

GASTROENTERITIS (GAE)

Course in gastroenteritis (GAE) is offered by the Faculty of Medicine

GAE 6101 Courses in Gastro-Enterology (2 units)

The residents in Gastro-Enterology are exposed to pathophysiology lectures covering most aspects of gastro-intestinal conditions. They deal with liver functions and their pathology; portal hypertension, lipid digestion and absorption, intestinal water and electrolyte absorption. They also cover the pathogenesis of peptic ulcer diseases and its management as well as the pathophysiology of irritable bowel syndrome.

Course Component: Lecture
