Concours Fryer
(9^e année – Sec. III)

Galois Contest
(Grade 10)

Concours Galois
(10^e année – Sec. IV)

Hypatia Contest
(Grade 11)

Concours Hypatie
(11^e année – Sec. V)

The Centre for Education in Mathematics and Computing is pleased to announce the results of the 2025 Fryer, Galois and Hypatia Contests. Our congratulations go to all who participated.

Le Centre d'éducation en mathématiques et en informatique à d'annoncer les résultats des Concours Fryer, Galois et Hypatie 2025. Nos félicitations vont à tous les participants de cette année.

Key statistics:

- Fryer Average = 23.4
- Fryer School Medal Cutoff = 23
- Fryer Certificate of Distinction Cutoff = 28

- Galois Average = 23.2
- Galois School Medal Cutoff = 23
- Galois Certificate of Distinction Cutoff = 27

- Hypatia Average = 25.1
- Hypatia School Medal Cutoff = 25
- Hypatia Certificate of Distinction Cutoff = 30

Statistiques principales:

- Moyenne du Fryer = 23,4
- Note de passage: Médaille du championnat de l'école du Fryer = 23
- Note de passage: Certificat de distinction du Fryer = 28

- Moyenne du Galois = 23,2
- Note de passage: Médaille du championnat de l'école du Galois = 23
- Note de passage: Certificat de distinction du Galois = 27

- Moyenne du Hypatie = 25,1
- Note de passage: Médaille du championnat de l'école du Hypatie = 25
- Note de passage: Certificat de distinction du Hypatie = 30

Note: The names of some participants with sufficiently high scores do not appear on the Honour Rolls. In each case, this is because the participants were either unofficial or opted out of having their name displayed. The CEMC does not change these statuses after the fact.

Note: Les noms de certaines personnes participantes ayant obtenu des scores suffisamment élevés ne figurent pas dans les palmarès présentés. Dans chaque cas, cela s'explique par le fait que ces personnes participantes n'étaient pas officielles ou qu'elles n'ont pas souhaité que leur nom figure sur le palmarès. Le CEMI ne modifie pas ces statuts après coup.

Fryer Contest

1. Average: 9.4

This question was very well done by most students. Most errors either came from arithmetic errors, algebra errors, or in the case of part (c), misunderstanding the question.

2. Average: 7.8

This question was also very well done. Students who used a table similar to the one given on the question generally fared well. In the early parts, some common mistakes were incorrect arithmetic, not considering the correct number of games, or assuming that not every game ended in a tie. In the final part, some students missed the condition that a tie is always one point for each player and assumed it was half the value of a win for each player.

3. Average: 3.5

The wording of this question seemed to be challenging for many students. In part (b), many students misused the condition that $20d$ should be a divisor of 3600 leading to the inclusion of incorrect values. In part (c), some students thought 9 and 1 were prime numbers.

4. Average: 2.7

Students struggled with this question. In part (a), many students had ideas of how to compute areas, but ran into trouble. Some students forgot the $\frac{1}{2}$ in the formula for the area of a triangle. In part (b), many students missed $(1, 2)$ and $(8, 2)$ as points on the parallelogram with integer coordinates. Some students also missed the condition that the area of the triangle should be positive. Very few students made progress on part (c). It was difficult to categorize the triangles to simplify the count.

Galois Contest

1. Average: 9.2

This questions was generally well done. Some students concluded $n = 5$ in part (c) because they thought they should round the average.

2. Average: 8.2

This questions was well done using a variety of correct approaches.

3. Average: 4.7

Parts (a) and (b) were well done, but most students struggled with part (c). A common error in part (c) was to fail to reject incorrect solutions corresponding to lines that do not intersect the rectangle.

4. Average: 1.1

Most students struggled with this question, though there were a number of correct answers to part (a). Correct answers to parts (b) and (c) were rare.

Hypatia Contest

1. Average: 8.3

This question was generally done well. The most common difficulty for students was in part (c), where some students struggled to set up a correct equation in the variable t .

2. Average: 8.8

This question was generally well done. The most common mistakes were caused by a misunderstanding of what “percentage increase” and “percentage decrease” mean.

3. Average: 3.8

Part (a) was well done, but students had trouble with parts (b) and (c). It was rare to see students use the relationship between the roots of a polynomial and its coefficients (sometimes referred to as Vieta's formulas). Those that did use this relationship tended to make progress in parts (b) and (c). The other common correct approach was to use the quadratic formula to explicitly compute roots and find x -coordinates of the intersection points. This approach was more successful in part (c) than it was in part (b).

4. Average: 4.2

Part (a) was done well. In part (b) a common error was to include pairs that do not actually give a geometric sequence. There were very few complete and correct solutions to part (c). Among the students who made significant progress in part (c), the most common error was to assume that the common ratio must be an integer.

Please visit our website at cemc.uwaterloo.ca to download the 2025 Fryer, Galois and Hypatia Contests, plus full solutions.

Concours Fryer

1. Moyenne: 9,4

Cette question a été très bien réussie par la plupart des élèves. La plupart des erreurs provenaient soit d'erreurs d'arithmétique, soit d'erreurs d'algèbre, soit, dans le cas de la partie (c), d'une mauvaise compréhension de la question.

2. Moyenne: 7,8

Cette question a également été très bien réussie. Les élèves qui ont utilisé un tableau similaire à celui donné dans la question ont généralement bien réussi. Dans les premières parties, les erreurs les plus fréquentes étaient des calculs incorrects, le fait de ne pas prendre en compte le nombre correct de parties ou de supposer que toutes les parties ne se terminaient pas par une égalité. Dans la dernière partie, certaines et certains élèves n'ont pas tenu compte de la condition selon laquelle une égalité rapporte toujours un point à chaque joueur et ont supposé qu'elle représentait la moitié de la valeur d'une victoire pour chaque joueur.

3. Moyenne: 3,5

La formulation de cette question a semblé poser problème à de nombreuses et nombreux élèves. Dans la partie (b), beaucoup d'élèves ont mal utilisé la condition selon laquelle $20d$ doit être un diviseur de 3600, ce qui a conduit à l'inclusion de valeurs incorrectes. Dans la partie (c), une partie des élèves pensaient que 9 et 1 étaient des nombres premiers.

4. Moyenne: 2,7

Les élèves ont eu du mal à répondre à cette question. Dans la partie (a), de nombreuses et nombreux élèves avaient des idées sur la façon de calculer les aires, mais ont rencontré des difficultés. Certaines et certains élèves ont oublié le $\frac{1}{2}$ dans la formule de l'aire d'un triangle. Dans la partie (b), de nombreux étudiants ont oublié que les points $(1,2)$ et $(8,2)$ étaient des points du parallélogramme avec des coordonnées entières. Certains élèves ont également oublié la condition selon laquelle l'aire du triangle doit être positive. Très peu d'élèves ont progressé dans la partie (c). Il était difficile de catégoriser les triangles pour simplifier le décompte.

Concours Galois

1. Moyenne: 9,2

Cette question a été bien réussie dans l'ensemble. Certaines et certains élèves ont conclu que dans la partie (c) en pensant que la moyenne devait être arrondie.

2. Moyenne: 8,2

Cette question a été bien réussie en utilisant une variété d'approches correctes.

3. Moyenne: 4,7

Les parties (a) et (b) ont été bien réussies, mais la plupart des élèves ont eu des difficultés avec la partie (c). Une erreur fréquente dans la partie (c) a été de ne pas rejeter les solutions incorrectes correspondant à des lignes qui ne coupent pas le rectangle.

4. Moyenne: 1,1

La plupart des élèves ont eu du mal à répondre à cette question, bien qu'il y ait eu un certain nombre de réponses correctes à la partie (a). Les réponses correctes aux parties (b) et (c) ont été rares.

Concours Hypatie

1. Moyenne: 8,3

Cette question a été généralement bien réussie. La difficulté la plus fréquente pour les élèves était dans la partie (c), où certaines et certains élèves ont rencontré des difficultés à poser une équation correcte de la variable t .

2. Moyenne: 8,8

Cette question a été généralement bien réussie. Les erreurs les plus fréquentes sont dues à une mauvaise compréhension des notions de "pourcentage d'augmentation" et de "pourcentage de diminution".

3. Moyenne: 3,8

La partie (a) a été bien réussie, mais les élèves ont eu des difficultés avec les parties (b) et (c). Les élèves ont rarement utilisé la relation entre les racines d'un polynôme et ses coefficients (parfois appelée formule de Viète pour les polynômes). Celles et ceux qui ont utilisée cette relation ont eu tendance à progresser dans les parties (b) et (c). Une autre approche correcte fréquente consistait à utiliser la formule quadratique pour calculer explicitement les racines et trouver les coordonnées x des points d'intersection. Cette approche a été mieux réussie dans la partie (c) que dans la partie (b).

4. Moyenne: 4,2

La partie (a) a été bien réussie. Dans la partie (b), une erreur fréquente a été d'inclure les paires qui ne donnent pas réellement une suite géométrique. Il y a eu très peu de solutions complètes et correctes dans la partie (c). Parmi les élèves qui ont fait des progrès significatifs dans la partie (c), l'erreur la plus fréquente a été de supposer que la raison devait être un nombre entier.

Veillez visiter notre site Web à cemc.uwaterloo.ca pour télécharger les concours Fryer, Galois et Hypatie 2025, avec solutions complètes.
