

Northeastern University

Ruby Wallau for Northeastern University

Graduate Catalog

2025-2026

Table of Contents

Delivery of Services	21
General Information	22
Governing Boards and Officers of Northeastern	23
University Leadership	25
Accreditation	26
Authorizations	31
Notifications and Disclosures	35
Major CIP Codes	37
Resources	57
Graduate	58
Information for Entering Students	58
Academic Resources	58
Libraries	59
Office of the University Registrar	60
Campus Resources	61
Center for Advancing Teaching and Learning Through Research	61
Disability Resource Center	61
Employer Engagement and Career Design	62
Public Safety	63
University Health and Counseling Services	65
We Care	66
Information for International Students	67
Information Technology Services	68
Off Campus Engagement and Support	69
Financial Information	70
Contact Student Financial Services (SFS)	71
Tuition and Fees	72
Billing and Tuition Adjustments	79
Payment	82
Financial Aid	83
Northeastern University Student Health Plan (NUSHP)	86
Academic Policies and Procedures	87
Academic Integrity Policy	88
Academic Consequences for Violating the University Academic Integrity Policy	91
Accommodations for Students with Disabilities	92
Attendance Requirements	93
Campus Transfer and Campus Location Change	94
Clearing an Academic Deficiency	95
Code of Student Conduct	96
Course Credit Guidelines	112

Course Numbering System	113
Course Substitutions	114
Course Withdrawal	114
Grade Change Policy	114
Grade Table and GPA	115
Graduation Requirements	117
Instructional Methods	119
Leaves of Absence and University Withdrawal	120
Personal Information	123
Requesting and Clearing An Incomplete Grade	123
Retaking Courses	123
Student Bill of Academic Rights and Responsibilities	124
Student Records Privacy	127
Student Responsibility Statement	129
Student Right-to-Know Act	129
Student Time Status	130
University-Sponsored Travel	132
Academic Appeals Policies and Procedures	133
Academic Calendars	136
Audit Policy	136
Cooperative Education	137
Course Credit Sharing	139
Departmental Jurisdiction	140
Dropping a Class	140
Final Examinations and Related Policies on Other Exams	140
Minimum Cumulative GPA	141
Overload Conditions for Graduate Assistants	141
Satisfactory/Unsatisfactory Grading	141
Student Complaints	142
Regulations and Requirements for All Graduate Degree Programs	143
Regulations and Requirements for Graduate Certificate Programs	145
Regulations and Requirements for The Master's Degree	146
Regulations and Requirements for PlusOne Degree Combinations	147
Regulations and Requirements for Professional Doctorate Degree Programs	148
Regulations and Requirements for Certificates of Advanced Graduate Study	150
Regulations and Requirements for Doctor of Philosophy (PhD) Programs	151
Regulations and Requirements for Interdisciplinary Graduate Degree Programs	153
Definitions	154
PhD Programs	155
Experiential PhD (Boston)	157
Interdisciplinary, PhD (Boston)	158
Interdisciplinary, PhD (Portland)	160
University Interdisciplinary Programs	163

Artificial Intelligence, MS (Boston)	164
Complex Network Analysis, MS (Boston)	166
Data Science, MS (Boston)	169
Data Science—Align, MS (Boston)	172
Extended Realities, MS (Boston)	175
Extended Realities, MS (Oakland)	179
Robotics, MS (Boston)	180
Robotics, MS (Seattle)	184
Statistics, MS (Boston)	187
Statistics, MS—Connect (Boston)	189
AI Applications, Graduate Certificate (Boston)	190
AI Applications, Graduate Certificate (Silicon Valley)	191
Product Management, Graduate Certificate (Boston)	192
College of Arts, Media and Design	194
Academic Policies and Procedures	195
General Information	195
Grade Appeal Policy	195
Graduate Student Classification	196
Master's Degree Policies	197
School of Architecture	198
Master of Architecture—One-Year Program (Boston)	198
Master of Architecture—Two-Year Program (Boston)	199
Master of Architecture—Three-Year Program (Boston)	202
Master of Architecture—Three-Year Program—Advanced Degree Entrance (Boston)	205
Sustainable Urban Environments, MDes—One-Year Program (Boston)	209
Sustainable Urban Environments, MDes—Two-Year Program (Boston)	209
Art + Design	210
Experience Design, MFA (Boston)	211
Information Design and Data Visualization, MFA (Boston)	213
Experience Design, MS (Boston)	215
Game Science and Design, MS (Boston)	217
Game Science and Design, MS (Oakland)	219
Information Design and Data Visualization, MS (Boston)	221
Information Design and Data Visualization, MS (Vancouver)	222
Media Innovation and Data Communication, MS (Boston)	223
Experience Design, Graduate Certificate (Boston)	225
Game Experience Design, Graduate Certificate (Boston)	225
Game Science, Graduate Certificate (Boston)	226
Information Design and Visualization, Graduate Certificate (Boston)	227
Product Management, Graduate Certificate (Boston)	192
Communication Studies	228
Media, Technology, and Ethics, MS (Boston)	229
School of Journalism	231

Journalism, MA (Boston)	231
Media Advocacy, MS (Boston)	232
Media Innovation and Data Communication, MS (Boston)	223
Media, Technology, and Ethics, MS (Boston)	229
Interdisciplinary Programs	236
Interdisciplinary Design and Media, PhD (Boston)	237
Network Science, PhD (Boston)	241
Arts Administration and Cultural Entrepreneurship, MS (Boston)	246
Creative Collaboration and Multidisciplinary Design, MS (Boston)	248
Extended Realities, MS (Boston)	175
Extended Realities, MS (Oakland)	179
Urban Planning and Policy, MS (Boston)	254
AI Applications, Graduate Certificate (Boston)	190
Arts Administration, Graduate Certificate (Boston)	259
Cultural Entrepreneurship, Graduate Certificate (Boston)	259
Product Management, Graduate Certificate (Boston)	192
D'Amore-McKim School of Business	262
Master of Science	263
Business Analytics, MS (Boston)	263
Business Analytics, MS (Oakland)	264
Business Analytics—Online, MS	265
Extended Realities, MS (Boston)	175
International Management, MS (Boston)	270
Management, MS (Boston)	271
Management, MS with Major in Fintech Management (Miami)	281
Accounting, MSA (Boston)	282
Accounting and Business Administration, MSAMBA (Boston)	283
Finance, MSF (Boston)	284
Quantitative Finance, MSF (Boston)	285
Quantitative Finance, MSF (Oakland)	286
Master of Business Administration	288
Business Administration, MBA—Full-Time (Boston)	288
Business Administration, MBA—Online	297
Business Administration, MBA—Part-Time (Boston)	298
Dual Degrees	303
Business Administration, MBA—Full-Time / Finance, MSF (Boston)	304
Business Administration, MBA—Part-Time / Finance, MSF (Boston)	304
Law, JD / Accounting and Business Administration, MSAMBA (Boston)	305
Law, JD / Business Administration, MBA—Full-Time (Boston)	305
Law, LL.M. / Business Administration, MBA—Full-Time (Boston)	305
Quantitative Finance, MSF / Business Administration, MBA—Full-Time (Boston)	306
Graduate Certificates	306
Accounting and Financial Decision Making, Graduate Certificate (Boston)	307

AI Applications, Graduate Certificate (Boston)	190
Brand Management, Graduate Certificate (Boston)	308
Business Administration, Graduate Certificate (Boston)	309
Business Administration, Graduate Certificate (Miami)	310
Business Administration, Graduate Certificate—Online	311
Business Analytics, Graduate Certificate (Boston)	312
Business Management for Healthcare, Graduate Certificate (Boston)	312
Corporate Finance, Graduate Certificate (Boston)	313
Corporate Innovation, Graduate Certificate (Boston)	313
Corporate Renewal, Graduate Certificate (Boston)	314
Entrepreneurship, Graduate Certificate (Boston)	315
International Business, Graduate Certificate (Boston)	315
Investments, Graduate Certificate (Boston)	316
Leading People and Organizations, Graduate Certificate (Boston)	316
Marketing, Graduate Certificate (Boston)	317
Marketing Analytics, Graduate Certificate (Boston)	318
Mutual Fund Management, Graduate Certificate (Boston)	318
Product Management, Graduate Certificate (Boston)	192
Supply Chain Management, Graduate Certificate (Boston)	320
Sustainability and Business, Graduate Certificate (Boston)	321
Khoury College of Computer Sciences	322
Academic Policies and Procedures	323
Academic Integrity	323
Academic Probation and Dismissal	324
Attendance Policy	324
Campus Transfer	324
Certificates	325
Course Overload	325
Incomplete Grades	326
Satisfactory/Unsatisfactory (Pass/Fail) Policy	326
Reentry to Program	326
Retaking Courses	326
Transfer of Credit	326
Computer Science	327
Computer Science, PhD (Boston)	329
Network Science, PhD (Boston)	241
Personal Health Informatics, PhD (Boston)	339
Artificial Intelligence, MS (Boston)	164
Artificial Intelligence, MS (Portland)	345
Artificial Intelligence, MS (Seattle)	346
Artificial Intelligence, MS (Silicon Valley)	348
Complex Network Analysis, MS (Boston)	166
Data Science, MS (Boston)	169

Data Science, MS (Portland)	355
Data Science, MS (Silicon Valley)	357
Data Science—Align, MS (Boston)	172
Data Science, MS—Align (Portland)	361
Data Science, MS—Align (Silicon Valley)	364
Extended Realities, MS (Boston)	175
Game Science and Design, MS (Boston)	217
Internet of Things, MS (Boston)	372
Robotics, MS (Boston)	180
Robotics, MS (Seattle)	184
Statistics, MS (Boston)	187
Statistics, MS—Connect (Boston)	189
Computer Science, MSCS (Arlington)	386
Computer Science, MSCS (Boston)	388
Computer Science, MSCS (Miami)	389
Computer Science, MSCS (Oakland)	391
Computer Science, MSCS (Portland)	392
Computer Science, MSCS (Silicon Valley)	394
Computer Science, MSCS (Seattle)	395
Computer Science, MSCS (Vancouver)	398
Computer Science, MSCS—Align (Arlington)	400
Computer Science, MSCS—Align (Boston)	402
Computer Science, MSCS—Align (Miami)	404
Computer Science, MSCS—Align (Oakland)	405
Computer Science, MSCS—Align (Portland)	407
Computer Science, MSCS—Align (Seattle)	409
Computer Science, MSCS—Align (Silicon Valley)	412
Computer Science, MSCS—Align (Vancouver)	413
Computer Science, Graduate Certificate (Boston)	416
Data Analytics, Graduate Certificate (Boston)	416
Inclusive Computer Science Education, Graduate Certificate (Portland)	417
Cybersecurity	417
Cybersecurity, PhD (Boston)	418
Cybersecurity, MS (Arlington)	422
Cybersecurity, MS (Boston)	424
Cybersecurity, MS—Align (Arlington)	426
Cybersecurity, MS—Align (Boston)	428
Cybersecurity, Graduate Certificate (Boston)	429
Interdisciplinary Programs	430
Network Science, PhD (Boston)	241
Personal Health Informatics, PhD (Boston)	339
Data Science, MS (Boston)	169
Extended Realities, MS (Boston)	175

Game Science and Design, MS (Boston)	217
Health Informatics, MS (Boston)	447
Health Informatics, MS (Vancouver)	450
Robotics, MS (Boston)	180
Robotics, MS (Seattle)	184
Data Analytics, Graduate Certificate (Boston)	416
College of Engineering	460
Academic Policies	461
Academic Dismissal Policy	461
Academic Integrity Policy	461
Academic Standing Policy	462
Appeals Policy	462
Attendance Policy	463
Campus Transfer and Location Change	463
Certificate Policies and Procedures	464
Course Registration	466
Course Retake / Course Substitution	466
Course Selection	467
Dissertation Committee	467
Grievance Policy	468
PhD Student Progress and Review	468
Program Completion	469
Reenrollment Policy for Full-time Students	469
Thesis Policy	470
Bioengineering	470
Bioengineering, PhD (Boston)	471
Bioengineering, PhD (Portland)	479
Interdisciplinary Engineering, PhD (Boston)	486
Robotics, MS (Boston)	180
Bioengineering, MSBioE (Boston)	493
Bioengineering, MSBioE—Connect (Boston)	498
Chemical Engineering	499
Chemical Engineering, PhD (Boston)	500
Interdisciplinary Engineering, PhD (Boston)	486
Pharmaceutical Engineering, MS (Boston)	507
Chemical Engineering, MSChE (Boston)	509
Process Safety Engineering, Graduate Certificate (Boston)	514
Civil and Environmental Engineering	514
Civil and Environmental Engineering, PhD (Boston)	516
Interdisciplinary Engineering, PhD (Boston)	486
Climate Science and Engineering, MS (Boston)	520
Engineering and Public Policy, MS (Boston)	523
Sustainability Engineering Leadership, MS (Boston)	525

Civil Engineering with Concentration in Construction Management, MSCivE (Boston)	526
Civil Engineering with Concentration in Data and Systems, MSCivE (Boston)	528
Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering, MSCivE (Boston)	531
Civil Engineering with Concentration in Structures, MSCivE (Boston)	533
Civil Engineering with Concentration in Transportation, MSCivE (Boston)	535
Civil Engineering with Concentration in Water, Environmental, and Coastal Systems, MSCivE (Boston)	537
Environmental Engineering, MSEnVE (Boston)	539
Sustainable Building Systems, MSSBS (Boston)	541
Climate and Engineering, Graduate Certificate (Boston)	543
Sustainability Engineering, Graduate Certificate (Boston)	544
Electrical and Computer Engineering	544
Computer Engineering, PhD (Boston)	546
Cybersecurity, PhD (Boston)	418
Electrical Engineering, PhD (Boston)	551
Electrical Engineering, PhD (Oakland)	553
Interdisciplinary Engineering, PhD (Boston)	486
Applied Physics and Engineering, MS (Boston)	557
Artificial Intelligence, MS (Boston)	164
Data Science, MS (Boston)	169
Extended Realities, MS (Boston)	175
Internet of Things, MS (Boston)	372
Robotics, MS (Boston)	180
Robotics, MS (Seattle)	184
Semiconductor Engineering, MS (Boston)	580
Wireless and Network Engineering, MS (Boston)	583
Electrical and Computer Engineering with Concentration in Communications, Control, and Signal Processing, MSECE (Boston)	585
Electrical and Computer Engineering with Concentration in Computer Systems and Software, MSECE (Boston)	588
Electrical and Computer Engineering with Concentration in Computer Systems and Software, MSECE (Seattle)	590
Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms, MSECE (Boston)	593
Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms, MSECE (Seattle)	596
Electrical and Computer Engineering with Concentration in Electromagnetics, Plasma, and Optics, MSECE (Boston)	598
Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence, MSECE (Boston)	601
Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence, MSECE (Seattle)	604
Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices, MSECE (Boston)	606
Electrical and Computer Engineering with Concentration in Power Systems, MSECE (Boston)	609
Electrical and Computer Engineering Leadership, MSECEL (Boston)	611
Mechanical and Industrial Engineering	612
Industrial Engineering, PhD (Boston)	614
Interdisciplinary Engineering, PhD (Boston)	486
Mechanical Engineering, PhD (Boston)	619
Advanced and Intelligent Manufacturing, MS (Boston)	622
Artificial Intelligence, MS (Boston)	164
Data Analytics Engineering, MS (Boston)	628

Data Analytics Engineering, MS (Seattle)	631
Data Analytics Engineering, MS (Vancouver)	634
Data Analytics Engineering, MS—Online	637
Human Factors, MS (Boston)	638
Robotics, MS (Boston)	180
Robotics, MS (Seattle)	184
Semiconductor Engineering, MS (Boston)	580
Industrial Engineering, MSIE (Boston)	651
Engineering Management, MSEM (Boston)	655
Engineering Management, MSEM—Online	659
Energy Systems, MSeNeS (Boston)	660
Energy Systems, MSeNeS-Academic Link Program (Boston)	663
Mechanical Engineering with Concentration in General Mechanical Engineering, MSME (Boston)	664
Mechanical Engineering with Concentration in Materials Science, MSME (Boston)	667
Mechanical Engineering with Concentration in Mechanics and Design, MSME (Boston)	669
Mechanical Engineering with Concentration in Mechatronics, MSME (Boston)	672
Mechanical Engineering with Concentration in Thermofluids, MSME (Boston)	675
Operations Research, MSOR (Boston)	677
AI Applications, Graduate Certificate (Boston)	190
Data Analytics Engineering, Graduate Certificate (Boston)	681
Data Analytics Engineering, Graduate Certificate—Online	682
Digital Platforms for Service Innovation, Graduate Certificate (Boston)	682
Energy Systems, Graduate Certificate (Boston)	684
Energy Systems Management, Graduate Certificate (Boston)	684
Engineering Business, Graduate Certificate (Boston)	685
Engineering Economic Decision Making, Graduate Certificate (Boston)	687
Engineering Management, Graduate Certificate (Boston)	687
Lean Six Sigma, Graduate Certificate (Boston)	688
Renewable Energy, Graduate Certificate (Boston)	688
Software Engineering Systems, Graduate Certificate (Boston)	689
Supply Chain Engineering Management, Graduate Certificate (Boston)	689
Sustainable Energy Systems, Graduate Certificate (Boston)	690
Technology Systems Management, Graduate Certificate (Boston)	690
Multidisciplinary Programs	691
Information Systems, MSIS (Arlington)	692
Information Systems, MSIS (Boston)	693
Information Systems, MSIS (Miami)	695
Information Systems, MSIS (Oakland)	697
Information Systems, MSIS (Portland)	698
Information Systems, MSIS (Seattle)	700
Information Systems, MSIS (Silicon Valley)	701
Information Systems, MSIS (Toronto)	702
Information Systems, MSIS (Vancouver)	704

Information Systems, MSIS—Online	706

Delivery of Services

Northeastern University assumes no liability for delay or failure to provide educational or other services or facilities due to causes beyond its reasonable control. Causes include, without limitation, power failure, fire, strikes by university employees or others, damage by natural elements, and acts of public authorities. The university will, however, exert reasonable efforts, when it judges them to be appropriate, to provide comparable services, facilities, or performance; but its inability or failure to do so shall not subject the university to liability.

In the event that Northeastern determines it must suspend or alter its operations in whole or in part due to epidemic, pandemic, other public health emergency, extreme weather, natural disaster, acts or threatened acts of terrorism or war, or any single act or combination of events beyond the university's control, Northeastern may suspend, reduce, terminate and/or modify its operations in whole or in part, which may or may not include offering online or other alternative learning options, in its discretion. In any such event, Northeastern is under no obligation to refund or credit any portion of tuition, fees, or other charges paid or owed, but it may do so in its discretion.

Northeastern reserves the sole right to promulgate and change rules and regulations and to make changes of any nature in its program; calendar; admissions policies, procedures, and standards; degree requirements; fees; and academic schedule whenever necessary or desirable including, without limitation, changes in course content and class schedule, the cancellation of scheduled classes and other academic activities, and the substitution of alternatives for scheduled classes and other academic activities. In any such case, the university will give whatever notice is reasonably practical.

Northeastern will endeavor to make available to its students a fine education and a stimulating and congenial environment. However, the quality and rate of progress of an individual's academic career and professional advancement upon completion of a degree or program are largely dependent on the individual's own abilities, commitment, and effort. In many professions and occupations, there are also requirements imposed by federal and state statutes and regulatory agencies for certification or entry into a particular field. These requirements may change while a student is enrolled in a program and may vary from state to state or country to country. Although the university stands ready to help its students find out about requirements and changes in them, it is the student's responsibility to initiate the inquiry.

Kellee Tsai, BA, MA, PhD, *Dean of the College of Social Sciences and Humanities*

Carmen L. Sceppa, BS, MD, PhD, *Dean of the Bouvé College of Health Sciences*

Accreditation

Northeastern University has maintained its status as a member in good standing of the New England Commission of Higher Education, Inc., previously New England Association of Schools and Colleges, since it was awarded its initial accreditation in 1940. The university was last reviewed by NECHE in 2018 and will be reviewed again in fall 2028.

¹ The Association of American Law Schools is an elected membership organization, not an accrediting body.

Authorizations

Northeastern University's degree-granting authority is rooted in its charter, which was established by an act of the Massachusetts Legislature in 1916.

Campus Locations and Regulatory Agencies

In addition to accreditation by the New England Commission of Higher Education, Northeastern University is regulated by local authorities for its global campus network locations. These agencies are as follows:

- Arlington, Virginia
 - State Council of Higher Education for Virginia
- Charlotte, North Carolina
 - Board of Governors of the University of North Carolina
- Miami, Florida
 - Florida Commission for Independent Education
- Portland, Maine
 - Maine Department of Education

Required Disclosures

VIRGINIA

Northeastern has processes in place to ensure that student grievances are treated with respect and addressed in a fair and professional manner. Students can report concerns to the Office of Student Conduct and Conflict Resolution (<https://www.northeastern.edu/osccr/>) or the Office of the University Ombuds for Graduate Students (<https://graduateombuds.northeastern.edu/>). At the Arlington campus, students can contact the on-site student support specialist or the campus principal.

If a student's problem has not been resolved in pursuance of the Northeastern grievance policy, they may contact the State Council of Higher Education for Virginia. SCHEV representatives can be reached via telephone at (804) 225-2600; via fax at (804) 225-2604; at this website (<https://www.schev.edu/students/resources/student-complaints/>); or by mail at 101 N. 14th Street, 10th Floor, James Monroe Building, Richmond, VA 23219.

The Virginia State Approving Agency is the approving authority of education and training programs for Virginia. Our office investigates complaints of GI Bill® beneficiaries. While most complaints should initially follow the school grievance policy, if the situation cannot be resolved at the school, the beneficiary should contact our office via email saa@dvs.virginia.gov. *GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by VA is available at the official U.S. government website at <http://www.benefits.va.gov/gibill> (<http://www.benefits.va.gov/gibill/>).*

NORTH CAROLINA

Northeastern has been evaluated by the University of North Carolina and is licensed to conduct higher education degree activity in the state. The university's guaranty bond for unearned prepaid tuition is on file with the Board of Governors of the University of North Carolina and the Office of the General Counsel at Northeastern. North Carolina students may view a copy of the Tuition Guaranty Bond by contacting Northeastern's Risk Services at 716 Columbus Avenue (Columbus Place), Suite 301 CP, Boston, MA 02120.

If students are unable to resolve a complaint offered by the Northeastern grievance procedures, they can submit a complaint through the online student complaint form at <https://studentcomplaints.northcarolina.edu/form> (<https://studentcomplaints.northcarolina.edu/form/>), or by mail to North Carolina Post-Secondary Education Complaints, 140 Friday Center Drive, Chapel Hill, NC 27517. <https://www.northcarolina.edu/post-secondary-education-complaints/>.

FLORIDA

Northeastern University—Miami is accredited by the New England Commission of Higher Education and is provisionally licensed in the state of Florida by the Commission on Independent Education. Additional information regarding the institution may be obtained by contacting the Commission for Independent Education, Department of Education, 325 West Gaines Street, Suite 1414, Tallahassee, Florida 32399-0400, toll-free telephone number (888) 224-6684.

The transferability of credits you earn at Northeastern is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree you earn in the educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Northeastern to determine if your credits or degree will transfer.

CALIFORNIA

Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education (<http://www.bppe.ca.gov>), 1747 N. Market Blvd., Ste. 225, Sacramento, CA 95834; P.O. Box 980818, West Sacramento, CA 95798-0818, (888) 370-7589, or by fax (916) 263-1897.

NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION

The transferability of credits you earn at Northeastern is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the degree you earn in the educational program is also at the complete discretion of the institution to which you may seek to transfer. If the credits or degree that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Northeastern to determine if your credits or degree will transfer.

The Office of Student Assistance and Relief is available to support prospective students, current students, or past students of private postsecondary educational institutions in making informed decisions, understanding their rights, and navigating available services and relief options. The office may be reached by calling (888) 370-7589 or by visiting <https://osar.bppe.ca.gov/>.

WASHINGTON

Northeastern is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes Northeastern to offer specific degree programs. The council may be contacted for a list of currently authorized programs. Authorization by the council does not carry with it an endorsement by the council of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the council at P.O. Box 43430, Olympia, WA 98504-3430 or by email at degreeauthorization@wsac.wa.gov.

The transferability of credits earned at Northeastern is at the discretion of the receiving college, university, or other educational institution. Students considering transferring to any institution should not assume that credits earned in any program of study at Northeastern will be accepted by the receiving institution. Similarly, the ability of a degree, certificate, diploma, or other academic credential earned at Northeastern to satisfy an admission requirement of another institution is at the discretion of the receiving institution. Accreditation does not guarantee credentials or credits earned at Northeastern will be accepted by or transferred to another institution. To minimize the risk of having to repeat coursework, students should contact the receiving institution in advance for evaluation and determination of transferability of credits and/or acceptability of degrees, diplomas, or certificates earned. The Washington Student Achievement Council has authority to investigate student complaints against specific schools. WSAC may not be able to investigate every student complaint. Visit <http://www.wsac.wa.gov/student-complaints> (<http://www.wsac.wa.gov/student-complaints/>) for information regarding the WSAC complaint process.

ONTARIO

Master of Science in Project Management (p. 1078)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting July 28, 2021. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Regulatory Affairs (p. 1083)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting June 25, 2021. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Professional Studies in Analytics (p. 1026)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting March 6, 2020. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Professional Studies in Informatics (p. 1044)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting March 6, 2020. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Information Systems (p. 702)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting July 28, 2021. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Biotechnology (p. 1154)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting September 14, 2021. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Cyber-Physical Systems (p. 723)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting January 18, 2023. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Bioinformatics (p. 1133)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting January 18, 2023. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Software engineering systems (p. 733)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting April 4, 2025. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Data architecture and management (p. 728)

This institution has been granted consent by the Minister of Colleges, Universities, Research Excellence and Security to offer this degree program for a five-year term starting April 4, 2025. Prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

BRITISH COLUMBIA**Master of Science in Computer Science (p. 398)**

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective July 7, 2019, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Align—Master of Science in Computer Science (p. 413)

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective July 7, 2019, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Data Analytics Engineering (p. 634)

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective November 29, 2021, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Science in Information Design and Data Visualization (p. 222)

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective October 28, 2021, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

Master of Professional Studies in Analytics (p. 1027)

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective October 28, 2021, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

MASTER OF SCIENCE IN INFORMATION SYSTEMS (p. 704)

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective March 3, 2023, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (e.g., acceptable to potential employers, professional licensing bodies, or other educational institutions).

MASTER OF professional studies in digital media (p. 1037) (*including connect* (p. 1041))

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective June 6, 2023, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (for example, acceptable to potential employers, professional licensing bodies, or other educational institutions).

MASTER OF science in health informatics (p. 450)

This program is offered under the written consent of the Minister of Post-Secondary Education and Future Skills effective January 31, 2025, having undergone a quality assessment process and been found to meet the criteria established by the minister. Nevertheless, prospective students are responsible for satisfying themselves that the program and the degree will be appropriate to their needs (for example, acceptable to potential employers, professional licensing bodies, or other educational institutions).

Distance Education/State Authorization Reciprocity Agreement Student Complaint Procedures (<https://graduate.northeastern.edu/state-authorization-statements-and-complaint-resolution/>)

Notifications and Disclosures

The *Northeastern University Catalog* contains the university's primary statements about approved academic programs and degree requirements, as authorized by the president or the Board of Trustees.

The *Northeastern University Catalog* contains current information about the university calendar, admissions, degree requirements, fees, and certain procedures and regulations; however, such information is not intended and should not be regarded to be contractual. Course information was current as of June 5, 2025. For updated course information, students and advisors should consult the Banner course catalog (<https://nubanner.neu.edu/StudentRegistrationSsb/ssb/term/termSelection/?mode=courseSearch>).

Accreditation

Please visit the Accreditation (<https://catalog.northeastern.edu/graduate/appendix/statements-accreditation/>) page of this catalog for details of Northeastern University's accreditation status.

FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

In accordance with the Family Educational Rights and Privacy Act of 1974, Northeastern University permits its students to inspect their records wherever appropriate and to challenge specific parts of them when they feel it is necessary to do so. Specific details of the law as it applies to Northeastern are discussed in this section of the catalog (p. 127).

PERSISTENCE RATES UNDER THE STUDENT RIGHT-TO-KNOW ACT

In the fall of 2024, the persistence rate for undergraduate students who entered in the fall 2023 cohort was 96.9%.

TUITION DEFAULT POLICY

In cases where the student defaults on their tuition, the student shall be liable for the outstanding tuition and all reasonable associated collection costs incurred by the university, including attorneys' fees.

NONDISCRIMINATION POLICIES

Northeastern University is committed to providing a living, learning, and working environment free from discrimination and harassment and does not discriminate on the basis of race, color, religion, religious creed, genetic information, sex (including on the basis of sex stereotypes, sex characteristics, pregnancy, or related conditions), gender, gender identity, gender expression, sexual orientation, age, national origin, ancestry, ethnicity, disability, or veteran or military status in admission to, access to, treatment in, or employment in its programs and activities. The university will not tolerate any conduct that violates rights guaranteed by law, or any of the university policies that prohibit discrimination, including the Policy on Equal Opportunity (https://www.northeastern.edu/policies/pdfs/Policy_on_Equal_Opportunity.pdf), Policy on Sexual and Gender-Based Harassment and Title IX (https://policies.northeastern.edu/policy104/#_ga=21399120526780236931685972406-9222403871666097079), and the Policy on Non-Fraternization (https://www.northeastern.edu/policies/pdfs/Policy_on_Non-Fraternization.pdf). Furthermore, university policy also includes prohibitions of retaliation for filing complaints of discrimination with the Office for University Equity and Compliance. Links to the university's nondiscrimination policies and its grievance procedures are available at the OUEC (<https://www.northeastern.edu/ouec/>). Inquiries regarding the university's nondiscrimination policies may be directed to:

Office for University Equity and Compliance (<https://ouec.northeastern.edu/>)
Mark Jannoni, Assistant Vice President and Title IX Coordinator
125 Richards Hall
Northeastern University
Boston, Massachusetts 02115
617.373.4644
ouec@northeastern.edu

The university strongly encourages any person to report information relating to alleged discrimination or harassment to the OUEC (<https://ouec.northeastern.edu/>) by completing the form available here (<https://web.studentally.com/#/report/northeastern>) or through any of the contact options listed above. OUEC's policies, as well as other helpful information, can be found at the OUEC website (<https://ouec.northeastern.edu/>).

DISABILITY ACCESS SERVICES

Disability Access Services (<https://drc.sites.northeastern.edu/>) provides a variety of disability-related services and accommodations to Northeastern University's students with documented disabilities.

Northeastern's compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 are coordinated by the senior director of Disability Access Services. Persons requiring information regarding Disability Access Services should contact the center at 617.373.2675 or at DASBoston@northeastern.edu.

CLERY ACT

Northeastern University is committed to assisting all members of the university community in providing for their own safety and security. Information regarding campus security and personal safety, including topics such as crime prevention, university police law enforcement authority, crime reporting policies, crime statistics for the most recent three-year period, and disciplinary procedures, is available in the Annual Security & Fire Safety Reports, located on the NUPD website (<https://nupd.northeastern.edu/annual-reports/>).

EMERGENCY INFORMATION

The university is prepared to respond to emergencies and urgent situations that require immediate action with a trained team of police officers, EMTs, health and counseling experts, student affairs and residential life staff, and other professionals from a coordinated group that is able to manage a wide range of potential situations.

In case of emergency or crisis situations that require immediate notification, university officials will deploy the NU Alert system, which sends email, voicemail, and text messages to students, faculty, and staff. NU Alert is intended to communicate pertinent information and, when appropriate, provide directions to those in the affected area(s).

A record of past Timely Warning and NU Alert Emergency Notifications for our campus community can be found on the NUPD website (<https://nupd.northeastern.edu/safety-notifications/>).

Examples of crisis situations range from snowstorms to national emergencies that have a local impact.

Additional information on the university's emergency information systems can be found on the university's Emergency information (<https://www.northeastern.edu/emergency-information/>) website.

MISSION STATEMENT

To educate students for a life of fulfillment and accomplishment.

To create and translate knowledge to meet global and societal needs.

Major CIP Codes

The following is a list of Northeastern University majors for programs accepting new students for the 2025-2026 catalog year, along with each major's corresponding CIP code. "CIP" refers to the Classification of Instructional Programs published by the U.S. Department of Education's National Center for Education Statistics (<https://nces.ed.gov/ipeds/cipcode/Default.aspx?y=56>).

Information for Entering Students

Graduate education at Northeastern University integrates the highest level of scholarship across disciplinary boundaries with significant research and experiential learning opportunities in Boston and around the world. Northeastern offers hundreds of graduate programs, ranging from doctoral and full-time master's programs to part-time programs and graduate certificates, including an array of innovative PhD and master's programs designed to prepare students for emerging new fields. Students are able to take courses on campus, online, or in hybrid formats. This multidimensional learning environment offers students the knowledge and experience to excel and the flexibility to create the educational experience that best meets their needs. Our graduates are well positioned to meet the diverse demands of careers in academia, industry, and the professions.

Libraries

Northeastern University Library

Website (<https://library.northeastern.edu>)
617.373.8778

The Northeastern University Library serves the entire Northeastern community—in Boston, Oakland, across the global university system, and online. The Library provides collections and services supporting research and teaching across disciplines. Its collections are extensive, with a large proportion available digitally. The Library's collections include nearly 1.5 million e-books; almost 500,000 print titles; more than 180,000 licensed e-journals; and more than 270,000 streaming audio and visual titles. Access to print and electronic materials is provided through Scholar OneSearch, the Library's discovery platform. The Library's Archives and Special Collections hold historical records and publications of Northeastern and unique materials preserving the history of Boston's social movements, public infrastructure, neighborhoods, and natural environments.

Services provided by the Library include both on-site (in Boston and in Oakland) and online research help, the latter including 24/7 live chat with a reference librarian; subject-specialist librarians who provide in-depth consultation and research support for each academic program at the university; and an interlibrary loan system for providing materials not readily available at Northeastern. The Library actively supports the unique needs of graduate students in research and publishing through services such as citation management workshops, research data support, and digital scholarship services.

The Snell Library building in Boston is open to all Northeastern students, faculty, and staff. Spaces in the building include areas for group work and quiet individual study, with more than 50 group study rooms with whiteboards and plug-in displays for collaborative group work. Individual study rooms are also available for graduate students. The Library supports a range of creative activities and includes studios for audio recording and video production.

F. W. Olin Library in Oakland is open to all Northeastern students, faculty, and staff, as well as Mills College and Northeastern University alumni and community members. The Library offers a collection of 200,000 volumes and other media supporting the curricular needs of the programs on the Oakland campus. Spaces in the building include areas for quiet study and group work, including reservable study rooms, a seminar room, and the student lounge. F. W. Olin Library houses special collections in the Elinor Raas Heller Rare Book Room. Oakland special collections include early printed books, contemporary fine press and artists' books, the Mills College Archive, and other archives and manuscripts.

School of Law Library

Website (<https://law.northeastern.edu/library/>)
617.373.3332

The School of Law Library, located on four floors in the Knowles Law Center, includes a comprehensive collection of U.S. legal materials in print and in electronic format. Of particular note is the library's collection in the areas of public interest law; international human rights law; and public health, death penalty issues, and progressive lawyering. More information can be found at the School of Law Library webpage (<https://law.northeastern.edu/library/>).

Office of the University Registrar

The Office of the University Registrar provides an important link between the university's academic programs and policies and the student. It administers a number of specific services, including class scheduling, registration, record functions, verification of enrollment, reporting, and transcript services.

The Office of the University Registrar utilizes the Student Hub (<https://me.northeastern.edu/>) to provide students convenient access to information and services, including class schedules and registration, most recent grades, unofficial transcripts, and transcript and enrollment verification requests.

Office of the University Registrar website (<https://registrar.northeastern.edu/>)

registrar@northeastern.edu

617.373.2300

617.373.5351 (fax)

Maintenance of Student Records

The Office of the University Registrar is responsible for ensuring appropriate maintenance and safekeeping of student records. The transcript, which is stored electronically and maintained indefinitely, is the holistic record of student attendance and degree progress. In the event that the university discontinues operations, the archive of student records would be maintained by:

617.373.3157

617.373.7779 (fax)

The Center for Advancing Teaching and Learning Through Research provides professional development for all graduate students at Northeastern University in their roles as teaching assistants, instructors, and future faculty and professionals. We provide a range of opportunities for graduate students to develop effective teaching skills, including course design and communication. CATLR is committed to supporting your success at Northeastern and beyond, and we welcome you to:

- Participate in workshops and other events to learn about effective practices in teaching and course design and to adapt them for your own current or future use.
- Meet one-on-one with a CATLR consultant to discuss any aspect of teaching or preparing for the academic job market and postdoctoral careers, including developing course syllabi, teaching statements, teaching portfolios, and diversity statements.
- Invite a CATLR consultant to observe your class, recitation, lab, studio, or guest lecture and to meet with you afterward to share and discuss their observations in relation to your own goals and reflections.

All of CATLR's services are provided on a formative and confidential basis.

Disability Access Services

617.373.2675

617.373.7800 (fax)

Website (<https://disabilityaccessservices.northeastern.edu/>)

Northeastern University and Disability Access Services (DAS) are committed to providing disability services that enable students who qualify under applicable laws such as Section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA) Amendments Act to participate fully in the activities of the university. To receive accommodations through DAS, students must provide appropriate documentation that demonstrates a current significant limitation and the corresponding need for accommodations or services. DAS evaluates the information provided by students and their clinicians on a case-by-case basis and makes an individualized determination about requested accommodations based on an informed and interactive process. Accommodations and services are available for students with the following diagnoses, among others:

- Learning disabilities and/or ADHD
- Autism spectrum disorders
- Chronic or degenerative disorders
- Hearing loss
- Mobility impairments
- Psychiatric disorders
- Traumatic or acquired brain injury
- Vision impairments

Students should provide documentation to DAS at their earliest convenience to allow for sufficient time for review. After the documentation has been reviewed, a disability specialist will contact the student regarding appropriate next steps. Visit the DAS website (<http://www.northeastern.edu/drc/>) for additional information or contact staff at 617.373.2675.

Employer Engagement and Career Design

Website (<https://careers.northeastern.edu/>)

103 Stearns Center

617.373.2430

huskycareers@northeastern.edu (huskycareers@northeastern.edu)

Employer Engagement and Career Design serves a diverse and sustainable global network of learners, alumni, and employers, forming a powerful ecosystem that nurtures lifelong career design and partnerships by enabling learners to:

- Choose a major and explore career options that fit an individual's unique attributes
- Take advantage of experiential learning opportunities
- Make career decisions that will engage students and alumni in productive and fulfilling work
- Prepare for and conduct successful job searches
- Create meaningful and effective engagement with employers
- Contribute to meeting global and societal needs

We collaborate closely with the co-op community in all colleges and campuses across the global university while offering a dynamic framework of career design as lifelong learning with distinctive advising and programs to support learners at all stages of their journey. We are committed to supporting all learners and employer partners in eliminating biases and inequitable systems that stand in the way of achieving their goals and fostering an inclusive and just society.

Public Safety

Northeastern University Police Department

100 Columbus Place (Boston Administrative Offices)
617.373.3333 (EMERGENCY—police, fire, medical)
617.373.3934 (TTY emergency or nonemergency)
617.373.2121 (nonemergency regular business)
Emergency or Nonemergency for the Deaf and Hearing Impaired: Dial 711

Website (<https://nupd.northeastern.edu/>)

Public Safety Division Administrative Offices
617.373.2696

Personal Safety
617.373.2121

The Public Safety Division is committed to working with Northeastern University faculty, students, staff, and neighbors to build relationships and keep our campus thriving. Our work extends far beyond Boston, as we support learners in their academic and experiential endeavors around the world. The Public Safety Division is comprised of three sections: Police Department, Emergency Management, and International Safety.

The Northeastern University Police Department (<https://nupd.northeastern.edu/>) is a full-service and accredited police agency that comprises patrol and investigative divisions providing 24-hour service. NUPD has developed robust crime-detection and prevention strategies centered on technology and campus community engagement. Our well-trained officers are ready and willing to assist all members of our community.

A personal safety escort (<https://nupd.northeastern.edu/our-services/safety-escort-services/>) can be provided from one Boston on-campus location to another, any time of day, whenever personal safety is a concern. You'll need to provide your name, Northeastern ID number, and location. Safety escorts usually arrive in 10 to 15 minutes. A special, nighttime off-campus escort service, called the RedEye, runs from dusk to dawn to transport students to their residence within two miles from the center of the Boston campus. Every night from 5 p.m. until 6 a.m., the RedEye van will pick students up at Egan Access Road, behind Snell Library. In order to use this escort, you must book a ride in advance using the RedEye app, or you can book a ride at the RedEye dispatch center located at the Northeast Security office in the Ruggles Substation.

SafeZone (<https://nupd.northeastern.edu/safezone/>) is a mobile safety app that is unique to Northeastern. SafeZone is a smartphone app that any student or staff member can download and use for free. This app will connect you directly to the NUPD should you need our assistance or emergency support while you are on campus.

Fire egress drills in residence halls are held each semester to familiarize students with the alarm system and the evacuation routes. All building occupants must participate when a drill is held. For tips on fire safety, pick up a fire safety brochure or visit the NUPD website.

NUPD encourages you to familiarize yourself with all of the services provided by NUPD and to utilize the services and safety-related tips provided. If you see something that does not look or feel right, NUPD encourages you to say something by contacting NUPD at 617.373.2121 or Oakland Department of Public Safety at 510.430.3333 or utilizing the SafeZone app.

LOST AND FOUND ([HTTPS://NUPD.NORTHEASTERN.EDU/OUR-SERVICES/LOST-AND-FOUND/](https://nupd.northeastern.edu/our-services/lost-and-found/))

If you have lost an item on the Boston campus, call 617.373.3913. If your item has been turned in, we will contact you by telephone or email. If you have found an item of value on campus, return it to our headquarters located at 100 Columbus Place. If you suspect the item has been stolen, call the NUPD at 617.373.2121 to report the theft.

UNIVERSITY EMERGENCY INFORMATION ([HTTPS://WWW.NORTHEASTERN.EDU/EMERGENCY-INFORMATION/](https://www.northeastern.edu/emergency-information/))

617.373.2000 (snow emergencies)
617.373.3333 (police, medical, or fire emergencies)

Northeastern is committed to providing members of its community with a safe and secure place in which to live, work, and study.

The university is prepared to respond to emergencies and urgent situations that require immediate action. A trained team of police officers, EMTs, health and counseling experts, student affairs and residential life staff, and other professionals form a coordinated group that is able to manage a wide range of potential situations.

NU Alert, emergency broadcast communication messages, are sent to the email addresses and telephone numbers students, faculty, and staff have provided the university. For more information on NU Alert and Emergency Planning, visit the NUPD website (<https://nupd.northeastern.edu/safety/emergency-planning/>).

Health and Counseling

24-Hour Mental Health Support

Mental health support is available at any time from any location through Find@Northeastern for all full-time degree-seeking students. Call 877.233.9477 (U.S.), 855.229.8797 (Canada), or +1.781.457.7777 (International) to connect with a mental health clinician who is there to listen, guide, and help. In addition, through Find@Northeastern, students have access to unlimited free counseling sessions with therapists in their local area, connection to specialized treatment providers, and free access to Headspace and SilverCloud. Learn more here (<https://uhcs.northeastern.edu/find-at-northeastern/>).

BOSTON

University Health and Counseling Services (<https://uhcs.northeastern.edu/>)

70 Forsyth Building, Suite 135, Boston MA 02115

617.373.2772

uhcs@northeastern.edu

University Health and Counseling Services provides medical and mental healthcare for students in Massachusetts. UHCS clinicians are board-certified and licensed practitioners who provide confidential assessment and treatment of medical and mental health concerns, as well as referrals to specialists in the local Boston area. Visit UHCS (<https://uhcs.northeastern.edu/>) for more information including access to care, NUSHP, medical leave of absence, and timely health updates.

OAKLAND

Counseling and Psychological Services (<https://oakland.northeastern.edu/student-resources/health-and-wellness/counseling-and-psychological-services/>)

Cowell Building, Oakland, CA 94613

510.430.2111

oakland-counseling@northeastern.edu

Counseling and Psychological Services provides mental health support for students on the Oakland campus. Located in the Cowell Building, CAPS offers brief therapy, groups, outreach services, and referrals to supportive resources. Visit CAPS (<https://oakland.northeastern.edu/student-resources/health-and-wellness/counseling-and-psychological-services/>) for more information, including additional mental health resources available through Find@Northeastern.

Student Health Center (<https://oakland.northeastern.edu/student-resources/health-and-wellness/>)

CPM 117, Oakland, CA 94613

510.431.1108

The Student Health Center provides on-campus confidential healthcare to students enrolled at Mills at Northeastern University. Services offered include primary and preventive care, basic treatment for illnesses and injuries, laboratory and pharmacy services, and referrals to specialty care and imaging services. The Student Health Center is an outpatient clinic staffed by a board-certified and licensed nurse practitioner and supported by a team that includes a board-certified physician.

We Care

617.373.7591

wecare@northeastern.edu (we_care@northeastern.edu)

Website (<https://we-care.studentlife.northeastern.edu/>)

The We Care Office assists students who are experiencing unexpected challenges to maintain their academic progress. The staff works with students individually to help them understand and explore their options, which may involve explaining Northeastern University policy, providing resources and referrals, and coordinating among university offices. We Care also provides guidance to faculty and staff in identifying Northeastern resources and policies to help students succeed.

Information for International Students

Office of Global Services

Website (<https://international.northeastern.edu/ogs/>)
617.373.2310

The Office of Global Services provides immigration advice and support services to over 20,000 international students and scholars enrolled throughout our global university system.

OGS enhances the educational experience of international students and scholars at Northeastern University by cultivating a supportive and inclusive community that fosters academic success and promotes personal growth. Through personalized comprehensive advising and dynamic programming, we empower students and scholars with understanding the regulatory complexities of maintaining their student/scholar status and connect them to resources to successfully navigate, adapt to, and excel in their new academic and cultural environments.

OGS provides stability in an ever-evolving regulatory climate, and we work collaboratively with campus partners toward positive outcomes for students and scholars within this framework. OGS advocates for international student and scholar interests and needs, not only within the larger university community but also at the local, regional, and national levels throughout our campus network.

OGS provides **immigration advising services** to assist international students in understanding the benefits and restrictions of being an international student, as governed by the federal immigration regulations set forth by the country of the student's study location within the Northeastern global university system. OGS advises students on the complexities of immigration compliance and interfaces with various government agencies. OGS is also responsible for monitoring student academic progress and maintaining institutional compliance through mandatory governmental reporting.

During **international student orientation**, international students will receive an overview of the immigration compliance requirements along with information and resources to support academic success, student life, campus safety, and cultural adjustment. OGS serves as a home away from home for all international students and offers a wide array of **programs and services** to assist international students with their cultural adjustment, academic success, and professional growth.

During every required academic term, international students must maintain **full-time status and appropriate on-ground presence** at Northeastern to comply with federal immigration regulations. Timely registration for full-time, on-ground courses is especially important so that international students may remain in compliance with Northeastern's governmental reporting requirements. For study permit holders in Canada, full-time registration is required to maintain work and postgraduation benefits. For F-1/J-1 students in the United States, full-time status and appropriate on-ground presence is required to maintain eligibility for all associated benefits of F-1/J-1 status. For those on student visas in the United Kingdom, students must adhere to the conditions of their student visa and fully comply with Northeastern's Academic Engagement Monitoring Policy.

Because understanding federal regulations is complex and often nuanced, international students should consult with OGS if they have questions about their individual status.

OGS—UNITED STATES ([HTTPS://INTERNATIONAL.NORTHEASTERN.EDU/OGS/](https://international.northeastern.edu/ogs/))

Information for international students and scholars attending Northeastern in the United States including I-20 (F-1) or DS-2019 (J-1) issuance, visa processing, general guidelines for maintaining status, postgraduation benefits, orientation, events and programs, and support services. F-1 and J-1 students are encouraged to regularly review the guidelines on maintaining status (<https://international.northeastern.edu/ogs/current-students/understanding-visa-requirements/guidelines-on-maintaining-status/>).

OGS—CANADA ([HTTPS://INTERNATIONAL.NORTHEASTERN.EDU/OGS/STUDENT-SUPPORT/GLOBAL-CAMPUSES/CANADA/](https://international.northeastern.edu/ogs/student-support/global-campuses/canada/))

Information for international students attending the Northeastern program in Canada including study permit compliance and extension, work eligibility, co-op work permit application, Post-Graduation Work Permit application, general guidelines, and support services.

OGS—UNITED KINGDOM ([HTTPS://WWW.NULONDON.AC.UK/ADMISSIONS/VISAS/](https://www.nulondon.ac.uk/admissions/visas/))

Information for international students attending the Northeastern program in the United Kingdom including information about Certificate of Acceptance for Studies issuance, UK student visa application processes, enrollment requirements, attendance guidelines, work regulations, poststudy work programs, and other important information regarding study requirements.

Information Technology Services

IT Services is Northeastern University's central group that provides technology services, solutions, and support to all Northeastern students. Visit the **Connect To Tech guide** (<https://connect-to-tech.northeastern.edu/students/>) for information and key technology resources that are particularly helpful to students, including:

- Northeastern accounts
- Access to email
- Laptop recommendations and discounts
- Canvas learning management system
- Software such as Office 365 and Adobe Creative Cloud
- Frequently used websites and mobile apps

Technology Support and IT Service Desk

Technology support is available 24/7 online or by phone and email. Walk-up support is available at the Tech Bar on the Boston and Oakland campuses.

G (https://service.northeastern.edu/tech/?id=its_contact_us) **et IT Support >**

service.northeastern.edu/tech (<https://service.northeastern.edu/tech/>)

617.373.HELP [4357]

help@northeastern.edu

Visit the **Tech Service Portal** (<https://service.northeastern.edu/tech/>) to search for how-tos and FAQs, borrow a laptop or other equipment, start a live chat, and search other resources.

Occasionally, interruptions to university systems, services, and tools can happen—when they do, get updates about them through Northeastern's **IT status page** (<https://northeastern.statuspage.io/>).

Off Campus Engagement and Support

617.373.8480

offcampus@northeastern.edu

Off Campus Engagement and Support and our Network Housing team at Northeastern University provide support and education related to off-campus housing, renters' rights information, and campus and community connection. We offer many resources, special programs, and events to help you find off-campus housing in Boston and across the Northeastern network; connect with roommates; stay involved on campus; and serve as a link to your peers, alumni, and community. For students on co-op, our Network Housing support offers leased housing options in popular co-op locations.

We also help you understand your rights and responsibilities as a renter, understand your lease, and how to navigate landlord issues. Peer Community Ambassadors plan programs and events for you, are here to answer all of your questions, and help you meet your neighbors.

Our extensive website offers a host of resources including an apartment search database (<http://aptsearch.northeastern.edu/>); information on neighborhoods and transportation; as well as Northeastern, City of Boston, and Network Housing resources and relocation services.

Off Campus Engagement and Support publishes an e-newsletter that provides valuable tips and information on upcoming programs and events both on campus and off campus. Individuals interested in receiving our newsletter can sign up here (<http://offcampus.sites.northeastern.edu/newsletter/>) or email us at offcampus@northeastern.edu.

For more information, visit Off Campus Engagement and Support (<http://offcampus.sites.northeastern.edu/>).

Financial Information

Student Financial Services is available to assist you in developing a plan for financing a Northeastern University education. To learn more, visit the Student Financial Services website (<https://studentfinance.northeastern.edu/>).

- Contact Student Financial Services (SFS) (p. 71)
- Tuition and Fees (p. 72)
- Billing and Tuition Adjustments (p. 79)
- Payment (p. 82)
- Financial Aid (p. 83)
- Northeastern University Student Health Plan (NUSHP) (p. 86)

Contact Student Financial Services (SFS)

Contacting Student Financial Services

Student Financial Services assists students, families, and supports through a range of self-service tools, in-person assistance, and remote services. Connect with our team to access the resources and guidance needed to navigate the financial aspects of your education with confidence.

SELF-SERVICE RESOURCES

Many SFS needs can be addressed through our convenient self-service tools, available 24/7 to our global community.

SFS SERVICE PORTAL

Students and families can find answers to common questions and access a wide range of services through the SFS Service Portal. This portal offers a comprehensive FAQ knowledge base and convenient online forms to help manage needs related to financial aid and student accounts. Services include:

- Requesting a loan adjustment or cancellation
- Reducing or canceling federal work-study funds
- Reporting an outside scholarship
- Submitting outside form requests
- And much more

Students are encouraged to log in utilizing assigned Northeastern University credentials to receive faster service.

Visit the SFS Service Portal to get started quickly and easily.

Other Contact Methods

For more ways to connect with SFS, including phone, fax, walk-in availability, and office hours, please visit the Contact Us page on the Northeastern website.

SFS INQUIRY FORM

If you need additional support beyond our self-service options, the Student Financial Services Inquiry form is the most efficient way to contact our team. Once your form is submitted, a case number will be assigned to your inquiry. This case number allows you to:

- Track the progress of your request
- Reference your inquiry in follow-up communications
- Ensure faster, more accurate assistance from our staff

Please provide as much detail as possible when submitting your form to help us resolve your issue efficiently.

NUSHP SUPPORT

For inquiries related to the Northeastern University Student Health Plan, please contact NUSHP directly. The NUSHP team is best equipped to assist with all health-plan-related questions.

Tuition and Fees

For students interested in pursuing financial assistance or educational loans, additional educational costs, known as Cost of Attendance (COA) components, can be included in the calculation of aid and loan eligibility. Components may include food, housing, books, course materials, supplies, equipment, transportation, personal expenses, and the cost of obtaining a first professional licensure. You can find comprehensive details on Student Financial Service's website (<https://studentfinance.northeastern.edu/billing-payments/tuition-and-fees/>). Please keep in mind that COA can vary significantly depending on academic program, enrollment intensity, and individual circumstances.

Please note that courses taken outside of the student's home college may be billed at the per-credit rate of the college offering the course.

All graduate programs, except specific programs listed below.	\$1,864 USD
All PhD programs	\$15,750 USD (per semester)
Doctor of Professional Studies	\$1,555 USD
Graduate Certificate, Organizational Communication—Online	\$438 USD
Graduate Certificate, Project Management—Online	\$438 USD

Dissertation and Continuation

Item	Fee
Master's or professional doctorate continuation fee (flat rate)	Equivalent to the college per-credit-hour rate listed above

Fees

For a complete list of fee descriptions, please visit Student Financial Services (<https://studentfinance.northeastern.edu/billing-payments/tuition-and-fees/fee-descriptions/>).

Item	Fee
Northeastern University Student Health Plan (p. 86)	\$2,849 USD (assessed annually)
International Student Fee	\$450 USD (onetime fee)

Campus-Specific Fees

Boston	
• Student Center Fee, full-time students (Boston students, except College of Professional Studies and School of Law students)	\$85 USD (per term)
• Student Center Fee, part-time students (Boston students, except College of Professional Studies and School of Law students)	\$12 USD (per term)
• Student Center Fee, College of Professional Studies students (Boston students)	\$9 USD (per quarter)
• Student Recreation Fee (full-time Boston students)	\$75 USD (per term)
• Student Recreation Fee (part-time Boston students)	\$40 USD (per term)
• Student Recreation Fee, College of Professional Studies (Boston students)	\$30 USD (per quarter)
• Student Activities Fee (Boston students)	\$19 USD (per term)
• Health and Counseling Fee (Boston students)	\$225 USD (assessed annually)
• Parking (per semester, optional)	
Oakland	
• Student Activities (ASMC) Fee (Oakland students)	\$100 USD (per term)
• AC Transit Fee (Oakland students)	\$72 USD (per term)

- Campus Comprehensive Fee (Oakland students) \$700 USD (per term)

California Residency-Based Fee

- Student Tuition Recovery Fund (STRF) Fee¹ Assessed annually

¹ The state of California mandates an STRF fee, at a rate of \$2.50 per \$1,000 of institutional charges, to students who are California residents or are enrolled in a residency program.

Canadian Programs

College of Arts, Media and Design

MS Biotechnology (international students)	\$1,387 CAD

Billing and Tuition Adjustments

Our team is committed to helping students and families understand the student account and associated billing statements, important dates and deadlines, payment options, and overall financial responsibilities associated with a Northeastern University education.

Billing Policy

Tuition bills are only generated electronically each semester and are available via the Student Hub. Paper bills are not generated. Balances are due prior to the start of the term. For additional information regarding the e-bill, please visit the Billing & Payments Frequently Asked Questions webpage.

Students must authorize parent or guardian access to view billing information and make payment via the Family Portal. For more information, visit the Northeastern Accounts website.

Discrepancies in your bill should be addressed in writing via the Student Financial Services Inquiry form. Include your name, Northeastern ID, Northeastern email address, dollar amount in question, date of invoice, and any other relevant information.

Responses will be sent to the student's Northeastern email address. If there is a discrepancy in your bill, pay the undisputed part of the bill to avoid responsibility for any late fees or financial holds.

Student Financial Responsibility Agreement

As compelled by federal law, all students who enroll in classes at Northeastern are required to complete and accept the Student Financial Responsibility Agreement, which acknowledges their obligations and understanding of the financial policies of the university. This will be available for completion after July 1 each academic year. The SFRA informs students of the financial responsibilities associated with enrolling for classes and explains the potential consequences that may result if a student fails to meet those obligations. This agreement must be completed once per academic year and is located on the Student Hub. Failure to complete the SFRA will result in a hold that prevents registration.

Past-Due and Delinquent Balances

When a student fails to make payment on a balance owed, the university may initiate a series of progressively severe actions, including but not limited to:

- Assessment of late fees
- Placement of a financial hold preventing:
 - Course registration or schedule changes
 - Participation in global study programs
 - Release of diplomas
- Initiation of collections activity, including referral to third-party collection agencies
- Collection fees
- Involuntary withdrawal from the university

Students withdrawn for nonpayment remain financially liable for all outstanding tuition and fees. In addition, the student is responsible for all reasonable collection costs and any legal fees incurred by the university during the collection process.

INTERNATIONAL STUDENTS

For students in F-1 or J-1 visa status, failure to resolve delinquent balances in a timely manner may negatively impact immigration status, potentially affecting eligibility to remain in or reenter the United States. Students who face status issues due to failure to resolve delinquent balances should contact the Office of Global Services.

Late Fee Policy

Northeastern has implemented a policy regarding late fees. If the balance on a student's account remains unpaid, 30 days after the initial bill due date the university will impose a late fee of \$150 on the student's account. If the student's account balance remains unpaid after the initial late fee is assessed, the university will impose an additional 1% late charge once a month, until the balance is paid. If delinquency continues to a subsequent term, the late fee assessment cycle will start again. There will be an initial late fee, in the amount of \$150, then an additional 1% late charge once a month until the balance is paid.

If a student or payer wishes to dispute a late fee assessment, they may review and submit the Late Fee Removal Request form.

Collection Partners

As outlined in the SFRA, student account balances that remain unpaid will be placed initially with ECSI, Northeastern's precollections partner. If a student account balance remains unpaid, the past-due student account balance will then be placed with a collections agency (Reliant or Radius). Information about Northeastern's collections partners can be found [here](#).

Tuition Adjustments for Dropping a Course

If a student drops one or more courses, they are eligible for a full reversal of the course tuition as long as the course(s) were dropped before the course drop deadline. Once the deadline to drop a course without a W grade passes, the student is responsible for 100% of tuition and associated charges —no partial refunds will be provided. Refer to the academic calendar for course registration dates. Please see the Financial Aid page (p. 83) for information on how financial aid will be impacted for withdrawing from or dropping a course.

Credit balances will be refunded to the student unless otherwise directed by the student or the bill payer. Note the following exceptions:

- Payment plans and supplemental loans: Credit balances created from supplemental loans or overpayment to the monthly payment plan will be refunded to the bill payer on record unless a completed Refund Authorization form, stating that funds may be released directly to the student, is received from that borrower. Please note that anticipated credits are funds that have not been received by the university and, therefore, cannot be refunded.
- International payments: Credit balances created from an international payment must be returned to the originating bank by the payment method used.

Tuition Adjustments for Official University Withdrawal

If a student submits an official withdrawal from the university, they may be eligible for a tuition adjustment based on the official withdrawal date recorded. Note that nonattendance does not constitute official withdrawal.

Tuition adjustments vary according to the duration of the course.

Please also see the Financial Aid page (p. 83) for information on how aid is impacted by withdrawal.

Information on the university's Emergency Leave of Absence policy is located in the Graduate Catalog (p. 58) (p. 58) in the "Academic Policies and Procedures" section.

Refund Schedule - Semester Calendar Programs

	Full Term	Half Term	Thirds	First Semester JD Students
Before Term	100%	100%	100%	80%
Week 1	100%	100%	0%	60%
Week 2	100%	0%	0%	40%
Week 3	0%	0%	0%	20%
Week 4	0%	0%	0%	0%

Refund Schedule - Quarter Calendar Programs

Before Term	100%
12-week quarters:	
Week 1	100%
Week 2	100%
Week 3 and thereafter	0%
6- and 8-week quarters:	
Week 1	100%
Week 2	100%
Week 3 and thereafter	0%
4-week quarters:	
Week 1	100%
Week 2 and thereafter	0%
1-week or less quarters:	

Week 1	100% (first day only)
Week 2 and thereafter	0%

STATE-SPECIFIC POLICIES

To comply with local laws regarding student refunds, Northeastern maintains state-specific refund policies. Additional information is available on the Student Financial Services website.

Tuition Insurance

Given the substantial financial commitment that students and their families must make to pay for a Northeastern education, Student Financial Services offers options for tuition insurance. For more information, visit the Student Financial Services website.

Tax Information

Northeastern provides certain annual tax forms to eligible students. For more information, visit the Student Financial Services website.

Payment

Northeastern University is committed to assisting students in developing a plan for financing their Northeastern education. Through a variety of options—including federal financial aid, Northeastern's monthly payment plan, supplemental loans, and your own resources—a plan can be designed that will make your education costs affordable.

Student Financial Responsibility Agreement

As compelled by federal law, all students who enroll in classes at Northeastern are required to complete and accept the Student Financial Responsibility Agreement, which acknowledges their obligations and understanding of the financial policies of the university. This will be available for completion after July 1 each academic year. The SFRA informs students of the financial responsibilities associated with enrolling for classes and explains the potential consequences that may result if a student fails to meet those obligations. This agreement must be completed once per academic year and is located on the Student Hub. Failure to complete the SFRA will result in a hold that prevents registration.

Payment Options

Northeastern accepts multiple payment methods. Payments will be accepted for billed charges only. Northeastern is not able to process payments for more than the balance due on the student's account.

Accepted methods of payment include:

- Electronic check and credit card
- International payments via payment partners
- 529 payments
- Other payment options including external scholarships, tuition paid by employers or other third parties, tuition reimbursement, and tuition insurance

For additional information regarding payment options, visit the Student Financial Services website.

For information on payment timelines, late payments, and adjustments to tuition, please see the graduate Billing and Tuition Adjustments page. (p. 79)

Financing Options

NORTHEASTERN'S MONTHLY PAYMENT PLAN

Northeastern offers a monthly payment plan, which allows students and families to divide their educational costs each semester into smaller, more manageable installments. In using this plan, it can reduce your need to borrow, thereby reducing the overall cost of education. The monthly payment plan can be combined with awarded financial aid as well as other payment and financing options. Multiple people can set up payment plans for the same student.

STUDENT LOANS

There are a number of educational loan programs available to assist eligible students and families in covering expenses over and above any financial aid that may be awarded from Student Financial Services. Most private lenders have credit and income requirements that students and/or parents must meet before being approved for these programs. When researching the loan and lender that best meet your needs, make sure you take into consideration the interest rate; the quality of customer service; as well as any origination, disbursement, and/or repayment fees.

Account Credit Balance Refunds

The university automatically issues refunds for eligible students whose account reflects a credit balance.

If a credit card has been used to pay any portion of the amount due, the refund will be made first to that credit card. If the credit balance on the account exceeds the amount that was paid via credit card, these additional funds will be refunded by check or direct deposit.

For additional information regarding student refunds, including Frequently Asked Questions, visit the Student Financial Services website.

Financial Aid

Northeastern University is committed to helping students make their higher education goals a reality. Our team provides the resources, support, and expert guidance needed to navigate the financial aid application process, stay on top of key dates and deadlines, and understand the factors that influence aid eligibility.

Financial Aid Eligibility

Students in the graduate colleges must meet all criteria to be eligible for federal financial aid including:

- Be a U.S. citizen or eligible noncitizen
- Be matriculated in a degree-granting program
- Have received a high school diploma or GED
- Not be in default from previous student loans
- Maintain satisfactory academic progress

Additionally, to be eligible for federal financial aid you must be enrolled in at least 4 credits per term, unless you are on a co-op, clinical rotation, residency, or are enrolled in a full-time or part-time stand-alone course.

Students enrolled in graduate certificate programs are not eligible for federal financial aid.

While international students are not eligible for federal aid, other financing options are available. Please visit the Student Financial Services website to learn more about the resources available to international students.

Types of Aid for Graduate Students

GRADUATE ASSISTANTSHIPS AND SCHOLARSHIPS

Graduate assistantships and awards are offered directly by the individual graduate schools or academic departments. Students seeking such assistance should contact their graduate school for eligibility criteria.

To review a description of available scholarships, visit the Student Financial Services website.

LOAN PROGRAMS

There are a number of different loan programs available to help graduate students finance their education. These programs include the following:

- Federal Direct Graduate PLUS Loan
- Health Professions Student Loans and Nursing Student Loans
- Physician Assistant Loan
- Supplemental Student Loans

For more information, please visit the Student Financial Services website .

How to Apply

To apply for financial aid, first-year and transfer students must submit the Free Application for Federal Student Aid. Returning students must submit the FAFSA each academic year.

Students are encouraged to submit their financial aid application materials by the priority filing deadline date to ensure that they are considered for all available financial aid programs for which they qualify. To view the priority filing deadline dates and learn more about the financial aid application process, visit the Student Financial Services website.

The timeline for receiving an award after applying for aid can vary, and students may need to respond to additional document requests. For more information on awarding timelines, see the Student Financial Services website.

Typical Graduate Financial Aid Award

Eligible students who file the FAFSA will be automatically considered for the Federal Direct Unsubsidized Loan, provided that all eligibility requirements have been met. The maximum amount that a student may borrow per academic year in the Federal Direct Unsubsidized Loan program is \$20,500.

For more information about the Federal Direct Loan Program, visit the Student Financial Services website.

Satisfactory Academic Progress

QUALITATIVE

Student grade-point averages are reviewed annually at the end of spring semester. Satisfactory academic progress requires a cumulative quality point average of 3.000 or better. The qualitative standard will be reviewed annually. Students that fail to meet this standard will not be eligible for federal aid until the cumulative 3.000 QPA is achieved.

QUANTITATIVE

Students must also meet certain quantitative requirements. Completed credits are reviewed as a percentage of attempted credits after each academic year. Students must earn at least 50% of their cumulative attempted credits to maintain SAP.

Additionally, graduate students must complete their program within the maximum allowable time frame and will not be eligible to receive financial aid once they have attempted more than 200% of the normal credits required for their degree or certificate program. Day students should refer to their college or program for the number of credits required for their degree.

APPEALS

Students who have lost their eligibility for financial aid due to failure to meet qualitative or quantitative SAP standards have the right to appeal for an additional probationary term of financial aid.

For additional information regarding SAP and the appeals process, visit the Student Financial Services website.

Change in Enrollment Status

Students must notify Student Financial Services about any change in planned period of enrollment, whether due to withdrawal from a class, a leave of absence, a change in co-op or academic division, or withdrawal from the university. Students should be aware that any change in enrollment status may result in a change in federal or institutional aid eligibility. It is the student's responsibility to notify Student Financial Services about any change in enrollment status and to ensure understanding of the ramifications of such changes. It is highly recommended that whenever possible, students discuss the impact of such changes with their financial aid counselor before making them.

For more information on how students are billed for classes taken during co-op or less than full-time enrollment, please see Graduate Billing and Tuition Adjustments.

Outside Sources of Aid

Students must notify Student Financial Services of any external aid received, such as scholarships from outside organizations. This will prompt a review, and financial aid may be recalculated based on federal, state, and institutional requirements. For further information on reporting outside aid, please visit the Student Financial Services website.

Return of Title IV Aid

Northeastern is required by federal statute to recalculate federal financial aid eligibility for students who withdraw, drop out, are dismissed, or take a leave of absence prior to completing 60% of a term. Recalculation is based on the percentage of earned aid using the Federal Return of Title IV funds formula. Federal regulations require students to obtain at least an A, B, C, D, S, or F in at least one course for the term; students who receive all unsuccessful grades for a term (NE, #W, #I, #U) will be considered unofficially withdrawn from the term. For unofficial withdrawals, the withdrawal date used for aid recalculation is the midpoint of the term.

For information on how tuition may be adjusted for withdrawals, please see Graduate Billing and Tuition Adjustments. (p. 79)

Verification

If a student is selected for verification, Student Financial Services may be required to collect additional financial documents, including tax returns and other financial documents, to verify the information provided on the FAFSA. In some cases, verification may result in changes to financial aid. For incoming students, verification must be completed before aid can disburse. For returning students, verification must be completed before aid can be awarded and disbursed.

For more information on this process, visit the Student Financial Services website.

Appeals

In some instances, graduate students may have educational expenses that exceed the standard budget for their program and may choose to utilize additional loans. Allowable expenses that may serve as the basis for a budget increase appeal may include living expenses that exceed the standard budget, dependent care, disability-related expenses, and others. For more information, students can review the Student Financial Services website.

VA Education Benefits

In accordance with Title 38 USC 3679 (e), covered individuals utilizing Chapter 31 or Chapter 33 education benefits at Northeastern University will not have any penalty imposed on their account nor will they be required to take out additional funding due to pending or late payments from the Department of Veterans Affairs as long as the Dolce Center for the Advancement of Veterans and Servicemembers has a current Certificate of Eligibility or VRE Authorization on file AND a Request for VA Benefit Certification is submitted through the Student Hub (<https://me.northeastern.edu>) portal.

COEs must be submitted before the start of the student's first term but do not need to be resubmitted unless entitlement information changes. Students are also required to complete the Request for VA Benefit Certification form through the Student Hub (<https://me.northeastern.edu>) portal before the start of each term they wish to use VA benefits. Students may have a hold placed on the account if there is an outstanding balance after payment from the VA is received by Northeastern.

Northeastern University Student Health Plan (NUSHP)

General Information

Since September 1989, Massachusetts law (M.G.L. c. 15A, § 18) has required every full-time and part-time student enrolled in a certificate, diploma, or degree-granting program in a Massachusetts institution of higher learning to participate in a Student Health Plan or in a health benefit plan with comparable coverage.

The Northeastern University Student Health Plan defines a full-time student as having full-time student status and enrolled in any amount of credits of a full-time curriculum.

NUSHP defines a part-time student as having part-time student status and enrolled in at least 75% of credits of the full-time curriculum (College of Professional Studies undergraduate students—9 credits, CPS graduate students—6 credits).

The health fee is assessed each term on a student's account based on these definitions unless the student has previously waived the health plan fee in the current academic year. Once enrolled, the student will remain enrolled for the entire plan year, ending August 31.

Students on co-op or on study abroad are considered active students and will be enrolled in and billed for NUSHP each year.

Students enrolled in pre-matriculation and online programs are not eligible for NUSHP.

Health Insurance Waiver

Eligible students are automatically enrolled in NUSHP each academic year and may waive NUSHP via the Waiver Portal (<https://go.gallagherstudent.com/Universities/Northeastern%20University/Home/>) after they have been billed for NUSHP. In addition, to be eligible to waive, comparable coverage must be effective from the beginning of the term the student meets Student Health Program requirements.

Students with comparable, ACA-compliant, domestic health coverage, may choose to waive NUSHP by completing the waiver request. A waiver request will be evaluated to ensure compliance. An email will be sent to the student if the waiver is approved, denied, or needs additional information to be completed. If a waiver is requested and approved, the student will be accepting responsibility for all medical expenses incurred, and neither Northeastern nor its Student Health Plan will be responsible for these expenses.

Visit the NUSHP website (<https://studenthealthplan.northeastern.edu/>) for more waiver information and deadlines.

Academic Integrity Policy

A commitment to the principles of academic integrity is essential to the mission of Northeastern University. The promotion of independent and original scholarship fosters an environment where students derive the most from their educational experience and their pursuit of knowledge. Academic dishonesty violates the most fundamental values of an intellectual community and undermines the achievements of the entire university.

As members of the academic community, students must become familiar with their rights and responsibilities. In each course, they are responsible for knowing the requirements and restrictions regarding research and writing, examinations of whatever kind, collaborative work, the use of study aids, the appropriateness of assistance, and other issues. Students are responsible for learning the conventions of documentation and acknowledgment of sources in their fields. Northeastern expects students to complete all examinations, tests, papers, creative projects, and assignments of any kind according to the highest ethical standards, as set forth either explicitly or implicitly in this policy or by the direction of instructors.

The following is a broad overview, but not an all-encompassing definition, of what constitutes a violation of academic integrity.

Cheating

The university defines cheating as using or attempting to use unauthorized materials, information, or study aids in any academic exercise. When completing any academic assignment, a student shall rely on their own mastery of the subject.

Examples include, but are not limited to:

- Unauthorized use of aids such as, but not limited to, notes, text, the internet, artificial intelligence, chatbots, cellphones, etc., to complete any academic assignment
- Copying from another student's current or past academic work
- Unauthorized communication during an examination
- Handing in the same academic material, in part or in total, for more than one course without explicit permission from the instructor(s)
- Intentionally viewing a test before it is administered
- Storing notes on paper or in a portable electronic device for use during an examination

Fabrication

The university defines fabrication as falsification, misrepresentation, or invention of any information, data, or citation in an academic exercise.

Examples include, but are not limited to:

- Inventing data, facts, or sources for an academic assignment
- Altering the results of a lab experiment or survey
- Citing a source in a bibliography that was not used
- Stating an opinion as a scientifically proven fact

Plagiarism

The university defines plagiarism as using as one's own the words, ideas, data, code, or other original academic material of another without providing proper citation or attribution. Plagiarism can apply to any assignment, either final or drafted copies, and it can occur either accidentally or deliberately. Claiming that one has "forgotten" to document ideas or material taken from another source does not exempt one from plagiarizing.

The following sources require citation:

- Word-for-word quotations from a source, including another student's work
- Paraphrasing (using the ideas of others in your own words)
- Unusual or controversial facts not widely recognized
- Audio, video, digital, or live exchanges of ideas, dialogue, or information
- Charts, diagrams, graphics, and images
- Recycling or reusing one's own specific words from previously published texts.

Students unclear as to whether or not a source requires citation should speak with their professor or consult the Writing Center (<https://cssh.northeastern.edu/writingcenter/>).

Unauthorized Collaboration

The university defines unauthorized collaboration as instances when students submit individual academic works that are substantially similar to one another. While several students may have the same source material, any analysis, interpretation, or reporting of data required by an assignment must be each individual's independent work unless the instructor has explicitly granted permission for group work.

Examples include, but are not limited to:

- Submitting work that closely matches that of another student, even when the work is to be original to the student handing in the assignment
- Sharing a take-home examination, case write-up, lab report, or any other assignment with a peer or on any nonpersonal portfolio website such as, but not exclusive to, Chegg, Course Hero, Quizlet, etc., without express permission from the instructor

Participation in Academically Dishonest Activities

The university defines participation in academically dishonest activities as any action taken by a student with the intention of gaining an unfair advantage over other students.

Examples include, but are not limited to:

- Misrepresenting oneself or one's circumstances to an instructor
- Stealing an examination
- Purchasing a prewritten paper
- Selling, loaning, or otherwise distributing materials intended for the purpose of cheating, plagiarism, or other academically dishonest acts
- Destroying, altering, stealing, or forging another student's work, library materials, laboratory materials, academic records, course syllabi, or examination/course grades
- Intentionally missing an examination or assignment deadline to gain an unfair advantage
- Forging information or signatures on official university documents such as, but not limited to, attendance logs, resumés, cover letters, honesty statements, etc.

Facilitating Academic Dishonesty

The university defines facilitating academic dishonesty as intentionally or knowingly helping or contributing to the violation of any provision of this policy.

Examples include, but are not limited to:

- Doing academic work for another student
- Making available previously used academic work for another individual who intends to resubmit the work for credit

Obligation to Uphold Academic Integrity

All members of the Northeastern community have a role in upholding the Academic Integrity Policy. Any member of the community who witnesses a violation of this policy should report it to the appropriate faculty member or the Office of Student Conduct and Conflict Resolution (<https://osccr.sites.northeastern.edu/>). All instructors are required to refer to Northeastern's Academic Integrity Policy in their course syllabi.

Options for Instructors Reporting Alleged Violations of the Academic Integrity Policy

A faculty member who suspects a student in their class, or working under their direction, of violating the Academic Integrity Policy can choose to:

- File official charges with the OSCCR
- Submit the complaint as an "information only" case to request that the incident be kept "on file" for the student

The director of OSCCR will review all complaints submitted against a student to determine whether sufficient evidence for a violation of the Academic Integrity Policy exists. If the director determines that the evidence of a potential violation is sufficient, the case will be assigned to a staff member within OSCCR. An instructor who believes that a student made an unintentional mistake should note that belief in an Academic Integrity report. The director of OSCCR, or designee, will review the report along with supplemental documents provided and any prior student conduct history to determine if an administrative hearing is necessary or if an "Information Only" educational reminder notice is appropriate to increase learning and awareness of campus resources. The faculty member is advised to speak with any student they intend to report for an alleged violation of the Code of Student Conduct.

Sanctions

Hearing officers and the Student Conduct Board have discretion to impose sanctions for a responsible finding of an Academic Integrity violation that range in severity from a written warning to expulsion and include an action taken by the student to help rebuild trust within the community.

Hearing officers will take the following into consideration when determining appropriate sanctions for violations of the Academic Integrity Policy:

- Nature of the violation(s)
- Severity of the damage, injury, or harm resulting therefrom
- Student's past student conduct record
- Mitigating circumstances
- Aggravating circumstances

Appeals

Students may appeal the disciplinary actions of an Academic Integrity violation on the three grounds identified in the Code of Student Conduct. The appeals process outlined in the Code of Student Conduct (p. 96) will be used for such appeals. Please refer to the Code of Student Conduct (p. 96) for a complete description and explanation of the appeals process.

Grading Authority

OSCCR does not have authority over assignment or course grades. Therefore, a student who violates Northeastern's Academic Integrity Policy may also be subject to academic penalties (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/academic-consequences-violating-academic-integrity-policy/>) at the discretion of the instructor in the course. This can result in, but is not restricted to, the student failing the course. A student with questions about the academic appeals process should contact the academic advisor to review that process.

Academic Consequences for Violating the University Academic Integrity Policy

The purpose of the Code of Student Conduct (p. 96) is to set forth Northeastern University's expectations of behavior that promote the safety and welfare of the Northeastern community. The Code of Student Conduct gives an overview of what constitutes a violation of academic integrity. Violations of the Code are handled and/or overseen by the Office of Student Conduct and Conflict Resolution (<https://osccr.sites.northeastern.edu/>).

Hearing officers and the Student Conduct Board have discretion to impose sanctions for a "responsible" finding of an academic integrity violation that range in severity from a written warning to expulsion and include an action taken by the student to help rebuild trust within the community. OSCCR does not have authority over assignment of course grades. Therefore, a student who violates Northeastern's Academic Integrity Policy may also be subject to academic consequences at the discretion of the instructor in the course.

When a student has been found responsible for violating the Academic Integrity Policy, faculty members have the discretion to apply an academic consequence. Academic consequences may include:

- **Resubmission:** resubmission of an assignment, or retaking an exam or quiz, without penalty
- **Single grade reduction:** reduction of grade or failure on project, exam, quiz, or other academic exercise on which the student was found responsible for violating the Academic Integrity Policy
- **Course grade reduction:** reduction of course grade or failure in the course

Consequences of violating academic integrity should be described in the course syllabus. When assigning consequences, faculty may consider:

- The student's familiarity with academic integrity expectations
- The amount of instruction the student has had on the violation
- The percentage of the assignment/assessment affected by the alleged violation
- The value of the affected assignment/assessment on the course grade
- The impact of the violation on others

Academic consequences may be applied through a process defined by the college.

Accommodations for Students with Disabilities

617.373.2675

617.373.7800 (fax)

Website (<https://disabilityaccessservices.northeastern.edu/>)

Northeastern University and Disability Access Services (DAS) are committed to providing disability services that enable students who qualify under applicable laws such as Section 504 of the Rehabilitation Act and the Americans with Disabilities Act (ADA) Amendments Act to participate fully in the activities of the university. To receive accommodations through DAS, students must provide appropriate documentation that demonstrates a current significant limitation and the corresponding need for accommodations or services. DAS evaluates the information provided by students and their clinicians on a case-by-case basis and makes an individualized determination about requested accommodations based on an informed and interactive process. Accommodations and services are available for students with the following diagnoses, among others:

- Learning disabilities and/or ADHD
- Autism spectrum disorders
- Chronic or degenerative disorders
- Hearing loss
- Mobility impairments
- Psychiatric disorders
- Traumatic or acquired brain injury
- Vision impairments

Students should provide documentation to DAS at their earliest convenience to allow for sufficient time for review. After the documentation has been reviewed, a disability specialist will contact the student regarding appropriate next steps. Visit the DAS website (<http://www.northeastern.edu/drc/>) for additional information or contact staff at 617.373.2675.

Attendance Requirements

Class participation is essential to success no matter the course format or its delivery. Individual instructors may have course-specific attendance policies. It is the student's responsibility to ascertain what each instructor requires. Failure to meet attendance requirements may force a student to drop the applicable courses. Students should not make conflicting commitments until the class schedules for each semester are final. Permission to make up work may be granted by instructors for reasonable cause. Requests must be made immediately upon a student's return to class. Laboratory work can be made up only during the hours of regularly scheduled instruction.

Absence Because of University-Sponsored Activities

Participation in university-sponsored activities, where the students are representing their university, college, or department, may cause absences from class that qualify as excused absences. Excused absences, with appropriate prior arrangement, are not subject to penalty, and missed work may be satisfied through agreement between the student and the instructor. University-sponsored activities that may justify excused absences include athletic competition, performing arts events, and research or other presentations.

Students must discuss absence(s) with instructors at least two weeks in advance of the university-sponsored activity, or as soon as possible if the activity is at the beginning of the term or is the result of an unforeseen circumstance. Instructors may require a written statement from the administrator in charge of the activity. Instructors are expected to make reasonable accommodations for these class absences, including administration of makeup assignments and exams whenever possible. It is expected that students seeking an excused absence will develop a plan and timetable to make up the missed coursework with their instructor(s). Note, however, that the requirements of some courses or programs may preclude such accommodations.

Absence Because of Religious Beliefs

Any student who is unable, because of their religious beliefs, to attend classes or to participate in any examination, study, or work requirement should be provided with an opportunity to make up such examination, study, or work requirement that they may have missed because of such absence on any particular day, provided that such makeup examination or work does not create an unreasonable burden upon the university. Students should make appropriate arrangements with the instructor in advance of the absence, preferably at least two weeks before the religious observance.

Absence Because of Jury Duty

Members of the university community are expected to fulfill their obligations to serve on a jury if called upon. A student selected for jury duty should inform their instructors. They will provide a reasonable substitute or compensatory opportunities for any required work missed. A student with such an absence will not be penalized in any way.

Absence Because of Military Deployment

See Leave of Absence Due to Military Deployment (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/leaves-of-absence-withdrawal/#military>).

Other Absences

Unforeseen events or circumstances, including illness, may cause a student to be absent from class. Students must notify their instructors and academic advisor, as appropriate, as soon as possible to apprise them of the circumstances leading to their absence, as well as how much time will be missed. Students must work with their instructors to develop a plan, with a timetable, to make up missed coursework. Students cannot be required to provide medical documentation, including sick notes or verification of medical treatment. (Faculty and students should note that the University Health and Counseling Services does not provide sick notes or medical excuses except for long-term illness.) Instructors are expected to make reasonable accommodations for warranted class absences, including administration of makeup assignments and exams, whenever possible.

Extended Absences

A student who is absent from school for an extended period of time must inform their academic advisor by letter, email, or telephone. The expected length of the absence may determine whether the student should apply for a medical or emergency leave of absence (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/leaves-of-absence-withdrawal/#medical>). It is strongly recommended that the student contact their academic advisor to discuss potential next steps, which could include incomplete grades; withdrawal from classes; or, in the event of an extended absence due to a chronic medical condition or disability, consultation with Disability Access Services to explore potential accommodation.

Nonattendance

Nonattendance does not constitute official course dropping or withdrawal, which means the student is fully responsible for the academic and financial consequences. Like all grades for courses attempted and/or completed, a grade earned due to nonattendance impacts a student's academic progression, an international student's visa eligibility, and a federal financial aid recipient's aid eligibility and award.

Campus Transfer and Campus Location Change

Campus Transfer

Students may request an official campus transfer from their school/college to complete their program. The program has to be approved by the school/college academically AND meet regulatory requirements (state/provincial licensure). If the student is an international student, the program has to be offered in compliance with nonimmigrant status/study permit requirements at the requested new home campus location. International students should seek advice from the Office of Global Services (<https://international.northeastern.edu/ogs/>) before the final decision to transfer to another campus.

Campus Location Change

Students may request a campus location change to a new campus (the host campus) for a period no longer than one academic year (two consecutive semesters or three consecutive quarter terms) and no more than 50% of a degree program. It must be approved by the school/college academically, and courses must be offered that allow the student to make normal academic progress in compliance with regulatory requirements. In order for international students to change a campus location, the academic program has to be offered in compliance with nonimmigrant status/study permit requirements at the requested host campus location. International students should seek advice from the OGS (<https://international.northeastern.edu/ogs/>) before requesting a campus location change.

Clearing an Academic Deficiency

An academic deficiency occurs when a student fails to complete a course with a satisfactory grade. The deficiency may occur because the student has failed the course or because the student has passed the course but with a grade that does not meet the minimum required by the student's program.

Students who have academic deficiencies may be required to clear them before progressing within the curriculum, especially if a given course is a prerequisite for future coursework. Deficiencies may affect the student's expected year of graduation.

With the approval of the appropriate program faculty and/or academic advisor, students can clear deficiencies in the following ways:

1. Retake the same course at one of Northeastern University's colleges, which will result in a "retake" grade (see "Retaking Courses" in this section of the catalog).
2. Substitute a comparable course at one of Northeastern's colleges, which will result in a "retake" grade (see "Substituting Courses" in this section of the catalog).
3. Under special circumstances, if the course is not currently offered at Northeastern, a student may be advised to take a preapproved course at another institution outside Northeastern. The original grade will remain on the student's Northeastern transcript.

Code of Student Conduct

Adopted November 12, 1971; last revised in April 2025.

The purpose of the Code of Student Conduct (the Code) is to set forth the university's expectations of behavior that promotes the safety and welfare of the Northeastern University community. The university seeks to provide a supportive environment that is conducive to learning, the pursuit of truth, the exchange of knowledge, the intellectual development of students, and the general good of society. In those instances where violations of the behavioral expectations occur, Northeastern has developed policies and procedures to protect the interests of members of the university community, individually and collectively. The Code has been developed with the assistance of students, faculty, and staff of the university.

Applicability of the Code On and Off Campus/Jurisdiction of the Code

The Code applies to all Northeastern students, at all levels of study, in all colleges and programs, at all locations in the United States or abroad, on-ground or online, as well as all student groups and organizations. It applies to all Northeastern students both on and off campus. The university establishes guidelines for the behavior of its students to promote student conduct that does not adversely affect the educational mission of the university; members of the university community; and the university's relationship with the surrounding community, partner institutions, or co-op partners. Student behavior occurring off campus that allegedly violates the Code; university policy; local, state, federal, or host country laws; and that could negatively affect the educational mission of the university or its relationship with the surrounding community may subject students to discipline as noted in the Code.

Alleged violations of the Code are handled and/or overseen by the Office of Student Conduct and Conflict Resolution (<https://osccr.sites.northeastern.edu/>). Because the conduct process is an educational process and not a legal or criminal one, the formal legal rules of evidence do not apply to the Code and its procedures. The Code states all rights applicable to the conduct process. Students may not access documents not included in their case packet, demand access to individuals, or compel witnesses to participate in the conduct process. For information regarding Title IX, sexual violence, and related rights and procedures, please refer to the university's Policy on Sexual and Gender-Based Harassment and Title IX (<https://policies.northeastern.edu/policy104/>), which governs the investigation, adjudication, appeal, and other elements of the university's response to allegations of conduct that may constitute sexual or gender-based harassment or misconduct.

The Code also applies to all accepted and prematriculated students. The university reserves the right to adjudicate an accepted student who allegedly engages in prohibited conduct prior to matriculation (e.g., at the university's New Student Orientation programs, while moving in, or prior to the official start of the semester) through the conduct process.

When a student withdraws, takes a leave of absence, or becomes inactive from the university after allegedly engaging in conduct that may violate any of the university's policies, rules, regulations, or standards of conduct, but before the alleged violation has been adjudicated through the conduct process, a hold will be placed on the student's record and the student will be banned from campus. The hold will prevent a student from reenrolling at the university until the alleged violations have been resolved. The university reserves the right to delay the awarding of a degree, certificate, badge, or other credential pending the resolution of the student conduct process. In the event a student is found responsible for violating university policy and the sanction is expulsion, the student will not be eligible to be awarded their pending credential. The university also reserves the right, in its discretion, to revoke degrees.

General Expectations

As citizens and as members of an academic community, students enjoy the same basic privileges and are bound by the same responsibilities as all citizens. Presence on campus and/or student status does not shield students from the law. Northeastern assumes that all students will abide by the policies, rules, and regulations of the university and by state, local, federal, and host country laws. The university reserves the right to inform the police or other appropriate authorities when student behavior appears to violate laws.

It is recognized that all members of an academic community, individually and collectively, have a right to express their views publicly on any issue; however, the university insists that all such expressions be peaceful and orderly, conducted in a manner consistent with the Code and university policies, and in such a way that university business and respectful academic discourse are not unduly disrupted. Northeastern students seeking to demonstrate on university property and/or in connection with a university event must comply with all applicable university policies (<https://policies.northeastern.edu/policy617/>), protocols, procedures, and requirements. Moreover, students must clearly indicate that they are speaking as individuals and not for or on behalf of the university community.

Students are expected to display proper respect for the rights and privileges of other members of the university community and their guests. The atmosphere on university property, in university facilities, online, and at university programs and events must be free from undue disruption. Furthermore, students must comply with all directions issued by university officials (including Northeastern University Police Department officers and other public safety officers acting on behalf of the university). Students are expected to be honest and forthright in their dealings with the university. Falsification, distortion, or misrepresentation of information to the university or university officials could result in being charged with a violation of the Code.

Students are expected to engage directly with OSCCR regarding any alleged violations of the Code. While students are free to consult with advocates and third parties, such third parties are not permitted to ask or communicate on behalf of students in the student conduct process. Additionally, recordings of any kind are not permitted in OSCCR, except as permitted by the Code or with express permission of OSCCR staff.

STUDENT EXPECTATIONS

Each Northeastern student can expect:

1. Written notification of alleged Code or university policy violations within a reasonable period of time from OSCCR's receipt of the complaint or incident report pertinent to those allegations. This notification will state the role of the involved student (such as charged student, victim, etc.) and date, time, and place of the administrative hearing or prehearing meeting, in the case of a Student Conduct Board (the Board) hearing. The date, place of incident, and the complainant and/or reporting party (where permitted by law and university policy) will also be included.
2. The opportunity to request to reschedule a hearing date up to one business day prior to the hearing, due to academic or other reasonable conflicts. Requests may be granted at the discretion of OSCCR.
3. The opportunity to request that a hearing be suspended after the presentation of information for a brief and agreed-upon period of time.
4. The opportunity to coordinate with Disability Access Services (<https://disabilityaccessservices.northeastern.edu/>) to request any accommodations or adjustments needed to participate in the conduct process in an equitable manner.
5. The option to request OSCCR to provide speech translation services during the hearing process.
6. The hearing may proceed without the student's presence, consistent with the Code.
7. OSCCR to make reasonable efforts to issue the decision letter within 10–15 business days after the conclusion of the hearings pertinent to the case.
8. The option to choose a Hearing Advisor, as outlined within the Structure and Procedure section of the Code, to serve as a guide throughout the student conduct hearing process.
9. The option to file an appeal within five business days. Further information regarding appeals is outlined within the Procedures for Student Appeals section of the Code.

In cases where a Board hearing is scheduled, the following procedural rights also apply:

1. To review written information received by OSCCR that is pertinent to the case (subject to any applicable privacy laws or policies), a minimum of one business day prior to the designated Board hearing date, and to address inferences that might be drawn from such statements during the Board hearing.
2. To a hearing before a panel composed of three or five Board members or, at the discretion of the director of OSCCR or designee, three members of the OSCCR staff.
3. To request the removal of names from the list of prospective Board members, with reasonable notification and explanation.
4. To question witnesses, to produce witnesses on the student's own behalf, and to present substantiating information and written personal statements on the student's own behalf. Witnesses are individuals who were present for the incident in question and/or have information relevant to the incident.

Each Northeastern student has the responsibility:

1. To review and abide by the Code and university policies and procedures, both academic and otherwise, until the conferring of their degree.
2. To monitor their university email address and respond to any Northeastern notifications sent directly to the individual student.
3. To maintain their local address information and update it at the beginning of each semester when they are an active student.
4. To represent the university appropriately, both on and off campus.
5. To respect the differences of individuals and treat others in a civil and respectful manner.
6. To carry their university ID with them at all times and present it to officials when requested.
7. To honor their fiscal responsibilities to the university.

Decision-Making Authority

1. The senior vice chancellor for student life is responsible for the overall administration of the Code, as well as the student conduct process, as it applies to individuals and student groups. Under the oversight of the senior vice chancellor for student life, the director of OSCCR has been charged with the day-to-day responsibility for administering the Code and the student conduct process.
2. All decisions made by the Board, Hearing Administrator, Appeals Board, and/or Fraternity and Sorority Life Standards Boards are subject to final approval and modification by the senior vice chancellor for student life, or designee.
3. The Board and designated Hearing Administrators are authorized to take official disciplinary actions in accordance with the policies, regulations, and sanctions contained in the Code and other policies and regulations of the university.
4. The policies and procedures outlined in the Code will at all times govern the adjudication of matters relating to the Code.

Structure and Procedure of the Student Conduct Process

The student conduct process begins when a report alleging a violation of the Code is received by OSCCR, Residential Life, Global Experience Office, or the Center for Student Involvement. For information regarding Title IX, sexual violence and misconduct, and related rights and procedures, please refer to the university's Policy on Sexual and Gender-Based Harassment and Title IX (<https://policies.northeastern.edu/policy104/>), which governs the investigation, adjudication, appeal, and other elements of conduct prohibited under that policy. Notwithstanding the procedures established in the Code, the university reserves the right to act in a manner it deems necessary or appropriate to address alleged Code violations and promote the safety and well-being of the campus community, including but not limited to altering specific elements and procedures within the Code as necessary to achieve this goal. The university specifically reserves the right to delay the awarding of a degree, certificate, badge, or other credential pending the completion of the student conduct process.

Reports of sexual and gender-based harassment and misconduct (including sexual harassment, sexual assault, domestic violence, intimate partner violence, dating violence, stalking, or retaliation) involving students are addressed by the university's Policy on Sexual and Gender-Based Harassment and Title IX (<https://policies.northeastern.edu/policy104/>) and separate procedures referenced in that policy, which outline the investigation and resolution of claims of conduct prohibited by that policy. Reports of prohibited conduct can be submitted directly to the Title IX coordinator and the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>) via several reporting options (<https://ouec.northeastern.edu/reporting-options/>).

FILING A REPORT

Incident reports can be submitted by clicking on Report an Incident (<https://osccr.sites.northeastern.edu/report-an-incident/>). Any academic or administrative official, university staff member, faculty member, student, law enforcement agency, or member of the community may file a complaint involving any student or student organization. The complaint should include the following information, if available:

1. Name(s) of the student or student organization alleged to have violated the Code and/or university policy
2. Description of the incident
3. Date of the incident
4. Names and contact information of witnesses
5. Names and contact information of those filing the report

In most instances, the person who submits a report will serve as the complainant if the report results in resolution through a Board hearing.

THE ROLE OF THE OFFICE OF STUDENT CONDUCT AND CONFLICT RESOLUTION

The role of the OSCCR (<https://osccr.sites.northeastern.edu/>) is to review all reports it receives to determine if a violation of the Code allegedly occurred and to oversee or directly resolve complaints of an alleged violation. OSCCR does not represent either party. From time to time, OSCCR may conduct or participate in an investigation to gather information about the alleged violation(s).

REVIEWING THE REPORT AND DETERMINING HEARING TYPE OR OTHER ACTION

The director of OSCCR, or designee, reviews the report to determine if a violation of the Code allegedly occurred. The severity of the alleged violation is also considered, as this determines the type of hearing that generally will be used to resolve the complaint/case. In most cases, off-campus legal proceedings will not be grounds for delay. OSCCR will determine in each case the appropriate hearing type or other action appropriate to resolve charges. However, if either party has concerns about this, the party should communicate such concerns to the Hearing Administrator. OSCCR retains the right to determine when and in what format any alleged Code violations are heard through administrative hearing or Board hearing, as well as the timing of such hearing.

- Administrative hearing—When the severity of the alleged violation(s) could result in sanctions of written warning, disciplinary probation, or deferred suspension, involved students will receive a hearing notice requesting their attendance at an administrative hearing.
- Student Conduct Board—When the severity of the alleged violation(s) could result in sanctions of suspension or expulsion, or if the facts of the incident are so complex that an administrative hearing is not appropriate, involved students will receive a hearing notice requesting their attendance at a prehearing, which precedes a Board hearing.
- End-of-term hearings—Incidents that occur and/or matters that are being scheduled to be heard during the last two weeks of classes, or finals, may be resolved by one of the following end-of-term hearing processes:

Board level—Incidents that may result in suspension or expulsion, or if the facts of the incident are so complex that an administrative hearing is not appropriate, may be resolved by an administrative hearing held prior to the end of the term or a Board hearing for the following term.

Administrative level—Incidents that will not result in suspension or expulsion may be resolved by an administrative hearing held prior to the end of the term or immediately following the end of the term.

Information only—When a report is filed with the OSCCR that is deemed to not rise to the level of a Code violation but worthy of a formal conversation to discuss behavioral expectations, an Information Only meeting may occur. Involved students will meet

with a Hearing Administrator to review the report and to clarify expectations. This does not involve formal charges against the student, but OSCCR may consider the action as part of a student's history if subsequent violations occur.

Letter only—When a report is filed with the OSCCR that is deemed to not warrant an individual meeting to address concerns, a formal reminder of expectations letter may be sent to the involved parties in order to resolve the case. The letter will include an overview of the concern and written reminder of expectations. This does not involve formal charges against the student, but OSCCR may consider the action as part of a student's history if subsequent violations occur.

When distance precludes a student from having a face-to-face Board hearing or administrative hearing with a member of OSCCR, the case may be resolved via a video conference or phone hearing.

- **Alternate resolution**—The OSCCR reserves the right to determine if the incident can be resolved by alternative means (e.g., mediation). All parties involved must agree to this, as the outcome of this alternate resolution is final.

PLEASE NOTE: The university reserves the right to hear any case, even ones where the violation(s) could result in a sanction of suspension or expulsion, through an administrative hearing when it is determined to be appropriate.

Determining responsibility—In all hearings, the Hearing Administrator or Board will use the “preponderance-of-evidence” standard, also known as “more-likely-than-not” standard, to determine if a violation of the Code occurred.

PLEASE NOTE: OSCCR will take into account the severity of the incident when determining the most appropriate method of resolving end-of-term cases.

HEARING ADVISORS

Students participating in the student conduct process may choose a university faculty or staff member who has been trained by OSCCR to serve as a Hearing Advisor. No current student may serve as Hearing Advisor. Students will receive a list of members from the university community who have volunteered to serve as a Hearing Advisor and been trained in the conduct process. Visit OSCCR's website for a full list of current Hearing Advisors (<https://osccr.sites.northeastern.edu/hearing-advisors/>). Staff or faculty who represent a student as legal counsel outside the conduct process may not act as the student's Hearing Advisor in the university process, except as permitted under the university's Policy on Sexual and Gender-Based Harassment and Title IX. Students who wish to have a Hearing Advisor present with them during meetings should communicate to OSCCR availability that is inclusive of the Hearing Advisor's schedule. Appointments will not be rescheduled solely due to a Hearing Advisor's inability to attend.

PLEASE NOTE: If Hearing Advisors fail to follow the set expectations during the proceedings of a hearing, the Hearing Administrator may take action including the removal of the Hearing Advisor from the hearing or the cessation of the hearing itself.

The role of the Hearing Advisor includes:

1. Assisting the student in understanding how the hearing will proceed.
2. Assisting the student with understanding the resolution process.
3. Attending the hearing (administrative, Board, admitted responsibility) if the student prefers and selects a time within the Hearing Advisor's availability.
4. Providing emotional support before, during, and after a hearing.
5. At no time is the Hearing Advisor permitted to address the Board or Hearing Administrator directly or communicate on behalf of the student.

DESCRIPTION OF ADMINISTRATIVE HEARINGS

When the severity of the alleged violation(s) could result in sanctions of written warning, disciplinary probation, or deferred suspension, or in certain other circumstances identified in the Code, involved students will receive a hearing notice requesting their attendance at an administrative hearing.

Notification

The administrative hearing notice will be sent to students via their university email account. This notice will provide them with the date and location of the incident; the complainant and/or reporting party (where permitted by law and university policy); the alleged violation(s); and the date, time, and location of the hearing.

The Hearing

An administrative hearing is a one-on-one meeting between the student and Hearing Administrator to discuss the alleged violation(s). Third parties including but not limited to witnesses, lawyers, parents, guardians, and friends are not permitted to attend an administrative hearing. Hearing Advisors may attend at the request of the student. During the hearing, the student provides their account of the incident, the Hearing Administrator presents the student with the report and other available documentation (from which information about or identifying others may be redacted), and asks questions to clarify or identify missing information. In addition, the student can present written documentation, including witness statements, at the administrative hearing for the Hearing Administrator's review. After the presentation of information, the student may suspend the administrative hearing for a brief and agreed-upon amount of time. After the information has been gathered and the hearing concludes, the Hearing Administrator will

review the information to determine if a violation of the Code occurred based on a preponderance of the evidence. If the Hearing Administrator determines that a student violated the Code, the student will be found responsible, and sanctions will be imposed.

Failure to Appear

If a student fails to appear for the scheduled meeting, the Hearing Administrator has the option to dismiss the charges; set a new hearing date; or make a decision and impose sanctions, if appropriate, based on the information available.

The Decision Letter

Charged students will receive a decision letter via their university email account that includes the rationale for the finding(s), sanctions (if applicable), and information on the appeal process (if applicable). In certain circumstances, other parties or members of the university community may also be informed of the decision to the extent permitted by law and university policy. Unless otherwise noted in a student's records, the university reserves the right to notify a student's parents where permitted by university policy and applicable law.

DESCRIPTION OF STUDENT CONDUCT BOARD HEARINGS

When the severity of the alleged violation(s) could result in sanctions of suspension or expulsion, or if the facts of the incident are so complex that an administrative hearing is not appropriate, involved students will receive a hearing notice requesting their attendance at a prehearing, which precedes a Board hearing. In a Board hearing, the complainant and charged student come before a panel of three or five trained Board members to provide their account of the incident, answer questions, and provide information relevant to their case.

Notification

A prehearing meeting notice is sent to the student at their university email account. This notice will provide them with the date and location of the incident; the complainant and/or reporting party (where permitted by law and university policy); the alleged violation(s); and the date, time, and location of the prehearing meeting.

The PreHearing

The prehearing meeting is a one-on-one meeting between the student and Hearing Administrator to:

- Review the incident and written documentation (from which information about or identifying others may be redacted) that forms the basis of the complaint
- Explain the charges filed against the student
- Review the Board hearing process and its possible outcomes

In addition, students will have the option to review a list of current Board members and request the exclusion of potential Board members from the hearing panel. An explanation for this request must be supplied by the student and will be reviewed by the Hearing Administrator, who has discretion to resolve the request based on relevant considerations such as the reasons for the request and the interests of fairness and efficiency.

Third parties including but not limited to witnesses, lawyers, parents, guardians, and friends are not permitted to attend the prehearing meeting. Hearing Advisors may attend at the request of the student.

During the prehearing meeting, the charged student can either accept responsibility or contest responsibility for the charges. Upon request, a charged student can delay this decision for no more than two business days after the prehearing meeting. Students should note that accepting or contesting responsibility does not necessarily lessen or increase the sanctions that could be imposed.

- Accept responsibility—Students who accept responsibility for all charges proceed to an admitted responsibility meeting, scheduled for a later date. During the admitted responsibility meeting, the Hearing Administrator presents the case to at least two members of the Board who will ask questions to determine the most appropriate sanctions. The student may provide a verbal statement as well as additional written documentation to the Board.
- Contest responsibility—Students who contest responsibility for at least one of the charges proceed to a Board hearing, scheduled for a later date. Students will have an opportunity to clarify which charges they are contesting or accepting during the introductory statements of the hearing.

OSCCR reserves the right to refer all students from the same incident to a Board hearing for a resolution, regardless of an individual student's preference regarding acceptance or contesting of responsibility.

Preparing for the Student Conduct Board Hearing

Attendance at hearings is limited to parties involved and university officials as deemed necessary by the Board and/or OSCCR. Members of the Northeastern University Police Department or other law enforcement agency may be present at hearings. Attorneys, parents, or guardians are not permitted in Board hearings unless given express permission by OSCCR. Hearing Advisors may attend at the request of the student.

Written documentation—All parties involved have the opportunity to submit written documentation for the Board to review no later than two business days prior to the hearing.

Witnesses—Witnesses who have direct information regarding the incident may be presented by the complainant or the charged student, provided that the witnesses are identified in a list submitted to OSCCR two business days prior to the hearing. OSCCR staff

may issue a written request requiring the appearance of an individual before the Board if it is determined that the person's appearance is likely to provide important information for the Board regarding a student's case.

Failure to appear—If the complainant, charged student, or witness(es) fail to appear at the scheduled hearing, the Board or Hearing Administrator may dismiss the action; set a new hearing date; or continue the hearing without that party present and determine the finding and impose sanctions, if appropriate, based on available information.

Information Regarding the Student Conduct Board Hearing

1. The Board typically consists of three or five students representing undergraduate, graduate, online, law, and/or professional studies students. In cases involving graduate and professional studies students, a simple majority of the Board members will be graduate and/or professional studies students. Where deemed appropriate at the discretion of the director of OSCCR or designee, a Board hearing may instead proceed before a panel composed of three members of the OSCCR staff.
2. The chair will typically be a student and voting member of the Board whose responsibilities during the hearing will be to act as presiding officer at hearings and in all voting procedures.
3. A Hearing Administrator from OSCCR will be present during the hearing and all deliberations to provide information on applicable university policy and procedures. The Hearing Administrator does not vote or represent either party.
4. Board hearings are audio or video recorded for the purpose of appeals only. Parties to appeals may request to listen to the recording of the hearing in the OSCCR. Recordings are not to be removed from the OSCCR and are destroyed upon completion of the appeal process. Recordings do not become part of any student's record or any conduct file maintained by OSCCR.
5. Determinations of responsibility are made based on a preponderance of the evidence, or a "more-likely- than-not" standard, as determined by simple majority vote by the Board.
6. All records of a case will be treated as confidential and disclosed only to the extent permitted under applicable law and university policy.
7. All decisions made by a Board are subject to final approval or modification by the senior vice chancellor for student life, or designee.

Presentation of Information

1. Complainant's opening statement and perspective (the complainant is the individual(s) or the office affected by or representing the complaint issued to OSCCR).
2. Charged student's opening statement and perspective (a charged student is the individual(s) charged with a violation of the Code).
3. Questioning of complainant (charged student and SCB members).
4. Questioning of charged student (complainant and SCB members).
5. Statements from complainant's witnesses.
6. Questioning of complainant's witnesses (complainant, charged student, and Board members).
7. Statements from charged student's witnesses.
8. Questioning of charged student's witnesses (charged student, complainant, and Board members).
9. Scheduled break to attend to personal needs and prepare for final statements.
10. Final questions from the Board.
11. Complainant's closing statement.
12. Charged student's closing statement, including any statement as to mitigating circumstances were the student to be found responsible.
13. Complainant and charged student are excused so the Board can engage in closed-door deliberation and sanctioning, if necessary.
14. The Board may ask questions at any time during the hearing.

The Decision Letter

After the Board makes a determination and applies any appropriate sanctions, the charged student will receive a decision letter. The letter will include the rationale for the finding(s), sanction(s) (if applicable), and information on the appeal process (if applicable). OSCCR shall make reasonable efforts to issue the decision letter within 10–15 business days of the hearing. In certain circumstances, other parties or members of the university community may also be informed of the decision to the extent permitted by law and university policy. Unless otherwise noted, the university reserves the right to notify a student's parents where permitted by university policy and applicable law.

Procedures for Student Appeals

Students have five business days from the date of their decision letter to appeal the decision of either the Hearing Administrator or the Board.

All conduct hearing appeals will be heard by the Appeals Board, which consists of three voting members: one representative from Academic Affairs, one representative from Student Life, and a trained student representative.

The director of OSCCR, or designee, will serve as an advisor of the Appeals Board. When a current participant of a Global Experience Office program or a student organization files an appeal, a staff member of those respective programs will join the Appeals Board.

Appeals must be made in writing using the electronic Appeal Request form and must demonstrate one of the following grounds for appeal:

Procedural error—The student asserts a procedural error impaired their right to a fair opportunity to be heard.

New information—Information has arisen that could not reasonably have been made available during the original hearing and may have been sufficient to alter the Board/Hearing Administrator's decision.

Review of sanctions—The student requests a review of the imposed sanction(s), citing undue hardship caused by sanctioning or individual extraordinary circumstances.

The appeals process is primarily a paper process and will not involve a meeting with the charged student or other persons unless requested by the Appeals Board.

The Appeals Board will review the electronic appeal submitted by the appealing party, the documentation from the original case, and any other information deemed necessary by OSCCR. The audio or video recording of the original hearing (in the case of Board hearings) will be made available to the Appeals Board.

PLEASE NOTE: The submission of an Appeal Request form will not stay the effect of sanctions imposed by the Hearing Administrator or the Board/ Title IX/Sexual and Gender-Based Harassment Board. The Appeal Request form may request that sanctions imposed be stayed, or modified, pending the determination of the appeal, and the reasons for such request are to be set forth within the Appeal Request form. The senior vice chancellor for student life, or their designee, at their discretion may suspend, stay, or modify sanctions imposed, subject to such conditions as they may deem appropriate.

The Appeals Board will take one of the following actions:

- Concur with original decision.
- Refer the matter to the appropriate hearing body if based on a procedural error. In this case, the entire case will be reheard, as if it had not been heard before.
- Refer the matter back to the original hearing body if based on the grounds of new information. The original body; complainant; charged student; and, if required, witnesses, will be reconvened to review only the new information. The hearing body will then render a decision considering the new information.
- Mitigate the sanction. Students should understand that this option is exercised only in rare circumstances. The university reserves the right to take any action necessary to corroborate the student's statements.

All decisions of the Appeals Board may be recommended to the senior vice chancellor for student life, or designee, for final approval.

Standards of Conduct

Potential student conduct charges are listed below. Students are required to be familiar with applicable standards, policies, and regulations, as well as with all university, campus, program, and departmental requirements, and must comply with them. Violations of any of these standards will be handled in accordance with the appropriate university procedure.

The use and/or abuse of alcohol and/or drugs will not be considered a mitigating circumstance for any violation of the Code. Rather, individuals may be additionally charged with the appropriate alcohol or drug violation. For information regarding standards of conduct related to sex-based harassment and misconduct, including the definition of consent and the definitions of prohibited offenses, please refer to the university's Policy on Sexual and Gender-Based Harassment and Title IX (<https://policies.northeastern.edu/policy104/>).

Violations are listed in alphabetical order; the order of violations is not indicative of the seriousness of each violation. Repeated violations, multiple violations, or the severity of the misconduct may heighten the university's response, which could include suspension or expulsion from the university and/or cancellation of the Residence Hall and Dining License Agreement.

Where permitted by applicable law and university policy, the university reserves the right to notify parents when a student has been referred to OSCCR.

ACADEMIC INTEGRITY

As defined in the Academic Integrity Policy (p. 88).

AIDING AND ABETTING

Knowingly assisting with or cooperating in an act or action that violates the Code. A student may be held responsible as though the student were a direct participant in the violation, even if information indicates the student was not directly involved in the perpetration of the violation.

ALCOHOL, MARIJUANA, OTHER DRUGS, AND MEDICAL AMNESTY

The university expects that all of its students, whether on or off campus, abide by the law and university regulations concerning alcohol and drug use.

Alcohol

1. A person under the legal drinking age as defined by local law is prohibited from being in the presence of alcoholic beverages in the residence halls and housing provided and/or arranged by Northeastern, with the following exception: An individual under the legal drinking age who has a roommate of legal drinking age may be in the presence of an open container of alcohol in the room only if the roommate of legal drinking age is also present. Non-roommates who are under the legal drinking age may not be in the room when alcohol is being consumed by the of-age roommate.
2. A person under the legal drinking age is prohibited from possessing empty alcohol containers.
3. For non-university-sponsored events at which alcohol will be served or consumed, no postings, announcements, promotions, or ticket sales may be made, placed, or distributed on university-owned or -leased property.
4. On-campus possession of a keg, beer ball, alcohol by the case, other central sources of alcoholic beverages, or other unauthorized quantities of alcohol is not permitted. Personal possession of alcoholic beverages is limited to one 12-pack of beer (144 ounces/4.26 liters) OR one-half gallon (64 ounces/1.89 liters) of wine OR one pint (16 ounces/470 milliliters) of hard liquor.
5. Possession or consumption of alcoholic beverages in locations or under conditions prohibited by university policy or by law:
 - a. A person must be of legal drinking age to possess or consume alcoholic beverages.
 - b. An individual of legal drinking age may possess and/or consume alcohol only in the student's residence hall room or in the residence hall room of another resident who is of legal drinking age and present in the room, provided alcohol is permitted in that residence hall for students of legal drinking age.
 - c. Prohibited locations include but are not limited to hallways, lobbies, lounges, stairwells, classrooms, studios, technical facilities, auditoriums, bathrooms, outdoor areas, vehicles, or any other public areas without authorization.
6. The possession or use of items that encourage heavy alcohol consumption is prohibited (examples could include alcohol funnels, AWOL or Alcohol Without Liquid, generators or vaporizers, BORGs, etc.), regardless of age.
7. Providing alcohol to anyone under the legal drinking age and/or allowing anyone under the legal drinking age to consume alcohol in on- or off-campus residences.
8. Distribution, sale, or manufacture of alcohol.
 - a. Manufacturing alcohol on university-owned or -leased property.
 - b. Selling alcohol without a liquor license, including but not limited to the sale of cups and/or any other form of container for the distribution of alcohol.
 - c. Distributing alcohol includes providing a central source or large quantity of alcohol.

Drugs

1. Knowingly being in the presence of illegal drugs.
2. Possession or consumption of illegal drugs (including marijuana), salvia divinorum, prescription medications belonging to another individual or over-the-counter substances, nitrous oxide, or other available substances to "get high" or induce a mind-altering state.
3. Possession, use, manufacture, distribution, or sale of drug paraphernalia or other items used in preparing or consuming illegal drugs (including marijuana).
4. Promotion of illegal drugs (including marijuana).
5. Providing or sharing drugs.
6. Distribution, sale, or manufacture of drugs (marijuana, mushrooms, prescription drugs, etc.).
 - a. Manufacturing or cultivation of drugs, on or off campus.
 - b. Sale or distribution of drugs or intention of sale or distribution.

Medical Amnesty

In cases of a drug or alcohol emergency, the primary concern is the health and safety of the individual(s) involved. Students/organizations are strongly encouraged to call the appropriate campus safety or emergency resources for medical assistance for themselves or for another student who they observe to be or feel is dangerously intoxicated/under the influence of drugs. If a student/organization calls on behalf of another student, that student/organization is required to remain with the student experiencing the emergency until medical assistance arrives. Neither the caller nor student requiring medical assistance for an alcohol or other drug-related emergency will be subject to university disciplinary action for the violation of possession or consumption of alcohol or drugs. This policy shall extend to the parties actively involved in proactively calling for medical assistance and is determined at the discretion of the director of OSCCR.

The student requiring medical assistance (and possibly the referring student(s)/organization) will receive medical amnesty and will have a confidential "check-in" meeting with a staff member from the Office of Prevention and Education at Northeastern. The student may also be contacted by various campus departments (e.g., WeCare and Northeastern University Police Department) for an optional follow-up conversation regarding the incident. As long as the student(s)/organization complies with all directives, there will be no disciplinary action taken related to the violation of possession or consumption of alcohol or drugs and no disciplinary record of the incident kept in the OSCCR. This policy applies only to those students or organizations who seek emergency medical assistance in

connection with an alcohol or drug-related medical emergency and does not apply to individuals experiencing an alcohol or drug-related medical emergency who are found by university employees (e.g., Northeastern University Police, faculty, administrative staff, or residence hall staff) or where the reporting student(s)/organization did not stay with them.

The Medical Amnesty Policy is not intended to shield or protect those students or organizations that repeatedly violate the Code. When repeated instances of drug or alcohol emergencies occur, the university reserves the right to take disciplinary action on a case-by-case basis regardless of the manner in which the incident was reported.

Medical amnesty applies only to alcohol or other drug-related emergencies, but it does not apply to other conduct violations such as but not limited to assault, property damage, or distribution of illicit substances. If other violations occur, then a student may face disciplinary charges for those violations. The use or abuse of alcohol or drugs is not considered a mitigating circumstance for any other violations of the Code. Medical amnesty applies only to the university response to a medical emergency. The Medical Amnesty Policy applies only to OSCCR proceedings and does not affect any separate law enforcement actions or criminal proceedings.

BIAS-RELATED INCIDENTS

Conduct prohibited by this Code may include but is not limited to harassment, bullying, abuse of others, disorderly conduct, and vandalism that is motivated in whole or part by prejudice toward an individual's or group's real or perceived race, color, religion, religious creed, genetics, sex, gender, gender identity, gender expression, sexual orientation, age, national origin, ancestry, veteran status, or disability.

BREAKING AND ENTERING

Attempted, actual, or forcible access to property.

BULLYING

A verbal, electronic, or physical act or gesture or the repeated use of written, verbal, or electronic expression or communication or any combination thereof that causes or is intended to cause physical, psychological, and/or emotional harm to another person or damage to property; places a university community member in reasonable fear of harm or damage to property; or creates a hostile, threatening, intimidating, humiliating, or abusive environment for a university community member or substantially interferes with academic performance, opportunities, or benefits. For purposes of this section, bullying may include but is not limited to social exclusion or isolation, humiliation or degradation, threats, intimidation, harassment, stalking, theft and/or damage/destruction of property, or the perpetuation of any of the conduct listed in this section by inciting, soliciting, or coercing others to demean, embarrass, humiliate, or cause emotional, psychological, or physical harm to a member of the university community.

DANGEROUS WEAPONS

Possession or use of items that could be used or are used to threaten another individual with physical harm in violation of the university's Policy on Weapons on Campus (<https://policies.northeastern.edu/policy604/>). Those items include but are not limited to nunchakus (karate sticks), switchblades, knives, fake guns, tasers, BB guns, fireworks, ammunition, explosive devices, or firearms, except under official supervision as part of a recognized student activity.

DISORDERLY CONDUCT

Conduct that is disorderly and/or disruptive in nature and negatively affects the campus community, the neighborhood, and/or community members.

DISRUPTIVE GATHERINGS

Hosting or attending a disruptive gathering, whether on or off campus. Examples include but are not limited to gatherings that result in a noise complaint and/or police response, those that are disruptive to neighbors in any way, and/or excessive attendance beyond what is safe and/or reasonable. For off-campus gatherings, expectations include following all local ordinances.

DOXING

Publishing or distributing personal identifying information about another person with intent to place the other person in reasonable fear of harm to themselves or their family or for the purpose of causing or encouraging unwanted physical contact, injury, or harassment of the person by others.

ENDANGERING BEHAVIOR

Conduct demonstrating that the student constitutes a threat to self or others, or to the proper functioning of the university, including but not limited to threats, excessive consumption of drugs and/or alcohol, intoxication, bypassing security measures, dropping items from a window, and using any item to cause fear and intimidation and/or injury to another.

EXCESSIVE CONSUMPTION

Excessive consumption of alcohol is prohibited regardless of age. Being under the influence of and/or the abuse of drugs is prohibited.

Behavioral symptoms frequently associated with excessive consumption or intoxication may include but are not limited to impaired motor-skill coordination, difficulty communicating, vomiting, glazed/red eyes, the smell of alcohol on one's breath, verbal and/or physical aggressiveness, destructive and/or disruptive behavior, and engaging in any behavior that may endanger oneself or others.

FAILURE TO COMPLY

1. Failure to comply with or violation of the terms of an imposed disciplinary sanction.

2. Failure to follow the reasonable directions of university officials (including Northeastern University Police Department officers and faculty and staff at Northeastern), law enforcement agents, cooperative work assignment employers, or officials at other colleges and universities that are necessary for the proper conduct of the university and university community.

FAILURE TO PRODUCE NORTHEASTERN STUDENT IDENTIFICATION

All students must identify themselves by showing a Northeastern University Husky Card upon request by any university personnel or authorized personnel, including Northeastern University Police Department personnel. The Husky Card is the official identification card at Northeastern and is issued to all students. Students wearing a mask may be asked to adjust their mask for identity verification.

FIRE SAFETY

Breaching campus fire safety or security through:

1. Setting a fire (including charring, burning, lighting of papers, or any other act that could cause a fire), making a bomb threat, causing or creating a false alarm, or other such intentional or reckless conduct that causes harm or reasonable fear of harm to persons or property.
2. Misusing, tampering, or damaging fire safety equipment (including alarm systems, alarmed fire safety doors, smoke detectors, or fire extinguishers).
3. Failure to vacate university buildings during or after a fire alarm.
4. Entering or reentering a building during a fire alarm.

FORGERY

Falsification, alteration, or misuse of documents or records (including but not limited to parking permits, software, computer databases and/or systems, and/or email).

GAMBLING

Unlawful engaging in, playing, operating, or assisting in operating a game of chance for money (or some other stake) or the sale of lottery or raffle tickets, as prohibited by applicable law.

HARASSMENT

Repeated and/or continuing unwanted behavior, coercion, or intimidation of an individual or group, either directly or indirectly.

HAZING

Violation of the university's Policy Prohibiting Hazing (<https://policies.northeastern.edu/policy606/>), which includes any action taken or situation created, whether voluntary or involuntary, for the purpose of initiation, admission into, affiliation with, or as a condition for continued membership in a group or organization that endangers the mental or physical health or safety of a student; creates risk of injury; causes mental or physical fatigue or distress, discomfort, embarrassment, harassment, ridicule, or intimidation; causes damage to or destruction of property; or which is a violation of law, university policy, or the Code of Student Conduct. Such activities include but are not limited to striking another student by hand or with any instrument; requiring or advocating alcohol or other drug use; late sessions/meetings that interfere with academic activities; tattooing, branding, or piercing; physical or psychological shocks; wearing of apparel in public that is embarrassing, humiliating, or degrading; or games/activities causing or resulting in fatigue, sleep deprivation, mental distress, panic, embarrassment, or humiliation. Activities that generally would not be considered hazing include agreeing to maintain a specific GPA, comply with a dress code for a team/organizational function, participate in volunteer community service, participate in a team/organizational trip, take an oath, or sign a contract of standards.

Note: While some behaviors constitute hazing regardless of context (e.g., paddling, use of alcohol), others depend on the circumstances. For example, requiring athletes to perform normal calisthenics as part of conditioning would not be hazing, but requiring new members of a nonathletic student organization to do push-ups in the middle of the night would constitute hazing. Hazing can result in a range of sanctions against organizations/teams and/or individuals that range from educational interventions to suspension or expulsion. A nonexhaustive list by category is shown below to detail further examples of conduct that could be deemed hazing:

- **Sexualized or Inappropriate Acts**
 - Sexual simulations
 - Forced or coerced sexual acts
 - Requiring participation in lewd conduct
 - Compromising or degrading situations involving nudity or sexuality
- **Forced Servitude/Errand Running**
 - Personal errands or acts of servitude (e.g., forced cleaning, carrying books, fetching food)
 - Assignment of duties not assigned to other members
- **Coerced Financial Expenses**
 - Requiring the purchase of items or services
 - Financial exploitation or excessive dues under threat of social exclusion
- **Verbal Abuse and Degrading Language**
 - Verbal abuse, name-calling, or degrading, threatening language
- **Coercing Illegal Activity**

- Theft, trespassing, vandalism
- **Mental Abuse**
 - Social isolation
 - Forced silence or blindfolding for extended periods
 - Creating fear through mock interrogations or rituals
- **Others**
 - Consumption of unpalatable substances or palatable substances to excess
 - Engage in acts relevant to those of the group (for example, practice or training activities), but in a manner that a reasonable person would consider excessive or dangerous
 - Is known to be contrary to a prospective or new member's moral or religious belief
 - Requiring situationally inappropriate attire
 - Kidnapping

INAPPROPRIATE IDENTIFICATION

- 1 . The manufacturing, production, and/or distribution of any fake identification.
- 2 . Use of identification other than your own or possession of a false or altered ID.
- 3 . Representing yourself as someone other than who you are.
- 4 . Duplicating, lending, or borrowing of any official identification including but not limited to Husky Cards, student identification numbers, university marks and logos, and driver's licenses.
- 5 . Impersonating a university official.

MISREPRESENTATION OF INFORMATION

Falsification, distortion, or misrepresentation of information to the university or its officials (including Northeastern University Police Department officers and faculty and staff at Northeastern), law enforcement agents, cooperative work assignment employers, or officials at other colleges and universities that is intended to mislead in investigations or administrative processes or could adversely affect the mission or operations of the university.

MISUSE OF ELECTRONIC RESOURCES

Misuse of electronic systems or methods (for example, email "hacking") to steal, misrepresent, threaten, harass, or bully (including online aggression or cyberbullying) or violations of the Policy on Appropriate Use of Computer and Network Resources (<https://policies.northeastern.edu/policy700/>) and/or any other computer or system use restrictions.

NOISE

Disturbances in residence halls, on campus, or in neighborhoods caused by a loud or disruptive sound.

PHYSICAL ABUSE

Physical abuse of others, including but not limited to fights and/or injury caused by endangering behavior.

RETALIATION

Any intentional or attempted act that results in an adverse or negative effect on a person who in good faith makes a report, serves as a witness, or participates in an investigation or hearing regarding a violation of the Code or other university policy.

RIOTING

Inciting, participating in, or encouraging any disturbance for purposes of committing any action that presents a clear and present danger to self or others, causes physical harm to persons, or vandalizes or destroys property.

SMOKING

Smoking of any tobacco products is prohibited at Northeastern. This includes but is not limited to cigarettes, cigars, cigarillos, smokeless tobacco, electronic cigarettes, pipes, vaping pens, bidis, hookahs, chewing tobacco, and snuff. This does not include cessation tools such as nicotine gum or patches. Refer to the university Policy on Tobacco and Smoke-Free Campus (<https://policies.northeastern.edu/policy607/>).

THEFT

- 1 . The taking of property not owned by oneself.
- 2 . Attempted or actual theft of property.
- 3 . Attempted or actual theft of identity or services.
- 4 . The unauthorized use of ATM, phone, or credit cards; checks; Northeastern ID cards; or computer systems (including violation of the Policy on Appropriate Use of Computer and Network Resources (<https://policies.northeastern.edu/policy700/>)).

UNAUTHORIZED ACCESS OR USE

Unauthorized access or entry to, into, or onto any property owned or operated by the university or any private or restricted property.

UNAUTHORIZED USE/POSSESSION OF OTHER'S PROPERTY

Unauthorized use or possession of another's property.

UNAUTHORIZED USE OF UNIVERSITY IDENTIFICATION MARKS

Unauthorized use of the university's name, logo, or other identifying mark, including but not limited to postings, letterhead, websites, pamphlets, social media, etc. Please refer to the university Policy on Endorsements and Use of University Identifiers (<https://policies.northeastern.edu/policy116/>).

UNIVERSITY GUEST POLICY

Failure to control guests on campus or at university-sponsored events. Refer to the Residence Hall and Dining License Agreement (<https://housing.northeastern.edu/license-agreement/>) and/or Guide to Residence Hall Living (<https://housing.northeastern.edu/policies-and-publications/>) for specific regulations regarding guests in residence halls. If a guest violates university policy, the host may be held accountable for actions of the guest. The level of sanctioning for the host may be dependent upon the nature of the incident(s).

VANDALISM

Destruction or defacement of public or private property.

VIOLATION OF CENTER FOR SPIRITUALITY, DIALOGUE, AND SERVICE GUIDELINES

Failure to abide by the Guidelines and Policies set forth by the Center for Spirituality, Dialogue, and Service (<https://spirituallife.northeastern.edu/student-groups/>).

VIOLATION OF CENTER FOR STUDENT INVOLVEMENT GUIDELINES

Failure to abide by the rules and regulations set forth by the Center for Student Involvement and/or included in the *Student Organization Handbook*.

VIOLATION OF GUIDE TO RESIDENCE HALL LIVING

Failure to abide by the rules and regulations set forth for all residential students and stated in the Guide to Residence Hall Living (<https://housing.northeastern.edu/policies-and-publications/>).

VIOLATION OF LAW

Any action or behavior that violates federal, state, or local law.

VIOLATION OF PROFESSIONAL CONDUCT IN DEGREE PROGRAM

Failure to fulfill the guidelines and/or expectations of an academic degree program. Examples include but are not limited to failing to complete an internship, acting in an unprofessional manner (as defined by the degree program), etc.

VIOLATION OF THE N.U.IN PROGRAM POLICIES

Failure to abide by the rules and regulations set forth for all N.U.in participants and/or established in conjunction with N.U.in partner institutions.

VIOLATION OF UNIVERSITY POLICIES

Violation of any university policy, rule, or regulation within this handbook, published in hard copy, or available electronically on the University Policies (<https://policies.northeastern.edu>) website.

Sanctions

Sanctions are imposed to strengthen learning and assist students/organizations in adopting behaviors in order to avoid repeat violations.

In determining appropriate sanctions, Hearing Administrators and/or boards look at the totality of the incident(s)/situation and its impact on the community rather than looking at individual violations. In addition, they consider/weigh the impact of the following:

- 1 . Nature of the violation(s)—what happened?
- 2 . Severity of the impact caused (damage, injury, or harm, etc.) from this incident.
- 3 . Charged student's student conduct record, which could increase the severity of sanctions imposed for incident in question.
- 4 . Mitigating circumstances.
- 5 . Aggravating circumstances, which may include bias motivation.

Once these factors have been taken into consideration, Hearing Administrators and/or boards will look to impose at least one inactive sanction and at least one active sanction. In many instances, more than one active sanction will be imposed. A list of possible sanctions

follows. Hearing administrators and/or boards reserve the right to create active sanctions not included on this list if they determine that the sanction better addresses the concern and provides an appropriate opportunity for learning.

Inactive: May affect students' good standing with the university and may not require any sort of action on the part of the student.

1. Expulsion is the permanent separation of the student from the university. Students are permanently banned from entering all university property and prohibited from participating in any university-sponsored activities. A permanent notation, "Withdrawn Expelled (WE)," will appear on the student's transcript.
2. Suspension is the separation of the student from the university for a specified period of time, after which the student is eligible to return. Conditions for readmission may be specified. During the period of suspension, students are banned from entering all university property, may not live in university housing, and are prohibited from participating in any university-sponsored activities. Students are expected to adhere to all university policies while on suspension and will be held accountable for any violations during the period of suspension. Students will not be granted credit for any academic work during the period of suspension (including a cooperative work assignment). A student will continue on disciplinary probation for a specified period of time following the completion of suspension.
3. Deferred suspension is the most serious formal warning for violation of university rules/regulations that affects the student's good standing with the university. Students on deferred suspension may be limited in their ability to attend university programs, including those outside the country, during the period of deferred suspension. Deferred suspension is for a designated period of time. If the student is found responsible for violating any additional university policy, rule, or regulation during the period of deferred suspension, suspension may become effective, and the student may be subject to additional sanctions for the additional violation. Restrictions and/or conditions regarding participation in university-sponsored activities may be imposed. Students on deferred suspension may be members of organizations but may not hold any elected or appointed position in any recognized student organization or group, represent the student body on any university committee, or serve the university in other leadership positions. A student will continue on disciplinary probation for a specified period of time following the completion of deferred suspension.
4. University disciplinary probation is a formal warning for violation of university policies, rules, or regulations. Probation is for a designated period of time during which a student is not in good conduct standing with the university and may be subject to the imposition of more severe sanctions if found in violation of any university rules/regulations during the period of probation. University probation may be imposed with or without additional restrictions. The probation period is not noted on the student's transcript but may limit a student's opportunities to participate in a program as determined by a department or office (e.g., students on university probation cannot serve in a resident assistant role).
5. Written warning is a formal warning for violation of university policies, rules, or regulations and cautions students that continuation or repetition of prohibited conduct may result in more serious sanctions. The university does not consider a written warning to constitute a disciplinary record.
6. Cancellation of the Residence Hall and Dining License Agreement results in the separation of the student from university residence facilities either permanently or temporarily. Upon the cancellation of the agreement, the student is banned from entering all university residence facilities during the specified period of separation. *PLEASE NOTE:* Students required to leave the residence halls and/or the campus as a result of disciplinary action will not be eligible for a refund of tuition, housing, board, or other charges regardless of date of removal.
7. Loss of privileges and restriction on activities and programs means the loss and/or withdrawal of services or privileges as a student or member of the community or the loss of the privilege to participate in an activity, program, or event. Examples include but are not limited to restriction from holding positions of leadership in university-recognized student groups, clubs, and/or organizations or from being hired by programs/departments to serve in leadership roles; restriction from attendance at university events or activities including but not limited to campus programs, commencement, sporting events, etc.; restriction from the use of university resources; restriction of entry or access to particular locations, premises, or events; restriction on ability to study abroad including but not limited to traditional study-abroad programs, Dialogues of Civilization, mobility programs, co-op participation, etc.
8. Restriction of guest privileges with respect to hosting guests on campus, including in a residential facility, may be restricted or revoked for a specified period of time.
9. Deferred housing contract cancellation serves as a final warning in cases where a student's actions have negatively affected the university spaces within which they reside. Any further violation(s) may result in the cancellation of the student's housing contract.
10. Permanent loss of external privileges indicates that a student is no longer eligible to participate in any external program during the duration of their time at Northeastern. As a condition of permanent loss of external program privileges, a student is not permitted to visit any external program location without written authorization from OSCCR. Failure to comply with the conditions of this sanction are subject to additional disciplinary action and/or arrest. This sanction will not be notated on a student's transcript.
11. Other appropriate and alternative outcome information may include but is not limited to interim action pending a hearing and/or investigation, assignment of educational projects, referral to other offices or departments for ongoing guidance and support, specialized restorative projects, and additional restriction of university privileges, including but not limited to the restriction from university facilities or programs. These sanctions will not be notated on a student's transcript.

12. Northeastern reserves the right to delay the awarding of a degree, certificate, badge, or other credential pending the resolution of the student conduct process.
13. Northeastern reserves the right to withhold the awarding of any degree for academic and nonacademic misconduct.
14. Northeastern reserves the right, at its discretion, to revoke a degree.

Active: Requires student to take action.

1. Loss of membership in teams, clubs, and/or officially recognized organizations.
2. Loss of ability to hold any elected or appointed positions in any recognized student organization or group, represent the student body on any university committee, or serve the university in other leadership positions. Students may be members of organizations and may run for office while on this status but may not take office while it is in effect.
3. Loss of access to university buildings, facilities, or resources for a specified period of time or permanently.
4. Mandated service.
5. Restitution, which requires the student to make payment to the university or to specified individuals, groups, or organizations for costs incurred as a result of violation of university rules/regulations.
6. Loss of guest privileges on campus or in residence halls.
7. Submission of letter of apology to complainant/affected party.
8. Counseling evaluation.
9. Educational sanction, which may include but is not limited to attending a program, developing a program, and/or writing a paper. Students may be charged a fee to attend an educational program.
10. Fines for alcohol and drug cases. At the student's request, mandated service may be completed in lieu of paying the fine.

The university also reserves the right to sanction any student who is found responsible, pleads no contest, or is found guilty in a court of law for a violation of law. In these instances, disciplinary action will be administered through OSCCR and will not be processed by the Board.

In addition, students should review their financial aid and scholarship information to get clarification on those policies.

While the Hearing Administrator and/or the Board have discretion to impose sanctions they determine most appropriate based on the considerations described above, the Code provides sanctioning guidelines for drug and alcohol violations. The sanctions set forth below provide Hearing Administrators with a starting point for sanctioning cases involving alcohol and/or drugs. Depending on the information obtained through the hearing and the severity of the harm, the imposed sanctions may be enhanced or lessened. Students found responsible for violating the Code risk the cancellation of their Residence Hall License and Dining Agreement.

SANCTION GUIDELINES FOR POSSESSION/CONSUMPTION OF ALCOHOL

First violation:

- Disciplinary probation
- Mandatory completion of an alcohol education program
- Fine of \$100 or 10 hours mandated service

Second violation:

- Deferred suspension from the university
- Mandatory completion of an alcohol education program
- Fine of \$200 or 20 hours mandated service

Third violation:

- Suspension from the university
- Mandatory alcohol counseling to be completed off campus

SANCTION GUIDELINES FOR POSSESSION/CONSUMPTION OF MARIJUANA

First violation:

- Disciplinary probation
- Mandatory completion of a marijuana education program
- Fine of \$100 or 10 hours mandated service

Second violation:

- Deferred suspension from the university
- Mandatory completion of a marijuana education program
- Fine of \$200 or 20 hours mandated service

Third violation:

- Suspension from the university
- Mandatory drug counseling to be completed off campus

SANCTION GUIDELINES FOR POSSESSION/CONSUMPTION OF OTHER DRUGS

First violation:

- Deferred suspension from the university
- Mandatory completion of a drug education program
- Fine of \$200 or 20 hours mandated service

Second violation:

- Suspension from the university
- Mandatory drug counseling to be completed off campus

A letter may be sent home to a parent/legal guardian when a student under 21 years of age is found to have violated laws or policies concerning the use or possession of alcohol or controlled substances.

Parent/Guardian Notification

Northeastern reserves the right to notify parent(s)/guardian(s) about aspects of student conduct matters to the extent permitted by university policy and applicable law. The university may notify parent(s)/guardian(s) in matters including, without limitation, certain cases involving alcohol or drugs and matters that pose a threat to the health or safety of the student and/or other individuals.

Interim Suspension

The senior vice chancellor for student life, or their designee, may impose an interim suspension on a student if sufficient facts indicate that the student presents a threat to the university community. In most instances, a student who has an interim suspension from the university will be immediately banned from the university community. Interim suspension may include restrictions on class attendance, access into residence halls, and/or access to or use of university-owned or -operated property. The senior vice chancellor for student life, or their designee, may remove the interim suspension.

Students who have an interim suspension from the university will have a hold placed on their record and will need to make advance arrangements with OSCCR for approval any time they may need to be on campus to take care of university-related business during the period of the interim suspension.

In cases involving interim suspension, efforts will be made, if practicable, to conclude the hearing and obtain a decision on the charges within 10 business days after the interim suspension was imposed.

Other Interim Action

If upon review of a report Northeastern determines that an individual(s) is considered an imminent threat to the community, or when advisable to protect the physical, social, or emotional well-being of the university community, the senior vice chancellor of student life, or designee, may invoke interim administrative measures that can include but are not limited to loss of privileges and restrictions on activities, immediate residence hall relocation or suspension, immediate suspension from the university, and any other action deemed necessary to support students and/or this campus community or university community pending the outcome of the conduct process.

No Contact Order

When the university determines the severity of an incident rises to the level where continued contact between the involved parties could lead to further incidents and/or the creation of an unhealthy, unsafe, and/or hostile environment, OSCCR may impose a no contact order on the parties involved with the incident. Communication of the order will be made via email to the student's Northeastern email account.

Temporary Measures Administrative Directive

If a student or student organization is acting in such a way that may prove to be a violation of the Code, the senior vice chancellor for student life, or designee, may issue an administrative directive prohibiting the continuation of such behavior. It is not necessary for there to be current ongoing proceedings or even charges against the student or student organization when an administrative directive is issued.

A designated university administrator may issue an administrative directive, according to the guidelines listed, when harm is deemed to be occurring and immediate action is deemed necessary. OSCCR will enforce the directive.

1. A designated university administrator may issue an administrative directive:
 - a. To prevent a student or student organization from acting in specified ways that may result in violations of the Code. The designated university administrator may also prevent a student or student organization from committing an act that would negatively impact or interfere with OSCCR proceedings or any other similar proceedings.

- b. To restrain a student or student organization from assuming or exercising privileges granted to them by the university, pending action, until a final judgment can be rendered.
2. In order to receive an administrative directive, the prohibited action must be within the jurisdiction of the administrator, or designee, issuing such an order.
3. The designated administrator determines the date that the administrative directive expires, a period that initially will not exceed 10 days. The 10-day period may be extended, in consultation with the designated administrator's immediate supervisor, or if the restrained party consents to an extension.
4. Administrative directives will specify the reasons for the directive, the act or acts that are prohibited, and the student or organization bound by such directive.

Maintenance of Student Conduct Records

1. The university will permanently maintain the conduct records of those students separated from Northeastern by suspension or expulsion. A notation will be placed on the transcript of any student expelled from the university. A hold will be placed on the account of any student that withdraws, takes a leave of absence, or becomes inactive prior to the resolution of disciplinary charges. Such hold may not be lifted until the pending charges are resolved.
2. The university will expunge the conduct records of those students who received sanctions other than suspension or expulsion three years after the student's withdrawal or immediately upon their graduation date from Northeastern.
3. Written warnings are maintained in student conduct records as provided above for internal use by OSCCR. The university does not consider such warnings to constitute disciplinary records.
4. Students have the right to submit any documentation in their conduct file to amend a record they believe to be inaccurate or misleading.
5. If Northeastern notes a sanction on a transcript, this notation will not describe the violation or incident that resulted in the sanction. If a student voluntarily takes a leave or withdraws with an OUEC compliance complaint pending against them or a Code violation pending for conduct that reportedly harmed other individual(s) or the community, Northeastern will note the following on the student's transcript: "Voluntarily withdrew [day/month/year], with disciplinary charges pending. This notation does not constitute a finding or admission of responsibility." This notation will remain on the student's transcript until the charge or complaint is resolved.
6. Please refer to the university's privacy information (<https://www.northeastern.edu/privacy-information/>) and Policy on Student Rights Under The Family Educational Rights and Privacy Act (FERPA) (<https://policies.northeastern.edu/policy106/>) for more information regarding the disclosure of student records.

Interpretation and Application

1. Any question of interpretation or application of the Code shall be referred to the director of OSCCR, or designee.
2. The Code and its related procedures do not preempt or supplant any similar rules and regulations maintained by individual colleges, programs, departments, or offices. For example, student-athletes and members of student organizations must also abide by the policies of the Athletics Department and the Center for Student Involvement, respectively. Any proceedings under such policies may run concurrently with those described herein.
3. Nothing in this handbook limits the university's right to take any action it deems necessary to comply with applicable local, state, and federal law.

Course Credit Guidelines

Guidelines for Assigning Credit to Courses

The primary standard for establishing course credit at Northeastern University is the semester/quarter hour, or Carnegie Unit, the standard used by the federal government. One hour of credit is awarded for a lecture/seminar class meeting 50 minutes each week during a 15-week semester or 12-week quarter and also requiring a minimum of two hours of outside preparation each week by the student. An hour of contact time in the rest of the document is based on this 50-minute session.

- 2 semester/quarter hours (100 minutes per week of instruction plus 4–6 hours homework, or equivalent)
- 3 semester/quarter hours (150 minutes per week of instruction plus 6–9 hours homework, or equivalent)
- 4 semester/quarter hours (200 minutes per week of instruction plus 8–12 hours homework, or equivalent)

The Office of the University Registrar (<https://registrar.northeastern.edu/>) maintains the official record for all courses. In the event of error in any publication, the academic record will reflect the correct semester/quarter hours applicable to any degree requirement.

On occasion, course titles change, while the course number remains the same. Despite such title changes, the course is still considered to be the same course. Students who have taken the course under the old title and then take the course again under the new title are considered to have repeated the course.

NOTE ABOUT HOMEWORK AND STUDENT PREPARATION FOR CLASS

The credit hour assumes a set proportion of two hours of student preparation or homework for every hour spent in class. Northeastern wishes to emphasize that the federal government has established this as the minimum amount of work expected, and assigning more work does not in itself justify an increase in the credit value of the course. We also wish to note that there is great variation in the amount of time each student will need to devote to each course or to a specific form of study (e.g., reading, writing, completing problem sets), and, therefore, it is not possible to enforce any exact accounting of student work outside of class.

CREDIT ASSIGNMENT PROCESS

Northeastern uses the Carnegie Unit to determine class meeting time requirements. The actual amount of academic work that goes into a single credit hour is calculated as follows:

- One lecture (taught) or seminar (discussion) credit hour represents one hour per week (50 minutes) of scheduled class/seminar time and two hours of student preparation time.
- One laboratory or studio credit hour represents one hour per week of lecture or discussion time plus one to two hours per week of scheduled supervised or independent work, or a total of three hours in the lab or studio.

DEFINED INSTRUCTIONAL METHODS

- Traditional: meets fully on ground in a physical location with instructor present
- Hybrid: meets majority on ground in a physical location with instructor present with some online instructional component
- Live cast: meets fully on ground in a physical location with the instructor in a different location teaching synchronously and supported by an instructional assistant in the physical location
- Online: meets fully online

FULL-TIME AND HALF-TIME EXPERIENCES

Academic experiences integral to curriculum and requiring registration (but not credit bearing) have the following required hours of participation:

- Full-time experiences: 32–40 hours per week in a semester for a minimum of 11 weeks or 55 days, or in a quarter for 9 weeks or 45 days
- Half-time experiences: 16–31.99 hours per week in a semester for a minimum of 11 weeks or 55 days, or in a quarter for 9 weeks or 45 days (to achieve full-time status, graduate students must take 3 or more academic credits and undergraduate students must take 4 or more academic credits)
- Summer 1 or Summer 2 semester: minimum of 5 weeks or 25 workdays
- Summer quarter: 6 weeks or 30 workdays

International students must confer with the Office of Global Services to determine CPT requirements as appropriate.

Course Numbering System

0001–0999

Orientation and basic

No degree credit

Undergraduate

1000–1999

Introductory level (first year)

Survey, foundation, and introductory courses, normally with no prerequisites and designed primarily for students with no prior background

2000–2999

Intermediate level (sophomore/junior year)

Normally designed for sophomores and above but in some cases open to freshman majors in the department

3000–3999

Upper-intermediate level (junior year)

Designed primarily as courses for juniors; prerequisites are normally required, and these courses are prerequisites for advanced courses

4000–4999

Advanced level (senior year)

Designed primarily for juniors and seniors; also includes specialized courses such as research, capstone, and thesis

Graduate

5000–5999

First-level graduate

Courses primarily for graduate students and qualified undergraduate students with permission

6000–6999

Second-level graduate

Generally for master's and clinical doctorate only

7000–7999

Third-level graduate

Master's- and doctoral-level courses; includes master's thesis

8000–8999

Clinical/research/readings

Includes comprehensive exam preparation

9000–9999

Doctoral research and dissertation

Course Substitutions

Students may request to substitute one course for another to fulfill the academic requirements of a program. If approved, the substituted course will replace the originally designated course to fulfill the program requirement.

For Programs in Massachusetts and California

Course substitution requests must be reviewed by the student's academic advisor in consultation with the director of the student's program and the department that offers the original course. Once approved, the academic advisor will process the substitution.

For Programs Outside Massachusetts and California

Students must submit a Request for Waiver of University-Wide Graduate Requirement (https://graduateeducation.sites.northeastern.edu/academics-wide/#admins_forms) to the Office of the Provost. Approved course substitutions are processed by the Office of the Provost, and the decision will be communicated to both the student and their academic advisor.

Course Withdrawal

Students who withdraw from a course after the add/drop deadline and before the last day to withdraw will receive a W grade on their academic history and transcript to indicate that they withdrew and did not complete the course. The withdrawal does not affect the calculation of the cumulative grade-point average, but it does impact a student's academic progression as counted toward attempted credit, which may result in the student being placed on academic probation or dismissal.

Students must withdraw from courses using the Student Hub.

Students who fail to withdraw from a course by the deadline, regardless of their level of class participation or attendance, are financially and academically responsible. A student's lack of academic engagement and completion of course requirements will likely result in a final grade of F.

All students are encouraged to consult with their academic advisor prior to withdrawing from a course to understand how that may affect their progress toward their degree. Withdrawals may impact a student's time to degree completion.

A reduction in a student's course load due to withdrawals affects a student's externally reported time status and may impact progress toward degree, academic standing, financial aid, scholarship or other entity that has time status requirements for eligibility, and/or international student enrollment requirements. A student considering a withdrawal should consult with the relevant office or entity before they submit requests for withdrawal to understand how it may affect their respective eligibility or status.

Grade Change Policy

If a student has not graduated, a grade can be changed by a course instructor within 12 months of the end of the semester in which the grade was given.

If a student has graduated, or if more than 12 months have elapsed, a grade can only be changed by request of a course instructor with the approval of the college that offers the course.

If more than 24 months have elapsed, grades can no longer be changed.

If a course instructor is not available, course change requests may be initiated by the department or college that offers the course.

Colleges may place additional restrictions on how grades can be changed.

The grade change policy explains when a course instructor may change a student's grade to correct errors. This policy does not apply to incomplete grades or to student-initiated appeals to change grades. In particular, the grade change policy should not be used to allow a student to submit work after the completion of a class.

Grade Table and GPA

Grade Table

Grades are officially recorded by letters, evaluated as follows:

Letter Grade	Numerical Equivalent	Explanation
A	4.000	Outstanding achievement
A–	3.667	
B+	3.333	
B	3.000	Good achievement
B–	2.667	
C+	2.333	
C	2.000	Satisfactory achievement
C–	1.667	
D+	1.333	Undergraduate only
D	1.000	Undergraduate only/Poor achievement
D–	0.667	Undergraduate only
F	0.000	Fail
I		Incomplete ¹
IP		In progress ^{1,2}
CR		Credit (School of Law only)
HH		High Honor (School of Law only)
H		Honor (School of Law only)
P		Pass (School of Law only)
MP		Marginal Pass (School of Law only)
NE		Not enrolled
NG		Grade not reported by faculty ³
S		Satisfactory (counts toward total degree requirements)
U		Unsatisfactory
X		Incomplete ¹
L		Audit (no credit given)
T		Transfer
W		Withdrawal (student-initiated withdrawal after the add/drop period and before the withdrawal deadline)
AD		Administrative Drop ⁴
AW		Administrative Withdrawal ⁵

¹ I, IP, or X shows that the student has not completed the course requirements.

² IP is intended for courses that extend over several terms. The time restrictions on the incomplete grade do not apply to the IP grade. While the IP grade is left unchanged, it is not included in computing the GPA. If the IP grade is never changed, the course does not count toward graduation requirements.

³ NG is intended for classes with temporary unreported grades. The Office of the University Registrar may enter an NG grade code after the grading deadline in accordance with the academic calendar if no grade is entered on the student's record during the instructor grading period. The instructor of record will subsequently resolve the grade to update the student record. See also *Grade Change Policy*.

⁴ AD is assigned by the university when a student is removed from a course after the add/drop period but the approved academic appeal indicates that the student should not have a W grade. AD carries no academic penalty or calculation toward the GPA. It indicates that enrollment was ended due to circumstances outside the normal student course drop process. Administrative Drops are not counted toward total attempted hours in the calculation of Satisfactory Academic Progress for financial aid. See the *Financial Aid* page of this catalog for more information.

⁵ AW is assigned by the university when a student is removed from a course for administrative, academic, or disciplinary reasons based on an approved academic appeal. AW carries no academic penalty or calculation toward the GPA. It indicates that enrollment was ended due to circumstances outside the normal student withdrawal process. Administrative Withdrawals are counted toward total attempted hours in the calculation of Satisfactory Academic Progress for financial aid. See the *Financial Aid* page of this catalog for more information.

Course Comments

The following notations may also appear on the student's transcript:

E	Course excluded from GPA
HON	Honors-level course
I	Course included in GPA

GPA

Numerical equivalents for scholastic averages are weighted according to the number of hours the course carries. For example, suppose a student receives a grade of B in a course carrying 4 semester hours and a grade of A in a course carrying 1 semester hour. The weightings for these example courses are as follows:

Grade	Numerical Equivalent	Semester Hours	Weight
B	3.000	4	12
A	4.000	1	4
Totals:		5	16

The GPA for both courses would then be the total weight (16) divided by the total semester hours (5), or 3.200. Grades of I, IP, S, U, and X are not included in the calculation of the GPA. See Grade Table (p. 115) for a complete list of grades and numerical equivalents.

SUBSTITUTING COURSES

In some cases, it may not be possible to retake a course if a student wishes to do so. In unusual circumstances, students may petition to substitute one course for another they have already taken, as long as the subject matter of both courses is substantially alike. With the approval of the student's academic advisor and the agreement of the department that offered the first course taken, a grade received in the new course will be labeled "Substitute" on the transcript and will be treated in the GPA calculation as a "retake" grade, as described at *Retaking Courses* in this catalog. The original grade will remain on the student's Northeastern University transcript. Students should consult with their academic advisor before enrolling in any proposed substitute course. Students are required to pay normal tuition charges for all substitute coursework.

Graduation Requirements

To be eligible to be awarded a degree, graduating students must meet all academic requirements, specific program of study requirements, residency requirements, and be in good standing. In addition, before receiving their diploma, students must also clear all financial, experiential education, and disciplinary deficiencies. Requirements are specified for each program under the various schools and colleges in this catalog.

Once matriculated, students are expected to complete all coursework for their degree at Northeastern University; at an entity in a formal contractual, consorial, or partnership relationship with Northeastern; or at an approved Northeastern study-abroad program. In some cases, to clear a deficiency, to permit students access to courses deemed by their respective advisors and colleges to be important for their education but unavailable to them at Northeastern, or to remain on track for graduation, a student may petition their college for permission to take a course at another accredited institution.

Prior to completion of their program, the student's university degree audit will be reviewed by their college's academic advising office.

Commencement

Attendance at Commencement is optional. Information concerning Commencement is provided to all graduating students during the spring semester. Students who have been removed from the graduation list are notified if they fail to qualify for their degrees. No special notice is sent to students who do qualify.

Graduation Procedures

The following information is for degree-seeking students only. Certificate students should refer to the "Certificate" section below.

Only students who complete the graduation application process by specified deadlines will be considered for graduation and included in the graduation ceremony program. All qualified students must submit a graduation application to receive their diploma, regardless of whether they plan to attend the graduation ceremony.

Note important definitions: "Degree conferral date" and "graduation ceremony date" are not the same. Degree conferral date refers to the date of Northeastern's official recognition of degree completion. For the purposes of the graduation application that is accessed via the Student Hub (<https://me.northeastern.edu>), the "expected graduation date" is the same as the degree conferral date. Northeastern confers degrees three times each academic year: at the end of the fall, spring, and summer terms. The graduation ceremony date is the date that the college hosts the annual graduation ceremony.

Each fall, the Office of the University Registrar sends an email notification to students who may be eligible to graduate that academic year about applying to graduate. Eligibility is based on the EGD. This email notification informs and instructs students to complete the "Apply to Graduate" process, accessed via the Student Hub. Students are prompted to verify and provide critical information, e.g., spelling of the student's name on the diploma and mailing address.

An accurate EGD is required to gain access to the graduation application. The EGD is also used by clearinghouses to determine loan deferment schedules. A student who needs to update their EGD should contact their academic advisor.

Diploma

Information that will be printed on diplomas includes:

- Degree.
- The major will be printed on diplomas for nonspecified degrees only: Associate in Science, Bachelor of Science, Bachelor of Arts, Master of Science, Master of Arts, Master of Professional Studies, Certificate of Advanced Graduate Study, Doctor of Philosophy). Minors and concentrations are not printed on diplomas.
- Honors designation, for those who qualify.

Changes made to a student's name after the diploma has been printed may be subject to a \$50 fee and take more than one month to reprint.

Changes made to a student's degree information and name submitted after the graduation ceremony program deadline will not be noted in the graduation ceremony program.

Certificate

Certificates are conferred at the same time degrees are conferred each year in fall, spring, and summer terms. Students must consult with their academic advisor to be admitted to the certificate program to receive their certificate. Deadlines apply. Students should contact their academic advisor for more information.

Academic Transcripts

Currently enrolled students may obtain unofficial transcripts and also order official transcripts from the Student Hub. For further information on transcript requests, visit the Registrar Service Portal (https://service.northeastern.edu/registrar/?id=kb_article_view&sysparm_article=KB000019947). All questions concerning transcript requests should be directed to 617.373.2300, TTY 617.373.5360.

Academic information noted on official academic transcripts includes degree/certificate name; major; minor (if applicable); academic history, including transfer credits; and graduation honors designation (if applicable).

Instructional Methods

The instructional method for all class sections must match the method indicated in the class schedule to satisfy university and regulatory requirements.

Traditional Instructional Method

- Classes must be conducted in person at a designated campus location.
- In circumstances in which a faculty member is unable to teach a class session in person, the faculty member may teach a class online, but total online instructional time may not exceed 10% of required instructional time during the semester.
- Students are ordinarily expected to attend classes in person. Additional online class meetings may be available to a student with a Disability Access Services accommodation (<https://disabilityaccessservices.northeastern.edu/>).

Hybrid Instructional Method

- The majority of class hours (minutes) must be conducted in person at a designated campus location; however, some classes are held online (asynchronous and/or synchronous).
- When a faculty member is unable to teach an in-person class in person, classes must be rescheduled in person.
- Additional online class meetings may be available to a student with a DAS accommodation.

Live Cast Instructional Method

- Classes must be conducted in person at a designated campus location; students enrolled in this method are receiving in-class instruction synchronously with an instructional assistant physically present in their campus location.
- When a faculty member is unable to teach a class session, classes must be replaced by another in-person meeting.
- Online class meetings for sections taught in this instructional method may be available to a student with a DAS accommodation.

Online Instructional Method

- Classes must be conducted online (asynchronously or synchronously).

Colleges may have more restrictive policies on class section instructional methods.

Students who are unable to attend classes in person for extended periods should be advised to consider a leave of absence.

Leaves of Absence and University Withdrawal

Students may request to take the following types of leaves of absence:

- Personal or Academic
- Medical or Emergency
- Military Deployment or Missionary Service

Students in prematriculation programs, such as Pathway programs (including Global Pathways, Foundation Year, NU Immerse), and Global First Year programs (N.U.in, Global Scholars, London Scholars), do not fall under the leave of absence policy below. Students in these programs with emergent, medical, or personal circumstances that require a conversation about their ability to continue with their program of study should reach out to We Care (<https://we-care.studentlife.northeastern.edu/>) for further guidance.

General Leave of Absence Policy

Students who wish to take a leave of absence should complete a request through the Student Hub (<https://me.northeastern.edu>) (or via University Health and Counseling Services for a medical leave of absence, as described below) before the last day to drop without a W in a term. Please consult the Academic Calendar (<https://registrar.northeastern.edu/group/calendar/>) for the last day to drop without a W in the term.

Students can request a leave until the last day to drop with a W in a term but should review the financial implications of withdrawing from courses on the Student Financial Services website (<https://studentfinance.northeastern.edu/policies-procedures/withdrawalleave-of-absence/>).

Students can take up to one year of leave.

Any leave of absence type, if approved, is subject to the following conditions:

- International students must make an appointment with the Office of Global Services (<https://international.northeastern.edu/ogs/>) to discuss leave of absence procedures in accordance with federal regulations.
- Students who do not return at the end of the leave will be withdrawn and must contact their college for reentry prior to the term start.
- Students must return to a Northeastern University-sponsored activity that contributes toward the satisfaction of outstanding program requirements, such as registration for academic coursework.
- Students must be considered active in the period for which they are requesting a leave. Students are considered active when they are currently engaged in university-sponsored activity, such as academic coursework and co-op. If a student is withdrawn for personal reasons, the withdrawal can be reversed and a request for a leave of absence can only be processed if it is before the last day to drop without a W in a term. If the student has been administratively withdrawn, a request for leave of absence cannot be considered until the withdrawal is resolved.
- If a leave extends more than six months, students who have taken loans for education expenses may be required to begin repayment of those loans. Students who receive financial aid should meet with a financial aid counselor before going on a leave. Please see the Financial Aid section of this catalog for the possible financial aid impact of a leave of absence.
- Students in university housing should refer to the Office of Housing and Residential Life for policy information.
- A student's enrollment status cannot include more than one academic year of consecutive nonclass enrollments. Students on leave for more than one year will be withdrawn from the university.
- If a student has taken multiple leaves, resulting in the postponement of expected graduation date of a calendar year, the next leave request will be processed as a withdrawal.
- While on leave, students are not allowed to take classes for credit toward their Northeastern degree, either at Northeastern or at an outside institution.
- While on leave, students are not allowed to participate in any university-affiliated activities.

Students on a leave of absence are considered active students and are able to register for classes in an upcoming term in a leave status. If a student is unable to register because they are inactive, the student should contact their college for reentry at the time of registration for the return term. Students are expected to register for classes upon returning from a leave of absence.

LEAVE OF ABSENCE FOR INTERNATIONAL STUDENTS

International students must discuss maintenance of U.S. immigration status with an advisor at OGS before requesting any type of leave of absence.

PERSONAL OR ACADEMIC LEAVE OF ABSENCE

Personal leaves of absence are general leaves of absence that do not meet the criteria of more specific leaves outlined in the catalog. Academic leaves are applied to a student record in the rare cases when a student has fulfilled the last remaining requirements abroad but final grades have been yet to be received at Northeastern; or are taking a leave of absence from Northeastern to pursue other academic work. A student interested in requesting a personal or academic leave of absence should speak with an academic advisor.

MEDICAL OR EMERGENCY LEAVE OF ABSENCE

Medical leave is an option available to those Northeastern students who develop a major medical condition that precludes class attendance, completion of requirements, and/or participation in co-op. Medical leave of absence requests must be initiated at UHCS (<https://uhcs.northeastern.edu/forms/medical-leave-of-absence/>).

Students on a medical leave will no longer have Husky Card access to the Marino Center, libraries, dining services, residence halls, and UHCS. If a student is in treatment at UHCS, they will be provided with referral resources for care in the community where they will reside during their medical leave. Students are not to be participating in student groups while on medical leave.

Emergency leaves may be granted when a student cannot continue attending class after the start of the term due to life-changing situations beyond the student's control. Students interested in requesting emergency leave are encouraged to contact We Care (<https://we-care.studentlife.northeastern.edu/>). Students can request an emergency leave of absence via the Student Hub (<https://me.northeastern.edu>).

Students who have been granted a medical or emergency leave of absence due to extenuating circumstances may submit a Leave of Absence Refund Appeal form (https://service.northeastern.edu/sfs/?id=sc_cat_item&sys_id=50dc23cddb464150ebcdcafc13961951&sysparm_category=98921886db600d54ca10819b1396197e) for financial consideration. If the appeal is approved, please note that housing charges, meal plans, and other fees will not be included in the appeal decision; refer to the Residence Hall and Dining License Agreement (<https://housing.northeastern.edu/license-agreement/>). Please only complete the Leave of Absence Refund Appeal form if you have been approved for a medical or emergency leave of absence.

Please note that any outstanding balance (including unpaid balances) for the academic term in which the leave is taken are still due to the university.

Financial aid recipients must contact their financial aid counselor to understand the effects on aid received.

If the leave extends more than six months, students who have taken loans for education expenses may be required to start repayment of those loans.

Students enrolled in the Northeastern University Student Health Plan will remain enrolled in the plan for the plan year, ending August 31.

LEAVE OF ABSENCE DUE TO MILITARY DEPLOYMENT OR MISSIONARY SERVICE

When a student is called to active duty or missionary service, they must request the leave by filling out the proper request form through the Student Hub (<https://me.northeastern.edu>). Proof of official deployment or call to service paperwork will be required as an attachment when filling out the leave of absence request.

When a student is called during the term, the university will:

- Excuse tuition for that term. Any payment made will be credited to the student's account.
- Post a leave of absence for the term to hold a place for the student when they return.

If a student is called near the end of the term, the student and faculty members may determine that incomplete (I) grades are more appropriate. In this case, tuition will not be waived.

When a student returns to the university after completion, they will notify the college academic student services office if the leave was longer than one year; that office will in turn notify the Office of the University Registrar. The college academic student services office will assist the student with reentry and registration. If the leave was less than one year, the student should register for classes for the upcoming term prior to returning to campus.

International students who must take a leave of absence to engage in military service in their home country must also complete a form for leave of absence with OGS.

RETURNING FROM A LEAVE OF ABSENCE

Students on a leave of absence are considered active students and are able to register for classes in an upcoming term in a leave status. If a student is unable to register because they are inactive, they should contact their college for reentry at the time of registration for the return term. Students are expected to register for classes upon returning from a leave of absence.

Students who are withdrawn and are applying for Commencement may be reentered on a leave of absence, pending the college's approval, prior to the term in which they will graduate. International students returning from a leave of absence should contact OGS regarding the Student and Exchange Visitor Information System procedures three to four months prior to anticipated return date.

Students who wish to reenter the university following a medical leave must contact UHCS. Reentry from a medical leave requires receipt of all documentation delivered to UHCS approximately one month prior to the start of the term they wish to return. Once all documentation is received by UHCS, it will be reviewed and the student will be notified of the decision. Requests for reentry from medical leave must be completed no later than one week prior to the beginning of a term. Students must be enrolled in Northeastern classes for the term in which they wish to return from their medical leave of absence. More specific information about the reentry process can be found at the UHCS website (<https://uhcs.northeastern.edu/forms/medical-leave-of-absence/>).

University Withdrawal

Students seeking to withdraw from the university for any reason should meet with their academic advisor before completing the university withdrawal form online. Students should review the financial implications of withdrawing from all classes on the Student Financial Services website.

Students may be withdrawn from the university for financial, disciplinary, or academic reasons. Students looking to withdraw for medical reasons should reach out to UHCS (<https://uhcs.northeastern.edu/about-uhcs/contact-us/>) to review medical leave of absence.

Personal Information

Change of Name

Report all name changes to the Office of the University Registrar immediately by submitting a Personal Details Update ServiceNow (https://service.northeastern.edu/registrar/?id=sc_cat_item&sys_id=76dd3a7c973f25d0beddb4221153afec&sysparm_category=07325e0197487110beddb4221153afb7) ticket. Official documentation of the name change is required. International students must also report all name changes to the Office of Global Services.

Change of Address

Report all address changes via the Student Hub (<https://me.northeastern.edu>). Both the permanent home address and the local address are required. International students must report any changes of local address or phone number via the Student Hub (<https://me.northeastern.edu>) within 10 days in order to comply with immigration regulations.

Requesting and Clearing An Incomplete Grade

An incomplete grade may be reported by the instructor when a student has failed to complete a major component of a required course, such as homework, a quiz or final examination, a term paper, or a laboratory project. Students may make up an incomplete grade by satisfying the requirements of the instructor or, if the instructor is absent, the chair of the department. Be aware that instructors' policies on the granting of incomplete grades may vary and that the final decision on an incomplete grade is up to the instructor. Instructors may deny requests for an incomplete grade.

To request an incomplete grade, the student must obtain and complete in consultation with the instructor an Incomplete-Grade Contract (<https://registrar.northeastern.edu/article/incomplete-grade-contract/>) on which the precise agreement for clearing an incomplete grade is specified. The contract is then signed by the student, the instructor, and the student's academic advisor. Copies of the form are kept by the student, the instructor, and uploaded to the student's advising notes. The maximum time period for clearing an incomplete grade is restricted to 30 days from the end of the term in which the course was offered. Instructors may require a shorter due date before approving incomplete grade requests.

International students should consult with the Office of Global Services before requesting an incomplete grade to ensure that they will remain in compliance.

If the missing assignment(s) have not been submitted to the instructor within 30 days from the end of the term in which the course was offered, or the agreed upon due date, the grade entered will reflect the student's grade in the course for the work completed and the missing assignments receiving no credit toward the final grade. Changes in the final grade will be applied to the term in which the student was enrolled in the course. Any exception to this policy or extension of the deadline must be recommended by the college in which the course was offered and must be forwarded in writing to the Office of the University Registrar for implementation.

Retaking Courses

When the appropriate course is available, students may retake a nonrepeatable course to earn a better grade. In all cases, the most recent grade earned in a course is the one used in calculating the overall grade-point average followed by the retake notation I, indicating the course grade is included in the overall GPA; however, previous grades remain on the transcript followed by the retake notation of E, signifying that that course grade has been excluded. Consult your academic advisor before retaking a course. Students are required to pay normal tuition for all retaken coursework.

When the course description for the student's registration term indicates that the course may be repeated up to a certain number of course completions, each completion of the course (up to the limit stated in the course description) will appear on the student's transcript, and the grade for each such completion will be used in the calculation of the student's overall GPA.

Student Bill of Academic Rights and Responsibilities

This bill was drafted by the Student Senate, the Senior Vice Chancellor for Student Life, and members of the Faculty Senate. It was passed in the spring of 1992. It was then updated by the Student Body President and Vice President for Academic Affairs, and passed by the Student Senate in the Fall of 2017 and Faculty Senate in the Spring of 2018 for adoption in the Student Handbook (<https://catalog.northeastern.edu/handbook/>) for the 2018–2019 academic year.

We, the students of Northeastern University, believe that a quality education is the paramount goal of all students. In order to fulfill this goal, the university recognizes certain rights and responsibilities, which follow below.¹ Northeastern University students recognize and accept that redress of complaints arising from these rights is limited to the procedures specified in *Academic Appeals Policies and Procedures*.²

Course-Related Rights

ARTICLE 1

Students have the right to instructors who attend classes on time.

ARTICLE 2

Students have the right to receive grades and feedback in a timely manner, particularly in the case of sequentially related assignments. At least one summative assessment should be given and returned a week prior to the end of the withdrawal period. Students also have the right to view work they submit to satisfy course requirements after it is graded and receive their instructor's rationale for grades received on said work.

ARTICLE 3

Students have the right to adequate access to instructors. This includes instructors replying to communications from students in a timely manner, suggested to be within two business days, with the exception of during university recesses, as well as maintaining consistent office hours for in-person courses, occurring at the same time at least once a week. Instructors may change office hours by notifying students in a timely manner, suggested to be within two business days, barring extenuating circumstances.

ARTICLE 4

Students have the right to receive a course outline, which includes a fair and explicit grading policy, at the beginning of each course. Changes to the course outline that result in a deadline, assignment, major exam, or similar course event being introduced to or moved earlier in the schedule shall be communicated to students in a timely manner, suggested to be at least 10 business days prior to the new deadline.

ARTICLE 5

Students have the right to instructors who communicate the material pertaining to the course effectively in the English language except in the case of foreign language instruction.

ARTICLE 6

Students have the right to participate in and have access to Student Government Association teacher/course evaluations.

ARTICLE 7

Students have the right to have a list of all course materials that must be purchased. Possible substitutions for said course materials (e.g., acceptable previous editions of textbooks, digital versions, library-owned resources) should be made available to students at least a week prior to the start of the academic term.

ARTICLE 8

Students have the right to alternative grading arrangements if they are unable to attend a graded activity that takes place outside the scheduled class time.

Rights to University Academic Services

ARTICLE 9

Students have the right to adequate access to effective academic services, including academic and co-op advising, as described in the student handbook and other university publications, provided by the university.

ARTICLE 10

Students have the right³ to an environment conducive to learning and to faculty who respect students' academic freedom⁴ in the classroom. When exercising academic freedom, students are expected to comply with all applicable university ethics, anti-harassment, and nondiscrimination policies.

ARTICLE 11

Students have the right to access university health resources provided by University Health and Counseling Services (<https://uhcs.northeastern.edu/>) (UHCS), and in accordance to Massachusetts State Law, to have access to a medical plan that they can purchase (Northeastern University Student Health Plan (<https://studenthealthplan.northeastern.edu/>)).

ARTICLE 12

Students have the right to access university resources provided by the university's Disability Access Services in accordance with the Policy on Nondiscrimination and Equal Opportunity (<https://policies.northeastern.edu/policy107/>). Students have the right to pursue informal and formal grievances through the procedures outlined by Disability Access Services (<https://drc.sites.northeastern.edu/>).

Scheduling Rights**ARTICLE 13**

Students have the right to final exam schedules in accordance with established university policy, including non-conflicting final exam schedules.

ARTICLE 14

Students have the right to attend any course session held prior to the end of the add/drop period so long as permission from the instructor is obtained in advance and all duly registered students have proper access to seating and other course resources.

ARTICLE 15

Students will not be penalized for excused absences, with the understanding that students may need to make up for the academic commitment from which they were excused. Reasons for an excused absence include religious, medical issues, jury duty, bereavement, and military service. See this catalog (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/attendance-requirements/>) and other applicable policies (http://gonu.com/sports/2013/7/15/SASS_0715134535.aspx?path=sass) for the full attendance and excusal policy.

General Academic Rights**ARTICLE 16**

Students have the right to be informed, in a timely fashion, of proposed action to be taken against them.

ARTICLE 17

Students have the right to the redress of academic grievances through the processes provided by the university.

ARTICLE 18

Students have the right to university support and resources, such as the Office of Global Services (<https://international.northeastern.edu/ogs/>), with regard to their visa status.

ARTICLE 19

In accordance with the university's Policy on Nondiscrimination and Equal Opportunity (<https://policies.northeastern.edu/policy107/>), students have the right to a learning environment free of discrimination or harassment, including as provided for in the university's Policy on Sexual and Gender-Based Harassment and Title IX (<https://policies.northeastern.edu/policy104/>).

ARTICLE 20

Northeastern University's policies on student-produced intellectual property can be found in the Policy on Copyright (<https://policies.northeastern.edu/policy206-USA/>) and Policy on Patents (<https://policies.northeastern.edu/policy207-USA/>).

ARTICLE 21

Students have the right of access to their academic and financial aid records and maintenance of the privacy of these records, as provided by applicable privacy laws.

Student Responsibilities**ARTICLE 1**

Contribute to a climate of open inquiry and honesty in all aspects of the university's academic life. This includes reviewing, and becoming familiar with, the university's Academic Integrity Policy (p. 88).

ARTICLE 2

Commit sufficient time and effort for study and for use of library, studio, laboratory, and computational facilities, as appropriate for each course.

ARTICLE 3

Contribute to the classroom/laboratory/studio learning environment through discussion and active participation.

ARTICLE 4

Acquire the necessary prerequisites for full participation in each academic course.

ARTICLE 5

Attend scheduled classes regularly and on time, and arrive to class prepared, having completed all the readings and other assignments.

ARTICLE 6

Seek out faculty and teaching assistants outside of class time, to obtain help with problems encountered in a given course.

ARTICLE 7

Respect the academic freedom⁴ of each faculty member and student.

ARTICLE 8

Assist the university in its various self-evaluations (e.g., TRACE, surveys) by responding honestly and conscientiously.

ARTICLE 9

Maintain effective communication with the university by providing permanent and local address information to the university through a system designated by the university, and by reading university email on a frequent and consistent basis.

ARTICLE 10

Act as positive representatives and genuine ambassadors of the university when studying and working in domestic and international settings associated with Northeastern University.

ARTICLE 11

Complete an entry (including itinerary, accommodation information, and contact information) using "My Travel Plans," located via the Student Hub (<https://me.northeastern.edu>) or other system as required by the university, prior to all university-sponsored travel including, but not limited to, Study Abroad; Dialogues of Civilization; exchange programs such as BSIB, Alternative Spring Break, Engineers without Borders, co-op placements, etc.

ARTICLE 12

Complete all required activities prior to attending classes for their entrance date (including alcohol education, violence prevention programming, required reading, etc.).

ARTICLE 13

Have in their possession at all times the officially approved and properly validated photo identification card.

Students who fail to comply with these responsibilities could lose certain student privileges as well as face possible disciplinary sanctions under the Code of Student Conduct (p. 96).

- ¹ The student rights, through their representatives in the Student Government Association (SGA), described in these sections arise from faculty and staff employment responsibilities and obligations to the university. Northeastern University students recognize and accept that it is the sole prerogative of the university to enforce these obligations and responsibilities and to determine whether and to what extent they are being carried out or violated in specific instances. Northeastern University students recognize and accept that their ability to effect redress of complaints arising from these rights is limited to the procedures specified in the current Student Handbook.
- ² The articles shall be interpreted by the Office of the Provost in conjunction with the Office of the Vice Chancellor for Student Life, and shall be monitored by the Student Government Association. Further, should any student discover that they have been subject to any violation of the principles stated herein, the student should follow the appropriate complaint resolution procedure in the Student Handbook. The Student Government Association, if requested by the student, will monitor the progress of any student academic grievances.
- ³ Because the university operates on a 12-month calendar in an urban environment, many construction, remodeling, renovation, and repair projects must take place while the university is in session, and other potential distractions from the learning process arise from the surrounding urban environment on which it is dependent but over which it exerts little or no control. Thus, though the university is committed to maintaining an appropriate learning environment for its students, Northeastern University students recognize and accept, as part of their relationship with the university, that the conditions described above may cause occasional disturbances to that environment.
- ⁴ For more on academic freedom, please refer to the AAUP's definition (<https://www.aaup.org/report/1940-statement-principles-academic-freedom-and-tenure/>).

Student Records Privacy

Student Privacy—General Information

Students have specific privacy rights under applicable laws that vary depending on the global jurisdictions in which they reside. A general statement of student privacy rights is set forth in Northeastern University's Privacy Information (<https://www.northeastern.edu/privacy-information/>) site.

As a general matter, students have the right to:

- Access to their education records
- Seek to have their records amended (see the Registrar Service Portal (<https://service.northeastern.edu/registrar/>) for this procedure)
- Exercise some control over the disclosure of information from their records, including to parents and guardians

Additional information regarding these rights is provided below. Please note that these rights are subject to some exceptions under applicable laws. For a full statement of student privacy rights, please refer to the privacy policy referenced above.

Family Disclosure

Students have a right to privacy in their education records, which extends to preventing access by family members. While this right is subject to some exceptions under applicable laws, unless you indicate otherwise, Northeastern will inform parents or guardians, if asked, that access to your records is restricted and they should consult with you if they would like to see your records.

Release of Directory Information

For certain specific administrative purposes (such as confirming your attendance at Northeastern to employers and loan agencies or publicizing information about you if you are on an athletic team), Northeastern would like to release limited student data that it has designated as "directory information." You are given a choice whether or not you agree to this during the registration process. You may change your selection at any time on the university Student Hub or by notifying the university in writing by opening a case in the Registrar Service Portal (<https://service.northeastern.edu/registrar/>).

Directory information is defined in the university's Policy on Student Rights Under the Family Educational Rights and Privacy Act (FERPA) (<https://policies.northeastern.edu/policy106/>) as the following:

- Student name
- Home address (city, state, country only)
- Major field of study
- College
- Class year
- Enrollment status (e.g., undergraduate or graduate, full time or part time)
- Dates of attendance
- Degrees, honors, and awards received
- Most recent educational agency or institution attended
- Sports activity participation, showing weight/height of members of athletic teams
- Participation in officially recognized activities

How to Exercise Privacy Rights

Subject to certain exceptions, privacy laws afford students certain rights with respect to their education records. These rights are:

1. The right to inspect and review the student's education records within 45 days of the day the university receives a request for access (or fewer days if provided by applicable law). Students should submit to the registrar, dean, or head of the academic department (or appropriate official) written requests that identify the record(s) they wish to inspect. The university official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the university official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to request the amendment of the student's education record that the student believes is inaccurate or misleading. Students may ask the university to amend a record that they believe is inaccurate or misleading. They should write the university official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the university decides not to amend the record as requested by the student, the university will notify the student of the decision and advise the student of their right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
3. The right to provide written consent before the university discloses personally identifiable information from the student's education records. There are a number of exceptions to this right, such as disclosure to school officials (including service providers working on the university's behalf) with legitimate educational interests or disclosures to entities involved in financial aid responsibility.
4. The right to file a complaint with the applicable regulatory agency for alleged failures by the university to comply with privacy law. In the United States, that is the U.S. Department of Education; in Canada, the Privacy Commissioner of British Columbia or Toronto (as applicable) or of Canada;

and in the United Kingdom, it is the Information Commissioner's Office. At Northeastern, you may write to the Office of the University Registrar, 271 Huntington Avenue, Boston, MA 02115, or contact privacy@northeastern.edu.

Additional Information

Additional information can be obtained from the university's chief privacy officer at privacy@northeastern.edu.

Student Responsibility Statement

By accepting responsibility for their education, students enhance the development of their academic, social, and career goals. As a condition of enrollment, students are responsible for reviewing, understanding, and abiding by the university's policies, regulations, procedures, requirements, and deadlines as described in all official publications, including the university's Academic Catalog, Northeastern and college websites, and official university email communications, as applicable.

Students are responsible for meeting the degree requirements of their academic programs in all respects, including completeness and correctness of course selection, compliance with prerequisite and corequisite requirements, completion of program and degree requirements through regular, comprehensive review and understanding of the degree audit, and observance of all academic regulations and deadlines.

Students are expected to seek guidance from appropriate university representatives, such as departmental program advisors, academic advisors, co-op coordinators, and the Office of the University Registrar (<https://registrar.northeastern.edu/>), to confirm their compliance with all applicable academic expectations and requirements.

Student Right-to-Know Act

For disclosures required by the U.S. Student Right-To-Know and Campus Security Act, visit University Decision Support (<https://uds.northeastern.edu/about/consumer-information/>).

Student Time Status

Student Time Status

Student Time Status refers to the classification of students based on the number of credit hours they are enrolled in during a given semester or academic term. It helps to categorize students into full-time or part-time status, which is important for academic planning and standing, financial aid eligibility, and institutional reporting. The classification also assists in determining the level of student engagement and the support services needed to ensure student success.

Time status is determined on the census date of each academic term, and any changes to a student's enrollment after this date may affect their status.

F-1 and J-1 international students have specific requirements for full-time enrollment, which is based on the student's nonimmigrant status in the U.S. International students who have questions about taking a reduced course load or taking classes online should seek advice directly from the Office of Global Services (<https://international.northeastern.edu/ogs/>).

Course Load

Federal financial aid recipients must be enrolled in and successfully complete a minimum number of credits each semester to maintain eligibility. For more information, contact your financial aid counselor.

Time Status Categories

The following table outlines the time status classifications based on the number of credit hours a student is enrolled in during an academic term. The credit hours are listed to the tenth decimal for more precise classification:

UNDERGRADUATE SEMESTER HOURS

Time Status Classification	Credit Hours
Full time	12.00 or greater
Three-quarter time	9.00 - 11.99
Half-time	6.00 - 8.99
Less than half-time	0.00 - 5.99

GRADUATE SEMESTER HOURS

Time Status Classification	Credit Hours
Full time ^{1,2}	8.00 or greater
Three-quarter time	6.00 - 7.99
Half-time	4.00 - 5.99
Less than half-time	0.00 - 3.99

¹ Students who hold stipended graduate assistantships will be considered full time if enrolled for a minimum of 6 semester hours of credit.

² Students enrolled in Dissertation or Dissertation Continuation are considered full time.

COLLEGE OF PROFESSIONAL STUDIES UNDERGRADUATE SEMESTER HOURS

Time Status Classification	Credit Hours
Full time	12.00 or greater
Three-quarter time	9.00 - 11.99
Half-time	6.00 - 8.99
Less than half-time	0.00 - 5.99

COLLEGE OF PROFESSIONAL STUDIES GRADUATE QUARTER HOURS

Time Status Classification	Credit Hours
Full time	8.00 or greater
Three-quarter time	6.00 - 7.99
Half-time	4.00 - 5.99
Less than half-time	0.00 - 3.99

LAW SEMESTER HOURS

Time Status Classification	Credit Hours
Full time	11.00 or greater
Three-quarter time	8.50 - 10.99

Half-time	6.00 - 8.49
Less than half-time	0.00 - 5.99

Program-Specific Exceptions

Certain academic programs may define full-time enrollment differently due to their unique structure, accreditation requirements, or delivery format. Examples include, but are not limited to:

- Cohort-based or accelerated programs
- Professional or clinical programs with non-credit-bearing components (e.g., clinical placements)
- Thesis or dissertation research stages
- Summer term enrollment in structured year-round programs

Students enrolled in these programs may be considered full time based on program-specific criteria, which may differ from the standard credit-hour minimums.

Program-specific definitions of full-time status are published in the program requirements and plan of study sections of academic programs in this catalog.

Students should consult their academic advisors and program's plan of study for guidance.

University-Sponsored Travel

Northeastern University is committed to the health, safety, and security of its students and all other members of the university community. As a global institution, our university members undertake university travel around the world in pursuit of teaching, research, consulting, service, cocurricular activities, and work intended to advance learning and the interests of the university. The university supports standards and expectations associated with travel that are designed to reduce personal and university risk.

To enhance the health and safety of our students, you are required to comply with the university travel policies and guidance when undertaking university travel. These include, but are not limited to:

- **Registering University Travel**—Students, faculty, and staff are required to enter their travel itineraries per the Policy on Requiring Registration of University Travel (<https://policies.northeastern.edu/policy612/>). To access the registry, go to the Student Hub (<https://me.northeastern.edu/>) and navigate to My Travel Plans to register your travel. More information can be found on the Travel Registry page of the Global Safety and Support website (<https://globalsafety.northeastern.edu/travel-registry/>).
- **Review Destination Risks and Take Steps to Reduce Risks Before and During Travel**—Review the country briefing for your destination found in the My Travel Plans section of the Student Hub (<https://me.northeastern.edu/>) and travel health and safety advice issued by the U.S. Department of State (<https://travel.state.gov/content/travel/en/traveladvisories/traveladvisories.html/>), the U.S. Centers for Disease Control and Prevention (<https://wwwnc.cdc.gov/travel/notices/>), the UK Foreign Commonwealth & Development Office (<https://www.gov.uk/foreign-travel-advice/>), Government of Canada Travel Advisories (<https://travel.gc.ca/travelling/advisories/>) and other government organizations, the host nation, international organizations, etc. Travelers will be reminded about these sources via an email following trip registration.
- **Connectivity**—All students traveling on university programs must carry a cellphone with international calling, SMS, and cellular data capabilities per the Connectivity Requirements (<https://globalsafety.northeastern.edu/connectivity-requirements/>). Phones must be able to receive incoming and make outgoing phone calls without relying solely on data-calling or a Wi-Fi signal. Phone number must be updated in the Student Hub (<https://me.northeastern.edu/>) "I am Here" profile before travel or upon securing a new phone number on arrival.
- **Complete Travel Petitions or Waivers**—Visit the Travel Protocols page (<https://globalsafety.northeastern.edu/travel-protocols/>) to determine what forms travelers are required to complete before participating in off-campus programming. The page also explains how to obtain approval to travel to a destination designated as high risk by the university.
- **Reduce Your Travel Cyber Risk and Exposure**—Review and comply with the Policy on Computers and Mobile Devices for Travel to Destinations with Heightened Cybersecurity Risk (<https://policies.northeastern.edu/policy701/>) and review the information on the High Cyber Risk Destinations page on the Global Safety and Support website (<https://globalsafety.northeastern.edu/2020/11/10/high-cyber-risk-destinations/>).
- **Personal Health Insurance**—All travelers are required to have personal health insurance that provides coverage while participating on university trips. Insurance requirements and an explanation of the university-provided urgent and emergency program can be viewed on the insurance and global safety support network pages of the university's Global Safety and Support (<https://globalsafety.northeastern.edu/>) website.
- **Attend Predeparture Orientation**—PDO provides travelers with information about resources, requirements, safety, and security while traveling. Contact your program office to enroll in an in-person or online training.
- **Register Personal Travel**—Side trips are travel that takes place prior to, during the course of, and/or immediately following a scheduled program but is not part of the program. Travelers are required to notify the university and register side trips. Review the Side Trip Guidance (<https://globalsafety.northeastern.edu/2020/11/03/side-trip-guidance/>) for more information about your program's side trip registration requirements.
- **Student Housing Guidelines**—Students traveling abroad individually may be responsible for selecting and arranging their own housing. Please review the Student Housing Guidelines (<https://globalsafety.northeastern.edu/2020/10/14/student-housing-guidelines/>) on the Global Safety and Support website prior to booking accommodations.
- **Consult with the Office of Global Services**—International students participating on university programs outside of the home campus country should discuss any requirements with OGS (<https://international.northeastern.edu/ogs/>) prior to university.

Students are responsible for familiarizing themselves with the university travel policies and are encouraged to visit the university's Global Safety and Support (<https://globalsafety.northeastern.edu/>) website for guidance. If you have questions related to travel or travel support, please email mytravelplans@northeastern.edu. If you need assistance during university travel, please call the university's 24-hour travel assistance line at +1.857.214.5332 or tel:+44.20.3467.1773.

Academic Appeals Policies and Procedures

Academic appeals are submitted when a student disagrees with an academic determination, such as a change in academic status or a grade in a class. Students who would like to submit an academic appeal should complete the steps listed below.

Students who have other academic concerns should submit an academic complaint.

Students may find the following resources useful. More information about these resources is below.

- Office for University Equity and Compliance (<https://ouec.northeastern.edu>)
- Office of Student Conduct and Conflict Resolution (<https://osccr.sites.northeastern.edu>)
- We Care (<https://we-care.studentlife.northeastern.edu>)
- Graduate Ombuds (<https://graduateombuds.northeastern.edu>)
- Northeastern University Anonymous Reporting Hotline (<https://compliance.northeastern.edu/anonymous-reporting-hotline/>)

Academic Appeal Process

Introduction

Northeastern University is committed to ensuring that all graduate students are evaluated fairly concerning their academic performance, standing, and progress. The university presumes that its faculty's academic judgments are fair and objective. Any substitution of a different judgment for that of the original evaluator is a serious intrusion upon academic prerogatives entrusted to the faculty and others involved in academic evaluations.

Students who believe they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated in an academic determination may submit an academic appeal. This includes claims of misinterpretation or inequitable application of any academic provision in the Graduate Catalog or Faculty Handbook.

All appeals should be initiated and resolved in a timely manner in accordance with the detailed time limits provided in this policy. Although students are entitled to seek the advice of outside legal counsel, students may not be represented by a lawyer in the informal or formal academic appeal procedures. A student may consult with the provost or the provost's designee at any point in this procedure for advice or assistance.

It is strongly recommended that U.S.-based F-1/J-1 international students and Canadian-based international students holding a study permit consult as soon as possible with the Office of Global Services (<https://international.northeastern.edu/ogs/>) to determine the possibility of any repercussion that the timing of an appeal may have on their immigration status.

Scope

Academic appeals are submitted when a student disagrees with an academic determination, such as a change in academic status or a grade in a class. Decisions concerning admission or readmission into a program, including dismissals, and matters related to co-op employment (other than grades received) cannot be appealed beyond the college level. While program dismissals cannot be appealed beyond the college level, underlying academic judgments that led to a dismissal can be appealed.

Scientific or research misconduct is defined as fabrication, falsification, plagiarism, or other practices that seriously deviate from those that are commonly accepted within the academic and scientific community for proposing, conducting, or reporting research and does not include honest error or honest differences in interpretation or judgments of data. (Further information can be obtained from the U.S. Office of Research Integrity, Department of Health and Human Services.) Possible incidences of misconduct are to be reported immediately to the provost or their designee, who will initiate the appropriate procedures. Findings of scientific or research misconduct cannot be appealed through the process above.

If a student feels that they have been the victim of harassment or of discrimination prohibited by law or by university policy, and that this constitutes a substantive basis for the appeal, the appeal shall first be pursued and investigated through the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>). In such cases, the appeal described in Step 3 below is submitted to the appropriate college and a copy provided to the OUEC. Following a resolution of the harassment/discrimination issues, any remaining academic issues will be addressed, at the request of the student, according to the academic appeals procedures described herein.

Appeal of Final Grades and Outcomes of Other Academic Evaluative Processes

STEP 1: DISCUSS WITH FACULTY MEMBER

Students are encouraged to discuss their concerns with the faculty member who made the academic determination. This step should occur as soon as possible after the academic determination, given the time limit on college-level appeals described in Step 4. If a student is not comfortable discussing the matter with the faculty member, the student should proceed to Step 2.

STEP 2: DISCUSS WITH PROGRAM OR DEPARTMENT ADMINISTRATOR

If the student wishes to appeal the decision of the faculty member, or if the student is not comfortable discussing the issue with the instructor or other faculty member(s) involved, the student has the option of requesting a meeting with the appropriate administrator (e.g., program director, department chair, or group leader) to further discuss their concerns. This step should occur as soon as possible after the academic determination, given the time limit on college-level appeals described in Step 4. If students need assistance identifying an appropriate program or department administrator, they should ask the college contact listed in Step 4 to identify the appropriate person.

STEP 3: PREPARE APPEAL STATEMENT

If the student wishes to appeal the decision of the program or department administrator, or if the situation precludes a student from pursuing these steps, the student should prepare a written statement. The statement must start with a clear description of the basis for the appeal and should include basic facts about the situation leading to the appeal, when the situation occurred, who was involved, and the resolution sought by the student.

All relevant supporting materials should be attached as addenda to the statement. Statements should avoid unsubstantiated, defamatory, or ad hominem accusations regarding the motivations of the faculty member or other persons involved in making the academic determination.

The statement and supporting materials will serve as the basis of the appeal throughout the appeals process, including at the university level.

The statement must be submitted no later than 28 days from the day when the academic determination was made available to the student. If a student wishes to dispute a grade in their final term, the statement must be submitted within 28 calendar days of the degree conferral date.

STEP 4: SUBMIT APPEAL TO COLLEGE

Graduate students shall submit the statement and all supporting materials to the college by sending it to the college email address linked here (<https://graduateeducation.sites.northeastern.edu/college-contacts-for-academic-appeals-and-academic-complaints/>). The appeal will be handled in accordance with the applicable academic appeals process within the relevant college, which may include appeals processes at multiple levels within the college. For academic appeals related to courses, appeals should be sent to the college that offers the course.

The statement must be submitted no later than 28 calendar days from the day when the academic determination is made available to the student. If a student wishes to dispute a grade in their final term, the statement must be submitted within 28 calendar days of degree conferral date.

STEP 5. SUBMIT UNIVERSITY-LEVEL APPEAL

If the student is not satisfied with the college's disposition of the matter, or if the appeal is not resolved within 42 calendar days after originally submitted to the college pursuant to Step 4, the student may further pursue the matter by requesting in writing within 10 calendar days of the notification from the college in Step 4 that the university convene the Academic Appeals Resolution Committee to review the issue. This committee has been designated as the final authority on these matters. Students may obtain information on this process by sending email to otp-grad-education@northeastern.edu.

A. Submission

To submit a university-level appeal, graduate students shall submit a request for an academic appeal to the Office of the Provost at otp-grad-education@northeastern.edu. Upon receiving the request, the Office of the Provost will obtain the student's appeal statement, supporting documentation, and the responses from earlier appeals from the college.

B. Academic Appeals Resolution Committee

The Academic Appeals Resolution Committee shall be a standing committee consisting of the following:

- The provost or the provost's designee, who shall be the chair of the committee, and nonvoting member.
- Three faculty members and one alternate faculty member (with the alternate serving in instances where there is a conflict of interest or when a member has to be replaced) all from different colleges appointed by the Faculty Senate Agenda Committee. Members will serve a one-year term with no term limits.

If the appeal had at any point involved a matter of harassment/discrimination, the committee shall include a representative of the OUEC, who shall be a nonvoting member.

C. Preliminary Matters

If the Academic Appeals Resolution Committee determines, by a majority vote, that the appeal is patently without substance or merit, it may dismiss the appeal.

D. Investigation

The Academic Appeals Resolution Committee shall investigate the matter under appeal by studying the relevant documents (the statement, supporting documents, and additional accumulated documentation), interviewing the parties (especially the student and the involved faculty member), and taking any other action it deems appropriate. A resolution shall be rendered within 35 calendar days of appeal submission. At no time shall the committee be bound by rules of evidence but shall at all times conduct itself in a manner that is not arbitrary or capricious. The Academic Appeals Resolution Committee may, but is not required to, hold a hearing prior to resolving the issues. However, in all instances, the student and the involved faculty member shall have the right to appear separately and privately before the Academic Appeals Resolution Committee. The student shall have the right to have an advocate from the university community present during their testimony to the Academic Appeals Resolution Committee.

E. Authority to Act

The Academic Appeals Resolution Committee has been designated as the final authority on academic matters. At the conclusion of its investigation, the Academic Appeals Resolution Committee shall resolve, by majority vote, the issue by either upholding the finding of the college/school, in which case no further appeal is available, or granting such relief to the student as the Academic Appeals Resolution Committee deems appropriate. The Academic Appeals Resolution Committee shall not render a resolution that contradicts the prior findings or actions of the OUEC.

F. Resolution

All direct parties to the appeal, including but not limited to the student, the faculty member (or others involved in academic evaluations), the dean of the involved college(s), the Faculty Senate, and the Office of the University Registrar, shall be promptly informed in writing of the decisions and actions taken during this academic appeals procedure.

G. Action

The dean(s) or their designee in the involved college shall take whatever action is necessary to implement fully the resolution of the Academic Appeals Resolution Committee.

H. No Further Appeal

Once adjudicated by the Academic Appeals Resolution Committee, the matter is considered closed, and no further appeal can be instituted by the student or the involved faculty member with respect to the issue(s) raised at any level of the formal appeals resolutions procedures.

Appeals Process Timeline

Step 1: Discuss concern with faculty member	Time frame: As soon as possible after academic determination (see note below).
Step 2: Discuss with program or department administrator	Time frame: Within 10 calendar days of academic determination.
Step 3: Prepare appeal statement	
Step 4: Submit college-level appeal	Time frame: Within 28 days of academic determination. Decision notification within 42 days of appeal submission.
Step 5: Submit university-level appeal	Time frame: Within 10 calendar days of college/school decision. Resolution rendered within 35 calendar days of appeal submission.

Note: Colleges and schools will endeavor to expedite appeal responses when warranted by the circumstances.

Resources

Students may find the following resources useful:

- Office of Global Services (<https://international.northeastern.edu/ogs/>): U.S.-based F-1/J-1 international students and Canadian-based international students holding a study permit are encouraged to contact OGS to discuss potential impacts to their status.
- Office for University Equity and Compliance (<https://ouec.northeastern.edu/reporting-options/>): Students can make complaints regarding discrimination or harassment by contacting OUEC.
- Office of Student Conduct and Conflict Resolution (<https://osccr.sites.northeastern.edu/>): Students can make complaints regarding student code of conduct violations by contacting OSCCR.
- We Care (<https://we-care.studentlife.northeastern.edu/>): Students can obtain support for unexpected challenges to maintaining academic progress by contacting We Care.
- Graduate Ombuds (<https://graduateombuds.northeastern.edu/contact/>): Graduate students seeking confidential, impartial, and informal assistance regarding concerns related to their university experience can contact the Graduate Ombuds.
- Students may use the Northeastern University Anonymous Reporting Hotline (<https://secure.ethicspoint.com/domain/media/en/gui/32115/>).

Academic Calendars

The graduate schools' programs are offered on a semester calendar consisting of 15 weeks. The College of Professional Studies graduate programs are offered on a quarter calendar consisting of 12 weeks.

Quarter Programs

For student records that include quarter hours, the approved semester-hour conversion rate is (quarter hours) x 0.750. For example, a 4-credit quarter course is equivalent to a 3-credit semester course.

Semester Programs

Traditional semester hours apply.

Audit Policy

Full-time Northeastern University students may audit one class per term as an overload. In all colleges with the exception of the College of Professional Studies, there is no additional charge.

- Students are permitted to petition (https://service.northeastern.edu/registrar/?id=kb_article_view&sysparm_article=KB000019998) from the end of the course-add period to the end of the third week of classes.
- Permission is based on the availability of a seat in the class.
- Students must obtain advisor approval and meet the prerequisites and any other required approvals for the class.
- Instructor permission, as well as approval by the associate dean of the college offering the course, is required.
- The coursework required is at the discretion of the instructor.
- Once a student opts to audit a course, the audit status of the course cannot be changed.
- A signed Petition to Audit (https://service.northeastern.edu/registrar/?id=kb_article_view&sysparm_article=KB000019998) must be presented to the Office of the University Registrar during the designated audit-add period.
 - Students will not be registered for approved audited course(s) until after the add period is over for the intended term.
- Excluded courses are co-op, labs, language courses, any off-campus course, any online course, and any course required for the major or degree.
- Audits carry no academic credit.

Cooperative Education

Website (<https://www.northeastern.edu/experiential-learning/co-op/>)

Cooperative education is the cornerstone of Northeastern University's experiential learning approach, in which on-campus study is enhanced by real-world experience through full-time opportunities at locations worldwide. Graduate students have the opportunity to alternate periods of academic courses with one period of work in a position related to their academic or career interests. This combination provides an integrated learning experience that enhances both in-class studies and career development.

General Requirements

- Be a full-time student to participate in co-op.
- Completion of 16 semester hours or 24-27 quarter hours.
- Complete all pre-co-op requirements as established by the university, including the co-op preparatory course or equivalent.
- Make satisfactory progress toward degree completion, including grade-point average requirements as defined by the university.
- Have accurate information about the co-op position in the university's official co-op system of record, including specific start and end dates and meeting the minimum hour and day requirements.
- Not participate in co-op in the final term unless it is specified in the curriculum requirements of the program.
- Not participate in co-op in the term following a return from a leave of absence.
- Resolve any previous academic probation issues, or have the cooperative education coordinator approve a plan to resolve these issues prior to applying for co-op jobs.
- Have any self-developed co-op approved by the cooperative education coordinator before accepting the position.
- Comply with any preemployment checks required by the employer such as drug testing, credit checks, physical examinations, security clearance, and criminal record checks.
- Participate in Title IX training, as required.
- Work with the cooperative education coordinator if an Unsatisfactory (U) grade has been received for a past co-op to reestablish eligibility in accordance with the university's policies and requirements.

TRANSFER AND INTERNATIONAL STUDENTS

- Transfer students from other universities must have met the same requirements in their major's co-op program as nontransfers and must have completed at least one semester of classes before starting co-op.
- International students must attend one academic year, or its equivalent, and obtain proper authorization from the Office of Global Services before engaging in co-op.

Academic Requirements

1. **Be full time while on co-op. Full-time status for co-op is defined as either:**
 - a. One full-time co-op job; 32–40 hours per week
 - b. Two simultaneous half-time co-op jobs; 16–31.99 hours each
 - c. One half-time co-op job; 16–31.99 hours with graduate students taking 3 or more academic credits
2. **Meet the minimum length requirements for an academic term:**
 - a. Semester full-term: minimum of 11 weeks or 55 workdays
 - b. Quarter full-term: minimum of nine weeks or 45 workdays
 - c. Summer first-half or second-half term: minimum of five weeks or 25 workdays
3. **Receive a grade of Satisfactory or Unsatisfactory for the co-op experience.**
4. **Have a cumulative 3.000 GPA to be eligible to search for a co-op position.**

Co-op Duration

Graduate Students Enrolled in Colleges Other Than the College of Professional Studies:

- Students have the opportunity to complete one co-op for a period of four to eight months in one of the following patterns:
 - Four months (spring, fall, or summer full terms)
 - Six months (spring term plus summer first-half term, or summer second-half term plus fall term)
 - Eight months (spring term plus summer full term, or summer full term plus fall term)
- In addition, students enrolled at a Canadian campus may be hired into a co-op position for periods of four to eight months, including continuous periods spanning the fall and spring semesters. In the case of such eight-month fall/spring term co-op assignments, students are required to enroll full time in classes during the summer term immediately following the assignment. If a student only needs to take one additional course to complete their program's requirements, they are only required to enroll in that one class in the summer term immediately following the

assignment. In some programs, Canadian students may be eligible for a 12-month co-op position. Please contact your co-op advisor to learn more.

Graduate Students Enrolled in the College of Professional Studies:

- Students may be hired into co-op positions for periods of three months or six months.

Co-op Financial Planning

- No tuition is charged while a student is on co-op only (students will pay room and board if they stay in university housing).
- If a student takes a credit-bearing class while on co-op, tuition will be charged at the per-credit rate.
- Students who wish to register for more than 4 credits while on full-time co-op must complete the Petition Registration form (https://service.northeastern.edu/registrar/?id=kb_article_view&sysparm_article=KB000020003).
- Financial aid will be distributed to match the student's tuition bill and other allowable expenses.
- Students on co-op are required to maintain the same health insurance coverage (either through a private provider or through the university program) as they would while attending classes.

Registration for Co-op

Students are registered for co-op based on a completed co-op record that meets the minimum hour and day requirements with accurate start and end dates in the university's official co-op database system. Students must be registered for the co-op work experience course by the end of the add period or alternately registered for classes if still searching for a job by this deadline. All co-op positions need to be approved by the university and entered as completed records in the official co-op database system by the last day to drop without a W for the respective semester.

Further Information

For more detailed information about co-op policies and procedures, see the *Cooperative Education Student Handbook* on the Cooperative Education website (<https://www.northeastern.edu/experiential-learning/co-op/>).

Course Credit Sharing

Sharing of course credit refers to the practice of allowing one or more course(s) to satisfy the requirements of more than one credential offered by Northeastern University. Credentials covered by this policy include any certificate or degree offered by the university. The following policy refers to the sharing of credit among programs offered by Northeastern. Sharing of credit between programs at Northeastern and another institution is specified through an articulation agreement and is not governed by this policy.

General Credit Sharing Policies

Course credits may be shared between two credentials only if approved by the college or colleges offering both credentials.

To be shared with a credential, credits must be earned no more than seven years before starting the credential.

Specific Credit Sharing Policies

- Shared credits may not be used to fulfill the requirements of more than two degrees.
- A limit of one course (up to 4 semester hours) may be used to fulfill the requirements of two graduate certificates.
- Appropriate graduate credits taken as part of a graduate certificate program may be counted toward a graduate degree or a Certificate of Advanced Graduate Study.
- Students cannot apply the same set of courses toward both a graduate certificate and a concentration in the same field of study.
- Credits earned to fulfill the requirements of a master's program may not be used to fulfill more than 50% of the credits of another master's program or a CAGS.
- Students may credit-share specified courses taken while in undergraduate status for both the bachelor's and PhD degrees. A student who departs from the program before receiving PhD candidacy may opt to use those courses toward a master's degree earned. However, such credit sharing cannot be used for more than two credentials.
- Courses taken while a student is in undergraduate status and participating in a professional doctorate program at Northeastern may be used to fulfill the requirements for both the undergraduate and professional doctorate degree, up to a limit of 40% of the credits required for the professional doctorate.
- Appropriate credits taken as part of a master's degree may be counted toward a professional doctorate.
- Not more than four graduate courses or 16 semester hours, whichever is greater, taken while a student is in undergraduate status and participating in an accelerated master's (PlusOne) program at Northeastern, may be used to fulfill the requirements for both the undergraduate and graduate degrees. Exceptions to this credit sharing limit (due to significantly higher credit requirements for the graduate degree or other special provisions) must be approved through governance processes.
- Undergraduate students who wish to pursue a double major, second Northeastern bachelor's degree, or a minor should follow the credit sharing policies described in the undergraduate section of this catalog (<https://catalog.northeastern.edu/undergraduate/academic-policies-procedures/degrees-majors-minors/>).

Departmental Jurisdiction

Certain departments of the university shall have the power to set down rules and regulations governing the operation of the departments' respective areas of responsibility. Such rules and regulations shall be in accord with the Student Bill of Academic Rights and Responsibilities (p. 124), as well as with the policies described in this document.

Dropping a Class

Not attending class does not constitute withdrawal. Students receiving a grade of W or NE in any course are responsible for the costs associated with that course. Students must drop courses using processes described below.

Note: College of Professional Studies graduate students should consult the CPS graduate section of this catalog (p. 991) for class drop timelines specific to CPS graduate terms.

- Full-semester class: Through the first 14 calendar days of the term, students may withdraw from a class during the add/drop period without any grade being posted to the transcript. Courses may be dropped via the Student Hub (<https://me.northeastern.edu/>).
- Half- and graduate third-term classes: Through the first seven calendar days of the term, students may withdraw from a class during the add/drop period without any grade being posted to the transcript. Courses may be dropped via the Student Hub (<https://me.northeastern.edu/>).
- Following the add/drop period through the day before the last week of the term, withdrawals are indicated by a W on the student's record. Courses may be withdrawn via the Student Hub.
- During the last week of the term, no withdrawals are accepted for any reason. A letter grade for the course will be posted on the transcript.
- Dropping below full-time enrollment may affect financial aid, health insurance eligibility, and the maintenance of proper nonimmigrant visa status.
- Tuition financial adjustments are calculated based on the university's refund schedule for course withdrawals. See the Student Financial Services (<https://studentfinance.northeastern.edu/policies-procedures/>) website for more information.

Final Examinations and Related Policies on Other Exams

All final examinations, term papers, or projects must be returned to the student or be retained by the department for a period of one year.

Minimum Cumulative GPA

Grades submitted to satisfy, in whole or in part, the requirements for any graduate degree or certificate of advanced study must yield a cumulative GPA of 3.000 or higher. This requirement may be supplemented by additional restrictions established by the graduate program or the college's graduate office such as, but not limited to, the maximum number of individual courses with grades below 3.000 that may be obtained without being required to withdraw or a minimum GPA in each semester.

Students falling below 3.000 are placed on academic probation. If the student remains on academic probation for two semesters, they may be terminated from the graduate program.

Not more than two courses or 6 semester hours of credit, whichever is greater, may be repeated to satisfy the requirements for the degree. The last grade earned in each of these repeated courses is counted in the calculation of the cumulative GPA.

More information regarding course grading and academic disputes may be found at Academic Appeals Policies and Procedures (p. 133).

Overload Conditions for Graduate Assistants

Graduate assistants are expected to devote full-time effort to their studies and the duties of their award.

They are not permitted to hold any other job during the term of their assistantship; however, they may be offered limited extra work on campus. Graduate assistants who are not on F-1 or J-1 visas can be offered overload work that does not exceed an average of 6 hours a week or 90 hours a semester, for a total of 270 hours a year (or three semesters). As part of this work, graduate assistants may be hired to teach one 3-semester-hour course as an overload during the year (180 hours). The hours worked during the weeks between semesters are included in this total.

Satisfactory/Unsatisfactory Grading

The individual schools and colleges determine whether a course will be graded on a satisfactory/unsatisfactory basis.

Student Complaints

Academic complaints are submitted when a student has a complaint about a course, a program, curricula, instruction, or any other issues related to a student's academic experience at Northeastern University.

Students who would like to submit an academic complaint should complete the steps listed below.

Students who would like to appeal an academic determination, such as a grade in class, should submit an academic appeal.

Resources

Students may find the following resources useful:

- **Office of Global Services:** U.S.-based F-1/J-1 international students and Canadian-based international students holding a study permit are encouraged to contact OGS (<https://international.northeastern.edu/ogs/>) to discuss potential impacts to their status.
- **Office for University Equity and Compliance:** Students can make complaints regarding discrimination or harassment by contacting OUEC (<https://ouec.northeastern.edu/>).
- **Office of Student Conduct and Conflict Resolution:** Students can make complaints regarding student code of conduct violations by contacting OSCCR (<https://osccr.sites.northeastern.edu/>).
- **We Care:** Students can obtain support for unexpected challenges to maintaining academic progress by contacting We Care (<https://we-care.studentlife.northeastern.edu/>).
- **Graduate Ombudsperson:** Students seeking confidential, impartial, and informal assistance regarding concerns related to their university experience can contact the Ombuds for Graduate Students (<https://graduateombuds.northeastern.edu/contact/>).
- **Anonymous and Confidential Reporting Hotline:** Students may also use the university's Anonymous and Confidential Reporting Hotline (<http://northeastern.ethicspoint.com/>).

Academic Complaint Process

STEP 1: DISCUSS WITH FACULTY MEMBER OR ACADEMIC ADVISOR

Students are encouraged to first speak informally with their instructor, other faculty member(s) involved, or an academic advisor about any concerns related to their courses or program. If a student is not comfortable discussing the matter with a faculty member or academic advisor, the student should proceed to Step 2.

STEP 2: DISCUSS WITH ADMINISTRATOR IN YOUR PROGRAM OR ACADEMIC UNIT

If after this conversation the student's concerns remain unresolved to their satisfaction, or if the student is not comfortable discussing the issue with the instructor, other faculty member(s) involved, or academic advisor, the student should request a meeting with the appropriate administrator (e.g., program director, department chair, group leader, or director of graduate studies) to further discuss their concerns. Students should email the college contact listed in Step 3 to inquire about the appropriate person to contact.

STEP 3: COLLEGE-LEVEL REVIEW

Students whose concerns remain unresolved to their satisfaction should submit their concerns using the contact information provided here (<https://graduateeducation.sites.northeastern.edu/college-contacts-for-academic-appeals-and-academic-complaints/>) and follow the college complaint or grievance process.

STEP 4. UNIVERSITY-LEVEL REVIEW

If the student wishes to appeal the decision of the college, they should describe their concerns in an email to the Office of the Provost (OTP-grad-education@northeastern.edu).

Regulations and Requirements for All Graduate Degree Programs

A copy of each graduate degree program as approved by the Board of Trustees and as officially amended is on file in the Office of the Provost. This record contains the goals, learning objectives, and all requirements for the program. All descriptions of the program in the university, college, and department publications must conform to this officially approved record.

Standards of admission are specific to certificate and degree programs and are found on each college's or offering unit's website.

Admission Requirements

Prior to beginning a graduate program at Northeastern University, students must have met one of the following criteria:

1. Received a bachelor's degree or equivalent from an accredited college or university
2. Received a master's degree or equivalent degree from an accredited college or university
3. Received a first professional or equivalent degree from an accredited college or university
4. Been accepted into an approved bachelor's-to-graduate-degree program at Northeastern

Deferment of Enrollment Due to Military Deployment or Call to Service

When a student who has confirmed their intent to enroll in a Northeastern University degree program is to be deployed or called to active duty prior to matriculation, they may submit a request for enrollment deferment. For U.S. military cases, students must apply to the Director of Military Affiliated Enrollment and Financial Services. International students should follow the Admission Acceptance Deferral process set forth by the Admissions Office and the Office of Global Services. The respective office will notify the destination academic program of the student's intent to defer.

The enrollment deferment request shall follow established procedures that include official proof of deployment (or qualifying call to service) and estimated term of future enrollment (if known).

Under this type of deferment, the following conditions will apply:

- Any deposit for the program will be waived and any deposit payment made previously will be credited to the student's account.
- An enrollment deferment shall be posted to the students' admission record, not to exceed two years beyond the first day of the original term of enrollment.
- If the deferment due to deployment or active service continues beyond two years, the student may request further deferment; however, the university reserves the right to request that the student reapply for admission in those cases.

When the admitted student intends to enroll in the university after completion of military obligation, U.S. military-affiliated students will notify the Director of Military Affiliated Enrollment and Financial Services in writing, including the term they intend to enroll. International students should follow the procedures on the Office of Global Services website for securing the appropriate immigration documentation to join Northeastern for their intended term. The university reserves the right to delay the student's start term from their intended term due to curriculum alignment or accreditation enrollment caps.

Transfer and Other Advanced Standing Credit

Transfer credits from other institutions (or other programs within the university) will only be accepted at the discretion of the student's destination academic unit and the associated college with the following constraints:

- For graduate certificate programs, a maximum of 3 semester hours or 4 quarter hours of credit earned at another institution may be accepted toward the credential being pursued at Northeastern, provided the credits meet the above-listed standards.
- For master's degree programs, a maximum of 30% of the credits required for the degree that are earned at another institution may be accepted toward the degree being pursued at Northeastern, provided the credits:
 1. Consist of work taken at the graduate level for graduate credit
 2. Carry grades of 3.000 or better
 3. Have been earned at an accredited institution
 4. Have not been used toward any baccalaureate or advanced degree or certificate at another institution

Advanced standing is based on criteria established by the offering school or college and implemented in coordination with the Office of the University Registrar. When applied, advanced standing reduces the total credits required to complete the primary program.

The combination of advanced standing and transfer credit shall not exceed 30% of the credits required for the degree. Credit for prior experiential or non-collegiate-sponsored learning is limited to 25% of the degree credits required for the degree.

Transfer credit may not be applied to graduate degrees that are completed as part of a PlusOne program.

- For doctoral programs, a maximum of 30% of the total semester hours of required coursework may be granted upon the recommendation of the admitting college's graduate committee.

- For students pursuing the JD degree, a maximum of 34 semester hours required for the degree that are earned at another ABA-accredited institution, and which must be substantially equivalent to the first-year curriculum, may be accepted toward the degree being pursued at Northeastern.

Transfer credits must have been earned within five academic years of the date of matriculation in the Northeastern program to which they are to be applied.

Grades earned in courses to be applied as transfer credits are not counted as part of the overall grade-point average earned at Northeastern and are posted with a grade of T to the transcript.

Provisional or Special Students

Students cannot be admitted under provisional conditions, i.e., requiring preparatory or remedial coursework that must be successfully completed for progression in the program. Special students are nondegree students taking courses, not to exceed 12 semester or 16 quarter hours, while not admitted to a specific program.

Uniform Credit System

One credit hour of academic credit consists of three hours of work per week throughout the term, usually one hour of class contact and two hours of outside work. When students are registered for thesis credits, directed study, or internship, the appropriate number of credit hours will be determined using the same method. Programs may vary the ratio of class time to preparation time depending on the learning outcomes and accreditation standards appropriate in their field(s).

A quarter hour is evaluated as three-quarters of a semester hour.

When students are registered for thesis credits, directed study, or internship, the appropriate number of credit hours will be determined using the same method.

Additional information on course and credit guidelines can be found here (p. 112).

Undergraduate Credit for Graduate Courses

Undergraduate students who are juniors or seniors may enroll in graduate courses for credit toward their undergraduate degrees if they meet all prerequisites as determined by the graduate director and they receive permission from the instructor of the course and from the student's undergraduate academic advisor.

Time Limit for Course Credit

Course credits earned in the program of graduate study, or accepted by transfer, are valid for a maximum of seven years unless the relevant graduate office grants an extension.

Academic Progression

Grades submitted to satisfy, in whole or in part, the requirements for any graduate degree or certificate of advanced study must yield a cumulative GPA of 3.000 or higher. This requirement may be supplemented by additional restrictions established by the graduate office such as, but not limited to, the maximum number of individual courses with grades below 3.000 that may be obtained without being required to withdraw or a minimum GPA in each semester.

Students falling below 3.000 will be placed on academic probation. If the student remains on academic probation for two terms, they may be terminated from the graduate program. A PhD student will be considered to be on academic probation if their cumulative GPA falls below 3.000 and/or if they are not making acceptable research progress as defined by the college through an academic review process that occurs at least annually.

No more than two nonrepeatable courses may be retaken to satisfy the curricular requirements for the degree. A specific course may not be retaken more than once. The last grade earned in each of the retaken courses will be counted in the calculation of the cumulative GPA. Courses with a specified attribute of "repeatable" can be repeated up to the specified limit, and the earned grade in each occurrence of course completion will count toward the calculation of the cumulative GPA.

Any incomplete grades must be cleared in accordance with the university's policy concerning incomplete grades (p. 123).

Language Requirements

The committee in charge of the degree program may establish a language requirement.

Required Training

Graduate programs may require relevant training that all of the program's students must complete by deadlines communicated by the university or by the student's graduate program advisor.

Regulations and Requirements for Graduate Certificate Programs

Certificates That Appear on the Transcript

DEFINITION

A graduate certificate program is a program of study requiring at least three graduate courses and not fewer than 12 semester hours or 16 quarter hours of graduate credit. Successful completion of such a certificate program will be recorded on the student's transcript.

ADMISSION

All students admitted to a certificate program must satisfy the general requirements for admission as a graduate student and the requirements for the specific certificate program.

PROCEDURES FOR THE APPROVAL OF NEW CERTIFICATE PROGRAMS

New certificate programs are developed following the procedure outlined in the Guidelines for New Degree Programs found on the Office of the Provost website. (https://provost.northeastern.edu/wp-content/uploads/NewGraduateCertificate-Non-CAGS-ProposalGuidelines_5.11.17.pdf)

All new certificate programs require the approval of the University Graduate Curriculum Committee and notification of the Faculty Senate.

PROCEDURES FOR CERTIFICATE PROGRAM REVIEW

Certificate programs will be reviewed in the context of departmental reviews. Information about these reviews can be found on the Office of the Provost website. (<https://provost.northeastern.edu/wp-content/uploads/Guidelines-for-Academic-Program-Review.-December-2022.-Final.pdf>)

GENERAL REGULATIONS

Except as indicated herein, certificate programs shall be subject to the same regulations and procedures as master's degree programs.

TRANSCRIPT NOTATION

Only approved degrees, certificates, and concentrations appear on the transcript.

Regulations and Requirements for the Master's Degree

Admissions Requirements

All students admitted to a master's program must satisfy the general requirements for admission as a graduate student and the requirements for the specific master's program. To be eligible for admission, with the exception of PlusOne students, applicants must have a bachelor's degree from an accredited college or university.

Course Requirements

A candidate for the master's degree must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered.

The requirements for the master's degree are a minimum of 30 semester hours beyond the bachelor's degree, except in the College of Professional Studies in which 45 quarter hours of graduate work are required. Undergraduate-level coursework will not be accepted to meet the requirements for the master's degree.

Comprehensive Examination

The committee in charge of the degree program may require a final written or oral comprehensive examination(s) for partial fulfillment of degree requirements.

Thesis

If a thesis is required in partial fulfillment of degree requirements, it must show independent work based, in part, on original material and must meet the approval of the student's thesis committee. The committee in charge of the degree program is responsible for providing instructions concerning preparation of the thesis.

The student must submit the thesis to ProQuest (or a university-sanctioned successor system) according to the time schedule provided by the relevant graduate office. Information on archiving a thesis is available in the relevant graduate office.

Regulations and Requirements for PlusOne Degree Combinations

PlusOne program refers to any program in which students accelerate the attainment of the postbaccalaureate degree by applying graduate credits taken as an undergraduate toward both the undergraduate and graduate degrees. For more regulations concerning PlusOne programs, please see Course Credit Sharing (p. 139).

Regulations and Requirements for Professional Doctorate Degree Programs

Admissions Requirements

A student enrolled in a professional doctorate degree program must satisfy the general requirements for admission as a graduate student and the requirements for the specific professional doctorate degree program. To be eligible for admission, applicants must have a bachelor's degree from an accredited college or university.

Academic Classification and Degree Candidacy

- Doctoral student: Students in this classification have been admitted to a doctoral program.
- Doctoral candidate: Each program in which the term candidacy is used shall have a policy defining candidacy. Students in this classification will have completed all departmental, college, and university requirements except for the dissertation (if applicable). These requirements vary by program but minimally include completion of approximately 30 semester hours or 45 quarter hours of acceptable graduate work beyond the bachelor's degree or possession of a previously earned master's degree that is acceptable to the department and certification by the graduate office. The requirements frequently include a comprehensive examination and/or a proposal defense.

Academic Residency Requirement

In the context of a doctoral degree program, the residency requirement refers to either:

- A minimum number of credits or semesters that must be completed at the degree-granting institution
- A minimum duration during which the degree candidate must be enrolled full time at the degree-granting institution

In those programs in which the term candidacy is used, after reaching candidacy, students must register for Dissertation for a minimum of two semesters in order to fulfill their formal residency requirement. Continuation status enrollment is for students who are postcandidacy, have completed all coursework and their residency requirement, and are actively engaged in completing a dissertation.

Responsible Conduct of Research

All doctoral students for whom Responsible Conduct of Research training is required must complete training according to the university's Policy on Responsible Conduct of Research (<https://policies.northeastern.edu/policy500/>).

Course Requirements

A candidate for the professional doctorate degree must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered.

The requirements for the professional doctorate degree shall be determined by the program.

Undergraduate-level coursework will not be accepted to meet the requirements for the professional doctorate degree.

Qualifying Examination(s)

In departments that require qualifying examinations, students must be notified in writing of the nature and regulations governing these examinations and of how their performance on the examinations will affect their normal progress toward the degree. The graduate office shall be made aware of the department regulations concerning such examinations.

Dissertation Committee

For programs requiring the dissertation, the dissertation committee shall have at least three members, two of whom shall be from Northeastern University. The chair of the dissertation committee will be a faculty of Northeastern and will hold an appropriate terminal degree for the discipline. Exceptions to this policy may be granted by the dean of the relevant college (or their designee) based on the qualifications and experience of the faculty member who would serve as chair.

Comprehensive Examination

For programs requiring a comprehensive examination, the committee in charge of the degree program may require a final written or oral comprehensive examination(s) for partial fulfillment of degree requirements.

Thesis or Dissertation in Practice

If a thesis or dissertation in practice is required in partial fulfillment of degree requirements, it must show independent work based, in part, on original material and must meet the approval of the student's thesis committee. The committee in charge of the degree program is responsible for providing instructions concerning preparation of the thesis.

The student must submit the thesis to ProQuest (or a university-sanctioned successor system) according to the time schedule provided by the relevant graduate office. Information on archiving a thesis is available in the graduate office.

Time Limitation for Achieving Candidacy and Degree Completion

For programs in which the term candidacy is used, degree candidacy must be achieved within three years of entering the doctoral program. For all programs, the degree must be completed within seven years after entering the program. A student may request an extension of these time frames from the graduate office.

Pursuit of an Academic Credential Outside Student's Major

A student enrolled in a doctoral program may seek to pursue academic credentials (e.g., master's degree or certificate) outside of their major only if, prior to completing more than one-third of the required credits for that credential, they obtain the approval of their primary advisor, obtain the approval of the graduate office, and apply to and are accepted into the major offering that credential.

Regulations and Requirements for the Certificate of Advanced Graduate Study

The Certificate of Advanced Graduate Study provides specialized study above the master's degree. It is a course of study that falls between the master's and doctoral degree and culminates in a graduate certificate.

Admissions Requirements

An applicant for the CAGS must hold a master's degree in a related field from an accredited institution and must complete the admission procedure described in the material of the graduate schools. All students admitted to a CAGS program must satisfy the general requirements for admission as a graduate student and the requirements for the specific CAGS program.

Course Requirements

A candidate for the CAGS must satisfactorily complete an approved program conforming to the requirements of the graduate school and department or program in which the candidate is registered. The candidate must complete a minimum of 24 semester hours or, in the case of the College of Professional Studies, 32 quarter hours of credit beyond the master's degree.

Regulations and Requirements for Doctor of Philosophy (PhD) Programs

The formal requirements for the PhD degree are the following: completion of the coursework mandated by the individual degree program, fulfillment of the residency requirement, formal training in the Responsible Conduct of Research for students as appropriate, qualifying and/or comprehensive examination(s) or equivalent as required by the degree program, continuous registration, a final oral examination conducted by the student's PhD committee, and submission of a dissertation to the relevant graduate office and to ProQuest (or a university-sanctioned successor system) for archiving. The dissertation must be based on original and independent research.

Admissions Requirements

All students admitted to a doctor of philosophy program must satisfy the general requirements for admission as a graduate student and the requirements for the specific PhD program.

Academic Classification and Degree Candidacy

1. Doctoral student: Students in this classification have been admitted to a doctoral program.
2. Doctoral candidate: Every degree program shall have a policy defining candidacy. Students in this classification will have completed all departmental, college, and university requirements except for the dissertation. These requirements vary by program but minimally include completion of approximately 30 semester hours of acceptable graduate work beyond the bachelor's degree or possession of a previously earned master's degree that is acceptable to the admissions committee and certification by the graduate office. The requirements frequently include a comprehensive examination and/or a proposal defense.

Academic Residency Requirement

In the context of a doctoral degree program, the residency requirement refers to either:

1. A minimum number of credits or semesters that must be completed through the degree-granting institution
2. A minimum duration during which the degree candidate must be enrolled full time at the degree-granting institution

After reaching candidacy, students must register for Dissertation for a minimum of two consecutive semesters in order to fulfill their formal residency requirement. Continuation status enrollment is for students who are postcandidacy, have completed all coursework and their residency requirement, and are actively engaged in completing a dissertation.

Responsible Conduct of Research

All doctoral students for whom Responsible Conduct of Research training is required must complete training according to the university's Policy on Responsible Conduct of Research (<https://policies.northeastern.edu/policy500/>). (https://www.northeastern.edu/policies/Policy_on_Responsible_Conduct_of_Research.pdf)

Course Requirements

The program committee in charge of the degree program specifies the doctoral course requirements.

Requirements for Candidacy

In programs that require qualifying examinations, students must be notified in writing of the nature and regulations governing these examinations and of how their performance on the examinations will affect their normal progress toward the degree. The graduate office shall be made aware of the program regulations concerning such examinations.

Annual Review of Student Progress

Units shall define milestones for achieving satisfactory academic progress and shall establish a published process by which the academic progress of every PhD student will be evaluated through an annual review. A copy of each review shall be submitted to the student and the graduate office. If the annual academic review reports that a student is not making sufficient academic progress due to research performance, the PhD student will be placed on academic probation. After two consecutive semesters on academic probation, the student may be dismissed.

PhD Dissertation Committee

The dissertation committee shall have at least three faculty members, two of whom shall be from Northeastern University. The chair of the dissertation committee (who is presumed to be the thesis advisor) will be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold a PhD (or other research doctorate) or an appropriate terminal degree for the discipline. Colleges, the provost, or provost-designee may permit full-time faculty from other ranks: on a case-by-case basis to serve in this role based on the research qualifications and experience of individual faculty members or based on equivalent faculty definitions at locations operating under different faculty rank systems.

The PhD committee should be appointed early enough to advise in the formulation of the student's program and in refining the research topic for the dissertation. Within the constraints of the above criteria, the PhD program faculty will determine the process by which dissertation committees are established. The final list of dissertation committee members shall be reported to the college's associate dean for graduate education or administrative unit managing the degree program.

If a student's major advisor leaves Northeastern (including transition to emeritus status), that person may continue the research direction of the dissertation or thesis. However, a co-advisor must be appointed from the academic department or program. The student will then have two advisors, one an official member of the Northeastern faculty who will be available for research and administrative matters and the ex-Northeastern advisor. If a new major advisor is appointed, the former Northeastern faculty member may serve as an outside member of the committee.

Comprehensive Examination(s) and/or Proposal Defenses

Degree programs may require a comprehensive examination(s) and/or an oral defense of the dissertation proposal as the final step before becoming a PhD candidate. The purpose of the comprehensive examination(s) is to test the knowledge and skills of the student in a particular area and their knowledge of recent research developments in the field. The administrative home unit for each PhD program shall establish the process by which comprehensive examination committees are established. Units may require an oral defense of the dissertation proposal in lieu of, or in addition to, a comprehensive examination.

Dissertation

Candidates for the degree of Doctor of Philosophy must complete a dissertation that embodies the results of extended research and makes an original contribution to the field.

Oral Defense of the Dissertation

An oral defense of the dissertation is required and must be held at least 14 calendar days before the degree conferral date. The defense shall be public and conducted with the committee members present either in person or via electronic means. After the public session, a private session may be held to examine material that is subject to a confidentiality agreement. Following the presentation, the candidate will field questions from the committee in public or private. In the case where neither the candidate nor the committee members are present in person on campus (i.e., the candidate and all committee members are connected only remotely via electronic means), there shall be a location established and technology enabled for public, in-person attendance of the defense by the university community and this accommodation made known to the university.

Submission of the Dissertation

The student must submit the dissertation to ProQuest (or a university-sanctioned successor system) according to the time schedule provided by the relevant graduate office.

Time Limitation for Achieving Candidacy and Degree Completion

Degree candidacy must be achieved within three years of entering the PhD program, and the PhD degree must be completed within seven years after entering the PhD program. A student may request an extension of these time frames from the graduate office.

Pursuit of an Academic Credential Outside Student's Major

A student enrolled in a PhD program may seek to pursue academic credentials (e.g., master's degree or certificate) outside of their major only if, prior to completing more than one-third of the required credits for that credential, they obtain the approval of their primary advisor, obtain the approval of the graduate office, and apply to and are accepted into the major offering that credential.

Regulations and Requirements for Interdisciplinary Graduate Degrees

Northeastern University offers both university- and college-approved interdisciplinary graduate programs for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. The program will correspond in scope and depth to Northeastern's established degree standards but need not agree exactly with the regulations of individual units.

The general regulations and requirements for graduate programs apply to all interdisciplinary programs. Additional requirements are as follows.

Interdisciplinary degrees approved by the Board of Trustees and with curriculum listed in the *Graduate Catalog* will be administered by a unit designated by the provost. The unit may be within the Office of the Provost or within a college. Faculty oversight of these programs will be through a designated program committee or oversight group. For programs in colleges, the processes followed shall be determined by that unit. For degree programs administered through the Office of the Provost, a faculty group appointed by the provost will provide the faculty oversight.

Definitions

- "College" refers to the College of Arts, Media and Design; the Bouvé College of Health Sciences; the D'Amore-McKim School of Business; the Khoury College of Computer Sciences; the College of Engineering; the College of Professional Studies; the College of Science; the College of Social Sciences and Humanities; the School of Law; and Mills College at Northeastern.
- "Graduate office" refers to either the designated graduate administration office in the a college (as defined above) or an equivalent academic and academic support office that exists outside a college that serves the functions of a college-based graduate office.
- "Graduate program" refers to all postbaccalaureate degree, nondegree, and certificate programs and packages of courses offered for graduate credit. Graduate programs shall not include programs or courses that are offered by the School of Law in support of the JD or LLM degree.

PhD Programs

Overview

Northeastern University offers the PhD programs listed below. Included in this list are Cross-Disciplinary Science PhD Programs, where students may pursue a PhD program that blends curriculum across two departments in the College of Science, such as psychology with marine and environmental science.

In addition, PhD students are encouraged to pursue additional graduate certificates to enhance their professional development including the Postsecondary (p. 1362) Teaching (<https://catalog.northeastern.edu/graduate/additional-programs/postsecondary-teaching-graduate-certificate/>), Global Doctoral Research (p. 1361), and Experiential PhD Leadership (p. 157). The Experiential PhD (p. 157) page has additional information on doctoral opportunities that connect Northeastern to industry, government, and nonprofit partners.

PhD Network

The PhD Network works with Northeastern's colleges to produce career-ready, dynamic researchers with the deep knowledge and real-world skills and literacies they need to shape global and societal solutions—in academia and industry.

At Northeastern, every PhD student has opportunities to acquire experience beyond traditional dissertation research. Exposure to and integration with our many industry and academic partners—through internships, fieldwork, and other collaborations—and in authentic settings—from laboratories, startup companies, and nonprofit institutions—lead to research with greater impact and broader career opportunities, both within and beyond academia. The PhD Network works with internal and external partners to grow and facilitate opportunities for PhD students.

Shared values unite PhD-centered activities at Northeastern:

- **Excellence with purpose:** All PhD programs combine academic rigor with societal impact, preparing critical thinkers to tackle the world's most challenging problems.
- **Innovative thinking:** Our education programs, mentoring activities, and research scholarship develop novel content and pathfinding approaches.
- **Crossing boundaries:** PhD students transcend disciplinary and international boundaries during their innovative educational journey.
- **Integrative education:** The integration of scholarship and research training with collaborative fieldwork and professional development provides a uniquely experiential education.
- **Inclusive diversity:** Students and faculty from diverse cultures and backgrounds drive excellence by bringing a wide range of perspectives to our distinctive programs.

Explore the PhD Network website (<https://phd.northeastern.edu/network/resources/>) to learn more about:

- Resources that support PhD students' educational, professional, and personal lives
- Events created especially for PhD students, both at Northeastern and through our partners
- Funding in support of fellowships, internships, and conference attendance

Experiential PhD (Boston)

Overview

The future of research will be collaborative. Researchers across academic institutions, industry, government, and other organizations will team up to solve complex real-world problems. Researchers will require technical proficiency as well as the ability to work with others, form teams, manage projects, and more—skills that go beyond the classroom. At Northeastern University, every PhD student and postdoctoral research associate has opportunities to acquire experiences beyond traditional research. Exposure to and integration with our many partners through unique programs in authentic settings from laboratories to startup companies to nonprofit institutions leads to greater impact and broader career opportunities, both within and beyond academia.

The LEADERs Program (p. 157) is designed to enable researchers to develop professional skills through authentic career exploration opportunities at organizations in industry, government, and the nonprofit sector. Beyond the comfort zone of their own university research group, PhD students and postdoctoral research associates encounter new experiences that help shape their research perspective. They also bring fresh ideas and talent to their host organizations. Northeastern is one of the only universities in the world to offer students in all of its research-based doctoral-degree programs the option to learn and pursue research outside of their primary research group. These real-world placements are highly flexible and customizable, tailored to meet the needs of both Northeastern's PhD students and postdoctoral research associates and our institutional partners.

The Industry PhD (p. 158) is a first-of-its kind research-based doctoral program for full-time master's-level employees. Designed with input from external partners, employees pursue a research-based doctoral degree while maintaining their job and conducting research at the employer site. This enables employees to acquire new skills that will help them to advance in their careers and provides the organization with an opportunity to invest in their future leaders. By working closely with Northeastern faculty, employees will explore their research from a broader scientific perspective, enabling them to appreciate the research foundation of their day-to-day work and to pursue new areas of research for the company.

Experiential PhD opportunities offer robust benefits to both students and institutional partners. Students solve complex problems as part of their education and chart careers as future innovators. Our institutional partners receive many benefits as well, including:

- A deeper engagement in rapidly evolving fields of research
- Access to university facilities and senior faculty expertise
- Opportunities for senior leadership to mentor and copublish with students and to serve on their dissertation committees
- A chance to recruit emerging talent
- Opportunities to partner with Northeastern, an entrepreneurial research university known for its innovative collaborations with academia, government, and industry

Experiential PhD Leadership, Graduate Certificate

Experiential PhD Leadership, Graduate Certificate (Boston)

At Northeastern University, PhD students and postdoctoral researchers enjoy a uniquely broad range of immersive opportunities to expand critical inquiry, learn, perform original research, and chart a path to professional success. Experiential PhD opportunities enable PhD students to step outside the comfort zone of their campus research group where students can pursue challenging, creative, customized assignments within industry, government, or the nonprofit sector that inform and enhance their pursuit of a research doctorate. Experiential PhD gives postdoctoral researchers the opportunity to bring new skills to their positions at Northeastern.

This Graduate Certificate in Experiential PhD Leadership aims to:

- **Challenge students to address complex problems** through experience within the context of real-world needs and challenges faced by industry, government, or nonprofit-sector organizations, broadening students' view of stakeholders and impact, shaping the very questions they raise and answer.
- **Equip students for a lifetime with the cultural agility, creativity, and professional skills**—public speaking and communications, meeting goals and expectations (e.g., project management for personal and professional purposes), teamwork, leadership, peer influence, leading from the middle—that they will need to translate their findings into impactful solutions.
- **Enrich every student's research group and, ultimately, fields of expertise** by fostering a collaborative, entrepreneurial, innovative approach to knowledge creation that expands their network far beyond academia to include intellectual and professional mentors and collaborators.

This graduate certificate designed for PhD students across all of Northeastern's research-based PhD programs provides students embarking on an experiential PhD, as well as postdoctoral researchers working in an area within one of Northeastern's research-based programs, with the preparation, project delivery, and guidance for contextual integration within the context of leadership development. All students pursuing this leadership certificate will be mentored by their sponsor supervisor and dissertation advisor(s).

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B or higher is required in each course.

Requirements

Code	Title	Hours
PHDL 7600	Leading Self and Others	4
PHDL 7660	Experiential PhD Challenge Project 1	4
PHDL 7662	Experiential PhD Challenge Project 2	4
PHDL 7666	Contextual Integration	0

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Industry PhD

The Industry PhD is a first-of-its kind research-based doctoral program designed with input from external partners to provide a pathway for full-time master's-level employees. Designed with input from external partners, employees pursue a research-based doctoral degree while maintaining their job and conducting research at the employer site. This enables employees to acquire new skills that will help them to advance in their careers and provides the organization with an opportunity to invest in their future leaders. By working closely with Northeastern University faculty, employees will explore their research from a broader scientific perspective, enabling them to appreciate the research foundation of their day-to-day work and to pursue new areas of research for the company.

Experiential PhD programs offer robust benefits to both students and institutional partners. Students solve complex problems as part of their education and chart careers as future innovators. Our institutional partners receive many benefits as well, including:

- A deeper engagement in rapidly evolving fields of research
- Access to university facilities and senior faculty expertise
- Opportunities for senior leadership to mentor and copublish with students and to serve on their dissertation committees
- A chance to recruit emerging talent
- Opportunities to partner with Northeastern, an entrepreneurial research university known for its innovative collaborations with academia, government, and industry

The Industry PhD is applicable to any of our 35 doctoral programs. Applicants should follow the requirements of the program to which they are applying. In addition, the following Industry PhD terms (<https://phd.northeastern.edu/industry-and-experiential-phd-program/>) apply.

Interdisciplinary, PhD (Boston)

Offering an individually tailored program of study, the Northeastern University Interdisciplinary Doctor of Philosophy program enables students to draw from the disciplines supporting their fields of research and provides flexibility to train the next generation of transdisciplinary and multidisciplinary researchers who will be needed to tackle society's most pressing problems that cross disciplinary boundaries.

The graduate group, consisting of faculty from across Northeastern, provides the overarching faculty oversight to the curriculum that is expected to cross multiple Northeastern colleges. The Interdisciplinary PhD option will only be available when the desired research curriculum cannot be supported by one of Northeastern's existing PhD programs. This PhD program is administered by the Office of the Provost.

Minimum academic standards, oversight, requirements, and milestones related to this new PhD are described below.

Graduate Group

This refers to the faculty committee that will provide academic oversight for the PhD program as a whole.

Dissertation Committee

Established by the graduate group for each PhD student, the dissertation committee consists of at least three faculty qualified to supervise the student's research and establishes the curriculum requirements in support of the PhD student's anticipated dissertation research. There should be at least one dissertation committee member representing each discipline associated with the proposed PhD, and it is strongly encouraged that an external individual is added as a fourth member of the dissertation committee. This external member must be qualified to supervise and guide PhD-level research. The dissertation committee also establishes the milestone requirements, specifically the format for the qualifying exam at the time of admission. One member of the dissertation committee will serve as the committee chair. Cochairs are permitted and encouraged to guide research at the intersection of disciplines.

Area of Specialization

Students select an area of specialization, supported by their approved coursework and research areas and denoted on the student's transcript. The area of specialization will be recommended by the dissertation committee. The graduate group will review these areas of specialization within the context of existing PhD specializations. The graduate group will make the final decision about the area of specialization for each student. Area of specialization should be established by the end of the first year of academic study.

Admission to Candidacy

The admission to candidacy recognizes the wide range of disciplines that may participate in in this degree. To reach candidacy, PhD students must demonstrate their research ability through the application and synthesis of skills and knowledge and their ability to pose questions and solve problems. Students should achieve candidacy by the end of the second year of study. The admission to candidacy will include an assessment about the candidate's ability to perform societally impactful research by an external evaluator. Students who require more than 18 months to meet the requirements for candidacy will need to petition the dissertation committee and the graduate group to request extended time. Candidacy will be achieved with the following:

- The qualifying examination subject areas will be established at the time of admission, which will be aligned with the student's proposed research project. A representative from the graduate group will convene the dissertation committee for the qualifying exams. To assess the student's ability to perform impactful research, it is strongly recommended that an evaluator outside Northeastern (and not a member of the dissertation committee) be included as an examiner. The qualifying examination will normally include a written exam, oral exam, response to a journal paper, and/or other format deemed acceptable by the dissertation committee for the involved disciplinary areas.
- Progression to candidacy may also require a research paper requirement. Any paper requirements will be communicated at admission.
- The committee may require a presentation from the student before making its recommendation.

Dissertation Prospectus/Proposal

After the student has achieved sufficient depth in a field of study, the student prepares a proposal for a PhD dissertation. This process should take place within a year of achieving candidacy. The dissertation proposal describes the proposed research, including the relevant background materials from literature. The proposal should clearly specify the research questions to be addressed, the methods to be used, and a schedule of milestones to completion. A representative from the graduate group will convene the dissertation committee for the dissertation proposal. The dissertation proposal must be approved by the dissertation committee. It is strongly encouraged that the dissertation committee include an individual qualified to guide the research from outside Northeastern. Upon approval of the written proposal, the student must present the proposed work orally in a public forum, followed by a closed-door oral examination from the dissertation committee. The dissertation committee will submit the dissertation proposal results to the representative from the graduate group who will review and communicate the results to the student. The student may take the dissertation proposal examination twice, at most.

Dissertation Defense

The dissertation defense is held in accordance with the bylaws of the University Graduate Curriculum Committee of the Northeastern Faculty Senate. The defense is convened by a representative from the graduate group and is chaired by a Northeastern faculty member approved by the graduate group and outside the dissertation committee. The dissertation committee will include an external examiner who is an individual with expertise in the area of study but not affiliated with the Northeastern global campus system or previously involved with the student's research. The defense chair will communicate the results to the PhD candidate.

Program Requirements

	Complete 30 semester hours of coursework in consultation with your dissertation committee.	30

The dissertation committee will provide oversight in coursework selection, provided that each student has training (via courses or experience) in prerequisite domain knowledge, research methods, and specific contexts. Students are required to enroll in a minimum of 30 semester hours of coursework approved by the dissertation committee. This coursework may include traditional courses, special topics courses, independent study, and discussant or other coursework taken via partner institution. The coursework should also include opportunities to develop the professional skills (such as communication, teaching, and leadership) required for the student's field of research. Courses delivered at a partner outside Northeastern University may satisfy these course requirements provided an education or experiential PhD agreement exists with that organization. The dissertation committee will ensure that the 30 semester hours represent a balance of coursework across domain knowledge, research methods, application contexts, research

integrity, colloquia, the research itself, and professional development. The dissertation committee should submit a plan of study to the graduate group during the first semester of a PhD student's enrollment.

Interdisciplinary, PhD (Portland)

Offering an individually tailored program of study, the Northeastern University Interdisciplinary Doctor of Philosophy program enables students to draw from the disciplines supporting their fields of research and provides flexibility to train the next generation of transdisciplinary and multidisciplinary researchers who will be needed to tackle society's most pressing problems that cross disciplinary boundaries.

The graduate group, consisting of faculty from across Northeastern, provides the overarching faculty oversight to the curriculum that is expected to cross multiple Northeastern colleges. The Interdisciplinary PhD option will only be available when the desired research curriculum cannot be supported by one of Northeastern's existing PhD programs. This PhD program is administered by the Office of the Provost.

Minimum academic standards, oversight, requirements, and milestones related to this new PhD are described below.

Graduate Group

This refers to the faculty committee that will provide academic oversight for the PhD program as a whole.

Dissertation Committee

Established by the graduate group for each PhD student, the dissertation committee consists of at least three faculty qualified to supervise the student's research and establishes the curriculum requirements in support of the PhD student's anticipated dissertation research. There should be at least one dissertation committee member representing each discipline associated with the proposed PhD, and it is strongly encouraged that an external individual is added as a fourth member of the dissertation committee. This external member must be qualified to supervise and guide PhD-level research. The dissertation committee also establishes the milestone requirements, specifically the format for the qualifying exam at the time of admission. One member of the dissertation committee will serve as the committee chair. Cochairs are permitted and encouraged to guide research at the intersection of disciplines.

Area of Specialization

Students select an area of specialization, supported by their approved coursework and research areas and denoted on the student's transcript. The area of specialization will be recommended by the dissertation committee. The graduate group will review these areas of specialization within the

context of existing PhD specializations. The graduate group will make the final decision about the area of specialization for each student. Area of specialization should be established by the end of the first year of academic study.

Admission to Candidacy

The admission to candidacy recognizes the wide range of disciplines that may participate in this degree. To reach candidacy, PhD students must demonstrate their research ability through the application and synthesis of skills and knowledge and their ability to pose questions and solve problems. Students should achieve candidacy by the end of the second year of study. The admission to candidacy will include an assessment about the candidate's ability to perform societally impactful research by an external evaluator. Students who require more than 18 months to meet the requirements for candidacy will need to petition the dissertation committee and the graduate group to request extended time. Candidacy will be achieved with the following:

- The qualifying examination subject areas will be established at the time of admission, which will be aligned with the student's proposed research project. A representative from the graduate group will convene the dissertation committee for the qualifying exams. To assess the student's ability to perform impactful research, it is strongly recommended that an evaluator outside Northeastern (and not a member of the dissertation committee) be included as an examiner. The qualifying examination will normally include a written exam, oral exam, response to a journal paper, and/or other format deemed acceptable by the dissertation committee for the involved disciplinary areas.
- Progression to candidacy may also require a research paper requirement. Any paper requirements will be communicated at admission.
- The committee may require a presentation from the student before making its recommendation.

Dissertation Prospectus/Proposal

After the student has achieved sufficient depth in a field of study, the student prepares a proposal for a PhD dissertation. This process should take place within a year of achieving candidacy. The dissertation proposal describes the proposed research, including the relevant background materials from literature. The proposal should clearly specify the research questions to be addressed, the methods to be used, and a schedule of milestones to completion. A representative from the graduate group will convene the dissertation committee for the dissertation proposal. The dissertation proposal must be approved by the dissertation committee. It is strongly encouraged that the dissertation committee include an individual qualified to guide the research from outside Northeastern. Upon approval of the written proposal, the student must present the proposed work orally in a public forum, followed by a closed-door oral examination from the dissertation committee. The dissertation committee will submit the dissertation proposal results to the representative from the graduate group who will review and communicate the results to the student. The student may take the dissertation proposal examination twice, at most.

Dissertation Defense

The dissertation defense is held in accordance with the bylaws of the University Graduate Curriculum Committee of the Northeastern Faculty Senate. The defense is convened by a representative from the graduate group and is chaired by a Northeastern faculty member approved by the graduate group and outside the dissertation committee. The dissertation committee will include an external examiner who is an individual with expertise in the area of study but not affiliated with the Northeastern global campus system or previously involved with the student's research. The defense chair will communicate the results to the PhD candidate.

Artificial Intelligence, MS (Boston)

The Master of Science in Artificial Intelligence provides a comprehensive framework encompassing foundational algorithms, theory, and practical applications in the rapidly evolving field of AI. This program offers students the essential knowledge and skills to design, develop, and implement AI systems across various high-demand sectors. The core curriculum is designed to provide in-depth understanding of fundamental AI concepts, forming a solid foundation for both theoretical and practical aspects of artificial intelligence.

Building on this strong foundation, students can delve into advanced AI applications through interdisciplinary concentrations tailored to industry needs. These concentrations include computer vision, continuous process engineering, machine learning, and robotics and agent-based systems.

The master's in artificial intelligence is an interdisciplinary degree offered by Khoury College of Computer Sciences and the College of Engineering. Descriptions of the concentrations offered in this degree are as follows:

- Computer Vision—College of Engineering
 - The computer vision concentration offers students the knowledge and skills to drive innovation at the intersection of new and emerging vision systems and AI, through utilizing AI and machine learning solutions for a wide range of applications including image enhancement/restoration, object recognition, navigation, graphics rendering, and pattern classification.
- Continuous Process Engineering—College of Engineering
 - The continuous process engineering concentration offers students the knowledge and skills to revolutionize how industrial processes are designed, monitored, and optimized. The program aims to prepare students to utilize AI and machine learning solutions to enhance process efficiency, predictive maintenance, and real-time decision making in industries such as chemicals, pharmaceuticals, and energy. Graduates will be prepared to integrate AI-driven solutions into continuous manufacturing environments to improve safety, sustainability, and productivity.
- Energy Systems—College of Engineering
 - The energy systems concentration offers students the knowledge and skills to drive innovation in sustainable and intelligent energy systems. Students examine how to utilize AI and machine learning solutions to support smart energy grid operations, integrate renewable energy sources, and create responsive and resilient systems.
- Machine Learning—Khoury College of Computer Sciences
 - The goal of the machine learning concentration is to provide students with practical, hands-on experience in designing, implementing, and optimizing machine learning models for real-world applications. The curriculum positions graduates to pursue roles that leverage AI to drive innovation and efficiency in a wide variety of industries and domains.
- Robotics and Agent-Based Systems—Khoury College of Computer Sciences
 - The goal of the robotics and agent-based systems concentration is to provide students with expertise in designing and developing intelligent robotic systems and autonomous agents capable of performing complex tasks in dynamic environments. The curriculum positions graduates to pursue roles that contribute to innovations in automation, human-robot interaction, and intelligent systems design.

Students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their college of admission.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A cumulative GPA of 3.000 or higher is required in the following:

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 5130	Applied Programming and Data Processing for AI	4
DADS 5200	Mathematics for Machine Learning	4
or DS 5020	Introduction to Linear Algebra and Probability for Data Science	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	4
or DADS 7275	Machine Learning and Data Analytics	

Concentrations

Complete one of the following concentrations:

- Computer Vision (p. 165)—College of Engineering
- Continuous Process Engineering (p. 165)—College of Engineering
- Energy Systems (p. 165)—College of Engineering
- Machine Learning (p. 166)—Khoury College of Computer Sciences
- Robotics and Agent-Based Systems (p. 166)—Khoury College of Computer Sciences

Complex Network Analysis, MS (Boston)

Complex network analysis is the quantitative study of interconnected systems that influence every aspect of our lives—from where we get our news and who we share ideas with, to how we travel and the people we interact with, to the products we purchase and the foods we eat. Networks are ubiquitous across natural and human-made systems, and their structure and dynamics can explain and help improve the greatest challenges of the next century such as pandemics, food scarcity, cultural polarization, and climate change. Expertise in the emerging field of complex network analysis, within the landscape of the rapid growth of artificial intelligence and machine learning, forms the foundation of the next generation of thought leaders. Northeastern University leads the way in this burgeoning field, offering a unique master's degree program in complex network analysis methodologies. The program is designed to equip students with the conceptual and analytical tools needed to find patterns of connections in networked systems and apply these techniques in real-world settings. The curriculum includes industry-aligned concentration areas of focus, enabling graduates to apply complex network analysis skills in impactful careers in the public and private sectors as well as in research. The concentrations for this program correspond directly to the following industry sectors:

1. Public health and life sciences fields such as epidemiological modeling, public policy, and behavioral research
2. Social or urban science and research fields such as urban planning, social network research, economics, education, criminal science, or public policy
3. Finance or technological fields such as financial analytics, market research, or network analysis for business
4. Biological systems modeling used across research and industry including network biology, drug discovery, or multi-omics mining

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Complex Biological Networks—College of Science
- Complex Social Systems—College of Social Sciences and Humanities
- Economic and Technological Networks—Khoury College of Computer Sciences
- Population Health Dynamics—Bouvé College of Health Sciences

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CNET 5050	Fundamentals of Complex Networks	4
CNET 5051	Analyzing Complex Network Data	4
CNET 5052	Advanced Tools for Complex Network Analysis	4
CNET 5901	Visualizing Complex Networks	2
CNET 5902	Communicating Network Data	2

Concentrations

Complete one of the following concentrations:

- Complex Biological Networks (p. 167)—College of Science
- Complex Social Systems (p. 168)—College of Social Sciences and Humanities
- Economic and Technological Networks (p. 168)—Khoury College of Computer Sciences
- Population Health Dynamics (p. 169)—Bouvé College of Health Sciences

Experiential Courses

Code	Title	Hours
Complete a total of 4 semester hours from the following (course may be repeated):		4
CNET 6107	Complex Network Analysis Research Rotation	
CNET 6108	Complex Network Analysis Capstone	
CNET 6990	Thesis	

Optional Co-op

Code	Title	Hours
CNET 6000	Professional Development for Co-op	1
CNET 6964	Co-op Work Experience	0

Data Science, MS (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Data Science Core

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Programming with Data		
DS 5110	Essentials of Data Science	4
Algorithms		
CS 5800 or EECE 7205	Algorithms Fundamentals of Computer Engineering	4
Machine Learning		
CS 6140 or EECE 5644	Machine Learning Introduction to Machine Learning and Pattern Recognition	4
Interdisciplinary Capstone		
DS 5500	Data Science Capstone	4

Data Science Concentration Options

Complete one of the following concentrations:

- Computer Science (p. 170)—Khoury College of Computer Sciences
- Engineering Theory and Modeling (p.)—College of Engineering

Program Credit/GPA Requirements

IE 7500	Applied Natural Language Processing in Engineering
IE 7615	Neural Networks and Deep Learning

- ¹ Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional hour, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Data Science, MS—Align (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

The Master of Science in Data Science—Align curriculum is specifically designed to prepare incoming students without any prior programming experience. During the first semester of year one, students are expected to take foundational courses in computer science fundamentals, as well as a course in data structures/discrete mathematics. During their second semester, students will take coursework in programming for data science, as well as linear algebra and probability.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Align Bridge Coursework

Students are required to complete all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
Fundamentals		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
Discrete Structures		
CS 5002	Discrete Structures	4
Programming for Data Science		
DS 5010	Introduction to Programming for Data Science	4
Additional Align Coursework		
DS 5020	Introduction to Linear Algebra and Probability for Data Science	4

Data Science Core

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Programming with Data		
DS 5110	Essentials of Data Science	4
Algorithms		

CS 5800	Algorithms	4
or EECE 7205	Fundamentals of Computer Engineering	
Machine Learning		
CS 6140	Machine Learning	4
or EECE 5644	Introduction to Machine Learning and Pattern Recognition	
Interdisciplinary Capstone		
DS 5500	Data Science Capstone	4

Data Science Concentration Options

Complete one of the following concentrations:

- Computer Science (p. 173)—Khoury College of Computer Sciences
- Engineering Theory and Modeling (p.)—College of Engineering

Program Credit/GPA Requirements

40–48 total semester hours required

Minimum 3.000 GPA required

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Complete 16 semester hours from the following: ¹		16
CS 5100	Foundations of Artificial Intelligence	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5610	Web Development	
CS 6120	Natural Language Processing	
CS 6200	Information Retrieval	
CS 6220	Data Mining Techniques	
CS 6240	Large-Scale Parallel Data Processing	
CS 6350	Empirical Research Methods	
CS 6620	Fundamentals of Cloud Computing	
CS 6650	Building Scalable Distributed Systems	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
CS 7200	Statistical Methods for Computer Science	
CS 7250	Information Visualization: Theory and Applications	
CS 7280	Special Topics in Database Management	
CS 7290	Special Topics in Data Science	
CS 7990	Thesis	
CS 8674	Master's Project	
DS 7995	Project	

ENGINEERING THEORY AND MODELING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Foundational Courses		
Complete 4 semester hours from the following: ¹		4
DS 7995	Project	
EECE 5360	Combinatorial Optimization	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 7204	Applied Probability and Stochastic Processes	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	

EECE 7346	Probabilistic System Modeling and Analysis
IE 6400	Foundations for Data Analytics Engineering
IE 7275	Data Mining in Engineering
IE 7280	Statistical Methods in Engineering
Translational and Advanced Courses	
Complete the remaining 12 semester hours from the following:	
BIOE 5750	Modeling and Inference in Bioengineering
BIOE 5880	Computational Methods in Systems Bioengineering
BIOE 6200	Mathematical Methods in Bioengineering
CHME 5137	Computational Modeling in Chemical Engineering
CHME 5649	Numerical Strategies and Data Analytics for Chemical Sciences

IE 6400	Foundations for Data Analytics Engineering
IE 6600	Computation and Visualization for Analytics
IE 6700	Data Management for Analytics
IE 6750	Data Warehousing and Integration
IE 7270	Intelligent Manufacturing
IE 7275	Data Mining in Engineering
IE 7280	Statistical Methods in Engineering
IE 7295	Applied Reinforcement Learning in Engineering
IE 7300	Statistical Learning for Engineering
IE 7500	Applied Natural Language Processing in Engineering
IE 7615	Neural Networks and Deep Learning

¹ Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional 1 semester hour, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouvé College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering

- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4
CS 6120	Natural Language Processing	4
CS 6140	Machine Learning	4
or DS 5220	Supervised Machine Learning and Learning Theory	

CONCENTRATION IN ENTREPRENEURSHIP—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics of Design	

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4

Electives

Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

Electives

Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8
HIST 5241	Exhibits and Museums	
HIST 7250	Topics in Public History (Public History and Slavery)	
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)	

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
GSND 6460	Generative Game Design	

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	

JRNL 5311	Design for Storytelling
JRNL 6305	Topics
JRNL 6341	Telling Your Story with Data

Plan of Study

Sample Plan of Study

The following is a sample plan of study for a student in the Concentration in XR and Games.

Year 1			
Fall	Hours	Spring	Hours
EXRE 5010 and EXRE 5011		5 EXRE 5030	4
EXRE 5020		4 GSND 5110 and GSND 5111	5
		9	9

Robotics, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics offers instruction by the faculty of the College of Engineering, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences. The program is designed to provide students with comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Biomedical and Rehabilitation Robotics—College of Engineering
- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Gordon Institute of Engineering Leadership

Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate coursework may be applied to this program's elective requirements in the coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
Electrical and Computer Engineering		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Computer Science		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Concentrations

Complete one of the following options:

- Biomedical and Rehabilitation Robotics (p. 181)—College of Engineering
- Computer Science (p. 182)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 182)—College of Engineering
- Mechanical Engineering (p. 183)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

BIOMEDICAL AND REHABILITATION ROBOTICS CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
Complete one of the following:		4
BIOE 5520	Bioengineering Design for Robotic Rehabilitation	
PT 5170 and PT 5171	Motor Control and Lab for PT 5170	
PT 5321	Applications of Biomechanics in Human Function and Movement	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945 or PT 7995	Master's Project Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945 or PT 7995	Master's Project Master's Project	
BIOE 7990 or PT 7990	Thesis Thesis	

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours

Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.

Required Course

Complete one additional CS course not used to fulfill the core requirements: 4

CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

CS 8674 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

CS 7990 Thesis

CS 8674 Master's Project

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

ELECTRICAL AND COMPUTER ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional EECE course not used to fulfill the core requirements: 4

EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

EECE 7945 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

EECE 7945 Master's Project

EECE 7990 Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1

ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

MECHANICAL ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	

Options

Complete one of the following options:		16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

ME 7945 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

ME 7945 Master's Project

ME 7990 Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6350	Empirical Research Methods	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	

EECE 5554	Robotics Sensing and Navigation
EECE 5580	Classical Control Systems
EECE 5639	Computer Vision
EECE 5642	Data Visualization
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 7150	Autonomous Field Robotics
EECE 7323	Numerical Optimization Methods
EECE 7337	Information Theory
EECE 7370	Advanced Computer Vision
EECE 7397	Advanced Machine Learning
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)
IE 6500	Human Performance
IE 7280	Statistical Methods in Engineering
IE 7315	Human Factors Engineering
IE 7615	Neural Networks and Deep Learning
ME 5240	Computer Aided Design and Manufacturing
ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5654	Elasticity and Plasticity
ME 5655	Dynamics and Mechanical Vibration
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 6200	Mathematical Methods for Mechanical Engineers 1
ME 6250	Wearable Robotics
ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering
PT 5170	Motor Control
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 7001	Core Concepts in Rehabilitation Science and Research
PT 7005	Experimental Design and Applied Statistics
PT 7020	Technologies in Movement and Rehabilitation Science

Robotics, MS (Seattle)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics is offered by the College of Engineering and the Khoury College of Computer Sciences. The program is designed to provide students comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	

Electrical and Computer Engineering

Complete one of the following:	4
EECE 5550	Mobile Robotics
EECE 5552	Assistive Robotics
EECE 5554	Robotics Sensing and Navigation

Computer Science

Complete one of the following:	4
CS 5180	Reinforcement Learning and Sequential Decision Making
CS 5335	Robotic Science and Systems

Concentrations

Complete one of the following concentrations:

- Computer Science (p. 185)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 185)—College of Engineering
- Mechanical Engineering (p. 186)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

CONCENTRATION IN COMPUTER SCIENCE

Code	Title	Hours
Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.		
Required Course		
Complete one additional CS course not used to fulfill the core requirements:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p.)		
<i>Project Option</i>		
CS 8674	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p.)		
<i>Thesis Option</i>		
CS 8674	Master's Project	
CS 7990	Thesis	
Complete 8 semester hours of courses from the elective course list. (p.)		

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

CONCENTRATION IN ELECTRICAL AND COMPUTER ENGINEERING

Code	Title	Hours
Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.		
Required Course		
Complete one additional EECE course not used to fulfill the core requirements:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p.)		
<i>Project Option</i>		
EECE 7945	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p.)		

Thesis Option

EECE 7945	Master's Project	
EECE 7990	Thesis	
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.		
Complete 8 semester hours of courses from the elective course list. (p.)		

Optional Co-op

Complete the following (students in EECE and MIE concentrations must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

CONCENTRATION IN MECHANICAL ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements: 4

ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p.)

Project Option

ME 7945	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p.)		

Thesis Option

ME 7945	Master's Project	
ME 7990	Thesis	

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p.)

Optional Co-op

Complete the following (students in EECE and MIE concentrations must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction

ME 7247	Advanced Control Engineering

Statistics, MS (Boston)

The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The Master of Science in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouvé College of Health Sciences
- Statistical machine learning—Khoury College of Computer Sciences
- Statistical theory and modeling—College of Science

Students will follow all policies associated with their home college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800	Causal Inference in Public Health Research	3-4
or PHTH 6801	Causal Inference 1	
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics (p. 188)—Bouvé College of Health Sciences
- Statistical Machine Learning (p. 188)—Khoury College of Computer Sciences
- Statistical Theory and Modeling (p. 188)—College of Science

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses may be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

31 total semester hours required (32 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

CONCENTRATION IN BIOSTATISTICS (BOUVÉ COLLEGE OF HEALTH SCIENCES)

Code	Title	Hours
Complete 12 semester hours from the following:		12
PHTH 5350	Using SAS in Public Health Research	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6802	Causal Inference 2	
PHTH 6810	Survival Analysis	
PHTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL MACHINE LEARNING (KHOURY COLLEGE OF COMPUTER SCIENCES)

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4
DS 5110	Essentials of Data Science	4
Optional Co-op		
CS 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL THEORY AND MODELING (COLLEGE OF SCIENCE)

Code	Title	Hours
Complete 12 semester hours from the following:		12
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	

Optional Co-op

EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Statistics, MS—Connect (Boston)

The Master of Science in Statistics—Connect program is designed for students from all backgrounds with a BS/BA degree, provided the student has experience with basic calculus and statistics. The first semester of the degree program provides students with the foundational knowledge needed to study successfully alongside direct-entry graduate students. The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The MS in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical Machine Learning—Khoury College of Computer Sciences
- Statistical Theory and Modeling—College of Science

Students will follow all policies associated with their college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Connect Courses

Code	Title	Hours
Students are required to complete 8–10 semester hours from the following unless otherwise determined by the program:		8-10
CS 5001	Intensive Foundations of Computer Science	
MATH 5001	Accelerated Linear Algebra	
MATH 5002	Accelerated Multivariable Calculus	
MATH 5003	Accelerated Probability and Statistics	
MATH 5110	Applied Linear Algebra and Matrix Analysis	

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800	Causal Inference in Public Health Research	3-4
or PHTH 6801	Causal Inference 1	
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics—Bouv  College of Health Sciences (p. 190)
- Statistical Machine Learning—Khoury College of Computer Sciences (p. 190)
- Statistical Theory and Modeling—College of Science (p. 190)

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses can be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

39-41 total semester hours required (40-42 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

BIostatistics Concentration—Bouv  College of Health Sciences

Code	Title	Hours
Complete 12 semester hours from the following:		12
PHTH 5350	Using SAS in Public Health Research	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6802	Causal Inference 2	
PHTH 6810	Survival Analysis	
PHTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

Statistical Machine Learning Concentration—Khouri College of Computer Sciences

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4
DS 5110	Essentials of Data Science	4
Optional Co-op		
CS 6964	Co-op Work Experience	0

Statistical Theory and Modeling Concentration—College of Science

Code	Title	Hours
Complete 12 semester hours from the following:		12
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics

EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4

Experiential Courses

Code	Title	Hours
Complete 4 semester hours from the following:		4
CRIM 6600	Justice, Technology, and AI	
EDUT 6150	AI in Education	
HLTH 5800	AI Across the Health Sciences	
IE 5640	Data Mining for Engineering Applications	
JRNL 6460	AI in Media Industries	
MISM 6250	Strategic AI for Business	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

AI Applications, Graduate Certificate (Silicon Valley)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by the College of Engineering and will follow all policies associated with the College of Engineering.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047 or EECE 5644	Exploring AI Trends and Tools Introduction to Machine Learning and Pattern Recognition	4
PHIL 5110	Responsible AI	4

Experiential Course

Code	Title	Hours
IE 5640	Data Mining for Engineering Applications	4

Program Credit/GPA Requirements

16 total semester hours required
Minimum 3.000 GPA required

Product Management, Graduate Certificate (Boston)

The Graduate Certificate in Product Management is designed for students with undergraduate degrees in a wide range of fields—including computer science, engineering, economics, business administration, design, and psychology—who want to build the skills necessary for success as product managers. This certificate equips students with the expertise to excel in this dynamic field, whether they are early career professionals, transitioning into product roles, or looking to differentiate themselves in a competitive job market. The program provides a flexible, cost-effective alternative to a full MS program while offering hands-on learning experiences.

Curriculum and Structure

This interdisciplinary certificate offers a structured yet adaptable curriculum that balances foundational knowledge with practical, industry-relevant skills.

The program consists of four courses (12–13 semester hours total):

- Three core courses covering fundamental concepts across key product management functions
- One experiential course (1 credit) providing hands-on learning opportunities tailored to students’ backgrounds and career goals in product management

This certificate allows students to gain real-world experience, develop in-demand skills, and enhance their career opportunities within a streamlined, flexible structure.

Admissions and College Affiliation

Students are admitted to the certificate program through one of the following colleges and follow the academic policies of their home college:

- College of Arts, Media and Design
- College of Engineering
- D’Amore-McKim School of Business
- Office of the Provost and College of Professional Studies¹

This certificate provides a fast, flexible, and practical pathway for students looking to build expertise in product management while benefiting from Northeastern University’s strong academic and professional support network.

¹ Program Structure and Transition

- For the 2025–2026 academic year, the Graduate Certificate in Product Management is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern's graduate academic calendar and be governed by the academic policies and procedures outlined in the university's *Graduate Catalog*.
- While designated under the Office of the Provost, students will receive full academic and student support services from the College of Professional Studies including academic advising, co-op and career advising, and access to the International Tutoring Center.
- Beginning in the 2026–2027 academic year, the certificate program will transition fully to the College of Professional Studies. At that time, students will be officially designated under CPS in the academic system of record and governed by its academic policies as outlined in the university's *Graduate Catalog*.

The College of Arts, Media and Design offers graduate programs that build on existing knowledge and establish innovative areas of inquiry and practice. We work with students to frame, research, and answer transformative questions. Together, we challenge, engage, and shape global cultures and marketplaces.

Our Mission

We create a distinctive experiential education by leveraging emergent practices and scholarship in the arts, media, and design. Our unique combination of disciplines empowers innovative thinking and making. Our students become informed citizens and creative leaders with an entrepreneurial spirit.

Graduate Studies in the College of Arts, Media and Design

Welcome to graduate studies at CAMD. We deliver an outstanding graduate education in traditional areas while exploring new approaches to this generation's transformative questions. Our graduate programs highlight intersectional approaches that bring together human, technological, and data literacies to push the boundaries of our disciplines.

We offer diverse program types to meet individual career and academic goals, including terminal degrees (Doctor of Philosophy, Master of Fine Arts, Master of Architecture); professional degrees (Master of Science, Master of Arts, Master of Design); PlusOne pathways; and Graduate Certificates. Our graduate degree programs are inherently interdisciplinary, led by research faculty across the departments of Art + Design, architecture, journalism, music, and theatre. Coursework incorporates a range of scholarly, applied, and experiential perspectives, complemented by lively community activities including lecture series, exhibitions, symposia, and more.

This is an exciting time to pursue advanced education and scholarship in creative fields. Never have the arts and culture been so clearly essential to our social, economic, and environmental future: From cultural outreach in underserved communities to designing ethical virtual environments for health and security; from green building innovation to cutting-edge journalism; from provocative performances and thought-provoking installations to incisive data visualizations that change how we view the world—our faculty and students are involved in a wealth of academic endeavors, creative enterprises, and professional experience.

Please use these resources to familiarize yourself with the diverse ranges of programs we offer. Don't hesitate to reach out to the graduate program faculty listed in your fields of interest, and be sure to visit CAMD's graduate programs website (<https://camd.northeastern.edu/graduate-students/>) often, where you'll find current news and links.

Academic Policies and Procedures

- General Information (p. 195)
- Grade Appeal Policy (p. 195)
- Graduate Student Classification (p. 196)
- Master's Degree Policies (p. 197)

General Information

Five units in the College of Arts, Media and Design offer programs at the graduate level:

- Architecture (p. 198)
- Art + Design (p. 210)
- Communication Studies (p. 228)
- Journalism (p. 231)
- Interdisciplinary (p. 236)

Grade Appeal Policy

It is the policy of Northeastern University that all students shall be treated fairly in evaluations made of their academic performance, standing, and progress. The university presumes that academic judgments by its faculty are fair, consistent, and objective. Students must understand that the substitution of a different academic judgment for that of the original evaluator is a serious intrusion upon teaching prerogatives. Nonetheless, the university believes it is essential to provide an appeals mechanism to students who believe that they were erroneously, capriciously, or otherwise unfairly treated in an academic or cooperative education determination. This includes claims of misinterpretation or inequitable application of any academic provision of the university's *Graduate Catalog*, *Student Handbook*, or *Faculty Handbook*.

Decisions concerning admission or readmission into a program, including dismissals, and matters related to co-op employment (other than grades received) cannot be appealed beyond the college level. While program dismissals cannot be appealed beyond the college level, underlying academic judgments that led to a dismissal can be appealed.

The steps below are for academic appeals. In the academic appeals procedures described herein, "dean" refers to the dean of the college or a designee. If a student feels that they have been the victim of harassment or of discrimination prohibited by university policy, they should consult with the Office for University Equity and Compliance (<https://ouec.northeastern.edu/>) as soon as they become aware of alleged prohibited harassment or discrimination. A student is not required to wait until a term grade or determination is received before seeking advice or redress. If the OUEC is advised of such alleged prohibited conduct as part of an academic appeal (see below), the appeal shall be pursued and investigated through the OUEC first. In such cases, the student should submit the appeal to the appropriate dean(s) described in Step 2, with a copy also given to the OUEC. Following a resolution of the harassment/discrimination issues, any remaining academic issues will be addressed, at the request of the student, according to the academic appeals procedures.

Before invoking the appeals procedures, students are always encouraged to speak informally to their instructors or graduate program coordinator/director about any determination or grade about which they have questions. If students choose to pursue an appeal, the process is described in the appeals section that follows.

A student may appeal an academic determination by submitting a written statement that details the action or judgment and the basis for the appeal. All parties shall cooperate and act expeditiously in processing the appeal to completion.

All appeals should be initiated and resolved in a timely manner in accordance with the detailed time limits provided in this document.

Though students are always entitled to seek the advice of legal counsel, a student's lawyer cannot be present in the informal or formal academic appeal procedures. A student may consult with the provost or their designee at any point in these procedures for advice or assistance. University officials may take whatever steps they deem reasonably appropriate to achieve resolution of the problem at any stage of these procedures.

It is strongly recommended that international students consult as soon as possible with the Office of Global Services (<https://international.northeastern.edu/ogs/>) to determine the possibility of any repercussion that the timing of an appeal may have on their immigration status.

Scientific or Research Misconduct

Scientific or research misconduct is defined as fabrication, falsification, plagiarism, or other practices that seriously deviate from those that are commonly accepted within the academic and scientific community for proposing, conducting, or reporting research and does not include honest error or honest differences in interpretation or judgments of data. (Further information can be obtained from the U.S. Office of Research Integrity, Department of Health and Human Services (<https://ori.hhs.gov/>).) Possible incidences of misconduct are to be reported immediately to the provost

or their designee, who will initiate the appropriate procedures. Findings of scientific or research misconduct cannot be appealed through the process below.

Appeal of Final Grades and Outcomes of Other Academic Evaluative Processes

- Step 1: Discuss Concerns with Instructor and/or Graduate Program Coordinator/Director
- Step 2: Prepare an Appeal Statement
- Step 3: Associate Dean of Graduate Programs-Level Resolution
- Step 4: College-Level Appeal
- Step 5: University-Level Appeal

STEP 1: DISCUSS CONCERNS WITH INSTRUCTOR AND/OR GRADUATE PROGRAM COORDINATOR/DIRECTOR

In most cases, students should first discuss their concerns with the faculty member who taught the course to see if it is possible to reach agreement on the issue(s). If the student is not satisfied with the outcome of this discussion, or if the student is not comfortable discussing the issue with the instructor, the student should request a meeting with the appropriate administrator (e.g., program coordinator/director or chair) to further discuss their concerns. If these attempts to informally resolve the issue fail, the student can enter the formal procedure at the college level as follows. Note that this step should occur as soon as possible after the academic determination given the time frame for appeal statement submission described in Step 2.

STEP 2: PREPARE AN APPEAL STATEMENT

A student appeals an academic determination by submitting a written statement (the Statement). The Statement shall include when the problem occurred, who made the disputed determination, the nature of the determination, and what resolution the student is requesting. All relevant supporting materials should be attached to the Statement. The Statement should be submitted no later than 28 calendar days from the day when the academic determination is made available to the student. If the appeal concerns academic probation, a grade, or course evaluation, it is submitted to the associate dean of graduate programs in the college. If, however, the appeal concerns a grade or course evaluation for a course taken in a college other than CAMD, refer to and follow the grade appeal policy for that college (individual college appeal procedures can be viewed within the college's section of this catalog). If a student wishes to dispute a grade in their final term, this must be done within 28 calendar days of degree conferral date.

STEP 3: ASSOCIATE DEAN OF GRADUATE PROGRAMS-LEVEL RESOLUTION

The associate dean of graduate programs shall respond to the student in writing, including specific instructions for the student to seek an informal resolution to the matter, unless such a course of action as outlined by the student in the Statement is demonstrably futile. A copy of this response shall be sent to the graduate program coordinator/director and department chairperson of the appropriate unit. If the student has failed to achieve relief through an informal resolution, the associate dean of graduate programs shall discuss the matter with the department chairperson or equivalent supervisor, who shall attempt to affect an informal resolution. In this case, the student shall also have the right to discuss the matter with the chairperson, or equivalent supervisor, in which department the faculty member involved in the matter serves.

If the appeal involves allegations of prohibited harassment or discrimination, the associate dean of graduate programs shall consult with the OUEC before responding and shall, as part of this response, explain the role that the OUEC will play in Steps 4 and 5 of this procedure.

STEP 4: COLLEGE-LEVEL APPEAL

If the student is not satisfied with the disposition of the matter at Step 3, they may proceed with the appeal through the college's established academic appeals procedure. The dean or the academic standing committee, as applicable, must provide the student and the involved faculty member with a written report of their/its finding(s) and decision.

- This step involves a review by a college academic standing committee making the recommendation to the dean. The student may obtain a copy of the operating rules of the academic standing committee from the dean or their designee.
- In appeals involving allegations of prohibited harassment or discrimination, the dean or academic standing committee shall receive a report of the findings of the investigation of the OUEC. The dean or committee shall be without authority to reverse or modify the OUEC finding(s) or resolution and, instead, shall work to resolve the remaining academic appeal issue(s).

STEP 5: UNIVERSITY-LEVEL APPEAL

If the student is not satisfied with the college's disposition of the matter, or if the appeal is not resolved within 35 calendar days after having been submitted to the associate dean of graduate programs pursuant to Step 2, they may appeal the matter to the university level. The student shall submit a request in writing, within 10 calendar days of the finding of the college in Step 4, that the university convene the Academic Appeals Resolution Committee to review the issue. This committee has been designated as the final authority on these matters. Please refer to Academic Appeals Policies and Procedures (p. 133) in the graduate section of this catalog for information about this process.

Graduate Student Classification

Regular Student

Those students who are admitted to a degree program.

Conditional Student

Students whose admissions files are missing documentation. A student who has not provided required documentation for admission by the due date for final grades for the student's first academic term will not be permitted to register for a future term.

Special Student

Special students are enrolled on a part-time basis (no more than 6 semester hours per semester). Credit can be earned for a maximum of 12 semester hours over time. Students interested in taking more than 12 semester hours must make a formal application to the degree program through Northeastern University's online application portal (<https://camd.northeastern.edu/apply/>). Special students who do not register for four consecutive semesters (excluding summer semester) will be subject to review and possible withdrawal by CAMD graduate studies.

Student Status

For academic purposes, a graduate student is considered a full-time student if enrolled in a minimum of 8 semester hours of credit for the semester, with the following exceptions:

- A student is considered full time if enrolled in a full-time co-op (p. 137).
- Students enrolled in PhD program Dissertation or PhD program Dissertation Continuation are considered full time.

Note: Full-time status may be defined differently for federal loan purposes. For information, contact Student Financial Services (<https://studentfinance.northeastern.edu/>), 617.373.5899.

Master's Degree Policies

The College of Arts, Media and Design graduate studies sets minimum standards for all students to fulfill. In addition, departments and programs may have requirements that exceed the standards outlined below.

A candidate for the master's degree must complete a minimum of 30 semester hours of graduate-level coursework and such other study as may be required by the department in which the student is registered. To qualify for the degree, a minimum cumulative grade-point average of 3.000, equivalent to a grade of B, must be obtained. This average will be calculated each semester. A student who does not make satisfactory progress toward degree requirements, as specified by the individual department, may be terminated from the program.

To maintain current student status within CAMD, graduate students must make satisfactory progress in their degree, including working toward the graduation requirement of a GPA of 3.000 and the timely completion of coursework. See the university policy Minimum Cumulative GPA (p. 141).

All students must be registered in the last semester of their program. Any student who does not attend Northeastern University for a period of one year will be required to apply for readmission.

Electives

No more than 8 semester hours of electives may be taken outside of CAMD. Any additional non-CAMD elective hours will not count toward the degree.

Graduate Student Scholarship

Students who are registered in degree programs are eligible for a CAMD Graduate Student Scholarship. Award recipients will receive an official award letter from CAMD graduate studies. Pay attention to this letter as it is an official contract that should be read carefully. The GSS is contingent on satisfactory academic progress toward the degree and meeting department-specific guidelines. Recipients must be in full-time status and be registered for a minimum of 8 semester hours. Note, however, that recipients remain eligible for the GSS in their final semester even if they are enrolled in less than 8 semester hours. Receipt of financial support administered by CAMD graduate studies requires that all students receiving awards must maintain a 3.000 cumulative GPA. Students whose cumulative GPA is below 3.000 will be placed on academic probationary status and are not eligible to receive the award while on probation. The GSS can be reactivated by raising the cumulative GPA to 3.000 in the subsequent semester; students who do not meet the minimum GPA requirement at the end of the next semester cannot receive additional probationary periods.

Leave of Absence

Full-time students who are not involved in any academic endeavor for a period of time are required to petition the manager of student services, through their department, for a leave of absence (p. 120) by completing the leave of absence petition through the Student Hub (<https://me.northeastern.edu/>). CAMD graduate studies will not accept retroactive leave requests. Note that if a student is requesting a leave for medical reasons, students should contact University Health and Counseling Services (<https://uhcs.northeastern.edu/>). Leaves of absence generally are not approved for more than one calendar year at a time. International students must consult with an advisor at the Office of Global Services (<https://international.northeastern.edu/ogs/>) for proper guidance. Leaves of absence are not appropriate for master's degree students who are working on a thesis but are away from the Northeastern campus. Except in the case of medical leaves, being on an approved leave of absence does not extend the amount of time allowed for degree completion or the makeup of incomplete grades.

Time Limitation

For the master's degree, course credits earned in the program of graduate study are valid for a maximum of seven years.

If a student wishes to apply for an extension of the time limit, they must submit a petition to their department of study. The petition must include a detailed plan for completion of all remaining degree requirements. In the case of time-limit extension requests for master's degree coursework, the department must certify that the content of each of the courses has not changed since the time the student completed the course. If deemed appropriate, the department will recommend approval of the extension to CAMD graduate studies.

Changes in Requirements

The continuing development of CAMD graduate studies forces regular revision of curricula. When no hardship is imposed on the student because of changes and the facilities (e.g., equipment, technology, studios, etc.) of the college permits, the student is encouraged to meet the more recent program requirements. This requires application to change the catalog term of the student's program of study. To accomplish this, the student's advisor can assist the student with the process of applying to change catalog term. However, if it can be demonstrated that doing so imposes a substantial hardship, the requirements of the year in which the student matriculated will be applicable.

Thesis

Theses are required in some programs and should demonstrate the individual's capacity to execute independent work based on original material. Registration for the thesis course is required. Theses must be approved by the departmental graduate committee and must receive a grade of B (3.000) or better to be accepted. Students who have not completed their thesis after having registered for the specified number of thesis credits must register and pay for Thesis Continuation.

School of Architecture

Website (<https://camd.northeastern.edu/architecture/>)

Daniel Adams, MArch

Associate Professor and Director of the School of Architecture
617.373.4637
da.adams@northeastern.edu

Master of Architecture

Northeastern University offers a Master of Architecture degree accredited by the National Architectural Accrediting Board (<http://www.naab.org>).

The program leverages the school's outstanding faculty and pragmatically grounded curriculum. The physical and cultural context of Boston serves as a laboratory for the program's design studios and is design focused but with a different approach than many schools. We find opportunities for innovation within the real estate and construction industries and current policy debates—rather than outside them. This is how we intend to move architects to the center of the discussion about the future of our cities.

Students take courses in urban housing, practice-integrated design, and do original research on market-driven building types. The final degree project in the design studio offers an opportunity to leverage this research with real innovations in hybrid types, strategic alterations to existing ones, and to take on the challenge of finding prototypical solutions for systemic problems.

In addition to studio courses, graduate students take seminars in architectural theory and design strategy; and electives are available in real estate development, sustainable building techniques, urban landscape, and other topics. There is also a unique course that looks at case studies of architecture firms in practice, problem solving, and innovation. We seek to have students leave our program with a unique balance of technical, theoretical, and strategic tools to make a real difference in the profession.

Programs

Master of Architecture (MArch)

- One-Year Program (p. 198) (Boston)
- Two-Year Program (p. 199) (Boston)
- Three-Year Program (p. 202) (Boston)
- Three-Year Program—Advanced Degree Entrance (p. 205) (Boston)

Master of Design for Sustainable Urban Environments (MDes-SUEN)

Admissions to these programs have been suspended.

- One-Year Program (p. 209) (Boston)
- Two-Year Program (p. 209) (Boston)

Master of Architecture—One-Year Program (Boston)

This program gives eligible candidates the opportunity to get a NAAB-accredited (<http://www.naab.org>) Master of Architecture degree in one year.

Open to candidates with either a Bachelor of Science in Architecture from Northeastern University or a professional Bachelor of Architecture degree from an accredited North American program with at least one year of IDP-approved professional experience.

Students engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students' design projects. This final degree project

parallels an in-depth two-semester professional practice sequence that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Master of Architecture—Two-Year Program (Boston)

This program offers students who have earned a Bachelor of Science in Architecture from an institution other than Northeastern University to engage in the urban-focused curriculum that is offered at the School of Architecture. Students are awarded a MArch degree, which is NAAB-accredited (<http://www.naab.org>).

Year One

Urban Architecture Studio (ARCH 6115) engages students with a series of design interventions to improve our public realm. Students have the opportunity to learn about timely issues, including decarbonization and adaptive reuse, at the scale of the human, material, building, and urban networks.

Option Studio (ARCH 5115) offers topical content that best aligns with the research and practice expertise of the faculty, which provides students with the latest concepts in architectural design, theory, and research on a consistently updated and rotating basis. Students select their top choices of studio topics and instructors, giving them more flexibility in the areas for which they would like to focus their education. Additionally, students take classes in technology as well as architecture seminars and electives.

Year Two

Integration Studio (ARCH 7120) and Integrated Building Systems (ARCH 7220) encourage students to explore the theories and practices of integrating building systems, their detailing and assembly, to create high-performing, long-lasting, and humane architecture. These courses offer students an opportunity to draw on the full range of their prior architectural education to produce a design that synthesizes specific criteria to build sustainable and culturally valuable environments for generations of human use.

In the final year, students also engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty. In the fall semester, students study contemporary research strategies and ethics in architecture, landscape, and urbanism, giving them the opportunity to formulate original approaches to design thinking and research. This research will serve as the basis of the intellectual framework for the individual students' design projects in the spring semester. This final degree project parallels an in-depth professional practice course that analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Building and Environment		
ARCH 5210	Environmental Systems	4
ARCH 7220	Integrated Building Systems	4
Studio

Master of Architecture—Three-Year Program (Boston)

Open to candidates who do not have a Bachelor of Science in Architecture or equivalent.

Applicants from all disciplines are welcome. Those who have some architecture coursework may be eligible for advanced placement.

The program requires three years of study. Students have the option to pursue a summer co-op opportunity managed by Northeastern University's co-op program.

After completing a first-year introductory curriculum, students in the three-year program merge into the two-year MArch curriculum. This is a NAAB-accredited (<http://www.naab.org>) degree program.

Year One

In the first year, students take intensive studios, technology classes, and architectural history classes to immerse them in the studio culture of the school and to give them a strong foundation to begin the upper-level studios. The introductory graduate skills and design studios are specifically designed for the students in this program who do not have experience doing architectural drawing and designing. Students complete a series of projects that will give them an opportunity to develop the skills and the critical thinking needed in the graduate curriculum.

Year Two

Students continue to develop their core skills in the Urban Architecture Studio. In the spring semester, the Option Studio offers topical content that best aligns with the research and practice expertise of the faculty, which provides students with the latest concepts in architectural design, theory, and research on a consistently updated and rotating basis. Students select their top choices of studio topics and instructors, giving them more flexibility in the areas for which they would like to focus their education.

Year Three

In the final year, the Integration Studio in the fall semester challenges students to consider architectural connections at all scales, from architectural detail, to architectural systems, to the whole building and its urban context. Students also engage in a two-semester research and design project based on pertinent contemporary topics chosen by the graduate faculty, or students may propose an independent research and design project. Team research is conducted and compiled into online and physical research books. This body of compiled research then becomes the basis of the intellectual framework for the individual students' design projects. This final degree project parallels an in-depth professional practice course that

analyzes all of the contingencies of successful architectural projects, including architectural offices and their project management strategies, real estate development criteria, and associated project finance.

Total Hours: 100**Master of Architecture—Three-Year Program—Advanced Degree Entrance (Boston)**

The Master of Architecture, Three-Year Program with Advanced Entry is open to applicants who have not earned a Bachelor of Science in Architecture or an equivalent degree but have some background in architectural studies or engineering. The program carries the same requirements as the Master of Architecture, Three-Year Program except that 4–20 semester hours of first-year coursework will be waived at the discretion of the program director, in consultation with program faculty members, based on the applicant's prior coursework, academic transcript, and portfolio or work samples.

This is an NAAB-accredited (<http://www.naab.org/>) degree program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Foundation Courses

Students may be required to complete up to 16 semester hours of foundation coursework as determined by the program advisor, based on the applicant's prior coursework, academic transcript, and portfolio or work samples. Waivers are determined by the faculty; students should consult with their advisors.

Code	Title	Hours
History		
ARCH 2340	Modern Architecture	4
ARCH 5340	Architectural and Urban Histories	4
Building, Design, and Environment

Any 5000-level or above PPUA course		

ELECTIVES OPTION

Code	Title	Hours
Required Electives		
Complete 12 semester hours of non-ARCH courses (required).		12
Optional Electives		
Complete up to 8 additional semester hours.		8

Plan of Study**Sample Plan of Study**

All students in this program must complete a minimum of 8 semester hours per semester in the first year.

Note: This sample plan of study presumes that the Modern Architecture (ARCH 2340) and Recitation for ARCH 2340 (ARCH 2341) requirements of the Master of Architecture, Three-Year Program have been waived based on the applicant's prior coursework and portfolio or work samples. These two courses would otherwise be completed in Year 1 spring in the standard Master of Architecture, Three-Year program. Given the waiver of those requirements, the student will complete the Master of Architecture, Three-Year Program with Advanced Entry at 96 semester hours of study, in comparison to the 100 semester hours of study required for the Master of Architecture, Three-Year Program.

Year 1			
Fall	Hours	Spring	Hours
ARCH 2240		4 ARCH 3450	4
ARCH 5340		4 ARCH 6200	6

Sustainable Urban Environments, MDes—One-Year Program (Boston)

Admissions to this program have been suspended.

The one-year Master of Design for Sustainable Urban Environments (MDes-SUEN) is open to students holding an accredited, first-professional degree in landscape architecture, architecture, planning, or urban design. The 36-credit program offers a core sequence of advanced design research studios, proseminars, and urban ecology and technology workshops complemented by interdisciplinary electives.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code Studio	Title	Hours
SUEN 7130	Master's Research Studio: Design and the Resilient City	6
SUEN 7140	Master's Research Studio: Master's Project	6
Proseminar		
Complete 8 semester hours from the following (repeatable) courses:		8
SUEN 7320	Pro-Seminar: Issues in Designed Urban Environments	
SUEN 6340	Topics in Urban Environmental Design	
Technology		
SUEN 7230	Urban Ecologies and Technologies 1	4
SUEN 7240	Urban Ecologies and Technologies 2	4

Electives

Electives in other disciplines may be taken in consultation with your faculty adviser.

Code	Title	Hours
Complete 8 semester hours from the following subject areas:		8
SUEN, ARCH, LARC, PPUA, LPSC, and SBSY		

Program Credit/GPA Requirements

36 total semester hours required

Minimum 3.000 GPA required

Plan of Study

Year 1			
Fall	Hours	Spring	Hours
SUEN 7130		6 SUEN 7140 (or co-op*)	6
SUEN 7230		4 SUEN 7240	4
SUEN 7320 or 6340		4 SUEN 7320	4
Elective (required)		4 Elective (required)	4
		18	18

Total Hours: 36

*Students may opt to do a graduate co-op. Co-op does not count toward degree credits.

Sustainable Urban Environments, MDes—Two-Year Program (Boston)

Admissions to this program have been suspended.

The two-year Master of Design for Sustainable Urban Environments (MDes-SUEN) is open to students entering with a bachelor's degree in any field. The 64-credit program provides a full year of core skill sets including design; site analysis, implementation, and visualization; history/theory; and policy. This includes introduction to basic earthworks, water, and plants systems as well as the principles of landscape and urban ecology.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Studio		
SUEN 6110	Graduate Studio 1: Sustainable Urban Sites	6
SUEN 6120	Graduate Studio 2: Sustainable Urban Systems	6
SUEN 7130	Master's Research Studio: Design and the Resilient City	6
SUEN 7140	Master's Research Studio: Master's Project	6
Cities: Design and Planning		
SUEN 6310	Cities, Nature, and Design in Contemporary History and Theory	4
LPSC 7312	Cities, Sustainability, and Climate Change	4
Proseminar

The graduate programs in the Department of Art + Design are designed to cultivate capacity and fluency in a range of disciplines and practices to create and deliver value and benefit for an increasingly connected and diverse world. Spanning many subjects, interests, and intentions across disparate fields and manifold practices of art, media, and design, our master's and certificate programs will challenge and inspire you to push the boundaries of cultural production and stewardship and social and civic impact. We strive to empower you to bring your ideas to life through design conversations, media making, and artistic expression and enjoy richly rewarding careers and lives.

Programs

Master of Fine Arts (MFA)

- Experience Design (p. 211) (Boston)
- Information Design and Data Visualization (p. 213) (Boston)

Master of Science (MS)

- Experience Design (p. 215) (Boston)
- Game Science and Design (p. 217) (Boston)
- Game Science and Design (p. 219) (Oakland)
- Information Design and Data Visualization (p. 221) (Boston)
- Information Design and Data Visualization (p. 222) (Vancouver)
- Media Innovation and Data Communication (p. 223) (Boston)

Graduate Certificate

- Experience Design (p. 225) (Boston)
- Game Experience Design (p. 225) (Boston)
- Game Science (p. 226) (Boston)
- Information Design and Visualization (p. 227) (Boston)
- Product Management (p. 192) (Boston)

Experience Design, MFA (Boston)

The Master of Fine Arts in Experience Design embraces research-driven design thinking for entrepreneurship, innovation, and other areas, preparing students to be vital contributors and leaders at the intersection of innovation and design.

Experience design is a holistic and integrative approach to design that utilizes investigation into the human experience in specific situations to improve its quality, given an understanding of human goals, needs, and desires. For example, in the context of healthcare, an experience designer does not focus on the design of any one technology product, information system, or physical space. Instead, the designer is charged with understanding and improving the overall sequence of events that impact the patient before and during a hospital stay as well as through follow-up care.

The experience design program moves beyond design thinking to produce outcomes that demonstrate the value of human-centered research and design methods. It draws on findings from a range of professional and scholarly disciplines (including business, psychology, human-computer interaction, engineering, cybernetics) to understand and shape specific situations. It extends across many industries and aspects of life: healthcare, technology, services, travel, education, entertainment, shopping, dining, and the nature of work itself.

Through examining how people behave in a real context in relation to emerging technologies, the Master of Fine Arts in Experience Design allows graduates from design and related disciplines (such as communications, computer science, business, architecture, art, journalism, humanities, and the social sciences) to gain knowledge and experience in the design competencies. To accomplish these goals, students study how to invoke cooperation, collaboration, and integration across disciplines and practices.

The Master of Fine Arts in Experience Design seeks to prepare students to be vital contributors and leaders of professional experience design teams where technological innovation intersects with design. Successful graduates should be able to analyze how people undergo real-world situations, enabling them to enrich experience by orchestrating new design-driven relationships. They will be equipped with the skills to identify shortcomings as well as opportunities for improved engagement between systems and elements—virtual or physical—with the humans who encounter them.

Information Design and Data Visualization, MFA (Boston)

The Master of Fine Arts in Information Design and Data Visualization program uniquely combines design training and analytical methods with distinctive approaches to theoretical, visual, and technical aspects of visual communication. Successful graduates gain expertise in the visual and technological languages of data, applying modes of visual cognition, and using analytics tools to create interactive, data-driven communication and installations.

This design-centric program seeks to prepare graduates to collaborate across a variety of fields and settings, crossing the bridge between technology, public communication, and systems design. Successful graduates are prepared to be professional information designers and data visualization experts in design agencies, research institutions, industry, and public institutions, able to lead and collaborate in this dynamic and burgeoning interdisciplinary field of practice and research. Students also are well positioned to pursue PhDs and academic careers. Students have the unique advantage of studying at a major research university known for interdisciplinary collaboration located in Boston—a global center for technology, science, education, and culture—offering diverse opportunities for practice and research in information design and data visualization.

The MFA-IDDV curriculum includes studio courses and seminars in graphic, information, and interaction design; creative inquiry; research methodologies; data literacies; and visualization technologies. It integrates faculty instruction with visiting artists and researchers. The degree requires 60 credit hours over two academic years, with an option to engage in Northeastern's renowned co-op program. A thesis project, a written thesis, and an accompanying work exhibition in the thesis show are required.

Learn more about IDDV projects, students, and faculty at Information Design and Data Visualization (<http://northeastern.edu/visualization/>).

Experience Design, MS (Boston)

The Master of Science in Experience Design embraces research-driven design thinking for entrepreneurship, innovation, and other areas, preparing students to be vital contributors and leaders at the intersection of innovation and design.

Experience design is a holistic and integrative approach to design that utilizes investigation into the human experience in specific situations to improve its quality, given an understanding of human goals, needs, and desires. For example, in the context of healthcare, an experience designer does

not focus on the design of any one technology product, information system, or physical space. Instead, the designer is charged with understanding and improving the overall sequence of events that impact the patient before and during a hospital stay as well as through follow-up care.

The experience design program moves beyond design thinking to produce outcomes that demonstrate the value of human-centered research and design methods. It draws on findings from a range of professional and scholarly disciplines (including business, psychology, human-computer interaction, engineering, cybernetics) to understand and shape specific situations. It extends across many industries and aspects of life: healthcare, technology, services, travel, education, entertainment, shopping, dining, and the nature of work itself.

Through examining how people behave in a real context in relation to emerging technologies, the Master of Science in Experience Design allows graduates from design and related disciplines (such as communications, computer science, business, architecture, art, journalism, humanities, and the social sciences) to gain knowledge and experience in the design competencies. To accomplish these goals, students study how to invoke cooperation, collaboration, and integration across disciplines and practices.

The Master of Science in Experience Design seeks to prepare students to be vital contributors and leaders of professional experience design teams where technological innovation intersects with design. Successful graduates should be able to analyze how people undergo real-world situations, enabling them to enrich experience by orchestrating new design-driven relationships. They will be equipped with the skills to identify shortcomings as well as opportunities for improved engagement between systems and elements—virtual or physical—with the humans who encounter them.

The MS degree is intended for graduate students from related fields—media, design, communications, data science, and more—who would like to acquire competencies in experience design to complement their skills and address their professional needs. Embedded in the course offering of our Master of Fine Arts in Experience Design (p. 211) program, students in the MS program will have the opportunity to join MFA students for activities such as attending guest lectures and workshops.

16		16

Total Hours: 32

*Students may opt to do a graduate co-op. Co-op does not count toward credits required for the degree.

Game Science and Design, MS (Boston)

The Master of Science (MS) in Game Science and Design is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Successful graduates who wish to become professional game developers or game user research experts should be able to collaborate effectively in this dynamic and burgeoning field of practice and research. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that makes products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; augmented and virtual reality; as well as games in health, education, and training. Rapid innovations are happening in player psychology, middleware, graphics and authoring tools, game mechanics, and artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, the game industry needs professionals with interdisciplinary skill sets who can blend knowledge about development with knowledge about evaluation methods and players' behavior and psychology.

Jointly offered by Northeastern's College of Arts, Media and Design and Khoury College of Computer Sciences (<https://www.khoury.northeastern.edu/>), the **Master of Science in Game Science and Design** is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-semester-hours program.

All admitted students will be assigned to an advisor who will help them select a pathway with a coherent set of electives depending on their career goals. The advisor will also monitor their progress through the master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
GSND 5122	Business Models in the Game Industry	1
GSND 5130	Mixed Research Methods for Games	4
Thesis		
Students complete Games Project, then select either Thesis or a second completion of Games Project, in consultation with the program coordinator.		
GSND 7995	Games Project	4
<i>Thesis Conclusion</i>		
Complete an additional 4 Semester Hours from the following:		4
GSND 7990	Thesis	
GSND 7995	Games Project	

Core Electives

Code	Title	Hours
Game Design		
Complete one of the following:		4

Information Design and Data Visualization, MS (Boston)

The Master of Science in Information Design and Data Visualization is a two-semester research- and analysis-oriented program focusing on visual interfaces to communicate and explore digital information. Graduates may become professional information designers and data visualization experts able to collaborate effectively in this dynamic and burgeoning field of practice and research, prepared to work in data-driven areas including design, technology, business, health, education, and public institutions. The curriculum is designed to train students in design principles, critical inquiry, and the analytical and creative practices needed to assume leadership roles in an evolving interdisciplinary field. Coursework focuses on the translation of data and information into visual languages and the integration of theoretical, cognitive, and technical aspects of visualizations that engage a broad range of audiences. From this master's program, students have multiple options to expand their advanced studies along diverse avenues, including adding graduate certificates in related topics such as user analytics, data analytics, experience design, and cultural entrepreneurship; engaging in co-op opportunities; and applying to proceed academically into a terminal Master of Fine Arts degree.

Media Innovation and Data Communication, MS (Boston)

The Master of Science will offer a distinctive approach to knowledge and innovation in media fields, an approach rooted in the rigor of professional journalism—with its emphasis on empowered knowledge acquisition, empirical verification, and storytelling in the public interest—but one keenly attuned to emerging, data-driven technologies and their potential. The program capitalizes on the revolution in data storytelling and computational methods in media work; the rapid evolution in video, animation, and augmented/virtual reality technologies; and social networks and digital analytics. Our graduates will be prepared to become leaders in media firms and outlets engaged with cutting-edge technologies and innovative digital startups, as well as a broad range of media and communications organizations across the rapidly evolving digital economy.

Experience Design, Graduate Certificate (Boston)

The Graduate Certificate in Experience Design embraces research-driven design thinking for entrepreneurship, innovation, and other areas, preparing students to be vital contributors and leaders at the intersection of innovation and design.

Experience design is a holistic and integrative approach to design that utilizes investigation into the human experience in specific situations to improve its quality, given an understanding of human goals, needs, and desires. For example, in the context of healthcare, an experience designer does not focus on the design of any one technology product, information system, or physical space. Instead, the designer is charged with understanding and improving the overall sequence of events that impact the patient before and during a hospital stay as well as through follow-up care.

The Graduate Certificate in Experience Design moves beyond design thinking to produce outcomes that demonstrate the value of human-centered research and design methods. It draws on findings from a range of professional and scholarly disciplines (including business, psychology, human-computer interaction, engineering, cybernetics) to understand and shape specific situations. It extends across many industries and aspects of life: healthcare, technology, services, travel, education, entertainment, shopping, dining, and the nature of work itself.

Through examining how people behave in a *real* context in relation to emerging technologies, the Graduate Certificate in Experience Design allows working professionals or graduates from design and related disciplines (such as communications, computer science, business, architecture, art, journalism, humanities, and the social sciences) to gain knowledge and experience in the design competencies. To accomplish these goals, students need to learn how to invoke cooperation, collaboration, and integration across disciplines and practices.

The Graduate Certificate in Experience Design is designed to prepare students to be vital contributors and leaders of professional experience design teams where technological innovation intersects with design. Successful graduates will be able to analyze how people undergo real-world situations, enabling them to enrich experience by orchestrating new design-driven relationships. They will be equipped with the skills to identify shortcomings as well as opportunities for improved engagement between systems and elements—virtual or physical—with the humans who encounter them.

The certificate is intended for practitioners and graduate students from related fields—media, design, communications, data science, and more—who would like to acquire competencies in experience design to complement their skills and address their professional needs. Embedded in the course offering of our Master of Fine Arts in Experience Design (p. 211) program, students in the certificate program will have the opportunity to join MFA students for activities such as attending guest lectures and workshops.

Game Experience Design, Graduate Certificate (Boston)

The Graduate Certificate in Game Experience Design offers training in the skills, tools, and methods needed to design successful game products, including social and mobile gaming; augmented and virtual reality; as well as games for health, education, and science. Students gain hands-on experience in designing games under faculty with industry expertise in game design. Game design courses focus on innovation; societal impact; and player-centric, experiential design approaches. The Graduate Certificate in Game Experience Design is a one-year, 17-semester-hour program. Upon

successful completion of the certificate, students can opt to apply to the Master of Science in Game Science and Design and, if accepted, may apply credits gained through the certificate to requirements of that degree program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
GSND 5110 and GSND 5111 and GSND 5112	Game Design and Analysis and Seminar for GSND 5110 and Recitation for GSND 5110	5
GSND 5130	Mixed Research Methods for Games	4

17 total semester hours required

Minimum 3.000 GPA required

Game Science, Graduate Certificate (Boston)

The Graduate Certificate in Game Science offers training in assessing, tracking, and analyzing player experience using game analytics methods and techniques, biometrics, and research methods including interviews and surveys. Students gain hands-on experience with these methods and techniques under faculty guidance with industry experts in game science. The game development process has shifted from “design, develop, release” to “design, develop, release, and continuously fine-tune based on user data.” Game science plays a critical role in this new process. The Graduate Certificate in Game Science is a one-year, 17-semester-hour program. Upon successful completion of the certificate, students can opt to apply to the Master of Science in Game Science and Design and, if accepted, transfer credits gained through the certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Information Design and Visualization, Graduate Certificate (Boston)

The Graduate Certificate in Information Design and Visualization focuses on the data-driven analytical and visual design of information, preparing students to communicate visually while engaging advanced data analytics to produce meaningful information environments.

Graduates of the certificate program are professionals who are prepared to tackle new information communication challenges and communicate and collaborate with researchers in a variety of fields, as well as stakeholders and the public. Throughout the course of the program, students master how to think visually, while also learning how to produce effective, meaningful visual information from various sources of data.

The certificate is intended for practitioners and graduate students from related fields—media, design, communications, data science, and more—who would like to acquire competencies in information design and data visualization to complement their skills and address their professional needs. Embedded in the course offering of our Master of Fine Arts in Information Design and Data Visualization (p. 213) program, students in the certificate program have the opportunity to join MFA students for activities such as attending guest lectures and workshops.

Product Management, Graduate Certificate (Boston)

The Graduate Certificate in Product Management is designed for students with undergraduate degrees in a wide range of fields—including computer science, engineering, economics, business administration, design, and psychology—who want to build the skills necessary for success as product managers. This certificate equips students with the expertise to excel in this dynamic field, whether they are early career professionals, transitioning into product roles, or looking to differentiate themselves in a competitive job market. The program provides a flexible, cost-effective alternative to a full MS program while offering hands-on learning experiences.

Curriculum and Structure

This interdisciplinary certificate offers a structured yet adaptable curriculum that balances foundational knowledge with practical, industry-relevant skills.

The program consists of four courses (12–13 semester hours total):

- Three core courses covering fundamental concepts across key product management functions
- One experiential course (1 credit) providing hands-on learning opportunities tailored to students’ backgrounds and career goals in product management

This certificate allows students to gain real-world experience, develop in-demand skills, and enhance their career opportunities within a streamlined, flexible structure.

Admissions and College Affiliation

Students are admitted to the certificate program through one of the following colleges and follow the academic policies of their home college:

- College of Arts, Media and Design
- College of Engineering
- D’Amore-McKim School of Business
- Office of the Provost and College of Professional Studies¹

This certificate provides a fast, flexible, and practical pathway for students looking to build expertise in product management while benefiting from Northeastern University’s strong academic and professional support network.

¹ Program Structure and Transition

- For the 2025–2026 academic year, the Graduate Certificate in Product Management is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern’s graduate academic calendar and be governed by the academic policies and procedures outlined in the university’s *Graduate Catalog*.
- While designated under the Office of the Provost, students will receive full academic and student support services from the College of Professional Studies including academic advising, co-op and career advising, and access to the International Tutoring Center.
- Beginning in the 2026–2027 academic year, the certificate program will transition fully to the College of Professional Studies. At that time, students will be officially designated under CPS in the academic system of record and governed by its academic policies as outlined in the university’s *Graduate Catalog*.

Welcome to the graduate program at Northeastern University's Department of Communication Studies. Our department offers one degree: the Master of Science in Media, Technology, and Ethics.

Through a combination of empirical analysis and problem solving, the Master of Science in Media, Technology, and Ethics program enables students to wrestle with the ethical and communicative dimensions of new technology. Its interdisciplinary approach highlights the need to continually think about technological developments in the context of democracy, politics, and civic engagement through the situated analysis of new developments in technology, data, and communication practices. The program examines the ethical, communicative, and political issues raised by data-driven technologies as well as the foundational knowledge, intellectual creativity, and practical skills to address them.

School of Journalism

Website (<https://camd.northeastern.edu/journalism/>)

Jonathan Kaufman, MA

Professor and Director

617.373.3236

Welcome to the graduate programs at Northeastern University's School of Journalism. Our school offers three degrees: a Master of Arts in Journalism, a Master of Science in Media Innovation and Data Communication, and a Master of Science in Media Advocacy.

The Master of Arts in Journalism degree is designed to merge traditional journalism with the latest technology. Students new to the field or those with experience can choose one of two tracks—professional journalism or media innovation—to prepare them for the challenges faced by legacy and new media in the digital age. The Master of Science in Media Innovation and Data Communication degree focuses on new forms of data-driven media practice, creative digital storytelling, and strategies for fostering innovation in media fields. The Master of Science in Media Advocacy degree is designed to teach strategic advocacy skills and prepare graduates to succeed as resilient, media-empowered citizens in a global society. Moreover, these programs offer students hands-on training in preparation for careers in reporting, editing, multimedia design and production, social media, and data journalism.

As part of Northeastern's College of Arts, Media and Design, our graduate students are also part of an interdisciplinary and creative community. Our core curriculum is supplemented by electives that take advantage of course offerings from within our college and from other colleges in the university. And with our experiential education opportunities and outstanding co-op program, students do not have to wait until after graduation to begin developing skills as reporters, media advocates, or public relations professionals.

It is our goal to help you put your passion into practice. To that end, our graduate programs afford students the opportunity to study in Boston with a small and dedicated faculty of specialists with years of experience and extensive contacts in the media world.

Programs**Master of Arts (MA)**

- Journalism (p. 231) (Boston)

Master of Science (MS)

- Media Advocacy (p. 232) (Boston)
- Media Innovation and Data Communication (p. 223) (Boston)
- Media, Technology, and Ethics (p. 229) (Boston)

Journalism, MA (Boston)

The School of Journalism offers a dynamic Master of Arts degree that seeks to prepare students for the challenges faced by media organizations in the digital age. The degree trains students to become rigorous, ethical, and creative news reporters, editors, and content producers, as well as social media managers and video/audio specialists.

Both students new to the field and those with some experience can choose courses tailored to help them thrive in particular subject areas, such as criminal justice or climate change, or around specific technologies, such as podcasting or data visualization. Our programs are designed to merge the skills of professional journalism with knowledge of the latest information technologies.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
JRNL 6200	Enterprise Reporting 1	4
JRNL 6201	Enterprise Reporting 2	4
JRNL 6202	Perspectives on News Media Ethics and Diversity	4
JRNL 6340	Fundamentals of Digital Journalism	4

Electives

Code	Title	Hours
Complete 20 semester hours in the following range:		20
JRNL 5309 to JRNL 7976		
Courses from other disciplines may be taken in consultation with your faculty advisor.		
No more than two courses outside of CAMD may be taken.		

Program Credit/GPA Requirements

Total Hours: 37							

Media Advocacy, MS (Boston)

The Master of Science in Media Advocacy places particular focus on developing direct and indirect advocacy skills: that is, to influence government decision makers directly and to change minds indirectly through shifting public opinion. The program uniquely combines grounding in governmental structures and the legal system with sophisticated training in the latest communication techniques including social media, web communications, and videography, as well as data analytics and data-driven storytelling. Successful graduates will be empowered to promote the public agenda of employers ranging from mission-driven organizations, such as the ACLU or the Sierra Club, to industry leaders, such as hospitals and technology companies, to lobbying and strategic communications groups and political consulting firms.

Program Requirements**Core Requirements**

Code	Title	Hours

Media Innovation and Data Communication, MS (Boston)

The Master of Science will offer a distinctive approach to knowledge and innovation in media fields, an approach rooted in the rigor of professional journalism—with its emphasis on empowered knowledge acquisition, empirical verification, and storytelling in the public interest—but one keenly attuned to emerging, data-driven technologies and their potential. The program capitalizes on the revolution in data storytelling and computational methods in media work; the rapid evolution in video, animation, and augmented/virtual reality technologies; and social networks and digital analytics. Our graduates will be prepared to become leaders in media firms and outlets engaged with cutting-edge technologies and innovative digital startups, as well as a broad range of media and communications organizations across the rapidly evolving digital economy.

Interdisciplinary Programs

Welcome to interdisciplinary graduate studies in the College of Arts, Media and Design. Here you'll find courses and programs that embrace shared dialogue and experiential learning across creative fields. These interdisciplinary doctoral programs, master's programs, and graduate certificates place collaboration at the core of their mission, integrating frameworks, methods, and practices to support students in developing truly innovative approaches and outcomes. Our interdisciplinary degree and certificate options provide a strong foundation of use-inspired, experientially informed coursework and research opportunities.

The PhD in Interdisciplinary Design and Media offers an innovative, globally aware, human-centered approach to advanced graduate study, focusing on practice-based research and scholarship applied to or conducted through making or creation.

The Master of Science in Arts Administration and Cultural Entrepreneurship and graduate certificate programs give students foundational to advanced training in the skills and techniques essential to leading arts and culture organizations today, combining the human literacies of collaboration and communication with the technical basis of arts organizational visioning, planning, and sustainable management.

The Master of Science in Urban Planning and Policy program is jointly offered between the college's School of Architecture and the School of Public Policy and Urban Affairs within the College of Social Sciences and Humanities. The curriculum provides a strong foundational knowledge base and allows specialization into the closely related areas of sustainable urban planning and contemporary approaches to urban policy for global cities.

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality. The College of Arts, Media and Design partners closely with Bouvé College of Health Sciences, the College of Engineering, the D'Amore-McKim School of Business, and Khoury College of Computer Sciences to offer additional concentrations that provide breadth and depth of knowledge.

Programs

Doctor of Philosophy (PhD)

- Interdisciplinary Design and Media (Boston) (p. 237)
- Network Science (Boston) (p. 241)

Master of Science (MS)

- Arts Administration and Cultural Entrepreneurship (Boston) (p. 246)
- Creative Collaboration and Multidisciplinary Design (Boston) (p. 248)
- Extended Realities (Boston)
- Extended Realities (Oakland)
- Urban Planning and Policy (Boston) (p. 254)

Graduate Certificate

- AI Applications (Boston) (p. 190)
- Arts Administration (Boston) (p. 259)
- Cultural Entrepreneurship (Boston) (p. 259)
- Product Management (Boston) (p. 192)

Interdisciplinary Design and Media, PhD (Boston)

The PhD provides a rigorous, globally aware, practice-based, and human-centered approach to advanced scholarship. It aims to cultivate researcher-designers with a versatile repertoire of methods and a passion for applying those skills to the emerging epistemic perspective of integrated human, technological, and data frameworks within creative collaboration across disciplinary boundaries. The degree is designed to attract entrepreneurial self-starters who seek to break ground and invent new fields through hybrid and integrated approaches to knowledge creation.

The PhD emphasizes four pillars of excellence within a research culture:

- Engaging with the nature of human experience through innovative, interdisciplinary approaches to design
- Investigating new forms of digital media and data-driven communication across diverse disciplines
- Articulating how creativity can embrace connections between artistic practices, innovation, entrepreneurship, and research
- Connecting with changing forms of technology and media to foster shared experiences and exchange within local and global communities

The PhD is unique in its focus on practice-based research or scholarship applied to or conducted through making or creation. This is an emerging area that has been applied internationally to a wide range of creative fields and industries, many of which are represented within the College of Arts, Media and Design: music, theatre, design, studio art, games, architecture, journalism, and others. It differs from other forms of knowledge creation in that it rigorously cultivates the creation of artifacts as a mode of producing new knowledge, theories, and methodologies. Practice-based research integrates fields such as creativity and cognition or human-computer interaction to understand how practice operates, to enact that knowledge in practical applications, and to use the acts of creation themselves as a research methodology. PhD students will be encouraged to conduct their research in—and in some cases create—"living labs" embedded in real-world contexts and through on- and off-campus research partnerships.

The PhD degree program is composed of a common core and pathways of specialization. The core is centered around three areas: design research, which provides a methodology for understanding the ways design and media touch every aspect of daily life at every level of society; ethical practice, which engages with the humanistic concerns of design and cultural production; and experiential learning, which offers students the opportunity to produce research and conduct fieldwork with partner organizations.

Specialized pathways, customized according to the program of study as approved by the PhD advisors and vetted by external experts, include:

- Information design and visualization
- Design research
- Creative research

Degree Requirements

POSTBACCALAUREATE ENTRY

The PhD degree requires completion of at least 48 semester credit hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need five years to complete the program.

ADVANCED ENTRY

Students can petition for an advanced entry, which requires completion of at least 28 semester hours. Advanced entry requires an advanced degree (MS, MA, MFA, etc.) or extensive experience aligned with the research direction of the candidate. While students can qualify for advanced entry upon acceptance, the decision for students to continue in the advanced program is made after the first year, where they have to demonstrate that they do not need additional coursework and can complete the program in four years.

Qualifying Examination

The qualifying exam is a written and/or oral examination in the primary and secondary research fields that ensures the student is intimately familiar with the relevant scholarly work in their area of concentration. The pedagogical role is not in the examination itself but in the rigorous preparation of the primary and secondary fields by the student, approved by the advisor. Prior to the qualifying exam, the student prepares a document that outlines the selected primary and secondary fields, provides an overview of the current state of research, and assembles a list of relevant literature that will serve as the basis for the examination. The emphasis of the examination (for example, short essays, a lecture presenting a scholarly argument) is to be useful for the dissertation research. Typically, the student takes the qualifying examination during the second year.

Dissertation Proposal Defense

To ensure students complete satisfactory dissertations that are appropriate for their focus area(s), all students are required to submit and defend a dissertation proposal prior to advancing to candidacy. The dissertation proposal is a detailed document outlining the scholarly context, methods, arguments, and activities underpinning the dissertation. It will include a detailed research plan and timeline and is to be approved by the student's dissertation committee, which the student has to assemble in advance. The student then defends the accepted dissertation proposal in the context of the research seminar, inviting feedback from faculty and other students. The dissertation proposal defense is open to the entire CAMD PhD community and constitutes the last step before degree candidacy.

Degree Candidacy

A student is considered a PhD degree candidate after:

- Successfully completing core and specialization courses with a minimum of a 3.000 cumulative GPA and no grades lower than a B in core courses
- Passing the qualifying exam
- Submitting and successfully defending the dissertation proposal

Advising and Committee Formation

Each entering student will be assigned to a faculty advisor based on their interests who will guide students in completing their core requirements of their degree. Ideally, this person will also serve as their thesis committee chair, but they may transition to another committee chair as they transition into ABD status. As part of this process, in addition to their thesis committee chair, they will also be expected to identify two other readers representing their secondary and, if applicable, tertiary discipline areas. The advisory committee will be responsible for guiding the students through their individual research proposal process, helping them to develop a robust research methodology and clear plan for completion. The advisory committee will also be responsible for identifying an appropriate external expert to consult at key stages of degree progression. The advisors will also guide the students through the thesis project and its written component. Where applicable, committee members will also mentor and support the student through funded research.

Dissertation Defense

Each student will, with the aid of their advisor and committee, define the final product. The research component will typically consist of empirical and/or theoretical scholarship created using a methodology appropriate for the topic and field that is fully integrated with the practice component. The synergy between creative practice and research can take the form of knowledge production through a variety of potential means: production of digital and physical artifacts, software and hardware applications, games, paintings, documentaries, comics, exhibitions, design projects or products, theatrical productions, musical compositions, performances, or other formats. The work will include a written dissertation that can also be paired with other modes of conveyance, such as a documentary, demonstration, performance, or exhibition. A key function of the dissertation will be to contextualize the practical work in contemporary scholarship and discourse, clearly articulating its rationale and contribution to the field. Over the course of their studies, students are expected to produce peer-reviewed submissions based on their work.

The dissertation defense follows a similar format to the proposal defense. Acceptable dissertation models may include long-form (book-style) dissertations, multiple publishable papers, a system build-evaluate model, or other creative formats enumerated above.

Network Science, PhD (Boston)

The PhD in Network Science program aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is a multidisciplinary program, with members of the Northeastern University Network Science Institute (<https://www.networkscienceinstitute.org/>) representing a range of fields including computer science, information science, physics, complexity, sociology, communication, data visualization, organizational behavior, political science, population health, and epidemiology.

This doctoral program is a joint collaboration across five academic colleges. Students are admitted to the College of Social Sciences and Humanities and may choose to move to the home college of their dissertation advisor after they reach candidacy (once they pass their dissertation proposal/comprehensive exam). Students follow policies of their home college, including dissertation format and submission deadlines for graduation. Faculty supervisors may be from one of the following Northeastern academic colleges:

- College of Science
- College of Social Sciences and Humanities
- Khoury College of Computer Sciences
- Bouvé College of Health Sciences
- College of Arts, Media and Design

Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of elective courses relevant to the student's area of research. Electives should be discussed with the student's faculty advisor. A minimum of 40 semester hours of coursework is required, though the faculty advisor or program committee may recommend additional coursework based on student research skills.

Alternative Course Path

Students have the option to complete core coursework in their first year of study. This curriculum pathway is expected to be taken by students whose admitting advisor is located outside of the Boston campus and elsewhere in the Northeastern network.

Annual Review

A review of satisfactory progress will be ongoing and formally evaluated at the end of each academic year. Students must maintain a cumulative grade-point average of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain a 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for dismissal by the graduate program committee.

As part of the annual review process, the students will be asked to submit a summary of completed and future courses and research. Students will submit to the program committee:

- A list of courses completed in the last academic year and course plan for the following year
- A short synopsis of their research progress and research plans for the next year

Qualifying Examination

The qualifying exam is an hour-long oral examination of the material covered in the core curriculum and consists of questions selected by network science faculty. One month prior to the exam., students receive between 50 to 80 study questions to prepare. Students will be asked to give a short presentation of their research plans, followed by an oral exam where the qualifying exam panel will ask a subset of the review questions.

Students must take the exam by the fall semester of their third year. If students fail the qualifying exam on their first attempt, they may retake the exam in the following semester. Students who do not pass the exam after two attempts will be asked to leave the program.¹

Dissertation Committee

Students must confirm their dissertation advisor by the end of their second year. The dissertation advisor must be a full-time, tenured, tenure-track, research, or teaching faculty member of Northeastern. The advisor should be a network science doctoral program faculty member, unless the student receives approval by the network science program committee.

Students must confirm their dissertation committee prior to their comprehensive exam. The committee must consist of a minimum of four members:

1. A dissertation advisor
2. A core member of the Network Science Institute faculty
3. An additional tenured/tenure-track, research, or teaching faculty member from the Network Science Institute or other Northeastern faculty approved by the advisor and program committee
4. One member recognized as an expert in the specific topic of research, who can be external to Northeastern.

Dissertation Proposal (Comprehensive Examination)

The comprehensive exam should be completed in the student's fourth year of study. The exam consists of two parts: preparation of the dissertation proposal and oral presentation of the proposal. Students must prepare a written comprehensive research proposal describing the dissertation research plan including review of relevant literature, research questions, motivation, methods, any preliminary results, and potential impact. The proposal must be shared with the doctoral committee members two weeks prior to the scheduled presentation.

Students will give a 30-minute oral presentation to their committee members that is open to the public. Following the presentation, the dissertation committee will assess the proposed research plan and provide feedback to the student. If the proposal and/or presentation do not meet the expectations of the committee, the student will be asked to revise their proposal and/or their presentation. The completion of the comprehensive exam is considered successful if the dissertation committee approves as satisfactory both the written proposal and the oral presentation. Students may repeat the comprehensive exam once. If they are unsuccessful in their second attempt, the program will ask the student to leave the program.

PhD Candidacy

A student is considered a doctoral candidate upon completion of the required coursework with a minimum cumulative GPA of 3.000, a passing score on the qualification exam, and satisfactory completion of the comprehensive exam.

Dissertation

A PhD student should aim to complete their dissertation in their fifth year of study. Upon successful completion of the research plan proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field. The work should give evidence of the candidate's ability to carry out independent research. It is expected that the dissertation consists of one or more research studies of sufficient quality to merit publication in a reputable journal(s).

Dissertation Defense

Like the dissertation proposal, the dissertation defense consists of two parts: the written dissertation and the defense oral presentation. The PhD candidate should send the written dissertation to their dissertation committee at least one month prior to the dissertation defense.

The oral dissertation defense will be open to the public and will include a Q&A session. Following the presentation, the dissertation committee will communicate their assessment of whether they consider the candidate's dissertation requirement fulfilled. Once the dissertation requirement is fulfilled, the PhD candidate is ready to graduate. Students then apply to graduate and follow the formatting guidelines and deadlines of their home college.

¹Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an MS in Network Science degree. Note that no students will be admitted directly into the MS in Network Science to pursue a master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Arts Administration and Cultural Entrepreneurship, MS (Boston)

The arts and cultural industries are key drivers of each nation's economy, contributing more than \$730 billion annually in the United States alone. While the economic impact of the arts and cultural industries can be measured, their social impacts are often underestimated. Music, dance, visual art, and theatre are critical to how we perceive, interpret, and critique the world and people around us. The arts articulate our beliefs, politics, familial and community ties, and history.

Arts administrators are the bridge between creative practitioners and audiences and between arts institutions and supportive stakeholders. In today's digitally driven, highly competitive, and increasingly global economy, traditional institutions for visual and performing arts face critical sustainability challenges. Leaders in the arts must adopt the creative thinking and problem-solving skills of an entrepreneur in order to envision new models for creative practice, audience engagement, and funding.

The interdisciplinary Master of Science in Arts Administration and Cultural Entrepreneurship (AACE) prepares arts leaders to both convey the human necessity of creative expression and apply creative thinking to manage resources, inspire audience engagement, and sustain financial support. The arts, and audience opportunities to experience them, are more dynamic and diverse than ever before, flourishing in major arts institutions as well as nonhierarchical organizations, from artist-run spaces and community organizations to annual festivals and pop-up exhibitions. It is time for a transformation in leadership training that matches the ingenuity of today's most exciting experiments in music, dance, theatre, and the visual arts. Arts leaders must also be equipped with the administrative, analytical, and technological skill sets necessary to excel within the complex, interdependent arts ecosystem.

The AACE curriculum is designed to meet the changing needs of arts leaders, from administrators in arts institutions to creative practitioners and entrepreneurs eager to make their art startup a reality. The program focuses on leadership innovation in a range of performance, visual arts, and cultural organizations. As an intellectual and practical course of study that merges the expertise of academics, creative professionals, administrators, and entrepreneurs, the program's aim is to support sustainable creative practice.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Creative Collaboration and Multidisciplinary Design, MS (Boston)

Overview

The Master of Science in Creative Collaboration and Multidisciplinary Design is an executive education degree rooted in the creative process as the main driver for adaptive thinking, dynamic communication, and empowering collaboration. In today’s highly networked organizational structures, current and future leaders will need the skills to navigate the creative process, respond to shifting landscapes with agility, and articulate their vision through multiple modalities in ways that inspire, connect, and call others to action. This highly interactive, experiential degree will provide students with a combination of design skills and creativity techniques in a project-based learning environment to foster innovative leadership and empower communication. Graduates will leave with a flexible toolkit to nurture their individual creativity, adaptability in the face of rapid change, and skills to become well-rounded strategists and communicators.

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouv  College of Health Sciences

Extended Realities, MS (Oakland)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities (XR) to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

In this degree program, students are admitted to the College of Arts, Media and Design and their degree is awarded by that college. Students will follow all policies associated with the College of Arts, Media and Design.

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries, including medicine, business, entertainment, architecture, and journalism.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Urban Planning and Policy, MS (Boston)

The Master of Science in Urban Planning and Policy program trains leaders interested in building just and sustainable solutions to today's critical urban problems. Students in the program develop the theoretical and analytical tools to understand contemporary challenges of social, racial, and environmental injustice in cities and urban regions. They develop professional tools to work effectively in the realms of planning, policy, politics, and advocacy to impact urban challenges, including affordable housing provision, equitable and sustainable economic growth, sustainable transportation, and climate change adaptation and mitigation. This innovative program combines the expertise in urban planning and policy analysis data analytics of the School of Public Policy and Urban Affairs with expertise in physical planning, design, and data visualization at the School of Architecture. The core curriculum of the program provides students with a solid foundation in essential skills and concepts, including techniques of effective community engagement, research design and statistics, economic analysis, legal foundations of urban planning and policy, and the history of urban development and urban planning. Students also have the opportunity to develop substantial expertise in a specialization area, including urban analytics, urban sustainability and resilience, urban design and physical planning, and urban development policy and planning.

The optional cooperative education experience (co-op) is available to eligible students. Cooperative education is central to both the Northeastern experience and to the College of Social Sciences and Humanities experiential liberal arts framework. Northeastern's signature co-op ecosystem provides qualified master's students with six-month work experiences in businesses, nonprofits, and government agencies in Boston and across the United States. Graduate students take their work from campus learning spaces, apply their knowledge outside of the classroom, and then bring knowledge and skills gained in community learning spaces back to our campus learning spaces during the cocurricular experiential integration course.

In addition to the co-op option, students in the program have opportunities to gain experience in the application of their knowledge and skills via internships, class projects, and a capstone research report. They graduate prepared for careers working for state and local government, federal agencies, community development corporations and other nonprofit organizations, research institutes, and as private-sector planning consultants.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Planning and Policy		
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context	4
PPUA 6502	Economic Analysis for Policy and Planning	4
SUEN 6340	Topics in Urban Environmental Design	4
Research Design		
INSH 6300	Research Methods in the Social Sciences	4
Quantitative Techniques		
Students in the urban analytics focus area are encouraged to take INSH 5301.		
Choose one from the following:		4
INSH 5301	Introduction to Computational Statistics	
INSH 6500	Statistical Analysis	
Planning Law		
Choose one from the following:		2-4
LPSC 5201	Law and the City	
PPUA 5201	Urban Planning and the Law	
Planning and Social Justice		
Choose one from the following:		2-4
PPUA 5233	Contemporary Community Development	
PPUA 5235	Participatory Community Planning Methods	
PPUA 6219	Race, Justice, and Belonging in Planning Practice	

Focus Areas

Complete one of the following focus areas:

- Urban Design and Physical Planning (p. 255)
- Urban Analytics (p. 256)
- Sustainability and Resilience (p. 256)
- Urban Development Policy and Planning (p. 256)

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Arts Administration, Graduate Certificate (Boston)

Today's arts sector is more vital and dynamic than ever, flourishing in both arts institutions and "non-hierarchical organizations," from artist-run spaces to community organizations. This context, paired with changes in the funding climate over the past 30 years, has generated a need to transform leadership training in the arts. Creative thinkers must be equipped with administrative, analytical, entrepreneurial, and technological skill sets to work within the complex, interdependent arts and cultural ecosystem.

The **Graduate Certificate in Arts Administration** offers an interdisciplinary graduate program focused on leadership innovation in performance, visual arts, cultural, and community organizations.

The Graduate Certificate in Arts Administration challenges students to create diverse, viable, and sustainable arts and culture projects and organizations; to use entrepreneurial practices in order to create transformation; to develop and deploy new arts and culture sector-focused business and analytic skills; and to design innovative planning and engagement strategies. Course and project work embeds experiential opportunities to explore and demonstrate transformational arts management approaches.

The required curriculum includes three core and one directed elective for a total of 12 credit hours. All courses can be completed online.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
AACE 6000	Arts and Culture Organizational Leadership	3

12 total semester hours required

Minimum 3.000 GPA required

Cultural Entrepreneurship, Graduate Certificate (Boston)

Cultural entrepreneurs combine their passion for creative and cultural products and programs with creative, out-of-the-box thinking to forge the resilience of the arts sectors and the wider communities they serve. Cultural entrepreneurs employ innovative approaches to audience engagement – like a roving theater company, pop-up museum, or a smartphone app for artistic collaboration – to deliver artistic value to wide and diverse audiences and make a positive social, environmental, and economic impact. Today's cultural entrepreneurs operate in diverse professional environments, from consulting for organizational transformation to launching a creative startup. By understanding community impacts and activating a range of cultural and creative experiences, cultural entrepreneurs play a crucial role in ensuring the vitality of artistic engagement, advancing community goals, and strengthening society.

The **Graduate Certificate in Cultural Entrepreneurship** empowers students with a critical, creative perspective on arts programming and management and a myriad of creative management tools that harness new technologies for artistic engagement.

The Graduate Certificate in Cultural Entrepreneurship offers an interdisciplinary program to create diverse and viable projects and organizations for artistic experience and positive social impact. The program prepares students to become innovators in a range of artistic and cultural disciplines, from music, visual art, theater, and dance to community-building and transformation. The curriculum offers students the opportunity to identify opportunities for evolution in the arts and cultural sectors and to develop critical, creative practices; leadership acumen; and skill sets in arts management, strategic planning, and performance analysis to conceive and implement creative, cultural programming for community engagement and positive impact.

The program learning objectives provide students with opportunities to:

- Develop an understanding of methods and tools used to conceptualize, scope, pilot, evaluate, iterate and launch cultural entrepreneurship projects;
- Align creative practice and arts enterprise strategies with opportunities, challenges and resources to achieve desired impact;
- Apply communication, engagement and evaluation techniques to develop and sustain diverse audiences and stakeholder relationships;
- Engage in critical analysis of the work of peers and industry leaders by analyzing and contextualizing the quality, viability and sustainability of culturally-driven entrepreneurship.

The required curriculum includes three core courses and one directed elective for a total of 12 semester hours. All courses can be completed online.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Product Management, Graduate Certificate (Boston)

The Graduate Certificate in Product Management is designed for students with undergraduate degrees in a wide range of fields—including computer science, engineering, economics, business administration, design, and psychology—who want to build the skills necessary for success as product managers. This certificate equips students with the expertise to excel in this dynamic field, whether they are early career professionals, transitioning into product roles, or looking to differentiate themselves in a competitive job market. The program provides a flexible, cost-effective alternative to a full MS program while offering hands-on learning experiences.

Curriculum and Structure

This interdisciplinary certificate offers a structured yet adaptable curriculum that balances foundational knowledge with practical, industry-relevant skills.

The program consists of four courses (12–13 semester hours total):

- Three core courses covering fundamental concepts across key product management functions
- One experiential course (1 credit) providing hands-on learning opportunities tailored to students’ backgrounds and career goals in product management

This certificate allows students to gain real-world experience, develop in-demand skills, and enhance their career opportunities within a streamlined, flexible structure.

Admissions and College Affiliation

Students are admitted to the certificate program through one of the following colleges and follow the academic policies of their home college:

- College of Arts, Media and Design
- College of Engineering
- D'Amore-McKim School of Business
- Office of the Provost and College of Professional Studies¹

This certificate provides a fast, flexible, and practical pathway for students looking to build expertise in product management while benefiting from Northeastern University's strong academic and professional support network.

¹ Program Structure and Transition

- For the 2025–2026 academic year, the Graduate Certificate in Product Management is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern's graduate academic calendar and be governed by the academic policies and procedures outlined in the university's *Graduate Catalog*.
- While designated under the Office of the Provost, students will receive full academic and student support services from the College of Professional Studies including academic advising, co-op and career advising, and access to the International Tutoring Center.
- Beginning in the 2026–2027 academic year, the certificate program will transition fully to the College of Professional Studies. At that time, students will be officially designated under CPS in the academic system of record and governed by its academic policies as outlined in the university's *Graduate Catalog*.

David De Cremer, PhD, Dunton Family Dean

Kate E. Klepper, MBA, Associate Dean of Graduate Programs

Founded in 1922, the D'Amore-McKim School of Business exemplifies Northeastern University's experiential learning and entrepreneurial spirit. Our graduate programs are designed to prepare learners to be responsible business leaders of the world capable of working, navigating, and creating in a digital environment.

D'Amore-McKim is part of a thriving global network, attracting some of the best and brightest faculty across the business world. Many are founders of startups and respected management leaders, and our students benefit daily from their research and expertise.

Experience-powered learning is at the heart of everything we do. Our students do more than master skills in their chosen business field. They put the knowledge gained from a demanding curriculum to work as they apply what they've learned to authentic business challenges. This educational model sets us apart.

Business Analytics, MS (Boston)

Northeastern University D'Amore-McKim School of Business's Master of Science in Business Analytics (https://damore-mckim.northeastern.edu/programs/ms-business-analytics/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=msba) prepares students to lead in a business world driven by Big Data.

Make Data-Driven Business Decisions

Students build the skills to know what data to analyze and understand how to leverage that data for strategic decision making. Classwork provides exposure to data mining, statistical and quantitative analysis, multivariate testing, and predictive modeling. Students explore how to build sales, enhance marketing, or strengthen a company's infrastructure.

Integrate Classroom and Professional Experiences

Through in-class case studies and a capstone project, professors share real company data so that students apply their knowledge to actual business challenges. They gain unique perspectives as they learn from renowned experts who have led through times of rapid change. Through an optional graduate co-op, students translate ideas into action as they complete a project for an organization.

Complete the Degree in as Few as 12 Months

Students complete seven courses throughout the first two semesters and an optional career management class developed by the Graduate Career Center advisor. Students may complete their final three courses over the summer term or can extend their studies and complete their program in the fall term.

Students enroll in this 30-semester-hour master's degree program for full-time study.

Program Requirements

Core Requirements

Code	Title	Hours
MISM 6200	Introduction to Business Analytics	3
MISM 6202	Foundations of Data Analysis for Business	3
MISM 6205	Data Wrangling for Business	3
MISM 6210	Information Visuals and Dashboards for Business	3

MISM 6212	Data Mining and Machine Learning for Business	3
MISM 6213	Business Information Design, Quality, and Strategy	3
MISM 6214	Business Analytics Capstone	3

Elective Coursework

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met:		9
HRMG 6223	Global Talent Management	
INTB 6230	Global Field Study	
MISM 6201	Database Management for Business	
MISM 6206	Modeling for Business	
SCHM 6201	Operations and Supply Chain Management	
SCHM 6215	Supply Chain Analytics	
STRT 6210	Workforce Metrics and Analytics	
MKTG electives as advised		

Optional Career Management Course

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business

- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouv  College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4
CS 6120	Natural Language Processing	4
CS 6140	Machine Learning	4
or DS 5220	Supervised Machine Learning and Learning Theory	

CONCENTRATION IN ENTREPRENEURSHIP—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics of Design	

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
Electives		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
Electives		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8

HIST 5241	Exhibits and Museums
HIST 7250	Topics in Public History (Public History and Slavery)
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
GSND 6460	Generative Game Design	

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4

Elective

Complete 4 semester hours from the following:		4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
JRNL 5311	Design for Storytelling	
JRNL 6305	Topics	
JRNL 6341	Telling Your Story with Data	

Plan of Study**Sample Plan of Study**

The following is a sample plan of study for a student in the Concentration in XR and Games.

Year 1			
Fall	Hours	Spring	Hours
EXRE 5010 and EXRE 5011		5 EXRE 5030	4
EXRE 5020		4 GSND 5110 and GSND 5111	5
		9	9
Year 2			
Fall	Hours	Spring	Hours
EXRE 6500		4 EXRE 7500	4
GSND 5122		1 XR and games elective 2	4
XR and games elective 1		4	
		9	8
Total Hours: 35			

International Management, MS (Boston)

Northeastern University D'Amore-McKim School of Business's Master of Science in International Management program is designed to prepare students to bridge local and international operations quickly and confidently.

Develop a Global Mindset

Students have an opportunity to develop critical thinking skills to handle the challenges organizations and businesses face when operating across borders and cultures. Core courses focus on cultural agility, leadership, and workforce management. Students explore topics ranging from international trade to globalization of the world economy.

Integrate Classroom and Professional Experiences

Students obtain real-world experiences that help them to gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects.

Students can gain experience tackling real business issues faced by a company aligned with their career aspirations through the "Make Your Case" consulting program. Students build storytelling and case-writing skills while gaining inside exposure to their chosen industry.

Students may enroll in this 30-semester-hour master's degree program for full-time and part-time study.

Program Requirements**Core Requirements**

Code	Title	Hours
INTB 6200	Managing the Global Enterprise	3
INTB 6226	Becoming a Global Leader	3
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met:		3
STRT 6210	Workforce Metrics and Analytics (or graduate-level INTB elective)	
In consultation with advisor, complete 3 graduate-level semester hours from the following for which prerequisites have been met:		3
FINA 6204	International Financial Management	
INNO 6200	Enterprise Growth and Innovation	
INTB 5000 - 6999		

INTB 6230	Global Field Study	
MKTG 6212	International Marketing	
In consultation with advisor, complete 3 graduate-level semester hours from the following for which prerequisites have been met:		3
INTB 6260	Advanced Topics in Global Management and Strategy	
STRT 6200	Strategic Decision Making in a Changing Environment	

Electives

Code	Title	Hours
In consultation with advisor, complete 15 graduate-level semester hours from the following for which prerequisites have been met:		15
ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MISM, MKTG, SCHM, and STRT		

Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

Management, MS (Boston)

Overview

Northeastern University D'Amore-McKim School of Business's MS in Management (https://damore-mckim.northeastern.edu/programs/ms-x/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=msx) program enables students to gain the business knowledge and specialized expertise needed to be responsible business leaders of the world capable of working, navigating, and creating in a digital environment.

Students enroll in this 30-semester-hour master's degree program for full-time, part-time, or hybrid study. There are four ways to earn this master's degree:

MS in Management: Boston Campus

MS in Management on our Boston campus allows students to personalize all aspects of their degree, including core coursework, to match their specific professional goals. Four core classes each represent a key domain: managing organizations, data-driven management, strategy and growth, and finance and operations. Students without a background in these areas have an opportunity to build foundational skills, and those with previous experience expand their knowledge in higher-level courses.

Students may focus their learning by selecting a market-aligned concentration. They'll personalize their program by selecting electives from the entire portfolio of graduate-level courses taught by D'Amore-McKim's industry-leading faculty. Or they may choose to take one elective from a diverse list of eligible graduate courses offered by other Northeastern colleges.

MS in Management with a Concentration in Digital Transformation in Healthcare or Healthcare Administration: Online Only

MS in Management for online study focuses on healthcare and leverages a unique partnership between Northeastern University and the Mayo Clinic College of Medicine and Science. Coursework provides a deep understanding of the technical skills, regulatory frameworks, and managerial competencies necessary to join the next generation of healthcare pioneers.

Students choose one of two concentrations: Digital Transformation in Healthcare or Healthcare Administration. Digital Transformation in Healthcare is designed for current healthcare executives who want to leverage emerging technologies better. Healthcare Administration offers business and healthcare knowledge tailored for those entering the industry.

MS in Management with a Concentration in Strategic Technology Leadership: Hybrid Only

MS in Management with a Concentration in Strategic Technology Leadership prepares executives and senior leaders to harness digital technology and innovation. They develop expertise in solving challenges with cutting-edge technologies and deepen their knowledge of strategies for managing technology adoption.

Students develop a project business plan under the guidance of a seasoned executive mentor. Classes are hybrid, with live online interactive courses and three in-person residencies in Boston or London.

Program Requirements

Core Requirements

Code	Title	Hours
Managing Organizations		
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:		3
HRMG 6200	Managing People and Organizations	

HRMG 6223	Global Talent Management
INTB 6226	Becoming a Global Leader
MGMT 6213	Managing Ethics in the Workplace and Marketplace
MGMT 6214	Negotiations
MGMT 6225	Sustainability and Leadership
MGMT 6226	Sustainability and the Business Environment

Data-Driven Management

In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:

3

ACCT 6200	Financial Reporting and Managerial Decision Making 1
MISM 6200	Introduction to Business Analytics
MISM 6202	Foundations of Data Analysis for Business
MISM 6210	Information Visuals and Dashboards for Business
MISM 6212	Data Mining and Machine Learning for Business
MKTG 6200	Creating and Sustaining Customer Markets
MKTG 6234	Marketing Analytics
SCHM 6215	Supply Chain Analytics
STRT 6210	Workforce Metrics and Analytics

Strategy and Growth

In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:

3

INNO 6200	Enterprise Growth and Innovation
INNO 6222	Competing in Dynamic, Innovation-Driven Markets
INNO 6225	Acquisitions, Alliances, and Growth
INTB 6200	Managing the Global Enterprise
MKTG 6216	Market Focused Strategy
SCHM 6213	Global Supply Chain Strategy
STRT 6200	Strategic Decision Making in a Changing Environment

Finance and Operations

In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met. Choose from the following:

3

FINA 6309	Foundations of Accounting and Finance
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit
SCHM 6201	Operations and Supply Chain Management
SCHM 6214	Sourcing and Procurement
SCHM 6221	Sustainability and Supply Chain Management
SCHM 6223	Managing Healthcare Supply Chain Operations

Concentration Options

Students may complete one of the following concentrations. Not all concentrations are available at all locations; please refer to your advisor or admissions coach for the course availability each semester at your location. Courses taken to fulfill concentrations may be used toward the elective section below.

- Accounting Analytics (p. 274)
- AI Applications (p. 274)
- Analytics (p. 275)
- Brand Management (p. 275)
- Business Management for Healthcare (p. 275)
- Corporate Finance (p. 276)
- Corporate Innovation (p. 276)
- Digital Transformation in Healthcare (p. 276)
- Entrepreneurship (p. 277)
- Healthcare Administration (p. 277)
- International Business (p. 277)
- Investments (p. 278)

- Leading People and Organizations (p. 278)
- Marketing (p. 278)
- Marketing Analytics (p. 279)
- Operations and Supply Chain Management (p. 279)
- Public Health (p. 279)
- Strategic Technology Leadership (p. 279)
- Sustainability and Business (p. 280)

Electives

Code	Title	Hours
In consultation with advisor, complete 18 graduate-level semester hours for which prerequisites have been met. Choose from the following subject codes:		18
ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MISM, MKTG, SCHM, STRT		
In consultation with advisor, students may also select an interdisciplinary elective, for which prerequisites have been met, offered in partnership with other Northeastern University colleges. Choose from the following:		
AACE 6000	Arts and Culture Organizational Leadership	
ARTG 5150	Information Visualization Principles and Practices	
ARTG 5151	Information Design Critique Seminar	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 5640	Prototyping for Experience Design	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	
BINF 6200	Bioinformatics Programming	
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6309	Bioinformatics Computational Methods 2	
BIOT 5120	Foundations in Biotechnology	
BIOT 5219	The Biotechnology Enterprise	
BIOT 6214	Experimental Design and Biostatistics	
CAEP 6326	Behavioral Concepts and Principles	
CS 5100	Foundations of Artificial Intelligence	
CS 5200	Database Management Systems	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
ECON 5140	Applied Econometrics	
GE 5030	Iterative Product Prototyping for Engineers	
GE 5100	Product Development for Engineers	
GSND 5110	Game Design and Analysis	
GSND 6320	Psychology of Play	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
HINF 5101	Introduction to Health Informatics and Health Information Systems	
HINF 5105	The American Healthcare System	
HINF 6202	Business of Healthcare Informatics	
HINF 6205	Creation and Application of Medical Knowledge	
IE 5617	Lean Concepts and Applications	
IE 5640	Data Mining for Engineering Applications	
IE 6200	Engineering Probability and Statistics	
IE 6600	Computation and Visualization for Analytics	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
INSH 5301	Introduction to Computational Statistics	

INSH 5302	Information Design and Visual Analytics
JRNL 5311	Design for Storytelling
JRNL 5400	Media and Advocacy in Theory and Practice
JRNL 6305	Topics
JRNL 6340	Fundamentals of Digital Journalism
JRNL 6341	Telling Your Story with Data
PHIL 5001	Global Justice
PHIL 5005	Information Ethics
PHIL 5010	AI Ethics
PHTH 5232	Evaluating Healthcare Quality
PHTH 5234	Economic Perspectives on Health Policy

MISM 6210	Information Visuals and Dashboards for Business	
EEBA 6401	Experiential Business Decision Making (repeated 3 times)	
EEBA 6410	Workplace Skills in Action	

AI APPLICATIONS CONCENTRATION

Code	Title	Hours
Required		
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4
Electives		
In consultation with advisor, complete 4 graduate-level semester hours for which prerequisites have been met. Choose from the following:		4
EDUT 6150	AI in Education	
HLTH 5800	AI Across the Health Sciences	
IE 5640	Data Mining for Engineering Applications	
JRNL 6460	AI in Media Industries	
MISM 6250	Strategic AI for Business	

ANALYTICS CONCENTRATION

Code	Title	Hours
Required		
MISM 6200	Introduction to Business Analytics	3
Electives		
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met. Choose from the following:		9
MISM 6201	Database Management for Business	
MISM 6202	Foundations of Data Analysis for Business	
MISM 6205	Data Wrangling for Business	
MISM 6206	Modeling for Business	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business	
MISM 6213	Business Information Design, Quality, and Strategy	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	
SCHM 6215	Supply Chain Analytics	
STRT 6210	Workforce Metrics and Analytics	

BRAND MANAGEMENT CONCENTRATION

Code	Title	Hours
Required		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6223	Brand and Advertising Management	3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
MKTG 6210	Marketing Research	
MKTG 6214	New Product Development	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6287	Succeeding in the Platform Economy	

BUSINESS MANAGEMENT FOR HEALTHCARE CONCENTRATION

Code	Title	Hours
Required		
FINA 6220 or SCHM 6223	Healthcare Finance Managing Healthcare Supply Chain Operations	3
HINF 5105	The American Healthcare System	3
HRMG 6220	Health Organization Management	3
STRT 6220	Strategic Management for Healthcare Organizations	3
Optional Electives		
Note: Electives are not required; the following course(s) are suggested beyond the concentration:		
ENTR 6214	Social Enterprise	
FINA 6220	Healthcare Finance	
HINF 5101	Introduction to Health Informatics and Health Information Systems	
HINF 6202	Business of Healthcare Informatics	
HINF 6205	Creation and Application of Medical Knowledge	
MGMT 6214	Negotiations	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6226	Consumer Behavior	
PHTH 5232	Evaluating Healthcare Quality	
PHTH 5234	Economic Perspectives on Health Policy	
SCHM 6223	Managing Healthcare Supply Chain Operations	

CORPORATE FINANCE CONCENTRATION

Code	Title	Hours
Required		
FINA 6200	Value Creation through Financial Decision Making	3
FINA 6205	Financial Strategy	3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
FINA 6204	International Financial Management	
FINA 6213	Investment Banking	
FINA 6214	Mergers and Acquisitions	
FINA 6215	Business Turnarounds	
FINA 6216	Valuation and Value Creation	

CORPORATE INNOVATION CONCENTRATION

Code	Title	Hours
Electives		
In consultation with advisor, complete 12 graduate-level semester hours for which prerequisites have been met. Choose from the following:		12
ARTG 5610	Design Systems	
GE 5100	Product Development for Engineers	
HRMG 6222	The Entrepreneurial Mindset of Leaders	
HRMG 6280	The Human Side of Innovation	
INNO 6200	Enterprise Growth and Innovation	
INNO 6217	Lean Innovation	
INNO 6222	Competing in Dynamic, Innovation-Driven Markets	
INNO 6225	Acquisitions, Alliances, and Growth	
INNO 6227	Digital Bias in Business	

DIGITAL TRANSFORMATION IN HEALTHCARE CONCENTRATION

Code	Title	Hours
To earn the Concentration in Digital Transformation in Healthcare, students must complete the following four core courses of the core curriculum of this program:		
MGMT 6213	Managing Ethics in the Workplace and Marketplace	
MISM 6200	Introduction to Business Analytics	
SCHM 6223	Managing Healthcare Supply Chain Operations	
STRT 6220	Strategic Management for Healthcare Organizations	
Required		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 6404	Patient Engagement Informatics and Analytics	3
INNO 6200	Enterprise Growth and Innovation	3
MGSC 6281	Service Innovation and Management	3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
FINA 6220	Healthcare Finance	
or FINA 6309	Foundations of Accounting and Finance	
HINF 5105	The American Healthcare System	
HRMG 6220	Health Organization Management	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business	

ENTREPRENEURSHIP CONCENTRATION

Code	Title	Hours
Electives		
In consultation with advisor, complete 12 graduate-level semester hours for which prerequisites have been met. Choose from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6340	The Technical Entrepreneur as Leader	
GE 5030	Iterative Product Prototyping for Engineers	
HRMG 6222	The Entrepreneurial Mindset of Leaders	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

HEALTHCARE ADMINISTRATION CONCENTRATION

Code	Title	Hours
To earn the Concentration in Healthcare Administration, students must complete the following four core courses of the core curriculum of this program:		
FINA 6309 or SCHM 6223	Foundations of Accounting and Finance Managing Healthcare Supply Chain Operations	
MGMT 6213	Managing Ethics in the Workplace and Marketplace	
MISM 6200	Introduction to Business Analytics	
STRT 6220	Strategic Management for Healthcare Organizations	
Required		
HRMG 6200	Managing People and Organizations	3
HRMG 6223	Global Talent Management	3
INNO 6200	Enterprise Growth and Innovation	3
MGMT 6214	Negotiations	2-3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
FINA 6309	Foundations of Accounting and Finance (If not taken towards concentration core)	
HINF 5101	Introduction to Health Informatics and Health Information Systems	
HINF 5105	The American Healthcare System	
HINF 6404	Patient Engagement Informatics and Analytics	
HRMG 6220	Health Organization Management	
HRMG 6230	Leading a Diverse and Inclusive Organization	
MGSC 6281	Service Innovation and Management	
MISM 6210	Information Visuals and Dashboards for Business	
MISM 6212	Data Mining and Machine Learning for Business	
SCHM 6223	Managing Healthcare Supply Chain Operations (If not taken towards concentration core)	
STRT 6210	Workforce Metrics and Analytics	

INTERNATIONAL BUSINESS CONCENTRATION

Code	Title	Hours
Required		
INTB 6200	Managing the Global Enterprise	3
Electives		
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met. Choose from the following:		9
INTB 6212	Cultural Aspects of International Business	

INTB 6226	Becoming a Global Leader
INTB 6230	Global Field Study
INTB 6249	Digitization of International Business
STRT 6224	Managing the Sustainable Global Enterprise

INVESTMENTS CONCENTRATION

Code	Title	Hours
Required		
FINA 6200	Value Creation through Financial Decision Making	3
FINA 6203	Investment Analysis	3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
FINA 6211	Financial Risk Management	
FINA 6212	Fixed-Income Securities and Risk	
FINA 6213	Investment Banking	
FINA 6217	Real Estate Finance and Investment	
FINA 6339	Quantitative Portfolio Management	

LEADING PEOPLE AND ORGANIZATIONS CONCENTRATION

Code	Title	Hours
Required		
HRMG 6200	Managing People and Organizations	3
Electives		
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met. Choose from the following:		9
HRMG 6218	Great Companies	
HRMG 6220	Health Organization Management	
HRMG 6222	The Entrepreneurial Mindset of Leaders	
HRMG 6223	Global Talent Management	
MGMT 6214	Negotiations	
STRT 6210	Workforce Metrics and Analytics	
STRT 6224	Managing the Sustainable Global Enterprise	

MARKETING CONCENTRATION

Code	Title	Hours
Required		
MKTG 6200	Creating and Sustaining Customer Markets	3
Electives		
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met. Choose from the following:		9
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	
MKTG 6287	Succeeding in the Platform Economy	

MARKETING ANALYTICS CONCENTRATION

Code	Title	Hours
Required		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6234	Marketing Analytics	3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
MKTG 6210	Marketing Research	
MKTG 6216	Market Focused Strategy	
MKTG 6222	Digital Marketing	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	

OPERATIONS AND SUPPLY CHAIN MANAGEMENT CONCENTRATION

Code	Title	Hours
Required		
SCHM 6201	Operations and Supply Chain Management	3
SCHM 6213	Global Supply Chain Strategy	3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
SCHM 6211	Logistics and Transportation Management	
SCHM 6214	Sourcing and Procurement	
SCHM 6215	Supply Chain Analytics	
SCHM 6221	Sustainability and Supply Chain Management	
SCHM 6223	Managing Healthcare Supply Chain Operations	
SCHM 6224	Demand Planning and Forecasting	

PUBLIC HEALTH CONCENTRATION

Code	Title	Hours
PHTH 5120	Race, Ethnicity, and Health in the United States	3
PHTH 5212	Public Health Administration and Policy	3
PHTH 5214	Environmental Health	3
PHTH 6208	Foundations of Community Health Assessment	3

STRATEGIC TECHNOLOGY LEADERSHIP CONCENTRATION

Code	Title	Hours
To earn the Concentration in Strategic Technology Leadership, students must complete the following four core courses of the core curriculum of this program:		
INNO 6222	Competing in Dynamic, Innovation-Driven Markets	
INTB 6226	Becoming a Global Leader	
MISM 6212	Data Mining and Machine Learning for Business	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
Required		
Complete the following course three times:		6
INNO 6250	Integrated and Applied Technology Leadership Project	
Complete the following:		
INNO 6240	Strategic Disruption Residency 1	1
INNO 6241	Strategic Disruption Residency 2	1
INNO 6242	Strategic Disruption Residency 3	1
INNO 6254	Technology and the Law	3
Electives		
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met. Choose from the following:		6
ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MKTG, MISM, SCHM, or STRT		

Students may also select preapproved interdisciplinary electives, for which prerequisites have been met, offered in partnership with other Northeastern University colleges.

SUSTAINABILITY AND BUSINESS CONCENTRATION

Code	Title	Hours
Required		
MECN 6200	Global Competition and Market Dominance	3
Electives		
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met. Choose from the following:		9
ENTR 6214	Social Enterprise	
ENTR 6216	Global Social Entrepreneurship and Innovation	
MECN 6205	Sustainability and the Economics of Markets	
MGMT 6225	Sustainability and Leadership	
MGMT 6226	Sustainability and the Business Environment	
SCHM 6221	Sustainability and Supply Chain Management	
STRT 6224	Managing the Sustainable Global Enterprise	

Plan of Study

Not all concentrations are available at all locations; please refer to your advisor or admissions coach for the course availability each semester at your location.

¹ Students will take courses online but will be required to attend an on-campus residency in Boston and/or London.

Management, MS with Major in Fintech Management (Miami)

The Master of Science in Management with Major in Fintech Management focuses on finance and leverages technology to help develop financial services. Four core classes each represent a key domain: managing organizations, data-driven management, strategy and growth, and finance and operations. Students without a background in these areas have an opportunity to build foundational skills, and those with previous experience expand their knowledge in higher-level courses.

Prerequisite Course

Applicants without a prior degree or prior background in finance are required to complete the following course with a grade of C– or better before admission to the program:

Code	Title	Hours
FINA 6200	Value Creation through Financial Decision Making	3

Program Requirements

Core Requirements

Code	Title	Hours
Managing Organizations		
MGMT 6413	Managing Ethics in the Workplace and Marketplace	4
Data-Driven Management		
FINA 6403	Investment Analytics	4
FINA 6433	Fundamentals of Programming for Finance	2

MISM 6402	Foundations of Data Analysis for Business	2
Strategy and Growth		
INNO 6400	Enterprise Growth and Innovation	2
Finance and Operations		
MKTG 6430	Driving Marketing Performance: Measure, Analyze, Profit	2

Fintech Management Major Requirements

Code	Title	Hours
In consultation with advisor, complete 14 semester hours from the following:		14
FINA 6432	Fundamentals of Financial Math and Financial Markets	
FINA 6437	Fintech, Financial Innovation, and Blockchain	
FINA 6440	Financial Markets and Banking in the Post Financial Crisis Era	
FINA 6443	Credit Risk Management	
MISM 6410	Information Visuals and Dashboards for Business	

Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

Accounting, MSA (Boston)

Northeastern University D'Amore-McKim School of Business's Master of Science in Accounting is designed to prepare students for a career in the rapidly evolving accounting industry.

Build Deep Accounting Expertise

Students build on their undergraduate accounting major and have an opportunity to gain the knowledge, skills, and credit hours needed to pursue CPA licensure and launch their careers in just seven months. Classwork deepens their expertise through advanced accounting topics, management best practices, and data analytics skills. The Board of Public Accountancy in Massachusetts has approved the program curriculum.

Select a Track

Students may specialize in either audit or tax, guiding them toward the career that best suits their goals. The audit track offers intense exposure to ethics, auditing research, and forensic accounting. The tax track explores the intricacies of the tax industry so that students may gain a comprehensive understanding of taxation at all levels, from local to international.

Integrate Classroom and Professional Experiences

Students have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects. Students gain unique perspectives as they learn from industry-leading faculty with years of practice as both PhDs and CPAs at Big 4 and other public accounting firms.

Students enroll in this 30-semester-hour master's degree program for full-time study.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Accounting		
ACCT 6203	Business Entity Taxation	3
ACCT 6204	Financial Reporting for Integrated Multinational Enterprises	3

ACCT 6248	Income Taxation of Trusts and Estates	
ACCT 6292	Tax Research, Practice, and Ethics	

Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

Accounting and Business Administration, MSAMBA (Boston)

Northeastern University D'Amore-McKim School of Business' Master of Science in Accounting/Master of Business Administration (<https://damore-mckim.northeastern.edu/programs/ms-accounting-mba/>) combined-degree program puts nonaccounting majors on an accelerated path toward a successful career in accounting.

Cultivate Deep Accounting Knowledge and Fundamental Business Skills

This 15-month curriculum is constructed in partnership with some of the leading accounting firms. Students will build knowledge in both accounting and business, including a four-course concentration in business analytics.

Analytics Concentration

Students will develop their analytical skills through an MBA concentration in analytics. Through four courses students use data to support business decision making and create a measurable improvement on organizational performance.

Integrate Classroom and Professional Experiences

Students will have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects. Starting in January, students leverage their newly acquired skills in a three-month paid corporate residency at a Big 4 or another top accounting firm. Far removed from the typical internship, students work full-time as an associate and have significant responsibilities to deliver on organizational goals.

Students may enroll in this 68-semester-hour master's degree program for full-time study.

Program Requirements**Business Administration Core Requirements**

Code	Title	Hours
Marketing		
MKTG 6318	Customer Value and the Enterprise	2
Strategic Decision Making

Finance, MSF (Boston)

Northeastern University D'Amore-McKim School of Business' Master of Science in Finance (https://damore-mckim.northeastern.edu/programs/ms-finance/?utm_medium=website&utm_source=catalog&utm_campaign=ptmsf) helps students cultivate the high-level knowledge needed to drive financial strategy in today's tech economy.

Develop Deep Finance Expertise

Core courses and elective offerings help students become financial experts with the skills to diversify financial portfolios, effectively minimize risks, maximize return on investments, and sustain growth. Students interested in pursuing the Chartered Financial Analyst designation will find CFA preparations integrated into their coursework.

Integrate Classroom and Professional Experiences

Students will have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. They apply their knowledge to actual business challenges through class projects.

Students can apply to participate in a student-managed mutual fund, The 360 Huntington Fund, where they gain valuable experience performing equity research and portfolio management. By participating in the Fund, students may earn one semester hour per semester with the option to fulfill a 3 semester hours elective course requirement by participating for three terms.

Students enroll in this 30-semester-hour master's degree program for part-time study.

Program Requirements

Core Requirements

Code	Title	Hours
FINA 6200	Value Creation through Financial Decision Making	3
FINA 6202	Analysis of Financial Institutions and Markets	3
FINA 6203	Investment Analysis	3
FINA 6204	International Financial Management	3
FINA 6205	Financial Strategy	3
FINA 6206	Finance Seminar	3

Electives

Code	Title	Hours
In consultation with advisor, complete 12 graduate-level semester hours for which prerequisites have been met:		12
FINA 6207	Financial Modeling	
FINA 6211	Financial Risk Management	
FINA 6212	Fixed-Income Securities and Risk	
FINA 6214	Mergers and Acquisitions	
FINA 6215	Business Turnarounds

FINA 6220	Healthcare Finance	
FINA 6292	Advanced Topics in Finance	
FINA 6360	Fund Management for Analysts	
FINA 6361	Fund Management for Managers	

A maximum of one graduate-level business course may be taken from the following subject codes:

ACCT, BUSN, ENTR, FINA, HRMG, INNO, INTB, MECN, MGMT, MKTG, SCHM, and STRT

Program Credit/GPA Requirements

30 total semester hours required

Minimum 3.000 GPA required

Quantitative Finance, MSF (Boston)

Northeastern University D'Amore-McKim School of Business's Full-Time MS in Quantitative Finance is designed to prepare students to thrive in a rapidly changing finance industry transformed by technology and innovation.

Cultivate Advanced Finance and Fintech Skills

This quantitative finance curriculum emphasizes the intersection of finance and data analytics. Coursework integrates economics, mathematics, and computer science with financial theory and application. Students interested in pursuing the Chartered Financial Analyst designation will find CFA preparations integrated into their coursework.

Integrate Classroom and Professional Experiences

Students will have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. Through an optional graduate co-op, students translate ideas into action as they complete a project for an organization.

Students can apply to participate in a student-managed mutual fund, The 360 Huntington Fund (https://damore-mckim.northeastern.edu/programs/360-huntington-fund/?utm_medium=website&utm_source=catalog&utm_campaign=msqf), where they can gain experience performing equity research and portfolio management. By participating in the Fund, students may earn 1 semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

Complete the Degree in as Few as 12 Months

In the first two semesters, students complete six required courses, one elective, and an optional career development program developed by the Graduate Career Center advisors. They may complete the remaining three elective courses over the summer term or extend their studies and complete their electives in the fall term.

Students enroll in this 30-semester-hour master's degree program for full-time study.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
FINA 6203	Investment Analysis	3
FINA 6331	Corporate Finance	3
FINA 6332	Fundamentals of Financial Math and Financial Markets	3

Quantitative Finance, MSF (Oakland)

Admissions to this program have been suspended.

Northeastern University D'Amore-McKim School of Business's Full-Time MS in Quantitative Finance is designed to prepare students to thrive in a rapidly changing finance industry transformed by technology and innovation.

Cultivate Advanced Finance and Fintech Skills

This quantitative finance curriculum emphasizes the intersection of finance and data analytics. Coursework integrates economics, mathematics, and computer science with financial theory and application. Students interested in pursuing the Chartered Financial Analyst designation will find CFA preparations integrated into their coursework.

Integrate Classroom and Professional Experiences

Students will have opportunities to obtain real-world experiences that help them gain a fresh perspective while using relevant skills. Through an optional graduate co-op, students translate ideas into action as they complete a project for an organization.

Students can apply to participate in a student-managed mutual fund, The 360 Huntington Fund (https://damore-mckim.northeastern.edu/programs/360-huntington-fund/?utm_medium=website&utm_source=catalog&utm_campaign=msqf), where they can gain experience performing equity research and portfolio management. By participating in the Fund, students may earn 1 semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

Complete the Degree in as Few as 12 Months

In the first two semesters, students complete six required courses, one elective, and an optional career development program developed by the Graduate Career Center advisors. They may complete the remaining three elective courses over the summer term or extend their studies and complete their electives in the fall term.

Students enroll in this 30-semester-hour master's degree program for full-time study.

Master of Business Administration

At Northeastern University's D'Amore-McKim School of Business, we prepare students to be responsible global business leaders who thrive in a digital world. In our MBA programs (<https://damore-mckim.northeastern.edu/catalog-mba-programs/>), students learn across borders and get ready to make a real impact. They develop in-demand skills by working on projects with actual company data, guided by a faculty of consultants, management leaders, and startup founders. This hands-on approach helps them become innovative leaders.

At D'Amore-McKim, we excel at integrating classroom instruction with real-world, experience-powered learning. This approach broadens students' knowledge, fosters their creativity, and equips them to meet the evolving demands of today's business landscape. Our MBA students dive into experiences that provide fresh perspectives and valuable skills.

Programs

- Business Administration, MBA—Full-Time (Boston) (p. 288)
- Business Administration, MBA—Online (p. 297)
- Business Administration, MBA—Part-Time (Boston) (p. 298)

Business Administration, MBA—Full-Time (Boston)

The Northeastern University D'Amore-McKim School of Business Full-Time MBA (https://damore-mckim.northeastern.edu/programs/full-time-mba/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=ftmba) program is designed to prepare students to lead with impact. Our Full-Time MBA program integrates business knowledge with a deep understanding of technology, preparing students to stay ahead of change and become the leaders that today's business world demands. Students will choose from a wide-ranging list of in-demand electives and concentrations—including our signature MBA x concentrations—allowing them to develop a unique nonbusiness skill set.

Integrate Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Through a corporate residency, students translate ideas to action for 3, 6, or up to 12 months. Far removed from the typical internship, students work full time at a leading firm or startup in their field and have significant responsibilities as they work to deliver on organizational goals.

Select Two Concentrations

Students will specialize their degree by selecting two in-demand business concentrations. Or, they could choose to add expertise in another professional area by choosing an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Build an Interdisciplinary Skill Set

Students will select 6 interdisciplinary (nonbusiness) semester hours of their choice. They can mix and match the content that interests them from a diverse list of eligible graduate courses across Northeastern colleges.

Program Requirements

Core Requirements

Code	Title	Hours
Marketing		
MKTG 6318	Customer Value and the Enterprise	2
Strategic Decision Making

Business Administration, MBA—Online

Northeastern University's D'Amore-McKim School of Business prepares business leaders to navigate the challenges of today's tech-forward business world. D'Amore-McKim's Online MBA (https://damore-mckim.northeastern.edu/programs/online-mba/?utm_medium=website&utm_source=catalog&utm_campaign=omba) program helps students build broad business skill sets and specialized knowledge in their field. In this flexible program, students build skills that they can apply in real-time—and complete their degree 100% online in as little as 18 months.

Integrate Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern University MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students gain unique perspectives as they learn from entrepreneurs and executives at top firms who have led through times of rapid change.

Live Faculty Connect Sessions

Optional live faculty sessions offer a collaborative and interactive learning environment where students can connect with their professors and peers weekly to discuss course concepts, receive feedback, and gain valuable insights.

EXPO Courses

In the EEBA 6401 Experiential Business Decision Making course, students take on the role of a C-suite business executive and tackle a real business challenge for an actual company, all while gaining real-time feedback from a seasoned C-suite executive.

Societal Challenge Courses

In the societal challenge courses, students build upon the skills gained in the core course focusing on stakeholder values and societal challenges by selecting either a diversity, equity, and inclusion course or a sustainability course. The skills gained through these courses are designed to prepare students for immediate impact and are exactly what employers are seeking.

In the EEBA 6403 EXPO Challenge: Diversity, Equity, and Inclusion course, students work as a team to solve a DEI-related business problem. The course format includes case studies, Q&A sessions, and guidance and feedback from industry experts and seasoned faculty members.

In the EEBA 6402 EXPO Challenge: Sustainability course, students work in teams to bring their experience and newly learned skills to solve a real sustainability-related business problem. These problems could range from environmental sustainability issues to societal challenges associated with climate change. The course format includes case studies, Q&A sessions, and guidance and feedback from industry experts and seasoned faculty members.

Business Administration, MBA—Part-Time (Boston)

Northeastern University's D'Amore-McKim School of Business is designed to prepare business leaders to navigate the challenges of today's tech-forward business world. D'Amore-McKim's Part-Time MBA (https://damore-mckim.northeastern.edu/programs/part-time-mba/?utm_medium=website&utm_source=catalog&utm_campaign=part-time-mba) program helps students build broad business skill sets and specialized knowledge in their field. In this flexible program, students build skills they can apply in real time—and complete their degree part-time.

Integrate Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students gain unique perspectives as they learn from entrepreneurs and executives at top firms who have led through times of rapid change.

Select Up to Two Concentrations

Students may specialize their degree by selecting up to two in-demand business concentrations. Students gain exposure to diverse perspectives as they build competencies in multiple disciplines. This combination prepares them to lead in a complex business world.

MGMT 6226	Sustainability and the Business Environment	
SCHM 6221	Sustainability and Supply Chain Management	
STRT 6224	Managing the Sustainable Global Enterprise	

Dual Degrees

Northeastern University's D'Amore-McKim School of Business is designed to prepare learners to be responsible business leaders of the world capable of working, navigating, and creating in a digital environment. Our dual degree programs (<https://damore-mckim.northeastern.edu/catalog-dual-degrees/>) offer a powerful opportunity for students to build their future-forward business skills through an MBA and a deep foundation in another area. Dual degree students earn two degrees simultaneously—an MBA and a second degree from Northeastern.

At Northeastern, experience is at the heart of everything we do. Our experience-powered educational model fuses robust classroom education with real-world application. Students benefit from opportunities to apply what they've learned in the classroom to real challenges in business and the industry of their second degree.

Dual degree programs merge select core requirements from a D'Amore-McKim MBA with a master's degree or juris doctorate, allowing students to finish their program in less time than it would take to earn the two degrees separately. This distinctive blend of knowledge and skill positions dual degree students to lead in the two sectors.

Programs

- Business Administration, MBA—Full-Time / Finance, MSF (Boston) (p. 304)
- Business Administration, MBA—Part-Time / Finance, MSF (Boston) (p. 304)
- Law, JD / Accounting and Business Administration, MSAMBA (Boston) (p. 305)
- Law, JD / Business Administration, MBA—Full-Time (Boston) (p. 305)

- Law, LLM / Business Administration, MBA—Full-Time (Boston) (p. 305)
- Quantitative Finance, MSF / Business Administration, MBA—Full-Time (Boston) (p. 306)

Business Administration, MBA—Full-Time / Finance, MSF (Boston)

Northeastern University's D'Amore-McKim School of Business prepares resilient finance leaders to weather a changing business world. The Full-Time MBA / MSF Finance (https://damore-mckim.northeastern.edu/programs/full-time-ms-finance-mba/?utm_source=internal-referral&utm_medium=nucatalog&utm_campaign=ftmsfmba) dual degree program integrates business knowledge with a deep understanding of finance to prepare students to be the leaders that today's business world demands.

Develop Deep Finance Expertise

Students pursue rigorous coursework laser focused on financial theory and practice. Students have an opportunity to gain advanced financial skills and high-level knowledge to drive financial strategy, increase shareholder value, support flexible operating models, minimize risk, and maximize revenue through the finance courses.

Select a Concentration

Students specialize their MBA degree by selecting a concentration in either corporate finance or investments. In the corporate finance concentration, students master a range of financial, analytical, and communication skills for increasing profitability and shareholder value. In the investments concentration, students become knowledgeable managers of assets for individuals or institutions, building their expertise in capital allocation, valuation, or risk management.

Integrating Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-powered electives and class projects. Through a corporate residency, students gain invaluable experience at the intersection of business and finance, translating ideas into action for three, six, or up to 12 months. Far removed from the typical internship, students work full time at a leading firm or startup in their field and have significant responsibilities as they work to deliver on organizational goals.

Students can apply to gain valuable experience performing equity research and portfolio management in a student-managed mutual fund, The 360 Huntington Fund. By participating in the Fund, students may earn 1 semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

Through coursework or individually, students can earn Bloomberg Market Concepts and the Bloomberg Environmental, Social, & Governance certifications and gain a deeper understanding of how businesses operate in the global economy—and how they implement strategies to become better corporate citizens.

Business Administration, MBA—Part-Time / Finance, MSF (Boston)

Northeastern University's D'Amore-McKim School of Business is designed to prepare resilient finance leaders to weather a changing business world. The Part-Time MS in Finance/MBA (<https://damore-mckim.northeastern.edu/programs/part-time-ms-finance-mba/>) dual degree program integrates business knowledge with a deep understanding of finance to prepare students to be the leaders that today's business world demands.

Develop Deep Finance Expertise

Students pursue rigorous coursework laser focused on financial theory and practice. Students have an opportunity to gain advanced financial skills and high-level knowledge to drive financial strategy, increase shareholder value, support flexible operating models, minimize risk, and maximize revenue through the finance courses.

Select a Concentration

Students specialize their MBA degree by selecting a concentration in either corporate finance or investments. In the corporate finance concentration, students have an opportunity to master a range of financial, analytical, and communication skills for increasing profitability and shareholder value. In the investments concentration, students may become knowledgeable managers of assets for individuals or institutions, building their expertise in capital allocation, valuation, or risk management.

Integrating Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-powered electives and class projects. Through a corporate residency, students gain invaluable experience at the intersection of business and finance, translating ideas into action for three, six, or up to 12 months. Far removed from the typical internship, students work full time at a leading firm or startup in their field and have significant responsibilities as they work to deliver on organizational goals.

By participating in the Fund, students may earn 1 semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

Through coursework or individually, students can earn Bloomberg Market Concepts and the Bloomberg Environmental Social Governance certifications and gain a deeper understanding of how businesses operate in the global economy—and how they implement strategies to become better corporate citizens.

Law, JD / Accounting and Business Administration, MSAMBA (Boston)

The Northeastern University School of Law and the D'Amore-McKim School of Business offer a combined degree that results in a Juris Doctor and Master of Science in Accounting and Business Administration. Students without a previous accounting background study how to operate effectively in specialized fields such as taxation law, corporate finance, or mergers and acquisitions. Students have an opportunity to gain advanced legal expertise alongside future-forward accounting and business knowledge.

Our combined degree program is a full-time, four-year course of study. Students usually complete two years of the law curriculum, followed by 15 months of the combined accounting and business administration curriculum, before returning to finish their studies at the School of Law.

Students gain valuable work experience in law and public accounting before they graduate. They can make a real impact during two co-ops in legal departments, law firms, government agencies, judges' chambers, or other legal settings. Students also experience working as an accounting associate during the busy tax season through a corporate residency at Big 4 or other globally known accounting firms.

Students concurrently pursue the two degrees and may count 12 semester hours of nonlaw coursework from the accounting and business administration curriculum toward the law curriculum. The corporate residency at an accounting firm may fulfill the requirement for the third co-op required for the law curriculum. Students are encouraged to consult their law advisor to select accounting and business classes that satisfy JD requirements.

Law, JD / Business Administration, MBA—Full-Time (Boston)

The JD/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to operate in increasingly interdependent legal and business spheres. As new technology disrupts industries and data availability and sophisticated use shifts the business landscape, our JD/MBA (<https://damore-mckim.northeastern.edu/programs/jd-mba/>) students prepare to guide corporate-level strategy and become the leaders businesses need.

Our JD/MBA program is a full-time, four-year course of study that includes three semester-long co-op work experiences arranged through Northeastern Law. Students complete three years of law school, taking a break after either year one or two to complete a year of business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they may add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may count 9 semester hours of nonlaw coursework from the JD curriculum toward the interdisciplinary and elective requirements of the MBA degree and up to 12 semester hours from the MBA curriculum toward the JD degree. Students should work with their MBA advisor to select JD courses that will fulfill MBA requirements and with their law advisor to choose MBA courses that will satisfy JD requirements.

Law, LLM / Business Administration, MBA—Full-Time (Boston)

Law, LLM / MBA

The LLM/MBA dual degree is offered through a partnership between Northeastern University School of Law and the D'Amore-McKim School of Business to position students to harness legal and business skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm-mba/>) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, 20-month course of study. Students start taking classes in business school, take law courses next, and finish with business courses.

Students specialize their program by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by choosing an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

Law, LLM—Experiential / MBA

The LLM/MBA dual degree is offered through a partnership between Northeastern Law and the D'Amore-McKim School of Business to position students to harness business and legal skills to serve their clients' needs. In the LLM/MBA (<https://damore-mckim.northeastern.edu/programs/llm->

mba/) program, students prepare to assume leadership positions where they'll navigate complex legal issues, answer their clients' calls for legal expertise, and engage as partners to develop new models for businesses, nonprofit organizations, and governments worldwide.

The LLM/MBA program is a full-time, two-year course of study that includes a semester-long co-op work experience arranged through Northeastern Law. During the course of their studies, students take classes in business school and the School of Law and complete a law co-op.

Students specialize their degree by selecting two in-demand business concentrations from the D'Amore-McKim School of Business. Or, they could add expertise in another professional area by selecting an interdisciplinary MBA x concentration in a highly relevant field offered through partnerships with other Northeastern colleges.

Students will concurrently pursue the two degrees and may be able to count up to 12 semester hours of coursework toward both degrees. Students should consult their MBA and LLM program advisors for more information.

Quantitative Finance, MSF / Business Administration, MBA—Full Time (Boston)

Northeastern University's D'Amore-McKim School of Business is designed to position students to become leaders ready for the rapidly changing financial services industry. The MSF Quantitative Finance/MBA (https://damore-mckim.northeastern.edu/programs/full-time-ms-finance-mba/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=ftmsfmba) dual degree integrates business knowledge with advanced mathematical and technical skills.

Integrating Classroom and Professional Experiences

Learning by doing is a hallmark of a Northeastern MBA. Students apply their knowledge to actual business challenges through experience-fueled electives and class projects. Students gain invaluable experience at the intersection of business and finance through a corporate residency, translating ideas into action for three, six, or up to 12 months. Far removed from the typical internship, students work full time at a leading firm or startup in their field and have significant responsibilities as they work to deliver on organizational goals.

Cultivate Advanced Quantitative Finance Skills

Students pursue a major in quantitative finance that emphasizes the intersection of technology and business analytics with finance. Coursework integrates economics, mathematics, and computer science with financial theory and application. Students have an opportunity to develop mathematically demanding quantitative skills and fintech expertise.

The 360 Huntington Fund

By participating in the Fund, students may earn 1 semester hour per semester with the option to fulfill a 3-semester-hour elective course requirement by participating for three terms.

Concentrate in Analytics

Students specialize their MBA degree by concentrating in analytics.

Graduate Certificates

Northeastern University's D'Amore-McKim School of Business offers graduate certificates (<https://damore-mckim.northeastern.edu/graduate-certificates/>) to help professionals quickly develop knowledge through short-term programs focused on a specific business area. Students may choose to fill in gaps in their business knowledge or strengthen their skills in market-aligned areas to expand their career potential.

Our business faculty, many of whom are also consultants, respected management leaders, and startup founders, share their insights. Additionally, students will have classmates from a multitude of industries who share their passions and interests, enriching the learning experience.

Programs

- Accounting and Financial Decision Making, Graduate Certificate (Boston) (p. 307)

- Sustainability and Business, Graduate Certificate (Boston) (p. 321)

Accounting and Financial Decision Making, Graduate Certificate, (Boston)

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Accounting and Financial Decision Making (http://www.damore-mckim.northeastern.edu/academic-programs/certificates/accounting/?utm_medium=website&utm_source=catalog&utm_campaign=gcafdm) helps students build critical skills for essential financial practices, positioning them for a managerial role. Students learn to see business problems clearly, identify the strategic implications of potential solutions, and develop innovative ways to achieve organizational goals.

In just five courses—with the option to take a sixth to deepen their learning—students will advance their understanding of critical financial practices and build the skills necessary to analyze financial statements, assess risk, and make informed decisions. Depending on the electives they choose, they'll explore critical topics in greater depth, such as resource acquisition, capital budgeting, and information technology.

Students may enroll in the Graduate Certificate in Accounting and Financial Decision Making for full-time or part-time study.

Program Requirements

Core Requirements

Code	Title	Hours
ACCT 6200 and ACCT 6201	Financial Reporting and Managerial Decision Making 1 and Financial Reporting and Managerial Decision Making 2	4.5
FINA 6200	Value Creation through Financial Decision Making	3
MGSC 6200	Information Analysis	3

Elective

Code	Title	Hours
In consultation with advisor, complete one graduate-level course for which prerequisites have been met. Some courses may fulfill requirements of the MBA program.		1.5-3

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4

Experiential Courses

Code	Title	Hours
Complete 4 semester hours from the following:		4
CRIM 6600	Justice, Technology, and AI	
EDUT 6150	AI in Education	
HLTH 5800	AI Across the Health Sciences	
IE 5640	Data Mining for Engineering Applications	
JRNL 6460	AI in Media Industries	
MISM 6250	Strategic AI for Business

Brand Management, Graduate Certificate (Boston)

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Brand Management (https://damore-mckim.northeastern.edu/programs/brand-management-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=GCBM) helps students create and manage brands that resonate with consumers. Students develop a strategic mindset and specialized skills equipped for today's dynamic digital marketing environment.

In just four courses—with an option to take a fifth to deepen your learning—you'll learn how to develop an integrated brand strategy that helps students position an organization for growth. Your coursework will explore the brand-building process across platforms, and you'll choose electives that take a deeper look at topics such as consumer behavior, marketing research, and innovation.

Program Requirements

Minimum 3.000 GPA required

Business Administration, Graduate Certificate (Boston)

Northeastern University D'Amore-McKim School of Business's Graduate Certificate in Business Administration (https://damore-mckim.northeastern.edu/programs/business-administration-certificate/?utm_medium=content&utm_source=catalog&utm_campaign=dmsb-melt-evg-glo-comp-bos-bus-gcbaa-con-2022_02_25-gcba_catalog) helps students gain forward-thinking, relevant, in-demand business skills.

There are three ways to earn this graduate certificate:

Build Your Own

Students align their courses to their professional goals by choosing one area of focus or widening their scope and building expertise on all business fundamentals as they build their curriculum (<https://damore-mckim.northeastern.edu/programs/business-administration-certificate/academic-details/build-your-own-curriculum/>). Students can select any graduate-level business courses offered that semester, provided they meet course prerequisites. Course offerings vary by term and campus.

Eight-month International Student Cohort Curriculum

Students take five courses as a part of an international student cohort (http://www.damore-mckim.northeastern.edu/academic-programs/certificates/business-administration/academics/international-cohort/?utm_medium=website&utm_source=catalog&utm_campaign=gcba). Students expand their business knowledge in financial reporting, managerial decision-making, information analysis, and managing information resources.

Part-Time MBA Path Curriculum

Students take six foundational quantitative and business classes from the D'Amore-McKim MBA curriculum in the Part-Time MBA Path (<https://damore-mckim.northeastern.edu/programs/business-administration-certificate/academic-details/part-time-mba-path-curriculum/>).

Minimum 3.000 GPA required

Mutual Fund Management, Graduate Certificate (Boston)

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Mutual Fund Management (http://www.damore-mckim.northeastern.edu/academic-programs/certificates/mutual-fund-management/?utm_medium=website&utm_source=catalog&utm_campaign=gcmfm) helps students build the skills to become knowledgeable asset managers that create value by spotting opportunities and capitalizing on growth.

In just four courses—with the option to take a fifth course to deepen your knowledge base—students learn the essentials of managing funds, including allocating assets, managing risk, and complying with regulations. Depending on the electives chosen, students explore critical topics in greater depth, such as market analysis or fixed-income securities.

Students may enroll in our Graduate Certificate in Mutual Fund Management for part-time study.

Program Requirements

Core Requirements

Code	Title	Hours
In consultation with advisor, complete 9 graduate-level semester hours for which prerequisites have been met:		9
FINA 6202	Analysis of Financial Institutions and Markets	
FINA 6203	Investment Analysis	
FINA 6212	Fixed-Income Securities and Risk	
FINA 6219	Portfolio Management	
FINA 6360	Fund Management for Analysts (Complete 3 semester hours through our student managed mutual fund. Each course is 1 semester hour and may be taken multiple times.)	

Electives

Code	Title	Hours
In consultation with advisor, complete 3 graduate-level semester hours for which prerequisites have been met:		3
FINA 6202	Analysis of Financial Institutions and Markets	
FINA 6203	Investment Analysis	
FINA 6211	Financial Risk Management	
FINA 6212	Fixed-Income Securities and Risk	
FINA 6213	Investment Banking	
FINA 6217	Real Estate Finance and Investment	
FINA 6219	Portfolio Management	
FINA 6360	Fund Management for Analysts (Complete 3 semester hours through our student managed mutual fund. Each course is 1 semester hour and may be taken multiple times.)	

Program Credit/GPA Requirements

12 total semester hours required; may take a maximum of 15 semester hours

Minimum 3.000 GPA required

Product Management, Graduate Certificate (Boston)

The Graduate Certificate in Product Management is designed for students with undergraduate degrees in a wide range of fields—including computer science, engineering, economics, business administration, design, and psychology—who want to build the skills necessary for success as product managers. This certificate equips students with the expertise to excel in this dynamic field, whether they are early career professionals, transitioning into product roles, or looking to differentiate themselves in a competitive job market. The program provides a flexible, cost-effective alternative to a full MS program while offering hands-on learning experiences.

Curriculum and Structure

This interdisciplinary certificate offers a structured yet adaptable curriculum that balances foundational knowledge with practical, industry-relevant skills.

The program consists of four courses (12–13 semester hours total):

- Three core courses covering fundamental concepts across key product management functions
- One experiential course (1 credit) providing hands-on learning opportunities tailored to students' backgrounds and career goals in product management

This certificate allows students to gain real-world experience, develop in-demand skills, and enhance their career opportunities within a streamlined, flexible structure.

Admissions and College Affiliation

Students are admitted to the certificate program through one of the following colleges and follow the academic policies of their home college:

- College of Arts, Media and Design
- College of Engineering
- D'Amore-McKim School of Business
- Office of the Provost and College of Professional Studies¹

This certificate provides a fast, flexible, and practical pathway for students looking to build expertise in product management while benefiting from Northeastern University's strong academic and professional support network.

¹ Program Structure and Transition

- For the 2025–2026 academic year, the Graduate Certificate in Product Management is being offered as a collaboration between the College of Professional Studies and the Office of the Provost. During this period, students will follow Northeastern's graduate academic calendar and be governed by the academic policies and procedures outlined in the university's *Graduate Catalog*.
- While designated under the Office of the Provost, students will receive full academic and student support services from the College of Professional Studies including academic advising, co-op and career advising, and access to the International Tutoring Center.

- Beginning in the 2026–2027 academic year, the certificate program will transition fully to the College of Professional Studies. At that time, students will be officially designated under CPS in the academic system of record and governed by its academic policies as outlined in the university's *Graduate Catalog*.

Program Requirements

Requirements

Code	Title	Hours
Fundamental Concepts		
ARTG 5600	Experience Design Studio 1: Principles	4
EMGT 6750 or PDM 6000	Advanced Product Management Foundations of Product Management	3-4
INNO 6409	Innovation Portfolio Management	4
Experiential Course		
Complete one of the following:		1
ARTG 5540	Design and Product Management	
EMGT 6760	Technical Product Management	
INNO 6411	Product Innovation Management	
PDM 6940	Product Analytics	

Program Credit/GPA Requirement

12 total semester hours required (additional hours may be required based on student choice of course options)

Minimum 3.000 GPA required

Supply Chain Management, Graduate Certificate (Boston)

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Supply Chain Management (https://damore-mckim.northeastern.edu/programs/supply-chain-management-certificate/?utm_source=internal-referral&utm_medium=nu-catalog&utm_campaign=gcscm) helps students become skilled supply chain leaders who can respond to disruption with agility and confidence.

In just four courses—with the option to take a fifth course to deepen their knowledge base—students build a strong portfolio of skills for optimizing supply chains from end to end, advancing their knowledge of sourcing, logistics, inventory management, and process control. They also have the opportunity to explore elective topics important to their professional goals, such as creating and managing sustainable supply chains.

Program Requirements

Core Requirements

Code	Title	Hours
SCHM 6201	Operations and Supply Chain Management	3
SCHM 6213	Global Supply Chain Strategy	3

Electives

Code	Title	Hours
In consultation with advisor, complete 6 graduate-level semester hours for which prerequisites have been met:		6
SCHM 6211	Logistics and Transportation Management	
SCHM 6214	Sourcing and Procurement	
SCHM 6215	Supply Chain Analytics	
SCHM 6221	Sustainability and Supply Chain Management	
SCHM 6223	Managing Healthcare Supply Chain Operations	
SCHM 6224	Demand Planning and Forecasting	

Program Credit/GPA Requirements

Minimum 3.000 GPA required

Sustainability and Business, Graduate Certificate (Boston)

Northeastern University D'Amore-McKim School of Business' Graduate Certificate in Sustainability and Business (https://damore-mckim.northeastern.edu/programs/sustainability-business-certificate/?utm_medium=content&utm_source=catalog&utm_campaign=dmsb-melt-evg-glo-comp-bos-bus-gcsb-con-2022_02_25-gcsb_catalog) helps students build the skills to increase efficiency, drive value, and build trust through sustainable practices.

In just four courses—with the option to take a fifth course to expand their learning—students learn to implement sustainable business strategies to create a competitive edge for organizations. Depending on the electives chosen, students may dive into social entrepreneurship, public policy, and sustainable supply chain management.

Students may enroll in our Graduate Certificate in Sustainability and Business for part-time study.

Khoury College of Computer Sciences

Website (<https://khoury.northeastern.edu>)

Elizabeth Mynatt, PhD, Dean

Ben Hescott, PhD, Teaching Professor, Senior Associate Dean of Academic Programs and Student Experience

Amit Shesh, PhD, Assistant Dean of Master's Programs

Amal Ahmed, PhD, Associate Dean for Graduate Programs

Meg Bebis, Senior Director for Graduate Student Services and Career Development

617.373.6840

khoury-gradschool@northeastern.edu

At the Khoury College of Computer Sciences, we are inspired by our information-driven world and strive to make it a better place. Our students engage in rigorous learning and real-world co-op experiences. Our renowned faculty shapes minds, sparks innovation, and inspires ideas. Our interdisciplinary research breaks new ground to solve everyday problems.

Khoury maintains a strong research program with significant funding from the major federal research agencies and private industry. With a substantial increase in faculty strength and research funding in recent years, we are actively seeking highly motivated, bright, hardworking students who are interested in pursuing a PhD degree in computer science or in the interdisciplinary field of cybersecurity, network science, or personal health informatics. Graduate students and faculty members are involved in exciting projects in a wide range of research areas, including programming languages, software engineering, distributed and parallel computing, cryptography, network security, health informatics, network science, databases, information retrieval, robotics, visualization, and artificial intelligence. Colloquia and weekly research seminars contribute to the vibrant research atmosphere in the college.

Our curriculum encompasses both the breadth and depth needed for graduate school. Specialized, advanced courses for PhD students in computer science, cybersecurity, and personal health informatics are designed to prepare all students for research early in their doctoral education.

The Master of Science in Computer Science curriculum combines the study of basic algorithms and theoretical computer science principles with advanced programming and software design methods. It offers students the opportunity to develop the analytical and problem-solving skills needed to pursue challenging professional careers.

Khoury also offers the Master of Science in Cybersecurity, which focuses on information technology and incorporates the understanding of the social sciences, law, criminology, and management needed to prevent and combat cyberattacks.

In addition, we offer five interdisciplinary master's degree programs: the Master of Science in Artificial Intelligence with the College of Engineering, which provides a comprehensive framework of theory and practice in this emerging field and incorporates elements of data science, robotics, and machine learning; the Master of Science in Health Informatics with Bouvé College of Health Sciences, which seeks to prepare graduates to use information technology to improve healthcare delivery and outcomes; the Master of Science in Data Science with the College of Engineering, which is designed to give students a comprehensive framework for processing, modeling, analyzing, and reasoning about data; the Master of Science in Robotics with the College of Engineering, which offers students an opportunity to obtain a comprehensive understanding of the algorithms, sensors, control systems, and mechanisms used in robotics; and the Master of Science in Game Science and Design with the College of Arts, Media and Design, which seeks to provide students with a comprehensive understanding of how successful game products are created in a player-centric environment.

The Align program enables intellectually curious students to earn a Master of Science in Computer Science or Data Science without a background in the field. Regardless of undergraduate major or prior programming experience, Align's custom curricula is designed to prepare students for high-demand industries.

Khoury College is a tightly knit community, and the faculty, staff, and students interact regularly through town hall meetings, social gatherings, lectures, and seminars. A diverse, multicultural graduate student body and faculty encourage rich extracurricular interaction. The Master's Council organizes a number of social events to promote friendship and camaraderie within the Khoury community.

Academic Policies and Procedures

- Academic Integrity (p. 323)
- Academic Probation and Dismissal (p. 324)
- Attendance Policy (p. 324)
- Campus Transfer (p. 324)
- Certificates (p. 325)
- Course Overload (p. 325)
- Incomplete Grades (p. 326)
- Satisfactory/Unsatisfactory (Pass/Fail) Policy (p. 326)
- Reentry to Program (p. 326)
- Retaking Courses (p. 326)
- Transfer of Credit (p. 326)

Academic Integrity

Academic Integrity Violation Submission and Review Process

ACADEMIC INTEGRITY POLICY

A faculty member who suspects that a graduate student has violated the university's Academic Integrity Policy (p. 88) must offer to meet with the student to discuss the suspected violation. The faculty member may ask the student to provide supporting documentation and may gather information from other students involved in the incident.

If the faculty member finds that the student has violated the Academic Integrity Policy, the faculty member may take appropriate action and can include adjusting the student's grade, requiring additional academic work, and/or submitting a failing grade for the student's qualifying examination. The faculty member is encouraged to submit an incident report to the Office of Student Conduct and Conflict Resolution and forward the report to graduate administration at Khoury College of Computer Sciences, which handles suspected violations of the Academic Integrity Policy. Any penalties must be imposed by the faculty member within three weeks of learning of the suspected violation.

The Graduate Academic Integrity Committee regularly reviews all reports and appeals. Students will be notified of the decision made by the Graduate Academic Integrity Committee within two weeks.

Students found in violation of the Academic Integrity Policy will be placed on deferred suspension. A deferred suspension is a formal warning for a violation and remains with the student for their entire time in the program. Based on the severity of the violation, the Graduate Academic Integrity Committee may recommend one or more of the following sanctions:

- Removal of co-op privilege for the remainder of time in the MS program
- Suspension or deferral of co-op for one or two semesters
- Disqualification from paid graduate student positions within the college (i.e., graders, course assistants, TA/RA appointments)

Students deemed to be in violation of the Academic Integrity Policy for a second instance may be terminated from their graduate program.

In accordance with university policy, the college maintains the right to override decisions issued by the Office of Student Conduct and Conflict Resolution in academic performance.

Students will have the right to appeal all decisions issued by the Graduate Academic Integrity Committee. The appeals process is outlined below.

Students may also refer to the Academic Consequences for Violating the University Academic Integrity Policy in the graduate catalog (p. 91).

The Graduate Academic Integrity Committee offers a reinstatement process. Students can apply for some or all of their suspended privileges to be reinstated after three months or the next semester, whichever is later. Students are notified by the committee when they are eligible for the reinstatement process.

APPEALS PROCESS

Students are entitled to appeal all decisions made by the college's Graduate Academic Integrity Committee. The appeals committee is comprised of a graduate co-op faculty member, the senior director of graduate student services, and one Khoury faculty member. Cases submitted concerning students from interdisciplinary programs will be reviewed by an appeals committee that includes a member of college administration at the assistant dean, associate dean, or faculty level. Student appeals will be heard by the committee and then by the college senior associate dean. In the event the appeal is denied at both college levels, the student will have the right to have their appeal heard by the university's Academic Appeals Resolution Committee. College-level appeals will be heard monthly, in accordance with the Graduate Academic Integrity Committee meeting schedule.

Details regarding the university academic appeals process can be found in the graduate catalog (p. 133).

Academic Probation and Dismissal

Academic Probation and Dismissal

A student whose overall GPA falls below 3.000 will be automatically placed on academic probation and will be notified by the college. Once on probation, a student has one academic semester (summer excluded) to achieve a 3.000 GPA. If the GPA is still unsatisfactory at the end of that semester, the student will be eligible for dismissal from the graduate program. In programs that require prerequisite or Align bridge courses, these courses count toward the GPA for academic standing.

Students should refer to their program's requirements page regarding any applicable core GPA requirement.

Appeals Process

Students are entitled to appeal dismissal and dismissal override decisions made by the college's Academic Standing Committee. Appeals should be submitted within five business days of dismissal notification. All appeals to the college should be submitted in writing. The appeals committee will be comprised of the associate dean of graduate programs, the associate dean of graduate program administration, the director of graduate operations, and an academic advisor. Cases submitted concerning students from interdisciplinary programs will be reviewed by an appeals committee that includes a member of the partner college administration at the associate dean or faculty level. Student appeals will first be heard by the committee itself and then by the college dean. Appeals will be reviewed within five business days of submission by the Academic Standing Committee. In the event the appeal is denied at both college levels, the student will have the right to have their appeal heard by a provost review committee.

Details regarding the university appeal process can be found in the graduate catalog here (p. 133).

Attendance Policy

Students are expected to attend all classes and lab sections for their registered courses. Any student who anticipates missing a class due to illness or emergency situations is expected to contact their professor as soon as possible.

The Khoury College of Computer Sciences expects students who are eligible to travel over winter and summer breaks to return to campus on time and to be present for the first week of classes each term. Students who do not arrive back to campus on time may be dropped from their classes. The Office of the University Registrar posts current and future academic calendars (<https://registrar.northeastern.edu/group/calendar/>) so travel plans can be made accordingly.

Please see Attendance Requirements (p. 93) for more information.

Campus Transfer

Khoury College graduate students may request an intercampus transfer after at least one academic year (two full-time semesters) in their graduate program if their academic program is offered at the target campus. For campus transfers, the eligible full-time semesters are fall, spring, and full summer. For Align programs, students must have completed their Align Bridge coursework.

Transfer Eligibility Requirements for all Programs Except MSCS Computer Science—Align Online (p. 325)

1. Student has met with their current academic advisor to discuss transfer option.
2. Minimum of 3.000 overall grade-point average.
3. Completed two full-time academic semesters on their original campus. (*Note:* incoming students should work with the Office of Admissions to request a campus change.)
4. All Align students: successful completion of bridge courses at home campus.
5. Student is relocating for a work experience and wants to complete their academic program at the new location and can provide documentation.
6. Transfers to the Boston campus will be considered for approval if a student has secured a research assistantship opportunity and can provide documentation from their sponsoring faculty.
7. Other unique circumstances must be approved by the senior director for graduate student services.

If a student is found to misrepresent their circumstances in the intercampus transfer process, they will be referred to Khoury College's Academic Integrity Committee.

IMPORTANT CONSIDERATIONS FOR ALL MS STUDENTS

- Intercampus transfer requests are not guaranteed approval and may be denied based on capacity at their target campus. Transfers are approved or denied by Khoury's senior director for graduate student services or associate dean for graduate network.
- Students should consider living, housing, and moving expenses when considering an intercampus transfer.
- Students who cancel an approved transfer to a specific campus in a specific term will need to work with their advisor to resubmit a new transfer request if their plans change. Prior approval does not guarantee approval of a new request.
- Students considering transfer to the Vancouver campus should review Canadian study permit and co-op/internship policies here (<https://international.northeastern.edu/ogs/student-support/global-campuses/canada/>) before making their decisions. Canada's post-graduation

work permit (PGWP) has specific restrictions around the length of a program that must be completed in Canada. Students who transfer to the Vancouver campus with remaining length of their degree program of less than eight months are not eligible for the PGWP.

- Students graduating from Canadian campuses must complete a capstone course prior to graduation.
- Vancouver students considering transfer to a U.S. campus should review immigration/visa information (<https://international.northeastern.edu/ogs/new-students/>) and co-op/internship policies (<https://international.northeastern.edu/ogs/employment/off-campus-employment/>) before making their decision.

DEADLINES FOR TRANSFER (EXCLUDING VANCOUVER)

- Transfer for fall term: two weeks prior to fall registration date
- Transfer for spring term: two weeks prior to spring registration date
- Transfer for summer term: two weeks prior to summer registration date

DEADLINES FOR TRANSFER TO VANCOUVER*

- Transfer for fall term: 90 days prior to fall registration date as determined
- Transfer for spring term: 90 days prior to spring registration date
- Transfer for summer term: 90 days prior to summer registration date

MSCS Computer Science—Align Online Student Intercampus Transfer Policy

Students enrolled in the MSCS Computer Science—Align (p. 402) program (with catalog term fall 2023 onward) *for fully online course delivery* are eligible to transfer to an on-ground campus of their choosing at specific points in their program:

- MSCS Computer Science—Align (p. 402) online students in good standing can transfer to an on-ground campus after they successfully complete the Align Bridge coursework: Intensive Foundations of Computer Science (CS 5001), Discrete Structures (CS 5002), Object-Oriented Design (CS 5004), and Data Structures, Algorithms, and Their Applications within Computer Systems (CS 5008). A student who instead seeks to transfer after successful completion of two semesters of degree coursework should contact their advisor to explore general transfer eligibility requirements.

MSCS Computer Science—Align (p. 402) online students must be in good academic standing (minimum 3.000 overall GPA) and meet with their academic advisor to begin the transfer process.

* **Transfer to Vancouver requires more time due to study permit process.*

Certificates

Khoury College of Computer Sciences offers numerous graduate certificates. These certificates may be completed as stand-alone credentials or in combination with a graduate degree. The graduate certificates offer the opportunity for working professionals or graduate students to broaden their skills and knowledge or stay competitive in the job market. Graduate coursework may be completed as part of a certificate program and applied toward a graduate degree in Khoury College.

Course Overload

The full-time load for Khoury College graduate students is 8-9 credits per semester, depending on the program. For summer, students may take either of the following combinations: 8 credits over the summer full term OR 4 credits in summer first half and 4 credits in summer second half. Students are not permitted to take 8 credits in either summer first half or summer second half as these are accelerated terms.

Khoury College graduate students may request a credit overload after having earned at least 8 credits of courses and obtained an MS-level grade-point average of 3.500. The following courses excluded from consideration in the GPA include Intensive Foundations of Computer Science (CS 5001), Discrete Structures (CS 5002), Data Structures, Algorithms, and Their Applications within Computer Systems (CS 5008), Introduction to Programming for Data Science (DS 5010), Introduction to Linear Algebra and Probability for Data Science (DS 5020), Cybersecurity: Technologies, Threats, and Defenses (CY 5001)*, and Foundations of Software Security (CY 5003).

A credit overload includes a maximum of 12 credits in a fall or spring term. For summer, students may register for the following combinations: 12 credits over the summer full term OR 4 credits in summer first half, 4 credits in summer full, and 4 credits in summer second half. Students are not permitted to take 8 credits in either summer first half or summer second half as these are accelerated terms.

- * Cybersecurity: Technologies, Threats, and Defenses (CY 5001) is excluded only for students in the Master of Science in Cybersecurity—Align program.

Incomplete Grades

Students who are considering an incomplete (I) grade for a course must read Requesting and Clearing An Incomplete Grade (p. 123).

After completing the Incomplete Grade Contract (https://service.northeastern.edu/registrar/?id=kb_article_view&sysparm_article=KB000019929) with instructor's approval and signature, the student must send a copy to their academic advisor for recordkeeping.

Satisfactory/Unsatisfactory (Pass/Fail) Policy

Khoury College does not allow Khoury graduate students to elect a Satisfactory/Unsatisfactory grading scheme for courses that are letter graded.

Reentry to Program

A student not registered for a course in their program of study for three consecutive semesters will be marked inactive and withdrawn from the program. A student who has been withdrawn must reapply to their program of study.

A student may be dismissed due to an academic integrity violation, student conduct, or for making insufficient academic progress. While a student who has been dismissed can reapply for admission, their application is not likely to be considered favorable without sufficient evidence toward future student success.

A student on an official leave may return without reapplying if they return within one year from the start of their leave. A student who is on any leave for more than one year is officially withdrawn from their program and must reapply.

Readmitted students must follow the course catalog and program requirements of the academic year of readmission.

If the program is no longer offered, students must apply to a new program and meet the conditions of admission to the new program. Courses from the previous program are not guaranteed to transfer to the new program.

If readmitted, any course, course waivers, or transfer credits that a student was previously awarded will be reevaluated. There is a seven-year time limit on course transfers; any earned credit older than seven years is unlikely to transfer.

Retaking Courses

When the appropriate course is available, students may retake a nonrepeatable course up to two times to earn a better grade and must be approved by the student's academic advisor. In all cases, the most recent grade earned in a course is the one used in calculating the overall grade-point average followed by the retake notation I, indicating the course grade is included in the overall GPA; however, previous grades remain on the transcript followed by the retake notation E, signifying that that course grade has been excluded. Consult your academic advisor before retaking a course. Students are required to pay normal tuition for all retaken coursework.

When the course description for the student's registration term indicates that the course may be repeated up to a certain number of course completions, each completion of the course (up to the limit stated in the course description) will appear on the student's transcript, and the grade for each such completion will be used in the calculation of the student's overall GPA.

Transfer of Credit

Transfer of Credit Taken Before Enrollment at Khoury College

A maximum of 9 semester hours of credit obtained at another institution may be accepted toward the degree, provided the credits meet the following criteria:

- Work is completed at the graduate level for graduate credit
- Student received a grade of 3.000 or better (as per Northeastern University policy (p. 143))
- Credits were earned at an accredited institution
- Credits have not been used toward any other degree
- Credits must not be more than five years old at the time of transfer

Students can submit a request for transfer of credit after they have begun taking courses in the Khoury College of Computer Sciences. Transfer credit will be offered only for courses that match a course offered at Northeastern and that have been approved by the graduate committee. Students are advised to contact their academic advisor to submit a request.

A student currently enrolled in a Khoury degree program may not take courses outside of the college to meet degree requirements, unless the course(s) were completed before enrollment.

Transfer of Credit Taken During Enrollment at Khoury College

Once students begin their Khoury College graduate degree program, they are expected to complete all coursework for their degree at Northeastern.

Students who wish to take courses at another institution and transfer the credit to Northeastern must obtain *prior* approval from the college. This includes online and asynchronous courses.

Granting approval follows the approval policy for courses that are not part of the degree. Courses may not be approved if counting them exceeds the full-time load (or approved overload) for the semester in which they are to be taken.

Computer Science

At the Khoury College of Computer Sciences, we are inspired by an increasingly interconnected society, informed by a rapidly changing job market, and focused on addressing the challenges of a complex world. Our goal is to equip students with knowledge as diverse as it is deep. Our programs provide a strong technical foundation and an essential understanding of computing concepts while integrating computer and data sciences across disciplines and industries.

Our master's degrees are advanced programs that are designed to prepare students to be job ready through a rigorous curriculum, innovative research, experiential learning, and a collaborative environment rich in faculty expertise.

Our research-driven doctoral programs offer students an opportunity to engage in exciting projects, a vibrant community, and a challenging curriculum that offers breadth and depth in areas both within computer science and across disciplines throughout Northeastern University.

Graduate education in computer science also features the top-ranked Northeastern co-op program, enabling students to supplement their classroom education with real-world experience in the field.

Doctor of Philosophy in Computer Science

The PhD program in computer science is designed to prepare students for careers in academia and industry—from conducting research to developing systems to publishing and presenting papers. The rigorous curriculum provides a broad background in the fundamentals of computer science and advanced courses in a wide range of focus areas.

The past decade has witnessed a dramatic increase in Northeastern's international reputation for research and innovative educational programs. Since 2014, the Khoury College of Computer Sciences has hired 71 outstanding faculty members and plans to continue this strategic growth in the coming years, advancing its position (<http://csrankings.org/>) among the nation's top research universities. Today, the college has a diverse faculty (<https://www.ccis.northeastern.edu/role/tenured-and-tenure-track-faculty/>) of 103 working in a wide range of research areas (<https://www.ccis.northeastern.edu/research/research-areas/>). Forty-one faculty members have joint appointments with other colleges and schools including engineering, science, business, social sciences and humanities, health sciences, law and arts, and media and design.

Master of Science in Computer Science

Northeastern's Master of Science in Computer Science is designed to prepare students for a variety of careers in computer science. The program combines both computing and important application domains—enabling students to increase their broad-based knowledge in the field while focusing on one curricular concentration selected from a range of options including artificial intelligence, computer-human interaction, graphics, programming languages, software engineering, data science, networks, theory, game design, systems, and information security.

Align Master of Science in Computer Science

MSCS—Align students come from a wide variety of backgrounds—with undergraduate majors ranging from math, biology, history, engineering, and classics. In this program, students have an opportunity to acquire both the knowledge needed to transition into a new career and the practical skills to build the next great app.

MSCS—Align Online students take online courses from anywhere, with the flexibility to complete the courses fully online or transfer to one of our strategically located campuses after completing the bridge portion of the program. Align Online students will also have three in-person campus visits during the first two semesters to form peer and professional connections. The MSCS—Align Online option is not an F-1 compliant program.

Graduate Certificate in Computer Science

The postbaccalaureate certificate is designed to give students a solid foundation in the mathematical and theoretical underpinnings of computer science, including the areas of discrete mathematics, basic programming, data structures, object-oriented programming, algorithms, and computer systems. The goal of the certificate is to provide foundational knowledge in computer science that is valuable in both the workplace for career advancement as well as to those looking to move into graduate programs within the discipline.

The Graduate Certificate in Computer Science will serve as the foundational premaster's courses in the Align program.

Graduate Certificate in Data Analytics

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the Khoury College of Computer Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policymaking processes. The program is designed to provide students with foundational knowledge in data science—including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

Graduate Certificate in Inclusive Computer Science Education

The Graduate Certificate in Inclusive Computer Science Education is designed to prepare students to teach computer science principles and concepts in the context of a K–12 environment. Building on the successful Computer Science—Align program, this certificate assumes no prior computer science experience. Through coursework and project-based learning, students have an opportunity to obtain the foundational knowledge necessary to teach basic computing concepts and programming at a variety of educational levels both as stand-alone courses and integrated into other disciplines. The certificate emphasizes how teachers can create an inclusive classroom environment, actively work to dispel stereotypes, and build student confidence. Students who finish this certificate will be well positioned to obtain K–12 certification in computer science.

Programs

Doctor of Philosophy (PhD)

- Computer Science (Boston) (p. 329)
- Network Science (Boston) (p. 241)
- Personal Health Informatics (Boston) (p. 339)

Master of Science (MS)

- Artificial Intelligence (Boston) (p. 164)
- Artificial Intelligence (Portland) (p. 345)

Computer Science, PhD (Boston)

The PhD in Computer Science is designed to prepare students for careers in academia, industrial and national research labs, and technical leadership in industry and government. The rigorous curriculum provides a broad background in the fundamentals of computer science, advanced courses in a wide range of focus areas, and opportunity to make an impact at the forefront of computing. The program provides training in conducting research, publishing and presenting papers, developing systems, and establishing science and technology policy.

Coursework

A minimum of 48 semester hours of coursework beyond the BS/BA degree is required of all students.

All students must demonstrate sufficient knowledge in the fundamentals of computer science, as well as the ability to carry out research in an area of computer science.

The student must maintain a minimum grade-point average of 3.500 among the six core courses and receive a grade of B or better in each of these courses. Students who have taken equivalent courses in other institutions may petition to be exempted from the course(s) (subject to the approval of the PhD computer science curriculum committee). Each student may repeat a course once for no more than three out of the six courses if they do not receive a B or better in the course. Students with a Master of Science in Computer Science may petition to the PhD computer science curriculum committee for an exemption from these courses. Petition forms are available on the college website.

The fields listed do not necessarily represent areas of specialization or separate tracks within the PhD program. Rather, they attempt to delineate areas on which the student must be examined in order to measure their ability to complete the degree. Therefore, they may be adjusted in the future to reflect changes in the discipline of computer science and in faculty interests within the Khoury College of Computer Sciences. Similarly, these fields do not represent the only areas in which a student may write their dissertation. They are, however, intended to serve as a basis for performing fundamental research in computer science.

Paper Requirement

To demonstrate research ability, the student is required to submit to the PhD committee a research or a survey paper in an area of specialty under the supervision of a faculty advisor. A submitted paper from a student is considered to have fulfilled the paper requirement if:

1. The paper has been accepted by a selective conference.
2. The student has made a substantial contribution to the paper.
3. The advisor has endorsed the paper with a written statement indicating the student's contribution.
4. The PhD computer science curriculum committee has voted on a positive recommendation. The committee may require a presentation from the student before making a recommendation.

Admission to Candidacy

Upon completion of the course and the research paper requirements, the student is admitted to candidacy for the PhD degree. It is highly recommended that the student complete the candidacy requirement by the end of their second year but no later than the third year.

Residency

One year of continuous full-time study is required after admission to the PhD candidacy. It is expected that during this period the student will make substantial progress in preparing for the comprehensive examination.

Teaching Requirement

All computer science PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment, or quiz, or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

Comprehensive Examination/Dissertation Proposal

After the student has achieved sufficient depth in a field of study, they prepare a proposal for the PhD dissertation. This process should take place no later than the end of the fifth year in residence. The student prepares a dissertation proposal, which describes the proposed research, including the relevant background materials from the literature. The proposal should clearly specify the research problems to be attacked, the techniques to be used, and a schedule of milestones toward completion.

The dissertation proposal must be approved by the dissertation committee. With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD computer science curriculum committee. The four members must include the advisor, two internal members, and an external member.

Upon approval of the written proposal, the student has to present the proposed work orally in a public forum, followed by a closed-door oral examination from the dissertation committee. The student may take the dissertation proposal examination twice, at most.

Doctoral Dissertation

Upon successful completion of solving the research proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field of computer science. The work should give evidence of the candidate's ability to carry out independent research. It is expected that the dissertation should be of sufficient quality to merit publication in a reputable journal in computer science.

Doctoral Committee

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD computer science curriculum committee. The four members must include the advisor, two internal members, and an external member.

Dissertation Defense

The dissertation defense is held in accordance with the regulations of the University Graduate Curriculum Committee. It consists of a lecture given by the candidate on the subject matter of the dissertation. This is followed by questions from the dissertation committee and others in attendance concerning the results of the dissertation as well as any related matters. The defense is chaired by the PhD advisor.

Time and Time Limitation

After the establishment of degree candidacy, a maximum of five years will be allowed for the completion of the degree requirements, unless an extension is granted by the college graduate committee.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Coursework
 Paper requirement
 Admission to candidacy
 Residency
 Teaching requirement
 Comprehensive examination/dissertation proposal
 Doctoral dissertation
 Doctoral committee
 Dissertation defense

Course Area Requirements

A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

Students should refer to the course numbering table for graduate course leveling (p. 115).

Code	Title	Hours
Complete a total of six courses. Courses must cover at least four of the five areas, and a maximum of two courses may be at the 5000 level.		24
At least two courses must be 7000-level seminar courses.		
At least two courses must be 7000-level nonseminar courses.

Advanced Entry Program Requirements

Coursework

Incoming PhD in Computer Science students who have already completed a Master of Science in Computer Science or an adjacent field may petition to the PhD in Computer Science program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that advanced standing does not waive by itself any part of the PhD coursework requirements.

As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master's degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). Students must maintain a minimum GPA of 3.500 as well as earn a grade of B or better in each course.

Paper Requirement

Refer to the Computer Science, PhD, overview (p. 329), for research/survey paper requirements.

Admission to Candidacy

Refer to the Computer Science, PhD, overview, (p. 329) for admission to candidacy requirements.

Residency

Refer to the Computer Science, PhD, overview, (p. 329) for residency requirements.

Teaching Requirement

Refer to the Computer Science, PhD, overview, (p. 329) for the teaching requirement.

Comprehensive Examination/Dissertation Proposal

Refer to the Computer Science, PhD, overview, (p. 329) for comprehensive examination requirements.

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

- Annual review
- Course requirements
- Paper requirement
- Comprehensive exam
- Teaching requirement
- Doctoral candidacy
- Dissertation committee
- Dissertation proposal
- Dissertation defense

Core Requirements

Students must maintain a minimum GPA of 3.500 as well as earn a grade of B or better in each course.

Program Credit/GPA Requirements

- 16 total semester hours required
- Minimum overall 3.500 GPA required

Network Science, PhD (Boston)

The PhD in Network Science program aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is a multidisciplinary program, with members of the Northeastern University Network Science Institute (<https://www.networkscienceinstitute.org/>) representing a range of fields including computer science, information science, physics, complexity, sociology, communication, data visualization, organizational behavior, political science, population health, and epidemiology.

This doctoral program is a joint collaboration across five academic colleges. Students are admitted to the College of Social Sciences and Humanities and may choose to move to the home college of their dissertation advisor after they reach candidacy (once they pass their dissertation proposal/comprehensive exam). Students follow policies of their home college, including dissertation format and submission deadlines for graduation. Faculty supervisors may be from one of the following Northeastern academic colleges:

- College of Science
- College of Social Sciences and Humanities
- Khoury College of Computer Sciences
- Bouvé College of Health Sciences
- College of Arts, Media and Design

Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of elective courses relevant to the student’s area of research. Electives should be discussed with the student’s faculty advisor. A minimum of 40 semester hours of coursework is required, though the faculty advisor or program committee may recommend additional coursework based on student research skills.

Alternative Course Path

Students have the option to complete core coursework in their first year of study. This curriculum pathway is expected to be taken by students whose admitting advisor is located outside of the Boston campus and elsewhere in the Northeastern network.

Annual Review

A review of satisfactory progress will be ongoing and formally evaluated at the end of each academic year. Students must maintain a cumulative grade-point average of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain a 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for dismissal by the graduate program committee.

As part of the annual review process, the students will be asked to submit a summary of completed and future courses and research. Students will submit to the program committee:

- A list of courses completed in the last academic year and course plan for the following year
- A short synopsis of their research progress and research plans for the next year

Qualifying Examination

The qualifying exam is an hour-long oral examination of the material covered in the core curriculum and consists of questions selected by network science faculty. One month prior to the exam., students receive between 50 to 80 study questions to prepare. Students will be asked to give a short presentation of their research plans, followed by an oral exam where the qualifying exam panel will ask a subset of the review questions.

Students must take the exam by the fall semester of their third year. If students fail the qualifying exam on their first attempt, they may retake the exam in the following semester. Students who do not pass the exam after two attempts will be asked to leave the program.¹

Dissertation Committee

Students must confirm their dissertation advisor by the end of their second year. The dissertation advisor must be a full-time, tenured, tenure-track, research, or teaching faculty member of Northeastern. The advisor should be a network science doctoral program faculty member, unless the student receives approval by the network science program committee.

Students must confirm their dissertation committee prior to their comprehensive exam. The committee must consist of a minimum of four members:

1. A dissertation advisor
2. A core member of the Network Science Institute faculty
3. An additional tenured/tenure-track, research, or teaching faculty member from the Network Science Institute or other Northeastern faculty approved by the advisor and program committee
4. One member recognized as an expert in the specific topic of research, who can be external to Northeastern.

Dissertation Proposal (Comprehensive Examination)

The comprehensive exam should be completed in the student's fourth year of study. The exam consists of two parts: preparation of the dissertation proposal and oral presentation of the proposal. Students must prepare a written comprehensive research proposal describing the dissertation research plan including review of relevant literature, research questions, motivation, methods, any preliminary results, and potential impact. The proposal must be shared with the doctoral committee members two weeks prior to the scheduled presentation.

Students will give a 30-minute oral presentation to their committee members that is open to the public. Following the presentation, the dissertation committee will assess the proposed research plan and provide feedback to the student. If the proposal and/or presentation do not meet the expectations of the committee, the student will be asked to revise their proposal and/or their presentation. The completion of the comprehensive exam is considered successful if the dissertation committee approves as satisfactory both the written proposal and the oral presentation. Students may repeat the comprehensive exam once. If they are unsuccessful in their second attempt, the program will ask the student to leave the program.

PhD Candidacy

A student is considered a doctoral candidate upon completion of the required coursework with a minimum cumulative GPA of 3.000, a passing score on the qualification exam, and satisfactory completion of the comprehensive exam.

Dissertation

A PhD student should aim to complete their dissertation in their fifth year of study. Upon successful completion of the research plan proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field. The work should give evidence of the candidate's ability to carry out independent research. It is expected that the dissertation consists of one or more research studies of sufficient quality to merit publication in a reputable journal(s).

Dissertation Defense

Like the dissertation proposal, the dissertation defense consists of two parts: the written dissertation and the defense oral presentation. The PhD candidate should send the written dissertation to their dissertation committee at least one month prior to the dissertation defense.

The oral dissertation defense will be open to the public and will include a Q&A session. Following the presentation, the dissertation committee will communicate their assessment of whether they consider the candidate's dissertation requirement fulfilled. Once the dissertation requirement is fulfilled, the PhD candidate is ready to graduate. Students then apply to graduate and follow the formatting guidelines and deadlines of their home college.

¹Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an MS in Network Science degree. Note that no students will be admitted directly into the MS in Network Science to pursue a master's degree.

Personal Health Informatics, PhD (Boston)

Northeastern University's Doctor of Philosophy in Personal Health Informatics is a transdisciplinary doctoral program focused on educating top researchers in the theoretical underpinnings, design, evaluation, and dissemination of consumer- and patient-focused health systems. Personal health technologies are those that non-health professionals interact with *directly*, both in and out of a clinical setting and in various life stages of illness and wellness.

Examples include:

- Assistive technologies that aid persons with disabilities
- Consumer wellness promotion technologies
- Patient education and counseling systems
- Interfaces for reviewing personal health records
- Advanced ambulatory monitoring for supporting health
- Automated elder care systems that monitor health and support independent living
- Social networking systems connecting families and their social and medical support networks

Developing personal health interface technologies requires that professionals have skills and experience designing systems for individual patients and consumers with a wide range of backgrounds in different contexts using a variety of media, while ensuring that fielded technologies are effective, reliable, and responsive to the needs of at-risk and patient populations. Critical skills and knowledge include needs assessment, theories of interface design and health behavior, rapid prototyping and implementation, experimental design with human subjects in challenging settings, and statistical data analysis and validation. Moreover, these skills must be deployed while working with, or leading, transdisciplinary teams.

The interdisciplinary nature of the program targets students who are interested in improving health and wellness using novel technologies that directly impact the lives of consumers and patients. This is a program for students who are not only technically strong but also socially conscious, design oriented, and interested in rigorously evaluating the technologies they imagine and build. The program provides a path for technical students to acquire more experience in the deployment and evaluation of health technologies in the field but also a path for students with health backgrounds to develop the technical skills needed to prototype and assess creative ideas they envision for improving care. The expected length of study is five years after the bachelor's degree.

Admission Requirements

Students will be accepted with either of the following:

- A bachelor's or higher degree in a technical discipline (e.g., computer science or information science, computer systems engineering) with either academic or work experience demonstrating a commitment to working in health.
- A bachelor's or higher degree in a health science discipline (e.g., nursing, medicine, physical therapy, pharmacy, public health) with either some academic coursework in technology, such as a course in programming or design, or work experience where the applicant participated in the development, adaptation, or evaluation of consumer- or patient-facing health technology. (Otherwise outstanding applicants without programming skills may be advised to take an introductory programming course prior to entry; otherwise outstanding applicants without any formal experience working in health settings may be advised to spend some time volunteering in a medical or community health setting prior to entry.)

Applicants will be expected to have:

- A minimum 3.000 undergraduate GPA
- A minimum total GRE score of 300 or equivalent
- A minimum GRE academic writing score of 3.5
- For international applicants, a minimum TOEFL score of 105

Minimum Academic Standards and Requirements

RESIDENCY REQUIREMENT

The residency requirement will follow the university's residency requirement for PhD programs (<https://catalog.northeastern.edu/graduate/general-admission-transfer-credit/regulations-phd-programs/>).

TEACHING REQUIREMENT

All personal health informatics PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment, or quiz, or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

DISSERTATION ADVISING

Each student will have one primary advisor from the personal health informatics doctoral program faculty.

DISSERTATION COMMITTEE

The committee will consist of at least three members: the dissertation advisor, one additional personal health informatics doctoral program faculty member, and one member external to Northeastern who is an expert in the specific personal health informatics topic of research. The dissertation committee shall include experts with both health and technology backgrounds. The dissertation advisor must be a full-time member of the Northeastern faculty.

QUALIFYING EXAMINATION

The qualifying examination consists of a three-part exam conducted by a committee of three personal health informatics doctoral program faculty members, each overseeing one part of the exam. The research core of the exam is fulfilled with submission of a high-quality paper to a strong peer-reviewed conference or journal. The health component of the exam is fulfilled when the student passes a written exam developed by a faculty member with a health sciences background, and the technical component of the exam is fulfilled when the student passes an exam developed by a faculty member with a technical background. The content of the written exams and the paper topic are developed in consultation with each faculty member.

DEGREE CANDIDACY

A student is considered a PhD degree candidate upon meeting these conditions:

- Completion of core courses with a minimum GPA of 3.000 overall on the core courses
- Completion of the qualifying examination

COMPREHENSIVE EXAM

A PhD student must submit a written dissertation proposal to the dissertation committee. The proposal should identify the research problem, the research plan, and its potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee.

DISSERTATION DEFENSE

A PhD student must complete and defend a dissertation that involves original research in personal health informatics.

Curriculum Requirements

REQUIRED AND ELECTIVE COURSES

The curriculum is designed to provide all PhD students with a strong foundation in principles critical to the design and evaluation of personal health interfaces. All students take six core courses (24 semester hours) and the user-interface practicum (1 semester hour).The student must maintain a minimum GPA of 3.500 among the six core courses and receive a grade of B or better in each of these courses. All students must also fulfill the programming fundamentals requirement (4 semester hours) and the statistics fundamentals requirement (4 semester hours), where some flexibility in course selection allows tailoring based on background and experience. Two additional research electives (8 semester hours) are selected based on research interests from the personal health informatics electives list. Students are also expected to participate in the personal health informatics seminar series during semesters when it is run.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

- Qualifying examination
- Annual review
- Dissertation proposal
- Dissertation committee
- Dissertation defense

Core Requirements

A grade of B or higher is required in each course. A cumulative 3.500 grade-point average is required for the core requirement.

Code	Title	Hours
Foundations		
HINF 5200	Theoretical Foundations in Personal Health Informatics	4

Program Design and Development

CS 5010	Programming Design Paradigm (or another programming course)	4
CS 7340	Theory and Methods in Human Computer Interaction	4
HINF 5300	Personal Health Interface Design and Development	4

Methods and Statistics

CS 7300	Empirical Research Methods for Human Computer Interaction	4

Complete one of the following:

Artificial Intelligence, MS (Boston)

The Master of Science in Artificial Intelligence provides a comprehensive framework encompassing foundational algorithms, theory, and practical applications in the rapidly evolving field of AI. This program offers students the essential knowledge and skills to design, develop, and implement AI systems across various high-demand sectors. The core curriculum is designed to provide in-depth understanding of fundamental AI concepts, forming a solid foundation for both theoretical and practical aspects of artificial intelligence.

Building on this strong foundation, students can delve into advanced AI applications through interdisciplinary concentrations tailored to industry needs. These concentrations include computer vision, continuous process engineering, machine learning, and robotics and agent-based systems.

The master's in artificial intelligence is an interdisciplinary degree offered by Khoury College of Computer Sciences and the College of Engineering. Descriptions of the concentrations offered in this degree are as follows:

- **Computer Vision—College of Engineering**
 - The computer vision concentration offers students the knowledge and skills to drive innovation at the intersection of new and emerging vision systems and AI, through utilizing AI and machine learning solutions for a wide range of applications including image enhancement/restoration, object recognition, navigation, graphics rendering, and pattern classification.
- **Continuous Process Engineering—College of Engineering**
 - The continuous process engineering concentration offers students the knowledge and skills to revolutionize how industrial processes are designed, monitored, and optimized. The program aims to prepare students to utilize AI and machine learning solutions to enhance process efficiency, predictive maintenance, and real-time decision making in industries such as chemicals, pharmaceuticals, and energy. Graduates will be prepared to integrate AI-driven solutions into continuous manufacturing environments to improve safety, sustainability, and productivity.
- **Energy Systems—College of Engineering**
 - The energy systems concentration offers students the knowledge and skills to drive innovation in sustainable and intelligent energy systems. Students examine how to utilize AI and machine learning solutions to support smart energy grid operations, integrate renewable energy sources, and create responsive and resilient systems.
- **Machine Learning—Khoury College of Computer Sciences**
 - The goal of the machine learning concentration is to provide students with practical, hands-on experience in designing, implementing, and optimizing machine learning models for real-world applications. The curriculum positions graduates to pursue roles that leverage AI to drive innovation and efficiency in a wide variety of industries and domains.
- **Robotics and Agent-Based Systems—Khoury College of Computer Sciences**
 - The goal of the robotics and agent-based systems concentration is to provide students with expertise in designing and developing intelligent robotic systems and autonomous agents capable of performing complex tasks in dynamic environments. The curriculum positions graduates to pursue roles that contribute to innovations in automation, human-robot interaction, and intelligent systems design.

Students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their college of admission.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A cumulative GPA of 3.000 or higher is required in the following:

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 5130	Applied Programming and Data Processing for AI	4
DADS 5200 or DS 5020	Mathematics for Machine Learning Introduction to Linear Algebra and Probability for Data Science	4
EECE 5644 or DADS 7275	Introduction to Machine Learning and Pattern Recognition Machine Learning and Data Analytics	4

Concentrations

Complete one of the following concentrations:

- Computer Vision (p. 165)—College of Engineering
- Continuous Process Engineering (p. 165)—College of Engineering
- Energy Systems (p. 165)—College of Engineering
- Machine Learning (p. 166)—Khoury College of Computer Sciences
- Robotics and Agent-Based Systems (p. 166)—Khoury College of Computer Sciences

Master's Project

Artificial Intelligence, MS (Portland)

The Master of Science in Artificial Intelligence program is designed to give students a comprehensive framework for AI with specialization in one of five areas: vision, intelligent interaction, robotics and agent-based systems, machine learning, and knowledge management and reasoning. Students may choose from three options: specialization, thesis, or coursework only. Students will engage in an extensive core intended to develop depth in all core concepts that build a foundation for AI theory and practice. Students will also be given the opportunity to build on the core knowledge of AI by taking a variety of elective courses, selected from colleges throughout campus, to explore key contextual areas or more complex technical applications. Program graduates will be well positioned to attain research and development positions in a rapidly growing field or to progress into doctoral-degree-related fields.

The Master of Science in Artificial Intelligence is comprised of eight courses: five core courses, two electives to be chosen from one of five specialization areas or coursework option, and one elective. The core courses are designed and developed by Khoury College faculty. Elective courses consist of graduate courses offered in Khoury and other partner colleges, including College of Arts, Media and Design; College of Engineering; College of Science; and College of Social Sciences and Humanities.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A cumulative GPA of 3.000 or higher is required in the following core courses:

Code	Title	Hours
Intelligence		
CS 5100	Foundations of Artificial Intelligence	4
Programming and Algorithms		
CS 5010	Programming Design Paradigm	4
CS 5800	Algorithms	4
Machine Learning		
CS 6140	Machine Learning	4
Interaction		
CS 5170	Artificial Intelligence for Human-Computer Interaction	4

Options

Complete one of the following options:

SPECIALIZATION OPTION

Code	Title	Hours
Complete two courses from one of the following specializations:		8

Complex Network Analysis, MS (Boston)

Complex network analysis is the quantitative study of interconnected systems that influence every aspect of our lives—from where we get our news and who we share ideas with, to how we travel and the people we interact with, to the products we purchase and the foods we eat. Networks are ubiquitous across natural and human-made systems, and their structure and dynamics can explain and help improve the greatest challenges of the next century such as pandemics, food scarcity, cultural polarization, and climate change. Expertise in the emerging field of complex network analysis, within the landscape of the rapid growth of artificial intelligence and machine learning, forms the foundation of the next generation of thought leaders. Northeastern University leads the way in this burgeoning field, offering a unique master’s degree program in complex network analysis methodologies. The program is designed to equip students with the conceptual and analytical tools needed to find patterns of connections in networked systems and apply these techniques in real-world settings. The curriculum includes industry-aligned concentration areas of focus, enabling graduates to apply complex network analysis skills in impactful careers in the public and private sectors as well as in research. The concentrations for this program correspond directly to the following industry sectors:

1. Public health and life sciences fields such as epidemiological modeling, public policy, and behavioral research
2. Social or urban science and research fields such as urban planning, social network research, economics, education, criminal science, or public policy
3. Finance or technological fields such as financial analytics, market research, or network analysis for business
4. Biological systems modeling used across research and industry including network biology, drug discovery, or multi-omics mining

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Complex Biological Networks—College of Science
- Complex Social Systems—College of Social Sciences and Humanities
- Economic and Technological Networks—Khoury College of Computer Sciences
- Population Health Dynamics—Bouvé College of Health Sciences

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
CNET 5050	Fundamentals of Complex Networks	4
CNET 5051	Analyzing Complex Network Data	4
CNET 5052	Advanced Tools for Complex Network Analysis	4
CNET 5901	Visualizing Complex Networks	2
CNET 5902	Communicating Network Data	2

Concentrations

Complete one of the following concentrations:

- Complex Biological Networks (p. 167)—College of Science
- Complex Social Systems (p. 168)—College of Social Sciences and Humanities
- Economic and Technological Networks (p. 168)—Khoury College of Computer Sciences
- Population Health Dynamics (p. 169)—Bouvé College of Health Sciences

Experiential Courses

Code	Title	Hours
Complete a total of 4 semester hours from the following (course may be repeated):		4
CNET 6107	Complex Network Analysis Research Rotation	
CNET 6108	Complex Network Analysis Capstone	
CNET 6990	Thesis	

Optional Co-op

Code	Title	Hours
CNET 6000	Professional Development for Co-op	1
CNET 6964	Co-op Work Experience	0

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Additional hours may be required based on student choice of courses or concentration.

One semester hour of additional coursework is required for participation in co-op.

Minimum 3.000 GPA required

CONCENTRATION IN COMPLEX BIOLOGICAL NETWORKS—COLLEGE OF SCIENCE

Code	Title	Hours
A minimum of 16 semester hours is required to complete this concentration.		
Required		
CNET 5515	Complex Network Analysis for Biological Systems	4
Complete 8 semester hours from the following:		8
BINF 6308	Bioinformatics Computational Methods 1	
BINF 6310	Introduction to Bioinformatics	
EEMB 5130	Population Dynamics	
ENVR 5450	Applied Social-Ecological Systems Modeling	
MATH 5131	Introduction to Mathematical Methods and Modeling	
MATH 7340	Statistics for Bioinformatics	
PHYS 5211	Introduction to Scientific Computing	
Complete 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	
CNET 5314	Complexity in Social Systems	
CNET 5411	Financial and Economic Networks	
CNET 6061	Analyzing Higher-Order Networks	
CNET 6063	Probabilistic Mathematics of Networks	
CNET 6099	Special Topics in Complex Networks	

CONCENTRATION IN COMPLEX SOCIAL SYSTEMS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
A minimum of 13 semester hours is required to complete this concentration.		
Required		
CNET 5314	Complexity in Social Systems	3
Complete a minimum of 6 semester hours from the following:		6
CNET 5311	Physical and Digital Human Traces	
CNET 5360	Research Design for Social Networks	
INSH 5301	Introduction to Computational Statistics	
INSH 6101	Agent-Based Modeling for Applied and Social Sciences	
INSH 6300	Research Methods in the Social Sciences	
INSH 6304	Modeling and Analyzing Social Networks	
INSH 6406	Analyzing Complex Digitized Data	
INSH 6500	Statistical Analysis	
PHYS 5211	Introduction to Scientific Computing	
PPUA 5262	Big Data for Cities	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	
Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section):		4
CNET 5126	Spreading on Networks: From Epidemics to Memes	

CNET 5411	Financial and Economic Networks
CNET 5515	Complex Network Analysis for Biological Systems
CNET 6061	Analyzing Higher-Order Networks

CNET 6099	Special Topics in Complex Networks

CONCENTRATION IN ECONOMIC AND TECHNOLOGICAL NETWORKS—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours

A minimum of 14 semester hours is required to complete this concentration.

Required

CNET 5411	Financial and Economic Networks	3

Complete a minimum of 7 semester hours from the following: 7

CS 7150	Deep Learning
CS 7200	Statistical Methods for Computer Science
DS 5220	Supervised Machine Learning and Learning Theory
DS 5230	Unsupervised Machine Learning and Data Mining
MISM 6212	Data Mining and Machine Learning for Business
PHYS 5211	Introduction to Scientific Computing

Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section): 4

CNET 5126	Spreading on Networks: From Epidemics to Memes
CNET 5314	Complexity in Social Systems
CNET 5515	Complex Network Analysis for Biological Systems
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

CONCENTRATION IN POPULATION HEALTH DYNAMICS—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours

A minimum of 14 semester hours is required to complete this concentration.

Required

CNET 5126	Spreading on Networks: From Epidemics to Memes	4

Complete a minimum of 6 semester hours from the following: 6

BINF 6308	Bioinformatics Computational Methods 1
PHTH 5210	Biostatistics in Public Health
PHTH 6210	Applied Regression Analysis
PHTH 6224	Social Epidemiology
PHTH 6440	Advanced Methods in Biostatistics
PHTH 6800	Causal Inference in Public Health Research
PHTH 6801	Causal Inference 1
PHYS 5211	Introduction to Scientific Computing

Complete a minimum of 4 semester hours from the following (students may opt to take the required course in the College of Science or Bouvé College of Health Sciences concentrations for this section): 4

CNET 5314	Complexity in Social Systems
CNET 5411	Financial and Economic Networks
CNET 5515	Complex Network Analysis for Biological Systems
CNET 6061	Analyzing Higher-Order Networks
CNET 6063	Probabilistic Mathematics of Networks
CNET 6099	Special Topics in Complex Networks

Data Science, MS (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses

from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Data Science Core

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Programming with Data		
DS 5110	Essentials of Data Science	4
Algorithms		
CS 5800 or EECE 7205	Algorithms Fundamentals of Computer Engineering	4
Machine Learning		
CS 6140 or EECE 5644	Machine Learning Introduction to Machine Learning and Pattern Recognition	4
Interdisciplinary Capstone		
DS 5500	Data Science Capstone	4

Data Science Concentration Options

Complete one of the following concentrations:

- Computer Science (p. 170)—Khoury College of Computer Sciences
- Engineering Theory and Modeling (p.)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Complete 16 semester hours from the following: ¹		16
CS 5100	Foundations of Artificial Intelligence	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5200	Database Management Systems

Data Science, MS—Align (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

The Master of Science in Data Science—Align curriculum is specifically designed to prepare incoming students without any prior programming experience. During the first semester of year one, students are expected to take foundational courses in computer science fundamentals, as well as a course in data structures/discrete mathematics. During their second semester, students will take coursework in programming for data science, as well as linear algebra and probability.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Align Bridge Coursework

Students are required to complete all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
Fundamentals		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
Discrete Structures		
CS 5002	Discrete Structures	4

GSND 6350	Data-Driven Game Design

Program Credit/GPA Requirements

40–48 total semester hours required

Minimum 3.000 GPA required

¹ Students taking electives worth less than 4 SH (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative SH to 4. In order to earn this additional 1 SH, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Data Science, MS—Align (Silicon Valley)

Khoury College of Computer Sciences and the Department of Electrical and Computer Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science (p. 357) or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

The Master of Science in Data Science—Align curriculum is specifically designed to prepare incoming students without any prior programming experience. During the first semester of year one, students are expected to take foundational courses in computer science fundamentals, as well as a course in data structures/discrete mathematics. During their second semester, students will take coursework in programming for data science, as well as linear algebra and probability.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 115).

Align Bridge Coursework

Students are required to complete all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
Fundamentals		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
Discrete Structures		
CS 5002	Discrete Structures	4
Programming for Data Science		
DS 5010	Introduction to Programming for Data Science	4
Additional Align Coursework		
DS 5020	Introduction to Linear Algebra and Probability for Data Science	4

Core Requirements

A cumulative GPA of 3.000 or higher is required in the following core courses:

Code	Title	Hours
Algorithms		
Complete 4 semester hours from the following:		4
CS 5800	Algorithms	
EECE 7205	Fundamentals of Computer Engineering	
Data Management and Processing		
DS 5110	Essentials of Data Science	4
Machine Learning and Data Mining		
DS 5220	Supervised Machine Learning and Learning Theory	4
DS 5230	Unsupervised Machine Learning and Data Mining	4
Presentation and Visualization		
DS 5500	Data Science Capstone	4

Electives¹

Code	Title	Hours
Complete 12 semester hours from the following:		12
Khoury College of Computer Sciences		
CS 5100	Foundations of Artificial Intelligence	

CS 5180	Reinforcement Learning and Sequential Decision Making
CS 5200	Database Management Systems

In order to earn this additional 1 SH, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences

- Human Movement Science (p. 176)—Bouv  College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4
CS 6120	Natural Language Processing	4
CS 6140	Machine Learning	4
or DS 5220	Supervised Machine Learning and Learning Theory	

CONCENTRATION IN ENTREPRENEURSHIP—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics of Design	

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
Electives		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
Electives		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8

HIST 5241	Exhibits and Museums
HIST 7250	Topics in Public History (Public History and Slavery)
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
GSND 6460	Generative Game Design	

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4

Elective

Complete 4 semester hours from the following:		4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
JRNL 5311	Design for Storytelling	
JRNL 6305	Topics	
JRNL 6341	Telling Your Story with Data	

Plan of Study**Sample Plan of Study**

The following is a sample plan of study for a student in the Concentration in XR and Games.

Year 1			
Fall	Hours	Spring	Hours
EXRE 5010 and EXRE 5011		5 EXRE 5030	4
EXRE 5020		4 GSND 5110 and GSND 5111	5
		9	9
Year 2			
Fall	Hours	Spring	Hours
EXRE 6500		4 EXRE 7500	4
GSND 5122		1 XR and games elective 2	4
XR and games elective 1		4	
		9	8
Total Hours: 35			

Game Science and Design, MS (Boston)

The Master of Science (MS) in Game Science and Design is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Successful graduates who wish to become professional game developers or game user research experts should be able to collaborate effectively in this dynamic and burgeoning field of practice and research. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that makes products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; augmented and virtual reality; as well as games in health, education, and training. Rapid innovations are happening in player psychology, middleware, graphics and authoring tools, game mechanics, and artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, the game industry needs professionals with interdisciplinary skill sets who can blend knowledge about development with knowledge about evaluation methods and players' behavior and psychology.

Jointly offered by Northeastern's College of Arts, Media and Design and Khoury College of Computer Sciences (<https://www.khoury.northeastern.edu/>), the **Master of Science in Game Science and Design** is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-semester-hours program.

All admitted students will be assigned to an advisor who will help them select a pathway with a coherent set of electives depending on their career goals. The advisor will also monitor their progress through the master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
GSND 5122	Business Models in the Game Industry	1

GSND 5130	Mixed Research Methods for Games	4

Thesis

Students complete Games Project, then select either Thesis or a second completion of Games Project, in consultation with the program coordinator.

GSND 7995	Games Project	4

Thesis Conclusion

Complete an additional 4 Semester Hours from the following:

GSND 7990	Thesis	4
GSND 7995	Games Project	

Core Electives

Code	Title	Hours

Game Design

Complete one of the following: 4

GSND 6000	Advanced Topics in Game Design	4
GSND 6225	Applied Game Design	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	

Game Science

Complete one of the following: 4

GSND 6001	Advanced Topics in Game Science	4
GSND 6320	Psychology of Play	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	

Other Electives

Code	Title	Hours

Complete any two (8 Semester Hours) of the following courses listed. 8

If ARTG 5000 or GSND 6000 or GSND 6001 is completed more than once, the additional completions may be allowed toward the electives.

Elective courses outside of CAMD are subject to availability and registration policy of the home college.

Science

CS 5340	Computer/Human Interaction	4
PSYC 4612	Laboratory in Cognition	

Programming

CS 5150	Game Artificial Intelligence	4
CS 5850	Building Game Engines	
GSND 6460	Generative Game Design	

Art

ARTG 5000	Topics in Design	4
ARTG 5100	Information Design Studio 1: Principles	
ARTG 5130	Visual Communication for Information Design	
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	

Extended Realities

EXRE 5010	Immersive Media: Extended Realities (XR) History, Theory, and Impact	4
EXRE 5011	Seminar for EXRE 5010	
EXRE 5020	Developing Extended Realities (XR)	
EXRE 5030	Designing Extended Realities (XR)	

Other

ARTG 5310	Visual Cognition	4
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5610	Design Systems	
ARTG 5640	Prototyping for Experience Design	
ARTG 6310	Design for Behavior and Experience	

CS 5520	Mobile Application Development
CS 5610	Web Development
DA 5020	Collecting, Storing, and Retrieving Data
DA 5030	Introduction to Data Mining/Machine Learning
INSH 5302	Information Design and Visual Analytics
JRNL 6341	Telling Your Story with Data

Program Credit/GPA Requirements

34 total semester hours required

Minimum 3.000 GPA required

Internet of Things, MS (Boston)

The Master of Science in Internet of Things is an interdisciplinary program administered by the Institute for the Wireless Internet of Things, the Department of Electrical and Computer Engineering, and the Khoury College of Computer Sciences. This program is aimed at preparing highly qualified researchers and a specialized workforce that will lead the development of a globally interconnected continuum of untethered devices and objects interacting with the physical environment, people, and each other. The program will provide students with the necessary knowledge and skills to understand, design, and implement autonomous wireless networked systems of tomorrow operating in uncertain, challenging, extreme environments through a combination of coursework, master project research, and/or industry experience.

Program Requirements

Fundamental Requirements

Code	Title	Hours
EECE 5155	Wireless Sensor Networks and the Internet of Things	4
Complete one of the following:		4
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	
Complete one of the following:		4
CS 5800	Algorithms	
CS 7800	Advanced Algorithms	
EECE 7205	Fundamentals of Computer Engineering	
Complete one of the following:		4
CS 6140	Machine Learning	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Deep Learning and Edge Computing in Wireless Networks)	
Complete one of the following:		4

EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7390	Computer Hardware Security	
EECE 7368	High-Level Design of Hardware-Software Systems	
Complete one of the following for a total of 4 semester hours:		4
EECE 5698	Special Topics in Electrical and Computer Engineering (Spectrum Policy Issues for Wireless Communications Innovators)	
INNO 6230 and EECE 6400	Platform Innovation and Special Problems in Electrical and Computer Engineering	
HRMG 6280 and EECE 6400	The Human Side of Innovation and Special Problems in Electrical and Computer Engineering	
Complete one of the following:		4
CY 5120	Applied Cryptography	
CY 5130	Computer System Security	
CY 5150	Network Security Practices	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CY 6740	Network Security	
CY 6760	Wireless and Mobile Systems Security	
EECE 5641	Introduction to Software Security	
EECE 5699	Computer Hardware and System Security	

Options

COURSEWORK OPTION

Code	Title	Hours
Complete 4 semester hours from the electives course list below. (p. 373)		4

MASTER'S PROJECT OPTION

Code	Title	Hours
EECE 7945	Master's Project	4

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Electives Course List

Any course in the following list will fulfill the coursework option, provided the student satisfies prerequisites and program requirements. Students can take courses outside this list with prior approval from the program director.

Code	Title	Hours
Courses in College of Engineering		
<i>Bioengineering</i>		
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
<i>Civil and Environmental Engineering</i>		
CIVE 5280	Remote Sensing of the Environment	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
CIVE 7151	Urban Informatics and Processing	
CIVE 7380	Performance Models and Simulation of Transportation Networks	

Electrical and Computer Engineering

EECE 5155	Wireless Sensor Networks and the Internet of Things
EECE 5360	Combinatorial Optimization
EECE 5550	Mobile Robotics
EECE 5554	Robotics Sensing and Navigation
EECE 5576	Wireless Communication Systems
EECE 5606	Micro- and Nanofabrication
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts
EECE 5639	Computer Vision
EECE 5640	High-Performance Computing
EECE 5641	Introduction to Software Security
EECE 5642	Data Visualization
EECE 5643	Simulation and Performance Evaluation
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 5645	Parallel Processing for Data Analytics
EECE 5649	Design of Analog Integrated Circuits with Complementary Metal-Oxide-Semiconductor Technology
EECE 5652	Microwave Circuits and Systems
EECE 5666	Digital Signal Processing
EECE 5693	Electromagnetic Devices for RF and Wireless Communications
EECE 5697	Acoustics and Sensing
EECE 5698	Special Topics in Electrical and Computer Engineering (Advanced Network Management)
EECE 5698	Special Topics in Electrical and Computer Engineering (GNSS Signal Processing)
EECE 5698	Special Topics in Electrical and Computer Engineering (Network Programming)
EECE 5698	Special Topics in Electrical and Computer Engineering (Networked XR Systems)
EECE 5698	Special Topics in Electrical and Computer Engineering (Spectrum Policy Issues for Wireless Communications Innovators)
EECE 5698	Special Topics in Electrical and Computer Engineering (Terahertz Communication for 6G)
EECE 5699	Computer Hardware and System Security
EECE 7150	Autonomous Field Robotics
EECE 7200	Linear Systems Analysis
EECE 7201	Solid State Devices
EECE 7202	Electromagnetic Theory 1
EECE 7204	Applied Probability and Stochastic Processes
EECE 7205	Fundamentals of Computer Engineering
EECE 7240	Analog Integrated Circuit Design
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)
EECE 7245	Microwave Circuit Design for Wireless Communication
EECE 7247	Radio Frequency Integrated Circuit Design
EECE 7275	Antennas and Radiation
EECE 7310	Modern Signal Processing
EECE 7323	Numerical Optimization Methods
EECE 7336	Digital Communications
EECE 7337	Information Theory
EECE 7345	Big Data and Sparsity in Control, Machine Learning, and Optimization

Robotics, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics offers instruction by the faculty of the College of Engineering, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences. The program is designed to provide students with comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Biomedical and Rehabilitation Robotics—College of Engineering
- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Gordon Institute of Engineering Leadership

Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate coursework may be applied to this program's elective requirements in the coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
Electrical and Computer Engineering		

Complete one of the following:	4

EECE 5550	Mobile Robotics
EECE 5552	Assistive Robotics
EECE 5554	Robotics Sensing and Navigation

Computer Science

Complete one of the following:	4

CS 5180	Reinforcement Learning and Sequential Decision Making
CS 5335	Robotic Science and Systems

Concentrations

Complete one of the following options:

- Biomedical and Rehabilitation Robotics (p. 181)—College of Engineering
- Computer Science (p. 182)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 182)—College of Engineering
- Mechanical Engineering (p. 183)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

BIOMEDICAL AND REHABILITATION ROBOTICS CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
Complete one of the following:		4
BIOE 5520	Bioengineering Design for Robotic Rehabilitation	
PT 5170 and PT 5171	Motor Control and Lab for PT 5170	
PT 5321	Applications of Biomechanics in Human Function and Movement	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
BIOE 7990	Thesis	
or PT 7990	Thesis	
Complete 8 semester hours of courses from the elective course list. (p. 183)		
Optional Co-op		
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.		
Required Course		
Complete one additional CS course not used to fulfill the core requirements:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	
Options		
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
CS 8674	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
CS 7990	Thesis	
CS 8674	Master's Project	
Complete 8 semester hours of courses from the elective course list. (p. 183)		
Optional Co-op		
For students in the this concentration, please consult your academic advisor for co-op procedures.		

ELECTRICAL AND COMPUTER ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.		
Required Course		
Complete one additional EECE course not used to fulfill the core requirements:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Options		
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
EECE 7945	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
EECE 7945	Master's Project	
EECE 7990	Thesis	
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.		
Complete 8 semester hours of courses from the elective course list. (p. 183)		
Optional Co-op		
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

MECHANICAL ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Students in the mechanical engineering concentration follow the College of Engineering co-op policies.		
Required Course		

Complete one additional ME course not used to fulfill the core requirements:

4

ME 5250	Robot Mechanics and Control
ME 5659	Control Systems Engineering

Options

Complete one of the following options:

16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

ME 7945 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

ME 7945 Master's Project

ME 7990 Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6350	Empirical Research Methods	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5580	Classical Control Systems	
EECE 5639	Computer Vision	
EECE 5642	Data Visualization	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7150	Autonomous Field Robotics	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	
EECE 7370	Advanced Computer Vision	

EECE 7397	Advanced Machine Learning
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)
IE 6500	Human Performance
IE 7280	Statistical Methods in Engineering
IE 7315	Human Factors Engineering
IE 7615	Neural Networks and Deep Learning
ME 5240	Computer Aided Design and Manufacturing
ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5654	Elasticity and Plasticity
ME 5655	Dynamics and Mechanical Vibration
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 6200	Mathematical Methods for Mechanical Engineers 1
ME 6250	Wearable Robotics
ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering
PT 5170	Motor Control
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 7001	Core Concepts in Rehabilitation Science and Research
PT 7005	Experimental Design and Applied Statistics
PT 7020	Technologies in Movement and Rehabilitation Science

Statistics, MS (Boston)

The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The Master of Science in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical machine learning—Khoury College of Computer Sciences
- Statistical theory and modeling—College of Science

Students will follow all policies associated with their home college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800	Causal Inference in Public Health Research	3-4

or PHTH 6801	Causal Inference 1	
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics (p. 188)—Bouvé College of Health Sciences
- Statistical Machine Learning (p. 188)—Khoury College of Computer Sciences
- Statistical Theory and Modeling (p. 188)—College of Science

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses may be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

31 total semester hours required (32 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

CONCENTRATION IN BIOSTATISTICS (BOUVÉ COLLEGE OF HEALTH SCIENCES)

Code	Title	Hours
Complete 12 semester hours from the following:		12
PHTH 5350	Using SAS in Public Health Research	
PHTH 6440	Advanced Methods in Biostatistics	
PHTH 6802	Causal Inference 2	
PHTH 6810	Survival Analysis	
PHTH 6820	Design and Analysis of Clinical Trials	
Optional Co-op		
HLTH 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL MACHINE LEARNING (KHOURY COLLEGE OF COMPUTER SCIENCES)

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4
DS 5110	Essentials of Data Science	4
Optional Co-op		
CS 6964	Co-op Work Experience	0

CONCENTRATION IN STATISTICAL THEORY AND MODELING (COLLEGE OF SCIENCE)

Code	Title	Hours
Complete 12 semester hours from the following:		12
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	
Optional Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Statistics, MS—Connect (Boston)

The Master of Science in Statistics—Connect program is designed for students from all backgrounds with a BS/BA degree, provided the student has experience with basic calculus and statistics. The first semester of the degree program provides students with the foundational knowledge needed to study successfully alongside direct-entry graduate students. The field of statistics plays a critical role in the support of nearly every industry including technology; business, management, and finance; healthcare and pharmaceuticals; and more. The MS in Statistics develops a comprehensive and flexible skill set that allows graduates to adapt to an ever-changing job market in various occupations and industries. In an era of increasing automation of Big Data, the value of the rigor of statistical thinking and analysis by individuals grows with the rise of automated Big Data analysis (e.g., artificial intelligence and machine learning). This program in statistics is designed to provide learners with a solid foundation in applied, modern, and computational approaches to statistical analysis and exposure to the statistical thinking skills necessary to critically assess data and answer business and research questions across domains. Core courses integrate theory and application, enabling students to be ready for the job on day one. Upon application, each student selects an industry concentration (biostatistics, statistical machine learning, and statistical theory and modeling) to examine statistical theories and applied methodologies most relevant to specific career pathways. In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the following colleges:

- Biostatistics—Bouv  College of Health Sciences
- Statistical Machine Learning—Khoury College of Computer Sciences
- Statistical Theory and Modeling—College of Science

Students will follow all policies associated with their college. Each student finishes the program with experiential courses such as a thesis, capstone, or consulting project, where they gain hands-on, project-based experience addressing business problems and presenting and communicating the findings and recommendations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Connect Courses

Code	Title	Hours
Students are required to complete 8–10 semester hours from the following unless otherwise determined by the program:		8-10
CS 5001	Intensive Foundations of Computer Science	
MATH 5001	Accelerated Linear Algebra	
MATH 5002	Accelerated Multivariable Calculus	
MATH 5003	Accelerated Probability and Statistics	
MATH 5110	Applied Linear Algebra and Matrix Analysis	

Required Courses

Code	Title	Hours
MATH 5010	Foundations of Statistical Theory and Probability	4
MATH 6241	Stochastic Processes	2
MATH 6243	Statistical Learning	4
PHTH 6800 or PHTH 6801	Causal Inference in Public Health Research Causal Inference 1	3-4
PHTH 6830	Generalized Linear Models	4

Concentrations

Complete one of the following concentrations:

- Biostatistics—Bouv  College of Health Sciences (p. 190)
- Statistical Machine Learning—Khoury College of Computer Sciences (p. 190)
- Statistical Theory and Modeling—College of Science (p. 190)

Experiential Courses

Code	Title	Hours
Complete 2 semester hours from the following (courses can be repeated):		2
MATH 6910	Master's Project	
PHTH 6880	Statistical Consultancy	

Program Credit/GPA Requirements

39-41 total semester hours required (40-42 for students who declare the Concentration in Statistical Theory and Modeling and also opt to participate in co-op)

Minimum 3.000 GPA required

BIostatistics Concentration—Bouv  College of Health Sciences

Code	Title	Hours
Complete 12 semester hours from the following:		12
PTH 5350	Using SAS in Public Health Research	
PTH 6440	Advanced Methods in Biostatistics	
PTH 6802	Causal Inference 2	
PTH 6810	Survival Analysis

Optional Co-op		
HLTH 6964	Co-op Work Experience	0

Statistical Machine Learning Concentration—Khouri College of Computer Sciences

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 6140	Machine Learning	4
DS 5110	Essentials of Data Science	4
Optional Co-op		
CS 6964	Co-op Work Experience	0

Statistical Theory and Modeling Concentration—College of Science

Code	Title	Hours
Complete 12 semester hours from the following:		12
MATH 7339	Machine Learning and Statistical Learning Theory 2	
MATH 7340	Statistics for Bioinformatics	
MATH 7341	Probability 2	
MATH 7342	Mathematical Statistics	
MATH 7343	Applied Statistics	
MATH 7344	Regression, ANOVA, and Design	
Optional Co-op		
EESC 6500	Pathways to Professional Success	1
EESC 6964	Co-op Work Experience	0

Computer Science, MSCS (Arlington)

Northeastern University's Master of Science in Computer Science is designed to prepare students for a variety of careers in computer science. The program combines both computing and important application domains—enabling you to increase your broad-based knowledge in the field while allowing you to delve deeper in specific areas through elective courses.

MS Thesis Committee

The MS thesis committee must satisfy the following conditions:

1. A total of three members, including the advisor.
2. Two members from Khouri College of Computer Sciences (or affiliated to Khouri).
3. At least one member who is at “arm's length” from the particular work in the thesis. This means that there should be at least one member who isn't a co-advisor on the thesis.
4. External members are allowed but not required.

More members (internal or external) can be added as readers to the committee, so long as the above minimum requirements are fulfilled.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 115).

Core Requirements

Code	Title	Hours
CS 5010 and CS 5011	Programming Design Paradigm and Recitation for CS 5010	4
CS 5800	Algorithms	4

Breadth Areas

Code	Title	Hours
Complete 12 semester hours from two of the following breadth areas:		12

Artificial Intelligence and Data Science

CS 5100	Foundations of Artificial Intelligence
CS 5150	Game Artificial Intelligence
CS 5200	Database Management Systems
CS 5330	Pattern Recognition and Computer Vision
CS 6120	Natural Language Processing
CS 6140	Machine Learning
CS 6200	Information Retrieval
CS 6220	Data Mining Techniques
CS 6240	Large-Scale Parallel Data Processing
CS 7140	Advanced Machine Learning

Systems and Software

CS 5400	Principles of Programming Language
CS 5500	Foundations of Software Engineering
CS 5520	Mobile Application Development
CS 5600	Computer Systems
CS 5610	Web Development
CS 5700	Fundamentals of Computer Networking
CS 5850	Building Game Engines
CS 6410	Compilers
CS 6510	Advanced Software Development
CS 6620	Fundamentals of Cloud Computing

Theory and Security

CS 6760	Privacy, Security, and Usability
CS 7805	Complexity Theory
CY 5770	Software Vulnerabilities and Security
CY 6740	Network Security

Electives

Code	Title	Hours
Complete 12 semester hours from the following:		12

CS 5097	Mixed Reality
CS 5100 to CS 7980	
CS 7990	Thesis
CS 8674	Master's Project
CS 8982	Readings
CY 5001	Cybersecurity: Technologies, Threats, and Defenses
CY 5010	Cybersecurity Principles and Practices
CY 5130	Computer System Security
CY 5210	Information System Forensics
CY 6120	Software Security Practices

DS 5110	Essentials of Data Science
DS 5230	Unsupervised Machine Learning and Data Mining

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Computer Science, MSCS (Boston)

Northeastern University's Master of Science in Computer Science is designed to prepare students for a variety of careers in computer science. The program combines both computing and important application domains—enabling you to increase your broad-based knowledge in the field while allowing you to delve deeper in specific areas through elective courses.

MS Thesis Committee

The MS thesis committee must satisfy the following conditions:

1. A total of three members, including the advisor.
2. Two members from Khoury College of Computer Sciences (or affiliated to Khoury).
3. At least one member who is at “arm’s length” from the particular work in the thesis. This means that there should be at least one member who isn’t a co-advisor on the thesis.
4. External members are allowed but not required.

More members (internal or external) can be added as readers to the committee, so long as the above minimum requirements are fulfilled.

Gordon Institute of Engineering Leadership

For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the GIEL certificate coursework may be applied to the elective requirements of the program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Core Requirements

Code	Title	Hours
Programming		
CS 5010 and CS 5011	Programming Design Paradigm and Recitation for CS 5010	4
Algorithms		
CS 5800	Algorithms	4

Breadth Areas

Code	Title	Hours
Complete three courses from two of the following breadth areas:		12
Artificial Intelligence and Data Science		
CS 5100	Foundations of Artificial Intelligence	
CS 5150	Game Artificial Intelligence	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision	
CS 6120	Natural Language Processing

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Computer Science, MSCS—Align (Arlington)

Master of Science in Computer Science—Align students come from a wide variety of backgrounds, with undergraduate majors including math, biology, history, engineering, and classics. The program begins with a two-semester introductory sequence, which provides the foundational knowledge for students from nontechnical backgrounds to succeed. Students have an opportunity to acquire both the knowledge needed to transition into a new career and the practical skills to build the next great app.

MS Thesis Committee

The MS thesis committee must satisfy the following conditions:

1. A total of three members, including the advisor.
2. Two members from Khoury College of Computer Sciences (or affiliated to Khoury).
3. At least one member who is at arm's length from the particular work in the thesis. This means that there should be at least one member who isn't a co-advisor on the thesis.
4. External members are allowed but not required.

More members (internal or external) can be added as readers to the committee, so long as the above minimum requirements are fulfilled.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Align Bridge Coursework

Students are required to take all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
Fundamentals		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
Discrete Structures		
CS 5002	Discrete Structures	4
Object-Oriented Design		
CS 5004 and CS 5005	Object-Oriented Design and Recitation for CS 5004	4
Additional ALIGN courses		
CS 5008 and CS 5009	Data Structures, Algorithms, and Their Applications within Computer Systems and Recitation for CS 5008	4

Core Requirement

Code	Title	Hours
Algorithms		
CS 5800	Algorithms	4

Breadth Areas

Code	Title	Hours
Complete 12 semester hours from two of the following breadth areas:		
Artificial Intelligence and Data Science		
CS 5100	Foundations of Artificial Intelligence	
CS 5150	Game Artificial Intelligence	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision

Minimum 3.000 GPA required

Computer Science, MSCS—Align (Silicon Valley)

Master of Science in Computer Science—Align students come from a wide variety of backgrounds, with undergraduate majors including math, biology, history, engineering, and classics. The program begins with a two-semester introductory sequence, which provides the foundational knowledge for students from nontechnical backgrounds to succeed. Students have an opportunity to acquire both the knowledge needed to transition into a new career and the practical skills to build the next great app.

MS Thesis Committee

The MS thesis committee must satisfy the following conditions:

1. A total of three members, including the advisor.
2. Two members from Khoury College of Computer Sciences (or affiliated to Khoury).
3. At least one member who is at “arm’s length” from the particular work in the thesis. This means that there should be at least one member who isn’t a co-advisor on the thesis.
4. External members are allowed but not required.

More members (internal or external) can be added as readers to the committee, so long as the above minimum requirements are fulfilled.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Align Bridge Coursework

Students are required to take all bridge courses unless otherwise determined by the program.

A grade of B or higher is required in each course.

Code	Title	Hours
Fundamentals		
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
Discrete Structures		
CS 5002	Discrete Structures	4
Object-Oriented Design		
CS 5004 and CS 5005	Object-Oriented Design and Recitation for CS 5004	4
Additional ALIGN courses		
CS 5008 and CS 5009	Data Structures, Algorithms, and Their Applications within Computer Systems and Recitation for CS 5008	4

Computer Science, Graduate Certificate (Boston)

The postbaccalaureate certificate is designed to give students a solid foundation in the mathematical and theoretical underpinnings of computer science, including the areas of discrete mathematics, basic programming, data structures, object-oriented programming, algorithms, and computer systems. The goal of the certificate is to provide foundational knowledge in computer science that is valuable in both the workplace for career advancement, as well as to those looking to move into graduate programs within the discipline.

The courses in the Postbaccalaureate Certificate in Computer Science will serve as the foundational premaster's courses in the Align program. Students that successfully complete the five certificate courses with a B in each course or better will be eligible to matriculate into the Master of Science in Computer Science program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CS 5001 and CS 5003	Intensive Foundations of Computer Science and Recitation for CS 5001	4
CS 5002	Discrete Structures	4
CS 5004 and CS 5005	Object-Oriented Design and Recitation for CS 5004	4
CS 5008 and CS 5009	Data Structures, Algorithms, and Their Applications within Computer Systems and Recitation for CS 5008	4

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Data Analytics, Graduate Certificate (Boston)

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the Khoury College of Computer Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policymaking processes. The program is designed to provide students with foundational knowledge in data science—

including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

For more information on the certificate, refer to the program's website (<https://www.northeastern.edu/graduate/program/graduate-certificate-in-data-analytics-boston-14423/>).

Program Requirements

DA 5020	Collecting, Storing, and Retrieving Data	4
DA 5030	Introduction to Data Mining/Machine Learning	4
INSH 5301	Introduction to Computational Statistics	4
INSH 5302	Information Design and Visual Analytics	4

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Inclusive Computer Science Education, Graduate Certificate (Portland)

Overview

The Graduate Certificate in Inclusive Computer Science Education is designed to prepare students to teach computer science principles and concepts in the context of a K–12 environment. Building on the successful Computer Science—Align program, this certificate assumes no prior computer science experience. Through coursework and project-based learning, students have an opportunity to obtain the foundational knowledge necessary to teach basic computing concepts and programming at a variety of educational levels both as stand-alone courses and integrated into other disciplines. The certificate emphasizes how teachers can create an inclusive classroom environment, actively work to dispel stereotypes, and build student confidence. Students who finish this certificate will be well positioned to obtain K–12 certification in computer science.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CS 5001	Intensive Foundations of Computer Science	4
CS 5002	Discrete Structures	4
CS 5933	Advanced Computer Science Topics for Teachers	4
CS 5934	Introduction to Inclusive Computer Science Teaching	4

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Cybersecurity

Students can apply for admission to two distinct degree programs.

Doctor of Philosophy in Cybersecurity

Offered jointly between Khoury College and the College of Engineering, a research-based, interdisciplinary PhD in cybersecurity spans theory and systems, from hardware to software security, from cryptography to policy, and from malware to wireless security. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Master of Science in Cybersecurity

An industry-focused, interdisciplinary Master of Science in Cybersecurity combines knowledge of information security technology and cybersecurity hands-on tools with relevant knowledge from law, the social sciences, criminology, and management. The Master of Science in Cybersecurity is designed for students focused on cybersecurity careers in companies or government agencies, thus applying their knowledge to their workplaces to assess security threats and manage information security risks and technical and policy controls.

Northeastern University designations by the National Security Agency and the Department of Homeland Security:

- NSA/DHS Center of Academic Excellence in Cybersecurity—Cyber Defense Education
- NSA/DHS Center of Academic Excellence in Cybersecurity—Research
- NSA/DHS Center of Academic Excellence in Cybersecurity—Cyber Operations
- NSA National Center of Academic Excellence in Cybersecurity

Align Master of Science in Cybersecurity

Without exception, every organization needs to protect their information system. Every day cyber risks are becoming more complex, and the sophistication and number of threats is growing continuously. For these reasons, cybersecurity professionals need to become more prepared, with a very solid background and with the capacity to evolve and adapt to the current and future information systems challenges.

Organizations are looking for well-rounded cybersecurity professionals who, beside their understanding of information technologies, can also comprehend the many other dimensions that contribute to effective and efficient information systems security. Professionals with diversified backgrounds are particularly interesting because they are able to provide different approaches to complex cybersecurity problems.

Align-MSCY students are perfect cybersecurity professionals, because they have proven their adaptability to the cybersecurity field and also because they bring an invaluable experience and knowledge from other areas to contribute to a global perspective of an organization's cybersecurity posture.

- Cybersecurity—Align (Boston) (p. 428)

Graduate Certificate

- Cybersecurity (Boston) (p. 429)

Cybersecurity, PhD (Boston)

A research-based, interdisciplinary Doctor of Philosophy (PhD) in Cybersecurity combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Students who choose the PhD in Cybersecurity program have a strong desire to pursue academic research solving critical cybersecurity challenges facing today's society. The PhD program is a natural path for students in the college's Master of Science in Cybersecurity (<http://www.ccs.neu.edu/graduate/degree-programs/m-s-in-information-assurance/>) program who want to pursue research and students with bachelor's degrees and an interest in research-focused careers. Students who pursue careers in advancing the state of the art of cybersecurity have an opportunity to gain:

- A strong technical foundation in cybersecurity and an interdisciplinary perspective based on policy and social science
- A path to a research-focused career coupled with depth in information assurance research at a leading institution, one of the earliest designees by NSA/DHS as a National Center of Academic Excellence in Information Assurance Research, Information Assurance/Cyber Defense, and Cyber Operations
- The opportunity to work with and learn from faculty who are recognized internationally for their expertise and contributions in information assurance from Northeastern University's Khoury College of Computer Sciences, the Department of Electrical and Computer Engineering, and the College of Social Sciences and Humanities
- Access to research projects at Northeastern's research centers focused on security:
 - The Cybersecurity and Privacy Institute (<https://cyber.ccis.northeastern.edu/about/>): The mission of Northeastern's Cybersecurity and Privacy Institute is to safeguard critical technology. Forging partnerships with experts in industry, government, and academia worldwide, the Institute's faculty and students develop, protect, and enhance technologies on which the world relies—from mobile devices and “smart” IoT applications to tomorrow's self-driving cars and delivery drones. Their expertise spans algorithm auditing; cloud security; cryptography; differential privacy;

embedded device security; internet-scale security measurements; machine learning; big data; security, malware, and advanced threats; network protocols and security; web and mobile security; and wireless network security.

- The International Secure Systems Lab (<http://www.isecslab.org/>), affiliated with Northeastern, a collaborative effort of European and U.S. researchers focused on web security, malware, and vulnerability analysis; intrusion detection; and other computer security issues.
- The ALERT Center (<http://www.northeastern.edu/alert/>), where Northeastern is the lead institution, a multiuniversity Department of Homeland Security Center of Excellence involved in research, education, and technology related to threats from explosives.

The benefits of the Boston area:

- World-renowned for academic and research excellence, the Boston area is also home to some of the nation's largest Department of Defense contractors and government and independent labs such as MIT Lincoln Lab, MITRE, and Draper Lab.

Degree Requirements

The PhD in Cybersecurity degree requires completion of at least 48 semester hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program, and they will be awarded a master's degree en route to the PhD.

Doctoral Degree Candidacy

A student is considered a PhD degree candidate after completing the core courses with at least a 3.500 GPA, with no grades lower than a B in the core courses, and either publishing a paper in a strong conference or journal or passing an oral exam that is conducted by a committee of three cybersecurity faculty members and based on paper(s) written by the student.

RESIDENCY

One year of continuous full-time study is required after admission to the PhD candidacy. During this period, the student will be expected to make substantial progress in preparing for the comprehensive examination.

TEACHING REQUIREMENT

All cybersecurity PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment or quiz or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

DISSERTATION ADVISING

The doctoral dissertation advising team for each student consists of two cybersecurity faculty members, one in a technical area. When appropriate, the second faculty advisor will be from the policy/social science area.

DISSERTATION COMMITTEE

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD cybersecurity curriculum committee. The four members must include the advisor, two internal members, and an external member.

COMPREHENSIVE EXAMINATION

A PhD student must submit a written dissertation proposal and present it to the dissertation committee. The proposal should identify the research problem, the research plan, and the potential impact of the research on the field. The presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee after the public presentation.

DISSERTATION DEFENSE

A PhD student must complete and defend a dissertation that involves original research in cybersecurity.

AWARDING OF MASTER'S DEGREES

Students who enter the PhD in Cybersecurity program with a bachelor's degree have the option of earning a master's degree from one of the departments participating in the program. To do so, they must meet all of the department's degree requirements.

Program Requirements

Bachelor's Degree Entrance

Minimum 3.000 GPA required

Advanced Entry Program Requirements**Degree Requirements**

Incoming PhD in Cybersecurity students who have already completed a Master of Science in an adjacent field may petition to the graduate program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that advanced entry does not waive by itself any part of the PhD coursework requirements. As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master's degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

Doctoral Degree Candidacy

Refer to the PhD Cybersecurity overview (p. 418) for admission to candidacy requirements.

Residency

Refer to the PhD Cybersecurity overview (p. 418) for residency requirements.

Teaching Requirement

Refer to the PhD Cybersecurity overview (p. 418) for teaching requirements.

Dissertation Advising

Refer to the PhD Cybersecurity overview (p. 418) for dissertation advising requirements.

Dissertation Committee

Refer to the PhD Cybersecurity overview (p. 418) for dissertation committee requirements.

Comprehensive Examination

Refer to the PhD Cybersecurity overview (p. 418) for comprehensive examination requirements.

Dissertation Defense

Refer to the PhD Cybersecurity overview (p. 418) for dissertation defense and completion requirements.

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Cybersecurity, MS (Arlington)

Our Master of Science in Cybersecurity combines a solid understanding of information security technology with relevant knowledge from law, the social sciences, criminology, and management. The MS program is designed for working professionals and also recent graduates who want knowledge they can apply in workplaces to assess and manage information security risks effectively.

The cybersecurity program provides graduates with both the theoretical and experimental skills to perform professional cybersecurity duties. Due to the broad variety of positions that cybersecurity professionals may hold in the industry, our curriculum is designed to provide enough flexibility to our students to tailor their own careers appropriately.

The cybersecurity curriculum is intended to provide a comprehensive approach to cybersecurity, which includes both the technical skills and the contextual understanding that are fundamental to cybersecurity professions.

Concentration in Criminology

Cybercrime has evolved into more advanced techniques and sophisticated structures. Cybersecurity professionals are of vital importance in crime investigations, and for that reason, they need to have a well-rounded background and knowledge. The Master of Science in Cybersecurity provides an interdisciplinary foundation that includes computer science technical courses, complemented with the contextual knowledge courses required for a proper holistic approach to cybercrime. The optional concentration in criminology will offer MSCY students an opportunity to obtain the fundamental principles and the most important practices that criminal justice professionals use.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

CRIM Elective ²**Program Credit/GPA Requirements**

32 total semester hours required

Minimum 3.000 GPA required

¹ A student who demonstrates prior mastery of the learning outcomes for Cybersecurity: Technologies, Threats, and Defenses (CY 5001) may replace the course with elective coursework to meet the semester hours required for the degree. See the electives list for options.

² CRIM elective to be approved by director/associate director of MSCY.

Cybersecurity, MS (Boston)

Our Master of Science in Cybersecurity combines a solid understanding of information security technology with relevant knowledge from law, the social sciences, criminology, and management. The MS program is designed for working professionals and also recent graduates who want knowledge they can apply in workplaces to assess and manage information security risks effectively.

The cybersecurity program provides graduates with both the theoretical and experimental skills to perform professional cybersecurity duties. Due to the broad variety of positions that cybersecurity professionals may hold in the industry, our curriculum is designed to provide enough flexibility to our students to tailor their own careers appropriately.

The cybersecurity curriculum is intended to provide a comprehensive approach to cybersecurity, which includes both the technical skills and the contextual understanding that are fundamental to cybersecurity professions.

Concentration in Criminology

Cybercrime has evolved into more advanced techniques and sophisticated structures. Cybersecurity professionals are of vital importance in crime investigations, and for that reason, they need to have a well-rounded background and knowledge. The Master of Science in Cybersecurity provides an interdisciplinary foundation that includes computer science technical courses, complemented with the contextual knowledge courses required for a proper holistic approach to cybercrime. The optional concentration in criminology will offer MSCY students an opportunity to obtain the fundamental principles and the most important practices that criminal justice professionals use.

Gordon Institute of Engineering Leadership**MASTER'S DEGREE IN CYBERSECURITY WITH GRADUATE CERTIFICATE IN ENGINEERING LEADERSHIP**

Students may complete a Master of Science in Cybersecurity in addition to earning a Graduate Certificate in Engineering Leadership (p. 738).

Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The certificate program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour master's degree and certificate require 24 hours from the Master of Science in Cybersecurity (MS required courses, technical track, and contextual track).

For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours (SH) of the GIEL certificate coursework may be applied to the Capstone and elective requirements of the program.

Cybersecurity, MS—Align (Arlington)

The Master of Science in Cybersecurity—Align program is designed for students with a BS/BA degree from all backgrounds. During the first semester of year one, students are expected to take foundational courses in computer science fundamentals, as well as a course in data structures/discrete mathematics. During their second semester, students take coursework in foundations of cybersecurity.

Our Master of Science in Cybersecurity combines a solid understanding of information security technology with relevant knowledge from law and ethics, the social sciences, criminology, and management. The MS program is designed for working professionals and recent graduates who want knowledge they can apply in workplaces to assess and manage information security risks effectively.

The cybersecurity program provides graduates with both the theoretical understanding and technical skills to perform professional cybersecurity duties. Due to the broad variety of positions that cybersecurity professionals may hold in the industry, our curriculum is designed to provide enough flexibility to our students to tailor their own careers appropriately.

Cybersecurity, Graduate Certificate (Boston)

The certificate is designed to give students a solid foundation in cybersecurity. In the course work, students have the opportunity to be exposed to fundamental cybersecurity principles and information security concepts related to information systems, to explore issues involved in the security

of computer systems, and to explore the techniques used in computer forensic examination. The goal of the certificate is to provide prospective cybersecurity professionals with an entry point to industry positions within eight months from admission and with reduced financial investment.

Network Science, PhD (Boston)

The PhD in Network Science program aims to enhance our understanding of networks arising from the interplay of human behavior, sociotechnical infrastructures, information diffusion, and biological agents. This is a multidisciplinary program, with members of the Northeastern University Network

Science Institute (<https://www.networkscienceinstitute.org/>) representing a range of fields including computer science, information science, physics, complexity, sociology, communication, data visualization, organizational behavior, political science, population health, and epidemiology.

This doctoral program is a joint collaboration across five academic colleges. Students are admitted to the College of Social Sciences and Humanities and may choose to move to the home college of their dissertation advisor after they reach candidacy (once they pass their dissertation proposal/comprehensive exam). Students follow policies of their home college, including dissertation format and submission deadlines for graduation. Faculty supervisors may be from one of the following Northeastern academic colleges:

- College of Science
- College of Social Sciences and Humanities
- Khoury College of Computer Sciences
- Bouvé College of Health Sciences
- College of Arts, Media and Design

Required coursework includes 20 semester hours of core courses in network science, plus an additional 20 semester hours of elective courses relevant to the student's area of research. Electives should be discussed with the student's faculty advisor. A minimum of 40 semester hours of coursework is required, though the faculty advisor or program committee may recommend additional coursework based on student research skills.

Alternative Course Path

Students have the option to complete core coursework in their first year of study. This curriculum pathway is expected to be taken by students whose admitting advisor is located outside of the Boston campus and elsewhere in the Northeastern network.

Annual Review

A review of satisfactory progress will be ongoing and formally evaluated at the end of each academic year. Students must maintain a cumulative grade-point average of 3.000 or better in all coursework. Students are not allowed to retake courses. A student who does not maintain a 3.000 GPA, or is not making satisfactory progress on their dissertation research, may be recommended for dismissal by the graduate program committee.

As part of the annual review process, the students will be asked to submit a summary of completed and future courses and research. Students will submit to the program committee:

- A list of courses completed in the last academic year and course plan for the following year
- A short synopsis of their research progress and research plans for the next year

Qualifying Examination

The qualifying exam is an hour-long oral examination of the material covered in the core curriculum and consists of questions selected by network science faculty. One month prior to the exam., students receive between 50 to 80 study questions to prepare. Students will be asked to give a short presentation of their research plans, followed by an oral exam where the qualifying exam panel will ask a subset of the review questions.

Students must take the exam by the fall semester of their third year. If students fail the qualifying exam on their first attempt, they may retake the exam in the following semester. Students who do not pass the exam after two attempts will be asked to leave the program.¹

Dissertation Committee

Students must confirm their dissertation advisor by the end of their second year. The dissertation advisor must be a full-time, tenured, tenure-track, research, or teaching faculty member of Northeastern. The advisor should be a network science doctoral program faculty member, unless the student receives approval by the network science program committee.

Students must confirm their dissertation committee prior to their comprehensive exam. The committee must consist of a minimum of four members:

1. A dissertation advisor
2. A core member of the Network Science Institute faculty
3. An additional tenured/tenure-track, research, or teaching faculty member from the Network Science Institute or other Northeastern faculty approved by the advisor and program committee
4. One member recognized as an expert in the specific topic of research, who can be external to Northeastern.

Dissertation Proposal (Comprehensive Examination)

The comprehensive exam should be completed in the student's fourth year of study. The exam consists of two parts: preparation of the dissertation proposal and oral presentation of the proposal. Students must prepare a written comprehensive research proposal describing the dissertation research plan including review of relevant literature, research questions, motivation, methods, any preliminary results, and potential impact. The proposal must be shared with the doctoral committee members two weeks prior to the scheduled presentation.

Students will give a 30-minute oral presentation to their committee members that is open to the public. Following the presentation, the dissertation committee will assess the proposed research plan and provide feedback to the student. If the proposal and/or presentation do not meet the expectations of the committee, the student will be asked to revise their proposal and/or their presentation. The completion of the comprehensive exam

is considered successful if the dissertation committee approves as satisfactory both the written proposal and the oral presentation. Students may repeat the comprehensive exam once. If they are unsuccessful in their second attempt, the program will ask the student to leave the program.

PhD Candidacy

A student is considered a doctoral candidate upon completion of the required coursework with a minimum cumulative GPA of 3.000, a passing score on the qualification exam, and satisfactory completion of the comprehensive exam.

Dissertation

A PhD student should aim to complete their dissertation in their fifth year of study. Upon successful completion of the research plan proposed in the dissertation proposal, the candidate has an opportunity to prepare the dissertation for approval by the dissertation committee. The dissertation must contain results of extensive research and make an original contribution to the field. The work should give evidence of the candidate’s ability to carry out independent research. It is expected that the dissertation consists of one or more research studies of sufficient quality to merit publication in a reputable journal(s).

Dissertation Defense

Like the dissertation proposal, the dissertation defense consists of two parts: the written dissertation and the defense oral presentation. The PhD candidate should send the written dissertation to their dissertation committee at least one month prior to the dissertation defense.

The oral dissertation defense will be open to the public and will include a Q&A session. Following the presentation, the dissertation committee will communicate their assessment of whether they consider the candidate’s dissertation requirement fulfilled. Once the dissertation requirement is fulfilled, the PhD candidate is ready to graduate. Students then apply to graduate and follow the formatting guidelines and deadlines of their home college.

¹Students who have completed required coursework with a cumulative GPA of 3.000 or better may be eligible to receive an MS in Network Science degree. Note that no students will be admitted directly into the MS in Network Science to pursue a master’s degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Personal Health Informatics, PhD (Boston)

Northeastern University's Doctor of Philosophy in Personal Health Informatics is a transdisciplinary doctoral program focused on educating top researchers in the theoretical underpinnings, design, evaluation, and dissemination of consumer- and patient-focused health systems. Personal health technologies are those that non-health professionals interact with *directly*, both in and out of a clinical setting and in various life stages of illness and wellness.

Examples include:

- Assistive technologies that aid persons with disabilities
- Consumer wellness promotion technologies
- Patient education and counseling systems
- Interfaces for reviewing personal health records
- Advanced ambulatory monitoring for supporting health
- Automated elder care systems that monitor health and support independent living
- Social networking systems connecting families and their social and medical support networks

Developing personal health interface technologies requires that professionals have skills and experience designing systems for individual patients and consumers with a wide range of backgrounds in different contexts using a variety of media, while ensuring that fielded technologies are effective, reliable, and responsive to the needs of at-risk and patient populations. Critical skills and knowledge include needs assessment, theories of interface design and health behavior, rapid prototyping and implementation, experimental design with human subjects in challenging settings, and statistical data analysis and validation. Moreover, these skills must be deployed while working with, or leading, transdisciplinary teams.

The interdisciplinary nature of the program targets students who are interested in improving health and wellness using novel technologies that directly impact the lives of consumers and patients. This is a program for students who are not only technically strong but also socially conscious, design oriented, and interested in rigorously evaluating the technologies they imagine and build. The program provides a path for technical students to acquire more experience in the deployment and evaluation of health technologies in the field but also a path for students with health backgrounds to develop the technical skills needed to prototype and assess creative ideas they envision for improving care. The expected length of study is five years after the bachelor's degree.

Admission Requirements

Students will be accepted with either of the following:

- A bachelor's or higher degree in a technical discipline (e.g., computer science or information science, computer systems engineering) with either academic or work experience demonstrating a commitment to working in health.
- A bachelor's or higher degree in a health science discipline (e.g., nursing, medicine, physical therapy, pharmacy, public health) with either some academic coursework in technology, such as a course in programming or design, or work experience where the applicant participated in the development, adaptation, or evaluation of consumer- or patient-facing health technology. (Otherwise outstanding applicants without programming

skills may be advised to take an introductory programming course prior to entry; otherwise outstanding applicants without any formal experience working in health settings may be advised to spend some time volunteering in a medical or community health setting prior to entry.)

Applicants will be expected to have:

- A minimum 3.000 undergraduate GPA
- A minimum total GRE score of 300 or equivalent
- A minimum GRE academic writing score of 3.5
- For international applicants, a minimum TOEFL score of 105

Minimum Academic Standards and Requirements

RESIDENCY REQUIREMENT

The residency requirement will follow the university's residency requirement for PhD programs (<https://catalog.northeastern.edu/graduate/general-admission-transfer-credit/regulations-phd-programs/>).

TEACHING REQUIREMENT

All personal health informatics PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester:

- Teaches at least three hours of classes
- Prepares at least one assignment, or quiz, or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

DISSERTATION ADVISING

Each student will have one primary advisor from the personal health informatics doctoral program faculty.

DISSERTATION COMMITTEE

The committee will consist of at least three members: the dissertation advisor, one additional personal health informatics doctoral program faculty member, and one member external to Northeastern who is an expert in the specific personal health informatics topic of research. The dissertation committee shall include experts with both health and technology backgrounds. The dissertation advisor must be a full-time member of the Northeastern faculty.

QUALIFYING EXAMINATION

The qualifying examination consists of a three-part exam conducted by a committee of three personal health informatics doctoral program faculty members, each overseeing one part of the exam. The research core of the exam is fulfilled with submission of a high-quality paper to a strong peer-reviewed conference or journal. The health component of the exam is fulfilled when the student passes a written exam developed by a faculty member with a health sciences background, and the technical component of the exam is fulfilled when the student passes an exam developed by a faculty member with a technical background. The content of the written exams and the paper topic are developed in consultation with each faculty member.

DEGREE CANDIDACY

A student is considered a PhD degree candidate upon meeting these conditions:

- Completion of core courses with a minimum GPA of 3.000 overall on the core courses
- Completion of the qualifying examination

COMPREHENSIVE EXAM

A PhD student must submit a written dissertation proposal to the dissertation committee. The proposal should identify the research problem, the research plan, and its potential impact on the field. A presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee.

DISSERTATION DEFENSE

A PhD student must complete and defend a dissertation that involves original research in personal health informatics.

Curriculum Requirements

REQUIRED AND ELECTIVE COURSES

The curriculum is designed to provide all PhD students with a strong foundation in principles critical to the design and evaluation of personal health interfaces. All students take six core courses (24 semester hours) and the user-interface practicum (1 semester hour). The student must maintain a minimum GPA of 3.500 among the six core courses and receive a grade of B or better in each of these courses. All students must also fulfill the programming fundamentals requirement (4 semester hours) and the statistics fundamentals requirement (4 semester hours), where some flexibility in course selection allows tailoring based on background and experience. Two additional research electives (8 semester hours) are selected based on research interests from the personal health informatics electives list. Students are also expected to participate in the personal health informatics seminar series during semesters when it is run.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Qualifying examination
Annual review
Dissertation proposal
Dissertation committee
Dissertation defense

Core Requirements

A grade of B or higher is required in each course. A cumulative 3.500 grade-point average is required for the core requirement.

Code	Title	Hours

Data Science, MS (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Data Science Core

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Programming with Data		
DS 5110	Essentials of Data Science	4
Algorithms		
CS 5800	Algorithms	4
or EECE 7205	Fundamentals of Computer Engineering	
Machine Learning		
CS 6140	Machine Learning	4
or EECE 5644	Introduction to Machine Learning and Pattern Recognition	
Interdisciplinary Capstone		
DS 5500	Data Science Capstone	4

Data Science Concentration Options

Complete one of the following concentrations:

- Computer Science (p. 170)—Khoury College of Computer Sciences
- Engineering Theory and Modeling (p.)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Complete 16 semester hours from the following: ¹		16
CS 5100	Foundations of Artificial Intelligence	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5200	Database Management Systems	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5610	Web Development	
CS 6120	Natural Language Processing	
CS 6200	Information Retrieval	
CS 6220	Data Mining Techniques	
CS 6240	Large-Scale Parallel Data Processing	
CS 6350	Empirical Research Methods	
CS 6620	Fundamentals of Cloud Computing	
CS 6650	Building Scalable Distributed Systems	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
CS 7200	Statistical Methods for Computer Science	
CS 7250	Information Visualization: Theory and Applications	
CS 7280	Special Topics in Database Management

EECE 7337	Information Theory	
EECE 7346	Probabilistic System Modeling and Analysis	
IE 6400	Foundations for Data Analytics Engineering	
IE 7275	Data Mining in Engineering	
IE 7280	Statistical Methods in Engineering	
Translational and Advanced Courses		
Complete the remaining 12 semester hours from the following:		12
BIOE 5750	Modeling and Inference in Bioengineering	
BIOE 5880	Computational Methods in Systems Bioengineering	
BIOE 6200	Mathematical Methods in Bioengineering	
CHME 5137	Computational Modeling in Chemical Engineering	
CHME 5649	Numerical Strategies and Data Analytics for Chemical Sciences	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
EECE 5360	Combinatorial Optimization	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5614	Reinforcement Learning and Decision Making Under Uncertainty	
EECE 5626	Image Processing and Pattern Recognition	
EECE 5639	Computer Vision	
EECE 5640	High-Performance Computing	
EECE 5642	Data Visualization	
EECE 5645	Parallel Processing for Data Analytics	
EECE 7204	Applied Probability and Stochastic Processes	
EECE 7215	Introduction to Distributed Intelligence	
EECE 7223	Riemannian Optimization	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	
EECE 7345	Big Data and Sparsity in Control, Machine Learning, and Optimization	
EECE 7346	Probabilistic System Modeling and Analysis	
EECE 7370	Advanced Computer Vision	
EECE 7397	Advanced Machine Learning	
EECE 7945	Master's Project	
IE 5137	Computational Modeling in Industrial Engineering	
IE 5390	Structured Data Analytics for Industrial Engineering	
IE 5630	Biosensor and Human Behavior Measurement	
IE 5640	Data Mining for Engineering Applications	
IE 6400	Foundations for Data Analytics Engineering	
IE 6600	Computation and Visualization for Analytics	
IE 6700	Data Management for Analytics	
IE 6750	Data Warehousing and Integration	
IE 7270	Intelligent Manufacturing	
IE 7275	Data Mining in Engineering	
IE 7280	Statistical Methods in Engineering	
IE 7295	Applied Reinforcement Learning in Engineering	
IE 7300	Statistical Learning for Engineering	

IE 7500 Applied Natural Language Processing in Engineering

IE 7615 Neural Networks and Deep Learning

- ¹ Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional hour, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business
 - Entrepreneurship
 - Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business

- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouv  College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4
CS 6120	Natural Language Processing	4
CS 6140	Machine Learning	4
or DS 5220	Supervised Machine Learning and Learning Theory

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics of Design	

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
Electives		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
Electives		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8

HIST 5241	Exhibits and Museums
HIST 7250	Topics in Public History (Public History and Slavery)
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4
ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
GSND 6460	Generative Game Design

GSND 5122		1 XR and games elective 2	4
XR and games elective 1		4	
		9	8
Total Hours: 35			

Game Science and Design, MS (Boston)

The Master of Science (MS) in Game Science and Design is a program that seeks to give students a comprehensive understanding of how successful game products are created in a player-centric environment. Successful graduates who wish to become professional game developers or game user research experts should be able to collaborate effectively in this dynamic and burgeoning field of practice and research. Focusing on the science of game development, students have an opportunity to learn the design and technological skills needed to build a game and develop a deep understanding of playability and analytics that makes products successful in an increasingly competitive marketplace.

The game industry has expanded to include social and mobile gaming; augmented and virtual reality; as well as games in health, education, and training. Rapid innovations are happening in player psychology, middleware, graphics and authoring tools, game mechanics, and artificial intelligence and narrative techniques. It has become an increasingly competitive space.

The selectiveness of the industry and the diversity of the skills required mean that students seeking entry need both broad and deep skills. As an emergent industry using diverse technology and collaborative practices, the game industry needs professionals with interdisciplinary skill sets who can blend knowledge about development with knowledge about evaluation methods and players' behavior and psychology.

Jointly offered by Northeastern's College of Arts, Media and Design and Khoury College of Computer Sciences (<https://www.khoury.northeastern.edu/>), the **Master of Science in Game Science and Design** is a one-of-a-kind interdisciplinary program that seeks to prepare students to meet this need by weaving together science and design. This is a two-year, 34-semester-hours program.

All admitted students will be assigned to an advisor who will help them select a pathway with a coherent set of electives depending on their career goals. The advisor will also monitor their progress through the master's degree.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core		
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
GSND 5122	Business Models in the Game Industry	1

GSND 5130	Mixed Research Methods for Games	4
Thesis		
Students complete Games Project, then select either Thesis or a second completion of Games Project, in consultation with the program coordinator.		
GSND 7995	Games Project	4
<i>Thesis Conclusion</i>		
Complete an additional 4 Semester Hours from the following:		4
GSND 7990	Thesis	
GSND 7995	Games Project	

Core Electives

Code	Title	Hours
Game Design		
Complete one of the following:		4
GSND 6000	Advanced Topics in Game Design	
GSND 6225	Applied Game Design	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
Game Science		
Complete one of the following:		4
GSND 6001	Advanced Topics in Game Science	
GSND 6320	Psychology of Play	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	

Other Electives

Code	Title	Hours
Complete any two (8 Semester Hours) of the following courses listed.		8
If ARTG 5000 or GSND 6000 or GSND 6001 is completed more than once, the additional completions may be allowed toward the electives.		
Elective courses outside of CAMD are subject to availability and registration policy of the home college.		
Science		
CS 5340	Computer/Human Interaction	
PSYC 4612	Laboratory in Cognition	
Programming		
CS 5150	Game Artificial Intelligence	
CS 5850	Building Game Engines	
GSND 6460	Generative Game Design	
Art		
ARTG 5000	Topics in Design	
ARTG 5100	Information Design Studio 1: Principles	
ARTG 5130	Visual Communication for Information Design	
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
Extended Realities		
EXRE 5010	Immersive Media: Extended Realities (XR) History, Theory, and Impact	
EXRE 5011	Seminar for EXRE 5010	
EXRE 5020	Developing Extended Realities (XR)	
EXRE 5030	Designing Extended Realities (XR)

JRNL 6341	Telling Your Story with Data

Program Credit/GPA Requirements

34 total semester hours required

Minimum 3.000 GPA required

Plan of Study

Sample Plan of Study

TWO YEARS, ONE (OPTIONAL) CO-OP

Year 1					
Fall	Hours	Spring	Hours	Summer Full Semester	Hours
GSND 5110		4 Elective		4 Co-op (optional)	0
GSND 5111		1 Elective		4	
GSND 5130		4			
		9		8	0
Year 2					
Fall	Hours	Spring	Hours		
GSND 5122		1 GSND 7990 or 7995		4	
GSND 7995		4 Elective		4	
Elective		4			
		9		8	

Total Hours: 34

Health Informatics, MS (Boston)

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students may opt to select a concentration to deepen their knowledge in a particular area. Successful students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

Core Requirements

Code	Title	Hours
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
Choose one of the following courses in consultation with your advisor:		
HINF 5105 or HINF 5106	The American Healthcare System The Canadian Healthcare System	3

Program Options

Choose one of the following options:

- Health Informatics (Without Concentration) (p. 448)
- Health Informatics with Health Informatics Analytics Concentration (p. 449)
- Health Informatics with Personal Health Informatics Concentration (p. 449)

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

HEALTH INFORMATICS (WITHOUT CONCENTRATION)

Code	Title	Hours
Required Coursework in Addition to Core Requirements		
<i>Business Management</i>		
Complete two of the following:		6
HINF 5407	Business Application of Decision Support in Healthcare	
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management	
or EMGT 5220	Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PHTH 5226	Management and Leadership in Public Health and Healthcare	
<i>Health Informatics</i>		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	
HINF 6405	Quantifying the Value of Informatics	
PHTH 5232	Evaluating Healthcare Quality	
<i>Technical</i>		
Complete two of the following:		6
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
HINF 6400	Introduction to Health Data Analytics	
HLTH 5800	AI Across the Health Sciences	
PHTH 5202	Introduction to Epidemiology	
PHTH 5210	Biostatistics in Public Health	
PHTH 6210	Applied Regression Analysis	
PHTH 6400	Principles of Population Health 1	
PHTH 6440	Advanced Methods in Biostatistics	
One course from the following may count toward the technical core requirement:		
DA 5020	Collecting, Storing, and Retrieving Data	
DA 5030	Introduction to Data Mining/Machine Learning	
INSH 5301	Introduction to Computational Statistics	
INSH 5302	Information Design and Visual Analytics	
<i>Capstone</i>		
HINF 7701	Health Informatics Capstone Project	3
<i>Electives</i>		
Complete two of the following:		6

DA 5020	Collecting, Storing, and Retrieving Data
DA 5030	Introduction to Data Mining/Machine Learning
HINF 6345	Design for Usability in Healthcare
INSH 5301	Introduction to Computational Statistics
INSH 5302	Information Design and Visual Analytics
PHIL 5110	Responsible AI

HEALTH INFORMATICS ANALYTICS CONCENTRATION

Code	Title	Hours
Required Coursework in Addition to Core Requirements		
<i>Business Management</i>		
Complete two of the following:		6
HINF 6201	Organizational Behavior, Work Flow Design, and Change Management	
HINF 6202	Business of Healthcare Informatics	
HINF 6215	Project Management	
or EMGT 5220	Engineering Project Management	
HINF 6335	Management Issues in Healthcare Information Technology	
HINF 6240	Improving the Patient Experience through Informatics	
PHTH 5226	Management and Leadership in Public Health and Healthcare	
<i>Health Informatics</i>		
Complete two of the following:		6
HINF 5102	Data Management in Healthcare	
HINF 5110	Global Health Information Management	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
HINF 5300	Personal Health Interface Design and Development	
HINF 5301	Evaluating Health Technologies	
HINF 6205	Creation and Application of Medical Knowledge	
HINF 6350	Public Health Surveillance and Informatics	
HINF 6404	Patient Engagement Informatics and Analytics	
HINF 6405	Quantifying the Value of Informatics	
PHTH 5232	Evaluating Healthcare Quality	
<i>Technical</i>		
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4
<i>Capstone</i>		
HINF 7701	Health Informatics Capstone Project	3
Elective		
Complete one of the following:		4
IE 5137	Computational Modeling in Industrial Engineering	
IE 5390	Structured Data Analytics for Industrial Engineering	
IE 5400	Healthcare Systems Modeling and Analysis	
IE 5640	Data Mining for Engineering Applications	
IE 6600	Computation and Visualization for Analytics	
IE 6700	Data Management for Analytics	
IE 7275	Data Mining in Engineering	

PERSONAL HEALTH INFORMATICS CONCENTRATION

Code	Title	Hours
Required Coursework in Addition to Core Requirements		
<i>Health Informatics</i>		
HINF 6205	Creation and Application of Medical Knowledge	3
<i>Technical</i>		
CS 5340	Computer/Human Interaction	4
Complete one of the following. Students must petition to take electives outside the approved list:		4
CS 5010	Programming Design Paradigm	

CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 6200	Information Retrieval	
Complete one of the following:		3
HINF 6220	Database Design, Access, Modeling, and Security	
HINF 6355	Interoperability Key Standards in Health Informatics	
<i>Theory and Evaluation</i>		
PHTH 5210	Biostatistics in Public Health ¹	3
Complete one of the following:		4
CS 6350	Empirical Research Methods (On campus only)	
HINF 5200	Theoretical Foundations in Personal Health Informatics	
Culminating Experience		
Complete one of the two options below.		6
<i>Thesis Option</i>		
Students must enroll in HINF 7990 for two semesters for a total of 6 semester hours with director approval only and under supervision of Personal Health Informatics faculty:		
HINF 7990	Thesis	
<i>Capstone Option</i>		
HINF 7701	Health Informatics Capstone Project	
Complete any course for a minimum of 3 semester from the Health Informatics (without concentration) curriculum, that has not been used in previous requirements.		

¹ Student may petition director to take a more advanced stats course, such as Applied Regression Analysis (PHTH 6210).

Health Informatics, MS (Vancouver)

Northeastern University's interdisciplinary Master of Science in Health Informatics was the first MS in the field and is now one of the few that is fully interdisciplinary between health science and computer science.

The program seeks to prepare students to address the combined clinical, technical, and business needs of health-related professionals. Students graduate with the knowledge of how technology, people, health, and the healthcare system interrelate; the ability to use technology and information management to improve healthcare delivery and outcomes; and the skills to communicate effectively among healthcare practitioners, administrators, information technology professionals, and patients.

Please visit Bouvé College Learning Outcomes (<http://bouve.northeastern.edu/learning-outcomes/>) for the specific student learning outcomes for this program.

Program Requirements

Note: For the 2025–2026 academic year, this program will be offered in an online format. If you have questions about eligibility, please reach out to your admissions counselor.

Complete all courses and requirements listed below unless otherwise indicated.

A grade of B– or higher is required in each course.

Code	Title	Hours
Core Requirements		
HINF 5101	Introduction to Health Informatics and Health Information Systems	3
HINF 5106	The Canadian Healthcare System	3

Program Credit/GPA Requirements

Minimum 33 total semester hours required

Minimum 3.000 GPA required

Robotics, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics offers instruction by the faculty of the College of Engineering, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences. The program is designed to provide students with comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Biomedical and Rehabilitation Robotics—College of Engineering
- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Gordon Institute of Engineering Leadership

Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate coursework may be applied to this program's elective requirements in the coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
Electrical and Computer Engineering		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Computer Science		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Concentrations

Complete one of the following options:

- Biomedical and Rehabilitation Robotics (p. 181)—College of Engineering
- Computer Science (p. 182)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 182)—College of Engineering
- Mechanical Engineering (p. 183)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

BIOMEDICAL AND REHABILITATION ROBOTICS CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
Complete one of the following:		4
BIOE 5520	Bioengineering Design for Robotic Rehabilitation	
PT 5170 and PT 5171	Motor Control and Lab for PT 5170	
PT 5321	Applications of Biomechanics in Human Function and Movement	
Complete one of the following options:		16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.

BIOE 7945 Master's Project

or PT 7995 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.

BIOE 7945 Master's Project

or PT 7995 Master's Project

BIOE 7990 Thesis

or PT 7990 Thesis

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours

Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.

Required Course

Complete one additional CS course not used to fulfill the core requirements: 4

CS 5180 Reinforcement Learning and Sequential Decision Making

CS 5335 Robotic Science and Systems

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

CS 8674 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

CS 7990 Thesis

CS 8674 Master's Project

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

ELECTRICAL AND COMPUTER ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional EECE course not used to fulfill the core requirements: 4

EECE 5550 Mobile Robotics

EECE 5552 Assistive Robotics

EECE 5554 Robotics Sensing and Navigation

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

EECE 7945 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

EECE 7945 Master's Project

EECE 7990 Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

MECHANICAL ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements: 4

ME 5250	Robot Mechanics and Control
ME 5659	Control Systems Engineering

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

ME 7945 Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

ME 7945 Master's Project

ME 7990 Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	

CS 5097	Mixed Reality
CS 5100	Foundations of Artificial Intelligence
CS 5170	Artificial Intelligence for Human-Computer Interaction
CS 5330	Pattern Recognition and Computer Vision
CS 5340	Computer/Human Interaction
CS 5800	Algorithms
CS 6120	Natural Language Processing
CS 6140	Machine Learning
CS 6350	Empirical Research Methods
CS 7140	Advanced Machine Learning
CS 7150	Deep Learning
CS 7180	Special Topics in Artificial Intelligence
EECE 5550	Mobile Robotics
EECE 5552	Assistive Robotics
EECE 5554	Robotics Sensing and Navigation
EECE 5580	Classical Control Systems
EECE 5639	Computer Vision
EECE 5642	Data Visualization
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 7150	Autonomous Field Robotics
EECE 7323	Numerical Optimization Methods
EECE 7337	Information Theory
EECE 7370	Advanced Computer Vision
EECE 7397	Advanced Machine Learning
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)
IE 6500	Human Performance
IE 7280	Statistical Methods in Engineering
IE 7315	Human Factors Engineering
IE 7615	Neural Networks and Deep Learning
ME 5240	Computer Aided Design and Manufacturing
ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5654	Elasticity and Plasticity
ME 5655	Dynamics and Mechanical Vibration
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 6200	Mathematical Methods for Mechanical Engineers 1
ME 6250	Wearable Robotics
ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering
PT 5170	Motor Control
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 7001	Core Concepts in Rehabilitation Science and Research
PT 7005	Experimental Design and Applied Statistics
PT 7020	Technologies in Movement and Rehabilitation Science

Computer Science		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Concentrations

Complete one of the following concentrations:

- Computer Science (p. 185)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 185)—College of Engineering
- Mechanical Engineering (p. 186)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

CONCENTRATION IN COMPUTER SCIENCE

Code	Title	Hours
Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.		
Required Course		
Complete one additional CS course not used to fulfill the core requirements:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p.)		
<i>Project Option</i>		
CS 8674	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p.)		
<i>Thesis Option</i>		
CS 8674	Master's Project	
CS 7990	Thesis	
Complete 8 semester hours of courses from the elective course list. (p.)		

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

CONCENTRATION IN ELECTRICAL AND COMPUTER ENGINEERING

Code	Title	Hours

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional EECE course not used to fulfill the core requirements:	4

EECE 5550	Mobile Robotics
EECE 5552	Assistive Robotics
EECE 5554	Robotics Sensing and Navigation

Complete one of the following options:	16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p.)

Project Option

EECE 7945	Master's Project

Complete 12 semester hours of courses from the elective course list. (p.)

Thesis Option

EECE 7945	Master's Project

EECE 7990	Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p.)

Optional Co-op

Complete the following (students in EECE and MIE concentrations must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

CONCENTRATION IN MECHANICAL ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements:	4

ME 5250	Robot Mechanics and Control
ME 5659	Control Systems Engineering

Complete one of the following options:	16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p.)

Project Option

ME 7945	Master's Project

Complete 12 semester hours of courses from the elective course list. (p.)

Thesis Option

ME 7945	Master's Project

ME 7990	Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p.)

Optional Co-op

Complete the following (students in EECE and MIE concentrations must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1

ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction

Data Analytics, Graduate Certificate (Boston)

The interdisciplinary Graduate Certificate in Data Analytics is offered through a collaboration between the Khoury College of Computer Sciences and the College of Social Sciences and Humanities. The certificate curriculum emphasizes the skills needed to bridge between emerging technological capacities and traditional policymaking processes. The program is designed to provide students with foundational knowledge in data science—

including data management, machine learning, data mining, statistics, and visualizing and communicating data—that can be applied to data-driven decision making in any discipline.

For more information on the certificate, refer to the program's website (<https://www.northeastern.edu/graduate/program/graduate-certificate-in-data-analytics-boston-14423/>).

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
DA 5020	Collecting, Storing, and Retrieving Data	4
DA 5030	Introduction to Data Mining/Machine Learning	4
INSH 5301	Introduction to Computational Statistics	4
INSH 5302	Information Design and Visual Analytics	4

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

College of Engineering

The Graduate School of Engineering offers research and professional degree programs organized around a core curriculum that equips students with a solid foundation for technical and leadership positions in industry organizations, government laboratories, research laboratories, and educational institutions. By involving students in many levels of research, encouraging collaboration across departments, and partnering with outside institutions and organizations globally, Northeastern University engineering graduate students have the opportunity to gain a rich and experiential education in their chosen discipline.

Master of Science and doctoral degree programs are offered, as well as numerous graduate certificate programs that can be applied toward master's degree programs for lifelong learning. The GSE offers traditional full-time day and part-time evening master's and doctoral degree programs and part-time evening certificate programs. Programs are offered in Boston, Arlington, Miami, Seattle, Silicon Valley, Oakland, Portland (Maine), Toronto, and Vancouver. A number of courses and degree programs are also available in a flexible online or hybrid format, which are well suited for distance learners. Innovative programs, such as interdisciplinary degrees, business/entrepreneurship pathways, and programs for students without an undergraduate engineering degree (or who need additional preparatory coursework), enable students to personalize their learning experience.

Academic Policies

- Academic Dismissal Policy (p. 461)
- Academic Integrity Policy (p. 461)
- Academic Standing Policy (p. 462)
- Appeals Policy (p. 462)
- Attendance Policy (p. 463)
- Campus Transfer and Location Change (p. 463)
- Certificate Policies and Procedures (p. 464)
- Course Registration (p. 466)
- Course Retake / Course Substitution (p. 466)
- Course Selection (p. 467)
- Dissertation Committee (p. 467)
- Grievance Policy (p. 468)
- PhD Student Progress and Review (p. 468)
- Program Completion (p. 469)
- Reenrollment Policy for Full-time Students (p. 469)
- Thesis Policy (p. 470)

Academic Dismissal Policy

A student placed on academic probation for a cumulative grade-point average of less than 3.000 will have one academic term to raise the cumulative GPA greater than or equal to 3.000. Students whose cumulative GPA is below 3.000 for two consecutive terms in which they took courses for credit (including Career Management for Engineers (ENCP 6000) or Introduction to Cooperative Education (ENCP 6100), if taken) will automatically be dismissed from their degree program at the end of the second term. Students in this situation may submit an Academic Dismissal Appeal form to the graduate school, *to be reviewed by the student's academic department*, to request a final one-term extension. Students whose cumulative GPA is below 3.000 for three consecutive terms will automatically be dismissed from their degree program.

A student will also be dismissed from their degree program if they do not meet the requirements of their program.

A student who is dismissed from their program may submit an appeal through the college's graduate appeals process.

Students dismissed from their program will receive a written notification from the Graduate School of Engineering.

Academic Integrity Policy

Graduate students are expected to abide by Northeastern University's Academic Integrity Policy (p. 88).

A faculty member who suspects that a graduate student has violated the university's Academic Integrity Policy must offer to meet with the student to discuss the suspected violation. The faculty member may ask the student to provide supporting documentation and may gather information from other students involved in the incident.

If the faculty member finds that the student has violated the Academic Integrity Policy, the faculty member may take action as the faculty member considers appropriate and can include adjusting the student's grade, requiring additional academic work, forfeiture of co-op opportunity, and/or failing the qualifying examination. In this case, the faculty member is encouraged to submit an information-only report about the incident to the university Office of Student Conduct and Conflict Resolution, which handles suspected violations of the Academic Integrity Policy. Any penalties must be imposed by the faculty member within three weeks of the suspected violation.

If the student is not satisfied with the faculty member's decision, the student may appeal to the department by contacting the department head (or designee) who should apply the department's procedures to review the case. If the suspected violation took place in a department or if it involved cooperative education, the appeal should be submitted to that unit. Otherwise, the appeal should be submitted directly to the college. The student should appeal within one week of the imposition of penalties.

The department will either affirm the faculty member's decision or substitute an alternative decision. The department's decision should be made within two weeks of receiving the appeal.

The student may appeal the department decision using the college's academic appeal process. The college will either affirm the department's decision or substitute an alternative decision.

The student may appeal the college decision using the university's academic appeal process.

The faculty member may appeal the department or college decision by submitting a complaint to OSCCR, which will determine whether the student is responsible for the suspected violation. OSCCR will make a recommendation to the senior vice provost for student affairs who will make a final decision.

If the student is found to be responsible for a violation by OSCCR, the faculty member may take action as appropriate. If the student is found to be not responsible for a violation, the faculty member cannot take action and if action was previously taken, the action must be reversed.

The dean (or designee) of the involved college shall take whatever action is necessary to implement the resolution of the case, including reporting a change of grade to the Office of the University Registrar.

Academic Standing Policy

Academic standing at Northeastern University is determined by a student's cumulative grade-point average.

Academic probation is a period of time when a student must address and remediate academic deficiencies.

Full-time Students

Full-time graduate students are expected to maintain a cumulative GPA of 3.000 or higher each term to remain in good academic standing and to progress toward graduation.

Students falling below a cumulative GPA of 3.000 are placed on academic probation for each academic term in which the cumulative GPA is below 3.000 after the completion of at least 8 semester hours. Full-time students must raise the cumulative GPA to 3.000 or higher after completion of at least 8 additional semester hours to regain good academic standing status.

Part-time Students

Graduate students in official part-time status with the university are expected to maintain a cumulative GPA of 3.000 or higher each term to remain in good academic standing and to progress toward graduation.

Students falling below a cumulative GPA of 3.000 after at least 8 semester hours are completed are placed on academic probation. Part-time students must raise the cumulative GPA to 3.000 or higher after completion of at least 8 additional semester hours to regain good academic standing status.

Summer Term

There are three semesters during the summer session: Summer First Half, Summer Second Half, and Summer.

Academic standing for the summer terms will be reviewed and evaluated for all students at the end of the Summer Second Half. If students complete fewer than 8 semester hours during any of the summer semesters combined, their academic standing is evaluated after the completion of at least 8 semester hours.

Appeals Policy

It is the policy of Northeastern University that all students shall be treated fairly with respect to evaluations made of their academic performance, standing, and progress. This policy provides an appeals mechanism to students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated in an academic determination.

The university presumes that academic judgments by its faculty are fair, consistent, and objective. Substitution of a different academic judgment for that of the original evaluator is a serious intrusion upon academic prerogatives entrusted to the faculty and others involved in academic evaluations.

This policy applies to appeals related to academic determinations in COE graduate courses, regardless of the student's home college, and graduate programs. Appeals related to graduate courses or programs offered by another college should be handled by that college. Appeals related to third-semester dismissals should be submitted directly to the college.

Step 1. The student should first speak with the involved faculty or staff member about any determination about which they have questions and attempt to reach a resolution.

Step 2. If the student is not satisfied with the decision, the student may appeal. If the appeal relates to a course or program offered by a department, the appeal should be submitted to that department. Otherwise, the appeal should be submitted directly to the college. Department appeals should be submitted to the department chair (or designee) who should apply the department's procedures to review the case. The student must appeal within four weeks of the academic determination.

A student shall initiate this appeal of an academic determination by submitting a written statement that specifies the details of the action or judgment that they seek to appeal. This statement must start with a clear description of the basis for the appeal and should include basic facts about the situation leading to the appeal, when the situation occurred, who was involved, and the resolution sought by the student. All relevant supporting materials should be attached as addenda to the statement. Appeals should avoid unsubstantiated, defamatory, or ad hominem accusations regarding the motivations of the faculty member or other persons involved in making the academic determination.

The department will either affirm the original decision or substitute an alternative decision. The department's decision shall be made in writing and include the reasoning behind the decision. The department's decision must be made within two weeks of receiving the appeal.

Step 3. The student may appeal the department's decision to the college. To initiate the college appeal, the student shall submit to the associate dean of graduate education their statement, the department's response, and any additional information the student would like to be considered. Appeals to the college are reviewed by the Graduate Appeals Committee, which makes recommendations to the associate dean for graduate education. The student shall be offered the opportunity to meet with the committee to make a statement, present relevant facts of the case, and respond to clarifying questions the committee may have regarding the case. The chair of the committee reserves the right to end this meeting after 10 minutes if no further relevant facts are forthcoming. The committee may invite faculty and staff members to discuss the case and share relevant information.

The committee will either affirm the original decision, substitute an alternative decision, or refer the case back to the department for additional consideration. The committee's decision shall be made in writing and include the reasoning behind the decision. The committee's decision must be made within two weeks of receiving the appeal.

Step 4. Upon receiving the recommendation of the committee, the associate dean for graduate education shall review the case and make a final decision for the college.

Attendance Policy

In each term, students enrolled in on-ground sections are expected to be on campus and attending class beginning with the first day of classes. Students in online sections are expected to log in and participate in class beginning with the first day of classes.

Students who join a class after the first day of class during the university add period, or who are approved for late registration by the instructor and the Graduate School of Engineering, are responsible for all coursework missed prior to enrolling. Enrolled students who do not attend class during the first week of a semester risk being dropped from the course.

In the interest of students' success, the college does not support the arrival of students to class after the university add deadline. Students should not expect to be added to a class after the university add deadline and will be held responsible for the academic, financial, or immigration consequences due to their late or nonattendance without prior approval.

In cases where an enrolled student cannot arrive to campus by the first day of class due to circumstances beyond their control, it is the student's responsibility to contact the instructor for approval and notify the Graduate School of Engineering.

Campus Transfer and Location Change

This page outlines policy and procedure related to MS students transferring to a different Northeastern campus ("Campus Transfer") and enables mobility within our Global Network ("Location Change").

The Campus Transfer and Location Change policy applies to transfer/changes within the United States. Transfers within Canada, from the United States to Canada, or vice versa are not permitted.

Campus transfers and location changes are for continuing students only. Students who have not yet started their program should contact the admissions office.

Students may not transfer from a Global Network campus to Boston. Students may only have one campus transfer or location change per program.

Students who received a Global Network campus scholarship will not maintain their scholarship following campus transfer or location change. If the new campus is offering a scholarship for the student's program at the time of transfer, the student will be eligible to apply for that scholarship.

Campus transfers and location changes may depend on the credits completed and length of time the new campus has been running the program. Please, see the eligibility requirements below.

The student must have a minimum grade-point average of 3.000 or higher and cannot be on academic probation.

Campus transfers and location changes are subject to program approval even if students meet all eligibility requirements.

Definitions

CAMPUS TRANSFER

Students may request an official campus transfer from their school/college to complete their program. Students requesting an official campus transfer will transfer to a Northeastern U.S. Global Network Campus (new campus) to finish their degree requirements. The permanent transfer must be approved by the school/college academically and must meet regulatory requirements (state licensure). If the student is an international student, the program must be offered in compliance with F-1/J-1 requirements at the requested new campus location. International students should seek advice from the Office of Global Services (<https://international.northeastern.edu/ogs/>) before their final decision to transfer to another campus.

SHORT-TERM CAMPUS LOCATION CHANGE

Students who want to visit one of the Northeastern U.S. Global Network Campuses for one or two terms may request an official location change (the new campus) for a period no longer than one academic year (a fall and spring semester) and for no more than 50% of a degree program. The change must be approved by the school/college academically, and courses must be offered that allow the student to make normal academic progress in compliance with regulatory requirements. For international students to change their campus location, the academic program must be offered in compliance with F-1/J-1 requirements at the requested new campus location. If the location change is approved, the home campus will remain unchanged on the student's record.

Eligibility

The academic advisors (primary academic advisor and new campus academic advisor) collaborate with the student to determine academic eligibility. We recommend that students meet with their advisors to discuss the reasoning for their campus change request, any program-specific requirements, and eligibility. To be academically eligible:

- Students intending to begin at their new campus location for the fall may do so after completing their first two courses of the program (four for MSIS—Bridge programs), provided that the campus has already run that program for one semester and is offering second-semester courses.
- Students intending to begin at their new campus location for the spring may do so after completing the first four courses of the program (six for MSIS—Bridge programs) provided that the campus has already run that program for one semester and is offering second-semester courses.
- Students completing courses 6 through 8 of their programs (9 through 10 for MSIS—Bridge programs) are not eligible to transfer to a new campus within the network that has not run the program for more than two semesters.
- The student must have a minimum GPA of 3.000 or higher and cannot be on academic probation.
- Campus transfers and location changes are subject to program approval even if students meet all eligibility requirements.

Process

Students requesting an official campus transfer or a location change are required to apply at least one month before the start of the term. The request can be made as early as a week before registration opens. Please refer to the Academic Calendar for these dates.

- A student interested in a campus transfer or location change needs to contact their primary academic advisor and the academic advising team of the new campus to determine eligibility.
 - Seattle: coe-seattle-gradadvising@northeastern.edu
 - Silicon Valley: coe-sv-gradadvising@northeastern.edu
 - Portland, Maine: coe-roux-gradadvising@northeastern.edu
 - Miami: coe-miami-gradadvising@northeastern.edu
 - Arlington: coe-arlington-gradadvising@northeastern.edu
 - Oakland: coe-oakland-gradadvising@northeastern.edu
- Once the eligibility is confirmed, the student fills out the first two parts of the Registrar Campus Transfer and Location Change form (https://service.northeastern.edu/registrar/?id=kb_article_view&sysparm_article=KB000020000&sys_kb_id=abecaafc93445a10469eb53a7bba1089&spa=1) and emails it to the advisor of the new campus.
- The advisor of the new campus signs the Registrar Campus Transfer and Location Change form and emails it to the Office of the University Registrar (copying the student).
- Once approved, the Office of the University Registrar will email the student and advisor of the new campus to confirm approval and changes the campus attribute. This is only if it is a campus transfer. If it is a campus location change, the campus attribute will not be changed.
- **International students:** F-1/J-1 students must submit the OGS Intercampus Transfer Request as per the instructions on the OGS e-form. Within the Intercampus Transfer Request e-form, the student will need to download the Intercampus Transfer Clearance Letter, complete the first part (name, NUID, degree), and then send it to the new campus advisor. Once signed, the new campus advisor will email the student the Intercampus Transfer Clearance Letter. Only after completing this step, can the student electronically submit the Intercampus Transfer Request via MyOGS.

Certificate Policies and Procedures**Admission Into a Graduate School of Engineering Graduate Certificate****CURRENT GSE DEGREE-SEEKING STUDENTS**

In order to be considered admissible to a College of Engineering graduate certificate, current GSE students:

1. Must be in good academic standing. Students on academic probation will not be admitted into a graduate certificate program.
2. **Must apply for admission to a certificate program in the fall or spring semester and prior to their final term of study. Requests for admission in the summer semesters or final term will not be considered, regardless of whether coursework has been completed.**
3. Current College of Engineering PhD students must also have the approval of their PhD faculty advisor.

NON-DEGREE-SEEKING STUDENTS

In order to be considered admissible to a College of Engineering graduate certificate, non-degree-seeking students must have:

1. A minimum 3.000 grade-point average.
2. Completed a relevant engineering undergraduate degree.
 - Applicants without an engineering undergraduate degree should apply to the Graduate Certificate in Technology Systems Management.

Application Procedures

Apply via the Certificate Application for Current COE Graduate Students (<https://enroll.northeastern.edu/register/?id=ef6fb869-21a6-4e34-bc09-e830e53d13b4>). Graduate School of Engineering continuing students are not required to resubmit their admissions documents or pay the application fee. Contact the Graduate School of Engineering Admissions team (coe-gradadmissions@northeastern.edu) for questions about the application process.

Academic Standing

All certificate-seeking students must meet the GSE requirement of a 3.000 GPA to remain in good standing. Only students who complete the required coursework and remain in good standing will be eligible to be awarded a certificate.

GSE Certificate Policies

- Students must complete the certificate coursework before or in the same semester that they complete their primary degree coursework.

DOMESTIC STUDENTS

- May take courses on-ground at student's campus of study or online, provided the certificate is approved and offered at that campus.

INTERNATIONAL STUDENTS

- May take courses on-ground at student's campus of study, provided the certificate is approved and offered at that campus.
- During every required academic term, international students must maintain **full-time status and appropriate on-ground presence** at Northeastern University to comply with federal immigration regulations. International students must consult with the Office of Global Services (<https://international.northeastern.edu/ogs/>) to determine eligibility for enrollment in online courses.

Certificate Coursework Credit Sharing with GSE Degrees

In approved circumstances, certificate coursework completed by graduate students may also be applied toward requirements of a College of Engineering graduate degree program. Two factors will be considered: course eligibility and the number of courses permitted to be applied to requirements of both the degree program and the certificate program (double counting).

Course Eligibility

GSE certificate courses may be counted toward an engineering graduate degree if the **degree program** requirements allow for the course. Refer to the specific graduate degree requirements in the university catalog. Students cannot substitute any of the certificate courses, except by petition.

Course Double Counting

For most **disciplinary degrees**, students can double count up to 8 semester hours of eligible courses for a graduate degree and graduate certificate. An exception is made for the following disciplinary degrees where students can double count up to 16 semester hours of eligible courses (with academic advisor approval for courses):

- All civil and environmental engineering programs (p. 515) pursuing the climate and engineering, and sustainability engineering certificates
- MSeNeS Energy Systems (p. 660)
- MSEM Engineering Management (p. 655)
- MSIE Industrial Engineering (p. 651)
- MSOR Operations Research (p. 677)
- MSME Mechanical Engineering with concentration in General Mechanical Engineering (p. 664)

For all **multidisciplinary degree** (MGEN) programs: Students can double count up to 16 semester hours of eligible courses for a graduate degree and graduate certificate.

Double Counting Across Certificates

Engineering graduate courses may not be double counted across graduate certificates.

PlusOne Programs

Engineering graduate courses may not be triple counted for graduate certificate and/or degree programs. Graduate courses that are double counted toward the bachelor's and master's degrees (e.g., PlusOne programs) may not be counted toward a graduate certificate.

Graduate Courses Applied to an Undergraduate Degree

Graduate courses that were applied toward an undergraduate degree cannot be double counted for a graduate certificate. Graduate courses completed as an undergraduate that are taken above and beyond the requirements for the undergraduate degree may count toward a graduate certificate.

Co-op

Students enrolled in only a certificate program are not eligible to participate in co-op. Co-op eligibility will reside with the graduate degree program of the degree-seeking student. There are no additional considerations allotted by the certificate program.

Applying to Graduate

Students must apply to graduate for their certificate when the application for graduation window opens or no later than the beginning of the term they plan to graduate. If graduating with both a certificate and a degree program, they must apply for the certificate first and then the degree program. Both the certificate and degree program will be awarded concurrently, even if the certificate coursework is completed before the degree coursework.

Certificate Transcript

Awarding of a certificate will be noted on the official Northeastern University transcript of students who complete a certificate program.

Course Registration

Full-time students (domestic and international) in the Graduate School of Engineering must register for classes on an ongoing basis and carry a minimum of 8 semester hours of coursework per semester. Any student who is appointed to a stipended graduate assistantship is considered full time for the term(s) of appointment if enrolled for a minimum of 6 semester hours.

All graduate students who are registered for Dissertation Term 1, Dissertation Term 2, Dissertation Continuation, PhD Candidacy Preparation, PhD Exam Preparation, or a 0-semester-hour Research course are considered full time. Registration in these courses is restricted to students who qualify for registration in these courses.

The graduate school does not require part-time students to be enrolled for a certain minimum number of semester hours in any term. However, part-time students who are not enrolled for more than one term (excluding summer terms) should take a leave of absence from Northeastern University to maintain active student status to keep their student account active.

The maximum number of semester hours approved for a student in each term varies by the degree program. However, a student can petition their faculty advisor to request permission to register for more than the allowed maximum number of semester hours for a given term. Normally, no more than 12 semester hours (inclusive of transfer credits and advanced standing for MS programs) may be taken outside the College of Engineering, unless otherwise specified in the program requirements.

Registration in classes is mandatory to maintain an active status with the university. Students must be registered in all courses for a given term prior to the university course add/drop deadline. Students should not register for an excessive number of courses or for multiple sections of the same course with the intention of dropping half or more of the courses during the first week of classes.

Students must be registered in their last semester of study. International students should consult with the Office of Global Services (<https://international.northeastern.edu/ogs/>) if they are intending to complete their program during the summer semester. Domestic students finishing their requirements in the summer semester must be registered either in summer first-half, summer second-half, or summer term.

Any student who is financially withdrawn by Student Accounts prior to the start of any given semester will not be permitted to register for that semester until they rectify the outstanding financial obligation.

The Graduate School of Engineering will correct registration errors. Corrections may generate a new tuition bill.

Due to last-minute scheduling changes, the Graduate School of Engineering must occasionally substitute faculty or change class schedules after the registration period has begun. Any student registered for the original course will automatically be registered for the updated section should no major schedule conflicts be apparent. Otherwise, the graduate school or the department will contact all affected students for alternatives.

Northeastern reserves the right to cancel, postpone, combine, or modify any class.

The Graduate School of Engineering does not allow College of Engineering graduate students to elect a satisfactory/unsatisfactory grading scheme for courses normally letter graded.

Course Retake / Course Substitution Policy

Students in Good Academic Standing

Students who are in good academic standing may retake up to 8 semester hours of coursework in order to earn a better grade. A course may only be retaken once.

Students on Academic Probation

The Graduate School of Engineering allows students to retake (or substitute) a total of up to 8 semester hours of coursework beyond stated minimum degree requirements in order to attain the required cumulative 3.000 grade-point average for good academic standing.

Course Retake

When the appropriate course is available, courses may be retaken once in order to earn a better grade. In all cases, the most recent grade earned in a course is the one used in calculating the overall GPA; however, previous grades remain on the transcript with a note that the grade is “excluded.” This means that the course is excluded from the GPA and earned credit calculation. Students must obtain approval from their academic advisor and the Graduate School of Engineering prior to retaking a course. Students are required to pay normal tuition charges for all retaken coursework. See the university’s Retaking Courses (p. 123) page for additional requirements.

Within the above limitations for extra or retaken courses, a student must retake any required core course in which they earn a grade below C. Individual programs may have additional requirements.

Course Substitution

In cases where retaking a course is not possible, a student may petition to substitute one course for another they have already taken, as long as the course content is significantly similar and is not a core required course.

The student’s department and graduate school in conjunction with the Office of the University Registrar must approve of the substitution. See the university’s Course Substitutions (p. 114) page for additional approval requirements.

If approved, the grade in the new course taken will be included in the GPA calculation, and the first course taken will remain on the transcript with a note that the grade is “excluded” from the GPA and earned credit calculation. Students are required to pay normal tuition charges for all substituted coursework.

Course substitution is not an option for students in good academic standing.

Course Selection

Students should formulate a program of study in consultation with their assigned faculty advisor at the beginning of their program, during fall or spring orientation. Students should preselect courses whenever possible and plan to take them when offered, maintaining flexibility with alternate courses in mind. Courses other than the required courses are offered based on demand and are subject to faculty availability. Not all courses are offered every year; however, the graduate school will do everything possible to assure continuity of programs and permit students to make continuous progress toward earning their degrees.

Prerequisite Courses/Undergraduate Courses

Students are not awarded credit toward graduate degree requirements for prerequisite courses unless expressly stated by the student’s academic department. Students may occasionally be permitted by their advisor to take undergraduate courses. However, undergraduate courses do not count toward a graduate degree and may affect a student’s eligibility to receive federal financial aid. Undergraduate courses do not count toward the graduate-level course load requirement for full-time students.

Dissertation and Dissertation Continuation

Once program requirements are met for the PhD candidacy, PhD candidates must register for Dissertation Term 1 (XXXX 9990) and Dissertation Term 2 (XXXX 9991). Candidates must then register for Dissertation Continuation (XXXX 9996) in each subsequent semester (excluding the summer term) until the dissertation is complete and approved by the Graduate School of Engineering. Students completing their dissertation in the summer term must register for Dissertation Continuation. Dissertation and Dissertation Continuation confer full-time status.

MS Thesis Option

Master’s degree students who are completing a thesis must register for 4 semester hours of Master’s Project (XXXX 7945) followed by 4 semester hours of Thesis (XXXX 7990) for a total of 8 semester hours, unless otherwise stated by the program’s requirements. Students who have not completed their thesis but have already registered for the required number of thesis hours may register for Thesis Continuation in their last semester (including summer terms). There is a 1-semester-hour tuition charge for Thesis Continuation. Thesis Continuation may only be completed once.

Petitions

Petitions are required in all cases where a student is requesting a change or exception to their current program or student status for the Graduate School of Engineering to maintain a complete and accurate record for all students.

Dissertation Committee

A dissertation committee shall include a minimum of three members, or four members if there are two co-advisors. At least three committee members should hold a doctorate or an appropriate terminal degree for the discipline, and at least two shall be full-time Northeastern University faculty.

At least two committee members shall hold some appointment in the department that offers the degree that the student is seeking. At least one member of the committee must not have a primary appointment in the department that offers the degree that the student is seeking.

The chair of the dissertation committee, who is assumed to be the advisor, shall be a full-time tenured or tenure-track member of the faculty of Northeastern, shall hold some appointment in the department that offers the degree that the student is seeking, and will hold a doctorate or an appropriate terminal degree for the discipline.

Research and teaching faculty may serve as the chair of the dissertation committee with departmental approval. In this case, at least two members of the committee must be tenured or tenure-track full-time Northeastern faculty. Exceptions to this requirement may be granted by the dean (or designee) based on the qualifications and experience of the faculty member who would serve as chair.

Graduate Student Grievance Policy

Introduction

This policy describes steps a graduate student should follow to submit a grievance.

Students should first attempt to resolve an issue through informal means, for example, by communicating with appropriate faculty members or the program director. If the issue is not resolved, students should follow the steps described below.

Students who believe that they have been erroneously, capriciously, inappropriately, or otherwise unfairly treated in an academic or cooperative education determination should follow the appeals procedure described in the COE Graduate Appeals Policy or the COE Cooperative Education Appeals Policy, respectively. Subsequent academic appeals can be submitted by following the University Academic Appeals Policy and Procedure.

Northeastern University is committed to providing a living, learning, and work environment that is safe and free from discrimination and harassment. This includes all allegations of discrimination including those based on race, color, religion, religious creed, genetic information, sex (including pregnancy or pregnancy-related condition, sexual assault, sexual harassment, stalking, domestic violence), gender, gender identity, sexual orientation, age, national origin, ancestry, and veteran or disability status. If a student makes a claim of discriminatory acts prohibited by law or by university policy, the grievance shall first be pursued through the Office of University Equity and Compliance and its procedures. When this has been completed, any aspects of the grievance that remain unresolved may then be brought to the grievance procedure.

Graduate students can contact the Ombuds for Graduate Students that offers confidential, impartial, and informal assistance to graduate students who have concerns related to their university experience.

Note that the college prohibits retaliation against a student for filing a grievance.

Grievance Procedure

A graduate student who would like to complain about their treatment by a College of Engineering employee (faculty or staff) may submit a grievance. A written description of the complaint should be submitted within 60 days of the alleged activity. The description should state the exact nature of the grievance, against whom it is filed, and the remedy sought.

The student should submit the complaint to the chair of the department that houses the student's primary program of study and to the associate dean for graduate education. The chair shall review the complaint, shall give any employees named in the grievance an opportunity to share relevant information, may gather additional information, and shall send a written response to the student and the associate dean for graduate education within two weeks.

If the student is not satisfied by the department chair's response, the student may submit the complaint to the associate dean for graduate education within two weeks. The associate dean shall review all available information and submit a written response to the student within two weeks.

If the student is not satisfied by the associate dean's decision, the student may submit the complaint to the dean within two weeks. The dean will review all available information and submit a written response to the student within two weeks.

PhD Student Progress and Review

Formal Requirements

The formal requirements for the PhD degree include the following milestones:

1. Completing required coursework.
2. Achieving candidacy, as determined by degree program. May be achieved through qualifying examinations, comprehensive examination(s), and/or an oral defense of the dissertation proposal.
3. Identifying a faculty research advisor.
4. Forming a dissertation committee.
5. Writing and completing a successful oral defense of the dissertation proposal before the PhD committee.

6. Completing a successful oral defense of dissertation before the PhD committee.
7. Approval of written dissertation by dissertation committee and Graduate School of Engineering.

Time Limits

Departments shall define standards for satisfactory performance progress for PhD students that include the following time limits:

DIRECT-ENTRY PHD STUDENTS

1. Candidacy must be achieved within three years of entering the PhD program.
2. The degree must be completed within seven years of entering the PhD program.

ADVANCED-ENTRY PHD STUDENTS

1. Candidacy must be achieved within three years of entering the PhD program.
2. The degree must be completed within five years of entering the PhD program.

Performance Progress

Departments shall establish a review process by which the performance progress of every PhD student is evaluated not more than once per semester and at least annually. As part of this review, students should submit information **that must include achievement of milestones** and could include descriptions of their plans, achievements, progress toward goals, transcripts, CV, publications, conferences attended, recognition they have received, and awards. The review process must include feedback from the student's faculty advisor.

If a department finds that a PhD student is not making satisfactory progress, the student shall be placed on performance probation. Members of the department shall work with the student to develop a performance improvement plan that includes specific actions the student should take to return to satisfactory progress. The performance progress of each PhD student on performance probation shall be reviewed by their department no earlier than one semester and no later than one year after being placed on probation. If a student on performance probation is again found to be not making satisfactory progress, the student shall be dismissed from their degree program. If a student on performance probation is found to be making satisfactory progress, the student shall leave performance probation status.

A copy of the performance progress review and performance improvement plan, if applicable, shall be submitted to the student. For all students, the result of the performance progress review shall be submitted to the Graduate School of Engineering. For all students who receive an unsatisfactory review, a summary of the performance progress review and performance improvement plan shall be submitted to the Graduate School of Engineering. Students dismissed from their program will be notified by the Graduate School of Engineering. A student who is dismissed from their program may submit an appeal through the college's graduate appeals process.

For the purposes of determining the timing of performance reviews specified by this policy, the summer first-half and summer second-half semesters shall collectively be considered one semester.

Program Completion

In order to earn a degree in the graduate program in which a student is enrolled, a student must complete all program and departmental requirements in a satisfactory manner.

A student must attain a cumulative grade-point average of 3.000 or higher in all courses applied toward that degree. A student must also earn a grade of C or higher in all required core courses. Please note that individual programs may have additional requirements.

Reenrollment Policy for Full-time Students

Students who enroll and complete at least one graduate engineering course can apply to their academic department to take an official leave of absence from the time they complete said course(s) and be automatically readmitted without department review. Automatic readmission applies only to the original program and concentration (if applicable) and only for students who took an official approved leave of absence. Catalog year of entry does not change and students must complete the curriculum requirements outlined in the Northeastern University *Graduate Catalog* for their original academic year of admission.

If a student without official leave of absence approval does not enroll in classes for two consecutive fall/spring semesters, they will be declared inactive.

To return from inactive status, a student must submit a petition to regain active student status. If the petition is approved by the department and the Graduate School of Engineering, the record will be moved back to active, and the student may register for courses. If the petition is denied, the Graduate School of Engineering will initiate a withdrawal from Northeastern.

If an inactive student does not enroll in classes for four total consecutive fall/spring semesters, the Graduate School of Engineering will initiate a withdrawal from Northeastern. In the case of withdrawal, a student will be required to submit a new admission application for graduate studies without guarantee of readmission. If the student is admitted after being withdrawn, they will be admitted into the current catalog year and must meet the curriculum requirements in the current *Graduate Catalog*.

In cases where the student has seven or more years of nonenrollment, the graduate advisor in the Graduate School of Engineering shall initiate the process by contacting the graduate studies chair/program director on behalf of the student to confirm the content in the course(s) is still relevant to the current degree program. If the courses are confirmed to still be relevant, the graduate advisor shall submit a Waiver Request form with a copy of the course confirmation, the student's academic transcript, and any additional supporting documents to the graduate studies chair/program director and associate dean for graduate education for review and final approval. If the waiver is approved, the graduate advisor will send the waiver to the Office of the University Registrar for the course(s) to be applied to the student's degree audit.

Thesis Policy

This policy applies to all full-time and part-time graduate students pursuing a master's degree program or students in the PlusOne accelerated master's degree program in the College of Engineering.

Students that pursue the thesis option in a master's degree will enroll in 4 semester hours of Master's Project followed by 4 semester hours of Thesis, unless otherwise stated by the program's requirements.

If a student is unable to complete the thesis requirements after registering for the Thesis course (7990), they should consult their academic advisor to determine the appropriate course for the following term to maintain their registration status while completing the thesis requirements.

In addition to completing the Master's Project and Thesis courses, students must successfully complete the thesis submission process by the specified deadlines, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Students pursuing the thesis option may switch to a Master's Project or coursework-only option after completing the Master's Project course. If a student changes from the thesis option to Master's Project, no action is needed. If a student changes from the thesis option to coursework option, they may petition to count up to 4 semester hours of Master's Project as elective credit toward the coursework option. This petition will be reviewed by the program contact, who may verify the work with the thesis advisor. If the program determines that the Master's Project semester hours cannot count toward the new coursework option requirements, students may need to take additional courses at their own expense to meet the degree requirements.

Bioengineering

Website (<https://bioe.northeastern.edu/>)

Abraham Joy, PhD

Professor and Chair

206 Interdisciplinary Science and Engineering Complex

a.joy@northeastern.edu

The Department of Bioengineering is driven by the conviction that the interface of engineering and medicine will be one of the great intellectual adventures of the 21st century. To prepare students for this adventure, the department strives to create an atmosphere of innovation and creativity that fosters excellence in instruction and research and provides a foundation for programs that drive forward the cutting edge of knowledge while establishing translational collaborations with clinical and industrial researchers.

Bioengineering is built on the recognition that engineering of biological systems, or tools that interface with living systems, requires a multidisciplinary approach considering mechanical, electrical, chemical, and materials processes. Students with backgrounds from biochemistry to computer science, and many fields in between, are attracted to bioengineering as a field with the potential to make a great impact on human health. The MS and PhD programs are designed to integrate students with very different backgrounds and provide them with the coursework and research experience that will take advantage of and build on their unique experiences.

Recognizing the breadth of disciplines that contribute to bioengineering, the MS program allows students to choose a concentration to develop deep expertise in an area of particular interest, selecting from biomechanics and mechanobiology; biomedical devices and bioimaging; molecular, cell, and tissue engineering; or systems, synthetic, and computational bioengineering. The MS program encourages individual research through an optional one-semester master's project or a master's project followed by a master's thesis.

The PhD program spans research areas for which the department has particular strengths. The PhD program in Boston specializes in biomechanics and mechanobiology; biomedical devices and bioimaging; molecular, cell, and tissue engineering; and systems, synthetic, and computational bioengineering. The PhD program at the Roux Institute in Portland specializes in artificial intelligence in translational healthcare. PhD coursework is designed to strengthen student backgrounds in the areas most relevant to their interests.

Mission of the Department

The mission of the Department of Bioengineering is the education of students in the fundamental principles and practice of bioengineering and, through basic and applied research, the creation of new knowledge at the interface of engineering and medicine to support development of new technologies for improvement of human health and healthcare.

Overview of Programs Offered

The Department of Bioengineering offers a Master of Science and a Doctor of Philosophy in Bioengineering. The MS degree is offered as a full-time or part-time program. The PhD degree program is only offered as a full-time program.

Candidates pursuing an MS or PhD are able to select thesis topics from a diverse range of faculty research. New graduate students may learn about ongoing research topics from individual faculty members, faculty websites, and bioengineering seminars.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1349) in combination with the MS degree.

Programs

Doctor of Philosophy (PhD)

- Bioengineering (Boston) (p. 471)
- Bioengineering (Portland) (p. 479)
- Interdisciplinary Engineering (Boston) (p. 486)

Master of Science (MS)

- Robotics, MS (Boston) (p. 180)

Master of Science in Bioengineering (MSBioE)

- Bioengineering (Boston) (p. 493)
- Bioengineering —Connect (Boston) (p. 498)

Bioengineering, PhD (Boston)

Biology can inspire engineering. Increasingly, discoveries in the life sciences reveal processes, complexity, and control without analogy in the world of traditional engineering. Current methods of producing nanoscale control over molecules cannot reproduce the organization found in even the simplest organisms. Energy capture, robust control, remediation, and self-assembly are all employed by biosystems with efficiency unparalleled by anything in today's laboratories. At the same time, traditional engineering disciplines struggle to find new approaches to the complex challenges of 21st-century technology. The last 50 years of basic life science research have gradually revealed the layers of complexity intrinsic to biological processes, unmasking the fundamental underpinnings on which biological systems are constructed. Bioinspired engineering has the potential to transform the technological landscape of the 21st century. Astonishingly, it represents merely one of the myriad opportunities presented at the interface of biology and engineering.

The field of bioengineering is broad and includes all research at the interface of engineering and biology—this includes bioprocesses, environmental microbiology, biomaterials and tissue engineering, bioelectricity, biomechanics, biomedical and biological imaging, nanotechnology in medicine and the environment, and engineering design for human interfacing. At Northeastern University, bioengineering PhD students have an opportunity to be trained to appreciate advances in bioengineering across a wide range of disciplines while they perform highly focused and cutting-edge bioengineering research with one of our faculty members.

The PhD in Bioengineering program reflects departmental research strengths in multiple areas. Students accepted to the bioengineering program will undertake a rigorous core curriculum in basic bioengineering science, followed by a flexible selection of electives tailored to their dissertation research.

Research Areas

There are four key areas of research strength in our department.

AREA 1—BIOMEDICAL DEVICES AND BIOIMAGING

The Biomedical Devices and Bioimaging track reflects Northeastern's outstanding research profile in developing transformative and translational instrumentation and algorithms to help understand biological processes and disease. Our department has active federally funded research spanning across a broad spectrum of relevant areas in instrument design, contrast agent development, and advanced computational modeling and reconstruction methods. Example research centers and laboratories include the Institute for Chemical Imaging of Living Systems (<https://coe.northeastern.edu/coe-research/research-centers-institutes/institute-for-chemical-imaging-of-living-systems/>), the Translational Biophotonics Cluster (<https://sites.google.com/view/tbpclosternu/home/>), and the B-SPIRAL signal processing group (<https://web.northeastern.edu/spiral/>).

AREA 2—BIOMECHANICS AND MECHANOBIOLOGY

Motion, deformation, and flow of biological systems in response to applied loads elicit biological responses at the molecular and cellular levels that support the physiological function of tissues and organs and drive their adaptation and remodeling. To study these complex interactions, principles of solid, fluid, and transport mechanics must be combined with measures of biological

function. The biomechanics and mechanobiology research area embraces this approach and leverages the strong expertise of Northeastern faculty attempting to tie applied loads to biological responses at multiple length and time scales. Northeastern faculty working in this field are centered around the Institute for Mechanobiology (<https://nam12.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmechanobiology.northeastern.edu%2F&data=05%7C02%7Cc.pridmore%40northeastern.edu%7C4de345a4039f4567acef08dd3690df82%7Ca8eec281aaa34daeac9b9a398b9215e7%7C0%7C0%7C638726718025303787%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIlwLjAuMDAwMCIslIAiOiJXaW4zMilslkFOljoitWFBpCisldUljoyfQ%3D%3D%7C0%7C%7C%7C&sdata=LwBJwtZbgsITmbIbUn07RsMyK5KbYtSowda69UI6CRo%3D&reserved=0>), whose mission is to accelerate mechanobiology discoveries and technologies to enhance human health and advance medicine.

AREA 3—MOLECULAR, CELL, AND TISSUE ENGINEERING

Principles for engineering living cells and tissues are essential to address many of the most significant biomedical challenges facing our society today. These application areas include engineering biomaterials to coax and enable stem cells to form functional tissue or to heal damaged tissue; designing vehicles for delivering genes and therapeutics to reach specific target cells to treat a disease; and uncovering therapeutic strategies to curb pathological cell behaviors and tissue phenotypes. At a more fundamental level, the field is at the nascent stages of understanding how cells make decisions in complex microenvironments and how cells interact with each other and their surrounding environment to organize into complex three-dimensional tissues. Advances will require multiscale experimental, computational, and theoretical approaches spanning molecular-cellular-tissue levels and integration of molecular and physical mechanisms, including the role of mechanical forces.

AREA 4—SYSTEMS, SYNTHETIC, AND COMPUTATIONAL BIOENGINEERING

Research groups in systems, synthetic, and computational bioengineering apply engineering principles to model and understand complex biological systems, including differentiation and development, pathogenesis and cancer, and learning and behavior. This involves designing and implementing methods for procuring quantitative and sometimes very large datasets, as well as developing theoretical models and computational tools for interpreting these data. Deciphering the workings of a biological system allows us to identify potential biomarkers and drug targets, to develop protocols for personalized medicine, and more. In addition, we use the design principles of biological systems we discover to engineer and refine new synthetic biological systems for clinical, agricultural, environmental, and energy applications.

Degree Requirements

Completion of the PhD degree requires students to successfully complete the following requirements:

CURRICULUM

The curriculum comprises a strong core of fundamental courses that is coupled with flexible choices of restricted and unrestricted technical electives to provide depth in a particular field of study. The detailed course requirements are outlined below.

For students possessing a baccalaureate in a suitable quantitative or technical field before entering the PhD program, the required course distribution is shown in the table below:

Requirements	Credits
Required core courses	12
Restricted technical electives	8
Unrestricted technical electives	12
Advanced seminar (four semesters)	
Dissertation	
Minimum semester hours required	32

The curriculum for PhD students with “advanced standings,” i.e., students with an MS degree in relevant engineering areas awarded at a qualified institution, will be selected from the available core and elective courses under the guidance of the program director and the student’s primary advisor. Completion of the PhD degree with an advanced standing requires a minimum of 16 semester hours of coursework to be approved by the graduate director and a completed PhD dissertation.

Requirements	Credits
Required core courses	8
Advisor-approved coursework	8
Advanced seminar (four semesters)	
Dissertation	
Minimum semester hours required	16

QUALIFYING EXAM (WRITTEN AND ORAL)

To qualify to continue in the PhD program, students must pass the bioengineering qualifying examination in the most relevant of the four department research areas. Students will prepare a seven-page written document that will be distributed to the committee before the oral examination. Details of the formal qualification exam procedure and timing are available in the Graduate Handbook (<https://bioe.northeastern.edu/community/resources-for-current-students/>). In addition, satisfactory research progress and academic standing are required to pass the exam. The qualifying exam is normally taken in the student’s second year.

QUALIFYING EXAM COMMITTEE

The qualifying examination committee is composed of three members of the Department of Bioengineering faculty. At least two of three committee members will be from the student's research area. The student's primary research advisor may not sit on the qualifying exam committee.

PHD DISSERTATION COMMITTEE

Students normally form their dissertation committee within two years of joining the PhD program. The dissertation committee is composed of a minimum of three members, two of whom must be core faculty from the Department of Bioengineering. The student's primary advisor will be a member of and chair the dissertation committee. This advisor must be a member of the core bioengineering faculty or a faculty member from another department who has an affiliation with the bioengineering department. Students are required to meet annually with their PhD dissertation committee to ensure satisfactory research progress.

ANNUAL COMMITTEE MEETINGS AND DISSERTATION PROPOSALS

PhD students must hold their first committee meetings no later than their third year. The first committee meeting requires the student to write a dissertation proposal in the form of an NIH-style R21 proposal research plan that will be distributed to their dissertation committee at least one week prior to the meeting. Thereafter, students are expected to hold annual progress updates with their committee. At the penultimate committee meeting (which must be held at least four months prior to the dissertation defense), the student will prepare and present a final proposal document to the committee. Successful defense of this proposal will allow the student to progress to the PhD dissertation defense.

PHD DISSERTATION DEFENSE

PhD candidates must satisfactorily complete and defend a dissertation describing original research in bioengineering in an open presentation to the Northeastern bioengineering community, followed by a closed meeting with their dissertation committee in which they are expected to defend their work and answer all relevant questions regarding that work, its significance, and its relationship to ongoing work across the broader research community.

DISSERTATION COURSE REQUIREMENTS

After achieving PhD candidacy by passing the qualifying exam, the doctoral candidate, in consultation with their research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation Term 1 (BIOE 9990) and Dissertation Term 2 (BIOE 9991). Upon completion of this sequence, the student must then register for Dissertation Continuation (BIOE 9996) every semester (in each fall and spring term and also in the summer term if summer is the student's last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (BIOE 9996) until they fulfill the two-semester sequence of Dissertation Term 1 (BIOE 9990) and Dissertation Term 2 (BIOE 9991).

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Research (BIOE 9986) in a section for which their research or academic advisor is listed as the instructor in the online registration system.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual review
Qualifying examination (within two years of entry)
Dissertation committee
Annual committee meetings
Area examination (dissertation prospectus/proposal)
Dissertation defense

Bioengineering, PhD (Portland)

Biology can inspire engineering. Increasingly, discoveries in the life sciences reveal processes, complexity, and control without analogy in the world of traditional engineering. Current methods of producing nanoscale control over molecules cannot reproduce the organization found in even the simplest organisms. Energy capture, robust control, remediation, and self-assembly are all employed by biosystems with efficiency unparalleled by anything in today's laboratories. At the same time, traditional engineering disciplines struggle to find new approaches to the complex challenges of 21st-century technology. The last 50 years of basic life science research have gradually revealed the layers of complexity intrinsic to biological processes, unmasking the fundamental underpinnings on which biological systems are constructed. Bioinspired engineering has the potential to transform the technological landscape of the 21st century. Astonishingly, it represents merely one of the myriad opportunities presented at the interface of biology and engineering.

The field of bioengineering is broad and includes all research at the interface of engineering and biology—this includes bioprocesses, environmental microbiology, biomaterials and tissue engineering, bioelectricity, biomechanics, biomedical and biological imaging, nanotechnology in medicine and the environment, and engineering design for human interfacing. At Northeastern University, bioengineering PhD students have an opportunity to be trained to appreciate advances in bioengineering across a wide range of disciplines while they perform highly focused and cutting-edge bioengineering research with one of our faculty members.

The PhD in Bioengineering program reflects departmental research strengths in multiple areas. Students accepted to the bioengineering program will undertake a rigorous core curriculum in basic bioengineering science, followed by a flexible selection of electives tailored to their dissertation research.

Research Focus

ARTIFICIAL INTELLIGENCE IN TRANSLATIONAL HEALTHCARE AT THE ROUX INSTITUTE (AI-TH@ROUX)

Translational healthcare is a discipline of biomedical research that seeks to improve the health of individuals and communities by translating research findings into diagnostic tools, medicine, and other therapies. Artificial Intelligence in Translational Healthcare at the Roux Institute uses methods of high-performance computing, data science, and modeling to achieve these goals. AI-TH@Roux builds on core research strengths at the Roux Institute in areas that include machine learning, dynamical systems modeling, biostatistics, human-computer and human-AI interactions, entrepreneurship, and business partnership with not-for-profit research institutions and companies. This research area collaborates closely with Bouvé College of Health Sciences—to further enhance connection to clinical practices and policies—and with Khoury College of Computer Sciences—to further strengthen students' computational literacy.

DEGREE REQUIREMENTS

Completion of the PhD degree requires students to successfully complete the requirements described below.

Curriculum

The curriculum comprises a strong core of fundamental courses that is coupled with flexible choices of restricted and unrestricted technical electives to provide depth in a particular field of study. The detailed course requirements are outlined below.

For students possessing a baccalaureate in a suitable quantitative or technical field before entering the PhD program, the required course distribution is shown in the table below:

Requirements	Credits
Required core courses	12
Restricted technical electives	8
Unrestricted technical electives	12
Advanced seminar (four semesters)	
Dissertation	
Minimum semester hours required	32

The curriculum for PhD students with advanced standings, i.e., students with an MS degree in relevant engineering areas awarded at a qualified institution, will be selected from the available core and elective courses under the guidance of the program director and the student's primary advisor. Completion of the PhD degree with an advanced standing requires a minimum of 16 semester hours of coursework to be approved by the graduate director and a completed PhD dissertation.

Requirements	Credits
Required core courses	8
Advisor-approved coursework	8
Advanced seminar (four semesters)	
Dissertation	
Minimum semester hours required	16

Qualifying Exam (Written and Oral)

To qualify to continue in the PhD program, students must pass the bioengineering qualifying examination in their research area. Students will prepare a seven-page written document that will be distributed to the committee before the oral examination. Details of the formal qualification exam procedure and timing are available in the Graduate Handbook (<https://bioe.northeastern.edu/community/resources-for-current-students/>). In addition, satisfactory research progress and academic standing are required to pass the exam. The qualifying exam is normally taken in the student's second year.

Qualifying Exam Committee

The qualifying examination committee is composed of three members of the Department of Bioengineering faculty. At least two of three committee members will be from the student's research area. The student's primary research advisor may not sit on the qualifying exam committee.

PhD Dissertation Committee

Students normally form their dissertation committee within two years of joining the PhD program. The dissertation committee is composed of a minimum of three members, two of whom must be core faculty from the Department of Bioengineering. The student's primary advisor will be a member of and chair the dissertation committee. This advisor must be a member of the core bioengineering faculty or a faculty member from another department who has an affiliation with the bioengineering department. Students are required to meet annually with their PhD dissertation committee to ensure satisfactory research progress.

Annual Committee Meetings and Dissertation Proposals

PhD students must hold their first committee meetings no later than their third year. The first committee meeting requires the student to write a dissertation proposal in the form of an NIH-style R21 proposal research plan that will be distributed to their dissertation committee at least one week prior to the meeting. Thereafter, students are expected to hold annual progress updates with their committee. At the penultimate committee meeting (which must be held at least four months prior to the dissertation defense), the student will prepare and present a final proposal document to the committee. Successful defense of this proposal will allow the student to progress to the PhD dissertation defense.

PhD Dissertation Defense

PhD candidates must satisfactorily complete and defend a dissertation describing original research in bioengineering in an open presentation to the Northeastern bioengineering community, followed by a closed meeting with their dissertation committee in which they are expected to defend their work and answer all relevant questions regarding that work, its significance, and its relationship to ongoing work across the broader research community.

Dissertation Course Requirements

After achieving PhD candidacy by passing the qualifying exam, the doctoral candidate, in consultation with their research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation Term 1 (BIOE 9990) and Dissertation Term 2 (BIOE 9991). Upon completion of this sequence, the student must then register for Dissertation Continuation (BIOE 9996) every semester (in each fall and spring term and also in the

summer term if summer is the student's last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (BIOE 9996) until they fulfill the two-semester sequence of Dissertation Term 1 (BIOE 9990) and Dissertation Term 2 (BIOE 9991).

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Research (BIOE 9986) in a section for which their research or academic advisor is listed as the instructor in the online registration system.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Interdisciplinary Engineering, PhD (Boston)

130 Snell Engineering Center

617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into the interdisciplinary engineering program by an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 470)
- Department of Chemical Engineering (p. 499)
- Department of Civil and Environmental Engineering (p. 514)
- Department of Electrical and Computer Engineering (p. 544)
- Department of Mechanical and Industrial Engineering (p. 612)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department.

The interdisciplinary engineering PhD program requires a commitment from a Northeastern faculty member to serve as the student's primary faculty advisor and chair of their interdisciplinary engineering PhD committee. The primary faculty member is affiliated with the program's administrative home unit unless otherwise approved by the administrative home unit. The PhD advisory committee must be assembled within the first semester of the program, and at least two units must be represented on the committee. The committee must include at least one faculty co-advisor from all participating academic units and otherwise conforms to the rules of the home unit. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

Supplementary Interdisciplinary Engineering PhD Program Forms

Successful application and admission to the interdisciplinary engineering PhD program requires a completed Program Preliminary Study Plan, available on the COE Graduate Student Services Forms website. This form provides a memorandum of understanding for your proposed PhD including the primary departments and advisor(s), a brief description of the planned research, and explanation of the rationale for an interdisciplinary PhD program.

No later than one year postentry into the program, a completed and signed Interdisciplinary Program Plan must be submitted to the Graduate School of Engineering. This individually designed plan includes a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program. This form can be found on the COE Graduate Student Services Forms website.

Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. Successful completion of the total interdisciplinary engineering PhD program depends on meeting department academic milestones and academic expectations.

Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

Program Requirements

Direct Entry

Complete all requirements listed below unless otherwise indicated.

Robotics, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics offers instruction by the faculty of the College of Engineering, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences. The program is designed to provide students with comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Biomedical and Rehabilitation Robotics—College of Engineering
- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Gordon Institute of Engineering Leadership

Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate coursework may be applied to this program's elective requirements in the coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
Electrical and Computer Engineering		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Computer Science		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Concentrations

Complete one of the following options:

- Biomedical and Rehabilitation Robotics (p. 181)—College of Engineering
- Computer Science (p. 182)—Khoury College of Computer Sciences

- Electrical and Computer Engineering (p. 182)—College of Engineering
- Mechanical Engineering (p. 183)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

BIOMEDICAL AND REHABILITATION ROBOTICS CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
Complete one of the following:		4
BIOE 5520	Bioengineering Design for Robotic Rehabilitation	
PT 5170 and PT 5171	Motor Control and Lab for PT 5170	
PT 5321	Applications of Biomechanics in Human Function and Movement	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
BIOE 7990	Thesis	
or PT 7990	Thesis	
Complete 8 semester hours of courses from the elective course list. (p. 183)		
Optional Co-op		
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.		
Required Course		
Complete one additional CS course not used to fulfill the core requirements:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	
Options		
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
CS 8674	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		

Thesis Option

CS 7990	Thesis	
CS 8674	Master's Project	
Complete 8 semester hours of courses from the elective course list. (p. 183)		

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

ELECTRICAL AND COMPUTER ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional EECE course not used to fulfill the core requirements: 4

EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

EECE 7945	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		

Thesis Option

EECE 7945	Master's Project	
EECE 7990	Thesis	

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

MECHANICAL ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements: 4

ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

ME 7945	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		

Thesis Option

ME 7945	Master's Project	
ME 7990	Thesis	

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6350	Empirical Research Methods	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5580	Classical Control Systems	
EECE 5639	Computer Vision	
EECE 5642	Data Visualization	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7150	Autonomous Field Robotics	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	
EECE 7370	Advanced Computer Vision	
EECE 7397	Advanced Machine Learning	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)	
IE 6500	Human Performance	
IE 7280	Statistical Methods in Engineering	
IE 7315	Human Factors Engineering	
IE 7615	Neural Networks and Deep Learning	
ME 5240	Computer Aided Design and Manufacturing	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	
ME 5654	Elasticity and Plasticity	
ME 5655	Dynamics and Mechanical Vibration	
ME 5659	Control Systems Engineering	
ME 5665	Musculoskeletal Biomechanics	

ME 6200	Mathematical Methods for Mechanical Engineers 1
ME 6250	Wearable Robotics
ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering
PT 5170	Motor Control
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 7001	Core Concepts in Rehabilitation Science and Research
PT 7005	Experimental Design and Applied Statistics
PT 7020	Technologies in Movement and Rehabilitation Science

Bioengineering, MSBioE (Boston)

Bioengineering is engineering in a biological context such as the human body, an ecosystem, or a bioreactor. In every case, the interface between engineered and biological systems places unique constraints on the design and implementation of devices, instruments, or implants. These depend on the properties of the biological system involved and the functionality that is being created.

The interface of engineering and medicine as embodied in bioengineering will be one of the most exciting endeavors and greatest adventures of the 21st century. Job opportunities are expected to expand dramatically with a focus on development of entirely new classes of products, instrumentation, and implants. The impact to human health will be extraordinary.

Bioengineering is intrinsically multidisciplinary and it is essential that students learn the languages used by multidisciplinary teams. To that end, our curriculum is structured around a core of six courses that analyze biological systems from every possible quantitative point of view. On the completion of the core, students select one of four concentrations, which provides the opportunity to develop a deep level of expertise in a specific area of bioengineering.

Bioengineering students will have unique opportunities in the classroom, research labs, and experiential learning. The projects that they may be able to contribute to include bio-bandages that monitor bacterial growth or that help damaged ligaments heal faster; sheets of cells folded like origami to form a working kidney; and new materials that—like a leaf in the sun—automatically sense and adapt to changes in the environment.

Our graduate program includes four concentrations, including:

- Biomechanics and Mechanobiology
- Biomedical Devices and Bioimaging
- Molecular, Cell, and Tissue Engineering
- Systems, Synthetic, and Computational Bioengineering

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Bioengineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Bioengineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 33-semester-hour degree and certificate will require 17 hours of advisor-approved bioengineering technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to the requirements of the coursework option of any concentration of this program.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Note: This major requires a concentration: biomechanics and mechanobiology; biomedical devices and bioimaging; molecular, cell, and tissue engineering; or systems, synthetic, and computational bioengineering. Consult your college administrator.

Core Requirements

Code	Title	Hours
Seminar		
BIOE 7390	Seminar ¹	0

Required Core

A grade of C or higher is required in each course:

BIOE 6000	Principles of Bioengineering ¹	1
BIOE 6100	Medical Physiology	4

Concentrations

Complete one of the following four concentrations:

- Biomechanics and Mechanobiology (p. 494)
- Biomedical Devices and Bioimaging (p. 495)
- Molecular, Cell, and Tissue Engineering (p. 496)
- Systems, Synthetic, and Computational Bioengineering (p. 497)

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op; some concentrations may require additional hours)

Minimum 3.000 GPA required

¹ Principles of Bioengineering (BIOE 6000) and Seminar (BIOE 7390) are not required for students in a PlusOne bioengineering pathway, but students must successfully complete a total of 32 semester hours.

CONCENTRATION IN BIOMECHANICS AND MECHANOBIOLOGY

Code	Title	Hours
Required Coursework		
A grade of C or higher is required.		
Complete two of the following:		8
BIOE 5630	Physiological Fluid Mechanics	
BIOE 5640	Computational Biomechanics	
BIOE 5650	Multiscale Biomechanics	
BIOE 5660	Integrative Mechanobiology	
ME 5665	Musculoskeletal Biomechanics	
Complete one of the following options:		20
<i>Coursework Option</i>		
Complete 20 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.		
<i>Project Option</i>		
BIOE 7945	Master's Project	
Complete 16 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.		
<i>Thesis Option</i>		
BIOE 7945	Master's Project	
BIOE 7990	Thesis	
Complete 12 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.		
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.		
Course List		

BIOE 5115	Dynamical Systems in Biological Engineering
BIOE 5440	The Cell as a Machine
BIOE 5520	Bioengineering Design for Robotic Rehabilitation
BIOE 5630	Physiological Fluid Mechanics
BIOE 5640	Computational Biomechanics
BIOE 5650	Multiscale Biomechanics
BIOE 5660	Integrative Mechanobiology
BIOE 5770	Machine Learning Methods in Biology and Health
BIOE 5820	Biomaterials
or CHME 5631	Biomaterials Principles and Applications
BIOL 5601	Multidisciplinary Approaches in Motor Control
CHME 5632	Advanced Topics in Biomaterials
EECE 7200	Linear Systems Analysis
EECE 7203	Complex Variable Theory and Differential Equations
ME 5650	Advanced Mechanics of Materials
ME 5654	Elasticity and Plasticity
ME 5655	Dynamics and Mechanical Vibration
ME 5657	Finite Element Method 1
ME 5658	Continuum Mechanics
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 7238	Finite Element Method 2

CONCENTRATION IN BIOMEDICAL DEVICES AND BIOIMAGING

Code	Title	Hours

Required Coursework

A grade of C or higher is required:

BIOE 5800	Systems, Signals, and Controls for Bioengineers	4

Complete two of the following:		8

BIOE 5235	Biomedical Imaging	
or BIOE 5648	Biomedical Optics	
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
BIOE 5810	Design of Biomedical Instrumentation	

Complete one of the following options:		16

Coursework Option

Complete 16 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.

Project Option

BIOE 7945	Master's Project	

Complete 12 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.

Thesis Option

BIOE 7945	Master's Project	
BIOE 7990	Thesis	

Complete 8 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Course List

BIOE 5115	Dynamical Systems in Biological Engineering
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design
BIOE 5510	Bioengineering Products/Technology Commercialization
BIOE 5520	Bioengineering Design for Robotic Rehabilitation
BIOE 5648	Biomedical Optics

or BIOE 5235	Biomedical Imaging
BIOE 5770	Machine Learning Methods in Biology and Health
BIOE 5810	Design of Biomedical Instrumentation
BIOE 5820	Biomaterials
or CHME 5631	Biomaterials Principles and Applications
BIOE 5850	Design of Implants
CHME 5632	Advanced Topics in Biomaterials
EECE 5606	Micro- and Nanofabrication
EECE 7200	Linear Systems Analysis
EECE 7203	Complex Variable Theory and Differential Equations
EECE 7204	Applied Probability and Stochastic Processes
ME 5657	Finite Element Method 1
NNMD 5370	Nanomedicine Research Techniques

CONCENTRATION IN MOLECULAR, CELL, AND TISSUE ENGINEERING

Code	Title	Hours

Required Coursework

A grade of C or higher is required:

BIOE 5410	Molecular Bioengineering	4
or BIOE 5411	Applied Molecular Bioengineering	
BIOE 5420	Cellular Engineering	4

Complete one of the following options: 19-20

Coursework Option

Complete 19–20 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.

Project Option

BIOE 7945 Master's Project

Complete 15–16 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.

Thesis Option

BIOE 7945 Master's Project

BIOE 7990 Thesis

Complete 11–12 semester hours from the course list. Any course on the required course list not used toward the core requirement may also be taken.

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Course List

BIOE 5115	Dynamical Systems in Biological Engineering
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design
BIOE 5411	Applied Molecular Bioengineering
BIOE 5430	Principles and Applications of Tissue Engineering
BIOE 5440	The Cell as a Machine
BIOE 5450	Stem Cell Engineering
BIOE 5510	Bioengineering Products/Technology Commercialization
BIOE 5650	Multiscale Biomechanics
BIOE 5660	Integrative Mechanobiology
BIOE 5710	Experimental Systems and Synthetic Bioengineering
BIOE 5711	Advanced Experimental Systems and Synthetic Bioengineering
BIOE 5720	Physical Bioengineering
BIOE 5770	Machine Learning Methods in Biology and Health
BIOE 5820	Biomaterials
or CHME 5631	Biomaterials Principles and Applications
BIOL 5543	Stem Cells and Regeneration
BIOL 6301	Molecular Cell Biology

- ¹ Principles of Bioengineering (BIOE 6000) and Seminar (BIOE 7390) are not required for students in a PlusOne bioengineering pathway, but students must successfully complete a total of 32 semester hours.

Bioengineering, MSBioE—Connect (Boston)

The Master of Science in Bioengineering—Connect program, with a concentration in biomedical devices and bioimaging, addresses the demand for skilled individuals who can engage with bioengineering challenges and innovations by preparing students from nonengineering backgrounds to become bioengineers. Recognizing bioengineering's complexity and interdisciplinary nature, this Connect program focuses on learners developing the necessary foundational and applied knowledge in mathematics and programming to successfully transition to the bioengineering field. Through specially created and defined core courses, students gain the bioengineering knowledge to excel in their academic coursework and the bioengineering sector.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Connect Courses

Code	Title	Hours
Courses to be taken concurrently in the first semester. A grade of C or higher is required.		
BIOE 5150	Foundational Mathematics of Bioengineering	4
BIOE 5151	Computational Tools in Bioengineering	4

Core Requirements

Code	Title	Hours
Required Core		
A grade of C or higher is required.		
BIOE 6000	Principles of Bioengineering	1
BIOE 6100	Medical Physiology	4
Seminar		
BIOE 7390	Seminar	0

Concentration in Biomedical Devices and Bioimaging

Code	Title	Hours
Required Courses		
A grade of C or higher is required.		
BIOE 5800	Systems, Signals, and Controls for Bioengineers	4
Complete two of the following:		8
BIOE 5235	Biomedical Imaging	
or BIOE 5648	Biomedical Optics	
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
BIOE 5810	Design of Biomedical Instrumentation	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours of courses from the electives course list. (p. 499)		16

PROJECT OPTION

Code	Title	Hours
BIOE 7945	Master's Project	4
Complete 12 semester hours of courses from the electives course list. (p. 499)		12

THESIS OPTION

Code	Title	Hours
BIOE 7945	Master's Project	4
BIOE 7990	Thesis	4
Complete 8 semester hours of courses from the electives course list. (p. 499)		8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-Op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

41 total semester hours required (42 with optional co-op)

Minimum 3.000 GPA required

ELECTIVES

Professor and Chairperson

201 Cullinane

617.373.2989

617.373.2209 (fax)

Mission of the Department

The mission of the Department of Chemical Engineering at Northeastern University is to educate and train students in chemical engineering practice through integrating an inclusive classroom environment with hands-on and cooperative education experiences while solving research problems that impact our world.

The graduate programs in the Department of Chemical Engineering offer students the opportunity to work on challenges facing our society and our planet in areas such as biomedicine, energy, security, and sustainability. Students develop an in-depth understanding of the principles of chemical engineering through core coursework and applied electives, while gaining career experience through laboratories, research, or co-op. The overarching goal of the rich research and educational experience is to equip our students to become future leaders in engineering and science, while simultaneously promoting scholarly achievement for both the faculty and students.

Academic Programs

The department offers graduate programs in both chemical engineering and pharmaceutical engineering:

- MS in Chemical Engineering
 - MS in Chemical Engineering students can select a concentration that is focused either on sustainability, biosystems, or development of research skills.
- MS in Pharmaceutical Engineering
- PhD in Chemical Engineering
- PhD in Interdisciplinary Engineering

Many graduate-level courses are in the late afternoon or early evening to make them accessible to part-time students with full-time industrial careers. A full-time student may apply for participation in co-op. MS or PhD students pursuing research should first gain the consent of their advisor(s) prior to participating in the co-op plan. Any deviations from the curriculum must be addressed by petition to the graduate committee and will be considered on a case-by-case basis.

Graduate students pursuing a thesis MS or a PhD degree are able to select research topics from a diverse range of faculty interests. The department's research areas include biomolecular and biomedical systems, complex and computational systems, energy and sustainability, engineering education and pedagogy, and materials and nanotechnology. New graduate students can learn about ongoing research from individual faculty members, faculty websites, and graduate student seminars. Graduate student seminars are held on a regular basis and provide an interactive forum for learning and exchanging research ideas.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with their degree. Students should consult their faculty advisor regarding these options (p. 770).

GRADUATE CERTIFICATE IN PROCESS SAFETY ENGINEERING

The Process Safety Engineering Graduate Certificate program focuses on the integration of chemical engineering skills with the knowledge of process safety and regulation with specific attention on designing and developing solutions for industrial firms with the goal of creating environments that are safer and in compliance with regulatory rules and regulations.

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1349) in combination with the MS degree.

Programs

Doctor of Philosophy (PhD)

- Chemical Engineering (p. 500) (Boston)
- Interdisciplinary Engineering (p. 486) (Boston)

Master of Science (MS)

- Pharmaceutical Engineering (p. 507) (Boston)

Master of Science in Chemical Engineering (MScE)

- Chemical Engineering (p. 509) (Boston)

Graduate Certificate

- Process Safety Engineering (p. 514) (Boston)

Chemical Engineering, PhD (Boston)

Each student admitted to the PhD program in chemical engineering will initially be designated a doctoral student. Upon successful completion of the requirements for doctoral candidacy as described below, a student is reclassified as a doctoral candidate. After establishing candidacy, a student must complete a dissertation under the direction of a dissertation advisor. All doctoral candidates must also pass a final written and oral examination.

Doctoral Candidacy for Direct Entry

To qualify for doctoral candidacy, the student must demonstrate mastery of four core courses of chemical engineering (thermodynamics or statistical thermodynamics, kinetics, transport, and mathematics). To become a doctoral candidate, students must maintain a grade-point average of 3.250

or above in the four core courses and have no individual grade below a B– in the four core courses. Mastery of the four core courses must be demonstrated within the first year, unless an extension is granted by the department graduate committee.

In addition, each student must complete 4 semester hours of Research (CHME 9984) and demonstrate critical thinking, analysis, and experimental planning skills related to their dissertation research topic through a written candidacy proposal and an oral defense of this proposal. The student must pass, as determined by the student's dissertation committee, this candidacy proposal defense in order to advance to doctoral candidacy. If the student fails, they may resubmit their proposal and retake the defense one time within four months, unless an extension is granted by the primary research advisor and the department graduate committee. The student earns the classification of doctoral candidate upon successful completion of these requirements.

Doctoral Candidacy for Advanced Entry

To become a doctoral candidate, advanced-entry students who have already completed a graduate degree in chemical engineering or a closely related discipline must petition the graduate committee of the Department of Chemical Engineering and demonstrate that the mastery has been attained through coursework either at Northeastern University or during a previous graduate degree from another institution (typically granted when the student has achieved a grade of at least A– in an equivalent course; an official transcript and relevant course syllabus from the previous degree will be required for verification). The student must demonstrate mastery of the four core areas of chemical engineering (thermodynamics or statistical thermodynamics, kinetics, transport, and mathematics) through course performance.

The graduate committee may require a student to take or retake any or all of the core courses before achieving doctoral candidacy. Incoming advanced-entry students should form a plan of coursework in consultation with the associate chair for graduate studies and have this approved by the graduate committee. For the core courses taken at Northeastern, students should maintain a GPA of 3.250 or above and have no individual grade below a B–.

In addition, each student must complete 4 semester hours of Research (CHME 9984) and demonstrate critical thinking, analysis, and experimental planning skills related to their dissertation research topic through a written candidacy proposal and an oral defense of this proposal. The student must pass, as determined by the student's dissertation committee, this candidacy proposal defense in order to advance to doctoral candidacy. If the student fails, they may resubmit their proposal and retake the defense one time within four months, unless an extension is granted by the primary research advisor and the department graduate committee. The student earns the classification of doctoral candidate upon successful completion of these requirements.

Course Requirements

DIRECT ENTRY

A minimum of 32 semester hours of academic coursework, **not including any directed study credits**, beyond the bachelor's degree is required. The 32 semester hours must include at least 24 semester hours of academic coursework (exclusive of thesis or dissertation) taken at Northeastern. All four of the core courses (see table under Program Requirements), the 4 semester hours of research, and the 4 semester hours of professional development courses must be included in the student's academic graduate coursework.

ADVANCED ENTRY

A **minimum** of 20 semester hours of academic coursework, **not including any directed study credits**, beyond the master's degree is required. At least 16 semester hours of academic coursework (exclusive of thesis or dissertation) must be taken at Northeastern. At least one of the core courses (see table under Program Requirements), 4 semester hours of Research (CHME 9984), and 4 semester hours of professional development courses must be included in the student's academic graduate coursework. At least 8 semester hours of noncore electives must also be included. If the graduate committee requires additional core courses to achieve doctoral candidacy, these are in addition to the 20-semester-hour minimum.

GENERAL REQUIREMENTS

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Research (CHME 9986), in a section for which their dissertation research advisor is listed as the instructor in the online registration system. The semester they plan to defend their proposal, they should register for Candidacy Preparation for Candidacy Preparation—Doctoral (CHME 8960) and for 4 semester hours of Research (CHME 9984).

After obtaining PhD candidacy, students are required to register for Dissertation Term 1 (CHME 9990) and Dissertation Term 2 (CHME 9991) for two consecutive semesters. This is then followed by registration for Dissertation Continuation (CHME 9996) in each semester thereafter until the dissertation has been completed and defended. Note: No course credits are awarded for Dissertation Term 1 (CHME 9990), Dissertation Term 2 (CHME 9991), or Dissertation Continuation (CHME 9996); however, a student is considered full time if registered for these courses.

All students pursuing a doctoral degree must enroll in the department's Seminar (CHME 7390) course for each semester they are working toward their degree.

Students will be advised on their courses for the first semester by the associate chair for graduate studies. After the first semester, students will work with their dissertation advisor to determine appropriate courses and course schedule to meet their educational needs and aspirations. Upon consultation with the dissertation advisor, a student may take up to 44 semester hours of course credit without additional financial penalty. Students and dissertation advisors should keep in mind that the university residency requirement requires two semesters of academic studies after becoming a doctoral candidate.

Language Requirement

There is no foreign language requirement for the PhD degree. However, each candidate must be proficient in technical writing and oral presentation in the English language. The graduate committee may require additional coursework to improve language proficiency, if necessary.

Residence Requirement

A student satisfies the residence requirement by completing one academic year of full-time graduate studies during two consecutive academic semesters after qualifying for doctoral candidacy. Additional required coursework (exclusive of seminars) may be completed during this period. Students are required to be continually enrolled while pursuing the completion of the dissertation.

Dissertation

After a student establishes doctoral candidacy, they must complete a dissertation that embodies the results of extended original research and includes material suitable for publication. The student is responsible for proposing a dissertation committee to be approved by the dissertation advisor at least one month prior to the dissertation defense. The committee must have a minimum of four members, including the primary advisor. At least two committee members must be faculty members in the Department of Chemical Engineering (with a greater than 0% appointment). Additionally, one of the committee members must be external to the Department of Chemical Engineering. Committee membership is not limited to faculty at Northeastern or to engineering faculty. The student is encouraged to consider experts in the dissertation topic and to work with the dissertation advisor to create a meaningful and helpful committee. The dissertation committee will approve the dissertation in its final form. The graduate school requirements for dissertation formatting and electronic submittal instructions can be found on the College of Engineering's webpage (<https://coe.northeastern.edu/academics-experiential-learning/graduate-school-of-engineering/graduate-student-services/dissertation-thesis-instructions/>). Students are responsible for contacting the Graduate School of Engineering for any updates to dissertation requirements and appropriate deadlines.

Dissertation Defense and Final Oral Examination

This comprehensive examination includes the public dissertation defense as well as a final oral examination to include the subject matter of the doctoral dissertation and significant developments in the field of the dissertation work. The oral presentation will be open to the public, including students, faculty, and the student's committee.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Interdisciplinary Engineering, PhD (Boston)

130 Snell Engineering Center

617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into the interdisciplinary engineering program by an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 470)
- Department of Chemical Engineering (p. 499)
- Department of Civil and Environmental Engineering (p. 514)
- Department of Electrical and Computer Engineering (p. 544)
- Department of Mechanical and Industrial Engineering (p. 612)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department.

The interdisciplinary engineering PhD program requires a commitment from a Northeastern faculty member to serve as the student's primary faculty advisor and chair of their interdisciplinary engineering PhD committee. The primary faculty member is affiliated with the program's administrative home unit unless otherwise approved by the administrative home unit. The PhD advisory committee must be assembled within the first semester of the program, and at least two units must be represented on the committee. The committee must include at least one faculty co-advisor from all participating academic units and otherwise conforms to the rules of the home unit. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

Supplementary Interdisciplinary Engineering PhD Program Forms

Successful application and admission to the interdisciplinary engineering PhD program requires a completed Program Preliminary Study Plan, available on the COE Graduate Student Services Forms website. This form provides a memorandum of understanding for your proposed PhD including the primary departments and advisor(s), a brief description of the planned research, and explanation of the rationale for an interdisciplinary PhD program.

No later than one year postentry into the program, a completed and signed Interdisciplinary Program Plan must be submitted to the Graduate School of Engineering. This individually designed plan includes a list of courses to be taken, a description of the qualifying and comprehensive examination

process to be used, a timeline, and any other requirements of the program. This form can be found on the COE Graduate Student Services Forms website.

Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. Successful completion of the total interdisciplinary engineering PhD program depends on meeting department academic milestones and academic expectations.

Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

Pharmaceutical Engineering, MS (Boston)

The Master of Science in Pharmaceutical Engineering is offered jointly by Northeastern University's College of Engineering and Bouvé College of Health Sciences. The program prepares students with a fundamental understanding of pharmaceutical sciences and principles of engineering to develop the depth needed for advanced study of pharmaceutical engineering.

This program is generally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields in engineering, sciences, or mathematics. The program was designed in collaboration with the Department of Pharmaceutical Sciences to develop the depth needed for advanced study of pharmaceutical engineering. Students wishing to pursue the master's degree with undergraduate educational backgrounds other than engineering are required to demonstrate completion of mathematics coursework through differential equations or the equivalent to be admitted. Prior completion of at least one semester of organic chemistry or the equivalent is also required, and some prior exposure to concepts in biochemistry and molecular biology is helpful. Students are advised to work closely with their advisors and instructors to determine the electives that would meet their career goals.

Part-Time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit.

Master of Science students wishing to change their status from part time to full time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CHME 6390	Professional Development and Communication Essentials (Complete this course twice.) ¹	0
CHME 7600	Pharmaceutical Engineering I	4
CHME 7601	Pharmaceutical Engineering II	4
CHME 7602	Pharmaceutical Engineering Laboratory	2
PHSC 5100	Concepts in Pharmaceutical Science	2
PHSC 5102	Concepts in Pharmaceutical Science 2	2
PHSC 7010	Pharmaceutical Sciences Laboratory	4

¹ To be completed each of the first two semesters in the program.

Restricted Elective Courses

Code	Title	Hours

At least 4 semester hours of elective coursework is required from CHME, and at least 2 semester hours of elective coursework is required from PHSC and PMST. These semester hours could come from any elective group, as appropriate.

Regulatory

Complete 3–4 semester hours from the following: 3-4

BIOE 5250	Regulatory and Quality Aspects of Medical Device Design
BIOT 5340	Introduction to Biotherapeutic Approvals
BIOT 5500	Concepts in Regulatory Science
BIOT 6320	Design and Development of Biopharmaceuticals
RGA 6002	Introduction to Regulatory Compliance and Practice

Quality/Statistics

Complete 4 semester hours from the following: 4

CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 6320	Numerical and Statistical Methods for Chemical Engineering
CHME 6410	Chemical Engineering Research Methods
IE 6200	Engineering Probability and Statistics
IE 7280	Statistical Methods in Engineering
IE 7285	Statistical Quality Control
PHSC 6214	Experimental Design and Biostatistics

Depth Electives

Complete 6–7 semester hours from the following: 6-7

BIOE 5115	Dynamical Systems in Biological Engineering
BIOE 5411	Applied Molecular Bioengineering
BIOE 5510	Bioengineering Products/Technology Commercialization
BIOE 5860	Engineering Approaches to Precision Medicine I
BIOT 5330	Drug Safety and Immunogenicity
BIOT 6300	Pharmaceutical Microbiology
BIOT 6340	Sterile Manufacturing Operations
CHME 5160	Drug Delivery: Engineering Analysis
CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5510	Fundamentals in Process Safety Engineering
CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries
CHME 5631 or BIOE 5820	Biomaterials Principles and Applications Biomaterials
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science
CHME 7330	Chemical Engineering Thermodynamics
CHME 7350	Transport Phenomena
PHSC 5300	Pharmaceutical Biochemistry

PHSC 5310	Cellular Physiology
PHSC 5500	Repurposing Drugs for Cancer Immunotherapies
PHSC 5555	Pharmaceutical Toxicology
PHSC 5560	Nanotoxicity
PMST 6250	Advanced Physical Pharmacy
PMST 6252	Pharmacokinetics and Drug Metabolism
PMST 6254	Advanced Drug Delivery Systems

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Chemical Engineering, MSChE (Boston)

For program contact information, please visit the College of Engineering website (<https://che.northeastern.edu/academics/graduate-studies/ms-che/>).

The Master of Science in Chemical Engineering is normally pursued by students with a Bachelor of Science in Chemical Engineering or closely allied fields. Students wishing to pursue the master's degree but with undergraduate educational backgrounds other than chemical engineering may be required to complete supplementary undergraduate coursework. These courses are in addition to the minimum course requirements. Students enrolled in the program are encouraged to seek guidance from their instructors and advisor regarding additional coursework that may supplement the graduate curriculum.

Students originally admitted to the master's degree program who wish to switch to the PhD program must petition the associate chair for graduate studies. If admission is granted, then the student must satisfy all the requirements of the doctoral degree program, including the requirements for doctoral candidacy.

Course Requirements

A minimum of 32 semester hours of academic work is required to qualify for the Master of Science degree in chemical engineering.

If pursuing the General Principles and Applications concentration, students can select from either the master's project option or master's thesis option. Students completing the master's project will take the 4-semester-hour master's project course and 4 semester hours of a core course. Students in the thesis track will complete the 4-semester-hour master's project course followed by the 4-semester-hour thesis course. In addition, each full-time student pursuing a thesis option must enroll in Professional Development and Communication Essentials (CHME 6390) in their first two semesters followed by Seminar (CHME 7390) for each semester they continue to work toward their degree. The faculty advisor and the student establish the sequence of courses that students take to pursue the Master of Science in Chemical Engineering.

If pursuing the Biosystems or Sustainability concentrations, students must complete a minimum of 32 semester hours of coursework. In addition, during their first two semesters of enrollment, they must complete Professional Development and Communication Essentials (CHME 6390).

Thesis Requirements

Students pursuing a Master of Science in Chemical Engineering with concentration in General Principles and Applications thesis option must submit to the Graduate School of Engineering a written thesis that is approved by the thesis committee and department chair. For details, see the graduate school requirements and electronic submittal instructions (<https://coe.northeastern.edu/academics-experiential-learning/graduate-school-of-engineering/graduate-student-services/dissertation-thesis-instructions/>). MS with thesis students must also complete an oral master's thesis defense in order to successfully complete the program. The student will be expected to form a master's thesis committee, composed of a minimum of three members—one who is the research advisor, one other faculty member from the chemical engineering department, and one member from outside the department. The oral presentation will be open to the public, including students, faculty, and the candidate's committee.

Part-time Students

Part-time students may progress according to their plans and time constraints but within the seven-year time limit. A minimum of 32 semester hours of academic coursework is required for part-time students.

Master of Science students wishing to change their status from part-time to full-time must notify the chemical engineering department and make a formal petition to the Graduate School of Engineering. Refer to the regulations of the Graduate School of Engineering for further information on academic administrative policies.

Departure Prior to Thesis Completion

Occasionally, students must leave the chemical engineering department prior to completion of all degree requirements. In such instances, long time intervals have often elapsed before thesis or manuscript submission. Accordingly, the department has adopted the guideline that a student cannot submit a thesis for credit beyond three years after the student stops actively pursuing the research. Exceptions may be granted upon petition to the departmental graduate committee. Petitions must demonstrate extenuating circumstances and prove that the research is still of value to the profession.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Chemical Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Chemical Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors, in addition to the semester hours required for the chemical engineering concentration selected. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the leadership challenge project coursework may be applied to this program's elective requirements with approval of the program director.

ENGINEERING BUSINESS

Master's Degree in Chemical Engineering with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Chemical Engineering in addition to earning a Graduate Certificate in Engineering Business. Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University. Students may use some of their breadth electives credits toward both the MS degree and the certificate. The certificate coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business. (p. 685)

Program Requirements

All students must complete the following core requirements unless otherwise indicated. Courses cannot double count in two different categories.

Core Requirements

Code	Title	Hours
CHME 6310	Python for Chemical Engineers	2
CHME 6320	Numerical and Statistical Methods for Chemical Engineering	4
CHME 6390	Professional Development and Communication Essentials ¹	0

Concentrations

Complete one of the following concentrations:

- Biosystems (p. 510)
- General Principles and Applications (p. 511)
- Sustainability (p. 512)

BIOSYSTEMS CONCENTRATION

Code	Title	Hours
CHME 5160 or CHME 5630	Drug Delivery: Engineering Analysis Biochemical Engineering	4
CHME 6430	Chemical Engineering for Biosystems and Biomaterials	2

Biosystems Depth Electives

Complete 8 semester hours from the following (courses cannot count in multiple categories):		8
CHME 5160	Drug Delivery: Engineering Analysis	
CHME 5185	Design of Experiments and Ethical Research (DOEER)	
CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries	

CHME 5630	Biochemical Engineering
CHME 5631	Biomaterials Principles and Applications
CHME 5632	Advanced Topics in Biomaterials
CHME 5683	Introduction to Polymer Science
Biosystems Breadth Electives	
Complete 12 semester hours from the following (courses cannot count in multiple categories):	
BIOE 5410	Molecular Bioengineering
CHEM 5620	Protein Chemistry
CHEM 5625	Chemistry and Design of Protein Pharmaceuticals
CHEM 5638	Molecular Modeling
CHME 5105	Materials Characterization Techniques
CHME 5137	Computational Modeling in Chemical Engineering
CHME 5160	Drug Delivery: Engineering Analysis
CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5510	Fundamentals in Process Safety Engineering
CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries
CHME 5621	Electrochemical Engineering
CHME 5630	Biochemical Engineering
CHME 5631	Biomaterials Principles and Applications
CHME 5632	Advanced Topics in Biomaterials
CHME 5642	Photochemistry Fundamentals and Applications
CHME 5649	Numerical Strategies and Data Analytics for Chemical Sciences
CHME 5683	Introduction to Polymer Science
CHME 5699	Special Topics in Chemical Engineering
CHME 7330	Chemical Engineering Thermodynamics
CHME 7340	Chemical Engineering Kinetics
CHME 7350	Transport Phenomena
CHME 7600	Pharmaceutical Engineering I
CHME 7601	Pharmaceutical Engineering II
CHME 7973	Special Topics in Chemical Engineering
CIVE 7251	Environmental Biological Processes
EMGT 5220	Engineering Project Management
EMGT 6225	Economic Decision Making
EMGT 6305	Financial Management for Engineers
IE 6200	Engineering Probability and Statistics
IE 7280	Statistical Methods in Engineering
IE 7285	Statistical Quality Control
ME 5620	Fundamentals of Advanced Materials
NNMD 5270	Foundations in Nanomedicine: Therapeutics
NNMD 5370	Nanomedicine Research Techniques
NNMD 5470	Nano/Biomedical Commercialization: Concept to Market
PHSC 6214	Experimental Design and Biostatistics

GENERAL PRINCIPLES AND APPLICATIONS CONCENTRATION

Code	Title	Hours
CHME 6410	Chemical Engineering Research Methods	2
CHME 7330	Chemical Engineering Thermodynamics	4
or CHME 7350	Transport Phenomena	
CHME 7390	Seminar ²	0

Thesis or Project Options

Complete one of the following options (courses cannot count in multiple categories): 8

Thesis Option

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest:

CHME 7945	Master's Project ³
CHME 7990	Thesis
<i>Project Option</i>	
CHME 7330	Chemical Engineering Thermodynamics
or CHME 7340	Chemical Engineering Kinetics
or CHME 7350	Transport Phenomena
CHME 7945	Master's Project

Electives Course List

Complete 12 semester hours from the following (courses cannot count in multiple categories): 12

BIOE 5410	Molecular Bioengineering
CHEM 5620	Protein Chemistry
CHEM 5625	Chemistry and Design of Protein Pharmaceuticals
CHEM 5638	Molecular Modeling
CHEM 5653 and CHEM 5651	Electrochemistry of Renewable Energy Devices and Materials Chemistry of Renewable Energy
CHME 5105	Materials Characterization Techniques
CHME 5137	Computational Modeling in Chemical Engineering
CHME 5160	Drug Delivery: Engineering Analysis
CHME 5179	Complex Fluids and Everyday Materials
CHME 5185	Design of Experiments and Ethical Research (DOEER)
CHME 5510	Fundamentals in Process Safety Engineering
CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries
CHME 5621	Electrochemical Engineering

SUSTAINABILITY CONCENTRATION

Code	Title	Hours
CHME 5621	Electrochemical Engineering	4
or CHME 5683	Introduction to Polymer Science	
CHME 6420	Engineering for Chemical Sustainability	2

Sustainability Depth Electives

Complete two of the following (courses cannot count in multiple categories):		8
CHME 5105	Materials Characterization Techniques	
CHME 5137	Computational Modeling in Chemical Engineering	
CHME 5179	Complex Fluids and Everyday Materials	
CHME 5621	Electrochemical Engineering	
CHME 5683	Introduction to Polymer Science	

Sustainability Breadth Electives

Complete 12 semester hours from the following (courses cannot count in multiple categories):		12
BIOE 5410	Molecular Bioengineering	
CHEM 5638	Molecular Modeling	
CHEM 5653 and CHEM 5651	Electrochemistry of Renewable Energy Devices and Materials Chemistry of Renewable Energy	
CHME 5105	Materials Characterization Techniques	
CHME 5137	Computational Modeling in Chemical Engineering	
CHME 5160	Drug Delivery: Engineering Analysis	
CHME 5179	Complex Fluids and Everyday Materials	
CHME 5185	Design of Experiments and Ethical Research (DOEER)	
CHME 5510	Fundamentals in Process Safety Engineering	
CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries	
CHME 5621	Electrochemical Engineering	
CHME 5630	Biochemical Engineering	
CHME 5631	Biomaterials Principles and Applications	
CHME 5632	Advanced Topics in Biomaterials	
CHME 5642	Photochemistry Fundamentals and Applications	
CHME 5649	Numerical Strategies and Data Analytics for Chemical Sciences	
CHME 5683	Introduction to Polymer Science	
CHME 5699	Special Topics in Chemical Engineering	
CHME 7330	Chemical Engineering Thermodynamics	
CHME 7340	Chemical Engineering Kinetics	
CHME 7350	Transport Phenomena	
CHME 7600	Pharmaceutical Engineering I	
CHME 7601	Pharmaceutical Engineering II	
CHME 7973	Special Topics in Chemical Engineering	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5260	Environmental Fluid Mechanics	
CIVE 5365	Climate Technologies for Decarbonization, Mitigation, and Adaptation	
CIVE 7251	Environmental Biological Processes	
EMGT 5220	Engineering Project Management	
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
ME 5620	Fundamentals of Advanced Materials	

¹ To be completed in the first two semesters in the program.

² To be completed in same term with Master's Project (CHME 7945) and Thesis (CHME 7990).

³ To be completed prior to Thesis (CHME 7990).

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1

ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Process Safety Engineering, Graduate Certificate (Boston)

Through this graduate certificate program, students explore the identification and analysis of systems and processes relevant to their fields of study. Students have an opportunity to gain a fundamental understanding of considerations and methods for the safe design of engineered processes and to develop skills for creating computational models to represent and analyze hazardous scenarios.

This three-course graduate certificate seeks to provide students with skills to lead efforts within companies to plan and implement process safety designs that assist in meeting the regulatory requirements and confirming code compliance within an industrial firm in order to maintain the safety, health, and welfare of their employees and the public, as well as making industrial firms safer and profitable.

Program Requirements

Complete all requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Process Safety Core Courses		
CHME 5510	Fundamentals in Process Safety Engineering	4
or CHME 5515	Process Safety Engineering for Biotechnology and Pharmaceutical Industries	
CHME 5520	Designing for Process Safety	4

Civil and Environmental Engineering

Website (<https://cee.northeastern.edu/>)

R. Edward Beighley, PhD

COE Distinguished Professor and Chair

400 Snell Engineering Center

617.373.2444

Overview

With a strategic focus in urban engineering and through a range of teaching and research strengths, anchored by several multidisciplinary, multi-institutional centers and programs, our academic programs are designed to prepare professionals to address the global, complex, and ever-evolving engineering challenges of our time by building on current department strengths and expanding into vital areas. We give our future master's and PhD graduates the opportunity to make real-world impact on and long-lasting contributions to the well-being and development of society.

Mission of the Department

Advancing innovative civil and environmental solutions for society and creating globally oriented engineering leaders by integrating experiential education and use-inspired interdisciplinary research.

Academic Programs

Within our graduate programs, students work alongside world-class faculty on advanced research and courses, developing a solid base for their careers. Three overarching themes are emphasized in our programs: environmental health, civil infrastructure security, and sustainable resource engineering. These themes are aligned with the department's premier strengths in simulation (both computational and experimental), smart sensing, data and network science, and urban informatics and are all reflected in the courses offered in our graduate programs.

MASTER OF SCIENCE DEGREE

The department offers five MS degree programs in the following areas: civil engineering (students can choose one out of six concentrations); environmental engineering; engineering and public policy; sustainable building systems; and climate science and engineering (in partnership with the Department of Marine and Environmental Science in the College of Science). Options for a master's thesis or report in place of coursework are available. All civil and environmental engineering master's programs are available on a full-time or part-time basis. For a full list of the department's academic program offerings, please refer to the Programs (p. 515) tab.

DOCTOR OF PHILOSOPHY DEGREE

The department offers the following PhD degrees: PhD in Civil and Environmental Engineering and Interdisciplinary PhD. The doctoral program is designed to be flexible with respect to subject area and may be adapted to any subject area in civil and environmental engineering, including interdisciplinary options within the department or across departments or colleges.

The PhD is awarded to students who demonstrate high academic achievement and research competence in the selected field. Students must pursue the PhD program on a basis consistent with the residence requirements for the degree (p. 516).

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 738) in combination with the MS degree.

Programs

Doctor of Philosophy (PhD)

- Civil and Environmental Engineering (Boston) (p. 516)
- Interdisciplinary Engineering (Boston) (p. 486)

Master of Science (MS)

- Climate Science and Engineering (Boston)
- Engineering and Public Policy (Boston) (p. 523)
- Sustainability Engineering Leadership (Boston) (p. 525)

Master of Science in Civil Engineering (MSCivE)

- Civil Engineering with Concentration in Construction Management (Boston) (p. 526)
- Civil Engineering with Concentration in Data and Systems (Boston) (p. 528)
- Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering (Boston) (p. 531)
- Civil Engineering with Concentration in Structures (Boston) (p. 533)
- Civil Engineering with Concentration in Transportation (Boston) (p. 535)
- Civil Engineering with Concentration in Water, Environmental, and Coastal Systems (Boston) (p. 537)

Master of Science in Environmental Engineering (MSEnvE)

- Environmental Engineering (Boston) (p. 539)

Master of Science in Sustainable Building Systems (MSSBS)

- Sustainable Building Systems (Boston) (p. 541)

Graduate Certificate

- Climate and Engineering (Boston) (p. 543)
- Sustainability Engineering (Boston) (p. 544)

Civil and Environmental Engineering, PhD (Boston)

The Doctor of Philosophy in Civil and Environmental Engineering offers students an opportunity for in-depth study in a broad range of areas in civil and environmental engineering. Awarding the PhD degree is based on ability to formulate and execute original research addressing important problems and completion of a rigorous academic program that enhances the student's knowledge in relevant areas. The PhD program has two components:

1. An academic program of graduate-level courses that provides depth in a specific area of civil and environmental engineering (the major field) as well as other coursework that provides additional exposure at an advanced level to one or more disciplines
2. The dissertation, an extended independent research effort on a relevant technical problem resulting in an original contribution to the field

Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying examinations (both written and oral area exams) and all the required coursework.

Each student's mastery of subject matter is measured by a qualifying examination covering a subset of topics selected from the major field. A doctoral dissertation committee periodically monitors research progress, and the candidate is required to present and defend their research results before the doctoral dissertation committee upon completion of the work.

Coursework Requirement

The academic program must include at least 22 semester hours (advanced standing) or 50 semester hours (direct entry) of graduate-level coursework at Northeastern University. A student may count no more than 4 semester hours of independent study (such as special project in civil and environmental engineering) toward the minimum course requirements. For direct entry students, a minimum of 40 semester hours must be related to the major field but may include courses from other departments when appropriate. The civil and environmental engineering department encourages flexibility in program definition, especially in areas where complementary courses exist in other departments or where expertise resides outside the department and the objective is to introduce new technology in civil and environmental engineering practice.

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Exam Preparation—Doctoral (CIVE 8960), in a section for which their research or academic advisor is listed as the instructor in the online registration system.

Upon successful completion of the qualifying exam and the majority of required coursework, each doctoral candidate must register in two consecutive semesters for Dissertation Term 1 (CIVE 9990) and Dissertation Term 2 (CIVE 9991). Upon completion of this sequence, the candidate must register for Dissertation Continuation (CIVE 9996) in every semester until the dissertation is complete. Students may not register for Continuation until they fulfill the two-semester dissertation sequence.

Qualifying Examination and Degree Candidacy

The objective of the doctoral qualifying examination is to determine whether the applicant possesses mastery of the fundamentals and ability to apply them to solve unfamiliar problems that require analysis, synthesis, and independent thinking, as well as communication skills to present research ideas and plans, motivate problems, respond to related questions, and defend assumptions and technical approach.

The qualifying exam includes written and oral components. Its content depends upon the educational background and objectives of the student. In general, the written component covers four subject areas selected from the major field and includes engineering and science disciplines, as well as civil and environmental engineering application areas. The oral component measures general comprehension and aptitude for research. If a student fails the exam, they may retake it one more time with the permission of the qualifying examination committee.

The qualifying exam is administered within the first 18 months of the PhD program, if the student already holds an MS degree. PhD students who begin the PhD program without an MS degree should take the qualifying exam within the first 30 months of the start of the program.

Under extraordinary circumstances, a student may be granted one additional semester before taking the qualifying exam but only by prior petition to the advisor, concentration representative, and graduate studies committee.

DISSERTATION

Once degree candidacy is established, a doctoral candidate may proceed with their dissertation. The candidate must write a dissertation proposal and name a CEE faculty member as the dissertation advisor. The candidate and the advisor must form a dissertation committee, which should have no fewer than four members, of which at least two are full-time (or affiliated) faculty from the CEE department. The committee will monitor progress and approve the final document.

DISSERTATION PROPOSAL PRESENTATION

Each student, along with a faculty advisor, must jointly develop a proposal defining the content of the academic program, subject to review by the dissertation committee. Intellectual rigor, connectivity of subject matter, and compatibility with departmental interests are critical issues. The doctoral dissertation committee's approval of the proposal represents a mutual agreement between the student and the committee.

Comprehensive Examination

The comprehensive exam is a defense of the doctoral research work and an examination on subject matter related to the dissertation area.

Each doctoral candidate must defend their dissertation within seven years from the start of the PhD program.

Annual Report

At the beginning of each calendar year all CEE doctoral students, including interdisciplinary students within CEE, should complete the Annual PhD Student Progress Report, which details academic and research activities and accomplishments over the previous year. These forms will be reviewed by the faculty in each respective concentration to ensure satisfactory progress, with feedback provided to the students as necessary.

Residence Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residence. The total effort for a PhD program involves a minimum of three years of full-time work beyond the bachelor's degree. Students who enter the doctoral program with a Master of Science degree may complete the requirements in less time but should anticipate at least two years of full-time effort.

Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Qualifying examination and comprehensive examination

Interdisciplinary Engineering, PhD (Boston)

130 Snell Engineering Center
617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into the interdisciplinary engineering program by an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 470)
- Department of Chemical Engineering (p. 499)
- Department of Civil and Environmental Engineering (p. 514)
- Department of Electrical and Computer Engineering (p. 544)
- Department of Mechanical and Industrial Engineering (p. 612)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department.

The interdisciplinary engineering PhD program requires a commitment from a Northeastern faculty member to serve as the student's primary faculty advisor and chair of their interdisciplinary engineering PhD committee. The primary faculty member is affiliated with the program's administrative home unit unless otherwise approved by the administrative home unit. The PhD advisory committee must be assembled within the first semester of the program, and at least two units must be represented on the committee. The committee must include at least one faculty co-advisor from all participating academic units and otherwise conforms to the rules of the home unit. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

Supplementary Interdisciplinary Engineering PhD Program Forms

Successful application and admission to the interdisciplinary engineering PhD program requires a completed Program Preliminary Study Plan, available on the COE Graduate Student Services Forms website. This form provides a memorandum of understanding for your proposed PhD including

the primary departments and advisor(s), a brief description of the planned research, and explanation of the rationale for an interdisciplinary PhD program.

No later than one year postentry into the program, a completed and signed Interdisciplinary Program Plan must be submitted to the Graduate School of Engineering. This individually designed plan includes a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program. This form can be found on the COE Graduate Student Services Forms website.

Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. Successful completion of the total interdisciplinary engineering PhD program depends on meeting department academic milestones and academic expectations.

Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

Climate Science and Engineering, MS (Boston)

Overview

The Master of Science in Climate Science and Engineering is offered jointly by the College of Engineering and the College of Science. The program provides training in the fundamental scientific processes that underpin the structure and dynamics of the climate, as well as the engineering strategies and technologies required for decarbonization and adaptation to climate change.

Incoming students will typically hold a bachelor’s degree in a science, engineering, or related field. The program is designed to prepare students for climate-facing positions in the public or private sectors and can serve as a springboard for students interested in pursuing doctoral-level research. Students must take at least 12 semester hours of College of Science courses and at least 12 semester hours of College of Engineering courses, which includes a report, thesis, or coursework option.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Student should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Climate Science and Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Climate Science and Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership (p. 738), 12 semester hours of the certificate coursework may be applied to the restricted elective requirements of this program's coursework option. Of the remaining 20 semester hours required by this program, students must take 12 semester hours of College of Science courses (subject codes EEMB and ENVR) and 8 semester hours from College of Engineering courses (subject codes CIVE, EECE, ENSY, MATL, ME, and SBSY).

The Department of Civil and Environmental Engineering encourages students pursuing the Graduate Certificate in Engineering Leadership (p. 738) to complete their MS coursework requirements in their first year and their certificate requirements in their second year. Students who prefer to complete their certificate requirements in their first year are asked to speak with their MS degree advisor in advance.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. In order to ensure a balance of training across science and engineering, students must take at least 12 semester hours of College of Science courses (starting with EEMB, ENVR) and at least 12 semester hours of College of Engineering courses (starting with CIVE, EECE, ENSY, MATL, ME, SBSY) from the core requirements and restricted elective course options.

Core Requirements

Code	Title	Hours
Complete 20 semester hours from the core requirements listed below (any core course not used to meet this core course requirement can be taken as a restricted elective):		20
CIVE 5150 or ENVR 5150	Climate and Atmospheric Change Climate and Atmospheric Change	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5365	Climate Technologies for Decarbonization, Mitigation, and Adaptation	
CIVE 5366	Air Quality Engineering and Science	
CIVE 5670 or ENVR 5670	Global Biogeochemistry Global Biogeochemistry	
CIVE 7110	Critical Infrastructure Resilience	
ENVR 5350	Sustainable Energy and Climate Solutions	
ENVR 5600	Coastal Processes, Adaptation, and Resilience	
ENVR 5800	Climate Adaptation and Nature-Based Solutions	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the restricted electives course list below. (p. 522)		12

REPORT OPTION

Code	Title	Hours
CIVE 7945 or EEMB 8984	Master's Project Research	4
Complete 8 semester hours from the restricted electives course list below. (p. 522)		8

THESIS OPTION

Code	Title	Hours
Complete CIVE 7945 and CIVE 7990 for 8 semester hours or complete EEMB 8984 twice for 8 semester hours:		8
CIVE 7945 and CIVE 7990	Master's Project and Thesis	
EEMB 8984	Research (Completed twice)	
Complete 4 semester hours from the restricted electives course list below. (p. 522)		4

In addition to completing the thesis course, College of Engineering students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Restricted Electives

Code	Title	Hours
CIVE 5280	Remote Sensing of the Environment	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7282	Coastal and Hydraulic Modeling	
CIVE 7385	Public Transportation	
CIVE 7392	Special Topics in Environmental Engineering	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration	
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
ENVR 5210	Environmental Planning	
ENVR 5220	Ecosystem-Based Management	
ENVR 5563	Advanced Spatial Analysis	
INTL 5100	Climate and Development	
LAW 7634	Energy Law and Policy	
LPSC 7312	Cities, Sustainability, and Climate Change	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
ME 5685	Solar Thermal Engineering	
PPUA 5238	Climate Change and Global Urbanization	
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change	
PPUA 5268	International Environmental Policy	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Engineering and Public Policy, MS (Boston)

For program contact information, please visit the College of Engineering website (<https://cee.northeastern.edu/academics/graduate-studies/ms-cepp/>).

The purpose of this degree is to provide students with a background in engineering with the tools necessary to conduct robust policy analysis. It includes required core courses from the Department of Civil and Environmental Engineering and the School of Public Policy and Urban Affairs, complemented by electives in engineering and public policy, which can be met by two courses and a master's report (recommended), or by one course and a thesis, or by three courses. A minimum of 16 semester hours must be taken in the College of Engineering.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Engineering and Public Policy with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Engineering and Public Policy in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16 semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved technical courses.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Sustainable Engineering and Systems Modeling Requirements

Code	Title	Hours
Complete 12 semester hours from the following:		12
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
or PPUA 5261	Dynamic Modeling for Environmental Decision Making	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5368	Air Quality Management	
CIVE 6566	Sustainable Urban Transportation: Netherlands	
CIVE 6777	Climate Hazards and Resilient Cities Abroad	
CIVE 6778	Climate Adaptation and Policy Abroad	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7110	Critical Infrastructure Resilience	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
CIVE 7151	Urban Informatics and Processing	
CIVE 7155	Dynamics and Control of Infrastructure Systems	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
IE 5500	Systems Engineering in Public Programs	
IE 5640	Data Mining for Engineering Applications	
IE 6200	Engineering Probability and Statistics	
IE 7280	Statistical Methods in Engineering	
SBSY 5100	Sustainable Design and Technologies in Construction	
SBSY 5200	Sustainable Engineering Systems for Buildings	
SBSY 5400	Sustainable Building Systems Seminar	

Public Policy and Analysis Requirements

Code	Title	Hours
Complete 8 semester hours from the following:		8
INSH 5301	Introduction to Computational Statistics	
INSH 6300	Research Methods in the Social Sciences	
INSH 6500	Statistical Analysis	
INSH 7400	Quantitative Analysis	
LPSC 7311	Strategizing Public Policy	
PPUA 5246	Participatory Modeling for Collaborative Decision Making	
PPUA 5260	Ecological Economics	
PPUA 5263	Geographic Information Systems for Urban and Regional Policy	
PPUA 6212	Research Toolkit for Urban and Regional Policy: Project Management	
PPUA 6502	Economic Analysis for Policy and Planning	
PPUA 6506	Techniques of Policy Analysis	
PPUA 6509	Techniques of Program Evaluation	
PPUA 6532	Building Resilience into Local Government	
PPUA 7237	Advanced Spatial Analysis of Urban Systems	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the Elective Course List below. (p. 524)		12

PROJECT OPTION

Code	Title	Hours
CIVE 7945	Master's Project	4
Complete 8 semester hours from the Elective Course List below. (p. 524)		8

THESIS OPTION

Code	Title	Hours
CIVE 7945	Master's Project	4
CIVE 7990	Thesis	4
Complete 4 semester hours from the Elective Course List below. (p. 524)		4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing Committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS Thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

ELECTIVE COURSE LIST

Code	Title	Hours
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	

CIVE 5271	Solid and Hazardous Waste Management
CIVE 5280	Remote Sensing of the Environment
CIVE 5281	Coastal Dynamics and Design
CIVE 5300 and CIVE 5301	Environmental Sampling and Analysis and Lab for CIVE 5300
CIVE 5670	Global Biogeochemistry
CIVE 7230	Legal Aspects of Civil Engineering
CIVE 7392	Special Topics in Environmental Engineering (Equity in Civil and Environmental Engineering)
EMGT 6225	Economic Decision Making
ENVR 5210	Environmental Planning
ENVR 5260	Geographical Information Systems
ENVR 6102	Environmental Science and Policy Seminar 2
INSH 7400	Quantitative Analysis
INTL 5100	Climate and Development
LPSC 7311	Strategizing Public Policy
LPSC 7312	Cities, Sustainability, and Climate Change
PHTH 5214	Environmental Health
PHTH 5230	Global Health
PPUA 5249	Sustainable Urban Coastal Policy
PPUA 5262	Big Data for Cities
PPUA 5263	Geographic Information Systems for Urban and Regional Policy
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change
PPUA 5268	International Environmental Policy
PPUA 5270	Food Systems and Public Policy
PPUA 6101	Environmental Science and Policy Seminar 1
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context
PPUA 7346	Resilient Cities

Sustainability Engineering Leadership, MS (Boston)

The Master of Science in Sustainability Engineering Leadership is designed to train future leaders in the design and engineering of products, processes, and systems that address pressing environmental challenges. Students build core skills in engineering management and leadership while pursuing advanced training in one of two sustainable engineering tracks: sustainability assessment or energy and climate technologies. All students complete a comprehensive capstone project as part of the degree. The Master of Science in Sustainability Engineering Leadership is a double-degree program with University College Dublin. As a double-degree program, students complete their first year at Northeastern University—with 20 total semester hours and a potential four-month co-op or research experience—and take their remaining credits in the second year with University College Dublin.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
EMGT 5220	Engineering Project Management ¹	4
ENLR 5121	Engineering Leadership 1	2
ENLR 5122	Engineering Leadership 2	2

Master's Thesis or Challenge Projects

Code	Title	Hours
Complete one of the following sequences: ²		8
CIVE 7945 and CIVE 7990	Master's Project and Thesis	
ENLR 7440 and ENLR 7442	Engineering Leadership Challenge Project 1 and Engineering Leadership Challenge Project 2	

Concentrations

Complete one of the following options:

- Energy and Climate Technologies (p. 526)
- Sustainability Assessment (p. 526)

ENERGY AND CLIMATE TECHNOLOGIES CONCENTRATION

Code	Title	Hours
Complete 20 semester hours from the following: ³		20
CHME 6410	Chemical Engineering Research Methods	
CHME 6420	Engineering for Chemical Sustainability	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5365	Climate Technologies for Decarbonization, Mitigation, and Adaptation	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
ENSY 5000	Fundamentals of Energy System Integration

CIVE 5255	Tools and Techniques of Environmental Health	
CIVE 5261	Dynamic Modeling for Environmental Investment and Policymaking	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5699	Special Topics in Civil Engineering (Equity in Civil and Environmental Engineering)	
CIVE 7110	Critical Infrastructure Resilience	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
SBSY 5100	Sustainable Design and Technologies in Construction	

¹ The following UCD course will also fulfill this requirement: MEEN40800.

² The following UCD courses must be used to fulfill this requirement: BSEN40550 and BSEN40570.

³ The following UCD courses will also fulfill this requirement: BSEN30310, BSEN30560, BSEN40320, BSEN40350, BSEN40560, and BSEN40700.

⁴ The following UCD courses will also fulfill this requirement: BSEN30060, BSEN30360, BSEN40400, BSEN40750, and BSEN40810.

Program Credit/GPA Requirements

36 total semester hours required

Minimum 3.000 GPA required

Civil Engineering with Concentration in Construction Management, MSCivE (Boston)

This program is intended for students interested in construction management and engineering or a closely related field. It includes required core courses primarily from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-cive/>), complemented by electives in civil and environmental engineering and other departments such as mechanical and industrial engineering and business administration. Based on proven proficiency in given areas, students may waive certain core courses and replace them with alternate elective courses.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	10 SH	10 SH	10 SH
Elective courses	18 SH	14 SH	22 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Civil Engineering with Concentration in Construction Management with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Civil Engineering with Concentration in Construction Management in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 34-semester-hour degree and certificate will require fulfillment of the 10-semester-hour construction management core. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 14 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

The Department of Civil and Environmental Engineering encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand.

ENGINEERING BUSINESS

Master's Degree in Civil Engineering with Concentration in Construction Management with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Civil Engineering with Concentration in Construction Management in addition to earning a Graduate Certificate in Engineering Business (p. 685). Students must apply and be admitted to the Galante Engineering Business Program in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University. The integrated 32-semester-hour degree and certificate will require 10 semester hours of the core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CIVE 5221	Construction Project Control and Organization	2
CIVE 7220	Construction Management	4
CIVE 7230	Legal Aspects of Civil Engineering	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 22 semester hours from the course list below. (p. 528)		22

Civil Engineering with Concentration in Data and Systems, MSCivE (Boston)

This program is designed for students with career goals that require application of data and systems analysis to challenges across any discipline of civil and environmental engineering. The degree requirements include core courses (total of 20 semester hours) in data analysis and computing, systems and sensors, and data and systems topics in civil and environmental engineering, complemented by electives across multiple departments including mathematics, computer science, engineering, economics, and policy.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	20 SH	20 SH	20 SH
Electives	8 SH	4 SH	12 SH

Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Civil Engineering with Concentration in Data and Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Civil Engineering with Concentration in Data and Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved data and systems engineering technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 12 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

The Department of Civil and Environmental Engineering encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated. At least 20 semester hours (of the 32 semester hours) must be listed as CIVE or SBSY and must form a cohesive advisor-approved program.

Core Requirements

Code	Title	Hours
Complete 20 semester hours from the following course lists:		20
Data and Computing		
Complete at least 4 semester hours from the following:		4
CIVE 5280	Remote Sensing of the Environment	
CIVE 7100	Time Series and Geospatial Data Sciences	
or ENVR 6500	Biostatistics	
or IE 6200	Engineering Probability and Statistics	
or IE 7280	Statistical Methods in Engineering	
or INSH 5301	Introduction to Computational Statistics	
or MATH 7343	Applied Statistics

EECE 5642	Data Visualization	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7204	Applied Probability and Stochastic Processes	
IE 5617	Lean Concepts and Applications	

IE 7215	Simulation Analysis
SBSY 5300	Information Systems for Integrated Project Delivery

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering, MSCivE (Boston)

This program includes study in the areas of soil mechanics/foundations and geoenvironmental engineering. It includes studies of soil and related earth materials for problems related to the protection of human health and the environment. Related areas include soil mechanics, fate/transport in subsurfaces, subsurface remediation, and others. The degree requirements include core courses from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-cive/>), complemented by electives in civil and environmental engineering, as well as electives from other departments such as mechanical and industrial engineering.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core courses	8 SH	8 SH	8 SH
Elective courses	20 SH	16 SH	24 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Civil Engineering with Concentration in Geotechnical/Geoenvironmental Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require fulfillment of the 8-semester-hour core curriculum and 12 semester hours of restricted electives from the geotechnical/geoenvironmental engineering concentration coursework. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 12 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

The Department of Civil and Environmental Engineering encourages students pursuing a GIEL certificate to complete their MS coursework requirements in their first year and their GIEL certificate requirements in their second year. Students who prefer to complete their GIEL certificate requirements in their first year are asked to speak with their MS degree advisor beforehand. For students pursuing a concentration in geotechnical/geoenvironmental engineering, the two courses required by the concentration are offered in alternate years. To complete this certificate program in two years, one of the courses needs to be taken in the first year and the other in the second year.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
CIVE 7301	Advanced Soil Mechanics	4
CIVE 7302	Advanced Foundation Engineering	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 24 semester hours from the electives list below. (p. 532)		24

PROJECT OPTION

Code	Title	Hours
CIVE 7945	Master's Project	4
Complete 20 semester hours from the electives list below. (p. 532)		20

THESIS OPTION

Code	Title	Hours
CIVE 7945	Master's Project	4
CIVE 7990	Thesis	4
Complete 16 semester hours from the electives list below. (p. 532)		16

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Electives List

Code	Title	Hours
CIVE 5271	Solid and Hazardous Waste Management	
CIVE 5300 and CIVE 5301	Environmental Sampling and Analysis and Lab for CIVE 5300	
CIVE 5524	Vibration-Based Structural Health Monitoring	
CIVE 5536	Hydrologic and Hydraulic Design	
CIVE 7230	Legal Aspects of Civil Engineering	
CIVE 7240	Construction Equipment and Modeling	
CIVE 7250	Environmental Chemistry	
CIVE 7251	Environmental Biological Processes	
CIVE 7260	Hydrologic Modeling	
CIVE 7311	Soil and Foundation Dynamics

Civil Engineering with Concentration in Water, Environmental, and Coastal Systems, MSCivE (Boston)

This program integrates the study of infrastructure; hydrology; hydraulics; engineering for coastal areas; numerical modeling; remote sensing; spatial and temporal data analysis; and physical, chemical, and biological processes that impact the water and air quality to provide students with the knowledge and tools for developing and managing sustainable, resilient water resources and infrastructure. It includes required core courses from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-cive/>), complemented by electives in electrical and computer engineering, mechanical and industrial engineering, and earth and environmental sciences.

Degree Requirements	With Project	With Thesis	Coursework Only

Environmental Engineering, MSEnVE (Boston)

This program integrates the study of physical, chemical, and biological processes and fundamental principles for water and wastewater treatment and disposal, hazardous waste management, surface water and groundwater quality, water resources management, and air quality management. Successful graduates will have the ability to develop and implement technologies for various environmental applications with the goal of improving and protecting the environment and human health. It includes required core courses from the Department of Civil and Environmental Engineering (<https://cee.northeastern.edu/academics/graduate-studies/ms-envi/>), complemented by electives in civil and environmental engineering, mechanical and industrial engineering, earth and environmental sciences, and mathematics.

Degree Requirements	With Project	With Thesis	Coursework Only
Required core electives	12 SH	12 SH	12 SH
Restricted electives	8 SH	8 SH	12 SH
Other electives	8 SH	4 SH	8 SH
Master of Science project/thesis	4 SH	8 SH	

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Environmental Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Environmental Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved environmental engineering technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 12 semester hours of the certificate coursework may be applied to the restricted or unrestricted elective requirements of this program's coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Complete three of the following:		12
CIVE 5300 and CIVE 5301	Environmental Sampling and Analysis and Lab for CIVE 5300	
CIVE 5368	Air Quality Management	
CIVE 7250	Environmental Chemistry	
CIVE 7251	Environmental Biological Processes	
CIVE 7255	Environmental Physical/Chemical Processes	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the restricted electives list below. (p. 540)		12
Complete 8 semester hours from the other electives list below. (p. 540)		8

PROJECT OPTION

Code	Title	Hours
CIVE 7945	Master's Project	4

Minimum 3.000 GPA required

Sustainable Building Systems, MSSBS (Boston)

Website (<https://cee.northeastern.edu/academics/graduate-studies/ms-subs/>)

The sustainable building systems program focuses on the design and operation of buildings to provide a comfortable, healthy, and productive indoor environment with minimal energy and environmental impact. Students have an opportunity to develop leadership and decision-making skills to implement sustainable building practices in either the private or public sectors in the global market.

The graduates of the Master of Science in Sustainable Building Systems (<https://cee.northeastern.edu/academics/graduate-studies/ms-subs/>) program should display a high level of engineering knowledge in a broad range of architectural engineering, civil engineering, and construction management while embracing the concepts of engineering sustainability as related to energy and materials usage and the effects on the environment. Graduates will have the base training necessary to lead efforts within companies to plan and implement sustainable practices for the design and operation of buildings, realize energy and materials efficiency improvements, and minimize environmental impact. Upon graduation, students will have a theoretical background to the concepts behind the LEED (Leadership in Energy and Environmental Design) Green Associate examination.

Below is a typical course sequence for graduation in two semesters. The program is flexible to accommodate full-time students—who wish to proceed over a period of two to four semesters—and part-time students—who can complete the program requirements by taking one to two courses per semester, finishing the program in approximately four years.

Degree Requirements	With Project	With Thesis	Coursework Only
Core courses	12 SH	12 SH	12 SH
Restricted electives	8 SH	8 SH	8 SH
Other electives	8 SH	4 SH	12 SH
Master of Science report/thesis	4 SH	8 SH	
Minimum semester hours required	32 SH	32 SH	32 SH

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Sustainable Building Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Sustainable Building Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require fulfillment of the 12-semester-hour core curriculum and 8 semester hours of restricted electives from the sustainable building systems coursework. Students who concurrently enroll in the Graduate Certificate in Engineering Leadership may apply 12 semester hours of the certificate coursework to this program's unrestricted elective requirements.

The Civil and Environmental Engineering Department encourages students pursuing the Graduate Certificate in Engineering Leadership to complete their MS coursework requirements in their first year and their certificate requirements in their second year. Students who prefer to complete their certificate requirements in their first year should speak with their MS degree program coordinator prior to registration.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
ARCH 5210 and ARCH 5211	Environmental Systems and Recitation for ARCH 5210	4
SBSY 5100	Sustainable Design and Technologies in Construction	4
SBSY 5200	Sustainable Engineering Systems for Buildings	4
Students must register for this 0-semester-hour course every semester.		
SBSY 5400	Sustainable Building Systems Seminar	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 8 semester hours from the restricted electives list below. (p. 542)		8
Complete 12 semester hours from the other electives list below. (p. 543)		12

PROJECT OPTION

Code	Title	Hours
SBSY 7945	Master's Project	4
Complete 8 semester hours from the restricted electives list below. (p. 542)		8
Complete 8 semester hours from the other electives list below. (p. 543)		8

THESIS OPTION

Code	Title	Hours
SBSY 7945	Master's Project	4
SBSY 7990	Thesis	4
Complete 8 semester hours from the restricted electives list below. (p. 542)		8
Complete 4 semester hours from the other electives list below. (p. 543)		4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Electives

RESTRICTED ELECTIVES LIST

Code	Title	Hours
Complete 8 semester hours from the following:		
ARCH 5220	Integrated Building Systems	
CIVE 5221	Construction Project Control and Organization	
CIVE 5231	Alternative Project Delivery Systems in Construction	

CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure
CIVE 7220 or EMGT 5220	Construction Management Engineering Project Management
CIVE 7230	Legal Aspects of Civil Engineering
EMGT 6305	Financial Management for Engineers
SBSY 5250	Building Performance Simulation
SBSY 5300	Information Systems for Integrated Project Delivery

OTHER ELECTIVES LIST

Any restricted elective not used to meet the restricted elective requirement can be taken as another elective.

Code	Title	Hours
Complete 12 semester hours from the following:		12
ACCT 6200	Financial Reporting and Managerial Decision Making 1	
ACCT 6201	Financial Reporting and Managerial Decision Making 2	
CIVE 7151	Urban Informatics and Processing	
CIVE 7350	Behavior of Concrete Structures	
CIVE 7351	Behavior of Steel Structures	
CIVE 7388	Special Topics in Civil Engineering (Dynamics and Control of Infrastructure Systems)	
FINA 6200	Value Creation through Financial Decision Making	
FINA 6216	Valuation and Value Creation	
FINA 6217	Real Estate Finance and Investment	
LPSC 7312	Cities, Sustainability, and Climate Change	

Climate and Engineering, Graduate Certificate (Boston)

Climate change is a defining challenge of the 21st century. This three-course certificate in climate and engineering provides students with the foundational knowledge of how climate change will impact engineered systems and approaches for adaptation at multiple scales. Students will also acquire the analytical skills to evaluate technologies and engineering approaches for safety, climate effectiveness, and equality in societal costs and benefits.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Complete one of the following:		4
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5699	Special Topics in Civil Engineering (Climate Technologies for Decarbonization, Mitigation, and Adaptation)	

Electives

Code	Title	Hours
Complete two of the following:		8
CIVE 5150	Climate and Atmospheric Change	
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 5281	Coastal Dynamics and Design	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
CIVE 5670	Global Biogeochemistry	
CIVE 5699	Special Topics in Civil Engineering (Intro to Air Quality Engineering Science)	
CIVE 5699	Special Topics in Civil Engineering (Climate Technologies for Decarbonization, Mitigation, and Adaptation)	
CIVE 5984	Research (4 SH, with topic approval of program advisor)	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Sustainability Engineering, Graduate Certificate (Boston)

Overview

Society is facing increasingly complex and multidisciplinary challenges in balancing the relationship between the built environment and the earth system. The four-course certificate in sustainability engineering provides foundational knowledge that facilitates framing challenges and working on multidisciplinary topics to address sustainability challenges, including engineering perspectives, toolsets, and data methods.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Requirements

Code	Title	Hours
Complete one of the following:		4
CIVE 5150	Climate and Atmospheric Change	
CIVE 5250	Organic Pollutants in the Environment	
CIVE 5363	Climate Science, Engineering Adaptation, and Policy	
Complete one of the following:		4
CIVE 5699	Special Topics in Civil Engineering (Intro to Air Quality Engineering Science - 4 semester hours)	
CIVE 7250	Environmental Chemistry	
CIVE 7251	Environmental Biological Processes	
Complete one of the following:		4
CIVE 5275	Life Cycle Assessment of Materials, Products, and Infrastructure	
CIVE 6566	Sustainable Urban Transportation: Netherlands	
SBSY 5100	Sustainable Design and Technologies in Construction	
Complete one of the following:		4
CIVE 5373	Transportation Systems: Analysis and Planning	
CIVE 5984	Research (4 semester hours)	
CIVE 7100	Time Series and Geospatial Data Sciences	
CIVE 7260	Hydrologic Modeling	
CIVE 7388	Special Topics in Civil Engineering (Random Data and Processing)	

Program Credit/GPA Requirements

16 total semester hours required

Electrical and Computer Engineering

Website (<https://ece.northeastern.edu/>)

Edmund Yeh, PhD

Professor and Chair

409 Dana Research Center

617.373.7529

617.373.4431 (fax)

The Department of Electrical and Computer Engineering's graduate program is a dynamic and thriving center of world-recognized research in a wide range of areas. The department has strong ties to local industry and the world-famous hospitals and medical centers of Boston and is involved in many joint research projects with them. With five NSF- and DHS-funded research centers and over 20 industrial partners, faculty and students are actively conducting cutting-edge research in areas such as computer vision; pattern recognition and machine learning; brain-computer interface; computer architecture; high-performance computing; embedded systems; hardware and software security; power systems and power electronics; underwater communication networks and signal processing; robotics; information theory; communications, control, and signal processing; Internet

of Things; RF, electromagnetics, optics, and magnetic materials; micro/nanomechanical structures and advanced nanomaterials; power-first system/computer architecture; and ultralow power biomedical and neural circuits and systems.

ECE's graduate program educates MS and PhD students with deep fundamental and practical knowledge in the various disciplines of electrical and computer engineering by offering a strong curriculum and providing opportunities for research in these disciplines. The department educates the next generation of highly skilled engineers and researchers with necessary skills to address the future needs of academia, industry, government, and humanity.

Overview of Programs Offered

ECE's graduate program offers a Master of Science in Electrical and Computer Engineering, a Master of Science in Electrical and Computer Engineering Leadership, a Master of Science in Applied Physics and Engineering, a Master of Science in Data Science, a Master of Science in Robotics, a Master of Science in Internet of Things, a Master of Science in Wireless and Network Engineering, a Doctor of Philosophy in Computer Engineering, a Doctor of Philosophy in Cybersecurity, a Doctor of Philosophy in Electrical Engineering, and a Doctor of Philosophy in Interdisciplinary Engineering (housed in the College of Engineering).

Mission of the Department

The primary educational missions of the electrical and computer engineering department are to educate undergraduate students so they have the opportunity to obtain successful careers in electrical and computer engineering and related disciplines and pursue advanced graduate study in engineering or related disciplines. The mission of the graduate program is to educate graduate students so they have the skills to solve complex engineering problems and can make meaningful contributions to research and industry.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Master of Science in Electrical and Computer Engineering Leadership (p. 611) along with the Graduate Certificate in Engineering Leadership.

In addition, students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1349) in combination with the Master of Science in Electrical and Computer Engineering. This option results in an increase in total hours beyond that required for the master's degree only.

Programs

Doctor of Philosophy (PhD)

- Computer Engineering (p. 546) (Boston)
- Cybersecurity (p. 418) (Boston)
- Electrical Engineering (p. 551) (Boston)
- Electrical Engineering (p. 553) (Oakland)
- Interdisciplinary Engineering (p. 486) (Boston)

Master of Science (MS)

- Applied Physics and Engineering (p. 557) (Boston)
- Artificial Intelligence (p. 164) (Boston)
- Data Science (p. 169) (Boston)
- Data Science—Align (p. 172) (Boston)
- Extended Realities (p. 175) (Boston)
- Internet of Things (p. 372) (Boston)
- Robotics (p. 180) (Boston)
- Robotics (p. 184) (Seattle)
- Semiconductor Engineering (p. 580) (Boston)
- Wireless and Network Engineering (p. 583) (Boston)

Master of Science in Electrical and Computer Engineering (MSECE)

- Concentration in Communications, Control, and Signal Processing (p. 585) (Boston)
- Concentration in Computer Systems and Software (p. 588) (Boston)
- Concentration in Computer Systems and Software (p. 590) (Seattle)
- Concentration in Computer Vision, Machine Learning, and Algorithms (p. 593) (Boston)
- Concentration in Computer Vision, Machine Learning, and Algorithms (p. 596) (Seattle)
- Concentration in Electromagnetics, Plasma, and Optics (p. 598) (Boston)
- Concentration in Hardware and Software for Machine Intelligence (p. 601) (Boston)

- Concentration in Hardware and Software for Machine Intelligence (p. 604) (Seattle)
- Concentration in Microsystems, Materials, and Devices (p. 606) (Boston)
- Concentration in Power Systems (p. 609) (Boston)

Master of Science in Electrical and Computer Engineering Leadership (MSECEL)

- Electrical and Computer Engineering Leadership (p. 611) (Boston)

Computer Engineering, PhD (Boston)

The Doctor of Philosophy in Computer Engineering offers students an opportunity for study in a broad range of areas in computer engineering. Details on PhD requirements can be found in the *Graduate Program Guide*. A summary of requirements is given below.

Qualifying Exam and Degree Candidacy

The PhD qualifying exam is the examination for admissions to the doctoral programs in electrical engineering and in computer engineering. The exam has the dual purposes of serving as an indicator of the student's capability for successful completion of the PhD in electrical engineering or in computer engineering and of serving as a guide to the student's advisor in developing a suitable plan of study, tailored to the individual needs of the student.

A student who has matriculated into the PhD program is considered a predoctoral student, whether they are BS entry or advanced entry. Upon successful completion of the qualifying exam, the student is designated a PhD candidate. A student who fails the qualifying exam will be permitted to retake the exam only one more time.

Annual Review

PhD students are reviewed annually. Each student is evaluated and receives a grade of satisfactory, needs improvement, or unsatisfactory.

Residence Requirement

After reaching PhD candidacy, one year of full-time graduate work or two consecutive years of part-time graduate work satisfy the university residence requirement. In the latter case, the student's advisor must approve a detailed schedule in order to ensure that the student devotes at least half of the time to the requirements of the Graduate School of Engineering.

Dissertation

Within one year of passing the PhD qualifying exam, the PhD candidate must form a dissertation committee. A dissertation committee must have at least three members that hold a PhD or equivalent degree. At least two of the committee members must be tenured or tenure-track Department of Electrical and Computer Engineering faculty, and the committee must include the student's advisor. The chair of the committee must be a tenured or tenure-track faculty member in the ECE department.

The dissertation committee must design an appropriate program of study that prepares the student to be a successful doctoral-level engineer as well as direct the candidate's dissertation research. The dissertation committee will approve the dissertation in final form.

DISSERTATION AND DISSERTATION CONTINUATION REGISTRATION

Upon successful completion of the PhD qualifying exam and the required coursework, the PhD candidate must register in two consecutive semesters for Dissertation Term 1 (EECE 9990) and Dissertation Term 2 (EECE 9991). Upon completion of this sequence, the student must register for Dissertation Continuation (EECE 9996) in every semester until the dissertation is completed. A student may not register for Continuation until they fulfill the two-semester sequence of Dissertation.

REGISTRATION REQUIREMENTS FOR PREDOCTORAL AND PHD CANDIDATE GRADUATE ASSISTANTS

The ECE department requires that predoctoral students and PhD candidates who hold research or teaching assistantships be registered full-time. Predoctoral PhD students may register for Research (EECE 9986) (zero credit, full-time equivalent) *if needed* to fulfill the registration requirement.

PHD PROPOSAL REVIEW

Each PhD candidate must demonstrate, by means of the proposal review, subject matter knowledge satisfactory for the award of the degree.

The proposal review is an oral presentation followed by a question-and-answer session administered by the student's dissertation advisor/committee. The proposal review will be given at the time the student submits their dissertation proposal to the dissertation advisor/committee for approval. As part of this exam, the dissertation advisor/committee will review the student's doctoral program and their performance in graduate courses, as well as examine the student on subject matter related to their graduate coursework and dissertation subject area.

FINAL DISSERTATION DEFENSE

The final dissertation defense will include the subject matter of the dissertation and significant developments in the field of the dissertation work. Other related fields may be included if recommended by the examining faculty. The dissertation defense must be scheduled at least six months after the PhD proposal review.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual departmental review (each fall semester after the student has been in the program for at least one year)
 Qualifying examination
 Dissertation committee
 Proposal stage review
 Dissertation defense

Core Requirements

Code	Title	Hours
Complete 32 semester hours of approved coursework—equivalent of MSECE degree. Then complete 16 semester hours, of which 8 must be graduate-level EECE courses. Consult faculty research advisor for acceptable courses.		48

Dissertation

Code	Title	Hours
EECE 9990	Dissertation Term 1	
EECE 9991	Dissertation Term 2	

Program Credit/GPA Requirements

48 total semester hours required
 Minimum 3.000 GPA required

Advanced Entry Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual review (each fall semester after the student has been in the program for at least one year)
 Qualifying examination
 Dissertation committee
 Proposal stage review
 Dissertation defense

Core Requirements

Complete 16 semester hours of approved coursework. At least 8 semester hours must be graduate-level EECE courses. Consult your faculty adviser for acceptable courses.

Cybersecurity, PhD (Boston)

A research-based, interdisciplinary Doctor of Philosophy (PhD) in Cybersecurity combines a strong security technical foundation with a security policy and social sciences perspective. It seeks to prepare graduates to advance the state of the art of security in systems, networks, and the internet in industry, academia, and government. The interdisciplinary nature of the program distinguishes it from traditional doctoral degree programs in computer science, engineering, or social sciences and makes it unique in the Boston area.

Students who choose the PhD in Cybersecurity program have a strong desire to pursue academic research solving critical cybersecurity challenges facing today's society. The PhD program is a natural path for students in the college's Master of Science in Cybersecurity (<http://www.ccs.neu.edu/graduate/degree-programs/m-s-in-information-assurance/>) program who want to pursue research and students with bachelor's degrees and an interest in research-focused careers. Students who pursue careers in advancing the state of the art of cybersecurity have an opportunity to gain:

- A strong technical foundation in cybersecurity and an interdisciplinary perspective based on policy and social science
- A path to a research-focused career coupled with depth in information assurance research at a leading institution, one of the earliest designees by NSA/DHS as a National Center of Academic Excellence in Information Assurance Research, Information Assurance/Cyber Defense, and Cyber Operations
- The opportunity to work with and learn from faculty who are recognized internationally for their expertise and contributions in information assurance from Northeastern University's Khoury College of Computer Sciences, the Department of Electrical and Computer Engineering, and the College of Social Sciences and Humanities
- Access to research projects at Northeastern's research centers focused on security.
 - The Cybersecurity and Privacy Institute (<https://cyber.ccis.northeastern.edu/about/>): The mission of Northeastern's Cybersecurity and Privacy Institute is to safeguard critical technology. Forging partnerships with experts in industry, government, and academia worldwide, the Institute's faculty and students develop, protect, and enhance technologies on which the world relies—from mobile devices and “smart” IoT applications to tomorrow's self-driving cars and delivery drones. Their expertise spans algorithm auditing; cloud security; cryptography; differential privacy; embedded device security; internet-scale security measurements; machine learning; big data; security, malware, and advanced threats; network protocols and security; web and mobile security; and wireless network security.
 - The International Secure Systems Lab (<http://www.iseclab.org/>), affiliated with Northeastern, a collaborative effort of European and U.S. researchers focused on web security, malware, and vulnerability analysis; intrusion detection; and other computer security issues.
 - The ALERT Center (<http://www.northeastern.edu/alert/>), where Northeastern is the lead institution, a multiuniversity Department of Homeland Security Center of Excellence involved in research, education, and technology related to threats from explosives.

The benefits of the Boston area:

- World-renowned for academic and research excellence, the Boston area is also home to some of the nation's largest Department of Defense contractors and government and independent labs such as MIT Lincoln Lab, MITRE, and Draper Lab.

Degree Requirements

The PhD in Cybersecurity degree requires completion of at least 48 semester hours beyond a bachelor's degree. Students who enter with an undergraduate degree will typically need four to five years to complete the program, and they will be awarded a master's degree en route to the PhD.

Doctoral Degree Candidacy

A student is considered a PhD degree candidate after completing the core courses with at least a 3.500 GPA, with no grades lower than a B in the core courses, and either publishing a paper in a strong conference or journal or passing an oral exam that is conducted by a committee of three cybersecurity faculty members and based on paper(s) written by the student.

RESIDENCY

One year of continuous full-time study is required after admission to the PhD candidacy. During this period, the student will be expected to make substantial progress in preparing for the comprehensive examination.

TEACHING REQUIREMENT

All cybersecurity PhD students must satisfy the teaching requirement in order to graduate. This requirement is fulfilled when the student works as a teaching assistant or instructor of record for one semester and during this semester.

- Teaches at least three hours of classes
- Prepares at least one assignment or quiz or equivalent

PhD students are expected to satisfy the teaching requirement some time after completing their first year and at least one semester prior to scheduling their PhD defense.

DISSERTATION ADVISING

The doctoral dissertation advising team for each student consists of two cybersecurity faculty members, one in a technical area. When appropriate, the second faculty advisor will be from the policy/social science area.

DISSERTATION COMMITTEE

With the help of the advisor, a student selects the committee, consisting of at least four members, to be approved by the PhD cybersecurity curriculum committee. The four members must include the advisor, two internal members, and an external member.

COMPREHENSIVE EXAMINATION

A PhD student must submit a written dissertation proposal and present it to the dissertation committee. The proposal should identify the research problem, the research plan, and the potential impact of the research on the field. The presentation of the proposal will be made in an open forum, and the student must successfully defend it before the dissertation committee after the public presentation.

DISSERTATION DEFENSE

A PhD student must complete and defend a dissertation that involves original research in cybersecurity.

AWARDING OF MASTER'S DEGREES

Students who enter the PhD in Cybersecurity program with a bachelor's degree have the option of earning a master's degree from one of the departments participating in the program. To do so, they must meet all of the department's degree requirements.

Program Requirements**Bachelor's Degree Entrance**

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Teaching
 Qualifying exam and area exam
 Annual review
 Dissertation proposal
 Dissertation committee
 Dissertation defense

Core Requirements

A grade of B or higher is required in each core course. A cumulative 3.500 grade-point average is required for the core requirement.

Advanced Entry Program Requirements
Degree Requirements

Incoming PhD in Cybersecurity students who have already completed a Master of Science in an adjacent field may petition to the graduate program administration for advanced entry. Advanced entry petitions are reviewed by the program administration on a case-by-case basis. Please note that advanced entry does not waive by itself any part of the PhD coursework requirements. As a degree conferral requirement, a minimum of 16 semester hours of coursework beyond the 32 semester hours of the master’s degree is required of advanced entry PhD students (48 semester hours is required of standard entry PhD students). A grade of B or higher is required in each course. A cumulative 3.500 GPA is required for the core requirement.

Doctoral Degree Candidacy

Refer to the PhD Cybersecurity overview (p. 418) for admission to candidacy requirements.

Residency

Refer to the PhD Cybersecurity overview (p. 418) for residency requirements.

Teaching Requirement

Refer to the PhD Cybersecurity overview (p. 418) for teaching requirements.

Dissertation Advising

Refer to the PhD Cybersecurity overview (p. 418) for dissertation advising requirements.

Dissertation Committee

Refer to the PhD Cybersecurity overview (p. 418) for dissertation committee requirements.

Comprehensive Examination

Refer to the PhD Cybersecurity overview (p. 418) for comprehensive examination requirements.

Dissertation Defense

Refer to the PhD Cybersecurity overview (p. 418) for dissertation defense and completion requirements.

Complete all courses and requirements listed below unless otherwise indicated.

Electrical Engineering, PhD (Boston)

The PhD program in electrical engineering offers students an opportunity for study in a broad range of areas in electrical engineering. Details on PhD requirements can be found in the *Graduate Program Guide*. A summary of requirements is given below.

Qualifying Exam and Degree Candidacy

The PhD qualifying exam is the examination for admissions to the doctoral programs in electrical engineering and in computer engineering. The exam has the dual purposes of serving as an indicator of the student's capability for successful completion of the PhD in electrical engineering or in computer engineering and of serving as a guide to the student's advisor in developing a suitable plan of study, tailored to the individual needs of the student.

A student who has matriculated into the PhD program is considered a predoctoral student, whether they are BS entry or advanced entry. Upon successful completion of the qualifying exam, the student is designated a PhD candidate. A student who fails the qualifying exam will be permitted to retake the exam only one more time.

Annual Review

PhD students are reviewed annually. Each student is evaluated and receives a grade of satisfactory, needs improvement, or unsatisfactory.

Residence Requirement

After reaching PhD candidacy, one year of full-time graduate work or two consecutive years of part-time graduate work satisfy the university residence requirement. In the latter case, the student's advisor must approve a detailed schedule in order to ensure that the student devotes at least half of the time to the requirements of the Graduate School of Engineering.

Dissertation

Within one year of passing the PhD qualifying exam, the PhD candidate must form a dissertation committee. A dissertation committee must have at least three members that hold a PhD or equivalent degree. At least two of the committee members must be tenured or tenure-track ECE faculty and the committee must include the student's advisor. The chair of the committee must be a tenured or tenure-track faculty member in the ECE department.

The dissertation committee must design an appropriate program of study that prepares the student to be a successful doctoral-level engineer as well as direct the candidate's dissertation research. The dissertation committee will approve the dissertation in final form.

DISSERTATION AND DISSERTATION CONTINUATION REGISTRATION

Upon successful completion of the PhD qualifying exam and the required coursework, the PhD candidate must register in two consecutive semesters for Dissertation Term 1 (EECE 9990) and Dissertation Term 2 (EECE 9991). Upon completion of this sequence, the student must register for Dissertation Continuation (EECE 9996) in every semester until the dissertation is completed. A student may not register for Continuation until they fulfill the two-semester sequence of Dissertation.

REGISTRATION REQUIREMENTS FOR PREDOCTORAL AND PHD CANDIDATE GRADUATE ASSISTANTS

The ECE department requires that predoctoral students and PhD candidates who hold research or teaching assistantships be registered full-time. Predoctoral PhD students may register for Research (EECE 9986) (zero credit, full-time equivalent) if needed to fulfill the registration requirement.

PHD PROPOSAL REVIEW

Each PhD candidate must demonstrate, by means of the proposal review, subject matter knowledge satisfactory for the award of the degree.

The proposal review is an oral presentation followed by a question-and-answer session administered by the student's dissertation advisor/committee. The proposal review will be given at the time the student submits their dissertation proposal to the dissertation advisor/committee for approval. As part of this exam, the dissertation advisor/committee will review the student's doctoral program and their performance in graduate courses, as well as examine the student on subject matter related to their graduate coursework and dissertation subject area.

FINAL DISSERTATION DEFENSE

The final dissertation defense will include the subject matter of the dissertation and significant developments in the field of the dissertation work. Other related fields may be included if recommended by the examining faculty. The dissertation defense must be scheduled at least six months after the PhD proposal review.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Annual review (each fall semester after the student has been in the program for at least one year)

Qualifying examination

Electrical Engineering, PhD (Oakland)

The PhD program in electrical engineering offers students an opportunity for study in a broad range of areas in electrical engineering. Details on PhD requirements can be found in the *Graduate Program Guide*. A summary of requirements is given below.

Qualifying Exam and Degree Candidacy

The PhD qualifying exam is the examination for admissions to the doctoral programs in electrical engineering and in computer engineering. The exam has the dual purposes of serving as an indicator of the student's capability for successful completion of the PhD in electrical engineering or in computer engineering and of serving as a guide to the student's advisor in developing a suitable plan of study, tailored to the individual needs of the student.

A student who has matriculated into the PhD program is considered a predoctoral student, whether they are BS entry or advanced entry. Upon successful completion of the qualifying exam, the student is designated a PhD candidate. A student who fails the qualifying exam will be permitted to retake the exam only one more time.

Annual Review

PhD students are reviewed annually. Each student is evaluated and receives a grade of satisfactory, needs improvement, or unsatisfactory.

Residence Requirement

After reaching PhD candidacy, one year of full-time graduate work or two consecutive years of part-time graduate work satisfy the university residence requirement. In the latter case, the student's advisor must approve a detailed schedule in order to ensure that the student devotes at least half of the time to the requirements of the Graduate School of Engineering.

Dissertation

Within one year of passing the PhD qualifying exam, the PhD candidate must form a dissertation committee. A dissertation committee must have at least three members that hold a PhD or equivalent degree. At least two of the committee members must be tenured or tenure-track ECE faculty and the committee must include the student's advisor. The chair of the committee must be a tenured or tenure-track faculty member in the ECE department.

The dissertation committee must design an appropriate program of study that prepares the student to be a successful doctoral-level engineer as well as direct the candidate's dissertation research. The dissertation committee will approve the dissertation in final form.

DISSERTATION AND DISSERTATION CONTINUATION REGISTRATION

Upon successful completion of the PhD qualifying exam and the required coursework, the PhD candidate must register in two consecutive semesters for Dissertation Term 1 (EECE 9990) and Dissertation Term 2 (EECE 9991). Upon completion of this sequence, the student must register for Dissertation Continuation (EECE 9996) in every semester until the dissertation is completed. A student may not register for Continuation until they fulfill the two-semester sequence of Dissertation.

REGISTRATION REQUIREMENTS FOR PREDOCTORAL AND PHD CANDIDATE GRADUATE ASSISTANTS

The ECE department requires that predoctoral students and PhD candidates who hold research or teaching assistantships be registered full-time. Predoctoral PhD students may register for Research (EECE 9986) (zero credit, full-time equivalent) if needed to fulfill the registration requirement.

PHD PROPOSAL REVIEW

Each PhD candidate must demonstrate, by means of the proposal review, subject matter knowledge satisfactory for the award of the degree.

The proposal review is an oral presentation followed by a question-and-answer session administered by the student’s dissertation advisor/committee. The proposal review will be given at the time the student submits their dissertation proposal to the dissertation advisor/committee for approval. As part of this exam, the dissertation advisor/committee will review the student’s doctoral program and their performance in graduate courses, as well as examine the student on subject matter related to their graduate coursework and dissertation subject area.

FINAL DISSERTATION DEFENSE

The final dissertation defense will include the subject matter of the dissertation and significant developments in the field of the dissertation work. Other related fields may be included if recommended by the examining faculty. The dissertation defense must be scheduled at least six months after the PhD proposal review.

Interdisciplinary Engineering, PhD (Boston)

130 Snell Engineering Center
617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into the interdisciplinary engineering program by an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 470)
- Department of Chemical Engineering (p. 499)
- Department of Civil and Environmental Engineering (p. 514)
- Department of Electrical and Computer Engineering (p. 544)
- Department of Mechanical and Industrial Engineering (p. 612)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department.

The interdisciplinary engineering PhD program requires a commitment from a Northeastern faculty member to serve as the student's primary faculty advisor and chair of their interdisciplinary engineering PhD committee. The primary faculty member is affiliated with the program's administrative home unit unless otherwise approved by the administrative home unit. The PhD advisory committee must be assembled within the first semester of the program, and at least two units must be represented on the committee. The committee must include at least one faculty co-advisor from all participating academic units and otherwise conforms to the rules of the home unit. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

Supplementary Interdisciplinary Engineering PhD Program Forms

Successful application and admission to the interdisciplinary engineering PhD program requires a completed Program Preliminary Study Plan, available on the COE Graduate Student Services Forms website. This form provides a memorandum of understanding for your proposed PhD including the primary departments and advisor(s), a brief description of the planned research, and explanation of the rationale for an interdisciplinary PhD program.

No later than one year postentry into the program, a completed and signed Interdisciplinary Program Plan must be submitted to the Graduate School of Engineering. This individually designed plan includes a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program. This form can be found on the COE Graduate Student Services Forms website.

Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. Successful completion of the total interdisciplinary engineering PhD program depends on meeting department academic milestones and academic expectations.

Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

Program Requirements

Direct Entry

Complete all requirements listed below unless otherwise indicated.

Milestones

Interdisciplinary Engineering PhD Program Preliminary Study Plan Interdisciplinary Program Plan Dissertation committee formation

- Doctoral qualifying exams (both written comprehensive and oral area exams)
- Annual review

Applied Physics and Engineering, MS (Boston)

The combined MS program in applied physics and engineering allows graduate students to receive training in one of three concentrations of the electrical and computer engineering department while also receiving fundamental graduate-level physics training that is relevant to that area.

Thesis Option

Students may register for an additional two semesters of thesis work. Depending on the affiliation of the thesis advisor, students may register for Thesis (PHYS 7990) for a total of 8 semester hours or 4 semester hours of Master's Project (EECE 7945) followed by 4 semester hours of Thesis (EECE 7990). Thesis credits cannot be substituted for any of the coursework listed above. This option requires a total of 40 semester hours for the master's degree. A thesis committee is composed of an advisor and two faculty members from physics or electrical engineering.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Concentrations

Complete one of the following concentrations:

- Analysis, Modeling, and Computation (p. 558)
- Electromagnetics, Plasma, and Optics (p. 558)
- Microsystems, Materials, and Devices (p. 559)

Optional Thesis

Code	Title	Hours
Select one of the following options based on the college affiliation of the thesis advisor. Thesis coursework will not be applied to other requirements of this degree program. Completion of this thesis option requires a total of 40 semester hours to earn the degree:		8

Option 1 (College of Science thesis advisor)

PHYS 7990	Thesis (completed twice over two semesters)

Option 2 (College of Engineering thesis advisor)

EECE 7945	Master's Project
EECE 7990	Thesis

Program Credit/GPA Requirements

32 total semester hours required (40 with optional thesis)

Minimum 3.000 GPA required

Artificial Intelligence, MS (Boston)

The Master of Science in Artificial Intelligence provides a comprehensive framework encompassing foundational algorithms, theory, and practical applications in the rapidly evolving field of AI. This program offers students the essential knowledge and skills to design, develop, and implement AI systems across various high-demand sectors. The core curriculum is designed to provide in-depth understanding of fundamental AI concepts, forming a solid foundation for both theoretical and practical aspects of artificial intelligence.

Building on this strong foundation, students can delve into advanced AI applications through interdisciplinary concentrations tailored to industry needs. These concentrations include computer vision, continuous process engineering, machine learning, and robotics and agent-based systems.

The master's in artificial intelligence is an interdisciplinary degree offered by Khoury College of Computer Sciences and the College of Engineering. Descriptions of the concentrations offered in this degree are as follows:

- Computer Vision—College of Engineering
 - The computer vision concentration offers students the knowledge and skills to drive innovation at the intersection of new and emerging vision systems and AI, through utilizing AI and machine learning solutions for a wide range of applications including image enhancement/restoration, object recognition, navigation, graphics rendering, and pattern classification.
- Continuous Process Engineering—College of Engineering
 - The continuous process engineering concentration offers students the knowledge and skills to revolutionize how industrial processes are designed, monitored, and optimized. The program aims to prepare students to utilize AI and machine learning solutions to enhance process efficiency, predictive maintenance, and real-time decision making in industries such as chemicals, pharmaceuticals, and energy. Graduates will be prepared to integrate AI-driven solutions into continuous manufacturing environments to improve safety, sustainability, and productivity.
- Energy Systems—College of Engineering
 - The energy systems concentration offers students the knowledge and skills to drive innovation in sustainable and intelligent energy systems. Students examine how to utilize AI and machine learning solutions to support smart energy grid operations, integrate renewable energy sources, and create responsive and resilient systems.
- Machine Learning—Khoury College of Computer Sciences

- The goal of the machine learning concentration is to provide students with practical, hands-on experience in designing, implementing, and optimizing machine learning models for real-world applications. The curriculum positions graduates to pursue roles that leverage AI to drive innovation and efficiency in a wide variety of industries and domains.
- Robotics and Agent-Based Systems—Khoury College of Computer Sciences
 - The goal of the robotics and agent-based systems concentration is to provide students with expertise in designing and developing intelligent robotic systems and autonomous agents capable of performing complex tasks in dynamic environments. The curriculum positions graduates to pursue roles that contribute to innovations in automation, human-robot interaction, and intelligent systems design.

Students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their college of admission.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A cumulative GPA of 3.000 or higher is required in the following:

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 5130	Applied Programming and Data Processing for AI	4
DADS 5200 or DS 5020	Mathematics for Machine Learning Introduction to Linear Algebra and Probability for Data Science	4
EECE 5644 or DADS 7275	Introduction to Machine Learning and Pattern Recognition Machine Learning and Data Analytics	4

Concentrations

Complete one of the following concentrations:

- Computer Vision (p. 165)—College of Engineering
- Continuous Process Engineering (p. 165)—College of Engineering
- Energy Systems (p. 165)—College of Engineering
- Machine Learning (p. 166)—Khoury College of Computer Sciences
- Robotics and Agent-Based Systems (p. 166)—Khoury College of Computer Sciences

Program Credit/GPA Requirements

Data Science, MS (Boston)

Khoury College of Computer Sciences and the College of Engineering jointly offer an interdisciplinary Master of Science in Data Science. This program is designed to give students a comprehensive framework for reasoning about data. Students engage in extensive coursework intended to develop depth in data collection, storage, retrieval, manipulation, visualization, modeling, and interpretation. Students are also able to choose elective courses from a variety of offerings in Khoury, the College of Engineering, and throughout the campus to explore areas that generate data or specialized data science applications. Successful program graduates are well positioned to attain data scientist and data engineer positions in a fast-growing field or to progress into doctoral degrees in related disciplines.

During the admissions process, applicants take a pretest to determine if the Master of Science in Data Science or Master of Science in Data Science—Align fits better with their current skill level. In addition, prospective applicants work with recruitment and enrollment coaching teams to select the appropriate program before applying.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Engineering Theory and Modeling—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Students should refer to the course numbering table for graduate course leveling (p. 113).

Data Science Core

A cumulative GPA of 3.000 or higher is required in the following core courses.

Code	Title	Hours
Programming with Data		
DS 5110	Essentials of Data Science	4
Algorithms		
CS 5800	Algorithms	4
or EECE 7205	Fundamentals of Computer Engineering	
Machine Learning		
CS 6140	Machine Learning	4
or EECE 5644	Introduction to Machine Learning and Pattern Recognition	
Interdisciplinary Capstone		
DS 5500	Data Science Capstone	4

Data Science Concentration Options

Complete one of the following concentrations:

- Computer Science (p. 170)—Khoury College of Computer Sciences
- Engineering Theory and Modeling (p.)—College of Engineering

ENGINEERING THEORY AND MODELING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Foundational Courses		
Complete 4 semester hours from the following: ¹		4
DS 7995	Project	
EECE 5360	Combinatorial Optimization	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 7204	Applied Probability and Stochastic Processes	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	
EECE 7346	Probabilistic System Modeling and Analysis	
IE 6400	Foundations for Data Analytics Engineering	
IE 7275	Data Mining in Engineering	
IE 7280	Statistical Methods in Engineering	
Translational and Advanced Courses		
Complete the remaining 12 semester hours from the following:		12
BIOE 5750	Modeling and Inference in Bioengineering	
BIOE 5880	Computational Methods in Systems Bioengineering	
BIOE 6200	Mathematical Methods in Bioengineering	
CHME 5137	Computational Modeling in Chemical Engineering	

CHME 5649	Numerical Strategies and Data Analytics for Chemical Sciences
CIVE 7100	Time Series and Geospatial Data Sciences
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering
EECE 5360	Combinatorial Optimization
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts
EECE 5614	Reinforcement Learning and Decision Making Under Uncertainty
EECE 5626	Image Processing and Pattern Recognition
EECE 5639	Computer Vision
EECE 5640	High-Performance Computing
EECE 5642	Data Visualization
EECE 5645	Parallel Processing for Data Analytics
EECE 7204	Applied Probability and Stochastic Processes
EECE 7215	Introduction to Distributed Intelligence
EECE 7223	Riemannian Optimization
EECE 7323	Numerical Optimization Methods
EECE 7337	Information Theory
EECE 7345	Big Data and Sparsity in Control, Machine Learning, and Optimization
EECE 7346	Probabilistic System Modeling and Analysis
EECE 7370	Advanced Computer Vision
EECE 7397	Advanced Machine Learning
EECE 7945	Master's Project
IE 5137	Computational Modeling in Industrial Engineering
IE 5390	Structured Data Analytics for Industrial Engineering
IE 5630	Biosensor and Human Behavior Measurement
IE 5640	Data Mining for Engineering Applications
IE 6400	Foundations for Data Analytics Engineering
IE 6600	Computation and Visualization for Analytics
IE 6700	Data Management for Analytics
IE 6750	Data Warehousing and Integration
IE 7270	Intelligent Manufacturing
IE 7275	Data Mining in Engineering
IE 7280	Statistical Methods in Engineering
IE 7295	Applied Reinforcement Learning in Engineering
IE 7300	Statistical Learning for Engineering
IE 7500	Applied Natural Language Processing in Engineering
IE 7615	Neural Networks and Deep Learning

¹ Students taking electives worth less than 4 semester hours (i.e., Bouvé courses) should enroll for an accompanying data science project course in the same semester to bring the cumulative semester hours to 4. In order to earn this additional hour, students are expected to work with faculty to design an additional project in line with the curricular aims of their chosen elective and the data science core learning outcomes.

Extended Realities, MS (Boston)

The Master of Science in Extended Realities seeks to open the new technologies, methods, practices, and skills of extended realities to students. XR includes augmented, virtual, and mixed reality. XR technologies have seen explosive growth over the last decade of mixed reality.

This program is structured to allow students flexibility and specialization to choose a path that matches their interest. Students have an opportunity to focus on a concentration area that matches their professional background and aspirations.

In this degree program, students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their home college. The concentrations are associated with the following colleges:

- Khoury College of Computer Sciences
 - Artificial Intelligence
 - Human Computer Interaction
- D'Amore-McKim School of Business

- Entrepreneurship
- Marketing
- Bouvé College of Health Sciences
 - Human Movement Science
- College of Social Sciences and Humanities
 - Information Ethics
 - Public History
- College of Engineering
 - Wireless Networking
- College of Arts, Media and Design
 - XR and Design
 - XR and Games
 - XR and Media

The Master of Science in Extended Realities welcomes students from a diverse range of backgrounds because of the applications of XR technology used in many disciplines and industries including medicine, business, entertainment, architecture, and journalism.

Some concentrations may require a technical background and are noted in the requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Extended Reality Core

Code	Title	Hours
Required Courses		
EXRE 5010 and EXRE 5011	Immersive Media: Extended Realities (XR) History, Theory, and Impact and Seminar for EXRE 5010	5
EXRE 5020	Developing Extended Realities (XR)	4
EXRE 5030	Designing Extended Realities (XR)	4
EXRE 7500 or EXRE 7990	Extended Realities (XR) Project Thesis	4
GSND 5122	Business Models in the Game Industry	1

Extended Reality Concentration Options

Complete one of the following options:

- Artificial Intelligence (p. 176)—Khoury College of Computer Sciences
- Entrepreneurship (p. 176)—D'Amore-McKim School of Business
- Human Computer Interaction (p. 176)—Khoury College of Computer Sciences
- Human Movement Science (p. 176)—Bouvé College of Health Sciences
- Information Ethics (p. 177)—College of Social Sciences and Humanities
- Marketing (p. 177)—D'Amore-McKim School of Business
- Public History (p. 177)—College of Social Sciences and Humanities
- Wireless Networking (p. 178)—College of Engineering
- XR and Design (p. 178)—College of Arts, Media and Design
- XR and Games (p. 178)—College of Arts, Media and Design
- XR and Media (p. 178)—College of Arts, Media and Design

Program Credit/GPA Requirements

34 total semester hours required. Some concentrations may require more than 34 semester hours to complete.

Minimum 3.000 GPA required

CONCENTRATION IN ARTIFICIAL INTELLIGENCE—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Requires a background in computer science.		
CS 5097	Mixed Reality	4
CS 5100	Foundations of Artificial Intelligence	4

CS 6120	Natural Language Processing	4
CS 6140	Machine Learning	4
or DS 5220	Supervised Machine Learning and Learning Theory	

CONCENTRATION IN ENTREPRENEURSHIP—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
INNO 6200	Enterprise Growth and Innovation	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
ENTR 6210	Managing Operations in Early Stage Ventures	
ENTR 6212	Business Planning for New Ventures	
ENTR 6214	Social Enterprise	
ENTR 6218	Business Model Design and Innovation	
ENTR 6240	Emerging and Disruptive Technologies	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6250	Lean Design and Development	
ENTR 6300	Managing a Technology-Based Business	
GE 5030	Iterative Product Prototyping for Engineers	
INNO 6230	Platform Innovation	
MKTG 6214	New Product Development	

CONCENTRATION IN HUMAN COMPUTER INTERACTION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Required Courses		
CS 5340	Computer/Human Interaction	4
Electives		
Complete 12 semester hours from the following:		12
ARTG 5710	Design for Dignity	
CS 5097	Mixed Reality	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 6350	Empirical Research Methods	
CS 7390	Special Topics in Human-Centered Computing	
GSND 6340	Biometrics of Design	

CONCENTRATION IN HUMAN MOVEMENT SCIENCE—BOUVÉ COLLEGE OF HEALTH SCIENCES

Code	Title	Hours
Required Courses		
GSND 6340	Biometrics of Design	4
PT 7001	Core Concepts in Rehabilitation Science and Research	3
PT 7005	Experimental Design and Applied Statistics	4
Electives		
Complete 7–8 semester hours from the following:		7-8
PT 5133	Kinesiology	
PT 5150	Motor Control, Development, and Learning	
PT 5321	Applications of Biomechanics in Human Function and Movement	
PT 5410	Functional Human Neuroanatomy	
PT 7010	Measurement and Analysis of Human Movement and Bioinstrumentation	
PT 7020	Technologies in Movement and Rehabilitation Science	

CONCENTRATION IN INFORMATION ETHICS—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	

PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	
Electives		
Complete 8 semester hours from the following:		8
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
PHIL 5001	Global Justice	
PHIL 5002	Ethics and Public Policy	
PHIL 5005	Information Ethics	
PHIL 5010	AI Ethics	

CONCENTRATION IN MARKETING—D'AMORE-MCKIM SCHOOL OF BUSINESS

Code	Title	Hours
Required Courses		
MKTG 6200	Creating and Sustaining Customer Markets	3
MKTG 6285	Creating Customer Value through Artificial Intelligence	3
Electives		
Complete 12 semester hours from the following:		12
MKTG 6210	Marketing Research	
MKTG 6212	International Marketing	
MKTG 6214	New Product Development	
MKTG 6216	Market Focused Strategy	
MKTG 6218	Managing Customer Engagement in a Service World	
MKTG 6222	Digital Marketing	
MKTG 6223	Brand and Advertising Management	
MKTG 6226	Consumer Behavior	
MKTG 6230	Driving Marketing Performance: Measure, Analyze, Profit	
MKTG 6234	Marketing Analytics	

CONCENTRATION IN PUBLIC HISTORY—COLLEGE OF SOCIAL SCIENCES AND HUMANITIES

Code	Title	Hours
Required Courses		
HIST 5237	Issues and Methods in Public History	4
Complete the following (repeatable) course twice:		4
HIST 8410	Fieldwork in History 1 (to be taken twice)	
Electives		
Complete 8 semester hours from the following:		8
HIST 5241	Exhibits and Museums	
HIST 7250	Topics in Public History (Public History and Slavery)	
HIST 7250	Topics in Public History (Sites of Violence and Public Memory)	

CONCENTRATION IN WIRELESS NETWORKING—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
EECE 5512	Networked XR Systems	
EECE 7374	Fundamentals of Computer Networks	
Electives		
Complete 8 semester hours from the following:		8
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	

CONCENTRATION IN XR AND DESIGN—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	4

ARTG 5640	Prototyping for Experience Design	4
EXRE 6500	Extended Realities (XR) Studio	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5310	Visual Cognition	
ARTG 5330	Visualization Technologies 1: Fundamentals	
ARTG 5600	Experience Design Studio 1: Principles	
ARTG 5610	Design Systems	
ARTG 5620	Notational Systems for Experience	
ARTG 6110	Information Design Theory and Critical Thinking	
ARTG 6310	Design for Behavior and Experience	
ARTG 6330	Information Design Mapping Strategies	

CONCENTRATION IN XR AND GAMES—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
GSND 5110 and GSND 5111	Game Design and Analysis and Seminar for GSND 5110	5
Electives		
Complete 8 semester hours from the following:		8
GSND 6000	Advanced Topics in Game Design	
GSND 6001	Advanced Topics in Game Science	
GSND 6240	Exploratory Concept Design	
GSND 6250	Spatial and Temporal Design	
GSND 6330	Player Experience	
GSND 6340	Biometrics of Design	
GSND 6350	Data-Driven Game Design	
GSND 6460	Generative Game Design	

CONCENTRATION IN XR AND MEDIA—COLLEGE OF ARTS, MEDIA AND DESIGN

Code	Title	Hours
Required Courses		
EXRE 6500	Extended Realities (XR) Studio	4
JRNL 5400	Media and Advocacy in Theory and Practice	4
JRNL 6340	Fundamentals of Digital Journalism	4
Elective		
Complete 4 semester hours from the following:		4
ARTG 5150 and ARTG 5151	Information Visualization Principles and Practices and Information Design Critique Seminar	
JRNL 5311	Design for Storytelling	
JRNL 6305	Topics	
JRNL 6341	Telling Your Story with Data	

Plan of Study**Sample Plan of Study**

The following is a sample plan of study for a student in the Concentration in XR and Games.

Year 1			
Fall	Hours	Spring	Hours
EXRE 5010 and EXRE 5011		5 EXRE 5030	4
EXRE 5020		4 GSND 5110 and GSND 5111	5

Year 2

Fall	Hours	Spring	Hours
EXRE 6500		4 EXRE 7500	4
GSND 5122		1 XR and games elective 2	4
XR and games elective 1		4	
		9	8

Total Hours: 35**Internet of Things, MS (Boston)**

The Master of Science in Internet of Things is an interdisciplinary program administered by the Institute for the Wireless Internet of Things, the Department of Electrical and Computer Engineering, and the Khoury College of Computer Sciences. This program is aimed at preparing highly qualified researchers and a specialized workforce that will lead the development of a globally interconnected continuum of untethered devices and objects interacting with the physical environment, people, and each other. The program will provide students with the necessary knowledge and skills to understand, design, and implement autonomous wireless networked systems of tomorrow operating in uncertain, challenging, extreme environments through a combination of coursework, master project research, and/or industry experience.

Program Requirements**Fundamental Requirements**

Code	Title	Hours
EECE 5155	Wireless Sensor Networks and the Internet of Things	4
Complete one of the following:		4
EECE 5576	Wireless Communication Systems	
EECE 7364	Mobile and Wireless Networking	
Complete one of the following:		4
CS 5800	Algorithms	
CS 7800	Advanced Algorithms	
EECE 7205	Fundamentals of Computer Engineering	
Complete one of the following:		4
CS 6140	Machine Learning	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Deep Learning and Edge Computing in Wireless Networks)	
Complete one of the following:		4
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7390	Computer Hardware Security	
EECE 7368	High-Level Design of Hardware-Software Systems	
Complete one of the following for a total of 4 semester hours:		4
EECE 5698	Special Topics in Electrical and Computer Engineering (Spectrum Policy Issues for Wireless Communications Innovators)	
INNO 6230 and EECE 6400	Platform Innovation and Special Problems in Electrical and Computer Engineering	
HRMG 6280 and EECE 6400	The Human Side of Innovation and Special Problems in Electrical and Computer Engineering	
Complete one of the following:		4
CY 5120	Applied Cryptography	
CY 5130	Computer System Security	
CY 5150	Network Security Practices	
CY 5240	Cyberlaw: Privacy, Ethics, and Digital Rights	
CY 6740	Network Security	
CY 6760	Wireless and Mobile Systems Security	
EECE 5641	Introduction to Software Security	
EECE 5699	Computer Hardware and System Security	

Options**COURSEWORK OPTION**

Code	Title	Hours
Complete 4 semester hours from the electives course list below. (p. 373)		4

MASTER'S PROJECT OPTION

Code	Title	Hours
EECE 7945	Master's Project	4

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)
 Minimum 3.000 GPA required

Electives Course List

Any course in the following list will fulfill the coursework option, provided the student satisfies prerequisites and program requirements. Students can take courses outside this list with prior approval from the program director.

Code	Title	Hours
Courses in College of Engineering		
<i>Bioengineering</i>		
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
<i>Civil and Environmental Engineering</i>		
CIVE 5280	Remote Sensing of the Environment	
CIVE 7150	Data-Driven Decision Support for Civil and Environmental Engineering	
CIVE 7151	Urban Informatics and Processing	
CIVE 7380	Performance Models and Simulation of Transportation Networks	
<i>Electrical and Computer Engineering</i>		
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5360	Combinatorial Optimization	
EECE 5550	Mobile Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5576	Wireless Communication Systems	
EECE 5606	Micro- and Nanofabrication

EECE 5639	Computer Vision	
EECE 5640	High-Performance Computing	
EECE 5641	Introduction to Software Security	
EECE 5642	Data Visualization	
EECE 5643	Simulation and Performance Evaluation	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5645	Parallel Processing for Data Analytics	
EECE 5649	Design of Analog Integrated Circuits with Complementary Metal-Oxide-Semiconductor Technology	
EECE 5652	Microwave Circuits and Systems	
EECE 5666	Digital Signal Processing	
EECE 5693	Electromagnetic Devices for RF and Wireless Communications	

EECE 5697	Acoustics and Sensing
EECE 5698	Special Topics in Electrical and Computer Engineering (Advanced Network Management)
EECE 5698	Special Topics in Electrical and Computer Engineering (GNSS Signal Processing)
EECE 5698	Special Topics in Electrical and Computer Engineering (Network Programming)
EECE 5698	Special Topics in Electrical and Computer Engineering (Networked XR Systems)
EECE 5698	Special Topics in Electrical and Computer Engineering (Spectrum Policy Issues for Wireless Communications Innovators)
EECE 5698	Special Topics in Electrical and Computer Engineering (Terahertz Communication for 6G)
EECE 5699	Computer Hardware and System Security
EECE 7150	Autonomous Field Robotics
EECE 7200	Linear Systems Analysis
EECE 7201	Solid State Devices
EECE 7202	Electromagnetic Theory 1
EECE 7204	Applied Probability and Stochastic Processes
EECE 7205	Fundamentals of Computer Engineering
EECE 7240	Analog Integrated Circuit Design
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)
EECE 7245	Microwave Circuit Design for Wireless Communication
EECE 7247	Radio Frequency Integrated Circuit Design
EECE 7275	Antennas and Radiation
EECE 7310	Modern Signal Processing
EECE 7323	Numerical Optimization Methods
EECE 7336	Digital Communications
EECE 7337	Information Theory
EECE 7345	Big Data and Sparsity in Control, Machine Learning, and Optimization
EECE 7346	Probabilistic System Modeling and Analysis
EECE 7352	Computer Architecture
EECE 7364	Mobile and Wireless Networking
EECE 7368	High-Level Design of Hardware-Software Systems
EECE 7370	Advanced Computer Vision
EECE 7374	Fundamentals of Computer Networks
EECE 7390	Computer Hardware Security
EECE 7397	Advanced Machine Learning
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances in Communication Electronics)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances on Deep Learning)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances in Wireless Communications)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (An Experimental Approach to Wireless Communications)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Deep Learning and Edge Computing in Wireless Networks)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Security in Large-Scaled Learning Enabled Systems)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Wireless Network Systems and Applications)

Robotics, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics offers instruction by the faculty of the College of Engineering, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences. The program is designed to provide students with comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Biomedical and Rehabilitation Robotics—College of Engineering
- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Gordon Institute of Engineering Leadership**Master's Degree in Robotics with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate coursework may be applied to this program's elective requirements in the coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
Electrical and Computer Engineering		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Computer Science		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Concentrations

Complete one of the following options:

- Biomedical and Rehabilitation Robotics (p. 181)—College of Engineering
- Computer Science (p. 182)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 182)—College of Engineering
- Mechanical Engineering (p. 183)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

BIOMEDICAL AND REHABILITATION ROBOTICS CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
Complete one of the following:		4
BIOE 5520	Bioengineering Design for Robotic Rehabilitation	
PT 5170 and PT 5171	Motor Control and Lab for PT 5170	
PT 5321	Applications of Biomechanics in Human Function and Movement	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
BIOE 7990	Thesis	
or PT 7990	Thesis	
Complete 8 semester hours of courses from the elective course list. (p. 183)		
Optional Co-op		
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.		
Required Course		
Complete one additional CS course not used to fulfill the core requirements:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	
Options		
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
CS 8674	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
CS 7990	Thesis	
CS 8674	Master's Project	
Complete 8 semester hours of courses from the elective course list. (p. 183)		

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

ELECTRICAL AND COMPUTER ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional EECE course not used to fulfill the core requirements:		4

EECE 5550	Mobile Robotics
EECE 5552	Assistive Robotics
EECE 5554	Robotics Sensing and Navigation

Options

Complete one of the following options:	16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

EECE 7945	Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

EECE 7945	Master's Project

EECE 7990	Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

MECHANICAL ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements:		4

ME 5250	Robot Mechanics and Control
ME 5659	Control Systems Engineering

Options

Complete one of the following options:	16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

ME 7945	Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

ME 7945	Master's Project

ME 7990	Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6350	Empirical Research Methods	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5580	Classical Control Systems	
EECE 5639	Computer Vision	
EECE 5642	Data Visualization	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7150	Autonomous Field Robotics	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	
EECE 7370	Advanced Computer Vision	
EECE 7397	Advanced Machine Learning	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)	
IE 6500	Human Performance	
IE 7280	Statistical Methods in Engineering	
IE 7315	Human Factors Engineering	
IE 7615	Neural Networks and Deep Learning	
ME 5240	Computer Aided Design and Manufacturing	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	
ME 5654	Elasticity and Plasticity	
ME 5655	Dynamics and Mechanical Vibration	
ME 5659	Control Systems Engineering	
ME 5665	Musculoskeletal Biomechanics	
ME 6200	Mathematical Methods for Mechanical Engineers 1	
ME 6250	Wearable Robotics	
ME 6260	Introduction to Microelectromechanical Systems (MEMS)	
ME 7247	Advanced Control Engineering	

PT 5170	Motor Control
PT 5321	Applications of Biomechanics in Human Function and Movement
PT 7001	Core Concepts in Rehabilitation Science and Research
PT 7005	Experimental Design and Applied Statistics
PT 7020	Technologies in Movement and Rehabilitation Science

Robotics, MS (Seattle)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics is offered by the College of Engineering and the Khoury College of Computer Sciences. The program is designed to provide students comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
Electrical and Computer Engineering		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Computer Science		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Concentrations

Complete one of the following concentrations:

- Computer Science (p. 185)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 185)—College of Engineering
- Mechanical Engineering (p. 186)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

CONCENTRATION IN COMPUTER SCIENCE

Code	Title	Hours
Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.		
Required Course		
Complete one additional CS course not used to fulfill the core requirements:		4

CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p.)		
<i>Project Option</i>		
CS 8674	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p.)		
<i>Thesis Option</i>		
CS 8674	Master's Project	
CS 7990	Thesis	
Complete 8 semester hours of courses from the elective course list. (p.)		

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

CONCENTRATION IN ELECTRICAL AND COMPUTER ENGINEERING

Code	Title	Hours

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional EECE course not used to fulfill the core requirements: 4

EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p.)

Project Option

EECE 7945 Master's Project

Complete 12 semester hours of courses from the elective course list. (p.)

Thesis Option

EECE 7945 Master's Project

EECE 7990 Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p.)

Optional Co-op

Complete the following (students in EECE and MIE concentrations must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

CONCENTRATION IN MECHANICAL ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements: 4

ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p.)

Project Option

ME 7945	Master's Project
Complete 12 semester hours of courses from the elective course list. (p.)	
<i>Thesis Option</i>	
ME 7945	Master's Project
ME 7990	Thesis
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.	
Complete 8 semester hours of courses from the elective course list. (p.)	

Optional Co-op

Complete the following (students in EECE and MIE concentrations must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6350	Empirical Research Methods	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
DS 5220	Supervised Machine Learning and Learning Theory

EECE 5639	Computer Vision	
EECE 5642	Data Visualization	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7150	Autonomous Field Robotics	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	
EECE 7370	Advanced Computer Vision	
EECE 7397	Advanced Machine Learning	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)	
IE 6500	Human Performance	
IE 7280	Statistical Methods in Engineering	
IE 7315	Human Factors Engineering	
IE 7615	Neural Networks and Deep Learning	
ME 5240	Computer Aided Design and Manufacturing	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	
ME 5654	Elasticity and Plasticity	

ME 5655	Dynamics and Mechanical Vibration
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 6200	Mathematical Methods for Mechanical Engineers 1
ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering

Semiconductor Engineering, MS (Boston)

The Master of Science in Semiconductor Engineering, offered by the Institute for NanoSystems Innovation—along with the Department of Electrical and Computer Engineering, the Department of Mechanical and Industrial Engineering, and the Department of Chemical Engineering in the College of Engineering—and the D'Amore-McKim School of Business, is designed to meet the burgeoning demand for skilled professionals in the semiconductor industry. This cutting-edge program aims to equip students with the knowledge and skills necessary to excel in this rapidly evolving field.

The national landscape is witnessing a significant uptick in interest in expanding the talent pool within the semiconductor sector, particularly following the enactment of the U.S. CHIPS and Science Act of 2022. This pivotal legislation has catalyzed a marked increase in the demand for engineers, drawing considerable attention from a wide array of companies to the semiconductor industry. There is a need for skilled workers to build new plants to increase and localize manufacturing capacity, design chips, and the tools that make the chips. This program is strategically positioned to address this growing need, offering a comprehensive educational experience that prepares our graduates to lead and innovate in this critical domain.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
NanoSystems		
Complete one of the following:		4
EECE 7201	Solid State Devices	
EECE 7240 and EECE 7248	Analog Integrated Circuit Design and Lab for EECE 7240	
EECE 7244 or ME 6260	Introduction to Microelectromechanical Systems (MEMS) Introduction to Microelectromechanical Systems (MEMS)	
Manufacturing		
Complete one of the following:		4
EECE 5606	Micro- and Nanofabrication	
MATL 7365	Properties and Processing of Electronic Materials	
ME 5630	Nano- and Microscale Manufacturing	
Innovation		
Complete four semester hours from the following. Students may not meet this requirement solely with directed study coursework:		4
BUSN 6379	Entrepreneurial Ecosystems	
BUSN 6389	Leading Global Virtual Innovation Teams	
CHME 5976	Directed Study	
GE 5010	Customer-Driven Technical Innovation for Engineers	
GE 5100	Product Development for Engineers	
INNO 6200	Enterprise Growth and Innovation	
ME 5976	Directed Study	

Concentrations

Complete one of the following concentrations:

- Devices and NanoSystems (p. 581)
- Materials and Manufacturing (p. 581)

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1

ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

CONCENTRATION IN DEVICES AND NANOSYSTEMS

Code	Title	Hours
Complete two of the following not used to complete other requirements of this program:		8
EECE 5606	Micro- and Nanofabrication	
EECE 5651	Introduction to Photonic Devices	
EECE 7201	Solid State Devices	
EECE 7240 and EECE 7248	Analog Integrated Circuit Design and Lab for EECE 7240	
EECE 7244 or ME 6260	Introduction to Microelectromechanical Systems (MEMS) Introduction to Microelectromechanical Systems (MEMS)	
EECE 7250	Power Management Integrated Circuits	
EECE 7353	VLSI Design	
Complete one of the following options for 12 semester hours:		12
<i>Coursework Option</i>		
Complete 12 semester hours from the restricted electives course list. (p. 582)		
<i>Project Option</i>		
EECE 7945	Master's Project	
Complete 8 semester hours from the restricted electives course list. (p. 582)		
<i>Thesis Option</i>		
EECE 7945	Master's Project	
EECE 7990	Thesis	
Complete 4 semester hours from the restricted electives course list. (p. 582)		

CONCENTRATION IN MATERIALS AND MANUFACTURING

Code	Title	Hours
Complete two of the following not used to complete other requirements of this program:		8
CHME 5105	Materials Characterization Techniques	
IE 6200	Engineering Probability and Statistics	
IE 7270	Intelligent Manufacturing	
MATL 7365	Properties and Processing of Electronic Materials	
ME 5245	Mechatronic Systems	
ME 5620	Fundamentals of Advanced Materials	
ME 5630	Nano- and Microscale Manufacturing	
Complete one of the following options for 12 semester hours:		12
<i>Coursework Option</i>		
Complete 12 semester hours from the restricted electives course list. (p. 582)		
<i>Project Option</i>		
ME 7945 or CHME 7945 or IE 7945	Master's Project Master's Project Master's Project	
Complete 8 semester hours from the restricted electives course list. (p. 582)		
<i>Thesis Option</i>		
ME 7945 or CHME 7945 or IE 7945	Master's Project Master's Project Master's Project	

ME 7990	Thesis
or CHME 7990	Thesis
or IE 7990	Thesis

Complete 4 semester hours from the restricted electives course list. (p. 582)

Restricted Electives Course List

Any course in the following elective lists will fulfill the restricted elective requirement, provided the course has not already been applied to fulfill core requirements of this program and provided the student satisfies prerequisites. Students can take electives outside of these lists with prior approval from the faculty advisor.

Code	Title	Hours
Elective Courses in Engineering and Science		
CHME 5105	Materials Characterization Techniques	
CHME 5510	Fundamentals in Process Safety Engineering	
CHME 5621	Electrochemical Engineering	
CHME 5642 and CHME 5643	Photochemistry Fundamentals and Applications and Photochemistry Lab	
CHME 5683	Introduction to Polymer Science	
CHME 5699	Special Topics in Chemical Engineering (BioMEM Systems)	
CHME 5699	Special Topics in Chemical Engineering (Carbon Capture Storage and Utilization)	
CHME 7340	Chemical Engineering Kinetics	
EECE 5606	Micro- and Nanofabrication	
EECE 5608	Magnetic Materials for Next-Generation Electronics	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5647	Nanophotonics	
EECE 5649	Design of Analog Integrated Circuits with Complementary Metal-Oxide-Semiconductor Technology	
EECE 5651	Introduction to Photonic Devices	
EECE 5652	Microwave Circuits and Systems	
EECE 5698	Special Topics in Electrical and Computer Engineering (Biomedical Microsystems)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Introduction to Quantum Engineering)	
EECE 7201	Solid State Devices	
EECE 7240 and EECE 7248	Analog Integrated Circuit Design and Lab for EECE 7240	
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
or ME 6260	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7245	Microwave Circuit Design for Wireless Communication	
EECE 7247	Radio Frequency Integrated Circuit Design	
EECE 7250	Power Management Integrated Circuits	
EECE 7296	Electronic Materials	
EECE 7353	VLSI Design	
EECE 7368	High-Level Design of Hardware-Software Systems	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advanced Radio Frequency Passive Tech)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Low Power Integrated Circuits Design)	
IE 5617	Lean Concepts and Applications	
IE 5137	Computational Modeling in Industrial Engineering	
IE 6200	Engineering Probability and Statistics	
IE 6300	Manufacturing Systems Design	
IE 6700	Data Management for Analytics	
IE 7200	Supply Chain Engineering	
IE 7270	Intelligent Manufacturing	
IE 7280	Statistical Methods in Engineering	

IE 7285	Statistical Quality Control
IE 7290	Reliability Analysis and Risk Assessment
MATL 6250	Soft Matter
MATL 6290	Fundamentals of Nanostructured Materials
MATL 7365	Properties and Processing of Electronic Materials
ME 5240	Computer Aided Design and Manufacturing
ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5520	Fundamentals and Applications of Optics and Photonics
ME 5600	Materials Processing and Process Selection
ME 5620	Fundamentals of Advanced Materials
ME 5630	Nano- and Microscale Manufacturing
ME 5640	Additive Manufacturing
PHYS 5114	Physics and Applications of Quantum Materials
PHYS 5125	Advanced Quantum Mechanics
PHYS 5260	Introduction to Nanoscience and Nanotechnology
PHYS 5318	Principles of Experimental Physics
PHYS 5352	Quantum Computation and Information

Elective Courses in Innovation

A maximum of 4 semester hours may be taken from the following:

FINA 6309	Foundations of Accounting and Finance
GE 5010	Customer-Driven Technical Innovation for Engineers
GE 5020	Engineering Product Design Methodology
GE 5030	Iterative Product Prototyping for Engineers
GE 5100	Product Development for Engineers
HRMG 6200	Managing People and Organizations
HRMG 6230	Leading a Diverse and Inclusive Organization
HRMG 6280	The Human Side of Innovation
INNO 6200	Enterprise Growth and Innovation
MGMT 6213	Managing Ethics in the Workplace and Marketplace
MGMT 6225	Sustainability and Leadership
MGMT 6226	Sustainability and the Business Environment
MKTG 6200	Creating and Sustaining Customer Markets

FINA, HRMG, INNO, MGMT, and MKTG courses listed above are 3 semester hours, so students may take one additional 1 semester hour of courses from the list below for a total of 4 semester hours:

BUSN 6379	Entrepreneurial Ecosystems
BUSN 6389	Leading Global Virtual Innovation Teams
CHME 5976	Directed Study
ME 5976	Directed Study

Wireless and Network Engineering, MS (Boston)

Overview

The Master of Science in Wireless and Network Engineering is administered by the Institute for the Wireless Internet of Things and the Department of Electrical and Computer Engineering. This program is aimed at preparing highly qualified researchers and a specialized workforce that will lead the future of our hyperconnected society. The program will provide students with the necessary knowledge and skills to understand, design, and implement present and future wireless and wired communication networks through a combination of coursework, master's thesis research, and/or industry experience.

Program Requirements

Fundamental Requirements

Code	Title	Hours
Complete two of the following:		8
EECE 5576	Wireless Communication Systems	

EECE 7364	Mobile and Wireless Networking
EECE 7374	Fundamentals of Computer Networks

Options

COURSEWORK OPTION

Code	Title	Hours
Complete 24 semester hours from the concentration course list below. (p. 584)		24

THESIS OPTION

Code	Title	Hours
EECE 7945	Master's Project	4
EECE 7990	Thesis	4

Complete 16 semester hours from the concentration course list below. (p. 584) 16

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites and program requirements. Students can take electives outside this list with prior approval from the program director.

Code	Title	Hours
Electrical and Computer Engineering		
EECE 5155	Wireless Sensor Networks and the Internet of Things	
EECE 5360	Combinatorial Optimization	
EECE 5610	Digital Control Systems	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5640	High-Performance Computing	
EECE 5641	Introduction to Software Security	
EECE 5643	Simulation and Performance Evaluation	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5645	Parallel Processing for Data Analytics	
EECE 5666	Digital Signal Processing	
EECE 5693	Electromagnetic Devices for RF and Wireless Communications	
EECE 5697	Acoustics and Sensing	
EECE 5698	Special Topics in Electrical and Computer Engineering (Advanced Network Management)	
EECE 5698	Special Topics in Electrical and Computer Engineering (GNSS Signal Processing)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Network Programming)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Spectrum Policy Issues for Wireless Communications Innovators)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Terahertz Communications for 6G)	

EECE 5699	Computer Hardware and System Security
EECE 6400	Special Problems in Electrical and Computer Engineering
EECE 7200	Linear Systems Analysis
EECE 7202	Electromagnetic Theory 1
EECE 7204	Applied Probability and Stochastic Processes
EECE 7205	Fundamentals of Computer Engineering
EECE 7245	Microwave Circuit Design for Wireless Communication
EECE 7247	Radio Frequency Integrated Circuit Design
EECE 7275	Antennas and Radiation
EECE 7336	Digital Communications
EECE 7337	Information Theory
EECE 7345	Big Data and Sparsity in Control, Machine Learning, and Optimization
EECE 7352	Computer Architecture
EECE 7393	Analysis and Design of Data Networks
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances in Communication Electronics)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances in Wireless Communications)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (An Experimental Approach to Wireless Communications)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Deep Learning and Edge Computing in Wireless Networks)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Security in Large-Scaled Learning Enabled Systems)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Wireless Networks Systems and Applications)
EECE 7400	Advanced Special Problems in Electrical and Computer Engineering
Computer Science	
CS 5520	Mobile Application Development
CS 5610	Web Development
CS 6620	Fundamentals of Cloud Computing
CS 6650	Building Scalable Distributed Systems
CS 7610	Foundations of Distributed Systems
Cybersecurity	
CY 5001	Cybersecurity: Technologies, Threats, and Defenses
CY 5010	Cybersecurity Principles and Practices
CY 6740	Network Security

Electrical and Computer Engineering with Concentration in Communications, Control, and Signal Processing, MSECE (Boston)

For program contact information, please visit this website (<https://ece.northeastern.edu/academics/graduate-studies/ms-elee/>).

The master's degree program in electrical and computer engineering offers in-depth coursework within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

Excluded Courses for All MSECE Concentrations

Students cannot take excluded courses as part of the MSECE program and may not petition to take these courses, as any petition to take these courses will be automatically rejected. Courses from the following subject areas may not count toward any concentration within the MSECE program: CSYE, DAMG, INFO, TELE. Select CS courses are also excluded from all MSECE concentrations. Please see the program requirements tab and your college administrator for more information.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP**Master's Degree in Electrical and Computer Engineering with a Concentration in Communications, Control, and Signal Processing with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Electrical and Computer Engineering with a Concentration in Communications, Control, and Signal Processing in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved communications, control, and signal processing technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 SH of the certificate project may be applied to this program's thesis requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5576	Wireless Communication Systems	
EECE 5666	Digital Signal Processing	
EECE 7200	Linear Systems Analysis	
EECE 7204	Applied Probability and Stochastic Processes	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Concentration Courses		
Complete 16 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		16
Electives		
Complete 8 semester hours from either concentration courses or from other concentrations.		8

THESIS OPTION

Code	Title	Hours
Thesis		
EECE 7945	Master's Project	4
EECE 7990	Thesis	4
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing Committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS Thesis to ProQuest.		
Concentration Courses		
Complete 8 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		8
Electives		
Complete 8 semester hours from either concentration courses or from other concentrations.		8

In the coursework option a maximum of two courses may be taken outside of electrical and computer engineering. Thesis track students can take up to three courses outside of electrical and computer engineering.

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

CONCENTRATION COURSES

Code	Title	Hours
EECE 5115	Dynamical Systems in Biological Engineering	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5576	Wireless Communication Systems	
EECE 5580	Classical Control Systems	
EECE 5582	Making Systems Reliable—An Introduction to Coding Theory	
EECE 5610	Digital Control Systems	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5626	Image Processing and Pattern Recognition	
EECE 5665	Signal Processing for Global Navigation Satellite Systems	
EECE 5666	Digital Signal Processing	
EECE 5698	Special Topics in Electrical and Computer Engineering (Feedback Control Systems: Applications to Unmanned Aerial Vehicles)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Formal Methods for Dynamical Systems)	
EECE 5698	Special Topics in Electrical and Computer Engineering (GNSS Signal Processing)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Introduction to Molecular Systems Biology Dynamic Modeling)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Spectrum Policy Issues for Wireless Communications Innovators)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Terahertz Communications for 6G)	
EECE 6400	Special Problems in Electrical and Computer Engineering (*For MSECE and PhD-BS students only)	
EECE 7200	Linear Systems Analysis	
EECE 7204	Applied Probability and Stochastic Processes	
EECE 7211	Nonlinear Control	
EECE 7213	System Identification and Adaptive Control	
EECE 7214	Optimal and Robust Control	
EECE 7215	Introduction to Distributed Intelligence	
EECE 7223	Riemannian Optimization	
EECE 7310	Modern Signal Processing	
EECE 7311	Two Dimensional Signal and Image Processing	
EECE 7315	Digital Image Processing	
EECE 7323	Numerical Optimization Methods	
EECE 7336	Digital Communications	
EECE 7337	Information Theory	
EECE 7345	Big Data and Sparsity in Control, Machine Learning, and Optimization	
EECE 7346	Probabilistic System Modeling and Analysis	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances in Communication Electronics)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances in Wireless Communications)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (An Experimental Approach to Wireless Communications)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Current Research in Nonlinear Systems)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Distributed Intelligence)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Systems Modeling and Analysis)	

EECE 7400	Advanced Special Problems in Electrical and Computer Engineering (*For PhD-AE students only)
ME 7247	Advanced Control Engineering

EXCLUDED COURSES FOR ALL MSECE CONCENTRATIONS

Please see your college administrator for more information.

Code	Title	Hours

Courses from the following subject areas may not count toward any concentration within the MSECE program:

CSYE, DAMG, INFO, TELE

The following CS courses may not count toward any concentration within the MSECE program:

CS 5010	Programming Design Paradigm
CS 5330	Pattern Recognition and Computer Vision
CS 5340	Computer/Human Interaction
CS 5520	Mobile Application Development
CS 5610	Web Development
CS 5700	Fundamentals of Computer Networking
CS 5800	Algorithms
CS 6140	Machine Learning
CS 6350	Empirical Research Methods

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved computer vision, machine learning, and algorithms technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate project may be applied to this program's thesis requirements.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Electrical and Computer Engineering with Graduate Certificate in Engineering Business

Students may complete a Graduate Certificate in Engineering Business in addition to a Master of Science in Electrical and Computer Engineering with a concentration in Computer Vision, Machine Learning, and Algorithms. Students must apply and be admitted to the [Galante Engineering Business Program \(https://galante.sites.northeastern.edu/\)](https://galante.sites.northeastern.edu/) to pursue this option. The program requires the applicant to have earned, or be in a program to earn, a Bachelor of Science in Engineering from Northeastern University or another accredited university/college within the United States. Students must fulfill all academic requirements for the MSECE program in their concentration and may use some of their credits toward both the MS degree and the certificate. The certificate coursework, along with participation in cocurricular professional development elements, earns the Graduate Certificate in [Engineering Business \(p. 685\)](#). Students may **double count** up to 16 credits of their MSECE courses toward the Galante Graduate Certificate in Engineering Business. Additionally, students are allowed to take up to 8 credit hours from the [Galante Catalog \(p. 686\)](#) as part of their coursework.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5554	Robotics Sensing and Navigation

EECE 7945	Master's Project	4
EECE 7990	Thesis	4
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing Committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS Thesis to ProQuest.		
Concentration Courses		
Complete a minimum of 8 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		8
Electives		
Students may complete a maximum of 8 semester hours from either the concentration course list or a maximum of 8 semester hours from the elective course list.		8

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	

or ENCP 6955

Co-op Work Experience Abroad - Half-Time

or ENCP 6965

Co-op Work Experience Abroad

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Course Lists

A maximum of three courses may be taken outside of electrical and computer engineering.

CONCENTRATION COURSES

Electrical and Computer Engineering with Concentration in Electromagnetics, Plasma, and Optics, MSECE (Boston)

For program contact information, please visit this website (<https://ece.northeastern.edu/academics/graduate-studies/ms-elee/>).

The master's degree program in electrical and computer engineering offers in-depth coursework within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

Excluded Courses for All MSECE Concentrations

Students cannot take excluded courses as part of the MSECE program and may not petition to take these courses, as any petition to take these courses will be automatically rejected. Courses from the following subject areas may not count toward any concentration within the MSECE program: CSYE, DAMG, INFO, TELE. Select CS courses are also excluded from all MSECE concentrations. Please see the program requirements tab and your college administrator for more information.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Electrical and Computer Engineering with Concentration in Electromagnetics, Plasma, and Optics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Electromagnetics, Plasma, and Optics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved electromagnetics, plasma, and optics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate project may be applied to this program's thesis requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5170	Introduction to Multiferroics Materials and Systems	
EECE 5693	Electromagnetic Devices for RF and Wireless Communications	
EECE 7202	Electromagnetic Theory 1	
EECE 7203	Complex Variable Theory and Differential Equations	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
A maximum of two courses may be taken outside of electrical and computer engineering.		
Concentration Courses		
Complete 16 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		16
Electives		
Complete 8 semester hours from either concentration courses or from other concentrations.		8

THESIS OPTION

Code	Title	Hours
A maximum of three courses may be taken outside of electrical and computer engineering.		
Thesis		
EECE 7945	Master's Project	4
EECE 7990	Thesis	4
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.		
Concentration Courses		
Complete 8 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		8
Electives		
Complete 8 semester hours from either concentration courses or from other concentrations.		8

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	
ENCP 6964	Co-op Work Experience	

600 Electrical and Computer Engineering with Concentration in Electromagnetics, Plasma, and Optics, MSECE (Boston)

or ENCP 6954 Co-op Work Experience - Half-Time
or ENCP 6955 Co-op Work Experience Abroad - Half-Time
or ENCP 6965 Co-op Work Experience Abroad

Course Lists

CONCENTRATION COURSES

Code	Title	Hours
EECE 5170	Introduction to Multiferroics Materials and Systems	
EECE 5608	Magnetic Materials for Next-Generation Electronics	
EECE 5651	Introduction to Photonic Devices	
EECE 5652	Microwave Circuits and Systems	
EECE 5654	Design and Prototyping of Optical Systems for Engineering Applications	
EECE 5692	Antennas for Wireless Communication and Sensing	
EECE 5693	Electromagnetic Devices for RF and Wireless Communications	
EECE 5697	Acoustics and Sensing	
EECE 5698	Special Topics in Electrical and Computer Engineering (Design and Prototyping of Optical Systems for Engineering Applications)

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved hardware and software for machine intelligence technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate project may be applied to this program's thesis requirements.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Electrical and Computer Engineering with Graduate Certificate in Engineering Business

Students may complete a Graduate Certificate in Engineering Business in addition to a Master of Science in Electrical and Computer Engineering with a Concentration in Hardware and Software for Machine Intelligence. Students must apply and be admitted to the [Galante Engineering Business Program \(https://nam12.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgalante.sites.northeastern.edu%2F&data=05%7C02%7Cp.krafka%40northeastern.edu%7C869786b563fc4a47d3f108dd1a14fefe%7Ca8eec281aaa34daeac9b9a398b9215e7%7C0%7C0%7C638695399708426107%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIlwLjAuMDAwMCIslIAiOiJXaW4zMlIsIkFOljojTWFPbCIsIlldUljoyfQ%3D%3D%7C0%7C%7C%7C&sdata=XtG563pylBB6%2BaE000VogeSlrFYCBqqGfO8r13hR1RU%3D&reserved=0\)](https://nam12.safelinks.protection.outlook.com/?url=https%3A%2F%2Fgalante.sites.northeastern.edu%2F&data=05%7C02%7Cp.krafka%40northeastern.edu%7C869786b563fc4a47d3f108dd1a14fefe%7Ca8eec281aaa34daeac9b9a398b9215e7%7C0%7C0%7C638695399708426107%7CUnknown%7CTWFpbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUsIlYiOiIlwLjAuMDAwMCIslIAiOiJXaW4zMlIsIkFOljojTWFPbCIsIlldUljoyfQ%3D%3D%7C0%7C%7C%7C&sdata=XtG563pylBB6%2BaE000VogeSlrFYCBqqGfO8r13hR1RU%3D&reserved=0) to pursue this option. The program requires the applicant to have earned, or be in a program to earn, a Bachelor of Science in Engineering from Northeastern University or another accredited university/college within the United States. Students must fulfill all academic requirements for the MSECE program in their concentration and may use some of their credits toward both the MS degree and the certificate. The certificate coursework, along with participation in cocurricular professional development elements, earns the Graduate Certificate in Engineering Business (p. 685). Students may **double count** up to 16 credits of their MSECE courses toward the Galante Graduate Certificate in Engineering Business. Additionally, students are allowed to take up to 8 credit hours from the [Galante Catalog \(p. 686\)](#) as part of their coursework.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7205	Fundamentals of Computer Engineering	
EECE 7352	Computer Architecture	
EECE 7353	VLSI Design	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
A maximum of three courses may be taken outside of the electrical and computer engineering EECE subject code.		
Concentration Courses		
Complete 16 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		16

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP**Master's Degree in Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices with Graduate Certificate in Engineering Leadership**

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Microsystems, Materials, and Devices in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate

Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved microsystems, materials, and devices technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate project may be applied to this program's thesis requirements.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Fundamental Courses

Code	Title	Hours
Complete at least 8 semester hours from the following:		8
EECE 5606	Micro- and Nanofabrication	
EECE 7201	Solid State Devices	
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)	
EECE 7353	VLSI Design	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Concentration Courses		
Complete 16 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		16
Electives		
Complete 8 semester hours from either concentration courses or from other concentrations.		8

THESIS OPTION

Code	Title	Hours
Thesis		
EECE 7945	Master's Project	4
EECE 7990	Thesis	4
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.		
Concentration Courses		
Complete 8 semester hours from the concentration course list below. Any fundamental course not used to meet the fundamental course requirement can be used toward the concentration course requirement.		8
Electives		
Complete 8 semester hours from either concentration courses or from other concentrations.		8

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	
ENCP 6964	Co-op Work Experience	
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Course Lists

In the coursework option, a maximum of two courses may be taken outside of electrical and computer engineering. Thesis track students can take up to three courses outside of electrical and computer engineering.

CONCENTRATION COURSES

Code	Title	Hours
EECE 5161	Thin Film Technologies	
EECE 5606	Micro- and Nanofabrication	
EECE 5608	Magnetic Materials for Next-Generation Electronics	

EECE 5647	Nanophotonics
EECE 5649	Design of Analog Integrated Circuits with Complementary Metal-Oxide-Semiconductor Technology
EECE 5651	Introduction to Photonic Devices
EECE 5652	Microwave Circuits and Systems
EECE 5653	Introduction to Quantum Engineering
EECE 5698	Special Topics in Electrical and Computer Engineering (Biomedical Microsystems)
EECE 5698	Special Topics in Electrical and Computer Engineering (Flexible and Printed Electronics)
EECE 5698	Special Topics in Electrical and Computer Engineering (Introduction to Organic and Printed Electronics)
EECE 5698	Special Topics in Electrical and Computer Engineering (Magnetic Materials and Devices for Microwave Engineering)
EECE 5698	Special Topics in Electrical and Computer Engineering (Photonic Devices for Communication Systems)
EECE 5698	Special Topics in Electrical and Computer Engineering (Semiconductor Packaging)
EECE 5698	Special Topics in Electrical and Computer Engineering (Visual Sensing & Computing Co-Design Edge Machine Perception)
EECE 6400	Special Problems in Electrical and Computer Engineering (*For MSECE and PhD-BS students only)
EECE 7201	Solid State Devices
EECE 7240 and EECE 7248	Analog Integrated Circuit Design and Lab for EECE 7240
EECE 7244	Introduction to Microelectromechanical Systems (MEMS)
EECE 7245	Microwave Circuit Design for Wireless Communication
EECE 7247	Radio Frequency Integrated Circuit Design
EECE 7250	Power Management Integrated Circuits
EECE 7284	Optical Properties of Matter
EECE 7296	Electronic Materials
EECE 7353	VLSI Design
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advanced Radio Frequency Passive Technologies)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advances in Communication Electronics)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Low Power Integrated Circuits Design)
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Photonic Circuit Design for Information Processing)
EECE 7400	Advanced Special Problems in Electrical and Computer Engineering (*For PhD-AE students only)

EXCLUDED COURSES FOR ALL MSECE CONCENTRATIONS

Please see your college administrator for more information.

Code	Title	Hours
Courses from the following subject areas may not count toward any concentration within the MSECE program:		
CSYE, DAMG, INFO, TELE		
The following CS courses may not count toward any concentration within the MSECE program:		
CS 5010	Programming Design Paradigm	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5520	Mobile Application Development	
CS 5610	Web Development	
CS 5700	Fundamentals of Computer Networking	
CS 5800	Algorithms	

CS 6140

Machine Learning

CS 6350

Empirical Research Methods

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

Electrical and Computer Engineering with Concentration in Power Systems, MSECE (Boston)

For program contact information, please visit this website (<https://ece.northeastern.edu/academics/graduate-studies/ms-elee/>).

The master's degree program in electrical and computer engineering offers in-depth coursework within the concentration-choice-related areas. The curriculum is integrated and intensive and is built on state-of-the-art research, taught by faculty who are experts in their areas.

Excluded Courses for All MSECE Concentrations

Students cannot take excluded courses as part of the MSECE program and may not petition to take these courses, as any petition to take these courses will be automatically rejected. Courses from the following subject areas may not count toward any concentration within the MSECE program: CSYE, DAMG, INFO, TELE. Select CS courses are also excluded from all MSECE concentrations. Please see the program requirements tab and your college administrator for more information.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Electrical and Computer Engineering with Concentration in Power Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Electrical and Computer Engineering with Concentration in Power Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved power systems technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate project may be applied to this program's thesis requirements.

Electrical and Computer Engineering Leadership, MSECEL (Boston)

The Gordon Engineering Leadership Program is a transformational, technical, and challenging graduate-level learning experience targeted for engineering professionals.

The Gordon Institute, in collaboration with the College of Engineering, offers the Master of Science in Electrical and Computer Engineering Leadership (MSECEL) as formal recognition of the combined focus in electrical and computer engineering technical skills and midlevel engineers' leadership acumen and broadened cross-functional capabilities. This program is offered through participation in the Gordon Engineering Leadership Program at Northeastern University and requires an additional application to the Gordon program.

Pursuing the MSECEL and the graduate certificate allows participants to:

- Enhance technical knowledge in electrical and computer engineering
- Take part in a hands-on curriculum (p. 611) taught by industry-experienced professors
- Work with peers from across engineering fields on leadership skills development
- Receive one-on-one mentoring from industry experts and faculty

The Gordon Engineering Leadership Program anchors around an intense, market-worthy challenge project based on your organization's strategic needs. This is a unique opportunity to apply your classroom experience to a professional setting, potentially further accelerating your career.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Leadership		
ENLR 5121	Engineering Leadership 1	2
ENLR 5122	Engineering Leadership 2	2
Foundations		
ENLR 5131	Scientific Foundations of Engineering 1	2
ENLR 5132	Scientific Foundations of Engineering 2	2
Project		
ENLR 7440	Engineering Leadership Challenge Project 1	4
ENLR 7442	Engineering Leadership Challenge Project 2	4
Concentration Courses		

Complete 16 semester hours from concentration courses in any of the seven EECE concentrations. Students are encouraged to take at least three courses within the same concentration.

16

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	
ENCP 6964	Co-op Work Experience	
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time

Mechanical and Industrial Engineering

Website (<https://mie.northeastern.edu/academics/graduate-studies/>)

Yingzi Lin, PhD

Professor and Chair

334 Snell Engineering Center

617.373.2740

617.373.2921 (fax)

Mechanical engineers design, develop, and support the manufacture of machinery and devices to transmit power or to convert energy from thermal to mechanical form in order to power the modern world and its machines. Traditionally, mechanical engineers have designed and tested devices such as heating and air-conditioning systems, machine tools, internal combustion engines, and steam power plants. Today, they also play primary roles in the development of new technologies in a variety of fields—energy conversion, solar energy utilization, environmental control, prosthetics, transportation, manufacturing, robotics, and new-materials development.

Industrial engineers design and analyze systems that include people, equipment, and materials and their interactions and performance in the workplace. An industrial engineer collects this information and evaluates alternatives to make decisions that best advance the goals of the enterprise. They leverage data analytics, artificial intelligence, machine learning, and simulation technologies to optimize complex systems and drive evidence-based decision making. Industrial engineers work in manufacturing firms, hospitals, banks, public sectors, government agencies, and service industries. They also increasingly find roles in technology companies, e-commerce platforms, and consulting firms specializing in digital transformation. Among the projects they undertake are design and implementation of a computer-integrated supply chain or manufacturing system, facilities planning for a variety of industries, design of a robotics system in a manufacturing environment, long-range corporate planning, development and implementation of a quality-control system, simulation analyses to improve processes and make operational decisions, healthcare operations design to enhance patient safety and improve efficiency, productivity, and development of computer systems for information control. Additional emerging areas include implementation of Internet of Things networks for real-time monitoring and control, development of predictive maintenance algorithms to prevent equipment failure, creation of digital twins for virtual system optimization, application of sustainable engineering principles to reduce environmental impact, design of human-AI collaborative workspaces, and utilization of Big Data analytics to identify patterns and trends that drive continuous improvement.

Mission of the Department

The mission of the Department of Mechanical and Industrial Engineering is to educate persons for professional and technical excellence; to perform research to advance the science and practice of engineering; to engage in service activities that advance the department, the university, and the profession; and to instill in ourselves and our students habits and attitudes that promote ethical behavior, professional responsibility, and careers that advance the well-being of society.

Academic Programs

The Department of Mechanical and Industrial Engineering offers comprehensive research and educational programs for both Master of Science and Doctor of Philosophy students. Our cutting-edge and vibrant doctoral programs include PhDs in industrial engineering, mechanical engineering, and an interdisciplinary engineering PhD (housed in the College of Engineering). Our MS degree programs are offered in both traditional mechanical and industrial engineering, as well as data analytics engineering, energy systems, engineering management, human factors, operations research, and advanced and intelligent manufacturing. These extensive programs and concentrations allow for the selection of a degree that meets a wide variety of personal and professional goals. Graduate students work with our world-renowned faculty to achieve research experience and their career goals and have opportunities to participate in the graduate cooperative education program.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (<https://graduate.northeastern.edu/programs/#/certificate/engineering.leadership/-/-/-/-/>).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (<https://graduate.northeastern.edu/program/graduate-certificate-in-engineering-leadership-5272/>) in combination with the MS degree.

ENGINEERING BUSINESS

Students have the opportunity to pursue the Galante Engineering Business Certificate (<https://graduate.northeastern.edu/program/galante-engineering-business-certificate-14806/>) in combination with several MS degrees.

Programs

Doctor of Philosophy (PhD)

- Industrial Engineering (Boston) (p. 614)
- Interdisciplinary Engineering (Boston) (p. 486)
- Mechanical Engineering (Boston) (p. 619)

Master of Science (MS)

- Advanced and Intelligent Manufacturing (Boston) (p. 622)
- Artificial Intelligence (Boston) (p. 164)
- Data Analytics Engineering (Boston) (p. 628)
- Data Analytics Engineering (Seattle) (p. 631)
- Data Analytics Engineering (Vancouver) (p. 634)
- Data Analytics Engineering—Online (p. 637)
- Human Factors (Boston) (p. 638)
- Robotics (Boston) (p. 180)
- Robotics (Seattle) (p. 184)
- Semiconductor Engineering (Boston) (p. 580)

Master of Science in Industrial Engineering (MSIE)

- Industrial Engineering (Boston) (p. 651)

Master of Science in Engineering Management (MSEM)

- Engineering Management (Boston) (p. 655)
- Engineering Management—Online (p. 659)

Master of Science in Energy Systems (MSEneS)

- Energy Systems (Boston) (p. 660)
- Energy Systems—Academic Link Program (Boston) (p. 663)

Master of Science in Mechanical Engineering (MSME)

- Mechanical Engineering with Concentration in General Mechanical Engineering (Boston) (p. 664)
- Mechanical Engineering with Concentration in Materials Science (Boston) (p. 667)
- Mechanical Engineering with Concentration in Mechanics and Design (Boston) (p. 669)
- Mechanical Engineering with Concentration in Mechatronics (Boston) (p. 672)
- Mechanical Engineering with Concentration in Thermofluids (Boston) (p. 675)

Master of Science in Operations Research (MSOR)

- Operations Research (Boston) (p. 677)

Graduate Certificates

- AI Applications (Boston) (p. 190)
- Data Analytics Engineering (Boston) (p. 681)
- Data Analytics Engineering (p. 681)—Online (p. 682)
- Digital Platforms for Service Innovation (Boston) (p. 682)
- Energy Systems (Boston) (p. 684)
- Energy Systems Management (Boston) (p. 684)

- Engineering Business (Boston) (p. 685)
- Engineering Economic Decision Making (Boston) (p. 687)
- Engineering Management (Boston) (p. 687)
- Lean Six Sigma (Boston) (p. 688)
- Renewable Energy (Boston) (p. 688)
- Software Engineering Systems (Boston) (p. 689)
- Supply Chain Engineering Management (Boston) (p. 689)
- Sustainable Energy Systems (Boston) (p. 690)
- Technology Systems Management (Boston) (p. 690)

Industrial Engineering, PhD (Boston)

Requirements

The PhD is awarded to students who demonstrate high academic achievement and research competence in the fields of mechanical engineering. To earn a PhD, a student must complete an approved, rigorous program of advanced coursework and submit and defend an original dissertation of independent research. The Department of Mechanical and Industrial Engineering expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

The MIE department admits applicants to the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements (both written and oral components) as well as all the required coursework.

Academic and Research Advisors

PhD students must find a research advisor within their first year of study. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Students are advised by the faculty advisor of their discipline before they select their research advisor(s). The research advisor and co-advisor (if applicable) must serve on the PhD student's oral examination, dissertation proposal, and dissertation defense committees.

Change of Research Advisor

Students who wish to change their research advisor need to use the MIE petition form to make that request. The petition form must be signed by the student and by the student's current and future research advisor. The signed petition form should then be submitted to the MIE department for further processing.

Course Requirements and Plan of Study

Each doctoral student, together with their research advisor, should develop an initial program during the first semester of study. The final program is also subject to the approval of the dissertation committee, who will add the program of study to the student's record upon admission to doctoral candidacy.

DIRECT ENTRY

A typical program of study includes at least 40 semester hours of coursework beyond a bachelor's degree. Students who apply to earn a master's degree along the way to a PhD must complete a total of 52 semester hours (32 semester hours to earn a master's degree and an additional 20 semester hours in order to earn a PhD). The 32 semester hours of coursework that apply toward the master's degree may include up to 8 semester hours of thesis or 4 semester hours of project.

ADVANCED ENTRY

A typical program of study includes at least 20 semester hours of coursework beyond a master's degree.

PHD CANDIDACY

To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying requirements as well as all the required coursework.

Doctoral Qualifying Requirements

Doctoral qualifying requirements framework: The goal of the Doctoral Qualifying Examination is to: test a student's knowledge in fundamental topics; to gauge the student's potential to conduct independent research; and to provide opportunities for feedback to the student.

The Doctoral Qualifying Examination will be administered by a committee of at least three members, with a minimum of two who are full-time faculty members in the MIE department. The exam comprises both a written and an oral portion, with specifics determined by the faculty of each concentration. Complete details are provided to students in the PhD Qualifying Requirement Guidelines on the MIE department graduate website (<https://mie.northeastern.edu/academics/graduate-studies/>).

Upon successfully completing both the written and oral components in addition to all the necessary coursework, as specified by the student's concentration, the student will be designated as a PhD candidate.

Appeal Procedure

The doctoral qualifying requirements process provides means for reevaluation for students who fail one or more components to appeal the Graduate Affairs Committee decision. All communications related to these should be coordinated through the student's research advisor. Only the student's research advisor may request the MIE Graduate Affairs Committee to reevaluate the student's performance.

PhD Students Annual Review

All PhD students in the MIE department must complete the PhD Students Annual Review form with their research advisor(s) and submit any supporting documents. Annual reviews will be filed with the MIE Department of Graduate Affairs.

PhD Students Changing Their Program

PhD students who, for any reason, decide to change their degree program (i.e., from PhD in ME to PhD in IE or vice versa) must satisfy the doctoral qualifying requirements (based on the student's new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

Interdisciplinary PhD Students with MIE as the Home Department

Students pursuing the College of Engineering interdisciplinary PhD program with the MIE department as their home department must satisfy the MIE doctoral qualifying requirements. Students dismissed from the ME or IE PhD programs in the MIE department cannot enroll in the PhD Interdisciplinary Engineering program with MIE as the primary affiliation.

Dissertation Proposal Preparation and Presentation Timing

Students must present their dissertation proposal no more than 18 months after successfully completing the oral exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than 6 months apart. The student's dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student's dissertation committee must be comprised of at least three members, including the research advisor. At least two of those three members must be full-time MIE faculty members. At least three committee members should hold a PhD and at least two shall be Northeastern University faculty. The chair of the dissertation committee shall be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold a PhD or an appropriate terminal degree for the discipline. Exceptions to this policy will be considered and, if appropriate, approved by the provost or their designee.

Dissertation Course Requirements

Upon successful completion of the doctoral qualifying requirements as well as all the required coursework, the doctoral candidate, in consultation with their research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation Term 1 (IE 9990) and Dissertation Term 2 (IE 9991). Upon completion of this sequence, the student must then register for Dissertation Continuation (IE 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student's last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (IE 9996) until they fulfill the two-semester sequence of Dissertation Term 1 (IE 9990) and Dissertation Term 2 (IE 9991).

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Candidacy Preparation—Doctoral (IE 8960), in a section for which their research or academic advisor is listed as the instructor in the online registration system.

Final Oral (Dissertation Defense) Examination

All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate's research is at a stage where it is appropriate for formal presentation and after completion of all other PhD requirements, including all the coursework approved in the final program of study. The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised **at least one week in advance** and all faculty members may attend and participate. At the conclusion of the presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

Residency Requirement

After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of dissertation.

Program Requirements

Bachelor's Degree Entrance

Complete all courses and requirements listed below unless otherwise indicated.

Milestones

Doctoral qualifying exams (both written comprehensive and oral area exams)
 Annual review
 Dissertation committee formation
 Dissertation proposal

Interdisciplinary Engineering, PhD (Boston)

130 Snell Engineering Center
617.373.2711

The College of Engineering offers an interdisciplinary engineering Doctor of Philosophy degree involving substantial work in two or more academic departments or disciplines. This is an individually designed program for the student who wishes to pursue graduate studies in an area that substantially overlaps two or more units. In such cases, that student may design, in consultation with their faculty advisor(s), an interdisciplinary program. The program will correspond in scope and depth to Northeastern University's established degree standards but need not agree exactly with the regulations of individual units. Individually designed interdisciplinary degree programs must be approved by the appropriate graduate office(s).

The interdisciplinary engineering program admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements as well as all the required coursework.

Program Requirements

In order to pursue an individually designed interdisciplinary engineering graduate program, a student must have been accepted into the interdisciplinary engineering program by an approved graduate program that will serve as the administrative home unit for the interdisciplinary engineering program:

- Department of Bioengineering (p. 470)
- Department of Chemical Engineering (p. 499)
- Department of Civil and Environmental Engineering (p. 514)
- Department of Electrical and Computer Engineering (p. 544)
- Department of Mechanical and Industrial Engineering (p. 612)

Students who have been dismissed from any of the COE departments will not be able to enroll into the interdisciplinary engineering PhD program with the department from which they were dismissed as either home or participating department.

The interdisciplinary engineering PhD program requires a commitment from a Northeastern faculty member to serve as the student's primary faculty advisor and chair of their interdisciplinary engineering PhD committee. The primary faculty member is affiliated with the program's administrative home unit unless otherwise approved by the administrative home unit. The PhD advisory committee must be assembled within the first semester of the program, and at least two units must be represented on the committee. The committee must include at least one faculty co-advisor from all participating academic units and otherwise conforms to the rules of the home unit. This committee will be responsible for overseeing the completion of the degree requirements. It will also be responsible for the administrative elements of the program, such as the monitoring of satisfactory progress; the design and grading of the preliminary and comprehensive exams, if applicable; graduation clearance; etc. This interdisciplinary committee is also responsible for an annual review of the progress of the student and for reporting this progress to the administrative home unit on an annual basis.

Supplementary Interdisciplinary Engineering PhD Program Forms

Successful application and admission to the interdisciplinary engineering PhD program requires a completed Program Preliminary Study Plan, available on the COE Graduate Student Services Forms website. This form provides a memorandum of understanding for your proposed PhD including the primary departments and advisor(s), a brief description of the planned research, and explanation of the rationale for an interdisciplinary PhD program.

No later than one year postentry into the program, a completed and signed Interdisciplinary Program Plan must be submitted to the Graduate School of Engineering. This individually designed plan includes a list of courses to be taken, a description of the qualifying and comprehensive examination process to be used, a timeline, and any other requirements of the program. This form can be found on the COE Graduate Student Services Forms website.

Qualifying Examination and Degree Candidacy

Interdisciplinary engineering PhD students must register for and pass the doctoral qualifying examination of their home department. In some cases, if deemed necessary by the interdisciplinary committee, students may be required to take some part of the doctoral qualifying examinations of the other department(s) involved with the student's program of study. To qualify as an interdisciplinary engineering doctoral candidate, students must successfully complete the doctoral qualifying examinations in addition to all their required coursework.

Dissertation

Students must present their dissertation proposal no more than 12 months after successfully completing their doctoral qualifying examinations. In addition, the presentation of the dissertation proposal and the actual dissertation defense shall be no less than six months apart. Interdisciplinary engineering PhD students must follow the dissertation guidelines of their home department.

Residency Requirement

After achieving PhD candidacy, students must complete at least two successive semesters of full-time study on campus to establish residency. Successful completion of the total interdisciplinary engineering PhD program depends on meeting department academic milestones and academic expectations.

Language Requirement

Each doctoral candidate must be proficient in technical writing and oral presentation in the English language. The qualifying examination committee may require additional coursework in the case of any deficiency in these areas.

Program Requirements

Direct Entry

Complete all requirements listed below unless otherwise indicated.

Mechanical Engineering, PhD (Boston)

Requirements

The PhD is awarded to students who demonstrate high academic achievement and research competence in the fields of mechanical engineering. To earn a PhD, a student must complete an approved, rigorous program of advanced coursework and submit and defend an original dissertation of independent research. The Department of Mechanical and Industrial Engineering expects all successful doctoral candidates to show depth of knowledge and research innovation in their chosen field of specialization.

The MIE department admits applicants into the PhD program either directly after earning a suitable bachelor's degree (i.e., direct entry) or after earning a suitable master's degree (i.e., advanced entry). Upon acceptance into the program, an applicant is designated as a doctoral student. This designation is changed to doctoral candidate upon successful completion of the doctoral qualifying requirements (both written and oral components) as well as all the required coursework.

Academic and Research Advisors

PhD students must find a research advisor within their first year of study. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Students are advised by the faculty advisor of their discipline before they select their research advisor(s). The research advisor and co-advisor (if applicable) must serve on the PhD student's oral examination, dissertation proposal, and dissertation defense committees.

Change of Research Advisor

Students who wish to change their research advisor need to use the MIE petition form to make that request. The petition form must be signed by the student and by the student's current and future research advisor. The signed petition form should then be submitted to the MIE department for further processing.

Course Requirements and Plan of Study

Each doctoral student, together with their research advisor, should develop an initial program during the first semester of study. The final program is also subject to the approval of the dissertation committee, who will add the program of study to the student's record upon admission to doctoral candidacy.

DIRECT ENTRY

A typical program of study includes at least 40 semester hours of coursework beyond a bachelor's degree. Students who choose to get a master's degree along the way to a PhD must complete a total of 52 semester hours (32 semester hours to earn a master's degree and an additional 20 semester hours in order to earn a PhD). The 32 semester hours of coursework that apply toward the master's degree may include up to 8 semester hours of thesis or 4 semester hours of project.

ADVANCED ENTRY

A typical program of study includes at least 20 semester hours of coursework beyond a master's degree.

PHD CANDIDACY

To qualify as a doctoral candidate, a doctoral student must successfully complete the doctoral qualifying requirements as well as all the required coursework.

Doctoral Qualifying Requirements**DOCTORAL QUALIFYING REQUIREMENTS FRAMEWORK**

The goals of the Doctoral Qualifying Examination are to test a student's knowledge in fundamental topics; to gauge the student's potential to conduct independent research; and to provide opportunities for feedback to the student.

The Doctoral Qualifying Examination will be administered by a committee of at least three members, with a minimum of two who are full-time faculty members in the MIE department. The exam comprises both a written and an oral portion, with specifics determined by the faculty of each concentration. Complete details are provided to students in the PhD Qualifying Requirement Guidelines on the MIE department graduate website (<https://mie.northeastern.edu/academics/graduate-studies/>).

Upon successfully completing both the written and oral components in addition to all the necessary coursework, as specified by the student's concentration, the student will be designated as a PhD candidate.

APPEAL PROCEDURE

The doctoral qualifying requirements process provides means for reevaluation for students who fail one or more components to appeal the Graduate Affairs Committee decision. All communications related to these should be coordinated through the student's research advisor. Only the student's research advisor may request the MIE Graduate Affairs Committee to reevaluate the student's performance.

PhD Students Annual Review

All PhD students in the MIE department must complete the PhD Students Annual Review form with their research advisor(s) and submit any supporting documents. Annual reviews will be filed with the MIE Department of Graduate Affairs.

PhD Students Changing Their Program

PhD students who, for any reason, decide to change their degree program (i.e., from PhD in ME to PhD in IE or vice versa) must satisfy the doctoral qualifying requirements (based on the student's new major research area (i.e., industrial engineering, materials, mechanics, mechatronics, or thermofluids).

Interdisciplinary PhD Students with MIE as the Home Department

Students pursuing the College of Engineering interdisciplinary PhD program with the MIE department as their home department must satisfy the MIE doctoral qualifying requirements. Students dismissed from the ME or IE PhD programs in the MIE department cannot enroll in the PhD in Interdisciplinary Engineering program with MIE as the primary affiliation.

Dissertation Proposal Preparation and Presentation Timing

Students must present their dissertation proposal no more than 18 months after successfully completing the oral exam. In addition, the presentation of the dissertation proposal and the actual dissertation defense (see below) shall be no less than 6 months apart. The student's dissertation committee will invite any additional faculty deemed appropriate to that field; this dissertation committee will then conduct the dissertation proposal session. Each student's dissertation committee must be comprised of at least three members, including the research advisor. At least two of those three members must be full-time MIE faculty members. At least three committee members should hold a PhD and at least two shall be Northeastern University faculty. The chair of the dissertation committee shall be a full-time tenured or tenure-track member of the faculty of Northeastern and will hold a PhD or an appropriate terminal degree for the discipline. Exceptions to this policy will be considered and, if appropriate, approved by the provost or their designee.

Dissertation Course Requirements

Upon successful completion of the doctoral qualifying requirements as well as all the required coursework, the doctoral candidate, in consultation with their research advisor, must register in two consecutive semesters (may include full summer term) for Dissertation Term 1 (ME 9990) and Dissertation Term 2 (ME 9991). Upon completion of this sequence, the student must then register for Dissertation Continuation (ME 9996) in every semester (in each fall and spring term and also in the summer term if summer is the student's last semester) until the dissertation is completed. Students may not register for Dissertation Continuation (ME 9996) until they fulfill the two-semester sequence of Dissertation Term 1 (ME 9990) and Dissertation Term 2 (ME 9991).

PhD students who have completed the majority of their coursework and not yet reached PhD candidacy should register for Candidacy Preparation—Doctoral (ME 8960), in a section for which their research or academic advisor is listed as the instructor in the online registration system.

Final Oral (Dissertation Defense) Examination

All doctoral candidates must pass a final oral exam. This exam will be scheduled once the dissertation committee agrees that the candidate's research is at a stage where it is appropriate for formal presentation and after completion of all other PhD requirements, including all the coursework approved in the final program of study. The objective of the exam is for the candidate to present and defend the results of the dissertation research and to demonstrate depth of knowledge and significant expertise in the area of that research under questioning from the dissertation committee and other attendees.

The exam shall be publicly advertised **at least one week in advance** and all faculty members may attend and participate. At the conclusion of the presentation and subsequent questions period, the dissertation committee will convene to determine the outcome. The committee may recommend that the candidate be awarded the PhD or may require additional research and/or modifications of the dissertation. In some cases, candidates may be asked to present an additional final oral dissertation defense.

Residency Requirement

After achieving PhD candidacy, the university residency requirement is satisfied by two semesters of full-time graduate registration or four semesters of part-time graduate registration. Students must be continually enrolled during the pursuit of dissertation.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Advanced and Intelligent Manufacturing, MS (Boston)

The Department of Mechanical and Industrial Engineering offers the Master of Science in Advanced and Intelligent Manufacturing to meet the growing demand for engineers, researchers, and scientists trained in advanced manufacturing and Industry 4.0 technologies. This degree program offers students an opportunity to either train for industry jobs with coursework and co-op experience or prepare for a doctoral program through coursework and research experience. The MIE department offers both core courses and elective courses required to complete the program. Students can take MS Project or MS Thesis under any MIE faculty. This program is designed for engineering and science students planning to pursue careers in advanced and smart manufacturing. The key sectors that require manufacturing professionals include automotive, aerospace, defense, appliances, computing machines, smartphones, and communication equipment. The MS in AIM program helps students acquire knowledge and skills to:

- Build digital (CAD) models of parts and products to support manual and computer-aided manufacturing
- Design, develop, and analyze traditional and advanced manufacturing processes
- Utilize additive manufacturing to produce complex parts with ease and efficiency
- Select manufacturing processes to fabricate parts and products for quality and cost
- Configure and analyze manufacturing systems for efficiency, responsiveness, and high throughput
- Understand the characteristics and challenges of nanomanufacturing processes
- Leverage Industry 4.0 technologies including Internet of Things, cloud computing, sensor analytics for advanced manufacturing
- Adopt condition-based maintenance strategies to achieve high resource utilization
- Apply automation, robotics, and artificial intelligence to make manufacturing smart and self-operational
- Use human-machine interaction tools such as augmented reality and virtual reality
- Analyze human performance in sociotechnical systems such as supply chains
- Apply data analytics methods to gain insights from design and manufacturing data

In the context of this program, the traditional manufacturing covers metal removal, forming, casting, and particulate processes. The additive manufacturing covers topics such as 3D-printed parts using different approaches. The nanomanufacturing covers fabrication as well as printing of micro and nano devices and design and creation of multifunctional materials. Intelligent manufacturing focuses on factory automation, prognostics and health management, dynamic scheduling, cloud-enabled manufacturing, and industrial Internet of Things for manufacturing performance assurance. It also leverages real-time data analytics and control systems, advanced high-fidelity models, networked data, and computation for seamless interoperation of cyber and physical assets in manufacturing facilities.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, statistics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Specific Degree Requirements

Core courses for the Master of Science in Advanced and Intelligent Manufacturing provide students with a foundation in traditional and advanced materials processing, additive manufacturing, intelligent manufacturing, and digital manufacturing. Students can select electives from a wide range of fields including mechanical engineering, industrial engineering, operations research, and engineering management. Alternatively, students can also take courses outside the MIE department by seeking a prior approval from their faculty advisor or MS thesis advisor. The course curriculum is designed to prepare students for industry jobs as well as for pursuing a doctoral program in manufacturing, mechanical engineering, and industrial engineering.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty in the MIE

department. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (IE 7945) or Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern University.

Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering are eligible to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Advanced and Intelligent Manufacturing with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Advanced and Intelligent Manufacturing in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved industrial engineering technical courses. For students who enroll in the Graduate Certificate in Engineering Leadership, 16SH of the certificate coursework may be applied to the restricted elective course (4SH) and the elective requirements of this program's coursework option (12SH).

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Complete 16 semester hours from the following:		16
IE 5360	Digital Manufacturing	
IE 5380	Integrated Automation	
IE 6300	Manufacturing Systems Design	
IE 7270	Intelligent Manufacturing	

ME 5640	Additive Manufacturing
ME 6420	Advanced Materials and Technologies in Manufacturing

Restricted Elective Course

Code	Title	Hours
Complete 4 semester hours from the following:		4
IE 6500	Human Performance	
ME 5240	Computer Aided Design and Manufacturing	
ME 7374	Special Topics in Mechanical Engineering (Nano and Microscale Manufacturing)	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the electives course list below. (p. 624)		12

PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
or ME 7945	Master's Project	
Complete 8 semester hours from the electives course list below. (p. 624)		8

THESIS OPTION

Code	Title	Hours
IE 7945	Master's Project	4
or ME 7945	Master's Project	
IE 7990	Thesis ¹	4
or ME 7990	Thesis	
Complete 4 semester hours from the electives course list below. (p. 624)		4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Electives

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites and program requirements. Students can take electives outside this list with prior approval from the faculty advisor.

Code	Title	Hours
Industrial Engineering		
IE 5617	Lean Concepts and Applications	
IE 6200	Engineering Probability and Statistics	
IE 7200	Supply Chain Engineering	
IE 7215	Simulation Analysis

ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5650	Advanced Mechanics of Materials
ME 5659	Control Systems Engineering
ME 7247	Advanced Control Engineering
Engineering Management	
EMGT 5220	Engineering Project Management
EMGT 6225	Economic Decision Making
EMGT 6305	Financial Management for Engineers

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

- ¹ A thesis is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship. The thesis topic should cover one or more of the areas from statistics, mathematics, optimization, data mining, machine learning, database design, Big Data, visualization tools, or forecasting methods. The thesis should train students for research in data and operations analytics and/or prepare them for a doctoral program.

Artificial Intelligence, MS (Boston)

The Master of Science in Artificial Intelligence provides a comprehensive framework encompassing foundational algorithms, theory, and practical applications in the rapidly evolving field of AI. This program offers students the essential knowledge and skills to design, develop, and implement AI systems across various high-demand sectors. The core curriculum is designed to provide in-depth understanding of fundamental AI concepts, forming a solid foundation for both theoretical and practical aspects of artificial intelligence.

Building on this strong foundation, students can delve into advanced AI applications through interdisciplinary concentrations tailored to industry needs. These concentrations include computer vision, continuous process engineering, machine learning, and robotics and agent-based systems.

The master's in artificial intelligence is an interdisciplinary degree offered by Khoury College of Computer Sciences and the College of Engineering. Descriptions of the concentrations offered in this degree are as follows:

- Computer Vision—College of Engineering
 - The computer vision concentration offers students the knowledge and skills to drive innovation at the intersection of new and emerging vision systems and AI, through utilizing AI and machine learning solutions for a wide range of applications including image enhancement/restoration, object recognition, navigation, graphics rendering, and pattern classification.
- Continuous Process Engineering—College of Engineering
 - The continuous process engineering concentration offers students the knowledge and skills to revolutionize how industrial processes are designed, monitored, and optimized. The program aims to prepare students to utilize AI and machine learning solutions to enhance process

efficiency, predictive maintenance, and real-time decision making in industries such as chemicals, pharmaceuticals, and energy. Graduates will be prepared to integrate AI-driven solutions into continuous manufacturing environments to improve safety, sustainability, and productivity.

- Energy Systems—College of Engineering

- The energy systems concentration offers students the knowledge and skills to drive innovation in sustainable and intelligent energy systems. Students examine how to utilize AI and machine learning solutions to support smart energy grid operations, integrate renewable energy sources, and create responsive and resilient systems.

- Machine Learning—Khoury College of Computer Sciences

- The goal of the machine learning concentration is to provide students with practical, hands-on experience in designing, implementing, and optimizing machine learning models for real-world applications. The curriculum positions graduates to pursue roles that leverage AI to drive innovation and efficiency in a wide variety of industries and domains.

- Robotics and Agent-Based Systems—Khoury College of Computer Sciences

- The goal of the robotics and agent-based systems concentration is to provide students with expertise in designing and developing intelligent robotic systems and autonomous agents capable of performing complex tasks in dynamic environments. The curriculum positions graduates to pursue roles that contribute to innovations in automation, human-robot interaction, and intelligent systems design.

Students are admitted to the college associated with their concentration, and their degree is awarded by that college. Students will follow all policies associated with their college of admission.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

A cumulative GPA of 3.000 or higher is required in the following:

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	4
CS 5130	Applied Programming and Data Processing for AI	4
DADS 5200	Mathematics for Machine Learning	4
or DS 5020	Introduction to Linear Algebra and Probability for Data Science	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	4
or DADS 7275	Machine Learning and Data Analytics	

Concentrations

Complete one of the following concentrations:

- Computer Vision (p. 165)—College of Engineering
- Continuous Process Engineering (p. 165)—College of Engineering
- Energy Systems (p. 165)—College of Engineering
- Machine Learning (p. 166)—Khoury College of Computer Sciences
- Robotics and Agent-Based Systems (p. 166)—Khoury College of Computer Sciences

Code	Title	Hours
Students without a chemical engineering degree are advised to choose the 510X courses, which serve as a bridge from other degrees.		
Complete 8 semester hours from the following:		8
CHME 5101 and CHME 5102	Fundamentals of Chemical Engineering: Fluid, Heat, and Mass Transfer and Fundamentals of Chemical Engineering: Thermodynamics and Kinetics	
CHME 5510 and CHME 5515	Fundamentals in Process Safety Engineering and Process Safety Engineering for Biotechnology and Pharmaceutical Industries	
CHME 7600 and CHME 7601	Pharmaceutical Engineering I and Pharmaceutical Engineering II	
Complete 4 semester hours from the following:		4
CHEM 5641 and CHME 7901	Computational Chemistry and Journal Club in Chemical Engineering	
CHME 5137	Computational Modeling in Chemical Engineering	
CHME 5520	Designing for Process Safety	
CHME 5649	Numerical Strategies and Data Analytics for Chemical Sciences	
IE 7270	Intelligent Manufacturing	
PHIL 5010	AI Ethics	
PHSC 5900	AI in Drug Discovery and Development	
Capstone		
CHME 6580	Artificial Intelligence for Process Engineering Capstone	4

ENERGY SYSTEMS CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Complete 12 semester hours from the following:		12
CHME 5621	Electrochemical Engineering	
CHME 5692	Carbon Capture, Utilization, and Storage	
ENSY 5000	Fundamentals of Energy System Integration	
ENSY 5700	Renewable Energy Development	
ENSY 5800	Applications of Artificial Intelligence in Energy Systems	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
ME 5374	Special Topics in Mechanical Engineering	
ME 6200	Mathematical Methods for Mechanical Engineers 1	
PHIL 5010	AI Ethics	
Capstone		
ME 7945	Master's Project	4

MACHINE LEARNING CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
CS 5800	Algorithms	4
Complete 8 semester hours from the following:		8
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5330	Pattern Recognition and Computer Vision	
CS 6120	Natural Language Processing	
CS 6200	Information Retrieval	
CS 6220	Data Mining Techniques	

CS 7140	Advanced Machine Learning
CS 7150	Deep Learning
CS 7180	Special Topics in Artificial Intelligence

Capstone

Complete 4 semester hours from the following: 4

CS 6170	AI Capstone
CS 8674	Master's Project

ROBOTICS AND AGENT-BASED SYSTEMS CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
CS 5800	Algorithms	4

Complete 8 semester hours from the following: 8

CS 5180	Reinforcement Learning and Sequential Decision Making
CS 5335	Robotic Science and Systems
EECE 5550	Mobile Robotics
EECE 5554	Robotics Sensing and Navigation

Capstone

Complete 4 semester hours from the following: 4

CS 6170	AI Capstone
CS 8674	Master's Project

Data Analytics Engineering, MS (Boston)

For program contact information, please visit this website (https://mie.northeastern.edu/academics/graduate-studies/ms-daae/#_ga=28171695117827619191584316293-4047061391578954920).

The Department of Mechanical and Industrial Engineering offers the Master of Science in Data Analytics Engineering to meet the current and projected workforce demands. This degree program offers students an opportunity to train for industry jobs or to acquire rigorous analytical skills and research experience to prepare for a doctoral program in health, security, and sustainability at Northeastern University. While the core courses for this program are offered by the College of Engineering, students can choose elective courses from diverse disciplines spread across various colleges at Northeastern. The MS degree in data analytics engineering is designed to train students with engineering, science, mathematics, and statistics backgrounds as advanced data analytics professionals and researchers who can transform large streams of data into understandable and actionable information for the purpose of making decisions. The key sectors that require analytics professionals include healthcare, smart manufacturing, supply chain and logistics, national security, defense, banking, finance, marketing, human resources, and sports.

The Master of Science in Data Analytics Engineering program helps students acquire knowledge and skills to:

- Discover opportunities to improve products, processes, systems, and enterprises through data analytics
- Apply optimization, statistical, and machine-learning methods to solve complex problems involving large data from multiple sources
- Process and explore data from a variety of sources, including Internet of Things, an integrated network of devices and sensors, customer touch points, processes, social media, and people
- Work with technology teams to design and build large and complex SQL and NoSQL databases
- Use tools and methods for data mining, Big Data processing, and data visualization to generate reports for analysis and decision making
- Create integrated views of data collected from multiple sources of an enterprise
- Understand and explain results of data analytics to decision makers
- Design and develop data analytics projects

This degree program seeks to prepare students for a comprehensive list of tasks including collecting, storing, processing, and analyzing data; reporting descriptive statistics and patterns; performing diagnostic, predictive, and prescriptive analytics; drawing conclusions and insights; making actionable recommendations; and designing and managing data analytics projects.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, statistics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can

be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Specific Degree Requirements

Core courses for the Master of Science in Data Analytics Engineering provide students with a foundation in algorithms and optimization, statistics, data and knowledge engineering, data mining, and visualization. These courses are designed to provide students with a strong understanding of probability and statistics, statistical learning, optimization methods, data mining, database design, and visualization. Students can select electives from a wide range of fields including business, finance, engineering, healthcare, manufacturing, and urban communities/cities. Elective courses provide students with the knowledge and understanding of descriptive, prescriptive, diagnostic, and predictive analytics as applied to a specific field of interest such as business, healthcare, manufacturing, and urban communities/cities. Alternatively, students can select their electives so that they can prepare for a doctoral program by taking advanced courses in mathematics, statistics, machine learning, natural language processing, and pattern recognition.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty in the MIE department. However, if the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose the project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Coursework Only, Project, or Thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering are eligible to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 770). Please note that students pursuing the Master of Science in Data Analytics Engineering are not eligible for the Graduate Certificate in Data Analytics Engineering.

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Data Analytics Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Data Analytics Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program (<https://galante.sites.northeastern.edu/>) in order

to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 semester hours of advisor-approved data analytics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 12SH of the certificate coursework may be applied to the core requirement and 4SH of the certificate coursework may be applied to the elective requirement of this program's coursework, project or thesis option.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Data Analytics Engineering with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Data Analytics Engineering in addition to earning a Graduate Certificate in Engineering Business (p. 685). Students must apply and be admitted to the Galante Engineering Business Program (<http://galante.sites.northeastern.edu/>) in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University or another accredited university/college within the U.S. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the data analytics engineering core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements ¹

Code	Title	Hours
IE 6400	Foundations for Data Analytics Engineering	4
IE 6600	Computation and Visualization for Analytics	4
IE 6700	Data Management for Analytics	4
IE 7275	Data Mining in Engineering	4
IE 7615	Neural Networks and Deep Learning	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the elective course list below. (p. 630)		12

PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
Complete 8 semester hours from the elective course list below. (p. 630)		8

THESIS OPTION ²

Code	Title	Hours
IE 7945	Master's Project	4
IE 7990	Thesis	4
Complete 4 semester hours from the elective course list below. (p. 630)		4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

An elective can be any course from the following subject codes that is offered on the Boston campus and for which the student satisfies prerequisites and program requirements.

Code	Title	Hours
Complete courses from any of the following subject codes:		
BINF		
BIOE		
CHME		
CIVE		
CS (except CS 5800 and CS 6140)		
DS		
EECE		
EMGT		
ENGR		
ENSY		
GE		
IE		
INFO		
HINF		
MATH		
MATL		
MEIE		
ME		
OR		
SBSY		

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

- ¹ Core courses cannot be substituted.
- ² A thesis is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship. The thesis topic should cover one or more of the areas from statistics, mathematics, optimization, data mining, machine learning, database design, Big Data, visualization tools, or forecasting methods. The thesis should train students for research in data and operations analytics and/or prepare them for a doctoral program.

Data Analytics Engineering, MS (Seattle)

For program contact information, please visit this website (https://mie.northeastern.edu/academics/graduate-studies/ms-daae/#_ga=28171695117827619191584316293-4047061391578954920).

The Department of Mechanical and Industrial Engineering offers the Master of Science in Data Analytics Engineering to meet the current and projected workforce demands. This degree program offers students an opportunity to train for industry jobs or to acquire rigorous analytical skills and research experience to prepare for a doctoral program in health, security, and sustainability at Northeastern University. While the core courses for this program are offered by the College of Engineering, students can choose elective courses from diverse disciplines spread across various colleges at Northeastern. The MS degree in data analytics engineering is designed to train students with engineering, science, mathematics, and statistics backgrounds as advanced data analytics professionals and researchers who can transform large streams of data into understandable and actionable information for the purpose of making decisions. The key sectors that require analytics professionals include healthcare, smart manufacturing, supply chain and logistics, national security, defense, banking, finance, marketing, human resources, and sports.

The Master of Science in Data Analytics Engineering program helps students acquire knowledge and skills to:

- Discover opportunities to improve products, processes, systems, and enterprises through data analytics
- Apply optimization, statistical, and machine-learning methods to solve complex problems involving large data from multiple sources
- Process and explore data from a variety of sources, including Internet of Things, an integrated network of devices and sensors, customer touch points, processes, social media, and people
- Work with technology teams to design and build large and complex SQL and NoSQL databases
- Use tools and methods for data mining, Big Data processing, and data visualization to generate reports for analysis and decision making
- Create integrated views of data collected from multiple sources of an enterprise

- Understand and explain results of data analytics to decision makers
- Design and develop data analytics projects

This degree program seeks to prepare students for a comprehensive list of tasks including collecting, storing, processing, and analyzing data; reporting descriptive statistics and patterns; performing diagnostic, predictive, and prescriptive analytics; drawing conclusions and insights; making actionable recommendations; and designing and managing data analytics projects.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, statistics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the two tracks: project option and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Specific Degree Requirements

Core courses for the Master of Science in Data Analytics Engineering provide students with a foundation in algorithms and optimization, statistics, data and knowledge engineering, data mining, and visualization. These courses are designed to provide students with a strong understanding of probability and statistics, statistical learning, optimization methods, data mining, database design, and visualization. Students can select electives from a wide range of fields including business, finance, engineering, healthcare, manufacturing, and urban communities/cities. Elective courses provide students with the knowledge and understanding of descriptive, prescriptive, diagnostic, and predictive analytics as applied to a specific field of interest such as business, healthcare, manufacturing, and urban communities/cities. Alternatively, students can select their electives so that they can prepare for a doctoral program by taking advanced courses in mathematics, statistics, machine learning, natural language processing, and pattern recognition.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty in the MIE department. However, if the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their program before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose the project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Project or Thesis)

Students accepted into this program can choose one of two options: project or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program

Students enrolled in any of the MIE department programs may change their current program no sooner than the beginning of their second full-time semester of study. In order for the program change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the

first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 6400	Foundations for Data Analytics Engineering	4
IE 6600	Computation and Visualization for Analytics	4
IE 6700	Data Management for Analytics	4
or DAMG 6210	Data Management and Database Design	
IE 7275	Data Mining in Engineering	4
OR 6205	Deterministic Operations Research	4
or CS 5800	Algorithms	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the elective course list below. (p. 633)		12

PROJECT OPTION

Code	Title	Hours
ME 7945	Master's Project	4
Complete 8 semester hours from the elective course list below.* (p. 633)		8

THESIS OPTION ¹

Code	Title	Hours
IE 7945	Master's Project	4
IE 7990	Thesis	4
Complete 4 semester hours from the elective course list below. (p. 633)		4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Data Analytics Engineering, MS (Vancouver)

For program contact information, please visit this website (<https://mie.northeastern.edu/academics/graduate-studies/ms-daae/>).

The Department of Mechanical and Industrial Engineering offers the Master of Science in Data Analytics Engineering to meet the current and projected workforce demands. This degree program offers students an opportunity to train for industry jobs or to acquire rigorous analytical skills and research experience to prepare for a doctoral program in health, security, and sustainability at Northeastern University. While the core courses for this program are offered by the College of Engineering, students can choose elective courses from diverse disciplines spread across various colleges at Northeastern. The MS degree in data analytics engineering is designed to train students with engineering, science, mathematics, and statistics backgrounds as advanced data analytics professionals and researchers who can transform large streams of data into understandable and actionable information for the purpose of making decisions. The key sectors that require analytics professionals include healthcare, smart manufacturing, supply chain and logistics, national security, defense, banking, finance, marketing, human resources, and sports.

The Master of Science in Data Analytics Engineering program helps students acquire knowledge and skills to:

- Discover opportunities to improve products, processes, systems, and enterprises through data analytics
- Apply optimization, statistical, and machine-learning methods to solve complex problems involving large data from multiple sources
- Process and explore data from a variety of sources, including Internet of Things, an integrated network of devices and sensors, customer touch points, processes, social media, and people
- Work with technology teams to design and build large and complex SQL and NoSQL databases
- Use tools and methods for data mining, Big Data processing, and data visualization to generate reports for analysis and decision making
- Create integrated views of data collected from multiple sources of an enterprise
- Understand and explain results of data analytics to decision makers
- Design and develop data analytics projects

This degree program seeks to prepare students for a comprehensive list of tasks including collecting, storing, processing, and analyzing data; reporting descriptive statistics and patterns; performing diagnostic, predictive, and prescriptive analytics; drawing conclusions and insights; making actionable recommendations; and designing and managing data analytics projects.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, statistics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the two tracks: project option and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Specific Degree Requirements

Core courses for the Master of Science in Data Analytics Engineering provide students with a foundation in algorithms and optimization, statistics, data and knowledge engineering, data mining, and visualization. These courses are designed to provide students with a strong understanding of probability and statistics, statistical learning, optimization methods, data mining, database design, and visualization. Students can select electives from a wide range of fields including business, finance, engineering, healthcare, manufacturing, and urban communities/cities. Elective courses provide students with the knowledge and understanding of descriptive, prescriptive, diagnostic, and predictive analytics as applied to a specific field of interest such as business, healthcare, manufacturing, and urban communities/cities. Alternatively, students can select their electives so that they

can prepare for a doctoral program by taking advanced courses in mathematics, statistics, machine learning, natural language processing, and pattern recognition.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty in the MIE department. However, if the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their program before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose the project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Project or Thesis)

Students accepted into this program can choose one of two options: project or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program

Students enrolled in any of the MIE department programs may change their current program no sooner than the beginning of their second full-time semester of study. In order for the program change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 6400	Foundations for Data Analytics Engineering	4
IE 6600	Computation and Visualization for Analytics	4
IE 6700	Data Management for Analytics	4
IE 7275	Data Mining in Engineering	4
IE 7615	Neural Networks and Deep Learning	4

Options

Complete one of the following options:

PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
Complete 8 semester hours from the elective course list below. (p. 636)		8

THESIS OPTION ¹

Code	Title	Hours
Complete the following course twice:		8
IE 7990	Thesis	
Complete 4 semester hours from the elective course list below. (p. 636)		4
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.		

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the course is offered and the student satisfied prerequisites and program requirements.

Code	Title	Hours
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5330	Pattern Recognition and Computer Vision	
CS 6240	Large-Scale Parallel Data Processing	
CS 6620	Fundamentals of Cloud Computing	
CS 7240	Principles of Scalable Data Management: Theory, Algorithms, and Database Systems	
DAMG 7245	Big-Data Systems and Intelligence Analytics	
DAMG 7250	Big Data Architecture and Governance	
EECE 5645	Parallel Processing for Data Analytics	
EECE 7205	Fundamentals of Computer Engineering	
EMGT 5220	Engineering Project Management	
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	
IE 5137	Computational Modeling in Industrial Engineering	
IE 5200	Mathematics for Machine Learning	
IE 5374	Special Topics in Industrial Engineering	
IE 5390	Structured Data Analytics for Industrial Engineering	
IE 5400	Healthcare Systems Modeling and Analysis	
IE 5630	Biosensor and Human Behavior Measurement	
IE 5640	Data Mining for Engineering Applications	
IE 6300	Manufacturing Systems Design	
IE 6750	Data Warehousing and Integration	
IE 7200	Supply Chain Engineering	
IE 7215	Simulation Analysis	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
IE 7290	Reliability Analysis and Risk Assessment	
IE 7295	Applied Reinforcement Learning in Engineering	
IE 7300	Statistical Learning for Engineering	
IE 7374	Special Topics in Industrial Engineering	

IE 7500	Applied Natural Language Processing in Engineering
INFO 6215	Business Analysis and Information Engineering
INFO 7260	Business Process Engineering
ME 6200	Mathematical Methods for Mechanical Engineers 1
OR 6205	Deterministic Operations Research
OR 7230	Probabilistic Operation Research
OR 7235	Inventory Theory
OR 7240	Integer and Nonlinear Optimization
OR 7245	Network Analysis and Advanced Optimization
OR 7310	Logistics, Warehousing, and Scheduling

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

- ¹ A thesis is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship. The thesis topic should cover one or more of the areas from statistics, mathematics, optimization, data mining, machine learning, database design, Big Data, visualization tools, or forecasting methods. The thesis should train students for research in data and operations analytics and/or prepare them for a doctoral program.

Data Analytics Engineering, MS—Online

Prepare for a career on the frontier of data analytics, with the Online Master of Science in Data Analytics Engineering. Whether you're an experienced engineer or brand-new to data analytics, this program will immerse you in specializations such as data visualization, database design, and data mining, giving you the opportunity to obtain the skills to bridge the gap between raw data and actionable insights.

Once you've mastered essential data analytics techniques such as data normalization and data mapping—and become proficient in multiple programming languages such as R, SQL, and Python—you'll be ready to take on roles like predictive modeling analyst, advanced software engineer, data integration engineer, and more to help shape the evolution of data as a transformative force in modern society.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 6400 or DADS 6400	Foundations for Data Analytics Engineering Foundations for Data Analytics	4
IE 6600 or DADS 6600	Computation and Visualization for Analytics Computation and Visualization for Analytics	4
IE 6700 or DADS 6700	Data Management for Analytics Data Management for Analytics	4
IE 7275 or DADS 7275	Data Mining in Engineering Machine Learning and Data Analytics	4
IE 7615	Neural Networks and Deep Learning	4

Additional Requirements

Code	Title	Hours
Complete 12 semester hours from the following:		12
IE 6750	Data Warehousing and Integration	
IE 7300	Statistical Learning for Engineering	
IE 7500	Applied Natural Language Processing in Engineering	
OR 6205	Deterministic Operations Research	

Program Credit/GPA Requirements

32 total semester hours required

Minimum 3.000 GPA required

Human Factors, MS (Boston)

Website (<https://mie.northeastern.edu/academics/graduate-studies/ms-hf/>)

This program addresses the growing need for engineering professionals trained in advanced human factors who can utilize human factors theories, procedures, and empirically derived knowledge into understandable and actionable information for use in the design and evaluation of a wide variety of products and systems. The key sectors demanding human factors professionals include transportation, healthcare, robotics, manufacturing, computer, consumer products, social, and organizational and military issues. The core courses of the Master of Science in Human Factors program are built on the foundations of human factors and ergonomics, probabilities and statistics, etc. Topics from these foundation areas are integrated to create human factors for engineering applications. Students can select their elective or breadth courses from a wide range of fields. The program seeks to prepare students for a comprehensive set of human-factors-related professional positions.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework, but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students may also petition to substitute a different course for a core course by demonstrating evidence of their having passed a similar approved IE or OR graduate course. In such situations, the students must first obtain approval from their academic advisor for the course(s) they are planning to substitute.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Coursework Only, Project, or Thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option (16 semester hours).

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate

Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Human Factors with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Human Factors in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved human factors technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Human Factors with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Human Factors in addition to earning a Graduate Certificate in Engineering Business (p. 685). Students must apply and be admitted to the Galante Engineering Business Program (<http://galante.sites.northeastern.edu/>) in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University or another accredited university/college within the United States. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the human factors core courses and 16 semester hours from the outlined business-skill curriculum.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 6200	Engineering Probability and Statistics	4
IE 6500	Human Performance	4
IE 7280	Statistical Methods in Engineering	4
IE 7315	Human Factors Engineering	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list below. (p. 640)		16

PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
Complete 12 semester hours from the course list below. (p. 640)		12

THESIS OPTION ¹

Code	Title	Hours
IE 7945	Master's Project	4
IE 7990	Thesis	4
Complete 8 semester hours from the course list below. (p. 640)		8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0

or ENCP 6954	Co-op Work Experience - Half-Time
or ENCP 6955	Co-op Work Experience Abroad - Half-Time
or ENCP 6965	Co-op Work Experience Abroad

Course List

Code	Title	Hours

Any course in the following list will fulfill the coursework option, provided the student satisfies prerequisites and program requirements. Students can take courses outside this list with prior approval from the faculty advisor.

College of Engineering

EMGT 5300	Engineering/Organizational Psychology
EMGT 6305	Financial Management for Engineers
EMGT 6600	Engineering Team Performance
GE 5010	Customer-Driven Technical Innovation for Engineers
GE 5020	Engineering Product Design Methodology
GE 5030	Iterative Product Prototyping for Engineers
GE 5100	Product Development for Engineers
IE 5137	Computational Modeling in Industrial Engineering
IE 5390	Structured Data Analytics for Industrial Engineering
IE 5630	Biosensor and Human Behavior Measurement
IE 5640	Data Mining for Engineering Applications
IE 6600	Computation and Visualization for Analytics

The following courses are available to students who concurrently enroll in the Graduate Certificate in Engineering Leadership:

ENLR 5121	Engineering Leadership 1
ENLR 5122	Engineering Leadership 2
ENLR 5131	Scientific Foundations of Engineering 1
ENLR 5132	Scientific Foundations of Engineering 2
ENLR 7440	Engineering Leadership Challenge Project 1
ENLR 7442	Engineering Leadership Challenge Project 2

College of Social Sciences and Humanities

ECON 7200	Topics in Applied Economics
ECON 7251	International Finance

College of Science

PSYC 5180	Quantitative Methods 1
PSYC 5181	Quantitative Methods 2
PSYC 7300	Advanced Quantitative Analysis
PSYC 7301	Research Methodologies Psychology

Bouvé College of Health Sciences

EXSC 5210	Physical Activity and Exercise: Prescription, Measurement, and Testing
EXSC 5220	Advanced Exercise Physiology

Khoury College of Computer Sciences

CS 5340	Computer/Human Interaction
CS 6350	Empirical Research Methods

College of Arts, Media and Design

ARTG 5150	Information Visualization Principles and Practices
ARTG 5310	Visual Cognition
ARTG 5330	Visualization Technologies 1: Fundamentals
ARTG 5600	Experience Design Studio 1: Principles
ARTG 5610	Design Systems
ARTG 5640	Prototyping for Experience Design

Design Research Methods

ARTG 6310	Design for Behavior and Experience
GSND 6240	Exploratory Concept Design
GSND 6250	Spatial and Temporal Design

GSND 6330

Player Experience

GSND 6340

Biometrics of Design

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

- ¹ Thesis option is required for all students who receive financial support from Northeastern University in the form of a research, teaching, or tuition assistantship.

Robotics, MS (Boston)

For program contact information, please visit this website (<https://coe.northeastern.edu/academic-programs/ms-robo/>).

The multidisciplinary Master of Science program in robotics offers instruction by the faculty of the College of Engineering, Khoury College of Computer Sciences, and the Bouvé College of Health Sciences. The program is designed to provide students with comprehensive training in algorithms, sensors, control systems, and mechanisms used in robotics.

In this degree program, students will be admitted to the college associated with their concentration, and their degree is awarded by that college. The concentrations are associated with the colleges as follows:

- Biomedical and Rehabilitation Robotics—College of Engineering
- Computer Science—Khoury College of Computer Sciences
- Electrical and Computer Engineering—College of Engineering
- Mechanical Engineering—College of Engineering

Students will follow all policies associated with their home college.

Gordon Institute of Engineering Leadership

Master's Degree in Robotics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Robotics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 40-semester-hour degree and certificate will require 24 semester hours of advisor-approved robotics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 8 semester hours of the certificate coursework may be applied to this program's elective requirements in the coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mechanical Engineering		
Complete one of the following:		4
ME 5250	Robot Mechanics and Control	
ME 5659	Control Systems Engineering	
Electrical and Computer Engineering		
Complete one of the following:		4
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
Computer Science		
Complete one of the following:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	

Concentrations

Complete one of the following options:

- Biomedical and Rehabilitation Robotics (p. 181)—College of Engineering
- Computer Science (p. 182)—Khoury College of Computer Sciences
- Electrical and Computer Engineering (p. 182)—College of Engineering
- Mechanical Engineering (p. 183)—College of Engineering

Program Credit/GPA Requirements

32 total semester hours required (33 total semester hours with participation in co-op in certain concentrations)

Minimum 3.000 GPA required

BIOMEDICAL AND REHABILITATION ROBOTICS CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours
Required Courses		
Complete one of the following:		4
BIOE 5520	Bioengineering Design for Robotic Rehabilitation	
PT 5170 and PT 5171	Motor Control and Lab for PT 5170	
PT 5321	Applications of Biomechanics in Human Function and Movement	
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p. 183)		
<i>Thesis Option</i>		
Students working with Department of Physical Therapy, Movement, and Rehabilitation Sciences faculty should enroll in the PT course. Students working with Department of Bioengineering faculty should choose the BIOE course.		
BIOE 7945	Master's Project	
or PT 7995	Master's Project	
BIOE 7990	Thesis	
or PT 7990	Thesis	
Complete 8 semester hours of courses from the elective course list. (p. 183)		
Optional Co-op		
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

COMPUTER SCIENCE CONCENTRATION—KHOURY COLLEGE OF COMPUTER SCIENCES

Code	Title	Hours
Students in the computer science concentration follow the Khoury College of Computer Sciences co-op policies.		
Required Course		
Complete one additional CS course not used to fulfill the core requirements:		4
CS 5180	Reinforcement Learning and Sequential Decision Making	
CS 5335	Robotic Science and Systems	
Options		
Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p. 183)		
<i>Project Option</i>		

CS 8674	Master's Project
Complete 12 semester hours of courses from the elective course list. (p. 183)	
<i>Thesis Option</i>	
CS 7990	Thesis
CS 8674	Master's Project
Complete 8 semester hours of courses from the elective course list. (p. 183)	

Optional Co-op

For students in the this concentration, please consult your academic advisor for co-op procedures.

ELECTRICAL AND COMPUTER ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the electrical and computer engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional EECE course not used to fulfill the core requirements: 4

EECE 5550	Mobile Robotics
EECE 5552	Assistive Robotics
EECE 5554	Robotics Sensing and Navigation

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

EECE 7945	Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

EECE 7945	Master's Project

EECE 7990	Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

MECHANICAL ENGINEERING CONCENTRATION—COLLEGE OF ENGINEERING

Code	Title	Hours

Students in the mechanical engineering concentration follow the College of Engineering co-op policies.

Required Course

Complete one additional ME course not used to fulfill the core requirements: 4

ME 5250	Robot Mechanics and Control
ME 5659	Control Systems Engineering

Options

Complete one of the following options: 16

Coursework Option

Complete 16 semester hours of courses from the elective course list. (p. 183)

Project Option

ME 7945	Master's Project

Complete 12 semester hours of courses from the elective course list. (p. 183)

Thesis Option

ME 7945	Master's Project

ME 7990

Thesis

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Complete 8 semester hours of courses from the elective course list. (p. 183)

Optional Co-op

Complete the following (students must complete ENCP 6100 to qualify for co-op experience):

ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
BIOE 5800	Systems, Signals, and Controls for Bioengineers	
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision

Complete one of the following options:		16
<i>Coursework Option</i>		
Complete 16 semester hours of courses from the elective course list. (p.)		
<i>Project Option</i>		
ME 7945	Master's Project	
Complete 12 semester hours of courses from the elective course list. (p.)		
<i>Thesis Option</i>		
ME 7945	Master's Project	
ME 7990	Thesis	
In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.		
Complete 8 semester hours of courses from the elective course list. (p.)		
Optional Co-op		
Complete the following (students in EECE and MIE concentrations must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Elective Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites.

Code	Title	Hours
CS 5097	Mixed Reality	
CS 5100	Foundations of Artificial Intelligence	
CS 5170	Artificial Intelligence for Human-Computer Interaction	
CS 5330	Pattern Recognition and Computer Vision	
CS 5340	Computer/Human Interaction	
CS 5800	Algorithms	
CS 6120	Natural Language Processing	
CS 6140	Machine Learning	
CS 6350	Empirical Research Methods	
CS 7140	Advanced Machine Learning	
CS 7150	Deep Learning	
CS 7180	Special Topics in Artificial Intelligence	
DS 5220	Supervised Machine Learning and Learning Theory	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5580	Classical Control Systems	
EECE 5639	Computer Vision	
EECE 5642	Data Visualization	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 7150	Autonomous Field Robotics	
EECE 7323	Numerical Optimization Methods	
EECE 7337	Information Theory	
EECE 7370	Advanced Computer Vision	
EECE 7397	Advanced Machine Learning	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Legged Robots)	
IE 6500	Human Performance	
IE 7280	Statistical Methods in Engineering	
IE 7315	Human Factors Engineering	

IE 7615	Neural Networks and Deep Learning
ME 5240	Computer Aided Design and Manufacturing
ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5654	Elasticity and Plasticity
ME 5655	Dynamics and Mechanical Vibration
ME 5659	Control Systems Engineering
ME 5665	Musculoskeletal Biomechanics
ME 6200	Mathematical Methods for Mechanical Engineers 1
ME 6260	Introduction to Microelectromechanical Systems (MEMS)
ME 7247	Advanced Control Engineering

Semiconductor Engineering, MS (Boston)

The Master of Science in Semiconductor Engineering, offered by the Institute for NanoSystems Innovation—along with the Department of Electrical and Computer Engineering, the Department of Mechanical and Industrial Engineering, and the Department of Chemical Engineering in the College of Engineering—and the D'Amore-McKim School of Business, is designed to meet the burgeoning demand for skilled professionals in the semiconductor industry. This cutting-edge program aims to equip students with the knowledge and skills necessary to excel in this rapidly evolving field.

The national landscape is witnessing a significant uptick in interest in expanding the talent pool within the semiconductor sector, particularly following the enactment of the U.S. CHIPS and Science Act of 2022. This pivotal legislation has catalyzed a marked increase in the demand for engineers, drawing considerable attention from a wide array of companies to the semiconductor industry. There is a need for skilled workers to build new plants to increase and localize manufacturing capacity, design chips, and the tools that make the chips. This program is strategically positioned to address this growing need, offering a comprehensive educational experience that prepares our graduates to lead and innovate in this critical domain.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
NanoSystems		
Complete one of the following:		4
EECE 7201	Solid State Devices	
EECE 7240 and EECE 7248	Analog Integrated Circuit Design and Lab for EECE 7240	
EECE 7244 or ME 6260	Introduction to Microelectromechanical Systems (MEMS) Introduction to Microelectromechanical Systems (MEMS)	
Manufacturing		
Complete one of the following:		4
EECE 5606	Micro- and Nanofabrication	
MATL 7365	Properties and Processing of Electronic Materials	
ME 5630	Nano- and Microscale Manufacturing	
Innovation		
Complete four semester hours from the following. Students may not meet this requirement solely with directed study coursework:		4
BUSN 6379	Entrepreneurial Ecosystems	
BUSN 6389	Leading Global Virtual Innovation Teams	
CHME 5976	Directed Study	
GE 5010	Customer-Driven Technical Innovation for Engineers	
GE 5100	Product Development for Engineers	
INNO 6200	Enterprise Growth and Innovation	
ME 5976	Directed Study	

Concentrations

Complete one of the following concentrations:

- Devices and NanoSystems (p. 581)
- Materials and Manufacturing (p. 581)

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

CONCENTRATION IN DEVICES AND NANOSYSTEMS

Code	Title	Hours
Complete two of the following not used to complete other requirements of this program:		8
EECE 5606	Micro- and Nanofabrication	
EECE 5651	Introduction to Photonic Devices	
EECE 7201	Solid State Devices	
EECE 7240 and EECE 7248	Analog Integrated Circuit Design and Lab for EECE 7240	
EECE 7244 or ME 6260	Introduction to Microelectromechanical Systems (MEMS) Introduction to Microelectromechanical Systems (MEMS)	
EECE 7250	Power Management Integrated Circuits	
EECE 7353	VLSI Design	
Complete one of the following options for 12 semester hours:		12
<i>Coursework Option</i>		
Complete 12 semester hours from the restricted electives course list. (p. 582)		
<i>Project Option</i>		
EECE 7945	Master's Project	
Complete 8 semester hours from the restricted electives course list. (p. 582)		
<i>Thesis Option</i>		
EECE 7945	Master's Project	
EECE 7990	Thesis	
Complete 4 semester hours from the restricted electives course list. (p. 582)		

CONCENTRATION IN MATERIALS AND MANUFACTURING

Code	Title	Hours
Complete two of the following not used to complete other requirements of this program:		8
CHME 5105	Materials Characterization Techniques	
IE 6200	Engineering Probability and Statistics	
IE 7270	Intelligent Manufacturing	
MATL 7365	Properties and Processing of Electronic Materials	
ME 5245	Mechatronic Systems	
ME 5620	Fundamentals of Advanced Materials	
ME 5630	Nano- and Microscale Manufacturing	
Complete one of the following options for 12 semester hours:		12
<i>Coursework Option</i>		
Complete 12 semester hours from the restricted electives course list. (p. 582)		
<i>Project Option</i>		
ME 7945	Master's Project	

or CHME 7945	Master's Project
or IE 7945	Master's Project

Complete 8 semester hours from the restricted electives course list. (p. 582)

Thesis Option

ME 7945	Master's Project
or CHME 7945	Master's Project
or IE 7945	Master's Project

ME 7990	Thesis
or CHME 7990	Thesis
or IE 7990	Thesis

Complete 4 semester hours from the restricted electives course list. (p. 582)

Restricted Electives Course List

Any course in the following elective lists will fulfill the restricted elective requirement, provided the course has not already been applied to fulfill core requirements of this program and provided the student satisfies prerequisites. Students can take electives outside of these lists with prior approval from the faculty advisor.

Code	Title	Hours
Elective Courses in Engineering and Science		
CHME 5105	Materials Characterization Techniques	
CHME 5510	Fundamentals in Process Safety Engineering	
CHME 5621	Electrochemical Engineering	
CHME 5642 and CHME 5643	Photochemistry Fundamentals and Applications and Photochemistry Lab	
CHME 5683	Introduction to Polymer Science	
CHME 5699	Special Topics in Chemical Engineering (BioMEM Systems)	
CHME 5699	Special Topics in Chemical Engineering (Carbon Capture Storage and Utilization)	
CHME 7340	Chemical Engineering Kinetics	
EECE 5606	Micro- and Nanofabrication	
EECE 5608	Magnetic Materials for Next-Generation Electronics	
EECE 5612	Statistical Inference: An Introduction for Engineers and Data Analysts	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
EECE 5647	Nanophotonics	
EECE 5649	Design of Analog Integrated Circuits with Complementary Metal-Oxide-Semiconductor Technology	
EECE 5651	Introduction to Photonic Devices	
EECE 5652	Microwave Circuits and Systems	
EECE 5698	Special Topics in Electrical and Computer Engineering (Biomedical Microsystems)	
EECE 5698	Special Topics in Electrical and Computer Engineering (Introduction to Quantum Engineering)	
EECE 7201	Solid State Devices	
EECE 7240 and EECE 7248	Analog Integrated Circuit Design and Lab for EECE 7240	
EECE 7244 or ME 6260	Introduction to Microelectromechanical Systems (MEMS) Introduction to Microelectromechanical Systems (MEMS)	
EECE 7245	Microwave Circuit Design for Wireless Communication	
EECE 7247	Radio Frequency Integrated Circuit Design	
EECE 7250	Power Management Integrated Circuits	
EECE 7296	Electronic Materials	
EECE 7353	VLSI Design	
EECE 7368	High-Level Design of Hardware-Software Systems	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Advanced Radio Frequency Passive Tech)	
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering (Low Power Integrated Circuits Design)	
IE 5617	Lean Concepts and Applications	

IE 5137	Computational Modeling in Industrial Engineering
IE 6200	Engineering Probability and Statistics
IE 6300	Manufacturing Systems Design
IE 6700	Data Management for Analytics
IE 7200	Supply Chain Engineering
IE 7270	Intelligent Manufacturing
IE 7280	Statistical Methods in Engineering
IE 7285	Statistical Quality Control
IE 7290	Reliability Analysis and Risk Assessment
MATL 6250	Soft Matter
MATL 6290	Fundamentals of Nanostructured Materials
MATL 7365	Properties and Processing of Electronic Materials
ME 5240	Computer Aided Design and Manufacturing
ME 5245	Mechatronic Systems
ME 5250	Robot Mechanics and Control
ME 5520	Fundamentals and Applications of Optics and Photonics
ME 5600	Materials Processing and Process Selection
ME 5620	Fundamentals of Advanced Materials
ME 5630	Nano- and Microscale Manufacturing
ME 5640	Additive Manufacturing
PHYS 5114	Physics and Applications of Quantum Materials
PHYS 5125	Advanced Quantum Mechanics
PHYS 5260	Introduction to Nanoscience and Nanotechnology
PHYS 5318	Principles of Experimental Physics
PHYS 5352	Quantum Computation and Information

Elective Courses in Innovation

A maximum of 4 semester hours may be taken from the following:

FINA 6309	Foundations of Accounting and Finance
GE 5010	Customer-Driven Technical Innovation for Engineers
GE 5020	Engineering Product Design Methodology
GE 5030	Iterative Product Prototyping for Engineers
GE 5100	Product Development for Engineers
HRMG 6200	Managing People and Organizations
HRMG 6230	Leading a Diverse and Inclusive Organization
HRMG 6280	The Human Side of Innovation
INNO 6200	Enterprise Growth and Innovation
MGMT 6213	Managing Ethics in the Workplace and Marketplace
MGMT 6225	Sustainability and Leadership
MGMT 6226	Sustainability and the Business Environment
MKTG 6200	Creating and Sustaining Customer Markets

FINA, HRMG, INNO, MGMT, and MKTG courses listed above are 3 semester hours, so students may take one additional 1 semester hour of courses from the list below for a total of 4 semester hours:

BUSN 6379	Entrepreneurial Ecosystems
BUSN 6389	Leading Global Virtual Innovation Teams
CHME 5976	Directed Study
ME 5976	Directed Study

Industrial Engineering, MSIE (Boston)

Website (<https://mie.northeastern.edu/academics/graduate-studies/ms-inde/>)

The Department of Mechanical and Industrial Engineering offers comprehensive research and educational programs for students pursuing the Master of Science in Industrial Engineering. Industrial engineering applies mathematical modeling and analytical tools to make better decisions for designing and managing efficient and effective systems. IE is applied in many areas, including healthcare systems, supply chains, logistics and transportation engineering, manufacturing, sustainability, resilient systems, energy systems, and human-in-the loop systems. We partner with organizations ranging

from startups to well-established corporations, to government and nongovernment organizations. For example, our supply chain resilience research is trying to understand and mitigate persistent drug shortages in the United States. Our research in healthcare systems engineering uses methods from lean Six Sigma tools to advanced mathematical models to improve system and product reliability and optimize healthcare process quality, delays, cost, efficiency, and effectiveness—national priorities. Recent healthcare applications include improvements in scheduling, readmissions, cost reductions, cancer care, and health services planning. We use stochastic and simulation modeling to study environmental issues related to green manufacturing, product recovery, and end-of-life management. We use data analytics for designing prognostics and preventive strategies for manufacturing operations. Our research and teaching together are designed to develop IE practitioners who can work, innovate, and excel in a variety of businesses. These extensive programs and coursework allow for the selection of a degree that meets a wide variety of personal and professional goals.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students may also petition to waive a core course by demonstrating evidence of their having passed a similar approved IE or OR graduate course. In such situations, the students must first obtain approval from their academic advisor for the course(s) they are planning to substitute.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (IE 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from Northeastern University in the form of a research, teaching, or tuition assistantship must complete the thesis option (16 semester hours). Students are strongly encouraged to complete 4 semester hours of Master's Project (IE 7945) followed by 4 semester hours of Thesis (IE 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Industrial Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Industrial Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved industrial engineering technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Industrial Engineering with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Industrial Engineering in addition to earning a Graduate Certificate in Engineering Business (<https://catalog.northeastern.edu/graduate/engineering/mechanical-industrial/engineering-business-graduate-certificate/>). Students must apply and be admitted to the Galante Engineering Business Program (<http://galante.sites.northeastern.edu/>) in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern or another accredited university/college within the U.S. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the industrial engineering core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business. (<https://mie.northeastern.edu/academics/graduate-studies/cert-enbu/>)

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4
Complete 8 semester hours from the following:		8
IE 5400 or IE 5500 or IE 7350	Healthcare Systems Modeling and Analysis Systems Engineering in Public Programs Sociotechnical Systems: Computational Models for Design and Policy	
IE 7200	Supply Chain Engineering	
IE 7215	Simulation Analysis	
IE 7275	Data Mining in Engineering	
IE 7315 or IE 6500	Human Factors Engineering Human Performance	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list below.		16

PROJECT OPTION

Code	Title	Hours
IE 7945	Master's Project	4
Complete 12 semester hours from the course list below.		12

THESIS OPTION ¹

Code	Title	Hours
IE 7945	Master's Project	4
IE 7990	Thesis	4
Complete 8 semester hours from the course list below.		8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Course List

Any course in the following list will serve as an elective course, provided the student satisfies prerequisites and program requirements. Students can take electives outside this list with prior approval from the faculty advisor.

Code	Title	Hours
Computer Systems Engineering		
CSYE 7280	User Experience Design and Testing	
Data Analytics		
DA 5020	Collecting, Storing, and Retrieving Data	
Data Architecture Management		
DAMG 6210	Data Management and Database Design	
Engineering Management		
EMGT 5220	Engineering Project Management	
EMGT 5300	Engineering/Organizational Psychology	
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	
General Engineering		
GE 5010	Customer-Driven Technical Innovation for Engineers	
GE 5100	Product Development for Engineers	
Industrial Engineering		
IE 5137	Computational Modeling in Industrial Engineering	
IE 5617	Lean Concepts and Applications	
IE 6300	Manufacturing Systems Design	
IE 6400	Foundations for Data Analytics Engineering	
IE 6600	Computation and Visualization for Analytics	
IE 6700	Data Management for Analytics	
IE 7270	Intelligent Manufacturing	
IE 7275	Data Mining in Engineering	
IE 7280	Statistical Methods in Engineering	
IE 7285	Statistical Quality Control	
IE 7290	Reliability Analysis and Risk Assessment	
IE 7295	Applied Reinforcement Learning in Engineering	
IE 7300	Statistical Learning for Engineering	
IE 7315	Human Factors Engineering	
IE 7350	Sociotechnical Systems: Computational Models for Design and Policy	
Operations Research		
OR 6500	Metaheuristics and Applications	
OR 7230	Probabilistic Operation Research	
OR 7235	Inventory Theory	
OR 7240	Integer and Nonlinear Optimization	
OR 7245	Network Analysis and Advanced Optimization	
OR 7270	Convex Optimization and Applications	
OR 7310	Logistics, Warehousing, and Scheduling	
Supply Chain Management		
SCHM 6213	Global Supply Chain Strategy	
SCHM 6214	Sourcing and Procurement	
SCHM 6215	Supply Chain Analytics	
SCHM 6221	Sustainability and Supply Chain Management	
SCHM 6223	Managing Healthcare Supply Chain Operations	

Or any IE or OR courses

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

- ¹ Thesis option is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

Engineering Management, MSEM (Boston)

The Master of Science in Engineering Management (<https://mie.northeastern.edu/academics/graduate-studies/ms-engm/>) offers graduate students an opportunity to develop both technical expertise and business competence that is in high demand among prospective technology-based employers. Industry leaders are seeking qualified and talented individuals who are not only able to guide research and design teams but also able to direct and supervise development and production processes. The combination of technical proficiency and business skills fostered in the engineering management program is designed to provide a competitive edge for graduates seeking a wide range of positions in technology-based product or service industries, as well as in comparable local, state, and federal agencies and programs.

The program was designed by experienced high-level managers and academic leaders as an option for engineers and scientists to broaden their skill sets to include management tools and techniques that are applicable to technology-based industries. Graduates of the engineering management program work as project managers or leaders of teams in technology-based industries. Upon completion of the program, students find that their acquired skills are applicable to a wide range of industries, primarily those focused upon the development of technical products and the management of technical projects.

Graduates may assist companies in bringing a product from an idea through its development phases to its introduction to the marketplace. They may also be involved in forming and managing teams for assessing cost-effectiveness, formulating strategies to improve production, or analyzing a company's supply chain. Most of these projects cannot be successfully completed without the skills of those possessing a background in management decision making and engineering expertise; therefore, the engineering management graduate is often a technical liaison to all levels of management. As a result, many of the assignments held by engineering management graduates have actually proven to be a gateway to upper-level management positions.

The current program of study can be taken on a part-time or full-time basis on-ground or online. There are four core courses required of all students, which have been formulated to satisfy the foundation requirements of economic decision making, decision-making mathematics, and project management. In addition to these required courses, the curriculum consists of electives that allow students to choose either a broad-based program of study or one centered on a particular concentration. Some students may elect to refresh or enhance their technical skills in engineering-based subjects such as information systems, computer systems engineering, or graduate courses from the traditional engineering disciplines. Other students may prefer to broaden their knowledge base by selecting coursework in management subjects such as engineering organizational psychology, financial management, logistics and warehousing, supply chain engineering, or lean systems design. Additionally, students may also elect to complete the Gordon Engineering Leadership Program as part of their engineering management degree.

One recent graduate has observed that "Northeastern's MSEM is like an MBA for engineers, with high-quality, dedicated professors who are proficient in their field yet are able to convey information in a way that's easy to understand." This graduate also noted, "My courses in project management have been key to understanding the subtleties that affect Project Managers while technical courses provide a strong background in fundamentals as well as specialty topics. My experience with co-op has been outstanding and has truly helped me further my career."

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework, but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (EMGT 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Coursework Only, Project, or Thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option. Students are strongly encouraged to complete 4 semester hours of Master's Project (EMGT 7945) followed by 4 semester hours of Thesis (EMGT 7990) over two consecutive semesters.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Engineering Management with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Engineering Management in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved engineering management technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16SH of the certificate coursework may be applied to the elective requirements of this program's coursework option.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Engineering Management with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Engineering Management in addition to earning a Graduate Certificate in Engineering Business (p. 685). Students must apply and be admitted to the Galante Engineering Business Program (<http://galante.sites.northeastern.edu/>) in order to pursue this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University or another accredited university/college within the U.S. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the engineering management core courses and 16 semester hours from the outlined business-skill curriculum. The coursework,

along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business. (<https://mie.northeastern.edu/academics/graduate-studies/cert-enbu/>)

Program Requirements

Core Requirements

Complete all courses and requirements listed below unless otherwise indicated. Students may not register for more than 9 semester hours in the fall, spring, and summer terms.

Code	Title	Hours
Required Courses		
EMGT 5220	Engineering Project Management	4
EMGT 6225	Economic Decision Making	4
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 8 semester hours from the course list below. (p. 658)		8

PROJECT OPTION

Code	Title	Hours
EMGT 7945	Master's Project	4
Complete 4 semester hours from the course list below. (p. 658)		4

THESIS OPTION ¹

Code	Title	Hours
EMGT 7945	Master's Project	4
EMGT 7990	Thesis	4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

ONLINE OPTION

Code	Title	Hours
Complete 8 semester hours from the course list below. (p. 658)		8
Courses offered online can be found on the online course list below. (p. 659)		

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Concentration or Electives Option

A concentration is not required. Students may complete electives in lieu of a concentration.

- Digital Product Management (p. 658)
- Electives (p. 658) Option (p. 658)

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)
Minimum 3.000 GPA required

¹ Thesis option is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

DIGITAL PRODUCT MANAGEMENT CONCENTRATION

Code	Title	Hours
EMGT 6700	Digital Product Design and Management	4
EMGT 6750	Advanced Product Management	4

ELECTIVES OPTION

Code	Title	Hours
Complete 8 semester hours from the course list below, not used to fulfil other requirements of the program. (p. 658)		8

ELECTIVE COURSE LIST

Code	Title	Hours
CSYE 7280	User Experience Design and Testing	
DAMG 6210	Data Management and Database Design	
EMGT 5300	Engineering/Organizational Psychology	
EMGT 6305	Financial Management for Engineers	
EMGT 6600	Engineering Team Performance	
EMGT 6700	Digital Product Design and Management	
ENGR 6010	Fundamentals of the Platform Economy

Engineering Management, MSEM—Online

The Online Master of Science in Engineering Management offers graduate students an opportunity to develop both technical expertise and management and business competence highly sought after by technology-driven employers. Whether you are planning to change your career path or start a career in technical management, this program provides you with the right skills. The blend of technical proficiency and management skills

fostered in this program is designed to prepare graduate students to excel across a wide range of careers in technology-driven industries as well as government organizations.

The program offers students instruction in how to assist companies in taking products from conception to market. They may play a crucial role in forming and managing teams for assessing cost-effectiveness, designing strategies to improve production, or analyzing supply chains. Most of these projects require an integrated set of skills that require managerial decision making on the one hand and engineering expertise on the other. This skill set enables graduates of this program to serve as technical liaisons within different levels of the organization, often paving the way to senior management roles.

The program curriculum includes four core courses required of all students, designed to establish the essential foundations in economic decision making, quantitative decision modeling, and project management. In addition to these core courses, students can tailor their studies through a wide range of electives, allowing them to pursue either a broad-based path or a more specialized plan of study. For instance, some students may elect to refresh or enhance their technical skills in engineering-based courses such as data analytics and information systems, while others may prefer to broaden their knowledge base by selecting coursework in management subjects such as organizational leadership, financial management, supply chain, lean design, or strategic planning.

Program Requirements

Complete all the core requirements listed below unless otherwise indicated.

Code	Title	Hours
Core Requirements		
EMGT 5220	Engineering Project Management	4
EMGT 6225	Economic Decision Making	4

32 total semester hours required

Minimum 3.000 GPA required

Energy Systems, MSeNeS (Boston)

The Master of Science in Energy Systems (<https://mie.northeastern.edu/academics/graduate-studies/ms-enes/>) integrates engineering, business, and policy into a high-level signature, multidisciplinary graduate program. Energy systems students have an opportunity to learn how to leverage business skills and public policy knowledge to accomplish their engineering goals. This program is ideal for the engineer or technical business major who is interested in pursuing an industrial or public-planning-based career.

The program's mission is to educate students in current and future energy systems technologies, to integrate energy-related technologies with the economics and financial considerations required to implement them, and to develop leadership and decision-making skills to implement energy systems in either the private or public sectors of the global market. The program will expose students to a combination of academic and corporate experience in energy systems.

The program curriculum features a multidisciplinary range of electives from five different academic colleges at Northeastern University. The curriculum is flexibly designed with a set of four core courses in engineering knowledge and finance in addition to four electives. The core courses help relate these electives back to energy-related engineering concepts including power strategies, energy renewal, sustainable energy solutions, energy storage, energy conversion, and energy efficiency. By integrating concepts across these disciplines, our students learn that implementing energy solutions requires an economic solution as well as an engineering one.

Students are exposed to business educators and practicing professionals and have the opportunity to participate in a six-month co-op experience. Practicing professionals with experience in the industry who have successfully implemented energy systems or devices and policies are actively involved in the program as adjunct professors and invited speakers. Through this curriculum and interaction with practitioners, students should be prepared to effectively integrate energy system development over a broad spectrum of technologies with the financial requirements to successfully implement them and to compete in the global energy market.

Successful graduates of the program will be involved in the decision making or policy planning that will deliver minimally polluting, energy-efficient systems to the global market. They will have the base training necessary to lead efforts within companies to plan and implement new energy-generation investments, realize energy-efficiency improvements specifically at the system level, and participate in energy and environmental markets such as cap-and-trade systems.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework, but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ENSY 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Energy Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Energy Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved energy systems technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 12 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

Program Requirements

Core Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Code	Title	Hours
Required Courses		
EMGT 6225	Economic Decision Making	4
EMGT 6305	Financial Management for Engineers	4
or FINA 6309	Foundations of Accounting and Finance	
ENSY 5000	Fundamentals of Energy System Integration	4
ENSY 5700	Renewable Energy Development	4

Restricted Electives

Code	Title	Hours
Complete a minimum of 8 semester hours from the following:		8
CHME 5621	Electrochemical Engineering	
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5400	Power Plant Design and Analysis	
ENSY 5500	Smart Grid	
ENSY 5585	Wind Energy Systems	
ENSY 5650	Geologic Energy Systems for Energy Generation and Carbon Sequestration	
ENSY 5800	Applications of Artificial Intelligence in Energy Systems	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
ME 5685	Solar Thermal Engineering	
ME 6200	Mathematical Methods for Mechanical Engineers 1	

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Other Electives

Code	Title	Hours
An additional 8 semester hours can either be taken from the list above or from the following list below or by approval of program director.		
CHEM 5614	Electroanalytical Chemistry	
CHEM 5651	Materials Chemistry of Renewable Energy	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
EECE 5680	Electric Drives	
EECE 5682	Power Systems Analysis 1	
EECE 5684	Power Electronics	
EMGT 5220	Engineering Project Management	
ENSY 7945	Master's Project	
ME 5690	Gas Turbine Combustion	
ME 7270	General Thermodynamics	
ME 7300	Combustion and Air Pollution	
ME 7305	Fundamentals of Combustion	
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change	
SBSY 5200	Sustainable Engineering Systems for Buildings	

Online Course List

All required courses and many electives are offered as online courses.

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)
Minimum 3.000 GPA required

Energy Systems, MSeNeS—Academic Link (Boston)

For program contact information, please visit the College of Engineering website (<https://mie.northeastern.edu/academics/graduate-studies/mse-nes/>).

Designing and implementing optimal methods to produce and utilize energy is one of the most pressing global issues today. Finding ways to implement these solutions that are sustainable and marketable is key. The energy systems Academic Link (AL) program is meant to provide engineering students who have not had any exposure to thermal sciences with the foundation skills necessary to create and implement energy solutions. Students begin the program by taking two core courses that cover topics across thermal sciences and math along with the general energy systems curriculum.

The preparatory core courses introduce students to the fundamentals that are necessary to be successful in the energy system program. AL courses are integrated with our multidisciplinary energy system curriculum that integrates engineering, business, and policy. Our curriculum is flexibly designed with a set of core courses in engineering and finance complemented by a range of electives across five different academic colleges. Our core and elective courses are designed to help to prepare students to lead the efforts to implement energy systems solutions that have a long-term positive effect on businesses and communities.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Energy Systems with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Energy Systems in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 44-semester-hour degree and certificate will require 28 hours of advisor-approved energy systems technical [courses](#). For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 4 semester hours of the certificate coursework may be applied to the Restricted Electives requirements and 8 semester hours may be applied to the Other Electives requirements of this program.

Program Requirements

General Requirements

A minimum of 40 semester hours must be earned toward completion of the degree. A minimum grade-point average of 3.000 is required over all courses applied toward the degree.

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Complete 20 semester hours from the following:		20
EMGT 6225	Economic Decision Making	
ENSY 5050	Fundamentals of Thermal Science 1	
ENSY 5060	Fundamentals of Thermal Science 2	
ENSY 5000	Fundamentals of Energy System Integration	
ENSY 5700	Renewable Energy Development	
Complete 4 semester hours from the following:		4
EMGT 6305	Financial Management for Engineers	
FINA 6309	Foundations of Accounting and Finance	

Restricted Electives List

Code	Title	Hours
Complete a minimum of 8 semester hours from the following:		8
CHME 5621	Electrochemical Engineering	
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	

ENSY 5300	Electrochemical Energy Storage
ENSY 5400	Power Plant Design and Analysis
ENSY 5500	Smart Grid
ENSY 5585	Wind Energy Systems
ENSY 5650	Geologic Energy Systems for Energy Generation and Carbon Sequestration

Minimum 3.000 GPA required

Mechanical Engineering with Concentration in General Mechanical Engineering, MSME (Boston)

Overview

While pursuing a Master of Science in Mechanical Engineering (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), students may choose the general mechanical engineering concentration.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved

coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Coursework Only, Project, or Thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option (16 semester hours).

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Mechanical Engineering with Concentration in General Mechanical Engineering with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with Concentration in General Mechanical Engineering in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved mechanical engineering technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mathematics Competency		
ME 6200	Mathematical Methods for Mechanical Engineers 1	4
Thermofluids Competency		
Complete 4 semester hours from the following:		4
ME 5685	Solar Thermal Engineering	
ME 5690	Gas Turbine Combustion	
ME 5695	Aerodynamics	
ME 7295	Multiscale Flow and Transport Phenomena	
ME 7300	Combustion and Air Pollution	
ME 7305	Fundamentals of Combustion	
ME 7310	Computational Fluid Dynamics with Heat Transfer	
Mechanics/Mechatronics Combined Competency		
Complete 4 semester hours from the following:		4
EECE 5610	Digital Control Systems	
EECE 5666	Digital Signal Processing	
ME 5245	Mechatronic Systems	
ME 5250	Robot Mechanics and Control	
ME 5650	Advanced Mechanics of Materials	
ME 5654	Elasticity and Plasticity	
ME 5655	Dynamics and Mechanical Vibration	
ME 5657	Finite Element Method 1	
ME 5659	Control Systems Engineering	
ME 7238	Finite Element Method 2	
Materials Competency		
Complete 4 semester hours from the following:		4
MATL 6250	Soft Matter	
MATL 6270	Principles, Devices, and Materials for Energy Storage and Energy Harvesting	
MATL 6285	Structure, Properties, and Processing of Polymeric Materials	
ME 5600	Materials Processing and Process Selection	
ME 5620	Fundamentals of Advanced Materials	
or any MATL courses		

OPTIONS

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours in the following subject areas:		16
ME, MATL		

PROJECT OPTION

Code	Title	Hours
ME 7945	Master's Project	4

Electives

Complete 12 semester hours in the following subject areas:		12
ME, MATL		

THESIS OPTION ¹

Code	Title	Hours
ME 7945	Master's Project	4
ME 7990	Thesis	4

Electives

Complete 8 semester hours in the following subject areas:		8
ME, MATL		

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

- ¹ Thesis option is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

Mechanical Engineering with Concentration in Materials Science, MSME (Boston)

For program contact information, please visit this website (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>).

Overview

While pursuing a Master of Science in Mechanical Engineering, students may choose materials science as a concentration. Materials science has been the key enabler in virtually all engineering breakthroughs that have occurred from early metal ages to the present nano age. In step with the scientific development and discovery of materials, members of the mechanical and industrial engineering faculty are involved in interdisciplinary research to further materials processing, synthesis, and design. Research areas are aligned with Northeastern University's broad initiatives of sustainability, security, and health, as well as national initiatives in manufacturing and nanotechnology. Investigations in the areas of metals/alloys, polymers, biomaterials (including biomimetics), and composites incorporating nanoscale materials make use of experimental, theoretical, and computational techniques to tailor structure-processing-property relationships in materials for specific applications. Current areas of research include controlling synthesis and assembly processes to produce well-defined atomic structures; defect engineering; manipulating atomic/microstructures and the chemistry of materials to optimize properties for next-generation structural, electronic, and energy applications; solidification and deformation processing, nanomanufacturing; and life-cycle assessments for nanocomposites/materials. Northeastern faculty and students are committed to creative thinking and engineering innovation to propel materials development to the forefront of scientific research.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the academic advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it

also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Coursework Only, Project, or Thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option (16 semester hours).

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Mechanical Engineering with Concentration in Materials Science with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with Concentration in Materials Science in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved materials science technical courses. For students who concurrently enroll in the Graduate Certificate for Engineering Leadership, 16 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Complete 16 semester hours from the following:		16
MATL 6250	Soft Matter	
MATL 6285	Structure, Properties, and Processing of Polymeric Materials	
MATL 7355	Thermodynamics of Materials	
ME 5600	Materials Processing and Process Selection	
ME 5620	Fundamentals of Advanced Materials	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Electives		
Complete 16 semester hours in the following subject areas:		16
ME, MATL		

PROJECT OPTION

Code	Title	Hours
MATL 7945	Master's Project	4

ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

¹ Thesis option is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

Mechanical Engineering with Concentration in Mechanics and Design, MSME (Boston)**Overview**

While pursuing a Master of Science in Mechanical Engineering with Concentration in Mechanics and Design (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), the students will study the motion, deformation, and failure of solid materials in response to the action of direct forces and external fields. The students will also get a chance to conduct research with faculty and observe how these studies will lead to key engineering innovations and designs. Using complementary analytical, computational, experimental, and design tools, the M&D faculty members conduct research in the design and analysis of engineered functional materials/structures, in mechanics of adhesion and contact, and in biomechanics and mechanobiology. For example, in our biomechanics research, we strive to close the gap between function, form, and disease in the bone by using experimental and computational techniques; also, we explore the mechanics of lipid-based drug delivery vesicles. At the small length scales, we are creating a new understanding of nanomechanics, contact mechanics, tribology, MEMS, and the application of nanomaterials for energy storage systems. Our research and teaching together are designed to prepare students to understand and exploit mechanics to enable their future engineering innovations.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Mechanical Engineering with a Concentration in Mechanics and Design with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with Concentration in Mechanics and Design in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 semester hours of advisor-approved mechanics and design technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mathematics Competency		
ME 6200	Mathematical Methods for Mechanical Engineers 1	4

Mechanics Competency

Complete 12 semester hours from the following:		12
ME 5650	Advanced Mechanics of Materials	
ME 5654	Elasticity and Plasticity	
ME 5655	Dynamics and Mechanical Vibration	
ME 5657	Finite Element Method 1	
ME 5659	Control Systems Engineering	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list. (p. 671)		16

PROJECT OPTION

Code	Title	Hours
ME 7945	Master's Project	4
Complete 12 semester hours from the course list. (p. 671)		12

THESIS OPTION ¹

Code	Title	Hours
ME 7945	Master's Project	4
ME 7990	Thesis	4
Complete 8 semester hours from the course list. (p. 671)		8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

¹ Thesis option is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

Course List

Code	Title	Hours
Any course in the following list will fulfill the coursework option, provided the student satisfies prerequisites and program requirements (students can take courses outside this list with prior approval from the faculty advisor):		
ME 5240	Computer Aided Design and Manufacturing	
ME 5374	Special Topics in Mechanical Engineering (Fracture Mechanics and Adhesion in Biological Science)	
ME 5374	Special Topics in Mechanical Engineering (Inelasticity)	
ME 5658	Continuum Mechanics	
ME 5665	Musculoskeletal Biomechanics	
ME 6260	Introduction to Microelectromechanical Systems (MEMS)	
ME 7238	Finite Element Method 2	

Mechanical Engineering with Concentration in Mechatronics, MSME (Boston)

While pursuing a Master of Science in Mechanical Engineering (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), students may choose mechatronics as a concentration. The term mechatronics is a combination of the words mechanics and electronics. Mechatronics is a multidisciplinary approach to product design and development, merging the principles of electrical, mechanical, computer, material, chemical, and industrial engineering. The mechatronics and systems research cluster in the MIE department is concerned with systems that are typically composed of traditional mechanical and electrical components but are rendered “intelligent” by the incorporation of sensors, actuators, and computer control systems. Our primary focus in mechatronics and systems is on intelligent and integrated systems and machines along with their practical applications ranging from manufacturing systems and robotic platforms to biological systems. Our research and teaching together are designed to prepare students to understand and exploit mechatronics to enable their future engineering innovations.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51% or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Coursework Only, Project, or Thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option (12 semester hours).

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate

Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Mechanical Engineering with Concentration in Mechatronics with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with Concentration in Mechatronics in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 hours of advisor-approved mechatronics technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 12 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Mechanical Engineering with Concentration In Mechatronics with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Mechanical Engineering with Concentration in Mechatronics in addition to earning a Graduate Certificate in Engineering Business (p. 685). Students must apply and be admitted to both the mechatronics concentration and the Galante Engineering Business Program (<http://galante.sites.northeastern.edu/>) in order to pursue this option. The Galante Engineering Business Program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern or another accredited university/college within the United States. The integrated 32-semester-hour degree and certificate will require 16 semester hours of core courses from the mechatronics concentration and 16 semester hours from a specific set of applicable elective graduate-level mechanical engineering courses. Students should consult the program directors of the mechatronics concentration and the Galante Engineering Business Program prior to selecting courses. The coursework, along with participation in cocurricular professional development elements, earn the Graduate Certificate in Engineering Business (p. 685).

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Mathematics Competency		
ME 6200 or IE 6200	Mathematical Methods for Mechanical Engineers 1 Engineering Probability and Statistics	
Mechanics Competency		
Complete 4 semester hours from the following:		4
ME 5250	Robot Mechanics and Control	
ME 5650	Advanced Mechanics of Materials	
ME 5655	Dynamics and Mechanical Vibration	
ME 5657	Finite Element Method 1	
Mechatronics Concentration		
ME 5245	Mechatronic Systems	4
ME 5659	Control Systems Engineering ¹	4
Electrical Competency		
Complete 4 semester hours from the following:		4
EECE 5610	Digital Control Systems	
EECE 5666	Digital Signal Processing	
EECE 5680 and EECE 5681	Electric Drives and Lab for EECE 5680	
EECE 5684 and EECE 5685	Power Electronics and Lab for EECE 5684	
ME 6260	Introduction to Microelectromechanical Systems (MEMS)	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the course list. (p. 674)		12

PROJECT OPTION

Code	Title	Hours
ME 7945	Master's Project ²	4
Complete 8 semester hours from the course list. (p. 674)		8

THESIS OPTION ³

Code	Title	Hours
ME 7945	Master's Project ²	4
ME 7990	Thesis ²	4
Complete 4 semester hours from the course list. (p. 674)		4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

Course List

Code	Title	Hours
Any course in the following list will serve as an elective course, provided the student satisfies prerequisites and program requirements (students can take electives outside this list with prior approval from the faculty advisor):		
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
BIOE 5810	Design of Biomedical Instrumentation	
CIVE 5373	Transportation Systems: Analysis and Planning	
CIVE 5699	Special Topics in Civil Engineering (Vibration-Based Structural Health Monitoring)	
CS 5335	Robotic Science and Systems	
CS 5340	Computer/Human Interaction	
CS 7150	Deep Learning	
EECE 5115	Dynamical Systems in Biological Engineering	
EECE 5550	Mobile Robotics	
EECE 5552	Assistive Robotics	
EECE 5554	Robotics Sensing and Navigation	
EECE 5576	Wireless Communication Systems	
EECE 5606	Micro- and Nanofabrication	
EECE 5644	Introduction to Machine Learning and Pattern Recognition	
IE 5617	Lean Concepts and Applications	
IE 5640	Data Mining for Engineering Applications	
IE 6600	Computation and Visualization for Analytics	
IE 6700	Data Management for Analytics	
IE 7275	Data Mining in Engineering	
IE 7300	Statistical Learning for Engineering	
IE 7315	Human Factors Engineering	
IE 7615	Neural Networks and Deep Learning	
ME 5240	Computer Aided Design and Manufacturing	
ME 5250	Robot Mechanics and Control	
ME 5665	Musculoskeletal Biomechanics	
ME 5976	Directed Study	
ME 6250	Wearable Robotics	
ME 7247	Advanced Control Engineering	
Or any other ME or MATL course or other advisor-approved courses		

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1

ENCP 6964	Co-op Work Experience
or ENCP 6954	Co-op Work Experience - Half-Time
or ENCP 6955	Co-op Work Experience Abroad - Half-Time
or ENCP 6965	Co-op Work Experience Abroad

0

Program Credit/GPA Requirements

32 total semester hours required (33 with optional co-op)

Minimum 3.000 GPA required

- ¹ PlusOne students who have already successfully completed System Analysis and Control (ME 4555) may substitute Robot Mechanics and Control (ME 5250) for Control Systems Engineering (ME 5659). In such cases a different course must be taken to satisfy the mechanics competency.
- ² It is the student's responsibility to identify a project/thesis advisor before registering for this course.
- ³ Thesis option is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

Mechanical Engineering with Concentration in Thermofluids, MSME (Boston)

While pursuing a Master of Science in Mechanical Engineering (<https://mie.northeastern.edu/academics/graduate-studies/ms-mece/>), students may choose thermofluids as a concentration. Some of the representative research areas under this concentration may include thermodynamics, fluid dynamics, kinetic theory of gases, and thermophoresis of aerosols; microscale heat transfer phenomena and its effects on laser beam propagation; fundamentals of combustion such as burning speed and onset of auto-ignition measurement and flame stability analysis; development of chemistry reduction such as rate-controlled constrained-equilibrium method; formation and control of combustion-generated pollutants and greenhouse gases; chemistry, transport, and abatement of air pollution; alternative energy sources; combustion-based synthesis of materials; fire propagation, containment, and extinction; nonequilibrium thermodynamics; energy and gas turbine cooling technology; turbine blade cooling; and energy-related and calorimeter studies related to pharmaceutical developments. Our research and teaching together seek to prepare students to understand and exploit thermofluids to enable their future engineering innovations.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (ME 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (Coursework Only, Project, or Thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete the thesis option (12 semester hours).

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a master's degree have the opportunity to also pursue one of the many engineering graduate certificate options in addition to or in combination with the MS degree. Students should consult their faculty advisor regarding these options (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Mechanical Engineering with Concentration in Thermofluids with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Mechanical Engineering with Concentration in Thermofluids in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 36-semester-hour degree and certificate will require 20 semester hours of advisor-approved thermofluids technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 12 semester hours of the certificate coursework may be applied to the elective requirements of this program's coursework option.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Core Courses		
ME 6200	Mathematical Methods for Mechanical Engineers 1	4
ME 7270	General Thermodynamics	4
ME 7275	Essentials of Fluid Dynamics	4
ME 7285	Heat Conduction and Thermal Radiation	4
or ME 7290	Convective Heat Transfer	
Thermofluids Concentration Course		
Complete 4 semester hours from the following:		4
ME 5685	Solar Thermal Engineering	
ME 5690	Gas Turbine Combustion	
ME 5695	Aerodynamics	
ME 7295	Multiscale Flow and Transport Phenomena	
ME 7300	Combustion and Air Pollution	
ME 7305	Fundamentals of Combustion	
ME 7310	Computational Fluid Dynamics with Heat Transfer	

Options

Complete one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 12 semester hours from the course list.		12

PROJECT OPTION

Code	Title	Hours
ME 7945	Master's Project	4
Complete 8 semester hours from the course list.		8

THESIS OPTION ¹

Code	Title	Hours
ME 7945	Master's Project	4
ME 7990	Thesis	4
Complete 4 semester hours from the course list.		4

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS thesis to ProQuest.

COURSE LIST

Code	Title	Hours
Any course in the following list will fulfill the coursework option, provided the student satisfies prerequisites and program requirements (students can take courses outside this list with prior approval from the faculty advisor):		
ME 5685	Solar Thermal Engineering	
ME 5690	Gas Turbine Combustion	
ME 5695	Aerodynamics	
ME 7295	Multiscale Flow and Transport Phenomena	
ME 7300	Combustion and Air Pollution	
ME 7305	Fundamentals of Combustion	
ME 7310	Computational Fluid Dynamics with Heat Transfer	

Optional Co-op Experience

Code	Title	Hours
Complete the following (students must complete ENCP 6100 to qualify for co-op experience):		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Program Credit/GPA Requirements

32 total semester hours required (33 with co-op experience)
Minimum 3.000 GPA required

¹ Thesis option is required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship.

Operations Research, MSOR (Boston)

Website (<https://mie.northeastern.edu/academics/graduate-studies/ms-opre/>)

The Department of Mechanical and Industrial Engineering (MIE) offers comprehensive research and educational programs for students pursuing the Master of Science in Operations Research (MSOR). OR deals with the application of scientific method to decision making. Its practitioners develop and solve mathematical and computer models of systems using optimization and statistical methods. OR methodologies are being used to improve efficiency, reduce costs, and increase profitability in all organizations whether in manufacturing, transportation, logistics and supply chains, healthcare, or financial institutions. Upon graduation, students who pursue this program may work in industry or may continue their studies by pursuing the PhD in Industrial Engineering. These extensive programs and coursework allow for the selection of a degree that meets a wide range of personal and professional goals.

General Degree Requirements

To be eligible for admission to any of the MS degree programs, a prospective student must hold a Bachelor of Science degree in engineering, science, mathematics, or an equivalent field. Students in all master's degree programs must complete a minimum of 32 semester hours of approved coursework (exclusive of any preparatory courses) with a minimum grade-point average (GPA) of 3.000. Students can complete a master's degree by pursuing any of one of the three tracks: coursework option, project option, and thesis option. Specific degree requirements for each of these tracks can

be found under the Program Requirements tab. Students may pursue any program either on a full-time or part-time basis; however, certain restrictions may apply.

Academic and Research Advisors

All nonthesis students are advised by the faculty advisor designated for their respective concentration or program. Students willing to pursue the thesis option must first find a research advisor within their first year of study. The research advisor will guide the students' thesis work, and thesis reader(s) may be assigned at the discretion of their research advisor. The research advisor must be a full-time or jointly appointed faculty. If the research advisor is outside the MIE department, before the thesis option can be approved, a faculty member with 51 percent or more appointments in the MIE department must be chosen as co-advisor, and a petition must be filed and approved by the co-advisor and the MIE Graduate Affairs Committee. Thesis option students are advised by the faculty advisor of their concentration before they select their research advisor(s). The research advisor and co-advisor must serve as thesis readers.

Plan of Study and Course Selection

It is recommended that all new students attend orientation sessions held by the MIE department and the Graduate School of Engineering to acquaint themselves with the coursework requirements and research activities of the department as well as with the general policies, procedures, and expectations.

In order to receive proper guidance with their coursework needs, all MS students are strongly encouraged to complete and submit a fully signed Plan of Study (PS) to the department before enrolling in second-semester courses. This form not only helps the students manage their coursework but it also helps the department to plan for requested course offerings. The PS form may be modified at any time as the students progress in their degree programs.

Students may also petition to waive a core course by demonstrating evidence of their having passed a similar approved IE or OR graduate course. In such situations, the students must first obtain approval from their academic advisor for the course(s) they are planning to substitute.

Students pursuing study or research under the guidance of a faculty member can choose project option by taking Master's Project (OR 7945). An MS project must be petitioned to the MIE Graduate Affairs Committee and approved by both the faculty member (instructor for Master's Project) and the student's academic advisor. The petition must clearly state the reason for taking the project course; a brief description of the goals; as well as the expected outcomes, deliverables, and grading scheme.

Options for MS Students (coursework only, project, or thesis)

Students accepted into any of the MS programs in the MIE department can choose one of the three options: coursework only, project, or thesis. Please see the Program Requirements tab on the top menu of this page for more information. MS students who want to pursue project or thesis options must find, within the first year of their study, a faculty member or a research advisor who will be willing to direct and supervise a mutually agreed research project or MS thesis. Moreover, students who receive financial support from the university in the form of a research, teaching, or tuition assistantship must complete 8 semester hours of thesis option.

Students who complete the thesis option must make a presentation of their thesis before approval by the department. The MS thesis presentation shall be publicly advertised at least one week in advance, and all faculty members and students may attend and participate. If deemed appropriate by the research advisor, other faculty members may be invited to serve as thesis readers to provide technical opinions and judge the quality of the thesis and presentation.

Change of Program/Concentration

Students enrolled in any of the MIE department programs or concentrations may change their current program or concentration no sooner than the beginning of their second full-time semester of study. In order for the program or concentration change request to be considered by the MIE Graduate Affairs Committee, the student must not be in the first semester of their current program, must have a 3.300 GPA, and have completed at least 8 semester hours of required coursework in their sought program at Northeastern.

Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP

Master's Degree in Operations Research with Graduate Certificate in Engineering Leadership

Students may complete a Master of Science in Operations Research in addition to earning a Graduate Certificate in Engineering Leadership (p. 738). Students must apply and be admitted to the Gordon Engineering Leadership Program in order to pursue this option. The program requires fulfillment of the 16-semester-hour curriculum required to earn the Graduate Certificate in Engineering Leadership, which includes an industry-based challenge project with multiple mentors. The integrated 32-semester-hour degree and certificate will require 16 hours of advisor-approved operations research technical courses. For students who concurrently enroll in the Graduate Certificate in Engineering Leadership, 16SH of the certificate coursework may be applied to the elective requirements of this program's coursework option.

GALANTE ENGINEERING BUSINESS PROGRAM

Master's Degree in Operations Research with Graduate Certificate in Engineering Business

Students may complete a Master of Science in Operations Research in addition to earning a Graduate Certificate in Engineering Business (p. 685). Students must apply and be admitted to the Galante Engineering Business Program (<http://galante.sites.northeastern.edu/>) in order to pursue

this option. The program requires the applicant to have earned or be in a program to earn a Bachelor of Science in Engineering from Northeastern University or another accredited university/college within the U.S. The integrated 32-semester-hour degree and certificate will require 16 semester hours of the operations research core courses and 16 semester hours from the outlined business-skill curriculum. The coursework, along with participation in co-curricular professional development elements, earn the Graduate Certificate in Engineering Business.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 6200 or MATH 7241	Engineering Probability and Statistics Probability 1	4
OR 6205	Deterministic Operations Research	4
OR 7245 or MATH 7234	Network Analysis and Advanced Optimization Optimization and Complexity	4
OR 7230 or MATH 7341	Probabilistic Operation Research Probability 2	4

Options

Select one of the following options:

COURSEWORK OPTION

Code	Title	Hours
Complete 16 semester hours from the course list below.		16

PROJECT OPTION

Code	Title	Hours
OR 7945	Master's Project	4
Complete 12 semester hours from the course list below.		12

THESIS OPTION

Code	Title	Hours
OR 7945	Master's Project	4
OR 7990	Thesis (required for all students who receive financial support from the university in the form of a research, teaching, or tuition assistantship)	4
Complete 8 semester hours from the course list below.		8

In addition to completing the thesis course, students must successfully complete the thesis submission process, including securing Committee and Graduate School of Engineering signatures and submission of an electronic copy of their MS Thesis to ProQuest.

Optional Co-op Experience

Code	Title	Hours
Complete the following. Students must complete ENCP 6100 to qualify for co-op experience:		
ENCP 6100	Introduction to Cooperative Education	1
ENCP 6964	Co-op Work Experience	0
or ENCP 6954	Co-op Work Experience - Half-Time	
or ENCP 6955	Co-op Work Experience Abroad - Half-Time	
or ENCP 6965	Co-op Work Experience Abroad	

Course List

Code	Title	Hours
Any course in the following list will serve as an elective course, provided the course is offered and the student satisfies prerequisites and program requirements. Students can take electives outside this list with prior approval from the faculty advisor.		
Civil Engineering and Environmental Engineering		
CIVE 7100	Time Series and Geospatial Data Sciences	
Computer Science		
CS 5800	Algorithms	
CS 6140	Machine Learning	

CS 7805	Complexity Theory
Computer Systems Engineering	
CSYE 7280	User Experience Design and Testing
Data Science	
DS 5220	Supervised Machine Learning and Learning Theory
DS 5230	Unsupervised Machine Learning and Data Mining
General Engineering	
GE 5010	Customer-Driven Technical Innovation for Engineers
GE 5100	Product Development for Engineers
Electrical and Computer Engineering	
EECE 5644	Introduction to Machine Learning and Pattern Recognition
Engineering Management	
EMGT 5220	Engineering Project Management
EMGT 5300	Engineering/Organizational Psychology
EMGT 6225	Economic Decision Making
EMGT 6305	Financial Management for Engineers
Industrial Engineering	
IE 5374	Special Topics in Industrial Engineering (Data Visualization Engineering)
IE 5374	Special Topics in Industrial Engineering (Human Performance in Sociotechnical Systems)
IE 5400	Healthcare Systems Modeling and Analysis
IE 5500	Systems Engineering in Public Programs
IE 5617	Lean Concepts and Applications
IE 6300	Manufacturing Systems Design
IE 7200	Supply Chain Engineering
IE 7215	Simulation Analysis
IE 7275	Data Mining in Engineering
IE 7280	Statistical Methods in Engineering
IE 7285	Statistical Quality Control
IE 7290	Reliability Analysis and Risk Assessment
IE 7315	Human Factors Engineering
Mathematics	
MATH 7233	Graph Theory
MATH 7342	Mathematical Statistics
Operations Research	
OR 6500	Metaheuristics and Applications
OR 7235	Inventory Theory
OR 7240	Integer and Nonlinear Optimization
OR 7270	Convex Optimization and Applications
OR 7310	Logistics, Warehousing, and Scheduling
Or any other IE, OR, MATH, CS, and graduate engineering courses

Minimum 3.000 GPA required

AI Applications, Graduate Certificate (Boston)

As artificial intelligence and machine learning become ubiquitous across industries, workers at all levels are seeking practical knowledge about AI: its implications, limitations, and uses across various domains. The Graduate Certificate in AI Applications is designed for professionals with a broad spectrum of academic and professional expertise seeking to harness the power of AI within their respective industries. The program offers professionals a comprehensive understanding of AI fundamentals and the opportunity to learn to effectively apply AI applications to their own contexts and products. Through a blend of theoretical knowledge and practical skills development, professionals will be equipped with the tools necessary to make informed decisions about when and how to leverage AI technologies.

The curriculum offers instruction on how to leverage AI technologies responsibly, ethically, and effectively within organizations and how to advocate for the responsible use of AI and mitigate risks associated with AI deployment, while also understanding the human-centered aspects of AI development and implementation.

Students are admitted to the certificate program by one of the following colleges and students follow all policies associated with their home college:

- Bouvé College of Health Sciences
- College of Arts, Media, and Design
- College of Engineering
- College of Social Sciences and Humanities
- D'Amore-McKim School of Business
- Mills College at Northeastern

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Required Courses

Code	Title	Hours
ARTG 6460	Human-Centered AI	4
CS 5047	Exploring AI Trends and Tools	4
PHIL 5110	Responsible AI	4

Experiential Courses

Code	Title	Hours

16 total semester hours required

Minimum 3.000 GPA required

Data Analytics Engineering, Graduate Certificate (Boston)

The Data Analytics Engineering Graduate Certificate program focuses on fundamental concepts, tools and techniques to extract information from large data sets in order to support effective decision making. This program is designed to provide opportunities for students to master high-demand data intelligence skills through hands-on experience on data storage, data retrieval, data visualization and prediction.

This four-course graduate certificate enables the students to apply the fundamentals of engineering knowledge and skills to database design, data pre- and post-processing for further analysis, data visualization for impactful infographics, statistical concepts for quantitative analysis and data mining techniques and algorithms for knowledge discovery.

Note: MS in Data Analytics students are not eligible for this graduate certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Courses		
IE 6400	Foundations for Data Analytics Engineering	4
IE 6600	Computation and Visualization for Analytics	4
IE 6700	Data Management for Analytics	4
IE 7275	Data Mining in Engineering	4

Digital Platforms for Service Innovation, Graduate Certificate (Boston)

Digital platforms for providing services are online tools that connect customers with service providers smoothly, enhancing operations by simplifying communication, transactions, and delivery. Examples of digital platforms for service delivery include Uber and Airbnb. The increasing digitization of the economy and resulting growth of digital platforms have dramatically altered how individuals, organizations, and governments exchange and allocate resources. These platforms have disrupted multiple industries; upended labor economics and practices; and fundamentally transformed resource management, asset allocation, and market design. This certificate is designed to provide students with foundational knowledge about the ecosystems around digital platforms and their impact on the equitable distribution of economic opportunities in society.

The transdisciplinary training in this certificate provides students with the capacity to integrate applicable findings and theories in business, policy, and social science with ethical engineering design and practice and, conversely, the ability to succeed in emerging and dynamic work environments that are yet to be regulated and to understand how technological innovations create value for different stakeholders and impact society at large. The certificate is designed for learners who view the digital sharing economy and sociotechnical systems to be central to their future careers.

Curriculum

Differentiated tracks have been created for students coming from social sciences and business backgrounds and students coming from engineering and computer science backgrounds. The certificate requirements consist of a cross-disciplinary training course; an interdisciplinary common core course; and one elective from the following areas: modeling and algorithms, economic and policy analysis, product management, and platform-based business model innovations.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Code	Title	Hours
Course 1		
	Complete a cross-disciplinary training course from the appropriate course 1 option list.	3–4

This requirement offers cross-disciplinary training in one of two areas: in social sciences or business for learners with a background in engineering or computer science and in knowledge engineering for learners with a background in the social sciences or business. Students should complete one of the courses listed below or submit a petition to their advisor for a different course that they believe is suitable. Some options to meet this course 1 requirement are prerequisites of options to meet the course 3 requirement of this program. Students are encouraged to examine course 3 options when planning their course 1 selection.

Course 1 for Learners with Background in Engineering or Computer Science

PHIL 5005	Information Ethics
PHIL 5010	AI Ethics
PPUA 5262	Big Data for Cities
PPUA 6502	Economic Analysis for Policy and Planning

Course 1 for Learners with Background in the Social Sciences or Business

CS 5800	Algorithms
IE 6400	Foundations for Data Analytics Engineering

Course 2

ENGR 6010	Fundamentals of the Platform Economy	4

Course 3

Complete an elective from one of the following elective lists. Students should choose one of the courses listed below or submit a petition for a different course they believe is suitable. Some options to complete this requirement have prerequisites outside the curriculum for this certificate program.

3–4

Modeling and Algorithms Electives

CIVE 7100	Time Series and Geospatial Data Sciences
CIVE 7380	Performance Models and Simulation of Transportation Networks
CIVE 7381	Transportation Demand Forecasting and Model Estimation
CS 5340	Computer/Human Interaction
CS 5800	Algorithms
ECON 5140	Applied Econometrics
EECE 5642	Data Visualization
EECE 5644	Introduction to Machine Learning and Pattern Recognition
EECE 7398	Advanced Special Topics in Electrical and Computer Engineering
IE 6200	Engineering Probability and Statistics
IE 7215	Simulation Analysis
IE 7275	Data Mining in Engineering
OR 6205	Deterministic Operations Research
PPUA 5261	Dynamic Modeling for Environmental Decision Making

Urban Affairs Electives

CIVE 5373	Transportation Systems: Analysis and Planning
CIVE 6566	Sustainable Urban Transportation: Netherlands
CIVE 7385	Public Transportation
PPUA 5262	Big Data for Cities
PPUA 5263	Geographic Information Systems for Urban and Regional Policy
PPUA 5265	Global Urbanization and Planning
PPUA 5266	Urban Theory and Science
PPUA 6201	The 21st-Century City: Urban Opportunities and Challenges in a Global Context
PPUA 7237	Advanced Spatial Analysis of Urban Systems

Policy and Regulation Electives

ENSY 5000	Fundamentals of Energy System Integration
PPUA 5260	Ecological Economics
PPUA 5264	Energy Democracy and Climate Justice: Technology, Policy, and Social Change
PPUA 6500	Principles of Public Administration
PPUA 6502	Economic Analysis for Policy and Planning
PPUA 6506	Techniques of Policy Analysis

Energy and Environment Electives

CIVE 5363	Climate Science, Engineering Adaptation, and Policy
CIVE 5699	Special Topics in Civil Engineering

Product Management and Platform-Based Business Model Innovations Electives

EMGT 6225	Economic Decision Making
ENTR 6218	Business Model Design and Innovation
MKTG 6200	Creating and Sustaining Customer Markets
MKTG 6214	New Product Development
MKTG 6283	Marketing and Selling Innovation

Students who complete the requirements above at less than the required 12 semester hours for this certificate should consult with their advisor regarding 1-semester-hour and/or 2-semester-hour course options to complete program requirements.

Program Credit/GPA Requirements

12 total semester hours required

Minimum 3.000 GPA required

Energy Systems, Graduate Certificate (Boston)

The Graduate Certificate in Energy Systems focuses on the combination of analysis and integration of energy systems engineering technology with financial planning and attention to business aspects and effective implementation.

This four-course graduate certificate seeks to offer students opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems to propose effective and efficient technology solutions based on data-driven and economic-based decisions.

Note: Students enrolled in the master's in energy systems program are not eligible for this graduate certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
EMGT 6225	Economic Decision Making	4
EMGT 6305	Financial Management for Engineers	4
ENSY 5000	Fundamentals of Energy System Integration	4

Elective

Code	Title	Hours
Complete one of the following course, provided any prerequisites have been satisfied. Electives outside this list may be taken with prior approval from the faculty advisor.		4

ENSY 5100	Hydropower
ENSY 5200	Energy Storage Systems
ENSY 5300	Electrochemical Energy Storage
ENSY 5400	Power Plant Design and Analysis
ENSY 5500	Smart Grid
ENSY 5585	Wind Energy Systems
ME 5685	Solar Thermal Engineering

Engineering Business, Graduate Certificate (Boston)

The Graduate Certificate in Engineering Business is part of the Galante Engineering Business Program. The Galante Engineering Business Program offers a progressive opportunity for engineering students to complement their technical engineering education with business skills. Galante is founded on the values of student engagement and leadership to strengthen interpersonal and professional skills.

The certificate seeks to provide students opportunities to apply the technical aspects of an engineering skill foundation in corporate settings through both academic and programmatic elements. Programmatic elements include workshops, speaker series, site visits, seminars, and other related personal and professional development activities as a connected cohort. These activities equip students to manage projects, lead people, make data-driven and market-based decisions, and advance economically sound initiatives.

The Galante Engineering Business Program can be completed concurrently with the following degree programs:

- MSBioE Bioengineering with Concentration in Biomedical Devices and Bioimaging (p. 493) (Boston)
- MSChE Chemical Engineering (p. 509) (Boston)
- MSCivE Civil Engineering with Concentration in Construction Management (p. 526) (Boston)
- MS Data Analytics Engineering (p. 628) (Boston)
- MSECE Electrical and Computer Engineering with Concentration in Computer Vision, Machine Learning, and Algorithms (Boston)
- MSECE Electrical and Computer Engineering with Concentration in Hardware and Software for Machine Intelligence (p. 601) (Boston)
- MSEM Engineering Management (p. 655) (Boston)
- MS Human Factors (p. 638) (Boston)
- MSIE Industrial Engineering (p. 651) (Boston)
- MSME Mechanical Engineering with Concentration in Mechatronics (p. 672) (Boston)
- MSOR Operations Research (p. 677) (Boston)

The Graduate Certificate in Engineering Business requires 15 semester hours from four courses across three categories. Students should consult with a COE advisor whether any courses completed for this certificate may also fulfill requirements of the student's concurrent master's program.

Refer to the Galante Engineering Business Program webpage (<https://galante.sites.northeastern.edu/>) for additional details and description.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Complete four courses from at least three of the following categories. A maximum of one course offered by a college outside the College of Engineering may be applied to this requirement:		15
Business Innovation Development		
BIOE 5810	Design of Biomedical Instrumentation	
BIOE 5820	Biomaterials	
EMGT 6700	Digital Product Design and Management	
ENTR 6212	Business Planning for New Ventures	
ENTR 6218	Business Model Design and Innovation	
ENTR 6241	Entrepreneurial Marketing and Selling	
ENTR 6300	Managing a Technology-Based Business	
ENTR 6340	The Technical Entrepreneur as Leader	
GE 5010	Customer-Driven Technical Innovation for Engineers	
GE 5020	Engineering Product Design Methodology	
GE 5030	Iterative Product Prototyping for Engineers	
GE 5100	Product Development for Engineers	
INNO 6200	Enterprise Growth and Innovation	
NNMD 5470	Nano/Biomedical Commercialization: Concept to Market	
Organizational Excellence		
BIOE 5250	Regulatory and Quality Aspects of Medical Device Design	
EMGT 5300	Engineering/Organizational Psychology	
EMGT 6600	Engineering Team Performance	
ENTR 6250	Lean Design and Development	
IE 5617	Lean Concepts and Applications	
SCHM 6201	Operations and Supply Chain Management	
SCHM 6223	Managing Healthcare Supply Chain Operations	
PHIL 5010	AI Ethics	
Financial Analysis		
ACCT 6200	Financial Reporting and Managerial Decision Making 1	
BIOE 5510	Bioengineering Products/Technology Commercialization	
EECE 5670	Sustainable Energy: Materials, Conversion, Storage, and Usage	
EMGT 5220	Engineering Project Management	
EMGT 6225	Economic Decision Making	
EMGT 6305	Financial Management for Engineers	
Information and Business Analysis		
IE 7300	Statistical Learning for Engineering	
or BIOE 5860	Engineering Approaches to Precision Medicine I	
or BIOE 5880	Computational Methods in Systems Bioengineering	
or CS 6140	Machine Learning	
or CS 6220	Data Mining Techniques	
or DA 5030	Introduction to Data Mining/Machine Learning	
or EECE 5644	Introduction to Machine Learning and Pattern Recognition	
DAMG 6210	Data Management and Database Design	
or IE 6700	Data Management for Analytics	
DS 5110	Essentials of Data Science	
IE 5640	Data Mining for Engineering Applications	
or IE 7275	Data Mining in Engineering	
or CS 6220	Data Mining Techniques	
IE 6600	Computation and Visualization for Analytics	

or EECE 5642

Data Visualization

Business Analysis and Information Engineering

Program Credit/GPA Requirements

15 total semester hours required

Minimum 3.000 GPA required

Engineering Economic Decision Making, Graduate Certificate (Boston)

The Graduate Certificate in Engineering Economic Decision Making focuses on developing economic decision-making skills in the context of engineering operations and projects with attention to decision-making models, causes of risk and uncertainty, decisions under uncertainty, and ways to change and influence the degree of risk and uncertainty.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to build decision-making models and to make data-driven, financial-based, and economic-based decisions.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
EMGT 6225	Economic Decision Making	4
EMGT 6305	Financial Management for Engineers	4
IE 6200	Engineering Probability and Statistics	4
OR 6205	Deterministic Operations Research	4

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Engineering Management, Graduate Certificate (Boston)

The Graduate Certificate in Engineering Management focuses on bridging the gaps between the fields of engineering, technology, and business with a focus on the art and the science of planning, organizing, allocating, directing, and controlling the activities and resources of organizations engaged in engineering activities and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills in a management setting to build decision-making models and make data-driven and/or economic-based decisions.

Note: Students enrolled in the master's in engineering management program are not eligible for this graduate certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Courses		
EMGT 5220	Engineering Project Management	4
EMGT 6225	Economic Decision Making	4
IE 6200	Engineering Probability and Statistics	4

Elective

Code	Title	Hours
Complete one of the following, provided any prerequisites have been satisfied. Electives outside this list may be taken with prior approval from the faculty advisor:		
EMGT 5300	Engineering/Organizational Psychology	4
EMGT 6305	Financial Management for Engineers	
OR 6205	Deterministic Operations Research	

Program Credit/GPA Requirements

16 total semester hours required
Minimum 3.000 GPA required

Lean Six Sigma, Graduate Certificate (Boston)

The Graduate Certificate in Lean Six Sigma focuses on enhancing engineering knowledge and skills with the fundamentals of lean manufacturing thinking and six sigma concepts to improve business processes through optimizing flow, eliminating waste, and emphasizing quality.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of lean six sigma concepts across an enterprise to contribute to an organization's continuous improvement initiatives by identifying and employing lean and quality tools and techniques, along with utilizing statistical methods to achieve quality control.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 5617	Lean Concepts and Applications	4
IE 6200	Engineering Probability and Statistics	4
IE 7280	Statistical Methods in Engineering	4
IE 7285	Statistical Quality Control	4

Program Credit/GPA Requirements

16 total semester hours required
Minimum 3.000 GPA required

Renewable Energy, Graduate Certificate (Boston)

The Graduate Certificate in Renewable Energy focuses on the combination of analysis and integration of energy systems engineering technology with key renewable engineering technology, including solar and wind generation, with environmental protection and manufacturing considerations.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems with a specific focus on renewable energy technologies along with EPA regulatory structure, including the LEED certification program, as well as industrial ecology, including life-cycle analysis and technical cost modeling.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
ENSY 5000	Fundamentals of Energy System Integration	4
ENSY 5585	Wind Energy Systems	4
ME 5685	Solar Thermal Engineering	4

Elective

Code	Title	Hours
Complete one of the following, provided any prerequisites have been satisfied. Electives outside this list may be taken with prior approval from the faculty advisor:		4
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5500	Smart Grid	

Program Credit/GPA Requirements

16 total semester hours required
Minimum 3.000 GPA required

Software Engineering Systems, Graduate Certificate (Boston)

The Graduate Certificate in Software Engineering Systems focuses on the sociotechnical approach to software engineering with attention on using engineering tools and considering real-world complexities to design and construct practical and viable software solutions.

This four-course graduate certificate is designed to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to software development with attention on enterprise design and integration, secure systems design and creation, and data integration and architecture.

Note: Master of Science in Software Engineering Systems students are not eligible for this graduate certificate.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
Required Courses		
CSYE 6200	Concepts of Object-Oriented Design	4
INFO 6205	Program Structure and Algorithms	4

Electives

Code	Title	Hours
Complete two of the following:		8
CSYE 6225	Network Structures and Cloud Computing	
CSYE 7215	Foundations of Parallel, Concurrent, and Multithreaded Programming	
CSYE 7280	User Experience Design and Testing	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Supply Chain Engineering Management, Graduate Certificate (Boston)

The Graduate Certificate in Supply Chain focuses on acquiring and applying the knowledge and skills associated with designing, analyzing, managing, and improving supply chains within technology companies with attention on optimizing parts of a supply chain for effective and efficient functioning.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to supply chains using deterministic and probabilistic decision-making models, lean concepts, mass customization principles, and methods of manufacturing including logistics, warehousing, and scheduling.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
IE 5617	Lean Concepts and Applications	4
IE 7200	Supply Chain Engineering	4

Electives

Code	Title	Hours
Complete two of the following, provided any prerequisites have been satisfied. Electives outside this list may be taken with prior approval from the faculty advisor:		8
EMGT 5300	Engineering/Organizational Psychology	
IE 6200	Engineering Probability and Statistics	
IE 6300	Manufacturing Systems Design	
OR 7310	Logistics, Warehousing, and Scheduling	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Sustainable Energy Systems, Graduate Certificate (Boston)

The Graduate Certificate in Sustainable Energy Systems focuses on the integration of energy systems engineering technology with sustainable building systems, including the design and operation of buildings with minimal energy and environmental impact.

This four-course graduate certificate seeks to provide students with opportunities to apply the fundamentals of engineering knowledge and skills to analyze energy systems as they relate to sustainable engineering building design with a focus on renewable energy with LEED certification or with a focus on industrial ecology, including life-cycle analysis and technical cost modeling.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
SBSY 5200	Sustainable Engineering Systems for Buildings	4
ENSY 5000	Fundamentals of Energy System Integration	4

Electives

Code	Title	Hours
Complete two of the following, provided any prerequisites have been satisfied. Electives outside this list may be taken with prior approval from the faculty advisor:		8
ENSY 5100	Hydropower	
ENSY 5200	Energy Storage Systems	
ENSY 5300	Electrochemical Energy Storage	
ENSY 5585	Wind Energy Systems	
ME 5685	Solar Thermal Engineering	

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Technology Systems Management, Graduate Certificate (Boston)

The Graduate Certificate in Technology Systems Management focuses on bridging the fields of technology, engineering, and business with a focus on the art and the science of managing organizational activities, including project and human resources engaged in engineering and technology development.

This four-course graduate certificate seeks to provide students with opportunities to apply technological knowledge and skills in a management setting to make data-driven, financial-based, and economic-based decisions.

Note: This certificate is for graduate engineering students as well as non-engineers and non-graduate engineering students.

Program Requirements

Complete all courses and requirements listed below unless otherwise indicated.

Core Requirements

Code	Title	Hours
EMGT 5220	Engineering Project Management	4
EMGT 5300	Engineering/Organizational Psychology	4
EMGT 6225	Economic Decision Making	4
EMGT 6305	Financial Management for Engineers	4

Program Credit/GPA Requirements

16 total semester hours required

Minimum 3.000 GPA required

Multidisciplinary Programs

Website (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/>)

Dana Research Center, 5th Floor

The multidisciplinary graduate engineering Master of Science programs integrate engineering solutions from the fields of technology and business by developing technical and engineering skills through advanced coursework and complex technical projects. Each program focuses on the application of knowledge and skills to business and industrial settings. The software, data, and network systems programs blend academic and corporate experience to enable students to enhance their professional capabilities, thereby facilitating career transformation. Given an applied focus, each program provides learning opportunities to develop the skills needed to create innovative, practical, and effective solutions that can be easily applied to current professional challenges.

The multidisciplinary graduate engineering programs are designed to prepare students for direct entry into the workforce. Students who are seeking preparation for entry into PhD programs should consider specific department MS programs (p. 460) aligned with their research interests.

Graduate Certificate Options

Students enrolled in a graduate degree program in the College of Engineering have the opportunity to pursue an engineering graduate certificate in addition to or in combination with the MS degree. For more information please refer to Graduate Certificate Programs (p. 770).

GORDON INSTITUTE OF ENGINEERING LEADERSHIP OPTION

Students have the opportunity to pursue the Gordon Engineering Leadership Program (p. 1349) in combination with the MS degree.

Programs

Master of Science in Information Systems (MSIS)

-
- Information Systems (Boston) (p. 693)
- Information Systems (Arlington) (p. 692)
- Information Systems (Miami) (p. 695)
- Information Systems (Oakland) (p. 697)
- Information Systems (Portland) (p. 698)
- Information Systems (Seattle) (p. 700)
- Information Systems (Silicon Valley) (p. 701)
- Information Systems (Toronto) (p. 702)
- Information Systems (Vancouver) (p. 704)
- Information Systems—Bridge (Boston) (p. 710)
- Information Systems—Bridge (Arlington) (p. 708)
- Information Systems—Bridge (Miami) (p. 711)
- Information Systems—Bridge (Oakland) (p. 713)
- Information Systems (p. 713)— (p. 713) Bridge (Portland) (p. 713)
- Information Systems—Bridge (Seattle) (p. 714)
- Information Systems—Bridge (Silicon Valley) (p. 716)
- Information Systems—Bridge (Toronto) (p. 716)
- Information Systems—Bridge (Vancouver) (p. 719)
- Information Systems—Bridge—Online (p. 721)
- Information Systems—Online (p. 706)

Master of Science (MS)

- Cyber-Physical Systems (Boston) (p. 722)
- Cyber-Physical Systems (Toronto) (p. 723)
- Data Architecture and Management (Boston) (p. 724)
- Data Architecture and Management (Seattle) (p. 725)
- Data Architecture and Management (Toronto) (p. 728)
- Software Engineering Systems (Boston) (p. 732)
- Software Engineering Systems (Arlington) (p. 730)
- Software Engineering Systems (Toronto) (p. 733)
- Telecommunication Networks (Boston) (p. 735)

Graduate Certificates

-
- Blockchain and Smart Contract Engineering (Boston) (p. 737)
- Blockchain and Smart Contract Engineering (Arlington) (p. 737)
- Broadband Wireless Systems (Boston) (p. 738)
- Engineering Leadership (Boston) (p. 738)
- IP Telephony Systems (Boston) (p. 740)
- Medical Software Engineering (Boston) (p. 740)
- Software Engineering Systems (Boston) (p. 689)
- Software Engineering Systems (Arlington) (p. 741)

Information Systems, MSIS (Arlington)

We offer cutting-edge expertise in a variety of courses that combine technological advances and business practices. We stress creative and inventive approaches to problem solving, which necessitates empowering students so that they can take charge of their own software projects to become originally productive. Our information systems program (<https://coe.northeastern.edu/academics-experiential-learning/academic-departments/mgen/ms-insy/>) is as much an art as a science. It bypasses mechanical learning and highlights the value and excitement of engineering thinking that gets things done efficiently as well as imaginatively. We balance theory and practice, on the premise that they are always intertwined and interdependent.

We seek to provide a basic foundation for our students and then seek to push them to new heights to advance their information technology skills in a way that keeps up and, better yet, exceeds the necessarily fast pace of this progressive field. It is not for us just a question of not being left behind; we strive to be at the forefront of software innovation in an effort to transform contemporary society even more radically than technology has already done—to take gigantic strides in business, medicine, education, and security.

The program offers a wide range of courses that reflect current and future industry trends:

- Cryptocurrency and Smart Contract Engineering
- Engineering of Big-Data Systems
- Business Intelligence and Data Analytics
