

Big Data Science

Data science is the basis of information management approaches and technologies, not only because large amounts of data are available, but also because information must be collected, organized, and represented before any more or less "intelligent" processing can occur.

Key topics:

- *Data and Information*
- *Big Data and Data Types*
- *Requirement Analysis*
- *Platforms and Systems*

Speakers: *Massimo Melucci and Emanuele Di Buccio*

22/09
14:00-18:00

26/09
09:30-15:00
