

Master of Nursing Paediatric Nursing Track

Occasional Student Enrollment (2025-2026)

The Master of Nursing (MNurs) Programme offers different study tracks in advancing students' career in different nursing specialties. The **Paediatric Nursing Track** is developed in close consultation with clinical partners and professional association with an aim to prepare nurses for advanced nursing practice in paediatric field.

Registered Nurses who are keen to advance their knowledge and skills in paediatric nursing are welcome to take the following courses as Occasional Students

NURS8266 Neonatal Care Nursing

This course examines the latest advanced nursing care on high-risk neonates ranging from common neonatal health problems with high dependency to critically unwell conditions, in a baby-friendly environment. The perinatal, biological, and pathophysiological risk factors are critically examined and related to the preventive measures and newborn assessment. With the evidence-based knowledge in the interpretation of advanced investigations, pharmacology, medical treatment and advanced technology in contemporary neonatal care, and family-centred care for the high-risk newborns will be strengthened. Parental education on long-term care to support the infants' nutrition, growth, neurological development and complex care needs will be emphasized.

Tentative Schedule:

Semester 1: September 10, to December 3, 2025
(Wednesday, 18:00-21:00) [Total 30 Contact Hours]

NURS8268 Child and Adolescent Health Nursing

This course examines the developmental stages and individual needs of the child and adolescent, as well as contemporary health issues related to child and adolescent. Growth and development of infants, children and adolescents; health assessment and health issues from regional and global perspectives are addressed to broaden the scope and understanding of child health.

Tentative Schedule:

Semester 2A: January to April 2026
(Wednesday, 18:00-21:00) [Total 30 Contact Hours]

NURS8271 Paediatric Nursing

This course explores nursing care for sick children ranging from infants to adolescents. This course aims to enhance the clinical judgement and decision making by equipping students' with the expanded knowledge on the applied pathophysiology, interpretation of the investigations, pharmacology, and evidence-based management to care the children with complex health needs and / or life-threatening conditions.

Tentative Schedule:

Semester 2B: May to July 2026
(Wednesday, 18:00-21:00) [Total 30 Contact Hours]
