Tutor assistance and outside help during the stay in Russia

WHAT ARE INTERNATIONAL SCHOOLS?

International Schools of Samara National Research University are short-term educational programs for students from 2015. Samara University (is in top-10 universities in Russia) organizes this two-week school in two variant of format (online/offline).

2000+ participants

65+ countries

Study and cultural parts

WHY SAMARA UNIVERSITY?

Samara National Research University is the leading and most dynamically developing Russian university.

For many years, Samara University has been inextricably linked with the overall industrial and economic development of the Samara region, which is one of the leading domestic and world centers of aerospace technologies.

INSTITUTES

- Aerospace Engineering
- Engines and Power Plant Engineering
- IT and Cybernetics
- Natural Sciences
- Economics and Management
- Social Sciences and Humanities
- Law

WHY SAMARA CITY?

- Rich History of Russia in the City: Monasteries, Stalin's Bunker, High Concentration of Sightseeings
- Resort City on the Volga River: Sandy Beaches, Boat Trips, Surfing, River Rafting, Swimming
- Space Capital: Fascinating World of Cosmonautics, Museums, and a Real Rocket
- Cultural Diversity: Russian Ballet, Multiple Theaters, Numerous Museums
- Gastronomic Delight: Top 5 City in Terms of Number of Restaurants and Cafes with Various Cuisines
- Natural Wonders: Nature Reserve, Samarskaya Luka National Park, Mountain Viewpoints

EXCURSIONS

- Airfield of Samara University (30 planes and helicopters incl. supersonic jet)
- Visit to Stalin's Bunker
- Space and Aircraft Engines Museum
- Museum of Aeronautics and Cosmonautics
- Railway Museum
- Russian Ethnographical Museum
- Smart House of Butterflies
- Bus Tour to a Russian Plant

MASTER CLASSES

- Cooking Russian National Dishes
- Creating Ritual Martenichki Dolls with Threads

CAMPUS

- Testing Rock-Climbing Wall
- Outdoors and Indoors Sports Facilities

TOURS

- River Cruise on the Volga river to Shuryaevvo Village
- Walking Tour around Shiryaevo Village and National Park
- Bus Tour to Nature Landmark Tsarev Kurgan

SUMMER LEISURE

- Picnic on the Beach with Samara Students
- Swimming in the Volga River
- Visiting the Parks and Public Spaces

ADDITIONAL PROGRAM*

Additional Program is a 4-day optional cultural touristic program to Moscow and Saint Petersburg.

- Day 0: Travel by night train from Samara to Moscow
- Day 1: Arrival to Moscow, Bus Sightseeing Tour around Moscow, Departure to St. Petersburg by Train, Check-in to the hostel
- Day 2: Bus Sightseeing Tour around St. Petersburg, Overlook a Drawbridge
- Day 3: Visit to Peterhof Palace, Garden, Park and Gulf of Finland
- Day 4: Tour along Channels of St. Petersburg, Visit to the Winter Palace (Hermitage Museum)
- Day 5: Departure from St. Petersburg to home country

TUITION FEE DEFINITION

Tuition fee for on-campus international school covers the following.

- Educational program under the timetable (4+ hours per day)
- Arrival and departure transfers at the Samara airport
- Accommodation at the hotel (2-3 students in a room)
- 2-time meals (breakfast and lunch)
- Excursions, tours with transfers, entrance to museums
- Social and entertainment activities
- School merch, hand-made souvenirs
- Tutor assistance during the stay in Russia

* Additional program to Moscow and St. Petersburg is optional and not included in the fee

Russian Language and Culture

You will speak Russian after this school! Successful Russian language study is the study with native speakers! Meet native speakers, find out more about Russian culture and Russian people's set of mind. The school is held in English and Russian. Students are divided into groups depending on the knowledge of Russian language.

The topics of Russian language classes cover alphabet, consonants and vowels, numeral, greetings and goodbye, basic phrases, professional vocabulary, topics of students' interests etc.

We will take you to play Russian famous games, walk with you along vivid streets and show the most beautiful places of the city, visit Space museum and other exclusive sites of Samara.

Along with language classes, the school offers courses on history and culture of Russia, master classes on making Russian food and souvenirs.

High Technology Management

Students with different backgrounds will get new knowledge and skills of hi-tech enterprises' management. During the studies, students will be working on a group hi-tech/digital project.

The core of the program consists in learning modern tools of project management, effective usage of lean manufacturing in high technology companies and researching the pressing issues in management, communication and marketing.

The lecturers and coaches will teach you how to create business plan, how to predict and analyze various risks, how to exercise design thinking and implement it in a project work, how to use agility in solving professional tasks.

Our friendly international schools team, entrepreneurs and mentors will lead the participants throughout the process, thus they can take a maximum of it.

3D Printing Technologies and Design Thinking

The program is suitable for students and engineers interested in additive manufacturing for real-world industrial applications. You will learn 3D modeling and create your own product. You will discover how to choose the 3D printing process and materials to maximize your profits. You will be able to innovate in your organization or accelerate your career with additive manufacturing!

The school provides a unique opportunity to focus on additive manufacturing and digital process modeling, additive design and manufacturing in space and mechanical engineering. In addition, thanks to creative thinking, you will have the opportunity to learn how to think outside the box when solving complex problems.

You will learn about modern CNC machines, technological equipment, and the main types of machine tools for modern production.

You will learn about each of the commercial AM technologies and understand how they work, the compatibility of materials, and the possibilities of application.

Production and Testing of Aircraft Engines

Production and Testing of Aircraft Engines School of Samara University is an international project that brings together undergraduate and graduate students from around the world.

The program is aimed at training students in the development, calculation, design and production of aircraft engines and gas turbine power plants. Type of future professional activity of participants of this school is design and creation of aircraft engines.

This short-term program attracts everyone who is interested in studying the problems of creating new types of equipment in aviation, space and engine construction.

In addition, we are pleased to present an interesting program to the students with a visit to the aircraft engine research center and the training airfield of Samara University. The program also includes an entertainment part with tours, ethnographic lectures and museum visits.
