Courses

AS.130

AS.130.101. Ancient Middle Eastern Civilizations. 3 Credits.

Review of important issues in ancient Near Eastern history and culture from the Neolithic era to the Persian period. Included will be an examination of the Neolithic agricultural revolution, the emergence of cities, states and writing, and formation of empires. Cultures such as Sumer and Akkad, Egypt, the Hittites, Israelites, Assyrians, Babylonians, and Persians will be discussed.

AS.130.119. Medicine in Ancient Egypt. 3 Credits.

A survey of medicine and medical practice in Egypt and, to a lesser extent, the ancient Near East in general. The abundant sources range from magical spells to surprisingly "scientific" treatises and handbooks. Readings are selected from translations of primary sources in the writings of ancient Egypt, Mesopotamia, and Israel. Topics will include the sources of our knowledge; the nature of medical practitioners, medical treatment, and surgery; beliefs about disease and the etiology of illness; concepts of contagion and ritual purity.

AS.130.152. After Babylon: Mesopotamia from Athens to Anime. 3 Credits.

This course is an exploration of how ancient Mesopotamian art, literature, history, and culture have been transmitted from the fall of Babylon in 539 BCE to the present day and the ways in which they have been adapted and transformed along the way. While all aspects of ancient Mesopotamia will be under discussion, the course will principally focus on the narratives of Gilgamesh, Semiramis/Shammuramat, and Sardanapalus/Assurbanipal. After briefly introducing ancient Mesopotamia, we will see how the region and its history are portrayed in biblical, Classical, Quranic, and medieval sources. From there we will discuss the "rediscovery" of Mesopotamia and the decipherment of cuneiform. The latter half of the course will then be devoted to Mesopotamia in 20th and 21st century popular culture.

AS.130.153. A (Virtual) Visit to the Louvre Museum: Introduction to the Material Culture of Ancient Egypt. 3 Credits.

This course will present the Egyptological collections of the musée du Louvre in Paris, room by room, as in a real visit. From the Predynastic period, in the 4th millennium BC, to Roman time, the iconic "masterpieces" of this world-renowned art museum, as well as its little-known artifacts, will allow us to explore the history and material culture of ancient Egypt. We will also learn to observe, describe and analyze archaeological objects, in a global manner and without establishing a hierarchy between them, while questioning their place in the museum and its particular language. The objective will be to go beyond the objects themselves and answer, in fine, the following questions: What do these objects tell us about the men and women who produced them, exchanged them, used them, and lived among them in antiquity? What do they also reveal about those who discovered them in Egypt, several millennia later, about those who collected them and sometimes traded them, and what does this say about the relations between Egypt and the Western countries over time?

AS.130.154. Giving Birth and Coming to Life in Ancient Egypt: The Tree and the Fruit. 3 Credits.

Childbirth is an event that is highly cultural, and is accompanied by gestures and beliefs that say a lot about the society in which they can be observed. This class will be based on Ancient Egyptian texts (translated), images and objects related to beliefs and practices surrounding pregnancy, birth-giving and the first moments of human life. We will discover the Egyptian views on procreation, the objects, the spells and the formulas used to protect pregnancy and childbirth – one of the most dangerous moments in a woman's life –, the divine entities invoked, the reactions caused by non-ordinary births (for example, twins), and the purification rites that punctuate the post-partum period. Finally, we will see that the first biological birth is a model on which many beliefs about life after death are based. Several guest researchers will present birth and childbirth in other ancient societies in order to broaden the discussion and establish comparisons.

AS.130.155. Sacred Signs: The History and Mystery of Egyptian Hieroglyphs. 3 Credits.

Everybody has heard of the hieroglyphs, but few know much about them. In this class we will begin by learning how the hieroglyphic writing system works. We will then think about the role that hieroglyphs and writing itself plays in Ancient Egypt. Knowledge of the hieroglyphs died out about 450 CE, but Renaissance and Early Modern scholars were still intensely interested in them. Why? Progress in true decipherment began about 1800 CE, the time of Napoleon. We will devote time to the fascinating story of the brilliant scholars (e.g., Champollion) who competed for the honor of decipherment and the different theories which they offered. No prior knowledge of Ancient Egypt or the Ancient Egyptian Language required.

AS.130.156. It's Pharaonic Egypt, hon! Intro to Anc Egyptian Culture, Society & Art at the Walters Art Museum. 3 Credits.

The Walters Art Museum in Baltimore is home to one of the finest collections of Egyptian art in the United States. This course will provide an introduction to the culture and society of pharaonic Egypt and ancient Egyptian art based upon this collection. Most of the sessions will take place in the museum's galleries, in front of the objects. The course will be divided into thematic sessions: Living in Ancient Egypt; Believing and Worshipping; Writing and Creating Art; Dying in Ancient Egypt. One session will also be devoted to the history of the Walters Art Museum and its Egyptian department, with a "behind-the-scenes experience" provided by the museum's curators. The goal of this course is not only to provide a general introduction to ancient Egypt to the students, but also to educate them in the observation, description, and analysis of ancient art and daily life objects. In this way, students will be able to place them in a broader context and understand how objects and artworks contribute to our knowledge and understanding of societies of the past.

AS.130.177. World Prehistory: An Anthropological Perspective. 3 Credits.

How and why did our nomadic hunting and gathering ancestors become farmers? What led agricultural societies to build cities, develop writing, religious institutions, wage war, and trade for exotic goods? This course surveys prehistory and ancient history from the origins of human culture to the emergence civilization. Although prehistory and ancient history yield evidence of tremendous cultural diversity this course emphasizes common elements of past human experience, culture, and culture change. These include the origins of modern humans and their adjustment to a variety of post-ice age environments, shifts from hunting and gathering to agricultural lifeways, and the initial development of the world's earliest cities and civilizations.

AS.130.202. Ancient Mythology. 3 Credits.

This course explores the mythology of the ancient Near East from the invention of writing in Sumer in 3000 B.C. until the conquest of Alexander the Great near the end of the first millennium B.C. Mythological texts from Mesopotamia, Egypt, Anatolia, the Levant, and the Bible will be read from a comparative perspective. Special attention is paid to the origin and development of the epic, culminating in the great Epic of Gilgamesh, but considerable time is also given to the vast mythological and historical literature, and such diverse genres as love poetry, proverbs, humorous dialogues, Omens, and legal and medical texts. All readings are in English translation.

AS.130.214. The Origins of Civilization: A Cross-Cultural Perspective. 3 Credits.

One of the most significant transformations in human history was the "urban revolution" in which cities, writing, and social classes formed for the first time. In this course, we compare five areas where this development occurred: China, Mesopotamia, the Indus Valley, Egypt, and Mesoamerica (Mexico/Guatemala/Honduras/Belize). In each region, we review the physical setting, the archaeological and textual evidence, and the theories advanced to explain the rise (and eventual collapse) of these complex societies.

AS.130.223. Ancient Revolutions: The Archaeology of Culture Change. 3 Credits.

The last 250,000 years have seen many moments that could be referred to as "revolutions" in art, technology, or other aspects of human society. The "Human Revolution" of the Upper Paleolithic saw the birth of artistic ability and symbolic thinking in hominids. We call the transition from hunting and gathering to settled agriculture the "Neolithic Revolution," while the "Urban Revolution" gave us complex societies and urban life. Times of dynamic change gave rise to important aspects of our shared behavioral and societal identity. They have become the subject not only of much archaeological investigation, but also of popular discourse about the human past. This class will explore famous cultural "revolutions" by looking at the causes and consequences of these important changes. We will evaluate the archaeological evidence, and through it interrogate the term "revolution" itself. What do we mean when we speak of "revolutions?" Are there other ways to think of past social and technological change, and when, if ever, do we truly see "revolutions" in the human condition in the ancient past?

AS.130.245. The Archaeology of Gender in the Ancient Eastern Mediterranean. 3 Credits.

How do art historians and archaeologists recover and study genders and sexualities of ancient people? This writing-intensive seminar looks at texts and objects from ancient Egypt, Assyria, and Greece through the lens of gender and sexuality studies. Beyond exploring concepts of gender in the ancient Eastern Mediterranean, students will also consider how modern scholars have approached, recovered, and written about ancient gender identities. There are no prerequisites for this course.

AS.130.246. Writing History in the Ancient Mediterranean World. 3 Credits.

Just what does it mean to "write history"? In this course, we will read a selection of historical texts from ancient Egypt, Mesopotamia, Greece, and Rome, in order to examine how these cultures conceived of, and narrated, their own pasts. A major focus will be how these texts were created in order to understand or control the present. We will also examine how these texts have come down to us, and in what ways this might affect how we use them in constructing our own historical narratives. No prior knowledge of the ancient world necessary; all texts read in English translation.

AS.130.247. Digging for Legitimacy Archaeology, Museums, and Ideology. 3 Credits.

Archaeology was born out of Western Colonial endeavors into Africa, the Middle East, Asia, and the Americas. Large scale excavations conducted by the United Kingdom, France, Germany, Italy, and the United States resulted in the removal and transfer of valuable (culturally and monetarily) material culture from local stewards and stakeholders to the West. To this day the discipline of archaeology is still saddled by its colonial past and the Hollywood interpretation of archaeologists as saviors of ancient treasures. Today, most interaction between people and ancient objects is facilitated via the museum. In this course we will explore 19th- 21st century archaeological and museum practices and the role they play in modern narratives of identity and representation in the America and the Middle East. Students will engage with the historical, legal, economic, and ethical implications of archaeology and analyze how political, religious, cultural, and academic institutions have leveraged archaeology and cultural artifacts to reify and legitimize their pursuits and ideologies.

AS.130.271. Scribes, Scribal Education, and Literacy in the Ancient Middle East. 3 Credits.

In the ancient Middle East, the term "scribe" refers to individuals skilled in writing cuneiform, the writing system developed in Mesopotamia. Their intellectual work, preserved primarily on clay tablets, is associated with various aspects of society, including politics, administration, trade, law, religion and culture. This course will introduce students to the core subjects that junior scribes learned to read and write in school. We will also explore scribes' diverse roles within specific social and historical contexts and understand how these skilled writers engaged in social activities and preserved and shaped their past.

AS.130.338. The Talmud as Read in the Middle Ages: The Sugya of Kavod HaBriot (Human Dignity). 3 Credits.

In the early Middle Ages the Talmud emerged as the defining document of official Jewish religion and culture, and remained so until the dawn of the Modern Era. Jewish scholars in many different countries, and in a wide variety of cultural contexts, developed certain ways of reading, interpreting, and applying the Talmud. In the process, they produced an immense corpus of commentary and law. This course will examine how and why the Talmud was studied in these centuries by Jews who mined it, subject by subject, for emotional, philosophical, and legal meaning.

AS.130.368. Nomads and Empires: Water in the Ancient Near East. 3 Credits.

Water and its histories reveal deep similarities and pivotal differences among human societies that are critical to understanding the human past and our future. Environments are often defined by water availability and periodicity, water is a frequent theme of religious traditions and a common point of political conflict. The hydraulic hypothesis, one of the longest-standing potential explanations for the rise of the world's earliest civilizations, claims that organizational requirements of large-scale irrigation spawned ancient political hierarchies and cities. Archaeologists now know irrigation was not the only factor responsible for the origins of ancient states, but water management was important to agriculture in every region of ancient state formation. This course explores economic and social histories of water in the ancient Near East. It examines water's diverse roles in ancient Mesopotamian, Egyptian, Levantine and South Arabian agriculture, politics, ritual and religion, including water's interconnected significance in Judaism, Christianity, and Islam.

AS.130.369. Law in the Ancient Middle East. 3 Credits.

The Middle East offers the earliest and most abundant source material for reconstructing ancient legal systems. From stone monuments like the Code of Hammurabi to clay tablets the size of postage stamps, the cuneiform record provides a window into not just legal thought but actual legal practice in the ancient Middle East. Surveying a span of more than two thousand years, we will explore the law in both its deep structure and its regional and temporal diversity. Specific topics will include homicide and personal injury law, family law, the legal status of women, codes and codification, and ancient Israelite law in its Middle Eastern context. AS.130.396. Readings in a Talmudic Sugya ("Zonah" and "Lav"-Struggling to Define Prohibited Sexual Relationships in pre-Modern Jewish Thought). 3 Credits.

In the early Middle Ages the Talmud emerged as the defining document of official Jewish religion and culture, and remained so until the dawn of the Modern Era. The problem was that the texts were not easily understandable, and the norms unclear. In premodern times, certain literary-approaches evolved which were taken by contemporaries as yielding significant meaning. Among the most interesting of these was the broad-sugya. In this course, students will follow the reasoning-process of a broad-sugya as they read a guided-series of passages and commentaries located throughout the Babylonian Talmud on the subject of the valence of human-life. All readings will be in the original Hebrew and Aramaic. Ability to read Hebrew and Aramaic required.

AS.131.653. Space Archaeology: An Introduction to Satellite Remote Sensing, GIS and GPS. 3 Credits.

This course introduces technologies archaeologists use to map ancient landscapes. These include Geographic Information Systems (GIS) mapping software, advanced Global Positioning System (GPS) receivers, and various types of satellite imagery. Taught together with AS.130.353. Distribution Area: Natural Sciences, Social and Behavioral Sciences

AS.131.654. Advanced Archaeological Method and Theory. 3 Credits.

Climate change, population growth, war - what questions do archaeologists ask about the ancient past, how do they collect relevant evidence, and how do they arrive at satisfying answers to their questions? This course will review major theoretical currents in archaeology including evolutionary, cultural-historical, processual and post-processual approaches and discuss the future of archaeology as a scientific and humanistic discipline. Basic techniques for analyzing major categories of artifacts such as lithics, ceramics, archaeobotanical, and zooarchaeological materials will also be introduced. Distribution Area: Humanities, Social and Behavioral Sciences

AS.131.657. Geographic Information Systems in Archaeology. 3 Credits.

Applications of GIS in archaeology have recently expanded dramatically and GIS has now become an indispensable tool for archaeological research worldwide. This course will introduce the major applications of Geographic Information Systems (GIS) in archaeology. These include the history of GIS in archaeology, air photography and satellite imagery, predictive modeling, hydrological modeling, viewsheds, and least-cost routes. It will grapple with theoretical issues manifest in archaeological GIS including conflicts between environment and social understandings of the ancient past, and will foster discussion of issues that affect outcomes of analyses including spatial scale and boundary delineation choices that can dramatically influence results. Students will learn the basics of ESRI's ArcGIS software. Taught with AS.130.357. Distribution Area: Humanities, Natural Sciences

AS.131.664. Archaeology of Arabia. 3 Credits.

This course examines the archaeology of the Arabian Peninsula from the earliest Paleolithic in the region (ca. 1.5 million years ago) through the first millennium of the Islamic era (ca. AD 1600). We will review basic geology and environmental conditions, examine the development of animal herding and crop cultivating lifeways, and study the rise of ancient complex societies and civilizations.

AS.131.678. Geoarchaeology: Applications of Earth Science to Archaeology. 3 Credits.

Geoarchaeology is a multidisciplinary subfield that applies the tools and techniques of earth science to understand ancient humans and their interactions with environments. This course examines basic topics and concepts, including archaeological site formation, paleo-environmental reconstruction, raw materials and resources, soil science, deposition and erosion of wind and water-borne sediments in different environments such as along rivers, lakes and coastlines, radiocarbon and other chronometric dating methods, and ground-based remote sensing, including ground penetrating radar. AS.133.304. Let's Play! Games from Ancient Egypt and Beyond. 3 Credits.

The ancient Egyptians played many games, as we do today. Board games, ball games, games of skill, etc., were not only part of daily life, but also had a role to play in religious practices and beliefs. Although the rules of the games are largely unknown to us, archaeological objects, funerary images, and texts help us to better understand their roles and meanings in ancient Egyptian culture. These various sources also show how games reflect (or contradict) some facets of the organization of the society, and reveal how the ancient Egyptians perceived some aspects of their world - social hierarchy, gender division, representation of death, relationship to chance/fate/divine will, etc. This course will present the evolution of games and play in Ancient Egypt from the 4th millennium BCE, with the first board game discovered in the tomb of a woman, through those deposited in the tomb of Tutankhamun, and up to the Roman period. By replacing the games in their archaeological, historical and cultural contexts, the course is also intended as an original introduction to the civilization of ancient Egypt. The course will consist mainly of lectures given by the professor, with several guest researchers. Examinations will be divided into three parts: two knowledge quizzes during the semester; at the end of the semester, an essay on an Egyptian game of the student's choice.

AS.133.418. Egyptian Art & Material Culture: Principles, Materiality and Challenges. 3 Credits.

This course is dedicated to the study of the art and material culture of ancient Egypt, spanning from the 5th millennium BCE to the Roman period. The objective of the course is to provide students with a comprehensive understanding of Egyptian art, with a focus on materiality, effective methods of description and analysis, and a command of bibliography. It will also enable students to practice two fundamental aspects of their future professional life: presenting a paper at a conference and submitting an article to an academic journal. In the initial sessions, we will examine the fundamental principles and conventions that define Egyptian art. We will then investigate the natural resources available to Egyptian craftsmen and artists, including nature, origin, networks, and uses. We will analyze the production of works of art through several case studies, focusing on materiality. Finally, we will reflect on the presence of Egyptian works of art in museums around the world. Moreover, the course will provide an opportunity for discourse on professional matters pertaining to engagement with Egyptian antiquities and works of art. The course will be structured around: lectures by the professor or by guest researchers, with the students participating in a dialogue with the lecturers; sessions dedicated to discussions of articles to be read (with two/three articles per session); oral presentations by the students, with the aim of reproducing the conditions of a colloquium or conference. These will include formal presentations and question-and-answer sessions, with all students taking part. At the conclusion of the semester, students will be required to submit a paper in connection with the oral presentation they have prepared. This paper will be presented as a scientific article, and the instructor will evaluate it in the same manner as an anonymous referee.

AS.134

AS.134.101. GOD 101: The Early History of God - Origin, Character, Practice. 3 Credits.

In a world of big ideas, there is none larger than that of God. Divinity is an ever-present topic for both religious devotees and hard core secularists—for anyone who embraces the humanities or ponders what makes us human. Humans are, for better and worse, homo-religiosus (humans who practice religion) as much as homo-sapiens. But what do we know of God historically? How do we go about reconstructing divinity from ancient texts and archaeology? How do we best walk back in time to understand ancient Middle Eastern cultures that gave birth to notions of the divine that have come down to today's Judaism, Christianity and Islam? This course looks synthetically at the vast topic of God—exploring questions of historical origin, how God was characterized in literature (mythic warrior, king, parent, judge, holy, compassionate) and how God was represented in iconography, both materially and abstractly. Secondly, how did belief intersect with practice? Using the indow of divinity, this course will peer into the varieties of religion experience, exploring the royal use of religion for power, prestige and control balanced against the intimacy of family and household religion. It will probe priestly prerogatives and cultic status, prophetic challenges to injustice, and the pondering of theodicy by poetic sages.

AS.134.406. Kings, Prophets, and Scribes: The Creation of "Israel" in the Deuteronomistic History. 3 Credits.

This class will introduce students to "The Deuteronomistic History," which comprises the biblical books of Deuteronomy, Joshua, 1-2 Samuel and 1-2 Kings. The narrative arc of this "history" spans the giving of the law to Moses to the rise and fall of the monarchies of Israel and Judah, respectively in the Neo-Assyrian and Neo-Babylonian periods. During this course we will examine the reasons why biblical scholars have argued in varying ways that this body of text represents the work of a group of ideologically driven scribes, the Deuteronomists; we will also investigate the primary texts themselves for evidence for divergent views about the need for a king in Israel and the role and fate of the royal house of David. We will also explore the relationship between the books of the former prophets (Joshua>2 Kings) and Deuteronomy, which is a book that concludes the Pentateuch. This course requires students to engage with the biblical text in the original Hebrew language at an advanced level. We will also engage with biblical scholarship regarding the scope, purpose, and nature of a cohesive Deuteronomistic History, as well as with dissenting voices that probe the unity of these biblical books.

An advanced course in Aramaic devoted to the study of Old Aramaic inscriptions. We will be translating and analyzing a selection of texts from Northern Syria (e.g. Bar-Rakib; Hadad; Kuttamuwa, Nerab, Panamuwa, Sefire, Zakkur), Southern Syria (e.g. Bar-Hadad/Melqart Stela, Hazael, Tel Dan) and Northern Mesopotamia (e.g. Tell Fakhariyah). Students will be expected to vocalize such texts as a study in historical and comparative linguistics and to clarify their understanding of the morphology and syntax. In addition to seminar times, students are expected to complete online discussions, supplemental readings and assignments, and attend several guest lecture events.
