives requirements of these options.

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the restricted electives course list below. (p. 695)		16
Complete 12 semester hours from the other electives course list below. (p. 695)		12

PROJECT OPTION

Code	Title	Hours
INFO 7945	Master's Project	4
Complete 12 semester hours from the restricted electives course list below. (p. 695)		12
Complete 12 semester hours from the other electives course list below. (p. 695)		12

THESIS OPTION

Code	Title	Hours
INFO 7945	Master's Project	4
INFO 7990	Thesis	4
Complete 8 semester hours from the restricted electives course list below. (p. 695)		8
Complete 12 semester hours from the other electives course list below. (p. 695)		12

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Concentration in Medical Software Engineering

A concentration is not required. Students may complete the following concentration in medical software engineering and apply concentration courses to restricted electives or other electives requirements of the program's coursework, project, or thesis options.

Code	Title	Hours
CSYE 7280	User Experience Design and Testing	4
INFO 7405	Advances in Engineering Medical Information Systems	4
INFO 7410	Advanced Medical Device Software Engineering	4

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6000 to qualify for co-op experience):		
ENCP 6000	Career Management for Engineers	1

ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

TELE 6300	Communication and Network Security
TELE 6400	Software-Defined Networking
TELE 6420	Infrastructure Automation Design and Tools
TELE 6500	Machine Learning for IoT Systems
TELE 6510	Fundamentals of the Internet of Things
TELE 6530	Connected Devices
TELE 6550	IoT Embedded System Design
TELE 7374	Special Topics in the Internet of Things

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6000 to qualify for co-op experience:		
ENCP 6000	Career Management for Engineers	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Information Systems, MSIS (Vancouver)

We offer cutting-edge expertise in a variety of courses that combine technological advances and business practices. We stress creative and inventive approaches to problem solving, which necessitates empowering students so that they can take charge of their own software projects to become originally productive. Our information systems program (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-insy/>) is as much an art as a science. It bypasses mechanical learning and highlights the value and excitement of engineering thinking that gets things done efficiently as well as imaginatively. We balance theory and practice, on the premise that they are always intertwined and interdependent.

We seek to provide a basic foundation for our students and then seek to push them to new heights to advance their information technology skills in a way that keeps up and, better yet, exceeds the necessarily fast pace of this progressive field. It is not for us just a question of not being left behind; we strive to be at the forefront of software innovation in an effort to transform contemporary society even more radically than technology has already done—to take gigantic strides in business, medicine, education, and security.

The program offers a wide range of courses that reflect current and future industry trends:

- Cryptocurrency and Smart Contract Engineering
- Engineering of Big-Data Systems
- Business Intelligence and Data Analytics
- Cyber-Security Engineering and Development
- Digital Business
- Full-Stack Software Engineering
- User Experience Design
- Data Science and Machine Learning Systems Engineering

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

Project or Thesis Option

Complete one of the following options:

PROJECT OPTION

Code	Title	Hours
INFO 7976	Directed Study	4

THESIS OPTION

Code	Title	Hours
Complete the following course twice:		8

INFO 7990	Thesis	

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing Committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS Thesis to ProQuest.

Concentration in General Information Systems

Code	Title	Hours

Complete 16 semester hours from any of the courses listed below:

CSYE 6225	Network Structures and Cloud Computing (Big Data Systems and Analytics)	
CSYE 7280	User Experience Design and Testing	
DAMG 7245	Big-Data Systems and Intelligence Analytics	
INFO 6150	Web Design and User Experience Engineering	
INFO 6245	Planning and Managing Information Systems Development	
INFO 6350	Smartphones-Based Web Development	
INFO 7250	Engineering of Big-Data Systems	
INFO 7375	Special Topics in Artificial Intelligence Engineering and Applications	
INFO 7390	Advances in Data Sciences and Architecture	
INFO 7500	Cryptocurrency and Smart Contract Engineering	
INFO 7510	Smart Contract Application Engineering and Development	
INFO 7520	Engineering of Advanced Cryptocurrency Systems	
INFO 7525	Regulatory Aspects of Smart Contract Automation	

INFO 7535	Digital Smart Contracts Product Innovations
INFO 7610	Special Topics in Natural Language Engineering Methods and Tools

Electives

Code	Title	Hours
Complete the remaining minimum program required semester hours from the following:		
CSYE 6225	Network Structures and Cloud Computing	
CSYE 7105	High-Performance Parallel Machine Learning and AI	
CSYE 7280	User Experience Design and Testing	
CSYE 7374	Special Topics in Computer Systems Engineering	
DAMG 6105	Data Science Engineering with Python	
DAMG 6210	Data Management and Database Design	
DAMG 7245	Big-Data Systems and Intelligence Analytics	
DAMG 7275	Advanced Database Management Systems	
DAMG 7350	Systems and Cybersecurity Fundamentals	
DAMG 7370	Designing Advanced Data Architectures for Business Intelligence	
INFO 6105	Data Science Engineering Methods and Tools	
INFO 6150	Web Design and User Experience Engineering	
INFO 6205	Program Structure and Algorithms	
INFO 6215	Business Analysis and Information Engineering	
INFO 6245	Planning and Managing Information Systems Development	
INFO 6250 and INFO 6251	Web Development Tools and Methods and Lab for INFO 6250	
INFO 6255	Software Quality Control and Management	
INFO 6350	Smartphones-Based Web Development	
INFO 7110	High-Performance Coding for Fintech	
INFO 7225	Accounting and Budgetary Systems for Engineers	
INFO 7245	Agile Software Development	
INFO 7250	Engineering of Big-Data Systems	
INFO 7255	Advanced Big-Data Applications and Indexing Techniques	
INFO 7285	Organizational Change and IT	
INFO 7375	Special Topics in Artificial Intelligence Engineering and Applications	
INFO 7385	Managerial Communications for Engineers	
INFO 7390	Advances in Data Sciences and Architecture	
INFO 7500	Cryptocurrency and Smart Contract Engineering	
INFO 7510	Smart Contract Application Engineering and Development	
INFO 7520	Engineering of Advanced Cryptocurrency Systems	
INFO 7525	Regulatory Aspects of Smart Contract Automation	
INFO 7535	Digital Smart Contracts Product Innovations	
INFO 7610	Special Topics in Natural Language Engineering Methods and Tools	

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6000 to qualify for co-op experience:		
ENCP 6000	Career Management for Engineers	1

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Information Systems—Online, MSIS

The Online Master of Science in Information Systems from the College of Engineering at Northeastern University is designed to teach students to use technology to address the challenges facing people in businesses, organizations, and communities across the world.

The online MSIS offers you an opportunity to obtain the technical skills and business management expertise to drive digital transformation in any organization. You'll study deep applied knowledge across a range of technological fields, including UX design, software development, data analytics, and digital business processes.

If you desire, you may choose to follow a curated Focus Areas in Cyber and Information Security; Product Management & DevOps Leadership; and Software Testing and Quality Assurance. These courses have been selected to ensure that you have the skills you need to enter the workforce in these critical and growing areas.

Along the way, you'll have an opportunity to learn business leadership best practices. With a strong working knowledge of quality assurance, data management, agile methodologies, and marketing assessment, you'll be ready for leadership in almost any organization or industry.

With this unique and flexible set of must-have skills, you'll be ideally positioned to step into a diverse range of tech leadership roles including IT project manager, systems administrator, software developer, information security analyst, and more.

Program Requirements

Complete all core and elective requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

Electives

Code	Title	Hours
Complete 28 semester hours from the following:		28
CSYE 6225	Network Structures and Cloud Computing	
CSYE 6255	Software Testing for Engineers	
CSYE 7280	User Experience Design and Testing	
CSYE 7400	Responsible Software Engineering and AI	
DAMG 6210	Data Management and Database Design	
DAMG 7330	Cybersecurity Audit and Compliance	
DAMG 7350	Systems and Cybersecurity Fundamentals	
INFO 6105	Data Science Engineering Methods and Tools	
INFO 6150	Web Design and User Experience Engineering	
INFO 6245	Planning and Managing Information Systems Development	
INFO 6255	Software Quality Control and Management	
INFO 6350	Smartphones-Based Web Development	
INFO 7245	Agile Software Development	
INFO 7260	Business Process Engineering	
TELE 5600	Linux/UNIX Systems Management for Network Engineers	
TELE 6300	Communication and Network Security	

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Information Systems, MSIS—Bridge (Arlington)

The Master of Science in Information Systems—Bridge (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-insy-bridge/>) (MSIS-Bridge) addresses the needs of the digital revolution by preparing students with non-STEM, nontechnical bachelor's degrees to become information systems professionals. MSIS-Bridge students are the link between business users and technologists. As industries launch into a digitized future, professionals with a clear understanding of how technology can be used to address significant societal challenges are in demand. The MSIS-Bridge program closes the gaps between business management, software engineering, and information technology to help students solve complex real-world issues in business and society. It also upskills and reskills to help individuals or businesses identify organizational skills gaps and create a tactical training plan to fill them with new skills and knowledge. Through specially created and selected core courses, students gain the engineering foundation needed to excel in the classroom and in the IT sector.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INFO 5001	Application Modeling and Design	4
INFO 5002	Introduction to Python for Information Systems	4
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

Restricted Electives

Code	Title	Hours
Complete 12 semester hours from the following:		12
INFO 6150	Web Design and User Experience Engineering	
INFO 6205	Program Structure and Algorithms	
INFO 6215	Business Analysis and Information Engineering	

INFO 6245	Planning and Managing Information Systems Development
INFO 7245	Agile Software Development
INFO 7385	Managerial Communications for Engineers

Electives

Code	Title	Hours
Complete 16 SH from the Electives list for this program below. (p. 709)		

Program Credit/GPA Requirements

40 total semester hours required
Minimum 3.000 GPA required

Electives

Code	Title	Hours
CSYE 6202	Concepts of Object-Oriented Design with C#	
CSYE 6205	Concepts of Object-Oriented Design with C++	
CSYE 6220	Enterprise Software Design	
CSYE 6225	Network Structures and Cloud Computing	
CSYE 6230	Operating Systems	
CSYE 6305	Introduction to Quantum Computing with Applications	
CSYE 6700	Technical Writing and Professional Development	
CSYE 7105	High-Performance Parallel Machine Learning and AI	
CSYE 7125	Advanced Cloud Computing	
CSYE 7200	Big-Data System Engineering Using Scala	
CSYE 7215	Foundations of Parallel, Concurrent, and Multithreaded Programming	
CSYE 7220	Deployment and Operation of Software Applications	
CSYE 7230	Software Engineering	
CSYE 7270	Building Virtual Environments	
CSYE 7374	Special Topics in Computer Systems Engineering	
CSYE 7470	Advanced Game Analytics	
CSYE 7550	Distributed Intelligent Agents in the Metaverse	
CSYE 7990	Thesis	
DAMG 6105	Data Science Engineering with Python	
DAMG 6210	Data Management and Database Design	
DAMG 7105	Intelligent Data Modeling and Presentation for Engineers	
DAMG 7245	Big-Data Systems and Intelligence Analytics	
DAMG 7250	Big Data Architecture and Governance	
DAMG 7275	Advanced Database Management Systems	
DAMG 7325	Introduction to Information Technology Auditing	
DAMG 7350	Systems and Cybersecurity Fundamentals	
DAMG 7370	Designing Advanced Data Architectures for Business Intelligence	
DAMG 7374	Special Topics in Data Architecture and Management

Program Credit/GPA Requirements

40 total semester hours required

Minimum 3.000 GPA required

Information Systems, MSIS—Bridge (Silicon Valley)

The Master of Science in Information Systems—Bridge (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-insy-bridge/>) (MSIS-Bridge) addresses the needs of the digital revolution by preparing students with non-STEM, nontechnical bachelor's degrees to become information systems professionals. MSIS-Bridge students are the link between business users and technologists. As industries launch into a digitized future, professionals with a clear understanding of how technology can be used to address significant societal challenges are in demand. The MSIS-Bridge program closes the gaps between business management, software engineering, and information technology to help students solve complex real-world issues in business and society. It also upskills and reskills to help individuals or businesses identify organizational skills gaps and create a tactical training plan to fill them with new skills and knowledge. Through specially created and selected core courses, students gain the engineering foundation needed to excel in the classroom and in the IT sector.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INFO 5001	Application Modeling and Design	4
INFO 5002	Introduction to Python for Information Systems	4
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

Restricted Electives

Code	Title	Hours
Complete 12 semester hours from the following:		12
DAMG 6210	Data Management and Database Design	
INFO 6150	Web Design and User Experience Engineering	
INFO 6205	Program Structure and Algorithms	
INFO 6215	Business Analysis and Information Engineering	
INFO 6245	Planning and Managing Information Systems Development	
INFO 6255	Software Quality Control and Management	
INFO 6350	Smartphones-Based Web Development	
INFO 7245	Agile Software Development	
INFO 7385	Managerial Communications for Engineers	

Electives

Code	Title	Hours
Complete 16 semester hours from the following subject codes:		16
CSYE (except CSYE 6220)		
DAMG

Information Systems, MSIS—Bridge—Online

The Online Master of Science in Information Systems—Bridge from the College of Engineering at Northeastern University is designed to teach students to use technology to address the challenges facing people in businesses, organizations, and communities across the world. This prestigious and meticulously designed master's program allows capable graduates from all academic and professional backgrounds to reposition themselves across a range of rapidly growing IT industries, ready to help define and lead the systemic changes that are reshaping our societies.

Designed for graduates and working professionals from any background, the online MSIS offers you an opportunity to obtain the technical skills and business management expertise to drive digital transformation in any organization. You'll study deep applied knowledge across a range of technological fields, including UX design, software development, data analytics, and digital business processes.

Along the way, you'll have an opportunity to learn business leadership best practices. With a strong working knowledge of quality assurance, data management, agile methodologies, and marketing assessment, you'll be ready for leadership in almost any organization or industry.

With this unique and flexible set of must-have skills, you'll be ideally positioned to step into a diverse range of tech leadership roles including IT project manager, systems administrator, software developer, information security analyst, and more.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Introductory Coursework

Note: To ensure that students have the foundation necessary to be successful in this program, each student must complete the following with a minimum grade of B:

Code	Title	Hours
INFO 5001	Application Modeling and Design	4
INFO 5002	Introduction to Python for Information Systems	4

Core Requirements

Code	Title	Hours
INFO 5100 and INFO 5101	Application Engineering and Development and Lab for INFO 5100	4

Additional Requirements

Code	Title	Hours
CSYE 7280	User Experience Design and Testing	4
DAMG 6210	Data Management and Database Design	4
INFO 6105	Data Science Engineering Methods and Tools	4
INFO 6150	Web Design and User Experience Engineering	4
INFO 6245	Planning and Managing Information Systems Development	4
INFO 6350	Smartphones-Based Web Development	4
INFO 7245	Agile Software Development	4

Program Credit/GPA Requirements

40 total semester hours required

Minimum 3.000 GPA required

Cyber-Physical Systems, MS (Boston)

The Master of Science in Cyber-Physical Systems (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-cyps/>) with a concentration in the Internet of Things is designed to prepare our graduates for a world of connected devices. This innovative multidisciplinary program is designed to meet the demand for a new kind of specialist—one who can engineer and develop new interactive services; acquire, fuse, and process the data collected from sensors, actuators, controllers, and other devices; and develop architectures to interconnect these elements as part of larger, more diverse systems. It is expected that careers in this rapidly evolving area will encompass industry sectors ranging from energy, healthcare, transportation, and infrastructure to manufacturing.

This program integrates the study of wireless networking, protocols, sensor networks, security, software development, embedded systems, data analytics, and Big Data to provide students with the knowledge and tools to develop IoT applications, to analyze and design IoT architectures for different application domains, and to develop data analytic tools to analyze the large amounts of data generated by the massive deployment of IoT devices.

Degree Requirements

Students in the program must complete 32 semester hours of approved coursework with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any one of the three options: coursework option, project option, and thesis option. Specific degree requirements for each of these options can be found under the Program Requirements tab. Although there are some dependencies among the core courses, the program may be started in either the fall or spring semester.

Master's Project and Thesis options must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for a Master's Project or a Thesis need to be submitted at least one month before the start of the semester.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
TELE 6510	Fundamentals of the Internet of Things	4
TELE 6530	Connected Devices	4
Complete two of the following:		8
CSYE 6200	Concepts of Object-Oriented Design	
TELE 6500	Machine Learning for IoT Systems	
TELE 6550	IoT Embedded System Design	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the electives course list below.		16

PROJECT OPTION

Code	Title	Hours
TELE 7945	Master's Project	4
Complete 12 semester hours from the electives course list below.		12

THESIS OPTION

Code	Title	Hours
TELE 7945	Master's Project	4
TELE 7990	Thesis	4
Complete 8 semester hours from the electives course list below.		8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Minimum 3.000 GPA required

Data Architecture and Management, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-daam/>).

Many MS programs in the data area deal with data collection and analysis but do not, however, address a crucial activity that data scientists, data analysts, business analysts, and many software engineers need to perform to make that data valuable—data integration. That activity may also be referred to as data preparation, data curation, application integration, and data engineering based on the integration of use cases and integration persona. The Master of Science in Data Architecture and Management focuses on these activities.

Data systems engineering occurs because data is fragmented and usually scattered across many data sources. However, even if all the data one needed were in one place, there is still an intensive need for integration. Information is data in context and the context of data as collected is different than the many ways it needs to be transformed so as to generate useful information.

The data engineering field could be thought of as a superset of business intelligence and data warehousing that brings in more elements from software engineering. This discipline also integrates specialization around the operation of so-called Big Data distributed systems, along with concepts around the extended Hadoop ecosystem, stream processing, and in computation at scale.

The Master of Science in Data Architecture and Management offers a multitude of courses in data engineering in addition to supplementary courses that are required to deliver the data results in a meaningful way to management. We plan to cover data management, advanced data management, data warehousing and business intelligence, column databases, data science engineering, and Big Data engineering. On the software engineering side, we offer advanced Big Data programming using the powerful Scala language and a course on advanced data science as well as cloud computing. Multithread concurrent computing is also offered as it is important for synchronizing a huge set of servers working in parallel to do large-scale analytics to make things run faster by hundredfold increases in speed. Due to the high-level mathematical operations required to make these programs run, only software engineers can make the necessary mathematical algorithms execute quickly enough to work in these complicated areas and get the finest results.

Degree Requirements

Students in the program must complete 32 semester hours of approved coursework with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three options: coursework, project, or thesis.

Master's project and thesis options must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for a master's project or a thesis need to be submitted at least one month before the start of the semester.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

The data engineering field could be thought of as a superset of business intelligence and data warehousing that brings in more elements from software engineering. This discipline also integrates specialization around the operation of so-called Big Data distributed systems, along with concepts around the extended Hadoop ecosystem, stream processing, and in computation at scale.

The Master of Science in Data Architecture and Management offers a multitude of courses in data engineering in addition to supplementary courses that are required to deliver the data results in a meaningful way to management. We plan to cover data management, advanced data management, data warehousing and business intelligence, column databases, data science engineering, and Big Data engineering. On the software engineering side, we offer advanced Big Data programming using the powerful Scala language and a course on advanced data science as well as cloud computing. Multithread concurrent computing is also offered as it is important for synchronizing a huge set of servers working in parallel to do large-scale analytics to make things run faster by hundredfold increases in speed. Due to the high-level mathematical operations required to make these programs run, only software engineers can make the necessary mathematical algorithms execute quickly enough to work in these complicated areas and get the finest results.

Degree Requirements

Students in the program must complete 32 semester hours of approved coursework with a minimum grade-point average of 3.000.

The master's thesis must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for a thesis need to be submitted at least one month before the start of the semester.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
DAMG 6105	Data Science Engineering with Python	4
DAMG 6210	Data Management and Database Design	4
DAMG 7250	Big Data Architecture and Governance	4
DAMG 7370	Designing Advanced Data Architectures for Business Intelligence	4
Complete 16 semester hours from the electives course list below. (p. 726)		16

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6000 to qualify for co-op experience):		
ENCP 6000	Career Management for Engineers	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Data Architecture and Management, MS (Toronto)

Admissions to this program will open for the 2026-2027 academic year.

For program contact information, please visit this website (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-daam/>).

Many MS programs in the data area deal with data collection and analysis but do not, however, address a crucial activity that data scientists, data analysts, business analysts, and many software engineers need to perform to make that data valuable—data integration. That activity may also be referred to as data preparation, data curation, application integration, and data engineering based on the integration of use cases and integration persona. The Master of Science in Data Architecture and Management focuses on these activities.

Data systems engineering occurs because data is fragmented and usually scattered across many data sources. However, even if all the data one needed were in one place, there is still an intensive need for integration. Information is data in context and the context of data as collected is different than the many ways it needs to be transformed so as to generate useful information.

The data engineering field could be thought of as a superset of business intelligence and data warehousing that brings in more elements from software engineering. This discipline also integrates specialization around the operation of so-called Big Data distributed systems, along with concepts around the extended Hadoop ecosystem, stream processing, and in computation at scale.

The Master of Science in Data Architecture and Management offers a multitude of courses in data engineering in addition to supplementary courses that are required to deliver the data results in a meaningful way to management. We plan to cover data management, advanced data management, data warehousing and business intelligence, column databases, data science engineering, and Big Data engineering. On the software engineering side, we offer advanced Big Data programming using the powerful Scala language and a course on advanced data science as well as cloud computing. Multithread concurrent computing is also offered as it is important for synchronizing a huge set of servers working in parallel to do large-scale analytics to make things run faster by hundredfold increases in speed. Due to the high-level mathematical operations required to make these programs

run, only software engineers can make the necessary mathematical algorithms execute quickly enough to work in these complicated areas and get the finest results.

Degree Requirements

Students in the program must complete 32 semester hours of approved coursework with a minimum grade-point average of 3.000. Students complete a master's degree by pursuing a thesis.

The thesis must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for a thesis need to be submitted at least one month before the start of the semester.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
DAMG 6105	Data Science Engineering with Python	4
DAMG 6210	Data Management and Database Design	4
DAMG 7250	Big Data Architecture and Governance	4
DAMG 7370	Designing Advanced Data Architectures for Business Intelligence	4

Thesis

Code	Title	Hours
DAMG 7945	Master's Project	4
DAMG 7990	Thesis	4

Complete 8 semester hours from the electives course list below.

8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Electives

Minimum 3.000 GPA required

Software Engineering Systems, MS (Arlington)

Website (<http://www.coe.neu.edu/degrees/ms-cse/>)

The software engineering systems program takes a sociotechnical, engineering approach to software. This engineering foundation is designed to enable students to embrace real-world complexity as a golden opportunity, especially for the more technically advanced student. We are committed to shaping our students to be intuitive problem solvers, experienced engineering architects, and result leaders who will have a great impact at the exciting three-way intersection of computer science, engineering, and ethics.

Our program offers a multitude of courses in Big Data engineering and analytics in addition to supplementary courses that are required to deliver the data analytics results in a meaningful way to management. We cover data management, advanced data management, business intelligence, column databases, data science, and Big Data engineering. We offer advanced functional programming using the powerful Scala language and a course on advanced data science as well as cloud computing. Multithread concurrent computing is also offered as it is important for synchronizing a huge set of servers working in parallel to do large-scale analytics to make things run faster by a hundredfold increase in speed. Due to the high-level mathematical operations required to run these programs, only software engineers have the capacity to work in such complicated areas. Only they can make the necessary mathematical algorithms execute quickly enough to get the finest results.

Our engineers become fluent in data science for the sake of building the actual system. They study how to write machine-learning algorithms on top of statistical packages.

- Students study the fundamentals of logical computing formulation and program construction as well as the mathematical modeling and analysis of algorithms—an essential aspect of data science analytics.
- Students study clustering techniques, along with topic modeling and classification and logical regression techniques, as well as Bayesian statistics.
- Students study how to configure and operate a Hadoop environment (large clusters of commodity hardware) and in the process how to integrate data from diverse sources to move and manage data through Big Data platforms (in-house or in the cloud). Data ingestion, the filtering and firing of millions of operations to run over large clusters of commodity hardware, is a software engineering technique that we teach our students how to perform through Scala, multithreading, Spark programming, and “map-reduce” techniques.
- We show students how to make the business case for analytics projects and how to follow an execution road map that involves understanding the architectures underpinning such gigantic platforms as well as the resourcing and cost issues.

Degree Requirements

Students in the program must complete 32 semester hours of approved coursework with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three options: coursework, project, or thesis.

Master's project and thesis options must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for a master's project or a thesis need to be submitted at least one month before the start of the semester.

Program Requirements

Graduate Certificate Options

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Software Engineering Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Software Engineering Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved software design engineering technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to this program's elective requirements.

PROGRAM CREDIT/GPA REQUIREMENTS

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Telecommunication Networks, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-tnet/>).

The Master of Science in Telecommunication Networks is designed for professionals currently in the telecommunications or networking field who either wish to enhance their technical skills and credentials or who wish to make a transition to the business side of telecommunications or networking. We also welcome applications from prospective students with limited industry experience. This program, which may be pursued on a full- or part-time basis, is one of only a very few master's programs in telecommunications and networking in the United States that is truly multidisciplinary, giving students the flexibility to tailor the curriculum to their specific interests, backgrounds, and career goals.

Degree Requirements

Students in the program must complete 32 semester hours of approved coursework with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three options: coursework, project, or thesis. Although there are some dependencies among the core courses, the program may be started in either the fall or spring semester. The three core courses each carry 4 semester hours of credit.

Master's project and thesis options must be carried out under the supervision of a professor and must have prior approval of the program director. Proposals for a master's project or a thesis need to be submitted at least one month before the start of the semester.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Telecommunication Networks with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Telecommunication Networks in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate require 12 semester hours of technical core courses from the telecommunication networks program and 4 semester hours from the technical course list provided for this program. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to this program's elective requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
TELE 5330 and TELE 5331	Data Networking and Lab for TELE 5330	4
TELE 5350	Telecom and Network Infrastructure	4
TELE 5360	Internet Protocols and Architecture	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 20 semester hours from the electives course list below. (p. 736)		20

PROJECT OPTION

Code	Title	Hours
TELE 7945	Master's Project	4
Complete 16 semester hours from the electives course list below. (p. 736)		16

THESIS OPTION

Code	Title	Hours
TELE 7945	Master's Project	4
TELE 7990	Thesis	4
Complete 12 semester hours from the electives course list below. (p. 736)		12

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Electives

Code	Title	Hours
Complete courses from any of the following subject codes:		
CSYE		
DAMG		
INFO		
TELE		

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6000 to qualify for co-op experience):		
ENCP 6000	Career Management for Engineers	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

Minimum of 32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Blockchain and Smart Contract Engineering, Graduate Certificate (Arlington)

The Graduate Certificate in Blockchain and Smart Contract Engineering addresses the rapidly growing and revolutionary field of distributed ledger (blockchain) technology. Companies from different industries are preparing to enhance their business practices through cryptocurrency, decentralized computing, digital security, smart contracts, and more. The certificate program covers blockchain platforms such as Ethereum that bring about transparency and trust to all participants in complex multiparty relationships. The implication is tremendous—from new currency and incentive systems to faster, less expensive, and more efficient transactions of all kinds, from banking to healthcare. Students have an opportunity to learn how blockchain platforms and their underlying trust models will impact the future of legally binding multiparty contracts. In addition, students also have an opportunity to learn how crypto-engineering techniques can be used to create digital trust fabrics that could safely facilitate the movement of any kind of transactions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Broadband Wireless Systems, Graduate Certificate (Boston)

The broadband wireless systems graduate certificate program focuses on the fundamentals of wireless communications, IP networks and protocols, and telecommunications infrastructure as preparation for developing expertise in ongoing developments in mobile networking, broadband wireless communications, and mobile apps.

The four-course graduate certificate requires that two TNET core technical courses be taken along with two other specified courses. With the approval of the certificate director, one of the core courses may be waived with another technical course taken in its place. Mobile Wireless Communications and Networking (TELE 6100) may not be waived under any circumstances.

Note: Master of Science in Telecommunication Networks students are eligible for this graduate certificate.

Engineering Leadership, Graduate Certificate (Boston)

The Gordon Engineering Leadership Program is a transformational, technical, and challenging graduate-level learning experience targeted for engineering professionals.

The Gordon Engineering Leadership Program directed by the Gordon Institute of Engineering Leadership offers a graduate certificate that pairs with over 25 master's degrees in the College of Engineering, College of Science, and Khoury College of Computer Sciences. The Gordon Program is a transformational graduate program designed to build a future corps of engineering leadership professionals.

Pursuing the graduate certificate allows participants to:

- Take part in a hands-on curriculum taught by industry-experienced professors
- Work with peers from across engineering fields on leadership skills development
- Receive one-on-one mentoring from industry experts and faculty

The Gordon Engineering Leadership Program anchors around an intense, market-worthy challenge project based on your organization's strategic needs. This is a unique opportunity to apply your classroom experience in a professional setting, potentially further accelerating your career.

How to Earn a Graduate Certificate in Engineering Leadership

If you already have a Master of Science, then you can complete the one-year program to earn a Graduate Certificate in Engineering Leadership.

If you do not have a Master of Science, then you can still be considered for the Graduate Certificate in Engineering Leadership if you have at least three years of engineering work experience.

Additional information can be found on the Gordon Engineering Leadership Program website. (<https://gordon.northeastern.edu>)

Beyond a Graduate Certificate

Most candidates pursue the Gordon Engineering Leadership Program as part of a Master of Science degree in the engineering discipline of their choice. Upon completion, they earn both a Master of Science degree and a Graduate Certificate in Engineering Leadership.

Students can enroll in the Engineering Leadership Graduate Certificate while pursuing the following degrees:

- MS Advanced and Intelligent Manufacturing (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/advanced-and-intelligent-manufacturing/>)
- MS Biotechnology (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-science/ms-in-biotechnology/>)
- MS Climate Science and Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/climate-science/>)
- MS Computer Science (<https://gordon.northeastern.edu/certificate-and-degree-options/khoury-college-of-computer-sciences/computer-science/>)
- MS Cybersecurity (<https://gordon.northeastern.edu/certificate-and-degree-options/khoury-college-of-computer-sciences/ms-in-information-assurance-and-cyber-security/>)
- MS Data Analytics Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-data-analytics-engineering/>)
- MS Engineering and Public Policy (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-engineering-and-public-policy/>)
- MS Human Factors (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/human-factors/>)
- MS Robotics (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/robotics/>)
- MS Telecommunication Networks (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-telecommunication-networks/>)
- MSBioE Bioengineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-bioengineering/>)
- MSCHE Chemical Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/chemical-engineering/>)
- MSCivE Civil Engineering (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-civil-engineering/>)
- MSCSE Software Engineering Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-computer-systems-engineering/>)
- MSECE Electrical and Computer Engineering (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-electrical-and-computer-engineering/>)
- MSECLE Electrical and Computer Engineering Leadership (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-electrical-and-computer-engineering-leadership/>)
- MSEM Engineering Management (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-engineering-management/>)
- MENE Energy Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-energy-systems/>)
- MEnvE Environmental Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-environmental-engineering/>)
- MSIE Industrial Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-industrial-engineering/>)
- MSIS Information Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-information-systems/>)
- MSME Mechanical Engineering (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-mechanical-engineering/>)
- MSOR Operations Research (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-operations-research/>)
- MSSBS Sustainable Building Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-sustainable-building-systems/>)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
ENLR 5121	Engineering Leadership 1	2
ENLR 5122	Engineering Leadership 2	2
ENLR 5131	Scientific Foundations of Engineering 1	2
ENLR 5132	Scientific Foundations of Engineering 2	2

Medical Software Engineering, Graduate Certificate (Boston)

The Graduate Certificate in Medical Software Engineering at Northeastern University is a pioneering initiative that addresses the evolving landscape of healthcare in the digital age. With a focus on interconnected ecosystems, the program aims to equip healthcare IT engineers with the knowledge and skills needed to navigate the complex web of healthcare services, ensuring patient safety and fostering collaboration among diverse stakeholders. Medical software engineering integrates principles of ecosystem design, systems engineering, zero-trust foundations, collaboration tools, and interoperability/data governance to create a holistic approach to healthcare IT. Students in this program have an opportunity to design and implement effective, ethical, and interconnected healthcare information systems, bridging the gap between technology and healthcare delivery.

Cybersecurity, PhD (Boston)

A research-based, interdisciplinary Doctor of Philosophy (PhD) in Cybersecurity combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Students who choose the PhD in Cybersecurity program have a strong desire to pursue academic research solving critical cybersecurity challenges facing today's society. The PhD program is a natural path for students in the college's Master of Science in Cybersecurity (<http://www.ccs.neu.edu/graduate/degree-programs/m-s-in-information-assurance/>) program who want to pursue research and students with bachelor's degrees and an interest in research-focused careers. Students who pursue careers in advancing the state of the art of cybersecurity have an opportunity to gain:

- A strong technical foundation in cybersecurity and an interdisciplinary perspective based on policy and social science
- A path to a research-focused career coupled with depth in information assurance research at a leading institution, one of the earliest designees by NSA/DHS as a National Center of Academic Excellence in Information Assurance Research, Information Assurance/Cyber Defense, and Cyber Operations
- The opportunity to work with and learn from faculty who are recognized internationally for their expertise and contributions in information assurance from Northeastern University's Khoury College of Computer Sciences, the Department of Electrical and Computer Engineering, and the College of Social Sciences and Humanities
- Access to research projects at Northeastern's research centers focused on security:
 - The Cybersecurity and Privacy Institute (<https://cyber.ccis.northeastern.edu/about/>): The mission of Northeastern's Cybersecurity and Privacy Institute is to safeguard critical technology. Forging partnerships with experts in industry, government, and academia worldwide, the Institute's faculty and students develop, protect, and enhance technologies on which the world relies—from mobile devices and “smart” IoT applications to tomorrow's self-driving cars and delivery drones. Their expertise spans algorithm auditing; cloud security; cryptography; differential privacy; embedded device security; internet-scale security measurements; machine learning; big data; security, malware, and advanced threats; network protocols and security; web and mobile security; and wireless network security.

- The International Secure Systems Lab (<http://www.iseclab.org/>), affiliated with Northeastern, a collaborative effort of European and U.S. researchers focused on web security, malware, and vulnerability analysis; intrusion detection; and other computer security issues.
- The ALERT Center (<http://www.northeastern.edu/alert/>), where Northeastern is the lead institution, a multiuniversity Department of Homeland Security Center of Excellence involved in research, education, and technology related to threats from explosives.

The benefits of the Boston area:

- World-renowned for academic and research excellence, the Boston area is also home to some of the nation's largest Department of Defense contractors and government and independent labs such as MIT Lincoln Lab, MITRE, and Draper Lab.

Degree Requirements

The PhD in Cybersecurity degree requires completion of at least 48 semester hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program, and they will be awarded a master's degree en route to the PhD.

Doctoral Degree Candidacy

A student is considered a PhD degree candidate after completing the core courses with at least a 3.500 GPA, with no grades lower than a B in the core courses, and either publishing a paper in a strong conference or journal or passing an oral exam that is conducted by a committee of three cybersecurity faculty members and based on paper(s) written by the student.

RESIDENCY

One year of continuous full-time study is required after admission to the PhD candidacy. During this period, the student will be expected to make substantial progress in preparing for the comprehensive examination.

TEACHING REQUIREMENT

All cybersecurity PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment or quiz or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

DISSERTATION ADVISING

The doctoral dissertation advising team for each student consists of two cybersecurity faculty members, one in a technical area. When appropriate, the second faculty advisor will be from the policy/social science area.

DISSERTATION COMMITTEE

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD cybersecurity curriculum committee. The four members must include the advisor, two internal members, and an external member.

COMPREHENSIVE EXAMINATION

A PhD student must submit a written dissertation proposal and present it to the dissertation committee. The proposal should identify the research problem, the research plan, and the potential impact of the research on the field. The presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee after the public presentation.

DISSERTATION DEFENSE

A PhD student must complete and defend a dissertation that involves original research in cybersecurity.

AWARDING OF MASTER'S DEGREES

Students who enter the PhD in Cybersecurity program with a bachelor's degree have the option of earning a master's degree from one of the departments participating in the program. To do so, they must meet all of the department's degree requirements.

Program Requirements

Bachelor's Degree Entrance

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Teaching
Qualifying exam and area exam
Annual review
Dissertation proposal
Dissertation committee
Dissertation defense

Core Requirements

A grade of B or higher is required in each core course. A cumulative 3.500 grade-point average is required for the core requirement.

Advanced Entry Program Requirements**Degree Requirements**

Incoming PhD in Cybersecurity students who have already completed a Master of Science in an adjacent field may petition to the graduate program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that advanced entry does not waive by itself any part of the PhD coursework requirements. As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master's degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

Doctoral Degree Candidacy

Refer to the PhD Cybersecurity overview (p. 418) for admission to candidacy requirements.

Residency

Refer to the PhD Cybersecurity overview (p. 418) for residency requirements.

Teaching Requirement

Refer to the PhD Cybersecurity overview (p. 418) for teaching requirements.

Dissertation Advising

Refer to the PhD Cybersecurity overview (p. 418) for dissertation advising requirements.

Dissertation Committee

Refer to the PhD Cybersecurity overview (p. 418) for dissertation committee requirements.

Comprehensive Examination

Refer to the PhD Cybersecurity overview (p. 418) for comprehensive examination requirements.

Dissertation Defense

Refer to the PhD Cybersecurity overview (p. 418) for dissertation defense and completion requirements.

Complete all courses and requirements listed below unless otherwise indicated.

Interdisciplinary Engineering, PhD (Boston)

130 Snell Engineering Center
617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into the interdisciplinary engineering program by an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 470)
- Department of Chemical Engineering (p. 499)
- Department of Civil and Environmental Engineering (p. 514)
- Department of Electrical and Computer Engineering (p. 544)
- Department of Mechanical and Industrial Engineering (p. 612)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department.

The interdisciplinary engineering PhD program requires a commitment from a Northeastern faculty member to serve as the student's primary faculty advisor and chair of their interdisciplinary engineering PhD committee. The primary faculty member is affiliated with the program's administrative home unit unless otherwise approved by the administrative home unit. The PhD advisory committee must be assembled within the first semester of the program, and at least two units must be represented on the committee. The committee must include at least one faculty co-advisor from all participating academic units and otherwise conforms to the rules of the home unit. This committee will be responsible for overseeing the completion

of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

Supplementary Interdisciplinary Engineering PhD Program Forms

Successful application and admission to the interdisciplinary engineering PhD program requires a completed Program Preliminary Study Plan, available on the COE Graduate Student Services Forms website. This form provides a memorandum of understanding for your proposed PhD including the primary departments and advisor(s), a brief description of the planned research, and explanation of the rationale for an interdisciplinary PhD program.

No later than one year postentry into the program, a completed and signed Interdisciplinary Program Plan must be submitted to the Graduate School of Engineering. This individually designed plan includes a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program. This form can be found on the COE Graduate Student Services Forms website.

Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. Successful completion of the total interdisciplinary engineering PhD program depends on meeting department academic milestones and academic expectations.

Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

Program Requirements

Direct Entry

Complete all requirements listed below unless otherwise indicated.

Applied Physics and Engineering, MS (Boston)

The combined MS program in applied physics and engineering allows graduate students to receive training in one of three concentrations of the electrical and computer engineering department while also receiving fundamental graduate-level physics training that is relevant to that area.

Thesis Option

Students may register for an additional two semesters of thesis work. Depending on the affiliation of the thesis advisor, students may register for Thesis (PHYS 7990) for a total of 8 semester hours or 4 semester hours of Master's Project (EECE 7945) followed by 4 semester hours of Thesis (EECE 7990). Thesis credits cannot be substituted for any of the coursework listed above. This option requires a total of 40 semester hours for the master's degree. A thesis committee is composed of an advisor and two faculty members from physics or electrical engineering.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Concentrations

Complete one of the following concentrations:

- Analysis, Modeling, and Computation (p. 558)
- Electromagnetics, Plasma, and Optics (p. 558)
- Microsystems, Materials, and Devices (p. 559)

Optional Thesis

Code	Title	Hours
Select one of the following options based on the college affiliation of the thesis advisor. Thesis coursework will not be applied to other requirements of this degree program. Completion of this thesis option requires a total of 40 semester hours to earn the degree:		8

Option 1 (College of Science thesis advisor)

PHYS 7990	Thesis (completed twice over two semesters)

Option 2 (College of Engineering thesis advisor)

EECE 7945	Master's Project
EECE 7990	Thesis

Program Credit/GPA Requirements

32 total semester hours required (40 with optional thesis)

Minimum 3.000 GPA required

Artificial Intelligence, MS (Boston)

The Master of Science in Artificial Intelligence provides a comprehensive framework encompassing foundational algorithms, theory, and practical applications in the rapidly evolving field of AI. This program offers students the essential knowledge and skills to design, develop, and implement AI systems across various high-demand sectors. The core curriculum is designed to provide in-depth understanding of fundamental AI concepts, forming a solid foundation for both theoretical and practical aspects of artificial intelligence.

Building on this strong foundation, students can delve into advanced AI applications through interdisciplinary concentrations tailored to industry needs. These concentrations include computer vision, continuous process engineering, machine learning, and robotics and agent-based systems.

The master's in artificial intelligence is an interdisciplinary degree offered by Khoury College of Computer Sciences and the College of Engineering. Descriptions of the concentrations offered in this degree are as follows:

- **Computer Vision—College of Engineering**
 - The computer vision concentration offers students the knowledge and skills to drive innovation at the intersection of new and emerging vision systems and AI, through utilizing AI and machine learning solutions for a wide range of applications including image enhancement/restoration, object recognition, navigation, graphics rendering, and pattern classification.
- **Continuous Process Engineering—College of Engineering**
 - The continuous process engineering concentration offers students the knowledge and skills to revolutionize how industrial processes are designed, monitored, and optimized. The program aims to prepare students to utilize AI and machine learning solutions to enhance process efficiency, predictive maintenance, and real-time decision making in industries such as chemicals, pharmaceuticals, and energy. Graduates will be prepared to integrate AI-driven solutions into continuous manufacturing environments to improve safety, sustainability, and productivity.
- **Energy Systems—College of Engineering**
 - The energy systems concentration offers students the knowledge and skills to drive innovation in sustainable and intelligent energy systems. Students examine how to utilize AI and machine learning solutions to support smart energy grid operations, integrate renewable energy sources, and create responsive and resilient systems.
- **Machine Learning—Khoury College of Computer Sciences**
 - The goal of the machine learning concentration is to provide students with practical, hands-on experience in designing, implementing, and optimizing machine learning models for real-world applications. The curriculum positions graduates to pursue roles that leverage AI to drive innovation and efficiency in a wide variety of industries and domains.
- **Robotics and Agent-Based Systems—Khoury College of Computer Sciences**
 - The goal of the robotics and agent-based systems concentration is to provide students with expertise in designing and developing intelligent robotic systems and autonomous agents capable of performing complex tasks in dynamic environments. The curriculum positions graduates to pursue roles that contribute to innovations in automation, human-robot interaction, and intelligent systems design.

Students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their college of admission.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A cumulative GPA of 3.000 or higher is required in the following:

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 5130	Applied Programming and Data Processing for AI	4
DADS 5200 or DS 5020	Mathematics for Machine Learning Introduction to Linear Algebra and Probability for Data Science	4
EECE 5644 or DADS 7275	Introduction to Machine Learning and Pattern Recognition Machine Learning and Data Analytics	4

Concentrations

Complete one of the following concentrations:

- Computer Vision (p. 165)—College of Engineering
- Continuous Process Engineering (p. 165)—College of Engineering
- Energy Systems (p. 165)—College of Engineering
- Machine Learning (p. 166)—Khoury College of Computer Sciences
- Robotics and Agent-Based Systems (p. 166)—Khoury College of Computer Sciences

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

COMPUTER VISION CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Complete 8 semester hours from the following:		8
EECE 5550	Mobile Robotics	
EECE 5554 or ME 5554	Robotics Sensing and Navigation	
EECE 5614	Reinforcement Learning and Decision Making Under Uncertainty	
EECE 5639	Computer Vision	
EECE 5642	Data Visualization	
Complete 4 semester hours from the following:		4
EECE 5645	Parallel Processing for Data Analytics	
EECE 7370	Advanced Computer Vision	
EECE 7397	Advanced Machine Learning	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering

Climate Science and Engineering, MS (Boston)**Overview**

The Master of Science in Climate Science and Engineering is offered jointly by the College of Engineering and the College of Science. The program provides training in the fundamental scientific processes that underpin the structure and dynamics of the climate, as well as the engineering strategies and technologies required for decarbonization and adaptation to climate change.

Incoming students will typically hold a bachelor's degree in a science, engineering, or related field. The program is designed to prepare students for climate-facing positions in the public or private sectors and can serve as a springboard for students interested in pursuing doctoral-level research. Students must take at least 12 semester hours of College of Science courses and at least 12 semester hours of College of Engineering courses, which includes a report, thesis, or coursework option.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Student should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Climate Science and Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Climate Science and Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership (p. 738), 12 semester hours of the certificate coursework may be applied to the restricted elective requirements of this program's coursework option. Of the remaining 20 semester hours required by this program, students must take 12 semester hours of College of Science courses (subject codes EEMB and ENVR) and 8 semester hours from College of Engineering courses (subject codes CIVE, EECE, ENSY, MATL, ME, and SBSY).

The Department of Civil and Environmental Engineering encourages students pursuing the Graduate Certificate in Engineering Leadership (p. 738) to complete their MS coursework requirements in their first year and their certificate requirements in their second year. Students who prefer to complete their certificate requirements in their first year are asked to speak with their MS degree advisor in advance.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. In order to ensure a balance of training across science and engineering, students must take at least 12 semester hours of College of Science courses (starting with EEMB, ENVR) and at least 12 semester hours of College of Engineering courses (starting with CIVE, EECE, ENSY, MATL, ME, SBSY) from the core requirements and restricted elective course options.

Core Requirements

Code	Title	Hours
Complete 20 semester hours from the core requirements listed below (any core course not used to meet this core course requirement can be taken as a restricted elective):		20
CIVE 5150 or ENVR 5150	Climate and Atmospheric Change	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5365	Climate Technologies for Decarbonization, Mitigation, and Adaptation	
CIVE 5366	Air Quality Engineering and Science	
CIVE 5670 or ENVR 5670	Global Biogeochemistry	
CIVE 7110	Critical Infrastructure Resilience	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5800	Climate Adaptation and Nature-Based Solutions	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the restricted electives course list below. (p. 522)		12

REPORT OPTION

Code	Title	Hours
CIVE 7945 or EEMB 8984	Master's Project Research	4
Complete 8 semester hours from the restricted electives course list below. (p. 522)		8

THESIS OPTION

Code	Title	Hours
Complete CIVE 7945 and CIVE 7990 for 8 semester hours or complete EEMB 8984 twice for 8 semester hours:		8
CIVE 7945 and CIVE 7990	Master's Project and Thesis	
EEMB 8984	Research (Completed twice)	
Complete 4 semester hours from the restricted electives course list below. (p. 522)		4

In addition to completing the thesis course, College of Engineering students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Restricted Electives

Code	Title	Hours
CIVE 5280	Remote Sensing of the Environment	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7282	Coastal and Hydraulic Modeling	
CIVE 7385	Public Transportation	
CIVE 7392	Special Topics in Environmental Engineering	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration	
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
ENVR 5210	Environmental Planning	
ENVR 5220	Ecosystem-Based Management	
ENVR 5563	Advanced Spatial Analysis	
INTL 5100	Climate and Development	
LAW 7634	Energy Law and Policy	
LPSC 7312	Cities, Sustainability, and Climate Change	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
ME 5685	Solar Thermal Engineering	
PPUA 5238	Climate Change and Global Urbanization	
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change	
PPUA 5268	International Environmental Policy	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Data Science, MS (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Data Science Core

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Programming with Data		
DS 5110	Essentials of Data Science	4
Algorithms		
CS 5800 or EECE 7205	Algorithms Fundamentals of Computer Engineering	4
Machine Learning		
CS 6140 or EECE 5644	Machine Learning Introduction to Machine Learning and Pattern Recognition	4
Interdisciplinary Capstone		
DS 5500	Data Science Capstone	4

Data Science Concentration Options

Complete one of the following concentrations:

- Computer Science (p. 170)—Khoury College of Computer Sciences
- Engineering Theory and Modeling (p.)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

IE 7270	Intelligent Manufacturing
IE 7275	Data Mining in Engineering
IE 7280	Statistical Methods in Engineering
IE 7295	Applied Reinforcement Learning in Engineering
IE 7300	Statistical Learning for Engineering
IE 7500	Applied Natural Language Processing in Engineering
IE 7615	Neural Networks and Deep Learning

¹ Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional hour, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Data Science, MS—Align (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

The Master of Science in Data Science—Align curriculum is specifically designed to prepare incoming students without any prior programming experience. During the first semester of year one, students are expected to take foundational courses in computer science fundamentals, as well as a course in data structures/discrete mathematics. During their second semester, students will take coursework in programming for data science, as well as linear algebra and probability.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Align Bridge Coursework

Students are required to complete all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
Fundamentals		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
Discrete Structures		
CS 5002	Discrete Structures	4
Programming for Data Science		

DS 5010	Introduction to Programming for Data Science	4
Additional Align Coursework		
DS 5020	Introduction to Linear Algebra and Probability for Data Science	4

Data Science Core

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Programming with Data		
DS 5110	Essentials of Data Science	4
Algorithms		
CS 5800	Algorithms	4
or EECE 7205	Fundamentals of Computer Engineering	
Machine Learning		
CS 6140	Machine Learning	4
or EECE 5644	Introduction to Machine Learning and Pattern Recognition	
Interdisciplinary Capstone		
DS 5500	Data Science Capstone	4

Data Science Concentration Options

Complete one of the following concentrations:

- Computer Science (p. 173)—Khoury College of Computer Sciences
- Engineering Theory and Modeling (p.)—College of Engineering

Program Credit/GPA Requirements

40–48 total semester hours required

Minimum 3.000 GPA required

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Complete 16 semester hours from the following: ¹		16
CS 5100	Foundations of Artificial Intelligence	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision

IE 7280	Statistical Methods in Engineering
IE 7295	Applied Reinforcement Learning in Engineering
IE 7300	Statistical Learning for Engineering
IE 7500	Applied Natural Language Processing in Engineering
IE 7615	Neural Networks and Deep Learning

¹ Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional 1 semester hour, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouv  College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4
CS 6120	Natural Language Processing	4
CS 6140	Machine Learning	4
or DS 5220	Supervised Machine Learning and Learning Theory	

CONCENTRATION IN ENTREPRENEURSHIP—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	

CS 5170	Artificial Intelligence for Human-Computer Interaction
CS 6350	Empirical Research Methods
CS 7390	Special Topics in Human-Centered Computing
GSND 6340	Biometrics of Design

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
Electives		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
Electives		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8
HIST 5241	Exhibits and Museums	
HIST 7250	Topics in Public History (Public History and Slavery)	
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)	

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	

GSND 6350	Data-Driven Game Design
GSND 6460	Generative Game Design

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4

XR and games elective 1		4	
		9	8
Total Hours: 35			

Product Development, MS (Boston)

Product development is in demand across many technology industries and is widely thought to be the engine of innovation. The Sherman Center for Entrepreneurial Engineering Education is uniquely positioned to offer students a combination of product process and technical skills. The mission of the center is to enable interdisciplinary student entrepreneurship in the broadest sense by providing education about tools, concepts, and resources to foster creativity and the ability to develop commercially viable ideas.

Products ranging from smart devices to the Internet of Things to software as a service all require people with product development skills. These positions guide product innovation and lead in crafting products for users. A look at any careers page for any technology firm currently hiring shows many positions open for individuals that have a mix of technical and product development knowledge.

The Master of Science in Product Development program contains a core of courses that span the product development cycle and then allows students to customize the rest of their degree to fit their chosen industry or path. The core courses cover topics such as customer acquisition, technical market analysis, product life cycle, intellectual property, prototyping, iterative development, product design, user testing, and manufacturing.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
GE 5010	Customer-Driven Technical Innovation for Engineers	4
GE 5020	Engineering Product Design Methodology	4

GE 5030	Iterative Product Prototyping for Engineers	4
GE 5100	Product Development for Engineers	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list below. (p. 766)		16

PROJECT OPTION

Code	Title	Hours
GE 7945	Master's Project	4
Complete 12 semester hours from the course list below. (p. 766)		12

THESIS OPTION

Code	Title	Hours
GE 7945	Master's Project	4
GE 7990	Thesis	4
Complete 8 semester hours from the course list below. (p. 766)		8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

COURSE LIST

Code	Title	Hours
Any course in the following list will serve as an elective course, provided the student satisfies prerequisites and program requirements. Students can take electives outside this list with prior approval from the program director.		
College of Engineering		
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
BIOE 5810	Design of Biomedical Instrumentation	
CSYE 6200	Concepts of Object-Oriented Design	
CSYE 6205	Concepts of Object-Oriented Design with C++	
CSYE 7280	User Experience Design and Testing	
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5580	Classical Control Systems	
EECE 5639	Computer Vision	
EECE 5666	Digital Signal Processing	
IE 5617	Lean Concepts and Applications	
IE 5630	Biosensor and Human Behavior Measurement	
IE 6200	Engineering Probability and Statistics	

IE 6500	Human Performance
IE 7200	Supply Chain Engineering
IE 7270	Intelligent Manufacturing
INFO 6660	Business Ethics and Intellectual Property for Engineers
ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5650	Advanced Mechanics of Materials
ME 5659	Control Systems Engineering
TELE 6510	Fundamentals of the Internet of Things
TELE 6530	Connected Devices
D'Amore McKim School of Business	
ENTR 6240	Emerging and Disruptive Technologies
ENTR 6250	Lean Design and Development
INNO 6200	Enterprise Growth and Innovation
INNO 6230	Platform Innovation
MKTG 6200	Creating and Sustaining Customer Markets
College of Arts, Media and Design	
ARTG 5120	Research Methods for Design
ARTG 5310	Visual Cognition
ARTG 5610	Design Systems
ARTG 5640	Prototyping for Experience Design
ARTG 6310	Design for Behavior and Experience
GSND 5110	Game Design and Analysis
GSND 5122	Business Models in the Game Industry
GSND 5130	Mixed Research Methods for Games
GSND 6320	Psychology of Play
GSND 6340	Biometrics of Design
Bouvé College of Health Sciences	
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4

Experiential Courses

Code	Title	Hours
Complete 4 semester hours from the following:		4
CRIM 6600	Justice, Technology, and AI	
EDUT 6150	AI in Education	
HLTH 5800	AI Across the Health Sciences	
IE 5640	Data Mining for Engineering Applications	
JRNL 6460	AI in Media Industries	
MISM 6250	Strategic AI for Business	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

AI Applications, Graduate Certificate (Silicon Valley)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by the College of Engineering and will follow all policies associated with the College of Engineering.

Product Management, Graduate Certificate (Boston)

The Graduate Certificate in Product Management is designed for students with undergraduate degrees in a wide range of fields—including computer science, engineering, economics, business administration, design, and psychology—who want to build the skills necessary for success as product managers. This certificate equips students with the expertise to excel in this dynamic field, whether they are early career professionals, transitioning

into product roles, or looking to differentiate themselves in a competitive job market. The program provides a flexible, cost-effective alternative to a full MS program while offering hands-on learning experiences.

Curriculum and Structure

This interdisciplinary certificate offers a structured yet adaptable curriculum that balances foundational knowledge with practical, industry-relevant skills.

The program consists of four courses (12–13 semester hours total):

- Three core courses covering fundamental concepts across key product management functions
- One experiential course (1 credit) providing hands-on learning opportunities tailored to students' backgrounds and career goals in product management

This certificate allows students to gain real-world experience, develop in-demand skills, and enhance their career opportunities within a streamlined, flexible structure.

Admissions and College Affiliation

Students are admitted to the certificate program through one of the following colleges and follow the academic policies of their home college:

- College of Arts, Media and Design
- College of Engineering
- D'Amore-McKim School of Business
- Office of the Provost and College of Professional Studies¹

This certificate provides a fast, flexible, and practical pathway for students looking to build expertise in product management while benefiting from Northeastern University's strong academic and professional support network.

¹ Program Structure and Transition

- For the 2025–2026 academic year, the Graduate Certificate in Product Management is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern's graduate academic calendar and be governed by the academic policies and procedures outlined in the university's *Graduate Catalog*.
- While designated under the Office of the Provost, students will receive full academic and student support services from the College of Professional Studies including academic advising, co-op and career advising, and access to the International Tutoring Center.
- Beginning in the 2026–2027 academic year, the certificate program will transition fully to the College of Professional Studies. At that time, students will be officially designated under CPS in the academic system of record and governed by its academic policies as outlined in the university's *Graduate Catalog*.

Program Requirements

Requirements

Code	Title	Hours
Fundamental Concepts		
ARTG 5600	Experience Design Studio 1: Principles	4
EMGT 6750 or PDM 6000	Advanced Product Management Foundations of Product Management	3-4
INNO 6409	Innovation Portfolio Management	4
Experiential Course		
Complete one of the following:		1
ARTG 5540	Design and Product Management	
EMGT 6760	Technical Product Management	
INNO 6411	Product Innovation Management	
PDM 6940	Product Analytics	

Program Credit/GPA Requirement

12 total semester hours required (additional hours may be required based on student choice of course options)

Minimum 3.000 GPA required

Graduate Certificate Programs

The College of Engineering offers numerous graduate engineering certificates for professionals at every career stage. These certificates may be completed as stand-alone credentials or in combination with a graduate degree. They typically consist of 16 to 20 semester hours and allow the learner to quickly gain a credential to advance their skills and knowledge, meet an emerging career market need, or add to their professional preparation. In many cases, graduate coursework completed as part of a certificate program may be applied toward a graduate degree in the College of Engineering. Whether you are a working professional seeking new career opportunities, or a full-time graduate student looking to enhance your credentials, our broad and continuously expanding range of certificates are ready to help move your preparation forward.

Programs

The College of Engineering offers numerous graduate certificates that may be completed alone or in combination with an MS degree. Please see Certificates Policies and Procedures (p. 464) for detailed information regarding College of Engineering graduate certificates.

BouveOGSS@northeastern.edu (BouveOGSS@northeastern.edu)

The Bouvé College of Health Sciences strongly supports the mission of Northeastern University as a practice-oriented, student-centered, experiential research institution. The college is committed to the goals of the university, which include excellence in education, research, scholarship, clinical practice, experiential learning, access to educational opportunities, and a strong professional orientation.

Bouvé offers students an education in health, health profession fields, and public health that features a curriculum of highly relevant, closely integrated, basic and applied courses in the physical, biological, behavioral, social, environmental, and health systems sciences. Students engage in interprofessional patient care, interdisciplinary translational research, and experiential learning opportunities through service-learning, research, and global experiences.

Bouvé leverages interdisciplinary and interprofessional collaboration to tackle the world's most pressing health challenges. The college seeks to prepare students to become clinicians, researchers, and leaders in healthcare and in the promotion of health of individuals and populations.

Students are provided a broad range of services and programs to ensure their academic success and professional development. Faculty are deeply committed to student success, as students interact with world-class healthcare and educational institutions nationally and globally, to advance health for all.

See Bouvé College Academic Policies and Procedures (p. 772).

Academic Policies and Procedures

Northeastern University has published Regulations and Requirements for all graduate programs here.

Program Status and Progression

All degree requirements must be completed within seven years of matriculation, although individual academic programs may require completion in a shorter time frame. Each student is responsible for reviewing the requirements for their particular program. A student's failure or inability to register does not extend the amount of time allowed to complete the program. Students should be registered by the first week of each semester (fall, spring, and, where indicated, summer). Course credits earned in programs of graduate study are valid for a maximum of seven years. A student may request an extension of these time frames from the program director and the Bouvé associate dean for academic affairs.

In order to progress in clinical courses that are sequenced, a student must receive a passing grade in all prior courses in the sequence. In the event that a student fails a clinical course that is not part of a sequence, progression is at the discretion of the student's academic advisor and/or the program director. When a student fails a clinical course that is part of a sequence of courses, the course instructor must notify the Bouvé Office of Student Services. Course material related to the student's failure (e.g., examination reports, clinical reports) must be made available to the student for review.

Annual Review for PhD Students

The academic progress of each PhD student will be evaluated through an annual review. A copy of each review shall be submitted to the student and the graduate office. If the annual review reports that a student is not making sufficient academic progress, the PhD student will be placed on academic probation. After two consecutive semesters on academic probation, the student may be dismissed from the program. See additional requirements that apply to PhD programs here.

Conditional Acceptance

A student who is accepted conditionally to a graduate program at Bouvé College of Health Sciences must meet the conditions set in the acceptance letter before matriculating into the program. Examples of conditions include receipt of official verification of previous degree completion, completion of missing prerequisite courses, receipt of a missing recommendation, receipt of standardized test scores, and translation of international documents. Students who fail to meet the conditions of their acceptance may be subject to program dismissal.

Admission as a Special Student

Special students are enrolled on a part-time basis (for no more than 6 semester hours per semester) and may accumulate a maximum of 12 semester hours over time. Students interested in taking more than 12 semester hours must make a formal application to a degree program through Northeastern's online application portal (<https://bouve.northeastern.edu/admissions/graduate-admissions/>). Special students who do not register for four consecutive semesters (excluding summer semesters) will be subject to review and possible withdrawal by the Bouvé College of Health Sciences Office of Student Services. Please note, some courses require approval before registration.

Program Extension Procedures

Students may seek an extension to complete their program of study only under documented extenuating circumstances. To request an extension, the student must submit the Graduate Program Status Change form along with an action plan to complete the degree requirements to the program director with a copy to the Bouvé Office of Student Services for approval.

Leave of Absence and University Withdrawal

Refer to Leaves of Absence and University Withdrawal in this catalog for more information and policies on leaves of absence and university withdrawals. Individual programs may have additional procedures related to leaves of absence. Consult the program's overview and requirements page in this catalog in addition to the information above. Faculty members are not responsible for notifying the university of a student's withdrawal. For information concerning refund policies, please refer to the Student Financial Services refund page here (<https://studentfinance.northeastern.edu/policies-procedures/refunds-from-credit-balances-withdrawals/>).

Course Substitution

A student must obtain approval from their program director to substitute a course. The student must provide official transcripts of completed coursework, accompanied by the respective course syllabi, to their program director. Substitutions will only be made for courses of equivalent credit hours. Once informally approved, the program director must submit a Course Substitution form for processing.

Transfer Credit

For general regulations concerning transfer credit in Northeastern's graduate degree programs, please visit Regulations and Requirements for All Graduate Degree Programs.

Students who wish to take a course for transfer at another institution while enrolled at Bouvé should first receive preapproval from their academic advisor and the Bouvé Office of Student Services. Transfer credits from other institutions (or other programs within the university) will only be accepted at the discretion of the student's program. The Graduate Petition to Transfer Credit form can be found at the Office of the University Registrar.

A Bouvé student may not complete coursework at another institution during their last term intending to transfer that credit back to Northeastern to complete the program.

Academic Standing

Academic standing in Bouvé is determined by the student's cumulative grade-point average and performance in required academic and clinical courses. All Bouvé students are expected to maintain a cumulative GPA of 3.000 each semester to remain in good academic standing and to progress toward graduation. Students who do not maintain a cumulative GPA of 3.000 each semester will be placed on academic probation—see below.

Each program has its own minimum grade requirements. Please review the program's requirements page in this catalog for details.

Graduate Student Academic Petitions

Students must submit a petition to their program's academic standing committee, graduate committee, or program director (as applicable) to request:

- A leave of absence.
- A transfer or waiver of credits or preapproval for the course to be taken for transfer (see Graduate Petition to Transfer Credit).
- Directed study (see Individual Instruction Registration).
- A waiver of policy (see department-specific appeal form (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Bouv%C3%A9-Student-Forms.aspx>)).
- A change in program, program status (e.g., full-time to part-time or vice versa), adding or removing concentration, program extension, or change of graduation date. Students should discuss with the program director and the program director will submit a Graduate Program Status Change form.
- A different course of action regarding their academic standing, progression, probation, or dismissal (see department-specific appeal form (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Bouv%C3%A9-Student-Forms.aspx>)).

The petition must include all relevant information. Students may be required to provide extra documentation, such as official transcripts and/or course descriptions. A copy of this action is filed in the student's permanent record in the Bouvé College of Health Sciences Office of Student Services.

Academic Probation Policy

Academic probation is a period of time when a student must address and remediate academic deficiencies.

A Bouvé graduate student may repeat a course only once to achieve a passing grade and may repeat only two courses during the entire program of study. A student may be on probation for only two semesters, or until the course is offered again, unless the advisor approves an action plan that specifies a longer (but definite) period. A student may only be placed on probation twice during enrollment in Bouvé and must correct all deficiencies, as specified, in each respective action plan during the applicable probationary period. Failure to remediate the deficiency within the agreed time may result in dismissal from the program. During the period of probation, the student must earn a GPA of 3.000 or better each semester, or the student is subject to dismissal from Bouvé. Note that individual graduate programs may have additional requirements that must be included in the probation action plan.

A student will be removed from academic probation after having attained a cumulative GPA of 3.000, earned a passing grade in a repeated course, and/or demonstrated satisfactory performance in a clinical course.

Collegewide Academic Probation Procedure

Academic standing is determined at the conclusion of every term, and students on academic probation are notified via email.

Students on probation are required to meet with their advisor before the end of week 2 of their probationary semester to complete an Academic Probation Contract (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Bouv%C3%A9-Student-Forms.aspx>).

Once the contract is completed and signed, students are required to submit it to both their program and their Student Services designee, no later than the end of week 3 of the probationary term. Failure to submit an Academic Probation Contract in a timely manner may result in dismissal from the college.

The program will review the student's contract and provide any additional feedback or recommendations for the student and return a signed copy to the student.

Advisors will meet with students on academic probation throughout the semester to benchmark progress and assess compliance with the contract during weeks 4, 10, and 12.

A review of the student's progress will occur at the end of the term.

- If a student returns to good standing, they will no longer be on academic probation.
- If a student does not return to good academic standing, their compliance with their contract will be reviewed:
 - If a student was compliant with the contract, they will be required to submit a second Academic Probation Contract to the unit.
 - If a student did not comply with the contract, they may be dismissed from Bouvé with an option to appeal.

Academic Dismissal

A student may be dismissed from a graduate program when they have failed to maintain academic requirements or have violated a policy that specifies immediate dismissal. All students shall have an opportunity to correct academic deficiencies during an appropriate probationary period before dismissal is instituted, except when the policy specifies "immediate dismissal."

Students may be subject to dismissal from a program under the following conditions. (*Note:* Additional requirements that are not included in this list, but are specific to the student's major, may also apply.)

- The student exhibits unethical behavior or misconduct in their academic program, practicum, internship, or research.
- The faculty instructor and/or the clinical supervisor determines that the student has demonstrated unsafe or inappropriate behavior in a clinical setting.
- The student does not register for at least one class for two consecutive semesters and does not have an approved leave of absence.
- The student has a cumulative GPA below 3.000 at the end of the probationary period specified by the action plan.
- The student does not demonstrate satisfactory performance in achieving the objectives of a clinical course.
- The student fails to meet all the requirements of the program within the specified time limit mandated by the program and has not been approved for a formal extension.
- The student in a PhD program fails to successfully complete the PhD qualifying/comprehensive exams successfully as stipulated by the program.
- The student fails to progress satisfactorily in research or fails to identify a committee for their thesis or dissertation within the time specified by the policies of the specific program.
- The student has failed to file an action plan within one month of notification of probation.
- The student has failed to meet the requirements of the action plan including any requirements specific to the student's major.
- The student has failed three courses or has failed the same course twice.
- The student has failed to make progress toward degree completion.

DISMISSAL PROCEDURES

Dismissal of a student from a program is initiated by the program director once the basis for the dismissal is provided to and reviewed by the Bouvé Office of Student Services. The program director will then notify the student of the dismissal. When a student is dismissed from the university, they are not permitted to remain registered for courses in the immediate next academic term. If the university dismissal is successfully appealed, a student may register for classes in the following academic term.

Collegewide Appeals

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic, professional code of conduct, or cooperative education decision may petition to appeal the decision.

Details about the process for undergraduate students may be found in Academic Appeals Policies and Procedures (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/academic-appeals-policies-procedures/>) in the undergraduate section of this catalog, supplemented by the college-specific policies and procedures below.

Details about the process for graduate students may be found in Academic Appeals Policies and Procedures (p. 133) in the graduate section of this catalog, supplemented by the college-specific policies and procedures below.

For appeals of decisions concerning academic standing, progression, or co-op, students should discuss their concerns with the academic advisor and prepare an appeal statement for submission to the unit level as shown in the step below. Bouvé undecided students should begin at Step 2, below.

For appeals concerning a course grade, students should discuss their concerns with the course instructor offering the course as outlined in the University Academic Appeals Policies and Procedures (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/academic-appeals-policies-procedures/>). If the concern remains unresolved after these conversations with your faculty, the student should prepare an appeal to the department chair or school dean level—see Step 2, below.

For appeals concerning a professional code of conduct determination (when applicable to a student's program or major), the student should follow the process outlined in the Bouvé College of Health Sciences Code of Professional Conduct policy (in the graduate (p.) and undergraduate (<https://catalog.northeastern.edu/undergraduate/health-sciences/academic-policies-procedures/#:~:text=Bouv  College of Health Sciences Code of Professional Conduct>) sections of this catalog).

Disability Access Services (<https://disabilityaccessservices.northeastern.edu/>) provides an appeal process for students with disabilities who believe their accommodation requests were unduly denied. Appeals arising from allegations of discrimination or harassment on the basis of a protected category should be referred to the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>). For appeals concerning student conduct, including academic integrity, please refer to the process outlined in the University Code of Student Conduct.

If the concern remains unresolved after informal discussions or if the concern pertains to a determination as outlined above, the student should prepare and submit an appeal statement. Students are encouraged to work with their advisor to complete the necessary forms.

STEP 1: BCHS UNIT-LEVEL APPEAL

When appealing a decision to the unit level, students should submit a request to appeal linked here (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Bouv%C3%A9-Student-Forms.aspx>) and submit the appeal statement within 28 calendar days from the day when the academic determination is made available to the student. The unit-level Academic Standing Committee must provide the student with a written report of the finding(s) and decision within 10 business days according to their established procedures.

STEP 2: DEPARTMENT CHAIR- OR SCHOOL DEAN-LEVEL APPEAL

Appeals of course grades should be requested with the College Grade Appeal form linked here within 28 calendar days of the posting of the grade in question. If the student believes they have been erroneously, capriciously, or otherwise unfairly treated with a unit-level committee's decision, they may pursue a secondary appeal to the next level as specified below:

School of Clinical and Rehabilitation Sciences: Department chair of the unit offering the course or major/program

School of Community Health and Behavioral Sciences: Department chair of the unit offering the course or major/program

School of Nursing: School dean

School of Pharmacy and Pharmaceutical Sciences: School dean

Bouv  Undecided: BCHS associate dean of academic affairs

The student must request the appeal by contacting the specified office in writing via the school dean/department chair-level appeal form (see Higher Level Appeals forms (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Bouv%C3%A9-Student-Forms.aspx>)) within 10 business days of receiving the report from the previous step. After consideration, the department chair or school dean, or their representative, shall provide the student and involved faculty member with a written report of their finding(s) and decision within 10 business days of receiving the appeal request.

STEP 3. COLLEGE-LEVEL APPEAL

If the student is not satisfied with the disposition of the matter at the previous step, they may proceed with the appeal to the college dean's office through the BCHS Academic Affairs Committee (AAC). The BCHS AAC hears cases that have been unsatisfactorily resolved at the prior school and unit levels for "students who believe that they have been erroneously, capriciously, or otherwise unfairly treated" or may directly hear appeals concerning course grades or when a unit does not have a unit-level committee. For all college-level appeals, the student must request an appeal hearing in writing via the Academic Affairs Committee Appeal form (see Higher Level Appeals forms (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Bouv%C3%A9-Student-Forms.aspx>)) within 10 business days of receiving the report from the previous step.

Processes for College-Level Appeals to the BCHS AAC:

- Students wishing to bring an appeal before the college AAC should first consult with their appointed academic advisor, or when the appeal involves the academic advisor, with the assistant dean of student services.
- The chair of the college AAC will convene the college appeals panel from among the regular members of the BCHS AAC. The appeals panel will include three voting members of the BCHS AAC that appropriately represent the breadth and depth of programs within the college. At minimum, two schools will be represented on the panel and at least one member who teaches within a similar degree-level program. Members of the panel shall have no known conflicts of interest with the student. The assistant dean of student services and the chair of the AAC will attend the appeal panel hearing as nonvoting members.
- A chair for the college appeal panel shall be selected from among the panel members and is responsible for producing a formal recommendation of the committee for communication to the college dean.
- The chair of the AAC will be responsible for scheduling the meeting, notifying the student and other participants in a timely manner so they may attend, and keeping and archiving records of the proceedings according to committee procedures.
- The chair of the college appeal panel will notify the college dean of the committee's findings and recommendation. The college dean will have the final decision.
- The college dean will notify the student and other relevant parties of the decision in writing no later than 10 business days after receiving the appeal request.

STEP 4. UNIVERSITY-LEVEL APPEAL

Some determinations may be appealed beyond the college level. Refer to the undergraduate and graduate appeals processes linked above for more information. Decisions concerning admission or readmission into a major or program, dismissals, and matters related to co-op employment (other than grades received) cannot be appealed beyond the college level. Please note, while major or program dismissals cannot be appealed beyond the college level, underlying academic judgments that led to a dismissal may be.

Graduation Policies**PROGRAMS THAT INCLUDE COMPLETION OF A THESIS**

Students completing a thesis as part of the program's academic requirements are required to complete the following at least five business days before the final grade submission deadline for the academic term:

- Upon successful defense of the thesis, the student must have the Thesis Approval form signed by the members of the thesis committee and approved by a representative from the Bouvé Office of Student Services.
- Students must submit an electronic copy of the thesis to ProQuest, following the directions outlined on the University Library website.

COMPLETION OF PHD PROGRAMS

The PhD hooding and degree conferral ceremony is only held during the spring semester. A PhD student may not participate in the ceremony until they have successfully defended their dissertation and completed all academic requirements.

Students completing a dissertation must complete the following at least five business days before the final grade submission deadline for the academic term:

- Upon a successful defense of the dissertation, the student must have the Dissertation Approval form signed by the dissertation committee members.
 - The student must submit an electronic copy of the dissertation to ProQuest, following the directions outlined in the University Library website.
 - The student must complete the PhD Exit form, at which time the Dissertation Approval form will be approved.
-

Bouvé College of Health Sciences Code of Professional Conduct

All students are expected to adhere to the Northeastern University Code of Student Conduct (p. 96). Additionally, students in the following schools or departments are expected to adhere to the Bouvé College of Health Sciences Code of Professional Conduct as described below:

Department of Applied Psychology (all programs)

Department of Communication Sciences and Disorders (all programs)

Department of Medical Sciences (all programs)

Department of Physical Therapy, Movement, and Rehabilitation Sciences (all programs)

School of Nursing (all programs)

School of Pharmacy and Pharmaceutical Sciences (all programs)

Healthcare and research professionals are required to adhere to rigorous standards of professional behavior. Bouvé emphasizes professionalism as part of the academic experience, ensuring that students graduate with adequate knowledge, skills, attitudes, and behaviors necessary for professional practice as healthcare and/or research team members.

Students are expected to demonstrate professional behavior in all academic, experiential (including clinical, cooperative education, and research), and extracurricular settings and activities, on and off campus. This Code of Professional Conduct applies to any situation affecting a student's fitness for continued enrollment or entry into professional practice.

Students must comply with the Northeastern University Code of Student Conduct (p. 96) and all other published university, college, and clinical or program policies. In addition, students in the abovementioned Bouvé departments or programs are expected to adhere to the following list of expected professional behaviors. By adhering to these expectations, students will contribute to a professional and respectful environment that fosters learning, collaboration, and the highest standards of academic and professional excellence:

SELF-GROWTH AND CARE

- Address and correct inappropriate behavior.
- Be open to and actively seek constructive feedback to improve performance.
- Demonstrate awareness of one's limitations.
- Display willingness to implement recommendations from faculty and others to enhance learning and performance.

ACCOUNTABILITY, INITIATIVE, RESPONSIBILITY, AND SENSE OF DUTY

- Show initiative and accountability in academic and professional roles.
- Collaborate effectively within healthcare and research teams.
- Exhibit a strong sense of duty and responsibility in all professional undertakings.
- Establish and maintain appropriate boundaries with patients, family members, community-based mentors, students, faculty, and staff.
- Complete tasks and responsibilities in a timely and reliable manner.
- Obtain permission before bringing family members, guests, and/or pets to the learning/research environment or professional academic activities.

RESPECT FOR OTHERS

- Respect the rights of others in both academic and professional settings while demonstrating compassion and respect in interactions with others.
- Demonstrate respect for all individuals, regardless of race, gender, religion, sexual orientation, age, or socioeconomic status.
- Demonstrate cultural humility with openness and responsiveness to the ethnic and cultural backgrounds of others.
- Respond to patient or participant needs in a timely, safe, and effective manner.
- Participate in a manner that is respectful and conducive to learning.
- Avoid causing disruptions that make it more difficult for others to learn and work.

PROFESSIONAL APPEARANCE

- Dress appropriately for professional settings, including patient care and research environments.

INTEGRITY AND TRUSTWORTHINESS

- Maintain the highest level of integrity during all academic, nonacademic, research, and extracurricular activities.
- Uphold the confidentiality rights of patients/clients and/or participants in accordance with university policy and the Health Insurance Portability and Accountability Act and other relevant laws and policies.
- Provide accurate and truthful information and operate within the scope of one's role and responsibilities in all academic, professional, research, and administrative settings.
- Act in the best interest of patients and patient safety.
- Establish and maintain appropriate rapport and show sensitivity to the needs, values, and perspectives of patients, family members, caregivers, and research participants.
- Respect privacy and property while ensuring clinical and research integrity.

TEAMWORK AND PROFESSIONAL DEMEANOR

- Demonstrate sensitivity to the needs and requests of team members, mentors, and faculty.
- Demonstrate the ability to collaborate with students, faculty, and staff in various settings.
- Exhibit professional demeanor and behaviors that support teamwork and collaboration.
- Demonstrate adaptability and flexibility in various environments.
- Receive constructive criticism with curiosity, intentionality to take action for improvement, and to do so without defensiveness.

SCHOLARSHIP AND COMMITMENT TO EXCELLENCE

- Avoid use of professional position for personal gain.
- Demonstrate behaviors that promote and reflect commitment to academic excellence and scholarly pursuits.

COMMUNICATION

- Address (oral and written) faculty, staff, students, preceptors, practitioners, or patients in a professional, respectful, and considerate manner.

Experiential Education Policies**BACKGROUND CHECKS**

Clinical education sites require background checks and/or drug screenings for employees, as well as for students who come to their facilities. All Northeastern University students will need to have background checks/drug screenings completed if their assigned clinical placement requires it. The college contracts with third-party vendors (such as Universal Background Screening, American DataBank, etc.) to perform these checks and screenings. These companies charge fees to conduct background checks/screenings, depending on the type of background check/screening needed. Students are responsible for any fees charged by companies conducting background checks/screenings.

All background check information is confidential. Results are posted to the company website in a secure, protected environment. A student may view their results online using a password. A student will be contacted by their program director, chair, or assistant dean if there is a question about the results. Neither a student nor the company is required to reveal the actual results of the background check to the clinical site. However, a student may be unable to be placed at that clinical site based on the site's requirements.

If an assigned clinical site requires a student to have a background check/screening, the on-campus clinical coordinator/clinical placement office will post the requirements and provide instructions and a deadline for completing the check. To ensure adequate processing time prior to the start of the clinical experience, it is crucial that the check be completed in advance of the deadline given. Failure to complete the check in a timely manner could jeopardize progression in the academic program.

HEALTH REQUIREMENTS

Students must comply with any universitywide health requirements (<https://catalog.northeastern.edu/undergraduate/information-entering-students/health-requirements-uhcs/>).

As a condition of matriculation at Northeastern, all students are required to submit the completed University Health Report form. Consult the UHCS website (<https://uhcs.northeastern.edu/forms/university-health-report/>) for instructions and deadlines to submit the University Health Report form. UHCS may block the registration of those students who do not file the required form(s).

Clinical Clearance

Based on clinical education site requirements and associated clinical affiliation agreements, some programs in the Bouvé College of Health Sciences will require additional medical documentation and health certification. Additional requirements may include, but are not limited to, exam or statement of good health prior to registration, annual proof of physical examination, and/or proof of additional immunities. This "clinical clearance" may be required by some programs prior to engaging in clinical, internship, or fieldwork. Students who do not meet these prerequisites may be unable to participate in required clinical experiences, which could impact their ability to progress in the program and complete all graduation requirements.

LIABILITY INSURANCE

Students on clinicals, clinical practicum, or clinical internships, under a clinical agreement with Northeastern, are covered by Northeastern's liability insurance program for claims arising out of the student performing assigned duties in the scope of their studies. Students should consult their clinical placement office, program director, and program policies for more information about liability insurance. If students have questions about their placement and the insurance provided, they may contact Risk Services (<https://risk-services.sites.northeastern.edu/>).

REQUIREMENTS FOR CLINICAL, INTERNSHIPS, AND PRACTICUM COURSES

- Some Bouvé programs require courses with clinical, internship, or fieldwork components. Such components are offered at affiliated hospitals, clinics, schools, medical facilities, or other institutions and involve contractual agreements with these institutions or sites.
- Some Bouvé programs have cooperative education requirements. Students secure co-ops through a job search process and are employees of an institution while on co-op. Co-op students are subject to the policies, procedures, and requirements of their employers.
- Northeastern is affiliated with numerous clinical sites across the country and around the world. Depending on the program, students may be required to travel outside of Massachusetts to complete clinical courses. Students are responsible for any costs associated with transportation and/or housing.
- Evaluation for clinical courses will be based on established guidelines and policies that students will receive prior to and/or during the clinical component. Periodic performance evaluations will take place during the course of the academic term. See specific program clinical policies and procedures, handbooks, or course syllabi for details.
- In order to enroll students in university-sponsored accidental injury insurance, elements of students' demographic information (including date of birth, address, and phone number) will be communicated via a university-contracted third-party clinical database to Risk Services and to the company providing the coverage. In addition, programs may use elements of a student's demographic information in the process of site onboarding. Students may refer to the university privacy policy (<https://www.northeastern.edu/privacy-information/>) and contact their program director or clinical placement office for more details.

Student Conduct

- Students assigned to an institution or site for instruction are expected to adhere to the rules and regulations of that institution. Failure to adhere to these rules may result in dismissal from that institution or site.

- Students should be aware that, while participating in any form of clinical practice, they continue to be under the jurisdiction of the university. Any breaches of conduct committed by a student in a clinical setting that would be a violation of the Northeastern University Code of Student Conduct (p. 96) or Bouvé College of Health Sciences Code of Professional Conduct (in the graduate (p.) and undergraduate (<https://catalog.northeastern.edu/undergraduate/health-sciences/academic-policies-procedures/#:~:text=Bouvé College of Health Sciences Code of Professional Conduct>) sections of this catalog), if applicable, shall also be considered a cause for disciplinary action against the student.
- All students are required by federal and state law to respect the confidentiality of the patients' and/or students' records under the Health Insurance Portability and Accountability Act and/or Family Educational Rights and Privacy Act, respectively, to which they may be privy. This includes, but is not limited to, patient/student identity and identifiers, diagnostic tests performed, medical history, special needs, and medications prescribed. For more information, students should contact their on-campus clinical education coordinator and/or clinical education site coordinator.

Health Clearance, Background Check, and Training Requirements

- Evidence of health clearance is required for experiential courses (including clinicals, internships, and practicums) in their field of study.
- Students must meet the health clearance requirements of their academic program and any site-specific requirements prior to entering the clinical setting. This means that students must make arrangements for their physical exams and immunizations months before they are scheduled for a clinical course or rotation. Students who do not present the appropriate health certification will be prohibited from attending a clinical course or rotation until satisfactory evidence is provided. Students who do not meet site-specific requirements may not be able to pass a clinical course and risk their ability to complete the degree program.
- Some programs use clinical clearance software packages (such as Exxat, Complio, or CastleBranch) to ensure compliance with health clearance requirements. In these cases, students are responsible for software account fees. Fees will be paid by the student directly to the software company, from the individual program's clinical placement office. Guidelines are updated periodically, and students must meet the most current guidelines or they will not be allowed into a clinical area.
- School of Nursing students must provide evidence of health documentation utilizing an immunization tracker in order to ensure that documents are updated on a yearly basis. All fees required for the immunization tracking will be paid by the student directly to the tracking service.
- In preparation for clinical education experiences, all students will complete on-site training in universal precautions and safe practices offered by the Office of Academic and Research Safety (<https://oars.northeastern.edu/>) or training vetted and approved by the Office of Environmental Health and Safety and offered by their program. Students must also complete an annual online refresher course in blood-borne pathogens exposure.
- Students may be required to complete background checks/drug screening prior to engaging in clinical, internship, or fieldwork courses as outlined above (p. 778).

Policies for International Students

- International students must consult with the university's Office of Global Services (<https://international.northeastern.edu/ogs/>) before enrolling in clinical, internship, practicum, off-campus directed study, co-op, or capstone courses in order to discuss proper documentation for these curriculum requirements (see also F-1 Curricular Practical Training (<https://international.northeastern.edu/ogs/employment/off-campus-employment/f-1-curricular-practical-training/>)).
- Graduate international nursing students must have a current U.S. nursing license.

Academic, Professional, or Research Misconduct

The healthcare professions represented by the programs in Bouvé College require more of their members than simple mastery of technical knowledge and skills. Equally important is the ability to earn the respect and confidence of those who seek medical care. The nearly universal existence of codes of conduct and standards of professional ethics and behavior in these disciplines is evidence that certain types of conduct are expected in order to promote this respect and confidence. Fundamental to most of these codes is an understanding that healthcare professions require individuals who conduct their activities in a manner that reflects a total concern for the well-being of the patient. Violations of ethical conduct may be grounds for dismissal from the program. Students are expected to learn and practice the conduct that is appropriate to their professions and promotes the physical and mental well-being of the patient.

Bouvé students are expected to adhere to the highest academic and professional standards. The Northeastern University Code of Student Conduct (p. 96) sets forth the university's expectations of behavior that promotes the safety and welfare of the Northeastern community and defines various aspects of academic misconduct, such as cheating and plagiarism. Lack of knowledge of these definitions does not negate the student's responsibility for upholding them. Academic misconduct is regarded as a serious violation of ethical standards and may result in the student's immediate dismissal from the program.

Failure to meet these standards, including misconduct in academic, professional, or research activities, will result in disciplinary action. Such actions may include a lowered or failing grade in the course, probation, suspension, or immediate dismissal from the program. Students found responsible for academic, professional, or research misconduct will have a letter placed in their permanent file stating the pertinent findings of their case.

In addition to maintaining complete honesty in all academic work, students admitted to clinical or professional programs in Bouvé College are expected to familiarize themselves with the code of ethical conduct of the professional discipline they are entering and to agree to uphold these principles.

Similarly, students who participate in research programs are expected to familiarize themselves with the code of ethics in research. Such a code is outlined in *Guidelines for the Conduct of Research*. Ethical codes of conduct for researchers are also presented in the National Academy of Sciences' (<https://www.nap.edu/catalog/12192/on-being-a-scientist-a-guide-to-responsible-conduct-in/>) *On Being a Scientist, A Guide to Responsible Conduct in Research*. Violations of research ethics can include, but are not limited to, falsification or fabrication of data, plagiarism, malicious allegations of

misconduct in science, covering up or failing to report misconduct, obstructing due process in investigations of misconduct, and reprisals against those revealing misconduct.

See also the "Scientific or Research Misconduct" section of the Academic Appeals Policies and Procedures (p. 133) page in this catalog.

- Patient Safety (Boston) (p. 815)

Network Science, PhD (Boston)

The PhD in Network Science program aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is a multidisciplinary program, with members of the Northeastern University Network Science Institute (<https://www.networkscienceinstitute.org/>) representing a range of fields including computer science, information science, physics, complexity, sociology, communication, data visualization, organizational behavior, political science, population health, and epidemiology.

This doctoral program is a joint collaboration across five academic colleges. Students are admitted to the College of Social Sciences and Humanities and may choose to move to the home college of their dissertation advisor after they reach candidacy (once they pass their dissertation proposal/comprehensive exam). Students follow policies of their home college, including dissertation format and submission deadlines for graduation. Faculty supervisors may be from one of the following Northeastern academic colleges:

- College of Science
- College of Social Sciences and Humanities
- Khoury College of Computer Sciences
- Bouvé College of Health Sciences
- College of Arts, Media and Design

Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of elective courses relevant to the student's area of research. Electives should be discussed with the student's faculty advisor. A minimum of 40 semester hours of coursework is required, though the faculty advisor or program committee may recommend additional coursework based on student research skills.

Alternative Course Path

Students have the option to complete core coursework in their first year of study. This curriculum pathway is expected to be taken by students whose admitting advisor is located outside of the Boston campus and elsewhere in the Northeastern network.

Annual Review

A review of satisfactory progress will be ongoing and formally evaluated at the end of each academic year. Students must maintain a cumulative grade-point average of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain a 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for dismissal by the graduate program committee.

As part of the annual review process, the students will be asked to submit a summary of completed and future courses and research. Students will submit to the program committee:

- A list of courses completed in the last academic year and course plan for the following year
- A short synopsis of their research progress and research plans for the next year

Qualifying Examination

The qualifying exam is an hour-long oral examination of the material covered in the core curriculum and consists of questions selected by network science faculty. One month prior to the exam., students receive between 50 to 80 study questions to prepare. Students will be asked to give a short presentation of their research plans, followed by an oral exam where the qualifying exam panel will ask a subset of the review questions.

Students must take the exam by the fall semester of their third year. If students fail the qualifying exam on their first attempt, they may retake the exam in the following semester. Students who do not pass the exam after two attempts will be asked to leave the program.¹

Dissertation Committee

Students must confirm their dissertation advisor by the end of their second year. The dissertation advisor must be a full-time, tenured, tenure-track, research, or teaching faculty member of Northeastern. The advisor should be a network science doctoral program faculty member, unless the student receives approval by the network science program committee.

Students must confirm their dissertation committee prior to their comprehensive exam. The committee must consist of a minimum of four members:

1. A dissertation advisor
2. A core member of the Network Science Institute faculty
3. An additional tenured/tenure-track, research, or teaching faculty member from the Network Science Institute or other Northeastern faculty approved by the advisor and program committee
4. One member recognized as an expert in the specific topic of research, who can be external to Northeastern.

Dissertation Proposal (Comprehensive Examination)

The comprehensive exam should be completed in the student's fourth year of study. The exam consists of two parts: preparation of the dissertation proposal and oral presentation of the proposal. Students must prepare a written comprehensive research proposal describing the dissertation research plan including review of relevant literature, research questions, motivation, methods, any preliminary results, and potential impact. The proposal must be shared with the doctoral committee members two weeks prior to the scheduled presentation.

Students will give a 30-minute oral presentation to their committee members that is open to the public. Following the presentation, the dissertation committee will assess the proposed research plan and provide feedback to the student. If the proposal and/or presentation do not meet the expectations of the committee, the student will be asked to revise their proposal and/or their presentation. The completion of the comprehensive exam is considered successful if the dissertation committee approves as satisfactory both the written proposal and the oral presentation. Students may repeat the comprehensive exam once. If they are unsuccessful in their second attempt, the program will ask the student to leave the program.

PhD Candidacy

A student is considered a doctoral candidate upon completion of the required coursework with a minimum cumulative GPA of 3.000, a passing score on the qualification exam, and satisfactory completion of the comprehensive exam.

Dissertation

A PhD student should aim to complete their dissertation in their fifth year of study. Upon successful completion of the research plan proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field. The work should give evidence of the candidate's ability to carry out independent research. It is expected that the dissertation consists of one or more research studies of sufficient quality to merit publication in a reputable journal(s).

Dissertation Defense

Like the dissertation proposal, the dissertation defense consists of two parts: the written dissertation and the defense oral presentation. The PhD candidate should send the written dissertation to their dissertation committee at least one month prior to the dissertation defense.

The oral dissertation defense will be open to the public and will include a Q&A session. Following the presentation, the dissertation committee will communicate their assessment of whether they consider the candidate's dissertation requirement fulfilled. Once the dissertation requirement is fulfilled, the PhD candidate is ready to graduate. Students then apply to graduate and follow the formatting guidelines and deadlines of their home college.

¹Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an MS in Network Science degree. Note that no students will be admitted directly into the MS in Network Science to pursue a master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Personal Health Informatics, PhD (Boston)

Northeastern University's Doctor of Philosophy in Personal Health Informatics is a transdisciplinary doctoral program focused on educating top researchers in the theoretical underpinnings, design, evaluation, and dissemination of consumer- and patient-focused health systems. Personal health technologies are those that non-health professionals interact with *directly*, both in and out of a clinical setting and in various life stages of illness and wellness.

Examples include:

- Assistive technologies that aid persons with disabilities
- Consumer wellness promotion technologies
- Patient education and counseling systems
- Interfaces for reviewing personal health records
- Advanced ambulatory monitoring for supporting health
- Automated elder care systems that monitor health and support independent living
- Social networking systems connecting families and their social and medical support networks

Developing personal health interface technologies requires that professionals have skills and experience designing systems for individual patients and consumers with a wide range of backgrounds in different contexts using a variety of media, while ensuring that fielded technologies are effective, reliable, and responsive to the needs of at-risk and patient populations. Critical skills and knowledge include needs assessment, theories of interface design and health behavior, rapid prototyping and implementation, experimental design with human subjects in challenging settings, and statistical data analysis and validation. Moreover, these skills must be deployed while working with, or leading, transdisciplinary teams.

The interdisciplinary nature of the program targets students who are interested in improving health and wellness using novel technologies that directly impact the lives of consumers and patients. This is a program for students who are not only technically strong but also socially conscious, design oriented, and interested in rigorously evaluating the technologies they imagine and build. The program provides a path for technical students to acquire more experience in the deployment and evaluation of health technologies in the field but also a path for students with health backgrounds to develop the technical skills needed to prototype and assess creative ideas they envision for improving care. The expected length of study is five years after the bachelor's degree.

Admission Requirements

Students will be accepted with either of the following:

- A bachelor's or higher degree in a technical discipline (e.g., computer science or information science, computer systems engineering) with either academic or work experience demonstrating a commitment to working in health.
- A bachelor's or higher degree in a health science discipline (e.g., nursing, medicine, physical therapy, pharmacy, public health) with either some academic coursework in technology, such as a course in programming or design, or work experience where the applicant participated in the development, adaptation, or evaluation of consumer- or patient-facing health technology. (Otherwise outstanding applicants without programming skills may be advised to take an introductory programming course prior to entry; otherwise outstanding applicants without any formal experience working in health settings may be advised to spend some time volunteering in a medical or community health setting prior to entry.)

Applicants will be expected to have:

- A minimum 3.000 undergraduate GPA
- A minimum total GRE score of 300 or equivalent

- A minimum GRE academic writing score of 3.5
- For international applicants, a minimum TOEFL score of 105

Minimum Academic Standards and Requirements

RESIDENCY REQUIREMENT

The residency requirement will follow the university's residency requirement for PhD programs (<https://catalog.northeastern.edu/graduate/general-admission-transfer-credit/regulations-phd-programs/>).

TEACHING REQUIREMENT

All personal health informatics PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester.

- Teaches at least three hours of classes
- Prepares at least one assignment, or quiz, or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

DISSERTATION ADVISING

Each student will have one primary advisor from the personal health informatics doctoral program faculty.

DISSERTATION COMMITTEE

The committee will consist of at least three members: the dissertation advisor, one additional personal health informatics doctoral program faculty member, and one member external to Northeastern who is an expert in the specific personal health informatics topic of research. The dissertation committee shall include experts with both health and technology backgrounds. The dissertation advisor must be a full-time member of the Northeastern faculty.

QUALIFYING EXAMINATION

The qualifying examination consists of a three-part exam conducted by a committee of three personal health informatics doctoral program faculty members, each overseeing one part of the exam. The research core of the exam is fulfilled with submission of a high-quality paper to a strong peer-reviewed conference or journal. The health component of the exam is fulfilled when the student passes a written exam developed by a faculty member with a health sciences background, and the technical component of the exam is fulfilled when the student passes an exam developed by a faculty member with a technical background. The content of the written exams and the paper topic are developed in consultation with each faculty member.

DEGREE CANDIDACY

A student is considered a PhD degree candidate upon meeting these conditions:

- Completion of core courses with a minimum GPA of 3.000 overall on the core courses
- Completion of the qualifying examination

COMPREHENSIVE EXAM

A PhD student must submit a written dissertation proposal to the dissertation committee. The proposal should identify the research problem, the research plan, and its potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee.

DISSERTATION DEFENSE

A PhD student must complete and defend a dissertation that involves original research in personal health informatics.

Curriculum Requirements

REQUIRED AND ELECTIVE COURSES

The curriculum is designed to provide all PhD students with a strong foundation in principles critical to the design and evaluation of personal health interfaces. All students take six core courses (24 semester hours) and the user-interface practicum (1 semester hour). The student must maintain a minimum GPA of 3.500 among the six core courses and receive a grade of B or better in each of these courses. All students must also fulfill the programming fundamentals requirement (4 semester hours) and the statistics fundamentals requirement (4 semester hours), where some flexibility in course selection allows tailoring based on background and experience. Two additional research electives (8 semester hours) are selected based on research interests from the personal health informatics electives list. Students are also expected to participate in the personal health informatics seminar series during semesters when it is run.

Program Requirements

Healthcare Leadership, DMSc (Boston)

Northeastern University's Doctor of Medical Science is an interdisciplinary degree designed for medical professionals to advance their education and expand their career opportunities through various healthcare concentration areas. Students from diverse healthcare backgrounds share the common goal of developing facility with healthcare systems and becoming leaders within the greater healthcare community.

In addition to taking core courses in healthcare leadership, advocacy, and research methods, students can obtain additional education in one of several areas of specialization. These concentrations are designed to empower graduates from diverse backgrounds with the technical and analytical expertise that is relevant and in high demand in today's healthcare environment. Students will have the opportunity to collaborate with faculty from the Department of Medical Sciences and world-renowned faculty from a variety of interdisciplinary fields within Northeastern and the greater Boston community. This collaboration allows students to access expertise and knowledge across disciplines that will culminate in the creation of an original thesis study.

This degree will take between 16 and 20 months to complete and can be completed fully online. Some concentrations have on-ground curriculum requirements.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

ARTG 6460	Human-Centered AI	
CS 5047	Exploring AI Trends and Tools	
HLTH 5800	AI Across the Health Sciences ⁸	
PHIL 5110	Responsible AI	

CONCENTRATION IN BUSINESS MANAGEMENT

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
ACCT 6318	Analyzing Accounting Data for Strategic Decision Making	
BUSN 6402	Stakeholder Values and Societal Challenges in Business	
ENTR 6250	Lean Design and Development	
FINA 6318	Financial Management	
HINF 5105	The American Healthcare System	
HRMG 6318	Managing the Organization	
INNO 6225	Acquisitions, Alliances, and Growth	
INNO 6318	Innovation Driven Strategy	
MISM 6201	Database Management for Business	
MISM 6202	Foundations of Data Analysis for Business	
MISM 6210	Information Visuals and Dashboards for Business	

MISM 6212	Data Mining and Machine Learning for Business
MKTG 6318	Customer Value and the Enterprise
SCHM 6318	Managing Operations and the Supply Chain
STRT 6318	Strategic Planning for the Future

CONCENTRATION IN EXERCISE SCIENCE

Code	Title	Hours
Concentration Required ²		
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing ³	3
EXSC 5220	Advanced Exercise Physiology	3
EXSC 6202	Electrocardiography, Clinical Assessment, and Prescription	3
Selective		
Complete 3 semester hours from the following:		3
EXSC 5200	Cardiopulmonary Physiology	
EXSC 5230	Physical Activity and Exercise: Effects on Musculoskeletal Health and Disease	

CONCENTRATION IN EXTREME MEDICINE

Code	Title	Hours
Complete a minimum of 12 semester hours.		
Concentration Required		
MSCI 5403 and MSCI 5400	Expedition and Wilderness Medicine Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 6}	3
Complete a minimum of 6 semester hours from the following (students may choose additional courses from the list below and/ or an optional experiential elective to meet the minimum 12-semester-hour program requirement):		6-9
MSCI 5001	Human Factors and Situational Awareness	
MSCI 5002	Crisis Resource Management and Case Studies	
MSCI 5003	Humanitarian Aid Practice and Principles	
MSCI 5004	Humanitarian and Disaster Response Ethics	
MSCI 5005	Care During Conflict	
Optional Elective Experiential Courses ⁵		
MSCI 5401 and MSCI 5400	Human Factors and Situational Awareness Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 6}	
MSCI 5402 and MSCI 5400	Expedition and Cold Weather Medicine Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 5, 6}	
MSCI 5405 and MSCI 5400	Humanitarian Medicine Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 5, 6}	

CONCENTRATION IN HEALTH INFORMATICS

Code	Title	Hours
Concentration Required		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6400	Introduction to Health Data Analytics	3
Selective		
Complete 3 semester hours from the following:		3
HINF 5105	The American Healthcare System	
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6205	Creation and Application of Medical Knowledge	

CONCENTRATION IN HEALTH INFORMATICS RESEARCH

Code	Title	Hours
Concentration Required		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6400	Introduction to Health Data Analytics	3
Selective		

Complete 4 semester hours from the following: 4

CS 6350	Empirical Research Methods
HINF 5300	Personal Health Interface Design and Development

CONCENTRATION IN HEALTH LAW

Code	Title	Hours

Concentration Required

LW 6102	Introduction to Legal Studies 2	3

Selectives

LW 6102 is a prerequisite for the LW courses listed below. Complete 9 semester hours from the following: 9

LW 6110	Law of Information and Records
LW 6150	Law and Organizational Management
LW 6180	Health Law Survey
LW 6181	Healthcare Regulation and Compliance
LW 6182	Patient Records, Privacy, and Security
LW 6210	Special Topics in Employee Rights and Employer Obligations

CONCENTRATION IN INTERDISCIPLINARY HEALTHCARE LEADERSHIP

Code	Title	Hours

Complete a minimum of 12 semester hours from the following: 12

Artificial Intelligence

ARTG 6460	Human-Centered AI
CS 5047	Exploring AI Trends and Tools
HLTH 5800	AI Across the Health Sciences ⁹
PHIL 5110	Responsible AI

Business Management

ACCT 6318	Analyzing Accounting Data for Strategic Decision Making
BUSN 6402	Stakeholder Values and Societal Challenges in Business
ENTR 6250	Lean Design and Development
FINA 6318	Financial Management
HINF 5105	The American Healthcare System
INNO 6225	Acquisitions, Alliances, and Growth
INNO 6318	Innovation Driven Strategy
MISM 6201	Database Management for Business
MISM 6202	Foundations of Data Analysis for Business
MISM 6210	Information Visuals and Dashboards for Business
MISM 6212	Data Mining and Machine Learning for Business
MKTG 6318	Customer Value and the Enterprise
SCHM 6318	Managing Operations and the Supply Chain
STRT 6318	Strategic Planning for the Future

Exercise Science

EXSC 5200	Cardiopulmonary Physiology
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing
EXSC 5220	Advanced Exercise Physiology
EXSC 5230	Physical Activity and Exercise: Effects on Musculoskeletal Health and Disease
EXSC 6202	Electrocardiography, Clinical Assessment, and Prescription

Extreme Medicine

MSCI 5001	Human Factors and Situational Awareness
MSCI 5002	Crisis Resource Management and Case Studies
MSCI 5003	Humanitarian Aid Practice and Principles
MSCI 5004	Humanitarian and Disaster Response Ethics
MSCI 5005	Care During Conflict

Health Informatics

CS 6350	Empirical Research Methods
HINF 5101	Introduction to Health Informatics and Health Information Systems

HINF 5105	The American Healthcare System
HINF 5200	Theoretical Foundations in Personal Health Informatics
HINF 5300	Personal Health Interface Design and Development
HINF 5407	Business Application of Decision Support in Healthcare
HINF 6205	Creation and Application of Medical Knowledge
HINF 6220	Database Design, Access, Modeling, and Security
HINF 6400	Introduction to Health Data Analytics

Health Law

LW 6102	Introduction to Legal Studies 2
LW 6102 is a prerequisite for the following LW courses:	
LW 6110	Law of Information and Records
LW 6150	Law and Organizational Management
LW 6180	Health Law Survey
LW 6181	Healthcare Regulation and Compliance
LW 6182	Patient Records, Privacy, and Security
LW 6210	Special Topics in Employee Rights and Employer Obligations

Patient Safety

HLTH 5600	Introduction to Patient Safety
HLTH 5600 is a concurrent prerequisite for the following HLTH courses:	
HLTH 5610	Patient Safety Science
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness
HLTH 5630	Quality Improvement in Patient Safety

Pharmacy and Health Systems Science

PHMD 5575	Pharmaceutical Industry

Public Health

HLTH 5700	Social Determinants of Health
PHTH 5120	Race, Ethnicity, and Health in the United States
PHTH 5212	Public Health Administration and Policy
PHTH 6200	Principles and History of Urban Health
PHTH 6208	Foundations of Community Health Assessment

CONCENTRATION IN PATIENT SAFETY

Code	Title	Hours
Concentration Required		
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

CONCENTRATION IN PUBLIC HEALTH

Code	Title	Hours
Concentration Required		
PHTH 5120	Race, Ethnicity, and Health in the United States	3
PHTH 5212	Public Health Administration and Policy	3
PHTH 6200	Principles and History of Urban Health	3
PHTH 6208	Foundations of Community Health Assessment	3

¹ Students who have not completed their thesis but have already registered for the required number of thesis hours, and have no remaining coursework to complete the degree, may register for Thesis Continuation—Half-Time (MSCI 7996) in their last semester (including summer term). There is a 1-semester-hour tuition charge for Thesis Continuation—Half-Time (MSCI 7996). Thesis Continuation may be taken only once.

² Anatomy and Physiology I and II or equivalent and an exercise physiology or medical background are strongly recommended for the Concentration in Exercise Science.

³ Physical Activity and Exercise: Prescription, Measurement, and Testing (EXSC 5210) is offered online with a four-day, on-campus, hands-on lab component in a low-residency format.

⁴ Courses are offered in partnership with World Extreme Medicine. Additional expenses may be associated with the experience courses. Offered on-ground in a four-day experiential format.

⁵ Some of the optional experiential learning experiences are limited to specific groups of medical or allied health professionals.

- One semester hour of Experiential Reflections: Bridging Theory and Experience (MSCI 5400) must be completed for each experience course. Experiential Reflections: Bridging Theory and Experience (MSCI 5400) may be taken concurrently or after the associated courses.
- Students who select AI Across the Health Sciences (HLTH 5800) (4 semester hours) versus Workforce Metrics: Measuring, Comparing, and Privileging the Interprofessional Healthcare Team (MSCI 6002) (3 semester hours) will incur an additional 1-semester-hour cost beyond the total program credits.
- Students who have completed AI Across the Health Sciences (HLTH 5800) as a core requirement must complete the remaining three courses in the Concentration in AI Applications.
- Students who have completed AI Across the Health Sciences (HLTH 5800) as a core requirement may not select this course as part of the Concentration in Interdisciplinary Healthcare Leadership requirements.

Complex Network Analysis, MS (Boston)

Complex network analysis is the quantitative study of interconnected systems that influence every aspect of our lives—from where we get our news and who we share ideas with, to how we travel and the people we interact with, to the products we purchase and the foods we eat. Networks are ubiquitous across natural and human-made systems, and their structure and dynamics can explain and help improve the greatest challenges of the next century such as pandemics, food scarcity, cultural polarization, and climate change. Expertise in the emerging field of complex network analysis, within the landscape of the rapid growth of artificial intelligence and machine learning, forms the foundation of the next generation of thought leaders. Northeastern University leads the way in this burgeoning field, offering a unique master's degree program in complex network analysis methodologies. The program is designed to equip students with the conceptual and analytical tools needed to find patterns of connections in networked systems and apply these techniques in real-world settings. The curriculum includes industry-aligned concentration areas of focus, enabling graduates to apply complex network analysis skills in impactful careers in the public and private sectors as well as in research. The concentrations for this program correspond directly to the following industry sectors:

1. Public health and life sciences fields such as epidemiological modeling, public policy, and behavioral research
2. Social or urban science and research fields such as urban planning, social network research, economics, education, criminal science, or public policy
3. Finance or technological fields such as financial analytics, market research, or network analysis for business
4. Biological systems modeling used across research and industry including network biology, drug discovery, or multi-omics mining

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Complex Biological Networks—College of Science
- Complex Social Systems—College of Social Sciences and Humanities
- Economic and Technological Networks—Khoury College of Computer Sciences
- Population Health Dynamics—Bouvé College of Health Sciences

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CNET 5050	Fundamentals of Complex Networks	4
CNET 5051	Analyzing Complex Network Data	4
CNET 5052	Advanced Tools for Complex Network Analysis	4
CNET 5901	Visualizing Complex Networks	2
CNET 5902	Communicating Network Data	2

Concentrations

Complete one of the following concentrations:

- Complex Biological Networks (p. 167)—College of Science
- Complex Social Systems (p. 168)—College of Social Sciences and Humanities
- Economic and Technological Networks (p. 168)—Khoury College of Computer Sciences
- Population Health Dynamics (p. 169)—Bouvé College of Health Sciences

Experiential Courses

Code	Title	Hours
Complete a total of 4 semester hours from the following (course may be repeated):		4
CNET 6107	Complex Network Analysis Research Rotation	
CNET 6108	Complex Network Analysis Capstone	
CNET 6990	Thesis	

Optional Co-op

Code	Title	Hours
CNET 6000	Professional Development for Co-op	1
CNET 6964	Co-op Work Experience	0

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Additional hours may be required based on student choice of courses or concentration.

One semester hour of additional coursework is required for participation in co-op.

Minimum 3.000 GPA required

CONCENTRATION IN COMPLEX BIOLOGICAL NETWORKS—COLLEGE OF SCIENCE

Code	Title	Hours
A minimum of 16 semester hours is required to complete this concentration.		
Required		
CNET 5515	Complex Network Analysis for Biological Systems	4
Complete 8 semester hours from the following:		8
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6310	Introduction to Bioinformatics	
EEMB 5130	Population Dynamics	
ENVR 5450	Applied Social-Ecological Systems Modeling	
MATH 5131	Introduction to Mathematical Methods and Modeling	
MATH 7340	Statistics for Bioinformatics	
PHYS 5211	Introduction to Scientific Computing	
Complete 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5411	Financial and Economic Networks	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN COMPLEX SOCIAL SYSTEMS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
A minimum of 13 semester hours is required to complete this concentration.		
Required		
CNET 5314	Complexity in Social Systems	3
Complete a minimum of 6 semester hours from the following:		6
CNET 5311	Physical and Digital Human Traces	
CNET 5360	Research Design for Social Networks	
INSH 5301	Introduction to Computational Statistics	
INSH 6101	Agent-Based Modeling for Applied and Social Sciences	
INSH 6300	Research Methods in the Social Sciences	
INSH 6304	Modeling and Analyzing Social Networks	
INSH 6406	Analyzing Complex Digitized Data	
INSH 6500	Statistical Analysis	

PHYS 5211	Introduction to Scientific Computing	
PPUA 5262	Big Data for Cities	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5411	Financial and Economic Networks	
CNET 5515	Complex Network Analysis for Biological Systems	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN ECONOMIC AND TECHNOLOGICAL NETWORKS—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
A minimum of 14 semester hours is required to complete this concentration.		
Required		
CNET 5411	Financial and Economic Networks	3
Complete a minimum of 7 semester hours from the following:		7
CS 7150	Deep Learning	
CS 7200	Statistical Methods for Computer Science	
DS 5220	Supervised Machine Learning and Learning Theory	
DS 5230	Unsupervised Machine Learning and Data Mining	
MISM 6212	Data Mining and Machine Learning for Business	
PHYS 5211	Introduction to Scientific Computing	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5515	Complex Network Analysis for Biological Systems	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN POPULATION HEALTH DYNAMICS—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
A minimum of 14 semester hours is required to complete this concentration.		
Required		
CNET 5126	Spreading on Networks: From Epidemics to Memes	4
Complete a minimum of 6 semester hours from the following:		6
BINF 6308	Bioinformatics Computational Methods 1	
PHTH 5210	Biostatistics in Public Health	
PHTH 6210	Applied Regression Analysis	
PHTH 6224	Social Epidemiology	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6800	Causal Inference in Public Health Research	
PHTH 6801	Causal Inference 1	
PHYS 5211	Introduction to Scientific Computing	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5314	Complexity in Social Systems	
CNET 5411	Financial and Economic Networks	
CNET 5515	Complex Network Analysis for Biological Systems	
CNET 6061	Analyzing Higher-Order Networks	

CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouvé College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business

- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4
CS 6120	Natural Language Processing	4
CS 6140	Machine Learning	4
or DS 5220	Supervised Machine Learning and Learning Theory	

CONCENTRATION IN ENTREPRENEURSHIP—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics of Design	

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4

PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
Electives		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
Electives		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8
HIST 5241	Exhibits and Museums	
HIST 7250	Topics in Public History (Public History and Slavery)	
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)	

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
GSND 6460	Generative Game Design	

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	

JRNL 5311	Design for Storytelling
JRNL 6305	Topics
JRNL 6341	Telling Your Story with Data

Plan of Study

Sample Plan of Study

The following is a sample plan of study for a student in the Concentration in XR and Games.

Year 1			
Fall	Hours	Spring	Hours
EXRE 5010 and EXRE 5011		5 EXRE 5030	4
EXRE 5020		4 GSND 5110 and GSND 5111	5
		9	9
Year 2			
Fall	Hours	Spring	Hours
EXRE 6500		4 EXRE 7500	4
GSND 5122		1 XR and games elective 2	4
XR and games elective 1		4	
		9	8
Total Hours: 35			

Health Data Analytics, MS—Online

The digitization of healthcare systems in clinical settings, in combination with the explosion of personal data collection devices, creates opportunities for using data to revolutionize approaches to health at all levels. The Master of Science in Health Data Analytics prepares students to make an impact on health outcomes, medical knowledge, and healthcare systems by producing data-driven insights.

The fully online and asynchronous Master of Science in Health Data Analytics is intended for students that seek to build analytics skills required to stand out in the healthcare industry. This program is designed for learners from multiple backgrounds and will prepare students with the specific technical skills required to excel in analytical roles in healthcare. Graduates will gain the expertise to extract actionable insights, identify patterns and trends, and inform evidence-based decision making in the dynamic healthcare landscape.

The program combines a robust analytics core presenting fundamental concepts such as data acquisition, data mining, statistics, and data visualization with foundational knowledge for navigating the healthcare data system. Health analytics courses discuss the complex data and information needs throughout the healthcare ecosystem including the needs of payers, providers, and regulatory agencies. Courses on health science as well as courses on the evolving business of healthcare provide students with deep, relevant industry knowledge preparing them for a variety of roles in the space. Students can expect to gain a broad and deep understanding of the various methods, software tools, and topical expertise needed to discover meaningful patterns in health-related data and effectively communicate their implications to a number of diverse stakeholders. In addition to the analytics core and the healthcare core, students will take elective courses allowing them to explore emerging topics of interest in more depth.

Successful graduates of the Master of Science in Health Data Analytics will be effective practitioners and leaders in the rapidly evolving domain of data analytics with a focus on health and healthcare.

Learning Outcomes

- Analyze organizational and stakeholder challenges in healthcare settings and develop data-driven solutions to address those challenges, align with strategic goals, and improve patient outcomes
- Collect health-related data from various sources, ensuring its accuracy and integrity
- Analyze health data using statistical, epidemiological, and data-mining methods, leveraging software tools and programming languages such as R, SAS, or Python to derive actionable insights
- Interpret and visualize analytical results by transforming complex data into clear charts and graphs that convey key insights to nontechnical stakeholders
- Present findings to nontechnical stakeholders by delivering concise, engaging narratives that highlight the implications of the analysis in an easily understandable format

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
DADS 6400	Foundations for Data Analytics	4
DADS 6600	Computation and Visualization for Analytics	4
DADS 7275	Machine Learning and Data Analytics	4
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5102	Data Management in Healthcare	3
HINF 6355	Interoperability Key Standards in Health Informatics	3
HINF 6400	Introduction to Health Data Analytics	3
HSCI 5130	Introduction to Real-World Evidence	2

Electives

Code	Title	Hours
Complete 6 semester hours from the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6404	Patient Engagement Informatics and Analytics	
PTH 5210	Biostatistics in Public Health	

Program Credit/GPA Requirements

32 total semester hours required
Minimum 3.000 GPA required

Health Informatics, MS (Boston)

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students may opt to select a concentration to deepen their knowledge in a particular area. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

Core Requirements

Code	Title	Hours
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
Choose one of the following courses in consultation with your advisor:		
HINF 5105 or HINF 5106	The American Healthcare System The Canadian Healthcare System	3

Program Options

Choose one of the following options:

- Health Informatics (Without Concentration) (p. 448)
- Health Informatics with Health Informatics Analytics Concentration (p. 449)
- Health Informatics with Personal Health Informatics Concentration (p. 449)

Program Credit/GPA Requirements

Minimum 33 total semester hours required
Minimum 3.000 GPA required

HEALTH INFORMATICS (WITHOUT CONCENTRATION)

Code	Title	Hours
Required Coursework in Addition to Core Requirements		
<i>Business Management</i>		
Complete two of the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management	
or EMGT 5220	Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PTH 5226	Management and Leadership in Public Health and Healthcare	
<i>Health Informatics</i>		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	
HINF 6405	Quantifying the Value of Informatics	
PTH 5232	Evaluating Healthcare Quality	
<i>Technical</i>		
Complete two of the following:		6
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
HINF 6400	Introduction to Health Data Analytics	
HLTH 5800	AI Across the Health Sciences	
PTH 5202	Introduction to Epidemiology	
PTH 5210	Biostatistics in Public Health	
PTH 6210	Applied Regression Analysis	
PTH 6400	Principles of Population Health 1	
PTH 6440	Advanced Methods in Biostatistics	
One course from the following may count toward the technical core requirement:		
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
<i>Capstone</i>		
HINF 7701	Health Informatics Capstone Project	3
<i>Electives</i>		
Complete two of the following:		6
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
HINF 6345	Design for Usability in Healthcare	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
PHIL 5110	Responsible AI	

HEALTH INFORMATICS ANALYTICS CONCENTRATION

Code	Title	Hours
Required Coursework in Addition to Core Requirements		
<i>Business Management</i>		
Complete two of the following:		6
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management	
or EMGT 5220	Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PHTH 5226	Management and Leadership in Public Health and Healthcare	
<i>Health Informatics</i>		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	
HINF 6405	Quantifying the Value of Informatics	
PHTH 5232	Evaluating Healthcare Quality	
<i>Technical</i>		
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4
<i>Capstone</i>		
HINF 7701	Health Informatics Capstone Project	3
Elective		
Complete one of the following:		4
IE 5137	Computational Modeling in Industrial Engineering	
IE 5390	Structured Data Analytics for Industrial Engineering	
IE 5400	Healthcare Systems Modeling and Analysis	
IE 5640	Data Mining for Engineering Applications	
IE 6600	Computation and Visualization for Analytics	
IE 6700	Data Management for Analytics	
IE 7275	Data Mining in Engineering	

PERSONAL HEALTH INFORMATICS CONCENTRATION

Code	Title	Hours
Required Coursework in Addition to Core Requirements		
<i>Health Informatics</i>		
HINF 6205	Creation and Application of Medical Knowledge	3
<i>Technical</i>		
CS 5340	Computer/Human Interaction	4
Complete one of the following. Students must petition to take electives outside the approved list:		4
CS 5010	Programming Design Paradigm	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 6200	Information Retrieval	
Complete one of the following:		3
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	

Theory and Evaluation		
PHTH 5210	Biostatistics in Public Health ¹	3
Complete one of the following:		4
CS 6350	Empirical Research Methods (On campus only)	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
Culminating Experience		
Complete one of the two options below.		6
Thesis Option		
Students must enroll in HINF 7990 for two semesters for a total of 6 semester hours with director approval only and under supervision of Personal Health Informatics faculty:		
HINF 7990	Thesis	
Capstone Option		
HINF 7701	Health Informatics Capstone Project	
Complete any course for a minimum of 3 semester from the Health Informatics (without concentration) curriculum, that has not been used in previous requirements.		

¹ Student may petition director to take a more advanced stats course, such as Applied Regression Analysis (PHTH 6210).

Health Informatics, MS (Vancouver)

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Note: For the 2025–2026 academic year, this program will be offered in an online format. If you have questions about eligibility, please reach out to your admissions counselor.

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

Code	Title	Hours
Core Requirements		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5106	The Canadian Healthcare System	3
Business Management		
Complete two of the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management

PHTH 6210	Applied Regression Analysis
PHTH 6400	Principles of Population Health 1
PHTH 6440	Advanced Methods in Biostatistics

One course from the following may count toward the technical core requirement:

DA 5020	Collecting, Storing, and Retrieving Data
DA 5030	Introduction to Data Mining/Machine Learning
INSH 5301	Introduction to Computational Statistics
INSH 5302	Information Design and Visual Analytics
PHIL 5110	Responsible AI

Capstone

HINF 7701	Health Informatics Capstone Project	3

Electives

Complete two of the following: 6

DA 5020	Collecting, Storing, and Retrieving Data
DA 5030	Introduction to Data Mining/Machine Learning
HINF 6345	Design for Usability in Healthcare
INSH 5301	Introduction to Computational Statistics
INSH 5302	Information Design and Visual Analytics

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

Pharmaceutical Engineering, MS (Boston)

The Master of Science in Pharmaceutical Engineering is offered jointly by Northeastern University's College of Engineering and Bouvé College of Health Sciences. The program prepares students with a fundamental understanding of pharmaceutical sciences and principles of engineering to develop the depth needed for advanced study of pharmaceutical engineering.

This program is generally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields in engineering, sciences, or mathematics. The program was designed in collaboration with the Department of Pharmaceutical Sciences to develop the depth needed for advanced study of pharmaceutical engineering. Students wishing to pursue the master's degree with undergraduate educational backgrounds other than engineering are required to demonstrate completion of mathematics coursework through differential equations or the equivalent to be admitted. Prior completion of at least one semester of organic chemistry or the equivalent is also required, and some prior exposure to concepts in biochemistry and molecular biology is helpful. Students are advised to work closely with their advisors and instructors to determine the electives that would meet their career goals.

Part-Time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit.

Master of Science students wishing to change their status from part time to full time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CHME 6390	Professional Development and Communication Essentials (Complete this course twice.) ¹	0
CHME 7600	Pharmaceutical Engineering I	4
CHME 7601	Pharmaceutical Engineering II	4
CHME 7602	Pharmaceutical Engineering Laboratory	2
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 7010	Pharmaceutical Sciences Laboratory	4

¹ To be completed each of the first two semesters in the program.

Restricted Elective Courses

Code	Title	Hours
At least 4 semester hours of elective coursework is required from CHME, and at least 2 semester hours of elective coursework is required from PHSC and PMST. These semester hours could come from any elective group, as appropriate.		

Regulatory

Complete 3–4 semester hours from the following: 3-4

BIOE 5250	Regulatory and Quality Aspects of Medical Device Design
BIOT 5340	Introduction to Biotherapeutic Approvals
BIOT 5500	Concepts in Regulatory Science
BIOT 6320	Design and Development of Biopharmaceuticals
RGA 6002	Introduction to Regulatory Compliance and Practice

Quality/Statistics

Complete 4 semester hours from the following: 4

CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 6320	Numerical and Statistical Methods for Chemical Engineering
CHME 6410	Chemical Engineering Research Methods
IE 6200	Engineering Probability and Statistics
IE 7280	Statistical Methods in Engineering
IE 7285	Statistical Quality Control
PHSC 6214	Experimental Design and Biostatistics

Depth Electives

Complete 6–7 semester hours from the following: 6-7

BIOE 5115	Dynamical Systems in Biological Engineering
BIOE 5411	Applied Molecular Bioengineering
BIOE 5510	Bioengineering Products/Technology Commercialization
BIOE 5860	Engineering Approaches to Precision Medicine I
BIOT 5330	Drug Safety and Immunogenicity
BIOT 6300	Pharmaceutical Microbiology
BIOT 6340	Sterile Manufacturing Operations
CHME 5160	Drug Delivery: Engineering Analysis
CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5510	Fundamentals in Process Safety Engineering
CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries
CHME 5631	Biomaterials Principles and Applications

or BIOE 5820	Biomaterials
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science
CHME 7330	Chemical Engineering Thermodynamics
CHME 7350	Transport Phenomena
PHSC 5300	Pharmaceutical Biochemistry
PHSC 5310	Cellular Physiology
PHSC 5500	Repurposing Drugs for Cancer Immunotherapies
PHSC 5555	Pharmaceutical Toxicology
PHSC 5560	Nanotoxicity
PMST 6250	Advanced Physical Pharmacy
PMST 6252	Pharmacokinetics and Drug Metabolism
PMST 6254	Advanced Drug Delivery Systems

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Statistics, MS (Boston)

The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The Master of Science in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouvé College of Health Sciences
- Statistical machine learning—Khoury College of Computer Sciences
- Statistical theory and modeling—College of Science

Students will follow all policies associated with their home college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800	Causal Inference in Public Health Research	3-4

or PHTH 6801	Causal Inference 1	
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics (p. 188)—Bouvé College of Health Sciences
- Statistical Machine Learning (p. 188)—Khoury College of Computer Sciences
- Statistical Theory and Modeling (p. 188)—College of Science

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses may be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

31 total semester hours required (32 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

CONCENTRATION IN BIOSTATISTICS (BOUVÉ COLLEGE OF HEALTH SCIENCES)

Code	Title	Hours
Complete 12 semester hours from the following:		12
PHTH 5350	Using SAS in Public Health Research	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6802	Causal Inference 2	
PHTH 6810	Survival Analysis	
PHTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL MACHINE LEARNING (KHOURY COLLEGE OF COMPUTER SCIENCES)

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4
DS 5110	Essentials of Data Science	4
Optional Co-op		
CS 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL THEORY AND MODELING (COLLEGE OF SCIENCE)

Code	Title	Hours
Complete 12 semester hours from the following:		12
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	
Optional Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Statistics, MS—Connect (Boston)

The Master of Science in Statistics—Connect program is designed for students from all backgrounds with a BS/BA degree, provided the student has experience with basic calculus and statistics. The first semester of the degree program provides students with the foundational knowledge needed to study successfully alongside direct-entry graduate students. The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The MS in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical Machine Learning—Khoury College of Computer Sciences
- Statistical Theory and Modeling—College of Science

Students will follow all policies associated with their college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Connect Courses

Code	Title	Hours
Students are required to complete 8–10 semester hours from the following unless otherwise determined by the program:		8-10
CS 5001	Intensive Foundations of Computer Science	
MATH 5001	Accelerated Linear Algebra	
MATH 5002	Accelerated Multivariable Calculus	
MATH 5003	Accelerated Probability and Statistics	
MATH 5110	Applied Linear Algebra and Matrix Analysis	

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800 or PHTH 6801	Causal Inference in Public Health Research Causal Inference 1	3-4
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics—Bouv  College of Health Sciences (p. 190)
- Statistical Machine Learning—Khoury College of Computer Sciences (p. 190)
- Statistical Theory and Modeling—College of Science (p. 190)

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses can be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

39-41 total semester hours required (40-42 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

BIostatistics Concentration—Bouvé College of Health Sciences

Code	Title	Hours
Complete 12 semester hours from the following:		12
PTH 5350	Using SAS in Public Health Research	
PTH 6440	Advanced Methods in Biostatistics	
PTH 6802	Causal Inference 2	
PTH 6810	Survival Analysis	
PTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

Statistical Machine Learning Concentration—Khoury College of Computer Sciences

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4
DS 5110	Essentials of Data Science	4
Optional Co-op		
CS 6964	Co-op Work Experience	0

Statistical Theory and Modeling Concentration—College of Science

Code	Title	Hours
Complete 12 semester hours from the following:		12
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	
Optional Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Law, JD / Public Health, MPH (Boston)

Northeastern University's School of Law and Bouvé College of Health Sciences offer a JD/MPH dual degree. Given the worldwide trend toward urbanization, the Master of Public Health (MPH) recognizes the growing need for professionals trained to respond to unique public health challenges and opportunities facing urban populations. The MPH program brings together interdisciplinary faculty (from the School of Law, D'Amore-McKim School of Business, College of Social Sciences and Humanities, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences) with expertise in collaborating with diverse urban populations to offer students an opportunity to obtain practice-based knowledge, skills, and experience needed to address public health problems.

Up to 9 credit hours of coursework in the JD program may count toward the MPH, while up to 12 credit hours of coursework in the MPH program may count toward the JD. See the JD/MPH program page (<https://law.northeastern.edu/academics/programs/jd/dual-degrees/public-health-bouve/>) for more information.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Pharmacy, PharmD—Direct Entry / Public Health, MPH (Boston)

The School of Pharmacy and Pharmaceutical Sciences and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master of Public Health (MPH) program.

The combined PharmD/MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD/MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

Refer to the School of Pharmacy and Pharmaceutical Sciences PharmD—Direct Entry (p. 939) and Department of Health Sciences Master of Public Health (p. 869) pages of this catalog for program requirements and technical standards. Students must adhere to all PharmD and MPH program standards, policies, and requirements as listed in the catalog, unless otherwise specified.

The Northeastern University Master of Public Health Program is accredited by the Council of Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

Public Health, MPH / Health Informatics, MS (Boston)

Website (<https://bouve.northeastern.edu/health-sciences/programs/ms-hinf-mph/>)

The Master of Public Health and Master of Science in Health Informatics dual degree allows qualified and interested students to prepare to lead healthcare at the nexus between public health and health informatics. Graduates of this program will be well-educated in the complex issues associated with improvements in information technology, as well as changes to the public health and healthcare delivery systems. Recognizing the increasing overlap between health informatics and public health, this program incorporates course work from both the MPH and MSHI curricula for both degrees, reducing tuition costs and saving one year of study compared to obtaining both degrees individually.

The Northeastern University Master of Public Health program is accredited by the Council on Education for Public Health (CEPH) (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

Up to 15 credits of coursework in the dual-degree program can be counted toward both the MPH and MS degrees.

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4

Experiential Courses

Code	Title	Hours
Complete 4 semester hours from the following:		4
CRIM 6600	Justice, Technology, and AI	
EDUT 6150	AI in Education	
HLTH 5800	AI Across the Health Sciences	
IE 5640	Data Mining for Engineering Applications	
JRNL 6460	AI in Media Industries	
MISM 6250	Strategic AI for Business	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Applied Psychology in Context, Graduate Certificate (Boston)

The Graduate Certificate in Applied Psychology in Context provides students with a strong foundation in scientific research and practice in applied psychology with options to focus in areas of interest, including child/adolescent/family, using a core and elective structure. The fully online, asynchronous graduate certificate offers students an opportunity to develop clinical skills for nonlicensed employees in healthcare, school, and other community-based organizations.

Program Requirements

Core Requirements

Code	Title	Hours
CAEP 5879	Trauma and Mental Health	3
CAEP 5880	Clinical Skills in Context	3
CAEP 6203	Understanding Culture and Diversity	3

Elective

Code	Title	Hours
Complete one of the following based on your area of focus:		3
CAEP 6242	Psychopathology: Diagnosis and Treatment Planning	
CAEP 6247	Child and Adolescent Psychopathology	

Program Credits/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Cannabis Science, Graduate Certificate (Boston)

The Graduate Certificate in Cannabis Science offers coursework in cannabis history, business, and law/policy with a primary focus on the chemical/biochemical, pharmacological, scientific, and health/therapeutic aspects of cannabis. This program is designed for students with a strong science background who want to explore the cannabis industry. It provides the knowledge needed to advance careers in healthcare, public policy, or health law, while supporting policy development and public health initiatives. Students have an opportunity to gain a comprehensive understanding of cannabis analysis and applications, the human endocannabinoid system, and the medicinal and clinical implications of cannabis.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Requirements

Code	Title	Hours
Complete three of the following:		12
PHSC 5910	Applied Sciences for the Cannabis Industry	
PHSC 5920	Clinical Application of Cannabis and Cannabinoids	
PHSC 5930	Advanced Translational Research on Medical Cannabis and Cannabinoids	
PHSC 5940	Cannabis Laws, Standards, and Politics	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Early Intervention, Graduate Certificate (Boston)

Northeastern University's Certificate Program in Early Intervention is grounded in interdisciplinary experiential learning and, thus, designed to prepare students for careers working with babies, toddlers, and their family units.

The interdisciplinary nature of the program is enhanced through diversity of both student and instructor experiences. The program spans across several disciplines including school psychology, counseling psychology, and speech-language pathology. Undergraduate students in their final year of schooling and working professionals may also participate, which further enriches the constitution of each year's cohort.

The program is delivered in a fully online format. Classes meet synchronously one day each month, and additional course content is delivered online. This format allows for maximal participation in both classroom learning and experiential application.

This graduate certificate program can be completed by non-degree-seeking students or integrated with master's or doctoral degree programs. Application of coursework from certain degree programs will be approved to apply to requirements of this graduate certificate; students are encouraged to speak with their academic advisors early in their programs to explore these options.

The goals for the early intervention certificate program are to prepare personnel:

- To provide services to infants and toddlers with disabilities and their families from culturally and linguistically diverse backgrounds
- In achieving all early intervention competencies set forth by the Massachusetts DPH and those that are consistent with best practice and research
- In an interdisciplinary manner, drawing from Northeastern's multidisciplinary resources
- To function effectively across teams (individualized family service plan teams, community teams, interagency teams) and to understand the roles of their interdisciplinary and transdisciplinary co-clinicians

Upon graduation, students are eligible for employment in an early intervention service delivery setting.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B or higher is required in all courses.

Code	Title	Hours
Required Core		
Completing the courses below provides eligibility to pursue provisional certification in the state of Massachusetts upon employment in an early intervention setting. Consult with your program director to determine the availability of and recommended/required enrollment sequence for your respective program.		
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
CAEP 5153	Early Intervention: Assessment and Intervention	3
SLPA 5152	Early Intervention: Planning and Evaluating Services	3
Optional Practicum		
Completing the courses below provides eligibility to pursue provisional certification with advanced standing in the state of Massachusetts upon employment in an early intervention setting. Consult with your program director to determine eligibility for and availability of these course options.		
SLPA 5154	Early Intervention Practicum 1	
SLPA 5155	Early Intervention Practicum 2	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Extreme Medicine, Graduate Certificate (Boston)

Overview

The Graduate Certificate in Extreme Medicine is an interprofessional program designed to prepare healthcare professionals to provide medical services in austere conditions. The core didactic courses are delivered online and provide foundational instruction in human factors, crisis resource management, efficiency of highly skilled teams, and theory and ethics of care in humanitarian crises.

In addition to the online courses, students take one or more on-ground experiential courses offered in an executive format. Experiential courses enable students to complete intensive, hands-on training and apply the principles of extreme medicine. This program is offered in collaboration with World Extreme Medicine (WEM (<https://worldextrememedicine.com/>)).

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/academics/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Core Requirements

A grade of B– or higher is required in each of the following:

Code	Title	Hours
Complete a minimum of 6 semester hours from the following courses. Students may choose additional courses from the list below and/or an optional experiential elective to meet the minimum 12 SH program requirement.		6-9
MSCI 5001	Human Factors and Situational Awareness	
MSCI 5002	Crisis Resource Management and Case Studies	
MSCI 5003	Humanitarian Aid Practice and Principles	
MSCI 5004	Humanitarian and Disaster Response Ethics	
MSCI 5005	Care During Conflict	

Experiential Coursework

Code	Title	Hours
Required Experiential Courses		
MSCI 5403 and MSCI 5400	Expedition and Wilderness Medicine Experience and Experiential Reflections: Bridging Theory and Experience	3
Optional Experiential Electives		
The following experiential courses are optional , but each requires one additional SH of MSCI 5400.		
MSCI 5401 and MSCI 5400	Human Factors and Situational Awareness Experience and Experiential Reflections: Bridging Theory and Experience ¹	
MSCI 5402 and MSCI 5400	Expedition and Cold Weather Medicine Experience and Experiential Reflections: Bridging Theory and Experience ¹	
MSCI 5405 and MSCI 5400	Humanitarian Medicine Experience and Experiential Reflections: Bridging Theory and Experience ¹	

¹ Courses are offered in partnership with World Extreme Medicine (WEM (<https://worldextrememedicine.com/>)). Additional expenses may be associated with the experience courses.
One semester hour of Experiential Reflections: Bridging Theory and Experience (MSCI 5400) must be completed for each experiential course.
Some optional experiential courses may be restricted to licensed or credentialed professionals or to students in the last two years of study in a medical or allied health professional program.
Offered on ground in a 4-day experiential format.

After completion of the 12 required semester hours, students are eligible to register for any of the remaining courses using Bouvé College's Special Student (<https://registrar.northeastern.edu/article/non-matriculated-registration/>) registration process.

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Health Informatics Management and Exchange, Graduate Certificate (Boston)

Overview

The certificate program in health informatics management and exchange offers you the opportunity to obtain the knowledge needed to support the collection, management, retrieval, and exchange of electronic health data. It is designed to prepare you for a position as a specialist in data management, interoperability standards, and health database design.

- Eight-month program
- Five courses, 15 semester hours

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B– or higher is required in all coursework.

Code	Title	Hours
Required Core		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5102	Data Management in Healthcare	3
Management and Exchange		
HINF 6205	Creation and Application of Medical Knowledge	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6355	Interoperability Key Standards in Health Informatics	3

Program Credit/GPA Requirements

15 total semester hours required

Minimum 3.000 GPA required

Patient Safety, Graduate Certificate (Boston)

Overview

The Graduate Certificate in Patient Safety informs and empowers the next generations of innovative patient safety experts by providing the knowledge and practical skills to promote a culture of safety and design safer systems of care. Future leaders incorporate clinician wellness strategies in care delivery models that are accountable, honest, and transparent. The purpose of this certificate is to support healthcare clinicians and leaders in advancing patient safety and the safety of healthcare providers by expanding their fundamental skills and knowledge in patient safety science principles, workforce wellness, and quality improvement strategies.

This is a four-course, interdisciplinary graduate certificate, tailored to accommodate a busy healthcare professional's schedule. Courses are delivered in an online format, structured to enhance the curriculum with peer-to-peer discussions and experience developing tools, protocols, and process improvement strategies.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

A grade of B or higher is required in each course.

Code	Title	Hours
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

The School of Clinical and Rehabilitation Sciences within the Bouvé College of Health Sciences at Northeastern University brings together the clinical fields of physical therapy (<https://bouve.northeastern.edu/academics/school-of-clinical-and-rehabilitation-sciences/physical-therapy-movement-and-rehabilitation-sciences/>), speech-language pathology and audiology (<https://bouve.northeastern.edu/academics/school-of-clinical-and-rehabilitation-sciences/communication-sciences-and-disorders/>), medical sciences, and physician assistant studies (<https://bouve.northeastern.edu/academics/school-of-clinical-and-rehabilitation-sciences/medical-sciences/>). Students and fellows in the school are prepared for clinical and research excellence, training with interdisciplinary experts in habilitation and rehabilitation sciences, epidemiology, neuroscience, engineering, physiology, exercise science, clinical medicine, design, diagnostic and therapeutic imaging, and communication. Working at the intersection of rehabilitation, clinical practice, data, and engineering, students and fellows engage in transformative research and experiential learning that is designed to prepare them to improve the quality of life and self-care for patients and communities, while promoting and developing innovative approaches to the future of healthcare.

Communication Sciences and Disorders

Our mission is to advance the science of human communication and its disorders, understand the science of human communication untethered from traditional limitations of the field, and make a direct impact on the world through targeted learning experiences and research opportunities, while creating an inclusive community. Our faculty are researchers, practicing clinicians, and scientists who bring real-world experience into the classroom to facilitate bench-to-bedside application. They develop, use, and address technology that improves communication and health beyond traditional boundaries.

The Department of Communication Sciences and Disorders offers a five-year PlusOne advanced degree pathway (BS-MS in Speech-Language Pathology) and a two-year, five-semester Master of Science in Speech-Language Pathology degree. A Master of Science in Speech-Language Pathology—Connect degree program is also offered as a six-semester degree, which includes a summer semester of bridge coursework for students who need to complete prerequisite requirements. Our goal is to educate students to the highest levels of professionalism, consistent with the American Speech-Language-Hearing Association and the Council on Academic Accreditation, Northeastern University accreditation standards, and Massachusetts licensure requirements. We provide an interprofessional and practice-oriented education in our urban university environment,

which affords students clinical experiences with clients, patients, and families from a diverse population base. Students are prepared with academic coursework informed by the most current scientific knowledge and evidence-based clinical practice.

- Speech-Language Pathology (Charlotte) (p. 820)
- Speech-Language Pathology, MS—Connect (Boston) (p. 822)
- Speech-Language Pathology, MS—Connect (Charlotte) (p. 823)

Medical Sciences

The mission of the Department of Medical Sciences is to educate and inspire diverse and interdisciplinary professionals to be leaders and innovators in medical science. We offer an interdisciplinary doctoral degree in healthcare leadership, a Master of Science in Physician Assistant Studies, and a Graduate Certificate in Extreme Medicine.

Our flagship program in PA studies was established in 1971 and has a long-standing history of, and expertise in, the education and training of PAs. The PA program is located in close proximity to Boston's major academic medical centers and was the first generalist PA training program in the nation to offer a master's degree in 1985. This rigorous, highly integrated curriculum offers our students the opportunity to obtain broad generalist training that is designed to prepare them for successful employment in all fields of clinical practice.

The Doctor of Medical Science in Healthcare Leadership is an interdisciplinary online degree for healthcare professionals from diverse backgrounds to advance their education and expand their career opportunities in the areas of healthcare leadership, entrepreneurship, medical education, applied AI, and community engagement and advocacy.

The Graduate Certificate in Extreme Medicine is an online interprofessional program offered in collaboration with World Extreme Medicine. The program is designed to prepare healthcare professionals to provide medical services in austere conditions. The core didactic courses provide foundational instruction in human factors, crisis resource management, efficiency of highly skilled teams, and theory and ethics of care in humanitarian crises.

Our faculty members are practicing clinicians, researchers, and healthcare leaders who bring real-world experience to the classroom. Northeastern University's graduates are in high demand and are employed in positions across the United States and internationally. In addition to clinical practice, our graduates are employed in research, administration, education, and leadership.

Doctor of Medical Science (DMSc)

Physical Therapy, Movement, and Rehabilitation Sciences Shaping the Future of Movement Science and Rehabilitation

The Department of Physical Therapy, Movement, and Rehabilitation Sciences at Northeastern University is dedicated to making a profound impact on the health and well-being of the global community. We accomplish this by developing leaders in our fields through interprofessional experiential education, groundbreaking research, and a commitment to excellence in clinical practice. Our mission aligns with the broader goals of Bouvé College of Health Sciences and Northeastern University, enhancing student learning through hands-on experiential education, fostering interdisciplinary collaborations, promoting interprofessional education, and creating meaningful research opportunities.

Within our department, students find themselves immersed in a vibrant community of scholarship and innovation. Our faculty members are recognized leaders in education, research, and clinical practice who mentor students as they explore the frontiers of human movement and rehabilitation science. The research landscape within our department is rich and diverse, spanning multiple specialized facilities including the labs NeuroRehabilitation Engineering, Robotics-Rehabilitation-Locomotion, Programmable and Reconfigurable Soft Engineered Systems, ReGame-XR, BALANCE, Cognitive and Brain Health, i-HBN, Exercise Psychology, TRIBE, and LAB:SYNC. In these dynamic environments, students work alongside faculty to conduct cutting-edge research that advances our understanding of human movement and rehabilitation across the life span.

Our flagship program, the **Doctor of Physical Therapy**, stands as one of the oldest within Bouvé College, with a proud tradition dating back to our first graduates in 1915. This comprehensive 37-month program offers rigorous graduate-level coursework complemented by a distinctive and valuable cooperative education experience—a six-month paid work opportunity in a physical therapy setting that allows students to apply theoretical knowledge in real-world contexts. Students seeking specialized expertise can pursue concentrations in sports performance or pediatric physical therapy, tailoring their education to align with their professional aspirations.

For those drawn to research and academic leadership, our **PhD in Human Movement and Rehabilitation Sciences** prepares graduates to conduct independent original research that restores and maximizes human functional capacity and well-being throughout the life span. This interdisciplinary

program emphasizes core competencies in motor control and motor learning, sophisticated movement measurement and analysis, knowledge translation theory, and the application of both traditional and emerging technologies. Our doctoral students emerge as thought leaders prepared to advance the theoretical foundations and practical applications of movement science.

The **Master of Science in Human Movement and Rehabilitation Sciences** offers an intensive 12-month program focused on innovative rehabilitation solutions through enhanced research and education. Students explore diverse topics including biomechanics, musculoskeletal disorders, control of movement, motor learning, health and well-being through movement design, human-cybernetic system interactions, and neurorehabilitation of movement and function. This program is available as a PlusOne option with several other Northeastern departments, creating particularly strong synergies with programs in the College of Engineering.

Through a prestigious partnership with Massachusetts General Hospital Sports Physical Therapy, we offer a 13-month full-time clinical residency program for licensed physical therapists pursuing careers in sports physical therapy. This specialized program advances the knowledge and clinical competency of sports physical therapists while fostering a culture of continued learning and scientific inquiry. Residents demonstrate an unwavering commitment to patients, students, and athletes at all levels, developing advanced skills that distinguish them as specialists in this dynamic field.

Doctor of Philosophy (PhD)

- Human Movement and Rehabilitation Sciences (Boston) (p. 831)

Doctor of Physical Therapy (DPT)

- Doctor of Physical Therapy—Postbaccalaureate Entry (Boston) (p. 834)

- Human Movement and Rehabilitation Sciences (Boston) (p. 845)

Speech-Language Pathology, MS (Boston)

Adhering to the highest professional standards, the speech-language pathology graduate program seeks to prepare future speech-language pathologists for the rigors of clinical practice across the life span. Graduates of the program will influence society in profound ways—for example, enabling children with autism to communicate effectively, relieving adolescents' fears of speaking dysfluently in the classroom, and helping stroke survivors resume activities in which they had previously participated. The comprehensive program of study emphasizes teamwork and interdisciplinary approaches to complex service delivery issues. Through academic and clinical experiences, SLP graduate students acquire the knowledge and skills needed for a lifetime of professional achievement and social contribution.

Milestone Requirement Options

Students choose either of the following options:

COMPREHENSIVE EXAMINATION

Students must complete a comprehensive examination during the final year in the program in order to graduate. Students must have completed Speech-Language Pathology Advanced Clinical Practicum 4 (SLPA 6418) or be currently enrolled in Speech-Language Pathology Advanced Clinical Practicum 4 (SLPA 6418) in order to be eligible to take the comprehensive examination. Students may submit a written request to the program director in order to take the comprehensive examination prior to enrolling in Speech-Language Pathology Advanced Clinical Practicum 4 (SLPA 6418).

MASTER'S THESIS

Students who elect to complete a master's thesis will have the comprehensive examination requirement waived.

Prerequisite or Equivalent Courses

To ensure that all students have the foundation necessary to be successful in this program, each incoming student, regardless of their background, must have completed coursework with content equivalent in the following courses with a minimum grade of C.

Code	Title	Hours
SLPA 1102	Language Development	
SLPA 1103	Anatomy and Physiology of Speech and Hearing Mechanism	
SLPA 1200	Phonetics	
SLPA 1203	Introduction to Audiology	
SLPA 1205	Speech and Hearing Science	

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

The comprehensive program of study emphasizes teamwork and interdisciplinary approaches to complex service delivery issues. Through academic and clinical experiences, speech-language pathology graduate students acquire the knowledge and skills needed for a lifetime of professional achievement and social contribution.

This program can be completed in six semesters of full-time study and is designed for students entering without a bachelor's degree in communication sciences and disorders or a bachelor's degree in speech-language pathology. Students who already possess a bachelor's degree in communication sciences and disorders or speech-language pathology or who have completed three or more of the bridge courses should consider the Speech-Language Pathology, MS (p. 818) program.

Milestone Requirement Options

Students choose either of the following options:

COMPREHENSIVE EXAMINATION

Students must complete a comprehensive examination during the final year in the program in order to graduate. Students must have completed Speech-Language Pathology Advanced Clinical Practicum 4 (SLPA 6418) or be currently enrolled in SLPA 6418 in order to be eligible to take the comprehensive examination. Students may submit a written request to the program director in order to take the comprehensive examination prior to enrolling in SLPA 6418.

MASTER'S THESIS

Students who elect to complete a master's thesis will have the comprehensive examination requirement waived.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Comprehensive examination or master's thesis

Connect Bridge Coursework

Students are required to complete three or more of the following bridge courses, to be determined by faculty mentor.

A grade of B or higher is required in each course.

Code	Title	Hours
SLPA 5300	Intensive Phonetics	3
SLPA 5302	Intensive Language Development	3
SLPA 5303	Intensive Anatomy and Physiology of Speech and Hearing Mechanism	3
SLPA 5305	Intensive Speech and Hearing Science	3
SLPA 5403	Applied Foundations of Audiology	3

Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
Disorders		
SLPA 5201	Diagnostic Testing in Speech-Language Pathology	2
SLPA 6303	Stuttering	3
SLPA 6304	Augmentative and Alternative Communication	3
SLPA 6305	Articulation and Phonology	3
SLPA 6307	Voice Disorders	3
SLPA 6308	Dysphagia	3
SLPA 6313	Counseling in Speech-Language Pathology	2
SLPA 6321	Motor Speech Disorders	3
SLPA 6340	Language Disorders in Children 1	3

SLPA 6341	Language Disorders in Children 2	3
SLPA 6342	Speech-Language Disorders In Adults 1	3
SLPA 6343	Speech-Language Disorders in Adults 2	3
Complete one of the following, as determined by the faculty advisor: ¹		3
SLPA 6219	Aural Rehabilitation	
Electives from the list below (p. 823)		
Science		
SLPA 5109	Neurology of Communication	3
SLPA 6300	Speech Science	2
Research		
SLPA 6211	Research and Evidence-Based Practice	3
Diversity, Equity, and Inclusion		
SLPA 6360	Diversity, Equity, and Inclusion in Speech-Language Pathology	3
Practicum		
SLPA 6415	Speech-Language Pathology Advanced Clinical Practicum 1 ²	3
SLPA 6416	Speech-Language Pathology Advanced Clinical Practicum 2	2
SLPA 6417	Speech-Language Pathology Advanced Clinical Practicum 3	2
SLPA 6418	Speech-Language Pathology Advanced Clinical Practicum 4	2

¹ Students who are assessed not to require Aural Rehabilitation (SLPA 6219) will choose an *additional* 3 semester hours of electives (below), for a total of 6 semester hours of electives for degree completion.

Electives

Code	Title	Hours
Complete 3 semester hours of coursework from the options below.		3
Students who have previously completed SLPA 5107 (or equivalent, as determined by the faculty advisor) should complete Option B below.		
All other students must complete Option A below.		
Option A		
SLPA 5107	Clinical Procedures	
Option B		
Other courses may be chosen with preapproval of the student's faculty advisor.		
SLPA 6320	Autism	
SLPA 6325	Accent Modification for Speech-Language Pathology	
SLPA 6332	Seminar in Communication Disorders	
SLPA 6339	Language Literacy in Practice	
SLPA 6350	Speech-Language Pathology in Medical Settings	

Optional Thesis

Code	Title	Hours
Complete 3 semester hours across two semesters with prior approval.		3
SLPA 6990	Thesis	

Program Credit/GPA Requirements

Minimum 3.000 GPA required

Speech-Language Pathology, MS—Connect (Charlotte)

Adhering to the highest professional standards, the speech-language pathology graduate program seeks to prepare future speech-language pathologists for the rigors of clinical practice across the life span. Graduates of the program will influence society in profound ways—for example, enabling children with autism to communicate effectively, relieving adolescents' fears of speaking dysfluently in the classroom, and helping stroke survivors resume activities in which they had previously participated. The comprehensive program of study emphasizes teamwork and interdisciplinary approaches to complex service delivery issues. Through academic and clinical experiences, speech-language pathology graduate students acquire the knowledge and skills needed for a lifetime of professional achievement and social contribution.

This program can be completed in six semesters of full-time study and is designed for students entering without a bachelor's degree in communication sciences and disorders or a bachelor's degree in speech-language pathology. Students who already possess a bachelor's degree in communication sciences and disorders or speech-language pathology or who have completed three or more of the bridge courses should consider the MS Speech-Language Pathology (p. 818) program.

Milestone Requirement Options

Students choose either of the following options:

COMPREHENSIVE EXAMINATION

Students must complete a comprehensive examination during the final year in the program in order to graduate. Students must have completed Speech-Language Pathology Advanced Clinical Practicum 4 (SLPA 6418) or be currently enrolled in SLPA 6418 in order to be eligible to take the comprehensive examination. Students may submit a written request to the program director in order to take the comprehensive examination prior to enrolling in SLPA 6418.

MASTER'S THESIS

Students who elect to complete a master's thesis will have the comprehensive examination requirement waived.

Healthcare Leadership, DMSc (Boston)

Northeastern University's Doctor of Medical Science is an interdisciplinary degree designed for medical professionals to advance their education and expand their career opportunities through various healthcare concentration areas. Students from diverse healthcare backgrounds share the common goal of developing facility with healthcare systems and becoming leaders within the greater healthcare community.

In addition to taking core courses in healthcare leadership, advocacy, and research methods, students can obtain additional education in one of several areas of specialization. These concentrations are designed to empower graduates from diverse backgrounds with the technical and analytical expertise that is relevant and in high demand in today's healthcare environment. Students will have the opportunity to collaborate with faculty from the Department of Medical Sciences and world-renowned faculty from a variety of interdisciplinary fields within Northeastern and the greater Boston community. This collaboration allows students to access expertise and knowledge across disciplines that will culminate in the creation of an original thesis study.

This degree will take between 16 and 20 months to complete and can be completed fully online. Some concentrations have on-ground curriculum requirements.

Please visit Bouvé College Learning Outcomes for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Thesis topic approval
Thesis committee
Thesis proposal
Thesis defense

Core Requirements

A grade of B– or higher is required in each course.

Code	Title	Hours
Healthcare Leadership		
MSCI 6001	Principles of Healthcare Advocacy	3
MSCI 6002	Workforce Metrics: Measuring, Comparing, and Privileging the Interprofessional Healthcare Team ⁷	3-4
or HLTH 5800	AI Across the Health Sciences	
MSCI 6003	Healthcare Leadership Seminar	3
PHTH 6204	Society, Behavior, and Health	3
Research		
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	3
MSCI 6900	Research Methods and Design	3
MSCI 6901	Doctoral Writing Seminar	3
MSCI 7990	Thesis	3
Registration in the following course is required if the thesis is not completed by the conclusion of the term of registration for MSCI 7990:		
MSCI 7996	Thesis Continuation - Half-Time ¹	

Concentrations

Completing a concentration is required to complete this program. A minimum of 12 semester hours is required.

- AI Applications (p. 789)
- Business Management (p. 789)
- Exercise Science (p. 790)
- Extreme Medicine (p. 790)
- Health Informatics (p. 790)
- Health Informatics Research (p. 790)
- Health Law (p. 791)
- Interdisciplinary Healthcare Leadership (p. 791)
- Patient Safety (p. 792)
- Public Health (p. 792)

Program Credit/GPA Requirements

Minimum of 36 total semester hours required

Minimum 3.000 GPA required

CONCENTRATION IN AI APPLICATIONS

Code	Title	Hours
Complete 12 semester hours from the following:		12
ARTG 6460	Human-Centered AI	
CS 5047	Exploring AI Trends and Tools	
HLTH 5800	AI Across the Health Sciences ⁸	
PHIL 5110	Responsible AI	

CONCENTRATION IN BUSINESS MANAGEMENT

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
ACCT 6318	Analyzing Accounting Data for Strategic Decision Making	
BUSN 6402	Stakeholder Values and Societal Challenges in Business	
ENTR 6250	Lean Design and Development	
FINA 6318	Financial Management	
HINF 5105	The American Healthcare System	
HRMG 6318	Managing the Organization	
INNO 6225	Acquisitions, Alliances, and Growth	
INNO 6318	Innovation Driven Strategy	
MISM 6201	Database Management for Business	
MISM 6202	Foundations of Data Analysis for Business	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business	
MKTG 6318	Customer Value and the Enterprise	
SCHM 6318	Managing Operations and the Supply Chain	
STRT 6318	Strategic Planning for the Future	

CONCENTRATION IN EXERCISE SCIENCE

Code	Title	Hours
Concentration Required ²		
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing ³	3
EXSC 5220	Advanced Exercise Physiology	3
EXSC 6202	Electrocardiography, Clinical Assessment, and Prescription	3
Selective		
Complete 3 semester hours from the following:		3
EXSC 5200	Cardiopulmonary Physiology	
EXSC 5230	Physical Activity and Exercise: Effects on Musculoskeletal Health and Disease	

CONCENTRATION IN EXTREME MEDICINE

Code	Title	Hours
Complete a minimum of 12 semester hours.		
Concentration Required		
MSCI 5403 and MSCI 5400	Expedition and Wilderness Medicine Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 6}	3
Complete a minimum of 6 semester hours from the following (students may choose additional courses from the list below and/ or an optional experiential elective to meet the minimum 12-semester-hour program requirement):		6-9
MSCI 5001	Human Factors and Situational Awareness	
MSCI 5002	Crisis Resource Management and Case Studies	
MSCI 5003	Humanitarian Aid Practice and Principles	
MSCI 5004	Humanitarian and Disaster Response Ethics	
MSCI 5005	Care During Conflict	
Optional Elective Experiential Courses ⁵		
MSCI 5401 and MSCI 5400	Human Factors and Situational Awareness Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 6}	
MSCI 5402 and MSCI 5400	Expedition and Cold Weather Medicine Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 5, 6}	
MSCI 5405 and MSCI 5400	Humanitarian Medicine Experience and Experiential Reflections: Bridging Theory and Experience ^{4, 5, 6}	

CONCENTRATION IN HEALTH INFORMATICS

Code	Title	Hours
Concentration Required		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3

HINF 6400	Introduction to Health Data Analytics	3
Selective		
Complete 3 semester hours from the following:		3
HINF 5105	The American Healthcare System	
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6205	Creation and Application of Medical Knowledge	

CONCENTRATION IN HEALTH INFORMATICS RESEARCH

Code	Title	Hours
Concentration Required		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6400	Introduction to Health Data Analytics	3
Selective		
Complete 4 semester hours from the following:		4
CS 6350	Empirical Research Methods	
HINF 5300	Personal Health Interface Design and Development	

CONCENTRATION IN HEALTH LAW

Code	Title	Hours
Concentration Required		
LW 6102	Introduction to Legal Studies 2	3
Selectives		
LW 6102 is a prerequisite for the LW courses listed below. Complete 9 semester hours from the following:		9
LW 6110	Law of Information and Records	
LW 6150	Law and Organizational Management	
LW 6180	Health Law Survey	
LW 6181	Healthcare Regulation and Compliance	
LW 6182	Patient Records, Privacy, and Security	
LW 6210	Special Topics in Employee Rights and Employer Obligations	

CONCENTRATION IN INTERDISCIPLINARY HEALTHCARE LEADERSHIP

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
Artificial Intelligence		
ARTG 6460	Human-Centered AI	
CS 5047	Exploring AI Trends and Tools	
HLTH 5800	AI Across the Health Sciences ⁹	
PHIL 5110	Responsible AI

HINF 5407	Business Application of Decision Support in Healthcare
HINF 6205	Creation and Application of Medical Knowledge
HINF 6220	Database Design, Access, Modeling, and Security
HINF 6400	Introduction to Health Data Analytics
Health Law	
LW 6102	Introduction to Legal Studies 2
LW 6102 is a prerequisite for the following LW courses:	
LW 6110	Law of Information and Records
LW 6150	Law and Organizational Management
LW 6180	Health Law Survey
LW 6181	Healthcare Regulation and Compliance
LW 6182	Patient Records, Privacy, and Security
LW 6210	Special Topics in Employee Rights and Employer Obligations
Patient Safety	
HLTH 5600	Introduction to Patient Safety
HLTH 5600 is a concurrent prerequisite for the following HLTH courses:	
HLTH 5610	Patient Safety Science
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness
HLTH 5630	Quality Improvement in Patient Safety
Pharmacy and Health Systems Science	
PHMD 5575	Pharmaceutical Industry
Public Health	
HLTH 5700	Social Determinants of Health
PHTH 5120	Race, Ethnicity, and Health in the United States
PHTH 5212	Public Health Administration and Policy
PHTH 6200	Principles and History of Urban Health
PHTH 6208	Foundations of Community Health Assessment

CONCENTRATION IN PATIENT SAFETY

Code	Title	Hours
Concentration Required		
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

CONCENTRATION IN PUBLIC HEALTH

Code	Title	Hours
Concentration Required

PHTH 5212	Public Health Administration and Policy	3
PHTH 6200	Principles and History of Urban Health	3
PHTH 6208	Foundations of Community Health Assessment	3

- ¹ Students who have not completed their thesis but have already registered for the required number of thesis hours, and have no remaining coursework to complete the degree, may register for Thesis Continuation—Half-Time (MSCI 7996) in their last semester (including summer term). There is a 1-semester-hour tuition charge for Thesis Continuation—Half-Time (MSCI 7996). Thesis Continuation may be taken only once.
- ² Anatomy and Physiology I and II or equivalent and an exercise physiology or medical background are strongly recommended for the Concentration in Exercise Science.
- ³ Physical Activity and Exercise: Prescription, Measurement, and Testing (EXSC 5210) is offered online with a four-day, on-campus, hands-on lab component in a low-residency format.
- ⁴ Courses are offered in partnership with World Extreme Medicine. Additional expenses may be associated with the experience courses. Offered on-ground in a four-day experiential format.
- ⁵ Some of the optional experiential learning experiences are limited to specific groups of medical or allied health professionals.
- ⁶ One semester hour of Experiential Reflections: Bridging Theory and Experience (MSCI 5400) must be completed for each experience course. Experiential Reflections: Bridging Theory and Experience (MSCI 5400) may be taken concurrently or after the associated courses.
- ⁷ Students who select AI Across the Health Sciences (HLTH 5800) (4 semester hours) versus Workforce Metrics: Measuring, Comparing, and Privileging the Interprofessional Healthcare Team (MSCI 6002) (3 semester hours) will incur an additional 1-semester-hour cost beyond the total program credits.
- ⁸ Students who have completed AI Across the Health Sciences (HLTH 5800) as a core requirement must complete the remaining three courses in the Concentration in AI Applications.
- ⁹ Students who have completed AI Across the Health Sciences (HLTH 5800) as a core requirement may not select this course as part of the Concentration in Interdisciplinary Healthcare Leadership requirements.

Physician Assistant, MS (Boston)

Physician assistants are healthcare providers who practice medicine with physician supervision. They are highly sought after members of the healthcare team who provide diagnostic and therapeutic patient care. The physician assistant studies program is a full-time, two-year graduate program that provides an opportunity to earn a Master of Science degree.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/academics/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Only physician assistant courses approved for this program are permitted to be applied to the requirements of this program. Equivalent courses may not be applied to requirements of this program. Students must follow the program requirements associated with their catalog year.

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Capstone project
Summative examination

Core Requirements

A grade of C or higher is required in each course.

Human Movement and Rehabilitation Sciences, PhD (Boston)

The Department of Physical Therapy, Movement, and Rehabilitation Sciences offers a PhD program in human movement and rehabilitation sciences. The PhD program seeks to prepare graduates to conduct independent (original) basic, translational, and applied research with the goal of creating new knowledge about neuromotor mechanisms and methods of restoring and maximizing human functional capacity and well-being across the life span. The program emphasizes core competencies in motor control and motor learning, movement measurement and analysis, knowledge translation theory, and the use of traditional and emerging technologies. The program is based on the integration of core skills and concepts across the multiple disciplines that are associated with human movement and rehabilitation sciences, coupled with the acquisition of research methodology, analyses, and skills, as well as specialization within specific areas of human movement and rehabilitation research.

The program showcases the unique faculty and research laboratories in human movement and rehabilitation sciences, as well as highly ranked programs in Bouvé College of Health Sciences, the College of Science, and the College of Engineering. Northeastern is dedicated to advancing the field of human movement and rehabilitation sciences and translating research from bench to clinic. Students benefit from our new research laboratories utilizing state-of-the-art movement and rehabilitation methods including virtual reality, ultrasound, neuroscience, neurophysiology, robotics, and movement measurement technologies.

Advanced Entry

Based on a student's background in their preceding master's or clinical doctorate degree, core coursework and total hours for the advanced entry program may vary. The graduate program director will consider all the program requirements and applicants' previous experience when advising students on a plan of study. All students, whether entering from traditional or advanced PhD pathways, will complete the milestones as documented in the curriculum.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Milestones

All students, whether entering from traditional or advanced PhD pathways, will complete the following milestones:

- Annual review
- Qualifying exam
- Dissertation committee
- Dissertation proposal
- Dissertation defense

Core Requirements

Code	Title	Hours
Seminar		
Students must enroll in the following course every semester until start of the dissertation phase of the program (the course is repeatable two times for 1 semester hour and four times for 0 semester hours):		2
PT 7030	Interdisciplinary Seminar in Rehabilitation Science	
Rehabilitation Science and Human Movement		
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
PT 7020	Technologies in Movement and Rehabilitation Science	4

Core Requirements

Based on a student's background in their preceding master's degree, core coursework and total hours for the advanced entry program may vary. The graduate program director will consider the following program requirements when advising students on a plan of study.

Code	Title	Hours
Seminar		
Students must enroll in the following course every semester until the start of the dissertation phase of the program:		2
PT 7030	Interdisciplinary Seminar in Rehabilitation Science (Repeatable 2 times for 1 semester hour and 4 times for 0 semester hours)	
Rehabilitation Science and Human Movement		
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
PT 7020	Technologies in Movement and Rehabilitation Science	4

Electives

Code	Title	Hours
Complete a minimum of 3 semester hours from the following. Some courses may require a prerequisite course:		3-4
ARTG 6460	Human-Centered AI	
BIOE 5235	Biomedical Imaging	
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOL 5601	Multidisciplinary Approaches in Motor Control	
CAEP 5877	Research Methods in Applied Psychology	
CAEP 6326	Behavioral Concepts and Principles	
CS 5047	Exploring AI Trends and Tools	
EDUT 6150	AI in Education	
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing	
HLTH 5450	Healthcare Research	
HLTH 5800	AI Across the Health Sciences	
IE 5630	Biosensor and Human Behavior Measurement	
IE 5640	Data Mining for Engineering Applications	
IE 6500	Human Performance	
IE 7315	Human Factors Engineering	

JRNL 6460	AI in Media Industries
ME 5250	Robot Mechanics and Control
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 7247	Advanced Control Engineering
MISM 6250	Strategic AI for Business
PHIL 5110	Responsible AI
PHTH 5202	Introduction to Epidemiology
PHTH 5210	Biostatistics in Public Health
PHTH 6202	Intermediate Epidemiology
PHTH 6210	Applied Regression Analysis
PHTH 6440	Advanced Methods in Biostatistics
PT 5133	Kinesiology
PT 5138	Neuroscience
PT 5150	Motor Control, Development, and Learning
PT 5209	Neurological Rehabilitation 1
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 6221	Neurological Rehabilitation 2
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation

Dissertation

Code	Title	Hours
PT 9990	Dissertation Term 1	
PT 9991	Dissertation Term 2

Minimum 3.000 GPA required

Physical Therapy, DPT—Postbaccalaureate Entry (Boston)

Jessica Maxwell, PT, DPT, PhD

Clinical Professor and DPT Program Director

Department of Physical Therapy, Movement, and Rehabilitation Sciences

301 Robinson Hall

Northeastern University

360 Huntington Avenue

Boston, MA 02115

Tel: 617.373.3508

physicaltherapy@northeastern.edu

Our Post Baccalaureate Doctor of Physical Therapy (DPT) (<http://www.northeastern.edu/bouve/pt/programs/pbdpt.html>) program is designed for individuals who hold a minimum of a baccalaureate degree in any major and have satisfied the prerequisite requirements. Over the course of three years, this rigorous curriculum provides didactic and experiential learning experiences, the cornerstone of our program. These experiences include cooperative education, simulated patient interactions, interprofessional education, human cadaver lab, engagement with consumer clients, service-learning, clinical research, and integrated and full-time clinical education experiences.

The DPT program recognizes that becoming a physical therapist is a developmental process that allows students the opportunity to take risks, reflect, learn from mistakes, and continue to grow to promote lifelong learning. We are committed to a process of actively engaged learning that occurs in the classroom, the research laboratory, the community, and clinical settings regionally and internationally. We strive to provide challenging and leading-edge academic content in an environment supportive of professional development. Our educational philosophy is based upon a strong foundation of biological, psychological, social, and clinical sciences; experiential learning; evidence-based practice; cultural agility and humanistic values; and ethical and professional expectations. This is supported by a commitment of promoting and improving the health of clients and society locally, nationally, and globally. Academic content is student-centered and delivered using both traditional and innovative teaching methods including, but not limited to, lectures, small group projects and discussions, multimedia presentations, expert panel discussions, human cadaver lab, problem-based approaches, case studies, faculty-led research, patient simulation, interprofessional education opportunities, virtual and online learning activities, and self-reflection. Experiential learning, a cornerstone of our curriculum, is embedded in academic course requirements including clinical

education, cooperative education, service-learning, and capstone research projects. These experiences are intentional and align with the philosophical underpinnings of Bouvé College and Northeastern University.

We offer a direct guaranteed acceptance for Northeastern undergraduate students interested in continuing their studies in the DPT program. Undergraduate students interested in this pathway can work with their academic advisor to complete the required prerequisite coursework. Application for admission to the DPT for Northeastern students can be found here (<https://bouve.northeastern.edu/programs/post-baccalaureate-physical-therapy-dpt/#h-admissions-requirements>). Students may also be able to participate in physical therapy-related experiential **cooperative education** to gain experience prior to enrolling. Northeastern graduates are eligible for the Double Husky Scholarship when enrolling in the DPT program, which offers a 25% tuition discount.

Please visit our website (<https://bouve.northeastern.edu/physical-therapy/programs/pbdpt/>) to learn more or email PB_DPT_INQUIRIES@northeastern.edu for more information.

The DPT program offers two concentrations that students are eligible to apply for in their first year.

- A pediatric physical therapy concentration designed to enhance the entry-level physical therapy graduate's ability to engage in interprofessional, family centered services with children from infancy through young adulthood in a variety of settings.
- A sports performance concentration designed to prepare the physical therapist student to confidently pursue a sports physical therapy position working with athletes of all ages in a variety of settings. Students take additional coursework and complete focused research and clinical experiences that expand upon the entry-level physical therapy curriculum.
- Both concentrations are beneficial for students who may wish to pursue clinical residency programs in the area of sports or pediatric physical therapy, including the Massachusetts General Hospital/Northeastern University Sports Physical Therapy Residency Program.

Emphasis on Experiential Learning

COOPERATIVE EDUCATION

Our DPT program provides students with six months of full-time experiential learning in addition to the required clinical education experiences necessary for licensure. Through cooperative education, the hallmark of Northeastern, students are able to integrate semesters of academic study with cooperative education experiences in hospitals and clinics throughout the country. Students may be employed as physical therapy co-ops or perform other health-related duties.

As a part of cooperative education experiences, students will be completing an Integrated Clinical Experience during Co-op Work Experience (PT 6964). This experience will provide clinical experience integrated within the didactic portion of the DPT curriculum. Students will observe and/or participate in patient interview, examination, evaluation, intervention, communication, and documentation skills previously learned in the classroom and cooperative educational experiences. Students will have the opportunity to increase their exposure and familiarity in a clinical setting and develop emerging competency in physical therapy skills. Students will demonstrate personal and professional growth and be able to identify learning needs for success on their future first full-time clinical experience.

CLINICAL EDUCATION

The curriculum also includes three rotations for a total of 31 weeks of full-time clinical education under the direct supervision of a licensed physical therapist. We are affiliated with world-class medical centers and clinical sites throughout the United States, providing students with access to master clinicians and clinical scholars. Every effort is made to accommodate individual circumstances, but students should be prepared to travel out of state for two of the three clinical placements. Availability of a car may be required, as most sites are not accessible by public transportation. All expenses associated with clinical education, including travel and housing, are the responsibility of the student.

GLOBAL OUTREACH

Students may participate in short cultural immersion experiences abroad whereby they engage in community service projects under the direction of a physical therapy faculty member or on physical therapy academic exchanges with partner academic institutions.

SERVICE-LEARNING

During the curriculum, students participate in service-learning opportunities in the local community in which they learn and apply skills and knowledge related to program objectives. These opportunities start during the first academic year and continue throughout the program in a variety of settings.

STUDENT RESEARCH

The Department of Physical Therapy, Movement, and Rehabilitation Sciences' research mission is to build the evidence for best practices to maintain and improve the health and well-being of local, national, and global community members. Students have the opportunity to work with faculty to conduct ongoing research in world-renowned medical centers and in one of the eight Department of Physical Therapy, Movement, and Rehabilitation Sciences' labs and centers, including Neuromotor Systems Lab, Laboratory for Locomotion Research, Movement Neuroscience Laboratory, Musculoskeletal Epidemiology and Biomechanics Laboratory, Occupational Biomechanics and Ergonomics Laboratory, Teaching and Learning Innovation Lab, Neuroscience Wet Lab, and the Center for Cognitive and Brain Health Program.

Progression in the DPT Program

To progress in the program, students must maintain acceptable standards of academic performance as stated in the program requirements section, including successful completion of all didactic, integrated clinical education cooperative education and full-time clinical education experiences. Students must demonstrate appropriate skills and professional behaviors to progress in the program. Students must develop appropriate motor

skills, professional behaviors, and emotional maturity as outlined in the essential functions. The program in physical therapy is accredited by the Commission on Accreditation in Physical Therapy Education of the American Physical Therapy Association.

Graduates of the DPT program are eligible to sit for the National Physical Therapy Examination in pursuit of licensure.

PROFESSIONAL BEHAVIORS REQUIREMENT

In order to promote professionalism in the classroom, local and global communities, and clinical settings, the physical therapy program requires the demonstration of professional behaviors in accordance with the professional behaviors policy. The purpose of professional behaviors procedures is to help remediate students who have been identified as having professional behavior issues in an academic, cooperative, or clinical education setting. Professional standards are outlined in the student manual and may include but are not limited to the APTA Code of Ethics for the Physical Therapist (https://www.apta.org/uploadedFiles/APTAorg/About_Us/Policies/Ethics/CodeofEthics.pdf) and/or the APTA Guide for Professional Conduct (http://www.apta.org/uploadedFiles/APTAorg/Practice_and_Patient_Care/Ethics/GuideforProfessionalConduct.pdf).

Any faculty member who has a concern about a student's professional behavior will arrange to meet with the student to discuss the issue. If the faculty member has met with the student and there is satisfactory resolution of the unprofessional conduct, only a form for tracking purposes is needed.

The tracking form shall be kept on record in order to track these students while they are in the program. A request for committee reviews as indicated on the tracking form must occur under the following conditions:

- a. A faculty member has attempted to correct the behavior, and it has not been corrected after meeting with the student and taking initial steps to improve the identified professional behavior issues.
- b. The incident is egregious.
- c. A second breach of professional standards has occurred.

Full Professional Behaviors Violation Review Process

- a. The chairperson of the PTMRS Academic Affairs Committee will send a letter to students about whom concerns have been raised and instruct each student to complete a Self-Assessment of Professional Behaviors. A meeting date will be set to discuss the concern. If the committee finds there is sufficient evidence to support a violation of the professional standards previously defined, one will be noted in the student's record.
- b. The AAC will develop an appropriate remediation plan in collaboration with the student and appropriate faculty.
- c. Depending on the situation, students may have the opportunity to improve professional behaviors.
- d. Any of the following may result in a dismissal from the program:
 - i. A third breach of professional standards
 - ii. A second offense of the same professional standard
 - iii. An egregious breach of a professional standard as outlined in the student manual and/or behaviors that may include but are not limited to violation of the APTA Code of Ethics for the Physical Therapist and/or the APTA Guide for Professional Conduct

If a student believes they have been erroneously, capriciously, or otherwise unfairly treated in the process or decision, they may appeal decisions made by the PTMRS AAC to the chair of PTMRS.

If the student has been suspected of cheating or in any way violating the Academic Code of Conduct, the student will be referred to the AAC as well as Office of Student Conduct and Conflict Resolution. Any concern regarding the student's professional behavior will be brought to the attention of the faculty as appropriate.

Doctor of Physical Therapy Program Goals

STUDENT

1. Demonstrate effective written, verbal, technological, and nonverbal communication skills in all professional settings.
2. Demonstrate leadership and advocacy skills.
3. Demonstrate professional and social responsibility by participating in local, national, and/or global initiatives.

GRADUATE

1. Be clinically competent and culturally sensitive doctors of physical therapy who, guided by the APTA Core Values, excel in patient/client management.
2. Exhibit professionalism, commitment to lifelong learning, and use of evidence-based practice.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of C or higher (or "Satisfactory" for experiential education experiences) is required in all courses.

Code	Title	Hours
Foundations		
PT 5101 and PT 5102	Foundations of Physical Therapy and Lab for PT 5101	4
PT 6330 and PT 6331	Functional Anatomy 1 and Lab for PT 6330	3
PT 6340 and PT 6341	Functional Anatomy 2 and Lab for PT 6340	5
PT 6350 and PT 6351	Foundations of PT Examination and Therapeutic Activities and Lab for PT 6350	5
Core		
PT 5138 and PT 5139	Neuroscience and Lab for PT 5138	5
PT 5140	Pathology	4
PT 5150 and PT 5151	Motor Control, Development, and Learning and Lab for PT 5150	5
PT 5160	Psychosocial Aspects of Healthcare	3
PT 5209 and PT 5210	Neurological Rehabilitation 1 and Lab for PT 5209	5
PT 5226	Physical Therapy Professional Seminar 2	2
PT 5500	Pharmacology for Physical Therapy	2
PT 5503 and PT 5504	Cardiovascular and Pulmonary Management and Lab for PT 5503	5
PT 5515 and PT 5516	Integumentary Systems and Lab for PT 5515	3
PT 5540	Clinical Integration 1: Evidence and Practice	2
PT 6221 and PT 6222	Neurological Rehabilitation 2 and Lab for PT 6221	5
PT 6243	Health Education, Promotion, and Wellness	3
PT 6245	Seminar for PT 6243	1
PT 6250	Clinical Integration 2: Evidence and Practice	2
PT 6251	Diagnostic Imaging	3
PT 6305 and PT 6306	Musculoskeletal Management I and Lab for PT 6305	5
PT 6405 and PT 6406	Musculoskeletal Management II and Lab for PT 6405	5
PT 6420	PT Administration and Management within the U.S. Healthcare System	4
PT 6505 and PT 6506	Musculoskeletal Management 3 and Lab for PT 6505	4
PT 6520 and PT 6521	Prosthetic Management and Lab for PT 6520	2
PT 6550	Pediatric Aspects of Life Span Management	3
PT 6555	Geriatric Aspects of Life Span Management	2
PT 6600	Special Topics	2
Clinical		
PT 6441	Clinical Education 1	6
PT 6442	Clinical Education 2	6
PT 6450	Clinical Education 3	8
Research		
PT 6510	Evidence-Based Practice and Research Design	3
PT 6511	Research Methods and Statistics in PT	2

PT 6512	DPT Capstone 1	1
PT 6513	DPT Capstone 2	2
Co-op		
PT 5111	Professional Development for Bouvé Graduate Co-op	1
PT 6964	Co-op Work Experience (taken two semesters)	0

Optional Concentration

- Pediatric Physical Therapy (p. 838)
- Sports Performance (p. 838)

Program Credit/GPA Requirements

123 total semester hours required (138–143 semester hours with optional concentration)

Minimum 3.000 GPA required

Concentration in Pediatric Physical Therapy

Code	Title	Hours
Required		
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
PT 6512	DPT Capstone 1 ¹	1
PT 6513	DPT Capstone 2 ¹	2
PT 6550	Pediatric Aspects of Life Span Management	3
Complete one of the following:		6-8
PT 6442	Clinical Education 2	
PT 6450	Clinical Education 3	

Concentration in Sports Performance

Code	Title	Hours
Required		
PT 5165	Sports Medicine: Managing the Injured Athlete	4
PT 6237	Advanced Special Topics in Physical Therapy ²	2
PT 6512	DPT Capstone 1	1
PT 6513	DPT Capstone 2	2
Complete one of the following:		6-8
PT 6442	Clinical Education 2	
PT 6450	Clinical Education 3	

¹ Pediatric physical therapy concentration students will be assigned a faculty with expertise in pediatric physical therapy. Pediatric-focused PT project proposals will be reviewed and approved by the director of the pediatric physical therapy concentration in line with current course requirements.

² Sports performance concentration students will be assigned a faculty project in sports, orthopedic, and/or anatomy. PT project proposals will be reviewed and approved by the director of the sports performance concentration in line with current course requirements.

Academic Progression Policies

ACADEMIC STANDING

Students must maintain an overall grade-point average of #3.000 #or higher and successfully complete all professional courses (including cooperative education, integrated clinical education, and full-time clinical education experiences) with a grade of C or better (or Satisfactory for experiential education experiences) to progress into the subsequent semester of professional courses.

PROBATION IN THE PROFESSIONAL PHASE

Students in the professional phase of the program who fail any professional course or whose overall GPA drops below a 3.000 must request to the department's Academic Affairs Committee to be granted a semester of academic probation to remediate the deficiency by the semester deadline set by the PTMRS Academic Standing Committee in order to remain in the Doctor of Physical Therapy program. Failure to request probation in a timely manner will result in a student being dismissed from the program.

A DPT student may only be placed on academic probation for one semester at a time or until the failed course is offered again. A DPT student may only be placed on academic probation a maximum of twice during the entire professional phase of the program.

During probation, students must correct all deficiencies as specified in their respective signed probation plan during the applicable probationary period. Failure to remediate the deficiencies within the agreed-upon time will result in dismissal from the program. During the period of probation, the student must earn a semester GPA of 3.000 or better, or the student will be dismissed from the DPT program. Once the student has successfully completed their probation action plan, they should work with their academic advisor to be removed from probation.

The chair of the department's Academic Affairs Committee may grant a DPT student's request for probation without a formal meeting under the following circumstances:

- The student has not already reached their maximum two semesters of probation.
- The student is in good professional standing with the Professional Behaviors Committee in accordance with the professional behaviors policy.

PROFESSIONAL BEHAVIORS REQUIREMENT

See Progression in the DPT Program located in the overview text.

Academic Dismissal from Major

Students in the DPT program will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Failure to earn a grade of C or better in a total of three professional courses, regardless of remediation. Within the physical therapy program, each specific professional course (with separate registration number) will be counted as a separate failure even if content is related.
- Failure to remediate a prior deficiency outlined within the probation contract within the agreed-upon time frame.
- Failure to earn the minimum required grade in the same course twice.
- Failure to maintain an overall GPA of 3.000 or higher during the professional phase of the DPT program. Students will be dismissed if they are not eligible for a probationary status.
- Physical therapy students will be permitted only two changes in year of DPT graduation. Any additional changes to year of graduation will result in the student being dismissed from the program.
- Students who do not adhere to the professional standards of the program are violating academic policy and will be dismissed if any of the following occurs:
 - A third breach of professional standards
 - A second offense of the same professional standard
 - Any egregious breach of a professional standard as outlined in the student manual and/or behaviors that may include but are not limited to violation of the APTA Code of Ethics for the Physical Therapist and/or the APTA Guide for Professional Conduct

Appeal of Academic Standing

Students may request, through their academic advisor, to appeal to the chair of the department's Academic Standing Committee to meet with the committee for an exception to the Academic Progression and Probation Policy for DPT program for extenuating or capricious circumstances as provided in the student's respective handbook.

Essential Functions for Physical Therapy Students

The DPT program at Northeastern University is a challenging and intense program, which places specific demands on a student enrolled in the program. The academic rigor of the program closely corresponds to intellectual and physical demands that a graduate will encounter as a practicing physical therapist. Northeastern's DPT program is designed to prepare students to enter the physical therapy profession as a generalist with the skills, knowledge, and ability to successfully perform all the required functions of an entry-level physical therapist. Essential functions are the aptitudes and abilities required of physical therapist students to successfully complete the curriculum of the DPT program and to perform the clinical skills of a physical therapist consistent with patient/client management as detailed in the Guide to Physical Therapy Practice.

The purpose of this document is to delineate the essential functions that are fundamental to the DPT program. Upon admission, students must be able to perform each of the essential functions outlined below during classroom, laboratory, and experiential education learning activities (including, but not limited to, participation in one-on-one interactions, small group discussion and presentation, large group lectures, service-learning, and patient encounters) in both academic, community, and clinical settings.

Students are also required to demonstrate good judgment, responsibility, integrity, sensitivity, and compassion, while simultaneously being able to accurately synthesize and apply knowledge in a timely and safe manner.

Students are required to perform the following essential functions of the DPT program:

Communication Functions

1. Read, understand, and communicate information in written and spoken formats using the English language.
2. Interpret and respond to the verbal, nonverbal, and written communications of others in an appropriate, professional manner.

Affective Functions

1. Establish, value, and continue to develop professional, respectful, empathetic relationships with individuals from all lifestyles, cultures, ages, socioeconomic backgrounds, and abilities.

2. Develop, value, and maintain effective working relationships with faculty, students, professional colleagues, peers, patients/clients, families, and the general public.
3. Meet externally imposed deadlines and time requirements.
4. React effectively in challenging situations with use of appropriate resources.
5. Demonstrate an ability to function effectively in complex, highly stimulating environments.
6. Demonstrate responsibility for self-directed assessment, reflection, and professional growth.
7. Demonstrate core values of honesty, integrity, and accountability for the consequences of one's own actions.
8. Demonstrate ethical behavior, proper judgement, and decision-making skills.

Cognitive Functions

1. Demonstrate self-management skills including planning, organizing, time management, and adhering to legal/regulatory requirements.
2. Use a variety of sources including reading material, lecture, discussion, observation, and physical examinations to:
 - a. Recall, interpret, extrapolate, and apply information
 - b. Measure, analyze, synthesize, and evaluate information
 - c. Gather and prioritize information needed to solve a problem
3. Respond appropriately to emerging problems and potentially hazardous situations by making timely judgments to react effectively and seek assistance when necessary.
4. Accept and apply constructive feedback.

Psychomotor Functions

1. Possess physical strength, stamina, balance, movement, hand-eye coordination, and dexterity required to perform patient care tasks in a manner that does not compromise the safety of self or others.
2. Perform intermittent physical activity of the whole body throughout an 8- to 12-hour period.
3. Engage in complex, coordinated movements needed during a variety of activities including skills lab practice, manual techniques, patient examination, intervention, and guarding.
4. Utilize auditory, visual, and tactile senses to receive information from written, spoken, and nonverbal communication mechanisms; observation of human structures; postures and movements; and equipment and or technology.
5. Quickly and appropriately react to sudden or unexpected events or movements of others.

For further information and clarification, please refer to the Post Baccalaureate Doctor of Physical Therapy (PBDPT) Student Handbook (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Handbooks.aspx>) and Clinical Education Student Manual (<https://northeastern.sharepoint.com/sites/BouveCurrentStudentResources/SitePages/Handbooks.aspx>).

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design

- XR and Design
- XR and Games
- XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouvé College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4

MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8
HIST 5241	Exhibits and Museums	
HIST 7250	Topics in Public History (Public History and Slavery)	
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)	

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	

ARTG 6310	Design for Behavior and Experience
ARTG 6330	Information Design Mapping Strategies

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
GSND 6460	Generative Game Design	

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
JRNL 5311	Design for Storytelling	
JRNL 6305	Topics	
JRNL 6341	Telling Your Story with Data	

Plan of Study

Sample Plan of Study

The following is a sample plan of study for a student in the Concentration in XR and Games.

Year 1			
Fall	Hours	Spring	Hours
EXRE 5010 and EXRE 5011		5 EXRE 5030	4
EXRE 5020		4 GSND 5110 and GSND 5111	5
		9	9
Year 2			
Fall	Hours	Spring	Hours
EXRE 6500		4 EXRE 7500	4
GSND 5122		1 XR and games elective 2	4
XR and games elective 1		4	
		9	8
Total Hours: 35			

Human Movement and Rehabilitation Sciences, MS (Boston)

A strong global need exists for interdisciplinary, innovative, and translational research and practice directed toward improving quality of life and participation of all people in our communities. To meet this need, we offer a novel Master of Science in Human Movement and Rehabilitation Sciences. Human movement and rehabilitation sciences encompasses a broad range of topics including sports performance, functional assessments, occupational biomechanics and ergonomics, motor control and learning, neuroscience, musculoskeletal disorders, orthopedics, aging, assistive technology, injury prevention and rehabilitation, communication sciences, speech, and early development.

The objective of this program is to prepare graduates to assist in advancing basic, translational, and applied research, as well as practice in human movement and rehabilitation sciences. The program is based on the integration of core skills and concepts across the multiple disciplines that are associated with human movement and rehabilitation sciences, coupled with the acquisition of skills and tools, and specialization within specific areas and concentrations in AI applications and exercise science.

The Master of Science in Human Movement and Rehabilitation Sciences program is housed in the Department of Physical Therapy, Movement, and Rehabilitation Sciences, offering excellent collaborative teaching and research programs across the departments and school of the Bouvé College of Health Sciences, the Khoury College of Computer Sciences, the College of Engineering, and the College of Science. The 12-month program requires 32 semester hours of required and elective courses, including 4 semester hours devoted to the capstone project.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Seminar		
PT 7030	Interdisciplinary Seminar in Rehabilitation Science	1
Rehabilitation Science and Human Movement		
Complete one of the following:		4
PT 5170 and PT 5171	Motor Control and Lab for PT 5170	
PT 5321	Applications of Biomechanics in Human Function and Movement	
Complete the following:		
PT 6230	Capstone Project: Human Movement and Rehabilitation Sciences	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
PT 7020	Technologies in Movement and Rehabilitation Science	4

Concentration or Electives Option

A concentration is not required. Students may complete the electives option in lieu of a concentration.

- AI Applications (p. 845)
- Exercise Science (p. 846)
- Electives Option (p. 846)

Program Credit/GPA Requirements

Minimum 32 total semester hours required

Minimum 3.000 GPA required

CONCENTRATION IN AI APPLICATIONS

Code	Title	Hours
Complete a total of 12 semester hours for this concentration.		
HLTH 5800	AI Across the Health Sciences	4
Complete 8 semester hours from the following:		8
ARTG 6460	Human-Centered AI	

CS 5047	Exploring AI Trends and Tools
PHIL 5110	Responsible AI

CONCENTRATION IN EXERCISE SCIENCE

Code	Title	Hours
Complete 12 semester hours from the following:		12
EXSC 5200	Cardiopulmonary Physiology	
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing	
EXSC 5220	Advanced Exercise Physiology	
EXSC 5230	Physical Activity and Exercise: Effects on Musculoskeletal Health and Disease	
EXSC 5240	Clinical Nutrition Applications in Health and Disease	
EXSC 6202	Electrocardiography, Clinical Assessment, and Prescription	
EXSC 6400	Applied Research Methods	

ELECTIVES OPTION

Code	Title	Hours
Some courses may require prerequisite coursework.		
Complete 12 semester hours from following (students must petition to take electives outside the approved list):		12
BIOE 5235	Biomedical Imaging	
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOL 5601	Multidisciplinary Approaches in Motor Control	
CAEP 6326	Behavioral Concepts and Principles	
EXSC 5200	Cardiopulmonary Physiology	
EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing	
EXSC 5220	Advanced Exercise Physiology	
EXSC 5230	Physical Activity and Exercise: Effects on Musculoskeletal Health and Disease	
EXSC 5240	Clinical Nutrition Applications in Health and Disease	
EXSC 6202	Electrocardiography, Clinical Assessment, and Prescription	
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	
HLTH 5450	Healthcare Research	
IE 5630	Biosensor and Human Behavior Measurement	
IE 6500	Human Performance	
IE 7315	Human Factors Engineering	
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
ME 5665	Musculoskeletal Biomechanics	
ME 7247	Advanced Control Engineering	
PHTH 5202	Introduction to Epidemiology	
PHTH 6202	Intermediate Epidemiology	
PHTH 6210	Applied Regression Analysis	
PHTH 6440	Advanced Methods in Biostatistics	
PT 5138	Neuroscience	
PT 5150	Motor Control, Development, and Learning	
PT 5209	Neurological Rehabilitation 1	
PT 5410	Functional Human Neuroanatomy	
PT 6221	Neurological Rehabilitation 2	

Extreme Medicine, Graduate Certificate (Boston)**Overview**

The Graduate Certificate in Extreme Medicine is an interprofessional program designed to prepare healthcare professionals to provide medical services in austere conditions. The core didactic courses are delivered online and provide foundational instruction in human factors, crisis resource management, efficiency of highly skilled teams, and theory and ethics of care in humanitarian crises.

In addition to the online courses, students take one or more on-ground experiential courses offered in an executive format. Experiential courses enable students to complete intensive, hands-on training and apply the principles of extreme medicine. This program is offered in collaboration with World Extreme Medicine (WEM (<https://worldextrememedicine.com/>)).

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/academics/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Core Requirements

A grade of B– or higher is required in each of the following:

Code	Title	Hours
Complete a minimum of 6 semester hours from the following courses. Students may choose additional courses from the list below and/or an optional experiential elective to meet the minimum 12 SH program requirement.		6-9
MSCI 5001	Human Factors and Situational Awareness	
MSCI 5002	Crisis Resource Management and Case Studies	
MSCI 5003	Humanitarian Aid Practice and Principles	
MSCI 5004	Humanitarian and Disaster Response Ethics	
MSCI 5005	Care During Conflict	

Experiential Coursework

Code	Title	Hours
Required Experiential Courses		
MSCI 5403 and MSCI 5400	Expedition and Wilderness Medicine Experience and Experiential Reflections: Bridging Theory and Experience	3
Optional Experiential Electives		
The following experiential courses are optional, but each requires one additional SH of MSCI 5400.		
MSCI 5401 and MSCI 5400	Human Factors and Situational Awareness Experience and Experiential Reflections: Bridging Theory and Experience ¹	
MSCI 5402 and MSCI 5400	Expedition and Cold Weather Medicine Experience and Experiential Reflections: Bridging Theory and Experience ¹	
MSCI 5405 and MSCI 5400	Humanitarian Medicine Experience and Experiential Reflections: Bridging Theory and Experience ¹	

¹ Courses are offered in partnership with World Extreme Medicine (WEM (<https://worldextrememedicine.com/>)). Additional expenses may be associated with the experience courses.
One semester hour of Experiential Reflections: Bridging Theory and Experience (MSCI 5400) must be completed for each experiential course.
Some optional experiential courses may be restricted to licensed or credentialed professionals or to students in the last two years of study in a medical or allied health professional program.
Offered on ground in a 4-day experiential format.

After completion of the 12 required semester hours, students are eligible to register for any of the remaining courses using Bouvé College's Special Student (<https://registrar.northeastern.edu/article/non-matriculated-registration/>) registration process.

The School of Community Health and Behavioral Sciences offers students interdisciplinary education and research excellence—drawing on novel health technologies and data literacy to address society's most pressing public health issues.

Students in the school are prepared to be the next generation of innovators and thought leaders in the health professions and public health. They will have an opportunity to be empowered to affect real change by leveraging new and emerging technologies and data.

The school is designed to improve individuals, communities, and society through three pillars of excellence:

- Health technologies
- Public mental health
- Social and environmental determinants of health to achieve social justice

Department of Applied Psychology

Graduate programs in the Department of Applied Psychology (including a doctoral program in counseling psychology and a doctoral program in school psychology that are accredited by the American Psychological Association) reflect Northeastern University's tradition of practice-oriented education with an ecological and multicultural focus. Faculty and students come from diverse ethnic and cultural backgrounds, providing an enriching learning experience in which students work with faculty who are national and world leaders in various areas of mental and behavioral health. The department is a scientist-practitioner-based unit that generates new psychological knowledge through research and the translation of research to applications that promote mental and physical health across the life span.

We offer leading licensure-focused master's programs in applied behavioral analysis, counseling psychology, and school psychology. In addition, we offer a master's in applied psychology, certificates in applied psychology and early intervention, and undergraduate minors in health psychology and mindfulness. Consistent with Northeastern, the Department of Applied Psychology emphasizes experiential and field-based learning in schools, community organizations, and private practices and the integration of science and practice. We prepare students to become mental and behavioral health professionals in a variety of educational, government, community, organizational, and private settings. Our doctoral programs provide excellent educational opportunities for those interested in mental and behavioral health research with specialized training for future careers in academic or practice positions as licensed psychologists.

Department of Public Health and Health Sciences

The Department of Public Health and Health Sciences in the Bouvé College of Health Sciences at Northeastern University provides a unique, transdisciplinary setting that incorporates academics, research, and practice and seeks to prepare students for a wide range of career paths. We offer two accredited bachelor's degrees in health sciences and public health; joint bachelor's degrees with the School of Law; and options for combined majors with the D'Amore-McKim School of Business, the College of Social Sciences and Humanities, the College of Science, the College of Engineering, and the Khoury College of Computer Sciences. In addition, the department offers minors in exercise science, public health, global health, and nutrition. We also offer several graduate degrees: Master of Public Health, Master of Science in Health Informatics in collaboration with Khoury College of Computer Sciences, and a combined master's in the two fields. Our Master of Public Health program is offered part time, full time, as a one-year accelerated online program, and at our Charlotte campus as a primarily online program with an intensive, one-week residency program. At the doctoral level, we offer a PhD program in population health and, in cooperation with Khoury, a PhD in personal health informatics.

Our diverse faculty has expertise in the fields of biostatistics/data science, community and rural health, environmental health, epidemiology, global health, health promotion and education, health policy, health technology, mental health, and more. Students have the opportunity to work side by side with faculty in conducting cutting-edge research in these fields.

In line with Northeastern's commitment to interdisciplinary research and urban engagement, we teach and work closely with many other schools, centers, and institutes in the university including the Institute for Health Equity and Social Justice Research; the Center for Community Health Education, Research and Service; the Social Science Environmental Health Research Institute; and the Center for Health Policy and Healthcare Research; as well as community agencies and neighborhood health centers in the local Boston area and beyond.

Graduate Certificates

- AI Applications (Boston) (p. 190)
- Health Informatics Management and Exchange (Boston) (p. 815)

Counseling Psychology, PhD (Boston)

The Doctor of Philosophy in Counseling Psychology program is accredited by the American Psychological Association (APA). It is designed to train the next generation of mental health professionals. The program offers doctoral education and training in psychology and seeks to prepare students for entry-level practice in counseling psychology. Doctoral-level counseling psychologists conduct research, teach at the university level, supervise students and professionals, consult with community agencies, and provide clinical services to people across the developmental life span. Counseling psychologists also enhance the science of health promotion and health psychology and emphasize community-based interventions. It is the mission of the PhD in Counseling Psychology program to train multiculturally competent counseling psychologists who are clinically adept in multiple settings with a variety of psychological and health-related issues and who are able to conceptualize, conduct, and evaluate research across biological, cultural, and relational systems in numerous social contexts, such as families, schools, neighborhoods, and communities.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual review

Four qualifying examinations completed in the first three years—research, ethics, assessment, and intervention

Research team during the first year (two consecutive semesters)

Dissertation committee

Dissertation proposal

Dissertation defense

Core Requirements

A grade of B or higher is required in all coursework.

Code	Title	Hours
Basic		
CAEP 6390	History and Systems of Psychology	3
CAEP 6394	Advanced Multicultural Psychology	3

School Psychology, PhD (Boston)

Northeastern University's Doctor of Philosophy in School Psychology program is accredited by the American Psychological Association and the National Association of School Psychologists. The program is designed to prepare the next generation of leaders in school psychology. The ecological perspective and scientist-practitioner training model provide the foundation for the program's educational goals. Students have an opportunity to learn how to conduct research, to use research to inform practice, and to contribute to the scientific foundation of professional practice.

School Psychology, CAGS (Boston)

Northeastern University's Certificate of Advanced Graduate Study in School Psychology is approved by the National Association of School Psychologists and the Massachusetts Department of Elementary and Secondary Education. The overarching purpose of the program is to develop highly competent school psychologists. Some students also choose to concentrate in applied behavior analysis or concurrently enroll in the Graduate Certificate in Early Intervention (p. 813). The option to concurrently enroll in early intervention training is designed to prepare school psychologists to work with infants and toddlers and their families in community and related agencies, on interdisciplinary teams, and on the transition to school. The applied behavior analysis concentration is designed to prepare school psychologists to address the learning and behavioral needs of children and adolescents with challenging behaviors in school, home, and community settings, including children with autism spectrum disorders.

Please see also the Master of Science in Applied Educational Psychology (p. 858) program.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Minimum 3.000 GPA required

Applied Behavior Analysis, MS (Boston)

The Master of Science in Applied Behavior Analysis program is designed to equip graduates with the skills to provide effective, compassionate behavior analytic services to students and clients across the life span in a variety of settings. Students are provided with flexible options to meet coursework and supervised fieldwork requirements to be eligible to take the Board Certified Behavior Analyst (BCBA®) examination. Courses explore the principles and procedures of applied behavior analysis in-depth and address its scientific and philosophical underpinnings. With this background, successful graduates are prepared to address the most complex behavior problems and learning challenges.

Curriculum

The program requires completion of a 30-semester-hours course sequence and offers an option to add on up to 4 semester-hours to accrue further supervision at Northeastern University. The required sequence includes eight core courses, two experiential learning courses, and two courses that will guide students through completion of a scholarly project.

Courses are delivered in online or hybrid formats, with the majority of work being able to be completed asynchronously. Specific courses also include optional or required in-person or synchronous remote meeting times.

EXPERIENTIAL LEARNING AND INTENSIVE PRACTICUM

Required experiential learning courses Experiential Learning in Skill Acquisition (CAEP 8412) and Experiential Learning in Behavioral Supervision (CAEP 8413) and optional intensive practicum courses Intensive Practicum in Applied Behavior Analysis 1 (CAEP 8417) and Intensive Practicum in Applied Behavior Analysis 2 (CAEP 8418) are offered to give students practice engaging in behavior analytic activities. Additionally, students may elect to accrue their supervised fieldwork requirement toward BCBA® eligibility through these classes.

PROJECT-BASED COURSES

During the final year of the program students will enroll in Systematic Inquiry in Behavior Analysis 1 (CAEP 7412) and Systematic Inquiry in Behavior Analysis 2 (CAEP 7413). This set of courses is designed for students to progressively complete a scholarly project. Students will be able to select the type of project. The outcome of the first semester will be a presented proposal, and a final written report will be the outcome of the second semester.

Programs of Study

Students who follow either sample program of study, taking 6 semester hours per academic term, will complete the Master of Science in Applied Behavior Analysis in 20 months. Courses are offered during the fall, spring, and full summer semesters with each course being offered twice per year.

Alternative options to this program of study may include:

- Completing the program in four semesters (16 months)—this involves taking 9 semester hours for two semesters and 6 semester hours for two semesters.
- Completing the program in more than five semesters—this involves taking 3 semester hours for some or all of the semesters during the program.
- Enrolling in optional intensive practicum courses—this involves adding up to two additional courses to the program of study to accrue additional supervised fieldwork hours while enrolled in the program.

Students planning on changing their program of study must complete an Alternative Program of Study form and have it approved by their faculty advisor to avoid semesters where courses they need are not offered.

Policies and Procedures

Please see Bouvé College of Health Sciences Academic Policies and Procedures (<https://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/>). Program-specific policies follow below.

GRADING, ACADEMIC PROBATION, AND ACADEMIC DISMISSAL

If a student earns a grade of B– or lower, they will be placed on academic probation. In order to return to nonprobationary status, the student must retake the course during the next semester in which it is offered and earn a B or better. Failure to do so or earning a B– or below in any remaining course will result in dismissal from the Master of Science in Applied Behavior Analysis program.

COURSE PROGRESSION

Students are expected to register for at least one course per academic term. In order to take a semester off (including the full summer semester), students must contact their faculty advisor to inform them of the timeline and apply for a leave of absence. Students who do not apply for a leave of absence prior to skipping a semester may need to reapply when returning to their coursework.

Program Requirements

Students must complete all core, experiential learning, and project-based courses to successfully complete the program.

Core Courses

Students enrolled in the program should pass Behavioral Concepts and Principles (CAEP 6326) and Ethics for Behavior Analysts (CAEP 6329) prior to registering for other courses unless otherwise advised.

Code	Title	Hours
CAEP 6326	Behavioral Concepts and Principles	3
CAEP 6327	Behavior Assessment	3
CAEP 6328	Single-Case Research Design	3
CAEP 6329	Ethics for Behavior Analysts	3
CAEP 6341	Behavioral Interventions	3
CAEP 6342	Consultation, Supervision, and Management	3
CAEP 6343	Radical Behaviorism and Verbal Behavior	3
CAEP 6344	Experimental Analysis of Behavior	3

Experiential Learning Course

Experiential learning courses require students to have a site at which they are able to complete behavior analytic projects. There are additional requirements for students wishing to accrue supervised fieldwork hours through these courses.

The semester prior to the onset of each of these classes, the director of supervision will connect with students to confirm arrangements of an adequate worksite to complete all required activities and meeting availability. It is the responsibility of the student to comply with all deadlines throughout this process, or they will not be permitted to enroll in the course.

A grade of Satisfactory (S) is required for each of these courses.

Code	Title	Hours
CAEP 8412	Experiential Learning in Skill Acquisition	2
CAEP 8413	Experiential Learning in Behavioral Supervision	2

Project-Based Courses

The project-based courses are designed to be taken concurrently so that students are guided through completion of a scholarly project. Prior to enrolling in Systematic Inquiry in Behavior Analysis 1 (CAEP 7412), students will work with faculty to plan for their project.

Code	Title	Hours
CAEP 7412	Systematic Inquiry in Behavior Analysis 1	1
CAEP 7413	Systematic Inquiry in Behavior Analysis 2	1

Optional Courses

Students may elect to take up to two intensive practicum courses to fulfill additional supervised fieldwork hours. In order to register for these classes, students must complete all preparation tasks the semester prior to enrollment.

These courses can be started during the student's second semester in the program. They cannot be taken at the same time as experiential learning courses Experiential Learning in Skill Acquisition (CAEP 8412) and Experiential Learning in Behavioral Supervision (CAEP 8413).

Contact the director of supervision for additional information and preparation tasks.

Code	Title	Hours
CAEP 8417	Intensive Practicum in Applied Behavior Analysis 1	2
CAEP 8418	Intensive Practicum in Applied Behavior Analysis 2	2

Applied Behavior Analysis, MS (Charlotte)

The Master of Science in Applied Behavior Analysis program is designed to equip graduates with the skills to provide effective, compassionate behavior analytic services to students and clients across the life span in a variety of settings. Students are provided with flexible options to meet coursework and supervised fieldwork requirements to be eligible to take the Board Certified Behavior Analyst (BCBA®) examination. Courses explore the principles and procedures of applied behavior analysis in-depth and address its scientific and philosophical underpinnings. With this background, successful graduates are prepared to address the most complex behavior problems and learning challenges.

Curriculum

The program requires completion of a 30-semester-hour course sequence and offers an option to add on up to 4 semester hours to accrue further supervision at Northeastern University.

Courses are delivered in online or hybrid formats, with the majority of work able to be completed asynchronously. Specific courses also include optional or required in-person or synchronous remote meeting times.

INTENSIVE PRACTICUM

Optional intensive practicum courses are offered to give students practice engaging in behavior analytic activities. Additionally, students may elect to accrue their supervised fieldwork requirement toward BCBA® eligibility through these classes.

Programs of Study

Courses are offered during the fall, spring, and full summer semesters with each course being offered twice per year.

Alternative options to this program of study may include:

- Completing the program in four semesters (16 months)—this involves taking 9 semester hours for two semesters and 6 semester hours for two semesters.
- Completing the program in more than five semesters—this involves taking 3 semester hours for some or all of the semesters during the program.

- Enrolling in optional intensive practicum courses—this involves adding up to two additional courses to the program of study to accrue additional supervised fieldwork hours while enrolled in the program.

Students planning on changing their program of study must complete an Alternative Program of Study form and have it approved by their faculty advisor to avoid semesters where courses they need are not offered.

Policies and Procedures

Please see Bouvé College of Health Sciences Academic Policies and Procedures (<https://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/>). Program-specific policies follow below.

GRADING, ACADEMIC PROBATION, AND ACADEMIC DISMISSAL

If a student earns a grade of B– or lower, they will be placed on academic probation. In order to return to nonprobationary status, the student must retake the course during the next semester in which it is offered and earn a B or better. Failure to do so or earning a B– or below in any remaining course will result in dismissal from the Master of Science in Applied Behavior Analysis program.

COURSE PROGRESSION

Students are expected to register for at least one course per academic term. In order to take a semester off (including the full summer semester), students must contact their faculty advisor to inform them of the timeline and apply for a leave of absence. Students who do not apply for a leave of absence prior to skipping a semester may need to reapply when returning to their coursework.

Program Requirements

Students must complete all core, experiential learning, and project-based courses to successfully complete the program.

Core Courses

Minimum 3.000 GPA required

Applied Educational Psychology, MS (Boston)

Within Northeastern University's MS in Applied Educational Psychology, students enroll in foundational courses in learning, human development, assessment, and diversity. Students also begin their practicum sequence with the pre-practicum, the purpose of which is to provide students with observational experiences and an early opportunity to learn about the school ecology. Following completion of the MS in Applied Educational Psychology, students in good academic standing will enter the CAGS in School Psychology program. Both the MS and CAGS are necessary to obtain licensure as a school psychologist.

Students who are interested in concurrently pursuing early intervention qualification should consider the Early Intervention Graduate Certificate (p. 813). Please see also the CAGS School Psychology (p. 853) program.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B or higher is required in all coursework.

Code	Title	Hours
Clinical/Applied		
CAEP 6201	Introduction to Assessment	3
CAEP 6350	Introduction to Cognitive Assessment	3
CAEP 6400	Prepracticum in School Psychology	1
Foundations		
CAEP 6202	Research, Evaluation, and Data Analysis (course being added as additional way to fulfill stats requirement)	3
or HLTH 5410	Introduction to Statistics in Health and Behavioral Science	
CAEP 6203	Understanding Culture and Diversity	3
CAEP 6206	Learning Principles	3
CAEP 6218	Infant, Child, and Adolescent Development	3
CAEP 6247	Child and Adolescent Psychopathology	3
CAEP 6328	Single-Case Research Design	3
CAEP 6360	Consultation and Program Evaluation	3
CAEP 6365	Seminar in School Psychology	3

Program Credit/GPA Requirements

31 total semester hours required

Minimum 3.000 GPA required

Applied Psychology, MS (Boston)

The Master of Science in Applied Psychology program at Northeastern University is committed to providing evidence-based knowledge in applied psychology to students who seek entry into a PhD in Counseling Psychology program and to graduates of baccalaureate degrees in human services, psychology, health sciences, and related disciplines who desire quality advanced training in applied psychology. The program is 30 semester hours and is intended to be completed in two semesters. It does not meet licensing regulations for mental health counselors in the Commonwealth of Massachusetts.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CAEP 5877	Research Methods in Applied Psychology	3
CAEP 6203	Understanding Culture and Diversity	3
CAEP 6260	Community Counseling Psychology	3
CAEP 6282	Ethics and Professional Development	3
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	3

Concentration or Electives Option

A concentration is not required. Students may complete the electives option in lieu of a concentration.

- Child, Adolescent, and Family Psychology (p. 859)
- Prevention Science (p. 859)
- Elective (p. 859)s Option (p. 859)

Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

CONCENTRATION IN CHILD, ADOLESCENT, AND FAMILY PSYCHOLOGY

Code	Title	Hours
Complete five of the following:		15
CAEP 5150	Early Intervention: Family Systems	
CAEP 5878	Pediatric Psychology	
CAEP 5879	Trauma and Mental Health	
CAEP 6218	Infant, Child, and Adolescent Development	
CAEP 6222	Human Sexuality	
CAEP 6247	Child and Adolescent Psychopathology	

CONCENTRATION IN PREVENTION SCIENCE

Code	Title	Hours
Complete five of the following:		15
CAEP 6100	Prevention and Intervention: Evidence-Based Practices	
CAEP 6110	Etiology-Psychopathology Across the Life Span	
CAEP 6220	Development Across the Life Span	
CAEP 6242	Psychopathology: Diagnosis and Treatment Planning	
CAEP 6342	Consultation, Supervision, and Management	
CAEP 6346	Behavior Change for Individuals and Communities	
PHTH 5540	Health Education and Program Planning	
PHTH 6204	Society, Behavior, and Health	

ELECTIVES OPTION

Code	Title	Hours
Complete five of the following (electives not on this list may be chosen with faculty advisor approval):		15
CAEP 5150	Early Intervention: Family Systems	

CAEP 5878	Pediatric Psychology
CAEP 5879	Trauma and Mental Health
CAEP 6100	Prevention and Intervention: Evidence-Based Practices
CAEP 6110	Etiology-Psychopathology Across the Life Span
CAEP 6218	Infant, Child, and Adolescent Development
CAEP 6220	Development Across the Life Span
CAEP 6222	Human Sexuality
CAEP 6242	Psychopathology: Diagnosis and Treatment Planning
CAEP 6247	Child and Adolescent Psychopathology
CAEP 6342	Consultation, Supervision, and Management
CAEP 6346	Behavior Change for Individuals and Communities
PHTH 5540	Health Education and Program Planning
PHTH 6204	Society, Behavior, and Health

Counseling Psychology, MSCP (Boston)

The Master of Science in Counseling Psychology program at Northeastern University is committed to the development of competent Licensed Mental Health Counselors (LMHC) through the disciplinary studies and contemporary professional practice of counseling psychology. The program complies with licensing regulations for mental health counselors in the Commonwealth of Massachusetts and is unique in its offer of a choice of specific specializations to gain additional depth in selected areas within the general Master of Science program.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/academics/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

The MSCP program requires a grade of B or better in all courses. Practicum and internship courses require a grade of Satisfactory (S). Grades of B– and lower or Unsatisfactory (U) are inconsistent with this policy. If received, students will be required to pay for the course again, repeat the course, and earn a grade of B or better or a grade of Satisfactory (S) in clinical practice courses.

Core Requirements

Code	Title	Hours
Seminar		
CAEP 6380	Seminar in Feminist Psychology	3
Required Core		
CAEP 6200	Introduction to Counseling: Theory and Process in an Ecological Context	3
CAEP 6201	Introduction to Assessment	3
CAEP 6203	Understanding Culture and Diversity	3
CAEP 6220	Development Across the Life Span	3
CAEP 6235	Vocational, Education, and Career Development	3
CAEP 6242	Psychopathology: Diagnosis and Treatment Planning	3
CAEP 6250	Individual Interventions	3
CAEP 6260	Community Counseling Psychology	3
CAEP 6282	Ethics and Professional Development	3
CAEP 6287	Group Counseling	3
CAEP 6375	Substance Use and Treatment	3
CAEP 6399	Clinical Skills in Counseling Psychology	3
Research		
CAEP 6202	Research, Evaluation, and Data Analysis	3
Practicum		
CAEP 8401	Practicum in Counseling Psychology ¹	3
Internship		
CAEP 8510	Internship in Counseling Psychology 1	3
CAEP 8511	Internship in Counseling Psychology 2	3

¹ If a student enrolls in Practicum in Counseling Psychology (CAEP 8401) two times, the student may only choose 6 semester hours for electives.

In rare cases where the student has chosen a *concentration and enrolls in CAEP 8401 two times*, the successful completion of Practicum in Counseling Psychology (CAEP 8401) for the second time takes priority. The student then must either forgo the concentration to complete the program with 60 semester hours or may choose to enroll in an additional course to complete the program plus concentration for a total of 63 semester hours.

Concentrations or Electives Option

A concentration is not required. Students may complete electives option in lieu of a concentration.

- Child and Adolescent Counseling Concentration (p. 861)
- Early Intervention Concentration (p. 861)
- Research in Counseling Psychology Concentration (p. 861)
- Electives (p. 861)

Program Credit/GPA Requirements

A minimum of 60 total semester hours is required

Minimum 3.000 GPA required

CHILD AND ADOLESCENT COUNSELING CONCENTRATION

Code	Title	Hours
CAEP 6247	Child and Adolescent Psychopathology	3
CAEP 6401	Counseling Children and Adolescents in Schools	3
Complete one of the following:		3
CAEP 6218	Infant, Child, and Adolescent Development	
CAEP 6402	Promoting Social, Emotional, and Behavioral Success in Schools	
CAEP 6286	Family Counseling Interventions	

EARLY INTERVENTION CONCENTRATION

Students who would like to earn a certification in early intervention must complete two semesters of internship at an early intervention site.

Code	Title	Hours
Complete 9 semester hours from the following:		9
CAEP 5150	Early Intervention: Family Systems	
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	
CAEP 5153	Early Intervention: Assessment and Intervention	
CAEP 6218	Infant, Child, and Adolescent Development	
SLPA 5152	Early Intervention: Planning and Evaluating Services	

RESEARCH IN COUNSELING PSYCHOLOGY CONCENTRATION

Code	Title	Hours
Complete 9 semester hours from the following:		9
CAEP 6328	Single-Case Research Design	
CAEP 7711	Measurement: Advanced Psychometric Principles	
CAEP 7712	Intermediate Statistical Data Analysis Techniques	
CAEP 7716	Advanced Research and Data Analyses 2	
CAEP 7771	Research Team Experience	
HLTH 5410	Introduction to Statistics in Health and Behavioral Science	
PHTH 6320	Qualitative Methods in Health and Illness	

ELECTIVES OPTION

When students are required to complete Practicum in Counseling Psychology (CAEP 8401) two times, students may only choose 6 semester hours as electives. Electives not on this list may be chosen with faculty advisor approval.

Code	Title	Hours
Complete 9 semester hours from the following:		9
CAEP 6218	Infant, Child, and Adolescent Development	
CAEP 6222	Human Sexuality	
CAEP 6247	Child and Adolescent Psychopathology	

CAEP 6283	Brief Therapies
CAEP 6286	Family Counseling Interventions
CAEP 6390	History and Systems of Psychology
CAEP 6394	Advanced Multicultural Psychology
CAEP 7720	Advanced Clinical Interventions
CAEP 7758	Doctoral Seminar in Contemporary Theories of Psychotherapy
PHTH 6320	Qualitative Methods in Health and Illness

Early Intervention, Graduate Certificate (Boston)

Northeastern University's Certificate Program in Early Intervention is grounded in interdisciplinary experiential learning and, thus, designed to prepare students for careers working with babies, toddlers, and their family units.

The interdisciplinary nature of the program is enhanced through diversity of both student and instructor experiences. The program spans across several disciplines including school psychology, counseling psychology, and speech-language pathology. Undergraduate students in their final year of schooling and working professionals may also participate, which further enriches the constitution of each year's cohort.

The program is delivered in a fully online format. Classes meet synchronously one day each month, and additional course content is delivered online. This format allows for maximal participation in both classroom learning and experiential application.

This graduate certificate program can be completed by non-degree-seeking students or integrated with master's or doctoral degree programs. Application of coursework from certain degree programs will be approved to apply to requirements of this graduate certificate; students are encouraged to speak with their academic advisors early in their programs to explore these options.

The goals for the early intervention certificate program are to prepare personnel:

- To provide services to infants and toddlers with disabilities and their families from culturally and linguistically diverse backgrounds
- In achieving all early intervention competencies set forth by the Massachusetts DPH and those that are consistent with best practice and research
- In an interdisciplinary manner, drawing from Northeastern's multidisciplinary resources
- To function effectively across teams (individualized family service plan teams, community teams, interagency teams) and to understand the roles of their interdisciplinary and transdisciplinary co-clinicians

Upon graduation, students are eligible for employment in an early intervention service delivery setting.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B or higher is required in all courses.

Code	Title	Hours
Required Core		
Completing the courses below provides eligibility to pursue provisional certification in the state of Massachusetts upon employment in an early intervention setting. Consult with your program director to determine the availability of and recommended/required enrollment sequence for your respective program.		
CAEP 5150	Early Intervention: Family Systems	3
CAEP 5151	Early Intervention: Infant and Toddler Development, Risk, and Disability	3
CAEP 5153	Early Intervention: Assessment and Intervention	3
SLPA 5152	Early Intervention: Planning and Evaluating Services	3
Optional Practicum		
Completing the courses below provides eligibility to pursue provisional certification with advanced standing in the state of Massachusetts upon employment in an early intervention setting. Consult with your program director to determine eligibility for and availability of these course options.		
SLPA 5154	Early Intervention Practicum 1	
SLPA 5155	Early Intervention Practicum 2	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Personal Health Informatics, PhD (Boston)

Northeastern University's Doctor of Philosophy in Personal Health Informatics is a transdisciplinary doctoral program focused on educating top researchers in the theoretical underpinnings, design, evaluation, and dissemination of consumer- and patient-focused health systems. Personal health technologies are those that non-health professionals interact with *directly*, both in and out of a clinical setting and in various life stages of illness and wellness.

Examples include:

- Assistive technologies that aid persons with disabilities
- Consumer wellness promotion technologies
- Patient education and counseling systems
- Interfaces for reviewing personal health records
- Advanced ambulatory monitoring for supporting health
- Automated elder care systems that monitor health and support independent living
- Social networking systems connecting families and their social and medical support networks

Developing personal health interface technologies requires that professionals have skills and experience designing systems for individual patients and consumers with a wide range of backgrounds in different contexts using a variety of media, while ensuring that fielded technologies are effective, reliable, and responsive to the needs of at-risk and patient populations. Critical skills and knowledge include needs assessment, theories of interface design and health behavior, rapid prototyping and implementation, experimental design with human subjects in challenging settings, and statistical data analysis and validation. Moreover, these skills must be deployed while working with, or leading, transdisciplinary teams.

The interdisciplinary nature of the program targets students who are interested in improving health and wellness using novel technologies that directly impact the lives of consumers and patients. This is a program for students who are not only technically strong but also socially conscious, design oriented, and interested in rigorously evaluating the technologies they imagine and build. The program provides a path for technical students to acquire more experience in the deployment and evaluation of health technologies in the field but also a path for students with health backgrounds to develop the technical skills needed to prototype and assess creative ideas they envision for improving care. The expected length of study is five years after the bachelor's degree.

Admission Requirements

Students will be accepted with either of the following:

- A bachelor's or higher degree in a technical discipline (e.g., computer science or information science, computer systems engineering) with either academic or work experience demonstrating a commitment to working in health.
- A bachelor's or higher degree in a health science discipline (e.g., nursing, medicine, physical therapy, pharmacy, public health) with either some academic coursework in technology, such as a course in programming or design, or work experience where the applicant participated in the development, adaptation, or evaluation of consumer- or patient-facing health technology. (Otherwise outstanding applicants without programming skills may be advised to take an introductory programming course prior to entry; otherwise outstanding applicants without any formal experience working in health settings may be advised to spend some time volunteering in a medical or community health setting prior to entry.)

Applicants will be expected to have:

- A minimum 3.000 undergraduate GPA
- A minimum total GRE score of 300 or equivalent
- A minimum GRE academic writing score of 3.5
- For international applicants, a minimum TOEFL score of 105

Minimum Academic Standards and Requirements

RESIDENCY REQUIREMENT

The residency requirement will follow the university's residency requirement for PhD programs (<https://catalog.northeastern.edu/graduate/general-admission-transfer-credit/regulations-phd-programs/>).

TEACHING REQUIREMENT

All personal health informatics PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment, or quiz, or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

DISSERTATION ADVISING

Each student will have one primary advisor from the personal health informatics doctoral program faculty.

DISSERTATION COMMITTEE

The committee will consist of at least three members: the dissertation advisor, one additional personal health informatics doctoral program faculty member, and one member external to Northeastern who is an expert in the specific personal health informatics topic of research. The dissertation committee shall include experts with both health and technology backgrounds. The dissertation advisor must be a full-time member of the Northeastern faculty.

QUALIFYING EXAMINATION

The qualifying examination consists of a three-part exam conducted by a committee of three personal health informatics doctoral program faculty members, each overseeing one part of the exam. The research core of the exam is fulfilled with submission of a high-quality paper to a strong peer-reviewed conference or journal. The health component of the exam is fulfilled when the student passes a written exam developed by a faculty member with a health sciences background, and the technical component of the exam is fulfilled when the student passes an exam developed by a faculty member with a technical background. The content of the written exams and the paper topic are developed in consultation with each faculty member.

DEGREE CANDIDACY

A student is considered a PhD degree candidate upon meeting these conditions:

- Completion of core courses with a minimum GPA of 3.000 overall on the core courses
- Completion of the qualifying examination

COMPREHENSIVE EXAM

A PhD student must submit a written dissertation proposal to the dissertation committee. The proposal should identify the research problem, the research plan, and its potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee.

DISSERTATION DEFENSE

A PhD student must complete and defend a dissertation that involves original research in personal health informatics.

Curriculum Requirements**REQUIRED AND ELECTIVE COURSES**

The curriculum is designed to provide all PhD students with a strong foundation in principles critical to the design and evaluation of personal health interfaces. All students take six core courses (24 semester hours) and the user-interface practicum (1 semester hour). The student must maintain a minimum GPA of 3.500 among the six core courses and receive a grade of B or better in each of these courses. All students must also fulfill the programming fundamentals requirement (4 semester hours) and the statistics fundamentals requirement (4 semester hours), where some flexibility in course selection allows tailoring based on background and experience. Two additional research electives (8 semester hours) are selected based on research interests from the personal health informatics electives list. Students are also expected to participate in the personal health informatics seminar series during semesters when it is run.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Qualifying examination
Annual review
Dissertation proposal
Dissertation committee
Dissertation defense

Core Requirements

A grade of B or higher is required in each course. A cumulative 3.500 grade-point average is required for the core requirement.

Code	Title	Hours
Foundations		
HINF 5200	Theoretical Foundations in Personal Health Informatics	4
Program Design and Development		
CS 5010	Programming Design Paradigm (or another programming course)	4
CS 7340	Theory and Methods in Human Computer Interaction	4
HINF 5300	Personal Health Interface Design and Development	4
Methods and Statistics		
CS 7300	Empirical Research Methods for Human Computer Interaction	4
Complete one of the following:		3-4
CAEP 7712	Intermediate Statistical Data Analysis Techniques	

CS 7200	Statistical Methods for Computer Science	
PHTH 5210	Biostatistics in Public Health	
PHTH 6440	Advanced Methods in Biostatistics

Population Health, PhD (Boston)

This program seeks to train students to become public health researchers and leaders through simultaneous examination of multiple determinations of health, including social, environmental, nutritional, and behavioral risk factors. Our students investigate the underlying causes of adverse health, including disease, disparities, and disability, through training in core population health disciplines—biostatistics, epidemiology, and health services—together with individual-specific and specialized training in topics related to student research. Importantly, our students are mentored by Northeastern's distinguished faculty, who individually and together conduct innovative, solution-focused research in critical population health topics.

Our population health doctoral students have an opportunity to learn to conduct research that addresses five key health determinants:

1. Social and community contexts
2. Environment and neighborhoods
3. Health and healthcare delivery
4. Education
5. Economic stability

Our diverse faculty has expertise in numerous population health disciplines, including health services research, health disparities, environmental and social epidemiology, biostatistics, exercise science, medical sociology, public policy, personal health technologies, and mental health. Students have the opportunity to work side by side with faculty in conducting cutting-edge, transdisciplinary research in these fields.

Course Requirements

All population health PhD candidates must earn at least 33 semester hours by completing core research courses, selecting a concentration and taking courses for that concentration, and taking additional electives and directed study courses as needed and in consultation with their faculty advisors. They must complete a dissertation in order to earn their degree. Eight core courses (22–23 semester hours) must be taken by all students, in addition to a mandatory, non-credit-bearing seminar speaker series. All students must fulfill the requirements of their specific population health option: social and environmental determinants of health or health services and policy. There may be some flexibility in course selection based on a student's relevant experience and dissertation topic. Students must consult with their advisor before selecting elective courses (9–10 semester hours). Electives should be used to either help the student develop skills needed for research or to help the student develop new research ideas.

ADVANCED ENTRY

This program is strictly for students who already have a master's degree in public health or a closely related area and have full-time employment at a company or agency who has entered into an agreement with Northeastern to be the student's sponsor. Completion of the PhD program requires 21–23 semester hours, including a yearlong research methods seminar and other advanced research courses. All students must fulfill the course requirements of their specific population health option: social and environmental determinants of health (9 semester hours) or health services and policy (7 semester hours). There may be some flexibility in course selection based on a student's relevant experience and dissertation topic. Students must consult with their advisor before selecting elective courses. Electives can be used to either help the student develop skills needed for research or to help the student develop new research ideas but are not required.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/academics/learning-outcomes/>) for the specific student learning outcomes for this program.

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Population Health (<https://catalog.northeastern.edu/graduate/health-sciences/community-health-behavioral-sciences/population-health-ms/>) degree. Note that no students will be admitted directly into the Population Health program to pursue a master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Public Health, MPH (Boston)

Through innovation in experiential education, research, and service, the Master of Public Health at Northeastern University (<https://bouve.northeastern.edu/health-sciences/programs/master-public-health/>) trains diverse and skilled professionals who promote and protect the health of all communities. This program is accredited by the Council on Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

MPH—Traditional

In order to help prepare the next generation of public health leaders and professionals, the MPH offers our diverse graduate students an opportunity to:

- Participate in learning options that meet the needs of the working professional:
 - On-ground, courses are offered in the evening (most classes meet once a week in the evening).
 - Enroll as either a full-time or part-time student.
 - Complete your degree online, on-ground, or in a hybrid format (a combination of both on-ground and online courses).
- Take 9 semester hours of elective coursework in emerging, relevant areas in the field—including public mental health and public health technologies—or choose electives from a wide range of topics including cross-departmental offerings from Northeastern's other colleges (law, business, social sciences, and more).
- Enjoy a supportive learning environment that includes outstanding student mentoring.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Traditional Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B– or higher is required in each required course.

Public Health, MPH (Charlotte)

Through innovation in experiential education, research, and service, the Master of Public Health at Northeastern University (<https://bouve.northeastern.edu/health-sciences/programs/master-public-health/>) trains diverse and skilled professionals who promote and protect the health of all communities. This program is accredited by the Council on Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

MPH—Charlotte

In order to help prepare the next generation of public health leaders and professionals, the MPH offers our diverse graduate students an opportunity to:

- Participate in learning options that meet the needs of the working professional:
 - Enroll as either a full-time or part-time student
 - Complete your degree using online asynchronous courses
 - Charlotte MPH students participate in a one-week in-person course residency at the Center for Health Sciences at Northeastern's Charlotte, North Carolina, campus
- Take 9 semester hours of elective coursework in emerging, relevant areas in the field, including public mental health and public health technologies, or choose electives from a wide range of topics, including cross-departmental offerings from Northeastern's other colleges (law, business, social sciences, and more)
- Enjoy a supportive learning environment that includes outstanding student mentoring

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B– or higher is required in each course.

Complex Network Analysis, MS (Boston)

Complex network analysis is the quantitative study of interconnected systems that influence every aspect of our lives—from where we get our news and who we share ideas with, to how we travel and the people we interact with, to the products we purchase and the foods we eat. Networks are ubiquitous across natural and human-made systems, and their structure and dynamics can explain and help improve the greatest challenges of the next century such as pandemics, food scarcity, cultural polarization, and climate change. Expertise in the emerging field of complex network analysis, within the landscape of the rapid growth of artificial intelligence and machine learning, forms the foundation of the next generation of thought leaders. Northeastern University leads the way in this burgeoning field, offering a unique master's degree program in complex network analysis methodologies. The program is designed to equip students with the conceptual and analytical tools needed to find patterns of connections in networked systems and apply these techniques in real-world settings. The curriculum includes industry-aligned concentration areas of focus, enabling graduates to apply complex network analysis skills in impactful careers in the public and private sectors as well as in research. The concentrations for this program correspond directly to the following industry sectors:

1. Public health and life sciences fields such as epidemiological modeling, public policy, and behavioral research
2. Social or urban science and research fields such as urban planning, social network research, economics, education, criminal science, or public policy
3. Finance or technological fields such as financial analytics, market research, or network analysis for business
4. Biological systems modeling used across research and industry including network biology, drug discovery, or multi-omics mining

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Complex Biological Networks—College of Science
- Complex Social Systems—College of Social Sciences and Humanities
- Economic and Technological Networks—Khoury College of Computer Sciences
- Population Health Dynamics—Bouv  College of Health Sciences

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CNET 5050	Fundamentals of Complex Networks	4
CNET 5051	Analyzing Complex Network Data	4
CNET 5052	Advanced Tools for Complex Network Analysis	4
CNET 5901	Visualizing Complex Networks	2
CNET 5902	Communicating Network Data	2

Concentrations

Complete one of the following concentrations:

- Complex Biological Networks (p. 167)—College of Science
- Complex Social Systems (p. 168)—College of Social Sciences and Humanities
- Economic and Technological Networks (p. 168)—Khoury College of Computer Sciences
- Population Health Dynamics (p. 169)—Bouv  College of Health Sciences

Experiential Courses

Code	Title	Hours
Complete a total of 4 semester hours from the following (course may be repeated):		4
CNET 6107	Complex Network Analysis Research Rotation	
CNET 6108	Complex Network Analysis Capstone	
CNET 6990	Thesis	

Optional Co-op

Code	Title	Hours
CNET 6000	Professional Development for Co-op	1
CNET 6964	Co-op Work Experience	0

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Additional hours may be required based on student choice of courses or concentration.

One semester hour of additional coursework is required for participation in co-op.

Minimum 3.000 GPA required

CONCENTRATION IN COMPLEX BIOLOGICAL NETWORKS—COLLEGE OF SCIENCE

Code	Title	Hours
A minimum of 16 semester hours is required to complete this concentration.		
Required		

CNET 5515	Complex Network Analysis for Biological Systems	4
Complete 8 semester hours from the following:		8
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6310	Introduction to Bioinformatics	
EEMB 5130	Population Dynamics	
ENVR 5450	Applied Social-Ecological Systems Modeling	
MATH 5131	Introduction to Mathematical Methods and Modeling	
MATH 7340	Statistics for Bioinformatics	
PHYS 5211	Introduction to Scientific Computing	
Complete 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5411	Financial and Economic Networks	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN COMPLEX SOCIAL SYSTEMS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
A minimum of 13 semester hours is required to complete this concentration.		
Required		
CNET 5314	Complexity in Social Systems	3
Complete a minimum of 6 semester hours from the following:		6
CNET 5311	Physical and Digital Human Traces	
CNET 5360	Research Design for Social Networks	
INSH 5301	Introduction to Computational Statistics	
INSH 6101	Agent-Based Modeling for Applied and Social Sciences	
INSH 6300	Research Methods in the Social Sciences	
INSH 6304	Modeling and Analyzing Social Networks	
INSH 6406	Analyzing Complex Digitized Data	
INSH 6500	Statistical Analysis	
PHYS 5211	Introduction to Scientific Computing	
PPUA 5262	Big Data for Cities	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5411	Financial and Economic Networks	
CNET 5515	Complex Network Analysis for Biological Systems	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN ECONOMIC AND TECHNOLOGICAL NETWORKS—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
A minimum of 14 semester hours is required to complete this concentration.		
Required		
CNET 5411	Financial and Economic Networks	3
Complete a minimum of 7 semester hours from the following:		7
CS 7150	Deep Learning	
CS 7200	Statistical Methods for Computer Science	
DS 5220	Supervised Machine Learning and Learning Theory	
DS 5230	Unsupervised Machine Learning and Data Mining	
MISM 6212	Data Mining and Machine Learning for Business	

PHYS 5211	Introduction to Scientific Computing	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5515	Complex Network Analysis for Biological Systems	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN POPULATION HEALTH DYNAMICS—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
A minimum of 14 semester hours is required to complete this concentration.		
Required		
CNET 5126	Spreading on Networks: From Epidemics to Memes	4
Complete a minimum of 6 semester hours from the following:		6
BINF 6308	Bioinformatics Computational Methods 1	
PHTH 5210	Biostatistics in Public Health	
PHTH 6210	Applied Regression Analysis	
PHTH 6224	Social Epidemiology	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6800	Causal Inference in Public Health Research	
PHTH 6801	Causal Inference 1	
PHYS 5211	Introduction to Scientific Computing	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5314	Complexity in Social Systems	
CNET 5411	Financial and Economic Networks	
CNET 5515	Complex Network Analysis for Biological Systems	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

Health Data Analytics, MS—Online

The digitization of healthcare systems in clinical settings, in combination with the explosion of personal data collection devices, creates opportunities for using data to revolutionize approaches to health at all levels. The Master of Science in Health Data Analytics prepares students to make an impact on health outcomes, medical knowledge, and healthcare systems by producing data-driven insights.

The fully online and asynchronous Master of Science in Health Data Analytics is intended for students that seek to build analytics skills required to stand out in the healthcare industry. This program is designed for learners from multiple backgrounds and will prepare students with the specific technical skills required to excel in analytical roles in healthcare. Graduates will gain the expertise to extract actionable insights, identify patterns and trends, and inform evidence-based decision making in the dynamic healthcare landscape.

The program combines a robust analytics core presenting fundamental concepts such as data acquisition, data mining, statistics, and data visualization with foundational knowledge for navigating the healthcare data system. Health analytics courses discuss the complex data and information needs throughout the healthcare ecosystem including the needs of payers, providers, and regulatory agencies. Courses on health science as well as courses on the evolving business of healthcare provide students with deep, relevant industry knowledge preparing them for a variety of roles in the space. Students can expect to gain a broad and deep understanding of the various methods, software tools, and topical expertise needed to discover meaningful patterns in health-related data and effectively communicate their implications to a number of diverse stakeholders. In addition to the analytics core and the healthcare core, students will take elective courses allowing them to explore emerging topics of interest in more depth.

Successful graduates of the Master of Science in Health Data Analytics will be effective practitioners and leaders in the rapidly evolving domain of data analytics with a focus on health and healthcare.

Learning Outcomes

- Analyze organizational and stakeholder challenges in healthcare settings and develop data-driven solutions to address those challenges, align with strategic goals, and improve patient outcomes

- Collect health-related data from various sources, ensuring its accuracy and integrity
- Analyze health data using statistical, epidemiological, and data-mining methods, leveraging software tools and programming languages such as R, SAS, or Python to derive actionable insights
- Interpret and visualize analytical results by transforming complex data into clear charts and graphs that convey key insights to nontechnical stakeholders
- Present findings to nontechnical stakeholders by delivering concise, engaging narratives that highlight the implications of the analysis in an easily understandable format

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
DADS 6400	Foundations for Data Analytics	4
DADS 6600	Computation and Visualization for Analytics	4
DADS 7275	Machine Learning and Data Analytics	4
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5102	Data Management in Healthcare	3
HINF 6355	Interoperability Key Standards in Health Informatics	3
HINF 6400	Introduction to Health Data Analytics	3
HSCI 5130	Introduction to Real-World Evidence	2

Electives

Code	Title	Hours
Complete 6 semester hours from the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6404	Patient Engagement Informatics and Analytics	
PTH 5210	Biostatistics in Public Health	

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Health Informatics, MS (Boston)

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students may opt to select a concentration to deepen their knowledge in a particular area. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

Core Requirements

Code	Title	Hours
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
Choose one of the following courses in consultation with your advisor:		
HINF 5105 or HINF 5106	The American Healthcare System The Canadian Healthcare System	3

Program Options

Choose one of the following options:

- Health Informatics (Without Concentration) (p. 448)
- Health Informatics with Health Informatics Analytics Concentration (p. 449)
- Health Informatics with Personal Health Informatics Concentration (p. 449)

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

HEALTH INFORMATICS (WITHOUT CONCENTRATION)

Code	Title	Hours
Required Coursework in Addition to Core Requirements		
Business Management		
Complete two of the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management	
or EMGT 5220	Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PHTH 5226	Management and Leadership in Public Health and Healthcare	
Health Informatics		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	
HINF 6405	Quantifying the Value of Informatics	
PHTH 5232	Evaluating Healthcare Quality	
Technical		
Complete two of the following:		6
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
HINF 6400	Introduction to Health Data Analytics	
HLTH 5800	AI Across the Health Sciences	
PHTH 5202	Introduction to Epidemiology	
PHTH 5210	Biostatistics in Public Health	
PHTH 6210	Applied Regression Analysis	
PHTH 6400	Principles of Population Health 1	
PHTH 6440	Advanced Methods in Biostatistics	
One course from the following may count toward the technical core requirement:		
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
Capstone		
HINF 7701	Health Informatics Capstone Project	3

Electives

Complete two of the following:		6
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
HINF 6345	Design for Usability in Healthcare	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
PHIL 5110	Responsible AI	

HEALTH INFORMATICS ANALYTICS CONCENTRATION

Code	Title	Hours

IE 7275	Data Mining in Engineering	

PERSONAL HEALTH INFORMATICS CONCENTRATION

Code	Title	Hours
Required Coursework in Addition to Core Requirements		

Health Informatics

HINF 6205	Creation and Application of Medical Knowledge	3

Technical

CS 5340	Computer/Human Interaction	4

Complete one of the following. Students must petition to take electives outside the approved list:		4
CS 5010	Programming Design Paradigm	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 6200	Information Retrieval	
Complete one of the following:		3
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
<i>Theory and Evaluation</i>		
PHTH 5210	Biostatistics in Public Health ¹	3
Complete one of the following:		4
CS 6350	Empirical Research Methods (On campus only)	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
Culminating Experience		
Complete one of the two options below.		6
<i>Thesis Option</i>		
Students must enroll in HINF 7990 for two semesters for a total of 6 semester hours with director approval only and under supervision of Personal Health Informatics faculty:		
HINF 7990	Thesis	
<i>Capstone Option</i>		
HINF 7701	Health Informatics Capstone Project	
Complete any course for a minimum of 3 semester from the Health Informatics (without concentration) curriculum, that has not been used in previous requirements.		

¹ Student may petition director to take a more advanced stats course, such as Applied Regression Analysis (PHTH 6210).

Health Informatics, MS (Vancouver)

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

Statistics, MS (Boston)

The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The Master of Science in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across

domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical machine learning—Khoury College of Computer Sciences
- Statistical theory and modeling—College of Science

Students will follow all policies associated with their home college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800 or PHTH 6801	Causal Inference in Public Health Research Causal Inference 1	3-4
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics (p. 188)—Bouv  College of Health Sciences
- Statistical Machine Learning (p. 188)—Khoury College of Computer Sciences
- Statistical Theory and Modeling (p. 188)—College of Science

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses may be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

31 total semester hours required (32 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

CONCENTRATION IN BIOSTATISTICS (BOUV  COLLEGE OF HEALTH SCIENCES)

Code	Title	Hours
Complete 12 semester hours from the following:		12
PHTH 5350	Using SAS in Public Health Research	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6802	Causal Inference 2	
PHTH 6810	Survival Analysis	
PHTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL MACHINE LEARNING (KHOURY COLLEGE OF COMPUTER SCIENCES)

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4

CS 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL THEORY AND MODELING (COLLEGE OF SCIENCE)

Code	Title	Hours
Complete 12 semester hours from the following:		12
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	
Optional Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Statistics, MS—Connect (Boston)

The Master of Science in Statistics—Connect program is designed for students from all backgrounds with a BS/BA degree, provided the student has experience with basic calculus and statistics. The first semester of the degree program provides students with the foundational knowledge needed to study successfully alongside direct-entry graduate students. The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The MS in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouvé College of Health Sciences
- Statistical Machine Learning—Khoury College of Computer Sciences
- Statistical Theory and Modeling—College of Science

Students will follow all policies associated with their college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Connect Courses

Code	Title	Hours
Students are required to complete 8–10 semester hours from the following unless otherwise determined by the program:		
CS 5001	Intensive Foundations of Computer Science	
MATH 5001	Accelerated Linear Algebra	
MATH 5002	Accelerated Multivariable Calculus	
MATH 5003	Accelerated Probability and Statistics	
MATH 5110	Applied Linear Algebra and Matrix Analysis	

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800	Causal Inference in Public Health Research	3-4
or PHTH 6801	Causal Inference 1	
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics—Bouv  College of Health Sciences (p. 190)
- Statistical Machine Learning—Khoury College of Computer Sciences (p. 190)
- Statistical Theory and Modeling—College of Science (p. 190)

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses can be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

39-41 total semester hours required (40-42 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Law, JD / Public Health, MPH (Boston)

Northeastern University's School of Law and Bouvé College of Health Sciences offer a JD/MPH dual degree. Given the worldwide trend toward urbanization, the Master of Public Health (MPH) recognizes the growing need for professionals trained to respond to unique public health challenges and opportunities facing urban populations. The MPH program brings together interdisciplinary faculty (from the School of Law, D'Amore-McKim School of Business, College of Social Sciences and Humanities, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences) with expertise in collaborating with diverse urban populations to offer students an opportunity to obtain practice-based knowledge, skills, and experience needed to address public health problems.

Up to 9 credit hours of coursework in the JD program may count toward the MPH, while up to 12 credit hours of coursework in the MPH program may count toward the JD. See the JD/MPH program page (<https://law.northeastern.edu/academics/programs/jd/dual-degrees/public-health-bouve/>) for more information.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Pharmacy, PharmD—Direct Entry / Public Health, MPH (Boston)

The School of Pharmacy and Pharmaceutical Sciences and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master of Public Health (MPH) program.

The combined PharmD/MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD/MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

Refer to the School of Pharmacy and Pharmaceutical Sciences PharmD—Direct Entry (p. 939) and Department of Health Sciences Master of Public Health (p. 869) pages of this catalog for program requirements and technical standards. Students must adhere to all PharmD and MPH program standards, policies, and requirements as listed in the catalog, unless otherwise specified.

The Northeastern University Master of Public Health Program is accredited by the Council of Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

Public Health, MPH / Health Informatics, MS (Boston)

Website (<https://bouve.northeastern.edu/health-sciences/programs/ms-hinf-mph/>)

The Master of Public Health and Master of Science in Health Informatics dual degree allows qualified and interested students to prepare to lead healthcare at the nexus between public health and health informatics. Graduates of this program will be well-educated in the complex issues associated with improvements in information technology, as well as changes to the public health and healthcare delivery systems. Recognizing the increasing overlap between health informatics and public health, this program incorporates course work from both the MPH and MSHI curricula for both degrees, reducing tuition costs and saving one year of study compared to obtaining both degrees individually.

The Northeastern University Master of Public Health program is accredited by the Council on Education for Public Health (CEPH) (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

Up to 15 credits of coursework in the dual-degree program can be counted toward both the MPH and MS degrees.

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4

Experiential Courses

Code	Title	Hours
Complete 4 semester hours from the following:		4
CRIM 6600	Justice, Technology, and AI	
EDUT 6150	AI in Education	
HLTH 5800	AI Across the Health Sciences	
IE 5640	Data Mining for Engineering Applications	
JRNL 6460	AI in Media Industries	
MISM 6250	Strategic AI for Business

16 total semester hours required

Minimum 3.000 GPA required

Applied Psychology in Context, Graduate Certificate (Boston)

The Graduate Certificate in Applied Psychology in Context provides students with a strong foundation in scientific research and practice in applied psychology with options to focus in areas of interest, including child/adolescent/family, using a core and elective structure. The fully online, asynchronous graduate certificate offers students an opportunity to develop clinical skills for nonlicensed employees in healthcare, school, and other community-based organizations.

Program Requirements

Core Requirements

Code	Title	Hours
CAEP 5879	Trauma and Mental Health	3
CAEP 5880	Clinical Skills in Context	3
CAEP 6203	Understanding Culture and Diversity	3

Health Informatics Management and Exchange, Graduate Certificate (Boston)

Overview

The certificate program in health informatics management and exchange offers you the opportunity to obtain the knowledge needed to support the collection, management, retrieval, and exchange of electronic health data. It is designed to prepare you for a position as a specialist in data management, interoperability standards, and health database design.

- Eight-month program
- Five courses, 15 semester hours

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B– or higher is required in all coursework.

Code	Title	Hours
Required Core		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5102	Data Management in Healthcare	3
Management and Exchange		
HINF 6205	Creation and Application of Medical Knowledge	3
HINF 6220	Database Design, Access, Modeling, and Security	3
HINF 6355	Interoperability Key Standards in Health Informatics	3

Program Credit/GPA Requirements

15 total semester hours required

Minimum 3.000 GPA required

This is a pivotal time in healthcare, and nursing plays a leading role in the transformation of our healthcare system. Northeastern University School of Nursing offers multiple options for graduate study—including master's, Doctor of Nursing Practice, Certificate of Advanced Graduate Study, as well as a PhD program—that are designed to prepare outstanding clinicians, leaders, scholars, educators, researchers, and policymakers. These programs leverage the school's renowned faculty, as well as exceptional clinical practicum sites. Our reputation is why our graduates are sought by top employers. Practicing advanced practice nurses may add a specialty area by enrolling in one of our CAGS programs in adult primary or acute, pediatric primary and acute, family, or mental health.

The master's program includes advanced practice degrees as well as a Master of Science in Nursing Leadership with four concentration options. Graduates of the master's program are advanced practice nurses and nurse leaders with roles in a variety of practice settings such as primary and acute care providers, patient safety specialists, executive nurse leaders, and clinical educators.

The DNP program is a practice-focused degree designed to prepare experienced nurses at the highest level of scholarly practice. Keeping pace with the demands of today's changing healthcare environment requires clinical experts who have the knowledge and skills to be effective change

agents. Graduates of our BSN-DNP and post-master's DNP program assume clinical and leadership positions as advanced nurses in a variety of roles including clinical experts, nurse executives, community leaders, and professional organization leaders.

The PhD program in nursing prepares research scientists, educators, and leaders who seek to improve health and healthcare across the life span with an emphasis on urban, vulnerable, and underserved populations. Graduates are expected to lead research initiatives that advance nursing science through knowledge development and interdisciplinary scholarly inquiry.

Further information about the degrees and specializations can be found at each program's page of this catalog.

Programs

Doctor of Philosophy (PhD)

- Nursing (Boston) (p. 888)

Doctor of Nursing Practice (DNP)

- Nurse Anesthesia (Boston) (p. 890)
- Nursing (Boston) (p. 892)
- Nursing—Post-Master's (Boston) (p. 895)
- Nursing—Post-Master's (Charlotte) (p. 896)

Certificate of Advanced Graduate Study (CAGS)

- Nursing with Concentration in Adult-Gerontology Nurse Practitioner, Acute Care (Boston) (p. 896)
- Nursing with Concentration in Adult-Gerontology Nurse Practitioner, Primary Care (Boston) (p. 897)
- Nursing with Concentration in Neonatal Nurse Practitioner (Boston) (p. 898)
- Nursing with Concentration in Pediatric Nurse Practitioner, Acute Care (Boston) (p. 898)
- Nursing with Concentration in Pediatric Nurse Practitioner, Acute and Primary Care (Boston) (p. 899)
- Nursing with Concentration in Pediatric Nurse Practitioner, Primary Care (Boston) (p. 900)
- Nursing with Concentration in Psychiatric-Mental Health Nurse Practitioner (Boston) (p. 900)

Master of Science (MS)

- Nursing (Boston) (p. 901)
- Nursing—Direct Entry (Boston) (p. 905)
- Nursing Leadership (Boston) (p. 909)

Graduate Certificate

- Patient Safety (Boston) (p. 815)
- Pediatric Nurse Practitioner, Acute Care (Boston) (p. 911)
- Primary Care Nursing FNP (Boston) (p. 912)

Nursing, PhD (Boston)

Overview

Research

The PhD in Nursing program is designed to prepare nurse researchers to advance the science of nursing by developing expertise in both leadership and innovation. Graduates are expected to lead multidisciplinary research initiatives that advance nursing and healthcare through knowledge development and interdisciplinary scholarly inquiry. Students will work with nursing faculty whose research addresses innovative questions that seek to advance knowledge for improvement of care. Students will have opportunities to collaborate with faculty across the broader Northeastern University community, in addition to Boston-area research and healthcare institutions. This collaboration allows students to work across disciplines and to access populations and research sites essential to the success of their original dissertation study.

Advanced entry into the PhD in Nursing program requires a master's degree in nursing.

Visit the Northeastern University Faculty Research site (<https://research.northeastern.edu/faculty-research/>) for more information.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/academics/learning-outcomes/>) for the specific student learning outcomes for this program.

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS (<https://catalog.northeastern.edu/graduate/health-sciences/nursing/applied-nursing-research-ms/>) Applied Nursing Research degree. Note that no students will be admitted directly into the Applied Nursing Research program to pursue a master's degree.

Program Requirements

Bachelor's Degree Entrance

A bachelor's degree in nursing is preferred. Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual review of progress
Comprehensive examination
Candidacy status
Dissertation committee
Dissertation proposal
Dissertation defense

Core Requirements

A grade of B or higher is required in all coursework.

Nurse Anesthesia, DNP (Boston)

The Doctor of Nursing Practice in Nurse Anesthesia is a practice-oriented degree designed to prepare nurse anesthetists at the highest level of clinical scholarly practice. Keeping pace with the demands of today's changing healthcare environment requires clinical experts who have the knowledge and skills to be effective change agents. The program prepares graduates to question practice, search for and critically appraise the best evidence to guide practice, and implement and evaluate the application of best evidence in practice.

A successful graduate from the program will gain the requisite skill set and leadership expertise to be a critical member of the healthcare team and provide anesthetics to patients throughout the life cycle in diverse settings such as small local hospitals, regional centers, and rural or urban settings for all types of surgery or procedures.

Transfer Policy

Northeastern University regulations for transfer credit are published in this catalog (p. 143). The transfer policy specific to this doctoral program is defined as a maximum of 9 semester hours or 12 quarter hours of credit earned at another institution may be accepted toward the degree being pursued at Northeastern, provided the credits:

1. Consist of work taken at the graduate level for graduate credit
2. Carry grades of 3.000 or better
3. Have been earned at an accredited institution
4. Have not been used toward any baccalaureate or advanced degree or certificate at another institution
5. Transfer credits must be approved by the program administrator and course faculty

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Nursing, DNP (Boston)

The Northeastern University Doctor of Nursing Practice program is designed to prepare future nurse leaders by integrating advanced evidence-based clinical practice, interdisciplinary collaboration, healthcare innovation, fiscal responsibility, and principles of leadership to impact patient and/or system-level outcomes. Utilizing implementation science and project management theory, the DNP students design and implement a DNP project that may include new models of care, implementing and evaluating evidence-based practice guidelines, performing a financial analysis of varying models of care, or analyzing and/or implementing healthcare policy. This Nursing, DNP program can be completed in 33 months of full-time study and is designed for students entering with a BS in Nursing who intend to practice as nurse practitioners.

Students who already possess a master's nursing degree (Post-Masters) and intend to complete the DNP should consider the Nursing, DNP-Post-Master's (<https://catalog.northeastern.edu/graduate/health-sciences/nursing/nursing-practice-dnp/>) program. Students entering with a bachelor's nursing degree who intend to practice as nurse executives, nurse educators, or patient safety specialists should consider the MS Nursing Leadership (p. 909) program. Students entering with a bachelor's nursing degree who intend to practice as nurse anesthetists should consider the Nurse Anesthesia, DNP (p. 890) program.

Please visit Bouvé College Program Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

Nursing, DNP—Post-Master's (Boston)

The Doctor of Nursing Practice (DNP) is a practice-oriented degree designed to prepare advanced nurses at the highest level of scholarly practice. Keeping pace with the demands of today's changing healthcare environment requires clinical experts who have the knowledge and skills to be effective change agents. Graduates of our post-master's DNP program assume clinical and leadership positions as advanced nurses in a variety of roles including clinical experts, nurse executives, community leaders, and professional organization leaders.

The Northeastern University post-master's DNP program includes advanced course work in leadership, practice inquiry, population health, informatics, and health policy. Our goal is to prepare the next generation of nurse leaders with a greater breadth of expertise so they can collaborate more effectively with interprofessional partners and provide leadership to enhance quality and safety. The DNP program curriculum is delivered online in an executive model hybrid format, with the on-ground meetings at the Boston campus.

If you are a registered nurse with at least two years of active advanced nursing experience, you may enter the DNP program after completing a master's degree in nursing or, in some cases, a related health field. A DNP Scholarly Project and 1,000 scholarly practice hours are required for program completion. A gap analysis upon admission will determine how many, if any, practice hours from a previously completed Master of Science in Nursing practicum qualify toward this practice hour requirement.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Nursing—Adult-Gerontology Nurse Practitioner, Acute Care, CAGS (Boston)

The adult-gerontology acute-care nurse practitioner program is designed to prepare nurses for advanced-practice roles as clinical experts, managers, educators, and consultants. The program offers advanced study with a major focus on clinical experience. Nurses who possess a Master of Science are eligible for the Certificate of Advanced Graduate Study (CAGS) in this specialization.

Nursing—Adult-Gerontology Nurse Practitioner, Primary Care, CAGS (Boston)

The Certificate of Advanced Graduate Study (CAGS) with a concentration in Primary Care Adult-Gerontology Nurse Practitioner offers nurse practitioners (NPs) with certification in a different specialty the opportunity to prepare for practice providing high-quality adult primary care services as an adult-gerontology NP. Adult-gerontology NPs provide services to individuals across most of the life span in clinics, private practices, home care, long-term care, and day programs. Upon completion of the primary care program, graduates are eligible to sit for the adult-gerontology certification exam.

Prerequisite Courses

To ensure that all students have the foundation necessary to be successful in this program, each incoming student, regardless of the student's background, must have completed coursework in the following areas with a minimum grade of B.

Nursing—Neonatal Nurse Practitioner, CAGS (Boston)

The School of Nursing offers a certificate of advanced study for experienced nurses who have a master's degree in nursing and want to specialize in neonatal critical care. Applicants are required to have at least two years of level-3 or greater of neonatal intensive care unit experience before entering the program; most applicants have greater relevant experience. One year of full-time study offers the student an opportunity to increase skills and experience and enables the student to sit for the neonatal nurse practitioner certification exam offered by the National Certification Corporation for the obstetric, gynecologic, and neonatal nursing specialties.

Prerequisite or Equivalent Courses

To ensure that all students have the foundation necessary to be successful in this program, each incoming student, regardless of the student's background, must have completed coursework with content equivalent to the following courses with a minimum grade of B.

Code	Title	Hours
NRSB 5117	Advanced Pharmacology	
NRSB 5126	Pathophysiology for Advanced Practice	

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B or higher is required in all coursework.

Code	Title	Hours
Clinical		
NRSB 6116	Advanced Health Assessment of the Neonate and Infant	3
NRSB 6230	Nursing Management: Critically Ill Neonatal 1	3
NRSB 6231	Nursing Management: Critically Ill Neonatal 2	3
NRSB 6232	Neonatal Pharmacology	2

Nursing—Psychiatric-Mental Health Nurse Practitioner, CAGS (Boston)

The School of Nursing offers specialized and flexible program options in psychiatric mental health nursing for nurse practitioners (NPs) with certification in another specialty. Classes are offered during the late afternoon and early evening hours to accommodate the multiple responsibilities of adult learners. This is a 24-semester-hour program of study. Upon completion of the psychiatric mental health advanced practice Certificate of Advanced Graduate Study (CAGS) program, graduates are eligible to sit for available national certification exams in their area of practice.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

Nursing, MS (Boston)

Northeastern University's School of Nursing offers seven nurse practitioner concentrations leading to a Master of Science in Nursing. The program provides a solid foundation in research, epidemiology, health assessment, advanced pharmacology and pathophysiology, and healthcare systems with on-ground or online didactic coursework and on-ground skills and clinical experiences. The program has a strong clinical focus with high-quality clinical rotations as top priority. Students graduate prepared to practice as novice advanced-practice providers and work across a variety of healthcare settings. Graduates become nurse clinicians, educators, scholars, researchers, and lifelong learners. Upon completion of the program, graduates are eligible to sit for all national certification exams in their specialty area.

Adult-Gerontology Acute-Care Nurse Practitioner Concentration

The adult-gerontology acute-care concentration seeks to prepare nurses for advanced-practice roles as clinical experts, educators, and consultants. The concentration provides advanced study with a major focus on clinical experience and prepares graduates to care for patients across the continuum of care, including tertiary care, rehabilitation, and home care.

Adult-Gerontology Primary Care Nurse Practitioner Concentration

With a focus on health equity, the adult-gerontology primary care concentration prepares nurses to provide high-quality, ethical, and inclusive primary care to individuals 13 years and older. Graduates care for patients in a wide variety of settings.

Family Nurse Primary Care Practitioner Concentration

The primary goal of the FNP concentration is to educate FNPs who are capable of providing evidence-based, culturally and linguistically competent, ethical primary healthcare to individuals and families in a variety of healthcare settings. The FNP concentration is offered in a hybrid format with the majority of the classes delivered online, coupled with live presentation sessions. Students are required to be on the Boston campus twice per semester. Upon completion, graduates are eligible to sit for all national certification exams in their area of practice.

Neonatal Nurse Practitioner Concentration

Neonatal critical care is a growing field, and Bouvé is at the forefront of providing experienced nurses with the knowledge, competence, and skill to be in demand across the country. We require applicants to have at least two years of level-3 neonatal intensive care unit experience before entering our program, and most applicants have more years of NICU experience. A registered nurse working in the NICU setting already has a significant base of nursing knowledge. The NNP concentration focuses on advanced nursing knowledge and clinical practice. Our graduates are prepared to make independent decisions in level-2 and level-3 NICUs, drawing on their experience and diagnostic abilities to affect lives every day.

Pediatric Nurse Practitioner Concentrations

These concentrations are designed to prepare nurses with the specialized skills needed to care for at-risk children living in urban settings, across the continuum of care. For nearly two decades, our PNP concentration prepared primary care PNPs to provide community-based, culturally sensitive primary care. More recently, building on the School of Nursing's foundation in evidence-based, interdisciplinary, urban healthcare, the PNP curriculum

was expanded to offer a concentration in acute care. Northeastern offers the only graduate nursing program in New England to prepare acute-care PNPs.

The School of Nursing offers two concentrations for the PNP student. The primary care concentration prepares students for the role of PNP focusing on well-child care and prevention and management of common acute and chronic illnesses. The acute- and primary care dual concentration prepares students for the primary care role, as well as the acute-care role. Pediatric acute-care nurse practitioners are prepared to care for patients with acute, complex, critical, and chronic illness in a variety of settings.

Psychiatric-Mental Health Concentration

The curriculum of the psychiatric-mental health concentration has a life span focus, with core course content covering all ages. The concentration emphasizes a biopsychosocial framework to develop the understanding of human development, etiology of psychiatric disorders, and treatment modalities geared toward working with individuals across the life span and their families. The course of study emphasizes diagnostic decision making; psychotherapeutic interventions, including individual, family, and group therapies; and psychopharmacology across the life span.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Nursing, MS—Direct Entry (Boston)**Nursing, MS—Direct Entry****PART I: PRELICENSURE**

The direct-entry nursing student enters the accelerated master's program as a graduate student. The first 16 months (four semesters) of the program consists of intensive, sequential undergraduate classes and clinical. Students are then prepared to take the National Council Licensure Exam upon completion of 64 program semester hours to earn an RN license. Students earn a Bachelor of Science in Nursing after this part of the program. Financial aid will be granted on an undergraduate basis during the prelicensure phase of the program.

ENTRY RN WORK EXPERIENCE

Once a student graduates with a BSN, they are required to participate in an online, 0-semester-hour professional seminar for two semesters prior to progressing into their master's coursework. In addition, after passing the licensure exam, students must practice as a nurse for 6 to 12 months prior to progression into the master's core courses. Students may begin the master's core courses during the required practice period, with approval from the specialty concentration director.

Finding RN employment is the responsibility of the student, as it is professional nursing experience. Northeastern will help support the student in preparation for the job search. Please see MS Nursing (p. 901) for more information about the master's phase of the direct-entry program.

PART II: RETURN TO MASTER'S SPECIALTY TRACKS

In the master's program, students are required to take professional, research, and clinical core courses, as well as clinical courses specific to their concentration. Full- or part-time academic study is available to students. Most students return to the master's segment of the program taking coursework as a part-time student while continuing to work and increasing the amount of professional RN experience accrued. Completion of the master's degree can take four to six semesters, depending on the student's program plan and concentration. Upon completion of the requirements for their concentration, the student receives a Master of Science degree and is eligible to take the national certification exam in their area of advanced nursing practice. Financial aid is awarded on a graduate basis during this portion of the program.

Bouvé College of Health Sciences School of Nursing

The goal of the School of Nursing is to promote clinical judgment development and prepare students to practice nursing competently and compassionately in rapidly changing practice environments. All efforts are designed to build nursing knowledge; enhance nursing practice and patient safety; foster professional identity; and ultimately improve the health outcomes of patients, families, and communities across the continuum of care. This approach is built on eight pillars: leadership; quality care; scientific reasoning; practice excellence; diversity, equity, and inclusion; innovation; interdisciplinary collaboration; and practice excellence. The clinical program takes place in the community where people live, as well as in

hospitals, rehabilitation centers, and long-term-care facilities. The curriculum culminates in courses that allow students to apply their leadership and management skills while integrating the full scope of the professional nurse's role through a clinical practicum.

In addition to completing academic coursework, students participate in cooperative education as specified by their plan of study, which gives them the opportunity to integrate the theory and practice of nursing in selected settings. Numerous community and institutional healthcare agencies in the Greater Boston area and beyond offer students an opportunity to gain experience in providing patient care to a variety of patients and families and to understand that nurses have major roles in wellness and health promotion, acute care, and long-term care. Students in the program are highly encouraged to engage in research activities and explore global educational opportunities, both of which can be integral components of their studies.

The baccalaureate degree, the accelerated bachelor's degree (ABSN in Burlington and Fall River, Massachusetts), and the direct entry master's degree programs in nursing at Northeastern University are accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791, and are also approved by the Board of Registration in Nursing of the Commonwealth of Massachusetts. The ABSN program in Charlotte is accredited by the Commission on Collegiate Nursing Education, 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791, and approved by the North Carolina Board of Nursing. Accreditation and approval indicate that the program meets educational standards for faculty, curriculum design, teaching quality, and overall university support.

ACADEMIC STANDARDS AND PROGRESSION POLICY (UNDERGRADUATE STUDENTS, DIRECT ENTRY, ACCELERATED PROGRAM FOR SECOND-DEGREE AND TRANSFER TRACK STUDENTS)

Academic standards and progression policies are reviewed and updated annually.

Students in the Bouvé College of Health Sciences, School of Nursing, Prelicensure Nursing Major of BSN, ABSN, Transfer Track, or DE (baccalaureate portion) will be dismissed from their major for any of the reasons noted in the catalog or a course failure, effective the following academic semester.

Course Failure

- Students who do not meet the required minimum grade of a C (73.0%) in two professional courses will be dismissed from the program. Professional courses include labs, clinical, and didactic classes that are designated nursing (NRSG) courses. Only one professional course can be repeated, and each course can be repeated once.
- Students must retake the failed professional course as a requirement for progression in the program. Students can repeat the failed course the next time it is offered within their specific program.
- Students will not be permitted to progress to the nursing clinical courses without successfully repeating the failed course.

Course Withdrawal

Only two professional course withdrawals will be permitted (excluding leave of absence). Students can only withdraw from each professional course once. More than two professional course withdrawals will lead to dismissal from the program. Based on the requirement that the theory course and the clinical/lab course are taken concurrently, a withdrawal in either the theory course or clinical lab course results in the student withdrawing from both courses. Personal leaves of absence will be considered on an individual basis.

ACADEMIC APPEALS

It is the policy of the university that all students shall be treated fairly in evaluations made of their academic performance, standing, and progress. The School of Nursing policy regarding academic appeals is consistent with Northeastern University. For more information about academic appeals policies and procedures see the Bouvé Appeals Policy at Academic Appeals (<https://catalog.northeastern.edu/undergraduate/health-sciences/>).

Program policies and standards may be found in the Pre-licensure Handbook (<https://bouve.northeastern.edu/wp-content/uploads/2024/11/northeastern-university-school-of-nursing-undergraduate-handbook-2024-2025.pdf>). Students are expected to adhere to the policies and standards of their program major as stated in the Student Handbook (<https://bouve.northeastern.edu/wp-content/uploads/2024/11/northeastern-university-school-of-nursing-undergraduate-handbook-2024-2025.pdf>) to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major can petition the School of Nursing Academic Standing Committee for their requests.

NURSING PROGRAM REQUIREMENTS

The nursing program offers multiple attendance options for students, as outlined below:

For First-Year (Freshman) Students (Including N.U.in) and Current Northeastern Students Changing Majors to BSN

- Four-Year Plan with Two Six-Month Co-Ops:
 - At least one co-op must involve working directly with registered nurses providing patient care.
 - All co-op experiences outlined in the academic plan must be completed with a grade of "S" (Satisfactory).

For those with a previous college degree or 62 college credits

- Accelerated Bachelor of Science in Nursing or Transfer Track:
 - Requires either a prior bachelor's degree with 66 transfer credits or a transfer track with 62 college credits (including prerequisites).
 - Features a 16-month, full-time hybrid program of nursing courses combining online coursework, clinical placements, and hands-on skills lab experience.
 - The Transfer Track includes an additional 4-credit Northeastern English course alongside nursing courses.
- Direct Entry Program:
 - Acceptance into the DE program includes the accelerated, pre-licensure, in-person program as well as an MSN program that will follow (NP specialty tracks).
 - Initial phase is 16 months (four semesters) of intensive undergraduate nursing courses and clinical training.

- Students are eligible to take the National Council Licensure Exam after completing 64 semester hours to earn an RN license.
- A Bachelor of Science in Nursing is awarded upon completing this phase, with financial aid provided at the undergraduate level during the pre-licensure phase.

GRADUATION REQUIREMENTS

All students, regardless of their entry point, must complete 130 semester hours of academic credit to meet university and nursing curriculum requirements and graduate within their expected time frame.

CLINICAL ATTENDANCE POLICY

Attendance in clinical is mandatory for all students. In the case of an illness, injury, or extenuating circumstance, which requires a student to miss clinical hours, students are required to make up missed hours. Clinical hours are to be completed on the clinical makeup day or as approved by the clinical coordinator. Failure to meet clinical course objectives due to missed clinical hours will result in course failure. To be eligible to make up hours, students are required to communicate an absence before clinical in a method required by the faculty.

Students must be fully compliant with onboarding and clinical clearance requirements to start the clinical course (see *Documentation of Immunity and Clinical Clearance*) and throughout the course. In addition, to the university's immunization requirements, students will adhere to the policies and procedures of assigned clinical sites and are required to complete a background check. *Students must be in compliance of all clinical clearance requirements at all times during the clinical portion of the program.* Students in Boston and Burlington will need to register in Exxat, an Education Management Platform for Health Sciences that tracks clinical compliance. Students in Charlotte will need to register with both Complio and My Clinical Exchange. All students will be advised at clinical orientation what is needed for their assigned clinical placement. If a student is noncompliant with health insurance and clinical clearance requirements, the student will be removed from clinical immediately.

Grounds for Clinical Warning, Removal from Clinical Site, and Clinical Course Failure

The following reasons will result in clinical course failure:

- Failure to meet clinical course outcomes and/or competencies
- Failure to demonstrate safe clinical practice
- Failure to adhere to the School of Nursing Code of Professional Conduct (<https://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/code-conduct-nurs/>)

Clinical Requirements

Please see School of Nursing Clinical settings policies (<https://catalog.northeastern.edu/undergraduate/health-sciences/nursing/>).

TECHNICAL STANDARDS FOR ADMISSION, ACADEMIC PROGRESSION, AND GRADUATION

In addition to classroom learning, students' clinical education experiences occur in settings, like hospitals, in which patient safety is the priority. For this reason, students who, upon enrollment in any of the nursing programs, seek accommodations from Disability Access Services (<https://disabilityaccessservices.northeastern.edu/>) at Northeastern must also request an assessment of accommodations that would be needed for clinical education.

Certain functional abilities are essential for the delivery of safe, effective nursing care during clinical education activities. Therefore, the School of Nursing has determined that certain technical standards are requisite for admission, progression, and graduation from the nursing programs. An individual must be able to independently, with or without reasonable accommodation, meet the following technical standards:

1. General abilities
2. Observational ability
3. Communication ability
4. Motor ability
5. Intellectual, conceptual, and quantitative abilities
6. Behavioral and social attributes
7. Ability to manage stressful situations

Individuals unable to meet these technical standards, with or without reasonable accommodation, will not be able to complete the program.

General Abilities

The student is expected to possess functional use of the senses of vision, touch, hearing, and smell so that data received by the senses may be integrated, analyzed, and synthesized in a consistent and accurate manner. A student must be able to respond promptly to urgent situations that may occur during clinical training activities and must not hinder the ability of other members of the healthcare team to provide prompt treatment and care to patients.

Observational Ability

The student must have sufficient capacity to make accurate visual observations and interpret them in the context of laboratory studies, medication administration, and patient care activities. In addition, the student must be able to document these observations and maintain accurate records.

Communication Ability

The student must communicate both verbally and nonverbally in order to elicit information and to convey that information to others. Each student must have the ability to read and write accurately and comprehensively in English. The student must be able to thoroughly comprehend and fluently

speak the English language so as to facilitate communication with patients, families, professionals in healthcare settings, instructors, and other students. The student must also be able to present information in a professional, logical manner and to provide counseling and instruction in order to effectively care for patients and their families.

Motor Ability

The student must be able to perform gross and fine motor movements with sufficient coordination needed to perform complete physical examinations utilizing the techniques of inspection, palpation, percussion, auscultation, and other diagnostic maneuvers. A student must develop the skills needed to perform or assist with procedures, treatments, administration of medication, and the management and operation of diagnostic and therapeutic medical equipment. The student must possess the physical and mental stamina to meet the demands associated with extended periods of sitting, standing, moving, and physical exertion required for satisfactory and safe performance in the clinical and classroom settings.

Intellectual, Conceptual, and Quantitative Abilities

The student must be able to develop and refine critical thinking skills that are essential to nursing practice. Critical thinking involves the abilities to measure, calculate, reason, analyze, and synthesize objective and subjective data and to make decisions, often in a time-urgent environment, that reflect consistent and thoughtful deliberation and sound clinical judgment.

Behavioral and Social Attributes

Compassion, integrity, motivation, effective interpersonal skills, and concern for others are personal attributes required of those in the nursing programs. The student must be able to work under supervision of a clinical instructor or preceptor; this is essential to ensure patient safety. The student must exercise good judgment and promptly complete all responsibilities in the classroom and clinical settings. The ability to establish culturally competent relationships with individuals, families, and groups and to respond effectively to patients who have different intellectual capacities is critical to nursing practice.

Ability to Manage Stressful Situations

The student must be able to adapt to and function effectively in stressful situations in both the classroom and clinical settings, including emergency situations. These stressors include personal, patient care/family, faculty/peer, and/or program-related issues.

Disability and Special Needs

Students with special needs are encouraged to contact Disability Access Services (<https://disabilityaccessservices.northeastern.edu/>) to register and request services. Students must notify the instructor at the beginning of the semester if they plan to use DAS services throughout the course. The staff in that office is available for assistance.

STATE BOARD NURSING EXAMINATION

In Massachusetts, North Carolina, and several other states, the registering board requires that graduates taking the National Council Licensing Examination meet standards of “good moral character.” Students may review the GMC requirement specified at Massachusetts General Laws Chapter 112, sections 74, 74A, and 76; Licensure Policy No. 00-01 under “Rules & Regulations” on the Massachusetts Board of Registration in Nursing website. (<https://www.mass.gov/orgs/board-of-registration-in-nursing/>)

North Carolina requirements for licensure can be found on the North Carolina Board of Nursing website (<https://www.ncbon.com/>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B or better in the BSN clinical courses is highly recommended for progression into the MSN portion of the program. Progression is at the graduate specialty director's discretion.

Students must successfully complete all courses with a grade of C or better except where otherwise indicated.

Code	Title	Hours
Semester 1		
HLTH 2100	Interprofessional Ethics for Individual and Population Health	4
NRSG 2215	Cultivating Nursing Professional Identity and Practice	3
NRSG 2222 and NRSG 2221	Health Assessment and Fundamental Nursing Skills and Lab for NRSG 2220 and NRSG 2222	5
NRSG 2350	Integrated Pathophysiology and Pharmaceutical Interventions for Nursing Practice	6
Semester 2		
NRSG 3320 and NRSG 3321	Nursing Care of Adults 1 and Clinical for NRSG 3320	6
NRSG 3333 and NRSG 3334	Comprehensive Assessment and Advanced Nursing Skills and Lab for NRSG 3333	4

NRSG 3400 and NRSG 3401	Nursing and the Promotion of Mental Health and Clinical for NRSG 3400	5
Semester 3		
NRSG 3420 and NRSG 3421	Nursing Care of Adults 2 and Clinical for NRSG 3420	6
NRSG 3344 and NRSG 3345	Nursing Care of the Childbearing Family and Clinical for NRSG 3344	3
NRSG 4504 and NRSG 4505	Nursing Care of Children and Clinical for NRSG 4504	3
NRSG 5220	Introduction to Research Methods and Application for Healthcare	4
Semester 4		
NRSG 4604 and NRSG 4605	Public Health Community Nursing and Clinical for NRSG 4604	5
NRSG 4610	Managing and Leading in Healthcare	4
NRSG 4889 and NRSG 4996	Transition into Nursing Practice and Clinical for NRSG 4995 and NRSG 4889	6

Program Credit / GPA Requirements

64 total semester hours required

Minimum 3.000 GPA required

Nursing Leadership, MS (Boston)

The Master of Science in Nursing Leadership program prepares future nurse leaders by integrating advanced evidence-based clinical practice, interdisciplinary collaboration, healthcare innovation, fiscal responsibility, and principles of leadership with a concentration in the areas of postsecondary teaching, nurse executive, patient safety, or artificial intelligence. The program provides theoretical content and experiential learning in diverse healthcare environments to examine healthcare services and quality, organizational systems analysis, fiscal responsibility, and strategies for student and peer evaluation and mentorship. Upon completion of a chosen concentration, students may consider national certification. Several examples include American Nurses Association Credentialing Center, providing certification as a Nurse Executive-Board Certified (NE-BC); National League for Nursing, providing certification as a Certified Academic Clinical Nurse Educator (CNEcl); and/or the Institute for Healthcare Improvement, providing certification as a Certified Professional in Patient Safety (CPPS).

Please visit Bouvé College Program Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
NRSG 5117	Advanced Pharmacology	2
NRSG 5121	Epidemiology and Population Health	3
NRSG 5126	Pathophysiology for Advanced Practice	3
NRSG 6115	Health Assessment	3
NRSG 6300	Healthcare Finance and Marketing	3
NRSG 6302	Health Policy and Law	3
NRSG 6306	Health Informatics	3
NRSG 7100	Leadership in Advanced Practice Nursing	3
NRSG 7105	Translating Research Evidence into Practice	3
NRSG 7500	Role/Practice Issues in Advanced Practice Nursing	3
NRSG 7911	DNP Project Immersion 1	1
NRSG 7920	The Steps to Practice Inquiry: Analyze, Evaluate, Synthesize, and Apply the Evidence	3
NRSG 7926	Applied Data Management	2

Concentrations and Program Credit Requirements

A concentration is required to complete this program.

- AI Applications (p. 910)
- Nurse Executive (p. 910)
- Patient Safety (p. 910)
- Postsecondary Teaching (p. 910)

Program Credit/GPA Requirements

Total program hours vary based on the concentration the student chooses

Minimum 3.000 GPA required

CONCENTRATION IN AI APPLICATIONS

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
HLTH 5800	AI Across the Health Sciences	4

Program Credit Requirement

47 total semester hours required, including program core requirements

CONCENTRATION IN NURSE EXECUTIVE

Code	Title	Hours
HLTH 5600	Introduction to Patient Safety	3
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness	3
MSCI 6001	Principles of Healthcare Advocacy	3
MSCI 6003	Healthcare Leadership Seminar	3
NRSG 7990	Thesis	3
PHTH 6204	Society, Behavior, and Health	3

Program Credit Requirement

53 total semester hours required, including program core requirements

CONCENTRATION IN PATIENT SAFETY

Note: A student enrolled in this concentration may not also earn the Graduate Certificate in Patient Safety.

Code	Title	Hours
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

Program Credit Requirement

47 total semester hours required, including program core requirements

CONCENTRATION IN POSTSECONDARY TEACHING

Note: A student enrolled in this concentration may not also earn the Graduate Certificate in Postsecondary Teaching.

Code	Title	Hours
INPR 5100	Foundations of Evidence-based Postsecondary Teaching	4
INPR 5110	Integrating Teaching Across Contexts	4
INPR 5120	Postsecondary Teaching Practicum	4

Program Credit Requirement

Patient Safety, Graduate Certificate (Boston)

Overview

The Graduate Certificate in Patient Safety informs and empowers the next generations of innovative patient safety experts by providing the knowledge and practical skills to promote a culture of safety and design safer systems of care. Future leaders incorporate clinician wellness strategies in care delivery models that are accountable, honest, and transparent. The purpose of this certificate is to support healthcare clinicians and leaders in advancing patient safety and the safety of healthcare providers by expanding their fundamental skills and knowledge in patient safety science principles, workforce wellness, and quality improvement strategies.

This is a four-course, interdisciplinary graduate certificate, tailored to accommodate a busy healthcare professional's schedule. Courses are delivered in an online format, structured to enhance the curriculum with peer-to-peer discussions and experience developing tools, protocols, and process improvement strategies.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

A grade of B or higher is required in each course.

Code	Title	Hours
HLTH 5600	Introduction to Patient Safety	3
HLTH 5610	Patient Safety Science	3
HLTH 5620	Leadership, Patient Safety, and Clinician Wellness	3
HLTH 5630	Quality Improvement in Patient Safety	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.00 GPA required

Pediatric Nurse Practitioner, Acute Care, Graduate Certificate (Boston)

The post-master's acute-care PNP 16-credit graduate certificate for PNPs or FNP's certified in primary care seeking pediatric specialization in acute care is open to PNPs or FNP's certified in primary care with a master's or doctoral degree from an accredited institution. Graduates are eligible to sit for the acute-care PNP certification board exam.

Prerequisite Requirements

To ensure that all students have the foundation necessary to participate in this program, successful completion of the following courses or their equivalent within the past five years is required. Alternatively, active PNP/FNP experience with primary care PNP competencies (one-year minimum full-time pediatric experience) is required.

A grade of B or higher is required in each course.

Code	Title	Hours
NRSG 5117	Advanced Pharmacology	
NRSG 5126	Pathophysiology for Advanced Practice	
NRSG 6115	Health Assessment	
NRSG 6262	Pediatric Pharmacology	
NRSG 6265	Care of Child/Adolescent Health Problems	
NRSG 6275	Health Promotion and Preventative Care in Pediatrics in the Context of Community Health	

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
NRSG 6116	Advanced Health Assessment of the Neonate and Infant	3
NRSG 6267	Care of the Critically Ill Child	3

NRSG 6461	Pediatric NP Practicum 3 ¹	5
NRSG 6463	Care of the Critically Ill Child Practicum ¹	5

¹ Direct clinical hours included

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Primary Care Nursing FNP, Graduate Certificate (Boston)

The Northeastern University Family Nurse Practitioner graduate certificate is designed to prepare Advanced Practice Registered Nurses who have completed a master's degree and certification in another APRN specialty to be eligible to obtain national certification (AACN or AANP) as a Family Nurse Practitioner. FNP's provide healthcare services across the life span and in a variety of settings including, but not limited to, neighborhood centers, private practice, school-based clinics, in the home, long-term care facilities, and hospice.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of B or higher is required in each course.

Code	Title	Hours
NRSG 6392	Family Theory	2
NRSG 6561	Advanced Nurse Practitioner Clinical Intensive	1

Options

- For Licensed Pediatric Nurse Practitioners/Pediatric Clinical Nurse Specialists (p. 912)
- For Licensed Nurse Midwives (p. 912)
- For Licensed Adult/Gerontology Primary Nurse Practitioners/CNS Adult (p. 913)
- For Licensed Adult/Gerontology Acute Care Nurse Practitioners/Adult/Acute Clinical Nurse Specialists (p. 913)
- For Licensed Psychiatric Mental Health Nurse Practitioners/PMH Clinical Nurse Specialists (p. 913)
- For Licensed Neonatal Nurse Practitioners (p. 913)
- For Licensed Nurse Anesthetists (p. 914)

Program Credit/GPA Requirements

19–29 total semester hours required

Minimum 3.000 GPA required

OPTION FOR LICENSED PEDIATRIC NURSE PRACTITIONERS/PEDIATRIC CLINICAL NURSE SPECIALISTS

In addition to Family Theory (NRSG 6392) and Advanced Nurse Practitioner Clinical Intensive (NRSG 6561), Licensed Pediatric Nurse Practitioners/Pediatric Clinical Nurse Specialists must complete the following:

Code	Title	Hours
NRSG 6222	Pharmacology of Adults and Older Adults (Total Program Hours)	2
NRSG 6390	Family Care of the Adult/Older Adult Patient	4
NRSG 6391	Practicum for NRSG 6390	4
NRSG 6395	Healthcare of Women in Family Practice	2
NRSG 6396	Practicum for NRSG 6395	4

OPTION FOR LICENSED NURSE MIDWIVES

In addition to Family Theory (NRSG 6392) and Advanced Nurse Practitioner Clinical Intensive (NRSG 6561), Licensed Nurse Midwives must complete the following:

Code	Title	Hours
NRSG 6222	Pharmacology of Adults and Older Adults	2
NRSG 6262	Pediatric Pharmacology	2
NRSG 6390	Family Care of the Adult/Older Adult Patient	4
NRSG 6391	Practicum for NRSG 6390	4
NRSG 6393	Family Care of the Pediatric and Adolescent Patient	4
NRSG 6394	Practicum for NRSG 6393	4

OPTION FOR LICENSED ADULT/GERONTOLOGY PRIMARY NURSE PRACTITIONERS/CNS ADULT

In addition to Family Theory (NRSG 6392) and Advanced Nurse Practitioner Clinical Intensive (NRSG 6561), Licensed Adult/Gerontology Primary Nurse Practitioners/CNS Adult students must complete the following:

Code	Title	Hours
NRSG 6262	Pediatric Pharmacology	2
NRSG 6393	Family Care of the Pediatric and Adolescent Patient	4
NRSG 6394	Practicum for NRSG 6393	4
NRSG 6395	Healthcare of Women in Family Practice	2
NRSG 6396	Practicum for NRSG 6395	4

OPTION FOR LICENSED ADULT/GERONTOLOGY ACUTE CARE NURSE PRACTITIONERS/ADULT/ACUTE CLINICAL NURSE SPECIALISTS

In addition to Family Theory (NRSG 6392) and Advanced Nurse Practitioner Clinical Intensive (NRSG 6561), Licensed Adult/Gerontology Acute Care Nurse Practitioners/Adult/Acute Clinical Nurse Specialists must complete the following:

Code	Title	Hours
NRSG 6262	Pediatric Pharmacology	2
NRSG 6390	Family Care of the Adult/Older Adult Patient	4
NRSG 6391	Practicum for NRSG 6390	4
NRSG 6393	Family Care of the Pediatric and Adolescent Patient	4
NRSG 6394	Practicum for NRSG 6393	4
NRSG 6395	Healthcare of Women in Family Practice	2
NRSG 6396	Practicum for NRSG 6395	4

OPTION FOR LICENSED PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONERS/PMH CLINICAL NURSE SPECIALISTS

In addition to Family Theory (NRSG 6392) and Advanced Nurse Practitioner Clinical Intensive (NRSG 6561), Licensed Psychiatric Mental Health Nurse Practitioners/PMH Clinical Nurse Specialists must complete the following:

Code	Title	Hours
NRSG 6222	Pharmacology of Adults and Older Adults	2
NRSG 6262	Pediatric Pharmacology	2
NRSG 6390	Family Care of the Adult/Older Adult Patient	4
NRSG 6391	Practicum for NRSG 6390	4
NRSG 6393	Family Care of the Pediatric and Adolescent Patient	4
NRSG 6394	Practicum for NRSG 6393	4
NRSG 6395	Healthcare of Women in Family Practice	2
NRSG 6396	Practicum for NRSG 6395	4

OPTION FOR LICENSED NEONATAL NURSE PRACTITIONERS

In addition to Family Theory (NRSG 6392) and Advanced Nurse Practitioner Clinical Intensive (NRSG 6561), Licensed Neonatal Nurse Practitioners must complete the following:

Code	Title	Hours
NRSG 6222	Pharmacology of Adults and Older Adults	2
NRSG 6262	Pediatric Pharmacology	2
NRSG 6390	Family Care of the Adult/Older Adult Patient	4
NRSG 6391	Practicum for NRSG 6390	4
NRSG 6393	Family Care of the Pediatric and Adolescent Patient	4
NRSG 6394	Practicum for NRSG 6393	4

NRSG 6395	Healthcare of Women in Family Practice	2
NRSG 6396	Practicum for NRSG 6395	4

OPTION FOR LICENSED NURSE ANESTHETISTS

In addition to Family Theory (NRSG 6392) and Advanced Nurse Practitioner Clinical Intensive (NRSG 6561), Licensed Nurse Anesthetists must complete the following:

Code	Title	Hours
NRSG 6222	Pharmacology of Adults and Older Adults	2
NRSG 6262	Pediatric Pharmacology	2
NRSG 6390	Family Care of the Adult/Older Adult Patient	4
NRSG 6391	Practicum for NRSG 6390	4
NRSG 6393	Family Care of the Pediatric and Adolescent Patient	4
NRSG 6394	Practicum for NRSG 6393	4
NRSG 6395	Healthcare of Women in Family Practice	2
NRSG 6396	Practicum for NRSG 6395	4

School of Pharmacy and Pharmaceutical Sciences

617.373.5127

617.373.7655 (fax)

SOPPS@northeastern.edu (schoolofpharmacy@northeastern.edu)

The School of Pharmacy and Pharmaceutical Sciences provides transformative learning and research experiences in a collaborative and diverse environment to develop leaders who positively impact the health and well-being across the life span of those we serve. SOPPS will be the model for excellence and innovation in pharmacy and pharmaceutical sciences education that is grounded in experiential learning and enhances the health of communities through research and practice.

Programs

Doctor of Philosophy (PhD)

- Biomedical Science (Boston) (p. 915)
- Medicinal Chemistry and Drug Discovery (Boston) (p. 921)
- Pharmaceutics and Drug Delivery (Boston) (p. 927)
- Pharmacology (Boston) (p. 933)

Doctor of Pharmacy (PharmD)

- Doctor of Pharmacy (Boston) (p. 938)
- Doctor of Pharmacy—Direct Entry (Boston) (p. 939)

Master of Science (MS)

- Biomedical Science (Boston) (p. 945)
- Medicinal Chemistry and Drug Discovery (Boston) (p. 947)
- Pharmaceutical Engineering (Boston) (p. 507)
- Pharmaceutics and Drug Delivery (Boston) (p. 952)
- Pharmacology (Boston) (p. 955)

Dual Degree

- Pharmacy, PharmD—Direct Entry/Public Health, MPH (Boston) (p. 811)

Graduate Certificate

- Cannabis Science, Graduate Certificate (Boston) (p. 812)

Biomedical Science, PhD (Boston)

The Department of Pharmaceutical Sciences offers a PhD program in biomedical science that focuses on the cross-disciplinary integration of human (patho)biology with drug action, invention, and clinical utility. The biomedical sciences curriculum involves coursework and original research in areas including drug design and profiling, toxicology, and pharmaceutical biochemistry/cell biology aimed at increasing our understanding of how unsolved medical needs may be addressed by novel therapeutic approaches. The biomedical science program is appropriate for those entering the field as well as persons currently employed as research technicians, clinical laboratory workers, and science teachers/administrators. The flexibility of the biomedical science program and its interdisciplinary nature can enhance job performance in a present position and invite new employment opportunities.

Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.
7. There are no vacations on internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the Universitywide Academic Policies and Procedures (p. 87) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 772).

Milestones

QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceutics and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research

(PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by the end of October, with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
 - For example, if the student is in the pharmaceuticals and drug delivery PhD program, part 1 will be about pharmaceuticals and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a satisfactory/unsatisfactory basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences "Dissertation Proposal" document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the committee must sign the proposal approval cover sheet (<https://app.smartsheet.com/b/form/bd964901f0324ef4981d1673ab45b4c9/>), which is automatically submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

BIANNUAL REVIEW

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format, identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

Registration for Dissertation

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

Publications and Presentations

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

PhD Dissertation Preparation

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

PHARMACEUTICAL SCIENCES COLLOQUIUM

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

ORAL DISSERTATION DEFENSE

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

Deadline

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

SOPPS CODE OF PROFESSIONAL CONDUCT

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Qualifying examination
 Doctoral candidacy status

¹ Doctoral Proposal (PHSC 9681 (<https://catalog.northeastern.edu/search/?P=PHSC%209681>)) may be taken in spring of the first year but must be taken before fall of the second year.

² Pharmaceutical Science Colloquium (PHSC 6810 (<https://catalog.northeastern.edu/search/?P=PHSC%206810>)) must be taken six months before the dissertation defense.

Advanced Entry Program Requirements

Advanced entry into the PhD program in biomedical science requires a master's degree in pharmaceutical sciences or a related area and focuses on various advanced research courses, and successful defense of the dissertation. . An applicant's transcripts are required to be reviewed by the admissions committee to ensure they are eligible to be in the advanced entry program.

Complete all courses and requirements listed below unless otherwise indicated.

¹ Doctoral Proposal (PHSC 9681 (<https://catalog.northeastern.edu/search/?P=PHSC%209681>)) may be taken in spring of the first year but must be taken before fall of the second year.

² Pharmaceutical Science Colloquium (PHSC 6810 (<https://catalog.northeastern.edu/search/?P=PHSC%206810>)) must be taken six months before the dissertation defense.

Medicinal Chemistry and Drug Discovery, PhD (Boston)

The PhD Program in Medicinal Chemistry and Drug Discovery educates and trains students in the design and synthesis of novel, biologically active compounds and in delineating their mechanisms of action using biochemical, biophysical, and pharmacological approaches. Research specializations are available in synthetic, biochemical/pharmacological, and biophysical aspects of medicinal chemistry. Doctoral research in these specializations will relate to faculty areas of research, which currently include substance use disorders and addiction; neuropathic pain; obesity and metabolic disorders; neuropsychiatric disorders (psychoses, ADHD, depression, anxiety, eating disorders); and neurodegenerative diseases.

Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.
7. There are no vacations on internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the Universitywide Academic Policies and Procedures (p. 87) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 772).

Milestones

QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceuticals and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research (PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by the end of October, with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
 - For example, if the student is in the pharmaceuticals and drug delivery PhD program, part 1 will be about pharmaceuticals and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a satisfactory/unsatisfactory basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences "Dissertation Proposal" document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the committee must sign the proposal approval cover sheet (<https://app.smartsheet.com/b/form/bd964901f0324ef4981d1673ab45b4c9/>), which is automatically submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

BIANNUAL REVIEW

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format, identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

Registration for Dissertation

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

Publications and Presentations

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

PhD Dissertation Preparation

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

PHARMACEUTICAL SCIENCES COLLOQUIUM

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

ORAL DISSERTATION DEFENSE

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

Deadline

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

SOPPS CODE OF PROFESSIONAL CONDUCT

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Total Hours: 10					

¹ Doctoral Proposal (PHSC 9681 (<https://catalog.northeastern.edu/search/?P=PHSC%209681>)) may be taken in spring of first year but must be taken before fall of second year.

² Pharmaceutical Science Colloquium (PHSC 6810 (<https://catalog.northeastern.edu/search/?P=PHSC%206810>)) must be taken six months before dissertation defense.

Advanced Entry Program Requirements

Advanced entry into the Medicinal Chemistry and Drug Discovery PhD program requires a master's degree in pharmaceutical sciences or a related area and focuses on various advanced research courses and successful defense of the dissertation. An applicant's transcripts are required to be reviewed by the admissions committee to ensure they are eligible to be in the advanced entry program.

Complete all courses and requirements listed below unless otherwise indicated.

Pharmaceutics and Drug Delivery, PhD (Boston)

The PhD Program in Pharmaceutics and Drug Delivery educates and trains students in the fundamental areas of physical pharmacy and pharmaceutics. Several specialized areas include:

- Novel drug delivery systems
- Nanomedical technologies
- Biopharmaceutics and pharmacokinetics

With exposure to these facets of the pharmaceutical sciences, successful graduates are poised to understand and assimilate the field of modern pharmaceutics. A PhD degree in pharmaceutics is a research degree. While coursework plays an important role, students become active participants in the science of pharmaceutics in the laboratory. Faculty research in pharmaceutical sciences covers a broad range of scientific interests including pharmacokinetic toxicodynamics of anticancer agents; use of novel biomaterials and synthetic polymeric systems in designing small-molecule drug delivery systems for small molecules, proteins, and nucleic acids; passive and active targeting of therapeutic agents for cancer and cardiovascular diseases; novel delivery systems for immunostimulating purposes; and mathematical modeling of endogenous compounds.

Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.
7. There are no vacations on internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the Universitywide Academic Policies and Procedures (p. 87) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 772).

Milestones

QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceutics and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research (PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by the end of October, with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
 - For example, if the student is in the pharmaceutics and drug delivery PhD program, part 1 will be about pharmaceutics and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a satisfactory/unsatisfactory basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences "Dissertation Proposal" document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the committee must sign the proposal approval cover sheet (<https://app.smartsheet.com/b/form/bd964901f0324ef4981d1673ab45b4c9/>), which is automatically submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

BIANNUAL REVIEW

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format, identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

Registration for Dissertation

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

Publications and Presentations

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

PhD Dissertation Preparation

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

PHARMACEUTICAL SCIENCES COLLOQUIUM

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

ORAL DISSERTATION DEFENSE

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

Deadline

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

SOPPS CODE OF PROFESSIONAL CONDUCT

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Pharmacology, PhD (Boston)

The pharmacology PhD enables students to specialize in the study of the actions of drugs and their effects in living systems. In addition to the opportunity for developing a sound knowledge base through coursework and seminars, the program is designed to strengthen students' ability to understand and evaluate critically current pharmacology literature, informing the students' independent laboratory research that advances our understanding of drugs, their actions, and their pharmacotherapeutic applications. Recent graduates with a pharmacology PhD have found employment in academic and industrial research positions.

Journal Club Participation

The Department of Pharmaceutical Sciences sponsors weekly journal clubs, Pharmaceutical Science Seminar (PHSC 6300), at which students present and evaluate current scientific literature in their fields of study. Students must attend one of these journal clubs (Pharmaceutics & Drug Delivery Journal Club, Pharmacology Journal Club, or Medicinal Chemistry & Drug Discovery Journal Club), chosen in consultation with their advisors.

Attendance at one of these journal clubs is required each and every academic semester, as an integral part of the PhD curriculum, with the exception of the last year (year four) in the program. All PhD students must participate full-time in journal club for course credit, Pharmaceutical Science Seminar (PHSC 6300), for six semesters. Failure to attend journal club regularly may result in sanctions such as probation or dismissal from the PhD program. Any student who does not comply with these (or any other) conditions required in the PhD program faces potential dismissal.

Colloquium Attendance

All PhD students, regardless of program, are required to attend the weekly Pharmaceutical Science Colloquium series. Announcements of times and locations will be distributed weekly to students by email to their university email addresses. Attendance is recorded by sign-up sheet. One excused absence is permitted per semester. Failure to attend colloquia may result in sanctions such as probation or dismissal from the PhD program.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in the pharmaceutical and biotechnology industries.

After PhD candidates have completed their dissertation research and are working on their dissertations, they are able, with the express permission of their PhD advisor, to participate in an internship if they choose. They are never allowed to intern while they are serving as teaching assistants.

1. Students are responsible for finding their own internship and must be honest and accurate representing their experiences on their resumés. Students are responsible for tracking this experience on their resumés as there will be no detailed record on students' transcripts of these opportunities.
2. In order to be eligible for internship, students must take Professional Development for Pharmaceutical Sciences (PHSC 5305) a semester before internship.
3. Students must not accept more than one position. They must honor the first offer accepted. Any student not adhering to this requirement will not be allowed to participate.
4. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services (<https://international.northeastern.edu/ogs/>) every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
5. In order to receive a grade for the course, students must write at least two learning goals within the first two weeks of the internship and a one- to two-page paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
6. Taking internship must not extend international students' visas.

7. There are no vacations on internships. Companies' sick time policies may vary. Students should check with their employers. For all other matters, please see the Universitywide Academic Policies and Procedures (p. 87) and/or Bouvé College of Health Sciences Academic Policies and Procedures (p. 772).

Milestones

QUALIFYING EXAMINATION

The PhD qualifying examination is required for students in all four programs under the auspices of the Department of Pharmaceutical Sciences: pharmacology, medicinal chemistry and drug discovery, biomedical sciences, and pharmaceuticals and drug delivery. Students from each of the four programs will take the exams within the same time frame (below), regardless of specialty-area program focus.

Doctoral students should have selected a dissertation advisor by the end of their first year in the program and are expected to have begun research and demonstrated initial proficiency in the laboratory before taking the PhD qualifying examination.

The PhD qualifying examination tests the candidates' knowledge and skills in core courses and program content areas. The overall PhD qualifying examination consists of two written exams and one oral exam. The qualifying examination is taken as a course, Doctoral Training and Research (PHSC 8940), no later than during the fall semester of the student's second year, after having successfully completed all the core courses of their respective programs.

At least two departmental faculty will contribute questions for the written exams, and no one faculty member will write more than the equivalent of one entire exam. All students qualified to sit for the exams are expected to take them at the times announced.

The format for the written exams may vary (e.g., faculty may ask a series of comprehensive essay questions or provide research publications(s) from the biomedical literature and ask questions based upon the publications' content). The first exam is given in the first week of fall semester, with the written portion of the second exam (i.e., the F31 written document) to be submitted to the student's exam committee by the end of October, with the oral presentation to be completed by mid-November and graded by the providers of the question(s).

- **Written exam 1** reflects students' knowledge of their specialty-area program material and of overall pharmaceutical sciences. This exam is given on the same day in two parts. Part 1 is focused on each student's specialty-area program focus. Part 2 will test students' overall knowledge in another program focus covered by the pharmaceutical sciences curriculum.
 - For example, if the student is in the pharmaceuticals and drug delivery PhD program, part 1 will be about pharmaceuticals and drug delivery, and part 2 can focus either on pharmacology or medicinal chemistry and drug discovery.
- **Written exam 2** requires that students write an NIH F31 grant proposal and have the proposal signed off as passing by their examination committee after an oral defense.

A score of at least 70% is required to pass the first written exam (two parts). Students must pass all written portions of the PhD qualifying examination prior to the oral defense of the F31 proposal. Students who fail one written exam will have one opportunity to retake and pass that examination. A student who fails the first exam twice will be required to withdraw from the PhD program.

During the oral exam, students defend their NIH F31 grant proposal before an examination committee of, minimally, four faculty members: the dissertation advisor, at least two other Department of Pharmaceutical Sciences faculty members, and at least one member from outside the department. This committee is convened only for the oral exam and does not need to be the same committee as the student's dissertation committee.

Members of the oral examination committee are selected by the student, after consultation with the dissertation advisor and/or the director of graduate studies. The oral exam is graded on a satisfactory/unsatisfactory basis. Students who fail the oral exam on the first attempt may retake the exam within a time period designated by the examination committee not to exceed two months from the first oral exam. Those who fail twice will be dismissed from the program.

DOCTORAL CANDIDACY STATUS

Doctoral students who have completed satisfactorily and thereby earned the credits for all required core courses (including those for their specialized area) and who have passed the written and oral qualifying examinations shall be admitted to candidacy status for the PhD degree.

DOCTORAL DISSERTATION COMMITTEE

Doctoral students must complete a dissertation that embodies the results of extended research and makes an original contribution to their field. This work should give evidence of candidates' abilities to conduct independent investigation and interpret the results of their research in a professional manner. The doctoral dissertation advisor serves as chairperson of the Doctoral Dissertation Committee, which consists of no fewer than five members. Selection of an advisor is by mutual consent of the student and a member of the faculty, with approval by the director of graduate studies in the Department of Pharmaceutical Sciences. At least two members of the Doctoral Dissertation Committee must be faculty members in the Department of Pharmaceutical Sciences. At least one member is to be selected from outside the department. Committee members are chosen for their expertise in students' research areas.

DISSERTATION PROPOSAL DEFENSE

Within a year after successful completion of the PhD qualifying examination, but no later than the beginning of the fall semester of the third year, students must prepare and defend a written proposal detailing their planned dissertation project. Failure to do so will be regarded as a failure to progress in the PhD program and will result in a warning from the director of graduate studies of the Department of Pharmaceutical Sciences.

Students who do not correct this deficiency within one semester will be placed on academic probation. Students on academic probation must complete the dissertation proposal defense and return to nonprobationary status within one semester or be dismissed from the PhD program.

The dissertation proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should otherwise conform to the format and structure of an NIH grant proposal with four main sections: specific aims, background and significance, preliminary studies, and experimental design and methods. The Department of Pharmaceutical Sciences "Dissertation Proposal" document provides detailed instructions on the preparation of a dissertation proposal. Associated required forms may be found in the School of Pharmacy and Pharmaceutical Sciences Student Portal on Canvas in the module section.

The dissertation proposal must be defended orally before the student's dissertation committee and signed by all dissertation committee members in *approval of the student's planned dissertation research*. Upon dissertation approval, the committee must sign the proposal approval cover sheet (<https://app.smartsheet.com/b/form/bd964901f0324ef4981d1673ab45b4c9/>), which is automatically submitted to the department's director of graduate studies and to the Bouvé College of Health Sciences Graduate Office.

BIANNUAL REVIEW

Dissertation committees meet routinely at six-month intervals, but no less than once a year, to evaluate students' research progress and to be presented with written and oral progress reports on the direction and status of the research. Progress reports should be written in a brief format, identical to that described for the formal dissertation (see instructions listed on the SOPPS Student Portal Canvas site). Unsatisfactory productivity provides the basis for a warning by the dissertation committee and/or the Graduate Committee. Two such warnings will result in a student's dismissal from the program.

Registration for Dissertation

Advisor consent and completion of all coursework (with the exception of the colloquium course) must be documented before students register for the first dissertation course. Students must register for Dissertation Term 1 (PHSC 9990) and Dissertation Term 2 (PHSC 9991). Students must register for Dissertation Continuation (PHSC 9996) each semester thereafter until the dissertation has been successfully defended. The department strongly encourages PhD students to complete the program within five years after acceptance, i.e., by three years after establishing degree candidacy. According to university policy, no PhD students may remain in the program for more than seven years.

Publications and Presentations

Prior to completion of PhD training, candidates must present their research either as a poster or podium presentation at a regional or national scientific conference. Also prior to completion, the student must have submitted (preferably, published) at least one manuscript in a peer-reviewed journal that reflects original findings and laboratory work from the candidate's dissertation research.

PhD Dissertation Preparation

Detailed guidelines for the format and content of the written dissertation are given in Instructions for Preparation of the Dissertation found on the SOPPS Student Portal Canvas site. The completed dissertation document should be reviewed first by the dissertation advisor. Feedback from the advisor should be incorporated into the dissertation draft before its distribution to the dissertation committee. The completed dissertation should be delivered to all dissertation committee members no later than two weeks before the scheduled oral defense.

PHARMACEUTICAL SCIENCES COLLOQUIUM

All PhD candidates nearing completion of their research are required to present their dissertation findings at the department's Pharmaceutical Sciences Colloquium. These presentations should be scheduled at least six months before anticipated completion of the dissertation. In turn, the dissertation should be completed no later than one year after the colloquium presentation. Students must register for Pharmaceutical Science Colloquium (PHSC 6810) during the semester that the colloquium presentation is to be given.

ORAL DISSERTATION DEFENSE

The oral dissertation defense takes place after students complete their PhD dissertation research and all other requirements for the PhD degree. The oral defense deals with the subject matter of the dissertation, significant developments in the field, and students' background knowledge in their field of concentration.

The dissertation committee conducts the final defense. The committee may recommend that the student clarify, amplify, or rewrite portions of the dissertation *before the final defense is scheduled*. Once the committee concurs that that written dissertation document is acceptable, a date is chosen for the final oral examination.

At least two weeks prior to the defense, students should inform the director of graduate studies in the Department of Pharmaceutical Sciences of the date of defense, so that advance announcement may be distributed. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student in a seminar format, and responses to audience and committee questions, the committee meets first with the student for any follow-up discussion and then in executive session to decide whether the student has defended the dissertation successfully.

The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and corrections, if applicable, and the dissertation is signed and passed on to the department's director of graduate studies. Requests for a second defense are highly irregular but may be permitted in the event that the previous oral defense was judged by the committee to be highly promising but inadequate in one critical aspect.

Deadline

The final dissertation must be written, defended, and approved at least two weeks before the university commencement deadline. Students must submit signed copies of their dissertations to the website designated by the university and must abide by any embargo sanctioned by the student's principal dissertation advisor and/or dissertation committee. The students should apply for graduation before the final dissertation defense, on the assumption that the dissertation will be approved. If the dissertation committee decides that more time is required to complete the dissertation beyond the commencement date, then the application for graduation can be withdrawn and a new one submitted pending final dissertation approval.

SOPPS CODE OF PROFESSIONAL CONDUCT

All SOPPS students (BSPS, Preprofessional, MS, and PhD) are expected to adhere to the Code of Professional Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Qualifying examination
 Doctoral candidacy status
 Doctoral dissertation committee
 Dissertation proposal
 Biannual review
 Pharmaceutical Sciences Colloquium
 Oral dissertation defense

Core Requirements

A grade of C– or higher is required in each course.

Total Hours: 30					

- ¹ Scientific Writing: Thesis Proposal (PHSC 7020) must be taken the summer before the qualifying exams.
² Doctoral Proposal (PHSC 9681) should be taken in summer of second year, but no later than fall of third year.
³ Pharmaceutical Science Colloquium (PHSC 6810) must be taken six months before dissertation defense.
⁴ PHSC 5305 & PHSC 6213 are suggested to be taken in the fourth year, but can be taken at any point before graduation.

Advanced Entry Program Requirements

Advanced entry into the PhD in Pharmacology requires a master's degree in pharmaceutical sciences or a related area and focuses on various advanced research courses and successful defense of the dissertation. An applicant's transcripts are required to be reviewed by the admissions committee to ensure they are eligible to be in the advanced entry program.

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual review
Qualifying examination

¹ Doctoral Proposal (PHSC 9681 (<https://catalog.northeastern.edu/search/?P=PHSC%209681>)) may be taken in spring of first year but must be taken before fall of second year.

² Pharmaceutical Science Colloquium (PHSC 6810 (<https://catalog.northeastern.edu/search/?P=PHSC%206810>)) must be taken six months before dissertation defense.

Pharmacy, PharmD (Boston)

Program requirements that follow relate to the final year of the six-year Doctor of Pharmacy (PharmD) program only. For information regarding years one through five of this program, please see the *Undergraduate Catalog* Doctor of Pharmacy (Pharmacy, PharmD) webpage.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Complete 36 semester hours in the following range:		36
PHMD 6440 to PHMD 6474		

Program Credit/GPA Requirements

36 total semester hours required
Minimum 3.000 GPA required

Pharmacy, PharmD—Direct Entry (Boston)

The School of Pharmacy and Pharmaceutical Sciences (SOPPS) offers the Doctor of Pharmacy degree (PharmD). The direct-entry admission pathway for this program requires that students complete a BS or BA from an accredited institution with a preferred prerequisite grade-point average of 3.000. Only grades of C (2.000) or higher are acceptable to fulfill a prerequisite course. The following prerequisite courses and credits are required:

Requirements	Credits
Chemistry 1 and 2 (1 lab)	7
General biology 1 and 2 (1 lab)	7
Calculus (or higher-level math)	3
Organic chemistry 1 and 2 (w/labs)	8
Biochemistry	3
Anatomy and Physiology 1 and 2	7
Arts/humanities/social studies	4

Direct entry into the first professional year of the PharmD program offers students a four-year graduate course of study that fully integrates campus-based learning with experiential learning, including Northeastern University's signature cooperative education program, to provide students with the knowledge, skills, and abilities necessary to succeed in the pharmacy profession. Our students promote and ensure the safe and effective use of drugs and provide medication therapy management services. In addition to preparing and dispensing prescribed medications, our students provide information to patients about medications and their uses; advise physicians, other prescribers, and other healthcare practitioners on medication selection, dosages, interactions, and adverse effects; and monitor patient responses to drug therapy.

Our students are well equipped to provide patient care services in a variety of settings. Most of our graduates work in community pharmacies or in healthcare facilities such as hospitals and ambulatory clinics. Additional practice opportunities exist in health maintenance organizations, private practice groups, long-term-care facilities, home healthcare, the Public Health Service, the armed services, and law enforcement and regulatory agencies such as the Federal Drug Administration or Drug Enforcement Administration. Graduates may also find employment in drug development, marketing and research within the pharmaceutical industry, colleges of pharmacy, and professional association management. In addition, many of our graduates go on to pharmacy practice residencies, fellowships, and leading graduate programs.

PharmD students are admitted with the expectation that by working with faculty, staff, and each other, they will develop the knowledge, skills, and attitudes necessary for academic and professional success. Students follow academic progression plans for their respective years of graduation. Any deviation from the prescribed curriculum will require faculty/staff permission and an approved plan of study from the SOPPS Academic and Professional Standing Committee.

The curriculum includes both Introductory Pharmacy Practice Experiences (IPPEs, fulfilled with co-op) and Advanced Pharmacy Practice Experiences (APPEs). These pharmacy practice experiences (PPEs) are provided primarily under the direct supervision of qualified pharmacist preceptors and occasionally with other qualified healthcare professionals. The school is affiliated with many world-class practice sites throughout the United States, providing students with access to experienced clinicians and scholars. Although every effort is made to accommodate individual circumstances and requests, students should be prepared to travel outside the Boston area to complete some of their PPEs. Availability of a car may be required, as some sites are not accessible by public transportation. All expenses associated with PPEs, including travel and housing, are the responsibility of the student.

IPPEs are competitive placements that are based on job availability in a geographic region. The placements are facilitated by SOPPS-designated Bouvé co-op education coordinators. Students are required to earn satisfactory (S) grades in both IPPEs. One will meet ACPE-based IPPE requirements, while the second IPPE will be selected by the student from all available positions.

APPE placements are provided based on site/preceptor availability and the final approval of the SOPPS Office of Experiential and Continuing Professional Education (OECPE). Students may be able to petition the OECPE for special-arrangement APPEs; however, availability for such requests is limited.

To be eligible for the PharmD degree, a student must successfully complete all courses in the curriculum, including the IPPEs (co-ops) and APPEs; meet the academic progression standards of the program; meet the technical standards of the program; and satisfy all other requirements as stated. The pharmacy program is fully accredited by the Accreditation Council for Pharmacy Education (<https://www.acpe-accredit.org/>) (ACPE) and adheres to the standards established by ACPE.

Pharmacy graduates must meet specific requirements to qualify for professional licensure in the state where they plan to practice as a registered pharmacist. These requirements include graduating from an accredited school of pharmacy, passing national and state board examinations, and completing internship hours. The internship is a period of practical experience conducted under the supervision of a registered pharmacist. Massachusetts requires 1,500 internship hours, all of which are satisfied through completion of IPPEs (co-op) and APPEs.

Professional and/or legal exigencies arise from time to time, which may necessitate changes in a pharmacy course, progression, and/or graduation requirements. Students should review their status with academic advisors on a timely basis and refer to current publications for updated information.

Requirements for the PharmD Pharmacy PPEs

Requirements for the successful completion of the PharmD PPEs include:

1. Evidence of health clearance from University Health and Counseling Services before placements at any PPE site.
2. Satisfactory completion of any additional site-specific requirements including, but not limited to, criminal record information (CORI), urine drug screens, and verification of immunization status. All fees associated with these requirements are the responsibility of the student.

Management of Positive Urine Drug Screens

If the student learns the urine drug screen (test #1) is positive (+), the student will notify the OECPE (pharmacyoe@northeastern.edu) and immediately complete a second urine screen (test #2). A professional concern form will be completed based on test #1 results and reported to the university's Office of Student Conduct and Conflict Resolution (OSCCR) via the Incident Report form (IRF).

If urine screen test #2 is negative (-), the student will be allowed to continue the PPEs. However, the student will be asked to complete a random urine screen (test #3) at a time determined by the OECPE. If this urine screen (test #3) is positive, the student will be administratively removed from the active PPEs and graduation may be delayed. A second professional concern form will be completed, based on test #3 results. The return to PPEs will occur once a repeat urine test is negative. That repeat negative test will be followed up by a random urine screen at a time determined by the OECPE.

If the urine screen (test #2) is positive, the student will be administratively removed from the PPEs and graduation may be delayed. The return to PPEs will occur once a repeat urine screen is negative. That negative screen will be followed up by a random urine screen at a time determined by the OECPE. A second professional concern form and OSCCR IRF will be completed based on a positive test #3 result.

3. Adherence to the school's code of professional conduct and university's code of conduct policies while off-campus.
4. Maintenance of an active pharmacy intern license in every state where the student completes a PPE.
5. Compliance with site-specific requirements (via site descriptions) and completion of site requests within specified deadlines. Students who fail to complete these requirements as directed will likely incur grade penalties and may experience a delay of graduation or dismissal from the PharmD program.

PROGRAM POLICIES

Students are expected to adhere to the policies and standards of their program major as stated to progress through their curriculum as planned. Students seeking any exceptions to the program policies and standards specified for their program major must present a petition before the SOPPS Academic and Professional Standing Committee.

Given programmatic requirements, coupled with concerns over the loss of therapeutic knowledge, requests for a General Leave of Absence (<https://catalog.northeastern.edu/graduate/academic-policies-procedures/policies/>), other than Medical or Emergency Leave of Absence:

- Must comply with all stated Northeastern general policies, regardless of the academic year.
- May be made at any time period during the P1 or P2 years.
- During the P3 academic year, any request for a general leave must be made no later than February 1 of the given academic year. Requests after this date will not be permitted.
- During the P4 academic year, requests for a general leave cannot be made at any time.

Students are eligible to begin APPEs following successful completion of all didactic coursework. Completing didactic coursework during P4 year is prohibited.

SOPPS PROFESSIONAL CODE OF CONDUCT

All SOPPS students (i.e., preprofessional PharmD, Pharmaceutical Sciences, BS, P1–P4 PharmD, MS, PhD) are expected to adhere to the SOPPS—Professional Code of Conduct (<https://bouve.northeastern.edu/assets/uploads/sites/5/2021/10/northeastern-school-of-pharmacy-code-of-professional-conduct-2021.pdf>).

TECHNICAL STANDARDS FOR THE DOCTOR OF PHARMACY PROGRAM

The PharmD program at Northeastern is a rigorous and challenging academic program that requires students to possess specific characteristics and abilities within the cognitive, affective, and psychomotor domains, referred to here as technical standards. To successfully progress in and ultimately complete the didactic, laboratory, and experiential components of the PharmD program, students must meet the standards described below.

Intellectual Abilities

Students must have well-developed problem-solving and critical-thinking skills. Cognitive function must be appropriate to integrate, evaluate, and apply information gained through measurement, analysis, calculation, and reasoning. Students must have the capacity to learn efficiently in classroom, laboratory, small group and experiential settings, and through independent study. Students are required to demonstrate the ability to integrate course content knowledge with clinical practice applications to optimize medication therapy management.

Communication Skills

Students must be able to communicate effectively with colleagues, professors, patients, families, and healthcare providers. This includes efficiently comprehending, speaking, reading, and writing in English. Students must be able to process and use appropriate nonverbal cues and be proficient in the use of electronic communication media.

Behavioral and Social Attributes

Students must demonstrate professionalism, maturity, integrity, honesty, compassion, and respect when relating to others. Students must have sufficient mental and emotional health to complete work and responsibilities using good judgment. Students must be able to tolerate and adapt to stressful workloads and situations and modify behavior based on constructive criticism. Students must be able to function in accordance with the legal, ethical, and professional standards of practice.

Observation and Motor Skills

Students must have functional use of visual, auditory, and tactile senses. Students must be able to observe and perform experiments, physical assessments, patient interviews, and medication order processing. Students must be able to distinguish physical characteristics of medications by inspection. Students must have coordination of gross and fine muscular movements sufficient to perform pharmacy-related tasks including compounding and dispensing medications, administering medications, and using computers and other technology necessary for learning and professional practice.

ACADEMIC DISMISSAL FROM MAJOR

PharmD students in the Bouvé College of Health Sciences will be dismissed from their major effective the following academic semester for any of the reasons noted below:

- Failure to earn a grade of C or better in three professional courses, regardless of remediation. Within the PharmD program, each specific professional course (with separate registration number) will be counted as a separate failure even if content is related.
- Failure to earn the minimum required grade in the same course twice.
- Failure to maintain a GPA of 3.000 after two semesters of probation.
- The expected graduation date may not change more than twice.

The PharmD program monitors and promotes the development of professional behaviors in its students in order to ensure appropriate professionalism in the classroom, local and global communities, and clinical settings. Breach of adherence to these standards may result in dismissal from the program.

ACADEMIC APPEALS

Students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education decision may petition to appeal the decision. Refer to the Bouvé College of Health Sciences Academic Affairs Appeals Process (<https://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/appeals-process/>) and the Northeastern University Academic Appeals Policies and Procedures (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/academic-appeals-policies-procedures/>).

PROGRAM STUDENT LEARNING OUTCOMES

Please visit Bouvé College Program Learning Outcomes (<https://bouve.northeastern.edu/bchs/about/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Pharmacy Major (PharmD) Grade and Progression Requirement

To progress into the subsequent semester of professional courses, students must receive a grade of C or better in all PHMD and PHSC courses, as well as in any course completed to fulfill the professional elective requirement.

For PharmD students, an unsatisfactory grade (U) in a co-op will be counted as a professional course deficiency.

Students who incur an incomplete grade in a prerequisite course may not progress into the subsequent courses(s). Any exceptions will be determined by protocols established by the program, after consultation with the student's academic advisor.

Biomedical Science, MS (Boston)

The science and research surrounding human health and disease are becoming more interdisciplinary. In response to this trend, the biomedical science MS program allows students to focus on areas across the biomedical sciences to gain training in human (patho)physiology and the application of existing and potential therapeutic approaches to treat disease. The Master of Science in Biomedical Science curriculum is particularly appropriate both for those entering as well as those currently employed in the field, including research technicians, clinical laboratory workers, science teachers, and science administrators. For those currently employed, the program can enhance performance in a present position or open new employment opportunities. Graduates of the program will be well prepared to enter related PhD programs at the university.

Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms filed); and have no instances of academic dishonesty or blocks on enrollment.
2. In order to be eligible for internship, students must take the Professional Development for Pharmaceutical Sciences (PHSC 5305) course in either the fall or spring semester of their first year.
3. Students are in school full-time in addition to working on their internships.
4. There are no vacations on internships. Companies' sick time policies may vary. Students should check with their employers.
5. Students are responsible for finding their own internship and must be honest and accurate in representing their experiences on their resumés. Prior to looking for an internship, students must have their faculty advisor approve their resumé and ascertain to the best of their ability that the skills and training of students are as presented.
6. Students must not accept more than one position. They must honor the first offer accepted.
7. In order to receive a grade for the course, students must write at least two learning goals and a paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
8. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
9. Students receive 1 academic credit per semester for Pharmaceutical Science Internship (PHSC 6401). If students want to do an internship for a fourth semester they may do so, but students will only receive a maximum of 3 credits for Pharmaceutical Science Internship (PHSC 6401). The 4th credit for Pharmaceutical Science Internship (PHSC 6401) will not be added to the student's degree.
10. Taking internship must not extend international students' visas.

General Policies Common to All MS Programs in the Department of Pharmaceutical Sciences

GRADING POLICY

Students are expected to maintain a GPA of 3.000 (B) or higher in all coursework. Students whose cumulative GPA falls below 3.000 will receive written notification from the Bouvé Office of Graduate Student Services that they have been placed on academic probation. A student must clear the deficiency and return to nonprobationary status within one semester, unless the course that must be retaken is not offered during the probationary semester. In such a case, the course to be retaken must be completed during the next semester that it is offered, and the GPA must be restored to at least 3.000. Failure to remediate the deficiencies and return to nonprobationary status within the established time limit will result in dismissal from the

MS program. Refer to the Bouvé College of Health Sciences policy on Academic Dismissal (p.) and Academic Probation Policy (p.) for full details.

PROGRESSION REQUIREMENT

Bouvé College of Health Sciences policy specifies that students register for coursework or continuation credit each semester of the academic year (fall and spring semesters) after they are matriculated as full- or part-time students. Moreover, international students are required to maintain full-time student status during each academic term; consult the Office of Global Services (<https://international.northeastern.edu/ogs/>) for specific requirements. Domestic students who are not able to register for courses during a particular semester must petition the director of graduate studies in the department for exemption in writing and state the reasons for the exemption and their plan for resuming their studies. Approval of the petition will preserve student status in the MS program.

All MS students are expected to complete the degree requirements within two years if enrolled on a full-time basis, or within three to five years if enrolled on a part-time basis. If progress toward the degree is slowed or interrupted for personal reasons, the student so affected must petition the School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee for an extension, detailing the anticipated time to completion. If an extension is approved, the student will be directed to meet with the graduate program director to devise a formal plan to achieve completion of the degree.

Course credits earned in the Bouvé College of Health Sciences Graduate School or accepted for transfer from another institution and not applied to obtain a previous degree are valid for a maximum of seven years. Refer to the Bouvé College of Health Sciences Academic Progression policies and procedures (p.) for details.

ACADEMIC HONESTY AND RESEARCH INTEGRITY

The Department of Pharmaceutical Sciences has a zero-tolerance policy regarding academic dishonesty and violations of research integrity. It is each student's responsibility to understand and adhere to the SOPPS Code of Professional Conduct (<https://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/code-conduct-sopps/>) and to Northeastern University's Academic Integrity Policy (p. 88). Definitions of plagiarism, cheating, fabrication, falsification, unauthorized collaboration, and actions that facilitate academic or research dishonesty can be found on the Office of Student Conduct and Conflict Resolution website (<https://osccr.sites.northeastern.edu/>). The lack of knowledge of these definitions does not excuse the student's responsibility for upholding them. Offenses of academic honesty and research integrity are egregious violations of ethical standards and may result in disciplinary actions, including the student's immediate dismissal from the graduate program.

SCHOOL OF PHARMACY AND PHARMACEUTICAL SCIENCES CODE OF PROFESSIONAL CONDUCT

All SOPPS students (BS Pharmaceutical Sciences, Preprofessional, MS, and PhD) are expected to adhere to the SOPPS Code of Professional Conduct.

MASTER OF SCIENCE THESIS OPTION

Students who undertake a thesis are expected to report the results of extended research in a written thesis document and make an original contribution to their field. This work should give evidence of the student's abilities to conduct independent research and interpret their research results in an acceptable manner. Arrangements are made by students interested in the thesis option with individual laboratory directors as to the availability of MS student research positions and the specific research focus.

Thesis Registration

Students may receive a maximum of 4 semester hours of credit for MS thesis research. Students should register for Thesis (PHSC 6990), twice for 2 semester hours each during the fall and spring semesters of their second full year of study, or after completing 15 credits of study. If completion of the thesis requires additional time, students should register for Thesis Continuation (PHSC 6996)(0 SH).

Thesis Committee

Each student's thesis committee should be composed of at least three members: two from the sponsoring program and one from outside the student's program. The outside member may be a Northeastern faculty member. The director of graduate studies for the pharmaceutical sciences department may appoint additional members, as considered necessary for student development. The student's major advisor, in whose laboratory the research is being conducted, will serve as committee chair. The student, after consulting with the committee chair, is responsible for calling all thesis committee meetings.

Thesis Proposal

The thesis proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should conform to the format and structure of an NIH grant proposal with four sections: specific aims, background and significance, preliminary studies, and experimental design and methods. See the Department of Pharmaceutical Sciences "Thesis Proposal" document for detailed instructions on the preparation of a thesis proposal and the required forms located in the SOPPS Student Portal on Canvas in the module section.

The thesis proposal must be defended orally before the thesis committee and verbally agreed on by all thesis committee members before the student undertakes the planned research. Once approved by the committee, the student should inform the director of graduate studies.

Thesis Final Defense

The final defense is taken after the student completes the thesis research and all other requirements for the MS degree. The defense deals with the subject matter of the thesis, significant developments in the field, and the student's background knowledge in their field of specialization. The thesis committee conducts the final defense.

At least two weeks prior to the expected date of the oral defense, the written thesis must be circulated to the student's thesis committee. After initial committee evaluation, recommendation may be made that the student clarify or rewrite portions of the thesis before scheduling the final defense. After the thesis committee concurs that the thesis is acceptable, a date is chosen for the final oral examination. At least two weeks prior to the defense, the student should inform the director of graduate studies in the pharmaceutical sciences department so that an announcement can be distributed to faculty and students. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student, and responses to audience and committee questions, the student's committee meets in executive session to decide whether the student has successfully defended the thesis. The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and the thesis is signed off and passed on to the director of graduate studies in the department. Requests for a second defense are unusual but may be permitted if the original oral defense was judged significantly inadequate.

Thesis Deadline

The thesis should be written, defended, and signed at least two weeks before the university commencement deadline. Students must submit signed copies of the thesis to the online site designated by the university.

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of C– or higher is required in each course.

Code	Title	Hours
Required Core		
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 5212	Research Skills and Ethics	2
or PHSC 6213	Ethical Problems in Health Sciences Research	
PHSC 5300	Pharmaceutical Biochemistry ¹	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 5310	Cellular Physiology	2
PHSC 6214	Experimental Design and Biostatistics	2
PHSC 6216	Human Physiology and Pathophysiology	2

Electives

Code	Title	Hours
Complete 17–19 semester hours in the following subject areas: ¹		17-19
PHSC, PMCL, PMST, BIOL, CHEM, NNMD, BIOT		

Thesis Option

Thesis credits may count toward the required elective hours.

Code	Title	Hours
Complete the following (repeatable) course twice:		4
PHSC 6990	Thesis	2
The following course may be taken if additional time is needed to complete the thesis:		
PHSC 6996	Thesis Continuation	

¹ Students who opt to complete 4-credit Pharmaceutical Sciences Laboratory (PHSC 7010) in the core requirements may complete the degree with 17 elective credits; all other students must complete 19 elective credits.

Program Credit/GPA Requirements

33 total semester hours required

Minimum 3.000 GPA required

Medicinal Chemistry and Drug Discovery, MS (Boston)

The Medicinal Chemistry & Drug Discovery MS program integrates aspects of contemporary medicinal chemistry and pharmacology, emphasizing topics most relevant to therapeutics design, discovery, and action. The core curriculum focuses on a combination of synthetic organic

chemistry, bioorganic chemistry, analytical chemistry, and pharmacology courses. Specialized, in-depth electives are offered in these areas. The program is designed to develop students' knowledge of medicinal chemistry through design, synthesis, and pharmacological profiling of novel pharmacotherapeutics as applied to helping solve unmet medical needs. For this purpose, many program graduates have established research careers in the pharmaceutical/biotech industry. Undergraduate prerequisites are general chemistry, organic chemistry, and biochemistry or cell/molecular biology.

Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms filed); and have no instances of academic dishonesty or blocks on enrollment.

Minimum 3.000 GPA required

Pharmaceutical Engineering, MS (Boston)

The Master of Science in Pharmaceutical Engineering is offered jointly by Northeastern University's College of Engineering and Bouvé College of Health Sciences. The program prepares students with a fundamental understanding of pharmaceutical sciences and principles of engineering to develop the depth needed for advanced study of pharmaceutical engineering.

This program is generally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields in engineering, sciences, or mathematics. The program was designed in collaboration with the Department of Pharmaceutical Sciences to develop the depth needed for advanced study of pharmaceutical engineering. Students wishing to pursue the master's degree with undergraduate educational backgrounds other than engineering are required to demonstrate completion of mathematics coursework through differential equations or the equivalent to be admitted. Prior completion of at least one semester of organic chemistry or the equivalent is also required, and some prior exposure to concepts in biochemistry and molecular biology is helpful. Students are advised to work closely with their advisors and instructors to determine the electives that would meet their career goals.

Part-Time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit.

Master of Science students wishing to change their status from part time to full time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CHME 6390	Professional Development and Communication Essentials (Complete this course twice.) ¹	0
CHME 7600	Pharmaceutical Engineering I	4
CHME 7601	Pharmaceutical Engineering II	4
CHME 7602	Pharmaceutical Engineering Laboratory	2
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 7010	Pharmaceutical Sciences Laboratory	4

¹ To be completed each of the first two semesters in the program.

Restricted Elective Courses

Code	Title	Hours
At least 4 semester hours of elective coursework is required from CHME, and at least 2 semester hours of elective coursework is required from PHSC and PMST. These semester hours could come from any elective group, as appropriate.		

Regulatory

Complete 3–4 semester hours from the following: 3-4

BIOE 5250	Regulatory and Quality Aspects of Medical Device Design
BIOT 5340	Introduction to Biotherapeutic Approvals
BIOT 5500	Concepts in Regulatory Science
BIOT 6320	Design and Development of Biopharmaceuticals
RGA 6002	Introduction to Regulatory Compliance and Practice

Quality/Statistics

Complete 4 semester hours from the following: 4

CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 6320	Numerical and Statistical Methods for Chemical Engineering
CHME 6410	Chemical Engineering Research Methods
IE 6200	Engineering Probability and Statistics
IE 7280	Statistical Methods in Engineering
IE 7285	Statistical Quality Control
PHSC 6214	Experimental Design and Biostatistics

Depth Electives

Complete 6–7 semester hours from the following: 6-7

BIOE 5115	Dynamical Systems in Biological Engineering
BIOE 5411	Applied Molecular Bioengineering
BIOE 5510	Bioengineering Products/Technology Commercialization
BIOE 5860	Engineering Approaches to Precision Medicine I
BIOT 5330	Drug Safety and Immunogenicity
BIOT 6300	Pharmaceutical Microbiology
BIOT 6340	Sterile Manufacturing Operations
CHME 5160	Drug Delivery: Engineering Analysis
CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5510	Fundamentals in Process Safety Engineering
CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries
CHME 5631	Biomaterials Principles and Applications

or BIOE 5820	Biomaterials
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science
CHME 7330	Chemical Engineering Thermodynamics
CHME 7350	Transport Phenomena
PHSC 5300	Pharmaceutical Biochemistry
PHSC 5310	Cellular Physiology
PHSC 5500	Repurposing Drugs for Cancer Immunotherapies
PHSC 5555	Pharmaceutical Toxicology
PHSC 5560	Nanotoxicity
PMST 6250	Advanced Physical Pharmacy
PMST 6252	Pharmacokinetics and Drug Metabolism
PMST 6254	Advanced Drug Delivery Systems

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Pharmaceuticals and Drug Delivery, MS (Boston)

Just as cars are useless without roads, drugs are useless without effective delivery systems. This is especially important in contemporary pharmaceutical research, as new chemical entities may be either too hydrophobic (e.g., many anticancer drugs) or hydrophilic and highly labile (e.g., nucleic acids). The Bouvé College of Health Sciences School of Pharmacy Pharmaceuticals and Drug Delivery students and faculty are developing the routes for bringing small-molecule drugs and biological therapies directly to target cells responsible for major diseases.

Our comprehensive Pharmaceuticals and Drug Delivery MS program includes faculty members in pharmaceuticals and drug development specializing in the use and delivery of therapeutics. The program faculty seeks to improve the understanding and description of how chemical and physical properties of drugs and dosage forms affect drug performance in healthy and diseased systems. Graduate students may choose from programs concentrating in:

- Novel drug delivery systems
- Biopharmaceutics and pharmacokinetics
- Physical pharmacy and polymeric dosage form development
- Drug metabolism

With a strong focus on nanotechnology-based advanced delivery systems that address contemporary therapeutic needs, the pharmaceutical sciences program also gives students opportunities to study with some of the world's top pharmaceuticals researchers. Students in the Pharmaceuticals and Drug Delivery MS program have the option of performing industrial internships (typically during the summer) in some of the most prestigious pharmaceutical and biotechnology companies in the Boston area.

Please visit Bouvé College Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms filed); and have no instances of academic dishonesty or blocks on enrollment.
2. In order to be eligible for internship, students must take the Professional Development for Pharmaceutical Sciences (PHSC 5305) course in either the fall or spring semester of their first year.
3. Students are in school full-time in addition to working on their internships.
4. There are no vacations on internships. Companies' sick time policies may vary. Students should check with their employers.
5. Students are responsible for finding their own internship and must be honest and accurate in representing their experiences on their resumés. Prior to looking for an internship, students must have their faculty advisor approve their resumé and ascertain to the best of their ability that the skills and training of students are as presented.
6. Students must not accept more than one position. They must honor the first offer accepted.
7. In order to receive a grade for the course, students must write at least two learning goals and a paper describing what they learned, mid- and end of semester. Supervisors for internships will reply to a questionnaire about students' performance.
8. International students must register for Pharmaceutical Science Internship (PHSC 6401) and follow instructions to receive Curricular Practical Training authorization from the Office of Global Services every semester they work. This applies to part-time jobs and volunteer opportunities. International students cannot engage in full-time CPT authorization totaling more than 52 weeks. Doing so will eliminate the possibility of engaging in the postgraduation benefit of Post-Completion Optional Practical Training.
9. Students receive 1 academic credit per semester for Pharmaceutical Science Internship (PHSC 6401). If students want to do an internship for a fourth semester they may do so, but students will only receive a maximum of 3 credits for Pharmaceutical Science Internship (PHSC 6401). The 4th credit for Pharmaceutical Science Internship (PHSC 6401) will not be added to the student's degree.
10. Taking internship must not extend international students' visas.

General Policies Common to All MS Programs in the Department of Pharmaceutical Sciences

GRADING POLICY

Students are expected to maintain a GPA of 3.000 (B) or higher in all coursework. Students whose cumulative GPA falls below 3.000 will receive written notification from the Bouvé Office of Graduate Student Services that they have been placed on academic probation. A student must clear the deficiency and return to nonprobationary status within one semester, unless the course that must be retaken is not offered during the probationary semester. In such a case, the course to be retaken must be completed during the next semester that it is offered, and the GPA must be restored to at least 3.000. Failure to remediate the deficiencies and return to nonprobationary status within the established time limit will result in dismissal from the MS program. Refer to the Bouvé College of Health Sciences policy on Academic Dismissal (p.) and Academic Probation Policy (p.) for full details.

PROGRESSION REQUIREMENT

Bouvé College of Health Sciences policy specifies that students register for coursework or continuation credit each semester of the academic year (fall and spring semesters) after they are matriculated as full- or part-time students. Moreover, international students are required to maintain full-time student status during each academic term; consult the Office of Global Services (<https://international.northeastern.edu/ogs/>) for specific requirements. Domestic students who are not able to register for courses during a particular semester must petition the director of graduate studies in the department for exemption in writing and state the reasons for the exemption and their plan for resuming their studies. Approval of the petition will preserve student status in the MS program.

All MS students are expected to complete the degree requirements within two years if enrolled on a full-time basis, or within three to five years if enrolled on a part-time basis. If progress toward the degree is slowed or interrupted for personal reasons, the student so affected must petition the School of Pharmacy and Pharmaceutical Sciences Academic Standing Committee for an extension, detailing the anticipated time to completion. If an extension is approved, the student will be directed to meet with the graduate program director to devise a formal plan to achieve completion of the degree.

Course credits earned in the Bouvé College of Health Sciences Graduate School or accepted for transfer from another institution and not applied to obtain a previous degree are valid for a maximum of seven years. Refer to the Bouvé College of Health Sciences Academic Progression policies and procedures (p.) for details.

ACADEMIC HONESTY AND RESEARCH INTEGRITY

The Department of Pharmaceutical Sciences has a zero-tolerance policy regarding academic dishonesty and violations of research integrity. It is each student's responsibility to understand and adhere to the SOPPS Code of Professional Conduct (<https://catalog.northeastern.edu/graduate/health-sciences/academic-policies-procedures/code-conduct-sopps/>) and to Northeastern University's Academic Integrity Policy (p. 88). Definitions of plagiarism, cheating, fabrication, falsification, unauthorized collaboration, and actions that facilitate academic or research dishonesty can be found on the Office of Student Conduct and Conflict Resolution website (<https://osccr.sites.northeastern.edu/>). The lack of knowledge of these definitions does not excuse the student's responsibility for upholding them. Offenses of academic honesty and research integrity are egregious violations of ethical standards and may result in disciplinary actions, including the student's immediate dismissal from the graduate program.

SCHOOL OF PHARMACY AND PHARMACEUTICAL SCIENCES CODE OF PROFESSIONAL CONDUCT

All SOPPS students (BS Pharmaceutical Sciences, Preprofessional, MS, and PhD) are expected to adhere to the SOPPS Code of Professional Conduct.

MASTER OF SCIENCE THESIS OPTION

Students who undertake a thesis are expected to report the results of extended research in a written thesis document and make an original contribution to their field. This work should give evidence of the student's abilities to conduct independent research and interpret their research results in an acceptable manner. Arrangements are made by students interested in the thesis option with individual laboratory directors as to the availability of MS student research positions and the specific research focus.

Thesis Registration

Students may receive a maximum of 4 semester hours of credit for MS thesis research. Students should register for Thesis (PHSC 6990), twice for 2 semester hours each during the fall and spring semesters of their second full year of study, or after completing 15 credits of study. If completion of the thesis requires additional time, students should register for Thesis Continuation (PHSC 6996)(0 SH).

Thesis Committee

Each student's thesis committee should be composed of at least three members: two from the sponsoring program and one from outside the student's program. The outside member may be a Northeastern faculty member. The director of graduate studies for the pharmaceutical sciences department may appoint additional members, as considered necessary for student development. The student's major advisor, in whose laboratory the research is being conducted, will serve as committee chair. The student, after consulting with the committee chair, is responsible for calling all thesis committee meetings.

Thesis Proposal

The thesis proposal should be no more than 50 double-spaced pages (12-point font minimum and one-half-inch margins on all sides). This page limit excludes references but includes figures, figure legends, and tables. Aside from these exceptions, the proposal should conform to the format and structure of an NIH grant proposal with four sections: specific aims, background and significance, preliminary studies, and experimental design and methods. See the Department of Pharmaceutical Sciences "Thesis Proposal" document for detailed instructions on the preparation of a thesis proposal and the required forms located in the SOPPS Student Portal on Canvas in the module section.

The thesis proposal must be defended orally before the thesis committee and verbally agreed on by all thesis committee members before the student undertakes the planned research. Once approved by the committee, the student should inform the director of graduate studies.

Thesis Final Defense

The final defense is taken after the student completes the thesis research and all other requirements for the MS degree. The defense deals with the subject matter of the thesis, significant developments in the field, and the student's background knowledge in their field of specialization. The thesis committee conducts the final defense.

At least two weeks prior to the expected date of the oral defense, the written thesis must be circulated to the student's thesis committee. After initial committee evaluation, recommendation may be made that the student clarify or rewrite portions of the thesis before scheduling the final defense. After the thesis committee concurs that the thesis is acceptable, a date is chosen for the final oral examination. At least two weeks prior to the defense, the student should inform the director of graduate studies in the pharmaceutical sciences department so that an announcement can be distributed to faculty and students. The final defense is open to anyone who wishes to attend and typically lasts at least two hours. After presentation of the work by the student, and responses to audience and committee questions, the student's committee meets in executive session to decide whether the student has successfully defended the thesis. The committee's decision is then announced to the student. If the committee's vote is favorable, the student incorporates committee suggestions and the thesis is signed off and passed on to the director of graduate studies in the department. Requests for a second defense are unusual but may be permitted if the original oral defense was judged significantly inadequate.

Thesis Deadline

The thesis should be written, defended, and signed at least two weeks before the university commencement deadline. Students must submit signed copies of the thesis to the online site designated by the university.

Please visit Bouvé College of Health Sciences Program Learning Outcomes (<https://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A grade of C– or higher is required in each course.

Code	Title	Hours
Required Core		
Complete the following courses:		
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 5212	Research Skills and Ethics	2

or PHSC 6213	Ethical Problems in Health Sciences Research	
PHSC 5300	Pharmaceutical Biochemistry ¹	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 5310	Cellular Physiology ¹	2 or 4
or PHSC 7010	Pharmaceutical Sciences Laboratory	
PHSC 6214	Experimental Design and Biostatistics	2
PHSC 6216	Human Physiology and Pathophysiology	2
Pharmaceutics and Drug Delivery		
PMST 6250	Advanced Physical Pharmacy	2
PMST 6252	Pharmacokinetics and Drug Metabolism	3
PMST 6254	Advanced Drug Delivery Systems	3

Electives

Code	Title	Hours
Complete 9–11 semester hours from the following subject areas: ¹		9-11
BIOL, BIOT, CHEM, NNMD, PHSC, PMCL, PMST		

Thesis Option

Thesis credits may count toward the required elective hours.

Code	Title	Hours
Thesis research should be taken twice.		4
PHSC 6990	Thesis	2
Thesis continuation may be taken if additional time is needed to complete the thesis.		
PHSC 6996	Thesis Continuation	

¹ Students who opt to complete 4-credit Pharmaceutical Sciences Laboratory (PHSC 7010) in the core requirements may complete the degree with 9 elective credits; all other students must complete 11 elective credits.

Program Credit/GPA Requirements

33 total semester hours required

Minimum 3.000 GPA required

Pharmacology, MS (Boston)

Graduate education in pharmacology embodies the principles and mechanisms of drug action in biological systems. Through coursework, seminars, and conferences, students in the pharmacology MS program gain exposure to both classical and recent approaches that have led to the development of current theories of drug action and therapeutic application. Pharmacology should not be confused with pharmacy programs or training, which lead to professional licensure as a pharmacist and involve medication management.

Curriculum Requirements

All MS programs in the Department of Pharmaceutical Sciences require a set of core courses taken by every MS student, regardless of program. In addition, students in each program are required to take a defined set of discipline-specific courses and several general electives. The number of specialized and elective courses differs somewhat among programs. The MS degree may be completed on either a full-time or part-time basis and may include an optional research thesis. International students are required to attend the program on a full-time basis.

Internship Requirements and Regulations for Department of Pharmaceutical Sciences

Internships provide an experiential component of the graduate curriculum that fosters professional development through work in industry and hospitals.

1. In order to participate in an internship, students must complete two semesters with a grade-point average of 3.200 or better; be in good academic and professional standing (i.e., have no Professionalism Concern forms filed); and have no instances of academic dishonesty or blocks on enrollment.
2. In order to be eligible for internship, students must take the Professional Development for Pharmaceutical Sciences (PHSC 5305) course in either the fall or spring semester of their first year.

Pharmacy, PharmD—Direct Entry / Public Health, MPH (Boston)

The School of Pharmacy and Pharmaceutical Sciences and the Department of Health Sciences offer a combined Doctor of Pharmacy (PharmD) and Master of Public Health (MPH) program.

The combined PharmD/MPH program recognizes and reinforces the importance of public health in pharmacy practice. Central to addressing public health concerns, and in particular those associated with racial and ethnic health disparities, the program is committed to building a strong, diverse, and activist public health workforce. The goal of the program is to graduate professionals who are well educated in the complex issues associated with disparate health status and healthcare access. The combined PharmD/MPH program allows qualified and interested students an opportunity to achieve their goal of obtaining a more robust understanding of public health through an MPH degree while also completing their PharmD.

Refer to the School of Pharmacy and Pharmaceutical Sciences PharmD—Direct Entry (p. 939) and Department of Health Sciences Master of Public Health (p. 869) pages of this catalog for program requirements and technical standards. Students must adhere to all PharmD and MPH program standards, policies, and requirements as listed in the catalog, unless otherwise specified.

The Northeastern University Master of Public Health Program is accredited by the Council of Education for Public Health (<https://ceph.org/>). CEPH is an independent agency recognized by the U.S. Department of Education to accredit schools of public health and public health programs outside of schools of public health.

Cannabis Science, Graduate Certificate (Boston)

The Graduate Certificate in Cannabis Science offers coursework in cannabis history, business, and law/policy with a primary focus on the chemical/biochemical, pharmacological, scientific, and health/therapeutic aspects of cannabis. This program is designed for students with a strong science background who want to explore the cannabis industry. It provides the knowledge needed to advance careers in healthcare, public policy, or health law, while supporting policy development and public health initiatives. Students have an opportunity to gain a comprehensive understanding of cannabis analysis and applications, the human endocannabinoid system, and the medicinal and clinical implications of cannabis.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Requirements

Code	Title	Hours
Complete three of the following:		12
PHSC 5910	Applied Sciences for the Cannabis Industry	
PHSC 5920	Clinical Application of Cannabis and Cannabinoids	

PHSC 5930	Advanced Translational Research on Medical Cannabis and Cannabinoids
PHSC 5940	Cannabis Laws, Standards, and Politics

Program Credit/GPA Requirements

Minimum 3.000 GPA required

School of Law

James R. Hackney, JD, Dean

Hemanth C. Gundavaram, JD, Associate Dean for Academic and Faculty Affairs

Kristin Madison, JD, PhD, Associate Dean for Academic Programs

Greg Houghton, MBA, MSF, Associate Dean for Administration and Finance

Julian M. Fray, JD, LLM, Associate Dean for Digital Strategy

Kiana Pierre-Louis, JD, Associate Dean for Belonging and Student Affairs

Lua Yuille, JD, Associate Dean for Research and Interdisciplinary Education

Northeastern University School of Law (<https://law.northeastern.edu/>)
416 Huntington Avenue
Boston, MA 02115
617.373.5149

Today's legal environment demands that attorneys be nimble, entrepreneurial, and savvy; in all of these regards, graduates of the Northeastern University School of Law excel. Our curriculum, taught by nationally recognized faculty, provides students with a superior understanding of how the law applies in real settings, a strong ethical framework, and the experience to strategically pursue their professional objectives. Our co-op program sets us apart from all other law schools—our JD students complete many hours of work in law offices, judges' chambers, corporations, nonprofit organizations, and government. As a result of their co-op experiences, Northeastern JD students are not just sitting in classes hearing about the rapid changes in the legal world—they live them.

Our community also provides a refreshing refutation of the law school stereotype as a place of ruthless competition and blind ambition. Instead, we cultivate an atmosphere that is collaborative, collegial, and supportive. Our students' eagerness to work in teams, help one another, and share their experiences reflects that ethos. Our faculty and staff are exceptionally supportive of students—not only because our small community encourages extensive student-faculty interaction but also because they share their students' passion for justice.

In addition to offering both full-time and part-time JD programs, the School of Law offers on-campus and online LLM programs for lawyers, a Master of Legal Studies program for nonlawyers, and a number of other programs. Our suite of LLM opportunities is offered for both those who hold a U.S. law degree and those who hold a first professional law degree from a law school outside of the United States.

Programs

Juris Doctor (JD)

- Law (Boston) (p. 962)

Master of Laws (LLM)

- Law (Boston) (p. 964)
- Law (p. 967)—Experiential (Boston)
- Law—Online

Master of Legal Studies (MLS)

- Legal Studies—Online (p. 970)

Master of Science (MS)

- Media Advocacy (Boston) (p. 232)

Graduate Certificates

- Business Law (Boston) (p. 973)
- Healthcare Compliance (Boston) (p. 973)
- Health Law (Boston) (p. 974)
- Human Resources Law (Boston) (p. 976)
- Intellectual Property Law (Boston) (p. 977)
- United States Law (Boston) (p. 981)

FOR JD STUDENTS ONLY:

- Health Law and Policy (Boston) (p. 975)
- Human Rights Law (Boston) (p. 976)

- Legal Design (Boston) (p. 978)
- Poverty Law and Economic Justice (Boston) (p. 979)
- Privacy Law (Boston) (p. 981)
- Women, Gender, Sexuality, and the Law (Boston) (p. 982)

Dual Degrees

- Law, JD / Accounting and Business Administration, MSAMBA (Boston) (p. 305)
- Law, JD / Business Administration, MBA—Full-Time (Boston) (p. 305)
- Law, JD / Criminology and Justice Policy, PhD (Boston) (p. 984)
- Law, JD / Criminology and Criminal Justice, MS (Boston) (p. 984)
- Law, JD / Public Health, MPH (Boston) (p. 810)
- Law, JD / Public Policy, MPP (Boston) (p. 984)
- Law, LLM / Business Administration, MBA—Full-Time (Boston) (p. 305)

Academic Policies and Procedures

Below, you will find select policies pertaining to the Juris Doctor program. For a comprehensive document with all policies and procedures, see the JD Student Handbook (<https://asa.law.northeastern.edu/>).

- Grades (p. 962)

Grades

Grades

Students will receive credit for courses in which they receive a grade of “High Honors,” “Honors,” “Pass,” or “Marginal Pass” but not for courses in which they receive a grade of “Fail.” If any class is designated as offered on a credit/fail basis, students will not receive credit for the class if they receive a grade of “Fail.”

Incomplete Grades

The School of Law follows university policy on incomplete grades (p. 123).

Law, JD (Boston)

Overview

Students at Northeastern University School of Law gain unparalleled networking opportunities from the moment they walk in the door. While many law schools talk about offering work experience, Northeastern Law has been the nation’s leader in experiential legal education for five decades. Northeastern launched its Cooperative Legal Education Program in 1968 and today offers the largest and most extensive hands-on professional program in the country. Students devote several of their upper-level terms to working full-time as legal professionals. Through the co-op program, students have the opportunity to experience various fields of law in multiple practice settings.

Northeastern Law students gain real work experience and networking opportunities that far exceed the offerings of other law schools. With more than 1,500 employers in more than 40 states and a number of countries around the world, Northeastern students create professional networks in legal offices ranging from large firms in Boston to government agencies in Washington, D.C., to human rights organizations in Geneva. Through these connections and with access to the more than 8,000 alumni, Northeastern Law students graduate with not only a resumé packed full of experience but also a network that is unrivaled.

The School of Law offers a curriculum that provides students the tools they will need to pursue a successful legal career. In their first year, JD students complete required coursework. In their second and third years, they explore areas of interest by completing multiple full-time co-ops and taking courses that provide insight into many areas of the law.

Interdisciplinary Graduate Certificates

The School of Law offers JD students the option to pursue one of the following interdisciplinary graduate certificates:

- Health Law and Policy (p. 975)
- Human Rights Law (p. 976)
- Legal Design (p. 978)
- Poverty Law and Economic Justice (p. 979)
- Privacy Law (p. 981)
- Women, Gender, Sexuality, and the Law (p. 982)

Dual Degrees

The School of Law offers multiple dual degrees (p. 983).

For a more comprehensive description of policies, procedures, and requirements pertaining to the JD program, please refer to the School of Law’s website (<https://www.northeastern.edu/lawstudentaffairs/>).

Full-Time Option

Complete all courses and requirements described below.

Milestones

Code	Title	Hours
Public Interest Requirement ¹		
Upper-Level Rigorous Writing Requirement ²		
Experiential Education Requirement ²		

Co-op Requirement: Co-ops corresponding to three terms³

Note: All courses used to satisfy JD requirements must be completed with a passing grade. Students must satisfactorily complete all JD requirements, including the public interest requirement, the upper-level rigorous writing requirement, the experiential education requirement, and the co-op requirement.

First-Year Course Requirements

Code	Title	Hours
Fall Term		
LAW 6100	Civil Procedure	5
LAW 6105	Property	4
LAW 6106	Torts	4
LAW 6160	Legal Skills in Social Context: Foundations of Social Justice Project	2
LAW 6165	Legal Skills in Social Context: Foundations of Legal Research and Writing	2
Spring Term		
LAW 6101	Constitutional Law	4
LAW 6102	Contracts	5
LAW 6103	Criminal Justice	4
LAW 6161	Legal Skills in Social Context: Social Justice Project	2
LAW 6166	Legal Skills in Social Context: Legal Research and Writing	2

Upper-Level Course Requirements

Code	Title	Hours
Professional Responsibility		
LAW 7443	Professional Responsibility	3
Electives		
Complete 46 credits of elective coursework.		46

Rules and policies applicable to elective coursework are described in the School of Law Student Information Handbook.

Program Credit Requirement

83 total credits required.

¹ Information about the public interest requirement is provided in the Student Information Handbook.

² The same course cannot be used to satisfy both the rigorous writing and experiential education requirements.

³ Transfer students should consult the Student Information Handbook for applicable requirements. All students with questions about satisfying co-op requirements should consult the Center for Co-op and Career Development.

Part-Time Option

Complete all courses and requirements described below.

Milestones

Code	Title	Hours
Public Interest Requirement¹		
Upper-Level Rigorous Writing Requirement²		
Experiential Education Requirement²		

Two practical experiences during separate terms when the student is not registered for coursework other than the practical experience(s), including at least one co-op in the form of a field placement with a related seminar; and 1,000 hours of relevant work experience.³

Note: All courses used to satisfy JD requirements must be completed with a passing grade. Students must satisfactorily complete all JD requirements, including the public interest requirement, the upper-level rigorous writing requirement, the experiential education requirement, and the co-op, field placement, practical experience, and relevant work experience requirement.

First-Year Course Requirements

Code	Title	Hours

LAW 6100	Civil Procedure	5
LAW 6101	Constitutional Law	4

LAW 6102	Contracts	5
LAW 6103	Criminal Justice	4
LAW 6105	Property	4
LAW 6106	Torts	4
LAW 6160	Legal Skills in Social Context: Foundations of Social Justice Project	2
LAW 6165	Legal Skills in Social Context: Foundations of Legal Research and Writing	2
LAW 6161	Legal Skills in Social Context: Social Justice Project	2
LAW 6166	Legal Skills in Social Context: Legal Research and Writing	2

Upper-Level Course Requirements

Code	Title	Hours
Field Placement		
Complete one course from each of the following two pairs of courses:		8
LAW 7940	Reflections on Lawyering	
or LAW 7945	Field Placement Seminar	
LAW 7941	Public Interest / Public Service Field Placement	
or LAW 7946	Field Placement	
Professional Responsibility		
LAW 7443	Professional Responsibility	3
Electives		
Complete 38 credits of LAW courses not already taken to fulfill another requirement.		38

Rules and policies applicable to upper-level courses are described in the School of Law Student Information Handbook.

Program Credit Requirement

83 total credit hours required.

- ¹ Information about the public interest requirement is provided in the Student Information Handbook.
- ² The same course cannot be used to satisfy both the rigorous writing and experiential education requirements.
- ³ Transfer students should consult the Student Information Handbook for applicable requirements. All students with questions about the nature of these requirements should consult the Student Information Handbook and the Center for Co-op and Career Development.

Law, LLM (Boston)

LLM Program Requirements

The LLM program offers a rigorous curriculum that provides a comprehensive foundation in legal theory and practice as well as the freedom to explore and refine students' career interests. LLM students may choose the general program, which offers maximum flexibility to choose the courses the student wants and needs—to academically prepare for a U.S. bar exam or to do whatever the student chooses as a lawyer who wants to make a difference—or one of the program's concentrations, which provides a competitive advantage in specific fields of interest.

Complete all courses and requirements listed below unless otherwise indicated.

Foundational Courses

These foundational courses are required for any student who obtained their first law degree outside the United States:

Code	Title	Hours
LAW 6301	Introduction to American Law and Legal Institutions	2
LAW 6302	Introduction to Legal Research and Writing for LLM Students	2

Electives

Code	Title	Hours
Students must take at least 20 credits of LAW electives if they took the foundational courses; they must take at least 24 credits of LAW electives if not required to take foundational courses. Courses taken to fulfill concentration requirements count toward the elective requirement.		20 or 24

Concentration Options

Students may choose to pursue a concentration by completing the listed requirements. Courses taken to fulfill concentration requirements count toward the elective requirement for the LLM degree.

- Business and Commercial Law (p. 965)
- Health Policy and Law (p. 965)
- Human Rights and Economic Development (p. 966)
- Intellectual Property and Innovation (p. 966)

Program Credit Requirement

24 total hours required

For additional information regarding the LLM program and its requirements, please see the LLM student information handbook.

Business and Commercial Law Concentration

Code	Title	Hours
Core Course		
Complete one of the following:		3–4
LAW 6313	Introduction to the Law of Contracts	
LAW 7323	Corporations	
LAW 7324	Securities Regulation	
LAW 7556	Corporate Finance	
LAW 7559	International Trade	
LAW 7603	International Business Transactions	
Relevant Elective Courses		
Complete at least two of the following:		5–8
LAW 6313	Introduction to the Law of Contracts	
LAW 7015	Law, Technology, and Economic Development	
LAW 7303	Antitrust	
LAW 7313	Secured Transactions	
LAW 7323	Corporations

LAW 7336	Immigration Law	
LAW 7338	International Law	
LAW 7369	Intellectual Property	
LAW 7424	Labor Law I	
LAW 7491	International Human Rights and the Global Economy	
LAW 7525	Law and Economic Development	
LAW 7556	Corporate Finance	
LAW 7559	International Trade	
LAW 7569	International and Foreign Legal Research	
LAW 7603	International Business Transactions	

Students must also complete a paper related to business and/or commercial law. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

Health Policy and Law Concentration

Code	Title	Hours
Core Course		
LAW 7335	Health Law	3–4
Relevant Elective Courses		
Complete at least two of the following:		6–7
LAW 7494	Bioethics and the Law	
LAW 7512	Problems in Public Health Law	
LAW 7527	Public Health Advocacy Clinic	
LAW 7588	Reproductive Rights, Justice, and Health	
LAW 7606	Drug Law and Policy	
LAW 7619	Healthcare Fraud and Abuse Law	
LAW 7695	Drug and Device Innovation: Law and Policy	

Students must also complete a paper related to health law. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

Human Rights and Economic Development Concentration

Code	Title	Hours
Core Course		
Complete one of the following:		3–4
LAW 7338	International Law	
LAW 7491	International Human Rights and the Global Economy	
LAW 7525	Law and Economic Development	
LAW 7651	Human Rights in the United States	
LAW 7697	Issues in Human Rights and Humanitarian Law	
Relevant Elective Courses		
Complete at least two of the following:		5–16
LAW 6314	Introduction to U.S. Constitutional Law	
LAW 7015	Law, Technology, and Economic Development	
LAW 7336	Immigration Law	
LAW 7338	International Law	
LAW 7358	Social Welfare Law	
LAW 7428	State Local Government	
LAW 7491	International Human Rights and the Global Economy	
LAW 7525	Law and Economic Development	
LAW 7550	Refugee and Asylum Law	
LAW 7559	International Trade	
LAW 7569	International and Foreign Legal Research	
LAW 7588	Reproductive Rights, Justice, and Health	
LAW 7597	Civil Rights and Restorative Justice Clinic	
LAW 7610	Community Business Law Clinic	
LAW 7651	Human Rights in the United States	
LAW 7657	Immigrant Justice Clinic	
LAW 7679	Race and the Law	
LAW 7697	Issues in Human Rights and Humanitarian Law	
LAW 7702	Crimmigration Law: The Intersection of Criminal Law and Immigration Law	
LAW 7705	Law and Global Technology	
LAW 7706	State Constitutions and the Protection of Individual Rights	

Students must also complete a paper related to human rights and/or economic development. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement.

Intellectual Property and Innovation Concentration

Code	Title	Hours
Core Course		
Complete one of the following:		3–4
LAW 7369	Intellectual Property	
LAW 7501	Patent Law	
LAW 7590	Copyright Law	
LAW 7638	Trademark Law	
Relevant Elective Courses		
Complete at least two of the following:		6–12
LAW 7015	Law, Technology, and Economic Development	
LAW 7303	Antitrust	
LAW 7323	Corporations	
LAW 7369	Intellectual Property	
LAW 7417	Entertainment Law	
LAW 7501	Patent Law	

LAW 7590	Copyright Law
LAW 7633	Intellectual Property Law Clinic
LAW 7638	Trademark Law
LAW 7640	Information Security Law
LAW 7669	Law and Technology
LAW 7672	Data Privacy Compliance in the 21st Century
LAW 7695	Drug and Device Innovation: Law and Policy
LAW 7698	AI for Lawyers: Uses, Risks, and Regulation
LAW 7700	Intellectual Property and Social Justice
LAW 7705	Law and Global Technology

Students must also complete a clinic or paper related to intellectual property and innovation. To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement. A clinic that counts toward the four-course requirement may not be used to also satisfy this requirement.

LLM Experiential Program Requirements

The Experiential LLM program offers a rigorous curriculum that is designed to provide a comprehensive foundation in legal theory and practice as well as the freedom to explore and refine students' career interests. Experiential LLM students may choose the general program, which offers maximum flexibility to choose the courses the student wants and needs—to academically prepare students for a U.S. bar exam or to do whatever the student chooses as a lawyer who wants to make a difference—or one of the program's concentrations, which provide a competitive advantage in specific fields of interest. Students in the full-time Experiential LLM program deepen their knowledge and expand their expertise by taking a full-time co-op or equivalent experiential alternative during one academic term.

Complete all courses and requirements listed below unless otherwise indicated.

Foundational Courses

These foundational courses are required for any student who obtained their first law degree outside the United States:

Code	Title	Hours
LAW 6301	Introduction to American Law and Legal Institutions	2
LAW 6302	Introduction to Legal Research and Writing for LLM Students	2
LAW 6315	Legal Research and Writing for LLM Students: Preparing for Co-op	2

Electives

Code	Title	Hours
Students must take at least 18 credits of LAW electives if they took the foundational courses; they must take at least 24 credits of LAW electives if not required to take foundational courses. Courses taken to fulfill concentration requirements count toward the elective requirement.		18–24

Concentration Options

Students may choose to pursue a concentration by completing the listed requirements. Courses taken to fulfill concentration requirements count toward the elective requirement for the LLM degree.

- Business and Commercial Law (p. 965)
- Health Policy and Law (p. 968)
- Human Rights and Economic Development (p. 968)
- Intellectual Property and Innovation (p. 969)

Experiential Requirement

Students must take one full-time co-op or equivalent experiential alternative of at least 12 weeks (or, for part-time students, an equivalent period over multiple terms).

Program Credit Requirement

24 total hours required

For additional information regarding the Experiential LLM program and its requirements, please see the LLM student information handbook.

To fulfill this requirement, a paper must satisfy the criteria of the JD rigorous writing requirement. A clinic that counts toward the four-course requirement may not be used to also satisfy this requirement.

Law, LLM—Online

The online LLM program offers students an opportunity to receive specialized legal training beyond the training they have already received in a JD program or an equivalent law degree program outside the United States. The elective courses in the program will provide insight into legal issues in areas such as intellectual property, privacy, and business. Students interested in taking a bar exam will be able to strengthen their foundational knowledge of U.S. law by taking courses with content tested on bar examinations. The asynchronous online format affords flexibility with respect to the times and location at which students complete their work.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Foundational Course

This foundational course is required for any student who obtained their first law degree outside the United States.

Code	Title	Hours
LAW 6400	Introduction to U.S. Law and Legal System	3

Electives

Code	Title	Hours
Students must take at least 21 credits of LAW electives if they took the foundational course; they must take at least 24 credits of LAW electives if not required to take the foundational course.		21-24

Program Credit

24 total hours required

Minimum 3.000 GPA required.

Legal Studies, MLS—Online

The Master of Legal Studies program is designed for professionals who want a deeper understanding of law and legal concepts. Such professionals may be found in nonprofit organizations, foundations, financial services firms, pharmaceutical companies, insurance firms, compliance departments, or a host of other commercial and noncommercial settings. Examples of the professionals who would be interested in this degree are human resource professionals, claims representatives for insurance companies, professionals in healthcare organizations, bank loan officers, real estate brokers, risk managers, government affairs officers, management consultants advising organizations, development officers working on planned giving, and software entrepreneurs. They desire to know more about the law and to be able to deal more effectively with the lawyers with whom they interact during their professional lives. The degree includes concentrations in human resources law, business law, intellectual property law, health law, and public law and policy.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Foundation Courses

Code	Title	Hours
LS 6101	Introduction to Legal Studies 1: Law and Legal Reasoning	3
LS 6102	Introduction to Legal Studies 2	3

Core Courses

Code	Title	Hours
Complete at least four of the following:		12-18
LS 6110	Law of Information and Records	
LS 6120	Law and Strategy

PPUA 6507	Institutional Leadership and the Public Manager	

30 total semester hours required
Minimum 3.000 GPA required

The Master of Science in Media Advocacy places particular focus on developing direct and indirect advocacy skills: that is, to influence government decision makers directly and to change minds indirectly through shifting public opinion. The program uniquely combines grounding in governmental structures and the legal system with sophisticated training in the latest communication techniques including social media, web communications, and videography, as well as data analytics and data-driven storytelling. Successful graduates will be empowered to promote the public agenda of employers ranging from mission-driven organizations, such as the ACLU or the Sierra Club, to industry leaders, such as hospitals and technology companies, to lobbying and strategic communications groups and political consulting firms.

Core Requirements

Code	Title	Hours
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 5480	Research for Media Strategy	4

Health Law, Graduate Certificate (Boston)

Healthcare is a complex legal arena, as it encompasses several key stakeholders, from providers to patients to insurers. The Graduate Certificate in Health Law can help individuals recognize and navigate the varying legal needs in this space; an introductory course is paired with three courses tailored to the health industry.

The program helps to prepare graduates with the knowledge and skills to:

- Summarize and apply the appropriate statutes and regulations to concrete situations
- Examine legal regulations governing the provision and financing of healthcare services
- Gain an in-depth overview of health and compliance programs and the code of conduct for particular fields

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Requirements

Code	Title	Hours
Students enrolled in Northeastern University colleges other than the School of Law should contact a School of Law advisor at lawstudentaffairs@northeastern.edu for guidance on registering for courses from the School of Law.

PPUA 5240	Health Policy and Politics
SOCL 7267	Environment, Health, and Society
STRT 6220	Strategic Management for Healthcare Organizations

Additional Requirements

Co-op Requirement: Students must complete at least one co-op related to the certificate topic.

Writing Requirement: Students must complete a piece of substantial writing that meets the requirements of the JD upper-level rigorous writing requirement and that has a clear connection to the certificate topic.

For additional information on requirements associated with this certificate, please consult the JD program's Student Information Handbook.

Program Credit/GPA Requirements

12 total semester hours required, including at least 6 semester hours of LAW courses and at least 6 semester hours of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

Human Resources Law, Graduate Certificate (Boston)

The workplace has drastically changed in the past decade and keeps on evolving. This leads to many new human resources legal and regulation challenges. The Graduate Certificate in Human Resources Law is designed to provide professionals who work in human resources with the skills needed to recognize and navigate the many legal issues that arise within this heavily regulated field.

The program helps to prepare graduates with the knowledge and skills to:

- Summarize and apply the appropriate statutes and regulations to concrete situations
- Examine laws and regulations governing the management of people resources
- Gain an in-depth overview of human resources compliance programs and policies
- Leverage specialized knowledge in human resources law and regulations to achieve personal and institutional goals

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

12 total credit hours required, including at least 6 credit hours of LAW courses and at least 6 credit hours of non-LAW courses.

Students must receive a passing grade in all courses and satisfactorily complete all other requirements.

Accelerated Degrees

The School of Law offers a PlusJD pathway that allows students to accelerate the attainment of the JD degree by applying School of Law coursework completed as an undergraduate toward both the undergraduate and JD degrees. Students pursuing the PlusJD pathway are expected to complete all undergraduate degree requirements before they begin their first-year JD courses, with the exception of requirements that may be fulfilled by these JD courses. Interested students should consult their advisor during their freshman or sophomore years. See the PlusJD program (<https://law.northeastern.edu/admissions/jd/application-process/plusjd/>) for additional information.

Dual Degrees

- Law, JD / Accounting and Business Administration, MSAMBA (Boston) (p. 305)
- Law, JD / Business Administration, MBA—Full-Time (Boston) (p. 305)
- Law, JD / Criminology and Justice Policy, PhD (Boston) (p. 984)
- Law, JD / Criminology and Criminal Justice, MS (Boston) (p. 984)
- Law, JD / Public Health, MPH (Boston) (p. 810)
- Law, JD / Public Policy, MPP (Boston) (p. 984)
- Law, LLM / Business Administration, MBA—Full-Time (Boston) (p. 305)

Law, JD / Accounting and Business Administration, MSAMBA (Boston)

The Northeastern University School of Law and the D'Amore-McKim School of Business offer a combined degree that results in a Juris Doctor and Master of Science in Accounting and Business Administration. Students without a previous accounting background study how to operate effectively in specialized fields such as taxation law, corporate finance, or mergers and acquisitions. Students have an opportunity to gain advanced legal expertise alongside future-forward accounting and business knowledge.

Our combined degree program is a full-time, four-year course of study. Students usually complete two years of the law curriculum, followed by 15 months of the combined accounting and business administration curriculum, before returning to finish their studies at the School of Law.

Students gain valuable work experience in law and public accounting before they graduate. They can make a real impact during two co-ops in legal departments, law firms, government agencies, judges' chambers, or other legal settings. Students also experience working as an accounting associate during the busy tax season through a corporate residency at Big 4 or other globally known accounting firms.

Students concurrently pursue the two degrees and may count 12 semester hours of nonlaw coursework from the accounting and business administration curriculum toward the law curriculum. The corporate residency at an accounting firm may fulfill the requirement for the third co-op required for the law curriculum. Students are encouraged to consult their law advisor to select accounting and business classes that satisfy JD requirements.

Law, JD / Business Administration, MBA—Full-Time (Boston)

The JD/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to operate in increasingly interdependent legal and business spheres. As new technology disrupts industries and data availability and sophisticated use shifts the business landscape, our JD/MBA (<https://damore-mckim.northeastern.edu/programs/jd-mba/>) students prepare to guide corporate-level strategy and become the leaders businesses need.

Our JD/MBA program is a full-time, four-year course of study that includes three semester-long co-op work experiences arranged through Northeastern Law. Students complete three years of law school, taking a break after either year one or two to complete a year of business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they may add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may count 9 semester hours of nonlaw coursework from the JD curriculum toward the interdisciplinary and elective requirements of the MBA degree and up to 12 semester hours from the MBA curriculum toward the JD degree. Students should work with their MBA advisor to select JD courses that will fulfill MBA requirements and with their law advisor to choose MBA courses that will satisfy JD requirements.

Law, JD / Criminology and Justice Policy, PhD (Boston)

The JD/PhD program will expand the knowledge base and career options of students. The disciplines of criminology and justice policy and law share common interests in identifying opportunities to create conditions for justice, equality, and societal well-being. The dual degree will provide students with a comprehensive interdisciplinary understanding of what influences criminal justice problems and the sociopolitical, legal, and economic context in which they are found. Solving problems requires interdisciplinary knowledge and an analytical and practical skill set that includes interprofessional problem solving.

Up to 16 credits of coursework in the dual-degree program can be counted toward both the JD degree and the PhD degree. Of these 16 credits, no more than 12 credits of non-law courses can count toward the JD degree.

Students will take law courses during semesters spent in the law school. Students will take criminology courses during semesters spent in SCCJ. Please consult the School of Law (<https://www.northeastern.edu/law/>) for more information about JD requirements. Additionally, please consult SCCJ (<https://cssh.northeastern.edu/sccj/>) for more information about PhD requirements.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Law, JD / Criminology and Criminal Justice, MS (Boston)

The JD/MS program will expand the knowledge base and career options of students. The disciplines of criminal justice and law share common interests in identifying opportunities to create the conditions for justice, social equality, and societal well-being. The dual degree is designed to provide students with a comprehensive interdisciplinary understanding of what influences criminal justice problems and the social, political, legal, economic context in which they are found. Solving these problems requires interdisciplinary knowledge and an analytical and practical skill set that includes interprofessional problem solving.

Up to 16 credits of coursework in the dual-degree program can be counted toward both the JD degree and the MS degree. Of these 16 credits, no more than 12 credits of non-law courses can count toward the JD degree.

Students will take law courses during semesters spent in the School of Law. Students will take criminology courses during semesters spent in the School of Criminology and Criminal Justice. Please consult the School of Law (<https://www.northeastern.edu/law/>) for more information about JD requirements. Additionally, please consult SCCJ (<https://cssh.northeastern.edu/sccj/>) for more information about MS requirements.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Law, JD / Public Health, MPH (Boston)

Northeastern University's School of Law and Bouvé College of Health Sciences offer a JD/MPH dual degree. Given the worldwide trend toward urbanization, the Master of Public Health (MPH) recognizes the growing need for professionals trained to respond to unique public health challenges and opportunities facing urban populations. The MPH program brings together interdisciplinary faculty (from the School of Law, D'Amore-McKim School of Business, College of Social Sciences and Humanities, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences) with expertise in collaborating with diverse urban populations to offer students an opportunity to obtain practice-based knowledge, skills, and experience needed to address public health problems.

Up to 9 credit hours of coursework in the JD program may count toward the MPH, while up to 12 credit hours of coursework in the MPH program may count toward the JD. See the JD/MPH program page (<https://law.northeastern.edu/academics/programs/jd/dual-degrees/public-health-bouve/>) for more information.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Law, JD / Public Policy, MPP (Boston)

The JD/Master of Public Policy (MPP) is designed to equip graduates with a unique blend of skills for navigating a complex and rapidly changing policy landscape. The program builds on students' legal training with a compelling blend of skills in applied public policy analysis, policy design, and strategic policy formation. Students also gain career-relevant experience through internships, small group capstone projects, and other

interactions with professionals in the field. All are part of a learning process designed to enable the Northeastern law and public policy graduates to navigate, and to redefine, diverse policy areas.

Ideally, students would apply to Northeastern's JD and MPP programs simultaneously. Those who apply and are admitted to both programs take MPP classes after completing their first year in the School of Law. Applicants may also be considered after they have enrolled in the JD program; interested JD students should consult the School of Law's Office of Academic and Student Affairs and the School of Public Policy and Urban Affairs graduate program director for more information.

Students enrolled in this dual-degree program will be able to count 8 JD credit hours toward their MPP degree and 12 MPP credit hours toward their JD degree. Students should consult advisors in each program if they have questions about which courses may be shared between degrees.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Law, LLM / Business Administration, MBA—Full-Time (Boston)

Law, LLM / MBA

The LLM/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to harness legal and business skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm-mba/>) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, 20-month course of study. Students start taking classes in business school, take law courses next, and finish with business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by choosing an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

Law, LLM—Experiential / MBA

The LLM/MBA dual degree is offered through a partnership between Northeastern Law and the D'Amore-McKim School of Business to position students to harness business and legal skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm-mba/>) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, two-year course of study that includes a semester-long co-op work experience arranged through Northeastern Law. During the course of their studies, students take classes in business school and the School of Law and complete a law co-op.

Students specialize their degree by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students will concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

Academic Progression Standards

Academic Progress/Standing

To be in good standing, a graduate student must continuously maintain a minimum cumulative grade-point average of 3.000 on a 4.000 scale and must also make continuous satisfactory academic progress. To make SAP, a student must earn at least 66% of their cumulative attempted credits. Nonmatriculated students are required to be in good academic standing to be allowed to register for any subsequent classes.

Students are responsible for reviewing their grades and academic standing at the end of each term through the Student Hub. If there are any discrepancies, students should immediately contact the instructor(s) directly. Students who want to appeal a grade have 30 calendar days from the date the grade is posted to do so.

Academic Probation and Dismissal

Notation of academic probation appears on a student's internal record but not on their permanent transcript.

With exception as specified by the program, a graduate (nondoctoral) student is placed on academic probation if their cumulative GPA is below 3.000 and/or if they do not earn at least 66% of their cumulative attempted credits. The student is strongly encouraged to consult with their academic and career advisor to develop an individualized success plan to improve their academic standing. Otherwise, a registration hold may be placed on the student's account.

A student whose cumulative GPA remains below 3.000, and/or does not earn at least 66% of their cumulative attempted credits in the term of enrollment subsequent to the one after they were placed on academic probation, will be academically dismissed. A student who has been academically dismissed from the college is automatically dismissed from their program of study.

Dismissal Notification

A student will be notified about their dismissal within one week following the end of the term and has the right to appeal the dismissal decision to the college's Academic Standing Committee if they can provide documented evidence supporting an appeal. The notification of dismissal will include the appeal deadline.

Students appealing a dismissal decision may not be eligible to enroll in classes the term following their dismissal to allow time for the appeal process.

Students are responsible for reviewing their grades and academic standing at the end of each term through the Student Hub.

Academic Resources

Interactive Academic Integrity Checklist

The Citation and Academic Integrity Checklist (<https://cps.northeastern.edu/current-students/academic-integrity/>) is a tool students can use before they turn in every assignment to ensure that they have not accidentally committed any of the most common violations of the Academic Integrity Policy. Additionally, the IAC contains links to examples of APA- and MLA-style formatting.

Global Student Success

10 Belvedere
617.373.2455
gss@northeastern.edu

Website (<https://international.northeastern.edu/gss/>)

Global Student Success is committed to supporting the success of international students at Northeastern University through cross-cultural, linguistic, and academic support services. We also partner with faculty, staff, and administrators to integrate global dimensions and cross-cultural understanding into the Northeastern experience.

Online Writing Lab

Website (<https://cps.northeastern.edu/academics/online-writing-center/>)

To provide students with guided writing support, the College of Professional Studies created the Online Writing Lab (<https://cps.northeastern.edu/academics/online-writing-center/>) as laboratory courses and attached them to six undergraduate courses and one graduate course. Students submit all of their essays to their writing specialists in the labs and then receive sophisticated revision and editing strategies to help them improve their essays before submission for a final grade. Students obtain strategies to help them focus, develop, edit, and refine their writing.

Tutoring Services

Website (<https://cps.northeastern.edu/academic-resources/tutoring-services/>)

Tutoring can benefit skilled professionals and beginning students alike. Whether you're struggling with organic chemistry, working on a long paper, or putting the finishing touches on a presentation, Northeastern University offers many opportunities for you to enhance your academic work and professional skills through free one-on-one academic support on and off campus.

Active-Duty Military Personnel

As a member of the Service Member Opportunity Colleges, the College of Professional Studies' academic residency requirement is different for active-duty service members. Active-duty service members are required to complete 30% of the graduate certificate/degree program at the College of Professional Studies.

Attendance Verification

"I Am Here" Process

After course registration, students are required to verify their intent to enroll in College of Professional Studies class(es) through the Student Hub (<https://me.northeastern.edu>) beginning four calendar days before the start of the academic term and ending on day two of the term.. This verification process is called "I Am Here." Students who fail to complete this process on time will be dropped from the class(es), which may impact their financial aid or international student visa eligibility.

Students are responsible for ensuring completion of the IAH process, which requires that they do not log out of the system early. Students who do not receive a "Successful Completion" message have not reached the end of the procedure and must start again. Sometimes it may take 24 hours before students can restart the procedure.

A student who registers for a course and completes the IAH process but does not officially drop the course by the deadline, regardless of their level of participation or attendance/nonattendance, is responsible for paying 100% of the tuition charges and applicable fees and the final earned grade. A student in this situation may earn an F grade that will be part of their permanent academic record.

Students registering for the first time after the start of classes will have access to complete IAH the following day.

Students who experience difficulty with the process or have questions should request support through the Registrar Services portal (<https://service.northeastern.edu/registrar/>).

Completing Degree Requirements

Graduate and Doctoral Degree Programs

To earn a graduate or doctoral degree, students must complete all courses as prescribed in the curriculum; the required number of credits as per the curriculum; applicable thesis or dissertation; the residency requirement; and maintain a minimum cumulative grade-point average of 3.000 or as outlined by the specific program.

Graduate Certificate Programs

To earn a graduate certificate, students must complete all courses as prescribed in the curriculum; the required number of credits as per the curriculum; the residency requirement; and maintain a minimum cumulative GPA of 3.000 or as outlined by the specific program.

Time Limit on Courses

Graduate course credits earned in the academic program or accepted by transfer are valid for a maximum of seven years.

Time Limit on Program Completion

- Graduate certificate students have up to three full years from the time of the first term of enrollment to complete the program.
- Master's degree students have up to seven full years from the time of the first term of enrollment to complete the program.
- Doctoral degree students, with the exception of the Transitional Doctor of Physical Therapy, have up to seven full years from the time of the first term of enrollment to complete the program.
- Transitional Doctor of Physical Therapy students have up to four full years from the time of the first term of enrollment to complete the program.

Note: The College of Professional Studies makes adjustments to its academic program offerings and curricula to stay current and to be able to offer students the most relevant courses and knowledge in the field. Examples of such changes include adding new programs, adding/adjusting course requirements, adding/adjusting courses, and adding/adjusting curriculum requirements.

When there is a change to a curriculum or program requirement, students already matriculated and actively enrolled in the program may continue to follow the program requirements at the time of matriculation or to follow the new curriculum/program requirements, unless it is otherwise specified by the academic program at the time of the announcement of said changes.

Degrees, Majors, and Concentrations

Change of Major/Program of Study

A graduate (nondoctoral) student matriculated in a certificate/degree program who would like to enroll in a different graduate program, after consulting with their academic advisor, must apply to the intended program by submitting the Change of Major form.

Previously awarded transfer credit awards are subject to change as a result of a program change. Students on financial aid or an international student visa are responsible for understanding the impact that results from a program change.

Doctoral students must consult with their program director or designee.

Concentrations

Only Northeastern University-approved concentrations are noted on a student's official academic record. If a student pursues a customized specialization, no concentration will be noted on their official academic transcript. Students who wish to pursue a customized specialization must consult with their academic advisor and seek approval from the academic program.

Full-Time Status

A graduate (nondoctoral) student's full-time course load is 9 quarter-hours of graduate credit for the quarter. An exception is made for students matriculated in master's degree programs that only require 4-credit courses, in which case full-time student status is attained with enrollment in 8 quarter-hours of graduate credit for the quarter.

A doctoral student's full-time course load is determined by the structure of the program.

Note that full-time status may be defined differently for federal loan purposes. International students have other considerations/requirements to maintain their visa eligibility. Visit Student Time Status (p. 130) for information on student time status.

Course Overload

A maximum course load (different from full-time enrollment) for a graduate (nondoctoral) student is 16 credits taken across a 12-week term, with no more than 8 credits per six-week session.

To be eligible for a course overload (greater than 16 credits per 12-week term or greater than 8 credits per six-week session), a graduate (nondoctoral) student must:

- Have a record of successful study with 12 or more credits a term at Northeastern University
- Have a minimum cumulative grade-point average of 3.500
- Provide a rationale to support the request

Students need to complete the appropriate form and return it to their career and academic advisor. Course overload is approved per term.

Each doctoral program has its own enrollment and course load requirements. Doctoral students who wish to seek a course overload must consult with the program director or designee.

International Student Enrollment Requirements

IMPORTANCE OF MAINTAINING F-1 STATUS

International students studying at Northeastern are responsible for maintaining compliance with U.S. federal regulations. Failure to maintain full-time enrollment, in accordance with these regulations, can result in consequences. Regular consultation with college academic advisors, as well as Office of Global Services international student advisors, is required before taking any action that may impact immigration status and educational endeavors in the United States.

ACHIEVING FULL-TIME ENROLLMENT STATUS

Full-time enrollment status must be maintained by F-1 students throughout the academic year. To achieve full-time status, graduate students must be enrolled in 8 to 9 credits throughout each academic term. Students can consult with their college academic advisor prior to each term to develop a course schedule to maintain full-time status. F-1 students are expected to study on-ground and cannot enroll in an online course without first speaking to a college academic advisor to confirm eligibility. If approved, F-1 students who need to withdraw/drop from a course must withdraw/drop from the additional online course first and not from any of the on-ground core courses in order to maintain full-time status.

COLLEGE OF PROFESSIONAL STUDIES ACADEMIC TERM

In CPS, each academic term in fall, winter, and spring is defined as a quarter-term consisting of 12 weeks. Some courses are scheduled for the entire 12 weeks, while others are scheduled for either the first six weeks or the last six weeks (parts of a term). A full summer term consists of eight weeks. Some courses are scheduled for the entire eight weeks of a term, while others are scheduled for parts of a term.

FINAL TERM

F-1 students are required to maintain full-time enrollment status, except in the final academic term of degree completion. If the course requirements for degree completion are less than 8 to 9 credits, they must be completed on-ground throughout the entire final term.

ELIGIBILITY FOR SUMMER TERM OFF

All students, regardless of the term in which they begin studies, (e.g., CPS winter or spring quarter-terms) are eligible to take the summer term off as their standard vacation term, as long as they confirm enrollment in the following fall term and they are not starting or ending their program of study in that same summer term.

Directed Study

Directed studies are offered when a course is required for a student's program of study but said course is not available in a given academic term and there is immediacy for a student to complete said course. Academic deans/directors will make the decision if there is a compelling need to run a course as a directed study.

Global Partnership Programs

Students enrolled in a College of Professional Studies' global partnership are required to abide by the policies and procedures of both institutions or as specified in their program.

Graduate Campus

Students enrolled in a Northeastern University graduate (regional) campus are also required to abide by the policies and procedures specific to that campus.

Master's Degree Admission Requirements

Note that all master's degrees offered through the College of Professional Studies have the following admission requirements:

- Online application
- Statement of purpose (500–1,000 words)
- Professional resumé
- Official undergraduate transcript(s) noting conferral of a bachelor's degree

- Two letters of recommendation
- English-language proficiency proof (for non-native English-language speakers)
- TOEFL, IELTS, Pearson, Duolingo, or TOEIC scores

Some programs have additional requirements.

The college reserves the right to rescind an offer of acceptance if the student is no longer considered in good academic or disciplinary standing between the time of acceptance and matriculation.

New Student Orientation (On-Ground and Online)

New students taking courses on-ground receive an invitation to the on-ground orientation. The purpose of New Student Orientation is to provide information and tools for each student's success from the point of program entry to degree completion. All new students are expected to attend the on-ground orientation. If students cannot attend the on-ground orientation, they should thoroughly review the New Admitted Students (<https://cps.northeastern.edu/current-students/orientation/>) site.

Personal Professional Enrichment (PPE)

Students interested in taking graduate-level (nondoctoral) courses for personal or professional enrichment need to complete an online application (<https://cps.northeastern.edu/admissions-aid/graduate-admissions/>) as PPE students. Once approved, students will be able to register through the Student Hub (<https://me.northeastern.edu>).

- Students on PPE status are expected to satisfy applicable course prerequisites before enrolling in a course.
- Students taking courses while on PPE status may elect to apply to a graduate certificate or degree program by completing the formal application process (<https://cps.northeastern.edu/admissions-aid/graduate-admissions/>). Up to two qualifying courses (or 8 credits) completed while on PPE status may be applied to the intended program of study. To be eligible, the minimum earned grade for the course(s) must be B.
- Students taking courses under PPE status are not eligible for financial aid.

PPE status is not an option for students seeking an F-1 visa.

Readmission to Program

A new admission application is required of students whose studies are interrupted voluntarily for more than three years.

Students are expected to meet the requirements of the program curriculum current at the time of the approved readmission. If the program into which the student is seeking readmission is no longer offered, the student may apply to another program and must meet the admissions requirements for that program. Contact the Office of Admissions (<https://cps.northeastern.edu/admissions-aid/>) for assistance and to complete the admission application.

If readmitted, transfer credits that a student was previously awarded will be reevaluated following the transfer credit award rules current at the time of readmission. It is at the discretion of the academic program to determine applicability of courses previously completed.

Reentry to Program

Application for reentry into any academic program is required of students whose studies are interrupted voluntarily for a period of one to three years. Students who are dismissed academically must wait at least one academic term before applying for reinstatement.

Students are expected to meet the requirements of the program curriculum current at the time of the approved reentry. If a student does not enroll in the term in which they were approved for reentry, they must follow the curriculum requirements for the term in which they resume coursework with approval. If a student waits for more than one year to resume their studies after being approved for reentry, they will have to apply for reentry again.

If the program into which the student is seeking reentry is no longer offered, the student may choose to enroll in another program if they meet the admissions requirements for that program. Contact the Office of Academic Advising (<https://cps.northeastern.edu/academic-resources/advising/>) for assistance and to complete the appropriate form.

Registration and Taking Courses

Course Registration

For course registration information, visit the College of Professional Studies webpage (<https://cps.northeastern.edu/current-students/registering-for-classes/>).

Course registration procedures are as follows:

- Newly accepted and returning students add or drop courses through the Student Hub any time during the registration period.
- Certificate- and degree-seeking students whose studies have been interrupted voluntarily for one to three years or more need to first apply for reentry through the Office of Academic Advising before registering for course(s).
- Global program students should consult with their program to determine if they need to register on their own or if the program will register them.

All students need to be mindful of the college's course add/drop policies and deadlines to register as early as possible with the intent to secure a spot in the preferred course and to avoid being charged in full for missing the course drop/withdrawal deadline.

Auditing a Course

Graduate (nondoctoral) students are permitted to audit graduate (nondoctoral) courses, but they must complete the usual registration process and pay regular tuition fees. There is no reduction in fees for auditing.

An auditor may participate in class discussions, complete papers and projects, and take tests and examinations for informal evaluation. Regardless of the amount or quality of work completed, however, no academic credit will be granted at any time for audited courses. In addition, audited courses may not be used in the determination of enrollment status for financial aid purposes and do not count toward program completion.

The student's decision to audit a course must be communicated in writing to the Office of the University Registrar before the fourth class meeting for 12-week courses. For 4-, 6-, and 8-week courses, requests must be received by the second class meeting. No exception to this procedure may be approved without the authorization of the college's academic standing committee.

If approved, the student should inform the instructor of their status as auditor of the course.

Course Selection and Planning

Students should refer to their degree audits for program curriculum information, to select courses, and to monitor their progress toward degree completion. Students should access their degree audits through the Student Hub or request an audit from their academic advisor. Degree audits are unofficial records of academic progress. Students are encouraged to consult with their academic advisor about their academic planning.

Course Prerequisites

Course prerequisites are courses that are required to have been completed prior to enrolling in another course. Before registering for a course through the Student Hub, students, regardless of matriculation status, should consult the academic catalog to determine whether they have satisfied the course prerequisites.

Course Corequisites

Course corequisites are courses that are required to be taken concurrently. Before registering for a course through the Student Hub, students, regardless of matriculation status, should read the course description to determine if there is a corequisite requirement and register for both courses.

Retaking a Course

If a student wishes to improve their cumulative grade-point average by retaking a course, they may do so. Only the grade earned in the last attempt is used to compute the GPA while all grades remain part of the student's permanent academic record. A student is required to pay the normal tuition charges for all retaken courses. A student may not retake more than two nonrepeatable courses or 8 quarter hours of credit, whichever is greater, to satisfy the requirements of the degree.

Financial aid recipients must be mindful that retaking a course could impact their aid eligibility. Students with questions about this possible impact should contact their financial aid counselor.

Course Waiver

A course waiver may be awarded to a student who has completed the equivalent course at an accredited institution other than the College of Professional Studies in the past five years. The waiver will exempt the student from completing the required course. The student will complete another course, as approved by the program, to satisfy the number of credits required for the program.

Doctoral students must consult with their academic program to determine if course waivers are permitted.

Duration of Courses

Each full fall, winter, and spring term runs for 12 weeks. Each full summer term runs for 8 weeks.

Course durations are as follows:

- During the fall, winter, and spring terms, courses are scheduled for either 6 or 12 weeks.
- During the summer term, courses are scheduled for 4, 6, or 8 weeks.

Course Add/Drop Policy

Refer to the academic calendar (<https://registrar.northeastern.edu/article/academic-calendar/>) for specific dates. Students should consult with their academic advisor before adding or dropping classes.

Students may add a 4-week or 6-week course within the first week of the course. For 8- and 12-week courses, students may add a course within the first 2 weeks of the course. Students who add a class during the add/drop period are responsible for all assignments missed prior to enrolling. Enrolled students are responsible to attend classes during the add/drop period, and absences will be held accountable to the instructor's attendance policy.

Students who drop a course before the add/drop deadline will not be charged for the course and will not have a W (withdrawal) on their transcript. Thereafter, students are responsible for 100% of the tuition charges and applicable fees and the earned grade will be on the students' permanent academic record. All such dates are specified in the academic calendar.

Students must add/drop courses using the Student Hub.

A reduction in a student's course load could affect a student's international student visa status or financial aid eligibility.

Students who experience difficulty adding or dropping a course should promptly request support through the Registrar Service Portal (<https://service.northeastern.edu/registrar/>). If it is determined that there is an issue with the student's Student Hub account or access, they need to contact the Service Desk at 617.373.4357 (HELP); help@northeastern.edu.

Students with holds (e.g., financial, judicial) may have restricted access to add, drop, or withdraw from a course. In such instances, students are responsible for resolving the hold immediately and to meet the established course registration deadlines.

Course Withdrawal Policy

Refer to the academic calendar (<https://registrar.northeastern.edu/article/academic-calendar/>) for specific dates. All students are encouraged to consult with their academic advisor prior to withdrawing from a course.

Students who withdraw from a course after the add/drop deadline and before the last day to withdraw will receive a W grade and will be responsible for 100% of the tuition charges and applicable fees. The W grade does not affect the calculation of the GPA but it does impact a student's academic progression, which may result in the student being placed on academic probation or dismissal.

Students must withdraw from courses using the Student Hub.

A reduction in a student's course load could affect a student's international student visa status or financial aid eligibility.

Students who experience difficulty withdrawing from a course should promptly request support through the Registrar Service Portal (<https://service.northeastern.edu/registrar/>). If it is determined that there is an issue with the student's Student Hub account or access, the student needs to contact the Service Desk at 617.373.4357 (HELP); help@northeastern.edu.

Students who fail to withdraw from a course by the deadline, regardless of their level of class participation or attendance, are financially and academically responsible. A student's lack of participation/attendance will likely result in a final grade of F.

Withdrawals may impact a student's time to degree completion.

Reinstatement after Academic Dismissal

A student who is academically dismissed from the College of Professional Studies is not eligible to register again for courses at CPS until they are approved for reinstatement. A student may apply for reinstatement after a minimum of one academic term if they can provide documented evidence supporting the application (e.g., completed two graduate courses with a grade of B or higher at another accredited college or relevant professional development opportunities during the one-term absence). The application must be made in writing by submitting the appropriate form and providing supporting documentation to the Office of Academic Advising (<https://cps.northeastern.edu/academic-resources/advising/>).

If reinstatement to the college is approved, a student is expected to meet the most current program admissions and curriculum requirements.

A student approved for reinstatement but who does not meet the admissions requirements for the intended program of study, or if the intended program of study is no longer available, may apply to another program.

Students reinstated must achieve good academic standing in the first term of reinstatement.

Seeking More than One Certificate or Degree

A graduate (nondoctoral) student can be enrolled in only one graduate program at a time.

Graduate (nondoctoral) students seeking more than one certificate or degree after having completed a program should note that graduate credits earned toward:

1. A degree at any institution may not be used to satisfy the requirements of another graduate program.
2. A degree earned at the College of Professional Studies may be used to satisfy the requirements of a graduate certificate with a cap of 50% of the required credits of a graduate certificate, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the certificate.
 - a. If the same course is required in the degree and certificate programs and the student has exceeded the maximum number of credits that can be applied in the certificate program, they may request a course substitution to be permitted to take another course instead of repeating the course.
3. With specified exception, a certificate earned at CPS may be used to satisfy the requirements of a graduate degree, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the degree.
4. A certificate earned at CPS may be used to satisfy the requirements of a second certificate with a cap of one course of no more than 4 credits, if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the certificate.
 - a. If the same course is required in both certificate programs and the student has exceeded the maximum number of credits that can be applied in the second certificate program, the student will request a course waiver to be permitted to take another course instead of repeating the course. See Course Waiver (p. 991) section.
5. A certificate earned at another accredited institution may be accepted as transfer credits to satisfy the requirements of a graduate degree with a cap of four 3-credit courses or three 4-credit courses (no more than 12 credits), if the contents are determined to be applicable per the program director and if the credits were earned within seven years of pursuit of the degree.

A graduate (nondoctoral) degree student who wishes to pursue a graduate certificate concurrently may seek admission in the certificate program by the end of their first term of matriculation in the degree program. Courses that satisfy requirements for both the degree and certificate will count for each.

- When the certificate is identical to a concentration in a degree program, only the certificate credential will be earned. The student's transcript will not indicate completion of a concentration.

Special Student Status

Graduate applicants to the College of Professional Studies may be eligible to take up to 16 graduate (nondoctoral) quarter hours toward their program while completing the formal application process by seeking special student status (<https://cps.northeastern.edu/admissions-aid/graduate-admissions/graduate-special-student-status/>).

- Students taking courses under special student status are expected to satisfy applicable course prerequisites before enrolling in a course.
- Students taking courses under special student status are not eligible for financial aid.
- Special student status does not guarantee acceptance.
- The maximum number of courses students may take under special student status is two. After completing two courses, students will be blocked from further course registration until they have been officially accepted into a program.

The following programs are not available for special student status: Master of Arts in Teaching; Master of Education, Special Education Concentration; Doctor of Education; Doctor of Law and Policy, or Doctor of Professional Studies.

Special student status is not an option for students on an F-1 visa.

Student Evaluation of Courses

Students play a critical role in Northeastern University's commitment to quality teaching and academic excellence when they participate in the evaluation of courses, an online survey students complete anonymously. Students are expected to participate in the course evaluation process with constructive feedback that is relevant to teaching and course content.

Students may access the course evaluation summary results from previous terms via the Student Hub (<https://me.northeastern.edu/>). Courses with three or fewer students enrolled are not surveyed.

Transfer Credit Policies

All graduate transfer credit awards are made on a case-by-case basis. Transfer credit awards are made for eligible courses successfully completed at regionally and programmatically accredited institutions. The Council for Higher Education Accreditation provides information about the organizations responsible for these two forms of accreditation. Official transcripts from all institutions should be sent directly to the College of Professional Studies Office of Admissions at the time of application.

Students seeking transfer credits earned at institutions outside the United States should submit an official English evaluation completed by an approved credential evaluator. Course descriptions and/or syllabi also should be translated into English and submitted to the College of Professional Studies Office of Admissions.

A maximum of 12 quarter hours or four 3-credit courses or three 4-credit courses obtained at another institution may be accepted as transfer toward the degree, provided the credits consist of work taken at the graduate level for graduate credit, carry minimum grades of B (or 3.000 on a 4.000 scale), have been earned at an accredited institution or equivalent, and have not been used toward any baccalaureate or advanced degree or certificate of advanced graduate study at another institution.

Transfer credits must be no more than five academic years old at the time the student is admitted to graduate study. Courses older than five years will be accepted only in rare circumstances.

Prior Learning Assessment

Students may be eligible for prior learning assessment credit if they have accrued a foundation of knowledge and skills equivalent to the content of courses offered by the College of Professional Studies.

Awarded credits are incorporated into a student's degree plan as transfer credits and are subject to Northeastern University's residency requirement. PLA credit is limited to a maximum of 12 quarter hours for graduate students. Acceptable credits for PLA review are determined from approved certificates, training, and a portfolio review of prior work experience. As part of consideration for PLA credits, faculty will evaluate and map learning outcomes and achievement in alignment with NECHE accreditation requirements.

Potential PLA credits should be considered and discussed as part of a student's transfer credits at the time of enrollment. Interested students should contact their academic advisor for more information.

Graduate Certificate Transfer Credit Policies

- A maximum of 4 quarter hours of transfer credit

Master's Degree Transfer Credit Policies

- A maximum of 12 quarter hours of transfer credit

Doctoral Degree Transfer Credit Policies

- A maximum of 9 quarter hours of transfer credit for Doctor of Education students
- A maximum of 8 quarter hours of transfer credit for Transitional Doctor of Physical Therapy students
- No transfer credit is awarded for students in the Doctor of Law and Policy program

Doctoral Degree Programs

Northeastern University's College of Professional Studies professional doctorate programs are designed for working professionals to address problems of practice through coursework—based on developing professional, scholarly, and research expertise—culminating in an original research project. The programs are guided by industry-leading faculty and are built on the scholar-practitioner model. Students conduct research that is related to their professional experience and designed to solve new and emerging problems.

The Doctor of Education

The Doctor of Education empowers students to bring about solutions to complex problems of practice in their local context, while leveraging a global network to magnify students' boundless experiential learning to build a more socially just world. The Dissertation in Practice, the culminating component of the EdD, is designed to prepare leaders who can construct and apply knowledge to transform their organizations and communities through laboratories of practice where students implement change and then measure and analyze the impact to improve their professional practice. This knowledge is the start of students' potential for meaningful change work. Students magnify their ability to generate socially just change by leveraging Northeastern's global network of students, alumni, employers, and entrepreneurs.

Doctor of Law and Policy

The Doctor of Law and Policy prepares experienced professionals to become transformative leaders who understand and influence the intersection of law, policy, and practice. Our diverse students develop expertise in legal reasoning, policy analysis, and practical implementation while pursuing a thesis tailored to their professional interests and goals. The DLP empowers exceptional citizens to leverage their professional experience with advanced academic training to solve complex problems in organizations, policymaking, and democratic governance. Through rigorous coursework and mentored research, students master advanced analytical methods, develop a nuanced understanding of governance systems, and build expertise in evidence-based decision making within their chosen specialization. The program's distinctive hybrid format accommodates working professionals while fostering a collaborative learning community where intellectual diversity enriches academic discourse. Graduates emerge equipped to drive meaningful change in their organizations, industries, and communities, with the intellectual adaptability to navigate evolving regulatory environments and emerging societal challenges throughout their careers.

Programs

Doctor of Education (EdD)

- Education (Boston) (p. 996)
- Education (Seattle) (p. 999)

Doctor of Law and Policy (DLP)

- Law and Policy (Boston) (p. 1001)
- Law and Policy (Seattle) (p. 1002)

Education, EdD (Boston)

The Doctor of Education (EdD) empowers students to bring about solutions to complex problems of practice in their local context, while leveraging a global network to magnify students' boundless experiential learning to build a more socially just world. The Dissertation in Practice, the culminating component of the degree, is designed to prepare leaders who can construct and apply knowledge to transform their organizations and communities through laboratories of practice where students implement change and then measure and analyze the impact to improve their professional practice. This knowledge is the start of students' potential for meaningful change work. Students magnify their ability to generate socially just change by leveraging Northeastern University's global network of students, alumni, employers, and entrepreneurs.

Admission Requirements

Note that all Doctor of Education degrees offered through the College of Professional Studies have the following admission requirements:

- Online application
- Academic transcripts (undergraduate **and** graduate)
- Admissions statement (1,000–1,200 words)
- Minimum of three years of professional work experience in a related field
- Professional resumé
- Faculty recommendation
- Two professional recommendations
- English-language proficiency proof (for non-native English-language speakers)

HIGHER EDUCATION ADMINISTRATION CONCENTRATION

The Higher Education Administration concentration provides an opportunity for experienced higher education professionals to examine new and deepen previous understanding of practices within all sectors of postsecondary education. Sectors examined include community colleges, four-year colleges, for-profit institutions, and research universities. The increased globalization of higher education is addressed throughout the program. The concentration courses allow experienced higher education professionals to advance their professional practice by developing and deepening their understanding of the roles of colleges and universities in our society. Specifically, this concentration provides the opportunity to:

1. Be well-grounded in areas essential to understanding and articulating the educational roles of colleges and universities that include:
 - Cultural, ethical, and societal issues that affect higher education
 - History of higher education worldwide
 - Organization, governance, leadership, and administrative theories and practices
 - Higher education finance, law, and planning
2. Develop skills and knowledge for establishing and sustaining initiatives in higher education.
3. Address the challenge of ensuring educational equity through an evaluation of the roles, functions, and interrelationships among a college's or university's major constituents, including students, faculty, staff, and alumni.
4. Conduct research at the worksite that contributes to the resolution of an urgent and complex problem of practice.

INNOVATIVE TEACHING AND LEARNING

The Innovative Teaching and Learning concentration focuses on transforming education through innovation, justice, and policy by providing engaging opportunities for current and aspiring teaching and learning specialists working in a variety of educational spaces. In a global, ever-changing educational environment, cultivating strong teaching and learning specialists is critical to building strong, safe, and equitable learning spaces. The concentration focuses on teaching and learning both inside and outside the bounds of P–20 schools. Through a focus on developing and leading innovative curriculum and professional development, the coursework and programmatic experiences are experiential—offers opportunity for learning and growth in connection with partners in the field; modular—develops specialized professional knowledges; and justice-oriented—enables an understanding of change processes that deconstruct systemic injustice at all educational levels. Specifically, the Innovative Teaching and Learning concentration provides the opportunity to:

- Develop the ability to improve teaching and learning through innovation
- Design classroom, curriculum, and professional development that lead to greater achievement and equity

- Design systems to address race, class, and gender inequities in education
- Leverage partnerships with business and community to expand networks and experiences

INTEGRATIVE STUDIES CONCENTRATION

The Integrative Studies Concentration provides an opportunity for students to design a program of study that includes the program-required foundation and research courses, concentration courses from any EdD concentration, and electives from the Doctor of Education or Doctor of Law and Policy programs.

TRANSFORMATIVE SCHOOL LEADERSHIP

The Transformative School Leadership concentration provides innovative opportunities for experienced education professionals who are current and aspiring leaders of early childhood centers, public or private schools, or school districts. In a global, ever-changing educational environment, cultivating strong educational leaders is critical to building strong, safe, and equitable learning spaces. In preparing to meet complex and nuanced educational challenges, school leaders need to be knowledgeable and innovative, capable of facilitating the generation and advancement of new ideas and strategic initiatives, and equipped to shape the needs of education in K–12, higher education, organizational contexts, and beyond. Through deeper engagement with these components, the Transformative School Leadership concentration prepares students to lead and transform educational spaces P–12. The coursework and programmatic experiences are experiential—offers opportunity for learning and growth in connection with partners in the field; modular—develops specialized professional knowledges; and justice-oriented—enables an understanding of change processes that deconstruct systemic injustice at all educational levels. Specifically, this concentration provides the opportunity to:

- Develop the ability to shape a vision of academic success for all students
- Develop leadership capacity in others
- Manage people, data, and processes to develop innovative skills and knowledge
- Design systems to address race, class, and gender inequities in education
- Leverage partnerships with business and community to expand networks and experiences

WORKPLACE LEARNING

The Workplace Learning concentration embraces the value of equity through instruction grounded in the concept of enabling people of all backgrounds, networking across the globe, to achieve their potential and the belief that social issues matter in workplace learning and development. This doctoral concentration in Workplace Learning helps learning professionals gain a deeper understanding of, recognize, and influence real-life social inequalities marginalized populations face in the workplace. The concentration courses allow experienced learning professionals to advance their professional practice by developing and deepening their understanding of workplace learning, organizational dynamics, learning strategy, and ethics. Specifically, this concentration provides the opportunity to:

- Articulate the issues facing workplace learning
- Develop skills and knowledge for establishing and sustaining initiatives and partnerships in workplace learning
- Conduct research in the workplace that contributes to the resolution of an urgent and complex problem of practice

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal CAGS Education Leadership Management (<https://catalog.northeastern.edu/graduate/professional-studies/doctoral-degree-programs/education-leadership-management-cags/#text>). Note that no students will be admitted directly into the CAGS Education Leadership Management (<https://catalog.northeastern.edu/graduate/professional-studies/doctoral-degree-programs/education-leadership-management-cags/#text>) program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Note: A minimum of 51 quarter hours must be taken at the College of Professional Studies.

Required Foundation Courses

Code	Title	Hours
EDU 7207	Foundations of Doctoral Studies	3
EDU 7218	Leadership for Social Justice	3
EDU 7219	Foundations of Collaboration, Leadership, and Change	3

Required Research Courses

Code	Title	Hours
EDU 7225	Fundamentals of Research	3
EDU 7226	Research Design	3
EDU 7294	Advanced Research Design 1	3

EDU 7295	Dissertation in Practice Seminar	3
EDU 7310	Advanced Research Design 2	3

Concentrations

Complete one of the following concentrations:

- Higher Education Administration
- Innovative Teaching and Learning
- Integrative Studies
- Transformative School Leadership (p. 999)
- Workplace Learning (p. 999)

Dissertation in Practice

Code	Title	Hours
EDU 8750	Proposal, Action Step, and Evaluation	6
EDU 8760	Action Research Results and Dissemination	6

Residency Requirement: Each student is required to attend two residency events. Dates and other event information are released annually. Seattle and Charlotte students will satisfy residency requirements through regional campus hybrid coursework.

Elective List

Complete four courses from the EDU 7000 level. Below is a list of courses regularly offered as electives within the Doctor of Education program.

Code	Title	Hours
EDU 7227	The Power of Experiential Learning	
EDU 7228	Bringing Experiential Learning, Assessment, and Reflection to Life	
EDU 7229	The Experiential Learning Leader	
EDU 7230		
EDU 7245		
EDU 7251	Student Engagement in Higher Education	
EDU 7256	Financial Decision Making in Higher Education	
EDU 7260	Comparative International/Global Higher Education	
EDU 7261	International Student Markets	
EDU 7266	Contemporary Issues in Community Colleges	
EDU 7274	Doctoral Seminar in Organizational Leadership and Communication	
EDU 7314		
EDU 7317	Collaboration and Networks in Teaching and Learning	
EDU 7510	Data-Driven Decision Making	
EDU 7511	Digital Workplace Learning

Law and Policy, DLP (Boston)

Public servants, executives, and managers operate in an increasingly complex global environment. A doctoral education seeks to provide the policy, analytic, and research skills necessary to advance one's career.

Developed jointly by the College of Professional Studies and Northeastern's Public Policy program, the Doctor of Law and Policy program (DLP) is designed for experienced professionals who are interested in the origins, development, implementation, and analysis of legal and public policy decisions in government and related institutions. The program prepares students to advance their careers within a variety of fields while focusing their thesis research on a precise law and policy topic.

Students undertake the DLP in order to understand the ways in which public and related institutions formulate and execute policy. Students have the opportunity to develop the ability to interpret and assess the research of others, to acquire skills as researchers, and to communicate their knowledge to a wide range of audiences. Those who successfully complete the degree are equipped to bring their skills and knowledge to senior policy and management positions in government, nonprofit agencies, research organizations, consulting firms, and corporations.

The DLP program is structured so course work and the doctoral thesis can be completed in two years. Classes meet one weekend per month in Boston, and the learning continues online throughout the rest of the month.

Northeastern University also offers a traditional PhD in Public Policy. To learn more, visit the Public Policy program website (<https://cssh.northeastern.edu/policyschool/program/phd-in-public-policy/>).

Elementary Education, MAT (Boston)

Designed for Massachusetts-based aspiring teachers and career changers, the Master of Arts in Teaching in Elementary Education (MAT)¹ offers an appreciation for and an understanding of the diverse educational needs, social concerns, and cultural values of today's elementary and secondary schools. This graduate degree in teaching seeks to enhance your foundational skills, broaden your perspectives, and strengthen your ability to inspire and educate. The master's degree, which includes a full term of student teaching and prepracticum experiential fieldwork, seeks to produce graduates well positioned to make a meaningful impact in their school, in their community, and in the lives of their students.

The Elementary MAT+ provides qualifying students with the opportunity to complete a Master of Arts in Teaching (MAT) with further study in a selected area of expertise. Currently, students can take additional coursework to earn either endorsement for an additional license in special education (Teacher of Students of Moderate Disabilities, PreK–8) or endorsement for an additional license in ESL (Teacher of English as a Second Language, Pre-K–6) to the Massachusetts Department of Elementary and Secondary Education. Teacher candidates may also plan a program of study that allows for triple licensure in consultation with the program director.

A formal application for approval or placement of field-based experiences for prepracticum and practicum requirements must be filed with the Office of Licensure and Field Experience before a student may enroll in a course requiring fieldwork. Deadline for fall placements and approvals must be completed by April 1st (of the previous spring quarter), October 1st for winter placements and approvals, and February 1st for spring placements and approvals.

- ¹ The MAT Elementary (grades 1–6) has been approved at the initial licensure level by the Massachusetts Department of Elementary and Secondary Education.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
EDU 6051	Introduction to Social Justice in Educational Settings	4
EDU 6086	Foundations of Literacy Development and Instruction	4
EDU 6101	Critical Issues in Education: Past and Present	2
EDU 6102	Reflection, Community Engagement, and Agency in Education	2
EDU 6104	Child and Adolescent Development, Learning, and Teaching	4
EDU 6107	Inclusion, Equity, and Diversity ¹	4
EDU 6154	Inquiry in the Sciences and Humanities	4
EDU 6155	Inquiry in Mathematics ²	4
EDU 6183	Collaborative Strategies for Effective Classroom Management	3
Complete one of the following:		
<i>For students pursuing emergency elementary teaching licenses or ESL+ licensure in Massachusetts</i>		
EDU 6513	Sheltered English Immersion in the General Classroom	4
<i>For students not pursuing emergency elementary licenses and ESL+ licensure in Massachusetts</i>		
EDU 6185	English-Language Learners in the General Education Classroom	4
EDU 6426	Developmental Language, Literacy, and Writing: Assessment and Instruction	4
EDU 6866	Teaching Practicum and Seminar	6

- ¹ For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

- ² For students who do not pass their Gateway Performance Task II in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

Program Credit/GPA Requirements

45 total quarter hours required (additional hours may be required for endorsement for Massachusetts licensure)

Minimum 3.000 GPA required

ELEMENTARY MAT+ SPECIAL EDUCATION

The special education course requirements are:

Code	Title	Hours
EDU 6425	Special Education: Role of Special Educators in an Inclusive School ¹	4
EDU 6429	Variations in Child and Adolescent Development	4
EDU 6528	Adaptive Learning/Behavior Management Strategies: Consultation and Collaboration	4
EDU 6569	Differentiated Instruction and Assessment in Mathematics	4
EDU 6874	Practicum, Portfolio, and Panel Review	4

- ¹ For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

MAT+ IN ENGLISH AS A SECOND LANGUAGE (ESL)

This Commonwealth of Massachusetts-approved MAT+ program consists of five courses, some of which may be taken as electives in the MAT program.

The English as a Second Language course requirements are:

Code	Title	Hours
EDU 6300	Introduction to Language and Linguistics	4
EDU 6310	Literacy Development and the Academic Domains ¹	4

EDU 6429	Variations in Child and Adolescent Development	4
EDU 6517	Foundations of Teaching English as a Second Language: Research and Practice ²	4
EDU 6874	Practicum, Portfolio, and Panel Review	4

¹ For students who do not pass their Gateway Performance Task I in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

² For students who do not pass their Gateway Performance Task II in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

Secondary Education, MAT (Boston)

Designed for Massachusetts-based aspiring teachers and career changers, the Master of Arts in Secondary Education (MAT) ¹ offers an appreciation for and an understanding of the diverse educational needs, social concerns, and cultural values of today's secondary schools.

This MAT in Secondary Education seeks to enhance your foundational skills, broaden your perspectives, and strengthen your ability to inspire and educate. This master's degree, which includes a full term of student teaching, seeks to produce graduates well positioned to make a meaningful impact in their school, in their community, and in the lives of their students.

- Gain political, social, and historical perspectives on education
- Explore the richly complex environments of schools and communities
- Develop a working understanding of teaching and learning in diverse settings
- Investigate how humans learn, acquire knowledge, and make sense of their experiences
- Examine theories of teaching and explore how best to teach for understanding and learning achievement
- Research methods and materials, pedagogies, and assessment strategies that foster integrated learning

Options for endorsement to licensure include history, 5–12; biology, 8–12; social science, 5–12; English, 5–12; mathematics, 8–12; chemistry, 8–12; earth and space science, 8–12; political science/political philosophy, 8–12; or physics, 8–12. Determination of program of study to be made by faculty review at time of admission.

The MAT+ offers qualifying students the opportunity to complete a MAT with further study in a selected area of expertise. Currently, students can take additional coursework to earn either endorsement for an additional license in special education (Teacher of Students of Moderate Disabilities, 5–12) or an endorsement for an additional license in ESL (Teacher of English as a Second Language, 5–12) to the Massachusetts Department of Elementary and Secondary Education.

A formal application for approval or placement of field-based experiences for prepracticum and practicum requirements must be filed with the Office of Licensure and Field Placement before a student may enroll in a course requiring fieldwork. Deadline for fall placements and approvals must be completed by April 1 (of the previous spring quarter), October 1 for winter placements and approvals, and February 1 for spring placements and approvals.

¹ The Master of Arts in Teaching Secondary Education (grades 5–12 or 8–12 dependent on content area) has been approved at the initial licensure level by the Massachusetts Department of Elementary and Secondary Education.

² For students who do not pass or complete their Gateway Performance Task I in this course, complete Project (EDU 6995) to meet programmatic and endorsement requirements.

³ For students who do not pass or complete their Gateway Performance Task II in this course, complete Project (EDU 6995) to meet programmatic and endorsement requirements.

- ² For students who do not pass their Gateway Performance Task II in this course, complete EDU 6995 to meet programmatic and endorsement requirements.

Education, MEd (Boston)

ESL Instruction Concentration

The English as a Second Language Instruction concentration allows teachers with an initial teacher license in Massachusetts to earn an additional license in English as a Second Language (grades PreK–8 or 5–12). The coursework engages graduate students in subject-based knowledge and field experiences. There is a need for more Massachusetts teachers licensed in English as a Second Language, which makes this concentration an essential pathway for teachers to deepen their expertise to meet the broad range of students they work with.

Learning and Instruction Concentration

The learning and instruction concentration in the MEd program is designed for teachers and leaders in K–12-focused schools and community organizations that want to lead change and expand equity in their classrooms, schools, or educational communities. Graduate students examine the impact of local, national, and global changes on educational policy and practice. They deepen their ability to effectively engage diverse students in meaningful learning through coursework focused on curriculum and assessment, teaching and learning, and experiential education.

Students pursuing Massachusetts ESL, preK–12, initial licensure: This program meets Massachusetts Department of Elementary and Secondary Education standards and competencies for licensure as an English as a Second Language Teacher, pre-K–6 and 5–12.

Special Education Concentration

Demand for graduate-level-prepared special education practitioners is on the rise, driven by heightened degree requirements and a shortage of licensed, qualified teachers. In response, the College of Professional Studies is pleased to offer the Master of Education with Concentration in Special Education. Designed for educators who are licensed in Massachusetts at the initial or professional level in another discipline, this innovative master's degree program seeks to prepare you to meet the special needs of students across a variety of school environments.

This program meets Massachusetts Department of Elementary and Secondary Education standards and competencies for licensure as a Teacher of Students with Moderate Disabilities, preK–8 and 5–12.

In this advanced program, you have an opportunity to explore specific topics on modifying curriculum, designing curriculum-based assessments, managing severe behaviors, developing individualized education programs, leveraging community resources, and improving literacy. As a result, you have an opportunity to enhance your ability to meet the needs of a diverse student population and to achieve the competencies required for this specialized license.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
EDU 6050	Education as an Advanced Field of Study	5
EDU 6051	Introduction to Social Justice in Educational Settings	4

Concentration

Complete one of the following concentrations. Students must successfully complete all licensure courses with a grade of B or better in order to progress into their next licensure course.

- ESL Instruction (p. 1013)
- Learning and Instruction
- Special Education

Program Credit/GPA Requirements

Higher Education Administration, MEd (Boston)

Institutions of higher education around the world are facing considerable pressures that range from changing demographics to financial strain amid disruptions unimaginable 20 years ago. Administrators must develop foundational skills to create conditions that allow their students and institutions to thrive in a constantly changing world. The Master of Education in Higher Education Administration prepares practitioners for the unique and difficult challenges facing the next generation of higher education professionals. This program allows students the flexibility to build upon their skills in a customized manner with a focus on practical skills and course designs firmly grounded in experiential learning.

The Master of Education in Higher Education Administration degree program seeks to prepare student with the knowledge to understand the structure, governance, and operation of various higher education organizations. Within the context of classes, students have an opportunity to develop solutions to real world problems. This innovative master's degree program explores complex industry issues such as student demographics, financial concerns, legal and policy requirements, technology, and competitive forces.

Analytics, MPS (Arlington)

With the proliferation of data across all sectors of the global economy, there is an immediate need for individuals to be knowledgeable in how to harness this data for continuous analysis and study. This spectrum spans from commercial to nonprofit, from higher education to government, and is constantly expanding with new sectors as data mining becomes the standard for knowledge gathering in the digital age.

The Master of Professional Studies in Analytics helps to meet the demand from employers with a graduate program that provides students with an end-to-end analytics education through a core curriculum with integrated experiential learning opportunities. The program is designed to prepare students with a deep understanding of the mechanics of working with data (i.e., its collection, modeling, and structuring), along with the capacity to identify and communicate data-driven insights that ultimately influence decisions.

Not only will students graduate with a portfolio of work samples that demonstrate their range and depth of skill, they will be part of a larger network of analytics professionals who will serve them now and in the future.

- Build portfolios of real-world projects demonstrating competency with key technologies, visualization and communication techniques, and the ability to translate information into recommended actions.
- Gain a core analytical skill set upon which to layer more specialized technical skill sets or industry-specific applications.

- Develop a relationship to industry leaders and peers so that you may leverage your Northeastern education long after your formal education ends.
- Choose from a host of flexible programming options—all of which share an industry-defined core curriculum and a required, credit-bearing experiential requirement.
- Anticipate and contribute to the future direction of data analytics.

Analytics, MPS (Boston)

With the proliferation of data across all sectors of the global economy, there is an immediate need for individuals to be knowledgeable in how to harness this data for continuous analysis and study. This spectrum spans from commercial to nonprofit, from higher education to government, and is constantly expanding with new sectors as data mining becomes the standard for knowledge gathering in the digital age.

The Master of Professional Studies in Analytics helps to meet the demand from employers with a graduate program that provides students with an end-to-end analytics education through a core curriculum with integrated experiential learning opportunities. The program is designed to prepare students with a deep understanding of the mechanics of working with data (i.e., its collection, modeling, and structuring), along with the capacity to identify and communicate data-driven insights that ultimately influence decisions.

Not only will students graduate with a portfolio of work samples that demonstrate their range and depth of skill, they will be part of a larger network of analytics professionals who will serve them now and in the future.

- Build portfolios of real-world projects demonstrating competency with key technologies, visualization and communication techniques, and the ability to translate information into recommended actions.
- Gain a core analytical skill set upon which to layer more specialized technical skill sets or industry-specific applications.
- Develop a relationship to industry leaders and peers so that you may leverage your Northeastern education long after your formal education ends.
- Choose from a host of flexible programming options—all of which share an industry-defined core curriculum and a required, credit-bearing experiential requirement.
- Anticipate and contribute to the future direction of data analytics.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
Note: ITC 6000 is for students without prior educational or professional experience with data and database structures. Students who do not complete ITC 6000 must complete a third elective course to reach 45 quarter hours.		
ALY 6000	Introduction to Analytics	3
ALY 6010	Probability Theory and Introductory Statistics	3

1018 Analytics, MPS (Boston)

ALY 6015	Intermediate Analytics	3
ALY 6050	Introduction to Enterprise Analytics	3
ALY 6070	Communication and Visualization for Data Analytics	3
ITC 6000	Database Management Systems	3

Experiential Learning Course

Code	Title	Hours
ALY 6080	Integrated Experiential Learning	3

Experiential Capstone Course

Code	Title	Hours
ALY 6980	Capstone	3

The remaining quarter hours of the program may be completed by a combination of completing a concentration and additional electives or selecting any courses listed in the concentrations and elective list.

Concentrations

- Applied Machine Intelligence (p. 1019)
- Evidence-Based Management (p. 1019)
- Statistical Modeling (p. 1019)

Electives

Applied Logistics, MPS (Boston)

The Master of Professional Studies in Applied Logistics is built to prepare students to be agile in the changing warehousing and distribution industry.

As a central pillar of the program, students will study how to handle challenges that arise quickly and develop leadership and project management skills to help communicate to customers, avoid reactionary responses, work collaboratively to find a solution, and to effectively communicate across the supply chain and with customers. By integrating systems thinking with training in the technical applications in logistics, students will gain well-rounded experience that allows them to understand and adapt to strategic imperatives while also being able to execute in detail. The program aims to develop proficiency in descriptive analytics and the use of real-time data to optimize routing among distribution centers and fulfill orders in response to changing customer profiles, shifting product sales, disruptions in the supplier network, and customer demand for packaging changes.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Courses

Code	Title	Hours
APL 6000	Foundations of Applied Logistics Execution	3
APL 6010	Warehouse Management	3
APL 6020	Freight Management	3
APL 6030	ERP Systems for Inventory Management	3

Capstone

Code	Title	Hours
APL 6980	Applied Logistics Capstone	3

The remaining quarter hours may be completed by a combination of completing a concentration and electives or selecting any courses listed in the concentrations and elective lists.

Concentrations

- Analytics (p. 1030)
- Applied Machine Intelligence (p. 1030)
- Leadership (p. 1030)
- Project Management (p. 1031)

Electives

Code	Title	Hours
APL 6050	Supplier Management	
APL 6100	Advanced Technology in Logistics and Distribution	
CMN 6040	Consumer Behaviors in the Online Environment	
CMN 6060	Negotiation, Mediation, and Facilitation	
INT 6943	Integrative Experiential Learning	
EAI 6020	AI System Technologies	
LDR 6110	Leading Teams Strategically in a Global Environment	
PJM 5900	Foundations of Project Management	
PJM 6185	Managing Innovation Projects	
PJM 6210	Communication Skills for Project Managers	
SMT 6060	Decision Support and Sales Analytics	

Program Credit/GPA Requirements

45 total quarter hours required

Minimum 3.000 GPA required

Concentrations**ANALYTICS CONCENTRATION**

Code	Title	Hours
Required Courses		
ALY 6000	Introduction to Analytics	3
ALY 6010	Probability Theory and Introductory Statistics	3
ALY 6015	Intermediate Analytics	3
ALY 6070	Communication and Visualization for Data Analytics	3
Complete one of the following:		3
ALY 6020	Predictive Analytics	
ALY 6030	Data Warehousing and SQL	
ALY 6040	Data Mining Applications	
ALY 6110	Data Management and Big Data

Code	Title	Hours
EAI 6000	Fundamentals of Artificial Intelligence	3
EAI 6010	Applications of Artificial Intelligence	3
EAI 6020	AI System Technologies	3
ALY 6040	Data Mining Applications	3
ALY 6110	Data Management and Big Data	3

LEADERSHIP CONCENTRATION

Code	Title	Hours
Required Courses		
LDR 6100	Developing Your Leadership Capability	3
LDR 6110	Leading Teams Strategically in a Global Environment	3
LDR 6120	Developing Organizational Success through Leadership Development	3
LDR 6150	Innovation and Organizational Transformation	3
Elective		
Complete one of the following:		3

LDR 6135	Ethical Leadership
LDR 6140	Leadership Strategy, Design, and Practice

PROJECT MANAGEMENT CONCENTRATION

Code	Title	Hours
Required Courses		
PJM 5900	Foundations of Project Management ¹	4
PJM 6005	Project Scope Management	3
PJM 6015	Project Risk Management	3
PJM 6025	Project Scheduling and Cost Planning	3
Elective		
Complete 3-6 quarter hours from the following:		3-6
INT 6940	Experiential Learning Projects for Professionals	
INT 6943	Integrative Experiential Learning	
PJM 6075	Project Finance	
PJM 6125	Project Evaluation and Assessment	
PJM 6140	Managing Troubled Projects	
PJM 6145	Global Project Management	
PJM 6175	Project Resource Management	
PJM 6180	Project Stakeholder Management	
PJM 6205	Leading and Managing Technical Projects	
PJM 6210	Communication Skills for Project Managers	
PJM 6215	Leading Remote Project Teams	
PJM 6710	Introduction to Program and Portfolio Management	
PJM 6983	Special Topics	

¹ Foundations of Project Management (PJM 5900) is for students with fewer than three years of experience directing or leading project tasks. Students who do not complete PJM 5900 may substitute any project management electives to satisfy the required program hours.

Applied Machine Intelligence, MPS (Boston)

Humankind is on the threshold of a new era—an age of artificial intelligence (AI) as revolutionary in its global impact as the Industrial Revolution. With the proliferation of machine learning and AI across all sectors of the global society, and fields such as financial services, healthcare, and robotics, GEOINT and cybersecurity are already changing as intelligent computers take on once-indispensably human tasks. There is an immediate need for individuals to be knowledgeable in how to manage, analyze, communicate, visualize, and lead in the area of AI by being data, technology, and human literate. The experiential AI curricula includes an introductory core, as well as an advanced core with an end-to-end AI education in the areas of finance, HR, business ventures, and healthcare/pharmaceuticals. The goal is to proactively and thoughtfully prepare students for the evolving technology and the challenges it presents. The curricula framework adopts a multidisciplinary approach to problem solving by combining computer science and analytical skills with functional government and industry expertise, creativity, and leadership with program offerings on-ground and online.

The degree program is distinguished from others by:

- Focusing on the specific but widespread field of AI that exists within a variety of industries and applications
- Northeastern faculty experts, who have extensive and proven experience in computer science, analytics, geospatial science, information technology, etc.
- Courses that focus on providing critical skills in data management, data analysis, data visualization, problem solving, and advanced analytical tools, creating AI-driven decision making in fields like healthcare/pharmaceuticals, finance, HR, and business ventures

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
ALY 6110	Data Management and Big Data	3
EAI 6000	Fundamentals of Artificial Intelligence	3
EAI 6010	Applications of Artificial Intelligence	3

EAI 6020	AI System Technologies	3
EAI 6400	Data Governance and Responsible AI	3

Experiential Network and Capstone

Code	Title	Hours
EAI 6980	Integrated Experiential Capstone	3
Choose one of the following:		
ALY 6080	Integrated Experiential Learning	
INT 6940	Experiential Learning Projects for Professionals	

The remaining quarter hours may be completed by a combination of completing a concentration and additional electives or selecting any courses listed in the concentrations and elective list.

Concentrations

- AI for Business Ventures (p. 1032)
- AI for Finance (p. 1032)
- AI for Healthcare (p. 1033)
- AI for Human Resources (p. 1033)

Electives

Code	Title	Hours

Digital Media, MPS (Boston)

Students in the Master of Professional Studies in Digital Media will build their skills and expertise while gaining experience using a variety of industry-standard and cutting-edge technologies and tools. Our curriculum is organized around three types of experiences: core courses, concentration electives, and a capstone that can be completed as an individual thesis or a team project.

Our core courses in media creation, interactive design, usability, design thinking, and narrative structure provide a baseline for producing content-rich experiences. A series of electives are offered in seven distinctive areas: 3D animation, game design, digital video, social media, digital media management, or one of two tracks in interactive design: visual design or usability and production. In the capstone experience, you'll work with the guidance of faculty to channel your passion into a project that provides tangible evidence of your abilities.

Whether you are a full- or part-time student, our cohort structure allows you to build meaningful working relationships with students from around the globe. Team-based assignments strengthen your project management and leadership skills and allow you to take part in the design and development of more complex media projects than you could by working alone. The team efforts will also prepare you for your future as a professional in digital media's collaboration-oriented culture.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Core Courses

Code	Title	Hours
DGM 6122	Foundations of Digital Storytelling	4
DGM 6145	Information Technology and Creative Practice	4
DGM 6521	Web Creation for Content Management Systems	2
Complete one of the following:		4
DGM 6140	Sound Design	
DGM 6168	Usability and Human Interaction	
Complete one of the following options:		8
Thesis Option		
DGM 6890	Thesis Proposal Development	
DGM 7990	Thesis (at 6 QH)	
Capstone Option		
DGM 7980	Capstone	
Choose one technical course from the workshops list below.		

Concentrations

The remaining quarter hours may be completed by selecting a combination of a concentration and additional electives/workshops or selecting any courses in the concentrations and elective lists. You must complete any prerequisites associated with DGM courses unless granted a waiver under special circumstances.

- 3D Animation (p. 1036)
- Digital Media Management (p.)
- Digital Video (p.)
- Game Design (p.)
- Interactive Design (p.)
- Social Media (p.)

Electives

Code	Title	Hours
Complete one of the following:		3-4
ALY 6110	Data Management and Big Data	
DGM 6125		
DGM 6322	Advanced Digital Storytelling	
DGM 6550	Search Engine Optimization: Strategy and Implementation	
EDU 6184		
ITC 6410	Fundamentals of Human Behaviors for Interactive Systems	

Workshops

Optional digital media workshops are designed to provide valuable technical skills and tools for students in all graduate degree programs.

Code	Title	Hours
Students may complete one of the following:		
DGM 6506	Introduction to Digital Video	
DGM 6515	Introduction to After Effects	
DGM 6516	Virtual and Augmented Reality (VR/AR)	
DGM 6892		
TCC 6410		
TCC 6630		

Program Credit/GPA Requirements

45 total quarter hours required

Minimum 3.000 GPA required

3D ANIMATION

Code	Title	Hours
DGM 6450	Animation Basics	4
DGM 6510	3D Modeling	4
DGM 6530	Character Animation	4
DGM 6535	Rigging Principles and Techniques	4
DGM 6540	Compositing	4

DIGITAL MEDIA MANAGEMENT

Code	Title	Hours
DGM 6230	Digital Media Entrepreneurship	4
DGM 6279	Project Management for Digital Media	4
DGM 6280	Managing for Digital Media	4
DGM 6285	Interactive Marketing Fundamentals	4
DGM 6290	Social Media and Brand Strategy Implementation	4

DIGITAL VIDEO

Code	Title	Hours
DGM 6520	Lighting for the Camera	4
DGM 6435	Digital Video Production	4
DGM 6440	Editing in the Digital Studio	4
DGM 6540	Compositing	4
DGM 6545	Documentary and Nonfiction Production	4

GAME DESIGN

Code	Title	Hours
DGM 6308	Intermediate Programming for Digital Media	4
DGM 6400	Game Design Fundamentals	4
DGM 6403	Game Engine Fundamentals	4
DGM 6405	Game Development	4
DGM 6410	Game Design Technology Lab	4

INTERACTIVE DESIGN

Code	Title	Hours
Interactive Design		
DGM 6461	Interactive Information Design 1	4
Complete four courses from one of the following tracks:		16
Design Track		
DGM 6217	Typography for Interactivity	
DGM 6317	Screen-Based Publication Design	

DGM 6463	Interactive Information Design 2
DGM 6471	Designing Infographics
Usability and Development Track	
DGM 6268	Usable Design for Mobile Digital Media
DGM 6308	Intermediate Programming for Digital Media
DGM 6451	Web Development
DGM 6525	Research Methods for Global User Experiences
TCC 6110	
TCC 6710	

SOCIAL MEDIA

Code	Title	Hours
Complete the following:		19-21
Required		
DGM 6285	Interactive Marketing Fundamentals	4
Electives		
Complete 15–17 quarter hours from the following:		
CMN 6040	Consumer Behaviors in the Online Environment	
CMN 6045	Leveraging Digital Technologies: Strategy, Assessment, and Governance	
CMN 6065	Implementation and Management of Social Media Channels and Online Communities	
CMN 6075	Digital Marketing Analytics	
DGM 6290	Social Media and Brand Strategy Implementation	
DGM 6525	Research Methods for Global User Experiences	
DGM 6550	Search Engine Optimization: Strategy and Implementation	

Digital Media, MPS (Vancouver)

Students in the Master of Professional Studies in Digital Media will build their skills and expertise while gaining experience using a variety of industry-standard and cutting-edge technologies and tools. Our curriculum is organized around three types of experiences: core courses, concentration electives, and a capstone that can be completed as an individual thesis or a team project.

Our core courses in media creation, interactive design, usability, design thinking, and narrative structure provide a baseline for producing content-rich experiences. A series of electives are offered in seven distinctive areas: 3D animation, game design, digital video, social media, digital media management, or one of two tracks in interactive design: visual design or usability and production. In the capstone experience, you'll work with the guidance of faculty to channel your passion into a project that provides tangible evidence of your abilities.

Whether you are a full- or part-time student, our cohort structure allows you to build meaningful working relationships with students from around the globe. Team-based assignments are designed to strengthen your project management and leadership skills and allow you to take part in the design and development of more complex media projects than you could by working alone. The team efforts will also prepare you for your future as a professional in digital media's collaboration-oriented culture.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Core Courses

Code	Title	Hours
DGM 6122	Foundations of Digital Storytelling	4
DGM 6145	Information Technology and Creative Practice	4
DGM 6168	Usability and Human Interaction	4
DGM 6521	Web Creation for Content Management Systems	2
Complete one of the following options:		6
Thesis Option		
DGM 6890	Thesis Proposal Development	
DGM 7990	Thesis	
Capstone Option		
DGM 7980	Capstone	

Electives

Code	Title	Hours
Complete one of the following:		3–4
DGM 6322	Advanced Digital Storytelling	
ITC 6410	Fundamentals of Human Behaviors for Interactive Systems	

Workshops

Optional digital media workshops are designed to provide valuable technical skills and tools for students in all graduate degree programs. Students may complete one of the following as an optional workshop:

Code	Title	Hours
DGM 6506	Introduction to Digital Video	2
DGM 6515	Introduction to After Effects	2
DGM 6516	Virtual and Augmented Reality (VR/AR)	2

Concentrations

Students on the Vancouver campus may complete a concentration by taking all required courses and specified electives to fulfill their concentration requirements. If a concentration is not chosen, the remaining quarter hours may be completed by a combination of completing a concentration and electives or selecting any courses listed in the concentrations and elective lists.

DIGITAL MEDIA MANAGEMENT

Code	Title	Hours
DGM 6230	Digital Media Entrepreneurship	4

Program Credit/GPA Requirements

45 total quarter hours required

Minimum 3.000 GPA required

Digital Media, MPS—Connect (Boston)

The Master of Professional Studies in Digital Media Connect program is designed for students without prior experience in core technical and/or creative concepts. This program requires an additional 12 quarter hours of credit, with courses providing intensive, hands-on guidance into the essential knowledge required for the Master of Professional Studies Digital Media curriculum.

For students considering a career change into digital media, this coursework helps you connect your current background to a new digital media track. Courses focus on visual communications, programming foundations, and web creation. Once the fundamental courses are completed, students move into the more advanced Master of Professional Studies in Digital Media course requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Foundation Courses

Code	Title	Hours
DGM 6105	Visual Communications Foundation	4
DGM 6108	Programming Foundations for Digital Media	4
DGM 6109	Lab for DGM 6108	2
DGM 6501	Web Creation Boot Camp	2

Required Core Courses

Code	Title	Hours
DGM 6122	Foundations of Digital Storytelling	4
DGM 6145	Information Technology and Creative Practice	4
DGM 6521	Web Creation for Content Management Systems	2
Complete one of the following:		4
DGM 6140	Sound Design	
DGM 6168	Usability and Human Interaction	
Complete one of the following options:		8
Thesis Option		
DGM 6890	Thesis Proposal Development	
DGM 7990	Thesis (at 6 QH)	
Capstone Option		
DGM 7980	Capstone	
Complete one technical course from the workshops list below.		

Concentrations

The remaining quarter hours may be completed by selecting a combination of a concentration and additional electives/workshops or selecting any courses in the concentrations and elective lists. You must complete any prerequisites associated with DGM courses unless granted a waiver under special circumstances.

- 3D Animation (p. 1040)
- Digital Media Management (p.)
- Digital Video (p.)
- Game Design (p.)
- Interactive Design (p.)
- Social Media (p.)

Elective

DGM 6400	Game Design Fundamentals	4
DGM 6403	Game Engine Fundamentals	4
DGM 6405	Game Development	4
DGM 6410	Game Design Technology Lab	4

INTERACTIVE DESIGN

Code	Title	Hours
Interactive Design		
DGM 6461	Interactive Information Design 1	4

Complete four courses from one of the following tracks:

16

Design Track

DGM 6217	Typography for Interactivity
DGM 6317	Screen-Based Publication Design
DGM 6463	Interactive Information Design 2
DGM 6471	Designing Infographics

Usability and Development Track

DGM 6268	Usable Design for Mobile Digital Media
DGM 6308	Intermediate Programming for Digital Media
DGM 6451	Web Development
DGM 6525	Research Methods for Global User Experiences
TCC 6110	
TCC 6710	

SOCIAL MEDIA

Code	Title	Hours
Required		
DGM 6285	Interactive Marketing Fundamentals	4
Electives		
Complete 15–17 quarter hours from the following:		
CMN 6040	Consumer Behaviors in the Online Environment	
CMN 6045	Leveraging Digital Technologies: Strategy, Assessment, and Governance	
CMN 6065	Implementation and Management of Social Media Channels and Online Communities	
CMN 6075	Digital Marketing Analytics	
DGM 6290	Social Media and Brand Strategy Implementation	
DGM 6525	Research Methods for Global User Experiences	
DGM 6550	Search Engine Optimization: Strategy and Implementation	

Digital Media, MPS–Connect (Vancouver)

The Master of Professional Studies in Digital Media–Connect program is designed for students without prior experience in core technical and/or creative concepts. This program requires an additional 12 quarter hours of credit, with courses providing intensive, hands-on guidance into the essential knowledge required for the Master of Professional Studies Digital Media curriculum.

For students considering a career change into digital media, this coursework helps you connect your current background to a new digital media track. Courses focus on visual communications, programming foundations, and web creation. Once the fundamental courses are completed, students move into the more advanced Master of Professional Studies in Digital Media course requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Foundation Courses

Code	Title	Hours
DGM 6105	Visual Communications Foundation	4
DGM 6108 and DGM 6109	Programming Foundations for Digital Media and Lab for DGM 6108	6
DGM 6501	Web Creation Boot Camp	2

Required Core Courses

Code	Title	Hours
DGM 6122	Foundations of Digital Storytelling	4
DGM 6145	Information Technology and Creative Practice	4
DGM 6168	Usability and Human Interaction	4
DGM 6521	Web Creation for Content Management Systems	2
Complete one of the following options:		6
Thesis Option		
DGM 6890	Thesis Proposal Development	
DGM 7990	Thesis	
Capstone Option		
DGM 7980	Capstone	

Electives

Code	Title	Hours
Complete one of the following:		3–4
DGM 6322	Advanced Digital Storytelling	
ITC 6410	Fundamentals of Human Behaviors for Interactive Systems	

Workshops

Optional digital media workshops are designed to provide valuable technical skills and tools for students in all graduate degree programs. Students may complete one of the following as an optional workshop:

Code	Title	Hours
DGM 6506	Introduction to Digital Video	2
DGM 6515	Introduction to After Effects	2
DGM 6516	Virtual and Augmented Reality (VR/AR)	2

Concentrations

Students on the Vancouver campus may complete a concentration by taking all required courses and specified electives to fulfill their concentration requirements. If a concentration is not chosen, the remaining quarter hours may be completed by a combination of completing a concentration and electives or selecting any courses listed in the concentrations and elective lists.

DIGITAL MEDIA MANAGEMENT

Code	Title	Hours
DGM 6230	Digital Media Entrepreneurship	4
DGM 6279	Project Management for Digital Media	4
DGM 6280	Managing for Digital Media	4
DGM 6285	Interactive Marketing Fundamentals	4
DGM 6290	Social Media and Brand Strategy Implementation	4

SOCIAL MEDIA

Code	Title	Hours
Required Courses		
DGM 6285	Interactive Marketing Fundamentals	4
Complete 15–17 quarter hours from one of the following:		15–17
CMN 6040	Consumer Behaviors in the Online Environment	
CMN 6045	Leveraging Digital Technologies: Strategy, Assessment, and Governance	
CMN 6065	Implementation and Management of Social Media Channels and Online Communities	
DGM 6290	Social Media and Brand Strategy Implementation	
DGM 6525	Research Methods for Global User Experiences	
DGM 6550	Search Engine Optimization: Strategy and Implementation	

Program Credit/GPA Requirements

56 total quarter hours required

Minimum 3.000 GPA required

Informatics, MPS (Boston)

A rapidly evolving area, informatics is increasingly used to solve today's problems through IT innovations across many industries, including healthcare, business consulting, education, finance, and social media. This master's degree attracts students and working professionals with a diverse background to learn and improve IT technical and management skills, highlighted by our strengthened curriculum on information security management, as well as cloud computing application and management. Students also have the opportunity to acquire technical training in data analytics, user-centered design and web development, and managing technical projects.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ITC 6000	Database Management Systems	3
ITC 6010	Information Technology Strategy and Governance	3
ITC 6020	Information Systems Design and Development	3
ITC 6035	Information Technology Project Management	3
ITC 6400	Foundations of Informatics	3

Capstone and Experiential Learning

ITC 6040	Informatics Capstone	3
INT 6940	Experiential Learning Projects for Professionals	1-4

The remaining quarter hours may be completed by a combination of completing a concentration and additional electives or by selecting any courses listed in the concentrations and electives lists.

Concentrations or Electives

Complete one of the following concentrations or complete the required hours by selecting any courses listed in the concentrations and electives lists:

- Analytics (p. 1043)
- Cloud Computing Application and Management (p. 1043)
- Human-Centered Informatics (p. 1043)
- Information Security Management (p. 1043)
- Leading and Managing Technical Projects (p. 1044)

ANALYTICS CONCENTRATION

Code	Title	Hours
ALY 6000	Introduction to Analytics	3
ALY 6010	Probability Theory and Introductory Statistics	3
ALY 6015	Intermediate Analytics	3
ALY 6070	Communication and Visualization for Data Analytics	3
Complete one of the following:		3
ALY 6020	Predictive Analytics	
ALY 6030	Data Warehousing and SQL	
ALY 6040	Data Mining Applications	
ALY 6110	Data Management and Big Data	

CLOUD COMPUTING APPLICATION AND MANAGEMENT CONCENTRATION

Code	Title	Hours
ITC 6015	Enterprise Information Architecture	3
ITC 6420	Introduction to Cloud Computing Applications and Management	3
ITC 6450	Advanced Cloud Computing Applications and Management	3
ITC 6460	Cloud Analytics	3
ITC 6520	Network Protection and Cloud Security	3
Complete one of the following:		3-4
ITC 6355	Web Application Design and Development	
ITC 6470		
ITC 6480	Amazon Web Service (AWS) Cloud Architecting	

HUMAN-CENTERED INFORMATICS CONCENTRATION

Code	Title	Hours
DGM 6168	Usability and Human Interaction	4
DGM 6268	Usable Design for Mobile Digital Media	4
DGM 6461	Interactive Information Design 1	4
ITC 6410	Fundamentals of Human Behaviors for Interactive Systems	3
Complete one of the following:		3-4
ALY 6070	Communication and Visualization for Data Analytics	
DGM 6463	Interactive Information Design 2	
ITC 6355	Web Application Design and Development	

INFORMATION SECURITY MANAGEMENT CONCENTRATION

Code	Title	Hours
ITC 6300	Foundations of Information Security	3
ITC 6305	IT Infrastructure (Systems, Networks, Telecom)	3
ITC 6315	Information Security Risk Management	3
ITC 6520	Network Protection and Cloud Security	3
ITC 6530	Security Analytics	3

Complete one of the following:		3
ITC 6330	CISSP Preparation	
ITC 6490	Ethical Hacking	

LEADING AND MANAGING TECHNICAL PROJECTS CONCENTRATION

Code	Title	Hours
PJM 5900	Foundations of Project Management ¹	4
PJM 6205	Leading and Managing Technical Projects	3
PJM 6210	Communication Skills for Project Managers	3
PJM 6215	Leading Remote Project Teams	3
PJM 6810	Principles of Agile Project Management	3

¹ *Note:* Foundations of Project Management (PJM 5900) is for students with fewer than three years of experience directing or leading project tasks. Students who do not complete Foundations of Project Management (PJM 5900) may substitute an elective from the following list to satisfy the required program hours:

- Project Evaluation and Assessment (PJM 6125)
- Project Quality Management (PJM 6135)
- Managing Troubled Projects (PJM 6140)
- Introduction to Program and Portfolio Management (PJM 6710)

ELECTIVES

Code	Title	Hours
ALY 6015	Intermediate Analytics	
ALY 6030	Data Warehousing and SQL	
ALY 6050	Introduction to Enterprise Analytics	
ALY 6060	Decision Support and Business Intelligence	
ALY 6110	Data Management and Big Data	
ALY 6120	Leadership in Analytics	
ALY 6130	Risk Management for Analytics	
DGM 6501	Web Creation Boot Camp	
DGM 6145	Information Technology and Creative Practice	
DGM 6521	Web Creation for Content Management Systems	
EDU 6184		
GIS 5103	Foundations of Geographic Information Science	
GIS 6340	GIS Customization	
GIS 6360	Spatial Databases	
ITC 6030	Computer Systems and Networks	
ITC 6080		
ITC 6082	Network Protection	
ITC 6345	Systems and Network Administration	
ITC 6045	Information Technology Policy, Ethics, and Social Responsibility	
PJM 5900	Foundations of Project Management	
PJM 6205	Leading and Managing Technical Projects	
TCC 6110

Insurance Analytics and Management, MPS (Boston)**Overview**

Admissions to this program have been suspended.

The Master of Professional Studies in Insurance Analytics and Management addresses the mounting need for talent in the insurance industry with focus on disruptive trends and the inherent challenges that this industry sector faces. This program will build on five distinct pillars that are designed to serve the market and to offer graduates a clear pathway into the industry. Those pillars are application orientation, domain knowledge, digital leadership and human-centered design, decision support, and digital transformation. The goal of the MPS program is to produce graduates who are thinkers and designers and developers who merge applications, humanics, data, and technology in the age of digital transformation to benefit their industry.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Courses

Code	Title	Hours
INS 6010	Insurance Finance	3
INS 6020	Claims Management	3
INS 6030	Insurance Underwriting	3
INS 6040	Introduction to Insurance Data Analytics	3
INS 6050	Intermediate Insurance Analytics	3

Experiential Project

Code	Title	Hours
INS 6080	Integrated Experiential Learning	3

Capstone

Code	Title	Hours
INS 6980	Capstone	3

Concentrations

The remaining required quarter hours for the program may be completed by a combination of completing a concentration and additional electives or selecting any courses listed in the electives list.

- Advanced Insurance Management (p. 1047)
- Customer Engagement (p. 1047)
- Decision Support (p. 1047)

Electives

Code	Title	Hours
ALY 6020	Predictive Analytics	
ALY 6030	Data Warehousing and SQL	
ALY 6040	Data Mining Applications	
ALY 6110	Data Management and Big Data	
CED 6230	Quantitative Methods	
CED 6250	Derivatives and Alternative Investments	
EAI 6000	Fundamentals of Artificial Intelligence	
EAI 6020	AI System Technologies	
EAI 6080	Advanced Analytical Utilization	
EAI 6120	AI Communication and Visualization	
GIS 5103	Foundations of Geographic Information Science	
GIS 6370	Internet-Based GIS	
INS 6983	Special Topics	
LDR 6110	Leading Teams Strategically in a Global Environment

SMT 6020	Managing the Customer Experience	3

DECISION SUPPORT CONCENTRATION

Code	Title	Hours
EAI 6000 is for students who score 85% or more on the Python placement exam upon declaring this concentration. Students who score less than 85% on the placement exam complete a noncredit Python workshop before completing EAI 6000.		
ALY 6060	Decision Support and Business Intelligence	3
ALY 6070	Communication and Visualization for Data Analytics	3
EAI 6000	Fundamentals of Artificial Intelligence	3
EAI 6020	AI System Technologies	3
LDR 6100	Developing Your Leadership Capability	3

Learning Experience Design and Technology, MPS (Boston)

The Master of Professional Studies in Learning Experience Design and Technology is a robust practice-based program. It builds expertise in learning designers, educators, trainers, technologists, and other professionals by grounding them in the art and science of learning and the effective use

of learning design principles and technology. It provides both foundational and advanced design-related coursework that is experiential, taught by experts in the field, and incorporates skill-building opportunities that align with contemporary industry-based competencies.

During their course of study, students will have the opportunity to:

- Design learning environments that support learners in meeting academic, personal, professional, and/or organizational goals
- Put creative ideas into action using a variety of technologies and design and delivery modalities
- Develop a robust online portfolio of work to demonstrate their design skills

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Foundation Courses

Code	Title	Hours
EDU 6050	Education as an Advanced Field of Study	5
EDU 6051	Introduction to Social Justice in Educational Settings	4

Core Courses

Code	Title	Hours
EDU 6319	How People Learn	4
EDU 6323	Digital Learning Tools and Technologies for LXD	4

Commerce and Economic Development, MS (Boston)

Globalization has created a borderless economy with a host of new opportunities and challenges for those engaged in commerce and economic development. While global markets offer exciting growth prospects, navigating the world stage requires in-depth knowledge of the financial, regulatory, and economic environments and institutions that affect the global economy and international trade. To meet the need for both insight and skills development, Northeastern University's College of Professional Studies—in collaboration with Northeastern University's College of Social Sciences and Humanities—offers the online Master of Science in Commerce and Economic Development.

This graduate-level program integrates economics, leadership, institutional organization, technology, and public policy into a unique and focused educational experience designed to help guide and advance a rewarding career in the private or public sectors.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CED 6010	Applied Microeconomic Theory 1	3
CED 6020	Applied Macroeconomic Theory 1	3
CED 6030	Mathematical Methods for Economics 1	3

Corporate and Organizational Communication, MS (Boston)

Across all industries and professions, strong written and oral communication skills are essential to success. Whether you are seeking to advance in a communications-related field or get ahead in your current organization, this program seeks to provide the practical knowledge and valuable perspectives you need to communicate across a variety of contexts and situations.

From negotiation and writing to crisis management and public speaking, the Master of Science in Corporate and Organizational Communication degree program examines topics that are critical to effective organizational communication. Incorporating best practices, case studies, and classroom learning, courses within this innovative master's degree in communication address complex communication challenges, seeking to provide you with a distinct advantage in today's competitive marketplace.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CMN 6000 and INT 6000	Introduction to Organizational Communication and Writing Lab ¹	4
CMN 6010	Strategic Communication Management	3
CMN 6020	Ethical Issues in Organizational Communication	3
CMN 6910	Organizational Communication Assessment	3
Complete two of the following:		6
CMN 6080	Intercultural Communication	
CMN 6090	Organizational Culture, Climate, and Communication	
CMN 6100	Communication Networks and Managing Information	

¹ Introduction to Organizational Communication (CMN 6000) is required for students who do not have any professional experience in communication. Students with professional communication experience begin the program with Strategic Communication Management (CMN 6010) and complete an additional elective to satisfy the required program hours.

Capstone

Code	Title	Hours
CMN 6940	Projects for Professionals	4

Concentration or Electives

The remaining quarter hours may be completed by a combination of completing a concentration and additional electives or selecting any courses in the concentrations and elective lists.

CONCENTRATIONS

- Cross-Cultural Communication (p. 1052)
- Human Resource Management (p. 1052)
- Leadership (p. 1053)
- Project Management (p. 1053)
- Public and Media Relations (p. 1053)
- Sales Management (p. 1054)
- Social Media (p. 1054)

ELECTIVE COURSES

Note: Students who take Introduction to Organizational Communication (CMN 6000) are only required to take two courses in this section.

Code	Title	Hours
ALY 6010	Probability Theory and Introductory Statistics	
ALY 6070	Communication and Visualization for Data Analytics

Global Studies and International Relations, MS (Boston)

Globalization has created a world of new opportunities for those savvy enough to recognize them and acquire the new skill sets needed for success in international government, consulting, business and industry, nonprofit, and educational sectors.

This program is designed to prepare students for internationally focused positions that range from traditional practitioners of diplomacy; to development workers; to executives employed in the dynamic world of international consultancy, trade, and industry. With courses enriched by classmates from every continent, students are active learners in a collaborative, cross-cultural setting from their very first course.

The core curriculum ensures all students have a solid grounding in foundational courses such as international politics, economics, security, and diplomacy. Students then select from a broad-based menu of concentrations, allowing them to develop specialties. The program culminates in a capstone experience in which students elect to write a thesis, engage in a case study, or undertake short-term travel to conduct intensive field research.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
GST 6100	Globalization and Global Politics and Economics	4
GST 6101	Global Literacy, Culture, and Community	4
GST 6109	Basic Field Research Methods	4
GST 6320	Peace and Conflict	4

Regional Studies Courses

Code	Title	Hours
Complete one of the following:		4
GST 6501	Regional Studies: East Asia	
GST 6502	Regional Studies: Middle East and North Africa	
GST 6503	Regional Studies: Sub-Saharan Africa	
GST 6504	Regional Studies: Europe and Eurasia	
GST 6505	Regional Studies: Southwest and Central Asia	
GST 6506	Regional Studies: Latin America	

Capstone

Code	Title	Hours
Complete one of the following:		4
GST 6920	Case Study in Global Studies	
GST 7990	Thesis	
INT 6900	International Field Study Experience	

The remaining required quarter hours for the program may be completed by a combination of completing a concentration and additional electives or selecting any courses listed in the electives list. *Note:* A minimum of 18–20 quarter hours must be completed within global studies electives.

Concentrations

- Global Health and Development (p.)
- Conflict Resolution (p.)
- Diplomacy (p. 1057)
- International Economics and Consulting (p.)

¹ Foundations of Project Management (PJM 5900) is for students with fewer than three years of experience directing or leading project tasks. Students who do not complete PJM 5900 may substitute project management electives to satisfy the required program hours.

Nonprofit Management, MS (Boston)

Facing the threat of privatization and for-profit competition, nonprofit organizations are challenged to find leaders who not only possess keen business and managerial skills but can also effect change at a community or social level. Being successful in this dynamic and rewarding field requires strong leadership, managerial and interpersonal skills, as well as in-depth knowledge of fundraising, marketing, program development, and governance issues.

Integrating theoretical approaches with practical applications, the Master of Science in Nonprofit Management seeks to prepare you for a leadership position in a not-for-profit university, hospital, charity, foundation, or religious organization. Upon completion of this nonprofit degree, you emerge well equipped to embark on a career in nonprofit management—prepared, and inspired, to make a meaningful impact.

The mission of the Master of Science in Nonprofit Management at the College of Professional Studies is to offer courses that further develop the students' knowledge, skills, talent, and abilities. Faculty in the program support students' development goals through action-oriented courses that link theoretical learning to practical application. Nonprofit management courses aim to prepare students to be mission-driven executive leaders, managers, employees, and board members in public and private nonprofit organizations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

SMT 6983	Topics	

Project Management, MS (Arlington)

Companies succeed or fail based on their ability to bring quality products and services to market in a timely manner. Without skilled project managers in place, companies are challenged to deliver projects on time, on budget, and according to specifications. From inception to completion, project managers are responsible for every step in the process: project definition, cost and risk estimation, schedule planning and monitoring, budget management, negotiation and conflict resolution, project leadership, and project presentation and evaluation.

The Master of Science in Project Management is designed to provide you with the practical skills and theoretical concepts you need to lead complex projects. Featuring real-world case studies, this project management degree presents techniques and tools for managing long- and short-term projects successfully and cost-effectively. Augmenting the core project management courses are concentrations that seek to provide you with content-specific expertise that enables you to deepen your knowledge in your field of interest.

In October of 2021, the Master of Science in Project Management accreditation was re-affirmed for the maximum five-year accreditation cycle (originally accredited in 2009) by the Project Management Institute Global Accreditation Center for Project Management Education Programs (GAC) (<https://www.pmi.org/>), the world's leading association for project management professionals. Accreditation is achieved by meeting the GAC's rigorous standards, which include an assessment of program objectives and outcomes, a review of onsite and online resources, evaluations of faculty and students, and proof of continuous improvements in the area of project management.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
PJM 5900	Foundations of Project Management	4

Minimum 3.000 GPA required

AGILE PROJECT MANAGEMENT CONCENTRATION

Code	Title	Hours
Students who take this concentration will have only one required 3 QH elective course.		
PJM 6205	Leading and Managing Technical Projects	3
PJM 6810	Principles of Agile Project Management	3
PJM 6815	Advanced Agile Project Management	3
PJM 6820	Agile Implementation and Governance	3
PJM 6825	Agile Lean Product Development	3
CMN 6060	Negotiation, Mediation, and Facilitation	3

ANALYTICS CONCENTRATION

Code	Title	Hours
ALY 6000	Introduction to Analytics	3
ALY 6010	Probability Theory and Introductory Statistics	3
ALY 6015	Intermediate Analytics	3
ALY 6070	Communication and Visualization for Data Analytics	3
Complete one of the following:		3
ALY 6020	Predictive Analytics	
ALY 6030	Data Warehousing and SQL	
ALY 6040	Data Mining Applications	
ALY 6110	Data Management and Big Data	

Project Management, MS (Silicon Valley)

Companies succeed or fail based on their ability to bring quality products and services to market in a timely manner. Without skilled project managers in place, companies are challenged to deliver projects on time, on budget, and according to specifications. From inception to completion, project managers are responsible for every step in the process: project definition, cost and risk estimation, schedule planning and monitoring, budget management, negotiation and conflict resolution, project leadership, and project presentation and evaluation.

The Master of Science in Project Management is designed to provide you with the practical skills and theoretical concepts you need to lead complex projects. Featuring real-world case studies, this project management degree presents techniques and tools for managing long- and short-term projects successfully and cost-effectively. Augmenting the core project management courses are concentrations that seek to provide you with content-specific expertise that enables you to deepen your knowledge in your field of interest.

In October of 2021, the Master of Science in Project Management accreditation was re-affirmed for the maximum five-year accreditation cycle (originally accredited in 2009) by the Project Management Institute Global Accreditation Center for Project Management Education Programs (GAC) (<https://www.pmi.org/>), the world's leading association for project management professionals. Accreditation is achieved by meeting the GAC's rigorous standards, which include an assessment of program objectives and outcomes, a review of onsite and online resources, evaluations of faculty and students, and proof of continuous improvements in the area of project management.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
PJM 5900	Foundations of Project Management	4
PJM 6000	Project Management Practices	3
PJM 6005	Project Scope Management	3
PJM 6015	Project Risk Management	3
PJM 6025	Project Scheduling and Cost Planning	3
PJM 6135	Project Quality Management	3
PJM 6910	Capstone	3

Concentrations or Electives Option

The remaining required quarter hours for the program may be completed by a combination of completing a concentration and electives or a combination of electives and any courses listed in the concentrations.

CONCENTRATIONS

- Agile Project Management (<https://catalog.northeastern.edu/graduate/professional-studies/masters-degree-programs/project-management-ms/#agile>)
- Analytics (p. 1078)

PJM 6630	Requirements Analysis and Design	3
PJM 6640	Leadership Strategies for the Business Analyst	3

Regulatory Affairs, MS (Boston)

The rapid advancement of technology within healthcare and other sectors has driven the evolution of a complex global regulatory landscape and concurrently created the need for professionals with the skills necessary to facilitate the commercialization of products used therein. In response to this demand, Northeastern University's College of Professional Studies offers the Master of Science in Regulatory Affairs degree.

This unique graduate degree is designed to both broaden and deepen the student's understanding of current global compliance requirements and their practical application in the design, development, approval, and postmarketing of products utilized within regulated industries. Courses within this degree program offer students an opportunity to integrate scientific and technical knowledge and engineering and regulatory perspectives within the larger context of global product commercialization. From research and discovery through the postmarket phase of product utilization, the Master of Science in Regulatory Affairs degree examines the processes required for stakeholders to maintain compliance to product standards and regulations throughout the global marketplace.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
BTC 6210	Human Experimentation: Methodological Issues Fundamentals	4
RGA 6002	Introduction to Regulatory Compliance and Practice	2
RGA 6203 or RGA 6204	Pharmaceutical and Medical Device Law: Topics and Cases Legal Issues in International Food, Drug, and Medical Device Regulation	5
RGA 6212	Introduction to Safety Sciences	4
RGA 6463	Regulatory Strategy for Product Development and Life-Cycle Management	4

Capstone

Code	Title	Hours
RGA 6300	Practical Applications in Global Regulatory Affairs	4

The remaining quarter hours may be completed by selecting a combination of a concentration and additional electives or selecting any courses listed in the concentrations and electives lists.

Concentrations

- Biopharmaceutical Regulatory Affairs (p. 1082)
- Clinical Research Regulatory Affairs (p. 1082)
- Medical Device Regulatory Affairs (p. 1082)
- Nonclinical Biomedical Product Regulation (p. 1082)
- Quality Assurance Compliance (p.)

Program Credit/GPA Requirements

45 total quarter hours required

Minimum 3.000 GPA required

Sports Leadership, MSLD (Boston)

The practice-oriented sports leadership master's degree is structured to accommodate midcareer athletic administrators and coaches, as well as individuals seeking to prepare for careers in the sports industry.

Developed in collaboration with Northeastern University's Center for the Study of Sport in Society, the Master of Sports Leadership seeks to prepare you for a variety of sport-related occupations—whether it's working with a professional or intercollegiate sports team; with a fitness club or wellness organization; or in marketing, communication, or sports management. Courses within this unique graduate degree examine the social and business issues that are critical to sports leadership. Offered in an online format with intensive one-week institutes in Boston and Charlotte, this practice-oriented degree seeks to provide you with a well-rounded educational experience, equipping you to advance your career in the sports industry.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
LDR 6400	Sports Management	3

3D Animation, Graduate Certificate (Boston)

3D animation is not only a major component in the film and broadcast industries, it is also a crucial element in online entertainment and a driving force for the gaming industry. Companies use animation in advertisements, websites, and training programs. The growing use of gaming technologies in education and industry (often referred to as serious games) has given rise to a need for skilled animators who can work closely with business and academic institutions.

The Graduate Certificate in 3D Animation offers a practice-oriented approach to the art and science of animation, with a particular emphasis on the special requirements of 3D modeling and animating for the gaming industry. Course work is designed to develop students' powers of visualization as well as provide a conceptual basis for visual narrative. The program seeks to produce graduates who are skilled in the use of industry-standard animation applications; understand visual principles of lighting, modeling, and surfacing; and are conversant with motion and special effects compositing.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
DGM 6450	Animation Basics	4
DGM 6510	3D Modeling	4
DGM 6530	Character Animation	4

Elective Courses

Code	Title	Hours
Complete a minimum of four quarter hours from the following:		4
DGM 6515	Introduction to After Effects	
DGM 6535	Rigging Principles and Techniques	
DGM 6540	Compositing	

Program Credit/GPA Requirements

16 quarter hours required

Minimum 3.000 GPA required

Agile Project Management, Graduate Certificate (Boston)

Northeastern University's graduate certificate in agile is designed to empower students to explore agile principles and practice and remain up-to-date with current trends in the agile framework. The increasingly important role of agile practitioners and managers is becoming clear as agile business development processes are being adopted by major companies because of its high degree of success in achieving improved time to market, reducing costs, and increasing overall customer satisfaction.

The graduate certificate in agile is led by highly credentialed faculty members that are agile practitioners with decades of experience in helping companies successfully implement agile in their organizations.

Through courses you take online, our agile graduate certificate project management curriculum will give you the opportunity to:

- Develop a strong framework and understanding of the role of agile management
- Develop an understanding of the agile management processes and methodologies
- Develop an understanding of how an agile approach to managing projects can deliver value to the organization
- Develop a personal leadership strategy for success as an agile practitioner
- Develop an agile evaluation plan to measure success

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
PJM 5900	Foundations of Project Management ¹	4
PJM 6810	Principles of Agile Project Management	3
PJM 6815	Advanced Agile Project Management	3

PJM 6820	Agile Implementation and Governance	3
PJM 6825	Agile Lean Product Development	3

- ¹ Foundations of Project Management (PJM 5900) is for students with less than three years of experience directing or leading project tasks and is recommended for students who do not have a basic working knowledge of Microsoft Project software. Students who do not complete Foundations of Project Management (PJM 5900) take project management elective credits to satisfy the required credits for the program.

Elective Courses

Code	Title	Hours
INT 6940	Experiential Learning Projects for Professionals	1-4
INT 6943	Integrative Experiential Learning	3
PJM 6075	Project Finance	3
PJM 6125	Project Evaluation and Assessment	3
PJM 6140	Managing Troubled Projects	3
PJM 6145	Global Project Management	3
PJM 6175	Project Resource Management	3
PJM 6180	Project Stakeholder Management	3
PJM 6205	Leading and Managing Technical Projects	3
PJM 6210	Communication Skills for Project Managers	3
PJM 6215	Leading Remote Project Teams	3
PJM 6710	Introduction to Program and Portfolio Management	3
PJM 6983	Special Topics	1-4

Minimum 3.000 GPA required

Applied Analytics, Graduate Certificate (Boston)

In a global environment characterized by digital transformation, rapid change, and high levels of uncertainty, the ability to hire, reskill, and upskill analytic talent is a major driver of organizational performance. The Graduate Certificate in Applied Analytics in the College of Professional Studies is designed to prepare students to develop analytical skills that will support decision making in an organization's strategy. The certification focuses on data discipline: navigating the sea of information that's generated by machines; technical ability: understanding how machines function and how to interact with them; and the human discipline: what humans can do that machines, for the foreseeable future, cannot emulate—all with an emphasis on experiential learning. Students also will have the opportunity to tailor their studies to support their specific career objectives.

To address the needs of students who are currently in an analytical role, as well as those who are new to the field, the certification curriculum incorporates a broad menu of course options and a pathway through the program based on a student's experience level, as well as concentrations that are aligned with student career objectives.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Core Courses

Code	Title	Hours
Required Courses		
ALY 6000	Introduction to Analytics	3
ALY 6010	Probability Theory and Introductory Statistics	3

Biopharmaceutical Regulatory Affairs, Graduate Certificate (Boston)

The biotechnology and pharmaceutical industries continue to experience rapid growth in the U.S. market. As companies in these industries seek approval to market their products in the United States, demand for qualified regulatory affairs professionals continues to increase. Product development scientists, marketers, quality personnel, as well as legal experts that guide companies through the Food and Drug Administration (FDA) approval process, will benefit from regulatory affairs training.

The Graduate Certificate in Biopharmaceutical Regulatory Affairs is designed to provide students with a greater understanding of U.S. biologic and pharmaceutical product regulation and their unique development, marketing, manufacturing, and postmarket approval-related issues. The program also seeks to prepare students to ensure regulatory compliance, proper validation, and utilization of proper quantitative measurement techniques. Courses from this certificate may be applied toward the Master of Science in Regulatory Affairs for Drugs, Biologics, and Medical Devices.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
RGA 6000	Introduction to Food and Drug Administration (FDA) Pharmaceutical Regulation	2
RGA 6101	Therapeutic Product Development: A Regulatory Overview	4
RGA 6207	Global Impact of Electronic Common Technical Document (eCTD) Submissions	4
RGA 6380	Advanced Regulatory Writing: New Drug Applications	4
Complete one of the following:		4

Minimum 3.000 GPA required

Cloud Computing Application and Management, Graduate Certificate (Boston)

Cloud computing is the delivery of computing services over the internet. Due to the relatively lower cost of IT solutions, many organizations have started to take advantage of cloud services provided by Amazon Web Services, Microsoft Azure, IBM Cloud and SoftLayer, Google Cloud Platform, Salesforce, and so on. These web service providers offer a broad range of global cloud-based IT products, including computing technologies, storage, databases, analytics, networking, mobile, developer tools, management tools, Internet of Things connectivity, and security and enterprise applications. These services can help organizations move faster, facilitate agile development, and better manage scalability.

The cloud computing application and management (CCA&M) graduate certificate offers students an opportunity to develop technical and management skills to address the needs of enterprise IT services. They study theoretical and practical aspects of distributed systems from both technical and business perspectives. Successful students will be able to identify frameworks, techniques, and existing IT solutions to manage internet services at different levels (infrastructure, platform, and software) and will also be able to demonstrate the ability to use APIs to integrate applications and business operations into the cloud. They can be directly employed by web service providers or instead work as IT solutions managers in organizations that contract with web service providers.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ITC 6420	Introduction to Cloud Computing Applications and Management	3
ITC 6450	Advanced Cloud Computing Applications and Management	3

Collegiate Athletics Administration, Graduate Certificate (Boston)

College athletics in the United States is comprised of more than 1,200 schools, conferences, and organizations that collectively invest in the well-being of student-athletes—both on and off the field.

The Graduate Certificate in Collegiate Athletics Administration offers students an opportunity to obtain an in-depth understanding of the largest amateur segment of the sports industry. Through the program's curriculum, students will be given the opportunity to acquire leadership skills and knowledge in a variety of collegiate athletics topics including sports management, NCAA compliance, fund-raising, academic advising, gender and diversity in sport, and Title IX legislation.

Credits earned in this certificate may be used to satisfy some of the degree requirements Master of Sports Leadership (p. 1085) program. For further information see the Seeking More Than One Certificate or Degree (p. 993) page.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Construction Management, Graduate Certificate (Boston)

Over the last two decades, construction in both the public and private sector has become increasingly complex, requiring construction and project managers to have a stronger skill base to be successful in acquiring and executing projects.

The Graduate Certificate in Construction Management is intended to serve owners' representatives, consulting engineers, architects, design engineers, contractors, and subcontractors. Individuals who have a bachelor's degree, but not necessarily in construction, and who have been identified by their companies as having high potential for advancement are also good candidates for this program.

Courses from this certificate may be applied toward the Master of Science in Project Management.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CMG 6400	Introduction to Construction Management	4
CMG 6402	Alternative Project Delivery Methods and Project Controls	4
CMG 6403	Safety, Project Risk, and Quality Management	4

Cross-Cultural Communication, Graduate Certificate (Boston)

The Graduate Certificate in Cross-Cultural Communication will help to equip professionals with the knowledge and competencies to:

- Analyze personal cross-cultural awareness and implicit bias, in addition to interpret organizational cross-cultural communication strategy to develop effective communication processes and activities
- Evaluate communication audiences from a holistic perspective, thereby constructing effective verbal and nonverbal interactions based on cross-cultural consumption
- Formulate enlightened cross-cultural communication and inclusive diversity strategies, processes, and policies
- Demonstrate critical thinking skills through research, case analysis, role-plays, and experiential learning demonstrating agility, quick response, and diplomacy employing cross-cultural communication strategies

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Digital Media Management, Graduate Certificate (Boston)

The digital media market space can present unexpected challenges to standard business models. The Graduate Certificate in Digital Media Management offers courses designed to help managers apply best business practices to these nontraditional challenges. Students are offered the opportunity to gain skills in managing functionally diverse digital media teams, responding effectively to response-critical projects, and implementing marketing strategy in a variety of media channels.

Courses in the program were selected by faculty from the College of Professional Studies' Master of Professional Studies in Digital Media. The certificate consists of courses selected from the MPS in Digital Media (p. 1035) curriculum.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Digital Video, Graduate Certificate (Boston)

With the quality and ease of use of digital video camcorders, anyone can capture moving images, but the result is like a Stradivarius violin: It takes training to make music. The Graduate Certificate in Digital Video is a hands-on introduction to digital video technologies, as well as an examination of the social, cultural, and political implications of moving-image production in the digital age. Students have an opportunity to gain competency in digital production and postproduction while exploring various formal, conceptual, and structural strategies. Students will also have an opportunity to learn to generate digital video that communicates effectively and inventively, in preparation for positions in the creative industries of gaming, design, and media production.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
DGM 6435	Digital Video Production	4

eSports, Graduate Certificate (Boston)**Overview**

Students will have the opportunity to take specialized courses that focus on the emerging eSports field. The certificate is designed for professionals in sports leadership careers who want to have a deeper understanding of eSports. It also provides a pathway to prepare sports and gaming enthusiasts with a combination of coursework across graduate programs to confidently enter this emerging sports sector. This is in keeping with the commitment to serve diverse students who may want to explore a nontraditional learning path as they consider a new career or wish to continue career development in synch with changes occurring in the profession around them.

Credits earned in this certificate may be used to satisfy some of the degree requirements of the Master of Sports Leadership program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Experiential Teaching and Learning, Graduate Certificate (Boston)

Experiential learning has been documented to be an effective pedagogy for promoting deeper learning, fostering student engagement, and ultimately closing the opportunity gap for underserved students. However, many educators and educational leaders are not familiar with best-practice strategies for leading, practicing, and researching experiential learning in their classrooms and therefore need themselves to become adult learners to begin the process of pedagogical transformation.

The Graduate Certificate in Experiential Teaching and Learning is designed to provide K–12 experiential educators with the knowledge, skills, and attitudes needed to design, facilitate, research, and lead engaging and meaningful learning experiences. The program explores the theoretical foundations, approaches, and strategies for learning through experience and how to apply these competencies with a commitment toward fostering educational equity.

Classroom teachers who are interested in transforming their practice as well as educators who are interested in seeking out leadership roles within schools will benefit from earning the Graduate Certificate in Experiential Teaching and Learning as the certificate covers content and skills needed for leading both student and adult experiential learning.

The certificate is comprised of 16 quarter hours, which may be applied toward the Master of Education in Learning and Instruction.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours

Financial Markets and Institutions, Graduate Certificate (Boston)

In this rapidly changing business environment, the barriers between institutions are eroding, and competition is increasing due to deregulation and new product development. Managing internal operations more efficiently and adapting to the changing external environment is critical to the long-term survival of institutions. The Graduate Certificate in Financial Markets and Institutions seeks to prepare students to measure the impact of accounting decisions on performance; to manage risks, assets, and liabilities to meet corporate goals; to understand domestic and international financial systems and the institutions within them; and to build financial relationships that foster marketing financial products.

An examination of financial services industry principles and practices seeks to provide individuals working in brokerage houses, investment or commercial banks, insurance companies, or real estate with a greater understanding of financial systems as well as how to manage risks, assets, and liabilities in meeting corporate goals.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
FIN 6101	Accounting Fundamentals for Financial Institutions	3
FIN 6102	Asset and Liability Management	3

Forensic Accounting, Graduate Certificate (Boston)

News surrounding corporate corruption has had a significant impact on businesses, particularly the accounting industry. In response, the government has enacted sweeping accounting and business laws such as the Sarbanes-Oxley 2002 legislation. Additionally, many professional organizations, including the American Institute of Certified Public Accountants (AICPA) and the Association of Certified Fraud Examiners (ACFE), have made the prevention, detection, and prosecution of fraud and accounting abuse a priority.

This **four-course graduate certificate in forensic accounting** is designed to help students apply techniques in identifying, collecting, and examining evidence, including how to identify financial statement misrepresentation, transaction reconstruction, and tax evasion.

Note: Courses from this certificate may not be applied toward the Master of Science in Leadership.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Courses should be taken in the following sequence:

Code	Title	Hours
ACC 6210	Forensic Accounting Principles	3
ACC 6220	Dissecting Financial Statements	3

1096 Fundraising and Development, Graduate Certificate (Boston)

Geographic Information Systems, Graduate Certificate (Boston)

A geographic information system (GIS) combines layers of data to give needed information on specific locations. Such a system can map environmental sensitivities or geological features or can report on how best to speed emergency personnel to an accident or crime scene. Current fields using GIS include healthcare, public safety, environmental management, transportation and operations technology, real estate, and public utilities.

The Graduate Certificate in Geographic Information Systems program offers hands-on training, seeking to give students the necessary skills and understanding to apply GIS competently and effectively. As a result of the certificate curriculum, students should be well versed in GIS theory, have practical hands-on exposure to GIS software and hardware, understand the representation of data in both mapped and tabular forms, and know how to plan and construct spatial databases.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Higher Education Administration, Graduate Certificate (Boston)

Institutions of higher education around the world are facing considerable pressures that range from changing demographics to financial strain amid disruptions unimaginable 20 years ago. Administrators must develop foundational skills to create conditions that allow their students and institutions to thrive in a constantly changing world. The Graduate Certificate in Higher Education Administration is designed to prepare practitioners for the unique and difficult challenges facing the next generation of higher education professionals. This program allows students the flexibility to build upon their skills in a customized manner with a focus on practical skills and course designs firmly grounded in experiential learning.

The Graduate Certificate in Higher Education Administration program seeks to prepare students with the knowledge to understand the structure, governance, and operation of various higher education organizations. Within the context of classes, students have an opportunity to develop solutions to real-world problems.

Unique Features

- The ability to complete the program 100 percent while accessing and contributing to an extensive professional network—critical in the world of higher education.
- Northeastern faculty who are currently meaningfully engaged in the field, bringing their practical expertise to our students.
- The integration of experiential projects within several courses allowing students to develop practical skills.
- Credits can be applied toward the Master of Education, Higher Education Administration (p. 1014) program.

Human-Centered Informatics, Graduate Certificate (Boston)

Human-centered informatics (HCI) focuses on the design, development, and evaluation of IT systems with a particular emphasis on the relations and interactions between people and IT systems. The emphasis of understanding users experience when they interact with technology in the information-rich environment and the design of interfaces between users and systems makes it different from the focus of software engineering programs or visual and artistic design programs.

The human-centered informatics graduate certificate offers students the opportunity to learn the theories of cognitive and social psychology as well as universal principles of design adopted in human-computer interaction. Students develop the technical skills to study user experience in various IT environments (home, business, social media, healthcare, etc.), focusing on user needs, information architecture, and design of user interfaces. Successful students that graduate with the HCI graduate certificate will be able to propose innovative or improve design solutions to real-world problems.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Courses		
ITC 6410	Fundamentals of Human Behaviors for Interactive Systems	3
DGM 6461	Interactive Information Design 1	4
DGM 6168	Usability and Human Interaction	4
DGM 6268	Usable Design for Mobile Digital Media	4
Elective		
Complete one of the following:		3-4
DGM 6463	Interactive Information Design 2	
ALY 6070	Communication and Visualization for Data Analytics	
ITC 6355	Web Application Design and Development

Information Security Management, Graduate Certificate (Boston)

Information security is a management issue with global business implications. To succeed in today's network economy requires more than simply a focus on information technology (IT) issues. Succeeding also requires a focus on security strategy and management. IT security governance is an overarching consideration in all risk-assessment and management-related endeavors and is important for information security since many issues have legal, regulatory, policy, and ethical considerations. The associated risks of business today must be clearly understood and managed.

The Graduate Certificate in Information Security Management is designed to provide a conceptual and practical overview of information security management. It begins with an overview of key information security management issues and principles. It presents security governance challenges including the policy, law, regulatory, and ethical accountability frameworks that information security risk managers must work within. The program includes review courses that prepare students for the Certified Information Systems Security Professional (CISSP) and Certified Information Systems Auditor (CISA) exams.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ITC 6010	Information Technology Strategy and Governance	3

Insurance Analytics and Management, Graduate Certificate (Boston)

Overview

Learners have an opportunity to gain appropriate technical skills, insurance design expertise, and experience needed to assume professional roles in the insurance field. Upon completion, learners should be prepared to:

- Investigate and identify opportunities to address insurance questions and/or challenges in the evolving digital agenda of the insurance industry.
- Articulate and defend the significance and implications of the intersections of application orientation, domain knowledge, digital leadership and human-centered design, decision support, and digital transformation across the insurance enterprise.
- Integrate the principles, tools, and methods of digital transformation and human-centered design to solve organizational problems by making informed decisions related to the design and deployment of systems in human environments and workflows within the organization.
- Develop a formally proposed solution and/or application, real or hypothetical, to address an insurance-related question and/or challenge.
- Apply data management and strategic analysis, problem-solving, decision-making, effective visualization/communication, and digital leadership skills to the application or deployment of technologies and products in a real-world scenario.

Program Requirements

International Biopharmaceutical Regulatory Affairs, Graduate Certificate (Boston)

To work in today's global biopharmaceutical industry, there is a strong need to understand international regulations that impact the development, marketing, and manufacturing of pharmaceutical and biotechnology products.

The Graduate Certificate in Biopharmaceutical International Regulatory Affairs curriculum focuses on factors that facilitate the safety, performance, and efficacy of biomedical goods. Program training covers the assessment of international regulations and interpretation of their likely impact on a company's global commercialization strategies. Through participation in the program, students will have an opportunity to gain an understanding of international regulatory requirements necessary to implement such strategies.

Course work covers biotechnology and pharmaceutical product approval processes, regulatory analysis, and liability laws as they exist across different regulatory systems. The graduate certificate will provide core regulatory knowledge to students entering into the field from bench research, clinical studies, quality control/assurance, pharmacy, bioengineering, business, and legal analysis. The curriculum covers regulatory environments in Europe, Latin America, Australia, Japan, and other emerging economies. Courses from this certificate may be applied toward the Master of Science in Regulatory Affairs for Drugs, Biologics, and Medical Devices.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
RGA 6221	European Union Compliance Process and Regulatory Affairs	4

Leadership, Graduate Certificate (Boston)

Today's cross-functional teams and organizations require a leadership style that capitalizes on the collective expertise and capabilities of the group. The development and mastery of collaborative leadership skills are not typically part of one's focused discipline preparation; hence, leadership requires deliberate development by those who assume leadership roles.

The Graduate Certificate in Leadership starts with the premise that everyone is capable of leadership. The program studies every aspect of leadership dynamics from the leader as an individual to working in teams and from the organization itself to the development of strategic leadership techniques. Course work exposes participants to a series of alternative perspectives of leadership, including collaborative models. Using the course's action-learning methods, participants build a personal model of leadership that they can put to immediate use in their workplace.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
LDR 6100	Developing Your Leadership Capability	3

Leading and Managing Technical Projects, Graduate Certificate (Boston)

Whether you're an established project manager, or you're working in a technical field and aspire to be one, Northeastern's Graduate Certificate in Leading and Managing Technical Projects seeks to give you the foundational skills and practical knowledge you need to be successful.

Through courses you take online, our technical project management curriculum will give you the opportunity to:

- Develop the leadership and management skills to lead technical projects
- Learn how to communicate technical content to a nontechnical audience
- Gain practice leading remote teams, including global teams
- Plan and schedule projects using the most current and relevant methodologies
- Develop a personal leadership approach to motivate and inspire others

Credits earned in this certificate may be used to satisfy some of the degree requirements of a College of Professional Studies master's program. For further information, see the Seeking More Than One Certificate or Degree page.

Learning Experience Design and Technology, Graduate Certificate (Boston)

The Graduate Certificate in Learning Experience Design and Technology offers a practice-based exploration of the key skills required in the rapidly expanding field of learning design. Never before has the need for professionals with LXD expertise been so essential across all industry sectors. The certificate is designed to meet this need by grounding designers, educators, technologists, and other professionals in the art and science of effective learning design. Students will have the opportunity to build or strengthen design and technological skills that can be applied across PK–12, higher education, government, military, corporate, and nonprofit environments. Skills can be applied to learners of all ages and in online, mobile, virtual, face-to-face, and blended formats.

The program's innovative approach blends academic and workplace-based learning with a focus on how people learn, foundational learning design skills, and advanced learning design topics. Experiential opportunities are built into each course. Students will have the opportunity to develop an online portfolio of work to demonstrate their capacity to think strategically; put creative ideas into action using a variety of technologies; learning design environments that meet academic, personal, professional, and organizational goals; and interpret and clearly communicate results to stakeholders. Credits earned in this certificate may be used to satisfy some of the degree requirements of the Master of Professional Studies in Learning Experience Design and Technology program.

Medical Device Regulatory Affairs, Graduate Certificate (Boston)

The national and regional medical device industries have continued to experience significant market growth, despite the fluctuations in the overall global economy. There are more than 7,000 medical device companies in the United States alone, and nearly 1,000 of these are based in Massachusetts. In total, the medical device sector in Massachusetts employs 36,000 workers, has a payroll of over \$1.8 billion, and annual product shipments of \$7.3 billion.

The Graduate Certificate in Medical Device Regulatory Affairs provides students with an opportunity to gain a detailed knowledge of the regulations influencing the commercialization of new and existing medical devices. The intensely practical curriculum spans the entire life cycle of product development and introduces students to the salient features governing both pre- and postapproval stages. The program content also examines the relationship between regulatory agencies and the medical device industry. Students have the opportunity to take specialized courses on regulatory systems outside the United States.

The certificate will help advance the careers of students coming from such fields as bioengineering, quality control/assurance, intellectual property, business, and marketing. The choice of several courses makes this certificate ideal for students already working in the regulatory world as well as those just entering into the profession.

Courses from this certificate may be applied toward the Master of Science in Regulatory Affairs.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirement

Code	Title	Hours
Required Courses		
RGA 6001	Introduction to Food and Drug Administration (FDA) Medical Device Regulation	2

Nonclinical Biomedical Product Regulation, Graduate Certificate (Boston)

The professional practice of nonclinical regulatory affairs involves understanding, developing, and applying global compliance standards to the biomedical product commercialization process in several cross-functional areas that are separate and distinct from direct clinical patient care. This includes, but is not limited to, design and preclinical development processes, including *in vitro* and *in vivo* animal testing, *in silico* testing, small-scale/large-scale manufacturing process development and validation, development and maintenance of supply chains, as well as product handling and distribution. The Graduate Certificate in Nonclinical Biomedical Product Regulation introduces students to the practice of understanding, developing, and effectively applying global nonclinical compliance standards to new healthcare technologies. Students in the certificate program have the opportunity to:

- Differentiate between the nonclinical vs. clinical aspects of the global biomedical product commercialization process from a regulatory compliance perspective

- Explain the compliance-associated requirements needed to successfully practice professional nonclinical work within the global biomedical products industry
- Describe the nonclinical regulatory standards utilized by the United States Food and Drug Administration (FDA) and other global regulatory agencies to evaluate the safety and efficacy of new and existing biomedical products employed by healthcare practitioners in various patient settings
- Apply fundamental global nonclinical regulations to the biomedical product commercialization process, including therapy design, manufacturing process development and validation, cybersecurity, and supply chain risk management

Students that successfully complete this certificate may apply their courses toward the Master of Science in Regulatory Affairs (p. 1081).

Nonprofit Management, Graduate Certificate (Boston)

Nonprofits today simply require a higher level of management expertise. Nonprofit managers are required to manage people and programs more efficiently and effectively. The Graduate Certificate in Nonprofit Management focuses on developing skills in organizational management, financial management, fund-raising, grant and report writing, human resources management, and governance.

The program integrates theoretical approaches with practical application to prepare students for positions in either small or large nonprofit organizations. The program targets individuals who work in the nonprofit sector as executive directors, managers, program staff, board members, and volunteers. Students have an opportunity to participate in case studies, individual and group projects, and class discussions.

Project Business Analysis, Graduate Certificate (Boston)

At the heart of every project is requirements analysis. It's a critical skill set, leveraged across the spectrum of project work. This program provides practicing project managers with a solid framework and understanding of the process of developing requirements. It also emphasizes the need to engage stakeholders throughout the process to ensure outcomes meet the desired needs of the organization.

This graduate certificate allows you to possess an in-demand skill set. It gives you a better opportunity at finding entry-level positions as a PMO analyst or entry-level business analyst. And it prepares you with the knowledge, skills, and tools needed to create and manage requirements to meet stakeholder needs effectively.

In this program, you will:

- Develop a strong framework and understanding of the role of business analyst
- Understand and analyze the voice of the customer and explore potential solutions for their needs
- Apply tools and techniques to elicit requirements (business requirements, stakeholder requirements)
- Translate the needs of the business into clear, concise, quality requirements (solution requirements, functional and nonfunctional requirements)
- Apply analytical skills in the business analysis process
- Develop a personal leadership strategy for success as a business analyst

Project Management, Graduate Certificate (Boston)

Technical and managerial employees at all levels of organizations are being asked to manage small and large projects. Many of these professionals have not been specifically trained to effectively and efficiently manage projects. The task of managing projects has its own body of knowledge. This

program seeks to provide the practical and theoretical knowledge for which the Project Management Institute tests, and it is expected that individuals who successfully complete this program will be capable of fulfilling the education requirements of the Project Management Professional (PMP) certification exam.

This certificate program in project management is designed with sufficient course flexibility to accommodate professionals with various levels of project management experience. Project management principles are applicable to both manufacturing and service industries, including professionals in fields such as software engineering, construction management, and financial services.

Remote Sensing, Graduate Certificate (Boston)

Remote sensing is the measurement of information by a recording device that is not in physical contact with the object being measured. In practice, remote sensing is the utilization at a distance (as from aircraft, space shuttle, spacecraft, satellite, or ship) of any device for gathering information about the environment. The term remote sensing is most often applied to terrestrial and weather observations but can be applied to planetary environments and astronomy. Remote sensing is applicable to many other situations, including land-use change, pollution tracking, land-use and planning, transportation systems, and military observation.

The online Graduate Certificate in Remote Sensing aims to make education and training in remote sensing available to adult and professional students. The remote sensing certificate program seeks to produce students who are well versed in remote sensing theory, who have hands-on exposure to remote sensing software and hardware, and who have learned how to extract pertinent data from remotely sensed data sets. This six-course certificate program seeks to provide students with the necessary skills and understanding to apply remote sensing knowledge competently and effectively in a variety of areas.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Courses

Code	Title	Hours
RMS 5105	Fundamentals of Remote Sensing	3
RMS 6110	Introduction to Machine Learning for Image Data	3

Remote Sensing Electives

Code	Title	Hours
Complete four of the following:		12
GIS 6345	Geospatial Programming	
ITC 6480	Amazon Web Service (AWS) Cloud Architecting	
RMS 6240	Introduction to Radar and LiDAR Remote Sensing	
RMS 6280	Automated Feature Extraction for the Geospatial Professional	

RMS 6290

Social Media for Organizational Performance, Graduate Certificate (Boston)

In organizations, social media management and strategy development have become core skills required for communication professionals. According to WANTED Analytics, over 1.6 million working professionals utilize social media skills in jobs at the manager and executive level. The Graduate Certificate in Social Media for Organizational Performance focuses on strategic framework and the role digital media has in supporting organizational performance. The program integrates theory and practice, including experimenting with various tools and platforms and reflecting on lessons learned from active management and experimentation.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CMN 6045	Leveraging Digital Technologies: Strategy, Assessment, and Governance	3
DGM 6285	Interactive Marketing Fundamentals ¹	4
DGM 6290	Social Media and Brand Strategy Implementation	4

Electives

Code	Title	Hours
Complete a minimum of five quarter hours from the following:		5
CMN 6040	Consumer Behaviors in the Online Environment	
CMN 6065	Implementation and Management of Social Media Channels and Online Communities	
CMN 6075	Digital Marketing Analytics	
CMN 6096	Cultural Communications Lab	
DGM 6168	Usability and Human Interaction	
DGM 6550	Search Engine Optimization: Strategy and Implementation ²	
PBR 6001	Communications Technology Lab	

Program Credit/GPA Requirements

16 total quarter hours required

Minimum 3.000 GPA required

¹ Interactive Marketing Fundamentals (DGM 6285) is for students who do not have digital media marketing experience. Students who do not complete this course take additional elective credits to satisfy the required credits for the program. Students may also meet the requirement through prior learning assessment. Visit the Credit for Prior Learning (<https://cps.northeastern.edu/academics/prior-learning-assessments/>) page for more information.

² Contact your advisor to enroll in this course. Students who choose Search Engine Optimization: Strategy and Implementation (DGM 6550) are not required to complete its course prerequisites.

Usability, Graduate Certificate (Boston)

The Graduate Certificate in Usability is a practical, in-demand, career-focused graduate certificate. The certificate stresses both a broad, theory-based introduction to the field, as well as the ability to choose from focused electives, with an emphasis on practical assignments. This certificate highlights the key skills and tools used by usability generalists, working in a broad variety of fields.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
DGM 6168	Usability and Human Interaction	4
DGM 6268	Usable Design for Mobile Digital Media	4
DGM 6461	Interactive Information Design 1	4
DGM 6525	Research Methods for Global User Experiences	4

Electives Courses

The College of Science seeks to offer advanced students outstanding academics and real-world research experience through cutting-edge research opportunities that are both discipline based and interdisciplinary. Our doctoral and master's degree programs in the physical sciences, life sciences, and mathematics seek to give students a deep understanding of emerging fields such as chemical biology, cognition and neuroscience, environmental and marine science, biochemistry, bioinformatics, biotechnology, nanoscience, and network science. Our programs are positioned at the forefront of discovery, invention, and innovation. We seek to prepare students and professionals to enter the scientific workforce serving the academic, government, or private sector.

Academic Policies and Procedures

- Academic Appeals Policies (p. 1115)
- Awards (p. 1117)
- Changes in Requirements (p. 1117)
- Cooperative Education Policies (p. 1117)
- Course Registration (p. 1118)
- The Doctor of Philosophy Degree (PhD) (p. 1119)
- Grading Policies (p. 1120)
- The Master's Degree Academic Requirements (p. 1120)
- Satisfactory Progress (p. 1120)
- Time Limitation (p. 1120)
- Transfer Credit (p. 143)

Academic Appeals Policies

Northeastern University affirms that it is essential to provide an appeals mechanism to students who believe that they have been erroneously, capriciously, or otherwise unfairly treated. Information about the university appeals process and procedures can be found in the Graduate Catalog. (p. 133)

If a student feels that they have been the victim of harassment or of discrimination prohibited by law or by university policy, and that this constitutes a substantive basis for the appeal, they should consult with the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>) as soon as they become aware of alleged prohibited harassment or discrimination, and they are not required to wait until a term grade or determination is received before seeking advice or redress. If OUEC (<https://ouec.northeastern.edu/>) is advised of such alleged prohibited conduct as part of an academic appeal, the appeal shall first be pursued and investigated through OUEC (<https://ouec.northeastern.edu/>). Following a resolution of the harassment/discrimination issues, any remaining academic issues will be addressed, at the request of the student, according to the academic appeals procedures.

Before invoking the appeals procedures, students are encouraged to speak informally to their instructors or academic advisors about any determination or grade about which they have questions. If students choose to pursue an appeal, the College of Science process is described in the appeals section that follows. The Graduate Curriculum Committee, which is comprised of program and department directors, serves as the Academic Appeals Committee for the College of Science.

Grade Appeals

If a graduate student wishes to dispute a grade in a course taught by a member of the College of Science faculty, the first step is for the student to discuss their concerns with the faculty member who taught the course to see if it is possible to reach agreement on the issue(s). If the student is not able to resolve their issues with the faculty member who taught the course, the student should work with the department/program director to attempt a department-level resolution.

If these informal attempts to resolve the issue fail, the student can enter the formal procedure at the college level.

The student should meet with the associate dean who oversees the graduate program who will attempt to resolve the issue by working with the instructor and the department/program. Contact Graduate Student Services at COSGradStudents@northeastern.edu to schedule the meeting. If it is not possible for the associate dean to resolve the issue with the department/program, the associate dean will determine whether or not there is just cause to convene the Graduate Curriculum Committee.

The decision to convene the Graduate Curriculum Committee will be based upon the following:

- The student sincerely attempted to resolve the complaint with the professor and the department/program.
- The complaint is substantive in nature (adjudication could affect student's course grade and/or academic record).
- The complaint has been brought forward in a timely manner.
 - The statement must be submitted no later than 28 calendar days from the day when the academic determination is made available to the student.
 - If a student wishes to dispute a grade in their final term, this must be done within 28 calendar days of degree conferral date.

If the associate dean determines the appeal should be brought to the Graduate Curriculum Committee, the student must provide a formal written complaint to the associate dean within one week of the student's meeting with the associate dean.

- The written complaint should provide a detailed timeline as well as all available evidence supporting the student's complaint.
 - It is the student's responsibility to make their case. Students may submit any evidence such as emails, quizzes, examinations, etc.
 - Information about the statement can be found under Step 2 Prepare an Appeal Statement—Academic Appeals Policies and Procedures in the (p. 133) *Northeastern University Academic Catalog*.

- Once the associate dean receives a formal written complaint, the associate dean will provide a copy of the complaint to the faculty member and to the department/program director and convene a meeting of the Graduate Curriculum Committee.
- If the student fails to provide a thoughtful and well-reasoned written summary of the case, then the matter will be considered closed at the college level.
- The associate dean will make a good faith effort to identify a date and time for the meeting within 35 calendar days of the student's original submission of their statement.

GRADUATE CURRICULUM COMMITTEE

- The Graduate Curriculum Committee serves as the Academic Appeals Committee for the College of Science.
- The Graduate Curriculum Committee is convened in order to determine whether a fair and due process was used to determine the student's grade.
- The role of the committee is to conduct a review when a grade appeal is filed by a student for one of the following reasons:
 - The course grading policy was not applied consistently to all students within a class and/or section.
 - The instructor's method of assigning grades differed from the method outlined in the instructor's course syllabus.
 - The instructor failed to provide a clear policy on how grades would be assigned.

APPEALS MEETING

The student and the faculty member have the right to attend and present their case orally to the committee. The faculty member and the student are not required to attend; however, it is usually quite helpful to make an oral presentation and answer any questions that the committee may have. If the complainant indicates that they will present their case in person and then fails to attend the scheduled hearing, the case will be dismissed. The complainant and the faculty member both have the right to testify privately and separately before the committee. Lawyers are not permitted in these proceedings. Generally, the faculty member and complainant are each given a 15-minute period to present their case.

The student usually presents their complaint to the committee first. The committee may then ask the complainant any questions they have based upon either the written statement submitted by the complainant or the complainant's oral presentation. The faculty member then presents their case, which is followed by questions from the committee. After both the complainant and faculty member have addressed the committee, the committee then reviews the evidence, summarizes the case, and makes a recommendation to the associate dean concerning the resolution of the complaint.

If the committee believes it cannot resolve any issues without additional information, the committee may request any information needed from either the complainant, faculty member, or department/program. This information must be provided to the committee within one week of the meeting. If the requested information is not provided in the required time frame, then the committee may weigh this failure in making its final determination regarding the original complaint.

COMMITTEE PROCESS

- All decisions of the committee will be made based on a simple majority (51%) vote.
- The associate dean is chair of the committee and only votes when there is a tie.
- The student bringing the complaint to the committee carries the burden of proof based on the weight of the evidence in demonstrating that the grade is incorrect or unjustified.
- If the committee decides that the grading process was unfair, the committee can request that the instructor changes the student's grade.
 - If an acceptable agreement involves a change of grade, the instructor is responsible for submitting a change of grade to the Office of the University Registrar in a timely manner following notification of the committee's decision.
- The student shall be notified within three business days of a decision being reached.

If the student or the faculty member is not satisfied with the committee's disposition of the matter, or if the grade appeal is not resolved within 35 calendar days after the written statement is submitted to the college, they may further pursue the matter by requesting in writing that the university convene an academic appeals resolution committee to review the issue. This must be submitted within 10 calendar days of the notification from the college. This committee has been designated as the final authority on these matters. Students may obtain information on this process by contacting the Office of the Provost.

Academic Dismissal Appeal

If a student wishes to dispute an academic dismissal, the first step is to consult the graduate director about appealing to the department/program. If and when all departmental appeals are exhausted, the student can enter the formal procedure at the college level.

The student will meet with the associate dean for graduate affairs and professional programs who will attempt to resolve the issue by working with the department/program. Contact Graduate Student Services to schedule the meeting. If it is not possible for the associate dean to resolve the issue with the department/program, the associate dean will determine if the complaint is substantive and there is just cause to convene the Graduate Curriculum Committee.

The student must provide a formal written complaint to the associate dean within one week of the student's meeting with the associate dean. The statement must be submitted no later than 10 calendar days from the day when the academic determination is made available to the student. The written complaint should provide a detailed timeline as well as all available evidence supporting the student's complaint. Once the associate dean receives a formal written complaint, the associate dean will provide a copy of the complaint to the department/program director and convene a meeting of the Graduate Curriculum Committee. If the student fails to provide a thoughtful and well-reasoned written summary of the case, then the matter will be considered closed at the college level.

The associate dean will make a good faith effort to identify a date and time for the meeting within 35 calendar days of the student's original submission of their statement.

GRADUATE CURRICULUM COMMITTEE

- The Graduate Curriculum Committee serves as the Academic Appeals Committee for the College of Science.
- The Graduate Curriculum Committee is convened in order to determine whether a fair and due process was used.

APPEALS MEETING

The student has the right to attend and present their case orally to the committee. The student is not required to attend; however, it is usually quite helpful to make an oral presentation and answer any questions that the committee may have. If the complainant indicates that they will present their case in person and then fails to attend the scheduled hearing, the case will be dismissed. Lawyers are not permitted in these proceedings.

The student usually presents their complaint to the committee first. The committee may then ask the complainant questions based upon either the written case submitted by the complainant or the complainant's oral presentation. The committee then reviews the evidence, summarizes the case, and makes a recommendation to the associate dean concerning the resolution of the complaint.

If the committee believes it cannot resolve any issues without additional information, the committee may request any information needed from either the complainant or department/program. This information must be provided to the committee within one week of the meeting. If the needed information is not provided in the time frame required, then the committee may weigh this failure in making its final determination regarding the original complaint.

COMMITTEE PROCESS

- All decisions of the committee will be made based on a simple majority (51%) vote.
- The associate dean is chair of the committee and only votes when there is a tie.
- The student bringing the complaint to the committee carries the burden of proof based on the weight of the evidence in demonstrating that the dismissal is incorrect or unjustified.
- If the committee decides that the academic dismissal should be revoked, the committee can request that the department reinstate the student immediately.

Decisions concerning dismissals cannot be appealed beyond the college level. While program dismissals cannot be appealed beyond the college level, underlying academic judgments that led to a dismissal can be appealed.

Awards

Only those students who are registered in degree programs are eligible for awards. Award recipients will receive an official award letter from the College of Science via email. Pay attention to this letter as it is an official contract that should be read carefully. In addition, to maintain awards, students must be making satisfactory progress toward their degrees.

Receipt of financial support administered by the College of Science is contingent on satisfactory academic progress toward the degree and on meeting department-specific guidelines. The College of Science requires that all students receiving awards will generally have two semesters to reach a 3.000 grade-point average. Students whose cumulative GPA is below 3.000 will be reviewed by their departments and by the College of Science and may have their funding terminated on recommendation of their department or by decision of the College of Science in consultation with their department. Renewals of awards will depend on the student making satisfactory academic progress toward the degree, including a GPA of 3.000 or the department's minimum GPA, if it is higher than the College of Science minimum, and satisfactory performance of any duties required by the award.

Changes in Requirements

The continuing development of the college may result in regular revision of curricula. When curriculum changes are made, students are allowed to complete the degree requirements of the program when they matriculated. If a student wishes to follow the new curriculum/program, they may request this in writing to the College of Science Graduate Student Services office at the time of the announcement of said changes.

Cooperative Education Policies

The College of Science Graduate Cooperative Education Program is one option for experiential learning and is available to students enrolled full time at Northeastern University in a degree-granting program.

The goals of cooperative education are for students to:

- **Integrate knowledge** and skills learned in the classroom and co-op to identify and solve problems
- **Gain new knowledge** and develop new skills to successfully engage in unfamiliar activities and projects
- **Identify and leverage opportunities** to learn beyond the classroom
- **Articulate** the intellectual skills that underlie the work they engage in
- **Assess, critique, and improve** their work

- **Adapt** their behavior to different audiences they interact with (e.g., communication, self-representation, etc.)
- **Behave professionally** in various environments (i.e., team, independent, etc.) by adhering to ethical standards and being accountable for their commitments

Eligibility Requirement for Co-op

Master's-level students must meet the eligibility requirements and follow the guidelines below. Co-op is not guaranteed, and it is strongly recommended that students conduct independent searches as well.

- To be eligible for co-op, College of Science graduate students must:
 - Be enrolled full time at Northeastern. For students enrolled part time, meet with your co-op advisor to discuss options.
 - Have completed a minimum of 16 master's-level academic credits prior to the start of co-op.
 - Meet the 3.000 minimum grade-point average requirement.
 - Have no incomplete grades, not be on academic probation, or have any outstanding disciplinary issues.
 - Depending on your program and campus, returning to courses after your co-op experience may be required. See your co-op and academic advisor for clarification.
- Graduate certificate students are not eligible for co-op.
- International students on an F-1 visa must have a valid I-20 and must follow Curricular Practical Training protocol.
- Students must successfully complete the Pathways to Professional Success (EESC 6500) course. This course covers the College of Science co-op performance standards, which encourage professional and ethical behaviors throughout the co-op process and clarify procedures required for continued success of students and the co-op program. The standards establish professional expectations of the student throughout the co-op search process and during the co-op term and address co-op related issues that may involve performance.
- Students must notify their co-op advisor when they receive a co-op offer.

Guidelines

1. Co-ops must be aligned with academic terms (fall, spring, and full summer or summer first half and summer second half).
2. Students may participate in co-op activities with a single company for four or six months for no fewer than 12 weeks and must align with the academic calendar.
3. Co-ops are required to be full time, a minimum of 32 hours per week.
4. Course enrollment while on co-op is dependent upon academic program.
5. Students can create their own co-op outside of NUworks. Approval from the co-op faculty and adherence to all guidelines are required.
6. Students working in industry must complete an industry project to fulfill the co-op requirement. This must be approved by your assigned co-op faculty/coordinator.
7. College of Science students are only allowed to complete one co-op work experience per degree.

Registering for Co-op

Students are registered for the co-op work experience course based on the co-op position in NUworks. All co-op positions must be aligned with the academic calendar and be approved by the co-op faculty.

Co-op Documentation

Students who fully and successfully participate in co-op will receive a grade of Satisfactory (S). Those who fail to complete their co-op assignment will receive a grade of Unsatisfactory (U). These grades will appear on the student's academic transcript. Academic credit is not awarded for the completed co-op.

Global University System

University and college cooperative education policies apply to students on all campuses.

The College of Science Co-op Standing Committee

In the event a situation arises that requires special consideration, the College of Science students who are dismissed from or resign from a co-op job will have an opportunity to meet with the co-op standing committee for a review. A decision will be made on future co-op eligibility and access to NUworks.

PhD Students

Please contact your department or Graduate Student Services to inquire about guidelines for experiential learning opportunities.

Course Registration

Students are encouraged to obtain advisor approval of course selections each semester. This approval is required for all assistantship recipients, and some departments require it for all students. Students should check with individual departments for specific guidelines.

The Doctor of Philosophy Degree (PhD)

The Doctor of Philosophy degree is awarded to candidates who provide evidence of high scholastic attainment and research ability in their major field. Specific degree requirements are administered by a committee in charge of the degree program. It is the responsibility of the chair of this committee to certify to the College of Science the completion of each requirement for each candidate.

Residence Requirement

A PhD student must spend the equivalent of at least one academic year in residence at Northeastern University as a full-time graduate student. The committee of each degree program specifies the method by which the residence requirement is satisfied.

Qualifying Exam

In programs where a qualifying exam is required, students must complete this requirement within the time limit set by the program of study.

Comprehensive Examination

Degree programs may require a comprehensive examination. Generally, students are expected to complete all of the required degree coursework prior to taking the comprehensive examination. Students must complete this requirement within the time limit set by the program of study, usually within one term of completing the required coursework.

Doctoral Degree Candidacy

PhD degree candidacy is established when students have completed all departmental and university requirements for candidacy. These requirements vary by department and include completing the minimum number of graduate semester hours required of doctoral students by the department (this may include an earned master's degree accepted by the department) and passing a qualifying examination and/or a comprehensive examination. Once students reach doctoral degree candidacy they will be certified, in writing, by the college. Registration in coursework is not permitted once a student reaches candidacy.

Continuity of Registration

For each of the first two semesters that a doctoral candidate has established candidacy, the student must register for Dissertation. For each semester beyond the two Dissertation registrations, the student must register for Doctoral Dissertation Continuation until the dissertation is approved by the College of Science. During the terms when a student is registered for Doctoral Dissertation or Dissertation Continuation, coursework is not permitted as the course requirements for the degree have already been met. If the academic program requires enrollment in seminars or courses in addition to Dissertation or Dissertation Continuation, the department's graduate director will make a recommendation to the College of Science for approval. Approval must happen prior to registration. Students must be registered for Dissertation or Dissertation Continuation during the semester in which they take the final oral examination (including the full summer semester if that is when defense occurs). Any student who does not attend Northeastern for a period of one year may be required to apply for readmission. A student who does not enroll for a period of three semesters, or one year, will be required to apply for readmission. Readmission is done via Slate. A student who does not enroll for a period of two semesters, or less than one year, may petition their department for reactivation. If the department is supportive, the student will be required to submit a written request to the departmental graduate committee. If the graduate committee feels the student is worthy of reactivation, the student's written request must be submitted to Graduate Student Services. Please note that college admissions deadlines apply to requests for readmission and reactivation.

Dissertation

The dissertation committee shall have at least three faculty members, two of whom shall be from Northeastern. The chair of the dissertation committee (who is presumed to be the thesis advisor) will be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold a PhD (or other research doctorate) or an appropriate terminal degree for the discipline. Exceptions to this policy will be considered and, if appropriate, approved by the provost or their designee. Colleges may permit full-time faculty from other ranks to serve in this role based on the research qualifications and experience of individual faculty members.

The PhD committee should be appointed early enough to advise in the formulation of the student's program and in refining the research topic for the dissertation. Within the constraints of the above criteria, the PhD program faculty will determine the process by which dissertation committees are established. The final list of dissertation committee members shall be reported to the college's associate dean for graduate education or unit managing the degree program.

If a student's major advisor leaves Northeastern (including transition to emeritus status), that person may continue the research direction of the dissertation or thesis. However, a co-advisor must be appointed from the academic department or program. The student will then have two advisors, one an official member of the Northeastern faculty who will be available for research and administrative matters and the ex-Northeastern advisor. If a new major advisor is appointed, the former Northeastern faculty member may serve as an outside member of the committee.

Final Oral Examination

An oral defense of the dissertation is required and must be held at least 14 calendar days before the degree conferral date. The defense shall be conducted with the committee members present either in person or via electronic means. In the case where neither the candidate nor the committee members are present in person on campus (i.e., the candidate and all committee members are connected only remotely via electronic means), there shall be a location established and technology enabled for public, in-person attendance of the defense by the university community and this accommodation made known to the university.

Interdisciplinary Doctoral Programs

Some graduate students may wish to pursue doctoral programs that involve substantial work in two or more departments. To meet this need, an interdisciplinary program may be established that corresponds in scope and depth to doctoral standards but does not agree exactly with the individual departmental regulations. Consult this graduate catalog for policies and guidelines pertaining to this doctoral option.

Grading Policies

In the College of Science, not more than two courses or 6 semester hours of credit, whichever is greater, may be repeated to satisfy the requirements for the degree. Only such repeats will be counted in calculating the cumulative grade-point average.

No grade changes (p. 114) are permitted after the end of the final examination period one calendar year from the semester in which the student registered for the course. In calculating the overall cumulative average, all graduate-level coursework completed at the time of clearance, regardless of program, will be counted, including other coursework completed for graduate certificates, master's degrees, doctoral programs, and personal interest or professional development.

Students cannot elect a satisfactory/unsatisfactory grading scheme for College of Science courses, unless the course grading scheme is designated satisfactory/unsatisfactory.

The Master's Degree Academic Requirements

A candidate for the master's degree must complete a minimum of 30 semester hours of graduate-level coursework and such other study as may be required by the department in which the student is registered.

To qualify for the degree, a minimum cumulative grade-point average of 3.000, equivalent to a grade of B, must be obtained. This average will be calculated each semester according to the university grading system and will exclude any transfer credits and nonrepeatable courses that have been retaken. A student who does not make satisfactory progress toward degree requirements, as specified by the individual department, may be terminated from the program.

Comprehensive Examination

A final written or oral comprehensive examination is required in some programs. This examination will be given by the department concerned at least two weeks before the commencement at which the degree is expected to be conferred.

Thesis

A master's thesis is required in some programs and should demonstrate the individual's capacity to execute independent work based on original material. Registration for Thesis is required in most programs.

Theses must be approved by the departmental graduate committee and, in cases in which a grade is required, must receive a grade of B (3.000) or better to be accepted.

Continuity of Registration

Students are expected to maintain satisfactory progress toward their intended degrees. All students must be registered in the last semester of their program. A student who does not enroll for a period of three semesters, or one year, will be required to apply for readmission. Readmission is done via Slate. A student who does not enroll for a period of two semesters, or less than one year, may petition their department for reactivation. If the department is supportive, the student will be required to submit a written request to the departmental graduate committee. If the graduate committee feels the student is worthy of reactivation, the student's written request must be submitted to Graduate Student Services. Please note that college admissions deadlines apply to requests for readmission and reactivation.

Satisfactory Progress

Satisfactory progress means satisfying requirements in the College of Science, in this graduate catalog, and in the regulations specified by the departments.

The College of Science sets minimum standards for all students to fulfill. Departments and programs may have additional requirements that exceed those of the College of Science. Students in the College of Science must be making satisfactory progress, including working toward the graduation requirement of a grade-point average of 3.000 in their coursework and the timely completion of coursework and comprehensive/qualifying examinations. See also the university's policy on academic standing ("Minimum Cumulative GPA (p. 141)").

Time Limitation

Refer to Northeastern University policy regarding time limitations. If students wish to apply for an extension of the time limit, they must submit a petition to their department of study. The petition must include a detailed plan for completion of all remaining degree requirements. In the case of master's degree time limit extension requests for coursework, the department must certify that the content of each of the courses has not changed

since the time the student completed the course. If deemed appropriate, the department will recommend a time limit extension to Graduate Student Services. The associate dean has final approval of time limit extensions.

Biology

gradbio@northeastern.edu

The PhD program in biology emphasizes close interaction between graduate students and faculty in developing the intellectual and experimental skills required for creative independent research. Rigorous courses in a core biology curriculum, as well as advanced courses in particular research interests, are complemented by intensive research culminating in completion of a dissertation under faculty supervision. Students have an opportunity to declare a concentration in either cell and molecular biology or molecular microbiology.

The Department of Biology oversees the bioinformatics Master of Science program. The interdisciplinary program provides cross-disciplinary training in biology, computer science, and informational technology, preparing students for cutting-edge jobs in the biotechnology and pharmaceutical industries. The program consists of four parts: fundamental courses, core courses, co-op and experiential learning, and electives.

The Graduate Certificate in Bioinformatics offers professionals working in the research, healthcare, and pharmaceutical industries the ability to employ bioinformatics algorithms and techniques to biological problems in their current practice. It also gives people looking to switch careers the data and genomic analysis skills needed to be more competitive in the biological and pharmaceutical industries.

The Graduate Certificate in Omics provides students the opportunity to explore in detail the key genomic technologies and computational approaches that are driving advances in prognostics, diagnostics, and treatment, learning how scientists sequence, assemble, and analyze the function and structure of genomes. The certificate explores methods for determining traits and diseases by studying the larger population as well as how gene identification can help identify targets for therapeutic intervention. Students that are already in the field or have an interest will significantly benefit from a certificate like this.

Programs

Doctor of Philosophy (PhD)

- Biology (Boston) (p. 1121)

Master of Science (MS)

- Bioinformatics (Boston) (p. 1123)
- Bioinformatics (Oakland) (p. 1127)
- Bioinformatics (Portland) (p. 1130)
- Bioinformatics (Toronto) (p. 1133)
- Cell and Gene Therapies (Boston) (p. 1135)

Graduate Certificate

- Bioinformatics (Boston) (p. 1136)
- Bioinformatics (Portland) (p. 1138)
- Omics (Boston) (p. 1139)

Biology, PhD (Boston)

The PhD program entails course work from a core biology curriculum along with advanced courses in the student's area of research interest. This is complemented by intensive research and completion of a dissertation under faculty supervision. Faculty research includes biochemistry, microbiology, cell and molecular biology, genetics, neurobiology, regenerative biology, and the biology of reproduction. Two optional concentrations are available: cell and molecular biology and molecular microbiology.

Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an (https://catalog.northeastern.edu/graduate/social-sciences-humanities/sociology/sociology-ma/)MS Biology (https://catalog.northeastern.edu/graduate/science/biology/biology-ms/) degree. In addition, students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Biology (https://catalog.northeastern.edu/graduate/science/biology/biology-ms/) degree. Note that

no students will be admitted directly into the MS Biology (<https://catalog.northeastern.edu/graduate/science/biology/biology-ms/>) to pursue a master's degree.

Program Requirements

Bachelor's Degree Entrance

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Qualifying examination
Annual review
Dissertation committee
Dissertation proposal
Colloquia (minimum of three)
First-author publication
Dissertation defense

Core Requirements

Code	Title	Hours
Research Ethics		
BIOL 7399	Research Problem Solving, Ethics, and Communication Skills	4
Colloquium		
Complete the following (repeatable) course twice:		2
BIOL 5100	Biology Colloquium	

Concentration or Electives Option

A concentration is not required. Students may complete the electives option in lieu of a concentration.

- Cell and Molecular Biology Concentration (p. 1122)
- Molecular Microbiology Concentration (p. 1122)
- Electives Option (p. 1123)

Dissertation

Code	Title	Hours
BIOL 9990	Dissertation Term 1	
BIOL 9991	Dissertation Term 2	

Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

CELL AND MOLECULAR BIOLOGY CONCENTRATION

Code	Title	Hours
Required Coursework		
BIOL 6300	Biochemistry	4
Electives		
In consultation with faculty advisor, complete 20 semester hours from the topic of cell and molecular biology:		20
BIOL 5103 to BIOL 9984		

MOLECULAR MICROBIOLOGY CONCENTRATION

Code	Title	Hours
Required Coursework		
BIOL 6300	Biochemistry	4
BIOL 6405	Prokaryotic Cell and Molecular Biology	4
Electives		
In consultation with faculty advisor, complete 16 semester hours from the topic of molecular microbiology:		16
BIOL 5103 to BIOL 9984		

ELECTIVES OPTION

Code	Title	Hours
Required Coursework		
Complete 8 semester hours from the following:		8
BIOL 6303	Neurobiology and Behavior	
BIOL 6405	Prokaryotic Cell and Molecular Biology	
Electives		
Complete 16 semester hours from the following:		16
BIOL 5103 to BIOL 9984		

Advanced Entry Program Requirements

The biology PhD program seeks to provide a broad background knowledge base in conjunction with in-depth study of a specialized area of biology. The program emphasizes close interaction between graduate students and faculty members in developing the intellectual and experimental skills required for creative, independent research.

Students entering the PhD program with a related Master of Science degree typically have significantly reduced course loads. An individualized course of study is designed by the biology graduate curriculum committee in consultation with the student and the student's advisor. The student can then focus on intensive research and completion of a dissertation under faculty supervision. Faculty research includes biochemistry, microbiology, cell and molecular biology, genetics, neurobiology, regenerative biology, and the biology of reproduction. Financial support (teaching assistantships or research assistantships) is normally provided for PhD students who are making satisfactory progress toward completion of their degree.

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Qualifying examination
Annual review
Dissertation committee
Dissertation proposal
Colloquia (minimum of three)
First-author publication
Dissertation defense

Core Requirements**APPROVED COURSE WORK**

Consult your faculty advisor for acceptable courses.

APPROVED ELECTIVES

Consult your faculty advisor for acceptable electives.

Dissertation

Code	Title	Hours
BIOL 9990	Dissertation Term 1	
BIOL 9991	Dissertation Term 2	

Program Credit/GPA Requirements

Variable total semester hours required
Minimum 3.000 GPA required

Bioinformatics, MS (Boston)

The Master of Science in Bioinformatics seeks to provide students with core knowledge in bioinformatics programming, integrating knowledge from the biological, computational, and mathematical disciplines. Upon completion, students are equipped to apply bioinformatics and computational methods to biological problems. Students in the MS program have the opportunity to gain professional work experience via co-op.

The program consists of core coursework in computational methods, programming, and statistics, enhanced by electives in molecular biology, biochemistry, molecular modeling, web development, database design and management, data mining, and other related topics.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Programming		
BINF 6200	Bioinformatics Programming	4
Computational Methods		
BINF 6310	Introduction to Bioinformatics	4
Statistics		
MATH 7340	Statistics for Bioinformatics	4
Research and Seminar		
Complete one of the following:		1-2
BIOL 6381	Ethics in Biological Research	
NNMD 5310	Bioethics in the Age of Artificial Intelligence	
Professional Development		
EESC 6500	Pathways to Professional Success	1

Concentration or Electives Option

A concentration is not required. Students who choose not to declare a concentration will complete the electives option.

- Bioinformatics Enterprise (p. 1124)
- Biotechnology (p. 1124)
- Data Analytics (p. 1124)
- Health Informatics (p. 1125)
- Omics (p. 1125)
- Electives Option (p.)

Optional Co-op Experience

Code	Title	Hours
BINF 6964	Co-op Work Experience	0
or BINF 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

CONCENTRATION IN BIOINFORMATICS ENTERPRISE

Code	Title	Hours
BIOT 5219	The Biotechnology Enterprise	2
BIOT 5225	Managing and Leading a Biotechnology Company	3
BIOT 5228	Planning and Executing Biotechnology Projects	3
Complete 6 semester hours of coursework from the restricted electives list below. (p. 1125)		6
Complete 4 semester hours of coursework from the restricted electives or additional electives lists below.		4

CONCENTRATION IN BIOTECHNOLOGY

Code	Title	Hours
BIOT 5120	Foundations in Biotechnology	3
BIOT 5621	Protein Principles in Biotechnology	3
BIOT 5750	Molecular Approaches in Biotechnology	3
Complete 5 semester hours of coursework from the restricted electives list below. (p. 1125)		5
Complete 4 semester hours of coursework from the restricted electives or additional electives lists below.		4

CONCENTRATION IN DATA ANALYTICS

Code	Title	Hours
DA 5020	Collecting, Storing, and Retrieving Data	4
DA 5030	Introduction to Data Mining/Machine Learning (or Elective)	4
Complete one of the following:		4

INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
Complete 3 semester hours from the restricted electives list below. (p. 1125)		3
Complete 3 semester hours of coursework from the restricted electives or additional electives lists below.		3

CONCENTRATION IN HEALTH INFORMATICS

Code	Title	Hours
Complete at least 9 semester hours from the following:		9
HINF 5101	Introduction to Health Informatics and Health Information Systems	
HINF 5102	Data Management in Healthcare	
HINF 5105	The American Healthcare System	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 6220	Database Design, Access, Modeling, and Security	
Complete 5 semester hours of coursework from the restricted electives list below. (p. 1125)		5
Complete 4 semester hours of coursework from the restricted electives or additional electives lists below.		4

CONCENTRATION IN OMICS

Code	Title	Hours
BINF 6400	Genomics in Bioinformatics	4
BINF 6420	Omics in Bioinformatics	4
BINF 6430	Transcriptomics in Bioinformatics	4
Complete 6 semester hours of coursework from the restricted electives or additional electives lists below.		6

ELECTIVES OPTION

Code	Title	Hours
Complete 10 hours from the restricted electives list below. (p. 1125)		10
Complete 8 semester hours of coursework from the restricted electives or additional electives lists below.		8

RESTRICTED ELECTIVES

Code	Title	Hours

Bioinformatics, MS (Toronto)

The Master of Science in Bioinformatics seeks to provide students with core knowledge in bioinformatics programming, integrating knowledge from the biological, computational, and mathematical disciplines. Upon completion, students are equipped to apply bioinformatics and computational methods to biological problems. Students in the MS program have the opportunity to gain professional work experience via co-op.

The program consists of core coursework in computational methods, programming, and statistics, enhanced by electives in molecular biology, biochemistry, molecular modeling, web development, database design and management, data mining, and other related topics.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Programming		
BINF 6200	Bioinformatics Programming	4
Computational Methods		

BINF 6310	Introduction to Bioinformatics	4
Statistics		
MATH 7340	Statistics for Bioinformatics	4
Research and Seminar		
BIOL 6381	Ethics in Biological Research	2
Professional Development		
BINF 6964	Co-op Work Experience	0
or BINF 5964	Projects for Professionals	
BINF 7700	Bioinformatics Research Directions	4
BIOT 5219	The Biotechnology Enterprise	2
EESC 6500	Pathways to Professional Success	1
or BINF 6500	Professional Development for Co-op	

Concentration or Electives Option

A concentration is not required. Students who choose not to declare a concentration will complete the electives option.

- Bioinformatics Enterprise (p. 1134)
- Biotechnology (p. 1134)
- Omics (p. 1134)
- Electives Option (p. 1134)

Program Credit/GPA Requirements

32 total semester hours required

(Additional hours may be required based on choice of concentration)

Minimum 3.000 GPA required

CONCENTRATION IN BIOINFORMATICS ENTERPRISE

Code	Title	Hours
BIOT 5225	Managing and Leading a Biotechnology Company	3
BIOT 5228	Planning and Executing Biotechnology Projects	3
BIOT 5500	Concepts in Regulatory Science	3

CONCENTRATION IN BIOTECHNOLOGY

Code	Title	Hours
BIOT 5120	Foundations in Biotechnology	3
BIOT 5621	Protein Principles in Biotechnology	3
BIOL 6299	Molecular Cell Biology for Biotechnology	3

CONCENTRATION IN OMICS

Code	Title	Hours
BINF 6400	Genomics in Bioinformatics	4
BINF 6420	Omics in Bioinformatics	4
BINF 6430	Transcriptomics in Bioinformatics	4

ELECTIVES OPTION

Code	Title	Hours
Complete 11 semester hours of coursework from the electives list below.		11

ELECTIVES LIST

Complete the remaining semester hours from the approved electives list below. Students who declare the omics concentration are not required to complete electives.

Code	Title	Hours
BIOT 5145	Biotechnology Lab Skills	
BIOT 5225	Managing and Leading a Biotechnology Company	
BIOT 5227	Launching Your Science: Biotechnology Entrepreneurship	
BIOT 5330	Drug Safety and Immunogenicity	

BIOT 5340	Introduction to Biotherapeutic Approvals
BIOT 5500	Concepts in Regulatory Science
BIOT 5560	Bioprocess Fundamentals
BIOT 5635	Downstream Processes for Biopharmaceutical Production
BIOT 5640	Drug Product Processes for Biopharmaceuticals
BIOT 5700	Molecular Interactions of Proteins in Biopharmaceutical Formulations
BIOT 5810	Cutting-Edge Applications in Molecular Biotechnology
BIOT 5850	Higher-Order Structure Analytics
BIOT 6100	Agricultural Biotechnology
BIOT 6214	Experimental Design and Biostatistics
BIOT 6300	Pharmaceutical Microbiology
BIOT 6320	Design and Development of Biopharmaceuticals
BIOT 6340	Sterile Manufacturing Operations
BIOT 7245	Biotechnology Applications Laboratory
CHEM 5550	Introduction to Glycobiology and Glycoprotein Analysis
CHEM 5620	Protein Chemistry
INSH 5301	Introduction to Computational Statistics

Cell and Gene Therapies, MS (Boston)

Northeastern University's Master of Science in Cell and Gene Therapies is a professional master's program, an innovative, nonthesis graduate degree. It combines advanced interdisciplinary training in advanced therapies, such as cell therapies and gene therapies, with the development of high-value business skills critical to success in today's dynamic workplace. This program is designed to prepare graduates to innovate, collaborate, and lead as research, managerial, or technical professionals in a wide range of the cell and gene therapies fields.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Code	Title	Hours
Required Core		
BIOL 5543	Stem Cells and Regeneration	4
BIOL 5821	Cell and Gene Therapies	4
BIOT 5840	Cell and Gene Therapy Lab	3
BIOL 5583	Immunology	4
BIOT 5830	Regulatory Landscape of Cell and Gene Therapies	2
BIOL 6216	Applied Bioinformatics	4
BIOL 6381	Ethics in Biological Research	2
PMST 6254	Advanced Drug Delivery Systems	3
Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0
or BIOT 7001	Managing Innovation in Biotechnology	
Elective		
Complete a minimum of 5 semester hours from the following to meet the 32 total hours for the program:		5
BIOE 6000	Principles of Bioengineering	
BIOL 5100	Biology Colloquium	
BIOL 5549	Inventions in Microbial Biotechnology	
BIOL 5573	Medical Microbiology	
BIOL 5587	Comparative Neurobiology	
BIOL 5591	Advanced Genomics	
BIOL 5595	Cell and Molecular Neuroscience	
BIOT 5145	Biotechnology Lab Skills	
BIOT 5219	The Biotechnology Enterprise	
BIOT 5220	The Role of Patents in the Biotechnology Industry, Past and Future	
BIOT 5330	Drug Safety and Immunogenicity	

BIOT 5340	Introduction to Biotherapeutic Approvals
BIOT 5401	Scientific Communication and Problem Solving in Biotechnology
BIOT 5560	Bioprocess Fundamentals
BIOT 5630	Cell Culture Applications for Biopharmaceuticals
BIOT 5635	Downstream Processes for Biopharmaceutical Production
BIOT 5850	Higher-Order Structure Analytics
BIOT 6300	Pharmaceutical Microbiology
BIOT 6320	Design and Development of Biopharmaceuticals
BIOT 6340	Sterile Manufacturing Operations
CHME 5101	Fundamentals of Chemical Engineering: Fluid, Heat, and Mass Transfer
CHME 5160	Drug Delivery: Engineering Analysis
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5631	Biomaterials Principles and Applications
CHME 5632	Advanced Topics in Biomaterials
NNMD 5270	Foundations in Nanomedicine: Therapeutics
NNMD 5271	Foundations in Nanomedicine: Diagnostics
NNMD 5272	Nanomedicine Seminar

Program Credit/GPA Requirements

32 semester hours required

Minimum 3.000 GPA required

Bioinformatics, Graduate Certificate (Boston)

The Graduate Certificate in Bioinformatics seeks to provide students with core knowledge in bioinformatics programming, integrating knowledge from the biological, computational, and mathematical disciplines. Students have an opportunity to gain the data and genomic analysis skills needed to employ bioinformatics techniques to biological problems. The graduate certificate consists of four courses, three bioinformatics courses and one elective, totaling 15–16 semester hours.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Program Credit/GPA Requirements

15–16 total semester hours required

Minimum 3.000 GPA required

Omics, Graduate Certificate (Boston)

Students will explore in detail the key genomic technologies and computational approaches that are driving advances in prognostics, diagnostics, and treatment, learning how scientists sequence, assemble, and analyze the function and structure of genomes. The certificate explores methods for determining traits and diseases by studying the larger population, as well as how gene identification can help identify targets for therapeutic intervention. Students that are already in the field or have an interest in the field will significantly benefit from this curriculum.

Chemistry and Chemical Biology

Website (<https://cos.northeastern.edu/chemistry-chemical-biology/>)

Penny Beuning, PhD

Professor and Chair

617.373.2822

The PhD program in chemistry provides research and professional opportunities for students that are based on fundamental chemical principles with translational applications to the real world. The program is built on academic rigor and research impact, based on the creativity and strengths of an increasingly diverse faculty and student body. We have harnessed our extensive connections in industry to create and maintain a thriving industry-entry PhD program and provide our regular PhD students with internship opportunities in industry, government laboratories, and other venues that may lead to a wide range of careers. Students in our program leave with flexible skills that can be applied in creative and meaningful ways in academics, industry, and beyond. We are aligned in our core values with the mission of Northeastern University to “educate students for a life of fulfillment and accomplishments and create and translate knowledge to meet global and societal needs.” This mission is at the core of the curriculum, research, mentoring strategies, and professional development opportunities offered to our students. It is implemented in a highly multidisciplinary and transparent environment where students have a voice and take real ownership and responsibility for their professional success. Within this context, PhD students work with chemistry and chemical biology faculty in interdisciplinary areas that include biochemistry and chemical biology, synthetic chemistry, medicinal chemistry, polymer and materials chemistry, environmental chemistry, computational chemistry, and bioanalytical chemistry.

The Master of Science in Chemistry is designed to allow practicing chemical professionals who have an earned bachelor’s degree in chemistry or a closely related field to pursue a master’s degree in chemistry by completing a coursework program during the evening weekday hours. Full-time or part-time options are available. The department offers a diverse range of courses that mirror the faculty’s research interests in biochemistry, chemical biology, synthetic chemistry, medicinal chemistry, polymer and materials chemistry, environmental chemistry, computational chemistry, and bioanalytical chemistry.

Jocelyn Haversat, PhD

Associate Teaching Professor and Director, Biotechnology Programs

617.373.6998

The biotechnology programs are housed in the Department of Chemistry and Chemical Biology. The Master of Science in Biotechnology, a professional science master’s degree program, is an innovative, nonthesis, experiential graduate degree. It combines advanced interdisciplinary training in biotechnology, biology, chemistry, regulatory, and pharmaceutical sciences with the development of high-value business skills critical to success in the biotechnology industry. Students develop and apply their skills in a hands-on co-op experience with one of Northeastern’s many academic and industry partners. Full-time, part-time, and remote options are available with online and evening course offerings.

The biotechnology program also offers several graduate certificates in the areas of biodefense and biosecurity, biopharmaceutical analytical sciences, biotechnology, biotechnology enterprise, biotechnology regulatory science, experimental biotechnology, manufacturing and quality operations, molecular biotechnology, pharmaceutical technologies, process science, and vaccine development.

Programs

Doctor of Philosophy (PhD)

- Chemistry (Boston) (p. 1141)

Master of Science (MS)

- Biotechnology (Boston) (p. 1142)
- Biotechnology (Oakland) (p. 1147)
- Biotechnology (Portland) (p. 1150)
- Biotechnology (Toronto) (p. 1154)
- Chemistry (Boston) (p. 1157)

Graduate Certificate

- Biodefense and Biosecurity (Boston) (p. 1159)
- Biopharmaceutical Analytical Sciences (Boston) (p. 1160)
- Biotechnology (Boston) (p. 1160)
- Biotechnology (Portland) (p. 1160)
- Biotechnology Enterprise (Boston) (p. 1161)
- Biotechnology Regulatory Science (Boston) (p. 1161)
- Experimental Biotechnology (Boston) (p. 1162)

- Manufacturing and Quality Operations in Biotechnology (Boston) (p. 1162)
- Molecular Biotechnology (Boston) (p. 1162)
- Molecular Biotechnology (Portland) (p. 1163)
- Pharmaceutical Technologies (Boston) (p. 1163)
- Process Science (Boston) (p. 1164)
- Vaccine Development (Boston) (p. 1164)

Chemistry, PhD (Boston)

The PhD program in chemistry is designed for students who have earned a bachelor's or a master's degree in chemistry or related areas and who wish to earn a doctorate in chemistry. Research spans a wide range of multidisciplinary fields, with strengths in clean energy, polymers, materials, medicinal chemistry, bioanalytical chemistry, and chemical biology. Our research programs draw from a strong foundation in analytical, organic, physical, and biological chemistry in a collaborative and diverse environment. Our student-focused approach to mentoring, a strong graduate student association, and faculty deeply rooted both in academics and industry provide a flexible platform for student development toward a large diversity of career paths.

Students typically take courses their first year while supported on teaching assistantships and achieve PhD candidacy in the second year. The primary emphasis of the program is on the completion of an original research project, its articulation in a well-written thesis, and its subsequent defense before the thesis committee through an open seminar followed by oral examination by the committee members.

PhD Program Requirements

Bachelor's Degree Entrance

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Three qualifying examinations
Annual review
Candidacy
Minimum of two seminars
Dissertation committee
Dissertation proposal
Dissertation defense

Core Requirements

Code	Title	Hours
Required Core		
CHEM 5600	Research Skills and Ethics in Chemistry	3
CHEM 7710	Laboratory Rotations in Chemistry and Chemical Biology	0
CHEM 7750	Advanced Problem Solving	3
Complete the following (repeatable) course three times:		3
CHEM 5501	Chemical Safety in the Research Laboratory	
Seminar		
At least one seminar must be taken for a letter grade.		
CHEM 8504	Graduate Seminar	1
Research		
CHEM 8984	Research	1-6
Chemistry		
Complete 18 semester hours from the following:		18
CHEM 5550 or within the range of CHEM 5610 to CHEM 7320		

Dissertation

Code	Title	Hours
Complete the following courses:		
CHEM 9990	Dissertation Term 1	
CHEM 9991	Dissertation Term 2	
Registration in the following course is required for any additional terms taken to complete the dissertation.		
CHEM 9996	Dissertation Continuation	

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Advanced Entry Program Requirements

Advanced entry into the PhD program requires a master's degree in chemistry or a related area. Graduate courses taken during acquisition of the Master of Science degree allow completion of the PhD program with fewer course credits. Other than the course requirements, which are specified separately, see the PhD program requirements for details.

INDUSTRY ENTRY PHD

This program is strictly for students who already have a master's degree in chemistry or related area and have full-time employment at a company. The company must commit to all financial responsibilities accrued in obtaining the degree and allow time for the student to work on a PhD thesis in collaborative research with a company supervisor and one of our faculty members. Graduate courses in the Department of Chemistry and Chemical Biology are generally taught in the evenings to accommodate the fact that our students work in industry during the day.

Complete all courses and requirements listed below unless otherwise indicated.

Biotechnology, MS (Boston)

Overview

Northeastern's Master of Science in Biotechnology is a professional master's program, an innovative, nonthesis graduate degree. It combines advanced interdisciplinary training in biotechnology, biology, chemistry, and pharmaceutical sciences with the development of high-value business skills critical to success in today's dynamic workplace. This program is designed to prepare graduates to innovate, collaborate, and lead as research, managerial, or technical professionals in a wide range of biotechnology specialties. The two-year program offers students the possibility to pursue one of ten concentrations to further their knowledge in a specific topical area of the field.

Concentrations

AGRICULTURAL BIOTECHNOLOGY CONCENTRATION

The agricultural concentration goes beyond the production of biological drugs and focuses on the key agricultural biotechnology (agritech) principles and methods used today. Students have an opportunity to learn the principles of agritech and the role they play in the concepts and fundamentals of agriculture today. The concentration addresses plant, animal, food, and ecological biotechnology. The learning of the students is reinforced by both lecture courses and project-driven laboratory experience that provides hands-on learning of modern agricultural methodologies.

BIODEFENSE CONCENTRATION

The biodefense concentration is designed to prepare students for the initial homeland biodefense and bioterrorism response. Students have an opportunity to learn the microbiology and epidemiology of biological agents that are potential threats, identify and propose countermeasures, and

develop expertise in response and recovery strategies and policies. The learning combines the foundational biotechnology courses with case-based and hands-on bioethical, biowarfare, and bioterrorism courses.

BIOPHARMACEUTICAL TECHNOLOGIES AND ANALYTICS CONCENTRATION

The biopharmaceutical technologies and analytics track focuses on structures, variants and activities of biological molecules as well as how to convert purified proteins to biopharmaceutical drug products that are compatible for clinical use. Students learn the diversity of molecular forms derived from biological products, techniques to analyze and characterize these forms, and the impact of these structural changes on the safety and efficacy of biopharmaceuticals. The track addresses design of product formulation, development and implementation of drug product manufacturing processes, and relevant process technology, such as aseptic operations and freeze-drying, needed for drug product manufacturing. This is accomplished through both lecture courses and project-driven laboratory experiences that utilize analytical techniques and provide hands-on learning of formulation design and drug product process development.

BIOTECHNOLOGY OPERATIONS CONCENTRATION

The biotechnology operations track is an operationally inclusive concentration that offers relevant insights to the inner workings of a biotech company while preparing students for new entry or promotions to a variety of biotech functions. Students learn the principles of quality, regulatory science, process science and manufacturing, while integrating business and management skills with the science of biotechnology. The track covers the science behind compliance and the principles and practices of state-of-the-art biopharmaceutical manufacturing and quality operations, enabling students to move across positions in discovery, clinical operations, manufacturing, quality, regulatory affairs, and consulting for operations and operational strategy and/or remediations.

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

MASTER'S DEGREE IN BIOTECHNOLOGY WITH GRADUATE CERTIFICATE IN ENGINEERING LEADERSHIP

Students may complete a Master of Science in Biotechnology in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The certificate program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 6 semester hours of the certificate coursework may be applied to the general elective requirement of this program and to the elective requirement of any concentration.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
BIOT 5120	Foundations in Biotechnology	3
BIOT 5219	The Biotechnology Enterprise	2
BIOT 5401	Scientific Communication and Problem Solving in Biotechnology	3
BIOT 5621	Protein Principles in Biotechnology	3
BIOT 5630	Cell Culture Applications for Biopharmaceuticals	2
BIOT 5750	Molecular Approaches in Biotechnology	3
BIOT 6214	Experimental Design and Biostatistics	2
BIOT 7245	Biotechnology Applications Laboratory	3
EESC 6500	Pathways to Professional Success	1
Electives		
Complete 3 semester hours based on lab skills placement test results:		3
Option A (Student exempted from basic lab skills instruction due to placement test results)		
Complete 3 semester hours from the Electives list. (p. 1145)		
Option B (Student requires lab skills instruction)		
BIOT 5145	Biotechnology Lab Skills	
Complete 2 semester hours from the Electives list. (p. 1145)		

Concentration or Electives Option

A concentration is not required. Students may complete the electives option in lieu of a concentration.

- Agricultural Biotechnology (p. 1144)
- Biodefense (p. 1144)
- Biopharmaceutical Technologies and Analytics (p. 1144)
- Biotechnology Operations (p. 1145)
- Electives Option (p. 1145)

Optional Co-op Experience

Biotechnology, MS (Oakland)

Northeastern's Master of Science in Biotechnology is a professional master's program, an innovative, nonthesis graduate degree. It combines advanced interdisciplinary training in biotechnology, biology, chemistry, and pharmaceutical sciences with the development of high-value business skills critical to success in today's dynamic workplace. This program is designed to prepare graduates to innovate, collaborate, and lead as research, managerial, or technical professionals in a wide range of biotechnology specialties. The two-year program offers students the possibility to pursue one of ten concentrations to further their knowledge in a specific topical area of the field.

Concentrations

AGRICULTURAL BIOTECHNOLOGY CONCENTRATION

The agricultural concentration goes beyond the production of biological drugs and focuses on the key agricultural biotechnology (agritech) principles and methods used today. Students have an opportunity to learn the principles of agritech and the role they play in the concepts and fundamentals of agriculture today. The concentration addresses plant, animal, food, and ecological biotechnology. The learning of the students is reinforced by both lecture courses and project-driven laboratory experience that provides hands-on learning of modern agricultural methodologies.

BIODEFENSE CONCENTRATION

The biodefense concentration is designed to prepare students for the initial homeland biodefense and bioterrorism response. Students have an opportunity to learn the microbiology and epidemiology of biological agents that are potential threats, identify and propose countermeasures, and develop expertise in response and recovery strategies and policies. The learning combines the foundational biotechnology courses with case-based and hands-on bioethical, biowarfare, and bioterrorism courses.

BIOPHARMACEUTICAL TECHNOLOGIES AND ANALYTICS CONCENTRATION

The biopharmaceutical technologies and analytics track focuses on structures, variants and activities of biological molecules as well as how to convert purified proteins to biopharmaceutical drug products that are compatible for clinical use. Students learn the diversity of molecular forms derived from biological products, techniques to analyze and characterize these forms, and the impact of these structural changes on the safety and efficacy of biopharmaceuticals. The track addresses design of product formulation, development and implementation of drug product manufacturing processes, and relevant process technology, such as aseptic operations and freeze-drying, needed for drug product manufacturing. This is accomplished through both lecture courses and project-driven laboratory experiences that utilize analytical techniques and provide hands-on learning of formulation design and drug product process development.

BIOTECHNOLOGY OPERATIONS CONCENTRATION

The biotechnology operations track is an operationally inclusive concentration that offers relevant insights to the inner workings of a biotech company while preparing students for new entry or promotions to a variety of biotech functions. Students learn the principles of quality, regulatory science, process science and manufacturing, while integrating business and management skills with the science of biotechnology. The track covers the science behind compliance and the principles and practices of state-of-the-art biopharmaceutical manufacturing and quality operations, enabling students to move across positions in discovery, clinical operations, manufacturing, quality, regulatory affairs, and consulting for operations and operational strategy and/or remediations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
BIOT 5120	Foundations in Biotechnology	3
BIOT 5219	The Biotechnology Enterprise	2
BIOT 5401	Scientific Communication and Problem Solving in Biotechnology	3
BIOT 5621	Protein Principles in Biotechnology	3
BIOT 5630	Cell Culture Applications for Biopharmaceuticals	2
BIOT 5750	Molecular Approaches in Biotechnology	3
BIOT 6214	Experimental Design and Biostatistics	2

1148 Biotechnology, MS (Oakland)

BIOT 7245	Biotechnology Applications Laboratory	3
EESC 6500	Pathways to Professional Success	1
Electives		
Complete 3 semester hours based on lab skills placement test results:		3
Option A (Student exempted from basic lab skills instruction due to placement test results)		
Complete 3 semester hours from the Electives list. (p. 1149)		
Option B (Student requires lab skills instruction)		
BIOT 5145	Biotechnology Lab Skills	
Complete 2 semester hours from the Electives list. (p. 1149)		

Concentration or Electives Option

A concentration is not required. Students may complete the electives option in lieu of a concentration.

- Agricultural Biotechnology (p. 1148)
- Biodefense (p. 1148)
- Biopharmaceutical Technologies and Analytics (p. 1148)
- Biotechnology Operations (p. 1149)
- Electives Option (p. 1149)

Optional Co-op Experience

Code	Title	Hours

The learning combines the foundational biotechnology courses with case-based and hands-on bioethical, biowarfare, and bioterrorism courses.

BIOPHARMACEUTICAL TECHNOLOGIES AND ANALYTICS CONCENTRATION

The biopharmaceutical technologies and analytics track focuses on structures, variants and activities of biological molecules as well as how to convert purified proteins to biopharmaceutical drug products that are compatible for clinical use. Students learn the diversity of molecular forms derived from biological products, techniques to analyze and characterize these forms, and the impact of these structural changes on the safety and efficacy of biopharmaceuticals. The track addresses design of product formulation, development and implementation of drug product manufacturing processes, and relevant process technology, such as aseptic operations and freeze-drying, needed for drug product manufacturing. This is accomplished through both lecture courses and project-driven laboratory experiences that utilize analytical techniques and provide hands-on learning of formulation design and drug product process development.

BIOTECHNOLOGY OPERATIONS CONCENTRATION

The biotechnology operations track is an operationally inclusive concentration that offers relevant insights to the inner workings of a biotech company while preparing students for new entry or promotions to a variety of biotech functions. Students learn the principles of quality, regulatory science, process science and manufacturing, while integrating business and management skills with the science of biotechnology. The track covers the science behind compliance and the principles and practices of state-of-the-art biopharmaceutical manufacturing and quality operations, enabling students to move across positions in discovery, clinical operations, manufacturing, quality, regulatory affairs, and consulting for operations and operational strategy and/or remediations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
BIOT 5120	Foundations in Biotechnology	3
BIOT 5219	The Biotechnology Enterprise	2
BIOT 5401	Scientific Communication and Problem Solving in Biotechnology	3
BIOT 5621	Protein Principles in Biotechnology	3
BIOT 5630	Cell Culture Applications for Biopharmaceuticals	2
BIOT 5750	Molecular Approaches in Biotechnology	3
BIOT 6214	Experimental Design and Biostatistics	2
BIOT 7245	Biotechnology Applications Laboratory	3
Co-op and Experiential Learning		
EESC 6500	Pathways to Professional Success	1
BIOT 7001	Managing Innovation in Biotechnology	3

Concentration or Electives Option

A concentration is not required. Students may complete the Electives Option in lieu of a concentration.

Note: All students will be assessed for lab skills proficiency. Students who need to complete Biotechnology Lab Skills (BIOT 5145) and seek to graduate at 34 total program hours must select the Electives Option. For students who need to complete Biotechnology Lab Skills (BIOT 5145), choosing a concentration will require an additional 1 SH of coursework.

- Agricultural Biotechnology (p. 1155)
- Biodefense (p. 1155)
- Biopharmaceutical Technologies and Analytics (<https://catalog.northeastern.edu/graduate/science/chemistry-chemical-biology/biotechnology-ms/#Biopharmaceutical%20Technologies%20and%20Analytics>)
- Biotechnology Operations (<https://catalog.northeastern.edu/graduate/science/chemistry-chemical-biology/biotechnology-ms/#Biotechnology%20Operations>)
- Electives Option (p. 1155)

Optional Co-op Experience

Code	Title	Hours
BIOT 6964	Co-op Work Experience	0

Program Credit/GPA Requirements

34 total semester hours required (35 total semester hours required for students assessed to need Biotechnology Lab Skills (BIOT 5145) and who choose to declare a concentration)

Minimum 3.000 GPA required

CONCENTRATION IN AGRICULTURAL BIOTECHNOLOGY

Code	Title	Hours
BIOT 5810	Cutting-Edge Applications in Molecular Biotechnology	3
BIOT 6100	Agricultural Biotechnology	3
Choose one from the following:		3
BIOT 5225	Managing and Leading a Biotechnology Company	
BIOT 5850	Higher-Order Structure Analytics	

CONCENTRATION IN BIODEFENSE

Code	Title	Hours
BIOT 5810	Cutting-Edge Applications in Molecular Biotechnology	3
BIOT 6600	Agents of Bioterrorism	3
BIOT 6610	Biosecurity and Bioterrorism	3

CONCENTRATION IN BIOPHARMACEUTICAL TECHNOLOGIES AND ANALYTICS

Code	Title	Hours
BIOT 5640	Drug Product Processes for Biopharmaceuticals	3
BIOT 5700	Molecular Interactions of Proteins in Biopharmaceutical Formulations	3

Choose one from the following:

3

BIOT 5225	Managing and Leading a Biotechnology Company
BIOT 5910	Vaccines and Immunization
BIOT 5930	Molecular Tools for Vaccine Design
BIOT 5850	Higher-Order Structure Analytics
BIOT 6320	Design and Development of Biopharmaceuticals
CHEM 5550	Introduction to Glycobiology and Glycoprotein Analysis

CONCENTRATION IN BIOTECHNOLOGY OPERATIONS

Code	Title	Hours
BIOT 6290	Foundation in Quality for Biotechnology	3
BIOT 6320	Design and Development of Biopharmaceuticals	3

Choose one from the following:

3

BIOT 5225	Managing and Leading a Biotechnology Company
BIOT 5228	Planning and Executing Biotechnology Projects
BIOT 5330	Drug Safety and Immunogenicity
BIOT 5340	Introduction to Biotherapeutic Approvals
BIOT 5500	Concepts in Regulatory Science
BIOT 5560	Bioprocess Fundamentals
BIOT 5635	Downstream Processes for Biopharmaceutical Production
BIOT 6300	Pharmaceutical Microbiology
BIOT 6340	Sterile Manufacturing Operations

ELECTIVES OPTION

Code	Title	Hours
Complete at least 9 semester hours from this program's Electives List (p. 1156)		9

Electives List

Code	Title	Hours
BINF 6200	Bioinformatics Programming	
BINF 6310	Introduction to Bioinformatics	
BIOT 5145	Biotechnology Lab Skills	
BIOT 5225	Managing and Leading a Biotechnology Company	
BIOT 5228	Planning and Executing Biotechnology Projects	
BIOT 5330	Drug Safety and Immunogenicity	
BIOT 5340	Introduction to Biotherapeutic Approvals	
BIOT 5500	Concepts in Regulatory Science

BIOT 6610	Biosecurity and Bioterrorism	
BIOT 7983	Special Topics in Biotechnology	
BIOE 5430	Principles and Applications of Tissue Engineering	

CHEM 5550	Introduction to Glycobiology and Glycoprotein Analysis
DA 5020	Collecting, Storing, and Retrieving Data
DA 5030	Introduction to Data Mining/Machine Learning
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management
INSH 5301	Introduction to Computational Statistics
NNMD 5271	Foundations in Nanomedicine: Diagnostics
NNMD 5272	Nanomedicine Seminar
NNMD 5370	Nanomedicine Research Techniques
PHSC 5212	Research Skills and Ethics
PPUA 5390	Special Topics in Public Policy and Urban Affairs

Chemistry, MS (Boston)

Master's Coursework Option

The Department of Chemistry and Chemical Biology offers a full-time or part-time, course-based master's degree. Classes are generally offered in the evenings to accommodate students who have full-time jobs. A research thesis is not a requirement for the degree.

Master's Thesis Option

A thesis-based master's option is available only by department approval. Students who wish to pursue the thesis option must have a chemistry and chemical biology tenure-track faculty member willing to serve as their faculty advisor.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Concentration or Option

- Analytical Chemistry (p. 1157)
- Chemical Biology (p. 1158)
- Chemical Toxicology and Environmental Chemistry (p. 1158)
- Coursework Option (p. 1159)
- Thesis Option (p. 1159)

OPTIONAL CO-OP EXPERIENCE

Code	Title	Hours
If pursuing a co-op, regardless of concentration or option, the following must be completed:		
CHEM 5621 and CHEM 5622	Principles of Chemical Biology and Lab for CHEM 5621	4
CHEM 5628 and CHEM 5631	Principles of Spectroscopy of Organic Compounds and Lab for CHEM 5628	4
CHEM 5638 or CHEM 5641 or CHEM 5649	Molecular Modeling Computational Chemistry Numerical Strategies and Data Analytics for Chemical Sciences	3
EESC 6400	Pre-co-op Work Experience	0
EESC 6500	Pathways to Professional Success	1

Program Credit/GPA Requirements

30 total semester hours required

Additional hours required for students who opt to participate in co-op

Minimum 3.000 GPA required

ANALYTICAL CHEMISTRY CONCENTRATION

Code	Title	Hours
CHEM 5611	Analytical Separations	3
CHEM 5612	Principles of Mass Spectrometry	3
CHEM 5628	Principles of Spectroscopy of Organic Compounds	3
Complete 21 semester hours as follows.		21

Complete at least one of the following:

CHEM 5614	Electroanalytical Chemistry
CHEM 5642	Photochemistry Fundamentals and Applications
CHEM 5660	Analytical Biochemistry
CHEM 5670	Global Biogeochemistry
CHEM 5688	Principles of Nuclear Magnetic Resonance
Complete remaining coursework from the following range:	
CHEM 5550 to CHEM 7750	

CHEMICAL BIOLOGY CONCENTRATION

Code	Title	Hours
CHEM 5621	Principles of Chemical Biology	3
CHEM 5676	Bioorganic Chemistry	3

Complete 24 semester hours as follows. 24

Complete one of the following:

CHEM 5611	Analytical Separations
CHEM 5612	Principles of Mass Spectrometry
CHEM 5628	Principles of Spectroscopy of Organic Compounds
CHEM 5660	Analytical Biochemistry

Complete at least two of the following:

CHEM 5620	Protein Chemistry
CHEM 5630	Nucleic Acid Chemistry
CHEM 5638	Molecular Modeling
CHEM 5640	Biopolymeric Materials
CHEM 5648	Chemical Principles and Application of Drug Metabolism and Pharmacokinetics
CHEM 5670	Global Biogeochemistry

Complete remaining coursework from the following range:

CHEM 5550 to CHEM 7750

CHEMICAL TOXICOLOGY AND ENVIRONMENTAL CHEMISTRY CONCENTRATION

Code	Title	Hours
CHEM 5611	Analytical Separations	3
CHEM 5621	Principles of Chemical Biology	3
CHEM 5628	Principles of Spectroscopy of Organic Compounds	3
CHEM 5642	Photochemistry Fundamentals and Applications	3

Complete 18 semester hours as follows. 18

Complete at least one of the following:

CHEM 5640	Biopolymeric Materials
CHEM 5643	Plastics Sustainability and Circular Economy: A Chemical Perspective
CHEM 5670	Global Biogeochemistry
CHEM 5692	Carbon Capture, Utilization, and Storage

Complete one of the following:

CHEM 5648	Chemical Principles and Application of Drug Metabolism and Pharmacokinetics
CHEM 5660	Analytical Biochemistry

Complete remaining coursework from the range CHEM 5550 to CHEM 7750 or up to 6 semester hours from the following restricted electives:

CIVE 5250	Organic Pollutants in the Environment
CIVE 5255	Tools and Techniques of Environmental Health
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5300	Environmental Sampling and Analysis
CIVE 5366	Air Quality Engineering and Science
CIVE 7250	Environmental Chemistry
CIVE 7251	Environmental Biological Processes
CIVE 7255	Environmental Physical/Chemical Processes
CIVE 7279	Advanced Air Quality

ENVR 5350	Sustainable Energy and Climate Solutions
PHSC 5560	Nanotoxicity
PHTH 5202	Introduction to Epidemiology
PHTH 5210	Biostatistics in Public Health
PHTH 5214	Environmental Health
PHTH 6208	Foundations of Community Health Assessment
PPUA 5240	Health Policy and Politics
PPUA 5268	International Environmental Policy

COURSEWORK OPTION

Code	Title	Hours
Complete 30 semester hours from the following range:		30
CHEM 5550 to CHEM 7750		

THESIS OPTION

A thesis-based master's option is available only by department approval. Students who wish to pursue the thesis option must have a chemistry and chemical biology tenure-track faculty member willing to serve as their faculty advisor.

Code	Title	Hours
Coursework		
Complete 18 semester hours from the following:		18
CHEM 5550 or any course within the range of CHEM 5610 to CHEM 7320		
Graduate Seminar		
Seminar must be completed twice. At least one seminar must be taken for a letter grade.		2
CHEM 5904	Seminar	
or CHEM 8504	Graduate Seminar	
Laboratory		
Complete the following (repeatable) course twice:		2
CHEM 5501	Chemical Safety in the Research Laboratory	
Research		
CHEM 5984	Research	4-6
or CHEM 8984	Research	
Thesis		
CHEM 7990	Thesis	4

Biodefense and Biosecurity, Graduate Certificate (Boston)

The Graduate Certificate in Biodefense and Biosecurity has been designed in response to a need in the biotechnology industry for individuals who desire to become professionals in biodefense or biosecurity. The concentration seeks to give individuals a background into the technology to detect, analyze, and respond to biosecurity threats. Enrolled students will study the microbiology and epidemiology of biological agents that are potential threats; identify and propose what countermeasures can be used; and through coursework develop expertise in the response, strategies, and policies related to biodefense and biosecurity. The graduate certificate consists of three biotechnology courses and one public policy and urban affairs course totaling 13 semester hours.

Program Requirements**Required Courses**

Code	Title	Hours
BIOT 5810	Cutting-Edge Applications in Molecular Biotechnology	3
BIOT 6610	Biosecurity and Bioterrorism	3
BIOT 6600	Agents of Bioterrorism	3
PPUA 6532	Building Resilience into Local Government	4

Program Credit/GPA Requirements

13 total semester hours required

Minimum 3.000 GPA required

Biopharmaceutical Analytical Sciences, Graduate Certificate (Boston)

The Graduate Certificate in Biopharmaceutical Analytical Sciences has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of state-of-the-art analyses of protein with focus on the characterization of innovator and biosimilars. Individuals, particularly those who are working in the various sectors of biotechnology including basic research of biological systems, discovery, development, and manufacturing of biopharmaceuticals, have an opportunity to improve their competency and learn new practical skills that enable them to increase productivity and further contribute to their professions. In addition, the certificate was designed for both individuals with and without experience in biopharmaceuticals and their analysis.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 6290	Foundation in Quality for Biotechnology	3
BIOT 6320	Design and Development of Biopharmaceuticals	3
CHEM 5550	Introduction to Glycobiology and Glycoprotein Analysis	3
CHEM 5617	Protein Mass Spectrometry Laboratory	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Biotechnology, Graduate Certificate (Boston)

The Graduate Certificate in Biotechnology has been designed in response to a need in the biotechnology industry for individuals without a biotechnology background to obtain a strong foundation in basic biotechnology concepts and skills. Individuals, particularly those who are working in fields other than biotechnology, will acquire competency and learn new practical skills enabling them to increase productivity and allow for transitions into more biotechnology-related fields.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5120	Foundations in Biotechnology	3
BIOT 5220	The Role of Patents in the Biotechnology Industry, Past and Future	1
BIOT 5621	Protein Principles in Biotechnology	3
BIOT 5630	Cell Culture Applications for Biopharmaceuticals	2
BIOT 5750	Molecular Approaches in Biotechnology	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Biotechnology, Graduate Certificate (Portland)

The Graduate Certificate in Biotechnology has been designed in response to a need in the biotechnology industry for individuals without a biotechnology background to obtain a strong foundation in basic biotechnology concepts and skills. Individuals, particularly those who are working in fields other than biotechnology, will acquire competency and learn new practical skills enabling them to increase productivity and allow for transitions into more biotechnology-related fields.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5120	Foundations in Biotechnology	3
BIOT 5220	The Role of Patents in the Biotechnology Industry, Past and Future	1

BIOT 5621	Protein Principles in Biotechnology	3
BIOT 5630	Cell Culture Applications for Biopharmaceuticals	2
BIOT 5750	Molecular Approaches in Biotechnology	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Biotechnology Enterprise, Graduate Certificate (Boston)

The graduate certificate in biotechnology enterprise has been designed in response to a need in the biotechnology industry for individuals with a biotechnology background to obtain a strong foundation in the business aspects of biotechnology. Individuals, particularly those who are working in the field of biotechnology, will improve their business competency enabling them to better manage a team or move into a more business-orientated role.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Courses		
BIOT 5120	Foundations in Biotechnology	3
BIOT 5219	The Biotechnology Enterprise	2
BIOT 5220	The Role of Patents in the Biotechnology Industry, Past and Future	1
BIOT 5225	Managing and Leading a Biotechnology Company	3

Elective

Code	Title	Hours
Complete one elective from the following list:		3
BIOT 5228	Planning and Executing Biotechnology Projects	
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6211	Entrepreneurship: Services and Retail Business Creation	
ENTR 6212	Business Planning for New Ventures	
INTB 6200	Managing the Global Enterprise	
INTB 6212	Cultural Aspects of International Business	
MGSC 6200	Information Analysis	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Biotechnology Regulatory Science, Graduate Certificate (Boston)

This certificate was designed in response to a need in the biotechnology industry for individuals, in particular regulators, to obtain a strong foundation in the science behind good regulatory practice today, specifically in relation to biopharmaceuticals.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5330	Drug Safety and Immunogenicity	3
BIOT 5500	Concepts in Regulatory Science	3
BIOT 5621	Protein Principles in Biotechnology	3
BIOT 6320	Design and Development of Biopharmaceuticals	3
or BIOT 5340	Introduction to Biotherapeutic Approvals	

Program Credit/GPA Requirements

12 total semester hours required
Minimum 3.000 GPA required

Experimental Biotechnology, Graduate Certificate (Boston)

The graduate certificate in experimental biotechnology has been designed in response to a need in the biotechnology industry for individuals without a biotechnology background to obtain a strong foundation in lab-based, hands-on, biotechnology skills. Individuals, particularly those who are working in fields other than biotechnology, will acquire competency and learn new practical lab skills enabling them to increase productivity and transition into more biotechnology-related fields.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5145	Biotechnology Lab Skills	1
BIOT 5219	The Biotechnology Enterprise	2
BIOL 5549	Inventions in Microbial Biotechnology	4
BIOT 6214	Experimental Design and Biostatistics	2
BIOT 7245	Biotechnology Applications Laboratory	3

Program Credit/GPA Requirements

12 total semester hours required
Minimum 3.000 GPA required

Manufacturing and Quality Operations in Biotechnology, Graduate Certificate (Boston)

The graduate certificate in manufacturing and quality operations has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of state-of-the-art biopharmaceutical manufacturing and quality operations. In particular, the focus of this certificate is training the workforce to ensure quality medicines are produced. Individuals, particularly those who are working in the various sectors of biotechnology including basic research of biological systems, discovery, development, and manufacturing of biopharmaceuticals, have an opportunity to improve their competency and learn new practical skills, which enables them to increase productivity and further contribute to their professions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 6300	Pharmaceutical Microbiology	3
BIOT 6310	CGMP Statutes and Regulation	3
BIOT 6320	Design and Development of Biopharmaceuticals	3
BIOT 6340	Sterile Manufacturing Operations	3

Program Credit/GPA Requirements

12 total semester hours required
Minimum 3.000 GPA required

Molecular Biotechnology, Graduate Certificate (Boston)

The graduate certificate in molecular biotechnology has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of state-of-the-art molecular biology techniques and advanced protein structure analysis. Individuals, particularly those who are working in the various sectors of biotechnology including basic research of biological systems, discovery, development and manufacturing of biopharmaceuticals, will improve their competency and learn new practical skills enabling them to increase productivity and further contribute to their professions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5700	Molecular Interactions of Proteins in Biopharmaceutical Formulations	3
BIOT 5750	Molecular Approaches in Biotechnology	3
BIOT 5810	Cutting-Edge Applications in Molecular Biotechnology	3
BIOT 5850	Higher-Order Structure Analytics	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Molecular Biotechnology, Graduate Certificate (Portland)

The graduate certificate in molecular biotechnology has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of state-of-the-art molecular biology techniques and advanced protein structure analysis. Individuals, particularly those who are working in the various sectors of biotechnology including basic research of biological systems, discovery, development and manufacturing of biopharmaceuticals, will improve their competency and learn new practical skills enabling them to increase productivity and further contribute to their professions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5700	Molecular Interactions of Proteins in Biopharmaceutical Formulations	3
BIOT 5750	Molecular Approaches in Biotechnology	3
BIOT 5810	Cutting-Edge Applications in Molecular Biotechnology	3
BIOT 5850	Higher-Order Structure Analytics	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Pharmaceutical Technologies, Graduate Certificate (Boston)

The Graduate Certificate in Pharmaceutical Technologies has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of the stages of drug development, biopharmaceutical development. Individuals, particularly those who are working in the various sectors of biotechnology including basic research of biological systems, discovery, development, and manufacturing of biopharmaceuticals, will improve their competency and learn new practical skills enabling them to increase productivity and further contribute to their professions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5640	Drug Product Processes for Biopharmaceuticals	3
BIOT 5700	Molecular Interactions of Proteins in Biopharmaceutical Formulations	3
BIOT 6320	Design and Development of Biopharmaceuticals	3
CHEM 5550	Introduction to Glycobiology and Glycoprotein Analysis	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Process Science, Graduate Certificate (Boston)

The graduate certificate in process sciences has been designed in response to a need in the biotechnology industry for individuals with an advanced knowledge of the principles and practices of process development of biopharmaceuticals. Individuals, particularly those who are working in the various sectors of biotechnology including basic research of biological systems, discovery, development and manufacturing of biopharmaceuticals, will improve their competency and learn new practical skills enabling them to increase productivity and further contribute to their professions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5560	Bioprocess Fundamentals	3
BIOT 5635	Downstream Processes for Biopharmaceutical Production	3
BIOT 5640	Drug Product Processes for Biopharmaceuticals	3
BIOT 6320	Design and Development of Biopharmaceuticals	3

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Vaccine Development, Graduate Certificate (Boston)

The SARS-CoV-2 pandemic has reemphasized the importance of vaccines in our medical toolkit to prevent the spread of infectious diseases. The Certificate in Vaccine Development explores what vaccines are, how they work (immunization), how regulatory science has evolved in vaccine approvals, and how vaccines are created. This certificate includes three courses specifically focused on the science of vaccines and two courses focusing on cell culture and good manufacturing practices. Credits earned in this certificate may be used to satisfy requirements in the Master of Science in Biotechnology.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
BIOT 5220	The Role of Patents in the Biotechnology Industry, Past and Future	1
BIOT 5630	Cell Culture Applications for Biopharmaceuticals	2
BIOT 5910	Vaccines and Immunization	3
BIOT 5920	Foundations in Vaccine Regulatory Science	3
BIOT 5930	Molecular Tools for Vaccine Design	3

Marine and Environmental Sciences

Website (<http://www.northeastern.edu/mes/>)

Geoffrey C. Trussell, PhD

Professor and Chair

Jonathan H. Grabowski, PhD

Professor and Graduate Program Director

Marine Science Center

781.581.7370

781.581.6076 (fax)

gradmes@northeastern.edu

The PhD in Marine and Environmental Sciences is designed to train high-caliber and independent scientists whose research addresses fundamental and applied ecological and evolutionary questions at local, regional, national, and global scales. This training will include both general and specialized coursework in ecology and evolution, geoscience, sustainability, and marine sciences, with curricular programs providing specialized options tailored to each student's research interests. Students benefit from top-notch research facilities at the Marine Science Center in Nahant and on the main campus in Boston. Graduates of the program are prepared for careers in academia, government agencies, and the private sector.

The PhD in Human Behavior and Sustainability Sciences is a joint program with the Department of Psychology. The program combines training in psychology with the ecological and geophysical sciences to produce boundary-breaking scholars who can accelerate sustainability solutions that are interdisciplinary and transformative. The proposed curriculum integrates degree requirements from existing PhD programs in psychology and marine and environmental sciences (sustainability sciences concentration), with the addition of a set of specialized core courses and integrated cross-disciplinary research training. It also allows students broad latitude in designing their specialty within the parameters of the program.

The Master of Science in Marine Biology, also known as the Three Seas Program, gives students an opportunity to learn in three world-renowned research facilities in New England, the Caribbean, and the Pacific Northwest. In addition to rigorous coursework, the program offers the opportunity for students to formulate research questions, design and conduct critical experiments, and interpret and present results. The 15-month program culminates with an internship in the field and independent research project.

The Master of Science in Environmental Science and Policy is a joint program between the College of Science and the College of Social Sciences and Humanities. The interdisciplinary program aims to prepare the next generation of environmental professionals for dynamic opportunities focused on the science and policy of sustainability and resilience.

The Master of Science in Climate Science and Engineering is offered jointly by the College of Engineering and the College of Science. The program provides training in the fundamental scientific processes that underpin the structure and dynamics of the climate, as well as the engineering strategies and technologies required for decarbonization and adaptation to climate change.

Programs

Doctor of Philosophy (PhD)

- Human Behavior and Sustainability Sciences (p. 1169) (Boston)
- Marine and Environmental Sciences (p. 1165) (Boston)

Master of Science (MS)

- Climate Science and Engineering (p. 520) (Boston)
- Environmental Science and Policy (p. 1174) (Boston)
- Marine Biology (p. 1175) (Boston)

Graduate Certificate

- Sustainability Sciences (p. 1176) (Boston)

Marine and Environmental Sciences, PhD (Boston)

The PhD in Marine and Environmental Sciences (MES) program provides students with advanced course work and training in the concentration areas of marine sciences, geosciences, sustainability sciences, and ecology and evolutionary biology.

Students must pass three examinations during the course of their graduate studies:

1. An oral examination by the student's dissertation committee.
2. A proposal defense presented to the student's dissertation committee that explains the research areas that the student proposes to work in.
3. A defense of the student's written dissertation consisting of a public seminar, public question-and-answer period, and private defense of their work to their dissertation committee. Dissertation committees consist of at least four Northeastern faculty and one external faculty member.

A cumulative GPA of 3.000 is required for graduation. All PhD students are required to have at least two first-authored publications submitted to or accepted in a peer-reviewed journal prior to their defense. The PhD will be awarded following submission of a dissertation, approved by the candidate's dissertation committee, to the College of Science.

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Marine and Environmental Sciences (<https://catalog.northeastern.edu/graduate/science/marine-environmental-sciences/marine-environmental-sciences-ms/>) degree. Note that no students will be admitted directly into the Marine and Environmental Sciences program to pursue a master's degree.

PhD Program Requirements**Bachelor's Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual review
 Dissertation committee
 Qualifying examination
 Dissertation proposal
 Candidacy
 First-author publication
 Dissertation defense

Core Requirements

Code	Title	Hours
Statistics		
Complete one of the following:		4-5
EEMB 5522	Experimental Design Marine Ecology	
ENVR 6500 and ENVR 6501	Biostatistics and Lab for ENVR 6500	
Alternative statistics course as approved by graduate committee		
Research		
Complete the following (repeatable) course twice:		8
EEMB 8984	Research	

Concentration

Complete one of the following concentrations:

- Ecology and Evolutionary Biology (p. 1166)
- Sustainability Sciences (p. 1167)
- Geosciences (p. 1167)

Human Behavior and Sustainability Sciences, PhD (Boston)**Overview**

The persistent failure to integrate the social, behavioral, and cognitive sciences with ecological and geophysical sciences is a critical friction point reducing the viability and effectiveness of sustainability solutions. Therefore, a degree program that combines training in psychology with the ecological and geophysical sciences will produce boundary-breaking scholars who can accelerate sustainability solutions that are robustly informed by the results of scientific research. The proposed curriculum integrates degree requirements from existing PhD programs in psychology and marine and environmental sciences (sustainability sciences concentration), with the addition of a set of specialized core courses and integrated cross-disciplinary research training. It also allows students broad latitude in designing their specialty within the parameters of the program.

The PhD in Human Behavior and Sustainability Sciences program provides students with the following advanced coursework and training. Students must pass two examinations during the course of their graduate studies to achieve candidacy:

1. A qualifying paper that the student will write and present to their dissertation committee.
2. A proposal defense presented to the student's dissertation committee that explains the research areas that the student proposes to work in.

At the end of the program, students will defend their written dissertation, which consists of a public seminar, public question-and-answer period, and private defense of their work to their dissertation committee. Dissertation committees consist of at least four Northeastern University faculty and one external faculty member.

A cumulative grade-point average of 3.000 is required for graduation. The PhD will be awarded following submission of a dissertation, approved by the candidate's dissertation committee, to the College of Science.

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Cross-Disciplinary Science (<https://catalog.northeastern.edu/graduate/science/interdisciplinary/cross-disciplinary-science-ms-bos/>) degree. Note that no students will be admitted directly into the Cross-Disciplinary Science program to pursue a master's degree.

Climate Science and Engineering, MS (Boston)

Overview

The Master of Science in Climate Science and Engineering is offered jointly by the College of Engineering and the College of Science. The program provides training in the fundamental scientific processes that underpin the structure and dynamics of the climate, as well as the engineering strategies and technologies required for decarbonization and adaptation to climate change.

Incoming students will typically hold a bachelor's degree in a science, engineering, or related field. The program is designed to prepare students for climate-facing positions in the public or private sectors and can serve as a springboard for students interested in pursuing doctoral-level research. Students must take at least 12 semester hours of College of Science courses and at least 12 semester hours of College of Engineering courses, which includes a report, thesis, or coursework option.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Student should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Climate Science and Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Climate Science and Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership (p. 738), 12 semester hours of the certificate coursework may be applied to the restricted elective requirements of this program's coursework option. Of the remaining 20 semester hours required by this program, students must take 12 semester hours of College of Science courses (subject codes EEMB and ENVR) and 8 semester hours from College of Engineering courses (subject codes CIVE, EECE, ENSY, MATL, ME, and SBSY).

The Department of Civil and Environmental Engineering encourages students pursuing the Graduate Certificate in Engineering Leadership (p. 738) to complete their MS coursework requirements in their first year and their certificate requirements in their second year. Students who prefer to complete their certificate requirements in their first year are asked to speak with their MS degree advisor in advance.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. In order to ensure a balance of training across science and engineering, students must take at least 12 semester hours of College of Science courses (starting with EEMB, ENVR) and at least 12 semester hours of College of Engineering courses (starting with CIVE, EECE, ENSY, MATL, ME, SBSY) from the core requirements and restricted elective course options.

Core Requirements

Code	Title	Hours
Complete 20 semester hours from the core requirements listed below (any core course not used to meet this core course requirement can be taken as a restricted elective):		20
CIVE 5150 or ENVR 5150	Climate and Atmospheric Change Climate and Atmospheric Change	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5365	Climate Technologies for Decarbonization, Mitigation, and Adaptation	
CIVE 5366	Air Quality Engineering and Science	
CIVE 5670 or ENVR 5670	Global Biogeochemistry Global Biogeochemistry	
CIVE 7110	Critical Infrastructure Resilience	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5800	Climate Adaptation and Nature-Based Solutions	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the restricted electives course list below. (p. 522)		12

REPORT OPTION

Code	Title	Hours
CIVE 7945	Master's Project	4
or EEMB 8984	Research	
Complete 8 semester hours from the restricted electives course list below. (p. 522)		8

THESIS OPTION

Code	Title	Hours
Complete CIVE 7945 and CIVE 7990 for 8 semester hours or complete EEMB 8984 twice for 8 semester hours:		8
CIVE 7945	Master's Project	
and CIVE 7990	and Thesis	
EEMB 8984	Research (Completed twice)	
Complete 4 semester hours from the restricted electives course list below. (p. 522)		4

In addition to completing the thesis course, College of Engineering students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Restricted Electives

Code	Title	Hours
CIVE 5280	Remote Sensing of the Environment	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7282	Coastal and Hydraulic Modeling	
CIVE 7385	Public Transportation	
CIVE 7392	Special Topics in Environmental Engineering	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration	
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
ENVR 5210	Environmental Planning	
ENVR 5220	Ecosystem-Based Management	
ENVR 5563	Advanced Spatial Analysis	
INTL 5100	Climate and Development	
LAW 7634	Energy Law and Policy	
LPSC 7312	Cities, Sustainability, and Climate Change	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
ME 5685	Solar Thermal Engineering	
PPUA 5238	Climate Change and Global Urbanization	
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change	
PPUA 5268	International Environmental Policy	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	

or ENCP 6955

Co-op Work Experience Abroad - Half-Time

or ENCP 6965

Co-op Work Experience Abroad

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Environmental Science and Policy, MS (Boston)

The Master of Science in Environmental Science and Policy program emphasizes a broadly interdisciplinary and synthetic approach that integrates knowledge in the environmental sciences (conservation biology, climate change, fisheries science, ecosystem function, biodiversity, restoration ecology) with the social sciences (policy, economics, sociology, political science, and development) and humanities (environmental history, philosophy, and ethics). The goal of the program is to equip professionals with substantive breadth in knowledge and skills at the intersection of environmental science and policy. The program focuses on training students to think critically about the underlying causes of environmental problems and understanding the reciprocal relationships between coupled human-natural ecosystems and the interconnections between social and technological innovations. The program explores practical approaches and potential solutions that decision makers need to evaluate in policy debates related to promoting environmental sustainability.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Seminars		
PPUA 6101	Environmental Science and Policy Seminar 1	4
ENVR 6102	Environmental Science and Policy Seminar 2	4
Skills Courses		
Complete 2 courses from the following. At least one course needs to be taken from the College of Science Skills Course List and one course from the College of Social Sciences and Humanities Skills Course List.		8
<i>College of Science Skills Course List</i>		
EEMB 5130	Population Dynamics	
EEMB 5522	Experimental Design Marine Ecology	
ENVR 5150	Climate and Atmospheric Change	
ENVR 5210	Environmental Planning	
ENVR 5260	Geographical Information Systems

Marine Biology, MS (Boston)

The MS in Marine Biology provides students the opportunity to study marine biology in three distinct environments at three world-renowned research facilities in New England, the Caribbean, and the Pacific Northwest. An internship in the field and independent research project provide the capstone to the fifteen-month graduate program.

Much more than course work in a classroom, the MS in Marine Biology delivers inquiry-based curriculum in marine science during which our students formulate research questions, design and conduct critical experiments, and interpret and present results. You will have an opportunity not only learn science, you have an opportunity to learn how to do science and become a marine scientist.

This program is for students eager to broaden their knowledge of marine biology or who want to further refine their interests.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Students register for International Study—Three Seas Program (ABRS 5120) for the fall and spring terms of year 1.

Sustainability Sciences, Graduate Certificate (Boston)

Overview

Environmental sustainability challenges are inherently complex and multidisciplinary and will require a workforce capable of collaborating across interdisciplinary teams. Thus, it is critical that the next generation of sustainability scientists and engineers receive broad, interdisciplinary training so that they are better prepared to address these complex challenges. This certificate will provide social science and engineering students with fundamental training in sustainability science.

Mathematics

Website (<https://cos.northeastern.edu/mathematics/>)

Egon Schulte, PhD
Professor and Chair

617.373.2450

Mathematics is of ever-increasing importance to our society and everyday life. It has long been the language of science and technology and provides a rich source of methods for analyzing and solving problems encountered in the physical world. Today, mathematics is essential in virtually all fields of human endeavor including business, the arts, and the social sciences.

PhD students work with internationally recognized faculty in research programs in both pure and applied mathematics. The program is designed to provide students with a broad overview of current mathematics and a strong command of areas of specialization.

The Department of Mathematics also offers Master of Science degrees in mathematics, applied mathematics, operations research, and statistics, as well as a graduate certificate in applied mathematics. These programs prepare students for careers in business, industry, or government. Students pursuing degrees in applied math and operations research take part in Northeastern University's signature co-op program.

In addition to the numerous seminars and colloquia at Northeastern, there are ample opportunities for students in the Boston area to learn about important recent advances in the field.

Mathematics, PhD (Boston)

Course Requirements

Students entering with a bachelor's degree are required to take 48 semester hours of coursework divided between foundational and advanced offerings. Students entering the program will be allowed to place out of some (possibly all) of the six basic-level courses; the graduate coordinator together with the first-year graduate advisor will determine the allowable course substitutions and will advise the student which foundational courses to take. Students may satisfy requirements for Algebra 1 (MATH 5111) and Analysis 1: Functions of One Variable (MATH 5101) by taking qualifying exams in algebra 1 and in analysis 1 at the start of the program. Students may satisfy foundational course requirements if they demonstrate proficiency by passing an assessment exam in the course at the beginning of the semester or by demonstrating that they have taken a similar course and have adequate knowledge of the course material (syllabus and transcript are required; a brief oral examination is also required in that case). Academic advising will happen just before the start of each term and during the add/drop period in order to plan a student's course registration for the term. A complete listing of foundational and advanced courses is available from the Department of Mathematics and the graduate dean's office. Students are not permitted to register for more than two "readings" courses and three "topics" courses for credit toward the degree without explicit permission from the graduate dean. A minimum GPA of 3.000 is required for degree conferral.

Teaching Requirement

Some teaching experience is required while in the program. Students must attend university-led TA training at the start of the program; attend a one-semester TA training course conducted by faculty from the Department of Mathematics teaching committee; spend one semester shadowing faculty in the undergraduate classroom; and perform recitations and grading for the undergraduate course they are shadowing.

Qualifying Exams

Qualifying exam sessions are given once in spring and once in fall. Students will be required to pass four qualifying exams: algebra 1, analysis 1, and two other exams. The possible additional topics for qualifying exams are algebra 2, analysis 2, combinatorics, geometry, ordinary differential equations, partial differential equations, probability, statistics, topology, and algebraic geometry. A qualifying exam may be taken twice by any student. Additional attempts may be allowed at the discretion of the graduate committee with permission from the graduate dean in the College of Science. Two qualifying exams should be passed no later than the end of the second year and all four by the end of the third year.

Doctoral Candidacy

PhD candidacy is reached when all of the following conditions are met:

- Completion of eight advanced courses
- Identification of an unsolved research problem
- Successful passing of four qualifying exams
- Assignment of PhD supervisor and creation of a 1-page initial plan
- Completion of a 3-page plan of research
- Completion of a 10-page progress report and a one-hour defense of proposal, presented to supervisor and three faculty members of graduate committee

Dissertation Requirement

Each candidate must complete a dissertation that embodies the results of extended research and makes an original contribution to the field. This work should give evidence of the candidate's ability to carry out independent investigation and interpret, in a logical manner, the results of the research. There are two stages to this process:

- **Stage 1:** Students in the PhD program must have a dissertation supervisor within two years after joining the PhD program. The department views the failure of a student to find a supervisor within two years of joining the PhD program with concern and considers this sufficient cause to review the student's status in the PhD program. The process of obtaining a dissertation supervisor always involves two choices—the student chooses the supervisor, and the supervisor chooses the student. For this reason, the department does not guarantee a dissertation supervisor for every student, but the department recognizes its responsibility to help the student find a satisfactory match. This aid is usually provided by the student's graduate advisor, who should be familiar with the student's progress in finding a dissertation supervisor. The dissertation supervisor guides the student's further education as well as directs the student's dissertation. The dissertation itself must represent an original solution of a problem in the chosen area of mathematics that makes a significant contribution to the mathematical knowledge in that area. Students must enroll in Dissertation or Dissertation Continuation while fulfilling the dissertation requirements.
- **Stage 2 (dissertation defense):** The final oral examination on the dissertation is held in accordance with university regulations and given by a dissertation committee of four faculty members (three from the university, including the supervisor, and one from outside Northeastern University). The dissertation supervisor should propose this dissertation committee to the graduate committee for its approval at least one month before the PhD dissertation defense.

Program Requirements

Bachelor's Degree Entry

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Four qualifying examinations
Annual review
Teaching requirement
Doctoral candidacy
Dissertation committee
Dissertation proposal
Progress report and presentation
Dissertation defense

Prerequisites

Code	Title	Hours
Algebra and Analysis		
Complete 0–8 semester hours from the following:		0-8
MATH 5101	Analysis 1: Functions of One Variable	
MATH 5111	Algebra 1	

Advanced Coursework

Code	Title	Hours
Complete 32 semester hours from the advanced coursework list. Only two readings and three topics courses are allowed. (p. 1180)		32

Tracks

Complete one of the following three tracks:

- Pure Track (p. 1179)
- Discrete Track (p. 1180)
- Probability and Statistics Track (p. 1180)

Dissertation

Code	Title	Hours
MATH 9990	Dissertation Term 1	
MATH 9991	Dissertation Term 2	

Program Credit/GPA Requirements

48–56 total semester hours required

Minimum 3.000 GPA required

PURE TRACK

Code	Title	Hours
Analysis		
MATH 5102	Analysis 2: Functions of Several Variables	4
Algebra		
MATH 5112	Algebra 2	4
Foundational Courses		
Complete up to 8 semester hours from the following:		0-8
MATH 5122	Geometry 1	
MATH 5352	Quantum Computation and Information	
MATH 7202	Partial Differential Equations 1	
MATH 7203	Numerical Analysis 1	
MATH 7241	Probability 1

MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	
MATH 7346 to MATH 7361		
MATH 7371	Morse Theory	

MATH 7976 to MATH 8986

MATH 9984	Research
Topics	
Only three topics courses are allowed.	
MATH 7362	Topics in Algebra
MATH 7363	Topics in Algebraic Geometry
MATH 7364	Topics in Representation Theory
MATH 7375	Topics in Topology
MATH 7381	Topics in Combinatorics
Readings	
Only two readings courses are allowed.	
MATH 7721	Readings in Topology
MATH 7734	Readings in Algebra
MATH 7735	Readings in Algebraic Geometry
MATH 7736	Readings in Discrete Geometry
MATH 7741	Readings in Probability and Statistics
MATH 7771	Readings in Geometry

Advanced Entry Program Requirements

Course Requirements

Advanced students who enter the PhD program with a master's degree (or equivalent) will be allowed to place out of some (possibly all) of the six basic-level courses; the graduate coordinator together with the first-year graduate advisor will determine the allowable course substitutions and will advise the student which foundational courses to take. Students may satisfy requirements for Algebra 1 (MATH 5111) and Analysis 1: Functions of One Variable (MATH 5101) by taking qualifying exams in algebra 1 and in analysis 1 at the start of the program. Students may satisfy foundational course requirements if they demonstrate proficiency by passing an assessment exam in the course at the beginning of the semester or by demonstrating that they have taken a similar course and have adequate knowledge of the course material (syllabus and transcript are required; a brief oral examination is also required in that case). Academic advising will happen just before the start of each term and during the add/drop period in order to plan a student's course registration for the term. A complete listing of foundational and advanced courses is available from the Department of Mathematics and the graduate dean's office. Students are not permitted to register for more than two "readings" courses and three "topics" courses for credit toward the degree without explicit permission from the graduate dean. A minimum grade-point average (GPA) of 3.000 is required for degree conferral.

Teaching Requirement

Some teaching experience is required while in the program. Students must attend university-led TA training at the start of the program; attend a one-semester TA training course conducted by faculty from the Department of Mathematics teaching committee; spend one semester shadowing faculty in the undergraduate classroom; and perform recitations and grading for the undergraduate course they are shadowing.

Qualifying Exams

Qualifying exam sessions are given once in spring and once in fall. Students will be required to pass four qualifying exams: algebra 1, analysis 1, and two other exams. The possible additional topics for qualifying exams are algebra 2, analysis 2, combinatorics, geometry, ordinary differential equations, partial differential equations, probability, statistics, topology, and algebraic geometry. A qualifying exam may be taken twice by any student. Additional attempts may be allowed at the discretion of the graduate committee with permission from the graduate dean in the College of Science. Two qualifying exams should be passed no later than the end of the second year and all four by the end of the third year.

Doctoral Candidacy

PhD candidacy is reached when all of the following conditions are met:

- Completion of eight advanced courses
- Identification of an unsolved research problem
- Successful passing of four qualifying exams
- Assignment of PhD supervisor and creation of a 1-page initial plan
- Completion of a 3-page plan of research
- Completion of a 10-page progress report and a one-hour defense of proposal, presented to supervisor and three faculty members of graduate committee

Dissertation Requirement

Each candidate must complete a dissertation that embodies the results of extended research and makes an original contribution to the field. This work should give evidence of the candidate's ability to carry out independent investigation and interpret, in a logical manner, the results of the research. There are two stages to this process:

- **Stage 1:** Students in the PhD program must have a dissertation supervisor within two years after joining the PhD program. The department views the failure of a student to find a supervisor within two years of joining the PhD program with concern and considers this sufficient cause to review the student's status in the PhD program. The process of obtaining a dissertation supervisor always involves two choices—the student chooses the supervisor, and the supervisor chooses the student. For this reason, the department does not guarantee a dissertation supervisor for every student, but the department recognizes its responsibility to help the student find a satisfactory match. This aid is usually provided by the student's graduate advisor, who should be familiar with the student's progress in finding a dissertation supervisor. The dissertation supervisor guides the student's further education as well as directs the student's dissertation. The dissertation itself must represent an original solution of a problem in the chosen area of mathematics that makes a significant contribution to the mathematical knowledge in that area. Students must enroll in Dissertation or Dissertation Continuation while fulfilling the dissertation requirements.
- **Stage 2 (dissertation defense):** The final oral examination on the dissertation is held in accordance with university regulations and given by a dissertation committee of four faculty members (three from the university, including the supervisor, and one from outside Northeastern University). The dissertation supervisor should propose this dissertation committee to the graduate committee for its approval at least one month before the PhD dissertation defense.

Applied Mathematics, MS (Boston)

New applications of mathematics are constantly being discovered, and established techniques are being applied in new ways and in emerging fields. Northeastern University's Master of Science in Applied Mathematics caters to students who are looking to enter or who are currently working in a variety of applied math careers such as data science and high-tech firms, computer information and software firms, financial service and investment firms, academic institutions, and research institutes. Northeastern's master's program offers students an opportunity to obtain solid knowledge of mathematical modeling, statistics, and data analysis, as well as excellent programming skills, through experiential learning and co-op experiences from industry.

Students may complete a data science concentration, an operations research concentration, or an electives option. The value of the worldwide Big Data market is growing exponentially. Data science rooted in applied mathematics is essential in exploring Big Data from a wide range of science, businesses, and industries. The operations research concentration offers students study of the analytical and computational skills necessary to enhance efficiency and support decision making across diverse industries such as logistics, finance, and engineering. The electives option allows students to personalize their education with more in-depth knowledge of data science, statistics, or other areas of interest in applied mathematics.

Data Science Concentration

Data science is an interdisciplinary field using techniques and theories drawn from mathematics, statistics, computer science, information science, and related fields to uncover insights hidden in data and to make predictions and decisions. The data science concentration offers students opportunities to learn mathematical modeling, probability, and statistics, which are the theoretical background for data science. Courses in data visualization; machine learning and deep learning; statistical inference; algorithmic, numerical, and computational thinking; experimental design; and coding are also offered. The program offers a multimodal approach including lecture courses, data-driven computer labs, and industry projects. Some courses listed for this program are in collaboration with the College of Engineering and the Khoury College of Computer Sciences.

Operations Research Concentration

The operations research concentration offers students an opportunity to obtain a deep understanding of mathematical modeling and optimization techniques to solve complex operational problems. This concentration emphasizes areas such as decision analysis, stochastic processes, and advanced optimization to prepare students to tackle real-world challenges in fields like supply chain management, finance, and systems engineering. By integrating applied mathematics with problem-solving methodologies, students may gain the analytical and computational skills needed to enhance efficiency and inform decision making in both industry and research settings. Some courses listed for this program are offered in the College of Engineering.

Electives Option

Applications of mathematical modeling and methods are widely involved in different fields such as computer science, engineering, finance, health science, social science, artificial intelligence, etc. The electives option allows students to design their advanced coursework around an area of specific interest, pursue personalized training in applied mathematics, or strengthen an application to a PhD program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Modeling and Linear Algebra		
Complete 4 semester hours from the following:		4

MATH 5110	Applied Linear Algebra and Matrix Analysis	
MATH 5111	Algebra 1	
MATH 5131	Introduction to Mathematical Methods and Modeling	
Probability and Analysis		
Complete 4 semester hours from the following:		4
MATH 5101	Analysis 1: Functions of One Variable	
MATH 7241	Probability 1	
Statistics		
Complete 8 semester hours from the following:		8
MATH 7243	Machine Learning and Statistical Learning Theory 1	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	

Concentrations or Electives Option

A concentration is not required. Students may complete the electives option in lieu of a concentration.

- Data Science (p. 1185)
- Operations Research (p. 1185)
- Electives Option (p. 1186)

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Concentration in Data Science

Code	Title	Hours
No more than 8 semester hours of coursework outside of the MATH subject code may be applied to the requirements of this concentration.		
Core		
Complete 8 semester hours from the following (students may take other Khoury College of Computer Sciences courses not on the list in consultation with their faculty advisor):		8
CS 5800	Algorithms	
CS 6140	Machine Learning	
CS 6220	Data Mining Techniques	
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
DS 5220	Supervised Machine Learning and Learning Theory	
DS 5230	Unsupervised Machine Learning and Data Mining	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
MATH 7243	Machine Learning and Statistical Learning Theory 1	
Electives		
Complete 8 semester hours of courses at the 5000 level or above in the following subject area. See suggested elective course list. (p. 1186)		8
MATH		

Concentration in Operations Research

Code	Title	Hours
No more than 8 semester hours of coursework outside of the MATH subject code may be applied to the requirements of this concentration.		
Core		
Complete 8 semester hours from the following (students may take other College of Engineering courses not on the list in consultation with their faculty advisor):		8
IE 7200	Supply Chain Engineering	
MATH 7207	Algorithms for Optimization	
MATH 7234	Optimization and Complexity	

MATH 7341	Probability 2
OR 6205	Deterministic Operations Research
OR 7230	Probabilistic Operation Research
OR 7235	Inventory Theory
OR 7240	Integer and Nonlinear Optimization
OR 7245	Network Analysis and Advanced Optimization
OR 7270	Convex Optimization and Applications
OR 7310	Logistics, Warehousing, and Scheduling

Electives

Complete 8 semester hours of courses at the 5000 level or above in the following subject area. See suggested elective course list. (p. 1186) 8

MATH

Electives Option

Code	Title	Hours

Complete 16 semester hours in the following subject area. Students may take MATH courses at the 5000 level or above listed in other concentrations or the suggested elective course list. Courses outside of MATH may be chosen with faculty approval. 16

No more than 8 semester hours of coursework outside of the MATH subject code may be applied to requirements of this option.

MATH

Suggested Electives Course List

Code	Title	Hours

Students may complete other MATH courses not listed below and courses outside of MATH in consultation with their faculty advisor.

DS 5110	Essentials of Data Science
EECE 7205	Fundamentals of Computer Engineering
MATH 5352	Quantum Computation and Information
MATH 7203	Numerical Analysis 1
MATH 7205	Numerical Analysis 2
MATH 7207	Algorithms for Optimization
MATH 7223	Riemannian Optimization
MATH 7233	Graph Theory
MATH 7234	Optimization and Complexity
MATH 7339	Machine Learning and Statistical Learning Theory 2
MATH 7341	Probability 2
MATH 7342	Mathematical Statistics
MATH 7344	Regression, ANOVA, and Design

Additional Courses

The following are some theoretical MATH courses usually taken in the PhD program (these may not be offered every academic year):

MATH 5102	Analysis 2: Functions of Several Variables
MATH 5112	Algebra 2
MATH 7202	Partial Differential Equations 1
MATH 7221	Topology 2
MATH 7311	Commutative Algebra
MATH 7315	Algebraic Number Theory
MATH 7320	Modern Algebraic Geometry
MATH 7371	Morse Theory
MATH 7381	Topics in Combinatorics
MATH 7741	Readings in Probability and Statistics
MATH 8450	Research Seminar in Mathematics

Mathematics, MS (Boston)

This program offers students with a bachelor's degree in mathematics or a related field an opportunity to broaden their knowledge in the several fields of mathematics and its applications. The program is designed to prepare graduates for careers in business, industry, or government.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Algebra 1 and Analysis 1		
MATH 5101	Analysis 1: Functions of One Variable	4
MATH 5111	Algebra 1	4
Algebra 2 and Analysis 2		
MATH 5102	Analysis 2: Functions of Several Variables	4
MATH 5112	Algebra 2	4

Electives

Code	Title	Hours
Complete 16 semester hours from the following; no course can be used to satisfy both a requirement and an elective:		16
MATH 5122	Geometry 1	
MATH 7202	Partial Differential Equations 1	
MATH 7203	Numerical Analysis 1	
MATH 7205	Numerical Analysis 2	
MATH 7221	Topology 2	
MATH 7223	Riemannian Optimization	
MATH 7233	Graph Theory	
MATH 7234	Optimization and Complexity	
MATH 7241	Probability 1	
MATH 7243	Machine Learning and Statistical Learning Theory 1	
MATH 7311	Commutative Algebra	
MATH 7321	Topology 3	
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Statistics, MS (Boston)

The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The Master of Science in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouvé College of Health Sciences
- Statistical machine learning—Khoury College of Computer Sciences
- Statistical theory and modeling—College of Science

Students will follow all policies associated with their home college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800 or PHTH 6801	Causal Inference in Public Health Research Causal Inference 1	3-4
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics (p. 188)—Bouvé College of Health Sciences
- Statistical Machine Learning (p. 188)—Khoury College of Computer Sciences
- Statistical Theory and Modeling (p. 188)—College of Science

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses may be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

31 total semester hours required (32 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

CONCENTRATION IN BIostatISTICS (BOUVÉ COLLEGE OF HEALTH SCIENCES)

Code	Title	Hours
Complete 12 semester hours from the following:		12
PHTH 5350	Using SAS in Public Health Research	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6802	Causal Inference 2	
PHTH 6810	Survival Analysis	
PHTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL MACHINE LEARNING (KHOURY COLLEGE OF COMPUTER SCIENCES)

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4
DS 5110	Essentials of Data Science	4

Optional Co-op

CS 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL THEORY AND MODELING (COLLEGE OF SCIENCE)

Code	Title	Hours

Complete 12 semester hours from the following:

12

MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	

Optional Co-op

EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Statistics, MS—Connect (Boston)

The Master of Science in Statistics—Connect program is designed for students from all backgrounds with a BS/BA degree, provided the student has experience with basic calculus and statistics. The first semester of the degree program provides students with the foundational knowledge needed to study successfully alongside direct-entry graduate students. The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The MS in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical Machine Learning—Khoury College of Computer Sciences
- Statistical Theory and Modeling—College of Science

Students will follow all policies associated with their college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Connect Courses

Code	Title	Hours

Students are required to complete 8–10 semester hours from the following unless otherwise determined by the program:

8-10

CS 5001	Intensive Foundations of Computer Science	
MATH 5001	Accelerated Linear Algebra	
MATH 5002	Accelerated Multivariable Calculus	
MATH 5003	Accelerated Probability and Statistics	
MATH 5110	Applied Linear Algebra and Matrix Analysis	

Required Courses

Code	Title	Hours

MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4

PHTH 6800	Causal Inference in Public Health Research	3-4
or PHTH 6801	Causal Inference 1	
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics—Bouv  College of Health Sciences (p. 190)
- Statistical Machine Learning—Khoury College of Computer Sciences (p. 190)
- Statistical Theory and Modeling—College of Science (p. 190)

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses can be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

39-41 total semester hours required (40-42 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

BIostatistics Concentration—Bouv  College of Health Sciences

Code	Title	Hours
Complete 12 semester hours from the following:		12
PHTH 5350	Using SAS in Public Health Research	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6802	Causal Inference 2	
PHTH 6810	Survival Analysis	
PHTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

Optional Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Operations Research, MSOR (Boston)

This program seeks to train students in the basic techniques and theory of operations research and their applications to real-world problems. Graduates should have developed their analytical skills to attack complex, large-scale optimization problems of both a deterministic and stochastic nature. Eight 4-semester-hour graduate courses are required for this degree. Previous course work will be evaluated to determine proficiency in certain content areas and degree plan may be tailored accordingly. In some cases, a student may be required to take an assessment exam to determine content and knowledge proficiency. No course can be used to satisfy both a requirement and an elective. To qualify for degree conferral, a minimum cumulative grade-point average of 3.000, equivalent to a grade of B, must be obtained. Some courses listed for this program are offered in the College of Engineering or the Khoury College of Computer Sciences.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Probability		
Complete 4 semester hours from the following:		4
MATH 7241	Probability 1

Applied Mathematics, Graduate Certificate (Boston)

Large streams of data have brought mathematical modeling to nearly every field and industry. More than ever, a deep understanding of the fundamentals and applications of these models is the differentiator between the success and failure of projects in statistics, machine learning, probabilistic modeling, and optimization. From constructing financial tools and optimizing supply chains, to computer-guided brain surgery and to quantum computing, a foundational understanding of advanced mathematics can give you the tools to create the ideas and technology that will drive the 21st century.

A graduate certificate in applied mathematics gives you the opportunity to study the fundamentals of statistical reasoning, mathematical modeling, and modern mathematical methods in a Tier 1 research department. Shorter than the full master's, the graduate certificate allows you to take up to four courses from the Department of Mathematics. Our courses cover a wide range of topics, from theory courses about the fundamental structures of mathematical objects, to project-based applied courses where students use modeling to solve research-level problems from academic and industry partners.

All applied mathematics courses are taught in the evening to accommodate working students. Mathematics and pure math courses also count toward this certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Modeling		
Complete 4 semester hours from the following:		
MATH 5110	Applied Linear Algebra and Matrix Analysis

Physics PhD and Master of Science students at Northeastern University have the opportunity to explore, discover, and apply the fundamental principles that guide the universe. The program specializes in several subfields that reflect the forefront research activities of the department. These specializations include biological physics, condensed matter physics, elementary particle physics, astrophysics, nanomedicine, nanophysics, quantum science, and network science.

The Department of Physics also offers a Graduate Certificate in Nanomedicine. The certificate is designed for students, engineers, and physicians to develop competency and practical skills in the application of nanotechnology to problems in medicine. This program is appropriate for those working in or seeking careers in biotechnology, pharmaceutical, biomedical, or clinical fields.

Programs

Doctor of Philosophy (PhD)

- Physics (p. 1193) (Boston)
- Physics, PhD—Advanced Entry (p. 1197) (Boston)

Master of Science (MS)

- Applied Physics and Engineering (p. 557) (Boston)
- Complex Network Analysis (p. 166) (Boston)
- Nanomedicine (p. 1205) (Boston)
- Physics (p. 1209) (Boston)

Graduate Certificate

- Nanomedicine (p. 1211) (Boston)

Physics, PhD (Boston)

The Department of Physics offers a Doctor of Philosophy in Physics with specializations in different subfields that reflect the forefront research activities of the department including biological physics, condensed matter physics, elementary particle physics, astrophysics, nanomedicine, and network science. The program for the PhD degree consists of the required coursework, the proficiency exams, a preliminary research seminar, the completion of a dissertation based upon original research performed by the student, and a dissertation defense upon completion of the dissertation. Based on these measures, students are expected to obtain a graduate-level understanding of basic physics concepts and demonstrate the ability to formulate a research plan, communicate orally, and do research.

Entrance with a Bachelor's Degree

COURSEWORK

The required courses are grouped into two sets, Part 1 and Part 2, having a total of 42 semester hours as a minimum. Part 1 courses (first-year courses) are taken prior to the proficiency exam. Students without a master's degree must complete all Part 1 courses in the first year to remain in good academic standing in the graduate program. Part 2 courses (second-year courses) may be taken before or after passing the proficiency exam.

See Core Course Requirements and Program of Study for course details. Students with a master's degree should see Advanced Entry Program Requirements.

GRADE REQUIREMENTS

The minimum grade required for the successful completion of the Part 1 courses is a B (3.000) average. Students will only be allowed to take the proficiency exam if they fulfill this requirement. The minimum grade required for the successful completion of Part 2 (excluding advanced research)

is at least a B (3.000) average for the Part 2 courses. The Part 2 courses, including any makeup of grade-point-average deficiencies (see following), must be completed within two calendar years of passing the proficiency exam. The department expects students to complete the bulk of these courses in the first year after the proficiency exam. The cumulative average will be calculated each semester. No more than two courses or 8 semester hours of credit, whichever is greater, may be repeated in order to satisfy the requirement for the PhD degree. A student who does not maintain a 3.000 cumulative average for two consecutive semesters, or is otherwise not making satisfactory progress toward the PhD degree requirements, may be recommended for termination at the discretion of the graduate committee. Within the above limitations, a required course for which a grade of F is received must be repeated with a grade of C or better and may be repeated only once. In calculating the overall cumulative average, all graduate-level coursework completed at the time of clearance for graduation will be counted.

PROFICIENCY EXAM REQUIREMENT

A student who fails to achieve the required B average for the Part 1 courses must petition the graduate committee in order to remain in the graduate program and be eligible to take the proficiency exam. All students registered in the PhD program are required to pass a written proficiency exam, unless they are granted an exemption (see below).

The proficiency exam consists of four parts, which are based on the first-year courses. An exemption for each part is granted if a B, or higher, is earned in the corresponding course (listed below in parentheses). Exam exemptions are only granted based on courses taken at Northeastern University.

- Classical Mechanics and Mathematical Methods (Classical Mechanics/Math Methods (PHYS 7301))
- Electricity and Magnetism (Electromagnetic Theory (PHYS 7302))
- Statistical Mechanics (Statistical Physics (PHYS 7305))
- Quantum Mechanics (Quantum Theory 2 (PHYS 7316))

The proficiency exam is given twice yearly: once prior to the start of the fall semester and again within the first two weeks of the start of the spring semester. Each part consists of a three-hour written exam, and no student will be required to take multiple parts on the same day.

All students enrolled in the PhD program must take the fall proficiency exam after completing their first-year course of study with the required GPA unless they are granted a waiver. Unless exempted, students taking the exam for the first time must take all parts. A student who does not pass the exam on their first attempt must pass the exam the next time it is given in order to continue in the PhD program. Any part passed on the first attempt does not need to be repeated.

PHD CANDIDACY

Degree candidacy is established when the student has passed (or exempted) the proficiency examination and completed both the Part 1 and Part 2 course requirements. PhD candidacy may be achieved before completion of the advanced elective if the elective in the student's specialization is not offered in a given year. The elective must be taken at the next opportunity. PhD degree candidacy is certified by the college. A maximum of five years after the establishment of doctoral degree candidacy is allowed for the completion of degree requirements.

PhD Dissertation Requirement

All PhD students are required to complete a dissertation based upon new and original research in one of the three following options:

- In one of the current theoretical or experimental research programs in the department, under direct supervision of an advisor from the Department of Physics. A dissertation committee will be formed consisting of the advisor; two full-time members of the department; and an additional member, either from within the department or from an outside department or institution.
- In a recognized interdisciplinary field involving another research area of the university, under the direct supervision of a faculty member in that field. In this case, an interdisciplinary committee is formed under the approval of the graduate committee, consisting of the direct supervisor, a departmental advisor, one other member of the department, and an additional member of either the department or the external department.
- In an area of applied research in one of the industrial or high-technology laboratories associated with the department's industrial PhD program. The direct supervisor is associated with the institution where the research is performed. In this case, a dissertation advisory committee is established by the graduate committee, consisting of the direct supervisor, the departmental advisor, and two other members of the department.

PhD students must select their departmental advisor no later than the end of the spring semester of their second year or their second semester after having passed the proficiency examination, whichever comes first. This process should start as soon as the student has identified a field of research or has passed the proficiency exam.

PHD DISSERTATION COMMITTEE, PRELIMINARY THESIS PROPOSAL, AND PRELIMINARY RESEARCH SEMINAR

By the end of the spring semester of the third year or the second semester in which the student is enrolled for PhD dissertation, whichever comes first, each PhD student must have an approved dissertation committee and thesis proposal.

The student (with the aid and approval of their thesis advisor) will submit a PhD thesis proposal to the graduate committee clearly outlining a plan to carry out new and original research in the context of previously published research in the scientific literature and also describe the methodologies to be employed. The thesis proposal is limited to 15 pages or less, including references. A proposed makeup of the dissertation committee will be submitted at the same time.

The graduate committee will evaluate the merit of the proposal and make recommendations for improvements when necessary, including any changes to the composition of the dissertation committee. No more than two submissions for a particular proposal may be made. In the case where a revised

proposal does not meet a minimum academic standard that provides a basis for making such improvements, the graduate committee may instruct the student to select a different thesis topic or advisor.

After approval by the graduate committee, the proposal is circulated to the general faculty for comments. If the graduate coordinator receives any objections, the proposal will be referred back to the graduate committee for final resolution.

After the proposal and dissertation committee have been approved, the student will make a public presentation of the material in the preliminary research seminar before the dissertation committee in a format open to the full department and advertised one week in advance. The dissertation committee will then meet in closed session to evaluate the seminar. The preliminary research seminar must take place no later than the semester after the thesis proposal is approved and, normally, in the same semester.

In the event that the dissertation advisor is changed, a new committee must be formed, with the approval of the graduate committee, and a new preliminary research seminar given.

PHD DISSERTATION DEFENSE

The dissertation defense consists of a public presentation, followed by a question period conducted by the dissertation committee and limited to them and the department faculty. The date of the dissertation presentation must be publicized and a copy of the thesis deposited with the graduate program coordinator at least one week prior to the defense. If during this posting period or in the two business days following the defense a written objection to the thesis is lodged with the department chair by a member of the faculty, the chair may appoint an ad hoc postdefense review committee to provide advice on the scientific issues raised by the objection. Students should note that they must be registered for Dissertation or Dissertation Continuation during the semester in which they defend their dissertation and that they should schedule their defenses well in advance of the end of the semester in order to accommodate the review/waiting period and the time required to deposit the thesis.

The final dissertation defense is held in accordance with the College of Science regulations.

PhD Specialization Options

Students choose a specialization in biological physics; particle physics; condensed matter physics; or, with preapproval of a faculty member, in the following areas: nanomedicine or network science.

Multiple specializations are allowed if the individual requirements for each specialization are met.

Note that the specialization will not appear on the degree diploma or on the official transcript but can be listed as the field of study on CVs and grant proposals.

Transfer Credit

Students must petition in writing through the graduate committee to the director of graduate student services for all transfer credit. A copy of an official transcript must be attached to the Request for Transfer Credit form. A maximum of 9 semester hours of credit obtained at another institution may be accepted toward the PhD degree provided that the credits transferred consist of a grade of B or better, are graduate-level courses, have been earned at an accredited institution, and have not been used toward any other degree. Grades are not transferred.

Course Waivers

Course waivers may be accepted toward the PhD degree course requirements, though they will not change the number of credits required for the program. The student must have received a B grade or better in equivalent graduate-level core courses that have been earned at an accredited institution. Students must petition in writing to the graduate committee for all course waivers and provide documentation in the form of official transcripts to support their petition.

Residence Requirement

The residence requirement is satisfied by at least one year of full-time graduate work (i.e., enrollment in PhD Dissertation, for two consecutive semesters). Students must be continually enrolled throughout the pursuit of the dissertation.

Internship Option

A PhD candidate may spend one year in a participating high-technology, industrial, or government laboratory immediately after passing the PhD proficiency examination. In this program, the student is expected to remain in touch with the university by taking one course per semester at the university and by frequent contact with a faculty advisor. After the one-year paid internship, the student returns to the university to do the dissertation. Eligibility for this program is contingent on acceptance both by the department and by the external laboratory.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Physics, PhD—Advanced Entry (Boston)

The Department of Physics offers a Doctor of Philosophy in Physics with specializations in different subfields that reflect the forefront of research activities of the department including biological physics, condensed matter physics, elementary particle physics, nanomedicine, and network science. The program for the PhD degree consists of the required coursework, a proficiency examination, a preliminary research seminar, the completion of a dissertation based upon original research performed by the student, and a dissertation defense upon completion of the dissertation. Based on these

measures, students are expected to obtain a graduate-level understanding of basic physics concepts and demonstrate the ability to formulate a research plan, communicate orally a research plan, and conduct and present independent research.

Coursework

Students entering with a master's degree from a U.S. institution in physics or a related area approved by the department will be required to take 10 semester hours of courses. The courses will be determined by the graduate director based on the student's transcripts. Students entering with a MS degree awarded by an institution outside the United States will need to consult the graduate director for a transcript evaluation to determine required coursework and course waivers.

Grade Requirements

The minimum grade required is a B (3.000) average. A student who does not maintain a 3.000 cumulative average for two consecutive semesters, or is otherwise not making satisfactory progress toward the PhD degree requirements, may be recommended for termination at the discretion of the graduate committee.

Proficiency Exam Requirement

All students registered in the PhD program are required to pass a written proficiency exam, unless they are granted a waiver (see below). Students who enter with a master's degree from a U.S. institution may take any/all parts of the exam, at the first opportunity upon entering the program in the fall. In this case, the exam will count as a first attempt only if the student submits the exam to the examiner.

The proficiency exam consists of four parts, which are based on the first-year courses. A waiver for each part is granted if a B, or higher, is earned in the corresponding course (listed below in parentheses). Exam waivers are only granted based on courses taken at Northeastern University.

- Classical Mechanics/Math Methods (PHYS 7301)
- Electromagnetic Theory (PHYS 7302)
- Statistical Physics (PHYS 7305)
- Quantum Theory 2 (PHYS 7316)

The proficiency exam is given twice yearly: once prior to the start of the fall semester and again within the first two weeks of the start of the spring semester. Each part consists of a three-hour written exam, and no student will be required to take multiple parts on the same day.

All students enrolled in the PhD program must take the fall proficiency exam after completing their first-year course of study with the required grade-point average unless they are granted a waiver. Unless waived, students taking the exam for the first time must take all parts. A student who does not pass the exam on their first attempt must pass the exam the next time it is given in order to continue in the PhD program. Any part passed on the first attempt does not need to be repeated.

PhD Candidacy

Degree candidacy is established when the student has passed the proficiency examination and completed 10 semester hours of courses. PhD degree candidacy is certified by the college. A maximum of five years after the establishment of doctoral degree candidacy is allowed for the completion of degree requirements.

PhD Dissertation Requirement

All PhD students are required to complete a dissertation based upon new and original research in one of the three following options:

- In one of the current theoretical or experimental research programs in the department, under direct supervision of an advisor from the Department of Physics. A dissertation committee will be formed consisting of the advisor; two full-time members of the department; and an additional member, either from within the department or from an outside department or institution.
- In a recognized interdisciplinary field involving another research area of the university, under the direct supervision of a faculty member in that field. In this case, an interdisciplinary committee is formed under the approval of the graduate committee, consisting of the direct supervisor, a departmental advisor, one other member of the department, and an additional member of either the department or the external department.
- In an area of applied research in one of the industrial or high-technology laboratories associated with the department's industrial PhD program. The direct supervisor is associated with the institution where the research is performed. In this case, a dissertation advisory committee is established by the graduate committee, consisting of the direct supervisor, the departmental advisor, and two other members of the department.

PhD students must select their departmental advisor no later than the end of the spring semester of their second year or their second semester after having passed the proficiency examination, whichever comes first. This process should start as soon as the student has identified a field of research or has passed the proficiency exam.

PhD Dissertation Committee, Preliminary Thesis Proposal, and Preliminary Research Seminar

By the end of the spring semester of the third year or the second semester in which the student is enrolled for PhD dissertation, whichever comes first, each PhD student must have an approved dissertation committee and thesis proposal.

The student (with the aid and approval of their thesis advisor) will submit a PhD thesis proposal to the graduate committee clearly outlining a plan to carry out new and original research in the context of previously published research in the scientific literature and also describe the methodologies

to be employed. The thesis proposal is limited to 15 pages or less, including references. A proposed makeup of the dissertation committee will be submitted at the same time.

The graduate committee will evaluate the merit of the proposal and make recommendations for improvements when necessary, including any changes to the composition of the dissertation committee. No more than two submissions for a particular proposal may be made. In the case where a revised proposal does not meet a minimum academic standard that provides a basis for making such improvements, the graduate committee may instruct the student to select a different thesis topic or advisor.

After approval by the graduate committee, the proposal is circulated to the general faculty for comments. If the graduate coordinator receives any objections, the proposal will be referred back to the graduate committee for final resolution.

After the proposal and dissertation committee have been approved, the student will make a public presentation of the material in the preliminary research seminar before the dissertation committee in a format open to the full department and advertised one week in advance. The dissertation committee will then meet in closed session to evaluate the seminar. The preliminary research seminar must take place no later than the semester after the thesis proposal is approved and, normally, in the same semester.

In the event that the dissertation advisor is changed, a new committee must be formed, with the approval of the graduate committee, and a new preliminary research seminar given.

PhD Dissertation Defense

The dissertation defense consists of a public presentation, followed by a question period conducted by the dissertation committee and limited to them and the department faculty. The date of the dissertation presentation must be publicized and a copy of the thesis deposited with the graduate program coordinator at least one week prior to the defense. If during this posting period or in the two business days following the defense a written objection to the thesis is lodged with the department chair by a member of the faculty, the chair may appoint an ad hoc postdefense review committee to provide advice on the scientific issues raised by the objection. Students should note that they must be registered for Dissertation or Dissertation Continuation during the semester in which they defend their dissertation and that they should schedule their defenses well in advance of the end of the semester in order to accommodate the review/waiting period and the time required to deposit the thesis.

The final dissertation defense is held in accordance with the College of Science regulations.

Residence Requirement

The residence requirement is satisfied by at least one year of full-time graduate work (i.e., enrollment in PhD Dissertation, for two consecutive semesters). Students must be continually enrolled throughout the pursuit of the dissertation.

Internship Option

A PhD candidate may spend one year in a participating high-technology, industrial, or government laboratory immediately after passing the PhD proficiency examination. In this program, the student is expected to remain in touch with the university by taking one course per semester at the university and by frequent contact with a faculty advisor. After the one-year paid internship, the student returns to the university to do the dissertation. Eligibility for this program is contingent on acceptance both by the department and by the external laboratory.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Coursework
 Proficiency examinations (completed or waived)
 Annual review
 Candidacy
 Preliminary research seminar proposal with proposed dissertation committee
 Preliminary research seminar talk
 Dissertation defense

Core Requirements

Code	Title	Hours
Complete 10 semester hours of coursework. The courses required will be determined by the graduate program director based on the student's transcripts. ¹		10

Dissertation

Code	Title	Hours
PHYS 9990	Dissertation Term 1	
PHYS 9991	Dissertation Term 2	
Complete the following (repeatable) course until graduation:		
PHYS 9996	Dissertation Continuation	

Program Credit/GPA Requirements

10 total semester hours required

Minimum 3.000 GPA required

¹ Methods for Teaching in the Introductory Physics Laboratory 1 (PHYS 7220) is required for students awarded a teaching assistantship.

Applied Physics and Engineering, MS (Boston)

The combined MS program in applied physics and engineering allows graduate students to receive training in one of three concentrations of the electrical and computer engineering department while also receiving fundamental graduate-level physics training that is relevant to that area.

Thesis Option

Students may register for an additional two semesters of thesis work. Depending on the affiliation of the thesis advisor, students may register for Thesis (PHYS 7990) for a total of 8 semester hours or 4 semester hours of Master’s Project (EECE 7945) followed by 4 semester hours of Thesis (EECE 7990). Thesis credits cannot be substituted for any of the coursework listed above. This option requires a total of 40 semester hours for the master’s degree. A thesis committee is composed of an advisor and two faculty members from physics or electrical engineering.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Concentrations

Complete one of the following concentrations:

- Analysis, Modeling, and Computation (p. 558)
- Electromagnetics, Plasma, and Optics (p. 558)
- Microsystems, Materials, and Devices (p. 559)

Optional Thesis

Code	Title	Hours
Select one of the following options based on the college affiliation of the thesis advisor. Thesis coursework will not be applied to other requirements of this degree program. Completion of this thesis option requires a total of 40 semester hours to earn the degree:		8

Option 1 (College of Science thesis advisor)		
PHYS 7990	Thesis (completed twice over two semesters)	
Option 2 (College of Engineering thesis advisor)		
EECE 7945	Master’s Project	
EECE 7990	Thesis	

Program Credit/GPA Requirements

32 total semester hours required (40 with optional thesis)

Minimum 3.000 GPA required

ANALYSIS, MODELING, AND COMPUTATION		
Code	Title	Hours

Complex Network Analysis, MS (Boston)

Complex network analysis is the quantitative study of interconnected systems that influence every aspect of our lives—from where we get our news and who we share ideas with, to how we travel and the people we interact with, to the products we purchase and the foods we eat. Networks are ubiquitous across natural and human-made systems, and their structure and dynamics can explain and help improve the greatest challenges of the next century such as pandemics, food scarcity, cultural polarization, and climate change. Expertise in the emerging field of complex network analysis, within the landscape of the rapid growth of artificial intelligence and machine learning, forms the foundation of the next generation of thought leaders. Northeastern University leads the way in this burgeoning field, offering a unique master's degree program in complex network analysis methodologies. The program is designed to equip students with the conceptual and analytical tools needed to find patterns of connections in networked systems and apply these techniques in real-world settings. The curriculum includes industry-aligned concentration areas of focus, enabling graduates to apply complex network analysis skills in impactful careers in the public and private sectors as well as in research. The concentrations for this program correspond directly to the following industry sectors:

1. Public health and life sciences fields such as epidemiological modeling, public policy, and behavioral research
2. Social or urban science and research fields such as urban planning, social network research, economics, education, criminal science, or public policy
3. Finance or technological fields such as financial analytics, market research, or network analysis for business
4. Biological systems modeling used across research and industry including network biology, drug discovery, or multi-omics mining

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Complex Biological Networks—College of Science
- Complex Social Systems—College of Social Sciences and Humanities
- Economic and Technological Networks—Khoury College of Computer Sciences
- Population Health Dynamics—Bouv  College of Health Sciences

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CNET 5050	Fundamentals of Complex Networks	4
CNET 5051	Analyzing Complex Network Data	4
CNET 5052	Advanced Tools for Complex Network Analysis	4
CNET 5901	Visualizing Complex Networks	2
CNET 5902	Communicating Network Data	2

Concentrations

Complete one of the following concentrations:

- Complex Biological Networks (p. 167)—College of Science
- Complex Social Systems (p. 168)—College of Social Sciences and Humanities
- Economic and Technological Networks (p. 168)—Khoury College of Computer Sciences
- Population Health Dynamics (p. 169)—Bouv  College of Health Sciences

Experiential Courses

Code	Title	Hours
Complete a total of 4 semester hours from the following (course may be repeated):		4
CNET 6107	Complex Network Analysis Research Rotation	

CNET 6108	Complex Network Analysis Capstone
CNET 6990	Thesis

Optional Co-op

Code	Title	Hours
CNET 6000	Professional Development for Co-op	1
CNET 6964	Co-op Work Experience	0

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Additional hours may be required based on student choice of courses or concentration.

One semester hour of additional coursework is required for participation in co-op.

Minimum 3.000 GPA required

CONCENTRATION IN COMPLEX BIOLOGICAL NETWORKS—COLLEGE OF SCIENCE

Code	Title	Hours

A minimum of 16 semester hours is required to complete this concentration.

Required

CNET 5515	Complex Network Analysis for Biological Systems	4

Complete 8 semester hours from the following:		8

BINF 6308	Bioinformatics Computational Methods 1	
BINF 6310	Introduction to Bioinformatics	
EEMB 5130	Population Dynamics	
ENVR 5450	Applied Social-Ecological Systems Modeling	
MATH 5131	Introduction to Mathematical Methods and Modeling	
MATH 7340	Statistics for Bioinformatics	
PHYS 5211	Introduction to Scientific Computing	

Complete 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4

CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5411	Financial and Economic Networks	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN COMPLEX SOCIAL SYSTEMS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours

A minimum of 13 semester hours is required to complete this concentration.

Required

CNET 5314	Complexity in Social Systems	3

Complete a minimum of 6 semester hours from the following:		6

CNET 5311	Physical and Digital Human Traces	
CNET 5360	Research Design for Social Networks	
INSH 5301	Introduction to Computational Statistics	
INSH 6101	Agent-Based Modeling for Applied and Social Sciences	
INSH 6300	Research Methods in the Social Sciences	
INSH 6304	Modeling and Analyzing Social Networks	
INSH 6406	Analyzing Complex Digitized Data	
INSH 6500	Statistical Analysis	
PHYS 5211	Introduction to Scientific Computing	
PPUA 5262	Big Data for Cities	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	

Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section): **4**

CNET 5126	Spreading on Networks: From Epidemics to Memes
CNET 5411	Financial and Economic Networks
CNET 5515	Complex Network Analysis for Biological Systems
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

CONCENTRATION IN ECONOMIC AND TECHNOLOGICAL NETWORKS—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours

A minimum of 14 semester hours is required to complete this concentration.

Required

CNET 5411	Financial and Economic Networks	3

Complete a minimum of 7 semester hours from the following: **7**

CS 7150	Deep Learning
CS 7200	Statistical Methods for Computer Science
DS 5220	Supervised Machine Learning and Learning Theory
DS 5230	Unsupervised Machine Learning and Data Mining
MISM 6212	Data Mining and Machine Learning for Business
PHYS 5211	Introduction to Scientific Computing

Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section): **4**

CNET 5126	Spreading on Networks: From Epidemics to Memes
CNET 5314	Complexity in Social Systems
CNET 5515	Complex Network Analysis for Biological Systems
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

CONCENTRATION IN POPULATION HEALTH DYNAMICS—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours

A minimum of 14 semester hours is required to complete this concentration.

Required

CNET 5126	Spreading on Networks: From Epidemics to Memes	4

Complete a minimum of 6 semester hours from the following: **6**

BINF 6308	Bioinformatics Computational Methods 1
PHTH 5210	Biostatistics in Public Health
PHTH 6210	Applied Regression Analysis
PHTH 6224	Social Epidemiology
PHTH 6440	Advanced Methods in Biostatistics
PHTH 6800	Causal Inference in Public Health Research
PHTH 6801	Causal Inference 1
PHYS 5211	Introduction to Scientific Computing

Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section): **4**

CNET 5314	Complexity in Social Systems
CNET 5411	Financial and Economic Networks
CNET 5515	Complex Network Analysis for Biological Systems
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

Nanomedicine, MS (Boston)

Overview

The Master of Science in Nanomedicine is a flexible, interdisciplinary, industry-aligned professional master's degree program. It is designed for scientists, engineers, and clinicians who want to develop competencies and skills in nanomedicine research, innovation, and commercialization. Our students receive hands-on training in nanomedicine challenges and opportunities, research tools and techniques, and translation from bench to bedside. The curriculum integrates immersive individual and team-based research projects with a full-time industry co-op or laboratory experience to prepare graduates for high-demand research and entrepreneurship roles in biotechnology, pharmaceutical, biomedical, and healthcare industries.

This two-year, full-time master's program consists of eight core courses and year-round professional seminars. In year two, students tailor their curriculum by selecting a concentration and at least one experiential learning opportunity. A reflection capstone course is taken concurrently with co-op or during the final semester of study. Students seeking additional course and co-op flexibility may substitute an electives only program plan in place of a concentration.

Concentration in Nanoformulation Research

The nanoformulation research concentration integrates nanoparticle design, formulation, characterization, and translation. Students gain experience in nanomedicine theory, materials and methods, advanced laboratory techniques, and state-of-the-art instrumentation through a combination of expert-led lectures, instrument demonstrations, and collaborative interdisciplinary project-based laboratory experiences. Students have an opportunity to acquire research and project management skills for roles in research, development, and manufacturing.

Concentration in Translation and Commercialization

The translation and commercialization concentration studies scientific discovery, business, and management from the perspective of delivering nanomedicine products to patients. Students build real-world knowledge and skills in innovation, business development, and regulatory affairs—from initial discovery and research and development to FDA approval and launch—through a combination of case studies, industry-mentored projects, and creation of a virtual startup company.

Concentration in Vaccine Development Concentration

Innovations in nanoparticle-based vaccine delivery during the SARS-CoV-2 pandemic have fundamentally changed the way we develop and test vaccines. The vaccine development concentration provides training in scientific, business, and regulatory principals of vaccine research and development. Students integrate molecular tools for vaccine design, knowledge of vaccine-tissue interactions, and best practices for biopharmaceutical cell culture and manufacturing to develop the industry-aligned skills needed at the forefront of vaccine development.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
EESC 6500	Pathways to Professional Success	1
NNMD 5270	Foundations in Nanomedicine: Therapeutics	3
NNMD 5271	Foundations in Nanomedicine: Diagnostics	3
NNMD 5310	Bioethics in the Age of Artificial Intelligence	1
NNMD 5570	Preclinical and Clinical Study Design	3
NNMD 6272	Professional Nanomedicine Seminar	0
PHSC 5560	Nanotoxicity	3
PHSC 6214	Experimental Design and Biostatistics	2
or BIOT 6214	Experimental Design and Biostatistics	
Experiential Learning and Reflection		
NNMD 7500	Reflection Capstone	0
Complete at least one of the following (credit-bearing courses chosen to fulfill this requirement will also be applied to the elective requirements of this program):		
EESC 6954	Co-op Work Experience - Half-Time	
EESC 6964	Co-op Work Experience	
EESC 6965	Co-op Work Experience Abroad	
NNMD 6370	Nanomedicine Experiential Capstone	
NNMD 6984	Independent Research	

Concentration or Electives Option

A concentration is not required. Students may complete electives in lieu of a concentration.

- Nanoformulation Research (p. 1206)
- Translation and Commercialization (p. 1206)
- Vaccine Development (p. 1206)
- Electives Option (p. 1206)

Program Credit/GPA Requirements

34 total semester hours required

Minimum 3.000 GPA required

CONCENTRATION IN NANOFORMULATION RESEARCH

ELECTIVES OPTION

This year 2 sample plan of study shows how a student might combine electives with multiple hands-on experiential learning alternatives to co-op.

Fall	Hours	Spring	Hours
NNMD 5370		4 NNMD 6984	4
NNMD 6370		4 NNMD 7500	0
NNMD 6272		0 Elective	3
		Elective	3
		8	10

Total Hours: 18

- * Co-op is not required. Students may substitute an experiential learning course from the electives list during year 2 to satisfy the experiential learning requirement.

Physics, MS (Boston)

The Department of Physics offers a Master of Science degree with several options. The standard physics MS can be earned by taking a specified set of courses without an MS thesis. Alternatively, an MS thesis may substitute for 8 semester hours of coursework. Both of these options may be pursued either full time or part time. Upon completion of the MS degree in physics, students should be able to apply graduate-level knowledge and solve problems in the areas of electrodynamics, quantum mechanics, classical mechanics, statistical mechanics, and advanced mathematical methods.

Grade Requirements

To qualify for the MS degree, a cumulative average of 3.000, equivalent to a grade of B, must be obtained. No more than two courses or 6 semester hours of credit, whichever is greater, may be repeated in order to satisfy the requirements for the MS degree. A student who does not maintain a 3.000 cumulative average for two consecutive semesters, or is otherwise not making satisfactory progress toward the MS degree requirements, may be recommended for termination at the discretion of the graduate committee.

Within the above limitations, a required course for which a grade of F is received must be repeated with a grade of C or better and may be repeated only once. Elective courses in which an F has been received may be repeated once to obtain a C or better.

Transfer Credit

Students must petition, in writing, through the graduate committee to the director of graduate student services for all transfer credit. An official transcript must be attached to the Request for Transfer Credit form. A maximum of 9 semester hours of credit obtained at another institution may be accepted toward the MS degree provided that the credits transferred consist of a grade of B or better in graduate-level courses and have not been used toward any other degree. Grades are not transferred.

Current MS Students Interested in the PhD Program

Physics MS students interested in applying to the Physics, PhD (p. 1193) program must submit a complete application for admission.

Special Student Status

Special students are allowed to earn credit for a maximum of 12 semester hours. Students interested in taking more than 12 semester hours must make a formal application to the degree program online.

Coursework

The MS degree requires successful completion of a minimum of 32 semester hours of coursework. There are three options for the MS degree:

The first option is the standard physics MS without an MS thesis, requiring a minimum of 32 semester hours of coursework.

The second option is the standard physics MS with an MS thesis, requiring a minimum of 1 semester hour of thesis. Up to 8 semester hours of thesis can substitute for coursework.

The third option is the physics MS with thesis and specialization in applied physics, engineering physics, biophysics, chemical physics, material physics, mathematical physics, and computational physics.

Graduate students desiring the MS with thesis option should arrange a thesis with a faculty advisor. The thesis must demonstrate the individual's capacity to execute independent work based on original material. The thesis must be approved by the graduate committee. The thesis may be completed in one semester (e.g., summer semester) or in consecutive semesters. Students who have not completed their thesis after the required number of thesis credits must register for Thesis Continuation until the thesis is approved by the graduate school and submitted electronically to Proquest.

The degree requires a minimum of 32 semester hours of graduate credit. The 32 semester hours may include up to 9 semester hours of transfer credit, as approved by the department's graduate committee and the graduate school.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Computational Coursework		
PHYS 7301	Classical Mechanics/Math Methods	4
PHYS 7305	Statistical Physics	4
PHYS 7321	Computational Physics	4

Theory Coursework

PHYS 7302	Electromagnetic Theory	4
PHYS 7315	Quantum Theory 1	4
PHYS 7316	Quantum Theory 2	4

Options

- Coursework (p. 1210)
- Thesis (p. 1210)
- Thesis with specialization (p. 1210)¹

COURSEWORK OPTION

Note: In consultation with your faculty advisor, you may choose an area of specialization from physics, engineering, chemistry, biology, mathematics, psychology, or computer science. Elective courses from the Physics, PhD (p. 1193) program may substitute for these electives with advisor approval.

Code	Title	Hours
Electives		
Complete 8 semester hours from the following:		8
PHYS 5113	Particle Physics	
PHYS 5116	Network Science 1	
PHYS 5117	Advanced Astrophysics Topics	
PHYS 5118	General Relativity and Cosmology	
PHYS 5125	Advanced Quantum Mechanics	
PHYS 5260	Introduction to Nanoscience and Nanotechnology	
PHYS 5318	Principles of Experimental Physics	
PHYS 7322	Nonequilibrium Physics	
PHYS 7323	Elementary Particle Physics	
PHYS 7324	Condensed Matter Physics	
PHYS 7325	Quantum Field Theory 1	
PHYS 7731	Physics of Biological Processes and Living Systems 1	

THESIS

Code	Title	Hours
Complete 8 semester hours from the following:		8
PHYS 7990	Thesis (In consultation with your faculty advisor, any remaining semester hours may be completed with electives.)	

In consultation with your faculty advisor, any remaining semester hours may be completed with electives.

THESIS WITH SPECIALIZATION¹

Applied physics, engineering physics, biophysics, chemical physics, materials physics, mathematical physics, or computational physics.

Code	Title	Hours
Complete a minimum of 12 semester hours from the following:		12
PHYS 7990	Thesis (A minimum of 1 semester hour is required and up to 8 semester hours may be used toward the thesis option.)	

Complete a minimum of 8 semester hours of specialization coursework in consultation with your faculty advisor.

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

¹ Note that the specialization will not appear on the degree diploma or on the official transcript but can be listed as the field of study on CVs and grant proposals.

Total Hours: 36			

Nanomedicine, Graduate Certificate (Boston)

The Graduate Certificate in Nanomedicine is a part-time program designed to introduce scientists, engineers, and physicians to interdisciplinary problem solving in nanomedicine. This experiential learning program is ideal for individuals seeking careers in biotechnology, pharmaceutical, biomedical, or clinical fields. Students study both fundamental and applied aspects of nanomedicine and then apply this knowledge to designing strategies for nanomedicine innovation, translation, and commercialization. The graduate certificate consists of 8 semester hours of NNMD coursework and one elective, totaling 12 semester hours.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
NNMD 5270	Foundations in Nanomedicine: Therapeutics	3
or NNMD 5271	Foundations in Nanomedicine: Diagnostics	
Complete at least 5 semester hours from the following:		5
NNMD 5272	Nanomedicine Seminar (may be repeated)	
NNMD 5310	Bioethics in the Age of Artificial Intelligence	
NNMD 5370	Nanomedicine Research Techniques	
NNMD 5380	Electron Microscopy Techniques	
NNMD 5470	Nano/Biomedical Commercialization: Concept to Market	
NNMD 5570	Preclinical and Clinical Study Design	

Electives

Code	Title	Hours
Complete 4 semester hours of electives from the following list. Electives not on this list may be chosen with faculty advisor approval:		4
<i>Laboratory Research</i>		
BIOL 6381	Ethics in Biological Research	
BIOT 5145	Biotechnology Lab Skills	
BIOT 7245	Biotechnology Applications Laboratory	
NNMD 5370	Nanomedicine Research Techniques	
NNMD 5380	Electron Microscopy Techniques	
NNMD 5570	Preclinical and Clinical Study Design	
NNMD 6370	Nanomedicine Experiential Capstone	
NNMD 6984	Independent Research	
PHSC 5212	Research Skills and Ethics	
PHSC 6214	Experimental Design and Biostatistics	

Nanomaterials Design and Application

BIOE 5820	Biomaterials
BIOE 6100	Medical Physiology
BIOT 5630	Cell Culture Applications for Biopharmaceuticals
BIOT 5700	Molecular Interactions of Proteins in Biopharmaceutical Formulations
BIOT 5910	Vaccines and Immunization
BIOT 5930	Molecular Tools for Vaccine Design
CHEM 5610	Polymer Chemistry
CHEM 5640	Biopolymeric Materials
CHME 5630	Biochemical Engineering
CHME 5631	Biomaterials Principles and Applications
CHME 5683	Introduction to Polymer Science
NNMD 5270	Foundations in Nanomedicine: Therapeutics
NNMD 5271	Foundations in Nanomedicine: Diagnostics
PHSC 6216	Human Physiology and Pathophysiology
PHSC 6290	Biophysical Methods in Drug Discovery
PHYS 5260	Introduction to Nanoscience and Nanotechnology
PHYS 7731	Physics of Biological Processes and Living Systems I

Drug Delivery

CHEM 5648	Chemical Principles and Application of Drug Metabolism and Pharmacokinetics
CHME 5160	Drug Delivery: Engineering Analysis
CHME 7350	Transport Phenomena
PHSC 5560	Nanotoxicity
PMST 6252	Pharmacokinetics and Drug Metabolism
PMST 6254	Advanced Drug Delivery Systems

Commercialization and Regulatory Affairs

BIOT 5219	The Biotechnology Enterprise
BIOT 5220	The Role of Patents in the Biotechnology Industry, Past and Future
BIOT 5225	Managing and Leading a Biotechnology Company
BIOT 5227	Launching Your Science: Biotechnology Entrepreneurship
BIOT 5920	Foundations in Vaccine Regulatory Science
BIOT 6290	Foundation in Quality for Biotechnology
BIOT 6310	CGMP Statutes and Regulation
BIOT 6320	Design and Development of Biopharmaceuticals
BIOT 6340	Sterile Manufacturing Operations
NNMD 5470	Nano/Biomedical Commercialization: Concept to Market

617.373.8714 (fax)

The doctoral program in the Department of Psychology offers a research-intensive environment within a supportive community of faculty and students. Its areas of research specialization include behavioral neuroscience, cognition/cognitive neuroscience, perception, and social/personality—with crosscutting themes in health, affective science, and life span development.

During the program, students complete a series of topical seminars and courses in quantitative analysis while gaining research skills through working closely with their advisors. They are also expected to develop their own research program, beginning with their master's thesis and culminating

in their dissertation. Students' professional development is supported by attending colloquia, serving as teaching assistants, and modest annual stipends for research/travel.

Programs

Doctor of Philosophy (PhD)

- Human Behavior and Sustainability Sciences (p. 1169) (Boston)
- Psychology (p. 1215) (Boston)

Human Behavior and Sustainability Sciences, PhD (Boston)

Overview

The persistent failure to integrate the social, behavioral, and cognitive sciences with ecological and geophysical sciences is a critical friction point reducing the viability and effectiveness of sustainability solutions. Therefore, a degree program that combines training in psychology with the ecological and geophysical sciences will produce boundary-breaking scholars who can accelerate sustainability solutions that are robustly informed by the results of scientific research. The proposed curriculum integrates degree requirements from existing PhD programs in psychology and marine and environmental sciences (sustainability sciences concentration), with the addition of a set of specialized core courses and integrated cross-disciplinary research training. It also allows students broad latitude in designing their specialty within the parameters of the program.

The PhD in Human Behavior and Sustainability Sciences program provides students with the following advanced coursework and training. Students must pass two examinations during the course of their graduate studies to achieve candidacy:

1. A qualifying paper that the student will write and present to their dissertation committee.
2. A proposal defense presented to the student's dissertation committee that explains the research areas that the student proposes to work in.

At the end of the program, students will defend their written dissertation, which consists of a public seminar, public question-and-answer period, and private defense of their work to their dissertation committee. Dissertation committees consist of at least four Northeastern University faculty and one external faculty member.

A cumulative grade-point average of 3.000 is required for graduation. The PhD will be awarded following submission of a dissertation, approved by the candidate's dissertation committee, to the College of Science.

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Cross-Disciplinary Science (<https://catalog.northeastern.edu/graduate/science/interdisciplinary/cross-disciplinary-science-ms-bos/>) degree. Note that no students will be admitted directly into the Cross-Disciplinary Science program to pursue a master's degree.

Psychology, PhD (Boston)

The PhD program in the Department of Psychology covers a wide spectrum of contemporary behavioral science within a close-knit community of faculty and students. The program offers experimental emphasis and coursework in behavioral and developmental neuroscience, cognitive science, sensation and perception, and social/affective science. The program does not offer training in clinical or counseling psychology. The objective of the PhD program is to prepare students to become experts in research and teaching in psychology. To accomplish this goal, the department takes a mentoring approach whereby the graduate students are apprentices in faculty laboratories, working closely with their faculty mentors throughout their time in the program. The basic apprenticeship relationship is supplemented by other activities, such as required courses (concentrated in the first and second years), advanced seminars and/or course work in this as well as other departments or universities, a colloquium series, assignments as teaching assistants, the master's project, and the dissertation and its oral defense. After the first year, the structure of the doctoral program, including course work, is flexible and assumes that the process of learning and scientific discovery must be individualized. Graduate students also have an opportunity to develop their teaching and research skills through close mentoring of undergraduate research assistants. The PhD program is a five-year, twelve-months-per-year program.

The dissertation committee must include at least three tenured or tenure-track faculty members from within the psychology department—two from the student's interest area and one from another area. The oral defense committee consists of the dissertation committee plus additional tenured and tenure-track faculty members from the psychology department.

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Psychology (<https://catalog.northeastern.edu/graduate/science/psychology/psychology-ms/>) degree. Note that no students will be admitted directly into the Psychology program to pursue a master's degree.

Advanced Entry Program Requirements

The PhD program in the Department of Psychology covers a wide spectrum of contemporary behavioral science within a close-knit community of faculty and students. Advanced Entry is for students who enter possessing a master's degree in psychology or another acceptable field. The program offers four overlapping areas of experimental emphasis: behavioral neuroscience, cognition, perception, and social/personality. The program does not offer training in clinical or counseling psychology. The objective of the PhD program is to prepare students to become experts in research and teaching in psychology. To accomplish this goal, the department takes a mentoring approach whereby the graduate students are apprentices in faculty laboratories, working closely with their faculty mentors throughout their time in the program. The basic apprenticeship relationship is supplemented by other activities, such as required courses (concentrated in the first and second years), advanced seminars and/or course work in this as well as other departments or universities, a colloquium series, assignments as teaching assistants, the master's project, and the dissertation and its oral defense. After the first year, the structure of the doctoral program, including course work, is flexible and assumes that the process of learning and scientific discovery must be individualized. Graduate students also have an opportunity to develop their teaching and research skills through close mentoring of undergraduate research assistants. The PhD program is a five-year, 12-months-per-year program.

For students who enter the program with a suitable master's degree, degree candidacy is established through completion of a set of requirements determined on an individual basis. An additional 20 semester hours beyond the master's degree are required for the PhD degree. The dissertation committee must include at least three tenured or tenure-track faculty members from within the psychology department—two from the student's interest area and one from another area. The oral defense committee consists of the dissertation committee plus additional tenured and tenure-track faculty members from the psychology department.

Complete all courses and requirements listed below unless otherwise indicated. Individual programs of study will be tailored to acknowledge students' previous coursework.

Milestones

Master's presentation

Cross-Disciplinary Science PhD

The Cross-Disciplinary Science PhD provides a framework for housing a series of combined PhD programs representing research evolution into cutting-edge areas that cross disciplinary boundaries driven by the demands of current world challenges. The rapid pace of research in these areas requires efficient development of new combined PhD programs, which draw on expertise from different disciplines, and can be developed efficiently under the common framework of the Cross-Disciplinary Science PhD. This framework provides the flexibility for PhD programs that reflect the multidisciplinary nature of the research performed by faculty and students interested in solving challenging problems through cross-disciplinary approaches.

Biophysics, PhD (Boston)

The Biophysics PhD program at Northeastern University is a combined and cross-disciplinary program that draws expertise from the physics, biology, and chemistry departments. Designed to meet the growing need for interdisciplinary research, this program focuses on the application of physical and chemical principles to understand complex biological systems. Through this unique partnership, students explore biological phenomena at all scales, from molecules to entire organisms, using quantitative and experimental methods.

This program offers a comprehensive curriculum that includes core courses in statistical mechanics, chemistry, and cell and molecular biology, along with a recurring graduate biophysics seminar. Emphasizing both theoretical knowledge and practical experience, the program covers techniques such as spectroscopy, computational modeling, and advanced microscopy, while also promoting the development of essential skills in data science and machine learning. This approach is designed to enable students to address significant scientific challenges in fields such as biotechnology and health sciences.

Structured under the College of Science's cross-disciplinary science PhD umbrella, the program allows for flexibility based on each student's background and career goals. Students engage in research rotations and are encouraged to seek external internships to broaden their professional experience and network. The program's structure supports students as they build a solid foundation in biophysics, preparing them for candidacy exams and offering pathways into diverse scientific careers.

Successful graduates of the Biophysics PhD program are equipped to excel in academia, industry, and beyond. By fostering a collaborative research environment that draws on the strengths of multiple disciplines, this program aims to produce scientists capable of groundbreaking research with a lasting impact on both science and society.

Students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MS Cross-Disciplinary Science (<https://catalog.northeastern.edu/graduate/science/interdisciplinary/cross-disciplinary-science-ms-bos/>) degree. Note that no students will be admitted directly into the Cross-Disciplinary Science program to pursue a master's degree.

Network Science, PhD (Boston)

The PhD in Network Science program aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is a multidisciplinary program, with members of the Northeastern University Network Science Institute (<https://www.networkscienceinstitute.org/>) representing a range of fields including computer science, information science, physics, complexity, sociology, communication, data visualization, organizational behavior, political science, population health, and epidemiology.

This doctoral program is a joint collaboration across five academic colleges. Students are admitted to the College of Social Sciences and Humanities and may choose to move to the home college of their dissertation advisor after they reach candidacy (once they pass their dissertation proposal/comprehensive exam). Students follow policies of their home college, including dissertation format and submission deadlines for graduation. Faculty supervisors may be from one of the following Northeastern academic colleges:

- College of Science
- College of Social Sciences and Humanities
- Khoury College of Computer Sciences

- Bouvé College of Health Sciences
- College of Arts, Media and Design

Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of elective courses relevant to the student's area of research. Electives should be discussed with the student's faculty advisor. A minimum of 40 semester hours of coursework is required, though the faculty advisor or program committee may recommend additional coursework based on student research skills.

Alternative Course Path

Students have the option to complete core coursework in their first year of study. This curriculum pathway is expected to be taken by students whose admitting advisor is located outside of the Boston campus and elsewhere in the Northeastern network.

Annual Review

A review of satisfactory progress will be ongoing and formally evaluated at the end of each academic year. Students must maintain a cumulative grade-point average of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain a 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for dismissal by the graduate program committee.

As part of the annual review process, the students will be asked to submit a summary of completed and future courses and research. Students will submit to the program committee:

- A list of courses completed in the last academic year and course plan for the following year
- A short synopsis of their research progress and research plans for the next year

Qualifying Examination

The qualifying exam is an hour-long oral examination of the material covered in the core curriculum and consists of questions selected by network science faculty. One month prior to the exam., students receive between 50 to 80 study questions to prepare. Students will be asked to give a short presentation of their research plans, followed by an oral exam where the qualifying exam panel will ask a subset of the review questions.

Students must take the exam by the fall semester of their third year. If students fail the qualifying exam on their first attempt, they may retake the exam in the following semester. Students who do not pass the exam after two attempts will be asked to leave the program.¹

Dissertation Committee

Students must confirm their dissertation advisor by the end of their second year. The dissertation advisor must be a full-time, tenured, tenure-track, research, or teaching faculty member of Northeastern. The advisor should be a network science doctoral program faculty member, unless the student receives approval by the network science program committee.

Students must confirm their dissertation committee prior to their comprehensive exam. The committee must consist of a minimum of four members:

1. A dissertation advisor
2. A core member of the Network Science Institute faculty
3. An additional tenured/tenure-track, research, or teaching faculty member from the Network Science Institute or other Northeastern faculty approved by the advisor and program committee
4. One member recognized as an expert in the specific topic of research, who can be external to Northeastern.

Dissertation Proposal (Comprehensive Examination)

The comprehensive exam should be completed in the student's fourth year of study. The exam consists of two parts: preparation of the dissertation proposal and oral presentation of the proposal. Students must prepare a written comprehensive research proposal describing the dissertation research plan including review of relevant literature, research questions, motivation, methods, any preliminary results, and potential impact. The proposal must be shared with the doctoral committee members two weeks prior to the scheduled presentation.

Students will give a 30-minute oral presentation to their committee members that is open to the public. Following the presentation, the dissertation committee will assess the proposed research plan and provide feedback to the student. If the proposal and/or presentation do not meet the expectations of the committee, the student will be asked to revise their proposal and/or their presentation. The completion of the comprehensive exam is considered successful if the dissertation committee approves as satisfactory both the written proposal and the oral presentation. Students may repeat the comprehensive exam once. If they are unsuccessful in their second attempt, the program will ask the student to leave the program.

PhD Candidacy

A student is considered a doctoral candidate upon completion of the required coursework with a minimum cumulative GPA of 3.000, a passing score on the qualification exam, and satisfactory completion of the comprehensive exam.

Dissertation

A PhD student should aim to complete their dissertation in their fifth year of study. Upon successful completion of the research plan proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field. The work should give evidence of the candidate's ability to carry

out independent research. It is expected that the dissertation consists of one or more research studies of sufficient quality to merit publication in a reputable journal(s).

Dissertation Defense

Like the dissertation proposal, the dissertation defense consists of two parts: the written dissertation and the defense oral presentation. The PhD candidate should send the written dissertation to their dissertation committee at least one month prior to the dissertation defense.

The oral dissertation defense will be open to the public and will include a Q&A session. Following the presentation, the dissertation committee will communicate their assessment of whether they consider the candidate's dissertation requirement fulfilled. Once the dissertation requirement is fulfilled, the PhD candidate is ready to graduate. Students then apply to graduate and follow the formatting guidelines and deadlines of their home college.

¹Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an MS in Network Science degree. Note that no students will be admitted directly into the MS in Network Science to pursue a master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Students must complete all 20 semester hours of the core courses listed below, unless the program director approves changes to the student's course plan:		
NETS 5116	Network Science 1	4
NETS 6116	Network Science 2	4
NETS 7332	Machine Learning with Graphs	4
NETS 7334	Social Networks	4
NETS 7335	Dynamical Processes in Complex Networks	4

Electives

Code	Title	Hours
Complete 20 semester hours from the following elective course options.		20
The student's elective course plan should be discussed with, and approved by, their advisor. Students who seek to apply courses not on this list to fulfill program requirements must obtain written approval from their advisor and the program director. Elective options below are organized by domain areas. Students may take courses from one or more domain areas.		

Computational Social Science

CNET 5126	Spreading on Networks: From Epidemics to Memes
CNET 5314	Complexity in Social Systems
CNET 5411	Financial and Economic Networks
CNET 5901	Visualizing Complex Networks
CNET 5902	Communicating Network Data
NETS 7341	Network Economics
NETS 7350	Bayesian and Network Statistics
NETS 7360	Research Design for Social Networks
NETS 7370	Computational Urban Science
NETS 7976	Directed Study
NETS 7983	Topics
NETS 8941	Network Science Literature Review Seminar
PHYS 7332	Network Science Data 2

Computer Science

CNET 5901	Visualizing Complex Networks
CNET 5902	Communicating Network Data
CS 5800	Algorithms
CS 6120	Natural Language Processing
CS 6140	Machine Learning
CS 6220	Data Mining Techniques
CS 7180	Special Topics in Artificial Intelligence
CS 7260	Visualization for Network Science
CS 7295	Special Topics in Data Visualization
NETS 7976	Directed Study
NETS 7983	Topics

PHYS 7305	Statistical Physics
PHYS 7321	Computational Physics
PHYS 7332	Network Science Data 2

Dissertation

Code	Title	Hours

Precandidacy

Students should register for NETS 8986 after passing the qualifying exam and before completing the comprehensive exam (proposal defense):

NETS 8986	Research

Dissertation

After passing the comprehensive exam (reaching candidacy), students should register for NETS 9990 and NETS 9991, successively:

NETS 9990	Dissertation Term 1

NETS 9991

Dissertation Term 2

Dissertation Continuation

After completing both NETS 9990 and NETS 9991, students should register for NETS 9996 each semester until graduation:

NETS 9996

Dissertation Continuation

Program Credit/GPA Requirements

Applied Physics and Engineering, MS (Boston)

The combined MS program in applied physics and engineering allows graduate students to receive training in one of three concentrations of the electrical and computer engineering department while also receiving fundamental graduate-level physics training that is relevant to that area.

Thesis Option

Students may register for an additional two semesters of thesis work. Depending on the affiliation of the thesis advisor, students may register for Thesis (PHYS 7990) for a total of 8 semester hours or 4 semester hours of Master's Project (EECE 7945) followed by 4 semester hours of Thesis (EECE 7990). Thesis credits cannot be substituted for any of the coursework listed above. This option requires a total of 40 semester hours for the master's degree. A thesis committee is composed of an advisor and two faculty members from physics or electrical engineering.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Concentrations

Complete one of the following concentrations:

- Analysis, Modeling, and Computation (p. 558)
- Electromagnetics, Plasma, and Optics (p. 558)
- Microsystems, Materials, and Devices (p. 559)

Optional Thesis

Code	Title	Hours
Select one of the following options based on the college affiliation of the thesis advisor. Thesis coursework will not be applied to other requirements of this degree program. Completion of this thesis option requires a total of 40 semester hours to earn the degree:		8

Option 1 (College of Science thesis advisor)

PHYS 7990	Thesis (completed twice over two semesters)

Option 2 (College of Engineering thesis advisor)

EECE 7945	Master's Project
EECE 7990	Thesis

Program Credit/GPA Requirements

32 total semester hours required (40 with optional thesis)

Minimum 3.000 GPA required

ANALYSIS, MODELING, AND COMPUTATION

Code	Title	Hours
Core Courses		
EECE 7205	Fundamentals of Computer Engineering	4
PHYS 7321	Computational Physics	4
Engineering Coursework		
Complete 12 semester hours from the following:		12
EECE 5639	Computer Vision	
EECE 5640	High-Performance Computing	
EECE 5642	Data Visualization	

EECE 5643	Simulation and Performance Evaluation
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 7205	Fundamentals of Computer Engineering
EECE 7271	Computational Methods in Electromagnetics
EECE 7352	Computer Architecture
EECE 7353	VLSI Design
EECE 7374	Fundamentals of Computer Networks

Physics Coursework

Complete 12 semester hours from the following: 12

PHYS 5116	Network Science 1
PHYS 5318	Principles of Experimental Physics
PHYS 7301	Classical Mechanics/Math Methods
PHYS 7305	Statistical Physics
PHYS 7335	Dynamical Processes in Complex Networks

ELECTROMAGNETICS, PLASMA, AND OPTICS

Code	Title	Hours

Core Courses

EECE 7203	Complex Variable Theory and Differential Equations	4
PHYS 7302	Electromagnetic Theory	4

Engineering Coursework

Complete 12 semester hours from the following: 12

EECE 5698	Special Topics in Electrical and Computer Engineering (Subsurface Imaging)
EECE 7105	Optics for Engineers
EECE 7202	Electromagnetic Theory 1
EECE 7245	Microwave Circuit Design for Wireless Communication
EECE 7270	Electromagnetic Theory 2
EECE 7271	Computational Methods in Electromagnetics
EECE 7275	Antennas and Radiation
EECE 7293	Modern Imaging

Physics Coursework

Complete 12 semester hours from the following: 12

PHYS 5318	Principles of Experimental Physics
PHYS 7305	Statistical Physics
PHYS 7315	Quantum Theory 1
PHYS 7316	Quantum Theory 2
PHYS 7321	Computational Physics

PHYS 7731	Physics of Biological Processes and Living Systems 1

MICROSYSTEMS, MATERIALS, AND DEVICES

Code	Title	Hours

Core Courses

EECE 7201	Solid State Devices	4
PHYS 7324	Condensed Matter Physics	4

Engineering Coursework

Complete 12 semester hours from the following: 12

EECE 5606	Micro- and Nanofabrication
EECE 5680	Electric Drives
EECE 7204	Applied Probability and Stochastic Processes
EECE 7240	Analog Integrated Circuit Design
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)
EECE 7245	Microwave Circuit Design for Wireless Communication
EECE 7353	VLSI Design
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering

Physics Coursework

Complete 12 semester hours from the following:

12

PHYS 5318	Principles of Experimental Physics
PHYS 7301	Classical Mechanics/Math Methods
PHYS 7302	Electromagnetic Theory
PHYS 7305	Statistical Physics
PHYS 7315	Quantum Theory 1
PHYS 7316	Quantum Theory 2
PHYS 7321	Computational Physics
PHYS 7734	Topics: Condensed Matter Physics

Climate Science and Engineering, MS (Boston)**Overview**

The Master of Science in Climate Science and Engineering is offered jointly by the College of Engineering and the College of Science. The program provides training in the fundamental scientific processes that underpin the structure and dynamics of the climate, as well as the engineering strategies and technologies required for decarbonization and adaptation to climate change.

Incoming students will typically hold a bachelor's degree in a science, engineering, or related field. The program is designed to prepare students for climate-facing positions in the public or private sectors and can serve as a springboard for students interested in pursuing doctoral-level research. Students must take at least 12 semester hours of College of Science courses and at least 12 semester hours of College of Engineering courses, which includes a report, thesis, or coursework option.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Student should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP**Master's Degree in Climate Science and Engineering with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Climate Science and Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership (p. 738), 12 semester hours of the certificate coursework may be applied to the restricted elective requirements of this program's coursework option. Of the remaining 20 semester hours required by this program, students must take 12 semester hours of College of Science courses (subject codes EEMB and ENVR) and 8 semester hours from College of Engineering courses (subject codes CIVE, EECE, ENSY, MATL, ME, and SBSY).

The Department of Civil and Environmental Engineering encourages students pursuing the Graduate Certificate in Engineering Leadership (p. 738) to complete their MS coursework requirements in their first year and their certificate requirements in their second year. Students who prefer to complete their certificate requirements in their first year are asked to speak with their MS degree advisor in advance.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. In order to ensure a balance of training across science and engineering, students must take at least 12 semester hours of College of Science courses (starting with EEMB, ENVR) and at least 12 semester hours of College of Engineering courses (starting with CIVE, EECE, ENSY, MATL, ME, SBSY) from the core requirements and restricted elective course options.

Core Requirements

Code	Title	Hours
Complete 20 semester hours from the core requirements listed below (any core course not used to meet this core course requirement can be taken as a restricted elective):		
CIVE 5150	Climate and Atmospheric Change	20

or ENVR 5150	Climate and Atmospheric Change
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 5281	Coastal Dynamics and Design
CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5365	Climate Technologies for Decarbonization, Mitigation, and Adaptation
CIVE 5366	Air Quality Engineering and Science
CIVE 5670	Global Biogeochemistry
or ENVR 5670	Global Biogeochemistry
CIVE 7110	Critical Infrastructure Resilience
ENVR 5350	Sustainable Energy and Climate Solutions
ENVR 5600	Coastal Processes, Adaptation, and Resilience
ENVR 5800	Climate Adaptation and Nature-Based Solutions

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the restricted electives course list below. (p. 522)		12

REPORT OPTION

Code	Title	Hours
CIVE 7945	Master's Project	4
or EEMB 8984	Research	
Complete 8 semester hours from the restricted electives course list below. (p. 522)		8

THESIS OPTION

Code	Title	Hours
Complete CIVE 7945 and CIVE 7990 for 8 semester hours or complete EEMB 8984 twice for 8 semester hours:		8
CIVE 7945 and CIVE 7990	Master's Project and Thesis	
EEMB 8984	Research (Completed twice)	
Complete 4 semester hours from the restricted electives course list below. (p. 522)		4

In addition to completing the thesis course, College of Engineering students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Restricted Electives

Code	Title	Hours
CIVE 5280	Remote Sensing of the Environment	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7282	Coastal and Hydraulic Modeling	
CIVE 7385	Public Transportation	
CIVE 7392	Special Topics in Environmental Engineering	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration	
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
ENVR 5210	Environmental Planning	
ENVR 5220	Ecosystem-Based Management	
ENVR 5563	Advanced Spatial Analysis	
INTL 5100	Climate and Development	
LAW 7634	Energy Law and Policy	
LPSC 7312	Cities, Sustainability, and Climate Change	

MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting
ME 5685	Solar Thermal Engineering
PPUA 5238	Climate Change and Global Urbanization
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change
PPUA 5268	International Environmental Policy
SBSY 5100	Sustainable Design and Technologies in Construction
SBSY 5200	Sustainable Engineering Systems for Buildings

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Complex Network Analysis, MS (Boston)

Complex network analysis is the quantitative study of interconnected systems that influence every aspect of our lives—from where we get our news and who we share ideas with, to how we travel and the people we interact with, to the products we purchase and the foods we eat. Networks are ubiquitous across natural and human-made systems, and their structure and dynamics can explain and help improve the greatest challenges of the next century such as pandemics, food scarcity, cultural polarization, and climate change. Expertise in the emerging field of complex network analysis, within the landscape of the rapid growth of artificial intelligence and machine learning, forms the foundation of the next generation of thought leaders. Northeastern University leads the way in this burgeoning field, offering a unique master's degree program in complex network analysis methodologies. The program is designed to equip students with the conceptual and analytical tools needed to find patterns of connections in networked systems and apply these techniques in real-world settings. The curriculum includes industry-aligned concentration areas of focus, enabling graduates to apply complex network analysis skills in impactful careers in the public and private sectors as well as in research. The concentrations for this program correspond directly to the following industry sectors:

1. Public health and life sciences fields such as epidemiological modeling, public policy, and behavioral research
2. Social or urban science and research fields such as urban planning, social network research, economics, education, criminal science, or public policy
3. Finance or technological fields such as financial analytics, market research, or network analysis for business
4. Biological systems modeling used across research and industry including network biology, drug discovery, or multi-omics mining

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Complex Biological Networks—College of Science
- Complex Social Systems—College of Social Sciences and Humanities
- Economic and Technological Networks—Khoury College of Computer Sciences
- Population Health Dynamics—Bouv  College of Health Sciences

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CNET 5050	Fundamentals of Complex Networks	4
CNET 5051	Analyzing Complex Network Data	4
CNET 5052	Advanced Tools for Complex Network Analysis	4

CNET 5901	Visualizing Complex Networks	2
CNET 5902	Communicating Network Data	2

Concentrations

Complete one of the following concentrations:

- Complex Biological Networks (p. 167)—College of Science
- Complex Social Systems (p. 168)—College of Social Sciences and Humanities
- Economic and Technological Networks (p. 168)—Khoury College of Computer Sciences
- Population Health Dynamics (p. 169)—Bouvé College of Health Sciences

Experiential Courses

Code	Title	Hours
Complete a total of 4 semester hours from the following (course may be repeated):		4
CNET 6107	Complex Network Analysis Research Rotation	
CNET 6108	Complex Network Analysis Capstone	
CNET 6990	Thesis	

Optional Co-op

Code	Title	Hours
CNET 6000	Professional Development for Co-op	1
CNET 6964	Co-op Work Experience	0

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Additional hours may be required based on student choice of courses or concentration.

One semester hour of additional coursework is required for participation in co-op.

Minimum 3.000 GPA required

CONCENTRATION IN COMPLEX BIOLOGICAL NETWORKS—COLLEGE OF SCIENCE

Code	Title	Hours
A minimum of 16 semester hours is required to complete this concentration.		
Required		
CNET 5515	Complex Network Analysis for Biological Systems	4
Complete 8 semester hours from the following:		8
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6310	Introduction to Bioinformatics	
EEMB 5130	Population Dynamics	
ENVR 5450	Applied Social-Ecological Systems Modeling	
MATH 5131	Introduction to Mathematical Methods and Modeling	
MATH 7340	Statistics for Bioinformatics	
PHYS 5211	Introduction to Scientific Computing	
Complete 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5411	Financial and Economic Networks	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN COMPLEX SOCIAL SYSTEMS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
A minimum of 13 semester hours is required to complete this concentration.		
Required		

CNET 5314	Complexity in Social Systems	3
Complete a minimum of 6 semester hours from the following:		6
CNET 5311	Physical and Digital Human Traces	
CNET 5360	Research Design for Social Networks	
INSH 5301	Introduction to Computational Statistics	
INSH 6101	Agent-Based Modeling for Applied and Social Sciences	
INSH 6300	Research Methods in the Social Sciences	
INSH 6304	Modeling and Analyzing Social Networks	
INSH 6406	Analyzing Complex Digitized Data	
INSH 6500	Statistical Analysis	
PHYS 5211	Introduction to Scientific Computing	
PPUA 5262	Big Data for Cities	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5411	Financial and Economic Networks	
CNET 5515	Complex Network Analysis for Biological Systems	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN ECONOMIC AND TECHNOLOGICAL NETWORKS—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
A minimum of 14 semester hours is required to complete this concentration.		
Required		
CNET 5411	Financial and Economic Networks	3
Complete a minimum of 7 semester hours from the following:		7
CS 7150	Deep Learning	
CS 7200	Statistical Methods for Computer Science	
DS 5220	Supervised Machine Learning and Learning Theory	
DS 5230	Unsupervised Machine Learning and Data Mining	
MISM 6212	Data Mining and Machine Learning for Business	
PHYS 5211	Introduction to Scientific Computing	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5515	Complex Network Analysis for Biological Systems

CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

Environmental Science and Policy, MS (Boston)

The Master of Science in Environmental Science and Policy program emphasizes a broadly interdisciplinary and synthetic approach that integrates knowledge in the environmental sciences (conservation biology, climate change, fisheries science, ecosystem function, biodiversity, restoration ecology) with the social sciences (policy, economics, sociology, political science, and development) and humanities (environmental history, philosophy, and ethics). The goal of the program is to equip professionals with substantive breadth in knowledge and skills at the intersection of environmental science and policy. The program focuses on training students to think critically about the underlying causes of environmental problems and understanding the reciprocal relationships between coupled human-natural ecosystems and the interconnections between social and technological innovations. The program explores practical approaches and potential solutions that decision makers need to evaluate in policy debates related to promoting environmental sustainability.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Seminars		
PPUA 6101	Environmental Science and Policy Seminar 1	4
ENVR 6102	Environmental Science and Policy Seminar 2	4
Skills Courses		
Complete 2 courses from the following. At least one course needs to be taken from the College of Science Skills Course List and one course from the College of Social Sciences and Humanities Skills Course List.		8
<i>College of Science Skills Course List</i>		
EEMB 5130	Population Dynamics	
EEMB 5522	Experimental Design Marine Ecology	
ENVR 5150	Climate and Atmospheric Change	
ENVR 5210	Environmental Planning	
ENVR 5260	Geographical Information Systems	
ENVR 5450	Applied Social-Ecological Systems Modeling	
ENVR 6500	Biostatistics	
<i>College of Social Sciences and Humanities Skills Course List</i>		
INSH 5301	Introduction to Computational Statistics	
INSH 6300	Research Methods in the Social Sciences	
INSH 7400	Quantitative Analysis	
LPSC 7311	Strategizing Public Policy	
PPUA 5260	Ecological Economics	
PPUA 5261	Dynamic Modeling for Environmental Decision Making	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
PPUA 6212	Research Toolkit for Urban and Regional Policy: Project Management	
PPUA 6216	Research Toolkit for Urban and Regional Policy: Grant Writing	
PPUA 6502	Economic Analysis for Policy and Planning	
PPUA 6505	Public Budgeting and Financial Management	
PPUA 6506	Techniques of Policy Analysis	

PPUA 6509

Techniques of Program Evaluation

PPUA 7237

Advanced Spatial Analysis of Urban Systems

Electives

Complete five courses from the following list. At least one course must be taken from the College of Science Elective Course List and one course from the College of Social Sciences and Humanities Elective Course List. Any skills course not taken to fulfill the skills courses requirement can be taken as an elective. Students may petition to enroll in other relevant graduate courses offered by other schools at Northeastern University.

Statistics, MS (Boston)

The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The Master of Science in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical machine learning—Khoury College of Computer Sciences
- Statistical theory and modeling—College of Science

Students will follow all policies associated with their home college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800	Causal Inference in Public Health Research	3-4

or PHTH 6801	Causal Inference 1	
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics (p. 188)—Bouv  College of Health Sciences
- Statistical Machine Learning (p. 188)—Khoury College of Computer Sciences
- Statistical Theory and Modeling (p. 188)—College of Science

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses may be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

31 total semester hours required (32 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

Optional Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Statistics, MS—Connect (Boston)

The Master of Science in Statistics—Connect program is designed for students from all backgrounds with a BS/BA degree, provided the student has experience with basic calculus and statistics. The first semester of the degree program provides students with the foundational knowledge needed to study successfully alongside direct-entry graduate students. The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The MS in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical Machine Learning—Khoury College of Computer Sciences
- Statistical Theory and Modeling—College of Science

Students will follow all policies associated with their college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Connect Courses

Code	Title	Hours
Students are required to complete 8–10 semester hours from the following unless otherwise determined by the program:		8-10
CS 5001	Intensive Foundations of Computer Science	
MATH 5001	Accelerated Linear Algebra	
MATH 5002	Accelerated Multivariable Calculus	
MATH 5003	Accelerated Probability and Statistics	
MATH 5110	Applied Linear Algebra and Matrix Analysis	

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800 or PHTH 6801	Causal Inference in Public Health Research Causal Inference 1	3-4
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics—Bouv  College of Health Sciences (p. 190)
- Statistical Machine Learning—Khoury College of Computer Sciences (p. 190)
- Statistical Theory and Modeling—College of Science (p. 190)

Experiential Courses

Graduate Certificate Programs

The College of Science is pleased to offer several graduate certificate programs for working professionals as well as postbaccalaureate students who want to build their knowledge in growing fields. Graduate certificates are offered in biotechnology, bioinformatics, applied mathematics, nanomedicine, and sustainability sciences. These programs are ideal for people already in the field who want to enhance their career or people who are looking to make a change.

Programs

Biology

- Bioinformatics (p. 1136) (Boston)
- Bioinformatics (p. 1138) (Portland)
- Omics (p. 1139) (Boston)

Chemistry and Chemical Biology

- Biodefense and Biosecurity (p. 1159) (Boston)
- Biopharmaceutical Analytical Sciences (p. 1160) (Boston)
- Biotechnology (p. 1160) (Boston)
- Biotechnology (p. 1160) (Portland)

- Biotechnology Enterprise (p. 1161) (Boston)
- Biotechnology Regulatory Science (p. 1161) (Boston)
- Experimental Biotechnology (p. 1162) (Boston)
- Manufacturing and Quality Operations in Biotechnology (p. 1162) (Boston)
- Molecular Biotechnology (p. 1162) (Boston)
- Molecular Biotechnology (p. 1163) (Portland)
- Pharmaceutical Technologies (p. 1163) (Boston)
- Process Science (p. 1164) (Boston)
- Vaccine Development (p. 1164) (Boston)

Marine and Environmental Sciences

- Sustainability Sciences (p. 1176) (Boston)

Mathematics

- Applied Mathematics (p. 1192) (Boston)

Physics

- Nanomedicine (p. 1211) (Boston)

CSSH Graduate Programs General Regulations (p. 1239)

Our Mission

The departments and programs of the College of Social Sciences and Humanities—with disciplines ranging from economics and history to English and international affairs, just to name a few—form an interdisciplinary collaborative of scholars with global perspectives. The CSSH mission is:

- To contribute to the experiential liberal arts education of all Northeastern University students
- To produce cutting-edge knowledge about and solutions to the political and social problems of our contemporary world
- To foster ethical reasoning and critical thought, with attention to the enduring significance of history, literature, and culture

This mission, along with a strong international focus, gives CSSH a central role in fulfilling Northeastern's ambition of educating global citizens.

CSSH Graduate Programs

Graduate education at Northeastern integrates the highest level of scholarship across disciplinary boundaries with significant research and experiential learning opportunities. This multidimensional learning environment offers students an opportunity to develop critical-thinking and creative problem-solving skills while introducing them to new perspectives in their fields. CSSH supports 16 master's programs, 8 doctoral programs, and 12 graduate certificate programs. Some courses and degree programs are offered in an online or hybrid format that provides additional flexibility for learners. Graduate programs in CSSH provide fertile ground and resources for advanced study and research. CSSH faculty members' cutting-edge interdisciplinary work inspires the development of new programs, research fellowship opportunities, and mentoring relationships.

All CSSH master's programs offer an optional cooperative education experience to eligible students. Cooperative education is central to both the Northeastern experience and to the CSSH experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with up to six months of work experiences in businesses, nonprofits, and government agencies in Boston, across the United States, and around the world. Through the co-op experience and integrative cocurricular coursework, graduate students apply what they have learned across contexts, bringing knowledge and skills gained in community learning spaces back to our campus learning spaces.

Our doctoral, master's, and professional degree programs produce graduates who are well prepared for the diverse demands of careers in academia, industry, and the professions. Please visit the College of Social Sciences and Humanities (<https://cssh.northeastern.edu/>) website for additional information, including latest news and upcoming events.

General Regulations

- Academic Appeals Procedures (p. 1239)
- Doctor of Philosophy (p. 1241)
- General Information (p. 1243)
- Master's Degrees (p. 1244)
- Regulations for All Students (p. 1244)

Academic Appeals Procedures

Northeastern University affirms that it is essential to provide an appeals mechanism to students who believe that they have been erroneously, capriciously, or otherwise unfairly treated. Information about the university appeals process and procedures can be found in this catalog (p. 133).

If a student feels that they have been the victim of harassment or of discrimination prohibited by law or by university policy, and that this constitutes a substantive basis for the appeal, they should consult with the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>) as soon as they become aware of alleged prohibited harassment or discrimination, and they are not required to wait until a term grade or determination is received before seeking advice or redress. If the OUEC is advised of such alleged prohibited conduct as part of an academic appeal, the appeal shall first be pursued and investigated through the OUEC. Following a resolution of the harassment/discrimination issues, any remaining academic issues will be addressed, at the request of the student, according to the academic appeals procedures.

In cases that do not involve sexual harassment or discrimination, students may speak informally to their instructors or academic advisors about any determination or grade about which they have questions. If students choose to pursue an appeal, the College of Social Sciences and Humanities process is described in the appeals section that follows. The Graduate Academic Advisory Committee, which is comprised of an elected body of full-time CSSH faculty, serves as the Academic Appeals Committee for the CSSH.

Graduate Academic Advisory Committee

The GAAC shall be responsible for ensuring that the graduate curriculum of the college promotes the college's and university's evolving intellectual and pedagogical aims. The GAAC acts on all matters relating to the academic life of graduate students in the college in accordance with guidelines approved by the college and the GAAC. The responsibilities of the GAAC are:

- a. Oversight over the quality and scope of the college's graduate curricula, including recommendations for changes to the general program of the college, approval of graduate degree and certificate programs, and review of proposed changes to those programs.
- b. Review of student appeals on decisions concerning grades, academic dismissals, academic probation, change in requirements, permission to resume studies, academic warning, and repeating of courses. The GAAC shall adhere to all policies and procedures adopted by the faculty of the college and the Faculty Senate.

In addition, the GAAC shall adhere to policies and procedures issued by the Office of the Provost. Actions on graduate matters taken by the GAAC shall constitute the recommendations by the faculty on these matters. The GAAC shall make recommendations on behalf of the faculty directly to the dean (or the dean's designee). If the dean supports them, the recommendations shall, as needed, then be sent to the University Graduate Curriculum Committee for consideration. The GAAC's and dean's actions shall be reported periodically to the units involved and to the college council for informational purposes.

The GAAC is charged with review of student appeals on decisions concerning grades, academic probation, change in requirements, permission to resume studies, academic warning, and repeating of courses. Members of the GAAC from the student's own unit are recused from the appeal process. Graduate students may request permission to present their appeals in person. If a student believes that all pertinent information has not been presented, the student may request that the GAAC reconsider its decision. If the GAAC reaffirms its action, and the student is still not satisfied, an appeal for review may be made through the university's Academic Appeals Resolution Committee. The appeals procedure is described in this catalog (p. 133).

Grade Appeals

If a graduate student wishes to dispute a grade in a course taught by a member of the CSSH faculty, the first step is for the student to discuss their concerns with the faculty member who taught the course to see if it is possible to reach agreement on the issue(s). If the student is not able to resolve the issues with the faculty member who taught the course, the student should work with the department/program director to attempt a department-level resolution.

If these informal attempts to resolve the issue fail, the student can enter the formal procedure at the college level.

The student should meet with the associate dean for graduate studies who will attempt to resolve the issue by working with the instructor and the department/program. Contact the Graduate Office at gradcssh@northeastern.edu to schedule the meeting. If it is not possible for the associate dean to resolve the issue with the department/program, the associate dean will determine whether or not there is just cause to convene the GAAC. In the

event of an alleged violation of the Student Code of Conduct, the associate dean will first seek a determination of the violation from the Office of Student Conduct and Conflict Resolution (<https://osccr.sites.northeastern.edu/>).

The decision to convene the GAAC will be based upon the following:

- The student attempted to resolve the complaint with the professor and the department/program.
- The complaint is substantive in nature (adjudication could affect a student's course grade and/or academic record).
- The complaint has been brought forward in a timely manner.
 - The statement must be submitted no later than 28 calendar days from the day when the academic determination is made available to the student.
 - If a student wishes to dispute a grade in their final term, this must be done within 28 calendar days of the degree conferral date.

FORMAL COMPLAINT

If the associate dean determines the appeal should be brought to the GAAC, the student must provide a formal written complaint to the associate dean within one week of the student's meeting with the associate dean.

- The written complaint should provide a detailed timeline as well as all available evidence supporting the student's complaint.
 - It is the student's responsibility to make their case. Students may submit any evidence such as emails, quizzes, examinations, etc.
- Once the associate dean receives a formal written complaint, the associate dean will provide a copy of the complaint to the faculty member and to the department/program director and convene a meeting of the GAAC.
- If the student fails to provide a well-reasoned written summary of the case, then the matter will be considered closed at the college level.
- The associate dean will make a good faith effort to identify a date and time for the meeting within 35 calendar days of the student's original submission of their statement.

APPEALS MEETING

- The GAAC serves as the Academic Appeals Committee for the CSSH.
- The GAAC is convened in order to determine whether a fair and due process was used to determine the student's grade.
- The role of the committee is to conduct a review when a grade appeal is filed by a student regarding one of the following reasons:
 - Concern that the course grading policy was not applied consistently to all students within a class and/or section.
 - Concern that the instructor's method of assigning grades differed from the method outlined in the instructor's course syllabus.
 - Concern that the instructor failed to provide a clear policy on how grades would be assigned.

The student and the faculty member have the right to attend and present their case orally to the GAAC. The faculty member and the student aren't required to attend; however, it is usually quite helpful to make an oral presentation and answer any questions that the GAAC may have. If the complainant indicates that they will present their case in person and then fails to attend the scheduled hearing, the case will be dismissed. The complainant and the faculty member both have the right to testify privately and separately before the committee. Lawyers are not permitted in these proceedings. Generally, the faculty member and complainant are each given a 15-minute period to present their case.

The student usually presents their complaint to the committee first. This is followed by a brief Q&A of the student by the GAAC. The GAAC may ask the complainant any questions they have based upon either the written statement submitted by the complainant or the complainant's oral presentation. The faculty member then presents their case, which is followed by a brief Q&A of the faculty member. After both the complainant and faculty member have addressed the GAAC, the GAAC then reviews the evidence, summarizes the case, and makes a recommendation to the associate dean concerning the resolution of the complaint.

If the GAAC believes it cannot resolve any issues without additional information, the GAAC may request any information needed from either the complainant, faculty member, or department/program. This information must be provided to the GAAC within one week of the meeting. If the requested information is not provided in the required time frame, then the GAAC may weigh this failure in making its final determination regarding the original complaint.

COMMITTEE PROCESS

- All decisions of the GAAC will be made based on a simple majority (51%) vote.
- Members of the GAAC from the student's own unit are recused from the appeal process.
- The associate dean is chair of the GAAC and only votes when there is a tie.
- The student bringing the complaint to the GAAC carries the burden of proof based on the weight of the evidence in demonstrating that the grade is incorrect or unjustified.
- If the GAAC decides that the grading process was unfair, the GAAC can request that the instructor changes the student's grade.
 - If an acceptable agreement involves a change of grade, the instructor is responsible for submitting a change of grade to the Office of the University Registrar in a timely manner following notification of the GAAC's decision.
- The student shall be notified within three business days of a decision being reached.

If the student is not satisfied with the GAAC's disposition of the matter, or if the grade appeal is not resolved within 35 calendar days after the written statement is submitted to the college, the student may further pursue the matter by requesting in writing that the university convene an Academic Appeals Resolution Committee to review the issue. This must be submitted within 10 calendar days of the notification from the college. This

committee has been designated as the final authority on these matters. Students may obtain information on this process by contacting the Office of the Provost.

Academic Dismissal Appeal

If a student wishes to dispute an academic dismissal, the first step is to consult the graduate director about appealing to the department/program. If and when all departmental appeals are exhausted, the student can enter the formal procedure at the college level.

The student will meet with the associate dean for graduate studies who will attempt to resolve the issue by working with the department/program. Contact the Graduate Office at gradcssh@northeastern.edu to schedule the meeting. If it is not possible for the associate dean to resolve the issue with the department/program, the associate dean will determine if the complaint is substantive and there is just cause to convene the GAAC.

FORMAL COMPLAINT

The student must provide a formal written complaint to the associate dean within one week of the student's meeting with the associate dean. The statement must be submitted no later than 28 calendar days from the day when the academic determination is made available to the student. The written complaint should provide a detailed timeline as well as all available evidence supporting the student's complaint. Once the associate dean receives a formal written complaint, the associate dean will provide a copy of the complaint to the department/program director and convene a meeting of the GAAC. If the student fails to provide a thoughtful and well-reasoned written summary of the case, then the matter will be considered closed at the college level. In the event of an alleged violation of the Student Code of Conduct, the associate dean will first seek a determination of the violation from the Office of Student Conduct and Conflict Resolution (<https://osccr.sites.northeastern.edu/>).

The associate dean will make a good faith effort to identify a date and time for the meeting within 35 calendar days of the student's original submission of their statement.

APPEALS MEETING

- The GAAC serves as the Academic Appeals Committee for the CSSH.
- The GAAC is convened in order to determine whether a fair and due process was used.

The student has the right to attend and present their case orally to the committee. The student isn't required to attend; however, it is usually quite helpful to make an oral presentation and answer any questions that the GAAC may have. If the complainant indicates that they will present their case in person and then fails to attend the scheduled hearing, the case will be dismissed. Lawyers are not permitted in these proceedings.

The student usually presents their complaint to the GAAC first. This is followed by a brief Q&A of the student by the GAAC. The GAAC may ask the complainant questions based upon either the written case submitted by the complainant or the complainant's oral presentation. The GAAC then reviews the evidence, summarizes the case, and makes a recommendation to the associate dean concerning the resolution of the complaint.

If the GAAC believes it cannot resolve any issues without additional information, the GAAC may request any information needed from either the complainant or department/program. This information must be provided to the GAAC within one week of the meeting. If the needed information is not provided in the time frame required, then the GAAC may weigh this failure in making its final determination regarding the original complaint.

COMMITTEE PROCESS

- All decisions of the GAAC will be made based on a simple majority (51%) vote.
- Members of the GAAC from the student's own unit are recused from the appeal process.
- The associate dean is chair of the GAAC and only votes when there is a tie.
- The student bringing the complaint to the GAAC carries the burden of proof based on the weight of the evidence in demonstrating that the dismissal is incorrect or unjustified.
- If the GAAC decides that the academic dismissal should be revoked, the GAAC can request that the department reinstate the student immediately.

If the student is not satisfied with the GAAC's disposition of the matter, or if the dismissal appeal is not resolved within 35 calendar days after the written statement is submitted to the college, the student may further pursue the matter by requesting in writing that the university convene an Academic Appeals Resolution Committee to review the issue. This must be submitted within 10 calendar days of the notification from the college. This committee has been designated as the final authority on these matters. Students may obtain information on this process by contacting the Office of the Provost (<https://provost.northeastern.edu/>).

Doctor of Philosophy

The Doctor of Philosophy degree is awarded to candidates who give evidence of high scholastic attainment and research ability in their major field. Specific degree requirements are administered by a committee in charge of the degree program. It is the responsibility of the chair of this committee to certify to the college the completion of each requirement for each candidate. Note that advanced standing is determined at the time of admission by the graduate program director.

Continuity of Registration

Students are expected to maintain satisfactory progress toward their intended degree. All students must register as approved by their advisors or the departmental graduate program directors. After establishing degree candidacy, registration must be continuous until graduation requirements are complete unless a leave of absence is allowed by and recommended by the departmental graduate committee and approved by the college. For each of the first two semesters that a doctoral candidate has established candidacy, the student must register for Doctoral Dissertation. For each semester

beyond the two Dissertation registrations, the student must register for Doctoral Dissertation Continuation until the dissertation is approved by the college and submitted to ProQuest. During the terms when a student is registered for Doctoral Dissertation or Dissertation Continuation, coursework is not permitted as the course requirements for the degree have already been met. If the academic program requires enrollment in seminars or courses in addition to Dissertation or Dissertation Continuation, the graduate program director will make a recommendation to the college. Approval of the college must happen prior to registration. Students must be registered for Dissertation or Dissertation Continuation during the semester in which they take the final oral examination (including the full summer semester if that is when defense occurs). Any student who does not attend Northeastern University for a period of one year may be required to apply for readmission.

Awards

Funding eligibility is contingent upon making satisfactory progress. See the college's Regulations for All Students (p. 1244) page for more information.

Course Requirements

Course requirements in each doctoral program are specified by the committee in charge of the doctoral program and departmental regulations. These are detailed in the academic catalog for the student's term of entry.

GPA Requirements

For all College of Social Sciences and Humanities doctoral degree programs, the minimum cumulative grade-point average is 3.500. To qualify for the degree, the minimum cumulative GPA must be obtained. This average will be calculated each semester according to the grading system noted in the academic catalog and will exclude any transfer credits or repeated courses. Individual programs may have additional GPA requirements. These can be found in the academic catalog or program policies and procedure documents. A student who does not make satisfactory progress toward degree requirements, as specified by the individual department, may be placed on academic probation or dismissed from the program. A student cannot begin working on exam requirements with a GPA that is below the program minimum.

Annual Student Progress Review

All PhD degree students are required to meet with their faculty advisor for an annual student progress review. The reviews will be submitted to the departmental graduate committee, which will determine whether satisfactory progress is being made and students are eligible to proceed to complete their graduate work. The CSSH Graduate Office will receive a copy of each student's review.

Residence Requirement

All PhD students must spend the equivalent of at least one academic year in residence at the university as a full-time graduate student. The departmental graduate committee specifies the method by which the residence requirement is satisfied. Residency is required of all students receiving a stipended graduate assistantship.

Qualifying Examinations

In programs where comprehensive or qualifying exams are required, students must complete these requirements within the time limit set by the program.

Dissertation Proposal

All CSSH doctoral programs require an approved prospectus or successful proposal defense for candidacy.

Doctoral Degree Candidacy

PhD degree candidacy is established when students have completed all departmental requirements for candidacy. These requirements vary by department and include completing the minimum number of graduate semester hours required of doctoral students by the department (this may include an earned master's degree accepted by the department) and passing a qualifying examination and/or a comprehensive examination. All CSSH doctoral programs require an approved prospectus or successful proposal defense for candidacy. Once students reach doctoral degree candidacy, the program should notify the CSSH Graduate Office. Students will be certified, in writing, by the college and their record will be updated to reflect PhD candidacy was reached. Students will not be able to register for Dissertation I until candidacy has been posted to the student record. Registration in coursework is not permitted once a student reaches candidacy.

Doctoral Dissertation

Each doctoral student must complete a dissertation that embodies the results of extended research and makes an original contribution to the field. This work should give evidence of the candidate's ability to carry out independent investigation and interpret in a logical manner the results of the research. The method of approval of the dissertation is established by the departmental graduate committee. No dissertation committee shall have fewer than three faculty members, two of whom shall be from Northeastern. The chair of the dissertation committee will be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold an appropriate doctorate. A research faculty member may chair a dissertation committee if the faculty member holds an appropriate doctorate and has received the approval to do so from the tenured and tenure-track faculty members of the unit(s) in which their appointment resides.

Final Oral Examination

The final oral examination will be on the subject matter of the doctoral dissertation and on important developments in the field of the dissertation. Other fields may be included if recommended by the examining committee. This examination will be taken after completion of all other degree requirements and must be held at least four weeks prior to the commencement at which the degree is to be awarded. All internal and external

committee members are expected to participate in the defense. The college must be notified of all scheduled defenses and expects that the defense will be publicly advertised for at least two weeks prior to the scheduled date. Some programs may require up to 30 days' notice.

- Upon successful defense of the dissertation, the student must have a dissertation approval record signed by the members of the dissertation committee and the department chair.
- The student must have the dissertation approval record approved by a representative from the CSSH Graduate Office.
- The student must submit an electronic copy of the dissertation to ProQuest, following the directions outlined on the University Library website.
- Visit Thesis and Dissertation Formatting Guidelines (<https://cssh.northeastern.edu/resources/theses-and-dissertations/>) for the approval form template and additional guidance.

General Information

For information about other academic policies and procedures; student responsibilities; student academic and cocurricular life; faculty rights and responsibilities; or general personnel policies, benefits, and services, please refer to university policies (p. 87) and related procedural guides, as appropriate.

Student Classification

Regular student—Students who are admitted to a degree or certificate program.

Special student—Nonmatriculated students who are enrolled in College of Social Sciences and Humanities graduate courses on a part-time basis (fewer than 8 semester hours per semester). Special students may earn up to 12 semester hours over time. Special students who do not register for four consecutive semesters (excluding summer semester) may be subject to review and possible withdrawal by the college. Graduate certificates and degrees cannot be conferred upon students in special student status. In keeping with university regulations, international students cannot be admitted as special students.

Doctoral degree candidate—Doctoral students who have completed departmental, college, and university requirements except for dissertation.

Student Status

For academic purposes, a graduate student is considered a full-time student if enrolled in a minimum of 8 semester hours of credit for the semester, with the following exceptions:

- Students who hold Stipended Graduate Assistantships will be considered full time if enrolled for a minimum of 6 semester hours of credit. However, some departments may require more credits for maintaining departmental progression standards.
- Students enrolled in Doctoral Research or full-time co-op are considered full time.
- All graduate students who are formally registered in a continuation status—Dissertation, Dissertation Continuation, Doctoral Research, or Qualifying/Comprehensive Exam Preparation courses—may be considered full time. It is ordinarily assumed that such students will be in residence.
- Students in their last semester of coursework may be enrolled in fewer than 8 semester hours to complete degree requirements. *Note:* To be eligible for some types of financial aid, the minimum full-time load may be defined differently. For information, contact the Graduate Student Financial Services Office (<https://studentfinance.northeastern.edu/>).

Continued registration in the CSSH is contingent upon receiving all official transcripts and test scores within 30 days of matriculation. Please note that you may be asked to provide us with these if you did not include official copies in your application.

Grading System

The student's performance in graduate courses will be graded according to the following numerical equivalents in the Academic Catalog (p. 115).

Grading Policies

Grading policies applying to all students may be found in the Academic Catalog (p. 87).

In the CSSH, not more than two courses or 8 semester hours of credit, whichever is greater, may be repeated to satisfy the requirements for the degree. Only such repeats will be counted in calculating the cumulative grade-point average. No grade changes are permitted after the end of the final examination period one calendar year from the semester in which the student registered for the course. This includes the clearance of incomplete grades (p. 123). In calculating the overall cumulative average, all graduate-level coursework completed at the time of clearance for graduation will be counted.

Students cannot elect a satisfactory/unsatisfactory grading scheme for CSSH courses unless the course grading scheme is designated satisfactory/unsatisfactory.

Class Credits

All credits are entered as semester hours. Graduate office policy states that in calculating the overall GPA, all graduate-level coursework completed at the time of clearance for graduation will be counted unless otherwise designated at the time of registration or unless counted toward a previous degree.

Master's Degrees

Academic Requirements

A candidate for the master's degree must complete a minimum of 30 semester hours of graduate-level coursework and additional requirements as determined by the department in which the student is registered.

To qualify for the degree, a minimum cumulative average of 3.000, equivalent to a grade of B, must be obtained. This average will be calculated each semester according to the university grading system (p. 115) and will exclude any transfer credits and nonrepeatable courses that have been retaken. A student who does not make satisfactory progress toward degree requirements, as specified by the individual department, may be dismissed from the program.

Continuity of Registration

Students are expected to maintain satisfactory progress toward their intended degrees. All students must be registered in the last semester of their program. Any student who does not attend Northeastern University for a period of one year will be required to apply for readmission.

Comprehensive Examination

Some programs require a final written or oral comprehensive examination. This examination will be given by the department concerned at least two weeks before the commencement at which the degree is expected. Students should check with individual departments for specific guidelines.

Thesis

Some programs require or offer master's degree Thesis. Theses should demonstrate the individual's capacity to execute independent work based on original material. Registration for XXXX 7990 Thesis is required. In cases in which a grade is required, theses must receive a grade of B (3.000) or better to be accepted. Students who have not completed their theses after having registered for the specified number of thesis credits must register for XXXX 7996 Thesis Continuation in the subsequent semester. Thesis Continuation will carry no credit but will be recorded on the student transcript with the appropriate grade (Satisfactory or Unsatisfactory). Thesis Continuation is not repeatable.

- Upon successful defense of the thesis, the student must have a thesis approval record signed by the members of the thesis committee. Visit Thesis and Dissertation Formatting Guidelines (<https://cssh.northeastern.edu/resources/theses-and-dissertations/>) for the approval form template and additional guidance.
- The student must have the thesis approval record approved by a representative from the CSSH Graduate Office.
- The student must submit an electronic copy of the thesis to ProQuest, following the directions outlined on the University Library website.

Regulations for All Students

Registration

Students must register via the Student Hub (<https://me.northeastern.edu>). Procedures to do so are available on the Office of the University Registrar's website. Consult the Academic Calendar (<https://registrar.northeastern.edu/group/calendar/>) for important registration dates.

Students are encouraged to obtain advisor approval of course selections each semester. Students should check with individual departments for specific guidelines.

Students are expected to only complete the courses and semester hours required for the degree or certificate. Any courses taken outside of those requirements must be approved by the director of the graduate program.

Transfer Credit

For general regulations concerning transfer credit in Northeastern University's graduate degree programs, please visit Regulations and Requirements for All Graduate Degree Programs (p. 143).

Degree students may petition to transfer credit through their departments to the College of Social Sciences and Humanities Graduate Office by completing the Transfer Credit form on the Office of the University Registrar's website. An official transcript must be attached to the petition.

Awards

Only those students who are registered in degree programs are eligible for awards. Award recipients will receive an official award letter from the CSSH Graduate Office. Please pay attention to this letter as it is an official contract that should be read carefully. In order to maintain awards, students must be making satisfactory progress toward their degrees. Please refer to the Satisfactory Academic Progress section below for more information.

Students receiving a Stipended Graduate Assistantship must be in full-time status and be registered for a minimum of 6 semester hours. The standard duration of the SGA funding window is five years beginning from the time of admission and is not changed based on the source of funding or if the stipend is declined in any given semester(s). The health plan fee (NUSHP) is covered by the SGA award whereas the University Health and Counseling Services fee is not. Students on an SGA must be available to come to campus during normal business hours and are expected to spend 20 hours per week supporting their assignment. Unsatisfactory progress in either the graduate program or performance in assistantship-related duties or any

deviation from the above may result in the early termination of the assistantship. Near the end of each funded term, student performance will be evaluated by their assignment supervisor and that evaluation will be filed with the CSSH Graduate Office.

CSSH Dean's Scholarship and Excellence Fellowship recipients must be in full-time status and be registered for a minimum of 8 semester hours.

Withdrawal from Courses

To withdraw from a course, a student must drop the course via the Student Hub within the deadlines as established by the Office of the University Registrar. Consult the Academic Calendar (<https://registrar.northeastern.edu/group/calendar/>) for more information.

Satisfactory Academic Progress

Satisfactory academic progress means satisfying requirements in the graduate program's general regulations and in the regulations specified by each department.

The college sets minimum standards for all students to fulfill, including:

- Maintaining the graduation requirement of a cumulative grade-point average of 3.000 (3.500 for doctoral programs) in their coursework
- Timely completion of coursework
- Timely completion of comprehensive/qualifying examinations

Departments and programs may have additional requirements that exceed those of the college. These requirements can be found in the *Academic Catalog* and department guides. Failure to maintain satisfactory academic progress may result in academic probation or dismissal from the program.

Receipt of financial support administered by the college is contingent on satisfactory academic progress toward the degree and on meeting department-specific guidelines. The college requires that all students receiving awards will generally have two semesters to reach a 3.000 GPA. Students whose cumulative GPA is below 3.000 (3.500 for doctoral programs) will be reviewed by their departments and by the CSSH Graduate Office and may have their funding terminated on recommendation of their department or by decision of the college in consultation with their department. In addition, continued funding for SGAs is contingent on satisfactorily carrying out duties as assigned.

Students enrolled in a program offering a cooperative education or internship option must be approved to participate. A minimum GPA of 3.000 is required at the time the co-op job or internship begins. Some departments may require a higher minimum GPA for co-op. Please refer to the *Academic Catalog* for program-specific information.

Leave of Absence

Full-time students who will not be involved in any academic endeavor for a period of time are required to petition via the Request for Leave of Absence form on the Student Hub (<https://me.northeastern.edu>). The CSSH Graduate Office will not accept retroactive leave requests. Please note that if a student is requesting a leave for medical reasons (p. 120), a Medical Leave of Absence form must be completed. Students should contact University Health and Counseling Services.

Leaves of absence generally are not approved for more than one calendar year. Further, a leave of absence is generally not appropriate for an international student on a student visa, unless the student is leaving the United States. The student must consult with an international student advisor at the Office of Global Services.

Leaves of absence are not appropriate for master's or doctoral students who are working on a thesis or dissertation but are away from the Northeastern campus.

Except in the case of medical leaves, being on an approved leave of absence does not extend the amount of time allowed for degree completion or the makeup of incomplete grades.

For more information on the general leave of absence policy for Northeastern's graduate degree programs, please visit Leaves of Absence and University Withdrawal (p. 120).

Time Limitations

Graduate course credits earned in the program of graduate study or accepted by transfer are valid for a maximum of seven years.

If students wish to apply for an extension of the university's seven-year time limit, they must submit a petition to their department of study. The petition must include a detailed plan for the completion of all remaining degree requirements. In the case of master's time-limit extension requests for coursework, the department must certify that the content of each of the courses has not changed since the time the student completed the course. If deemed appropriate, the department will recommend the approval of an extension to the college. The associate dean has final approval of time-limit extensions.

Application for the Diploma

Application for the diploma is made by applying to graduate. More information is available on the Commencement website (<https://commencement.northeastern.edu/>). Even if all other degree requirements may have been met, the application to graduate must be completed in order to assure that the degree will be conferred on the appropriate graduation date. It is the responsibility of the student to make sure that degree

requirements have been met. Once degree requirements have been met, the student will be cleared for commencement. Please note that there are no honors distinctions awarded at the graduate level.

Changes in Requirements

The continuing development of the college may result in regular revision of curricula. When curriculum changes are made, students are allowed to complete the degree requirements of the program when they matriculated. If a student wishes to complete the degree requirements of the new curriculum, the student may request this in writing to the CSSH Graduate Office via gradcssh@northeastern.edu.

School of Criminology and Criminal Justice

Website (<https://cssh.northeastern.edu/sccj/>)

CSSH Graduate Programs General Regulations (p. 1239)

The School of Criminology and Criminal Justice prepares students for meaningful careers in criminology, justice policy, the law, criminal justice, and related fields, including professional research careers. We do this by applying multidisciplinary social science tools that predict and explain crime, as well as deepening the understanding of policies that improve our systems of justice. Our approach is experiential, and our methods for teaching are rooted in knowledge creation as a top-tier research program. Our goal is to create ethical problem solvers who are prepared to tackle important crime and justice issues facing society. Our educational goals for students include a commitment to identify and address the role of systemic racism and intersecting dimensions of oppression in the development and application of justice system policies and practices, crime and justice theory, and research.

The school offers a Master of Science degree in criminology and criminal justice and a PhD degree in criminology and justice policy. In addition, the school offers a JD/MS in criminology and criminal justice program and a JD/PhD in criminology and justice policy in conjunction with the School of Law.

Programs

Doctor of Philosophy (PhD)

- Criminology and Justice Policy (Boston) (p. 1246)

Master of Science (MS)

- Criminology and Criminal Justice (Boston) (p. 1249)

Dual Degrees

- Law, JD/Criminology and Justice Policy, PhD (Boston) (p. 984)
- Law, JD/Criminology and Criminal Justice, MS (Boston) (p. 984)

Graduate Certificate

- Crime Analysis and Mapping (Boston) (p. 1251)

Criminology and Justice Policy, PhD (Boston)

The doctoral program in criminology and justice policy at the School of Criminology and Criminal Justice at Northeastern University seeks to prepare students for professional and research careers in criminal justice, criminology, and related fields by applying multidisciplinary and comparative social science to understand, predict, and explain crime and contribute to the development of public policy within urban communities. Using an active-learning approach, the school seeks to develop its students intellectually and ethically, while providing them with a keen appreciation for the complexities of crime and public and private efforts to make communities safer and to ensure justice.

The program is full time and is small and student centered. Students may enter the program with either a bachelor's degree or a master's degree. It is expected that students will be able to complete the program in four to five years, and students entering with a master's degree will be able to complete the program in three to five years.

Year one in the doctoral program offers students an opportunity to obtain a broad foundational knowledge in the discipline: one semester on theories of criminal justice process, two semesters of criminological theory, two semesters of statistics, and one semester of advanced research methods. To ensure that all students have mastered the foundational material emphasized across the required courses for the PhD program and can successfully integrate theory, research, and policy, all PhD students take a “foundations” qualifying examination at the end of their first year in the doctoral program.

After demonstrating mastery of the foundational knowledge in year one, students devote themselves to a more specific area of research in years two and three. Students demonstrate this commitment through the second and third qualifying examinations: an area exam and a publishable paper.

Following successful completion of the three qualifying examinations, and required and elective course work, the students proceed to a formal dissertation proposal defense.

Doctoral Degree Candidacy

A student achieves candidacy when they have successfully completed all course work (54 semester hours for students entering with a bachelor's degree or 42 semester hours for students entering with advanced standing), passed all three qualifying examinations, and deposited the final version of their dissertation proposal (approved by their full committee) with the school's graduate program office. Candidacy is certified, in writing, by the college.

Program Requirements

Criminology and Criminal Justice, MS (Boston)

The master's program in criminology and criminal justice at Northeastern University concentrates both on the problem of crime as a form of deviant behavior and on the criminal justice and private security systems that deal with it. The program emphasizes a systems approach to criminal justice, stressing policy development and analysis, as well as the impact these policies have on the individuals and organizations charged with delivering justice in a fair and equitable manner. In concept and scope, the MS degree encompasses such related disciplines as law, sociology, political science, psychology, criminology, and public administration.

The master's program is comprised of required courses encompassing both substantive and technical skills. Additionally, students choose elective courses from offerings within the graduate program in criminal justice or in other graduate programs in the College of Social Sciences and Humanities. The course offerings afford students the flexibility to customize their own programs, which may include an internship, directed study, or master's thesis.

For students interested in criminal justice in an increasingly digital world, the Master of Science in Criminology and Criminal Justice with a Concentration in Cybersecurity offers a strong criminal justice foundation coupled with the conceptual and practical skills that enable them to contribute to ensuring the reliability and security of cyberspace. Successful students will learn the principles, practices, and responsibilities of criminal justice professionals alongside the fundamental knowledge of computer science skills necessary for practical applications in the field. The concentration in cybersecurity provides criminal justice students an opportunity to learn how social behavior, policy, and legal rules can affect cybersecurity and the tools of information technology.

Faculty members in the graduate program represent several different academic disciplines, and teaching activities vary in nature depending on the instructors' specific objectives. The faculty's specialized interests help make possible a broad range of program offerings including courses on the criminal justice process, victimology, security management, criminal law, juvenile justice, law and psychology, and terrorism.

The master's program offers an optional cooperative education experience to eligible students. Students extend the two-semester program to 18 months through a co-op work experience and Experiential Integration (INSH 6864), the associated experiential integration course. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

Briefly stated, the graduate program endeavors to:

- Assist in developing criminal justice and private security leaders capable of assuming responsibility for policy planning and administration
- Offer students an opportunity to acquire the necessary skills and knowledge to conduct applied research while assisting them in developing the ability to apply this research in a variety of criminal justice settings
- Provide an opportunity for a solid educational foundation for those who wish to pursue more advanced graduate study beyond the Master of Science degree

Graduate study in criminology and criminal justice may be pursued on either a full- or part-time basis. All candidates for the Master of Science in Criminology and Criminal Justice degree must successfully complete a minimum of 32 semester hours of credit in coursework.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
CRIM 6200	Criminology	4
CRIM 6202	The Criminal Justice Process	4
Research and Statistics		
INSH 6300	Research Methods in the Social Sciences	4
INSH 6500	Statistical Analysis	4

Electives

Code	Title	Hours
Complete 16 semester hours in the following ranges:		16
CRIM 5000 to CRIM 7999		
INSH 5000 to INSH 7999		
POLS 5000 to POLS 7999		
PPUA 5000 to PPUA 7999		
SOCL 5000 to SOCL 7999		

The following courses may also count as electives toward the program:

ARTG 6460	Human-Centered AI
CS 5047	Exploring AI Trends and Tools
EDUT 6150	AI in Education
HLTH 5800	AI Across the Health Sciences
IE 5640	Data Mining for Engineering Applications
JRNL 6460	AI in Media Industries
MISM 6250	Strategic AI for Business
PHIL 5110	Responsible AI

Optional Concentration in Cybersecurity

Students adding a concentration in cybersecurity must use 12 semester hours of their elective credits to complete the following courses:

Code	Title	Hours
Required		
CY 5001	Cybersecurity: Technologies, Threats, and Defenses	4
Complete two of the following:		8
CRIM 6262	Evidence-Based Crime Policy	
CY 5010	Cybersecurity Principles and Practices	
CY 5200	Security Risk Management and Assessment ¹	
CY 5210	Information System Forensics ¹	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CY 5250	Decision Making for Critical Infrastructure	

¹ Instructor approval

Optional Co-op Experience

Code	Title	Hours
Four-month co-ops require registration at 1 semester hour for one term. Longer co-ops require registration at 1 semester hour per term for two consecutive terms.		1-2
CRIM 6964 and INSH 6864	Co-op Work Experience and Experiential Integration	

Program Credit/GPA Requirements

32 total semester hours required (33-34 with optional co-op)

Minimum 3.000 GPA required

Law, JD / Criminology and Justice Policy, PhD (Boston)

The JD/PhD program will expand the knowledge base and career options of students. The disciplines of criminology and justice policy and law share common interests in identifying opportunities to create conditions for justice, equality, and societal well-being. The dual degree will provide students with a comprehensive interdisciplinary understanding of what influences criminal justice problems and the sociopolitical, legal, and economic context in which they are found. Solving problems requires interdisciplinary knowledge and an analytical and practical skill set that includes interprofessional problem solving.

Up to 16 credits of coursework in the dual-degree program can be counted toward both the JD degree and the PhD degree. Of these 16 credits, no more than 12 credits of non-law courses can count toward the JD degree.

Students will take law courses during semesters spent in the law school. Students will take criminology courses during semesters spent in SCCJ. Please consult the School of Law (<https://www.northeastern.edu/law/>) for more information about JD requirements. Additionally, please consult SCCJ (<https://cssh.northeastern.edu/sccj/>) for more information about PhD requirements.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Law, JD / Criminology and Criminal Justice, MS (Boston)

The JD/MS program will expand the knowledge base and career options of students. The disciplines of criminal justice and law share common interests in identifying opportunities to create the conditions for justice, social equality, and societal well-being. The dual degree is designed to provide students with a comprehensive interdisciplinary understanding of what influences criminal justice problems and the social, political, legal, economic context in which they are found. Solving these problems requires interdisciplinary knowledge and an analytical and practical skill set that includes interprofessional problem solving.

Up to 16 credits of coursework in the dual-degree program can be counted toward both the JD degree and the MS degree. Of these 16 credits, no more than 12 credits of non-law courses can count toward the JD degree.

Students will take law courses during semesters spent in the School of Law. Students will take criminology courses during semesters spent in the School of Criminology and Criminal Justice. Please consult the School of Law (<https://www.northeastern.edu/law/>) for more information about JD requirements. Additionally, please consult SCCJ (<https://cssh.northeastern.edu/sccj/>) for more information about MS requirements.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Crime Analysis and Mapping, Graduate Certificate (Boston)

The Graduate Certificate in Crime Analysis and Mapping is a response to calls to integrate data-driven policing into the organizational culture of public safety agencies. Crime analysis is a deep examination of the criminogenic factors that help us understand why crime occurs. Crime mapping is a key component of crime analysis that is used by law enforcement, city planners, urban planners, corporate risk and enterprise professionals, and public health specialists to map, visualize, and analyze crime incident patterns. Together, sound crime analysis and crime mapping diagnose problems to facilitate tailored responses to crime and to reduce the frequency and severity of crime problems. Sound crime analysis allows for granular assessments of crime problems, which can facilitate the development of public safety programs in a manner that minimizes the risk for unintended harmful effects in the community. Crime analysis and mapping are key components of evidence-based programs that simultaneously promote crime prevention and social justice. This certificate is designed to contribute to students' understanding of how to critically assess crime patterns and connect crime data to other geographic data in order to inform prevention activities and efforts to improve public safety and security and to present the ways in which data management, geospatial and temporal crime data, and map construction can be used to develop crime policy.

Program Requirements

CSSH Graduate Programs General Regulations (p. 1239)

The Department of Economics offers both a Master of Science and a Doctor of Philosophy in Applied Economics. The most distinctive feature of these programs is their emphasis on applied economics, coupled with attention to providing a solid grounding in microeconomic and macroeconomic theory, and econometrics. Students come from all over the world, and the curriculum is designed with this in mind, striving for balance in coverage of economies that are rich and poor, large and small, mixed and market. This gives a unique flavor to the course of study, making it well suited to the analysis of the emerging global economy of the 21st century.

The Master of Science program is in applied economic policy analysis, with broad specialization areas. The program is large enough to support a full slate of core and area courses each year, yet small enough to maintain a sense of community among the students.

The program is especially appropriate for those who wish to work in or return to positions in government, teaching, finance, or industry while providing a rigorous basis for those who want to continue their studies to the doctoral level.

Our signature co-op program offers qualified MS students the opportunity to apply for paid work positions as practicing economists for up to six months as part of their academic program. This paid work experience enhances our MS degree and its emphasis on application. Students have an opportunity to learn how to apply their knowledge, solve problems, and make a difference in the world before they graduate. Our graduates either find full-time work in their area of specialty or go on to earn additional graduate degrees. All of our graduates find jobs after completing our program.

Master of Science students may choose to pursue a concentration in data science. The concentration strategically combines econometrics and machine learning techniques to analyze and predict outcomes with Big Data. Students in Seattle are required to select this concentration.

Our master's program-specific learning courses also feature "tracks." Along with the core MS classes, these informal tracks help our students prepare for different career paths. The Department of Economics currently offers three tracks (<https://cssh.northeastern.edu/economics/program/ms-graduate-program/available-tracks/>):

- Policy
- Quantitative analysis
- Academic

The PhD program is small and focused, and we welcome applications from those with a bachelor's or master's degree who have had prior training in macroeconomic and microeconomic theory and possess strong quantitative skills. Students take core course sequences in microeconomics, macroeconomics, and econometrics, followed by field course sequences in their second year. Students take field coursework in:

- Industrial organization, competition policy, and regulation
- Labor economics

In addition to industrial organization and labor, students take field courses, when available, in other research areas, including development economics.

Programs

Doctor of Philosophy (PhD)

- Economics (Boston) (p. 1253)

Master of Science (MS)

- Economics (Boston) (p. 1256)
- Economics (Seattle) (p. 1258)

Economics, PhD (Boston)

The PhD program in economics offers specializations in *industrial organization, competition policy, and regulatory economics* and *labor economics*.

Timeline

The PhD program for each student has two phases: the coursework phase followed by the dissertation phase. The coursework phase consists of required coursework and field courses, as well as taking and passing the three qualifying examinations.

A student moves into the dissertation phase upon successful completion of required coursework and upon passing the qualifying examinations. In the dissertation phase the student must prepare a dissertation proposal and present and defend the dissertation proposal before the student's proposal review committee. A student who successfully defends the dissertation proposal achieves candidacy. At the end of the dissertation phase, the student must defend their completed dissertation.

Coursework

Students entering the doctoral program will take seven core classes (28 semester hours), two classes in each of two doctoral fields (16 semester hours), and one elective (4 semester hours), for a total program requirement of 48 semester hours.

Core courses are focused on developing an advanced theoretical and quantitative foundation (macroeconomic theory, microeconomic theory, and applied econometrics). The remainder of the coursework is focused on the sophisticated application of analytical tools in the chosen field of concentration.

PhD students are expected to take three classes per semester as necessary to meet the degree's coursework requirements in the minimum number of semesters.

Field Coursework and Grade Requirement

Students must take four field courses, and they are strongly encouraged to take as many field courses as possible. Students should plan to take the two labor and two industrial organization courses, even if they arrange to do a field in development or health economics. Students interested in customizing their fieldwork should consult the PhD Program Guidelines on the website.

To maintain satisfactory standing in the PhD program, students must earn a grade of B or higher in at least four field courses. Students who do not earn a B in at least four field courses will be offered one opportunity to meet the grade standard. Consult PhD Program Guidelines on the website for further details.

Examinations

THREE QUALIFYING EXAMINATIONS—MACROECONOMICS, MICROECONOMICS, AND ECONOMETRICS

Three qualifying examinations are required upon completion of Macroeconomics 2, Microeconomics 2, and Econometrics 2. Students must receive a minimum grade of B– in the associated theory class to sit for its exam. Students are given a maximum of two attempts to pass each exam to continue in the program. Failure to sit for an exam at the appropriate time without prior consent of the graduate program director will result in an automatic fail on that exam.

Proposal Review

Students must complete the proposal review within two years of finishing their coursework; however, the department expects that a doctoral candidate's **dissertation committee** will be formed and the dissertation proposal presented within one year of reaching degree candidacy, which is normally by the end of the student's third year.

A **dissertation proposal** states the question or hypothesis, reviews the relevant literature, and explains how the proposed work will contribute to that literature and general understanding. The proposal sets forth data sources, models, and econometric issues in sufficient detail so that any faculty member not in the field will be able to assess its merits. Normally, the proposal should not exceed 30 double-spaced pages. The proposal is first approved by the dissertation committee and then presented at an open seminar.

Consult PhD Program Guidelines on the website for further details.

Doctoral Degree Candidacy

Upon successful completion of the proposal review, the student becomes a degree candidate. Candidacy may make the student eligible for a higher stipend and is an essential step in making satisfactory progress. Degree candidacy must be achieved within two years of completion of required coursework.

DISSERTATION

Students must complete their dissertation defense within five years of finishing their coursework, and postponing the proposal review does not alter the total time that students may use to complete their PhD. Under extenuating circumstances, a student may request an extension of this time frame from the Graduate Office.

One month in advance of the prospective date of the defense, the completed dissertation that is to be defended must be circulated to the committee members. At that time, all members of the committee must sign off on their agreement that the dissertation is ready for defense. Each student will have a dissertation committee chaired by a faculty member with an appointment in the economics department and at least two other members. Committees may have two cochairs. Committees should not have more than four members (except at interim stages if faculty are leaving the committee). Committees may include members outside the economics department, but at least two committee members must have an appointment in the economics department. The composition of the committee should be set before the proposal review and again, if changes occur, before the dissertation defense. Committee compositions must be approved by the graduate program director and department chair.

The dissertation defense normally takes place during the student's fifth year. Those who have not defended by the end of their fifth year must submit a status report and timetable for approval by their dissertation advisor and the PhD program director. Consult PhD Program Guidelines on the website for further details.

WRITING THE DOCTORAL DISSERTATION

Writing the dissertation entails working with the principal advisor and other committee members until it is determined that a dissertation is complete and the candidate is ready to present and defend the work at an open seminar. Candidates must arrange a date and time for the defense at least three weeks in advance. Students must familiarize themselves with the Theses and Dissertations Formatting Guidelines (<https://cssh.northeastern.edu/resources/theses-and-dissertations/>). The guide provides links to formatting tips, sample introductory pages, sample approval record, and deadlines. In addition, a checklist is provided to ensure students have fulfilled the required steps in the commencement clearance process.

Milestones

Maintaining satisfactory academic progress during doctoral candidacy requires the following:

PHD ANNUAL STUDENT PROGRESS REVIEW

Each PhD student will have an annual review of their progress toward the degree. Receipt of financial support administered by the graduate school is contingent upon satisfactory academic progress toward the degree and satisfactory performance in assigned duties. See the CSSH General Regulations (p. 1239) for further details.

FIELD WORKSHOP PARTICIPATION

All PhD students registered for Doctoral Dissertation or Continuation who are in residence are expected to regularly attend a field seminar in industrial organization or labor. These seminars meet roughly every week, and their purpose is to assist students in choosing and evaluating dissertation topics as well as advancing and completing their dissertation. All doctoral candidates will be expected to present their research at various stages of writing their dissertation.

SEMINAR SERIES PARTICIPATION

All PhD students registered for Doctoral Dissertation or Continuation who are in residence are expected to regularly attend academic seminars by speakers invited to campus through the Department of Economics Seminar Series. Participation in these seminars is an important component of doctoral training and is intended to expose students to current research in their field while helping to develop and hone their own presentation skills.

PRACTICAL EXPERIENCE IN APPLIED ECONOMICS PROGRAM

Participation in at least one semester of the Practical Experience in Applied Economics program is required of all students who have reached doctoral candidacy. The program is offered in the spring semester every other year. In this program, a variety of prominent practitioners working in consulting and government agencies in the fields of industrial organization and labor will describe their practical experience applying economics to a variety of consulting and policy problems, including antitrust, regulation, labor market policy, education, and health policy. This is a participatory class that will require advanced reading and preparation of questions for the practitioners in addition to other assignments.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Three qualifying examinations—microeconomics, macroeconomics, and econometrics

Annual reviews

Dissertation committee

Dissertation proposal

Dissertation defense

Economics, MS (Boston)

The Master of Science in Economics program focuses on applied economic policy analysis, with broad specialization areas. The program is large enough to support a full slate of core and area courses each year, yet small enough to maintain a sense of community among the students. The program is especially appropriate for those who wish to work in or return to positions in government, teaching, finance, or industry while providing a rigorous basis for those who want to continue their studies to the doctoral level.

The Master of Science in Economics offers the opportunity for master's students to apply for paid work positions through Northeastern University's world-famous co-op program. Qualified and approved master's students can participate in co-op as practicing economists for up to six months as part of their academic program (note that a minimum GPA of 3.000 is required in order to apply). This paid work experience enhances the degree and its emphasis on application. Students have an opportunity to learn how to apply their knowledge, solve problems, and make a difference in the world before they graduate. Our graduates either find full-time work in their area of specialty or go on to earn additional graduate degrees. All of our graduates have found jobs after completing our program. For more information, please visit the Master of Science in Economics (<https://cssh.northeastern.edu/economics/program/ms-graduate-program/>) website.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Quantitative		
ECON 5105 or ECON 6105	Math and Statistics for Economists Advanced Mathematics and Statistics for Economists	4
ECON 5140 or ECON 6140	Applied Econometrics Advanced Applied Econometrics	4
Theory		
ECON 5110 or ECON 6110	Microeconomic Theory Advanced Microeconomic Theory	4
ECON 5120 or ECON 6120	Macroeconomic Theory Advanced Macroeconomic Theory	4

The Department of Economics recommends that undergraduate PlusOne students enrolled in graduate courses notify the instructor that they are in the PlusOne program at the start of the semester.

Concentration or Electives Option

A concentration is not required. Students may complete the electives option in lieu of the Data Science for Economics concentration.

- Data Science for Economics (p. 1257)
- Electives Option (p. 1258)

Optional Co-op Experience

Code	Title	Hours
Four-month co-ops require registration at 1 semester hour for one term. Longer co-ops require registration at 1 semester hour per term for two consecutive terms.		1–2
ECON 6964 and INSH 6864	Co-op Work Experience and Experiential Integration	

Program Credit/GPA Requirements

32 semester hours required (33–34 with optional co-op)

Minimum 3.000 GPA required

CONCENTRATION IN DATA SCIENCE FOR ECONOMICS

CSSH Graduate Programs General Regulations (p. 1239)

The graduate program in English is grounded in the study of British and American literature through the most current modes of humanistic inquiry and in the disciplines of writing and rhetoric. Both in coursework and through the NULab for Digital Humanities and Computational Social Sciences (<https://web.northeastern.edu/nulab/>), the graduate program in English also offers training in the digital humanities. Altogether, our degree programs provide a challenging, flexible, and wide-ranging education in English studies today.

Programs

Doctor of Philosophy (PhD)

- English (Boston) (p. 1260)

Master of Arts (MA)

- English (Boston) (p. 1262)

Graduate Certificate

- Digital Humanities (Boston) (p. 1263)

English, PhD (Boston)

The PhD program seeks to train students to be productive scholars and teachers in the fields of both literary studies and rhetoric and composition. In course work, students read and analyze the important texts, current issues, and critical methodologies of the discipline. Drawing on the breadth of this preparation, students demonstrate their ability to recognize and produce scholarly arguments in designing the three comprehensive field papers in areas of scholarly interest and competence corresponding to recognized and emerging fields of study. Finally, the dissertation offers students an opportunity to design a focused research project in consultation with a dissertation advisor. Throughout the program, faculty works closely with doctoral students to develop their scholarly and professional identities in preparation for careers.

Academic Standing/Progress

To be considered in good academic standing, PhD students must be making progress toward their degree requirements, including maintaining a 3.500 minimum cumulative grade-point average (GPA) and completing the comprehensive examination within one year of finishing coursework.

Doctoral Degree Candidacy

Students entering with a relevant BA must complete 48 semester hours; students entering with a relevant MA must complete 24 semester hours. All students must complete the language requirement, pass the comprehensive examination, and submit their approved prospectus within six months after completing the comprehensive examination to reach candidacy.

General Regulations

Program requirements are described in the CSSH Graduate Programs General Regulations (p. 1239) and the Graduate Program in English PhD Guide (<https://cssh.northeastern.edu/english/resources/resources-for-current-grad-students/>). Both documents are updated annually.

Program Requirements

Bachelor's Degree Entrance

Milestones

- Annual progress review
- Reading proficiency in two languages other than English
- Comprehensive exam
- Dissertation committee
- Dissertation prospectus
- Doctoral degree candidacy
- Public prospectus/dissertation work-in-progress presentation
- Dissertation defense

English, MA (Boston)

The Master of Arts degree launches students into the study of literature, writing, and rhetoric at the graduate level. The program offers one and a half to two years of intensive study in the major fields of British and American literature, covering the debates and approaches that animate the discipline of English. Our MA graduates are fully prepared to proceed to study at the doctoral level, and their training in critical thinking, language skills, and cultural history has also proven to be fruitful preparation for a range of careers outside of academia.

The master's program offers an optional cooperative education experience to eligible students. Co-op is central to both the Northeastern University experience and the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the co-curricular experiential integration course.

Academic Standing/Progress

To be considered in good academic standing, MA students must be making progress toward their degree requirements, including maintaining a 3.000 minimum cumulative grade-point average.

General Regulations

Program requirements are described in the CSSH Graduate Programs General Regulations (p. 1239) and the Graduate Program in English MA Guide (<https://cssh.northeastern.edu/english/resources/resources-for-current-grad-students/>). Both documents are updated annually.

Digital Humanities, Graduate Certificate (Boston)

CSSH Graduate Programs General Regulations (p. 1239)

The Graduate Certificate in Digital Humanities allows students to pursue an organized course of study in digital humanities with the interdisciplinary faculty of the NULab for Texts, Maps, and Networks (<https://cssh.northeastern.edu/nulab/>). This certificate can be completed both by Northeastern University doctoral and master's students in the course of their existing program of study as well as those seeking a stand-alone certificate.

Digital humanities is an emerging field of research that is interdisciplinary in scope and collaborative in nature. The field is developing in relation to new digital technologies that have changed the objects of study, methods, and opportunities for research and teaching in existing humanities fields. Digitized texts are now read and accessed in new ways; digitized corpora of texts make possible new modes of quantitative and qualitative analysis (including “distant reading,” text mining, mapping, and network analysis); born digital objects constitute new primary sources in need of humanistic theorization, approaches, and critical vocabularies; and modes of encoding, aggregating, and connecting texts enable the creation of new archival resources that are changing our understanding of the archive itself as well as revealing new historical, literary, and cultural patterns.

The field is new and developing rapidly. Many students are eager for training in this area—both because DH is at the cutting edge of disciplinary work and because it offers new opportunities for employment within the academy and outside of it.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Final Project

The student will complete a final independent DH research project located in the student’s home program (such as a thesis, or a portion thereof) or participation in a collaborative DH project with substantial student participation. The final project will be overseen by the NULab faculty members teaching the NULab project seminar during its development; NULab workshop instructors will advise students on their projects and help students get guidance from other faculty as appropriate. Final projects will be submitted with three components: the project itself, a written project description of about 3,000 words, and a presentation to the NULab community. The DH certificate committee will formally approve all final projects.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Topics/Readings/Methods		
ENGL 7370	Introduction to Digital Humanities	4
or HIST 7370	Texts, Maps, and Networks: Readings and Methods for Digital History	

Lab Project Seminar

Complete the following (repeatable) course twice:		4
INSH 7910	NULab Project Seminar	

Elective

Code	Title	Hours
Complete 4 semester hours from the following:		4
ARTG 5100	Information Design Studio 1: Principles	
ARTG 5120	Research Methods for Design	
ARTG 5150	Information Visualization Principles and Practices	
CS 6120	Natural Language Processing	
CS 7250	Information Visualization: Theory and Applications	
CS 7260	Visualization for Network Science	
CS 7290	Special Topics in Data Science

history.department@northeastern.edu (gradhistory@northeastern.edu)

CSSH Graduate Programs General Regulations (p. 1239)

Graduate work in history focuses on global and world history. Students at both the master's and doctoral levels concentrate on the intersections and connections between national, regional, and global developments. The Department of History also offers a master's degree with a concentration in public history that emphasizes the study of material culture, historical exhibits and museums, historical agencies, and archival administration. Recent doctoral students have been the recipients of major fellowships for conducting dissertation research abroad including Fulbright, Fulbright-Hays, Social Science Research Council, and Chateaubriand fellowships.

Programs

Doctor of Philosophy (PhD)

- History (Boston) (p. 1265)

Master of Arts (MA)

- History (Boston) (p. 1267)

Graduate Certificate

- Public History (Boston) (p. 1269)

History, PhD (Boston)

The PhD program, with a focus on global, transnational, and comparative history, seeks to train research historians who plan to teach at the college and university level. Systematic training in theory and methodology and preparation for college teaching are distinctive features of the Northeastern program.

Academic Standing/Progress

Students are required to maintain an overall GPA of at least 3.500. In addition, the PhD annual review is based on a report by the student's advisor with attention to:

1. Success in setting up a doctoral committee
2. Passing the departmental language examination in the language of their field
3. Successful performance of teaching assistant duties
4. Successful completion of courses in the tiered system (i.e., the required course sequence)
5. Successful completion, where appropriate, of other required activities, including construction of the comprehensive examination list and the dissertation proposal and scheduling of comprehensive examinations

Doctoral Degree Candidacy

Students entering without an MA in history must complete 45 semester hours of coursework; pass the qualifying examination; and successfully defend a dissertation proposal by the end of the third year in the program. Students entering with an MA in history must complete 29 semester hours of coursework; pass the qualifying examination; and successfully defend a dissertation proposal by the end of the third year in the program. Upon completion of these requirements, students will be deemed PhD degree candidates by the college.

History, MA (Boston)

CSSH Graduate Programs General Regulations (p. 1239)

The Master of Arts in History offers two concentrations: public history and world history.

Public history encompasses the practice of history outside the academy in museums, state and local historical societies, archives, the National Park Service, and more. Public history includes the study of such topics as material culture, historical exhibits and museums, historical agencies, archival administration, and how difficult issues including slavery and site of violence are presented to the public.

World history focuses on the history of regions or peoples in Africa, Europe, Latin America, Asia, or the United States, with attention to the intersections and connections between national, regional, and global developments.

The master's program offers an optional cooperative education experience ("co-op") to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences as practicing public historians. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

Academic Standing/Progress

Students are expected to maintain a 3.000 grade-point average (GPA). Should the GPA drop below 3.000, the student will be placed on academic probation and allowed one more semester to bring their GPA to the 3.000 level. If the student is not able to meet this requirement by the end of the following semester, the student may be asked to leave the program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

The Master of Arts in History offers two concentrations: world history (p. 1269) and public history (p. 1268). The program requires a concentration. Please consult with a Department of History graduate program director for additional details.

Core Requirements

Code	Title	Hours

HIST 7205 to HIST 7218		
HIST 7220 to HIST 7297		

Public History, Graduate Certificate (Boston)

The Graduate Certificate in Public History allows students to pursue an organized course of study in public history. Students have an opportunity to gain a knowledge of core methods and issues in the field of public history and are enabled to use public history approaches in their own research and work.

Public history is a well-established field of practice that marries academic research and methods to public applications and collaborations. Public historians typically work in museums, archives, historical societies, documentary film production, and social activism, though training in public history is useful to a wide variety of humanistic, social science, and legal fields.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Political Science

Website (<https://cssh.northeastern.edu/polisci/>)

Department Chair, Program Directors, and Staff Members (<https://cssh.northeastern.edu/polisci/staff-and-department-leadership/>)

Graduate training in political science prepares students to analyze important issues in world affairs and succeed in a wide array of careers—from government and academia to the nonprofit and private sectors. Graduate programs in political science, public policy, public administration, security and resilience studies, and international affairs at Northeastern University explore the theory and practice of politics, public policy, and public management in the United States and throughout the world. In teaching and research, faculty members in the department cover a broad range of topics and issues in the field of political science. Core areas of inquiry within our department include national and international security, international and U.S. public policy, resilience, network science, European studies, Middle East studies, and democratization and development.

Programs

Doctor of Philosophy (PhD)

- Political Science (Boston) (p. 1270)

Master of Arts (MA)

- Political Science (Boston) (p. 1272)

Master of Science (MS)

- Resilience Studies (Boston) (p. 1275)

Graduate Certificate

- Resilience Studies (Boston) (p. 1276)

Political Science, PhD (Boston)

The Doctor of Philosophy in Political Science is grounded in the core fields of the discipline—American government and politics, comparative politics, international relations, and public policy. Students identify a primary and secondary field as areas of emphasis. The curriculum introduces students to the core fields and also seeks to develop their research skills through a series of methods courses. Students may develop a traditional, academic focus in one of the fields, or they may combine it with public policy to highlight a policy orientation. The program focuses on preparing students to be academic scholars and teachers as well as practitioners in research and public service. The PhD degree includes completion of required courses, passing a written and oral comprehensive examination, and the successful defense of the dissertation before a faculty committee.

Credit Requirements and Advanced Standing

Students entering with a bachelor's degree must complete 56 semester hours. Students currently in the MA or MPA program and accepted into the PhD program before completing the MA or MPA must complete 56 semester hours as well as all curriculum requirements of the PhD program.

Students entering with a master's degree may receive advanced standing for relevant prior coursework but must complete a minimum of 40 semester hours. Students entering with a Northeastern MA in political science or international affairs must complete a minimum of 24 semester hours while also satisfying all PhD course requirements. Master's-level coursework that results in advanced standing is evaluated by the graduate program director to determine its applicability to the PhD curriculum.

Doctoral Degree Candidacy

Doctoral degree candidacy is attained after successfully completing all coursework, comprehensive examination, and the dissertation proposal defense.

Academic Standing/Progress

All doctoral students must maintain an overall cumulative grade-point average (GPA) of 3.500 while making progress toward the degree requirements. Students who fall below any applicable standard for two consecutive semesters are subject to dismissal from the graduate program. Additionally, receipt of financial support administered by the department, college, or university is contingent on satisfactory academic progress toward the degree and specific guidelines as published in the terms of award. Students who have ungraded courses or courses graded as incomplete risk no longer being eligible for financial aid awards.

Language Proficiency

Students who conduct research in a language other than English must demonstrate proficiency as necessary for completion of the dissertation. Language courses do not count as electives.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

CSSH Graduate Programs General Regulations (p. 1239)

The Master of Arts program focuses on the core scholarly areas of political science. Students specialize in one of five concentration areas: American government and politics, comparative politics, international relations, public policy, and security studies. Courses in the MA program serve as a foundation for work in a doctoral program or as preparation for careers in government, nonprofit organizations, or related work in the private sector.

To earn the Master of Arts in Political Science degree at Northeastern University, you must successfully complete 32 semester hours (typically eight courses) of credit. Full-time students can expect to complete the degree within two academic years. Coursework consists of 4 semester hours in a required statistics course, 12 semester hours within a chosen concentration, and 16 semester hours of electives (including the experiential education requirement). To see the full breakdown, click the Program Requirements tab above.

Academic Standing/Progress

Satisfactory progress in the MA program includes maintaining a grade-point average of 3.000 overall as well as in the student's concentration area. A final cumulative GPA of at least 3.000 in all coursework is required to qualify for the Master of Arts degree. Any course in which a student earns lower than a C grade cannot be used to fulfill concentration area requirements. A student who fails to make satisfactory progress is placed on academic probation, which is a warning that the student may not be allowed to continue in the graduate program unless the deficiency is addressed.

Experiential Learning Requirement

In addition to in-class coursework, students are required to complete an experiential education component that advances their learning, research, and/or career objectives. Experiential education offers MA students a direct experience with focused reflection relevant to their academic studies. For students with research interests, the experience focuses on related activities, such as primary source analysis and data gathering. For other students, the experience involves engagement with areas of practice and policy, such as an internship. Students register for the relevant course with a minimum of 4 semester hours and maximum of 8 semester hours to satisfy the experiential education requirement.

An optional cooperative education experience can also satisfy the experiential education requirement. Co-op education is central to both the Northeastern experience and to the College of Social Sciences and Humanities Experiential Liberal Arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

Resilience Studies, MS (Boston)

Resilience studies is an emerging field of inquiry that focuses on how global, national, and subnational actors manage a range of chronic transnational challenges—such as terrorism, organized crime, weapons proliferation, cyberattacks, bioterrorism, climate change and catastrophic disasters, migration, and radicalization—that can be destabilizing to societies. It explores how strategic doctrines, organization processes, bureaucratic behaviors, and security tools and tactics are adapting to these challenges by placing greater emphasis on resilience. Resilience is a concept rooted in multiple disciplines that is gaining widespread currency at the community, societal, and global levels given the prevalence of human-made and naturally occurring threats that do not lend themselves to preventive and protective measures. Strategies for dealing with these threats emphasize measures that mitigate, respond to, recover from, and adapt to risk in order to safeguard essential functions and societal values. Many of these measures involve the role of technologies, system design, and engineering as well as policy, regulatory, and governance issues. Students at Northeastern University who enroll in the Master of Science in Resilience Studies have an opportunity to become prepared to inform and support domestic and international efforts to deal with the major sources of turbulence in the 21st century.

The master's program offers an optional cooperative education experience to eligible students. Co-op is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

To earn the Master of Science in Resilience Studies degree at Northeastern, you must successfully complete 32 semester hours (or 33–34 semester hours with co-op). Full-time students can expect to complete the degree within one calendar year. Cost per semester hour may vary based on the college that offers the course. See Tuition and Fees (p. 72) for more information.

Academic Standing/Progress

Satisfactory progress in the MS program includes maintaining a minimum grade-point average of 3.000.

Program Requirements**Core Requirements**

Code	Title	Hours
Required Courses		
POLS 7341	Security and Resilience Policy ¹	4

Resilience Studies, Graduate Certificate (Boston)

The goal of the Graduate Certificate in Resilience Studies is to prepare students to manage contemporary transnational risks by offering them an opportunity to gain a comprehensive understanding of the principles and policies for security and resilience of critical systems. This goal is achieved by:

- Passing a core course in security and resilience policy that introduces students to a comprehensive approach to managing transnational risks
- Passing recommended foundation courses for cyberspace policy, security administration, and counterterrorism specializations that provide a broad perspective on transnational threats and the means states use to address them
- Learning how to work with others in groups and exercise leadership in teams by completing group assignments and projects

The certificate requires students to take three courses for a total of 12 semester hours. This program can be completed at Northeastern University's Boston campus or online.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

The School of Public Policy and Urban Affairs is nationally and internationally recognized for excellence and innovation in policy-oriented education, applied research, and engagement. Our mission is to educate professional master's and doctoral students who are sought after as policy analysts, program evaluators, and leaders of nonprofit, public, private sector, and academic institutions; to create and disseminate policy-relevant knowledge and analytical methods of value to policymakers and the public; and to serve the broader community through policy analysis and technical assistance.

The school is committed to excellence in research and education on pressing and emerging policy issues of the day—public health, climate change, environmental challenges, the court and justice systems, and creating sustainable and resilient cities that provide economic opportunity for their residents. We define our approach as locally informed and internationally relevant. Our hallmark is to engage students in building the world that they would like to live in through experiential learning opportunities and applied research.

CSSH Graduate Programs General Regulations (p. 1239)

The PhD in Public Policy is an interdisciplinary program that combines social science and legal theoretical perspectives with quantitative and qualitative research methodologies. The faculty in the School of Public Policy and Urban Affairs support students’ research and dissertations in three broad areas of inquiry—urban and regional policy, sustainability and resilience, and health management and policy. Students work with faculty advisors to formulate a plan of study within their field of concentration by choosing from graduate programs offered in the School of Public Policy and Urban Affairs, the College of Social Sciences and Humanities, and in other colleges and schools at Northeastern University. Students study a common body of knowledge in core courses in policy theory, research methods, and statistics, followed by courses in each student’s respective concentration. The school’s research centers and faculty research projects provide opportunities for students to develop insight, experience, and synergies to help with their own research goals. The college and school offer a high level of support allowing all students to be devoted full time to their studies and research. The program is full time and in residence only.

Doctoral Degree Candidacy

Complete all required coursework with a minimum 3.500 grade-point average, pass the comprehensive examinations, and defend a dissertation proposal. Students entering without a JD or master’s degree must complete 55 semester hours. Students entering with a JD or master’s degree must complete 47 semester hours.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

- Annual review
- Comprehensive examination
- Dissertation committee
- Dissertation proposal
- PhD candidacy
- Dissertation defense

Core Requirements

A grade of B+ or higher is required in each course.

Code	Title	Hours
Seminar		
PPUA 7204	Seminar on Policy Theory	4
Complete the following two courses for a minimum of 4 semester hours total:		4
PPUA 7976	Directed Study	
PPUA 9984	Research	

Research and Statistical Methods

INSH 6300	Research Methods in the Social Sciences	4
INSH 6302	Qualitative Methods	4
INSH 7400	Quantitative Analysis	4

Advanced Methods

Complete one of the following (an additional concentration elective may be taken in lieu of the advanced methods elective): 4

INSH 7500	Advanced Quantitative Analysis
or INSH 7600	Multilevel Theorizing and Analysis

Experiential Research Residency

A PhD research residency or waiver is required.

Code	Title	Hours
PPUA 9980	Experiential PhD Research Residency	0

Concentrations

Complete one of the following concentrations:

- Health Policy and Management (p. 1279)
- Sustainability and Resilience (p. 1280)
- Urban and Regional Policy (p. 1280)

Exam and Dissertation

Code	Title	Hours

Exam Prep

Only needed for PhD students who have completed all coursework but have not yet passed the comprehensive exam/proposal defense. Repeatable:

PPUA 8960	Exam Preparation—Doctoral

Dissertation

PPUA 9990	Dissertation Term 1
PPUA 9991	Dissertation Term 2

Dissertation Continuation

Following completion of two semesters of dissertation (PPUA 9990 and PPUA 9991), registration in the following class is required in each semester (including summer if the dissertation is submitted in summer) until the dissertation is completed:

PPUA 9996	Dissertation Continuation

Program Credit/GPA Requirements

International Affairs, MA (Boston)

School of Public Policy and Urban Affairs (<https://cssh.northeastern.edu/policyschool/>)

We live in an increasingly interconnected global environment where people, goods, ideas, and conflicts traverse borders with rising frequency. Leaders in the activist, policy, and academic spheres must learn not only how to critically analyze these phenomena but also to envisage harnessing their constructive potential. The Master of Arts in International Affairs is an interdisciplinary graduate program dedicated to preparing tomorrow's global citizens.

A holistic approach to enhancing our understanding of the world must span the limits of any one academic field and embrace cross-disciplinary analytical competencies. Spanning several social sciences and humanities, our courses are taught by leading scholars who research democratization, gender, globalization, ethnic conflict and cooperation, human rights and international law, international relations, social activism, social justice, and many other topics. Through its core courses, its two thematic emphases—globalization, development, and social justice and international public policy—as well as global, policy, and methodological electives, this graduate program allows students to pursue a variety of themes.

The master's program offers an optional cooperative education experience ("co-op") to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

Please review the tuition and fee (p. 72) page as credit costs differ depending on the College in which the course is located.

Sustainability and Climate Change Policy Concentration

This graduate concentration is available to students in the Master of International Affairs (MIAF) program in the College of Social Sciences and Humanities. It is designed to enable MIAF students to develop deeper insights into the policy dimensions of these intertwined but conceptually distinct realms of inquiry and action, and in both domestic and international domains. The concentration is comprised of three courses.

CSSH Graduate Programs General Regulations (p. 1239)

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Political Economy		
Complete 8 semester hours from the following:		8
POLS 7387	Global Governance

Public Administration, MPA (Arlington)

Website (<https://publicaffairs.northeastern.edu/master-of-public-administration/>)

CSSH Graduate Programs General Regulations (p. 1239)

The Master of Public Administration is the management and leadership degree for those seeking to serve the public good. The program seeks to equip its students with skills in policy analysis, program evaluation, research methods, and written and verbal communications.

Students have an opportunity to develop competencies in budgeting and human resources, organizational management and leadership, and the interplay between ethics and accountability in a diverse society.

Throughout the degree program, students gain career-oriented experience through internships, small group projects, and other interactions with professionals in the field. These experiences are designed to enable the Northeastern University MPA graduate to move into a wide array of public and nonprofit sector positions at the local, state, national, and international levels. The Northeastern MPA program is nationally accredited by NASPAA.

Mission Statement

The Master of Public Administration program at Northeastern University aspires to provide a platform where students, faculty, and community partners address contemporary challenges in public administration and governance. Recognizing the complexities of the fast-changing civic environment in the 21st century, we design adaptable academic and professional pathways.

Our pragmatic approach fosters an environment that invites participation from a diverse range of actors including scholars, nonprofit leaders, and policymakers. We emphasize experiential learning, inviting students to engage with real-world issues and collaboratively devise feasible solutions. We often view challenges through an urban-centered lens, and we embrace a global to local perspective.

Accountability and inclusivity lie at the heart of our program. We are committed to ethical governance and strive to create a space that values social equity and inclusion. We aim to develop innovators equipped with the skills and awareness to bring about transformative solutions that extend beyond geographic and disciplinary boundaries. By setting measurable objectives, we uphold these standards and continually assess and improve the impact of our initiatives.

Please review the tuition and fees (<https://studentfinance.northeastern.edu/billing-payments/tuition-and-fees/>) page as credit costs differ depending on the college that offers the course.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose cumulative GPA falls below 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Public Administration, MPA (Boston)

Website (<https://publicaffairs.northeastern.edu/master-of-public-administration/>)

CSSH Graduate Programs General Regulations (p. 1239)

The Master of Public Administration is the management and leadership degree for those seeking to serve the public good. The program seeks to equip its students with skills in policy analysis, program evaluation, research methods, and written and verbal communications.

Students have an opportunity to develop competencies in budgeting and human resources, organizational management and leadership, and the interplay between ethics and accountability in a diverse society.

Throughout the degree program, students gain career-oriented experience through internships, small group projects, and other interactions with professionals in the field. These experiences are designed to enable the Northeastern University MPA graduate to move into a wide array of public and nonprofit sector positions at the local, state, national, and international levels. The Northeastern MPA program is nationally accredited by NASPAA.

Mission Statement

The MPA program at Northeastern aspires to provide a platform where students, faculty, and communities partner to address contemporary challenges in public administration and governance. Recognizing the complexities of the fast-changing civic environment in the 21st century, we design adaptable academic and professional pathways.

Our pragmatic approach fosters an environment that invites participation from a diverse range of actors including scholars, nonprofit leaders, and policymakers. We emphasize experiential learning, inviting students to engage with real-world issues and collaboratively devise feasible solutions. We often view challenges through an urban-centered lens, and we encourage global to local perspectives.

Accountability and inclusivity lie at the heart of our program. We are committed to ethical governance and strive to create a space that values social equity and inclusion. We aim to develop change makers equipped with the skills and awareness to bring about transformative solutions that extend beyond geographic and disciplinary boundaries. By setting measurable objectives, we uphold these standards and continually assess and improve the impact of our initiatives.

Internship

The MPA program requires all students to complete an internship. We offer an optional cooperative education experience to eligible students. Northeastern's signature co-op program provides qualified master's students with a four- to six-month work experience in government, nonprofits, and the private sector—in Boston, across the United States, and globally. Students who choose to do co-op can substitute it for the internship requirement. Co-op is central to both the Northeastern experience and to the experiential liberal arts framework of the College of Social Sciences and Humanities.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose cumulative GPA falls below 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Public Administration, MPA (Oakland)

Website (<https://publicaffairs.northeastern.edu/master-of-public-administration/>)

CSSH Graduate Programs General Regulations (p. 1239)

The Master of Public Administration is the management and leadership degree for those seeking to serve the public good. The program seeks to equip its students with skills in policy analysis, program evaluation, research methods, and written and verbal communications.

Students have an opportunity to develop competencies in budgeting and human resources, organizational management and leadership, and the interplay between ethics and accountability in a diverse society.

Throughout the degree program, students gain career-oriented experience through internships, small group projects, and other interactions with professionals in the field. These experiences are designed to enable the Northeastern University MPA graduate to move into a wide array of public and nonprofit sector positions at the local, state, national, and international levels. The Northeastern MPA program is nationally accredited by NASPAA.

Mission Statement

The mission of the MPA program at Northeastern is to serve the needs of the public affairs community, including students, working professionals, faculty, and researchers, by providing a practice-oriented and research-based graduate educational experience. The faculty pledges the best instruction available in a set of courses designed to integrate theoretical foundations with practical skills. The MPA program is designed to prepare students to be effective in a dynamic and increasingly diverse professional environment. We also commit ourselves to assisting students in every possible way to secure internships, postgraduate employment, and overall career advancement. Students, in turn, are expected to meet high levels of academic excellence combined with ethical and professional integrity. Committed to the ideals of public service and advancing the public interest, we seek students who share the same enthusiasm.

The MPA program requires all students to pursue an internship experience and offers an optional cooperative education experience to eligible students. Co-op is central to both the Northeastern experience and to the experiential liberal arts framework of the College of Social Sciences and Humanities. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies across the United States.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose cumulative GPA falls below 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A cumulative 3.000 grade-point average is required for the core requirements.

Public Policy, MPP (Arlington)

School of Public Policy and Urban Affairs (<https://cssh.northeastern.edu/policyschool/>)

CSSH Graduate Programs General Regulations (p. 1239)

The Master of Public Policy is the recognized industry standard for those seeking careers in public policy analysis and design. The MPP degree emphasizes the analysis of data and other relevant information to enable graduates to assess public problems, develop appropriate policy responses, and evaluate program effectiveness. MPP graduates enter careers as policy analysts, researchers, consultants, program evaluators, and policymakers in a broad range of public and nonprofit settings, ranging from the local to the international, and in the private sector. At Northeastern University, the MPP joins the nationally accredited Master of Public Administration as well as our Master of Science in Urban Planning and Policy, Master of Science in Urban Informatics, Master of Science in Environmental Science and Policy, and Master of Arts in International Affairs. As such, MPP students are part of a larger School of Public Policy and Urban Affairs community of great intellectual and policy area diversity.

The MPP programs require all students to engage in an internship experience and offer an optional cooperative education experience to eligible students. Cooperative education is central to both the Northeastern experience and to the experiential liberal arts framework of the College of Social Sciences and Humanities. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States.

Please review the tuition and fees (p. 72) page as credit costs differ depending on the college that offers the course.

Concentration in Healthcare Management and Policy

This concentration is designed to enable students to develop a deeper understanding of the contemporary healthcare sector, including the intricacies of U.S. health policy, and competencies in healthcare management. The concentration is comprised of 12 semester hours, with courses taken from health management, health policy, and electives.

Concentration in Sustainability and Climate Change Policy

This graduate concentration is available to students in the MPP program in the College of Social Sciences and Humanities. It is designed to enable MPP students to develop deeper insights into the policy dimensions of these intertwined but conceptually distinct realms of inquiry and action, in both domestic and international domains. The concentration is comprised of three courses.

Please review the tuition and fees (p. 72) page as credit costs differ depending on the college in which the course is located.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Engineering and Public Policy, MS (Boston)

For program contact information, please visit the College of Engineering website (<https://cee.northeastern.edu/academics/graduate-studies/ms-cepp/>).

The purpose of this degree is to provide students with a background in engineering with the tools necessary to conduct robust policy analysis. It includes required core courses from the Department of Civil and Environmental Engineering and the School of Public Policy and Urban Affairs, complemented by electives in engineering and public policy, which can be met by two courses and a master's report (recommended), or by one course and a thesis, or by three courses. A minimum of 16 semester hours must be taken in the College of Engineering.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP**Master's Degree in Engineering and Public Policy with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Engineering and Public Policy in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved technical courses.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Sustainable Engineering and Systems Modeling Requirements

Code	Title	Hours
Complete 12 semester hours from the following:		12
CIVE 5261 or PPUA 5261	Dynamic Modeling for Environmental Investment and Policymaking Dynamic Modeling for Environmental Decision Making	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5368	Air Quality Management	
CIVE 6566	Sustainable Urban Transportation: Netherlands	
CIVE 6777	Climate Hazards and Resilient Cities Abroad	
CIVE 6778	Climate Adaptation and Policy Abroad	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7110	Critical Infrastructure Resilience	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
CIVE 7151	Urban Informatics and Processing	
CIVE 7155	Dynamics and Control of Infrastructure Systems	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	
SBSY 5400	Sustainable Building Systems Seminar	

Public Policy and Analysis Requirements

Code	Title	Hours
Complete 8 semester hours from the following:		8
INSH 5301	Introduction to Computational Statistics	
INSH 6300	Research Methods in the Social Sciences	
INSH 6500	Statistical Analysis	
INSH 7400	Quantitative Analysis	
LPSC 7311	Strategizing Public Policy	
PPUA 5246	Participatory Modeling for Collaborative Decision Making	
PPUA 5260	Ecological Economics	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
PPUA 6212	Research Toolkit for Urban and Regional Policy: Project Management	
PPUA 6502	Economic Analysis for Policy and Planning	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6509	Techniques of Program Evaluation

PPUA 5262	Big Data for Cities	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change	
PPUA 5268	International Environmental Policy	

PPUA 5270	Food Systems and Public Policy
PPUA 6101	Environmental Science and Policy Seminar 1
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context
PPUA 7346	Resilient Cities

Environmental Science and Policy, MS (Boston)

The Master of Science in Environmental Science and Policy program emphasizes a broadly interdisciplinary and synthetic approach that integrates knowledge in the environmental sciences (conservation biology, climate change, fisheries science, ecosystem function, biodiversity, restoration ecology) with the social sciences (policy, economics, sociology, political science, and development) and humanities (environmental history, philosophy, and ethics). The goal of the program is to equip professionals with substantive breadth in knowledge and skills at the intersection of environmental science and policy. The program focuses on training students to think critically about the underlying causes of environmental problems and understanding the reciprocal relationships between coupled human-natural ecosystems and the interconnections between social and technological innovations. The program explores practical approaches and potential solutions that decision makers need to evaluate in policy debates related to promoting environmental sustainability.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Seminars		
PPUA 6101	Environmental Science and Policy Seminar 1	4
ENVR 6102	Environmental Science and Policy Seminar 2	4
Skills Courses		
Complete 2 courses from the following. At least one course needs to be taken from the College of Science Skills Course List and one course from the College of Social Sciences and Humanities Skills Course List.		8
<i>College of Science Skills Course List</i>		
EEMB 5130	Population Dynamics	
EEMB 5522	Experimental Design Marine Ecology

PPUA 6502	Economic Analysis for Policy and Planning	
PPUA 6505	Public Budgeting and Financial Management	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6509	Techniques of Program Evaluation	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	

Electives

Complete five courses from the following list. At least one course must be taken from the College of Science Elective Course List and one course from the College of Social Sciences and Humanities Elective Course List. Any skills course not taken to fulfill the skills courses requirement can be taken as an elective. Students may petition to enroll in other relevant graduate courses offered by other schools at Northeastern University.

COLLEGE OF SCIENCE ELECTIVE LIST

Code	Title	Hours
EEMB 5130 - EEMB 8984		
ENVR 5115 - ENVR 6900		

COLLEGE OF SOCIAL SCIENCES AND HUMANITIES ELECTIVE LIST

Code	Title	Hours
INSH 5302	Information Design and Visual Analytics	
INTL 5100	Climate and Development	
LPSC 7311	Strategizing Public Policy	
LPSC 7312	Cities, Sustainability, and Climate Change	
PHTH 5214	Environmental Health	
PHTH 5230	Global Health	
PPUA 5100 - PPUA 7346		
SOCL 7267	Environment, Health, and Society	

Program Credit/GPA Requirements

36 total semester hours required
Minimum 3.000 GPA required

Urban Informatics, MS (Arlington)

The Master of Science in Urban Informatics (MSUI) degree couples comprehensive data analytics skills with an understanding of the big questions faced by cities in the 21st-century city. This cutting-edge program is built upon a unique cross-college initiative, which offers comprehensive state-of-the-art training in the core skills of data analytics—including quantitative analysis, data mining, machine learning, and data visualization. Urban informatics students supplement training in these foundational skills with a specialized sequence of courses that address how data and technology are being used to tackle key social, infrastructural, and environmental challenges.

By combining a theoretically informed perspective of cities with advanced skills in accessing, managing, analyzing, and communicating insights from large complex, datasets, graduates are a part of the next wave of urban professionals ready to lead in the public, private, and nonprofit sectors. Given the continuous growth in urban data and technology, these professionals are essential to shaping the future of urban areas around the globe.

This program provides a uniquely integrated urban and informatics degree with a substantial experiential education component. The focus throughout is on practical application, and students have multiple opportunities to apply what they are learning.

The master's program offers an optional cooperative education experience (co-op) to eligible students. Co-op education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

Please review the tuition and fee (p. 70) page as credit costs differ depending on the college in which the course resides.

CSSH Graduate Programs General Regulations (p. 1239)

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Data Science Courses		
DA 5020	Collecting, Storing, and Retrieving Data	4
or DA 5030	Introduction to Data Mining/Machine Learning	
or PPUA 7237	Advanced Spatial Analysis of Urban Systems	
INSH 5301	Introduction to Computational Statistics	4
INSH 5302	Information Design and Visual Analytics	4

PPUA 5263	Geographic Information Systems for Urban and Regional Policy	4
Methods and Applications		
PPUA 5262	Big Data for Cities	4

Optional Co-op Experience

Code	Title	Hours
Four-month co-ops require registration at 1 SH for one term. Longer co-ops require registration at 1 SH per term for two consecutive terms:		1-2
PPUA 6964 and INSH 6864	Co-op Work Experience and Experiential Integration	

ELECTIVES

Code	Title	Hours
Complete 13 SH from the following:		13
Methods and Applications		
CIVE 7110	Critical Infrastructure Resilience	
CIVE 7380	Performance Models and Simulation of Transportation Networks	
CIVE 7381	Transportation Demand Forecasting and Model Estimation	
CIVE 7388	Special Topics in Civil Engineering (with prior approval of advisor)	
CIVE 7392	Special Topics in Environmental Engineering (with prior approval of advisor)	
IE 7374	Special Topics in Industrial Engineering	
INSH 6101	Agent-Based Modeling for Applied and Social Sciences	
PPUA 5230	Housing Policy	
PPUA 5235	Participatory Community Planning Methods	
PPUA 5246	Participatory Modeling for Collaborative Decision Making	
PPUA 5268	International Environmental Policy	
PPUA 5260	Ecological Economics	
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change	
PPUA 5265	Global Urbanization and Planning	
PPUA 5266	Urban Theory and Science	
PPUA 6101	Environmental Science and Policy Seminar 1	
PPUA 6502	Economic Analysis for Policy and Planning	
PPUA 6552	The Nonprofit Sector in Civil Society and Public Affairs	
PPUA 7346	Resilient Cities	
Analysis		
INSH 6302	Qualitative Methods

Climate and Resilience Concentration

This graduate concentration is available to students in the MSUI who want to specialize in the policy challenges that arise from climate change and the methodological tools designed to respond to them, especially those that help us understand and instill resilience in communities that are vulnerable to disruption. The concentration is comprised of three courses: a methods and applications course specific to the concentration; an analysis course specific to the concentration; and the requirement to complete a capstone or practicum relevant to climate and resilience.

Communities and Economic Development Concentration

This graduate concentration is available to students in the MSUI who want to specialize in the policy challenges associated with neighborhoods and communities and the methodological tools for addressing them. This includes examining more closely how communities work and the types of interventions that can help them to thrive and prosper. The concentration is comprised of three courses: a methods and applications course specific to the concentration; an analysis course specific to the concentration; and the requirement to complete a capstone or practicum relevant to communities and economic development.

Transportation and Infrastructure Concentration

This graduate concentration is available to students in the MSUI who want to specialize in the policy challenges and methods associated with transportation and related infrastructure. This includes questions of policy and operations pertaining to traffic management and public transit and the skills for analyzing mobility decisions. The concentration is comprised of three courses: a methods and applications course specific to the concentration; an analysis course specific to the concentration; and the requirement to complete a capstone or practicum relevant to transportation or infrastructure.

CSSH Graduate Programs General Regulations (p. 1239)

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Urban Planning and Policy, MS (Boston)

The Master of Science in Urban Planning and Policy program trains leaders interested in building just and sustainable solutions to today's critical urban problems. Students in the program develop the theoretical and analytical tools to understand contemporary challenges of social, racial, and environmental injustice in cities and urban regions. They develop professional tools to work effectively in the realms of planning, policy, politics, and advocacy to impact urban challenges, including affordable housing provision, equitable and sustainable economic growth, sustainable transportation, and climate change adaptation and mitigation. This innovative program combines the expertise in urban planning and policy analysis data analytics of the School of Public Policy and Urban Affairs with expertise in physical planning, design, and data visualization at the School of Architecture. The core curriculum of the program provides students with a solid foundation in essential skills and concepts, including techniques of effective community engagement, research design and statistics, economic analysis, legal foundations of urban planning and policy, and the history of urban development and urban planning. Students also have the opportunity to develop substantial expertise in a specialization area, including urban analytics, urban sustainability and resilience, urban design and physical planning, and urban development policy and planning.

The optional cooperative education experience (co-op) is available to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

In addition to the co-op option, students in the program have opportunities to gain experience in the application of their knowledge and skills via internships, class projects, and a capstone research report. They graduate prepared for careers working for state and local government, federal agencies, community development corporations and other nonprofit organizations, research institutes, and as private-sector planning consultants.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Planning and Policy		
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context	4
PPUA 6502	Economic Analysis for Policy and Planning	4
SUEN 6340	Topics in Urban Environmental Design	4
Research Design		
INSH 6300	Research Methods in the Social Sciences	4
Quantitative Techniques		
Students in the urban analytics focus area are encouraged to take INSH 5301.		
Choose one from the following:		4
INSH 5301	Introduction to Computational Statistics	
INSH 6500	Statistical Analysis	
Planning Law		
Choose one from the following:		2-4
LPSC 5201	Law and the City	
PPUA 5201	Urban Planning and the Law	
Planning and Social Justice		
Choose one from the following:		2-4
PPUA 5233	Contemporary Community Development	
PPUA 5235	Participatory Community Planning Methods	
PPUA 6219	Race, Justice, and Belonging in Planning Practice	

Focus Areas

Complete one of the following focus areas:

- Urban Design and Physical Planning (p. 255)
- Urban Analytics (p. 256)
- Sustainability and Resilience (p. 256)
- Urban Development Policy and Planning (p. 256)

PPUA 6964 and INSH 6864	Co-op Work Experience and Experiential Integration	

Program Credit/GPA Requirements

48 total semester hours required (50 with optional co-op)

Minimum 3.000 GPA required

Law, JD / Public Policy, MPP (Boston)

The JD/Master of Public Policy (MPP) is designed to equip graduates with a unique blend of skills for navigating a complex and rapidly changing policy landscape. The program builds on students' legal training with a compelling blend of skills in applied public policy analysis, policy design, and strategic policy formation. Students also gain career-relevant experience through internships, small group capstone projects, and other interactions with professionals in the field. All are part of a learning process designed to enable the Northeastern law and public policy graduates to navigate, and to redefine, diverse policy areas.

Ideally, students would apply to Northeastern's JD and MPP programs simultaneously. Those who apply and are admitted to both programs take MPP classes after completing their first year in the School of Law. Applicants may also be considered after they have enrolled in the JD program; interested JD students should consult the School of Law's Office of Academic and Student Affairs and the School of Public Policy and Urban Affairs graduate program director for more information.

Students enrolled in this dual-degree program will be able to count 8 JD credit hours toward their MPP degree and 12 MPP credit hours toward their JD degree. Students should consult advisors in each program if they have questions about which courses may be shared between degrees.

All JD students, including FlexJD students, are ordinarily eligible to apply into dual degree pathways.

Nonprofit Sector, Philanthropy, and Social Change, Graduate Certificate (Arlington)

School of Public Policy and Urban Affairs (<https://cssh.northeastern.edu/policyschool/>)

CSSH Graduate Programs General Regulations (p. 1239)

The Graduate Certificate in Nonprofit Sector, Philanthropy, and Social Change is a response to recent developments in social change theory, practice, and funding that are placing new demands and expectations on social change actors in the nonprofit, public, and private sectors, including nonprofit leaders, philanthropists, policymakers, and corporate social responsibility managers. These developments include the emergence of hybrid, cross-sector business models and new intermediary mechanisms for channeling the flow of capital into social change; new expectations and standards for performance measurement, transparency, and accountability; more sophisticated use of data and technology to support decision making, evaluation, and continual improvement; decreased public funding for traditional nonprofit activities; and the emergence of social media as a vehicle for mobilizing people and resources. The certificate enables social change professionals in all sectors to respond to these changes more effectively and will distinguish itself from other nonprofit certificate programs by focusing on the relationship between social program implementation and funding.

The certificate is a professionally oriented, application-based program for students seeking leadership positions in nonprofit organizations or in a public agency that deals extensively with nonprofits. The curriculum is designed to address the distinctive features and practices of the nonprofit sector and emphasizes management techniques helpful to nonprofit leaders.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirement

Code	Title	Hours
PPUA 6551	Nonprofit Organizations and Social Change	4

Electives

Code	Title	Hours
Complete 8 semester hours from the following. Courses outside this list may be taken as electives with approval of the graduate program director.		8

PPUA 6212	Research Toolkit for Urban and Regional Policy: Project Management
PPUA 6216	Research Toolkit for Urban and Regional Policy: Grant Writing
PPUA 6503	Managing People in Public and Nonprofit Sectors
PPUA 6509	Techniques of Program Evaluation
PPUA 6522	Administrative Ethics and Public Management
PPUA 6552	The Nonprofit Sector in Civil Society and Public Affairs

Nonprofit Sector, Philanthropy, and Social Change, Graduate Certificate (Boston)

School of Public Policy and Urban Affairs (<https://cssh.northeastern.edu/policyschool/>)

CSSH Graduate Programs General Regulations (p. 1239)

The Graduate Certificate in Nonprofit Sector, Philanthropy, and Social Change is a response to recent developments in social change theory, practice, and funding that are placing new demands and expectations on social change actors in the nonprofit, public, and private sectors, including nonprofit leaders, philanthropists, policymakers, and corporate social responsibility managers. These developments include the emergence of hybrid, cross-sector business models and new intermediary mechanisms for channeling the flow of capital into social change; new expectations and standards for performance measurement, transparency, and accountability; more sophisticated use of data and technology to support decision making, evaluation, and continual improvement; decreased public funding for traditional nonprofit activities; and the emergence of social media as a vehicle for mobilizing people and resources.

people and resources. The certificate enables social change professionals in all sectors to respond to these changes more effectively and will distinguish itself from other nonprofit certificate programs by focusing on the relationship between social program implementation and funding.

The certificate is a professionally oriented, application-based program for students seeking leadership positions in nonprofit organizations or in a public agency that deals extensively with nonprofits. The curriculum is designed to address the distinctive features and practices of the nonprofit sector and emphasizes management techniques helpful to nonprofit leaders.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose GPA falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirement

Code	Title	Hours
PPUA 6551	Nonprofit Organizations and Social Change	4

Electives

Public Policy Analysis, Graduate Certificate (Arlington)

CSSH Graduate General Regulations (p. 1239)

The Graduate Certificate in Public Policy Analysis seeks to provide students with the tools to analyze and shape public policy at the local, state, and national levels. Students have an opportunity to gain an understanding of the political and legal processes of policymaking, develop skills central to conducting research on policy questions, and learn techniques for evaluating the effectiveness of competing policies.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Program Requirements

Core Requirements

Students may not reuse required degree courses for the certificate.

Sustainability and Climate Change Policy, Graduate Certificate (Boston)

This graduate certificate, a collaboration between the School of Public Policy and the School of Law, is designed to prepare students for the dynamic, evolving landscape of climate and sustainability policy. Interest in the area of climate and sustainability policy is expanding rapidly among graduate students in multiple programs throughout Northeastern University and among professionals who may be considering graduate coursework at Northeastern. This certificate provides students from multiple backgrounds an option for gaining interdisciplinary skills and perspectives in climate and sustainability policy. Given the growing need in every organization—including private sector, public sector, and nonprofits—for professionals with knowledge and training in how to respond to the rapidly changing policy and regulatory frameworks in climate and sustainability, this certificate is open to JD, master's, and PhD students throughout the university. Students not presently enrolled in a Northeastern degree program are also welcome to apply for admission to this graduate certificate program.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Urban Analytics, Graduate Certificate (Boston)

CSSH Graduate General Regulations (p. 1239)

With 75 percent of the world's population projected to be living in cities by 2050, the need for professionals in urban planning and related careers will only increase. The Graduate Certificate in Urban Analytics seeks to prepare students outside of the Master of Science in Urban Informatics program to manage the progressively complex issues involved with rapidly expanding data and technological resources in cities. As Claire Lane of the City of Boston recently noted, "The blueprints for great cities are increasingly anchored in big data, expressed in GIS [Geographic Information Systems] and codified in coherent policy." Successful graduates with an urban analytics certificate have skills in each of these areas, which prepares them to be professionals ready to shape the future of cities across the globe.

Students are trained with the practical and theoretical knowledge necessary to understand the intricacies of interconnected urban systems and to analyze how these systems work together to create sustainable, resilient, and just cities. The curriculum emphasizes the expertise needed to bridge emerging technological capacities and traditional policymaking processes. Students cultivate applied skills in visual presentation, analysis, and modeling of new data sets—all of which helps to inform investment and policymaking. Inspired by Northeastern's leadership in experiential education, students use Boston and cities around the world as learning labs.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

Urban Studies, Graduate Certificate (Boston)

CSSH Graduate Programs General Regulations (p. 1239)

The Graduate Certificate in Urban Studies provides a foundation in the fundamentals of urban planning and policy theory for students outside the Master of Science in Urban Planning and Policy degree. It also allows students to pursue course work in a range of areas of concentration, including housing and community development, urban environmental sustainability, economic development, international comparative urban policy, and transportation.

Academic Standing/Progress

Students in the program are monitored for academic progress. Those students whose grade-point average (GPA) falls below a 3.000 are notified by and meet with the director of academic programs. They are counseled that if their GPA does not rise to a 3.000 or higher, they run the risk of not graduating and are advised on strategies for improvement.

CSSH Graduate Programs General Regulations (p. 1239)

The Department of Sociology and Anthropology at Northeastern University is home to a distinguished graduate program offering a Doctor of Philosophy in Sociology. The primary objectives of our graduate program are to offer a strong curricular foundation in sociology and the social

sciences; to inculcate in students a depth of knowledge in the basic tools of the discipline; to train our students to be outstanding teachers and researchers; and to provide professional socialization that adequately prepares students for a career in the discipline.

The PhD program boasts a wide array of curricular strengths and diverse methodological offerings, all of which draw upon the department's emphasis on the study of social inequalities along lines of race, class, and gender. Faculty expertise ranges widely from domestic U.S. concerns to issues that affect groups, regions, and societies on a global scale. We boast strengths in 11 different research foci (<https://cssh.northeastern.edu/socant/research-foci/>):

- Gender, sexuality, and intersectionality
- Political change and social movements
- Work, labor, and economic insecurity
- Global economy and culture
- Violence, conflict, and security
- Cities and urbanization
- Health and health equity
- Environment and environmental justice
- Racial identity, racism, and anti-racism
- Migration and immigrant communities
- Science and technology studies

The PhD program is designed to admit relatively small numbers of graduate students each year, which affords students the opportunity to forge close working relationships with the faculty. Our faculty and graduate students work together in a number of interdisciplinary research projects, programs, and centers including the Social Science Environmental Health Research Institute (<https://cssh.northeastern.edu/ssehri/>); the Brudnick Center on Violence and Conflict (<https://cssh.northeastern.edu/brudnickcenter/>); the Dukakis Center for Urban and Regional Policy (<https://cssh.northeastern.edu/dukakiscenter/>); and the Institute for Health Equity and Social Justice Research (<https://bouve.northeastern.edu/institute-for-health-equity-and-social-justice-research/>). Many of the faculty in the Department of Sociology and Anthropology have additional interests and are affiliated with other departments on campus including environmental studies; law and public policy; Latino, Latin American, and Caribbean studies; African American studies; international affairs; Jewish studies; and criminal justice. Students who wish to work with faculty in other disciplines are encouraged to enlist the aid of the sociology graduate director or their advisors in contacting individual faculty members.

Sociology, PhD (Boston)

The Department of Sociology and Anthropology at Northeastern University is home to a distinguished graduate program offering a PhD in Sociology. The primary objectives of our graduate program are to offer a strong curricular foundation in sociology and the social sciences; to inculcate in students a depth of knowledge in the basic tools of the discipline; to train our students to be outstanding teachers and researchers; and to provide professional socialization that adequately prepares students for a career in the discipline.

The PhD program is designed to attract students who wish to develop a broad base of sociological knowledge, such as would equip students to embark on academic careers in leading institutions of higher education. The PhD program boasts a wide array of curricular strengths and diverse methodological offerings, all of which draw upon the department's emphasis on the study of social inequalities along lines of race, class, and gender. Faculty expertise ranges widely from domestic U.S. concerns to issues that affect groups, regions, and societies on a global scale.

The PhD program is designed to admit relatively small numbers of graduate students each year, which affords students the opportunity to forge close working relationships with the faculty. Our faculty and graduate students work together in a number of interdisciplinary research projects, programs, and centers, including the Social Science Environmental Health Research Institute (<http://www.northeastern.edu/environmentalhealth/>); the Brudnick Center on Violence and Conflict (<http://www.northeastern.edu/brudnickcenter/>); the Dukakis Center for Urban and Regional (<http://www.northeastern.edu/dukakiscenter/>) Policy; and the Institute for Health Equity and Social Justice Research (<https://bouve.northeastern.edu/institute-for-health-equity-and-social-justice-research/>). Many of the faculty in the Department of Sociology and Anthropology have additional interests and are affiliated with other departments on campus, including environmental studies; law and public policy; Latino, Latin American, and Caribbean studies; African American studies; international affairs; Jewish studies; and criminal justice. Students who wish to work with faculty in other disciplines are encouraged to enlist the aid of the sociology graduate director or their advisors in contacting individual faculty members.

Admissions

Students interested in the PhD apply directly to that program. Students admitted without a master's degree earn the Master of Arts in Sociology en route once PhD coursework is completed. Please note that all applicants for the doctoral program are required to submit a writing sample that should consist of written materials that demonstrate their capacity for scholarship at the doctoral level. (Copies of several course or term papers or a copy of a master's thesis or paper are appropriate.)

Coursework

Doctoral students are required to complete 60 standard credit hours (SH) with grades of B or higher if coming in with a bachelor’s degree and 40 credit hours if coming in with a master’s degree in sociology. Students admitted without a master’s degree earn the MA in sociology en route to completing their PhD requirements (30 credits).

Required courses cover the core areas of sociological theory, research methods, and statistical analysis. All students must take courses in these areas regardless of their areas of specialization. Students must fulfill these requirements during their first year in the program. Students entering our program may be able to substitute courses taken at the prior institution for some or all of these requirements by submitting a course waiver form (a course waiver does not waive the associated semester hour requirement) or transfer of credit (courses submitted with a transfer of credit cannot have counted toward another degree).

FOUR PROSEMINARS

Proseminars provide students structure for their first two years in the PhD program to help ensure their professionalization into the discipline and to help them move more smoothly through program requirements.

Each course meets weekly for 60-minute sessions throughout each fall and spring semester for the student’s first two years. Each 1-credit course will be taken on a satisfactory/unsatisfactory (pass/fail) basis. In order to receive a satisfactory grade, students must attend most proseminar class meetings, complete the requirements for the proseminar course in a satisfactory manner, and attend most intellectual and professional development events organized by the department. Proseminar 1 and 2 are completed in the first year; Proseminar 3 and 4 are completed in the second year.

POST COURSEWORK BUT PRIOR TO PROPOSAL DEFENSE

Students must complete two field statements prior to their proposal defense and will register for Exam Preparation—Doctoral (SOCL 8960) (with the field statement chair listed as instructor of record).

Once field statements are complete and students are working on their dissertation proposal, students should register for a Research course (with their committee chair listed as instructor of record) until the proposal is successfully defended.

DEGREE CANDIDACY

To enter into degree candidacy, the student must have earned a Master of Arts degree or its departmental semester-hour equivalent, completed the four proseminars, successfully defended two field statements, and defended their dissertation proposal.

Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an MA in Sociology (<https://catalog.northeastern.edu/graduate/social-sciences-humanities/sociology/sociology-ma/>) degree. In addition, students who do not qualify for the doctoral degree, but who have completed required coursework with a cumulative GPA of 3.000 or better, may be eligible to receive a terminal MA in Sociology (<https://catalog.northeastern.edu/graduate/social-sciences-humanities/sociology/sociology-ma/>) degree. Note that no students will be admitted directly into the MA in Sociology (<https://catalog.northeastern.edu/graduate/social-sciences-humanities/sociology/sociology-ma/>) to pursue a master’s degree.

Network Science, PhD (Boston)

The PhD in Network Science program aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is a multidisciplinary program, with members of the Northeastern University Network Science Institute (<https://www.networkscienceinstitute.org/>) representing a range of fields including computer science, information science, physics, complexity, sociology, communication, data visualization, organizational behavior, political science, population health, and epidemiology.

This doctoral program is a joint collaboration across five academic colleges. Students are admitted to the College of Social Sciences and Humanities and may choose to move to the home college of their dissertation advisor after they reach candidacy (once they pass their dissertation proposal/comprehensive exam). Students follow policies of their home college, including dissertation format and submission deadlines for graduation. Faculty supervisors may be from one of the following Northeastern academic colleges:

- College of Science
- College of Social Sciences and Humanities
- Khoury College of Computer Sciences
- Bouvé College of Health Sciences
- College of Arts, Media and Design

Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of elective courses relevant to the student's area of research. Electives should be discussed with the student's faculty advisor. A minimum of 40 semester hours of coursework is required, though the faculty advisor or program committee may recommend additional coursework based on student research skills.

Alternative Course Path

Students have the option to complete core coursework in their first year of study. This curriculum pathway is expected to be taken by students whose admitting advisor is located outside of the Boston campus and elsewhere in the Northeastern network.

Annual Review

A review of satisfactory progress will be ongoing and formally evaluated at the end of each academic year. Students must maintain a cumulative grade-point average of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain a 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for dismissal by the graduate program committee.

As part of the annual review process, the students will be asked to submit a summary of completed and future courses and research. Students will submit to the program committee:

- A list of courses completed in the last academic year and course plan for the following year
- A short synopsis of their research progress and research plans for the next year

Qualifying Examination

The qualifying exam is an hour-long oral examination of the material covered in the core curriculum and consists of questions selected by network science faculty. One month prior to the exam., students receive between 50 to 80 study questions to prepare. Students will be asked to give a short presentation of their research plans, followed by an oral exam where the qualifying exam panel will ask a subset of the review questions.

Students must take the exam by the fall semester of their third year. If students fail the qualifying exam on their first attempt, they may retake the exam in the following semester. Students who do not pass the exam after two attempts will be asked to leave the program.¹

Dissertation Committee

Students must confirm their dissertation advisor by the end of their second year. The dissertation advisor must be a full-time, tenured, tenure-track, research, or teaching faculty member of Northeastern. The advisor should be a network science doctoral program faculty member, unless the student receives approval by the network science program committee.

Students must confirm their dissertation committee prior to their comprehensive exam. The committee must consist of a minimum of four members:

1. A dissertation advisor
2. A core member of the Network Science Institute faculty
3. An additional tenured/tenure-track, research, or teaching faculty member from the Network Science Institute or other Northeastern faculty approved by the advisor and program committee
4. One member recognized as an expert in the specific topic of research, who can be external to Northeastern.

Dissertation Proposal (Comprehensive Examination)

The comprehensive exam should be completed in the student's fourth year of study. The exam consists of two parts: preparation of the dissertation proposal and oral presentation of the proposal. Students must prepare a written comprehensive research proposal describing the dissertation research plan including review of relevant literature, research questions, motivation, methods, any preliminary results, and potential impact. The proposal must be shared with the doctoral committee members two weeks prior to the scheduled presentation.

Students will give a 30-minute oral presentation to their committee members that is open to the public. Following the presentation, the dissertation committee will assess the proposed research plan and provide feedback to the student. If the proposal and/or presentation do not meet the expectations of the committee, the student will be asked to revise their proposal and/or their presentation. The completion of the comprehensive exam is considered successful if the dissertation committee approves as satisfactory both the written proposal and the oral presentation. Students may repeat the comprehensive exam once. If they are unsuccessful in their second attempt, the program will ask the student to leave the program.

PhD Candidacy

A student is considered a doctoral candidate upon completion of the required coursework with a minimum cumulative GPA of 3.000, a passing score on the qualification exam, and satisfactory completion of the comprehensive exam.

Dissertation

A PhD student should aim to complete their dissertation in their fifth year of study. Upon successful completion of the research plan proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field. The work should give evidence of the candidate's ability to carry out independent research. It is expected that the dissertation consists of one or more research studies of sufficient quality to merit publication in a reputable journal(s).

Dissertation Defense

Like the dissertation proposal, the dissertation defense consists of two parts: the written dissertation and the defense oral presentation. The PhD candidate should send the written dissertation to their dissertation committee at least one month prior to the dissertation defense.

The oral dissertation defense will be open to the public and will include a Q&A session. Following the presentation, the dissertation committee will communicate their assessment of whether they consider the candidate's dissertation requirement fulfilled. Once the dissertation requirement is fulfilled, the PhD candidate is ready to graduate. Students then apply to graduate and follow the formatting guidelines and deadlines of their home college.

¹Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an MS in Network Science degree. Note that no students will be admitted directly into the MS in Network Science to pursue a master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Coursework
 Annual reviews
 Qualifying exam
 Dissertation committee
 Dissertation proposal (comprehensive examination)
 Dissertation

Dissertation defense

Core Requirements

Code	Title	Hours
Students must complete all 20 semester hours of the core courses listed below, unless the program director approves changes to the student's course plan:		
NETS 5116	Network Science 1	4
NETS 6116	Network Science 2	4
NETS 7332	Machine Learning with Graphs	4
NETS 7334	Social Networks	4
NETS 7335	Dynamical Processes in Complex Networks	4

Electives

Code	Title	Hours
Complete 20 semester hours from the following elective course options.		20

The student's elective course plan should be discussed with, and approved by, their advisor. Students who seek to apply courses not on this list to fulfill program requirements must obtain written approval from their advisor and the program director. Elective options below are organized by domain areas. Students may take courses from one or more domain areas.

Computational Social Science

CNET 5126	Spreading on Networks: From Epidemics to Memes
CNET 5314	Complexity in Social Systems
CNET 5411	Financial and Economic Networks
CNET 5901	Visualizing Complex Networks
CNET 5902	Communicating Network Data
NETS 7341	Network Economics
NETS 7350	Bayesian and Network Statistics
NETS 7360	Research Design for Social Networks
NETS 7370	Computational Urban Science
NETS 7976	Directed Study
NETS 7983	Topics
NETS 8941	Network Science Literature Review Seminar
PHYS 7332	Network Science Data 2

Computer Science

CNET 5901	Visualizing Complex Networks
CNET 5902	Communicating Network Data
CS 5800	Algorithms
CS 6120	Natural Language Processing
CS 6140	Machine Learning
CS 6220	Data Mining Techniques
CS 7180	Special Topics in Artificial Intelligence
CS 7260	Visualization for Network Science
CS 7295	Special Topics in Data Visualization
NETS 7976	Directed Study
NETS 7983	Topics
NETS 8941	Network Science Literature Review Seminar
PHYS 7332	Network Science Data 2

Epidemiology and Public Health

CNET 5126	Spreading on Networks: From Epidemics to Memes
CNET 5515	Complex Network Analysis for Biological Systems
CNET 5901	Visualizing Complex Networks
CNET 5902	Communicating Network Data
NETS 7370	Computational Urban Science
NETS 7976	Directed Study
NETS 7983	Topics
NETS 8941	Network Science Literature Review Seminar

PHTH 5202	Introduction to Epidemiology
PHTH 5210	Biostatistics in Public Health
PHTH 6202	Intermediate Epidemiology
PHTH 6400	Principles of Population Health 1
PHTH 6410	Principles of Population Health 2
PHTH 6800	Causal Inference in Public Health Research
PHYS 7332	Network Science Data 2

Mathematic and Physics

CNET 5901	Visualizing Complex Networks
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CS 5800	Algorithms
MATH 7233	Graph Theory
MATH 7243	Machine Learning and Statistical Learning Theory 1
NETS 7976	Directed Study
NETS 8941	Network Science Literature Review Seminar
PHYS 5211	Introduction to Scientific Computing
PHYS 7305	Statistical Physics
PHYS 7321	Computational Physics
PHYS 7332	Network Science Data 2

Dissertation

Code	Title	Hours
Precandidacy		

Students should register for NETS 8986 after passing the qualifying exam and before completing the comprehensive exam (proposal defense):

NETS 8986	Research

Dissertation

After passing the comprehensive exam (reaching candidacy), students should register for NETS 9990 and NETS 9991, successively:

NETS 9990	Dissertation Term 1
NETS 9991	Dissertation Term 2

Dissertation Continuation

After completing both NETS 9990 and NETS 9991, students should register for NETS 9996 each semester until graduation:

NETS 9996	Dissertation Continuation

Program Credit/GPA Requirements

40 total semester hours required
Minimum 3.000 GPA required

Applied Quantitative Methods and Social Analysis, MS (Boston)

The Master of Science in Applied Quantitative Methods and Social Analysis is an interdisciplinary, flexible, and innovative degree that focuses on quantitative research methods for social analysis strategies and techniques. The program integrates the interdisciplinary perspectives and methodological and analytical tools across the College of Social Sciences and Humanities. The program seeks to educate ambitious social scientists and analysts primed to deploy computational tools for social analysis and tackle social science questions of equity, hierarchy, social organization, and social systems. The 21st-century economy will increasingly demand a workforce capable of collecting, processing, analyzing, and interpreting large-scale data on human attributes, personal preferences, social attributes, and political behavior. In response, this program provides students with rigorous training in quantitative research and social science methods to address important questions of social inquiry. Emphasizing public dissemination of findings, the program is designed to prepare students to inform policymakers, decision makers in the private and public sectors, and the broader community. These skills prepare graduates to pursue analytical or research careers in corporations, nonprofits, and public services or to continue their education.

Students in this degree program will have the opportunity to gain advanced training in statistical analysis and research methodology aligned to key areas of strength in CSSH, including data analytics in the social sciences, computational social science, network analysis in the social sciences, statistical methods in the social sciences, information ethics for social analysis, geospatial analysis, and the digital humanities. Students will also have the opportunity to stack a range of graduate certificate programs into the master's degree.

The program will take advantage of various co-op opportunities—positions such as policy analysts, network scientists, econometricians, and crime analysts—that provide students with a professional environment to integrate quantitative skills and social analysis. The learning opportunities in professional settings (private sector, government, or nonprofit sector) reinforce the development of advanced quantitative skills and their applied nature to contemporary social issues. Ultimately, the Master of Science in Applied Quantitative Methods and Social Analysis will position students to enter the labor force with the competitive advantage of these experiences and skills.

CSSH Graduate Programs General Regulations (p. 1239)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Core Requirements		
INSH 6300	Research Methods in the Social Sciences	4
INSH 6500	Statistical Analysis	4

Required Concentration

Complete one of the following concentrations:

- Computational Social Science (p. 1322)
- Data Analytics in the Social Sciences (p. 1323)
- Information Ethics for Social Analysis (p. 1323)
- Machine Learning and Econometrics (p. 1323)
- Network Analysis in the Social Sciences (p. 1323)
- Statistical Methods in the Social Sciences (p. 1323)

ELECTIVES

Code	Title	Hours
Complete 12 semester hours from the following:		12
Concentration courses may not be double counted as elective courses.		
CRIM, ECON, INSH, POLS, PPUA, and/or SOCL at the 5000 level or higher		

Optional Co-op Experience

Code	Title	Hours
Four-month co-ops require registration at 1 semester hour for one term. Longer co-ops require registration at 1 semester hour per term for two consecutive terms.		1-2
INSH 6864	Experiential Integration	
INSH 6964	Co-op Work Experience	

Program Credit/GPA Requirements

32 total semester hours required (33–34 with optional co-op)

Minimum 3.000 GPA required

CONCENTRATION IN COMPUTATIONAL SOCIAL SCIENCE

Complex Network Analysis, MS (Boston)

Complex network analysis is the quantitative study of interconnected systems that influence every aspect of our lives—from where we get our news and who we share ideas with, to how we travel and the people we interact with, to the products we purchase and the foods we eat. Networks are ubiquitous across natural and human-made systems, and their structure and dynamics can explain and help improve the greatest challenges of the next century such as pandemics, food scarcity, cultural polarization, and climate change. Expertise in the emerging field of complex network analysis, within the landscape of the rapid growth of artificial intelligence and machine learning, forms the foundation of the next generation of thought leaders. Northeastern University leads the way in this burgeoning field, offering a unique master's degree program in complex network analysis methodologies. The program is designed to equip students with the conceptual and analytical tools needed to find patterns of connections in networked systems and apply these techniques in real-world settings. The curriculum includes industry-aligned concentration areas of focus, enabling graduates to apply complex network analysis skills in impactful careers in the public and private sectors as well as in research. The concentrations for this program correspond directly to the following industry sectors:

1. Public health and life sciences fields such as epidemiological modeling, public policy, and behavioral research
2. Social or urban science and research fields such as urban planning, social network research, economics, education, criminal science, or public policy
3. Finance or technological fields such as financial analytics, market research, or network analysis for business
4. Biological systems modeling used across research and industry including network biology, drug discovery, or multi-omics mining

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Complex Biological Networks—College of Science
- Complex Social Systems—College of Social Sciences and Humanities
- Economic and Technological Networks—Khoury College of Computer Sciences
- Population Health Dynamics—Bouvé College of Health Sciences

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CNET 5050	Fundamentals of Complex Networks	4
CNET 5051	Analyzing Complex Network Data	4
CNET 5052	Advanced Tools for Complex Network Analysis	4
CNET 5901	Visualizing Complex Networks	2
CNET 5902	Communicating Network Data	2

Concentrations

Complete one of the following concentrations:

- Complex Biological Networks (p. 167)—College of Science
- Complex Social Systems (p. 168)—College of Social Sciences and Humanities
- Economic and Technological Networks (p. 168)—Khoury College of Computer Sciences
- Population Health Dynamics (p. 169)—Bouv  College of Health Sciences

Experiential Courses

Code	Title	Hours
Complete a total of 4 semester hours from the following (course may be repeated):		4
CNET 6107	Complex Network Analysis Research Rotation	
CNET 6108	Complex Network Analysis Capstone	
CNET 6990	Thesis	

Optional Co-op

Code	Title	Hours
CNET 6000	Professional Development for Co-op	1
CNET 6964	Co-op Work Experience	0

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Additional hours may be required based on student choice of courses or concentration.

One semester hour of additional coursework is required for participation in co-op.

Minimum 3.000 GPA required

CONCENTRATION IN COMPLEX BIOLOGICAL NETWORKS—COLLEGE OF SCIENCE

Code	Title	Hours
A minimum of 16 semester hours is required to complete this concentration.		
Required		
CNET 5515	Complex Network Analysis for Biological Systems	4
Complete 8 semester hours from the following:		8
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6310	Introduction to Bioinformatics	
EEMB 5130	Population Dynamics	
ENVR 5450	Applied Social-Ecological Systems Modeling	
MATH 5131	Introduction to Mathematical Methods and Modeling	
MATH 7340	Statistics for Bioinformatics	
PHYS 5211	Introduction to Scientific Computing	
Complete 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouv� College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	

CNET 5314	Complexity in Social Systems
CNET 5411	Financial and Economic Networks
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

CONCENTRATION IN COMPLEX SOCIAL SYSTEMS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours

A minimum of 13 semester hours is required to complete this concentration.

Required

CNET 5314	Complexity in Social Systems	3

Complete a minimum of 6 semester hours from the following: 6

CNET 5311	Physical and Digital Human Traces
CNET 5360	Research Design for Social Networks
INSH 5301	Introduction to Computational Statistics
INSH 6101	Agent-Based Modeling for Applied and Social Sciences
INSH 6300	Research Methods in the Social Sciences
INSH 6304	Modeling and Analyzing Social Networks
INSH 6406	Analyzing Complex Digitized Data
INSH 6500	Statistical Analysis
PHYS 5211	Introduction to Scientific Computing
PPUA 5262	Big Data for Cities
PPUA 7237	Advanced Spatial Analysis of Urban Systems

Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section): 4

CNET 5126	Spreading on Networks: From Epidemics to Memes
CNET 5411	Financial and Economic Networks
CNET 5515	Complex Network Analysis for Biological Systems
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

CONCENTRATION IN ECONOMIC AND TECHNOLOGICAL NETWORKS—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours

A minimum of 14 semester hours is required to complete this concentration.

Required

CNET 5411	Financial and Economic Networks	3

Complete a minimum of 7 semester hours from the following: 7

CS 7150	Deep Learning
CS 7200	Statistical Methods for Computer Science
DS 5220	Supervised Machine Learning and Learning Theory
DS 5230	Unsupervised Machine Learning and Data Mining
MISM 6212	Data Mining and Machine Learning for Business
PHYS 5211	Introduction to Scientific Computing

Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section): 4

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouvé College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4
CS 6120	Natural Language Processing	4
CS 6140 or DS 5220	Machine Learning Supervised Machine Learning and Learning Theory	4

CONCENTRATION IN ENTREPRENEURSHIP—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	

ENTR 6250	Lean Design and Development
ENTR 6300	Managing a Technology-Based Business
GE 5030	Iterative Product Prototyping for Engineers
INNO 6230	Platform Innovation
MKTG 6214	New Product Development

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics of Design	

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
Electives		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
Electives		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12

MKTG 6210	Marketing Research
MKTG 6212	International Marketing
MKTG 6214	New Product Development
MKTG 6216	Market Focused Strategy
MKTG 6218	Managing Customer Engagement in a Service World
MKTG 6222	Digital Marketing
MKTG 6223	Brand and Advertising Management
MKTG 6226	Consumer Behavior
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit
MKTG 6234	Marketing Analytics

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8
HIST 5241	Exhibits and Museums	
HIST 7250	Topics in Public History (Public History and Slavery)	
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)	

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4

1332	AI Applications, Graduate Certificate (Boston)		
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110		5
Electives			
Complete 8 semester hours from the following:			8
GSND 6000	Advanced Topics in Game Design		
GSND 6001	Advanced Topics in Game Science		
GSND 6240	Exploratory Concept Design		
GSND 6250	Spatial and Temporal Design		
GSND 6330	Player Experience		
GSND 6340	Biometrics of Design		
GSND 6350	Data-Driven Game Design		
GSND 6460	Generative Game Design		

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
JRNL 5311	Design for Storytelling	
JRNL 6305	Topics	
JRNL 6341	Telling Your Story with Data	

Plan of Study
Sample Plan of Study

The following is a sample plan of study for a student in the Concentration in XR and Games.

Year 1			
Fall	Hours	Spring	Hours
EXRE 5010 and EXRE 5011		5 EXRE 5030	4
EXRE 5020		4 GSND 5110 and GSND 5111	5
		9	9
Year 2			
Fall	Hours	Spring	Hours
EXRE 6500		4 EXRE 7500	4
GSND 5122		1 XR and games elective 2	4
XR and games elective 1		4	
		9	8

Total Hours: 35

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4

Experiential Courses

Code	Title	Hours
Complete 4 semester hours from the following:		4
CRIM 6600	Justice, Technology, and AI	
EDUT 6150	AI in Education	
HLTH 5800	AI Across the Health Sciences	
IE 5640	Data Mining for Engineering Applications	
JRNL 6460	AI in Media Industries	
MISM 6250	Strategic AI for Business	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Computational Social Science, Graduate Certificate (Boston)

The certificate highlights how big data, computational analysis, and related techniques can be used to shed light on theoretical and policy questions in the fields of public policy, public health, sociology, criminal justice, political science, economics, computer science, and network science. The certificate will contribute to students' understanding of:

- How to collect, analyze, and interpret insights culled from applying computational analyses to big data in social science domains
- The ways in which computational analysis can be used to develop policy and evaluate policy outcomes and results

The field is new and developing rapidly, and employers are eager to hire students trained in this area—both because computational social science is at the cutting edge of interdisciplinary work and because it offers new opportunities for research and analysis. This certificate leverages the real-world relevance of big data, source data, machine learning, and predictive analytics, which are dominant aspects of the contemporary workplace landscape. The certificate is available on the Boston campus and online modalities.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INSH 5301 or INSH 6406	Introduction to Computational Statistics Analyzing Complex Digitized Data	4
DA 5030	Introduction to Data Mining/Machine Learning	4

Elective

Code	Title	Hours
Complete 4 SH from the following:		4
INSH 5302	Information Design and Visual Analytics	
POLS 7334	Social Networks	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
PPUA 5262	Big Data for Cities	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Computational Social Science, Graduate Certificate (Arlington)

The certificate highlights how big data, computational analysis, and related techniques can be used to shed light on theoretical and policy questions in the fields of public policy, public health, sociology, criminal justice, political science, economics, computer science, and network science. The certificate will contribute to students' understanding of:

- How to collect, analyze, and interpret insights culled from applying computational analyses to big data in social science domains
- The ways in which computational analysis can be used to develop policy and evaluate policy outcomes and results

The field is new and developing rapidly, and employers are eager to hire students trained in this area—both because computational social science is at the cutting edge of interdisciplinary work and because it offers new opportunities for research and analysis. This certificate leverages the real-world relevance of big data, source data, machine learning, and predictive analytics, which are dominant aspects of the contemporary workplace landscape.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
DA 5030	Introduction to Data Mining/Machine Learning	4
INSH 5301 or INSH 6406	Introduction to Computational Statistics Analyzing Complex Digitized Data	4

Elective

Code	Title	Hours
Complete 4 semester hours from the following:		4

PPUA 5262	Big Data for Cities	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Information Ethics, Graduate Certificate (Boston)

The Graduate Certificate in Information Ethics is intended to help students build a working knowledge of the primary theories, frameworks, concepts, and issues in information ethics, as well as to help students develop robust skills in ethical analysis and evaluation.

Students who complete the certificate will be able to conduct comprehensive ethics and value analysis and assessment of emerging issues and problems related to such things as data collection, management, and use; design and implementation of artificial intelligence and machine learning; development and deployment of autonomous systems; and online, networked, and digital experiences and systems.

The certificate is open to students in any graduate program at Northeastern.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Note: At least two of the three courses taken to fulfill the certificate requirements must be PHIL courses.

Core Requirements

Code	Title	Hours
Complete two of the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010 or PHIL 5110	AI Ethics Responsible AI	

Elective

Code	Title	Hours
Complete one of the following. The elective course must be different than the core courses:		4
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010 or PHIL 5110	AI Ethics Responsible AI	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Women's, Gender, and Sexuality Studies, Graduate Certificate (Boston)

Website (<https://cssh.northeastern.edu/wgss/>)

The Graduate Certificate in Women's, Gender, and Sexuality Studies (WGSS) is designed for students currently enrolled in a Northeastern University master's or doctoral program. The certificate aims to provide enhanced competency by:

- Analyzing contemporary feminist theoretical frameworks, methodologies, issues, and topics and their relation to established disciplines
- Focusing on the intersection of gender with sexuality, race, class, and other vectors of power and identity
- Broadening and enriching analytical skills in one or more disciplines while drawing on the interdisciplinary perspectives of WGSS
- Challenging the traditional separation of academic theory from political and professional practice

Prospective certificate students are advised initially to consult with the WGSS program director and the advisor in their home department to develop a plan for completing the certificate.

In addition to the College of Social Sciences and Humanities certificate, there is a specialized pathway for students enrolled in the Master of Public Health program (p. 869). These students are able to apply theories, concepts, and methods gained from the WGSS certificate to urban health issues. Students work closely with advisors in their home school and in WGSS to select a course of study to complete the certificate, including incorporating gender and sexuality studies into their MPH coursework as final projects/papers and naming a WGSS faculty member to their capstone committee, if using the capstone as an elective for the certificate. Students using the capstone toward their certificate must also enroll in a 1-credit directed study with the WGSS faculty who will sit on their committee. *Note:* Students pursuing the BS/MPH accelerated program and WGSS certificate should wait until they have *matriculated* into the MPH program to declare the certificate and to begin coursework toward the WGSS certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Foundational Requirement

Code	Title	Hours
All students, regardless of disciplinary background, must complete one of the following:		
WMNS 6100	Theorizing Gender and Sexuality	4
WMNS 7100	Queer Theory: Sexualities, Genders, Politics	
or SOCL 7100	Queer Theory: Sexualities, Genders, Politics	

General Option

Code	Title	Hours
Electives		
Complete two courses according to the instructions from the electives list (below the MPH option). At least one should come from outside the student's home department.		8

MPH Option

Code	Title	Hours
MPH students should plan to take one foundational required course from the list above and to focus final projects in core MPH courses on gender/sexuality in public health.		
Electives		
Complete 8 semester hours according to the instructions from the electives list. One course may be the capstone, if the topic selected focuses on gender and/or sexuality in connection to the selected urban health issue and the student enrolls in a 1-semester-hour directed study with the WGSS faculty member who will sit on the capstone committee.		8

Electives List

Code	Title	Hours
At least one course must come from outside the student's home discipline. Any foundational course not taken to complete the required foundational coursework may be taken as an elective but may not count as both the foundational requirement and an elective. Electives outside this list, particularly special topics courses not listed here, may be chosen in consultation with program director. Students may also consider courses at the Graduate Consortium for Studies of Gender, Culture, Women, and Sexuality (located at MIT). MPH students, in conversation with their advisors, may substitute PHTH 6910 for one elective.		
ECON 5292	Gender and Development Economics	
JRNL 5250	Gender in the Newsroom	
PHTH 6910	Public Health Capstone (with 1-SH directed study)	
SOCL 7100	Queer Theory: Sexualities, Genders, Politics	
SOCL 7231	Sociology of Prejudice and Violence	
WMNS 5240	Feminist Resistance	
or SOCL 5240	Feminist Resistance	
or HIST 5240	Feminist Resistance	
WMNS 6100	Theorizing Gender and Sexuality (if not taken as core course)	
WMNS 7100	Queer Theory: Sexualities, Genders, Politics (if not taken as core course)	
or SOCL 7100	Queer Theory: Sexualities, Genders, Politics	
WMNS 7900	Special Topics in Women's, Gender, and Sexuality Studies	
WMNS 7976	Directed Study	

Program Credit/GPA Requirements

Mills College at Northeastern University

Office of the Dean

510.430.2290

Mills_College@Northeastern.edu

Mills College at Northeastern University educates leaders who build a socially, economically, and environmentally sustainable future for all. Through interdisciplinary programs, innovative research with our community partners, and real-world hands-on experiences, our students develop transferable skills that empower them to challenge the status quo. Our graduates elevate well-being and economic justice, leverage frontier technology, lead with empathy, create with purpose, and inspire collective action toward an equitable, prosperous, and vibrant world.

Programs

Master of Arts (MA)

- Early Childhood Education (p. 1341) (Oakland)
- Educational Leadership (p. 1344) (Oakland)
- Multiple Subject Education (p. 1345) (Oakland)
- Single Subject Education (p. 1346) (Oakland)

Graduate Certificate

- AI Applications (p. 190) (Boston)

Academic Policies and Procedures

- Academic Appeals Policy (p. 1338)
- Changes in Requirements (p. 1340)
- Continuity of Registration (p. 1340)
- Course Registration and Advising (p. 1340)
- Grading (p. 1340)
- Satisfactory Progress (p. 1341)
- Student Complaints and Grievance Process (p. 1341)
- Time Limitation (p. 1341)

Academic Appeals Policy

Northeastern University affirms that it is essential to provide an appeals mechanism to students who believe that they have been erroneously, capriciously, or otherwise unfairly treated. Information about the university appeals process and procedures can be found in this catalog (p. 133).

If a student feels that they have been the victim of harassment or of discrimination prohibited by law or by university policy, and that this constitutes a substantive basis for the appeal, they should consult with the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>) as soon as they become aware of alleged prohibited harassment or discrimination, and they are not required to wait until a term grade or determination is received before seeking advice or redress. If the OUEC is advised of such alleged prohibited conduct as part of an academic appeal, the appeal shall first be pursued and investigated through the OUEC. Following a resolution of the harassment/discrimination issues, any remaining academic issues will be addressed, at the request of the student, according to the academic appeals procedures.

Before invoking the appeals procedures, students are encouraged to speak informally to their instructors or academic advisors about any determination or grade about which they have questions. If students choose to pursue an appeal, the Mills College at Northeastern process is described in the appeals section that follows. The Mills College Curriculum Committee serves as the Academic Appeals Committee for MCNU.

Graduate Academic Appeals Committee

The Academic Appeals Committee for MCNU is an ad hoc committee composed of the voting members of the MCCC. If the faculty member is a member of the MCCC at the time of the appeal, the dean of MCNU will appoint a replacement committee member for purposes of the appeal.

The chair of the Academic Appeals Committee is the associate dean of curriculum for MCNU, who can be contacted at otp-mcnu-grad-education@northeastern.edu.

The Academic Appeals Committee is convened in order to determine whether a fair and due process was used to determine the student's grade.

The role of the committee is:

- In the instance of an appeal of dismissal, to determine whether a fair and due process was used.
- In the instance of a grade appeal, to conduct a review when a grade appeal is filed by a student for one of the following reasons:
 - The course grading policy was not applied consistently to all students within a class and/or section.
 - The instructor's method of assigning grades differed from the method outlined in the instructor's course syllabus.
 - The instructor failed to provide a clear policy on how grades would be assigned.

Grade Appeals

If a graduate student wishes to dispute a grade in a course taught by a member of the MCNU faculty, the first step is for the student to discuss their concerns with the faculty member who taught the course to see if it is possible to reach agreement on the issue(s). If the student is not able to resolve their issues with the faculty member who taught the course, the student should work with the program director to attempt a department-level resolution.

If these informal attempts to resolve the issue fail, the student can enter the formal procedure at the college level.

The student should meet with the associate dean for curriculum, who will attempt to resolve the issue by working with the instructor and the department/program. Contact the associate dean for curriculum at otp-mcnu-grad-education@northeastern.edu to schedule the meeting. If it is not possible for the associate dean to resolve the issue with the department/program, the associate dean will determine whether or not there is just cause to convene the Academic Appeals Committee.

The decision to convene the Academic Appeals Committee will be based upon the following:

- The student sincerely attempted to resolve the complaint with the professor and the department/program.
- The complaint is substantive in nature (adjudication could affect student's course grade and/or academic record).

- The complaint has been brought forward in a timely manner.
 - The statement must be submitted no later than 28 calendar days from the day when the academic determination is made available to the student.
 - If a student wishes to dispute a grade in their final term, this must be done within 28 calendar days of degree conferral date.

If the associate dean determines the appeal should be brought to the Academic Appeals Committee, the student must provide a formal written complaint to the associate dean within one week of the student's meeting with the associate dean.

- The written complaint should provide a detailed timeline as well as all available evidence supporting the student's complaint.
 - It is the student's responsibility to make their case. Students may submit any evidence such as emails, quizzes, examinations, etc.
 - Information about the statement can be found under *Step 2 Prepare an Appeal Statement* in the Academic Appeals Policies and Procedures (p. 133) in this catalog.
- Once the associate dean receives a formal written complaint, the associate dean will provide a copy of the complaint to the faculty member and to the program director and convene a meeting of the Academic Appeals Committee.
- If the student fails to provide a thoughtful and well-reasoned written summary of the case, then the matter will be considered closed at the college level.
- The associate dean will make a good faith effort to identify a date and time for the meeting within 35 calendar days of the student's original submission of their statement.

Appeals Meeting

The student and the faculty member have the right to attend and present their case orally to the committee. The faculty member and the student are not required to attend; however, it is usually quite helpful to make an oral presentation and answer any questions that the committee may have. If the complainant indicates that they will present their case in person and then fails to attend the scheduled hearing, the case will be dismissed. The complainant and the faculty member both have the right to testify privately and separately before the committee. Lawyers are not permitted in these proceedings. Generally, the faculty member and complainant are each given a 15-minute period to present their case.

The student usually presents their complaint to the committee first. The committee may then ask the complainant any questions they have based upon either the written statement submitted by the complainant or the complainant's oral presentation. The faculty member then presents their case, which is followed by questions from the committee. After both the complainant and faculty member have addressed the committee, the committee then reviews the evidence, summarizes the case, and makes a recommendation to the associate dean concerning the resolution of the complaint.

If the committee believes it cannot resolve any issues without additional information, the committee may request any information needed from either the complainant, faculty member, or department/program. This information must be provided to the committee within one week of the meeting. If the requested information is not provided in the required time frame, then the committee may weigh this failure in making its final determination regarding the original complaint.

Committee Process

- All decisions of the committee will be made based on a simple majority (51%) vote.
- The chair of the committee only votes when there is a tie.
- The student bringing the complaint to the committee carries the burden of proof based on the weight of the evidence in demonstrating that the grade is incorrect or unjustified.
- If the committee decides that the grading process was unfair, the committee can request that the instructor changes the student's grade.
 - If an acceptable agreement involves a change of grade, the instructor is responsible for submitting a change of grade to the Office of the University Registrar in a timely manner following notification of the committee's decision.

The student shall be notified within 3 business days of a decision being reached. If the student or the faculty member is not satisfied with the committee's disposition of the matter, or if the grade appeal is not resolved within 35 calendar days after the written statement is submitted to the college, they may further pursue the matter by requesting in writing that the university convene an academic appeals resolution committee to review the issue. This must be submitted within 10 calendar days of the notification from the college. This committee has been designated as the final authority on these matters. Students may obtain information on this process by contacting the Office of the Provost.

Academic Dismissal Appeal

If a student wishes to dispute an academic dismissal, the first step is to consult the associate dean for curriculum about appealing to the department/program. If and when all departmental appeals are exhausted, the student can enter the formal procedure at the college level.

The student will meet with the associate dean, who will attempt to resolve the issue by working with the department/program. Contact the associate dean at otp-mcnu-grad-education@northeastern.edu to schedule the meeting. If it is not possible for the associate dean to resolve the issue with the department/program, the associate dean will determine if the complaint is substantive and there is just cause to convene the Academic Appeals Committee.

The student must provide a formal written complaint to the associate dean within one week of the student's meeting with the associate dean. The statement must be submitted no later than 10 calendar days from the day when the academic determination is made available to the student. The written complaint should provide a detailed timeline as well as all available evidence supporting the student's complaint. Once the associate dean receives a formal written complaint, the associate dean will provide a copy of the complaint to the department/program director and convene a

meeting of the Academic Appeals Committee. If the student fails to provide a thoughtful and well-reasoned written summary of the case, then the matter will be considered closed at the college level.

The associate dean will make a good faith effort to identify a date and time for the meeting within 35 calendar days of the student's original submission of their statement.

Appeals Meeting

The student has the right to attend and present their case orally to the committee. The student is not required to attend; however, it is usually quite helpful to make an oral presentation and answer any questions that the committee may have. If the complainant indicates that they will present their case in person and then fails to attend the scheduled hearing, the case will be dismissed. Lawyers are not permitted in these proceedings.

The student usually presents their complaint to the committee first. The committee may then ask the complainant questions based upon either the written case submitted by the complainant or the complainant's oral presentation. The committee then reviews the evidence, summarizes the case, and makes a recommendation to the associate dean concerning the resolution of the complaint.

If the committee believes it cannot resolve any issues without additional information, the committee may request any information needed from either the complainant or department/program. This information must be provided to the committee within one week of the meeting. If the needed information is not provided in the time frame required, then the committee may weigh this failure in making its final determination regarding the original complaint.

Committee Process

- All decisions of the committee will be made based on a simple majority (51%) vote.
- The associate dean is chair of the committee and only votes when there is a tie.
- The student bringing the complaint to the committee carries the burden of proof based on the weight of the evidence in demonstrating that the dismissal is incorrect or unjustified.
- If the committee decides that the academic dismissal should be revoked, the committee can request that the department reinstate the student immediately.

Decisions concerning dismissals cannot be appealed beyond the college level. While program dismissals cannot be appealed beyond the college level, underlying academic judgments that led to a dismissal can be appealed.

Changes in Requirements

The continuing development of the college may result in regular revision of curricula. When curriculum changes are made, students are allowed to complete the degree requirements of the program when they matriculated. If a student wishes to follow the new curriculum/program, they may request this in writing via an email to the MCNU Dean's Office at the time of the announcement of said changes.

Continuity of Registration

Students are expected to maintain satisfactory progress toward their intended degrees. All students must be registered in the last semester of their program. A student who does not enroll for a period of three semesters, or one year, will be required to apply for readmission. Readmission is done via Slate. A student who does not enroll for a period of two semesters, or less than one year, may petition their department for reactivation. If the department is supportive, the student will be required to submit a written request to the departmental graduate committee. If the graduate committee feels the student is worthy of reactivation, the student's written request must be submitted to the MCNU Dean's Office. Please note that college admissions deadlines apply to requests for readmission and reactivation.

Course Registration and Advising

Students are encouraged to obtain advisor approval of course selections each semester. This approval is required for all assistantship recipients, and some departments require it for all students. Students should check with individual departments for specific guidelines.

Grading

In MCNU, not more than two courses or 6 semester hours of credit, whichever is greater, may be repeated to satisfy the requirements for the degree. Only such repeats will be counted in calculating the cumulative grade-point average.

No grade changes are permitted after the end of the final examination period one calendar year from the semester in which the student registered for the course. In calculating the overall cumulative average, all graduate-level coursework completed at the time of clearance for graduation will be counted, including other coursework completed for graduate certificates, master's degrees, doctoral programs, and personal interest or professional development.

Students cannot elect a satisfactory/unsatisfactory (pass/fail) grading scheme for MCNU courses, unless the course grading scheme is designated satisfactory/unsatisfactory (pass/fail).

Satisfactory Progress

Satisfactory progress means satisfying requirements in Mills College at Northeastern, in this graduate catalog, and in the regulations specified by the departments.

MCNU sets minimum standards for all students to fulfill. Departments and programs may have additional requirements that exceed those of MCNU. Students in MCNU must be making satisfactory progress, including working toward the graduation requirement of a grade-point average of 3.000 in their coursework and the timely completion of coursework and comprehensive/qualifying examinations. See also the university's policy on academic standing ("Minimum Cumulative GPA").

Student Complaints and Grievance Process

Introduction

This policy describes steps a graduate student should follow to submit a grievance.

Students should first attempt to resolve an issue through informal means, for example, by communicating with appropriate faculty members or the program director. If the issue is not resolved, students should follow the grievance procedure.

Students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated in an academic or cooperative education determination should follow the appeals procedure described in the Mills College at Northeastern University Graduate Appeals Policy. Subsequent academic appeals can be submitted by following the MCNU Academic Appeals Policy and Procedure.

If a student's grievance includes a claim of discriminatory acts prohibited by law or by university policy (<https://catalog.northeastern.edu/handbook/policies-regulations/equal-opportunity/>), the student should first submit the grievance to the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>) for resolution through the applicable procedures. At the conclusion of the OUEC resolution process, any aspects of the grievance that remain unresolved may then be brought to the grievance procedure.

Graduate students can contact the Ombuds for Graduate Students (<https://graduateombuds.northeastern.edu/>) that offers confidential, impartial, and informal assistance to graduate students who have concerns related to their university experience.

Note that the college prohibits retaliation against a student for filing a grievance.

Grievance Procedure

A graduate student who would like to complain about their treatment by an MCNU employee (faculty or staff) may submit a grievance.

Step 1. A written description of the complaint should be submitted within 60 days of the alleged activity. The description should state the exact nature of the grievance, against whom it is filed, and the remedy sought.

Step 2. The student should submit the complaint to the faculty program lead (chair or unit head of the department or unit that houses the student's primary program of study) and to the associate dean for curriculum at otp-mcnu-grad-education@northeastern.edu. The program lead shall review the complaint, give any employees named in the grievance an opportunity to share relevant information, gather additional information as needed, and send a written response to the student and the associate dean within two weeks.

Step 3. If the student is not satisfied by the faculty lead's response, the student may resubmit the complaint to the associate dean for curriculum within two weeks. The associate dean shall review all available information and submit a written response to the student within two weeks.

Step 4. If the student is not satisfied by the associate dean's decision, the student may submit the complaint to the dean of MCNU within two weeks. The dean will review all available information and submit a written response to the student within two weeks.

Time Limitation

Refer to Northeastern University policy regarding time limitations. If students wish to apply for an extension of the time limit, they must submit a petition to their department of study. The petition must include a detailed plan for completion of all remaining degree requirements. In the case of master's degree time limit extension requests for coursework, the department must certify that the content of each of the courses has not changed since the time the student completed the course. If deemed appropriate, the department will recommend a time limit extension to the Office of the Dean. The dean has final approval of time limit extensions.

Early Childhood Education, MA (Oakland)

This program is designed to prepare our students to work as leaders in teaching or administration in early childhood settings, including preschools and child development programs. In addition, the program prepares students to teach early childhood education topics in community colleges or

adult education programs. Our students often continue their education to pursue research or doctoral degrees, as well as other forms of professional leadership. The program provides a strong foundation in child development and in developmentally, culturally, and linguistically responsive practices. The full-time MA programs can be pursued alongside the following teaching credentials: early childhood special education, multiple subject (for K–8 teaching), or educational leadership.

Special Education Credential

In combination with the early childhood education MA, this program prepares students to work in early intervention and preschool special education settings with infants and young children who have developmental disabilities. Graduates see that working with families, caregivers, and communities is integral to the education and care of young children with special needs. (See program details for specific information on the multiple subject and administrative services credentials.)

COURSEWORK

A total of 42 semester hours are required to earn the Master of Arts in Early Childhood Education with coursework leading to eligibility for the Special Education Credential. Coursework integrates theory and practice to prepare students to teach in urban settings and is guided by an overarching concern for social justice. All courses listed below, along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for the Preliminary Education Specialist, Early Childhood Special Education Credential, in the state of California. The final authority to grant a credential lies with the Commission on Teacher Credentialing.

FIELDWORK

The early childhood education department maintains the belief that coursework and fieldwork must be integrated. Therefore, courses have assignments requiring engagement in educational settings, and students are placed in experiential learning/educational fieldwork every semester of the two-year program. During a student's first year, they are placed at the Mills College Children's School, where they are closely mentored by experienced and knowledgeable early childhood professionals. Students participate in weekly reflective circles with team members, where they discuss instructional decisions and interventions, receive feedback, and identify the next steps for supporting children and families. During the second year, student teaching occurs in an early intervention setting and a preschool/kindergarten setting. In their field placements, students have an opportunity to demonstrate their understanding of effective early intervention and preschool special education. These experiential learning experiences total over 900 hours and therefore far exceed the 600 hours of fieldwork required by the state accrediting body, the California Commission on Teacher Credentialing. Throughout the course sequence of the ECSE program, students compile a digital portfolio, which includes course assignments such as reflection pieces, presentations, and papers. The portfolio provides evidence of varied experiences, depth of knowledge, and critical reflection around instruction gained during the program.

Program Requirements

Please note: All courses listed below (with the exception of Graduate Seminar: Research in Education 1 (EDUT 6210), Graduate Seminar: Research in Education 2 (EDUT 6211), Responsible AI (PHIL 5110), and AI in Education (EDUT 6150) , along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for the Preliminary Education Specialist, Early Childhood Special Education Credential, in the state of California. The final authority to grant a credential lies with the Commission on Teacher Credentialing.

Required Courses

Code	Title	Hours
Complete one of the two following sequences:		6-8
EDUT 6210 and EDUT 6211	Graduate Seminar: Research in Education 1 and Graduate Seminar: Research in Education 2	
PHIL 5110 and EDUT 6150	Responsible AI and AI in Education	
Complete at least two of the following (all four courses are required for the Concentration in Early Childhood Special Education concentration):		6-12
EDUT 6202	Children with Special Needs: Infants and Young Children	
EDUT 6203	Theory and Practice of Early Childhood Education 1: Infants, Toddlers, and Young Children	
EDUT 6204	Theory and Practice of Early Childhood Education 2: Infants, Toddlers, and Young Children	
EDUT 6213	Language Development: Literacy, Communication, and Multilingualism	

Concentration Options

Complete one of the following concentrations:

- Administrative Services (p. 1343)
- Early Childhood Special Education (p. 1343)
- Multiple Subject Education (p. 1343)

Program Credit/GPA Requirements

39 minimum semester hours required (total semester hours may vary based on the course options the student chooses)

Minimum 3.000 GPA required

CONCENTRATION IN ADMINISTRATIVE SERVICES

Coursework that prepares students for the **Administrative Services Credential** is listed below:

Code	Title	Hours
EDUT 6300	School Law and Public Policy	3
EDUT 6301	Instructional Leadership	4
EDUT 6302	Field Experience 1: Educational Leadership	2
EDUT 6303	Field Experience 2: Educational Leadership	2
EDUT 6304	Working with Families and the Community	3
EDUT 6305	Human Resource Management in Education	4
EDUT 6306	School Leadership	4
EDUT 6307	Fiscal and Business Services	4
EDUT 6308	Trauma-Informed Leadership	4

CONCENTRATION IN EARLY CHILDHOOD SPECIAL EDUCATION

Coursework that prepares students for the **Special Education Credential** is listed below:

Code	Title	Hours
EDUT 6200	Cultivating Critical Consciousness in Practice	3
EDUT 6201	Legal Aspects and Program Design of Special Education	3
EDUT 6202	Children with Special Needs: Infants and Young Children	3
EDUT 6203	Theory and Practice of Early Childhood Education 1: Infants, Toddlers, and Young Children	3
EDUT 6204	Theory and Practice of Early Childhood Education 2: Infants, Toddlers, and Young Children	3
EDUT 6205	Family Systems and Cultural Diversity	3
EDUT 6206	Assessment and Intervention for Children with Special Needs	3
EDUT 6207	Positive Behavior Support and Intervention	3
EDUT 6208	Field Experience in Early Childhood Special Education 1	3
EDUT 6209	Field Experience in Early Childhood Special Education 2	3
EDUT 6212	Leadership and Administration in Early Childhood Programs	3
EDUT 6213	Language Development: Literacy, Communication, and Multilingualism	3

CONCENTRATION IN MULTIPLE SUBJECT EDUCATION

Coursework that prepares students for the **Multiple Subject Teaching Credential** is listed below:

Code	Title	Hours
EDUT 6100	Sociopolitical Foundations 1	2
EDUT 6101	Sociopolitical Foundations 2	1
EDUT 6102	Sociopolitical Foundations 3	1
EDUT 6103	Human and Community Development 1	2
EDUT 6104	Human and Community Development 2	1
EDUT 6106	Multiliteracies 1—Multidiscipline	2
EDUT 6107	Multiliteracies 2—Multiple Subjects	1
EDUT 6112	Methodologies of English-Language Development and Content Instruction 1	2
EDUT 6115	Curriculum and Instruction 1—Multiple Subjects	2
EDUT 6116	Curriculum and Instruction 2—Multiple Subjects	2
EDUT 6117	Curriculum and Instruction 3—Multiple Subjects	2
EDUT 6124	Pedagogical Content Knowledge Lab 1—Multiple Subjects	2
EDUT 6125	Pedagogical Content Knowledge Lab 2—Multiple Subjects	3

EDUT 6126	Pedagogical Content Knowledge Lab 3—Multiple Subjects	3
EDUT 6136	Perspectives on Diversity, Equity, and Assessment	2

Educational Leadership, MA (Oakland)

This program is designed to prepare students for leadership positions in public educational institutions and emphasizes developmental and constructivist approaches to education. School leaders have an opportunity to test theory in practice, anticipate consequences, and evaluate outcomes in a wide range of educational settings. Graduates have a strong record of becoming successful school administrators and leaders in educational transformation. The Administrative Services Credential can be earned with the Master of Arts in Educational Leadership.

Administrative Services Credential

The Master of Arts in Educational Leadership includes coursework conducive to the Administrative Services Credential and prepares students for positions as administrators in K–12 public schools in the state of California. The ASC is required for administrative roles in all K–12 public schools in California; for example, the ASC is required for principals, assistant principals, superintendents, curriculum directors, and all other school administrator positions in all public schools across the state.

This credential program emphasizes both developmental and constructivist approaches to education. School leaders test theory in practice, anticipate consequences, and evaluate outcomes in a wide range of educational settings. Graduates have a strong record of becoming successful school administrators and leaders in educational transformation and school leadership. Graduates of the program are employed in 21 Bay Area school districts, including those in Alameda, Contra Costa, Sacramento, San Francisco, San Mateo, and Santa Clara counties. After completing courses required for the ASC, program graduates work with a commission-approved administrative services induction program to obtain a recommendation for the Clear Administrative Services Credential.

COURSEWORK

A total of 30 semester hours are required to earn the Master of Arts in Educational Leadership with the Administrative Services Credential. All courses offered through the educational leadership program may be applied to the MA, and the course of study will be determined by a student in partnership with their Mills College at Northeastern University faculty advisor. In most cases, it is possible to tailor the MA to an individual candidate's interests and specific career goals. All courses listed below, along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for the five-year preliminary Administrative Services Credential in the state of California. The final authority to grant a credential lies with the Commission on Teacher Credentialing.

FIELDWORK

The program values the students' ability to perform well and the rigor of their research. However, the real test of a novice administrator is at the school site, where they may use their growing knowledge and skills in a leadership capacity. Students are assigned mentor principals and field supervisors who support their leadership growth through reflective conversations, advice, and by modeling appropriate practice.

Program Requirements

Please note: All courses listed below, along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for the five-year preliminary Administrative Services Credential in the state of California. The final authority to grant a credential lies with the Commission on Teacher Credentialing.

Minimum 3.000 GPA required

Multiple Subject Education, MA (Oakland)

The Master of Arts in Multiple Subject Education is an Educators for Liberation, Justice, and Joy program administered by the Mills College at Northeastern University's School of Education in Oakland, California. This program aims to meet the urgent need for elementary schoolteachers whose teaching embodies racial and gender justice for educational equity principles, guided by an inquiry stance toward practice. The program offers beginning teachers an opportunity to obtain the skills and meet the requirements for a California Preliminary Multiple Subject Teaching Credential while completing classroom research. Students may follow either a preservice or an internship pathway toward the credential and subsequent MA.

Multiple Subject Teaching Credential

All courses in the program (with the exception of [EDUT 6210 Graduate Seminar: Research in Education 1](#), [EDUT 6211 Graduate Seminar: Research in Education 2](#), [EDUT 6150 AI in Education](#), and [PHIL 5110 Responsible AI](#)), along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for the Preliminary Multiple Subject Teaching Credential in the state of California. **The final authority to grant a credential lies with the Commission on Teacher Credentialing.**

COURSEWORK

A total of 37 semester hours are required to earn the Master of Arts in Multiple Subject Education. The coursework in the program is designed to satisfy both the requirements of the California teaching credential and lay the foundation for the MA in Multiple Subject Education. With the addition of two inquiry-oriented master's-level courses over the following academic year and the completion of their inquiry project, students will earn their Master of Arts degree.

FIELDWORK

All students are paired with a university-appointed coaching supervisor who provides guidance and feedback on their curriculum and pedagogy through a minimum of 12 observations during the school year, which must adhere to the six principles of the Teacher Performance Expectations as outlined by the California Commission on Teacher Credentialing. The successful completion of the ELJJ coursework, fieldwork, standardized exams, portfolio assessment, and all other requirements outlined by the CCTC will result in a recommendation from the ELJJ to the CCTC for a Preliminary Multiple Subject Teaching Credential. This will allow the graduate to teach in their discipline-specified area in a public school in the state of California. Through the National Association of State Directors of Teacher Education and Certification Interstate Agreement, credential holders of valid teaching state credentials, licenses, or certificates from a participating state may transfer these to another participating state, under certain conditions that must be confirmed by the receiving state's education department.

Program Requirements

Please note: All courses listed below (with the exception of [EDUT 6210 Graduate Seminar: Research in Education 1](#), [EDUT 6211 Graduate Seminar: Research in Education 2](#), [EDUT 6150 AI in Education](#), and [PHIL 5110 Responsible AI](#)), along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for the Preliminary Multiple Subject Teaching Credential in the state of California. The final authority to grant a credential lies with the Commission on Teacher Credentialing.

Minimum 3.000 GPA required

Single Subject Education, MA (Oakland)

The Educators for Liberation, Justice, and Joy program is designed to prepare graduate students to teach art, English, social science, Spanish or French, science, technology, engineering, or mathematics while earning their California Single Subject Teaching Credential and Master of Arts degree. The ELJJ program centers on racial and gender justice for educational equity and access. The program is designed around praxis as the core endeavor of teaching and teacher education, embracing critical reflection and practice to disrupt dominant ideologies and inequities. We utilize a cognitive apprenticeship model that combines coaching and inquiry and situates teacher learning within a school-based classroom. The program relies on an interdisciplinary, cross-grade, cohort community model that builds on the strengths of sociocultural learning theory. We believe that teachers must attend to the positive development of the whole child by successfully integrating culturally relevant and sustaining pedagogy, critical pedagogy, humanizing education, academic rigor, creative expression, and joy.

All courses in the program (with the exception of EDUT 6210 Graduate Seminar: Research in Education 1, EDUT 6211 Graduate Seminar: Research in Education 2, EDUT 6150 AI in Education, and PHIL 5110 Responsible AI), along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for a Preliminary Single Subject Teaching Credential in the state of California. The final authority to grant a credential lies with the Commission on Teacher Credentialing.

Coursework

A total of 36 semester hours are required to earn the Master of Arts in Single Subject Education. The coursework outlined in the program is designed to satisfy both the requirements of the California teaching credential and lay the foundation for the Master of Arts in Single Subject Education. With the addition of two inquiry-oriented master's-level courses over the following academic year and the completion of their inquiry project, students will earn their Master of Arts degree.

FOCUS AREAS

The coursework in the Single Subject (Humanities) focus area prepares students to teach art, English, social science, or Spanish or French as a foreign language.

The coursework in the Single Subject (Math/Science) focus area prepares students to teach science, technology, engineering, and mathematics in grades 6–12, particularly in urban public schools.

FIELDWORK

All students are paired with a university-appointed coaching supervisor who provides guidance and feedback on their curriculum and pedagogy through a minimum of 12 observations during the school year, which must adhere to the six principles of the Teacher Performance Expectations as outlined by the California Commission on Teacher Credentialing. The successful completion of the ELJJ coursework, fieldwork, standardized exams, portfolio assessment, and all other requirements outlined by the CCTC will result in a recommendation from the ELJJ to the CCTC for a Preliminary Single Subject Teaching Credential. This will allow the graduate to teach in their discipline-specified area in a public school in the state of California. Through the National Association of State Directors of Teacher Education and Certification Interstate Agreement, credential holders of valid teaching state credentials, licenses, or certificates from a participating state may transfer these to another participating state, under certain conditions that must be confirmed by the receiving state's education department.

Program Requirements

Please note: All courses listed below (with the exception of EDUT 6210 Graduate Seminar: Research in Education 1, EDUT 6211 Graduate Seminar: Research in Education 2, EDUT 6150 AI in Education, and PHIL 5110 Responsible AI), along with state-mandated fieldwork and assessments, fulfill the requirements to meet eligibility for a Preliminary Single Subject Teaching Credential in the state of California. The final authority to grant a credential lies with the Commission on Teacher Credentialing.

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities

- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Gordon Institute of Engineering Leadership

Website (<https://gordon.northeastern.edu/>)

Simon Pitts

Director and Head—Gordon Institute of Engineering Leadership

415 Stearns Center

617.373.4800

617.373.7680 (fax)

The Gordon Institute of Engineering Leadership offers a graduate certificate that pairs with over 20 master's programs in the College of Engineering, College of Science, and Khoury College of Computer Sciences. The Gordon program is a transformational graduate program designed to build a future corps of engineering leadership professionals. GIEL seeks to accelerate leadership development capability in an engineering context through a concentrated curriculum that inculcates both the psychological skills and capabilities needed to lead engineers in parallel with technical skills to successfully engineer products to customers and markets. The program teaches relevant leadership theory followed by practice in leadership laboratories. Technical product development and scientific principles courses are followed by the completion of a market-worthy challenge project. This learning framework is supplemented with three-way mentoring from industry, faculty, and program mentors. Graduates of the program, known as Gordon Fellows, have an opportunity to gain the knowledge, skills, and attitudes required to successfully lead engineering teams. They stand out from their peers in their ability to invent, innovate, and implement engineering projects from concept to market success. Participation in GIEL accelerates Gordon Fellows' careers, making them more valuable to their company.

The Challenge

When relatively unseasoned engineers run teams or projects, most fail to satisfy all of the project's critical requirements—missing the mark in functionality, performance, quality, time-to-market, cost, or other key objectives.

This shortfall exists because engineers enter the workforce without critical skills related to:

- Competitiveness
- Taking responsibility to prevent failure
- Market and customer focus
- Influencing and motivating skills
- Interdisciplinary decision-making and teamwork capability
- Simultaneous optimization of all elements of performance, quality, cost, and timing
- Front-loading the engineering process
- Financial acumen
- Big-picture engineering
- Leadership abilities and organizational social awareness
- Enterprise understanding
- Program management tools and processes
- Designing to avoid failure modes
- Designing for lean manufacture

The Mission

GIEL's mission is to create an elite cadre of engineering leaders who stand out from their peers in their ability to invent, innovate, and implement engineering projects from concept to market success.

These leaders will demonstrate an exceptional ability to lead engineering teams by providing purpose, direction, and motivation to influence others to achieve their collective goals.

The Method

To close the gaps and realize its mission, GIEL concentrates on the knowledge, skills, and abilities that reside at the intersection of engineering and leadership.

At the end of the program, Gordon Fellows emerge with the awareness, confidence, vision, and technical dexterity to drive positive change within their organizations and society.

Admissions

GIEL candidates must apply for and be admitted to both the Northeastern University Graduate School of Engineering and the Gordon Institute of Engineering Leadership.

Students pursue GIEL as part of a Master of Science degree in the engineering discipline of their choice or as a stand-alone graduate certificate. Upon completion of a Master of Science degree, students earn both the Master of Science degree in the discipline of choice and a Graduate Certificate in Engineering Leadership. Students who already hold a graduate degree in engineering or have greater than three years of engineering work experience can complete the program to earn a Graduate Certificate in Engineering Leadership. The core GIEL curriculum takes place during one calendar year (September–July), and additional coursework required for the Master of Science degree can be pursued before, after, or in parallel with GIEL.

Programs

Graduate Certificates

- Engineering Leadership (p. 738) (Boston)
- Technology Leadership (p. 1352) (Boston)

Engineering Leadership, Graduate Certificate (Boston)

The Gordon Engineering Leadership Program is a transformational, technical, and challenging graduate-level learning experience targeted for engineering professionals.

The Gordon Engineering Leadership Program directed by the Gordon Institute of Engineering Leadership offers a graduate certificate that pairs with over 25 master's degrees in the College of Engineering, College of Science, and Khoury College of Computer Sciences. The Gordon Program is a transformational graduate program designed to build a future corps of engineering leadership professionals.

Pursuing the graduate certificate allows participants to:

- Take part in a hands-on curriculum taught by industry-experienced professors
- Work with peers from across engineering fields on leadership skills development
- Receive one-on-one mentoring from industry experts and faculty

The Gordon Engineering Leadership Program anchors around an intense, market-worthy challenge project based on your organization's strategic needs. This is a unique opportunity to apply your classroom experience in a professional setting, potentially further accelerating your career.

How to Earn a Graduate Certificate in Engineering Leadership

If you already have a Master of Science, then you can complete the one-year program to earn a Graduate Certificate in Engineering Leadership.

If you do not have a Master of Science, then you can still be considered for the Graduate Certificate in Engineering Leadership if you have at least three years of engineering work experience.

Additional information can be found on the Gordon Engineering Leadership Program website. (<https://gordon.northeastern.edu>)

Beyond a Graduate Certificate

Most candidates pursue the Gordon Engineering Leadership Program as part of a Master of Science degree in the engineering discipline of their choice. Upon completion, they earn both a Master of Science degree and a Graduate Certificate in Engineering Leadership.

Students can enroll in the Engineering Leadership Graduate Certificate while pursuing the following degrees:

- MS Advanced and Intelligent Manufacturing (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/advanced-and-intelligent-manufacturing/>)
- MS Biotechnology (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-science/ms-in-biotechnology/>)
- MS Climate Science and Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/climate-science/>)
- MS Computer Science (<https://gordon.northeastern.edu/certificate-and-degree-options/khoury-college-of-computer-sciences/computer-science/>)
- MS Cybersecurity (<https://gordon.northeastern.edu/certificate-and-degree-options/khoury-college-of-computer-sciences/ms-in-information-assurance-and-cyber-security/>)
- MS Data Analytics Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-data-analytics-engineering/>)
- MS Engineering and Public Policy (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-engineering-and-public-policy/>)
- MS Human Factors (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/human-factors/>)
- MS Robotics (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/robotics/>)
- MS Telecommunication Networks (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-telecommunication-networks/>)
- MSBioE Bioengineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-bioengineering/>)
- MSChE Chemical Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/chemical-engineering/>)
- MSCivE Civil Engineering (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-civil-engineering/>)
- MSCSE Software Engineering Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-computer-systems-engineering/>)
- MSECE Electrical and Computer Engineering (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-electrical-and-computer-engineering/>)
- MSECLEL Electrical and Computer Engineering Leadership (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-electrical-and-computer-engineering-leadership/>)
- MSEM Engineering Management (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-engineering-management/>)

- MSEN Energy Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-energy-systems/>)
- MSENvE Environmental Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-environmental-engineering/>)
- MSIE Industrial Engineering (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-industrial-engineering/>)
- MSIS Information Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-information-systems/>)
- MSME Mechanical Engineering (select concentrations) (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-mechanical-engineering/>)
- MSOR Operations Research (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-operations-research/>)
- MSSBS Sustainable Building Systems (<https://gordon.northeastern.edu/certificate-and-degree-options/college-of-engineering/ms-in-sustainable-building-systems/>)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
ENLR 5121	Engineering Leadership 1	2
ENLR 5122	Engineering Leadership 2	2
ENLR 5131	Scientific Foundations of Engineering 1	2
ENLR 5132	Scientific Foundations of Engineering 2	2
Complete the following two courses based on the discipline of your master's program:		
ENLR 7440	Engineering Leadership Challenge Project 1	4
or EECE 7440	Electrical and Computer Engineering Leadership Challenge Project 1	
or ENSY 7440	Energy Systems Engineering Leadership Challenge Project 1	
or IE 7440	Industrial Engineering Leadership Challenge Project 1	
or ME 7440	Mechanical Engineering Leadership Challenge Project 1	
or TELR 7440	Technology Leadership Challenge Project 1	
ENLR 7442	Engineering Leadership Challenge Project 2	4
or EECE 7442	Electrical and Computer Engineering Leadership Challenge Project 2	
or ENSY 7442	Energy Systems Engineering Leadership Challenge Project 2	
or IE 7442	Industrial Engineering Leadership Challenge Project 2	
or ME 7442	Mechanical Engineering Leadership Challenge Project 2	
or TELR 7442	Technology Leadership Challenge Project 2	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Technology Leadership, Graduate Certificate (Boston)

The Graduate Certificate in Technology Leadership offered by the Gordon Institute of Engineering Leadership (GIEL) is a transformational graduate program designed to build a future corps of technology leadership professionals. GIEL seeks to accelerate leadership development capability in a technical context through a concentrated curriculum that inculcates both the psychological skills and capabilities needed to lead in parallel with technical skills to successfully release products to customers and markets. The program teaches relevant leadership theory followed by practice in leadership laboratories. Technical product development and scientific principles courses are followed by the completion of a market-worthy challenge project. This learning framework is supplemented with three-way mentoring from industry, faculty, and program mentors. Graduates of the program, known as Gordon Fellows, have an opportunity to gain the knowledge, skills, and attitudes required to successfully lead technical teams. They stand out from their peers in their ability to invent, innovate, and implement technology projects from concept to market success. Participation in GIEL accelerates Gordon Fellows' careers, making them more valuable to their company.

The Challenge

When relatively unseasoned professionals run teams or projects, most fail to satisfy all of the project's critical requirements—missing the mark in functionality, performance, quality, time-to-market, cost, or other key objectives.

This shortfall exists because professionals enter the workforce without critical skills related to:

- Competitiveness

- Taking responsibility to prevent failure
- Market and customer focus
- Influencing and motivating skills
- Interdisciplinary decision making and teamwork capability
- Simultaneous optimization of all elements of performance, quality, cost, and timing
- Front-loading the technology delivery process
- Financial acumen
- Big-picture engineering
- Leadership abilities and organizational social awareness
- Enterprise understanding
- Program management tools and processes
- Designing to avoid failure modes
- Designing for lean manufacture

The Mission

GIEL's mission is to create an elite cadre of technology leaders who stand out from their peers in their ability to invent, innovate, and implement technical projects from concept to market success.

These leaders will demonstrate an exceptional ability to lead teams by providing purpose, direction, and motivation to influence others to achieve their collective goals.

The Method

To close the gaps and realize its mission, GIEL concentrates on the knowledge, skills, and abilities that reside at the intersection of technology and leadership.

At the end of the program, Gordon Fellows emerge with the awareness, confidence, vision, and technical dexterity to drive positive change within their organizations and society.

Admissions

Candidates must apply for and be admitted to both a master's degree program at Northeastern and the Graduate Certificate in Technology Leadership.

Students pursue the Graduate Certificate in Technology Leadership as part of a master's degree or as a stand-alone graduate certificate. Upon completion of a Master of Science degree, students earn both the Master of Science degree in the discipline of choice and a Graduate Certificate in Technology Leadership. Students who already hold a graduate degree or have greater than three years' industry work experience can complete the program to earn a stand-alone Graduate Certificate in Technology Leadership. The core GIEL curriculum takes place during one calendar year (September–July), and additional coursework required for the Master of Science degree can be pursued before, after, or in parallel with GIEL.

For more information contact Amy Manley, Director of Admissions and Marketing, (617) 373-4800 or a.manley@northeastern.edu.

Program Requirements

Code	Title	Hours
TELR 5121	Technology Leadership 1	2
TELR 5122	Technology Leadership 2	2
TELR 5131	Scientific Foundations of Technology 1	2
TELR 5132	Scientific Foundations of Technology 2	2
TELR 7440	Technology Leadership Challenge Project 1	4
TELR 7442	Technology Leadership Challenge Project 2	4

¹ The Scientific Foundations of Technology 1 (TELR 5131) and Scientific Foundations of Technology 2 (TELR 5132) requirements may be met by completion of another course upon approval of the program director.

- Postsecondary Teaching, Graduate Certificate (Boston) (p. 1362)
- Project Management, Graduate Certificate—Online (p. 1362)

Professional Studies, DPS (Boston)

The Doctor of Professional Studies offers learners from diverse disciplines an opportunity to obtain the knowledge, skills, and confidence to utilize research skill sets, interdisciplinary theoretical frameworks, and a professional knowledge base to create, implement, and communicate solutions to complex problems of practice in their local, professional context.

The DPS degree program is structured to accommodate a wide range of learners from the practitioner community, including working professionals from the public and private sectors (national, state, local) and from broad and professionally diverse backgrounds. Learners explore areas such as project management and leadership, positioning them for success in higher education or in other industries where doctoral degrees are valued.

The DPS program is structured so coursework and the doctoral thesis can be completed in two to three years. Classes are delivered online with biannual Boston residencies.

For the 2025–2026 academic year, the Doctor of Professional Studies program is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern University's Graduate Academic Calendar and be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 87).

During the time a student is designated under the Office of the Provost, the College of Professional Studies will provide each student with full academic and student support services (e.g., academic advising services, co-op and career advising services, International Tutoring Center, etc.).

Beginning in the 2026–2027 academic year, students enrolled in the Doctor of Professional Studies program will transition to the College of Professional Studies, and their official college designation will be updated accordingly in the academic system of record. At that time, students will be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 986), specifically relating to the College of Professional Studies.

Program Requirements

Required Core Courses

Code	Title	Hours
PST 7700	Introduction to Doctoral Studies	3
PST 7710	Thought Leadership, Innovation, Leading Change, and Policy	3
PST 7720	Introduction to Research and Research Design	3
PST 7730	Data Analysis for Professionals: Visualization and Interpretation	3
PST 7740	Advanced Applied Research Methods	3

Restricted Electives

Complete 6 semester hours from the following:		6
EDU 7461	Data-Driven Decision Making for Workplace Learning	
EDU 7505	Writing a Publishable Article	
LWP 6400	The Policy Making Process	
LWP 6449	Public Policy Inquiry and Investigation	
PST 7750	Product Development, Innovation, and Entrepreneurship	
PST 7755	Advanced Quantitative Methods	
PST 7983	Topics	

Dissertation Courses

PJM 7100	Advanced Project Management Techniques and Methodologies	3
PJM 7110	Strategic Program and Project Portfolio Management	3
PJM 7130	Emerging Technologies in Project Management	3

Applied AI, MPS (Boston)

Humankind is on the threshold of a new era—an age of artificial intelligence as revolutionary in its global impact as the Industrial Revolution. The Master of Professional Studies in Applied AI program offers working professionals operational immersion and firsthand experiences with an end-to-end AI education that aims to prepare students proactively and thoughtfully for the evolving technology landscape and its challenges. The curriculum focuses on building and implementing AI and machine learning technologies, specializing in conversational AI, machine learning for cybersecurity, 3D imaging, and various electives. This comprehensive approach ensures that students are equipped with the skills and knowledge needed to stay ahead in the rapidly changing field of AI.

For the 2025–2026 academic year, the MPS Applied AI program is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern University's Graduate Academic Calendar and be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 87).

During the time a student is designated under the Office of the Provost, the College of Professional Studies will provide each student with full academic and student support services (e.g., academic advising services, co-op and career advising services, International Tutoring Center, etc.).

Beginning in the 2026–2027 academic year, students enrolled in the MPS Applied AI program will transition to the College of Professional Studies, and their official college designation will be updated accordingly in the academic system of record. At that time, students will be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 986), specifically relating to the College of Professional Studies.

AAI 6900	AI for Autonomous Systems

ELECTIVES OPTION

Code	Title	Hours
Complete any College of Professional Studies graduate-level courses, unused courses in this program, or a combination of both in lieu of a concentration to meet total program required semester hours.		

Applied AI—Connect, MPS (Boston)

The Master of Professional Studies in Applied AI—Connect program is designed for students without prior experience in engineering, computer technology, or statistics. The program requires an additional 9 semester hours of coursework that provide the intensive, hands-on instruction necessary for students considering a career change to artificial intelligence, connecting the student's current background to artificial intelligence applications.

For the 2025–2026 academic year, the MPS Applied AI—Connect program is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern University's Graduate Academic Calendar and be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 87).

During the time a student is designated under the Office of the Provost, the College of Professional Studies will provide each student with full academic and student support services (e.g., academic advising services, co-op and career advising services, International Tutoring Center, etc.).

Beginning in the 2026–2027 academic year, students enrolled in the MPS Applied AI—Connect program will transition to the College of Professional Studies, and their official college designation will be updated accordingly in the academic system of record. At that time, students will be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 986), specifically relating to the College of Professional Studies.

Global Doctoral Research, Graduate Certificate (Boston)

The Graduate Certificate in Global Doctoral Research is available to PhD students who are advised by Northeastern faculty or students enrolled in a PhD program at another institution who are co-advised by Northeastern faculty. The intent is to facilitate, encourage, and recognize the pedagogical and research benefits resulting from doctoral study in different cultural contexts. The intent is to guide students toward a set of globally meaningful education and research activities that infuse global values and perspectives into their research education.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
INPR 5900	Global and Intercultural Communication for Doctoral Students	2
INPR 7970	Global Research Integration	2

Electives

Code	Title	Hours
Complete 8 semester hours from the following:		8
INPR 6200	Global Research Literacies	
INPR 7900	Global Research Experience	
INPR 7995	Global Experiential Project	

Any PhD-level course with an international component may be applied to fulfillment of this requirement with prior approval from the program advisor.

Additional Requirements

- All global doctoral research students must have dissertation committee members from at least two different locations and spend time in at least two locations doing research.
- Students enrolled in a PhD program at another institution must spend time at a Northeastern University location and have a Northeastern faculty member on their dissertation committee to complete certificate requirements.
- The insights gained from the global experience must be a component of the dissertation defense.

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Organizational Communication, Graduate Certificate—Online

The study of organizational communication focuses on the dynamics of communication in complex organizations for the purpose of learning how individuals within such organizations can become effective communicators. Whether the context for such communication is meetings or professional presentations, communicating during a crisis, or intercultural exchanges, the message is consistent: Effective communication is a crucial factor in determining organizational success.

For the 2025–2026 academic year, the Graduate Certificate in Organizational Communication is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern University's Graduate Academic Calendar and be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 87).

During the time a student is designated under the Office of the Provost, the College of Professional Studies will provide each student with full academic and student support services (e.g., academic advising services, co-op and career advising services, International Tutoring Center, etc.).

Beginning in the 2026–2027 academic year, students enrolled in this graduate certificate program will transition to the College of Professional Studies, and their official college designation will be updated accordingly in the academic system of record. At that time, students will be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 986), specifically relating to the College of Professional Studies.

Postsecondary Teaching, Graduate Certificate (Boston)

The Certificate in Postsecondary Teaching prepares graduate students to be effective teachers and educators both inside and outside the classroom. It focuses on both didactic training in best practices and pedagogy around traditional teaching as well as online teaching. Finally, it is anchored by a teaching practicum where students put into practice what they have learned.

Program Requirements

Project Management, Graduate Certificate—Online

The Graduate Certificate in Project Management is designed to accommodate professionals with various levels of project management experience. Project management principles apply to both manufacturing and service industries including professionals in fields such as software engineering, construction management, and financial services.

For the 2025–2026 academic year, the Graduate Certificate in Project Management is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern University's Graduate Academic Calendar and be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 87).

During the time a student is designated under the Office of the Provost, the College of Professional Studies will provide each student with full academic and student support services (e.g., academic advising services, co-op and career advising services, International Tutoring Center, etc.).

Beginning in the 2026–2027 academic year, students enrolled in this graduate certificate program will transition to the College of Professional Studies, and their official college designation will be updated accordingly in the academic system of record. At that time, students will be governed by the academic policies and procedures documented in the university's Graduate Catalog (p. 986), specifically relating to the College of Professional Studies.
