

Advanced Accounting, Undergraduate Certificate (Boston)

The certificate program in advanced accounting is designed for those individuals who already possess an understanding of accounting principles and would like to prepare for an accounting-related career such as auditing, financial analysis, taxation, budgeting and control, cost accounting, or asset management.

This program can be paired with additional course work to meet the minimum CPA educational requirements for those possessing an approved bachelor's degree and meeting all other CPA exam requirements. In addition, the certificate provides nonaccounting managers with a solid foundation in accounting practices relative to new legislation that requires executives to be responsible for the financial statements and internal controls of their organizations.

Students enrolled in the Bachelor of Science in Finance and Accounting Management degree program are not eligible for this certificate program.
