

ME.370 (PSYCHIATRY AND BEHAVIORAL SCIENCES)

Courses

ME.370.601. Psychiatry Core Clerkship.

ME.370.650. Genes to Society - Mind, Brain, Behavior.

In Brain, Mind and Behavior (BMB) students will begin to access patient's mental states, behaviors, traits, and stories and to identify the psychological factors that differentiate patients as individuals. Although the main clinical focus is on psychiatric disorder, the perspectives introduced in BMB are of use in any clinical setting where the pathophysiology is either unknown or unable to usefully explain variation in patient presentation and treatment response. By the end of the course, students will be familiar with the major psychiatric disorders and treatments, with basic principles of behavioral biology, and with a pluralistic approach to address the problems of complex patients.

ME.370.696. Research Elective in Psychiatry and Behavioral Sciences.

ME.370.697. Extramural Elective in Psychiatry and Behavioral Sciences.

ME.370.699. Psychiatry Elective.
