### Schulich School of Engineering Guidelines for Student Trip Room Arrangements

*Fall 2024*

The Schulich School of Engineering aims to create an inclusive community where students can feel comfortable during overnight activities. This policy applies to all student clubs and teams that are supported with SSE resources, including advising, space, and funding.

Trip logistics and bookings must adhere to the following guidelines:

- All students will be guaranteed their own bed
- The default sharing allocation is same-gender rooms
- Students may choose individually whether they would like to opt-in to gender-inclusive rooming where their roommates may be students of all genders and gender identities
- Students may only room with others who have chosen the same room allocation as themselves (either same-gender or gender-inclusive)
- Students who select gender-inclusive rooming may still be roomed in a same-gender arrangement based on the group selections or destination country requirements
- Students may not incur additional individual costs based on the resulting room allocations
- Needs-based rooming requests or financial concerns may be discussed confidentially at the student's discretion with either of the Associate Deans listed below
- All students must comply with expected SSE behaviours, including the UCalgary Code of Conduct

Should you feel at any point, regardless of same-gender or gender-inclusive rooming, that you would like to discuss your rooming situation, please connect with either of the Associate Deans listed below.
