Fundamental MIS Hands on

Pediatric Surgery and Urology

Introduction

Minimally Invasive Surgery have become an integral part of operative management in virtually every realm of newborn and pediatric surgery in the last two decades. Although new Instruments and equipment's are promoting these achievements, there is still a long journey in training before Neonatal Endoscopic surgery become safe and widespread.

The UAE Pediatric Surgery Society, Gulf endoscopic pediatric surgery and urology group in collaboration with Clinical and surgical training center is dedicated to the advancement of training in Pediatric Minimal Invasive Surgery to ensure the safe performance of such operation.

What is unique about this workshop:

- Hands on experience on small animals
- Highly experienced faculty
- Interactive workshops, case study, video base learning

Course outcome

Course will provide theoretical update in the most recent development of neonatal endoscopy and intensive experimental session (Hands on Session) using small animals for each surgical procedure step by step. Some of topics are:

- Ergonomics and installation.
- Introduction and positioning of trocars.
- Creation of a working space in the abdomen and the chest.
- Instruments and energy device.
- Dissection, Suturing and knotting simple, sliding Knot and continuous and Back – Hand stitch.

Target audience

- Pediatric Surgeon and Urologist
- General Surgeons and Urologist
