Total			15

Coursework Timeline

- Applicants for the summer/fall term **may be** asked to submit spring final grades.
- Summer coursework **will not** be considered for summer/fall applicants.
- Fall coursework **will not** be considered for spring applicants.

Additional Transfer Requirements

- Transfer applicants should have completed a full semester (spring or fall) course load of 12 transferable hours (minimum) after graduating from high school.
- The Department of Maritime Business Administration is looking for students who are interested in pursuing our degree as a focus. Students should indicate our department as the primary major they are interested in if they wish to be admitted. The essay should reflect how earning this degree will help the student achieve their career goals.
- Meeting minimum requirements does not guarantee admission. The entire record is reviewed for consistency in coursework and grades. Admission preference is given to applicants with the highest GPA and the most appropriate courses completed.

Additional Information

- Applicants should be serious about earning a degree in Maritime Business Administration.
- Transfer applicants are instructed NOT to accept transfer admission to any major with the expectation of later applying for a change of major.

Career & Educational Opportunities

The Maritime Business Administration undergraduate curriculum provides a solid background in the key areas of accounting, finance, marketing, law, and economics that are critical for today's business professionals. These courses lay the foundation for more advanced courses in international trade, inland waterways management, brokerage and chartering, organizational behavior, transportation economics, port and terminal management, and other areas related to the maritime industry.

About 80% of global trade by volume moves through the maritime industry, highlighting the critical role of maritime business administrators in the world economy. Worldwide attention on maritime activity continues to grow, and U.S. ports are projected to more than double their throughput over the next 20 years. In particular, ports along the Gulf Coast are expected to experience a threefold increase in activity. Over the next 40 years, deep-water oil and gas production in the western Gulf Coast is also set to expand significantly. Together, these developments are driving a strong and sustained demand for skilled maritime business professionals. Graduates of Maritime Business Administration are uniquely positioned to meet this demand, equipped with the knowledge and expertise required by a rapidly expanding industry.

Transfer Course Sheet Notes

1. Admission preference is given to applicants with the highest GPA and the most appropriate courses completed.
2. Transfer applicants are encouraged to complete [University Core Curriculum](#) coursework found in the [Undergraduate Catalog](#) unless specified above.
3. This Transfer Course Sheet was supported in a partnership between the Office of Admissions and the Texas A&M University at Galveston with the Undergraduate Catalog having the most updated and definitive information.
