

Business Administration and Design, BS (Oakland)

The combined major in business administration and design integrates the theory and practice of management through active learning and problem-driven research with the practice of understanding humans, their surrounding contexts and systems, and designing alternative futures. Students are well prepared through business foundations in accounting, innovation, marketing, management, and organizational behavior, with the opportunity to concentrate in a specific area of business.

The program also offers students a choice of design options: experience design, a holistic and integrative approach that focuses on the quality of the human experience in concrete situations; graphic design, the integration of text and image to communicate critical concepts; information design, the visualization and physicalization of data to enhance human understanding of complex knowledge; or interaction design, the creation of navigable interfaces and systems that allow audiences to take an active role to achieve meaningful goals.
