

TEXAS A&M UNIVERSITY

UNDERGRADUATE CATALOG

2025-2026

ED. 148

TABLE OF CONTENTS

Purpose/Accreditation	12
Catalog Publication Statement	14
University Academic Calendars	15
Board of Regents and Administrative Officers	23
General Information	25
History and Development	25
University Core Curriculum	26
Student Learning Outcomes	31
Degree and Program Information	32
Cultural Discourse Requirements	48
International and Cultural Diversity Requirements	49
Admission	52
Registration and Academic Status	79
Grading System	81
Housing	83
Orientation	84
Office for Student Success	86
Services for Students	86
Campus Life	93
Tuition, Fees and Other Financial Information	98
Scholarships & Financial Aid	106
University Policies	110
International Opportunities for Students	114
Honors, Undergraduate Research and National Fellowships	116
Transition Academic Programs	121
Interdisciplinary Programs	122
Entrepreneurship - Minor	122
Honors - Minor	124
Leadership - Minor	124
College of Agriculture and Life Sciences	126
Department of Agricultural Economics	131
Agribusiness - BS	134
Agricultural Economics - BS, Finance and Real Estate Option	135
Agricultural Economics - BS, Food Marketing Systems Option	137
Agricultural Economics - BS, Policy and Economic Analysis Option	138
Agricultural Economics - BS, Rural Entrepreneurship Option	139

Agricultural Economics - 5-Year Bachelor of Science and Master of Public Service Administration	141
Financial Planning - BS	143
Agribusiness Entrepreneurship - Minor	144
Agricultural Economics - Minor	145
AgriFood Sales - Minor	145
Financial Planning - Minor	146
International Trade and Agriculture - Certificate	146
Department of Agricultural Leadership, Education, and Communications	147
Agricultural Communications and Journalism - BS	149
Agricultural Education - BS	150
Agricultural Leadership and Development - BS	151
Agricultural Communications and Journalism - Minor	152
Extension Education - Minor	153
International Agricultural Development - Minor	153
Leadership - Minor	154
Youth Development - Minor	154
Department of Animal Science	155
Animal Science - BS, Production/Industry Option	157
Animal Science - BS, Science Option	158
Equine Science - Certificate	160
Meat Science - Certificate	160
Department of Biochemistry and Biophysics	160
Biochemistry - BS	162
Genetics - BS	163
Biochemistry - Minor	164
Genetics - Minor	165
Department of Biological and Agricultural Engineering	165
Agricultural Systems Management - BS	166
Biological and Agricultural Engineering - BS	167
Biological and Agricultural Engineering - BS, Agricultural Engineering Track	169
Biological and Agricultural Engineering - BS, Biological Engineering Track	170
Biological and Agricultural Engineering - BS, Natural Resources Engineering Track	172
Agricultural Systems Management - Minor	173
Food Engineering - Minor	173
Department of Ecology and Conservation Biology	174
Ecology and Conservation Biology - BS, Ecoinformatics Track	175
Ecology and Conservation Biology - BS, Ecology and Conservation Biology Track	177

Ecology and Conservation Biology - BS, Forest Resources Track	178	Sport Nutrition - Certificate	214
Ecology and Conservation Biology - BS, Teaching Track	180	Department of Plant Pathology and Microbiology	215
Ecology and Conservation Biology - BS, Vertebrate Zoology Track	181	Bioenvironmental Sciences - BS	215
Ecology and Conservation Biology - Minor	182	Environmental Studies - BS	217
Department of Entomology	183	Bioenvironmental Sciences - Minor	218
Entomology - BS	184	Department of Poultry Science	218
Forensic and Investigative Sciences - BS, Pre-Law Emphasis	187	Poultry Science - BS, Industry Emphasis	219
Forensic and Investigative Sciences - BS, Science Emphasis	189	Poultry Science - BS, Technical Emphasis	220
Entomology - Minor	190	Poultry Science - Minor	221
Public Health Entomology - Certificate	191	Department of Rangeland, Wildlife and Fisheries Management	221
Department of Food Science and Technology	192	Rangeland, Wildlife and Fisheries Management - BS, Aquaculture and Fisheries Management Track	222
Food Science and Technology - BS, Food Industry Option	192	Rangeland, Wildlife and Fisheries Management - BS, Natural Resources Management and Policy Track	223
Food Science and Technology - BS, Food Science Option	194	Rangeland, Wildlife and Fisheries Management - BS, Outdoor Enterprise Management Track	225
Coffee Processing and Quality - Certificate	196	Rangeland, Wildlife and Fisheries Management - BS, Rangeland Management Track	226
Food Diversity - Certificate	197	Rangeland, Wildlife and Fisheries Management - BS, Wildlife Management Track	227
Department of Horticultural Sciences	197	Rangeland, Wildlife and Fisheries Management- 5-year Bachelor of Science and Master of Public Service Administration	228
Horticulture - BA	198	Park and Natural Resource Management - Minor	229
Horticulture - BS	200	Rangeland Management - Minor	230
Horticulture - Minor	201	Wildlife and Fisheries Management - Minor	230
Floral Design - Certificate	201	Department of Soil and Crop Sciences	230
Viticulture and Enology - Certificate	202	Plant and Environmental Soil Science - BS, Crops Emphasis	232
Department of Hospitality, Hotel Management and Tourism	202	Plant and Environmental Soil Science - BS, Soil and Water Emphasis	233
Hospitality, Hotel Management and Tourism - BS, Business Hospitality Track	203	Turfgrass Science - BS	234
Hospitality, Hotel Management and Tourism - BS, Event, Tourism and Recreation Management Track	204	Agronomy - Minor	235
Hospitality, Hotel Management and Tourism - BS, Hotel and Resort Management Track	205	Environmental Soil Science - Minor	236
Recreation Management - Minor	207	Plant Breeding - Minor	236
Tourism Management - Minor	207	College of Architecture	237
Hospitality Management - Certificate	207	Department of Architecture	239
Professional Event Management - Certificate	208	Architecture - BS	241
Recreation and Park Management - Certificate	208	Architectural Fabrication and Product Design - Minor	242
Tourism Management - Certificate	209	Architectural Heritage Conservation - Minor	243
Youth Development - Certificate	209	Art and Architecture History - Minor	243
Department of Nutrition	210	Sustainable Architecture and Planning - Minor	244
Nutrition - BS, Didactic Program in Dietetics Track	211	Department of Construction Science	244
Nutrition - BS, Human Health Track	212	Construction Science - BS	248
Nutrition - Minor	214	Facility Management - Minor	249
Culinary Health - Certificate	214		

Leadership in the Design and Construction Professions - Minor	249	Neuroscience - BS, Molecular and Cellular Neuroscience	304
Department of Landscape Architecture and Urban Planning	250	Zoology - BS	305
Landscape Architecture - BLA	252	Bioinformatics - Minor	306
Urban and Regional Planning - BS, Urban Design Track	253	Biology - Minor	307
Urban and Regional Planning - BS, Urban Policy Track	254	Neuroscience - Minor	307
Urban and Regional Planning - 6-Year Bachelor of Science and Master of Landscape Architecture	255	Pre-Medicine - Minor	308
Urban and Regional Planning - 5-Year Bachelor of Science and Master of Land and Property Development	256	Department of Chemistry	308
Urban and Regional Planning - 5-Year Bachelor of Science and Master of Urban Planning	258	Chemistry - BA	311
Urban and Regional Planning - Minor	259	Chemistry - BA, Biological Chemistry or Medical, Dental, Pharmacy School Track	312
University Studies	260	Chemistry - BA, Chemical Education Track	314
University Studies - BS, Global Arts, Planning, Design and Construction Concentration	260	Chemistry - BA, Environmental Chemistry Track	315
College of Arts and Sciences	261	Chemistry - BS	316
Environmental Studies - BS	266	Chemistry - BS, Biological-Chemistry Track	318
Environmental Systems Science - BS	269	Chemistry - BS, Environmental Chemistry Track	319
Women's and Gender Studies - BA	271	Chemistry - BS, Materials Chemistry Track	320
Women's and Gender Studies - BS	272	Chemistry - 5-Year Bachelor of Science and Master of Science in Chemistry	321
Environmental Systems Science - Minor	274	Chemistry - Minor	323
Gender and Health - Minor	274	Department of Communication and Journalism	324
Women's and Gender Studies - Minor	275	Communication - BA	326
Department of Anthropology	275	Communication - 5-Year Bachelor of Arts and Master of Arts in Communication	327
Anthropology - BA	276	Communication - BS	329
Anthropology - BA, Archaeology Track	278	Communication - 5-Year Bachelor of Science and Master of Arts in Communication	330
Anthropology - BS	279	Journalism - BA	332
Anthropology - Minor	281	Journalism - 5-Year Bachelor of Arts and Master of Arts in Communication	333
Archaeology - Minor	281	Journalism - BS	335
Medical Anthropology - Minor	282	Journalism - 5-year Bachelor of Science and Master of Arts in Communication	336
Museum Studies - Minor	282	Telecommunication Media Studies - BA	338
Nautical Archaeology - Minor	283	Telecommunication Media Studies - 5-Year Bachelor of Arts and Master of Arts in Communication	339
Department of Atmospheric Sciences	283	Telecommunication Media Studies - BS	341
Meteorology - BS	284	Telecommunication Media Studies - 5-Year Bachelor of Science and Master of Arts in Communication	342
Meteorology - 5-Year Bachelor of Science and Master of Ocean Science and Technology	285	Communication - Minor	344
Climate Change - Minor	287	Journalism - Minor	344
Meteorology - Minor	287	Communication Leadership and Conflict Management - Certificate	344
Department of Biology	288	Health Communication - Certificate	345
Biology - BA	298	Social Media - Certificate	345
Biology - BS	299	Strategic Communication - Certificate	346
Microbiology - BS	301		
Molecular and Cell Biology - BS	302		

Department of Economics	346	Geology - Minor	388
Economics - BA	348	Department of Global Languages and Cultures	389
Economics - 5-Year Bachelor of Arts and Master of International Affairs	349	Classics - BA, Classical Civilization Track	390
Economics - 5-Year Bachelor of Arts and Master of Public Service Administration	350	Classics - BA, Language and Literature Track	392
Economics - 5-Year Bachelor of Arts and Master of Science in Economics	352	Modern Languages - BA, French Option	393
Economics - BS	353	Modern Languages - BA, German Option	394
Economics - 5-Year Bachelor of Science and Master of International Affairs	354	Modern Languages - BA, Russian Option	396
Economics - 5-Year Bachelor of Science and Master of Public Service Administration	355	Spanish - BA	397
Economics - 5-Year Bachelor of Science and Master of Science in Economics	356	University Studies - BA, Race, Gender, Ethnicity Concentration	399
Economics - Minor	358	University Studies - BS, Race, Gender, Ethnicity Concentration	400
Department of English	358	Africana Studies - Minor	402
English - BA	360	Arabic Studies - Minor	402
English - BA, Middle School Teacher Certification	362	Chinese - Minor	403
English - 5-Year Bachelor of Arts and Master of Arts in English	364	Classical Studies - Minor	403
English - Minor	366	Comparative Cultural Studies International - Minor	404
Health Humanities - Minor	366	French - Minor	405
Professional Writing - Minor	367	German - Minor	406
Science Fiction and Fantasy Studies- Minor	368	Hispanic Studies for Community Engagement - Minor	406
Department of Geography	368	Italian - Minor	407
Geographic Information Science and Technology - BS	369	Japanese - Minor	407
Geographic Information Science and Technology - 5-Year Bachelor of Science and Master of Science in Geography	371	Jewish Studies - Minor	408
Geography - BS	372	Religious Studies - Minor	408
Geography - 5-Year Bachelor of Science and Master of Geoscience	373	Russian - Minor	409
Geography - 5-Year Bachelor of Science and Master of Science in Geography	375	Spanish - Minor	409
Geographic Information Science and Technology - Minor	376	Spanish for the Health Professions - Minor	410
Geography - Minor	377	Proficiency in Modern Languages - Certificate	410
Department of Geology and Geophysics	377	Department of History	410
Geology - BA	379	History - BA	412
Geology - BS	382	History - 5-Year Bachelor of Arts and Master of Arts in History	414
Geology - 5-Year Bachelor of Science and Master of Ocean Science and Technology	383	History - BS	415
Geology - 5-Year Bachelor of Science and Master of Science in Geology	385	History - Minor	416
Geophysics - BS	386	Legal History - Certificate	417
Geophysics - 5-Year Bachelor of Science and Master of Science in Geophysics	387	Department of Mathematics	417
		Applied Mathematics - BS, Actuarial Science Emphasis	422
		Applied Mathematics - BS, Biological Science Emphasis	424
		Applied Mathematics - BS, Computational Science Emphasis	425
		Applied Mathematics - BS, Cryptography Emphasis	426
		Applied Mathematics - BS, Economics Emphasis	428
		Applied Mathematics - BS, Math Emphasis	429

Applied Mathematics - BS, Statistics Emphasis	431	Psychology - BS	477
Applied Mathematics - 5-Year Bachelor of Science and Master of Science in Economics	432	Psychology - Minor	479
Applied Mathematics - 5-Year Bachelor of Science and Master of Science in Mathematics	434	Behavioral Health - Certificate	479
Mathematics - BA	436	Healthy Development - Certificate	479
Mathematics - BA, Teaching Emphasis	437	Psychology of Diversity - Certificate	480
Mathematics - 5-Year Bachelor of Arts and Master of Science in Mathematics	439	Work and Organizations - Certificate	480
Mathematics - BS	440	Department of Sociology	481
Mathematics - 5-Year Bachelor of Science and Master of Science in Mathematics	442	Sociology - BA	482
University Studies - BS, Mathematics for Teaching Concentration	444	Sociology - 5-Year Bachelor of Arts and Master of Public Service Administration	483
Mathematics - Minor	444	Sociology - BS	485
Department of Oceanography	445	Sociology - 5-Year Bachelor of Science and Master of Public Service Administration	486
Oceanography - BS	446	Criminology - Minor	488
Oceanography - 5-Year Bachelor of Science and Master of Ocean and Science Technology	448	Latino/a and Mexican-American Studies - Minor	488
Ocean Studies - BA	451	Sociology - Minor	489
Oceanography - Minor	452	Department of Statistics	490
Department of Philosophy	452	Bioinformatics - BS	491
Philosophy - BA	453	Statistics - BS	493
Philosophy - 5-Year Bachelor of Arts and Master of Arts in Philosophy	455	Statistics - 5-Year Bachelor of Science and Master of Science in Statistical Data Science	494
Society, Ethics, and Law - BA	456	Statistics - Minor	496
Philosophy - Minor	457	Mays Business School	497
Philosophy Pre-Law - Certificate	458	Business - BS	501
Department of Physics and Astronomy	458	Business Honors - BBA	502
Physics - BA	461	Artificial Intelligence in Business - Minor	504
Physics - BS	462	Business - Minor	504
Physics - BS, Astrophysics Track	463	Business of Technology - Certificate	504
Physics - BS, Business Track	464	International Business Studies - Certificate	505
Physics - BS, Computational Science Track	465	Management Consulting - Certificate	507
Physics - BS, Physical Science Teaching Track	466	James Benjamin Department of Accounting	507
Physics - BS, Physics and Mathematics Teaching Track	468	Accounting - BBA	510
Physics - BS, Semiconductors and Modern Materials Track	469	Accounting - 5-Year Bachelor of Business Administration and Master of Financial Management	511
Astrophysics - Minor	470	Accounting- 5-Year Bachelor of Business Administration and Master of Science	513
Physics - Minor	471	Energy Accounting - Certificate	515
Department of Psychological and Brain Sciences	471	Internal Audit - Certificate	515
Behavioral and Cognitive Neuroscience - BS	473	Adam C. Sinn '00 Department of Finance	516
Neuroscience - BS, Behavioral and Cognitive Neuroscience ...	474	Finance - BBA	518
Psychology - BA	475	Commercial Banking - Certificate	519
		Corporate Finance - Certificate	519
		Trading, Risk and Investments - Certificate	520

Department of Information and Operations Management	520	Kinesiology - 5-Year Bachelor of Science and Master of Science in Athletic Training	568
Management Information Systems - BBA	522	Sport Management - BS	570
Supply Chain Management - BBA	524	Coaching - Minor	571
Department of Management	525	Sport Management - Minor	571
Management - BBA, Consulting/General Management Track	527	Department of Teaching, Learning and Culture	572
Management - BBA, Entrepreneurial Leadership Track	529	Early Childhood Development and Education - BS, Leadership Track	575
Management - BBA, Human Resource Management Track	530	Early Childhood Development and Education - BS, Teaching (Non- Licensure) Track	576
Management - BBA, Pre-Law Track	531	Education - BS, Early Childhood-3 Certification	577
Department of Marketing	533	Education - BS, English Language Arts/Social Studies, Middle Grades Certification	578
Marketing - BBA, Advertising Strategy Track	534	Education - BS, Math/Science, Middle Grades Certification	579
Marketing - BBA, Analytics and Consulting Track	536	Education - BS, Pre-K-6, Generalist Certification	580
Marketing - BBA, Healthcare Marketing Track	537	Secondary Education - Clinical Teaching Minor	581
Marketing - BBA, Professional Selling and Sales Management Track	538	Secondary Education - Minor	582
Marketing - BBA, Strategic Retailing Track	540	Secondary Graduate Certification Program	582
University Studies	541	College of Engineering	584
University Studies - BS, Business Concentration	541	Engineering Concept, Creation, and Commercialization - Certificate	591
College of Dentistry	543	Holistic Leadership in Engineering - Certificate	592
Caruth School of Dental Hygiene	543	International Engineering - Certificate	592
Dental Hygiene - BS	544	Department of Aerospace Engineering	593
College of Education and Human Development	546	Aerospace Engineering - BS	595
Department of Educational Administration and Human Resource Development	548	Department of Biomedical Engineering	597
Human Resource Development - BS	549	Biomedical Engineering - BS	599
Learning Technology and Performance Systems - BS	550	Biomedical Engineering - Minor	601
Human Resource Development - Minor	552	Artie McFerrin Department of Chemical Engineering	602
Learning Technology and Performance Systems - Minor	552	Chemical Engineering - BS	605
Department of Educational Psychology	552	Engineering Therapeutics Manufacturing - Certificate	606
Education - BS, Bilingual Education EC-6	555	Safety Engineering - Certificate	607
Education - BS, Special Education EC-12	556	Zachry Department of Civil and Environmental Engineering	607
Human Development and Family Sciences - BS	557	Civil Engineering - BS, Coastal Engineering Track	611
Creative Studies - Minor	558	Civil Engineering - BS, Construction Engineering and Management Track	614
Educational Supports for Individuals with Disabilities - Minor	559	Civil Engineering - BS, Environmental Engineering Track	616
Interdisciplinary Studies - Certificate	559	Civil Engineering - BS, General Civil Engineering Track	618
Department of Kinesiology and Sport Management	559	Civil Engineering - BS, Geotechnical Engineering Track	620
Kinesiology - BS, Exercise and Sport Science Track	563	Civil Engineering - BS, Structural Engineering Track	623
Kinesiology - BS, Exercise Science Track, Applied Exercise Physiology Concentration	564	Civil Engineering - BS, Transportation and Infrastructure Materials Engineering Track	625
Kinesiology - BS, Exercise Science Track, Basic Exercise Physiology Concentration	566	Civil Engineering - BS, Water Resources Engineering Track	627
Kinesiology - BS, Exercise Science Track, Motor Behavior Concentration	567	Environmental Engineering - BS	630

Department of Computer Science and Engineering	632	J. Mike Walker '66 Department of Mechanical Engineering	682
Computer Engineering - BS	635	Mechanical Engineering - BS	686
Computer Science - BA	637	Department of Multidisciplinary Engineering	688
Computer Science - BS	638	Architectural Engineering - BS, Mechanical Systems for Buildings Track	690
Computer Science - Minor	640	Architectural Engineering - BS, Structural Systems for Buildings Track	692
Cybersecurity - Minor	640	Interdisciplinary Engineering - BS	693
Game Design and Development - Minor	641	Interdisciplinary Engineering - 5-Year Bachelor of Science and Master of Public Health in Occupational Safety and Health ...	695
Cyber Operations - Certificate	641	Interdisciplinary Engineering - 6-Year Bachelor of Science and Juris Doctor	697
Department of Electrical and Computer Engineering	642	Engineering Entrepreneurship - Minor	699
Computer Engineering - BS	644	Engineering Project Management - Minor	700
Electrical Engineering - BS	646	Department of Nuclear Engineering	701
Electrical Engineering - Minor	648	Nuclear Engineering - BS	702
Department of Engineering Technology and Industrial Distribution	648	Nuclear Engineering - Minor	703
Electronic Systems Engineering Technology - BS	654	Radiological Health Engineering - Minor	704
Industrial Distribution - BS	655	Department of Ocean Engineering	704
Manufacturing and Mechanical Engineering Technology - BS	657	Ocean Engineering - BS	705
Multidisciplinary Engineering Technology - BS, Electro Marine Engineering Technology Track	659	Harold Vance Department of Petroleum Engineering	707
Multidisciplinary Engineering Technology - BS, Mechatronics Track	661	Petroleum Engineering - BS	709
Multidisciplinary Engineering Technology - BS, STEM Education Track	663	Data Analytics for Petroleum Industry - Certificate	711
Embedded Systems Integration - Minor	665	Petroleum Ventures - Certificate	711
Information Technology Service Management - Minor	665	Bush School of Government and Public Service	713
Technical Sales - Minor	666	Department of International Affairs	726
Wm Michael Barnes '64 Department of Industrial and Systems Engineering	666	International Affairs - BA	729
Data Engineering - BS	668	International Affairs - 5-Year Bachelor of Arts and Master of International Affairs	730
Industrial Engineering - BS	670	Department of Political Science	733
Industrial Engineering - 5-Year Bachelor of Science and Master of Public Health in Occupational Safety and Health	671	Political Science - BA	735
Industrial Engineering - 5-year Bachelor of Science and Master of Science in Finance	673	Political Science - 5-Year Bachelor of Arts and Master of Public Service Administration	737
Industrial Engineering - Minor	675	Political Science - BS	738
Data Center Operations Engineering - Certificate	675	Political Science - 5-Year Bachelor of Science and Master of Public Service Administration	739
Data Engineering - Certificate	676	American Politics and Policy - Minor	740
Engineering Systems Management - Certificate	676	Comparative Politics - Minor	741
Department of Materials Science and Engineering	677	International Relations - Minor	741
Materials Science and Engineering - BS	679	Legal Foundations - Minor	742
Materials Science and Engineering - Minor	680	Political Data and Research - Minor	742
Corrosion Science and Engineering - Certificate	681	Political Theory - Minor	742
Polymer Specialty - Certificate	682	Race, Ethnicity, and Gender Politics - Minor	743
		Department of Public Service and Administration	743

Public Service and Administration - BA	745	Occupational Safety and Health - Minor	799
Public Service and Administration - BS	746	Public Health Studies - Minor	799
Homeland Security and Emergency Management - Minor	747	College of Veterinary Medicine and Biomedical Sciences	800
Nonprofit Studies - Minor	747	Biomedical Sciences - BS	801
Public Management - Minor	748	Biomedical Sciences - Minor	804
Public Policy Analysis - Minor	748	University Studies	805
College of Nursing	749	University Studies - BS, Biomedical Sciences Concentration	805
Nursing - BSN, Honors	752	Department of Veterinary Integrative Biosciences	806
Nursing - BSN, RN to BSN Track	753	Department of Veterinary Pathobiology	808
Nursing - BSN, Second Degree BSN Track	755	Department of Veterinary Physiology and Pharmacology	810
Nursing - BSN, Traditional BSN	756	Biomedical Research - Certificate	811
College of Performance, Visualization and Fine Arts	759	School of Military Sciences	813
Dance Science - BS	763	Department of Aerospace Studies	813
Kinesiology - BS, Dance Science Track	764	Department of Military Science	813
Music Performance - BFA	765	Department of Naval Science	815
Performance and Visual Studies - BA	767	Military Studies - Minor	816
Theatre – BFA	768	Texas A&M University at Galveston	818
Visualization - BS	769	General Information	823
Art - Minor	770	College of Marine Sciences and Maritime Studies	849
Artificial Intelligence in the Arts - Minor	771	Department of Foundational Sciences	850
Choreography - Minor	771	Clinical Laboratory Sciences - Minor	851
Dance Performance - Minor	771	Department of Marine and Coastal Environmental Science	851
Devised Theatre - Minor	772	Coastal Environmental Science and Society - BS	852
Film and Media Studies - Minor	772	Coastal Environmental Science and Society - 5-Year Bachelor of Science and Master of Marine Resources Management	854
Game Design and Development - Minor	773	Marine Sciences - BS	855
Graphic Design - Minor	773	Marine Sciences - BS, License Option	856
Music - Minor	773	Coastal Environmental Science and Society - Minor	858
Music Technology - Minor	774	Department of Marine Biology	858
Performance Studies - Minor	774	Marine Biology - BS	859
Studio Art - Minor	775	Marine Biology - BS, License Option	861
Virtual Production - Minor	775	Marine Fisheries - BS	862
School of Public Health	776	Marine Biology - Minor	863
Public Health - BS, Internship Track	781	Marine Fisheries - Minor	864
Public Health - BS, Non-Internship Track	783	Department of Marine Engineering Technology	864
Public Health - 5-year Bachelor of Science and Master of Public Health in Epidemiology	786	Marine Engineering Technology - BS	865
Public Health - 5-Year Bachelor of Science and Master of Public Health in Health Policy and Management	789	Marine Engineering Technology - BS, License Option	866
Public Health - 5-Year Bachelor of Science and Master of Public Health in Health Behavior	792	Marine Electro-Technology - Minor	868
Public Health - 5-year Bachelor of Science and Master of Public Health in Occupational Safety and Health	795	Marine Engineering Technology - Minor	868
Health Behavior - Minor	798	Department of Maritime Business Administration	868
		Maritime Business Administration - BS	869

Maritime Business Administration - 5-Year Bachelor of Science and Master of Maritime Business Administration and Logistics	871	ATTR - Athletic Training (ATTR)	942
Maritime Business Administration - Minor	872	BAEN - Biological & Ag Engr (BAEN)	942
Maritime Cybersecurity - Minor	872	BEFB - Bilingual Ed Field Based (BEFB)	945
Department of Maritime Studies	873	BESC - Bioenvironmental Sci (BESC)	946
Maritime Studies - BA	874	BICH - Biochemistry (BICH)	947
Diving Technology and Methods - Minor	875	BIMS - Biomedical Science (BIMS)	949
Maritime Environmental Law and Policy - Minor	876	BIOL - Biology (BIOL)	951
Department of Maritime Transportation	876	BMEN - Biomedical Engineering (BMEN)	955
Marine Transportation - BS	877	BOTN - Botany (BOTN)	959
University Studies Programs	879	BUSH - Geo Bush School of Gov (BUSH)	959
University Studies - BS, Oceans and One Health Concentration	879	BUSN - Mays Business School (BUSN)	960
University Studies - BS, Tourism and Coastal Community Development Concentration	880	CARC - College of Architecture (CARC)	962
Texas A&M University at Qatar	882	CEHD - Coll of Ed & Human Dev (CEHD)	963
General Information	883	CHEM - Chemistry (CHEM)	964
Division of Arts and Sciences	893	CHEN - Chemical Engineering (CHEN)	967
Course Descriptions	895	CHIN - Chinese (CHIN)	971
AALO - Arabic & Asian Language (AALO)	895	CLAS - Classics (CLAS)	971
ACCT - Accounting (ACCT)	895	CLEN - College of Engineering (CLEN)	974
AERO - Aerospace Engineering (AERO)	897	COMM - Communication (COMM)	975
AERS - Aerospace Studies (AERS)	900	COSC - Construction Science (COSC)	980
AFST - Africana Studies (AFST)	901	CSCE - Computer Sci & Engr (CSCE)	985
AGCJ - Ag Comm & Journalism (AGCJ)	904	CULN - Culinology (CULN)	990
AGEC - Agricultural Economics (AGEC)	906	CVEN - Civil Engineering (CVEN)	990
AGLS - Ag & Life Sciences (AGLS)	910	CYBR - Cybersecurity (CYBR)	994
AGSC - Agricultural Science (AGSC)	911	DAEN - Data Engineering (DAEN)	995
AGSM - Agricultrl Systems Mgmt (AGSM)	912	DASC - Dairy Science (DASC)	997
ALEC - Ag Leadrshp, Ed & Comm (ALEC)	914	DCED - Dance Education (DCED)	997
ALED - Ag Leadership & Dev (ALED)	916	DDHS - Dental Hygiene (DDHS)	1001
ANSC - Animal Science (ANSC)	918	DIVE - Diving Tech and Methods (DIVE)	1003
ANTH - Anthropology (ANTH)	922	ECCB - Eco & Conservation Biol (ECCB)	1004
ARAB - Arabic (ARAB)	927	ECDE - Early Chldhd Devl & Educ (ECDE)	1009
ARCH - Architecture (ARCH)	928	ECEN - Electrical & Comp Engr (ECEN)	1009

PURPOSE/ACCREDITATION

Purpose of Catalogs

Purpose of Catalogs

The Undergraduate and Graduate and Professional catalogs provide information about the academic programs of Texas A&M University to students, prospective students, faculty and staff of the University. Included is information concerning admissions, academic regulations and requirements, services available to students, academic offerings and a list of the administrative officers and faculty of the University. While every effort has been made to make this catalog as complete and accurate as possible, changes may occur at any time in requirements, deadlines, fees, curricula and courses listed in these catalogs.

Students should refer to Howdy for course offerings in any given semester. For administrative reasons, because of insufficient enrollment or because of limited resources, any given course might not be offered in the announced semester.

This catalog was prepared in advance of its effective date; therefore, the course descriptions may vary from actual course content. The provisions of the catalogs do not constitute a contract, express or implied, between any applicant, student, faculty or staff member of Texas A&M University or The Texas A&M University System. These catalogs are for informational purposes only. The University reserves the right to change or alter any statement herein without prior notice. Neither catalog should be interpreted to allow a student who begins his or her education under either catalog to continue the program under the provisions in that catalog.

Accreditation

Accreditation

Texas A&M University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, master's and doctoral degrees. Degree-granting institutions also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Texas A&M University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling 404-679-4500, or by using information available on SACSCOC's website (<https://www.sacscoc.org/>).

College of Agriculture and Life Sciences

Agricultural Science is accredited by the State Board of Educator Certification and the Texas Education Agency. (<https://tea.texas.gov/about-tea/leadership/state-board-for-educator-certification/>)

Agricultural Systems Management curriculum is recognized by the American Society of Agricultural and Biological Engineers (ASABE) (<http://www.asabe.org/>).

Biological and Agricultural Engineering is accredited by the Engineering Accreditation Commission of ABET (<https://amspub.abet.org/aps/>), <http://www.abet.org> (<http://www.abet.org/>).¹

The undergraduate program in Biochemistry is accredited by the American Society for Biochemistry and Molecular Biology (ASBMB) (<http://www.asbmb.org/>).

The Didactic Program in Dietetics is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) (<https://www.eatrightpro.org/acend/>).

Food Science and Technology curriculum is approved by the Institute of Food Technologists (IFT) (<https://www.ift.org/>).

Forensics and Investigative Sciences program is accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) (<http://fepac-edu.org/>).

College of Architecture

Architecture is accredited by the National Architectural Accrediting Board (NAAB) (<http://www.naab.org/>).

Construction Science curriculum is accredited by the American Council for Construction Education (ACCE) (<http://www.acce-hq.org/>).

Landscape Architecture curriculum is accredited by the Landscape Architectural Accreditation Board (LAAB) (<https://www.asla.org/accreditationlaab.aspx>).

The Master's curricular in *Urban and Regional Planning* curriculum is accredited by the Planning Accreditation Board (PAB) (<http://www.planningaccreditationboard.org/>).

Construction Management is accredited by the American Council for Construction Education (<https://www.acce-hq.org/>).

College of Arts and Sciences

Clinical Psychology is accredited by the American Psychological Association (APA) (<http://www.apa.org/>).

Mays Business School

The baccalaureate and master's curricula in *Mays Business School* are accredited by the Association to Advance Collegiate Schools of Business (AACSB) (<http://www.aacsb.edu/>).

College of Dentistry

Dentistry degree program is accredited by the Commission on Dental Accreditation (CODA) (<https://coda.ada.org/>).

College of Education and Human Development

Programs in professional education at Texas A&M University are approved and fully accredited by the State Board of Educator Certification and the Texas Education Agency (https://tea.texas.gov/About_TEA/Leadership/State_Board_for_Educator_Certification/).

Counseling Psychology and *School Psychology* are accredited by the American Psychological Association (APA) (<http://www.apa.org/>).

Athletic Training is accredited by the Commission on Accreditation of Athletic Training Education (CaATE) (<http://caate.net/>).

College of Engineering

Undergraduate programs in *Aerospace, Biomedical, Chemical, Civil, Computer, Electrical, Industrial, Mechanical, Nuclear, Ocean, and Petroleum Engineering* are accredited by the Engineering Accreditation Commission of ABET (<https://amspub.abet.org/aps/name-search/?searchType=institution>), <http://www.abet.org> (<http://www.abet.org/>).

Undergraduate programs in *Electronic Systems Engineering Technology, Industrial Distribution, Manufacturing and Mechanical Engineering Technology, and Multidisciplinary Engineering Technology*, are accredited by

the Engineering Technology Accreditation Commission of ABET (<https://amspub.abet.org/aps/name-search/?searchType=institution>), <http://www.abet.org> (<http://www.abet.org>).

The undergraduate program in *Computer Science* is accredited by the Computing Accreditation Commission of ABET (<https://amspub.abet.org/aps/name-search/?searchType=institution>), <http://www.abet.org> (<http://www.abet.org>).

Bush School of Government and Public Service

The *Master of Public Service and Administration* degree in the Bush School of Government and Public Service is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA) (<https://www.naspaa.org/accreditation/>)

School of Law

The *School of Law* is accredited by the American Bar Association (ABA) (<http://www.americanbar.org/aba.html>).

Naresh K. Vashisht College of Medicine

Medical Education degree program is accredited by the Liaison Committee on Medical Education (LCME) (<http://lcme.org/>).

The *Post Graduate Residency Training for Physicians in Institution, Family Medicine, Sports Medicine, and Psychiatry* is accredited by the American Council for Graduate Medical Education (ACGME) (<https://www.acgme.org/>).

The *Continuing Medical Education for Physicians* is accredited by the Accreditation Council for Continuing Medical Education (ACCME) (<https://www.accme.org/>).

College of Nursing

The baccalaureate and master's degree programs in nursing at Texas A&M University College of Nursing are accredited by the Commission on Collegiate Nursing Education (<https://www.aacnnursing.org/ccne-accreditation/>), 655 K Street, NW, Suite 750, Washington, DC 20001, 202-887-6791.

Irma Lerma Rangel College of Pharmacology

The PharmD curriculum in the *Irma Lerma Rangel College of Pharmacy* is accredited by the Accreditation Council for Pharmacy Education (ACPE) (<https://www.acpe-accredit.org/>)

School of Public Health

Public Health degree program is accredited by the Council on Education for Public Health (CEPH) (<https://ceph.org/>). (This includes the undergraduate degree program)

The *Master of Health Administration* is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME) (<https://cahme.org/>).

College of Veterinary Medicine and Biomedical Sciences

Veterinary Medicine degree program is accredited by the American Veterinary Medical Association Council on Education (AVMA) (<https://www.avma.org/>).

Texas A&M University at Galveston

The undergraduate program in *Marine Engineering Technology* is accredited by the Engineering Technology Accreditation

Commission of ABET (<https://amspub.abet.org/aps/name-search/?searchType=institution>), <http://www.abet.org> (<http://www.abet.org>).

The *Third Mate or Third Assistant Engineering Officer in the U.S. Merchant Marines* is accredited by the U.S. Coast Guard (<https://www.uscg.mil/>).

Texas A&M University at Qatar

Undergraduate programs in *Chemical, Electrical, Mechanical, and Petroleum* are accredited by the Engineering Accreditation Commission of ABET (<https://amspub.abet.org/aps/name-search/?searchType=institution>), <http://www.abet.org> (<http://www.abet.org>).

¹ The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering.

CATALOG PUBLICATION STATEMENT

The Texas A&M University Undergraduate Catalog, published annually, provides information about the undergraduate programs of Texas A&M University to students, prospective students, and faculty and staff of the University. Included is information concerning requirements for admission, services available to students, course offerings and listings of the administrative officers.

Publication

Publication Statement

The Texas A&M University Undergraduate Catalog is published each spring and the provisions for this volume are applicable during the 2025-2026 academic year. A student who registers for the first time at the University during a summer session is subject to the degree requirements set forth in the catalog effective for the fall semester immediately following his or her initial enrollment.

Texas A&M University Undergraduate Catalog, Edition 148, is published online by the Office of the Registrar, Texas A&M University, College Station, Texas 77843-0200.

UNIVERSITY ACADEMIC CALENDARS

College Station and Galveston

Texas A&M University and Texas A&M University at Galveston Calendar

All dates and times are subject to change.

2025 Summer Term I

May 12	Monday. Graduation application opens for all students planning to graduate in August 2025.
May 23	Friday, 5 p.m. Last day to register for first term semester classes. Refer to Student Business Services for tuition and fee due dates.
May 26	Monday. Memorial Day - No classes. Faculty and Staff Holiday.
May 27	Tuesday. First day of first term classes. Refer to Student Business Services for the Refund Policy for Withdrawals and Dropped Courses.
May 30	Friday. Last day for adding/dropping first term classes. Official census date for first term classes.
June 16	Monday, 5 p.m. Last day for all students to drop courses with no penalty for the first term (Q-drop). Last day to change Kinesiology 198/199 grade type for the first term. Last day to officially withdraw from the University for the first term.
June 19	Thursday. Juneteenth Emancipation Day - No classes. Faculty and Staff Holiday.
June 24	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 30	Monday. Last day of first term classes.
July 1	Tuesday. First term final examinations.
July 4	Friday. Independence Day - No classes. Faculty and Staff Holiday. Midsummer break at Bush School Washington, D.C. site.
July 7	Monday. First term final grades due at noon. Grades will be available for viewing in Howdy after 5 p.m.
July 11	Friday. Last day to apply online for all degrees to be awarded in August 2025 without a late fee.
July 23	Wednesday. Summer 2025 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
August 5	Tuesday. Last day to apply for all degrees to be awarded in August.
August 8	Friday. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.

August 9	Saturday. Commencement and Commissioning for degrees in College Station and Galveston. Additional details will be posted on graduation.tamu.edu as they become available.

August 13	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2025 Summer Term II

May 12	Monday. Graduation application opens for all students planning to graduate in August 2025.
June 24	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
July 1	Tuesday. Last day to register for second term classes. Refer to Student Business Services for tuition and fee due dates.
July 2	Wednesday. First day of second summer term classes.
July 4	Friday. Independence Day. Faculty and staff holiday. No classes.
July 8	Tuesday, 5 p.m. Last day for adding/dropping courses for the second term. Official census date for the second term.
July 11	Friday. Last day to apply online for all degrees to be awarded in August 2025 without a late fee.
July 23	Wednesday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop) for the second term. Last day to change Kinesiology 198/199 grade type for the second term. Last day to officially withdraw from the University for the second term.
	Summer 2025 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
August 5	Tuesday. Last day of second term classes. Last day to apply for all degrees to be awarded in August.
August 6	Wednesday. Second term final examinations for all students.
August 8	Friday. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 8-9	Friday - Saturday. Commencement and Commissioning for degrees in College Station and Galveston. Additional details will be posted on graduation.tamu.edu as they become available.
August 12	Tuesday, noon. Final grades for second term classes due. Grades will be available for viewing in Howdy after 5 p.m.
August 13	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2025 10-Week Summer Semester

May 12	Monday. Graduation application opens for all students planning to graduate in August 2025.
May 23	Friday, 5 p.m. Last day to register for 10-week semester classes. Refer to Student Business Services for tuition and fee due dates.
May 26	Monday. Memorial Day. Faculty and Staff holiday. No classes.
May 27	Tuesday. First day of 10-week classes. Refer to Student Business Services for the Refund Policy for Withdrawals and Dropped Courses.
May 30	Friday. Last day for adding/dropping 10-week classes. Official census date for 10-week classes.
June 2	Monday. First day of classes at the Bush School Washington, D.C. site.
June 19	Thursday. Juneteenth Emancipation Day. Faculty and Staff Holiday. No classes.
June 24	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 30-July 4	Monday-Friday. Midsummer break at the Bush School Washington, D.C. site.
July 1	Tuesday. No 10-week classes.
July 4	Friday. Independence Day. Faculty and staff holiday. No classes.
July 11	Friday. Last day to apply online for all degrees to be awarded in August 2025 without a late fee.
July 17	Thursday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop) for 10-week classes. Last day to officially withdraw from the University for 10-week classes.
July 23	Wednesday. Summer 2025 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
July 28	Monday. No classes held at the Bush School Washington, D.C. site.
July 29	Tuesday. Last day of classes at the Bush School Washington, D.C. site.
July 30-31	Wednesday-Thursday. Bush School Washington, D.C. site final examinations.
August 5	Tuesday. Last day of 10-week classes. Last day to apply for all degrees to be awarded in August.
August 6-7	Wednesday - Thursday. 10-week final examinations for all students.
August 8	Friday. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.

August 8-9 Friday - Saturday. Commencement and Commissioning for degrees in College Station and Galveston. Additional details will be posted on graduation.tamu.edu as they become available.

August 12 Tuesday, noon. Final grades for 10-week classes due. Grades will be available for viewing in Howdy after 5 p.m.

August 13 Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2025 Fall Semester

August 11	Monday. Graduation application opens for all students planning to graduate in December 2025.
August 13	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.
August 22	Friday, 5 p.m. Fall semester open registration ends. Late registration and course add/drop period begins.
August 25	Monday. First day of fall semester classes.
August 29	Friday. Last day for adding/dropping courses for the fall semester.
September 1	Monday. Labor Day. Faculty and Staff Holiday. No classes.
September 10	Wednesday. Fall official census date.
September 22	Monday. Undergraduate deadline to submit a request for change of curriculum.
September 26	Friday. Last day to apply for all degrees to be awarded in December without a late fee.
September 30	Tuesday. Undergraduate degree plan approval deadline. See Student Rule 1.9.
October 13	Monday, noon. Mid-semester grades due.
October 13-14	Monday-Tuesday. Fall break. No classes.
November 5	Wednesday. Last day to apply online for December 2025 graduation.
November 6-21	Thursday-Friday. Preregistration for 2026 spring semester.
November 11	Monday. Veterans Day. No classes held at the Bush School Washington, DC site.
November 18	Tuesday. Bonfire 1999 Remembrance Day.
November 19	Wednesday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop). Last day to change Kinesiology 198/199 grade type for fall 2025. Last day to officially withdraw from the University. Fall 2025 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
November 26	Wednesday. Reading day. No classes.
November 27-28	Thursday-Friday. Thanksgiving holiday. Faculty and Staff holiday. No classes.
December 8	Monday. Last day of fall semester classes. Last day to apply for all degrees to be awarded in December. No regular course examinations (except for laboratory and one-hour courses).

December 9	Tuesday. Redefined day for students at the Bush School Washington, DC site.
December 9-10	Tuesday - Wednesday. Reading days. No classes.
December 10	Wednesday. Reading Day for Bush School Washington, DC site.
December 11-12, 15-16	Thursday-Friday, Monday-Tuesday. Fall semester final examinations for all students.
December 17	Wednesday. 5 p.m. Last day for December undergraduate degree candidates to apply for Tuition Rebate (https://aggie.tamu.edu/graduation/tuition-rebate) in Howdy. 6 p.m. Grades due for degree candidates. Grades will be available for viewing in Howdy after 10 p.m. Commencement and Commissioning for all degrees in College Station (tentative). Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.
December 18	Thursday. Commencement and Commissioning for all degrees in College Station. Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.
December 19	Friday. Commencement and Commissioning for all degrees in College Station (tentative). Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available. Commencement and Commissioning - All degrees in Galveston.
December 22	Monday, noon. Final grades for all students due. Grades will be available for viewing in Howdy after 5 p.m.
December 23	Tuesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.
December 24-January 1	Wednesday-Thursday. Faculty and Staff holiday.

All dates and times are subject to change.

2026 Spring Semester

December 22	Monday. Graduation application opens for all students planning to graduate in May 2026.
January 9	Friday, 5 p.m. Spring semester open registration ends. Late registration and course add/drop period begins.
January 12	Monday. First day of spring semester classes.
January 16	Friday. Last day for adding/dropping courses for the spring semester.
January 19	Monday. Martin Luther King, Jr. Day. Faculty and Staff holiday. No classes.
January 28	Wednesday. Spring official census date.
February 9	Monday. Undergraduate deadline to submit a request for change of curriculum.
February 13	Friday. Last day to apply for all degrees to be awarded in May without a late fee.
February 16	President's Day observed. No classes. Bush School Washington, D.C. site.

March 2	Monday, noon. Mid-semester grades due.
March 9-13	Monday-Friday. Spring break. No classes.
March 12-13	Thursday-Friday. Faculty and Staff Holiday.
March 25	Wednesday. Last day to apply for spring 2026 graduation online.
March 26 - April 10	Thursday -Friday. Preregistration for the 2026 summer and fall semesters.
April 3	Friday. Reading day. No classes. Does not apply to clinical placements for the School of Nursing.
April 14	Tuesday, 5 p.m. Last day for all students to drop courses with no academic penalty (Q-drop). Last day to change KINE 198/199 Grade Type for spring 2026. Last day to officially withdraw from the University.
	Spring 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
April 21	Tuesday. Muster. Campus ceremony.
April 27	Monday. No regular course examinations (except for laboratory and one-hour courses).
April 28	Tuesday. Redefined day. Students attend their Friday classes. Does not apply to programs offered by the College of Nursing. Redefined day. Students attend their Monday classes. Bush School Washington, D.C. site. Last day of spring semester classes. No regular course examinations (except for laboratory and one-hour courses).
	Last day to apply for all degrees to be awarded in May.
April 29	Wednesday. Reading day. No classes.
April 30-May 1, May 4-5	Thursday-Friday, Monday-Tuesday. Spring semester final examinations for all students.
May 6	Wednesday.

	5 p.m. Last day for May undergraduate degree candidates to apply for Tuition Rebate in Howdy. 6 p.m. Grades for degree candidates due. Grades will be available for viewing in Howdy after 10 p.m.
May 7-9	Thursday - Saturday. Commencement and Commissioning for all degrees in College Station – additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.
May 11	Monday, noon. Final grades for all students due. Grades will be available for viewing in Howdy after 5 p.m.
May 12	Tuesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2026 Summer Term I

May 11	Monday. Graduation application opens for all students planning to graduate in August 2026.
May 22	Friday, 5 p.m. Last day of open registration for first term semester classes.

May 25	Monday. Memorial Day. Faculty and Staff holiday. No classes.
May 26	Tuesday. First day of first term classes.
May 29	Friday. Last day for adding/dropping first term classes. Official census date for first term classes.
June 15	Monday, 5 p.m. Last day for all students to drop courses with no penalty for the first term (Q-drop). Last day to change Kinesiology 198/199 grade type for the first term. Last day to officially withdraw from the University for the first term.
June 19	Friday. Juneteenth Emancipation Day. Faculty and staff holiday. No classes.
June 23	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 29	Monday. Last day of first term classes.
June 30	Tuesday. First term final examinations.
July 6	Monday. First term final grades due at noon. Grades will be available for viewing in Howdy after 5 p.m. Last day to apply online for all degrees to be awarded in August 2026 without a late fee. Last day to apply online for all certificates to be awarded in August 2026.
July 21	Tuesday. August 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline (https://aggie.tamu.edu/graduation/degree-requirement-verification) (https://aggie.tamu.edu/graduation/degree-requirement-verification/) per Student Rule 14.2.
August 4	Tuesday. Last day to apply for all degrees to be awarded in August.
August 7	Friday. Commencement and Commissioning - All degrees in Galveston. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 8	Saturday. Commencement and Commissioning for degrees in College Station. Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.
August 12	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2026 Summer Term II

May 11	Monday. Graduation application opens for all students planning to graduate in August 2026.
June 23	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 30	Tuesday. Last day to register for second term classes. Refer to Student Business Services for tuition and fee due dates.

July 1	Wednesday. First day of second summer term classes.
July 6	Monday. Last day to apply online for all degrees to be awarded in August 2026 without a late fee. Last day to apply online for all certificates to be awarded in August 2026.
July 8	Tuesday, 5 p.m. Last day for adding/dropping courses for the second term. Official census date for the second term.
July 21	Tuesday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop) for the second term. Last day to change Kinesiology 198/199 grade type for the second term. Last day to officially withdraw from the University for the second term. Summer 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
August 4	Tuesday. Last day of second term classes. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate (https://aggie.tamu.edu/graduation/tuition-rebate) (https://aggie.tamu.edu/graduation/tuition-rebate/) in Howdy.
August 5	Wednesday. Second term final examinations for all students.
August 7	Friday. Commencement and Commissioning - All degrees in Galveston. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 8	Saturday. Commencement and Commissioning for degrees in College Station. Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.
August 11	Tuesday, noon. Final grades for second term classes due. Grades will be available for viewing in Howdy after 5 p.m.
August 12	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2026 10-Week Summer Semester

May 11	Monday. Graduation application opens for all students planning to graduate in August 2026.
May 22	Friday, 5 p.m. Last day to register for 10-week semester classes. Refer to Student Business Services for tuition and fee due dates.
May 25	Monday. Memorial Day. Faculty and Staff holiday. No classes.
May 26	Tuesday. First day of 10-week classes.
May 29	Friday. Last day for adding/dropping 10-week classes.

	Official census date for 10-week classes.
June 19	Thursday. Juneteenth Emancipation Day. Faculty and Staff Holiday. No classes.
June 23	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 29-July 3	Monday-Friday. Midsummer break at the Bush School Washington, D.C. site.
June 30	Tuesday. No 10-week classes. Does not apply to undergraduate Nursing courses.
July 6	Monday. Last day to apply online for all degrees to be awarded in August 2026 without a late fee. Last day to apply online for all certificates to be awarded in August 2026.
July 15	Wednesday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop) for 10-week classes. Last day to officially withdraw from the University for 10-week classes.
July 21	Wednesday. Summer 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
July 23	Thursday. Last day of classes for Bush School Washington, DC site.
July 29-30	Wednesday-Thursday. Bush School Washington, D.C. site final examinations.
August 4	Tuesday. Last day of 10-week classes. Last day to apply for all degrees to be awarded in August.
August 5-6	Wednesday - Thursday. 10-week final examinations for all students.
August 7	Friday. Commencement and Commissioning - All degrees in Galveston. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 8	Saturday. Commencement and Commissioning for degrees in College Station. Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.

Dentistry

College of Dentistry (Dental Hygiene) Calendar

All dates and times are subject to change.

2025

June 9	Monday, SUMMER SESSION BEGINS (D2, D3, D4, DH Sr.) (7-week session)
June 10	Tuesday, QA/RM Program (D3-D4 & DH Sr.) - Clinics Closed From 1:00 PM - 4:00 PM
June 19	Thursday, Juneteenth Holiday
July 4	Thursday, Independence Day Holiday
July 25	Friday, SUMMER SESSION ENDS (D2, D3, D4, DH Sr.) (2-week break)
July 29	Tuesday, Summer Session Grades Due By 12:00 NOON - Dental and Dental Hygiene Courses
August 6-7	Wednesday-Thursday, Orientation - First-Year Dental and Dental Hygiene Students (ATTENDANCE MANDATORY)
August 8	Friday, Dental and Dental Hygiene White Coat Ceremony
August 11	Friday, 8:00 AM, FALL SEMESTER BEGINS (All students) (16-week fall semester)
August 22-23	Southwest Dental Conference - Clinics Closed
August	Award MS and PhD Degrees, visit https://graduation.tamu.edu/ for dates
September 1	Monday, Labor Day, Holiday
November 12	IPER Symposium – Half-day A.M. DH clinic closed all day. 2nd half-day to be scheduled in Spring 2026
November 24-28	Fall Semester Recess
November 27-28	Thursday and Friday, Thanksgiving Day, Holiday
December 5	Friday, FALL SEMESTER INSTRUCTION ENDS (D1, D2, D3, D4, DH Jr., DH Sr.)
December 8-12	Fall Semester Examination Period
December 12	Friday, 5:00 PM, Holiday Recess Begins (3-week break)
December	Award MS and PhD Degrees (visit https://graduation.tamu.edu for dates)
December 17	Faculty Retreat; Staff Development Event
December 23-31	Thursday, Christmas Day, Holiday

2026

January 1	Thursday, New Year's Day, Holiday
January 5	Monday, 8:00 AM, SPRING SEMESTER BEGINS (All Students) (17-week spring semester)
January 6	Tuesday, Fall Semester Grades Due by 12:00 NOON - Dental, Dental Hygiene, and Graduate Courses
January 19	Monday, Martin Luther King, Jr. Day, Holiday
February 2-4	Monday - Wednesday, Mock Boards— D4 Students
February 27	TAMU Health Disaster Day (College Station—details on travel assistance to be provided)
March 9-13	Spring Semester Recess
March 27-30	Clinical Licensure Exam - D4, DH Sr. Students
April 1	Wednesday, Scholars Day - Clinic closed for Dental and Dental Hygiene students
May 8	Friday, 5:00 PM, Spring Semester Instruction Ends (DDS, DH Students)
May 11-15	Spring Semester Examination Period (3-week break for returning students)
May 15	Friday, Spring Semester Grades Due by 12:00 NOON – D4, DH Sr., and Degree Candidate Graduate Students

May 19	Tuesday, Spring Semester Grades Due by 12:00 NOON – For All Other Students
May 21	Award Ceremony
May 22	Commencement
May 25	Monday, Memorial Day Holiday
June 8	Monday, SUMMER SESSION BEGINS (D2, D3, D4, DH Sr.) (7-week session)

[^]Dates for the Eid holidays are subject to change; however, the University will be closed for a three-day period during Eid.

BOARD OF REGENTS AND ADMINISTRATIVE OFFICERS

Board of Regents (<https://www.tamus.edu/regents/bios/>)

The responsibilities of The A&M System Board of Regents are to oversee the administration and set policy direction for the System's 11 universities, a comprehensive health science center, eight state agencies, and the RELIS Campus.

Mr. Robert L. Albritton, Chairman - Fort Worth

Mr. Jay C. Graham, Vice Chairman - Houston

Mr. David C. Baggett - Houston

Mr. John W. Bellinger - San Antonio

Mr. James R. "Randy" Brooks - San Angelo

Mr. Michael A. "Mike" Hernandez III - Fort Worth

Mr. William "Bill" Mahomes - Dallas

Mrs. Kelley Sullivan Georgiades - Galveston

Mr. R. Sam Torn - Houston

Student Regent - Mr. Cage M. Sawyers

Chancellor - Mr. Glenn Hegar

Texas A&M University Administrative Officers

President - General Mark A. Welsh III (Ret.)

- President's Cabinet (<https://president.tamu.edu/administration/presidents-cabinet/>)

Executive Vice President and Provost - Dr. Alan R. Sams

Vice President and Chief Operating Officer for Texas A&M Health (interim) - Dr. Indra K. Reddy

Vice President for Professional Schools and Programs, Dean and Chief Operating Officer, Texas A&M - Fort Worth - Mr. Robert B. Ahdieh

Vice President and Chief Operating Officer, Texas A&M at Galveston - Colonel Michael E. Fossum USAFR (Ret.)

Vice President and Chief Marketing and Communications Officer - Mr. R. Ethan Braden

Vice President for Finance & Chief Financial Officer - Mr. John W. Crawford

Vice President for Human Resources and Organizational Effectiveness - Mr. Henry Judah

Vice President for Information Technology and Chief Information Officer - Dr. Edwin L. Pierson

Senior Vice President for Strategy and Business Services - Mr. Joseph P. Pettibon II

Vice President for Research (Interim) - Dr. Costas N. Georgiades

Vice President for Student Affairs - Dr. Bill Kibler

Associate Vice President and Chief Operating Officer, Texas A&M - D.C. (Interim) - Mr. Raymond Robertson

Associate Vice President and Chief Operating Officer for the Higher Education Center at McAllen - Mr. Manual M. Vela

Associate Vice President for Facilities and Energy Services - Mr. Les Williams

Commandant of the Corps of Cadets (interim) - Lieutenant General Loyd S. Utterback (Ret.)

Chief Compliance Officer - Ms. Lisa K. Akin

Chief Operating Officer - Mr. Peter Lange

History and Development

Mission Statement

Texas A&M University is dedicated to the discovery, development, communication, and application of knowledge in a wide range of academic and professional fields. Its mission of providing the highest quality undergraduate and graduate programs is inseparable from its mission of developing new understandings through research and creativity. It prepares students to assume roles in leadership, responsibility and service to society. Texas A&M assumes as its historic trust the maintenance of freedom of inquiry and an intellectual environment nurturing the human mind and spirit. It welcomes and seeks to serve persons of all racial, ethnic and geographic groups as it addresses the needs of an increasingly diverse population and a global economy. In the 21st century, Texas A&M University seeks to assume a place of preeminence among public universities while respecting its history and traditions.

History and Development

Texas A&M is the state's first public institution of higher education. With a student body of more than 79,000 and more than 5,200 acres on the College Station campus alone, Texas A&M is also among the nation's largest universities.

Our origins, however, are much humbler. We owe our existence to the Morrill Act, approved by the U.S. Congress on July 2, 1862, which provided for the donation of public land to the states. The land was to be sold at auction, with the proceeds set aside in a perpetual fund, and

the interest generated supporting a college “to teach such branches of learning as are related to agriculture and mechanical arts . . . in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life.”

In November 1866, the Texas Legislature agreed to provide for the state’s land-grant college. Five years later, the Agricultural and Mechanical College of Texas was established through an act that appropriated \$75,000 for the construction of buildings and that bound the state to defray all expenses of the college exceeding the annual interest from the endowment. Proceeds from the sale of the 180,000 acres of land scrip received under the Land Grant College Act were invested in \$174,000 of Texas gold frontier defense bonds, forming a perpetual endowment for the institution. A commission created to identify a location for the college accepted the offer of 2,416 acres of land from the citizens of Brazos County in 1871, and the college opened its doors five years later.

In 1888, the faculty initiated programs of instruction at the graduate level, and in 1890, two Master of Science degrees were conferred. Initially, the Agricultural and Mechanical College of Texas emphasized graduate programs in agriculture and engineering, which were administered by a faculty committee for graduate studies. In 1898, a single Master of Science degree in horticulture was awarded, followed by a scattering of Master of Science degrees in agriculture over the next 22 years. The acceleration in the awarding of Master of Science degrees after 1920 prompted the college to establish the graduate school in 1924, with the dean of the college serving as graduate dean.

In 1936, the Board of Directors approved “certain programs of study and research leading to the doctorate.” That same year, the Academic Council established the graduate faculty, and in 1940, the first Ph.D. was awarded. In the 1960s, the Board of Regents created programs of graduate instruction in each of the academic colleges.

In 1963, the Texas state legislature officially changed the college’s name to Texas A&M University, with the “A” and “M” being a symbolic link to the school’s past but no longer officially standing for “Agricultural and Mechanical.”

Texas A&M underwent many other significant changes in the 1960s, as well. Under Gen. Earl Rudder’s administration, Texas A&M opened its doors to African American students and formally admitted women. Participation in the Corps of Cadets was made voluntary.

Since then, Texas A&M has become an academic powerhouse. It is one of only three Tier 1 universities in the state (along with Rice University and The University of Texas at Austin). Texas A&M was designated a sea-grant institution in 1971 and a space-grant institution in 1989, making it among the first four universities to hold this triple distinction, and one of only 24 nationwide.

In 2001, Texas A&M became a member of the Association of American Universities, which is restricted to the 71 top public and private institutions of higher learning in the United States and Canada. In 1949, the Texas A&M Chapter of Phi Kappa Phi was established and in 2004, the Kappa of Texas Chapter of Phi Beta Kappa was installed at Texas A&M.

As the state of Texas has grown, so has the university. In fall 2024, the university enrolled over 79,000 students across its various locations, and membership in the Corps of Cadets was more than 2,300. Historically, the Corps of Cadets has produced more officers than any other institution outside the military academies. The George H.W. Bush Presidential

Library and Museum opened on West Campus in 1997, making Texas A&M one of only a few universities to host a presidential library.

Texas A&M has a presence in all 254 Texas counties through its extension agencies, teaching sites in Washington, D.C., and McAllen, Texas, and has two branch campuses: a marine campus in Galveston and an engineering campus in the Middle Eastern country of Qatar (fully funded by the Qatar Foundation and planned to close in 2028). Research conducted at Texas A&M generated annual expenditures of more than \$1.278 billion in fiscal year 2023.

Classified by the Carnegie Foundation as a Research Intensive University, Texas A&M embraces its mission of advancing knowledge and human achievement, helping to drive the economic engine of the state and nation, and preparing students to be lifelong learners and leaders in today’s knowledge-based, global society.

Texas A&M’s focus on excellence and innovation in teaching, research and service has led to rankings among the nation’s top universities. Today, Texas A&M seeks even greater preeminence among the nation’s top universities, while continuing to respect the history and traditions that define us.

University Core Curriculum

The Texas A&M Core Curriculum, in compliance with the Texas Core Curriculum, provides students with a foundation of knowledge of human cultures and the physical and natural world, develops principles of personal and social responsibility for living in a diverse world, and advances intellectual and practical skills that are essential for all learning. The Core Curriculum enhances the individual degree program and university graduation requirements, and all three areas must be met by every student.

Given the rapid evolution of necessary knowledge and skills and the need to take into account global, national, state, and local cultures, the core curriculum ensures that students will develop the essential knowledge and skills they need to be successful in college, in a career, in their communities, and in life. The core curriculum acts to enrich and broaden the University’s tradition of providing thorough preparation in each student’s academic major and preparing students for a lifetime of learning.

The University Core Curriculum requirements are described in the section that follows. These requirements must be met by every student entering Texas A&M University on or after the 2014 fall semester. Students entering earlier will be guided by the core curriculum in the catalog upon which they entered the university. Individual degree programs may require that specific courses from the core curriculum be used to satisfy core curriculum requirements. Please check with individual program advisors for details. Students transferring course credit to satisfy the Core Curriculum requirements should refer to the Texas Common Course Numbering System (p. 1417).

Texas A&M University branch campuses in Galveston and Qatar do not offer all of the courses included in the Texas A&M core curriculum. All campuses offer courses in each Foundational Component Area so that students can complete the core curriculum at their home campus.

However, the Galveston and Qatar campuses have a limited number of courses in each Foundational Component Area. Students should consult their academic advisors for information on core curriculum courses available at their specific campus.

The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and their role in a diverse world and democratic society.

- *Critical Thinking Skills* – to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- *Communication Skills* – to include effective development, interpretation and expression of ideas through written, oral and visual communication.
- *Empirical and Quantitative Skills* – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
- *Teamwork* – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.
- *Personal Responsibility* – to include the ability to connect choices, actions and consequences to ethical decision-making.
- *Social Responsibility* – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

Students develop and practice these skills in the context of 42 semester credit hours assigned to eight Foundational Component Areas, each made up of a selection of courses that meet the definition provided by the Texas Core Curriculum. For additional information, please reference <http://core.tamu.edu>.

Communication - 6 SCH

Code	Title	Semester Credit Hours
COMM 203	Public Speaking	3
COMM 205	Communication for Technical Professions	3
COMM 243	Argumentation and Debate	3
ENGL 103	Introduction to Rhetoric and Composition	3
ENGL 104	Composition and Rhetoric	3
ENGL 203	Writing about Literature	3
ENGL 210	Technical and Professional Writing	3

Courses in this category focus on developing ideas and expressing them clearly, considering the effective of the message, fostering understanding, and building the skills needed to communicate persuasively. Courses involve the command of oral, aural, written, and visual literacy skills that enable people to exchange messages appropriate to the subject, occasion, and audience. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, team work, and personal responsibility.

Mathematics – 6 SCH¹

Code	Title	Semester Credit Hours
MATH 135	Mathematics for Teachers I	3
MATH 136	Mathematics for Teachers II	3
MATH 140	Mathematics for Business and Social Sciences	3
MATH 142	Business Calculus	3
MATH 147	Calculus I for Biological Sciences	4

MATH 148	Calculus II for Biological Sciences	4
MATH 150	Functions, Trigonometry and Linear Systems	4
MATH 151	Engineering Mathematics I	4
MATH 152	Engineering Mathematics II	4
MATH 167	Explorations in Mathematics	3
MATH 168	Finite Mathematics	3
MATH 171	Calculus I	4
MATH 172	Calculus II	4
PHIL 240	Introduction to Logic	3
STAT 201	Elementary Statistical Inference	3

Courses in this category focus on quantitative literacy in logic, patterns, and relationships. Courses involve the understanding of key mathematical concepts and the application of appropriate quantitative tools to everyday experiences. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, and empirical and quantitative.

Life and Physical Sciences – 9 SCH²

Code	Title	Semester Credit Hours
AGSM 105	The World Has a Drinking Problem - Global Water Scarcity	3
ANSC 107	General Animal Science	3
ANTH 225	Introduction to Biological Anthropology	3
ANTH 226	Introduction to Biological Anthropology Laboratory	1
ARSC 104	Contemporary Issues in Science - Cosmos, Earth and Humanity	3
ARSC 105/ CHEM 105	Contemporary Issues in Science - The Environment	3
ASTR 101	Basic Astronomy	3
ASTR 102	Observational Astronomy	1
ASTR 103	Introduction to Stars and Exoplanets	3
ASTR 104	Introduction to Galaxies and Cosmology	3
ASTR 109/ PHYS 109	Big Bang and Black Holes	3
ASTR 111	Overview of Modern Astronomy	4
ATMO 110/ GEOL 110	Disasters and Society	3
ATMO 201	Weather and Climate	3
ATMO 202	Weather and Climate Laboratory	1
ATMO 210	Climate Change	3
BESC 201	Introduction to Bioenvironmental Sciences	3
BESC 204	Molds and Mushrooms: The Impact of Fungi on Society and the Environment	3
BIOL 101	Botany	4
BIOL 104	Contemporary Issues in Science - Cosmos, Earth and Humanity	3
BIOL 107	Zoology	4

BIOL 111	Introductory Biology I	4
BIOL 112	Introductory Biology II	4
BIOL 113	Essentials in Biology	3
CHEM 105/ ARSC 105	Contemporary Issues in Science - The Environment	3
CHEM 106	Molecular Science for Citizens	3
CHEM 107	General Chemistry for Engineering Students	3
CHEM 116	Molecular Science for Citizens Laboratory	1
CHEM 117	General Chemistry for Engineering Students Laboratory	1
CHEM 119	Fundamentals of Chemistry I	4
CHEM 120	Fundamentals of Chemistry II	4
ECCB 205	Fundamentals of Ecology	3
ECCB 215	Fundamentals of Ecology-- Laboratory	1
ECCB 309	Forest Ecology	3
ENTO 322	Insects and Human Society	3
FIVS 205	Introduction to Forensic and Investigative Sciences	3
GEOG 203	Planet Earth	3
GEOG 205	Environmental Change	3
GEOG 213	Planet Earth Lab	1
GEOL 101	Principles of Geology	3
GEOL 102	Principles of Geology Laboratory	1
GEOL 106	Historical Geology	4
GEOL 110/ ATMO 110	Disasters and Society	3
GEOL 207	Dinosaur World	3
GEOL 208	Life on a Dynamic Planet	3
HORT 201	Horticultural Science and Practices	3
HORT 202	Horticultural Science and Practices Laboratory	1
KINE 120	The Science of Basic Health and Fitness	1
KINE 223	Introduction to the Science of Health and Fitness	3
MARS 102	Earth and Ocean Science	4
NUTR 222	Nutrition for Health and Health Care	3
OCNG 251	The Blue Planet - Our Oceans	3
OCNG 252	The Blue Planet - Our Oceans Laboratory	1
PHYS 104	Contemporary Issues in Science - Cosmos, Earth and Humanity	3
PHYS 109/ ASTR 109	Big Bang and Black Holes	3
PHYS 123	Physics for Future Presidents	3
PHYS 201	College Physics	4
PHYS 202	College Physics	4
PHYS 206	Newtonian Mechanics for Engineering and Science	3
PHYS 207	Electricity and Magnetism for Engineering and Science	3

PHYS 226	Physics of Motion Laboratory for the Sciences	1
PHYS 227	Electricity and Magnetism Laboratory for the Sciences	1
POSC 201	General Avian Science	3
SCSC 105	World Food and Fiber Crops	3
SCSC 301	Soil Science	4

Courses in this category focus on describing, explaining, and predicting natural phenomena using the scientific method. Courses involve the understanding of interactions among natural phenomena and the implications of scientific principles on the physical world and on human experiences. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, empirical and quantitative, and team work.

HIST 301/	Blacks in the United States Since	3
AFST 301	1877	
HIST 304	Southwest Borderlands	3

Courses in this category focus on the consideration of past events and ideas relative to the United States, with the option of including Texas History for a portion of this component area. Courses involve the interaction among individuals, communities, states, the nation, and the world, considering how these interactions have contributed to the development of the United States and its global role. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, social responsibility, and personal responsibility.

Government/Political Science – 6 SCH

Code	Title	Semester Credit Hours
POLS 206	American National Government	3
POLS 207	State and Local Government	3

Courses in this category focus on consideration of the Constitution of the United States and the constitutions of the states, with special emphasis on that of Texas. Courses involve the analysis of governmental institutions, political behavior, civic engagement, and their political and philosophical foundations. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, social responsibility, and personal responsibility.

Social and Behavioral Sciences – 3 SCH

WGST 213/ SOCI 213	Gender and Health	3

Courses in this category focus on the application of empirical and scientific methods that contribute to the understanding of what makes us human. Courses involve the exploration of behavior and interactions among individuals, groups, institutions, and events, examining their impact on the individual, society, and culture. The following skills will be addressed in the courses that comprise this area: critical thinking, communication, empirical and quantitative, and social responsibility.

¹ Applicable courses are listed in the Texas Higher Education Coordinating Board course inventory as meeting either the Mathematics or the Component Area Option Foundational Component Area.

² Applicable courses are listed in the Texas Higher Education Coordinating Board course inventory as meeting either the Life and Physical Sciences or the Component Area Option Foundational Component Area.

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Student Learning Outcomes

Student learning outcomes articulate the knowledge and skills we expect students to gain during their educational experience. These learning outcomes require students connect their course- and degree-

level learning to overall goals determined to be critically important as graduates progress in their career and engage in learning for a lifetime.

We expect students to have learned the material presented in their individual courses; from entry-level general education courses required of all undergraduates to capstone courses restricted to seniors in a major to specialized graduate seminars. By the time they graduate, students are expected to have learned the material assigned in all of their courses. Not only must graduates know facts and understand basic concepts, they must also demonstrate an ability to apply and explain those facts and concepts creatively in new situations. Students gain the skills and knowledge that allows them to thrive in a complex world.

Baccalaureate

A student who graduates from Texas A&M with a baccalaureate degree will have acquired the knowledge and skills necessary to:

Master the depth of knowledge required for a degree, including the ability to:

- Articulate disciplinary and interdisciplinary theories, concepts, principles, skills, and practices;
- Synthesize knowledge across courses and other experiences; and
- Apply knowledge from core curriculum courses, discipline-based courses, and other experiences in a range of contexts to solve problems and make decisions.

Demonstrate critical thinking, including the ability to:

- Evaluate, analyze, and integrate information from a variety of sources;
- Use appropriate strategies and tools to represent, analyze, and integrate information; and
- Develop critical, reasoned positions.

Communicate effectively, including the ability to:

- Demonstrate effective oral communication skills (which could include the use of languages such as American Sign language for those who do not communicate orally);
- Demonstrate effective writing skills;
- Demonstrate effective nonverbal communication skills (which could include appropriate use of performance, design, or representations such as maps, tables, and graphs);
- Listen actively and critically;
- Present work effectively to a range of audiences; and
- Effectively communicate original and creative ideas.

Practice personal and social responsibility, including the ability to:

- Practice ethical leadership;
- Recognize an ethical dilemma and apply rational decision-making in order to address it;
- Choose ethical courses of action in research and practice;
- Acknowledge and address the consequences of one's own actions; and
- Engage in local and global civic activities.

Demonstrate social, cultural, and global competence, including the ability to:

- Live and work effectively in a diverse and global society;
- Articulate the value of a diverse and global perspective; and
- Recognize diverse economic, political, cultural, and religious opinions and practices.

Prepare to engage in lifelong learning, including the ability to:

- Exhibit the skills necessary to acquire, organize, reorganize, and interpret new knowledge;
- Show proficiency in current technologies and the ability to adapt to emerging technologies;
- Recognize and participate in activities that enhance wellness of body, mind, and spirit;
- Formulate a plan of personal goals for continued professional growth; and
- Demonstrate intellectual curiosity.

Work collaboratively, including the ability to:

- Participate effectively in teams;
- Consider different points of view; and
- Work with others to support a shared purpose or goal.

Degree and Program Information

Which Catalog to Follow

In meeting the requirements for a baccalaureate degree, a student is expected to complete the course and hour requirements as outlined in the catalog in effect at the time they first enroll at Texas A&M. A student will not be granted a degree based upon completion of the requirements set forth in a catalog more than seven years old. Before changing catalogs, the student must consult their academic advisor. A student changes catalogs by filing a written notification with their dean, or designee. It is incumbent on the student to verify that the change has been made. Texas A&M University Student Rules (including periodic revisions) is the governing document in case of conflict between this catalog and Texas A&M University Student Rules. It is the responsibility of the individual student to read this information carefully and to use it as a reference. Please refer to the Student Rules for this information.

Whereas each college must retain the flexibility to improve its curriculum, course offerings may be changed during the student's education. If a course required under a previous catalog is no longer offered, a student eligible to graduate according to that catalog should consult their academic advisor or dean to identify another course that may be used to fulfill the requirement. Course adjustments in the degree program are permitted only with the approval of the dean through the department head or program director. Furthermore, the University reserves the right to make any changes in requirements it may consider necessary and desirable by due notice in the catalog.

Students are required to take the courses listed in a curriculum. This display is intended as a guide to indicate the preferred order for completion of degree requirements. Exceptions to certain requirements may be petitioned through the department head to the dean of the college.

Degrees Offered

The following degrees are offered for the satisfactory completion of resident study in the appropriate curriculum:

- Bachelor of Arts (BA)
- Bachelor of Business Administration (BBA)
- Bachelor of Fine Arts (BFA)
- Bachelor of Landscape Architecture (BLA)
- Bachelor of Science (BS)
- Bachelor of Science in Nursing (BSN)
- Master of Agribusiness (MAB)
- Master of Agriculture (MAGR)
- Master of Applied Youth Development (MAY)
- Master of Architecture (MARCH)
- Master of Arts (MA)
- Master of Biotechnology (MBIOT)
- Master of Business Administration (MBA)
- Master of Clinical Nutrition (MCN)
- Master of Computer Science (MCS)
- Master of Education (MED)
- Master of Engineering (MENGR)
- Master of Engineering Technical Management (METM)
- Master of Equine Industry Management (MEIM)
- Master of Financial Management (MFM)
- Master of Fine Arts (MFA)
- Master of Geoscience (MGSC)
- Master of Health Administration (MHA)
- Master of Industrial Distribution (MID)
- Master of International Affairs (MIA)
- Master of International Policy (MIP)
- Master of Land and Property Development (MLPD)
- Master of Landscape Architecture (MLA)
- Master of Laws (ML)
- Master of Legal Studies (MLG)
- Master of Marine Resources Management (MMRM)
- Master of Maritime Business Administration and Logistics (MMB)
- Master of National Security and Intelligence (MNSI)
- Master of Natural Resources (MNA)
- Master of Ocean Science and Technology (MOST)
- Master of Public Health (MPH)
- Master of Public Service and Administration (MPSA)
- Master of Real Estate (MRE)
- Master of Science (MS)
- Master of Science in Nursing (MSN)
- Master of Science in Public Health (MSPH)
- Master of Urban Planning (MUP)
- Master of Water Management and Hydrological Science (MWM)
- Doctor of Dental Surgery (DDS)
- Doctor of Education (EdD)
- Doctor of Engineering (DEng)
- Doctor of Medicine (MD)
- Doctor of Nursing Practice (DNP)
- Doctor of Pharmacy (PharmD)
- Doctor of Philosophy (PhD)
- Doctor of Public Health (DrPH)

- Doctor of Veterinary Medicine (DVM)
- Juris Doctor (JD)

The buying, selling, creating, duplicating, altering, giving or obtaining the Texas A&M diploma or other academic record is prohibited by state law. A person who violates this statute or who aids another person in violation is guilty of a misdemeanor and is subject to a fine and/or confinement if convicted.

The University has the right to rescind a previously granted degree if the University becomes aware of information indicating that the degree never should have been granted.

Tuition Charged for Excess Credit Hours

The State of Texas will not provide funds to state institutions of higher education for excess semester credit hours earned by a resident student. Because funding will not be provided by the State, and as permitted by State law, Texas A&M will charge tuition at the non-resident rate to all students who exceed the semester credit hour limit for their program. Excess semester credit hours are those which accrue after the student attempts more than 30 hours beyond the number of semester credit hours required for the completion of the degree program in which the student is enrolled. Thus, the student may accumulate up to 30 hours beyond those required for the chosen degree program and not exceed the limitation. The limitation on excess credit hours applies only to those undergraduate students who first enter higher education in the fall 1999 and thereafter. The semester credit hours counted toward the limitation include all hours attempted by the student except:

- Semester credit hours earned by the student before receiving an associate's or baccalaureate degree that has been previously awarded. (Effective February 2024)
- Semester credit hours earned by the student by examination or other procedure by which credit is earned without registering for a course for which tuition is charged.
- Credit for remedial education courses, technical courses, workforce education courses funded according to contact hours, or other courses that would not generate academic credit that could be applied toward a degree program at Texas A&M.
- Semester credit hours earned by the student at a private or an out-of-state institution.
- Semester credit hours earned by the student before graduating from high school and used to satisfy high school graduation requirements (Effective June 2009).
- Hours not eligible for formula funding.
- The first 15 hours upon return to an institution of higher education after a 24-month break in enrollment, so long as 50 hours of non-exempt coursework was completed before the break in enrollment. (Effective June 2017)
- Semester credit hours earned 10 or more years before the student began his or her degree program that have been excluded from the student record due to an election of admission under the Academic Fresh Start program.

Supplementary Fee for Courses Attempted More than Twice

Certain courses that are attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the

student who is repeating the course. Texas A&M has chosen to assess a supplementary fee to those students attempting a course more than twice.

A student attempting certain courses more than twice at Texas A&M will be subject to a supplementary fee of \$125 per semester credit hour (\$375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M and is subject to the supplementary fee.

Requirements for a Baccalaureate Degree

Requirements for a Baccalaureate Degree

To be a candidate for a degree at the end of the semester, a student must:

1. Be enrolled in or have completed all degree requirements by the 60th class day of the fall or spring semester, or the 15th class day of the second summer term either in residence or at another college or university. Proof of enrollment in any courses taken at another college or university must be provided to the Office of the Registrar, Degree Audit, by the above deadlines. A student must be enrolled in his or her degree-granting college(s) and major(s) at the beginning of the student's last semester at Texas A&M to be a candidate for a degree from that college.
2. Complete a minimum of 120 credit hours.
3. Complete, with at least a 2.0 grade point average, all undergraduate coursework attempted at Texas A&M.
4. Complete, with a 2.0 grade point average, all courses included in the major field of study.
5. Meet the Residence Requirement. A minimum of 25% of coursework applying to a degree must be completed in residence at Texas A&M University. Upper-level Residence Requirement: A minimum of 36 semester hours of 300- and/or 400-level coursework must be successfully completed in residence at Texas A&M to obtain a baccalaureate degree. A minimum of 12 of these 36 semester hours must be in the major. A student participating in Texas A&M off-campus study programs approved by the student's college may apply upper division credits earned in the programs toward the residence requirement up to a maximum of 18 semester hours, including hours transferred from another institution as part of one of these programs. These Texas A&M off-campus study programs may involve domestic or international institutions and may be taught by Texas A&M faculty or faculty from other institutions. Students choosing to participate in such programs and wishing to apply credits earned from the programs toward the residence requirement must receive college approval prior to the student's participation in the off-campus study program. Students participating in international programs must contact the Education Abroad Programs Office for details on how to obtain approval for courses taken outside the United States. Students participating in domestic off-campus programs must contact the dean's office of their college for approval procedures.
6. Complete the University Core Curriculum. Core Curriculum courses are listed on the University Core Curriculum (p. 26) page. For additional information, please reference <https://core.tamu.edu>.
7. Complete the citizenship requirement, which includes at least 6 credit hours in government/political science and at least 6 credit hours in American history. American National Government (POLS 206) and State and Local Government (POLS 207) fulfill the government/political science requirement.
8. Complete the Foreign Language requirement. A minimum of one year of foreign language is required for all baccalaureate degree programs at Texas A&M. For many programs, this degree requirement can be satisfied by the satisfactory completion of two units of the same foreign language at the high school level or a two course sequence of the same language at the college level.
 - a. International students whose native language is not English are exempt from satisfying the university foreign language requirement. These students may not register for the beginning and intermediate level courses in their native language (course numbers 101, 102, 201, and 202) which are used to fulfill the foreign language requirement.
 - b. Many Bachelor of Arts degrees require at least 6 additional semester credit hours of foreign language at the 200-level. Students should consult with an academic advisor about specific language requirements for their degree program.
 - c. Students who wish to demonstrate foreign language proficiency without taking acceptable high school or college courses may do so through the existing credit by examination process. In cases where students wish to demonstrate proficiency in a language not taught at Texas A&M, the following procedures shall apply. The student shall request an examination from the Head of the Department of Hispanic Studies or the Head of the Department of Global Languages and Culture. This department will coordinate the administration of special examinations to demonstrate foreign language proficiency. This will include finding an appropriate examination to test the student's proficiency, informing the student how to arrange to take the examination and certifying the results to the student's advisor. All arrangements shall be made and fees paid by the student.
 - d. American Sign Language (ASL) may be used to fulfill the foreign language degree requirement unless otherwise specified by the student's college or department. Students may either transfer ASL credits or arrange to be tested at another institution. (Texas A&M does not offer courses in ASL.)
9. Complete the Writing requirement. The requirement may be met by passing two writing (W) courses or one writing (W) course and one oral communication (C) course in the student's major. The requirement may not be met by any course listed as a University Core Curriculum communication requirement, nor may it be met through credit by examination. It may be met by a course transferred from another institution of higher learning, with the approval of the dean of the student's college and the Vice Provost for Student Success. Upon request, students will provide their dean with a course description, syllabus or writing sample from the course being transferred.
- a. Both the government/political science and American history requirements may be met, in whole or in part, by equivalent coursework satisfactorily completed at another accredited college or university.
- b. State law permits the substitution of 3 hours of history and 3 hours of government/political science for a student in the program of an approved senior ROTC unit. With the approval of the dean of the appropriate college, students successfully completing the required 12 hours of upper-level ROTC courses will be deemed to have completed the equivalent of POLS 206 or POLS 207 plus HIST 105 or HIST 106 (or another appropriate course) for a total of 6 hours.
- c. Students pursuing teacher certification are not allowed to substitute ROTC credits for this requirement.

10. Complete the International and Cultural Diversity and Cultural Discourse requirements (6 credit hours).

- a. The International and Cultural Diversity (ICD) requirement will prepare graduates for a diverse, global society and address the following University Baccalaureate Learning Outcomes:

- 1) Live and work effectively in a diverse and global society;
- 2) Articulate the value of a diverse and global perspective;
- 3) Recognize diverse opinions and practices and consider different points of view (including but not limited to economic, political, cultural, gender, and religious opinions).

Students must take one course (3 credit hours) from the list available on the International and Cultural Diversity Requirement (p. 49) page. For additional information, please reference <http://icd.tamu.edu> (<http://icd.tamu.edu/>).

- b. The Cultural Discourse (CD) requirement will prepare graduates to be leaders in an increasingly diverse world and act in a multicultural and global society and will address the following:

- 1) Hold respectful discussions and discourse on difficult topics
- 2) Understand self, including personal bias and prejudices
- 3) Understand how power or authority is distributed within organizational systems, including recognizing potential forms of privilege, oppression, and discrimination
- 4) Understand, as an overarching goal, how to use and promote informed dialogue to overcome issues dividing, not uniting, individuals and humankind
- 5) Understand tolerance and intolerance and have knowledge of when it is appropriate to be intolerant of specific behaviors/activities that violate our core values as people and Aggies
- 6) Understand how to function effectively in a multicultural and global society
- 7) Understand conflict from multiple viewpoints
- 8) Incorporates "Aggie Experience Activities" into the course
- 9) Incorporates small group discussions into the course

Students must take one course (3 credit hours) from the list available on the Culture Discourse Requirement page. For additional information, please reference <http://icd.tamu.edu>.

- c. If a course listed as ICD or CD, but it also satisfies a Core Curriculum requirement, then the course may be used to satisfy both requirements.

Undergraduate Minor Programs

A minor is a selection of courses that focuses on a single area or an interdisciplinary perspective as developed by the department or program that offers the minor. The department or program offering the minor is responsible for setting enrollment limits and deciding which courses are used to meet the minor. Coursework consists of 15-18 hours with a minimum of 6 in residence at the 300-400 level.

If a minor is offered by a department or academic unit, then the minor is considered to be available to all students as resources permit. Students must declare a minor no later than the date on which they apply for graduation. A maximum of two minors per degree can be completed by students. A minor is displayed on the transcript after graduation but not displayed on the diploma.

Two Degrees

A student pursuing a second baccalaureate degree must complete all university, college, and department/curricular requirements for the second degree not covered in the first. All essential work required for a second degree must be defined in advance in writing by the Dean or designee of the college granting the second degree. In all such cases, the total semester hours required must be at least 30 hours additional to the greater number required for either degree. At least 12 hours of 300- and 400-level course work must be completed in each field of study.

A student who has previously not been enrolled at Texas A&M and who is seeking a second degree must have a minimum of 36 hours of 300- and 400-level courses, 12 hours of which must be in the major field of study, in residence at Texas A&M. The student must also meet the citizenship requirements for American history and government/political science.

Baccalaureate Degree Option for Students Granted Early Admission to Professional Programs

A current undergraduate student who opts in to the early admission to professional program may be eligible for a Texas A&M University baccalaureate degree after completing their first year of professional school. In order to be eligible, the student must complete the minimum 120 hours as required for a baccalaureate degree from Texas A&M, including courses specified by the department and outlined in this catalog. To be eligible, the student must have satisfied all University Core Curriculum requirements as specified in this catalog. A student intending to use this baccalaureate degree option must coordinate early in their program with the appropriate undergraduate advisor in order to ensure that degree requirements are met. The student must complete at least half of the total hours required for the baccalaureate degree while in residence at Texas A&M. This requirement includes a minimum of 24 hours of upper division courses in residence; 12 of the 24 hours must be in the major.

Students selected into an approved professional program will be required to successfully complete a minimum of one full year of acceptable work at an accredited school of medicine, dentistry, optometry, pharmacy, law, physical therapy, or veterinary medicine in the United States. The student will be responsible for submitting official transcripts to the Office of Admissions to verify completion of agreement requirements. The participating undergraduate department or program will complete the required degree audit, approve the necessary substitutions and clear the student to graduate.

Baccalaureate degrees will be awarded in May, August, and December after the completion of the first year of the approved professional program or the necessary hours for the desired baccalaureate degree. Students must apply for graduation in Howdy. Check the academic calendar for deadlines and for commencement dates. Questions may be emailed to degree-audit@tamu.edu or call (979) 845-1089. For additional information about graduation, visit the graduation (<http://graduation.tamu.edu>) website.

Former students who have received a professional degree and did not receive a baccalaureate degree from Texas A&M prior to starting professional school may request the conferral of a baccalaureate degree with completion of core curriculum and the residence requirement as stated in this catalog. Although this is a University-wide policy, not all colleges choose to participate. The use of this baccalaureate option will remain a college initiative in that each individual college and/or program must clear each candidate for graduation.

Graduation with Honors

Undergraduate Students

To be eligible for graduation with Latin honors, a student seeking a baccalaureate degree must enroll in and complete a minimum of 60 semester hours at Texas A&M University, Texas A&M University Galveston campus, or Texas A&M University Qatar campus preceding graduation and have an institutional grade point average equal to or greater than that required for the appropriate category of honors. Course credit received by examination, and courses reserved for graduate credit only, are excluded from the calculation of the number of hours and the grade point average for graduation with Latin honors.

Categories for Latin honors shall be designated as follows:

- *Summa Cum Laude*: A student may be graduated Summa Cum Laude with a grade point average of 3.90 or above.
- *Magna Cum Laude*: A student may be graduated Magna Cum Laude with a grade point average range of 3.70 through 3.899.
- *Cum Laude*: A student may be graduated Cum Laude with a grade point average range of 3.50 through 3.699.

Grade point averages used to determine Latin honors designations are calculated during the final degree audit the day before the ceremonies and include hours and final grades in courses taken during the graduation semester. Latin honors designations will not be changed after the final graduation clearance deadline.

Information regarding other honors designations may be found on the Honors and Undergraduate Research (<https://catalog.tamu.edu/undergraduate/honors-undergraduate-research/>) page.

Please note:

- Students are **not** required to enroll in honors courses to graduate with Latin honors.
- Taking designated honors courses does not mean students will graduate with Latin honors.
- Grade point averages for Undergraduate Latin honors are truncated at 3 decimal places.

No Upper Division student found guilty of academic misconduct may receive Cum Laude, Magna Cum Laude, or Summa Cum Laude honors at graduation. Upper Division status is defined as having earned 60 or more credit hours, including transfer hours, prior to the date of the violation. This sanction is automatic upon a finding of academic misconduct, and is imposed without regard to the severity of other sanctions imposed by the instructor or Honor Council.

For more information, please see the Aggie Honor System Office (p. 84) section in the catalog.

Professional Practice Students

- Students who complete their entire course of study at Texas A&M University in the College of Medicine are eligible for academic honors.

In the Naresh K. Vashisht College of Medicine, students must obtain a grade point average of 3.50 or greater to graduate with honors.

- In the Irma Lerma Rangel College of Pharmacy, students are eligible for Latin Honors as follows: Summa Cum Laude (4.0-3.90), Magna Cum Laude (3.89-3.75), and Cum Laude (3.74-3.50).
- In the School of Law, JD students may qualify to graduate Summa Cum Laude by holding a final cumulative grade point average of 3.80 or above, Magna Cum Laude with a final cumulative grade point average of 3.60-3.79, and Cum Laude with a final cumulative grade point average of 3.40 through 3.59.
- A professional practice student in the College of Veterinary Medicine may qualify to graduate Summa Cum Laude by holding a final grade point average of 3.90 or above, Magna Cum Laude with a grade point average of 3.70 through 3.899 and Cum Laude with a grade point average of 3.50 through 3.699.

Graduation Application, Diploma and Commencement

Formal application for degrees must be submitted online in Howdy by the deadline stated in the academic calendar and in accordance with Student Rule 14.1 (<https://student-rules.tamu.edu/rule14/>).

The diploma of the University, with the appropriate degree, will be granted to the student who has made formal application for the degree by the published official deadline, has all grades on record in the Office of the Registrar, including grades pertaining to graduation with honors, and has satisfied all degree requirements by no later than 5 p.m., Friday, the first week of classes of the succeeding semester or summer term following commencement in accordance with Student Rule 14.5 (<https://student-rules.tamu.edu/rule14/>).

Students must have settled all financial obligations to the university prior to receiving a diploma.

A degree will not be awarded until full resolution of cases for which a student has been charged or is being investigated for one or more violations of a University or Student Rule that could result in suspension or expulsion in accordance with Student Rule 14.17 (<https://student-rules.tamu.edu/rule14/>).

Graduate and undergraduate students who plan to attend a commencement ceremony must do so the semester they apply for graduation and complete their degree requirements in accordance with Student Rule 14.15 (<https://student-rules.tamu.edu/rule14/>).

Formal application for a degree at Texas A&M University at Qatar is made by submitting an Application for Graduation via the Howdy Portal. Students must also pay the required diploma/graduation fee and the optional regalia fee (if planning to attend the commencement ceremony) using the online payment portal (<https://tamu.estore.flywire.com/products/?storeCatalog=1202>). Applications for graduation should be submitted by the deadline stated in the Texas A&M University at Qatar academic calendar. Under certain circumstances, an application for a degree may be accepted after the stated deadline.

Students must have settled all financial obligations to the university and Qatar Foundation prior to receiving a diploma.

Texas A&M University at Qatar graduate and undergraduate students completing their degree in July or December will have the opportunity to participate in the commencement ceremony in May, following

the completion of their degree. Students must participate in the commencement ceremony at their home campus.

Requirements for a Certificate

Requirements for a Certificate

A current student must receive permission from the department offering the certificate and their primary academic advisor in order to pursue a certificate. All requirements outlined in the catalog and degree evaluation for the specific certificate program must be met in order for a certificate to be awarded.

Certificate types:

- **Major-dependent** - A student is admitted to the program through the offering department. Admission to the program requires the student to pursue a specific degree/major at Texas A&M University. This type of certificate program typically serves as a track within a degree program. The certificate and degree are awarded simultaneously.
- **Degree-dependent** - A student is admitted to the program through the offering department. Admission to the program simply requires that the student pursue a degree at Texas A&M University. The certificate may or may not be related to their specific degree/major. The certificate is awarded upon completion of the requirements independent of a degree.
- **Stand-alone** - A student is admitted to the program through the Office of Admissions. The student may pursue the certificate without being enrolled in a degree program. The certificate may be awarded upon completion of requirements. Students currently pursuing a degree or another stand-alone certificate through Texas A&M can be admitted to an additional stand-alone certificate program through the offering department without submitting an application through the Office of Admissions.

Graduation Application, Certificate and Commencement

Formal application for certificates to be awarded must be submitted online in Howdy (<http://howdy.tamu.edu/>) by the deadline stated in the academic calendar.

Certificates are granted to students who make a formal application for the certificate to be awarded, have all grades on record in the Office of the Registrar, and have satisfied all certificate requirements. With the exception of major dependent certificates, which are awarded at the end of each term along with the student's associated degree, certificates are awarded on the last calendar day of the month in which they are completed. In months where a commencement ceremony is held, degree-dependent and stand-alone certificates will be awarded with the conferral date for that term's commencement.

Students that have made a formal application for a certificate in a given semester/term must have all requirements satisfied no later than 5 p.m., Friday, the first week of classes of the succeeding semester or summer term for the certificate to be formally awarded.

A Certificate Processing and Service Charge is assessed for each certificate graduation application submitted by a student. This charge is non-refundable and cannot be transferred to another certificate graduation application.

Students must have settled all financial obligations to the university prior to receiving a certificate.

University certificates will either be mailed directly to the student or issued to the college for formal presentation.

For additional information regarding certificate tracking and awarding, please visit the Office of the Registrar website (<https://registrar.tamu.edu/administrative-services/degree-audit/certificate-tracking-awarding/>).

Combination Programs

Combination Programs

Combination programs represent two degrees of different academic levels that are pursued and awarded simultaneously. Combination programs may allow a shorter time for completion due to the "double-counting" of some coursework. Even though the programs are combined, students must satisfy the required hours of both programs. See the specific program for more details.

Texas A&M University currently offers the following undergraduate programs combined with graduate and professional programs:

Undergraduate and Graduate Programs

- Bachelor of Arts in Communication and Master of Arts in Communication, 5-Year Degree Program (p. 327)
- Bachelor of Arts in Economics and Master of International Affairs, 5-Year Degree Program (p. 349)
- Bachelor of Arts in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 350)
- Bachelor of Arts in Economics and Master of Science in Economics, 5-Year Degree Program (p. 352)
- Bachelor of Arts in English and Master of Arts in English, 5-Year Degree Program (p. 364)
- Bachelor of Arts in History and Master of Arts in History, 5-Year Degree Program (p. 414)
- Bachelor of Arts in International Affairs and Master of International Affairs, 5-Year Degree Program (p. 730)
- Bachelor of Arts in Journalism and Master of Arts in Communication, 5-Year Degree Program (p. 333)
- Bachelor of Arts in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 439)
- Bachelor of Arts in Philosophy and Master of Arts in Philosophy, 5-Year Degree Program (p. 455)
- Bachelor of Arts in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 737)
- Bachelor of Arts in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 483)
- Bachelor of Arts in Telecommunication Media Studies and Master of Arts in Communication, 5-Year Degree Program (p. 339)
- Bachelor of Business Administration in Accounting and Master of Financial Management, 5-Year Degree Program (p. 511)
- Bachelor of Business Administration in Accounting and Master of Science, 5-Year Degree Program (p. 513)
- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 141)
- Bachelor of Science in Applied Mathematics and Master of Science in Economics, 5-Year Degree Program (p. 432)

- Bachelor of Science in Applied Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 434)
- Bachelor of Science in Chemistry and Master of Science in Chemistry, 5-Year Degree Program (p. 321)
- Bachelor of Science in (p. 854)Coastal [Environmental Science and Society](#) and Master of Marine Resources Management, 5-Year Degree Program
- Bachelor of Science in Communication and Master of Arts in Communication, 5-Year Degree Program (p. 330)
- Bachelor of Science in Economics and Master of International Affairs, 5-Year Degree Program (p. 354)
- Bachelor of Science in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 355)
- Bachelor of Science in Economics and Master of Science in Economics, 5-Year Degree Program (p. 356)
- Bachelor of Science in Geographic Information Science and Technology and Master of Science in Geography, 5-Year Degree Program (p. 371)
- Bachelor of Science in Geography and Master of Geoscience in Geoscience, 5-Year Degree Program (p. 373)
- Bachelor of Science in Geography and Master of Science in Geography, 5-Year Degree Program (p. 375)
- Bachelor of Science in Geology and Master of Science in Geology, 5-Year Degree Program (p. 385)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 383)
- Bachelor of Science in Geophysics and Master of Science in Geophysics, 5-Year Degree Program (p. 387)
- Bachelor of Science in Industrial Engineering and Master of Science in Finance, 5-Year Degree Program (p. 673)
- Bachelor of Science in Industrial Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 671)
- Bachelor of Science in Interdisciplinary Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 695)
- Bachelor of Science in Journalism and Master of Arts in Communication, 5-Year Degree Program (p. 336)
- Bachelor of Science in Kinesiology and Master of Science in Athletic Training, 5-Year Degree Program (p. 568)
- Bachelor of Science in Maritime Business Administration and Master of Maritime Business Administration and Logistics, 5-Year Degree Program (p. 871)
- Bachelor of Science in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 442)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 285)
- Bachelor of Science in Oceanography and Master of Ocean Science and Technology, 5-Year Degree Program (p. 448)
- Bachelor of Science in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 739)
- Bachelor of Science in Public Health and Master of Public Health in Epidemiology, 5-Year Degree Program (p. 786)
- Bachelor of Science in Public Health and Master of Public Health in Health Policy and Management, 5-Year Degree Program (p. 789)
- Bachelor of Science in Public Health and Master of Public Health in Health Behavior, 5-Year Degree Program (p. 792)
- Bachelor of Science in Public Health and Master of Public Health in Occupational Health and Safety, 5-Year Degree Program (p. 795)
- Bachelor of Science in Rangeland, Wildlife and Fisheries Management and Master of Public Service Administration, 5-Year Degree Program (p. 228)
- Bachelor of Science in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 486)
- Bachelor of Science in Statistics and Master of Science in Statistical Data Science, 5-Year Degree Program (p. 494)
- Bachelor of Science in Telecommunication Media Studies and Master of Arts in Communication, 5-Year Degree Program (p. 342)
- Bachelor of Science in Urban and Regional Planning and Master of Land and Property Development, 5-Year Degree Program (p. 256)
- Bachelor of Science in Urban and Regional Planning and Master of Landscape Architecture, 6-Year Degree Program (p. 255)
- Bachelor of Science in Urban and Regional Planning and Master of Urban Planning, 5-Year Degree Program (p. 258)

Undergraduate and Professional Programs

- Bachelor of Science in Interdisciplinary Engineering and Juris Doctor, 6-Year Degree Program (p. 697)

Degree Programs Via Distance Education

Degree Programs Via Distance Education

Texas A&M University currently offers the following programs by distance education:

Undergraduate Degree Program

- Bachelor of Science in Nursing (BSN) in Nursing

Graduate Degree Programs

- Doctor of Education (EdD) in Curriculum and Instruction
- Doctor of Education (EdD) in Bilingual, English as a Second Language, and Dual Language Education
- Doctor of Engineering (DEng) in Engineering
- Doctor of Nursing Practice (DNP) in Nursing Practice
- Doctor of Philosophy (PhD) in Agronomy
- Doctor of Philosophy (PhD) in Biomedical Sciences
- Doctor of Philosophy (PhD) in Computer Engineering
- Doctor of Philosophy (PhD) in Electrical Engineering
- Doctor of Philosophy (PhD) in Interdisciplinary Engineering
- Doctor of Philosophy (PhD) in Mechanical Engineering
- Doctor of Philosophy (PhD) in Nuclear Engineering
- Doctor of Philosophy (PhD) in Petroleum Engineering
- Doctor of Philosophy (PhD) in Plant Breeding

- Executive Master of Public Service and Administration (MPSA) in Public Service and Administration
- Master of Agriculture (MAgr) in Agricultural Development
- Master of Agriculture (MAgr) in Animal Science
- Master of Agriculture (MAgr) in Poultry Science
- Master of Applied Youth Development (MAY) in Applied Youth Development
- Master of Business Administration (MBA) in Business Administration
- Master of Computer Science (MCS) in Computer Science
- Master of Education (MEd) in Bilingual/ESL Education
- Master of Education (MEd) in Curriculum and Instruction
- Master of Education (MEd) in Educational Administration
- Master of Education (MEd) in Educational Psychology
- Master of Education (MEd) in Learning Design and Technology
- Master of Education (MEd) in Special Education
- Master of Engineering (MEngr) in Aerospace Engineering
- Master of Engineering (MEngr) in Biological and Agricultural Engineering
- Master of Engineering (MEngr) in Computer Engineering
- Master of Engineering (MEngr) in Electrical Engineering
- Master of Engineering (MEngr) in Engineering
- Master of Engineering (MEngr) in Industrial Engineering
- Master of Engineering (MEngr) in Mechanical Engineering
- Master of Engineering (MEngr) in Nuclear Engineering
- Master of Engineering (MEngr) in Ocean Engineering
- Master of Engineering (MEngr) in Petroleum Engineering
- Master of Engineering Technical Management (METM) in Technical Management
- Master of Geoscience (MGsc) in Geoscience
- Master of Health Administration (MHA) in Health Administration
- Master of Industrial Distribution (MID) in Industrial Distribution
- Master of Land and Property Development (MLPD) in Land and Property Development
- Master of Laws (LLM) in Cross-Border Advocacy
- Master of Laws (LLM) in Intellectual Property
- Master of Laws (LLM) in Laws
- Master of Legal Studies (MLG) in Intellectual Property
- Master of Legal Studies (MLG) in Legal Studies
- Master of Maritime Business Administration and Logistics (MMAL) in Maritime Business Administration and Logistics
- Master of Natural Resources (MNA) in Natural Resources
- Master of Public Health (MPH) in Environmental Health
- Master of Public Health (MPH) in Epidemiology
- Master of Public Health (MPH) in Health Behavior
- Master of Science (MS) in Accounting
- Master of Science (MS) in Agricultural Systems Management
- Master of Science (MS) in Agronomy
- Master of Science (MS) in Analytics
- Master of Science (MS) in Artificial Intelligence
- Master of Science (MS) in Bilingual/ESL Education
- Master of Science (MS) in Biomedical Sciences
- Master of Science (MS) in Computer Engineering
- Master of Science (MS) in Construction Management

- Master of Science (MS) in Education for Health Care Professionals
- Master of Science (MS) in Educational Human Resource Development
- Master of Science (MS) in Electrical Engineering
- Master of Science (MS) in Energy
- Master of Science (MS) in Engineering Management
- Master of Science (MS) in Entrepreneurial Leadership
- Master of Science (MS) in Human Resource Management
- Master of Science (MS) in Management Information Systems
- Master of Science (MS) in Marketing
- Master of Science (MS) in Mathematics
- Master of Science (MS) in Nuclear Engineering
- Master of Science (MS) in Ocean Engineering
- Master of Science (MS) in Petroleum Engineering
- Master of Science (MS) in Plant Breeding
- Master of Science (MS) in Safety Engineering
- Master of Science (MS) in Special Education
- Master of Science (MS) in Sport Management
- Master of Science (MS) in Statistical Data Science
- Master of Science in Nursing (MSN) in Family Nurse Practitioner
- Master of Science in Nursing (MSN) in Forensic Nursing
- Master of Science in Nursing (MSN) in Nursing Education

A limited number of graduate certificate programs are available by distance education. Please review them here (<https://catalog.tamu.edu/graduate/degrees-programs/#graduatecertificateprogramstext>).

The delivery platform differs among these programs. Most are available 100% online, some are web-supported with interactive video and others require periodic campus visits. The delivery platform in most programs changes depending on the course/program content, needs of the students and their geographic locations. Students should carefully consider distance education and address any specific questions to the department offering the program of interest.

Only a student who is admitted to Texas A&M University may enroll in these distance education programs and the associated courses. A student wishing to enroll in any of the distance education programs must be admitted as a degree-seeking graduate student or as a post-baccalaureate non-degree seeking student. Please see <http://admissions.tamu.edu> for graduate admissions information.

A student may take up to 12 hours in non-degree-seeking post-baccalaureate status and apply these hours to a master's program with the approval of the student's advisory committee, the head of the department (or Chair of the Intercollegiate Faculty, if appropriate), and the Office of Graduate and Professional Studies if all admission requirements to the selected master's program are fulfilled. Courses offered for extension credit may not be used on the student's degree plan. Post-baccalaureate non-degree status does not establish eligibility for admission to degree-seeking status.

Students who are not enrolled in an approved distance education program cannot take more than 50% of their required courses online. The Texas Higher Education Coordinating Board (THECB) (<https://www.highered.texas.gov/new-program-development/distance-education-resources/>) rules that no more than 50% of courses can be taken online if the program is not approved to be offered online as a distance education program.

Texas A&M University provides students pursuing a graduate degree by distance a wide variety of student support services, including access to library resources, advising, technology support and course materials acquisition through the online bookstore. A complete listing of services, degree program descriptions, appropriate points of contact within each program, and costs are available through the distance education website at <http://distance.tamu.edu>. Additional distance education programs are in development. Interested students should check the website periodically for updates. Students should contact the department offering the program for any questions.

State Authorization

State authorization allows Texas A&M University to offer educational opportunities to students among other states and nationwide.

State Authorization Reciprocity Agreements (SARA)

Texas A&M University participates in the State Authorization Reciprocity Agreements.

The State Authorization Reciprocity Agreements (SARA) is an agreement among member states, districts, and territories that establishes comparable national standards for offering postsecondary distance education courses and programs in other member states. In partnership with the four regional education compacts (<https://nc-sara.org/regional-education-compacts/>), the National Council for State Authorization Reciprocity Agreements (NC-SARA) (<https://nc-sara.org/>) coordinates the implementation of SARA nationally.

Texas was approved as a SARA state in 2015 and is administered through the Southern Regional Education Board (SREB) (<https://www.sreb.org/>).

SARA Student Complaint Process

NC-SARA provides information on filing a student complaint (<https://nc-sara.org/sara-student-complaints-0/>) under SARA policies. Students are encouraged to review this information prior to filing a complaint against a SARA institution. Complaints against a SARA participating institution must first go through the institution's own grievance procedures. All complaints regarding student grades or conduct violations are governed by the institution and the laws of the institution's home state. If a student is not satisfied with the outcome of the institutional grievance process, the student may appeal, within two years of the incident, to the SARA portal agency of the institution's home state.

Distance Education Student Grievances Process

Texas A&M University Student Rules 45 through 62 (<https://student-rules.tamu.edu/studentgrievanceprocedures/>) outline grievance processes and procedures, including the Texas A&M University offices responsible for assisting students through the grievance processes.

For more information regarding Texas A&M University Distance Education Grievance Policies and Procedures or to submit a Distance Education complaint, please reference <https://distance.tamu.edu/grievances.html>.

Cultural Discourse Requirements

Students are required to complete three (3) semester credit hours from the courses listed.

Code	Title	Semester Credit Hours
AFST 201	Introduction to Africana Studies	3
AFST 302	Gateway Course	3
AFST 325	Africana Humanities	3
AFST 327/ MUSC 327	Popular Musics in the African Diaspora	3
AFST 338/ COMM 338	Critical Race Discourse	3
AGSM 105	The World Has a Drinking Problem - Global Water Scarcity	3
ANTH 210	Social and Cultural Anthropology	3
ANTH 222	Cross Cultural Competency	3
ANTH 301	Indians of North America	3
ANTH 324/ MUSC 324	Music in World Cultures	3
ANTH 404/ WGST 404	Women and Culture	3
ARAB 215	Introduction to Modern Arab Culture	3
ARAB 258	Global Middle Eastern Cultures	3
ARTS 234	Body Art of Tattoos	3
ARTS 339	Themes in Contemporary Art	3
ARTS 349	The History of Modern Art	3
ATMO 110/ GEOL 110	Disasters and Society	3
CARC 101	Cultural and Social Issues in the Natural, Built and Virtual Environment	3
COMM 257/ RELS 257	Communication, Religion and the Arts	3
COMM 338/ AFST 338	Critical Race Discourse	3
COMM 343	Communication in a Diverse World	3
COMM 346/ JOUR 346	Media, Culture and Identity	3
COSC 222	Social Issues in the History of the Construction Environment	3
DCED 201	Dance History	3
ECCB 304	Conservation Biology	3

ENGL 211/ GLST 211	Foundations in Cultural Studies	3	PERF 156	Dress in World Cultures	3
ENGL 350	Twentieth-Century Literature to World War II	3	PERF 223	Aesthetics of Activism	3
ENGL 378	The British Novel, 1870 to Present.	3	PERF 301	Performance in World Cultures	3

			Application Information		
			Students can apply for undergraduate admission to Texas A&M University by using any one of several application services.		
			You may access the appropriate undergraduate application from the Texas A&M University admissions website http://admissions.tamu.edu .		

Texas A&M University has several conveniently located Prospective Student Centers throughout the state, staffed with advisors ready to serve you. Please contact the center nearest you to learn more about admissions, financial aid, academic programs and student services. Texas A&M also has advisors who serve the Brazos Valley, Central Texas and El Paso areas as well as advisors throughout the U.S. to assist out-of-state applicants. Visit the website admissions.tamu.edu/connect (<https://admissions.tamu.edu/connect/>) for more details.

The admission guidelines presented here are for admission to the Spring, Summer or Fall 2026 semester. While they are the best guide available, admission criteria are subject to change. The Office of Admissions website (<http://admissions.tamu.edu>) contains the admission policies and procedures in effect for 2026 admission.

Types of Admission and Application Calendars

At the Time of Application	Term	Opening Date	Closing Date
Freshman			
An applicant who: • is a citizen or permanent resident of the United States or qualifies for Texas residency. • is a degree-seeking applicant and is without college credit ¹ or • is still in high school, with or without college credit	Spring 2026	Aug. 1, 2025	Oct. 15, 2025
	Fall 2026	Aug. 1, 2025	Dec. 1, 2025
Transfer			
An applicant who: • is a citizen or permanent resident of the United States or qualifies for Texas residency • is a degree-seeking applicant • has graduated from high school or equivalent • has enrolled in a post-secondary institution after graduation from high school • does not have a bachelor's degree • does not qualify for readmission	Spring 2026	Aug. 1, 2025	Oct. 15, 2025
	Summer/Fall 2026	Jan. 1, 2026	Mar. 1, 2026

International Freshman

An applicant who: • is not a citizen or permanent resident of the United States (or applicant for permanent residency) and does not qualify for Texas residency • after high school graduation has never enrolled at a university as an undergraduate degree-seeking student	Spring 2026	Aug. 1, 2025	Oct. 15, 2025
	Fall 2026	Aug. 1, 2025	Dec. 1, 2025
International Transfer			
An applicant who: • is not a citizen or permanent resident of the United States (or applicant for permanent residency) and does not qualify for Texas residency • is an applicant seeking a bachelor's degree • has graduated from high-school or equivalent • has enrolled in a post-secondary institution, and • is not eligible for readmission (has never enrolled at Texas A&M University as an undergraduate degree-seeking student).	Spring 2026	Aug. 1, 2025	Oct. 15, 2025
	Summer/Fall 2026	Jan. 1, 2026	Mar. 1, 2026
Readmission			
An applicant who: • is a former degree-seeking Texas A&M undergraduate student (including an international student) • does not have a bachelor's degree • did not officially register for the previous semester (excluding summer sessions) at Texas A&M Readmission does not include applicants whose only previous enrollment at Texas A&M has been as a non-degree student.	Spring 2026	Aug. 1, 2025	Nov. 1, 2025
	Summer 2026	Jan. 1, 2026	April 1, 2026
	Fall 2026	Jan. 1, 2026	July 1, 2026
Postbaccalaureate Undergraduate			
An applicant who: • has a bachelor's degree • wishes to pursue a second undergraduate degree	Spring 2026	Aug. 1, 2025	Oct. 15, 2025
	Summer/Fall 2026	Jan. 1, 2026	Mar. 1, 2026
Non-degree Undergraduate			
An applicant who: • does not wish to pursue a degree at Texas A&M • wishes to take specific undergraduate coursework	Spring 2026	Aug. 1, 2025	Oct. 15, 2025
	Summer/Fall 2026	Jan. 1, 2026	Mar. 1, 2026
High School Enrichment Program			

An applicant who: • is a high school junior or senior in the Bryan/College Station area • has an SAT score of 1270, or an ACT score of 27 • has completed all levels of related coursework offered at their high school Each student is eligible to take 1 (one) course per fall or spring semester, and course registration will be completed by the TAMU advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M University campus. Students and their parents/guardians will be responsible for any lodging or transportation considerations. Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.	Spring 2026	Aug. 1, 2025	Nov. 1, 2025
	Fall 2026	Jan. 1, 2026	July 1, 2026

¹ An applicant who has enrolled in a post-secondary institution since high school graduation, with or without credit earned, must apply as a transfer applicant.

Items Necessary to Complete an Application File

Please see the Readmission, Post-baccalaureate or Non-degree sections for other items required to complete the transfer application

for those types of admission. U.S. citizens completing a non-U.S. high school program should refer to International Admissions for questions concerning transcripts, examination results, and foreign credentials.

An application is reviewed to make a decision about admission after all items listed below have been received. The items must be received by the appropriate closing date to qualify for consideration for admission.

In addition, freshman applicants must show proof of meeting the State of Texas Uniform Admission Policy to qualify for review. If you attend an out-of-state high school or are a home-schooled student, you are exempt from the Uniform Admission Policy.

Application submitted electronically via the Common Application or ApplyTexas

Application Fee (check, money order, Visa, MasterCard, Discover or American Express) – All fees are nonrefundable

- Domestic Undergraduate - \$75
- International - \$90

Guidelines for requesting application fee waivers:

- Fee waivers are not available for international students.

Freshman Waivers

Applicants who qualify for federally funded free/reduced lunch programs may qualify for a fee waiver. **Students must certify their eligibility on the application by answering Texas A&M's fee waiver question.**

Please see our document submission page, <https://admissions.tamu.edu/resources/undergraduate-document-submission> (<https://admissions.tamu.edu/resources/undergraduate-document-submission/>), for additional instructions for requesting a waiver.

Transfer or Readmit Waivers

To request a fee waiver, please provide your Student Aid Report (SAR), found within your current FAFSA, or a copy of an award letter from your current institution. The Office of Admissions does not have access to your FAFSA or SAR, you must provide a copy as part of your application file. **Checking the fee waiver box on the application will not satisfy the fee waiver requirement.**

Please see our document submission page, <https://admissions.tamu.edu/resources/undergraduate-document-submission> (<https://admissions.tamu.edu/resources/undergraduate-document-submission/>), for additional information.

Essays

- Freshman applicants are required to complete Essay Topic A.
- Transfer applicants are required to complete Essay Topic A.

SAT or ACT Scores

Texas A&M University is test optional and does not require ACT or SAT scores for freshman applicants. The submission of test scores is strongly encouraged but will not create any unfair advantage or disadvantage for those students who provide them.

We encourage students who have test score to send them.

- Scores should be sent **directly from the testing agency** and must be received by the posted deadline to be considered.
- The SAT code is 6003; the ACT code is 4198.
- Test scores must be from a test date within five years of the date of planned enrollment.

- The highest test score from **one test date** will be used in our review for admission. Texas A&M does not combine test scores from different test dates.

Self-reported Transcript and Academic Record (STAR) and relevant transcripts

- Domestic freshman applicants are required to fill out and submit the Self-reported Transcript and Academic Record (STAR) indicating coursework, credits earned, grades, graduation plan/diploma type, grade point average and a numerical class rank (if available) at least through their junior year. Students should have a copy of their high school transcript available to use as a reference when filling out the STAR. If admitted, the applicant will be required to submit a final transcript with graduation date by **August 15**. Discrepancies between a student's STAR and official final transcript will be thoroughly reviewed; depending on findings, this could result in a student's admission being rescinded. Freshman applicants who have already graduated from high school must also provide an official high school transcript with a graduation date as part of the application file.
- Access to the STAR will be available on our admissions website when the application opens.
- Domestic applicants attending an international school which follows an academic curriculum patterned after the U.S. education system may fill out the STAR.
- International applicants studying in the U.S. are required to fill out the STAR.
- International applicants studying outside the U.S. are required to fill out the STAR and provide official academic records, see International Admission Criteria for details.
- The Office of Admissions reserves the right to require official transcripts from any student; students should check the Applicant Information System to ensure completion of their file.
- Freshman and transfer applicants who have graduated from high school at the time of application should submit an official high school transcript that includes grades and credits for all completed coursework, a numerical class rank (if available), date of graduation and graduation plan completed, or a certificate verifying completion of a GED program.
- Post-baccalaureate applicants are not required to submit a high school transcript as part of the application file. Readmit applicants may be required to submit a final high school transcript if one is not currently on file with the university.
- To be considered official, a transcript must bear an original signature of a school official or an original school seal.
- Applicants who have attended high school both in the U.S. and out of the U.S. may complete the STAR provided the courses and grades are present on the U.S. transcript; otherwise, official transcripts are required. Details for providing international transcripts can be found under International Admission Criteria.
- For students enrolled in the U.S., copies of official transcripts from other countries will be accepted provided the copies are on file and verified by the U.S. institution.
- Faxed or emailed copies are not official and will not be accepted.

Class Rank

- Students **graduating from a Texas high school who rank in the top ten percent** must provide both the Self-reported Transcript and Academic Record and a high school transcript noting the student's rank and class size or a letter on school letterhead signed by a school official noting the student's rank and class size to qualify for

automatic admission. Documents may be uploaded in the Applicant Information System for processing.

- Texas A&M's Office of Admission will assign a ranking to students from non-ranking high schools.

Official College Transcripts

- An official transcript is required from **every** post-secondary institution attended even if the applicant did not earn credit, receive a course grade or the course is not transferable. Coursework from one college posted on the transcript of another college will not satisfy this requirement. Failure to acknowledge attendance and provide transcripts from **all** schools attended may be considered a fraudulent admissions application resulting in a denial of the application.
- A college transcript for **dual credit** coursework earned in high school is required.
- Official paper transcripts are to be sent by the sending institution in a sealed envelope. The transcript will not be considered official if the student has had access to the transcript.
- Requirements for submitting international transcripts can be found under International Admission Criteria.
- Faxed copies are not official and will not be accepted.
- For students enrolled in the U.S., copies of official transcripts from other countries will be accepted provided the copies are on file and verified by the U.S. institution.

Lawful Permanent Residents of the United States

An applicant who has applied for or been granted Lawful Permanent Resident (LPR) status in the United States by the Department of Homeland Security (DHS) is eligible to submit an application as a Domestic Applicant. To qualify, you must include one of the following with the application:

- a copy of both sides of the DHS-issued Permanent Resident Card, or
- the I-551 Entry Stamp and Immigrant Visa in the passport, or
- an approved I-797 Notice of Action or I-797C Notice of Receipt.

If your parent is also a permanent resident, a copy of the parent's proof of LPR status will be necessary to determine in-state residency for tuition purposes.

Note: If you have applied for adjustment of status to Lawful Permanent Residency and have not received your LPR card or Notice of Action that says Notice Type: Approval Notice, you will be considered an international student once you are admitted to the University. There are certain requirements that international students must fulfill in order to enroll. Please contact International Student and Scholar Services at <https://global.tamu.edu/iss> (<https://global.tamu.edu/iss/>) for more information about these requirements.

Required Immunizations

Texas Education Code (TEC) 51.9192 requires all entering students (under the age of 22) to provide evidence of vaccination against bacterial meningitis received within the last 5 years or a signed affidavit declining the vaccine at least 10 days prior to the start of classes for any given semester. Learn more about bacterial meningitis at <http://admissions.tamu.edu/meningitis>.

Notification of Application Status

Check the Applicant Information System (AIS) at applicant.tamu.edu (<https://applicant.tamu.edu/>) to verify your application has been received

and to determine if any credentials are missing or are incomplete. Please allow at least two weeks to process credentials.

The Office of Admissions will make every effort to inform applicants of incomplete files through AIS. If incomplete credentials are received within one month of the closing date, there may not be sufficient time for the Office of Admissions to notify applicants. All items necessary to complete an admission file must be received by the Office of Admissions by the closing date (not postmarked) to assure consideration for admission.

Required Coursework

Applicants who graduate from an accredited Texas public or private high school applying to Texas A&M University must have completed the Foundation High School Program preferably with the Distinguished Level of Achievement and at least one endorsement. The high school curriculum should be noted on the official high school transcript. Please visit <https://admissions.tamu.edu/resources/future-students/college-readiness> (<https://admissions.tamu.edu/resources/future-students/college-readiness/>) for a complete description of coursework including information for home-schooled and out-of-state applicants.

State of Texas Uniform Admission Policy

Texas Education Code (TEC) 51.803-51.809 (State of Texas Uniform Admission Policy (<http://admissions.tamu.edu/freshman/TexasUAP/>)) requires that all freshman applicants meet one of the following college readiness standards in order to be eligible to be considered for admission at a Texas four-year public institution.

- Satisfy the College Readiness Benchmarks on the SAT or ACT assessment; or
 - SAT – 480 EBRW and 530 Math for tests taken after February 2016
 - ACT – 18 English, 22 Reading, 22 Mathematics and 23 Science
- Successfully complete the State of Texas foundation, recommended or advanced/distinguished high school program or complete the portion of the program that was available to them; or
- Successfully complete a curriculum that is equivalent in content and rigor to the foundation, recommended or advanced/distinguished high school program at a high school that is exempt from offering such programs.

Students attending an out-of-state/out-of-country high school or home school are exempt from the Uniform Admission Policy.

Freshman Admissions

Additional Information for Freshman Applicants

1. Information Presented in the Application
 - Extracurricular activities including time commitment and duration of involvement
 - Leadership and/or exceptional talent as shown in extracurricular activities and/or work
 - Community/volunteer work including time commitment and duration of involvement
 - Awards and achievements earned while in high school
 - Employment and/or internships including dates of work and hours per week

- Family educational background and household income
- Number of people in household

2. Essay Topic A on the application is required.

Essay prompt: Tell us your story. What unique opportunities or challenges have you experienced throughout your high school career that have shaped who you are today?

Freshman Admissions

When all credentials necessary to complete a freshman applicant's file are received during the admission application period, one of the following criteria will be used to determine who will be offered admission:

1. Top 10% Applicants from Texas High Schools
Applicants who are Texas residents or who are enrolled in recognized public or private high schools in Texas with a rank in the top 10% of their high school graduating class, on or before the admissions deadline, will be automatically admitted to Texas A&M University if they have successfully met the State of Texas Uniform Admission Policy and have successfully completed the recommended or distinguished graduation plan or the foundation distinguished plan. Choice of major is not guaranteed. Applicants must submit all required credentials and a high school transcript verifying top ten percent ranking by the closing date in order to qualify for automatic admission.
2. Review Applicants
Applicants not meeting the above requirements for automatic admission but who have met the state of Texas Uniform Admission Policy will be considered for admission by holistic review of their application file, provided they submitted all required credentials by the closing date.

Information for all Freshman Applicants

- All applicants should use the application questions and the essay to present their academic background and personal strengths as well as personal circumstances.
- Letters of recommendation are optional. If an applicant chooses to submit letters of recommendation, only the first two received will be considered. The most helpful letters are from individuals who know the applicant well and who can write about what distinguishes the individual from other applicants in the areas of leadership, exceptional talent or special circumstances. Photocopies are acceptable.
- A competitive applicant who cannot be admitted to a major due to restricted enrollment will be offered admission to their second major choice. If the second major choice is full, then an alternate major must be chosen by the applicant after admission to the university.

Admission Decisions

Notice of Admission Decision

Texas A&M University receives many more academically prepared applicants for admission than we can accommodate. Admission decisions are made beginning September 1 and continue throughout the application period. A final decision may not be announced until early December for spring admission or late March for summer or fall admission. A limited number of applicants may be offered provisional admission that requires the successful completion of a summer school program at Texas A&M. In addition, some applicants may be offered admission to the Texas A&M Higher Education Center at

McAllen (<http://admissions.tamu.edu/HECM/>), Texas A&M Blinn TEAM Program (<https://tap.tamu.edu/programs/team.html>), Texas A&M Engineering at Blinn (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-blinn-bryan/>), Texas A&M Engineering at Galveston (<http://engineering.tamu.edu/academics/engineering-at-galveston/>), Texas A&M Engineering at McAllen (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/>), or the Program for System Admission (<http://admissions.tamu.edu/PSA/>).

Suspected Fraudulent Admission Applications

Applicants for admission to Texas A&M University should be aware that the information submitted as part of the application process will be relied upon by University officials to determine their status for admission and residency for tuition purposes. By signing and submitting an admission application, the applicant certifies that the information in, and submitted with, the application is complete and correct and may be verified by Texas A&M University.

All students applying to Texas A&M University are expected to follow the Aggie Code of Honor which states "An Aggie does not lie, cheat or steal nor tolerate those who do." Applicants found to have misrepresented themselves or submitted false information on the application will receive appropriate disciplinary action which may include rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment or any other appropriate disciplinary action. In all instances of disciplinary action, the application fee is non-refundable.

Pursuant to Texas A&M Student Rule 24.4.1 (<http://student-rules.tamu.edu/rule24/>), acts of dishonesty include but are not limited to:

- Withholding material information from the *University*, misrepresenting the truth during a *University investigation* or student conduct conference, and/or making false statements to any *University officials* or law enforcement officers in the course of their duties.
- Furnishing false information to and/or withholding information from any *University official, faculty member, office, or law enforcement officers* in the course of their duties.
- Forgery, alteration, possession, or misuse of any *University* document, record, or instrument of identification.
- The submission of false information at the time of admission or readmission is grounds for rejection of the application, withdrawal of any offer of acceptance, cancellation of enrollment, dismissal or other appropriate disciplinary action.

For prospective undergraduate students (admitted but not enrolled), the initial determination of whether an individual has submitted a fraudulent application will be made by the Director of Admissions Operations, with a right of appeal to the Executive Director of Admissions. All appeals will be considered by the Admissions Decisions Appeals Committee and a recommendation made to the Executive Director of Admissions. For prospective graduate students, initial appeals will be made to the Dean of the Graduate and Professional School.

Enrolled students suspected of violating Student Rules will be reported to the Student Conduct Office.

Any University official who suspects that a prospective student or enrolled student has submitted a fraudulent admission application must notify the Executive Director of Admissions.

Residence Requirement for Baccalaureate Degree

A student must complete at least 25% of semester credit hours applied to a baccalaureate degree in residence at Texas A&M University.

Upper-level Residence Requirement: A minimum of 36 semester credit hours of 300-level and/or 400-level coursework must be successfully completed in residence at Texas A&M University to obtain a baccalaureate degree. A minimum of 12 of these semester credit hours must be in the major.

- For the Bachelor of Science in Nursing - RN to BSN Track, a minimum of 30 semester credit hours of 300-level and/or 400-level coursework must be successfully completed in residence at Texas A&M University. A minimum 12 of these semester credit hours must be in the major.
- Students participating in TAMU off-campus study programs approved by the student's college may apply upper division credits earned in the programs towards the upper-level residence requirement. A maximum of 18 semester hours, including hours transferred from another institution as a part of these programs, may be applied.

Biomedical Sciences	BIMS
University Studies	USVM

¹ See this catalog pertaining to your major for the specific science.

² Choice available for transfer applicants only. Nursing and Dental Hygiene applicants must have completed or be enrolled in pre-requisite courses at the time of application. Courses may be completed at any accredited college or university.

³ All new students to the College of Architecture, Mays Business School, and School of Public Health enter the lower level.

⁴ The curriculum leading to a professional degree in Architecture begins in the four-year undergraduate Bachelor of Science in Architecture degree program. This degree provides entry to the Master of Architecture program.

⁵ No spring transfer admission.

⁶ All students seeking elementary teacher certification will complete a baccalaureate degree in Education. There is no major in Secondary Teacher Education. All students seeking secondary certification (except those preparing to teach physical education or health) will major in an academic discipline other than Education (i.e., mathematics, english, computer science, biology, etc.) and take appropriate coursework for teacher certification in the College of Education and Human Development.

⁷ Apply through College of Agriculture and Life Sciences.

⁸ Pre-veterinary medicine is not offered at Texas A&M. If you plan to apply to the Doctor of Veterinary Medicine (DVM) program, you should select a major that would be a good vocational choice if you do not later enter the DVM program. Any major may be selected; however, some curricula more closely parallel courses that must be completed before applying to the DVM program than others.

Change of Curriculum to Another Campus

In addition to main campus, Texas A&M offers certain undergraduate degrees at its branch campus in Galveston and the Higher Education Center at McAllen. While enrolled as a student in residence at any one of the Texas A&M locations, students may apply for a change of curriculum to another location for a future semester. Students must comply with the established change of curriculum procedures and requirements of their desired major, department, and college, and space must be available. Final approval is granted by the academic dean or departmental advisor for that major.

Transfer Admissions

Transfer Admissions

Transfer applicants will be reviewed and receive a decision from the Office of Admissions provided they submit all required credentials by the closing date.

Recommended/required coursework for all majors is available on the **Transfer Course Sheets** at <https://admissions.tamu.edu/resources/future-students/transfer-students> (<https://admissions.tamu.edu/resources/future-students/transfer-students/>). Students are strongly encouraged to follow the guidelines and complete both the required and recommended courses as outlined on the Transfer Course Sheets and in the catalog. Applicants who begin a set of courses which have a two-semester sequence are encouraged to complete both courses in the sequence before planning to transfer to Texas A&M.

Admission Criteria

- Transfer applicants should have at least a 2.5 grade point average (GPA) on at least 24 graded semester hours of transferable coursework at the time of application to be competitive for admission.
- Transfer admission decisions are made based on the college or major requested and are competitive; thus, admission standards may change from one semester to another. Preference is given to the applicant with the highest grade point average (GPA) and the most courses completed for the major designated on the application.
- Applicants who drop or withdraw from courses frequently and who do not routinely achieve satisfactory grades will be at a disadvantage in the review for admission.
- Spring grades may be used in the fall admission decision if requested by the Review Committee or in instances where the student did not meet the university requirements for review. Spring transcripts must be received by June 1 for review with spring grades. A complete application must be on file by March 1 to be considered for fall admission and to qualify for spring grade review. Spring grade review is not available for all applicants and is not an option for students studying outside the U.S.
- The entire application, including essay topic A, is considered in the review process.
- Some colleges consider second choice majors and some do not consider second choice majors. This is noted on the Transfer Course Sheets. The admission decisions follow the guidelines presented in the Transfer Course Sheets and the College Specific Information provided in the catalog. Space may be limited for those being reviewed for their second choice.

Automatic Transfer Admission through SB 175

A transfer applicant who graduated from a Texas high school and ranked in the top 10% of their high school qualifies for automatic transfer admission to a 4-year university under the provisions of SB 175 if they meet the following guidelines:

1. The applicant must have graduated in the top 10% of his or her high school graduating class from a Texas high school not more than 4 years prior to the semester for which the student is applying. The top 10% ranking must be stated on the final high school transcript, or the applicant must have been previously offered admission under the Top 10% rule to the institution to which the applicant seeks admission as a transfer student.

2. The applicant must complete the core curriculum at a public junior college or other public or private lower-division institution with a 2.5 GPA on a four-point scale or equivalent.
3. Transcript should note core completion.
4. The applicant must expressly and clearly claim in the application that he or she is seeking admission under the transfer Top 10% rule (SB 175).
5. The applicant must provide all of the documents required for transfer admission to Texas A&M by the posted deadline. Transfer requirements can be found at <http://admissions.tamu.edu/apply/transfer>.

Applicants qualifying for transfer Top 10% admission under SB 175 will be admitted to Texas A&M but the choice of major is not guaranteed. Students desiring admission to Business or Engineering are encouraged to select a second choice major of interest due to the limited enrollment capacity in these colleges.

For information concerning the Transfer Top 10% Admission, please see <https://admissions.tamu.edu/apply/transfer/transfer-programs> (<https://admissions.tamu.edu/apply/transfer/transfer-programs/>).

College Specific Information

College of Agriculture and Life Sciences

Transfer admission requirements vary for the different academic programs offered by the College. Transfer admission decisions are made by major and are competitive. Most majors have required and recommended coursework to be completed by the student prior to application. It is highly recommended that prospective students contact the academic advisor for the major of interest to inquire about specific transfer admission requirements. Students should also refer to the Texas A&M University Admissions website (<http://admissions.tamu.edu/transfer/apply/>) to review the Transfer Course Sheets for each major. Also, note that transfer admission GPA requirements vary by major and several exceed the minimum 2.5 GPA. Completion of the essay indicating why the major was selected and how a degree in this major will help meet career goals is required. For more information on transfer guidelines, coursework and contact information for all academic advisors, refer to the College of Agriculture and Life Sciences website (<http://aglifesciences.tamu.edu>).

College of Architecture

Applicants must have completed 24 hours of transferable coursework at the time of application, and it is recommended that these courses be selected from the degree program described elsewhere in this catalog. The essay is an important component in the review process and should explain why the applicant is interested in either the Architecture, Construction Science, Landscape Architecture, Urban and Regional Planning, or University Studies - Global Arts, Planning, Design and Construction concentration degree. Depending on the program of interest, applicants with less than a 3.0 GPA are rarely admitted. For more information, visit the College of Architecture website (<http://www.arch.tamu.edu>).

Enrollment in Architecture, Landscape Architecture, and Urban and Regional Planning is driven by available studio space. Additionally, there are eight sequential studios in those degree programs which makes it difficult for students that transfer with more than 36 hours to graduate in a timely manner.

Degree	Applicable Majors	Courses	TCCNS Number
Architecture	Architecture	ENGL 104, MATH 140 ¹ , MATH 142, PHYS 201	ENGL 1302, MATH 1324, PHYS 1401
Construction Science	Construction Science	ENGL 104, MATH 140 ¹ , PHYS 201	ENGL 1302, MATH 1324, PHYS 1401
Urban and Regional Planning, Landscape Architecture	Landscape Architecture, Urban and Regional Planning	ENGL 104, MATH 140 ¹ , PHYS 201 or Core Science	ENGL 1302, MATH 1324

¹ MATH 1324 from some colleges will not be a direct equivalent to MATH 140 at Texas A&M University but will satisfy the core math requirement for this major.

College of Arts and Sciences

Competitive applicants will apply with at least 24 hours of graded transferable coursework and a minimum GPA of 2.5 at the time of application. Transfer admission GPA requirements vary by major, with the majority requiring at least a 3.0 to be competitive for transfer admission consideration. Applicants should complete the essay indicating why they are interested in admission into their selected major. Applicants who have special or extenuating circumstances they wish to share are encouraged to address these within the essay(s) as well. Academic performance in courses relevant to the student's prospective major are considered in admissions decisions. STEM majors pay close attention to performance in required math and science courses. Majors may have prerequisites that must be met prior to admission. The College of Arts and Sciences will consider second-choice majors. Students with 90 hours of college credit may not be considered for transfer admission to some majors. Refer to this catalog for all electives in each curriculum. For more information about majors, programs and curricular requirements, please refer to this catalog, the Transfer Course Sheets (<https://admissions.tamu.edu/resources/future-students/transfer-students/>), and the College of Arts and Sciences website (<https://artsci.tamu.edu/>).

See below for courses required for STEM related majors:

Applicable Majors	Courses
Environmental Studies (ENST) BS	At least one course selected from: GEOG 1302, 1303, GEOL 1303 and 1103, 1403 or other introductory courses in the Geosciences (Geography, Geology, Atmospheric Science, Oceanography) Two Math courses: MATH 1324 and 1325 One Science course selected from: BIOL 1306 and 1106, 1406 CHEM 1311 and 1111, 1411

Environmental Geosciences (ENGs) BS At least one course selected from: GEOG 1302, 1303, GEOL 1303 and 1103, 1403 or other introductory courses in the Geosciences (Geography, Geology, Atmospheric Science, Oceanography) Two Math courses: MATH 2413 and 2414 One Science course selected from: BIOL 1306 and 1106, 1406 CHEM 1311 and 1111, 1411 PHYS 1301 and 1101, 1401

Geography (GEOG) BS University Studies - Geography (USGE) BS Geographic Information Science and Technology (GIST) BS One course selected from: GEOG 1301, 1302 or 1303, or the equivalent to GEOG 203 (Earth System Science) Two Math courses: MATH 1324 and 1325 One Science course selected from: BIOL 1306 and 1106, 1406 GEOL 1403 CHEM 1311 and 1111, 1411 PHYS 1301 and 1101, 1401

Geology (GEOL) BA GEOL 1303 and 1103 or 1403 Two Math courses: MATH 1324 and 1325 One Science course selected from: BIOL 1306 and 1106, 1406 CHEM 1311 and 1111, 1411, 1412 PHYS 1301 and 1101, 1401

Geology (GEOL) BS GEOL 1303 and 1103 or 1403 These four Math/Science courses: MATH 2413, 2414, CHEM 1411, 1412

Geophysics (GEOP) BS GEOL 1303 and 1103 or 1403 These four Math/Science courses: MATH 2413, 2414; PHYS 2325 and 2125, PHYS 2326 and 2126

Meteorology (METR) BS MATH 2413, 2414; PHYS 2425, CHEM 1411, 1412 (These courses must be completed with a B or better.)

Oceanography (OCNG) BS MATH 2413, 2414; CHEM 1411, 1412; PHYS 2325, 2326; BIOL 1106, 1306 (These courses must be completed with a C or better.)

¹ A grade of B or better is required on all courses. Requirements also include a cumulative GPA of 3.00 or better.

² Must be completed with a C or better.

³ Meets major requirement. May be taken as time permits.

Mays Business School

Mays Business School offers transfer admission to the most competitive applicants. The transfer admission process identifies applications that evidence outstanding accomplishments, including academic credentials using the following guidelines.

Mays admits transfer applicants for summer or fall admission. **No spring transfer admission is available.**

Applicants are expected to have completed and excelled in substantially all of the required coursework. Applicants need a grade of A in most courses and a high overall GPA to be competitive. Applicants desiring to major in business are encouraged to plan early and incorporate the required coursework listed below into their curriculum prior to applying. It is especially important to have credit for both required math courses before applying.

Required coursework differs based on the applicant's intended program and the number of hours completed at the time of application. Applicants for Bachelor of Business Administration (BUAD) with less than 30 hours completed are expected to have both required math and economics courses completed or in progress at the time of application. Applicants for BS in Business Administration (BUSI) and BUAD applicants with more than 30 hours completed are expected to have all required coursework completed or in progress upon application.

The entire record is reviewed for consistency in coursework and grades. Successful applicants include carefully written essays that demonstrate clarity of purpose, creativity, and an advanced writing style. Applicants are encouraged to use the required essay as an opportunity to identify their past accomplishments, discuss what they hope to study at Texas A&M University, and describe how their undergraduate business education will help them meet their goals after graduation. Applicants who have special circumstances they wish to have considered are urged to share all pertinent information, with appropriate documentation, in their essay(s).

REQUIRED COURSEWORK FOR ADMISSION: Priority courses to be completed before transfer application to Mays Business School are:

Course Number	Course Title	TCCNS Number
ACCT 229	Introductory Accounting - Financial	ACCT 2301, ACCT 2401
ACCT 230	Introductory Accounting - Managerial	ACCT 2302, ACCT 2402
BUSN 203	Statistical Methods for Business	BUSI 2305
ECON 202	Principles of Economics - Microeconomics	ECON 2302

ECON 203	Principles of Economics - Macroeconomics	ECON 2301
ISTM 210	Fundamentals of Information Systems	BCIS 1305
MATH 140 ¹	Mathematics for Business and Social Sciences	MATH 1324
MATH 142 ¹	Business Calculus	MATH 1325

¹ In lieu of MATH 1324 and MATH 1325, Mays accepts MATH 2414 and MATH 2413, respectively.

College of Education and Human Development

Transfer admission requirements vary for the different academic programs offered by the College of Education and Human Development (CEHD). All majors have required coursework to be completed by the student prior to application. It is highly recommended that prospective students contact the CEHD Undergraduate Prospective Student Office to inquire about specific transfer admission requirements. Students should also refer to the Texas A&M University Admissions website at <http://admissions.tamu.edu/transfer/majors> (<http://admissions.tamu.edu/transfer/majors/>) to review the Transfer Course Sheets for each major. Also, note that transfer admission GPA requirements vary by major, and several exceed the minimum 2.5 GPA. Completion of the essay indicating why the major was selected and how a degree in this major will help meet career goals is required. For more information on transfer guidelines, coursework and contact information for the CEHD Undergraduate Prospective Student Office refer to the following website <https://education.tamu.edu/> or email cehd-recruitment@tamu.edu

College of Engineering

Applicants should complete at least 24 hours of graded, transferable coursework at the time of submitting their application, all with a grade of C or better. Transfer admission GPA requirements vary by major, with the majority exceeding the minimum requirements for transfer admission consideration to Texas A&M. Transfer admission course requirements also vary by major.

Prospective transfer students should review the College of Engineering (<http://engineering.tamu.edu/>) website for more information about each major. Transfer Course Sheets (<https://admissions.tamu.edu/resources/future-students/transfer-students/>) are available for each major in the College of Engineering to provide guidance on specific transfer admission requirements.

Field of Study Curricula

A Field of Study Curriculum is a set of courses that will satisfy lower-division requirements for a baccalaureate degree in a specific academic area at a general academic teaching institution. The Texas Higher Education Coordinating Board publishes information about Board-approved Field of Study Curricula (www.highered.texas.gov/) (<https://www.highered.texas.gov/>). Texas A&M University complies with requirements outlined in 19 Texas Administrative Code §4.32 regarding transfer of course credit for completed or partially-completed Field of Study Curricula. Per 19 Texas Administrative Code §4.32, following the receipt of credit, "the student may be required to satisfy the remaining course requirements in the field of study curriculum of the receiving institution, or to complete additional requirements in the receiving

institution's program, as long as those requirements do not duplicate course content already completed through the field of study curriculum."

Notification of Admission Decisions

Transfer admission decisions are made through a competitive review process. Applicants are notified of the admission decision on a rolling basis throughout the application season. For those applicants requested to submit spring grades for fall consideration, decisions should be announced by early July.

Additional Information for Transfer Applicants

1. All applicants are encouraged to view the Transfer Course Sheets (<http://admissions.tamu.edu/transfer/majors/>) posted on the admissions website for information concerning required courses and GPA requirements for admission to a specific major.
2. A 2.0 GPA or better on coursework in progress during the semester (excluding summer terms) immediately prior to enrollment at Texas A&M is a condition of admission.
3. Grades for all transferable courses are used in the computation of the GPA. This includes:
 - Failing grades, repeated courses, WF, Incomplete, etc.
 - Grades reported as Incomplete are computed as Fs.
 - Plus and minus grade designations are not used; C+ is computed as a C, B- as a B, etc.
4. Credit by examination courses which are transcribed from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student's program of study at that institution, credit will be awarded for those courses that meet the transfer guidelines. Note: Credit by examination will not count toward the 24 hours required for consideration for admission.
5. Coursework taken as credit-by-exam must be listed as a specific course and course number on an official college transcript to be considered for transfer of credit.

Transfer Course Credit Policies

Transfer credit on coursework complete at the time of application to Texas A&M University is determined when an official transcript from the originating institution is presented as part of the application for admission or readmission process. An official transcript is required from every post-secondary institution attended (including dual credit earned in high school) even if the applicant did not earn credit, receive a course grade or the course is not transferable.

The transfer of course credit is determined by the Office of Admissions on a course-by-course basis by application of policies set under the guidance of the Texas Higher Education Coordinating Board, the Texas Association of Collegiate Registrars and Admissions Officers, and under the guidance of faculty within the academic colleges. Credit submitted for transfer must be on an official transcript received by the Office of Admissions from the Registrar of the institution where the credit was earned. Course content will be determined from the catalog description or the syllabus. The transferability of courses will be based on the criteria below. All criteria are intended to be considered together; for example, criteria 10 may be qualified by criteria 7.

Undergraduate course credit will only be evaluated and posted for undergraduate applicants and undergraduate students, not for graduate level applicants.

Credit from Institutions Accredited by One of the Institutional Accrediting Agencies

1. A course that is normally considered as part of a bachelor's degree program (not including the bachelor of technology or similar terminal degree) may be transferred. The following criteria, taken together, are used:
 - a. The course is applicable to a bachelor's degree at Texas A&M.
 - b. The course is similar to a course or courses offered for degree credit by Texas A&M.
 - c. The course content is at or above the level of the beginning course in the subject matter offered by Texas A&M.
2. A course that is intended for use in a vocational, technical or occupational program will not typically transfer. In certain cases, credit for occupational skill courses will be considered. Transfer of this credit requires that the student's Texas A&M major is engineering technology or industrial distribution or that the student's major department and dean approve the course for use in the student's degree program after enrollment.
3. Credit for support courses such as Math, Science and English intended specifically for use in an occupational program will not be transferred.
4. Credit for courses must be shown on the official transcript in semester hours or in units that are readily converted to semester hours.
5. A graduate-level course will not be transferred for undergraduate credit unless approved for use in the student's undergraduate degree program by the student's major department and Dean. This also applies for a course offered in a professional degree program such as Nursing, Law, or Medicine.
6. Credit by examination courses which are transcribed from other colleges or universities may be transferred if sequential coursework with credit is also indicated. If there is evidence that the credit by examination courses are part of the student's program of study at that institution, credit will be awarded for those courses that meet our transfer guidelines.
7. Courses similar to ones offered by Texas A&M at the junior or senior level transfer by title only. Such courses may be used in the student's degree program only if approved by the Department Head and Dean of the student's major field. Validation of such credit, either by examination or the completion of a higher level course, may be required.
8. A field experience, internship or student teaching course may be transferred by title only.
9. Credit for cooperative education will not be transferred.
10. A course that is substantially equivalent to a Texas A&M lower level course transfers as an equivalent course. Two or more courses may be combined to form one or more equivalent courses. If there is doubt about the equivalency of a course, the Texas A&M department offering the course subject matter may be asked to determine if the course is equivalent. STEM courses are often referred to the departments for evaluation.
11. As a general policy, credit for admission will be given for transfer work satisfactorily completed with a passing grade at another properly accredited institution.
12. Grade Point Average (GPA) for any period shall be computed by dividing the total number of semester hours of transferable courses for which the student received grades into the total number of grade points earned in that period. Credit hours to which grades equivalent to Texas A&M grades of W, WF, F, I or U are assigned shall be included;

those having grades equivalent to Texas A&M grades of WP, Q, S, X and NG shall be excluded.

13. In any case where a decision cannot be made using the above criteria, the Office of Admissions will determine the transfer of credit based on University policy, previous actions of the University and prior experience.

Resolution of Transfer Disputes for Lower Division Courses Between Public Institutions in Texas

The following procedures shall be followed by public institutions of higher education in the resolution of transfer credit disputes involving lower-division courses:

1. If an institution of higher education does not accept course credit earned by a student at another institution of higher education, the receiving institution shall give written notice to the student and to the sending institution that transfer of the course credit is denied. A receiving institution shall also provide written notice of the reasons for denying credit for a particular course or set of courses at the request of the sending institution.
2. A student who receives notice as specified in subsection 1 may dispute the denial of credit by contacting a designated official at either the sending or the receiving institution.
3. The two institutions and the student shall attempt to resolve the transfer of the course credit in accordance with the rules and guidelines of the Texas Higher Education Coordinating Board (THECB).
4. If the transfer dispute is not resolved to the satisfaction of the student or the sending institution within 45 days after the date the student received written notice of denial, the institution that denies the course credit for transfer shall notify the Commissioner of its denial and the reasons for the denial.

The Commissioner of Higher Education or the Commissioner's designee shall make the final determination about the dispute concerning the transfer of course credit and give written notice of the determination to the involved student and institutions.

Credit from Non-accredited Schools

Students who transfer to Texas A&M from an institution of higher education that is not accredited by one of the institutional accrediting agencies may validate the work taken at the institution by one of the following methods upon admission:

1. Successful completion of a comprehensive departmental examination or nationally standardized examination that is approved by the department.
2. Successful completion of a higher level course in the same subject area when approved by the Department Head and the Dean of the college or school.

Credit will be given to students transferring from non-accredited public colleges in Texas for work completed with grades of C or better if they earn a grade point of 2.0 (C average) on the first 30 hours of residence work at Texas A&M.

Credit from Foreign Institutions

Transfer work from institutions that do not follow the United States educational system with instruction in English will be evaluated on an individual basis. A-level examinations with a grade of C or better will result in the award of transfer credit. We do not award credit for

Baccalaureate II examinations. Credit will be given for work satisfactorily completed at international institutions offering programs recognized by Texas A&M. Official transcripts which include a listing of courses completed, terms of attendance, credit, and grades awarded submitted directly from the Office of the Registrar must accompany any request for transfer credit. Transfer work will be awarded by course title unless previous arrangements have been made using the Texas A&M University Transfer Credit Study Abroad Pre-Approval Form. Courses must be equivalent in character and content to courses offered at Texas A&M. Credit will not be awarded from international institutions which are not academically accredited by the Ministry of Education or other appropriate authority in the home country.

No English composition courses will be transferred from institutions located in non-English speaking countries. American history and American political science (government) courses will not transfer from foreign institutions.

Courses taken at language training centers or language institutes are generally not awarded transfer credit. A transcript from such an institution must be issued through the Office of the Registrar at a Texas A&M recognized university, institute or language training center. Credentials of all language training centers and institutes are carefully reviewed.

Credit for Military Experience

State law (Texas Education Code Section 51.3042) and Texas A&M University policy awards credit for military service to eligible veterans. To receive credit, student veterans must submit proof of eligibility to the Office of Admissions. Up to 12 hours of general elective credits may be awarded, as needed for the student's degree plan.

Proof of eligibility includes:

- DD Form 214 showing 1 year active duty and an honorable discharge OR
- Military orders OR
- Disability discharge documentation AND
- Documentation of high school completion (final high school transcript or General Educational Development certificate)

Military transcripts are evaluated at the time of application and credit for military experience/training is awarded based on recommendations contained within the Guide to the Evaluation of Educational Experiences in the Armed Services published by the American Council on Education (ACE). Texas A&M University will award KINE 198 and KINE 199 credit for completion of Basic Training if applicable to a student's degree plan. Credit under this policy does not prohibit Texas A&M University from awarding additional credit. The Military Transcript Credit Appeal form shall be provided to the Office of Admissions with approval of the academic advisor and veteran.

Proof of eligibility includes:

- Official military transcript (JST or CCAF)

Military Service Credits are irrevocable once awarded. Potential consequences should be identified and understood before a request is submitted. Students must consult their academic advisor for advice on the number of credits from military service that can be used in their degree program to avoid excess credit accumulation and possible negative effects.

Extension and Correspondence Courses

Students may apply a maximum of 30 semester hours of approved extension class work and correspondence study toward a degree. Students may apply up to 12 hours of correspondence credit earned through an accredited institution toward the requirements for an undergraduate degree, even though Texas A&M does not offer courses by correspondence.

Correspondence courses taken through the Defense Activity for Nontraditional Education Support (DANTES) may be accepted and included in the 12 hours allowed.

In order for a student in residence at Texas A&M to receive credit for correspondence work toward a bachelor's degree, he or she should:

- obtain advance written permission from the Dean of their college or school;
- present appropriate evidence of having completed the course.

Testing Services is authorized to act as an agent to receive correspondence courses.

International Admissions

International Admission Criteria

Transcripts/Examination Results

Official academic records (transcripts, marksheets, diplomas, etc.) are required for all secondary and any university coursework completed. Records should include all courses taken in high school and every college or university the applicant has attended.

Official records require the original school seal or an original signature of a school official (Registrar, Principal, Headmaster or Director of Student Records, Controller of Examinations, or the Ministry of Education). Official records should be mailed from the school directly to Texas A&M University, Office of Admissions. Examination results should be sent directly from the examination agency. In addition to the original records in a language other than English, Texas A&M requires official translations in English. Translations sent directly from the institution attended or from a recognized translator will be accepted. Transcript evaluations that include a certified copy of the original transcript and a word-for-word translation from an evaluation service that is a member of the National Association of Credential Evaluation Services (<https://naces.org/members/>) are strongly recommended and will allow faster processing of files. We recommend a document-by-document evaluation (with a GPA) for high school credentials and a course-by-course evaluation for college/university transcripts from non-U.S. institutions. Credential evaluations that include a word-for-word translation will be considered as an official translation but will **NOT** be accepted as a substitute for required transcripts. For students enrolled in the United States, we will accept copies of official transcripts from other countries that are on file and verified by the U.S. institution. Unofficial photocopies, fax copies, and notarized copies of records, examination results, or translations will not be accepted. Uploaded transcripts and diplomas indicating graduation from secondary school (final high school transcripts) will not be accepted. These transcripts must be mailed.

Admission Criteria for International Applicants with U.S. Based Credentials

International applicants who are completing their education at an institution that is accredited by the U.S. will be reviewed in accordance with the guidelines determined for domestic admission. However,

these applicants must still meet international deadlines and testing requirements. (See item 2 below.)

Admission Criteria for International Applicants with Foreign Credentials

International applicants who are completing their education at an institution that is not accredited by the U.S. will be reviewed based on the following criteria:

1. Academic Achievement

- International applicants are expected to complete an educational program that will allow them to be considered for admission to a university in their home country. Examples include the completion of Grade 13, Form 6 or 3 A-level exams following the General Certificate of Secondary Education (GCSE). Predicted A-level exam results must be received by the application closing date.
- Applicants must submit proof of high school graduation, typically a diploma, leaving certificate, or official examination results. Students that complete the West African Examinations Council (WAEC) exam must provide the necessary information for Texas A&M to verify the WAEC results, typically a WAEC scratch card or results checker, by the application closing date.
- Successful applicants will rank near the top of their country's educational system (B average or better) and score well above average on national exams.
- Secondary school courses: Appropriate college preparatory coursework is required.

2. Testing and Proof of English Proficiency

SAT or ACT scores will be considered in the review criteria for international freshman applicants. Applicants whose spoken language is not English are required to demonstrate English proficiency by meeting one of the following requirements to be eligible for review for admission:

- TOEFL internet-based test score of 80 or higher (taken within two years of date of intended enrollment)
- Minimum TOEFL Essentials score of 8.5 from a test date within two years (Texas A&M University does not accept the MyBest TOEFL score)
- IELTS with a 6.0 overall band score (taken within two years of date of intended enrollment)
- SAT Evidence Based Reading and Writing (EBRW) score of 560 or higher
- ACT English score of 21 or higher
- Completed all four years of high school within the U.S.
- Transfer from an accredited U.S. institution of higher education with at least 30 semester credit hours including the equivalent to Texas A&M's ENGL 103 or ENGL 104 with a grade of C or better.
- Please view the admissions website (<https://admissions.tamu.edu/apply/international/international-freshman/>) for information concerning acceptable English language testing for 2024.

3. Individual Achievement and Recognition

- Leadership positions held
- Honors/awards received
- Major national, state or Texas A&M scholarships received

Additional Requirements for International Applicants After Admission

If admitted, international students should review the International Student Services Channel, howdy.tamu.edu (<https://howdy.tamu.edu>) - Applicant tab, for next steps concerning enrollment at Texas A&M University. Additional information is available on the International Student and Scholar Services (ISSS) (<https://global.tamu.edu/iss/>) website.

Scholarship Information for International Students

There are a limited number of scholarships, fellowships, grants and loans available to international students, both in the admission process and throughout their enrollment. Some of these come from academic departments, particularly for graduate applicants, but there are also forms of financial aid available through International Student Services and Scholarships & Financial Aid. International applicants with financial need are encouraged to complete the International Student Financial Aid Application (ISFAA) (<https://aggie.tamu.edu/financial-aid/apply-for-aid/>). This form must be resubmitted annually for continued consideration for aid.

One special opportunity that a student may be eligible for upon admission to Texas A&M University is the Texas/Mexico Education Scholarship. Texas law allows a limited number of admitted applicants who are citizens of Mexico, and who can document financial need, to pay the same tuition as the residents of the State of Texas. For more information regarding how to apply for this scholarship, please refer to International Student and Scholar Services (ISSS) (<https://global.tamu.edu/iss/>) website.

For additional information regarding financial assistance and other scholarships available to International Students, please contact:

Scholarships & Financial Aid

<http://iss.tamu.edu>

Other Admissions

Admission Criteria for Other Application Types

Readmission Criteria

Admission decisions for readmission are based on the following:

- GPA on Texas A&M coursework;
- GPA on coursework since leaving Texas A&M;
- desired major; and
- information presented in the application and essay/statement of purpose.

If you were previously admitted but did not enroll and attend class through the official census date, you do not qualify as a readmit, and you must apply as either a freshman or transfer student.

If you were previously enrolled at Texas A&M but did not attend class through the official census date of the previous long semester, then you must apply for readmission.

Transcripts from institutions attended since the last enrollment at Texas A&M are required as follows:

If Desired Readmission Term Is	Must Have Transcripts Through
2026 Spring Semester	2025 Summer Semester
2026 Summer Semester	2025 Fall Semester
2026 Fall Semester	2026 Spring Semester if applying after June 1

Post-baccalaureate Undergraduate Criteria

Admission is limited and intended for applicants with a degree who wish to apply for further study at the undergraduate level to pursue a second bachelor's degree.

Additional requirements to complete a post-baccalaureate application:

- an official transcript indicating the receipt of a recognized baccalaureate degree
- a statement of purpose explaining why enrollment at Texas A&M is necessary
- official transcripts from all colleges attended (official high school transcript not required)

Admission decisions for post-baccalaureate undergraduates consider:

- GPA on transferable college coursework
- completion of prerequisite coursework
- information presented in the application

Priority is given to qualified applicants for their initial degree; therefore, **post-baccalaureate undergraduate admission may be limited or may not be available**. Mays Business School and the School of Public Health do not consider applicants for post-baccalaureate study. Students are encouraged to contact the major to determine if post-baccalaureate study is allowed. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

Undergraduate Non-degree Criteria

Admission is limited and intended for applicants with a high school diploma (with the exception of High School Enrichment Program participants) or for degree applicants who do not intend to pursue a baccalaureate degree at Texas A&M. This includes:

- local residents or University employees taking courses on a part-time basis
- applicants completing established Texas A&M University requirements for teacher or other certification

- applicants completing a prescribed set of courses as preparation for application to graduate study or professional programs (i.e., medical school, veterinary school, law school or CPA exam)
- others as deemed appropriate by the Office of Admissions and the college or program of admission

Additional requirements to complete an undergraduate non-degree application:

- a statement of purpose explaining why enrollment at Texas A&M is desired
- an official college transcript showing the latest collegiate coursework attempted or a complete, official high school transcript if no college work has been attempted after high school graduation
- additional information presented in the application may be considered
- other credential as deemed appropriate by the Office of Admissions and the college or program of admission

Priority is given to qualified applicants for their initial bachelor's degree; therefore, non-degree admission may be limited or not available. Students are encouraged to contact the major to determine if non-degree seeking study is allowed for any given semester. See the Classification section of this catalog for the enrollment rights and privileges of this classification.

Transient Session Only Criteria

Admission is considered for applicants who wish to attend summer only, present appropriate credentials for the level of specified coursework, and apply within the processing period for the specific session. The School of Public Health does not allow transient admission. Students are encouraged to contact the major to determine if transient study is allowed.

Additional requirements to complete transient session only application:

- a statement of purpose explaining why enrollment at Texas A&M is desired
- an official college transcript showing the latest collegiate coursework attempted or a complete, official high school transcript if no college work has been attempted after high school graduation

High School Enrichment Program

Texas A&M University is pleased to offer the High School Enrichment Program (HSEP) for qualified high school students in the Bryan/College Station area that will provide college credit and may also provide credit toward high school graduation. Admission for this program is on a space-available basis. The applicant pool is competitive, and admission into this program is not guaranteed.

This program provides a chance to further your knowledge in a subject you have completed in high school and earn valuable credit for graduation at both levels. For example, if you are interested in Physics and you have completed all of the classes your high school offers, you may qualify to continue to study Physics at the college level.

To be considered for this program, students must have completed all levels of related coursework offered at their high school. Each student is eligible to take one course per fall or spring semester, and course registration will be completed by the Texas A&M departmental advisor. No summer classes are offered at this time. Classes will be held on the Texas A&M campus, and students and their parents/guardians will be responsible for any transportation considerations.

Eligibility requirements:

- You must be a junior or senior in high school in the Bryan/College Station area.
- You must have a minimum SAT score of 1270 or an ACT score of 27.
- You must provide a recommendation form from your high school counselor to participate.

Academic Fresh Start Policy

Applicants for admission or readmission to Texas A&M may choose to have academic coursework that was completed at least 10 years prior to their term of application removed from consideration in the admission decision (Texas residents only). All other admission requirements apply. Should a Fresh Start applicant be admitted, he or she will forfeit all credit earned prior to 10 years from the term of admission. Academic Fresh Start must be requested as part of the application process. It cannot be requested after an applicant is admitted or enrolled.

Academic work done subsequent to ten years will be used in the evaluation of the applicant for admission. Applicants with subsequent coursework are required to submit the transfer application along with transcripts for all college level coursework as well as all additional required documents by the posted deadline. If a student does not have coursework subsequent to ten years, he or she will be considered for admission based on the guidelines for new entering freshmen.

See <https://admissions.tamu.edu/apply/academic-fresh-start> for additional requirements.

Admitted Fresh Start applicants have "Academic Fresh Start" indicated on their official Texas A&M transcript, are required to satisfy TSI (<https://asc.tamu.edu/tx-success-initiative/>) requirements, and will follow the academic requirements of the Undergraduate Catalog of record for the term of admission.

Forfeited coursework cannot be considered as prerequisites but placement examinations are allowed for courses which were not considered for admission because of the Fresh Start Policy. Once admitted on Academic Fresh Start, the applicant or student cannot subsequently request that the Fresh Start policy restrictions be removed.

If an applicant has used the Academic Fresh Start Policy at a previous school, the Academic Fresh Start will remain in effect at Texas A&M upon transfer.

Note: For financial aid purposes all previously taken coursework will be included when evaluating aid eligibility. In addition, the Department of Veterans Affairs (VA) does not recognize the Academic Fresh Start program. Students cannot be certified for courses they have successfully completed. Students using VA educational benefits should coordinate with the Veterans Services Office.

Entry to a Major – College of Engineering

Students who begin in general engineering programs in College Station (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>), (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>) Galveston (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-galveston/>) or McAllen (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/>) or who are in Texas A&M Engineering at Blinn (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-blinn-bryan/>), or the Texas A&M Engineering Academy Programs (<https://engineering.tamu.edu/academics/academies/>) pursue a common first year engineering curriculum to provide them opportunities

to explore the various engineering majors (<https://engineering.tamu.edu/academics/explore-engineering/>). Students are introduced to the different engineering majors in the first year engineering courses, ENGR 102, ENGR 216/PHYS 216 and ENGR 217/PHYS 217. Additionally, students are encouraged to leverage additional resources, including the Career Center (<https://careercenter.tamu.edu/>), faculty, and academic advisors, to gain more information about engineering majors. All general engineering students must complete the following first year engineering curriculum requirements over the course of at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses, from a pre-approved list posted at tx.ag/etam (<https://engineering.tamu.edu/academics/undergraduate/entry-to-a-major/>).

The entry-to-a-major (ETAM) process (<https://engineering.tamu.edu/academics/undergraduate/entry-to-a-major/>) enables students to take ownership of their future by identifying at least three majors that are a good match for their academic and career goals. The ETAM process is designed to place students in the highest rank major possible based upon academic performance, ETAM application content, and program capacities. Students who begin in general engineering programs in College Station (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>), (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>) Galveston (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-galveston/>) or McAllen (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/>) or who are in Texas A&M Engineering at Blinn (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-blinn-bryan/>), or the Texas A&M Engineering Academy Programs (<https://engineering.tamu.edu/academics/academies/>) are encouraged to be in a major as early as possible, and must be in a major by the end of the fourth semester.

Transfer students are admitted directly to a degree granting major through the admissions process.

Upper-Level Entry to the College of Architecture, Mays Business School, and Veterinary Medicine and Biomedical Sciences-Biomedical Science

College of Architecture

Transfer Students

Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. Following admission, some departments place transfer students on a 2.5 GPA probation for a minimum of 12 credit hours to substantiate competency in required lower-level courses. Departments with lower-level classification will admit transfer students into the school with a lower-level classification. Students may apply for upper-level status after at least one semester at Texas A&M University.

Change of Major

Students currently enrolled in another major at Texas A&M University with fewer than 60 hours who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application found on the Howdy portal under the "My Record" tab. See Student Rule 5.

The best-qualified applicants will be admitted based on the number of spaces available in their program of choice. Enrollment in Architecture, Landscape Architecture, and Urban and Regional Planning is driven by available studio space. Additionally, there are eight sequential studios in those degree programs which makes it difficult for students that transfer with more than 36 hours to graduate in a timely manner.

Mays Business School

Lower-level business (BUAD) students are encouraged to complete the freshman and sophomore sequence of courses as listed under Program Requirements.

The Upper-Level (UL) entry requirements and application procedures are as follows:

1. **Admission:** To be admitted to an UL major, a student must be admitted to Mays Business School and have:

- a. Satisfactorily completed the following five courses:

Code	Title	Semester Credit Hours
ACCT 229	Introductory Accounting	3
ECON 202	Principles of Economics	3
ECON 203	Principles of Economics	3
MATH 140	Mathematics for Business and Social Sciences	3
MATH 142	Business Calculus	3

- b. Submitted application for UL admission no later than preregistration for the expected UL entry term. **NOTE:** For summer UL entry, all requirements must be completed BEFORE the first class day of the FIRST SUMMER SESSION.
 - c. BUAD students may preregister for UL business courses in the semester for which they have applied for UL. However, students who fail to complete UL requirements shall not be permitted to remain registered in UL business classes.
2. **Transfer Students:** Transfer students admitted to Mays Business School enter as lower-level business (BUAD) students until they complete all requirements listed previously in item 1, at which time they may apply for admission to an UL major. Transfer students may immediately apply for UL when admitted to Mays Business School if, and only if, they meet all UL requirements at that time.
 3. **On-Campus Change of Major Students:** Texas A&M students who change major into Mays Business School from another college or department at the University will enter as lower-level business (BUAD) students until they complete all requirements listed previously in item 1. Change of major students who, when admitted to the business school, qualify to apply for admission to an UL major may do so.
 4. **Junior- and Senior-Level Business Courses:** Preference for available seats in junior- and senior-level business courses will be given to students who have been admitted to an UL major in Mays Business School. All ineligible students who preregister for UL business classes are subject to cancellation of their registration in these courses.

College of Veterinary Medicine and Biomedical Sciences

1. A Biomedical Sciences (BIMS) major will be admitted into the upper-level courses according to the following criteria:
 - a. Completion of a set of Common Body of Knowledge (CBK) courses with a grade of C or better in each course completed at Texas A&M. Any CBK course transferred from a community

- college must have a minimum grade of a B. For admission to BIMS upper-level courses, a student may have attempted a CBK course no more than twice.
- b. A minimum of 55 completed semester hours with a cumulative overall TAMU Grade Point Average (GPA) of 3.0 or better.
 - c. Process: Each student upon completing 55–65 semester credit hours must have a degree audit to verify upper-level eligibility. (All students are required to submit a completed degree planner yearly between March 1 and September 30. Students are encouraged to submit their planners prior to September 1).
2. The Biomedical Sciences Program will continue to accept changes of major into BIMS according to current Texas A&M University policy, but restrict changes of major into the upper-level courses (BIMS) according to the criteria listed in item 1. Students in other majors requesting a change of major to the BIMS program must fulfill the criteria in item 1. In addition, the dean must verify availability of resources necessary to insure the student's full-time enrollment in required upper-level courses prior to admission to upper-level status. If such courses are not available, the student will be denied admission to Biomedical Sciences.
 3. To enter BIMS upper-level courses, transfer students must have:
 - a. A minimum GPA of 3.0 in CBK courses with a grade of B or better in each completed course if taken at a 2-year college. A grade of C or better is accepted from a 4-year college.
 - b. Transfer students admitted under another major and wishing to change into BIMS must complete one semester of graded coursework at Texas A&M University with a cumulative overall TAMU GPA of 3.0, as well as meet change of major requirements for current students.
 - c. Texas A&M University change of majors must have at least 55 semester credit hours with a minimum cumulative GPA of 3.0.
 4. Students seeking readmission will be considered on a case-by-case basis, according to current catalog policy. No quotas will be placed on readmission; however, the decision to readmit will be dependent on resource availability and University policy.
 5. Any BIMS student admitted to upper-level courses who then falls below the 2.5 GPA requirement will not be considered in good academic standing in their major and will be placed on college probation. Students who achieve less than an overall TAMU GPA of 1.0, in any semester, are not eligible for college probation or grade warning status. All Biomedical Sciences majors must follow established probation rules for the Biomedical Sciences Program.
 6. The Dean, Director, or Department Head will reserve the right to waive CBK or GPA requirements within the criteria established in Texas A&M University Student Rules.
 7. No courses, other than those specifically approved by the Dean or designee or research/directed studies courses, can be taken as S/U to be used in the BIMS or USVM degree plans.
 8. BIMS/USVM probation is determined at the end of both Fall and Spring semesters. Students not meeting acceptable GPA requirements (cumulative 2.5 BIMS majors with 55 or more hours or cumulative 2.0 for USVM majors/BIMS majors with less than 55 hours) will be placed on probation for one semester. Students who achieve less than a cumulative TAMU GPA of 1.0 in any semester (BIMS or USVM) are not eligible for college probation or grade warning status. Any written correspondence from Texas A&M University regarding suspension supersedes departmental probation terms.

9. Students may only attempt Biomedical Science courses a total of three times.

Texas Success Initiative (TSI)

The Texas Success Initiative (TSI) was instituted to ensure that students enrolled in Texas public colleges and universities possess the necessary academic skills to perform effectively in college and to provide diagnostic information about reading, writing and mathematics skills of each student. All undergraduate students who did not meet one of the allowed exemptions must take the approved TSI Assessment.

Students who do not meet established cutoff scores or other approved exemptions for the TSI Assessment are required by Texas law to be enrolled in, and actively attend, an academic skills course and/or program each semester prior to completing all TSI requirements. Academic skills courses in each of the three TSI areas are offered by Texas A&M. Failure to meet the attendance requirements of the academic skills course may result in withdrawal from Texas A&M. The hours for these courses will not count toward any degree program but may count toward determining full-time status. See <https://asc.tamu.edu/TX-Success-Initiative> (<https://asc.tamu.edu/TX-Success-Initiative/>) for specific information.

Upload your official SAT/ACT/TSI Score Report to AIS and save as **Test Scores**. You can also send your scores directly from the testing agency (College Board, Accuplacer, etc.) to Texas A&M. Exempting documentation may also be included with the **official** high school transcript.

NOTE: FAILURE TO SUBMIT TSI SCORES OR OTHER EXEMPTING DOCUMENTATION (SAT/ACT SCORES) WILL RESULT IN A REGISTRATION HOLD.

Students required to take the TSI Assessment can also provide their score reports to the Academic Success Center at Texas A&M University at the address below.

Academic Success Center
1133 TAMU
College Station, TX 77843-1133

More information can be obtained from testing centers at most Texas public colleges and universities or by contacting:

Texas Higher Education Coordinating Board
P.O. Box 12788
Austin, TX 78711-2788

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

College of Dentistry – Caruth School of Dental Hygiene

Basis For Acceptance

All applicants will be considered using the following criteria. In addition, the applicant must be able to perform the essential functions required in the curriculum. The quality of the applicant's academic achievement is a prime consideration. A grade point average (GPA) is computed based on all courses taken in college.

Preference for admission is given to students with:

- A cumulative GPA and Science GPA indicating ability to succeed in the program.
- Attention given to detail when completing the application.
- A comprehensive biographical sketch that includes information that will help the Admissions Committee know the applicant better. Details about the dental hygiene procedures that have been observed, a description of the community service projects in which you have participated and information concerning your interests, abilities and attitudes that have motivated you to make the commitment required for a career in dental hygiene are examples of information that might be included.

The application deadline is January 5. The Office of Recruitment and Admissions encourages applicants to submit the online application forms by December 1. All materials related to the application must be received in the Office of Recruitment and Admissions by February 1.

- The following must be included with the application when it is submitted online:
 - a. Application for Admission
 - b. Secondary Application
 - c. List of courses in progress and those planned prior to enrollment in the dental hygiene program
 - d. Biographical sketch
- Other materials that should be sent to complete your application:
 - a. Application Fee (\$35.00)
 - b. Photograph sized 2 X 2 (does not have to be a passport picture - can be regular photograph cut down)
 - c. Transcripts from high school and all colleges attended (if you attended a foreign high school, you do not have to submit a copy)
 - d. Scores from Texas Success Initiative (TSI). (Or if exempt, SAT/ACT or TAAS— usually scores are listed on high school transcript; you do not have to submit scores separately.)
 - e. Observation Verification Form (minimum 16 hours required)
 - f. Recommendations: these evaluation forms should be completed by 1) a college instructor, 2) a dental hygienist and 3) an individual who has known applicant for some time; for example, an employer or supervisor.
- An application is valid for one academic year only.
- Official transcripts are required and will be accepted only when sent directly from each school the applicant has attended.
- It is the responsibility of the applicant to keep the application file current. Failure to supply grades, transcripts or recommendations may be perceived as an indication that the applicant is no longer interested in admission.

Interviews

Processing of applications begins the year prior to entrance into the professional program and continues until the class is filled. The applications are evaluated, and an invitation for an interview may be extended. The purpose of the interview is to determine the applicant's knowledge of the dental hygiene profession. It also provides an opportunity for the applicant to see the facility, meet with the Admissions Committee and to ask questions about the Caruth School of Dental Hygiene program.

All prospective students are encouraged to contact the college with questions regarding prerequisite courses or the program.

To Access the Dental Hygiene Application Forms:

The applicant will need to create an account on the Banner Admissions Management Framework (BAMF) website. The applicant will be required to complete and submit the College of Dentistry Dental Hygiene Application, the Secondary Application and the Ethnicity Form.

The application for the Dental Hygiene Program will be available on the BAMF website from July 15 to January 5.

Download Forms (Adobe PDF files):

The Evaluation Form and Observation Verification Form are available for download. You will need to print these forms and submit them with signatures through regular mail.

- Evaluation Form – top section to be filled in by applicant
- Observation Verification Form

For questions about the application process, please contact The Office of Recruitment and Admissions at (214) 828-8231 or by email at admissions-dentistry@tamhsc.edu.

Mail forms and transcripts to:

Office of Recruitment and Admissions
Texas A&M University College of Dentistry
3302 Gaston Avenue, Room 525
Dallas, TX 75246-2013
USA

Transfer Credit

Transfer credit will be determined by each component in conjunction with the staff of the college on a course-by-course basis from official transcripts submitted in the competitive admissions process. Course content will be determined by the catalog course description or course syllabus.

Course acceptability is guided by these criteria:

- Courses completed at regionally accredited institutions are considered for transfer if:
 - a. They are acceptable as credit for a bachelor's degree at a regionally accredited institution.
 - b. Course content is at or above the level of courses specified in the requirements for admission.
- Courses intended for use in a vocational, technical or occupational program normally do not transfer; general courses within this type of program may transfer.
- Credit on the transcript must appear in semester hours or credits that may be converted to semester hours.
- Credit by examination courses may be transferred if accepted by another college and followed by sequenced coursework.
- Equivalency of coursework is determined by content found in catalog course descriptions or syllabi of courses. In case of doubt, departmental faculty will determine equivalency. The final determination is left to the Program Director.
- As a general policy, coursework with a passing grade may be transferred, but the applicant must keep in mind that admission to the hygiene program is on a competitive basis and grades of F are calculated into the grade point average.

- Course hours will be evaluated on a course-by-course basis but will be transferred as a block of hours, and the grades do not calculate into the GPA for the hygiene program.
- Online courses are accepted.
- Typically, credit will not be given for courses completed at institutions not accredited by a regional accrediting agency.
- The college does not accept non-credit coursework to be used in lieu of coursework taken for academic credit.

Dental Hygiene Program (BS)

Application Fee	\$35 non-refundable fee
Admission Standards	Completion of required courses with GPA as high as possible. Admission is competitive.
Use of High School Record	No
Number of Articulation Agreements and Requirements for Admission	Not applicable
TOEFL**	Not applicable
Other Requirements	Three LOR required and TSI assessment. Interview; comprehensive biographical sketch; and 16 hours of verified observation of a dental hygienist

College of Nursing

Three different tracks lead to a baccalaureate degree in nursing. The traditional BSN track is for students seeking their first degree in college. The second-degree BSN track (post-baccalaureate) is for individuals who have already earned a bachelor's degree in another field of study. The RN to BSN track is for registered nurses who hold an associate degree in nursing. Prerequisite courses, which are the essential foundation for nursing, must be completed before entry into upper-division nursing courses through a competitive admission process. In addition, all students must meet the core curriculum requirements for Texas A&M University if not already completed at another institution.

The following documents are required for an application to be considered complete and eligible for review:

- Application
- Application fee
- Official college transcript(s)
- Timed verbal and written assessment
- Completion of prerequisite courses by the time of enrollment with a grade of C or better and 3.3 GPA
- Admissions Assessment (HESI A2) entrance exam required for traditional and second-degree BSN applicants only; minimum score of 75% in each required section
- Reference and professional resume required for RN to BSN applicants only
- RN to BSN applicants must provide proof of RN licensure in good standing by the start of the second semester
- Copy of permanent resident card, if applicable
- Official TOEFL Scores are required for international applicants and must be taken within the past two years. Test scores must be sent directly from the testing agency to be considered official.

The most current information regarding application to nursing can be found on the College of Nursing (CON) website. Applications must be received by the posted deadline. No late documents will be accepted. Admission to the college is competitive. At the time of application, students must be enrolled in or have completed all prerequisite course requirements which includes University Core Curriculum and nursing prerequisites with minimum GPA (prerequisite/nursing science GPA of 3.3). Admission offers may be made to students finalizing courses and will be contingent upon successful completion of all prerequisite requirements and students presenting a clear criminal background check and a negative drug screen.

If the student completed a core curriculum from another Texas public institution in a previous degree program, they are not required to complete the college's Core Curriculum. Students transferring from out of state, from a private institution, those with an international degree or anyone with concerns about this requirement, please contact an academic advisor at the College of Nursing for further clarification. Students will not be considered for admission unless the required coursework is completed by the time of enrollment while maintaining a 3.3 minimum GPA.

Additional Requirements for International Applicants and Applicants with Foreign Credentials

In addition to each program's stated application requirements, applicants with foreign transcripts must also include a transcript evaluation from an evaluation service which is a member of the National Association of Credential Evaluation Services. A course-by-course listing that reflects U.S. grade point equivalencies and semester credits is required. These reports must be sent directly from the evaluation agency in the original sealed envelope to NursingCAS. Send to: NursingCAS, P.O. Box 9201, Watertown, MA 02471. If sent via UPS or FEDEX, send to NursingCAS Transcript Department, 311 Arsenal Street, Suite #15, Watertown, MA 02472. Students may wish to speak with an advisor to determine transfer credits based on the results of the evaluation.

If admitted to the College of Nursing, applicants with foreign transcripts must submit the native language transcript along with an official English translation. These documents must include all original seals and/or signatures and be approved by the Texas A&M Office of Admissions prior to enrollment in the program.

English Proficiency and other Requirements for International Applicants

Applicants whose native language is not English are required to submit proof of English proficiency to be eligible for review. English proficiency can be demonstrated through various criteria. See more on this requirement on the international admissions website. International applicants will be expected to present a declaration of finances, F-1 travel documents and additional documentation upon acceptance to the College of Nursing. All deadlines required by the Office of International Student Services must be met.

College of Nursing (Health Science Center)

Traditional, Second Degree and RN to BSN

Applications & Fee	• Non-refundable fee set by NursingCAS • \$75 Paid through Apply Texas Application

Admission Standards	• Admission is competitive. • Required minimum grade of "C" in each of the prerequisite courses.
Use of High School Record	• Not used for admission purposes but required upon acceptance
Articulation Agreements	• South Texas College, Blinn College, and Angelina College
TOEFL	• See website for additional information
Other Requirements	• Entrance exam for pre-licensure applicants; Reference and Professional Resume for RN to BSN applicants; Timed verbal and written assessments may be required through Kira Talent portal.

Course Credit

Course Credit

Testing Services

Testing Services serves as the center for credit by examination, placement testing and correspondence testing, as well as national standardized testing. Other services include posting of test scores and evaluation of tests for college credit.

Credit by Examination

Undergraduate students at Texas A&M may earn course credits by demonstrating superior achievement on tests offered through several examination programs. Credit by examination is available to freshmen who plan to enter the University and to students who are currently enrolled. Credit earned by examination does not contribute to a student's grade point ratio. The University awards credit for scores on certain tests published by the Advanced Placement Program (AP), the College Level Examination Program Computer-Based Testing (CLEP CBT), the SAT Subject Tests, DANTES Subject Standardized Tests (DSST) and the International Baccalaureate (IB) Program. Texas A&M also offers qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Information concerning credit by examination may be obtained from Testing Services (<http://testing.tamu.edu>), (979) 845-0532.

Please note these regulations concerning credit by examination:

1. Test scores and/or credit eligibility must be reported formally to Testing Services for credit by examination to be awarded. Credit is posted to the academic record once appropriate scores are received by Testing Services, the student has officially enrolled in the University and the student has accepted the credit. For information regarding current procedures for accepting credit, please visit the Testing Services (<http://testing.tamu.edu>) website.
2. Students may not receive credit by examination for courses that are prerequisites to courses for which they already have credit except with the approval of the department authorizing the examination.
3. A student may not have credit posted for credit by examination for a course in which he or she is currently registered. If a student has acquired a grade or exercised First-Year Grade Exclusion on a course, then the student will not be eligible to take the equivalent departmental exam. Eligibility will not be affected if a student has a Q, W or NG in a course.

4. Please note that once any credit has been accepted it cannot be removed.

Advanced Placement Program (AP)

Examinations offered by the AP Program are administered during late spring by high schools. Students usually take the examinations after completing Advanced Placement courses, although experience in an AP course is not required. Interested students should contact their high school counselors for information concerning registration and test sites. High school students and currently enrolled students should have the College Board forward their scores to Testing Services, institution code: 6003. Advanced Placement scores of entering freshmen are generally received in July. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via AP tests. Testing Services suggests visiting with your advisor before you accept credit.

The following list includes all AP examinations currently accepted for credit.

AP Examination	Minimum Score Required	Texas A&M Course(s)	Credit Hours
African American Studies	3	AFST 289	3

¹ Students must consult their academic advisor for advice on the number of credits that can be used in their degree program to avoid excessive credit accumulation and possible negative effects.

² Variable credits up to a maximum of 3 credit hours. Students must consult their academic advisor for advice on the number of credits that can be used in their degree program to avoid excessive credit accumulation and possible negative effects.

* Engineering majors should accept credit for PHYS 206 and PHYS 207 only, (not 226 and 227) a 2 hour lab is required for their degree plan

For instructions on accepting AP credit, please visit T (<http://dars.tamu.edu>)esting Services (<http://testing.tamu.edu>).

College Level Examination Program Computer-Based Testing (CLEP CBT)

CLEP CBT tests are designed to evaluate nontraditional college-level education such as independent study, correspondence work, etc. Both enrolled undergraduate students and entering freshmen may receive CLEP CBT credit for the courses which are listed below. Only examination titles below are currently accepted. The minimum scores listed below are based on the current version of CLEP CBT Examinations. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via CLEP tests. Testing Services suggests visiting with your advisor before you accept credit.

CLEP CBT Subject Examination	Minimum Score Required	Texas A&M Course(s)	Credit Hours
Algebra	50	MATH 102	3
American Government	50	POLS 206	3
Calculus with Elementary Functions	50	MATH 151 or MATH 171	4

Psychology, Introductory	50	PBSI 107	3
Sociology, Introductory	50	SOCI 205	3
Western Civilization I: Ancient Near East to 1648	50	HIST 101	3
Western Civilization II: 1648 to Present	50	HIST 102	3

For instructions on accepting CLEP credit, please visit Testing Services (<http://testing.tamu.edu>).

Dantes Subject Standardized Tests (DSST) Program

The DSST Program is available to all interested persons. Enrolled undergraduate students and entering freshmen may receive DSST credit for the courses listed below. For more information about the test, please contact Testing Services.

DSST Examination	Minimum Score Required	Texas A&M Course(s)	Credit Hours
Art of the Western World	50	ARTS 149, ARTS 150	6
Astronomy	48	ASTR 101	3

Business Law II	52	MGMT 312	3
Lifespan Develop. Psyc.	47	PBSI 307	3
Principles of Statistics	48	STAT 201 or PBSI 301	3,4

International Baccalaureate (IB)

Texas A&M University, in compliance with SB111, will grant at least 24 semester credit hours of course-specific college credit in subject-appropriate areas on all International Baccalaureate (IB) exam scores of 4 or above as long as the incoming freshman has earned an IB diploma. While some course credit will be awarded regardless of a student's IB diploma status, some course credit at Texas A&M University may be subject to the successful completion of the IB diploma.

Entering freshman students should submit their International Baccalaureate transcript to Texas A&M University, institution code: 01355, for review. Students should contact Testing Services regarding their eligibility for course credit. Students should work with an academic advisor to determine the use of the IB credits in their individual degree plan and the impact accepting the credit may have upon tuition rebate eligibility, tuition charges for excessive total hours, and preparedness for sequential coursework based on IB test scores. Students will need to log onto their Howdy portal under My Records and then Credit by Exam to accept the credit earned via IB tests. Testing Services suggests visiting with your advisor before you accept credit.

Texas A&M University will notify IB applicants of their eligibility to receive credit by posting information on the website, Testing Services, and by establishing links to other web pages.

The evaluation of IB courses in order to identify the appropriate course credit is continuing and will be posted as it becomes available. The following list includes all IB examinations currently accepted for credit.

¹ Credit for MATH 151 may be substituted for MATH 142 or MATH 171.

For instructions on accepting IB credit, please visit Testing Services (<http://testing.tamu.edu>).

SAT Subject Tests

Credits are offered to entering freshmen who score high on the SAT Subject Tests. High school students who are interested in taking these tests should contact their school counselors or write College Board ATP, Box 592, Princeton, NJ 08541.

Subject Test	Minimum Score Required	Texas A&M Course(s)	Credit Hours
Chemistry	630	CHEM 119	4
French	640	FREN 101	4
	740	FREN 101, FREN 102	8
German	630	GERM 101	4
	740	GERM 101, GERM 102	8
Italian	630	ITAL 101	4
	750	ITAL 101, ITAL 102	8
Latin	630	CLAS 121	4
	730	CLAS 121, CLAS 122	8
Physics	680	PHYS 201, PHYS 202	8
Spanish	630	SPAN 101	4
	750	SPAN 101, SPAN 102	8

The minimum score required is based on the re-centered scale. Students who took tests before April 1, 1995, should contact Testing Services to determine the minimum score required. For instructions

on accepting SAT Subject credit, please visit Testing Services (<http://testing.tamu.edu>).

Departmental Examinations for Entering Freshmen and Currently Enrolled Students

Qualified entering freshmen may take departmental tests after being officially admitted into Texas A&M University. Currently enrolled students can also take the exams throughout the year. Contact Testing Services (<http://testing.tamu.edu>) for registration information. The tests are prepared by participating Texas A&M departments. Current offerings include:

Code	Title	Semester Credit Hours
CHEM 119	Fundamentals of Chemistry I	4
CHEM 120	Fundamentals of Chemistry II	4
MATH 102	Algebra (Available to entering freshman only during the summer before beginning classes at Texas A&M)	3
MATH 142	Business Calculus (Available to entering freshman only during the summer before beginning classes at Texas A&M)	3
MATH 151	Engineering Mathematics I (Available to entering freshman only during the summer before beginning classes at Texas A&M)	4
MATH 152	Engineering Mathematics II (Available to entering freshman only during the summer before beginning classes at Texas A&M)	4
MATH 171	Calculus I (Available to entering freshman only during the summer before beginning classes at Texas A&M)	4
MATH 172	Calculus II (Available to entering freshman only during the summer before beginning classes at Texas A&M)	4
MATH 251	Engineering Mathematics III (Available to entering freshman only during the summer before beginning classes at Texas A&M)	3
PHYS 201	College Physics	4
PHYS 202	College Physics	4
PHYS 206	Newtonian Mechanics for Engineering and Science (Non-engineering majors also qualify for PHYS 226 credit)	3
PHYS 207	Electricity and Magnetism for Engineering and Science (Non-engineering majors also qualify for PHYS 227 credit) *	3

Graduate Admission

Graduate Admission

For information related to graduate admission, please contact:

Office of Graduate Admissions
Texas A&M University
P.O. Box 40001
College Station, TX 77842-4001
(979) 845-1060
admissions@tamu.edu
<http://admissions.tamu.edu/apply/graduate>

Please reference the *Texas A&M University Graduate and Professional Catalog* on this website.

Registration and Academic Status

Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of the Registrar. The schedule of classes is available online.

Full-Time Student

A full-time undergraduate student is defined as one who is registered for 12 semester hours during a fall or spring semester or 8 hours in a summer semester. Full-time enrollment for federal financial aid is always defined as 12 semester hours, including the summer term. A Q grade or W grade does not count toward the certification of enrollment status. Only hours for which a student is currently enrolled at Texas A&M University can be used toward certification of enrollment.*

**Students participating in the Blinn TEAM program or the TAMU Engineering Academy at Blinn Bryan program may have unique enrollment certification specifications based on the program agreements. Enrollment status for students in these programs is reported to the National Student Clearinghouse by Texas A&M University and includes enrolled hours from both institutions.*

Undergraduates Registering for Graduate Courses

A senior undergraduate student with a grade point average of at least 3.000 or approval of their academic Dean or designee, is eligible to enroll in a graduate course and reserve it for graduate credit. To do this, students must work with their academic advisor to submit a request online through the Course Level Change (CLC) System (<https://registrar.tamu.edu/administrative-services/degree-audit/course-level-change-system/>). The request must be approved by the course instructor, the student's major department head, and the dean of the student's undergraduate college. Undergraduate credit hours used to meet the requirements for a baccalaureate degree may not be used to meet the requirements for a graduate degree.

An academically superior undergraduate student with a grade point average of at least 3.250 or approval of their academic Dean or designee, is eligible to apply graduate credit hours toward their undergraduate

degree program. To do this, students must work with their academic advisor to submit a request online through the Course Level Change (CLC) System (<https://registrar.tamu.edu/administrative-services/degree-audit/course-level-change-system/>). The petition must be approved by the course instructor, the student's major department head, and the dean of the student's undergraduate college. Graduate credit hours used to meet the requirements for a baccalaureate degree may not be used to meet the requirements for a graduate degree.

VA Benefits

Students who are military veterans should note that to receive full VA benefits they must be registered for enough hours to be considered full-time for their degree during each term they are seeking benefits. This number may differ between degrees and during the summer semester. For hour requirements, please visit Veterans Services.

Maximum Schedule

An undergraduate student with an overall grade point average of 3.0 or better may register for a course load in excess of 19 hours in a fall or spring semester with the approval of their advisor. An undergraduate student with an overall grade point average of less than 3.0 must obtain approval from their dean before registering for a course load in excess of 19 hours in a fall or spring semester.

Classification

Each student has a classification which indicates the type of degree program in which the student is enrolled, and reflects the student's progress within that program. The classifications are:

Code	Classification Definition
U0	Undergraduate Non-degree Students with a high school diploma (with the exception of high school concurrent enrollment participants) who do not intend to pursue a baccalaureate degree at Texas A&M University. This includes: a. Summer session only students. b. Local residents or university employees taking courses on a part-time basis. c. Others as may be deemed appropriate by the Office of Admissions and the school, college or program of admission.
	Undergraduate non-degree students are not permitted to enroll in courses until all degree seeking students have had the opportunity to enroll. Undergraduate non-degree enrollment begins on the first day of open registration. Enrollment may be limited by college or program policies. Admitted students are not eligible for refund of the admission processing fee regardless of course availability.

An undergraduate non-degree student must maintain a 2.0 GPA on all coursework attempted to remain eligible to register. Enrollment is subject to review at the end of each semester of enrollment. Enrollment beyond two years of attendance will be approved only in exceptional cases.

Should an undergraduate non-degree student desire admission to a degree program, regular formal application is necessary, including: a complete application for admission, the required application processing fee, the submission of all required credentials, and the meeting of all admission requirements.

An undergraduate non-degree student may not take graduate-level coursework.

Undergraduate non-degree students are subject to TSI and English proficiency requirements.

An undergraduate non-degree student does not qualify for financial aid through the University. With few exceptions, undergraduate non-degree status is not available to international students.

U1	Freshman 0-29 hours
U2	Sophomore 30-59 hours
U3	Junior 60-89 hours
U4	Senior 90+ hours
U5	Postbaccalaureate Undergraduate Students with a recognized baccalaureate degree who wish to complete requirements for a second baccalaureate degree at Texas A&M University or to complete established Texas A&M University certification requirements. The postbaccalaureate undergraduate classification (U5) has all the privileges and responsibilities of a senior classification (U4). Recipients of a Texas A&M University baccalaureate degree are not eligible for continued enrollment unless they have the specific approval of the school or college offering the second bachelor's degree or certification. Should they break enrollment, they must apply for readmission as second bachelor's degree candidates.

A candidate for a second baccalaureate degree must complete all the essential work of the second degree not covered in the first. In all such cases, the total semester hours required must be at least 30 semester hours additional to the greater number required for either degree (see Two Degrees in the Degree Information section). To pursue a second baccalaureate degree concurrently with the pursuit of the initial degree, all essential work required for a second degree must be defined in advance in writing by the dean of the school or college granting the second degree. To pursue a second baccalaureate degree sequentially requires admission to a second bachelor's degree classification. Pursuit of a second baccalaureate degree may be limited or may not be allowed by some schools or colleges.

Academic Status

Distinguished Student and Dean's Honor Roll

An undergraduate student who completes a semester schedule of at least 15 graded hours or a summer term schedule of at least 12 graded hours with no grade lower than C and with a grade point average of not less than 3.5 for the semester or for a summer term shall be designated "distinguished student." A student who, under the same circumstances, achieves a grade point average of at least 3.75 shall also be designated as a member of the "dean's honor roll." First-semester freshmen must complete a semester schedule of at least 15 hours with no grade lower than a C, no Q-drops, and with a grade point average of not less than 3.5 for "distinguished student" designation and a 3.75 for "dean's honor roll." Official notification of these designations will be issued to the student by the dean of the student's college. The hours earned with a grade of S shall not be included in determining minimum hours required for the designation of "distinguished student" or "dean's honor roll." A grade of I or U disqualifies a student from being considered as a "distinguished student" or for the "dean's honor roll." Grades of Q, W, and NG may not be included in the 15 graded hours. Only undergraduate courses or graduate courses used for the undergraduate degree will be used in either calculation.

Scholastic Probation

Scholastic probation is conditional permission for an undergraduate student to continue in the University after he or she has become scholastically deficient. For university policy regarding scholastic deficiency and scholastic probation, see the Texas A&M University Student Rules (<http://student-rules.tamu.edu>).

Withdrawal from the University

An official withdrawal from the university will result when a student drops all in progress and courses not yet started in a particular term. A student who withdraws from the university before the completion of a semester or summer term is required to comply with the official

withdrawal procedure. This process is initiated by submitting a request in the Howdy portal. Students may not withdraw after the Q-drop deadline. The student's dean will retain the authority to support a student withdrawal after the deadline.

If a student is enrolled in one or more inter/intra-session ("minimesters") or summer sessions and chooses to withdraw, all current and future in-progress courses for the entire semester will be dropped. The student will be ineligible to register for courses for the remainder of that semester.

For university policy regarding withdrawal, see the Texas A&M University Student Rules (<http://student-rules.tamu.edu>).

Official University Communications

Texas A&M may use email for official communications. It is each student's responsibility to claim their Texas A&M University email account (<http://gateway.tamu.edu>) and to check that account on a frequent and consistent basis.

Correct Addresses

It is necessary to have a correct mailing address on file with the University. Students may change their address in Howdy. International students must have a correct physical and permanent address.

Grading System

Because students attend a college or university to extend their education, grades are usually given as an indication of the proficiency of their endeavors. The student's semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination, as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.

The basis upon which the final grade will be determined shall be distributed in written form to the class during the first class meeting.

There are five passing grades at the undergraduate level, A, B, C, D and S, representing varying degrees of achievement; these letters carry grade points and significance as follows:

A	Excellent, 4 grade points per semester hour
B	Good, 3 grade points per semester hour
C	Satisfactory, 2 grade points per semester hour
D	Passing, 1 grade point per semester hour
F	Failing, no grade points, hours included in GPA calculation
I	Incomplete, no grade points, hours not included in GPA calculation
NG	No grade, grade removed from record, no grade points, hours not included in GPA calculation
Q	Course dropped with no penalty, no grade points, hours not included in GPA calculation
S	Satisfactory (C or above), no grade points, hours not included in GPA calculation

U	Unsatisfactory (D or F), no grade points, hours included in GPA calculation
X	No grade submitted, no grade points, hours not included in GPA calculation
W	Withdrew, no grade points, hours not included in GPA calculation (effective Spring 1996)
F*	Aggie Honor Code violation, no grade points, hours included in GPA calculation
U*	Aggie Honor Code violation, no grade points, hours included in GPA calculation

There are two failing grades, U and F, indicating work of unsatisfactory quality.

Repetition of a Course to Improve Grade

Any undergraduate student who wishes to repeat a course must do so before they complete a more advanced course in the same subject. What constitutes a more advanced course will be determined by the head of the department offering the course.

Credit for a course failed may be obtained only by registering for and repeating the course. The original grade will remain on the student's permanent record, and both grades will be used in computing the GPA. An F or U previously earned is not removed once the course is passed. Credit for each repeated course may only be used once toward degree requirements.

A student repeating a course completed at Texas A&M in which a grade of B or better has been earned will not receive grade points for the repeated course, unless the catalog states the course may be repeated for credit.

I and X Grades

A temporary grade of I (incomplete) at the end of a semester or summer term indicates that the student has completed the course with the exception of a major quiz, final examination or other work. The instructor shall give this grade only when the deficiency is due to an excused absence or other cause beyond the control of the student.

The remaining work must be completed in accordance with excused absence rules. See Student Rule 7 (<https://student-rules.tamu.edu/rule07/>). The instructor shall resolve the I grade before the last day of scheduled classes of the next fall or spring semester in which the student enrolls in the University unless the student's academic dean, with the consent of the instructor (in the absence of the instructor, the department head), grants an extension of time for good reason. If the incomplete grade is not resolved within this time or if the student registers for the same course again, the I will be changed to an F by the Office of the Registrar.

The X notation is assigned to a course by the Office of the Registrar at the end of a semester or summer term only when a grade is not submitted by the instructor. The Office of the Registrar will notify the dean of the college in which the course is taught that an X notation has been made. The dean of the college offering the course will request, through the department head, that the instructor submit a Grade Change

Request online in Howdy, removing the X notation and assigning a grade. The instructor will have 30 days from the beginning of the succeeding semester or summer term to report a change of grade to the Office of the Registrar. If a Grade Change Request is not received during this time period, the Office of the Registrar will automatically remove the X notation and assign a grade of F.

Q-Drop, Add and Drop

1. A student may enroll in a class during the first five class days of a fall or spring semester or during the first four class days of a summer term. A student requesting to add a course after these deadlines must have the approval of the student's dean or designee and department.
2. A student may drop a course with no record during the first 12 class days of a fall or spring semester and during the first four class days of a summer term. Following this period, if approved by the dean of the college or their designee, a student may drop a course without penalty through the 60th class day of a fall or spring semester, the 15th class day of a summer term or the 35th class day of a 10-week summer semester. The symbol Q shall be given to indicate a drop without penalty.

Under section 51.907 of the Texas Education Code, "an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education." Any course that a student drops is counted toward the six-course limit if "(1) the student was able to drop the course without receiving a grade or incurring an academic penalty; (2) the student's transcript indicates or will indicate that the student was enrolled in the course; and (3) the student is not dropping the course in order to withdraw from the institution." Some exemptions for good cause could allow a student to drop a course without having it counted toward this limit, but it is the responsibility of the student to establish that good cause. Undergraduate students at Texas A&M will normally be permitted four Q-drops during their undergraduate studies. However, in order to comply with this statute, a student who has dropped courses at other Texas public institutions may not be permitted four Q-drops if the student's total number of dropped courses would exceed the State limit of six.

3. Any course taught on a shortened format or between regularly scheduled terms will have add/drop, Q-drop and withdrawal dates proportionally the same as if the course were offered in a regular term. These dates will be determined by the Office of the Registrar.
4. After the Q-drop period has elapsed, a course may be dropped and a grade of W recorded if the student's dean determines that unusual circumstances exist to warrant a late drop.

Satisfactory/Unsatisfactory

Undergraduate students may be permitted to take courses in their degree programs at Texas A&M on a satisfactory/unsatisfactory (S/U) basis consistent with the requirements of the student's college. The hours for which a student receives a grade of satisfactory shall not be included in the computation of the student's semester or cumulative GPA; a grade of unsatisfactory shall be included in the computation of the student's grade points per credit hour as an F. A grade of satisfactory (S) will be given only for grades of C and above; a grade of unsatisfactory (U) will be given for grades D and F. The hours earned on a satisfactory/unsatisfactory basis shall not be included in the designation of distinguished student or dean's honor roll.

Students on probationary standing may be required to take electives on an S/U basis as determined by published college policies.

Students must register for courses on an S/U basis during the official registration periods and shall not be permitted to change the basis on which their grades will be recorded on their official transcripts, except for unusual circumstances and with the approval of the student's academic dean.

Students registered for KINE 199 who wish to change the grade type from a graded course to S/U or from S/U to a graded course, may do so in Howdy. All requests for KINE 199 changes must be completed on or before the Q-drop deadline for the fall, spring or summer semester.

Grade Point Average (GPA)

Only the grade earned in coursework for which the student was registered in this institution shall be used in determining his or her grade point average. Students anticipating graduating with honors should refer to that section of this catalog for information concerning the computation of grade point averages for that purpose.

A student's grade point average for any period shall be computed by dividing the total number of semester hours for they received grades into the total number of grade points earned in that period. Semester credit hours to which grades of F or U are assigned shall be included; those involving grades of W, Q, S, X, I, and NG shall be excluded.

Classification

Classification for academic purposes shall be based solely on scholastic progress as shown by the official records in the Office of the Registrar. Sophomore, junior and senior classification will be granted students who have passed 30, 60 and 90 semester hours, respectively.

Grade Reports

Mid-semester Report

Near the middle of the fall and spring semesters, a preliminary report, showing the current progress of undergraduate students who have completed less than 30 semester credit hours of coursework at Texas A&M, and of a selected group of other students that the academic deans/departments are monitoring, will be made available. Preliminary grades are not recorded on the student's permanent record. Grades are available in Howdy.

Final Grade Report

End of semester final grades are available in Howdy. No student grade may be posted in a manner that is personally identifiable unless the student has given written consent in advance.

Parent/Guardian Access to Grades

A parent or guardian may access midterm and final grades in Howdy after the student sets the parent access password. The Office of the Registrar cannot access the passwords created by students for parental access.

Semester Credit Hour

A lecture course which meets one hour per week for 15 weeks is worth 1 semester credit hour. Thus, a course worth 3 semester credit hours meets three hours per week. Credit hours for laboratory courses are determined to be some fraction of the number of hours spent in class.

For further information, see Texas A&M University Rule 11.03.99.M1 Definition of a Credit Hour (<https://rules-saps.tamu.edu/PDFs/11.03.99.M1.pdf>), which complies with the Texas Higher Education Coordinating Board definition of minimum course lengths as part of the Texas Administrative Code, "Minimum Length of Courses and Limitation on the Amount of Credit that a Student May Earn in a Given Time Period." For more information, please see the Texas Administrative Code online (<https://www.sos.state.tx.us/tac/index.shtml/>).

Transcripts

Students applying for admission to Texas A&M are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admission forms will be grounds for disciplinary action.

Individuals who have attended the University may obtain an official transcript of their work. A fee will be charged for each copy. During grading and degree posting, official transcripts may be produced for enrolled students only after all courses for that semester or term have final grades processed. Students and former students may submit a Transcript Request Order form in person or online through the Myhub portal for the National Student Clearinghouse. Transcript requests will not be accepted over the phone. A transcript request ordered through the Myhub portal must be paid by using a credit card from a United States bank. Requests made in person may be paid with check, money order or a credit card.

Housing

Student Life - Off Campus Student Services

The Bryan-College Station community offers a variety of options for living off campus. Student Life provides resources and information to students preparing to or currently living off campus. Students are encouraged to stay informed about best practices for living off campus, whether you are new to living off campus or continuing off campus. Being a good neighbor means staying informed and complying with city rules and community standards. Frequent city code violations include:

- Occupancy -#Per city ordinance, no more than four unrelated individuals can reside in a single-family home. So, remember me +3 before you sign a lease.
- Noise -#Community ordinances are clear that it is unlawful for anyone to engage in "loud noise" that, because of its volume level, duration, or character, annoys, disturbs, injures, or endangers the comfort, health, peace, or safety of reasonable persons of ordinary sensibilities within the limits of the city, especially during the hours of 10 p.m. to 6 a.m.
- Trash -After collecting trash, tenants have 12 hours to remove the sanitation container from the street.
- Parking -Not following parking rules could result in a parking violation or an emergency vehicle being unable to access someone in need. Do your part in being a good neighbor and ensure you know parking guidelines.

There are plenty of options to live in the Bryan/College Station community. AggieSearch is a fully searchable database that allows students, parents, faculty, staff and guests to find off-campus housing that meets their needs. AggieSearch to learn more.

Securing your new place in Aggieland means signing a lease. Reading and understanding the lease is critical before signing a lease. Leases are legally binding in Texas, and there are minimal means to get out of the lease. Remember these key tips before signing a lease:

- Read everything.
- All requests should be put in writing.
- Keep a copy of everything.
- Don't be afraid to ask questions.

#To learn more about off-campus living, visit the Student Life website.

Pay By Semester Housing: Residence Halls and White Creek Apartments

<http://reslife.tamu.edu>

Admission to the University is required prior to apply for campus housing.

Undergraduate students can apply for campus housing online. Applications should be completed as soon as possible following admission since the date of application for housing is important in the housing assignment process. An application fee is required at the time of application.

On-campus housing is assigned on a first-come, first-served basis. With the exception of the Corps of Cadets, students are not required to live on campus at Texas A&M.

University Apartments (The Gardens Apartments)

<http://reslife.tamu.edu/apartments>

Available for graduate students, married students, students with dependent children, international students, U.S. military veteran students, or undergraduate students who are sophomores, juniors, seniors or non-traditional first year students.

Fully furnished one- and two-bedroom units are available. Rent for The Gardens is paid monthly and includes furniture, parking, cable TV service, high-speed internet, and all utilities. Electricity charges are covered up to \$125 per apartment; any amount over \$125 will be billed to the residents of the apartment. All leases are either 9 1/2- or 12-month leases.

Application forms, rental rates and additional information may be obtained online at <http://reslife.tamu.edu/apartments>.

Orientation

New Student Conferences

<http://newaggie.tamu.edu>

- New Student Conferences are held each year for undergraduate students entering Texas A&M University. New students are required to register for and attend a conference in order to accept their offer of admission and register for classes.
- During the conference, new students learn about valuable university services and meet with academic advisors for curriculum advising and selection of first-semester courses.

Additional services and programs from Student Life - New Student and Family Programs:

- Howdy Week: Aggieland's Official Welcome (<https://howdyweek.tamu.edu/>) - held each fall and spring
- Aggie Parent and Family Programs (<http://familyprograms.tamu.edu>) - support and outreach including a family communication portal open to all Aggie families
- Family Weekend (<http://familyweekend.tamu.edu/>) - held each spring to honor and celebrate family members as they support their Aggie student
- Supervision and advising of Aggie Orientation Leaders (<https://newaggie.tamu.edu/studentleadership/ol/>) and Aggie Parent and Family Ambassadors (<https://familyprograms.tamu.edu/apfa/>)
- Publications for incoming students and family members

Extended Orientation

Excellence uniting Culture, Education, and Leadership (ExCEL)

<https://excel.tamu.edu/>

Excellence uniting Culture, Education, and Leadership (ExCEL) is a recognized student organization designed to help new students find academic, social, and personal balance at Texas A&M by fostering a community where they can holistically connect to campus. Since 1984, ExCEL has assisted new Aggies in making a smooth transition to campus by orienting them to the program through a conference, cultivating relationships between peers and mentors, providing a sense of social belonging, offering academic and personal support, and serving as a resource for transitioning into Aggie life.

ExCEL launches with the ExCEL Conference in the fall. During the conference, students become familiar with the year-long program, upper-class peer mentors, a peer group, and fellow freshmen. The conference consists of motivational speakers, dialogue within peer groups, sessions focused on personal development, and meet and greet activities. Following the conference, academic, social, and community development activities begin through the close of the spring semester.

ExCEL is student-run and information can be obtained by contacting excel@tamu.edu.

Fish Camp

<http://fishcamp.tamu.edu>

Fish Camp is an extended orientation program designed to provide incoming freshman the opportunity to establish relationships, meet student leaders, become familiar with Aggie traditions, the core values, and learn about campus life at Texas A&M. Held during a three-week period preceding the Fall semester, each three-day, two-night session is designed to aid students with the transition from high school to college and, particularly, to Texas A&M.

Peer counselors, as well as faculty and staff, speak on topics such as student involvement, academic and campus resources, personal development, community-building, and traditions. In addition to providing educational programs, large-group activities, and small group discussions, Fish Camp allows students to get to know each other through recreation, free time activities, and evening social programs. Participants of Fish Camp will have the opportunity to continue gathering with their camps and small groups through different activities and events

during the Fall semester. For more information on Fish Camp and to learn how to register, please visit our website.

Howdy Camp

<http://atc.tamu.edu>

Occurring in early January, Howdy Camp is a three-day, two-night extended orientation program for undergraduate students entering Texas A&M in the spring semester. Peer counselors, as well as faculty and staff, speak on topics such as student involvement, academic and campus resources, personal development, Texas A&M Core Values, and university traditions. In addition to providing educational programs, staff also lead large-group social activities and facilitate conversations within small discussion groups.

After camp, counselors and other staff will support students by providing support and helping students locate campus resources and opportunities to get involved during their first semester at Texas A&M. Program staff will also plan activities for the camps and small discussion groups throughout the spring semester.

For more information on Howdy Camp and how to register for a session, please visit the ATC website listed above.

Transition Camp (T-Camp)

<http://atc.tamu.edu>

Held annually in August, T-Camp is a three-day, two-night extended orientation program for undergraduate transfer and other non-traditional students entering Texas A&M in the summer and fall semesters. Peer counselors, as well as faculty and staff, speak on topics such as student involvement, academic and campus resources, personal development, Texas A&M Core Values, and university traditions. In addition to providing educational programs, staff also lead large-group social activities and facilitate conversations within small discussion groups.

After camp, counselors and other staff will support students by providing support and helping students locate campus resources and opportunities to get involved during their first semester at Texas A&M. Program staff will also plan activities for the camps and small discussion groups throughout the fall semester.

For more information on T-Camp and how to register for a session, please visit the ATC website listed above.

Venture Camp Programs

<https://recsports.tamu.edu/programs/outdoor-adventures/venture-camp/>

The Extended Orientation Team in the Department of Student Activities has partnered with the Outdoor Adventures Program in the Department of Rec Sports to welcome first year students, transfer students, and other undergraduate student populations through the Venture Camp Programs. Program offerings change from year to year depending on various factors, so we recommend you visit our website to learn more about the programs available each year. Past programs have included 9 day backcountry backpacking trips in Eastern New Mexico, weeklong paddling trips along the Buffalo River in Arkansas, as well as a weeklong base camp program where participants will stay in a common location at night and take part in different activities like rock climbing, hiking, and paddling each day. On all of our programs, participants can expect to meet other incoming students, current students and staff, learn about the traditions and core values of Texas A&M, hear about campus resources to

help them in their transition to Texas A&M, and to challenge themselves in new ways through different activities.

Previous outdoor experience is not required for any of these programs, but a willingness to be an active participant and a team player is very important!

To learn more about these programs and how to register, please visit our website listed above.

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University.

Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees
- Demand high academic standards from all members of the Aggie community
- Actively promote academic integrity
- Confront instances of academic misconduct through engagement in the Aggie Honor System Office rules and procedures

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

"An Aggie does not lie, cheat or steal, or tolerate those who do."

Upon accepting admission to Texas A&M University or one of its branch campuses, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The website, <http://aggiehonor.tamu.edu>, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations — 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations — Ethics in Research, Scholarship and Creative Work — 15.99.03 (<https://www.tamus.edu/legal/policy/policy-and-regulation-library/>), and Texas A&M University rules and standard administrative procedures — Responsible Conduct in Research and Scholarship — 15.99.03.M1, 15.99.03. M1.01-06 (<http://rules-saps.tamu.edu/TAMURulesAndSAPs.aspx#15>)).

Contact information for each campus can be found at the following:

- Texas A&M University website - <http://aggiehonor.tamu.edu>
- Texas A&M at Galveston website - <https://www.tamug.edu/HonorSystem/>
- Texas A&M at Qatar website - <https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system/>

Aggie Honor System Office

<http://aggiehonor.tamu.edu>

All Texas A&M students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code: "An Aggie does not lie, cheat or steal, or tolerate those who do."

Upon accepting admission to Texas A&M University, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Aggie Honor System Office (<http://aggiehonor.tamu.edu>). Students may be required to state their commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Aggie Honor System Office.

Texas A&M University students are responsible for authenticating all work submitted to an instructor. If asked, students must be able to produce proof that the item submitted is indeed the work of that student.

Students must keep appropriate records at all times. The inability to authenticate one's work, should the instructor request it, is sufficient grounds to initiate an academic dishonesty case.

Office for Student Success

About Us

The mission of the Office for Student Success (<https://studentsuccess.tamu.edu/>) is to advance student success outcomes at Texas A&M University by developing programs and supporting initiatives focused on student retention, achievement, and timely graduation. To all undergraduate, first-generation, and transfer students: we are your advocates.

Initiatives

- Academic Advising (<http://tx.ag/OSSadvising/>): Our office helps undergraduate students stay on track for graduation through in-person and virtual advising sessions. Students can ask questions through our Student Success Help Desk (<https://studentsuccess.tamu.edu/academic-advising/student-success-help-desk/>) and find their academic advisors through Find My Advisor (<https://studentsuccess.tamu.edu/academic-advising/for-students/find-my-advisor/>). We also provide leadership for Academic Advisor Career Development at Texas A&M University through training and professional development for undergraduate academic advisors.
- Hullabaloo U (<http://tx.ag/OSSFYE/>): Texas A&M's first-year experience course is designed to help freshmen make a successful transition to Aggieland. Each 25-student section meets for 50 minutes a week with their faculty/staff instructor and student peer mentor to discuss topics such as adjusting to college life, taking advantage of campus resources, and developing skills to achieve personal, academic and career goals. First-year students will learn more about Hullabaloo U at their New Student Conference (<https://newaggie.tamu.edu/>).
- The Routh First-Generation Center (<https://studentsuccess.tamu.edu/routh-first-gen-center/>): The Routh First-Generation Center supports all first-generation students at Texas A&M University through high-impact experiences, student involvement opportunities, and a Gen1 Learning Community. First-gen students – students whose parents or guardians have not earned a bachelor's degree – are invited to visit the Routh First-Generation Center Lounge and get involved with our staff, resources, and events throughout their time at Texas A&M. More than 20% of Texas A&M students are first-generation and we believe that should be celebrated!
- Transfer Student Program (<http://tx.ag/OSSTransfers/>): Students transferring to Texas A&M University can find resources and support from the Transfer Student Program (TSP). TSP helps transfer students get connected with a community. TSP hosts transfer peer mentorship, a Transfer Connection Workshop series, academic and social programming, and so much more! Visit us in the Transfer Village (Hotard Hall) to get involved.
- Navigate Student (<https://studentsuccess.tamu.edu/eab-navigate-for-students/>): Make every semester count with the Navigate Student app! Designed to get you from NSC to graduation, students can view their class schedule, explore campus resources, schedule advising appointments, keep up with deadlines, and much more. Available in the App Store and Google Play.

More Information

The Office for Student Success is located in Hotard Hall – across the street from Northside Garage. Visit studentsuccess.tamu.edu (<https://studentsuccess.tamu.edu/>) or email us at studentsuccess@tamu.edu for more information about our office, mission, and initiatives. Follow us on Instagram (<https://www.instagram.com/tamuoss/?hl=en>), X (<https://twitter.com/TAMUOSS/>), YouTube (<https://www.youtube.com/channel/UCF55VU8Tb6Gqepwk-SNAerg/>), and Facebook (<https://www.facebook.com/TAMUOSS/>) for student success news, stories, and events on campus.

Services for Students

Academic Advising

Academic advising is an interactive partnership between a student and an academic advisor. Through teaching and learning experiences, the student sets goals, acquires information and services to make decisions consistent with interests, goals, abilities and degree requirements.

Academic advising at Texas A&M University is an important component of student learning and degree completion, contributing to the academic success of all students through:

- Supporting student achievement of the University Learning Outcomes and commitment to lifelong learning
- Being responsible to and respectful of the individual student
- Encouraging commitment to lifelong learning by directing students toward opportunities to interpret, reflect upon, and apply their classroom experiences in ways relevant to their careers and their lives
- Interpreting and conveying Texas A&M University's mission to students

- Supporting the educational policies, procedures and values of the department, college and university; likewise, academic advising relies on the support and resources of the university, college and department
- Involving other university programs, services and individuals, when appropriate in the advising process
- Being responsible for professional academic advising, training, development and practices to ensure knowledge and skills stay relevant.

Academic Success Center

The Academic Success Center (<http://asc.tamu.edu>) helps all Aggies achieve their academic goals and fulfill their academic potential. We provide exceptional quality academic support services and resources in a welcoming environment, including:

- Success Coaching (<https://asc.tamu.edu/success-coaching/>), personalized meetings with a professional or peer coach to help you improve your academic performance, available in person or online
- Courses and workshops (<https://asc.tamu.edu/strivingforsuccess/courses-workshops/>) on study strategies, time management, motivation, and related topics
- Supplemental Instruction (<http://asc.tamu.edu/Supplemental-Instruction/>) (SI), available in some courses, to be announced by the instructor
- Tutoring (<https://asc.tamu.edu/tutoring/>) online and in-person at Evans Library and Zachry Education Complex
- Texas Success Initiative (<http://asc.tamu.edu/TX-Success-Initiative/>) (TSI) to support students working to fulfill state requirements
- StudyHub (<http://studyhub.tamu.edu>) to help you find academic help on the College Station, Galveston, and McAllen campuses

Also check out the Academic Success Center study and learning handouts (<https://asc.tamu.edu/study-learning-handouts/>) and YouTube (<https://www.youtube.com/channel/UCF55VU8Tb6Gqepwk-SNAerg/>) channel and keep up with our events by following us on Instagram or Facebook. *Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.*

Career Center

The Texas A&M University Career Center provides comprehensive services, programs, and resources to undergraduate, graduate and former students to support you in exploring career opportunities, preparing for the job search, gaining relevant experience, developing professionally, seeking admission to graduate and professional school, and securing professional employment upon graduation. Our goal is to assist you every step of the way, from admission through graduation, and after, as a Former Student. We offer a variety of programs, services and resources:

- Career and Major Exploration, Assessment, and Planning
- Introduction to Career Readiness Goals
- Job Search, Resume Writing, and Interview Preparation Tools
- Professional Networking Resources and Events
- Campus Recruiting for Aggies seeking Full-Time Positions, Internships, Externships, and Cooperative Education
- Assistance with Professional and Graduate School Applications and Interviews

- Presentations to Classes and Student Organizations, Workshops and Panel Discussions, Career Fairs, and Webinars
- Employer, Professional School and Graduate School Contacts
- Individual Appointments, Drop-in Advising, Open Office Hours, Mock Interviews

One of the largest centralized Career Centers in the nation, the Texas A&M University Career Center has been recognized nationally and regionally for our many Best Practices. The Career Center can be found online at careercenter.tamu.edu (<http://careercenter.tamu.edu/>) and is located in the Koldus Building, Suite 209, with additional satellite offices located in Zachry, Wehner, Kleberg, Eller, Nagle, and the Texas A&M Higher Education Center in McAllen.

Department of Multicultural Services

<http://dms.tamu.edu/>

The Department of Multicultural Services (DMS) fosters meaningful student connections to campus through active, intentional, and ongoing engagement programming. The department has a mission to provide multiple developmental experiences to cultivate transition through meaningful social engagement, foster a culture where students can thrive, and develop students' capacities to work productively and collaboratively with others in preparation for an increasingly complex world. DMS connects students to and engages students while on campus with the intent to enhance their overall educational experience.

Located in the Memorial Student Center (MSC), DMS helps meet student connection, transition, collaborative teamwork, and career preparedness needs which all work together to aid in student retention, persistence, graduation, and successful transition into their professional roles. The department maintains a welcoming and engaging environment for all students.

Department of Residence Life

<http://reslife.tamu.edu/>

- Responsible for the operation of on-campus residence halls and University Apartments (White Creek and Gardens Apartments). Summer occupancy of on-campus residence halls is open to undergraduate and graduate students.
- University Apartment units (<http://reslife.tamu.edu/apartments> (<http://reslife.tamu.edu/apartments/>)) are available for graduate students, students with dependent children, veterans, international students, married students or single undergraduate students without children who are sophomores, juniors, seniors or non-traditional freshmen (The Gardens).

Disability Resources

<http://disability.tamu.edu>

- Collaborates with faculty, staff and students to achieve access for students with disabilities.
- Interacts with students to determine reasonable accommodations to remove barriers.
- Facilitates accommodations including (but not limited to): exam accommodations, sign language interpreting and transcription, assistive technology, and classroom accommodations.
- Consults with all campus entities on providing access for disabled students.

Aggie Dining

dineoncampus.com/tamu (<https://dineoncampus.com/tamu/>) | @AggieDining (<https://qrco.de/bcmPal/>)

- By cooking with heart and serving with kindness, the dining program at Texas A&M is like no other! With over 50 dining locations across more than 5,000-acres, you can explore a new menu every day! Our 3 all-you-care-to-eat dining halls offer diverse, made-from-scratch meals with vibrant, global flavors that meet your homecooked expectations. Aggie Dining also offers a variety of retail dining locations – from favorite national brands like Chick-fil-A and Starbucks, to Aggieland favorites like Copperhead Jack's, Rev's American Grill, and Houston Street Subs! For a full map of Aggie Dining locations, visit their website here (<https://dineoncampus.com/tamu/campus-map/>).
- Budget and save while dining on campus with a campus Meal Plan! Aggie Dining offers a variety of meal plan sizes and options to fit every student's lifestyle. Students living both on and off campus can sign up for a campus Meal Plan by visiting the Meal Plan website (<https://mealplans.tamu.edu/Default.aspx?ReturnUrl=%2F>). To learn more about Meal Plans and how they work, please visit Aggie Dining's website (<https://dineoncampus.com/tamu/>).

George H.W. Bush Presidential Library and Museum

<https://www.bush41.org> (<https://www.bush41.org/>)

The George H.W. Bush Presidential Library and Museum at Texas A&M University is dedicated to preserving and making available the records and artifacts of George H.W. Bush, 41st President of the United States.

We promote civic literacy and increased historical understanding of our national experience, and foster a community of public service and volunteerism. We accomplish this mission by offering:

- Rich Educational and Public Programs
- Original Museum Exhibits
- Access to our Archival Holdings
- Research Opportunities
- Special Events
- Unique Volunteer and Internship Positions
- Foundation Memberships

The George H.W. Bush Presidential Library and Museum can be found online at <https://www.bush41.org> (<https://www.bush41.org/>) and is located at 1000 George Bush Drive West, College Station, Texas 77845. For additional information on the resources the George Bush Presidential Library and Museum have to offer please call (979) 691-4000 for all Museum inquiries or (979) 862-2251 for all Foundation or Membership inquiries.

International Student and Scholar Services

<https://global.tamu.edu/iss/>

International Student and Scholar Services (ISSS) is part of the Department of Global Engagement. Established in 2022, Global Engagement spearheads internationalization at Texas A&M by offering collaborative leadership, strategic coordination, and support for the development and sustainability of global programs and services across the university. Learn more at <https://global.tamu.edu/>. International

Student and Scholar Services provides the following support services to international students (defined as students who are not U.S. citizens or lawful permanent residents):

- Pre-arrival information
- Certificates of Eligibility (Forms I-20 and DS-2019)
- New Student Check-in and Resources
- Represent the University with the Department of Homeland Security, including the Student Exchange Visitor Information System (SEVIS), and the Department of State
- Assist students with federal immigration regulation compliance
- Immigration advising
- Liaison for students, university, and community
- International student employment information
- Workshops about immigration benefits
- Provide tax software and resources
- Coordinate with the Texas A&M University System Student Health Insurance Plan provider and students
- Community involvement activities
- Acts as a liaison between the University, sponsors, and sponsored students
- Post-graduation employment support

Math Learning Center

The Math Learning Center (mlc.tamu.edu (<http://mlc.tamu.edu/>)) fosters the academic success of all Aggies by supporting the high-enrollment courses with significant mathematics, statistics, and quantitative reasoning content. Our high quality services, offered virtually and in-person, include:

- Drop-in peer-led tutoring Help Sessions in multiple locations on campus.
- Active-learning sessions for high enrollment courses.
- Workshops on a variety of topics taught throughout each semester.
- Week-in-Review sessions for large enrollment courses led by course instructors.
- Virtual Math Learning Center (vmlc.tamu.edu (<http://vmlc.tamu.edu/>)) for self-paced study through handouts, guided practice problems, and video library.

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Military Education Benefits (Scholarships & Financial Aid)

<https://aggie.tamu.edu>

- The Aggie One Stop assists eligible students and their dependents in securing federal and state veteran/military education benefits and other funding including scholarships and financial aid.

MSC Programs

<http://mscprograms.tamu.edu>

- MSC Programs engages students in purposefully designed campus programs and service opportunities that prepare them to be global leaders. To this end, we are home to 17 recognized student

organizations that enrich the Aggie experience through academic, entertainment, arts, educational, and cultural programs.

- Our programs provide professional, personal, and practical engagement, supporting experiential learning and skill development in budgeting, communication, fund development, team development, program planning, logistics, meeting facilitation, public speaking, and technical skills.
- We offer a variety of interests, including student-curated art exhibitions, weekly concerts, service events, free film screenings, and world-renowned speakers discussing current events. Additionally, we host immersive travel experiences, former student engagement opportunities, and the MSC Jordan Institute for International Awareness.
- Texas A&M's Box Office in Rudder Tower provides ticketing services for student organizations, campus, and community events.

Ombuds Services

The Office of the Vice Provost for Academic Affairs provides Undergraduate Ombuds services to assist students, faculty, staff, and administrators with resolving academic conflicts on an informal and confidential basis. The Ombuds is equally open and accessible to all parties—students, faculty, staff, and administrators—in disputes that may arise when there are differing expectations or conflicting policies regarding academic issues. For more information, please visit <https://us.tamu.edu/ombuds> (<https://us.tamu.edu/ombuds/>). (<http://us.tamu.edu/Students/Undergraduate-Ombuds/>)

What does the Ombuds do?

- Assists members of the university community in solving problems and conflict.
- Serves as a neutral listener, resource, advisor, intermediary, and mediator.
- Considers all sides of a question impartially and objectively.
- Explains established policies and procedures of Texas A&M University.
- Helps visitors develop options for addressing concerns.
- Facilitates communication between students and others involved in an issue.

When would an undergraduate student need an Ombuds?

- There is an issue or a concern that cannot be resolved by the parties involved, or that one or all parties would prefer not to address through formal channels.
- There is a matter that is preferred for handling as “off the record,” or a need for an informal consultation.
- There is a problem and one or more parties are unsure of whom to speak with or what options are available to address it.
- One or more parties feel that a university policy, procedure, or regulation has been applied unfairly, or is itself unfair or ambiguous.
- There is a problem that requires an outside party to negotiate a solution or facilitate your communication with others.

What kinds of concerns could be brought to the Ombuds?

- The Ombuds can assist with any concern, but some of the issues brought to the office typically involve the following:
- Academic-related issues and appeals.

- Concerns about procedural fairness or due process.
- Questions about religious holy days.
- Misunderstandings between students, advisors, professors, or others.
- Communication breakdowns with students, advisors, professors, or others.
- Disagreements with or misunderstandings of university policies or procedures.
- Concerns over retaliation.

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Pregnant and Parenting Student Services

<https://studentlife.tamu.edu/>

Resources for Pregnant and Parenting Students

- **Student Rights and Campus Resources:** A list of frequently asked questions regarding the rights of pregnant and parenting students and some of the on-campus resources available to students.
- **Lactation Rooms on Campus:** Student Life maintains a comprehensive list of lactation rooms across campus. If you need assistance locating specific buildings, visit the Aggie Map. To find lactation rooms, click on “Layers” in the menu and select “Lactation Rooms.”
- **Pre-Registration for Parenting Students:** Students who are the parent or legal guardian of a child under 18 years of age are eligible for pre-registration. Students must complete the self-certify form (<https://studentlife.tamu.edu/support/rightsandresources/#register-parenting-student-registration-self-certification>) to be considered.

Professional School Advising

<http://opsa.tamu.edu>

- Preprofessional advising for Medical, Veterinary, Dental, Physical Therapy, Physician Assistant, Occupational Therapy, Pharmacy and Nursing careers.
- PreLaw Advising Services
- Preprofessional Student Organizations

Recreational Sports

<http://recsports.tamu.edu>

- All currently enrolled Texas A&M students (with some exceptions) are automatically Rec members. All you need is your student ID to utilize the Student Recreation Center, Polo Road Rec Center, Southside Rec Center, Penberthy Rec Sports Complex, and other Rec Sports facilities. Guest passes for visitors are available for purchase. Persons with disabilities are invited to contact Member Services to inquire about accommodations. We encourage individuals to download the Rec Sports app from the Apple App Store and Google Play.
- The Student Recreation Center is Texas A&M Rec Sports' flagship facility. With more than 500,000 square feet of recreation space, the facility offers a variety of areas including an extensive strength and conditioning room, indoor walking/jogging track, handball/

racquetball courts, and indoor courts for soccer, basketball, volleyball, and badminton. It also offers an indoor rock climbing facility, bouldering wall, outdoor basketball and sand volleyball courts, dance/activity rooms, free day-use lockers, locker rooms, and a world-class natatorium featuring a dive pool, lap pool, instructional pool, and the Cain outdoor pool. Facilities may be used on a drop-in basis except when reserved for classes or university functions.

- The Southside Rec Center, located on Bizzell Street adjacent to the Texas A&M Golf Club and across from the Southside Residence Halls, is approximately 60,000 square feet of indoor recreational space with an additional 15,000 square feet of outdoor space. It features strength and conditioning areas, fitness room, multi-purpose courts, a bouldering wall, outdoor sand volleyball courts, a large outdoor turf area, free day-use lockers, and locker rooms.
- The Polo Road Rec Center, located on Polo Road near University Drive, is approximately 28,000 square feet with a large strength and conditioning space that includes an indoor turf area, a multipurpose room for group fitness classes, free day-use lockers, and locker rooms.
- The Penberthy Rec Sports Complex, located on both sides of George Bush Drive, features artificial turf playing fields, natural grass fields, softball fields, a covered pavilion, and equipment checkout.
- Rec Sports also offers aquatics classes, group exercise and specialty classes, boot camps, personal and small group training, intramural sports, sport clubs, and outdoor adventures.

Student Activities

<http://studentactivities.tamu.edu/> (<https://studentactivities.tamu.edu/>)

The Department of Student Activities fosters and supports leadership, learning, and involvement opportunities that enhance the growth and development of students and recognized student organizations. As members of the university community, we are committed to a philosophy of shared responsibility that develops leaders of character dedicated to serving the greater good, and we subscribe to the Texas A&M core values of Respect, Excellence, Leadership, Loyalty, Integrity, and Selfless Service. We are committed to helping Aggies develop in ways, both in and out of the classroom, preparing them for life beyond Aggieland. In doing so, Student Activities offers opportunities to lead, serve, participate in campus traditions, represent student voice, and make an impact at Texas A&M. The perks of getting involved on campus range from reaching leadership potential to networking with administrators and potential employers, to forming lasting friendships.

Student Assistance Services

<http://studentlife.tamu.edu>

Student Assistance Services (SAS) connects students with guidance, resources, and support for personal and academic matters. SAS serves as an initial point of contact for information on various topics. Common issues supported by Student Assistance Services include referrals, resource connections, food insecurity, crisis support including medical emergencies, behavior follow-up, student absence notifications, Silver Taps, student death, and transition-related concerns.

Student Conduct Office

<https://studentconduct.tamu.edu>

The Student Conduct Office encourages the development and well-being of all students. This is accomplished by promoting reflection,

fostering accountability, and educating students and campus partners on individual rights and responsibilities within the university community.

The Student Conduct Office offers educational presentations and workshops, including the Ethics and Decision Making Workshop (<https://studentconduct.tamu.edu/edm/>) and hazing prevention and education programs (<https://studentconduct.tamu.edu/stophazing/>), in addition to responding to cases of alleged student rule violations and referring students to appropriate resources.

The staff in the Student Conduct Office are available for consultation on conflict resolution and student behavioral concerns. Staff are also available for presentations upon request.

Student Legal Services

<http://studentlife.tamu.edu>

Student Legal Services provides free legal advice and assistance to students. They cover various topics, including landlord/tenant disputes, criminal law, expunctions, automobile accidents, traffic tickets, and consumer protection. Additionally, notary services are available as well as mediation services to help students resolve conflicts.

Student Life

<http://studentlife.tamu.edu/>

Student Life strives to enhance your opportunities as a student to participate fully in the university experience. We do this by providing students with information, services, programs, and involvement opportunities that facilitate responsible life choices and promote awareness of themselves and their community. Each of the program areas within Student Life has a specific mission, but one common goal: to provide education, outreach, and support to you.

Specific services and programs offered include:

- Alcohol and Other Drug Education
- Graduate and Professional Student Government
- Interpersonal Violence Prevention
- New Student and Family Programs
- Off Campus Student Services
- Pregnant and Parenting Student Services
- Student Assistance Services
- Student Legal Services
- Student Media (The Battalion and #Aggieland#yearbook)

Student Media

<https://studentlife.tamu.edu/> (<http://studentlife.tamu.edu/studentmedia/>)

- Student Media produces national, award-winning publications: *The Battalion*, the *Aggieland* yearbook and the *Maroon Life* magazine. All three are written, edited and produced by students and offer excellent opportunities to gain valuable experience for journalistic and related careers.
- *The Battalion*, Texas A&M's student newspaper since 1893, typically is printed weekly on Thursdays during the fall and spring and every other week during the summer sessions. Around finals and holidays, the delivery days may be changed. It is distributed to students, faculty and staff on campus and at many apartments and other high

traffic areas in College Station. *The Battalion* is also available online and on mobile devices at thebatt.com. (<http://www.thebatt.com/>)

- *Aggieland*, which dates back to 1895, is distributed in the fall but is a year-round project documenting school activities. It is one of the nation's largest college yearbooks.
- *Maroon Life* is published five times during the school year with New Students' Guide to Aggieland (distributed at New Student Conferences), Fall Sports Preview, Best of Aggieland (winter distribution), Spring Sports Preview and Housing Guide (Family Weekend) editions.

The Association of Former Students

www.AggieNetwork.com

For more than 145 years, The Association of Former Students has supported programs, provided resources and cultivated experiences for Texas A&M University and Texas Aggies. The Association strives to be the premier alumni association and is the oldest organization serving Texas A&M in support of the ever-growing Aggie Network. Part of our mission is promoting the welfare of Texas A&M and serving the student body.

In 2024, The Association provided \$16.1 million in support and services to Texas A&M University and the Aggie Network, including \$6.1 million in cash support for academic programs and scholarships, student activities and faculty, staff and student recognition, and another \$10 million for engagement programs and facilities supporting current and former students.

Current student opportunities include:

- **Aggie Ring Day** – Multiple times a year, thousands of Aggies, family and friends gather at the Clayton W. Williams, Jr. Alumni Center to celebrate achieving an academic milestone by receiving their Aggie Rings.
- **Howdy Week GatheRing** – Join classmates at the Williams Alumni Center for free food and take part in the first official on-campus yell practice of the fall semester, with the Texas A&M yell leaders! tx.ag/GatheRing (<https://www.aggienetwork.com/events/gathering/>)
- **1879 Society Ambassadors** – A cohort of student leaders dedicated to selflessly serving The Association and Texas A&M through

fellowship and networking with fellow members of the Aggie Network, as well as building, perpetuating and sharing the Aggie Spirit. tx.ag/1879Ambassadors (<https://www.aggienetwork.com/studentambassadors/>)

- **Student Employment** – Explore a wide variety of student positions available at The Association of Former Students. tx.ag/AssociationJobs (<https://www.aggienetwork.com/theassociation/employment.aspx>)
- **Aggie Park** – Play games, study, listen to live music, catch a fish or just relax on this 20-acre space, which was funded through private donations raised by The Association. tx.ag/AggiePark (<https://aggiepark.tamu.edu/>)

Another pillar of The Association's mission is to strengthen the bonds that connect Aggies with each other and the university. Through generous gifts, The Association cultivates experiences for the Aggie Network by providing resources and supporting programs like Aggie Muster, A&M Clubs, Class activities, Constituent Networks, Traveling Aggies, Young Alumni, Reunions, Distinguished Alumni Gala, Find An Aggie and *Texas Aggie* magazine.

Transportation Services

Transit

The university operates an on- and off-campus transit system that can be used by anyone on campus, fare-free. The off-campus transit system serves most of the major apartment complexes and housing areas in College Station, as well as the Blinn College Campus and RELIS Campus.

All transit services are included in student registration fees and do not require a bus pass, however, passengers are required to present their Texas A&M, Blinn, or Brazos Transit District (BTD) ID when boarding at off-campus stops. Members of the general public possessing a Brazos Transit District ID may ride both on- and off-campus bus routes. In addition, students may ride The District (<http://btd.org/>) buses fare-free by showing their IDs upon entering the bus. For BTD bus route information, visit <http://btd.org> (<http://btd.org/>).

For updates about transit routes, subscribe to the RSS feed at <https://transport.tamu.edu/about/rss.aspx> or follow @aggiespiritbus (<http://twitter.com/aggiespiritbus/>) on X. For transit information, including maps and leave times, visit <https://transport.tamu.edu/transit.aspx>.

Parking

Those who choose to bring a vehicle to campus are required to purchase a parking assignment (virtual permit) or pay-by-the-hour to park in designated visitor areas. (Download the Parkmobile app, available on the AppStore, Google Play, or Windows Store, or those without a smartphone may use the mobile web app at <https://parkmobile.io/>.) See also Optional Campus Services (<https://catalog.tamu.edu/graduate/tuition-fees-financial-information/optional-campus-services/>).

Parking is at a premium on Texas A&M's campus; MOST customers are not assigned their first choice for parking. Often the available parking may not be immediately adjacent to your building or facility. Students may register for parking at <https://transport.tamu.edu/parking/faqpermit.aspx> (<http://transport.tamu.edu/parking/faqpermit.aspx>) or sign up for the wait lists at <http://transport.tamu.edu/account> (<http://transport.tamu.edu/account/>). To get the best parking available, register online by the July 7 priority deadline.

For updates about parking, traffic, and construction, subscribe to the RSS feeds at <https://transport.tamu.edu/about/rss.aspx> (<http://transport.tamu.edu/about/rss.aspx>) or follow @TAMUTransportation

(https://en-gb.facebook.com/tamutransportation/?ref=page_internal) on Facebook and Instagram.

For more information about parking or to view Parking Rules and Regulations, visit <https://transport.tamu.edu/Parking/regulations.aspx>.

Bicycles

Bicycles are a great way to get to, from, and around campus. Bike services include the bike share program, bike lease program, borrow-a-bike, bike registration, summer bike storage, and maintenance stations.

For more information visit <https://transport.tamu.edu/Alternative/bicycles/services.aspx>.

Alternatives

Don't have a car? There are plenty of alternatives, including carshare, rideshare, and break/weekend shuttles to major Texas cities. For more alternative transportation options, visit <http://transport.tamu.edu/alternative> (<http://transport.tamu.edu/alternative/>).

University Center and Special Events (UCEN)

<http://ucenter.tamu.edu/>

- University Center and Special Events features a variety of special event and meeting spaces, as well as theatrical production spaces. Our venues are ideal for student, academic, administrative, corporate, social, non-profit and arts-related events. Our spaces include: the Memorial Student Center, Rudder Theatre Complex, J. Earl Rudder Tower, Koldus Building, All Faiths Chapel, and designated outdoor spaces including Aggie Park. We also provide services in any approved facility of your choosing.
- When it comes to planning events on campus, visit the University Center and Special Events office on the 2nd floor of Rudder Tower. Our staff can assist you with reservations in any of the UCEN facilities as well as help in all aspects of planning meetings, socials or conferences. The highly skilled staff arranges event set ups; provides and operates audio/visual equipment, electricity, lighting and event staging; and assists with many of the other support details that are essential to a successful event.

University Health Services

<https://uhs.tamu.edu> (<https://uhs.tamu.edu/>)

University Health Services empowers Texas A&M students through integrated care that supports their physical and mental health. As part of Texas A&M Health—the university's comprehensive health science center—our clinicians provide the highest level of care in medicine, counseling, psychology and emergency medical services that fosters students' academic, personal and professional success.

- Counseling and Mental Health Care
 - Individual, crisis, couple and group counseling
 - Mental health assessments
 - Learning disability/ADHD screenings
 - Alcohol and other drug services
 - Workshops
 - Self-help resources
 - Career counseling and exploration

- TELUS Health Student Support app: (<https://uhs.tamu.edu/mental-health/student-support.html>) 24/7 access to professional counseling in multiple languages via phone or chat, all free and confidential
- Emergency Medical Services
 - Emergency response via 911 dispatch

University Writing Center

The University Writing Center (<http://writingcenter.tamu.edu>) helps Aggies improve their writing and public speaking. We offer the following resources:

- In-person, Zoom, and email consultations on writing and public speaking projects – Make an appointment (<https://writingcenter.tamu.edu/make-an-appointment/>) with a trained peer consultant to get feedback on your writing (papers, lab reports, resumes, cover letters, application essays, articles, or creative pieces) or speaking (speeches, presentations, English conversation practice, or research posters) during any stage of the creative process.
- Online writing and speaking guides (<https://writingcenter.tamu.edu/writing-speaking-guides/>) – resources include print, audio, and video help for writers and public speakers. Or watch videos on our YouTube channel (<https://www.youtube.com/user/tamuwritingcenter/>).
- Workshops and studios (<https://writingcenter.tamu.edu/faculty-advisors/request-a-workshop-or-studio/>) on writing and public speaking – Available for classes or organizations.

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Veteran and Military Students at Texas A&M

- Office of Military Admissions – Military Admissions Counselors are housed in the VRSC to assist prospective and current veterans and military students with the undergraduate admission process, military withdrawals/re-enrollments, and readmission process. Military Admissions | Texas A&M University - Admissions (<https://admissions.tamu.edu/connect/connect-with-an-advisor/military-admissions/>)
- The Don & Ellie Knauss Veteran Resource and Support Center (VRSC) offers resources, services, and a dedicated space for veteran and military students at Texas A&M. Our center features a lounge and kitchen, study spaces w/ innovative technology, and open access labs. <http://aggieveterans.tamu.edu> (<http://aggieveterans.tamu.edu/>)
 - Veteran Aggie Leaders for Outreach, Research and Resources (VALOR²) – Peer veteran and military student leaders engage with incoming and current students to facilitate continuous, real-time feedback on experiences, and connect them with valuable programs and area resources to facilitate individual student success. (<http://aggieveterans.tamu.edu/>)<https://aggieveterans.tamu.edu/valor/>
 - Aggie Veteran Network – A private LinkedIn group that connects veteran and military students (veterans, active duty, Reserve/National Guard) with hundreds of resources and contacts. (<https://aggieveterans.tamu.edu/valor/>)<https://www.linkedin.com/groups/13846895/>
 - Academic and Student Life Support – Numerous programs and partnerships to connect students with academic assistance and student life resources to meet individual needs.
 - Textbook lending library providing free textbook rentals to veteran and military students and dependents.
 - Financial Assistance
 - Over 190 scholarship opportunities available to veteran and military students. <https://aggieveterans.tamu.edu/scholarships/>
 - In addition to scholarships, emergency funding is available for qualifying students through the Division of Student Affairs.
- VA On-Campus Partners
 - VetSuccess on Campus (VSOC) – Connect with our campus VA VSOC Counselor for educational benefit and disability related

inquiries and veteran readiness and employment program support. <https://aggieveterans.tamu.edu/vsoc/>

- VITAL Coordinator – Connect with our Veterans Integration to Academic Leadership (VITAL) coordinator for VA health services and benefit related inquiries, mental health support and connections for counseling and health resources. <https://aggieveterans.tamu.edu/vital-2/>
- First Generation Veteran Leadership Scholars - A learning community for first-generation students who are current or former military. The program is designed to support students academically, mentally, and interpersonally by providing them with the skills and resources they need to be successful as students and leaders.
- Veteran and Military Opportunities for Advanced Credentials/ Education
 - Veteran Coaching Academy <https://veterans-coaching.tamu.edu/>
 - Entrepreneurship Bootcamp for Veterans <https://mcferrin.tamu.edu/program/entrepreneurship-bootcamp-for-veterans/>

Campus Life

The Corps Experience

<http://corps.tamu.edu>

The Corps of Cadets is the largest and most visible student organization at Texas A&M. Known as the Keepers of the Spirit and the Guardians of Tradition, many of Texas A&M's most cherished traditions grew out of the Corps, including Midnight Yell Practice, Aggie Muster and Silver Taps. Currently, over 2,300 young men and women are Corps members.

Most cadet graduates pursue a career in the public and private sector; however, the Corps of Cadets consistently commissions more officers than any institution other than the service academies.

Academic excellence is the top priority of the Corps of Cadets offering scholastic advising and cadet-led support programs as well as access to state-of-the-art academic facilities.

Cadets who pursue non-military careers continue to hone their leadership skills through a rigorous progression of academic leadership courses, applied leadership experiences within the Corps and broader Texas A&M community, and personal development of an Individual Leadership Development Plan. Additional emphasis is given to the development of career readiness competencies of critical thinking, teamwork, professionalism, oral/written communication, career management, digital technology, leadership, and global/intercultural fluency.

The Corps of Cadets offers cadet organizations (The Fightin' Texas Aggie Band, a precision military band; the Ross Volunteers, the official honor guard for the governor of the state of Texas; the Fish Drill Team, a precision drill unit; and Parsons Mounted Cavalry, the only mounted ROTC unit in the United States), ROTC special units (Army's Ranger Challenge Team and Rudder's Rangers, Navy SEAL Platoon, Marine Recon Platoon and the Air Force's Arnold Air Society) and advanced course ROTC contracts.

Department of Multicultural Services

<http://dms.tamu.edu>

The Department of Multicultural Services fosters meaningful student connections to campus through active, intentional, and ongoing

engagement programming. The department has a mission to provide multiple developmental experiences to cultivate transition through meaningful social engagement, foster a culture where students can thrive, and develop students' capacities to work productively and collaboratively with others in preparation for an increasingly complex world. DMS connects students to and engages students while on campus with the intent to enhance their overall educational experience.

Located in the Memorial Student Center (MSC), DMS helps meet student connection, transition, collaborative teamwork, and career preparedness needs which all work together to aid in student retention, persistence, graduation, and successful transition into their professional roles. The department maintains a welcoming and engaging environment for all students.

Fraternity and Sorority Life (FSL)

<https://studentactivities.tamu.edu/fsl/>

- Housed in the Department of Student Activities, Fraternity and Sorority Life's mission is to provide diverse educational and developmental services that foster an inclusive learning community. We aim to enhance the collegiate experience by supporting opportunities for leadership, academic integration, civic engagement and the creation of fraternal bonds. Our office serves as a liaison between the collegiate chapters, parents, alumni, inter/national organizations, and Texas A&M University. We provide organizational guidance, educational programs, and resources while challenging members to live their fraternal values.
- Fraternities and sororities are a fundamental part of Texas A&M University. We are home to 55+ internationally affiliated or local Greek-letter organizations governed by one of four councils: Collegiate Panhellenic Council (CPC), the Interfraternity Council (IFC), the Multicultural Greek Council (MGC), and the National Pan-Hellenic Council (NPHC). Our fraternities and sororities collectively constitute the largest membership-based and multi-faceted community on campus.
- Representing 11 percent of the undergraduate student population, fraternity and sorority members are committed to their academics, developing and strengthening their leadership skills, volunteering time in the community and continually forming a campus and cultural support network for current and incoming Aggies.

Intercollegiate Athletics

www.12thman.com (<http://www.12thman.com/>)

- Texas A&M is a member of the National Collegiate Athletic Association (NCAA) and the prestigious Southeastern Conference (SEC), which also includes the University of Alabama, University of Arkansas, Auburn University, University of Florida, University of Georgia, University of Kentucky, Louisiana State University, University of Mississippi, Mississippi State University, University of Missouri, University of South Carolina, University of Tennessee and Vanderbilt University.
- Texas A&M sponsors 20 intercollegiate athletics teams. The nine men's programs are football, basketball, baseball, golf, indoor track and field, outdoor track and field, cross country, swimming and diving, and tennis. The 11 women's programs are basketball, cross country, golf, indoor track and field, outdoor track and field, softball, swimming and diving, tennis, volleyball, soccer, and equestrian.

- Texas A&M has won 19 national championships in eight varsity sports, including football, women's basketball, softball, men's indoor track and field, men's outdoor track and field, women's outdoor track and field, men's golf, and equestrian. The Aggies have amassed 25 Southeastern Conference Championships since joining the league in the 2012-13 academic year, and boast some of the most decorated programs across all of intercollegiate athletics.
- Aggie athletes have earned more than 900 All-American selections and hundreds have gone on to successful careers in their respective sports. In addition, Texas A&M has produced a number of Olympic athletes, including a record number of 26 Aggies who competed in the 2020 Summer Olympic Games.
- MISSION: To create opportunities through championship athletics.
- VISION: The HOME OF THE 12TH MAN is the pinnacle in opportunities realized through sport: championships won, diplomas earned, leaders equipped and launched to impact the world.
- CORE VALUES: Respect, Excellence, Leadership, Loyalty, Integrity, Selfless Service

MSC Programs

<http://mscprograms.tamu.edu>

- MSC Programs engages students in campus programs and service opportunities that prepare them to be global leaders. To this end, we provide academic, entertainment, arts, political, and cultural awareness programs that enrich the Aggie experience. Our programming and service opportunities provide next-level professional, personal, and practical engagement that supports experiential learning and skill development in the areas of budgeting, communication, fund development, team development, program planning and logistics, meeting facilitation, public speaking, and technical skills such as running sound for a concert or installing an art exhibit.
- Our programs represent a wide variety of interests including student-curated art exhibitions in the MSC Reynolds Gallery, weekly concerts, service events, free film screenings, and the hosting of world-renowned speakers to discuss current events, national affairs, and other relevant topics of today. MSC Signature Events include the annual Reverend Dr. Martin Luther King, Jr. Breakfast, MSC Open House, MSC Student Conference On National Affairs, MSC Student Conference On Latinx Affairs, MSC Spencer Leadership Conference, MSC Wiley Lecture Series, and Kyle Field Day, among others.
- The MSC Box Office, located in Rudder Tower, also offers ticketing services for student organizations, campus, and community events and programs.

Music Activities (MUSA)

<http://musa.tamu.edu> (<http://musa.tamu.edu/>)

Band Opportunities

- Fightin' Texas Aggie Band – The Fightin' Texas Aggie Band is nationally known for its precision military marching formations on the football gridiron and is the largest military marching band in the nation. This Corps of Cadets unit is the official marching band of Texas A&M University. Corps of Cadets membership is required as well as an audition with the directors. Please refer to our website (<http://musa.tamu.edu/>) for more information.
- University Concert Bands – Wind Symphony, Symphonic Winds, Symphonic Band, and Concert Band. These ensembles consist of outstanding wind and percussion players from all areas of the Texas

A&M campus. Literature performed by the bands is chosen from the best of traditional and contemporary band works. The bands perform at least two concerts per semester and occasionally participate in off-campus concerts and tours. Students from all majors are welcome in the band, and Corps of Cadets membership is not required. An audition is required to participate in the bands. Please refer to our website (<http://musa.tamu.edu/>) for more information.

- **University Jazz Ensembles** – These two groups utilize standard 17-piece, large jazz ensemble instrumentation for 13 winds and 4 rhythm section instruments. The bands perform select literature from the best traditional and contemporary big band jazz repertoire. The ensembles perform at least two concerts each semester, including campus and community performances. An audition is required to participate in the jazz ensembles. Please refer to our website (<http://musa.tamu.edu/>) for more information.
- **Hullabaloo Band** – The Hullabaloo Band is housed in the Athletic Department and is a sponsored student organization, consisting of 100 student musicians that support Texas A&M Volleyball, and Men's and Women's Basketball. The band regularly travels to tournaments with the teams during postseason play. An audition is required to participate in the Hullabaloo Band. Please refer to our website (http://www.12thman.com/sports/2015/3/23/GEN_20140101165.aspx) for more information.

Choral Opportunities

- **Singing Cadets** – Membership in the Corps of Cadets is NOT required. The purpose of the Singing Cadets is to enhance the public relations of Texas A&M University through musical presentations as deemed appropriate by the Director and to develop disciplined leaders of character as defined by the Singing Cadet Handbook. The four pillars of the Singing Cadets are Purpose, Unity, Spirit, and Honor. Together, these four pillars have formed the solid foundation that has inspired and enabled our organization to succeed in carrying out its purpose for over a century. An audition is required to participate in the Singing Cadets. Please refer to our website (<http://musa.tamu.edu/>) for more information.
- **Century Singers** – The Century Singers is a recognized student organization and close-knit family that connects through a shared passion for music. Members also have the opportunity to participate in events throughout the year including overnight retreats and activities such as ice-skating, movie nights, and group dinners. Involvement in both social gathering and formal rehearsals brings members together as Aggies, musicians, and friends. This creates a truly unique and rewarding experience that will be remembered for a lifetime. An audition is required to participate in the Century Singers. Please refer to our website (<http://musa.tamu.edu/>) for more information.
- **Women's Chorus** – The Texas A&M Women's Chorus is a recognized student organization that strives to promote excellence in the fine arts and to encourage cultural expansion at Texas A&M. They also aim to provide entertainment for the campus community, and to enhance the perception of the ensemble at all levels. The choir travels throughout Texas, beyond our state borders, and internationally, and performs a varied repertoire of sacred and secular classical selections. An audition is required to participate in the Women's Chorus. Please refer to our website (<http://musa.tamu.edu/>) for more information.

Orchestral Opportunities

- **University Orchestras** – The orchestra program at Texas A&M consists of two orchestras; the Chamber Orchestra and the

Philharmonic Orchestra. Both of these groups are comprised of students from all majors at the university. Both orchestras provide students with outstanding musical experiences while allowing time for academics and other interests. Students in the orchestras perform the best of both string and symphony orchestra literature at a high level of artistic achievement in a focused and supportive environment. An audition is required to participate in the orchestras. Please refer to our website (<http://musa.tamu.edu/>) for more information.

Recreational Sports

<http://recsports.tamu.edu>

- All currently enrolled Texas A&M students (with some exceptions) are automatically Rec members. All you need is your student ID to utilize the Student Recreation Center, Polo Road Rec Center, Southside Rec Center, Penberthy Rec Sports Complex, and other Rec Sports facilities. Guest passes for visitors are available for purchase. Persons with disabilities are invited to contact Member Services to inquire about accommodations. We encourage individuals to download the Rec Sports app from the Apple App Store and Google Play.
- The Student Recreation Center is Texas A&M Rec Sports' flagship facility. With more than 500,000 square feet of recreation space, the facility offers a variety of areas including an extensive strength and conditioning room, indoor walking/jogging track, handball/racquetball courts, and indoor courts for soccer, basketball, volleyball, and badminton. It also offers an indoor rock climbing facility, bouldering wall, outdoor basketball and sand volleyball courts, dance/activity rooms, free day-use lockers, locker rooms, and a world-class natatorium featuring a dive pool, lap pool, instructional pool, and the Cain outdoor pool. Facilities may be used on a drop-in basis except when reserved for classes or university functions.
- The Southside Rec Center, located on Bizzell Street adjacent to the Texas A&M Golf Club and across from the Southside Residence Halls, is approximately 60,000 square feet of indoor recreational space with an additional 15,000 square feet of outdoor space. It features strength and conditioning areas, fitness room, multi-purpose courts, a bouldering wall, outdoor sand volleyball courts, a large outdoor turf area, free day-use lockers, and locker rooms.
- The Polo Road Rec Center, located on Polo Road near University Drive, is approximately 28,000 square feet with a large strength and conditioning space that includes an indoor turf area, a multipurpose room for group fitness classes, free day-use lockers, and locker rooms.
- The Penberthy Rec Sports Complex, located on both sides of George Bush Drive, features artificial turf playing fields, natural grass fields, softball fields, a covered pavilion, and equipment checkout.
- Rec Sports also offers aquatics classes, group exercise and specialty classes, boot camps, personal and small group training, intramural sports, sport clubs, and outdoor adventures.

Speech and Debate Team

<http://speech.tamu.edu>

- Compete at national level while impacting the community and the world at a grassroots level.

- Compete in debate, public address events, individual limited preparation events and oral interpretation events.
- Student-run, student-funded and student-oriented organization.

Student Activities

<http://studentactivities.tamu.edu>

- The Department of Student Activities fosters and supports leadership, learning, and involvement opportunities that enhance the growth and development of students and recognized student organizations. At Texas A&M, we care about helping Aggies develop in ways, both in and out of the classroom, that will prepare them for life beyond Aggieland. To do so, Student Activities offers opportunities to lead, serve, participate in campus traditions, represent student voice, and make an impact at Texas A&M. The perks of getting involved on campus range from reaching your leadership potential, to networking with administrators and potential employers, to forming lasting friendships.
- The Department of Student Activities houses key involvement opportunities, including 1300+ recognized student organizations, as well as 55+ fraternity and sorority chapters that can be found through Fraternity and Sorority Life (<https://studentactivities.tamu.edu/fsl/>). The Student Government Association (<https://sga.tamu.edu/>) and the Texas A&M Class Councils (<https://classcouncils.tamu.edu/>) offer opportunities for those who are passionate about representing the student voice and hosting Texas A&M traditions.
- At Texas A&M, Aggies are held to a high standard of leadership and selfless service. To help reach your leadership potential, visit our Student Organization Leadership and Development team - providing valuable services to recognized student organizations and housing several service-based organizations such as The Big Event (<https://bigevent.tamu.edu/>) and the 12th Can Food Pantry (<https://12thcan.tamu.edu/>) - or consider getting involved in an Extended Orientation (<https://studentactivities.tamu.edu/eo/>) program to help welcome new students to Aggieland.

Student Government Association (SGA)

<http://sga.tamu.edu>

- SGA is comprised of the executive, legislative, and judicial branches. Members of these branches include the Texas A&M Student Body President and Student Senators who work to advocate for student needs and help better the Texas A&M campus.
- SGA has four commissions – development, election, diversity, and legislative relations. Each of these serve to carry out the goals of the Student Body President from fundraising money for all of SGA to advocating for students at the state level.
- Finally, SGA houses 13 programming committees including The 12th Can Food Pantry, The Big Event, Traditions Council, Aggie Muster, and more. These committees strive to enhance the student body through their leadership, programming, conferences, and traditions and they directly have an impact on the student body and community.

Student Life

<http://studentlife.tamu.edu>

Student Life strives to enhance your opportunities as a student to participate fully in the university experience. We do this by providing students with information, services, programs, and involvement opportunities that facilitate responsible life choices and promote

awareness of themselves and their community. Each of the program areas within Student Life has a specific mission, but one common goal: to provide education, outreach, and support to you.

Specific services and programs offered include:

- Alcohol and Other Drug Education
- Graduate and Professional Student Government
- Interpersonal Violence Prevention
- New Student and Family Programs
- Off Campus Student Services
- Pregnant and Parenting Student Services
- Student Assistance Services
- Student Legal Services
- Student Media (The Battalion and Aggieland yearbook)

Student Affairs Planning, Assessment and Research

<http://sapar.tamu.edu/> (<https://sapar.tamu.edu/>)

- Student Affairs Planning, Assessment & Research provides leadership in assessment and planning to the Division of Student Affairs and to student organizations, maximizing program effectiveness, emphasizing student learning and contributing to the knowledge of the student experience at Texas A&M.

Student Life - Student Media

<http://studentlife.tamu.edu/studentmedia>

- Student Media produces national, award-winning publications; *The Battalion* newspaper, the *Aggieland* yearbook and the *Maroon Life* magazine. All three are written, edited and produced by students and offer excellent opportunities to gain valuable experience for journalistic and related careers.
- *The Battalion*, Texas A&M's student newspaper since 1893, is typically printed weekly on Thursdays during the fall and spring and every other week during the summer sessions. Around finals and holidays, the delivery days may be changed. It is distributed to students, faculty and staff on campus and at many apartments and other high traffic areas in College Station. *The Battalion* also is available online and on mobile devices at thebatt.com.
- The *Aggieland*, which dates back to 1895, is distributed in the fall but is a year-round project documenting school activities. It is one of the nation's largest college yearbooks.
- *Maroon Life* is published five times during the school year with New Students' Guide to Aggieland (distributed at New Student Conferences), Fall Sports Preview, Best of Aggieland (winter

distribution), Spring Sports Preview and Housing Guide (Family Weekend) editions.

University Art Galleries

<http://uart.tamu.edu>

The Texas A&M University Art Galleries (UART) department actively engages students, faculty, staff, and the surrounding community by offering thoughtful visual arts experiences that inspire dialogue, creativity, and collaboration. Through exhibitions, educational initiatives, and outreach programs, UART serves as a bridge between the university and the broader region, inspiring an appreciation for the arts. As dedicated stewards of the collections, UART promotes arts advocacy and cultivates an inclusive cultural environment that enriches learning, strengthens community connections, and supports Texas A&M University's educational mission.

Officing in the Memorial Student Center, UART organizes art exhibitions for the Forsyth and Stark galleries; advises on the selection, display and management of visual art objects on campus; collaborates with other university art collections; and provides guidance and support to university's relevant endeavors. To promote an appreciation for public art, the department oversees the preservation and maintenance of the university's outdoor sculpture collection.

University Center and Special Events (UCEN)

<http://ucenter.tamu.edu>

- University Center and Special Events (UCEN) is a highly skilled team of professionals committed to creating extraordinary guest experiences. We provide exceptional event management and technical support in state-of-the-art facilities that are well maintained, safe and clean. Through our facilities and services, we enhance the educational, business, social and cultural experiences of students, faculty, staff and visitors of Texas A&M University.
- Event Services – located on the second floor of Rudder Tower, the Event Services team assists in the booking, coordination, setup and staffing of meetings and events held in the Memorial Student Center (MSC), J. Earl Rudder Tower, John J. Koldus Building, All Faiths Chapel, and the surrounding outside event spaces including Aggie Park.
- Rudder Theatre Complex – our Rudder Theatre Complex team assists with the booking of space in Rudder Auditorium, Rudder Theatre, Rudder Forum, and the Exhibit Hall. Additionally, our team provides AV technical support, event setup, equipment rental, and event consultation for events held outside of UCEN facilities.
- Aggie Park - located just east of Kyle Field, is the premiere green space on campus with over 20 acres of outdoor areas for study, relaxation, tailgating, entertainment and recreation for students, staff, faculty, and visitors. To host events in Aggie Park, visit our team in Rudder Tower 103, email us at aggiepark@tamu.edu, or call 979.862-PLAY(7529).

Vice President for Student Affairs

<http://studentaffairs.tamu.edu>

The Office of the Vice President for Student Affairs (OVPSA) serves and supports 13 different departments within the Division of Student Affairs that are critically engaged in all aspects of students' lives and

the delivery of key services and support. In alignment with the mission, values, and policies of Texas A&M University, the OVPSA promotes collaboration and coordinating efforts that affect the entire division, such as strategic planning, budgeting, staff and community development, research, assessment, fundraising, public relations, and technology.

Furthermore, the OVPSA supports the division's community of talented and dedicated professionals who provide exceptional programs, services, and facilities that create a supportive campus environment where students feel a sense of community and have the opportunity to develop as leaders. The OVPSA works to ensure that the division and its staff maintain a student-centered approach to engagement, learning, leadership development, and well-being, in order to instill a commitment to critical thinking, lifelong learning, and the Aggie Core Values amongst our 79,000+ students.

TUITION, FEES AND OTHER FINANCIAL INFORMATION

General Information

Educational expenses for nine months will vary according to personal needs and course of study. The estimated cost to attend Texas A&M is approximately \$30,608 for in-state residents which includes tuition and fees, housing and food, books, transportation and miscellaneous expenses. The estimated cost to attend for non-resident or international students is about \$58,976. All tuition and fees amounts provided herein represent the most accurate figures available at the time of publication and are subject to change without notice. University Rules in place at the time of publishing are reflected here. All are subject to change. The most current information available will be maintained on the Aggie One Stop (<https://aggie.tamu.edu/>) website. Student Business Services online tuition and fee estimate calculator can be found at the Student Business Services (<http://sbs.tamu.edu/>) website.

Payment of Tuition and Fees

Students must meet all financial obligations to the University by their due dates to avoid late penalties. Failure to pay amounts owed may result in cancellation of the student's registration, barring from future enrollment and non-issuance of official transcripts. State law requires that tuition and fees be paid prior to the first day of classes. Students who wish to pay fees in installments can search for the Payment/Refund card on the Howdy (<http://howdy.tamu.edu>) Portal.

Obligation to Pay Tuition, Required Fees, Other Fees and Charges for Optional Services

By registering for classes, students agree to pay all tuition and required fees associated with their registration, optional services and other fees, whether paying in full or utilizing the installment payment option. Failure to pay tuition, fees and other charges may result in penalties, late registration fees and/or possible cancellation.

Tuition and Fees Deferment Option for Recipients of Military-Related Financial Assistance

In accordance with Public Law 115-407 and Texas Education Code 56.0065, Texas A&M University will not impose additional fees, obligations, or burdens concerning payment or registration because of the student's inability to meet financial obligations to the University on time as the result of the delayed disbursement of a state or federal military-related student financial assistance program covering tuition and fees.

Eligible students may request deferment for payment of tuition and fees if the military-related financial assistance is delayed. Requests for deferment should be requested prior to the first bill due date. Deferment will be permitted for up to 60 days from the first day of the semester for students receiving Post 9/11 G.I. Bill Ch.33 Benefits or Veteran Readiness and Employment Ch.31 benefits; all other forms of military-related financial assistance will receive a maximum of 60 days for deferment from the first due date. Should penalties be inadvertently assessed, eligible students may seek assistance from the Aggie One Stop or

Scholarships & Financial Aid to request reversal of fees. These offices will in turn collaborate with Student Business Services to manage the student account until receipt of the benefit payment.

Financial Obligation for Graduating Students

According to Texas A&M University Student Rules and Chapter § 54.007 (c) of the Texas Education Code, all financial obligations to the University must be paid by the end of the semester. Failure to settle all financial obligations will result in a hold being placed preventing access to certain privileges that include registering for future classes or receiving a diploma.

Citations

- Section 14.15 of the Texas A&M University Student Rules states "The student must have settled all financial obligations to the University."
- Chapter § 54.007 (c) of the Texas Education Code states "A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester."

Tuition

Texas A&M Tuition and Required Fees per Semester Credit Hour

A tuition calculator is provided on the Student Business Services (SBS) website to assist students in estimating their tuition and fee costs based on enrolled semester credit hours. Tuition and fee explanations can also be found at sbs.tamu.edu.

All rates are the most current available at the time of printing and are subject to change.

Nonresident Tuition Waiver

If you have any questions concerning your eligibility for a waiver of nonresident tuition, please visit our website (<https://aggie.tamu.edu/financial-aid/types-of-aid/tuition-waivers-and-exemptions/>) or contact Student Business Services by email at ssb@tamu.edu.

University Advancement Fee

The University Advancement Fee is a required fee charged to all Texas A&M University students. The University Advancement Fee funds services such as advising, the Career Center, University Writing Center, technology and libraries as well as administrative services such as ID services, the campus bus system, billing and refunds, access for students to discounted software and many of the services provided through the Division of Student Affairs.

CEHD Teacher Preparation Program

Undergraduate students enrolled in the professional phase of teacher preparation programs incur a differential tuition charge of \$300 in each of the remaining fall and spring semesters. This differential tuition helps support field experiences, supervision, scholarships and international/urban experiences in culturally diverse settings.

Distance Education Administration Fee

This \$30 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

Distance Education Differential Tuition

The rate to be charged for distance education courses will range from a minimum of \$40/SCH to a maximum of \$550/SCH. Each academic department will have an individual rate that will be approved annually by the President of Texas A&M University. For more information regarding Distance Education Differential Tuition, please visit <https://sbs.tamu.edu/billing-payments/billing-fee-explanations/index.html> (<https://sbs.tamu.edu/billing-payments/billing-fee-explanations/>).

TAMUHSC Tuition and Required Fees

Texas A&M University Health Science Center tuition and fees are approved by The Texas A&M University System Board of Regents within guidelines established by the Texas Legislature. Fees are subject to change by the Board of Regents.

A tuition calculator is provided on the SBS website to assist students in estimating their tuition and fee costs based on enrolled semester credit hours. Tuition and fee explanations can also be found at sbs.tamu.edu (<https://sbs.tamu.edu/>).

TAMUHSC Fees

Distance Education Administration Fee

This \$30.00 per semester credit hour administrative fee is assessed to Non-Funded Out-of-State students taking distance education courses.

Field Trip Fees

Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Group Hospital Fee

The group hospital fee supports the provision of medical services to students to access services at the academic locale.

ID card (1-time flat rate)

This additional ID fee covers the College of Dentistry badge, which also serves as an access card to secure locations of the college in addition to being an identification card.

Matriculation Fee (1-time flat rate)

This is a setup fee for first-year dental students related to a college-specific file set up with the college.

Drug Testing Fee (1-time flat rate)

All dental students pay this fee to cover drug testing for students, and this is a one-time assessment.

Lab Fee

The University is required to assess and collect a laboratory fee not less than \$2 nor more than \$30.00 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

Medical Liability

Medical Liability Insurance is required by students interacting and treating patients. This fee covers medical malpractice required for this type of activity.

Equipment Usage

This fee supports costs associated with instruments used during dental education.

Clinic Simulation Fee

This fee covers costs associated with Clinical Learning Resources Center to include specialized simulation technology, equipment, materials, and supplies related to the operating of the simulation center.

Professional Activity Fee

The Professional Activity Fee supports various professional activities for pharmacy students such as participation in clinical partnerships enhancing experiential education, financial resources to ensure these clinical experiences meet pharmacy education expectations, support of student travel to professional meetings/conferences, and other professional activities.

Professional Development Fee

One-third of the pharmacy curriculum is experiential education, which consists of the Introductory Pharmacy Practice Experiences (IPPE) and the Advanced Pharmacy Practice Experiences (APPE). This fee supports clinical site payments for student rotations. In addition to clinical site payments, the Professional development Fee supports service learning activities and other professional development services and programs.

Environmental Service Fee

This fee supports distribution, maintenance and pickup of recycle bins and materials from each building located on the Texas A&M University-Kingsville campus. Only pharmacy students located at Kingsville are assessed this fee.

Career Services and Professional Services Fee

This fee will support efficient and effective support services for professional career development services. Various operational costs associated with the provision of professional career development services.

Advising Services Fee

This fee will provide advising support services for all graduate degree programs not provided by members of the faculty. This fee includes, but is not limited to Graduate Studies, Professional School Advising, and Admission Services related to student enrollment. Various operational costs associated with the delivery of services noted in programmatic justification.

Transportation Fee

This \$70 per semester fee (\$35 for a 5-week summer term and \$70 for a 10-week summer semester) is assessed to provide unlimited fare-free access to all students to on-campus and off-campus services, and expanded service and revenue for a long-term bus replacement plan. In addition, revenue will pay for operating expenses and the enhancement of bus facilities on campus. Fee subject to change.

Locked and Variable Rate Tuition Plans

Beginning with the Academic Year 2018-2019, incoming undergraduate Texas resident students at Texas A&M University will be offered the choice between a variable rate tuition plan or a locked-rate (fixed) tuition plan allowing students and their parents to better plan and budget for college expenses. You will need to select the best option for you and your

family prior to registration. Incoming Non-Resident Students will default to the Variable Rate Plan.

Locked rates are guaranteed for a period of time-based on college and/or major.

All majors in the College of Engineering: 4.5 years from the time freshmen first enter college after high school.

Landscape Architecture: 5 years from the time freshmen first enter college after high school.

All Other Majors: 4 years from the time freshmen first enter college after high school.

HSC: Health Science Center (HSC) programs are upper-division programs with separate budgeted rates of two-year time frames. Upon transfer/entrance to an HSC major, you will be reassigned to their current-year locked-rate cohort for two years, or your remaining time left if you are originally in a main-campus locked-rate cohort.

Once you have completed the length of time in your locked rate cohort you will automatically be moved to the current year Variable Rate Cohort Non-Resident Students: Because the State of Texas does not fund "non-resident" tuition, mandates issued by the state for the fixed-rate tuition plan do not apply to non-resident students. Therefore, non-resident students will default to the variable-rate plan.

Options

Variable rate plan: Tuition and fees could increase each year, using the Higher Education Price Index.

Locked-rate (fixed) plan: Tuition and fees are locked into a per semester rate for 12 consecutive semesters, or 4 years, from the point of initial enrollment at a public or private institution.

Entering Freshman Texas Resident Students: Will choose either the variable rate or the locked-rate (fixed) associated with their first term of enrollment.

Entering Transfer or Readmit Texas Resident Students: Have three options to choose from

- Variable rate, which will vary each academic year
- Locked rate(fixed), based on their first term of enrollment in college after high school, which will expire at the end of 12 consecutive semesters, or 4 years from that first term of enrollment
- The current academic year's tuition and fee rate which will be locked in for 12 consecutive semesters or 4 years

Presumptions

Students will enroll in 30 hours an academic year for 4 years allowing completion of most degree plans. Some majors such as engineering and architecture are offered 1-2 additional semesters at the locked rate.

Where do I select my tuition rate?

All incoming freshmen, admitted transfer, and readmit applicants must select a tuition rate code prior to registration. Tuition rate code selections can be made by going to the Howdy Portal at howdy.tamu.edu (<http://howdy.tamu.edu>), searching Registration Readiness, and logging in. This will take you to the My Dashboard where Action Items are displayed. The Tuition Rate Plan Selection is towards the bottom of the list. The choice will be offered only once and cannot be changed in future semesters.

Tuition estimates can be found on the Student Business Services website at sbs.tamu.edu/ (<http://sbs.tamu.edu/>).

Texas A&M University meets requirements of the Texas Education Code, Section 54.017 regarding fixed tuition for undergraduate students.

Fees

Application Fees

Graduate: \$65; Undergraduate: \$75; International: \$90

Cooperative Education Fee

A fee of \$75 is charged to all participants of the Cooperative Education program.

Field Trip Fees

Field trip fees are assessed to cover the cost of providing trips and vary depending on the course taken and expected expenses.

Greek Dues Fee

This \$25 due fee provides members of fraternities and sororities with a sustainable advising and programming model to create a membership experience that is congruent with both the university's and the organizations' mission, purpose and values.

Laboratory Fees

The University is required to assess and collect a laboratory fee not to exceed \$30 for each laboratory course to cover in general the cost of laboratory materials and supplies used by a student.

Late Penalties

Students who fail to pay fees and installments when due are assessed a late payment fee for each payment or installment paid late.

Late Registration/Add Penalties

The Late Registration Charge is assessed to students who register on or after the first class day. A charge of \$100 for registration between the 1st and 12th class day and \$200 for registration after the 12th class day also applies to students who have not paid 100% of tuition and fees or submitted adequate Installment Plan payments by the semester census date. Registration after the 12th class day is by exception only and requires Dean's approval.

Students who add classes after the 12th class day that result in a net increase in hours enrolled are assessed a \$50 late add fee.

Microfilming, Binding and Collating

Binding, collating, microfilming theses and dissertations—Masters: \$110, Doctoral: \$170

Musical Activities Performance Fee

The \$100 Musical Activities Facility Performance Fee is a per semester fee that is charged to each participant in a Music Activities affiliated vocal or instrumental program and supports programming, performance, and operational costs. This charge is not Title IV eligible.

New Student Conference Fee

A non-refundable new student orientation fee of \$225 is charged to all freshmen students and \$153 to transfer students. An additional fee of \$35 is required of all international students to cover additional costs associated with orientation programs.

ROTC Uniform Rental

Qualifying cadets enrolled in Army, Air Force or Naval ROTC will be reimbursed the cost of basic cadet uniforms. Cadets who are not enrolled in ROTC (Drills and Ceremonies Cadets) are required to pay for use of uniforms.

Certificate Processing and Service Charge

A non-refundable document and processing charge is assessed for each certificate awarded. Students will incur this charge when an application for the certificate to be awarded is submitted.

Diploma/Graduation Fee

A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late fee of \$50, in addition to the diploma/graduation fee, may be charged to those who apply for graduation after the published deadline.

Health Center Fee

This \$75.00 per semester fee (\$25 for a 5-week summer term and \$75.00 for a 10-week summer term) is required of all students for the purpose of operating, maintaining and equipping the University Health Center and entitles the student to its services. These services do not include surgical operations or charges for consultations with outside physicians.

Identification Card (Aggie Card)

Every student is required to have a student ID card - Aggie Card. Aggie Cards are permanent and students are responsible for maintaining a working ID throughout their career at the University. The Aggie Card is used for residence hall access, dining halls, athletic event and recreational sports admittance as well as library privileges and printing station access. Faculty/Staff will ask for your Aggie Card when responding to questions about registration, tuition and fees and financial aid disbursement. Replacement ID cards are \$12. Students who lose their IDs can submit a form for a new Aggie Card online at <http://myaggiecard.tamu.edu>.

Student Business Services

Aggie Card Office, General Services Complex

aggiecard@tamu.edu

8 a.m. – 5 p.m., Monday through Friday

International Student Health Insurance

The Texas A&M University System requires all international students in F-1 or J-1 status to be covered under the Texas A&M University System Student Health Insurance Plan (SSHIP) or have equivalent insurance coverage that meets the waiver criteria. The System Student Health Insurance Regulation is located at <http://policies.tamus.edu/26-99-01.pdf>.

For more information regarding the health insurance and waiver processes, please visit the International Student and Scholar Services website at <https://global.tamu.edu/iss/>.

International Student Orientation Fee

This \$70 fee is charged to cover the cost of resources for newly admitted international students.

International Student Services Fee

This \$150 fee is required of all students who are not U.S. Citizens or Lawful Permanent Residents to offset the cost of specialized services provided to these students from International Student and Scholar Services, the Center for Teaching Excellence - English Language Proficiency Program, and the University Writing Center.

International Student Administrative Fee

An administrative fee of \$415 per semester or summer session (all or part thereof) is required to support international, sponsored students whose tuition and fee payments are coordinated through Specialized Student Billing, unless these fees are waived as part of negotiated contractual agreements.

International Student Post Enrollment Maintenance Fee

This three-tiered fee will be required of F-1 students who are applying for Post-Completion Optional Practical Training (OPT) and the 24-month STEM Extension of OPT as well as J-1 students who are applying for Academic Training that will occur post-completion of studies. Within the applicable requests, the student will be required to upload evidence that they have paid the required fee. This fee will only apply to new or extended authorization requests for Post-Completion OPT, STEM OPT, and Post-Completion Academic Training. Additional information about this fee can be found on the ISSS website.

Recreational Sports Fee

The Recreational Sports fee is assessed to all undergraduate and graduate students (with a few exceptions) attending the University for use of the Student Recreation Center, Southside Rec Center, Polo Road Rec Center, Penberthy Rec Sports Complex, and all other Recreational Sports facilities. The fee is \$145 per semester (\$72.50 for a 5-week summer term and \$145 for a 10-week summer semester).

Reinstatement Fee

If a student is removed from the rolls of the University, has access blocked or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of \$200 will be assessed, in addition, to any other late fees or penalties already incurred.

Supplementary Fee for Courses Attempted More than Twice

Certain courses that are attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is repeating the course. Texas A&M has chosen to assess a supplementary fee to those students attempting a course more than twice.

A student attempting certain courses more than twice at Texas A&M will be subject to a supplementary fee of \$125 per semester credit hour (\$375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M and is subject to the supplementary fee.

Student Center Complex Fee

This \$100 fee (\$50 for a 5-week summer term and \$100 for a 10-week summer semester) is required of all students for operating, maintaining, improving and equipping the Student Center Complex.

The TEA Teacher Ed Prep Program Fee

The TEA Teacher Ed Prep Program Fee is mandated by the Texas Education Agency for all candidates seeking educator certification in the State of Texas TAC 229.9 (https://texas-sos.appianportalsgov.com/rules-and-meetings/?interface=LANDING_PAGE). This fee is assessed based on information provided by the School of Education and Human Development.

Optional Services

Athletic Events

Sports Pass are available for purchase. For more information, please visit <https://www.12thmanfoundation.com/tickets/student-tickets/index.html> (<https://www.12thmanfoundation.com/tickets/student-tickets/>).

Installment Payment Option

Students who choose to pay using the installment plan pay an installment payment service charge per semester. This charge is non-refundable. You may add the installment plan by selecting the installment option through the online bill payment system at <https://howdy.tamu.edu> (<https://howdy.tamu.edu/>).

MSC OPAS Tickets

Special Discounted Student OPAS tickets are available through the MSC Box office. For more information, please contact MSC OPAS at (979) 845-1661 or visit their website (<https://www.opastickets.org/>).

Yearbook

There are three ways to order a yearbook.

- 1. Click on yearbook.tamu.edu (<https://yearbook.tamu.edu/>).
- 2. Call the business office at (979) 845-2697, and order one by telephone with a credit card.
- 3. Come by the office in Suite L400 of the Memorial Student Center and pick up an order form.

Aggie Dining

Aggie Dining offers a variety of Meal Plans to help students budget and save while dining on campus! Meal Plans are available to all students enrolled at Texas A&M University, whether they live on- or off-campus.

On-campus, “New First Time Freshmen” (regardless of the number of college credit hours) living in campus residence halls are required to have a minimum Meal Plan for both the Fall and the Spring semesters (or

remainder of the year for those that apply for housing after the beginning of the Fall semester).

All Corps of Cadets members are required to have a minimum Meal Plan as designated by the Office of the Commandant in order to meet requirements of mandatory March-In Meals with the Corps. March-In Meals are automatically deducted at the beginning of each semester from meal plans.

Non-Corps Upperclassmen and Off-Campus students are not required to purchase a Meal Plan, but the option is available to them to aid in budgeting and provide dining discounts.

To learn about Meal Plan requirements/options, visit new.dineoncampus.com/tamu/ (<https://new.dineoncampus.com/tamu/>).

General Dining Information

- More information about Meal Plans/Dining can be found at new.dineoncampus.com/tamu/ (<https://new.dineoncampus.com/tamu/>).
- All Meal Plans are loaded onto the Student ID to make access and use easy. Students must have their Aggie ID to utilize their Meal Plan.
- Fees for the selected Meal Plan will be added to the student’s Texas A&M University student fee, and are separate from housing fees. For questions about billing, email dining@tamu.edu.
- Meal Plans can be upgraded/downgraded up to specific deadlines during the semester. These deadlines are available at new.dineoncampus.com/tamu/ (<https://new.dineoncampus.com/tamu/>).
- Students can use their Retail Swipes and Dining Dollars on the Transact Mobile Ordering app to order food ahead of time at locations such as Houston Street Subs. More information can be found at new.dineoncampus.com/tamu/ (<https://new.dineoncampus.com/tamu/>).

Parking Assignments

Vehicles parked on the Texas A&M University campus are required to have a valid parking assignment (virtual permit) or pay by the hour to park in designated visitor areas. Costs of virtual permits are prorated and subject to change.

For more information or to purchase parking, visit [transport.tamu.edu/](https://transport.tamu.edu/permitreg) (<http://transport.tamu.edu/parking/faqpermit.aspx>).

Surface Lot	\$379
Night Permit (only valid 5 p.m. - 6 a.m.)	\$189.50
Night+ (includes garage access to UCG, CCG, SBG or PRG 5 p.m. - 6 a.m. Garage assignments will be determined at the time of purchase)	\$289.50
Garage Non-Reserved Space (Polo Rd. Garage is \$679)	\$711
Motorcycle Permit - including mopeds and scooters	\$189.50

Residence Hall and White Creek Apartment Rates

All students living in residence halls and White Creek Apartments are required to pay room/apartment rent. Rooms are furnished with beds, mattresses, desks, chairs and dressers. Students are expected to furnish their own pillows, blankets and linens. Room/apartment rates include utilities, high-speed internet, cable tv, and electricity. Rates are for the semester and are subject to change.

For more information, please see Residence Life (<http://reslife.tamu.edu>).

Application Fee for Pay by Semester Properties: Residence Halls and White Creek Apartments

There is a \$75 non-refundable application fee that is required to complete the housing application and sign a contract for the residence halls and university apartments. Students applying for our Residence Halls, White Creek Apartments, or Corps of Cadet Halls have until May 1st to cancel their housing for the Fall term, or December 1st for the Spring term.

Any cancellation after that date is considered a late cancellation and cancellation penalties apply. Freshmen classified as U1 with less than 30 hours will be required to have a dining plan if they live on campus.

Payments

Scholarships, Grants and Loans

All financial aid or loans must be accepted and requirements completed before it can be applied toward a student's account.

Payment Methods

Texas A&M utilizes online statements and electronic payments in its efforts to provide timely financial information to students and to control costs. Student account payment options include:

Electronic/Online

Students can view their account and make online payments using E-Checks, American Express, Discover Card, MasterCard, Visa, International Payments and wire payments by searching for the Payment/Refund card on the Howdy portal. Payments made with credit cards will incur a service fee charged at the time of payment. Additional forms of payment accepted include personal checks, cashier's checks, and money orders. (Please Note: Once online payment transaction has occurred, the Service Fee is non-refundable). E-check payments incur no charge.

Paper

- Checks – Students may still use paper checks for payments. The University reserves the right to utilize check conversion technology to convert paper checks into electronic format.
- Cashier's checks
- Money orders

Cash

- Cash is not accepted.

Flywire

- All bank wire transfers are accepted using our partner, Flywire. Texas A&M University does not accept direct wire transfers and will not provide our banking information.

Returned Payments

Any payment that is rejected for payment by the paying bank, credit card company or other financial institution is subject to returned item charges of \$30 or more. Rejected payments may also result in cancellation of the student's registration and additional late registration penalties if the student is required to re-register on or after the first day of classes.

Payment Plans

Tuition, required fees, room, board and parking are payable in full, or in installments. A service charge, to cover the cost of handling, will be assessed to each student who chooses to use the payment plan each semester. Students may pay their account in full any time during a semester; however, the service fee will not be refunded once a payment is made under the payment plan or after the first payment due date. See the Student Business Services website (<http://sbs.tamu.edu>) for information on installment plans.

Deposits

General Deposit

A deposit of \$100 is required of every student to ensure the institution against losses, damages, and breakage for which the student is responsible, or to be used to offset in part amounts owed by the student to the institution. General deposits are returned to students, less any such amounts owed to the institution, within a reasonable period after the date of the student's withdrawal or graduation from the institution, not to exceed 180 days. The deposit retention period provides the University sufficient time to identify all amounts owed and to determine if the student intends to enroll in the semester or summer session immediately following the student's withdrawal or graduation or, if the student withdraws or graduates in the spring semester, in the next fall semester. If a student leaves the University without graduating or officially withdrawing, they must submit a written request to Student Business Services to receive a refund of their deposit. Deposits for students that do not graduate, withdraw or otherwise request a refund remain on file for four years. Those deposits are forfeited to the University's General Deposit Scholarship Fund, after deducting any amounts owed the University.

Penalties and Late Fees

Late Payment Penalty

There are severe penalties for failure to pay student account balances and installments by their specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive credit for academic work performed. Students will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee of \$25 for A&M students and \$50 for HSC students will be assessed for each payment not received on or before it is due. If a student is removed from the rolls of the University or is withdrawn for failure to pay amounts owed the University, a reinstatement fee of \$200 will be assessed in addition to any other late fees or penalties already incurred. Current due dates can be found online at the Student Business Services website (<http://sbs.tamu.edu>).

Late Registration Fees

Students who register on or after the first day of classes are assessed a late registration fee of \$100 for A&M students and \$200 for HSC students. Students who register after the official census date (12th class day for fall or spring and 4th class day for summer) are assessed a late

registration fee of \$200 for A&M students and \$250 for HSC students. Students who add classes after the official census date are assessed a late add fee of \$50 for A&M students and \$100 for HSC students. Note: Penalties, late registration and late add fees also apply to students who are required to re-enroll because their registrations were canceled for nonpayment. Registrations are subject to cancellation and/or financial penalties if sufficient payment is not received before 5:00 p.m. on the semester due date.

Use of Collection Agencies and Credit Bureau

If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to recover the debt. If any collection efforts must take place, the student will be required to reimburse the University for the fees of any collection agency which may be based on a percentage at a maximum of 30% of the debt. All costs and expenses, including reasonable attorney's fees the University, incur in such collection efforts.

Canceling Registration

Once students have registered for classes, they must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date;
- use the online registration to drop all classes prior to the first day of classes; or
- initiate the withdrawal process online in Howdy to begin the process to withdraw from the University after the first day of classes.

Following this procedure is especially important for students who have been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to their account and will be held responsible for paying all fees for the semester, regardless of whether they attended classes.

Cancellation for Nonpayment of Tuition or Fees

The University reserves the right to cancel registrations not paid by their due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of university resources.

Refunds and Adjustments

Fee Adjustments for Courses Dropped

A student may drop individual courses during the first five days of a fall or spring semester (first four days of a summer term). Students also may drop individual classes with special permission of the dean between the 6th and 12th class days. Full refunds will be given for the individually dropped courses during these periods provided the student remains enrolled in at least one class and has not withdrawn from the university. Refunds will not be issued for classes dropped after the 12th class day.

As of the first day of the semester, students may not drop all of their courses through the drop/add process, but instead must begin the official withdrawal process online through Howdy (<https://howdy.tamu.edu>) (see **Withdrawal from the University** below for additional information regarding the withdrawal process). A student may add courses during the first five days of a fall or spring semester.

Adjustments for Withdrawal–Tuition and Fees

Tuition and fee adjustments shall be made to students officially withdrawing from the University for charges listed below according to the following refund schedule: Tuition and Required Fees, Residence Hall Rent, and Meal Plans.

Fall and Spring Semester and 10-Week Summer Semester

By 5 p.m. on the last business day before the first day of class	100%
During the first five class days	80%
During the second five class days	70%
During the third five class days	50%
During the fourth five class days	25%
After the fourth five class days	None

Summer Term of More Than 5 Weeks But Less Than 10 Weeks

By 5 p.m. on the last business day before the first day of class	100%
During the first, second or third class day	80%
During the fourth, fifth or sixth class day	50%
Seventh day of class and thereafter	None

Summer Term of 5 Weeks or Less

By 5 p.m. on the last business day before the first day of class	100%
During the first class day	80%
During the second class day	50%
During the third class day or thereafter	None

Athletic Refunds

Refunds are not allowed for individual games or games missed. A prorated refund is permitted until the option is used to pick up a ticket for any one game. Once a ticket option has been used, prorated refunds will be given only in the event of withdrawal from the University. For information on refunds, contact the Athletic Business Office at (979) 846-8892.

Reductions in Rates for Late Entry to the University

No reduction will be made in the charge of room rent and board in case of entrance within 10 days after the opening of a semester or summer term, nor will a refund be made in case of withdrawal during the last 10 days of a semester or summer term, or the last days for which payment is made.

Refund Delivery

Texas A&M and Flywire have joined forces to deliver financial aid and other refunds to students faster through the University's refund delivery process. You will receive information from the University at your new student conference and in your official University email account, which will explain the process for signing up for direct deposit of refunds.

Tuition Insurance

Texas A&M University has teamed up with GradGuard™ (<https://gradguard.com/tuition/tamu/>) to offer tuition insurance to Aggie students and families. This protection strengthens our existing refund policy (<https://sbs.tamu.edu/billing-payments/withdrawing/>) and can provide reimbursement for tuition, housing, and other fees if a student withdraws for a covered medical reason at any time during the covered semester.

Yearbook Refunds

Yearbook charges are refundable in full during the semester in which payment is made. Thereafter, no refunds will be made on orders canceled in subsequent semesters. Yearbooks must be picked up during the academic year in which they are published. Students who will not be on campus when the yearbooks are published must pay a mailing and handling fee. Yearbooks will not be held, nor will they be mailed, without payment of the mailing and handling fee. Refunds will not be made on books not picked up within one semester of the publication date. Refunds will not be made before 21 days from the date of payment. Refund policies contained herein reflect policies in effect at the time of publication and are subject to change.

Aggie Dining Meal Plan Adjustment/Cancellation/Transfer Policies

Aggie Dining's information is based on information available at the time of publishing and are subject to change.

Students may purchase a Meal Plan through Aggie Dining by visiting mealplans.tamu.edu. Students can upgrade/downgrade their chosen Meal Plan until a designated date in the semester, as listed on our website (<https://mealplans.tamu.edu/Default.aspx?ReturnUrl=%2F>). The appropriate fee is to be paid to the Office of Student Business Services.

Meal Plans are valid for one semester within dates designated on [dining.tamu.edu](https://dineoncampus.com/tamu/) (<https://dineoncampus.com/tamu/>). Check with Aggie Dining for posted dates for Meal Plan access. Location hours may vary during class breaks and meal availability may exclude official University holidays.

Following University policy, no one is authorized to use or borrow a student's identification card (Aggie Card); therefore, Meal Plans are not transferable between students. The Aggie Card must be presented to Aggie Dining cashiers for Meal Plan participation. If an Aggie Card becomes lost, report it immediately by calling (979) 845-4661 or go to <http://myaggiocard.tamu.edu> (<https://nam02.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmyaggiocard.tamu.edu%2F&data=04%7C01%7Caaallensworth%40tamu.edu%7Ccacbfde525e840deb5d908da1320916d%7C68f381e346da47b9ba576f322b8f0da1%7C1%7C0%7C637843327854600402%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLjBtIl6Ik1haWw%3D&reserved=0>) to deactivate the card.

Aggie Dining follows the University's refund schedule for Tuition and Fee Adjustments. Refunds are given on the percentage basis listed for students dropping fee options or officially withdrawing from the University. To submit a cancellation request, visit Aggie Dining's website here. (<https://dineoncampus.com/tamu/get-answers-now/>)

- **On-Campus Freshmen:** All students identified by Texas A&M as "New First Time Freshmen" (regardless of credit hours) living in on-campus residence halls are required to have a minimum designated Meal Plan for both the Fall and the Spring semesters. On-campus freshmen looking to cancel their campus Meal Plan must first cancel their housing contract through Residence Life. It is the student's responsibility to reach out to Aggie Dining about their canceled housing contract and request to cancel their Meal Plan. A canceled housing contract must be present before Meal Plan cancellation approval. To submit a cancellation request, visit Aggie Dining's website here. (<https://dineoncampus.com/tamu/get-answers-now/>)
- **Corps of Cadets:** All members of the Corps of Cadets are required to have a minimum designated Meal Plan for both the Fall and the Spring semesters. Cadets seeking to cancel their campus Meal Plan must first present their Corps resignation/withdrawal form before approval. To submit a cancellation request, visit Aggie Dining's website here. (<https://dineoncampus.com/tamu/get-answers-now/>)

For questions and assistance, please visit Aggie Dining's "Get Answers Now" webpage at <https://dineoncampus.com/tamu/get-answers-now> (<https://dineoncampus.com/tamu/get-answers-now/>).

Residence Hall and White Creek Apartment Cancellation Policy and Refunds

Any cancellation after May 1st for the Fall (regardless of when the student applies) is subject to the following cancellations penalties: 1) Prior to May 1st - no penalty, 2) May 2nd to May 30th - \$500, 3) June 1st to August 14th - \$1000, 4) August 15th (or after move) - 100% of fall semester rent and 5) Students who cancel their housing assignment after the student has moved in for the fall is subject to 100% of the spring semester rent.

Exceptions to the housing charge/refund schedule may be granted for students who graduate at the end of the fall semester, enlist in the Armed Forces of the United States, are accepted into one of the Service Academies, or participate in a cooperative education/internship, student teaching (not in the local area), or a student abroad program for the spring semester if written notification and verification of the aforementioned condition is received in the Housing Assignments Office, Corps Housing Office, or University Apartments Office (as applicable) by November 15th. Exceptions may also be made for students who are academically restricted from re-enrollment or who become medically unable to return for the spring (or summer if a 12 month contract) semester if written notification is received prior to the beginning of classes for the spring (or summer if a 12 month contract). Students who withdraw or transfer to a different college/university for personal reasons would not meet any of the above exemptions.

Withdrawal from the University

Once a student is considered officially enrolled, unless otherwise restricted from enrolling, stopping or cancelling payment for tuition and fees will not constitute official withdrawal.

Before the first class day of the semester, in accordance with the Academic Calendar, you may go online to Howdy (<http://howdy.tamu.edu/>) and drop your courses and options for the semester.

After the first class day of the semester, you must complete a Student Withdrawal in Howdy (<http://howdy.tamu.edu/>) in order to cancel your registration for the semester. Failure to complete the withdrawal process will result in forfeiture of any tuition and fee adjustments, and course work may be recorded as incomplete or failed.

Failure to follow procedures for withdrawing from the University may result in financial penalties and delays with future enrollment. Once a student registers, they are responsible for the total fees assessed regardless of whether the installment option is used. Refund percentages are applied to total fees assessed and not the amount paid. This means that students who withdraw before paying all installments may, in the event of withdrawal, still owe the University.

International students must visit with an advisor in International Student and Scholar Services before withdrawing to determine if doing so will affect visa status.

Student athletes should visit with an academic advisor in Athletics before initiating the withdrawal process.

Recipients of financial aid should visit with an Enrollment Services Advisor before withdrawing. Students receiving funds awards by Scholarships & Financial Aid should be aware that federal regulations require a return calculation for all students who receive Title IV federal aid and withdraw during a semester. These regulations stipulate that students who withdraw prior to the end of a semester may be required to return disbursed funds not earned if at the time of their withdrawal they have not completed 60 percent of the days they were scheduled to complete.

Scholarship & Financial Aid will notify and provide instructions to students for whom aid has been adjusted due to the return calculation. Eligibility for state and institutional funds may also be impacted with withdrawing from the university. More details can be found on our Maintaining Eligibility website (<https://aggie.tamu.edu/financial-aid/apply-for-aid/maintaining-eligibility/>).

Additionally, students who do not successfully complete courses for the semester may be considered unofficially withdrawn and could be subject to the same return calculation described above based on their last date of academic engagement as reported by their instructor(s). Academic engagement includes, but is not limited to, attending an in person or synchronous course lecture, or submitting an academic assignment or taking an exam. All disbursed funds may be returned if academic engagement cannot be documented in any course.

For aid recipients, course drops and withdrawals are considered to be unsuccessfully completed coursework when determining Satisfactory Academic Progress (SAP) and will impact completion rate. This can affect future aid eligibility. More details can be found on our Maintaining Eligibility website (<https://aggie.tamu.edu/financial-aid/apply-for-aid/maintaining-eligibility/>).

Allocating Returned Title IV Funds (Federal Aid)

Funds returned to the federal government due to student withdrawal are used to reduce the outstanding balances in individual federal programs.

Financial aid returned (by the University and/or the student or parent) must be allocated in the following order:

1. Unsubsidized Federal Direct Loan
 2. Subsidized Federal Direct Loan
 3. Direct Graduate PLUS (Student) Loan
 4. Federal Direct PLUS (Parent) Loan
 5. Federal Pell Grant
 6. Federal Supplemental Educational Opportunity Grant (FSEOG)
 7. TEACH Grant

Returns of state and institutional aid (when applicable) will be calculated using the same percentage proration used by Student Business Services to determine the amount of tuition and fees to be charged to a withdrawn student.

Unclaimed Title IV Refunds

According to federal law, the university is required to return Title IV funds that have not been claimed (i.e., refund check that has not been cashed) within 240 days of issue. These funds will be returned to the federal financial aid program from which they were disbursed.

Rebates

Tuition Rebates After Graduation

Certain undergraduate students who attempt no more than three hours in excess of the minimum number of semester credit hours required to complete the degree under the catalog under which they were graduated may be entitled to a \$1,000 tuition rebate after graduation. Several conditions apply and students must meet all of the specified criteria. If you wish to try and qualify for this program, please see the Office of the Registrar website (<http://registrar.tamu.edu>) for a complete set of student and institutional responsibilities and other criteria.

Scholarships & Financial Aid

We want to partner with you to help pay for your college expenses. There are different options to assist with cost.

Need-based financial aid programs are designed for students who have a demonstrated financial need as defined by their financial aid application, such as the Free Application for Federal Student Aid (FAFSA). All financial aid is contingent upon you enrolling and making Satisfactory Academic Progress (SAP), as defined by Scholarships & Financial Aid or the specific aid program.

Financial aid has two forms: Gift Aid (not repayable) and Self-Help (may be repayable, such as with a loan)

Gift Aid	Self-Help
Grants (Federal, State, Institutional)	Loans (Federal, State, Institutional, Alternative)
Scholarships	Student Employment (Work Study, Part-time Employment, Internships, Assistantships)

Waivers

There is limited gift aid available to undergraduate students. Gift aid is offered on a first-come, first-served basis based on priority dates

published on the Scholarships & Financial Aid Planner Dates website (<https://financialaid.tamu.edu/planner-dates/>).

To apply for financial aid, you must submit a financial aid application. The Free Application for Federal Student Aid (FAFSA) becomes available on October 1 each year for the next academic year. Students are encouraged to submit their FAFSA online at the Federal Student Aid website (<https://studentaid.gov/h/apply-for-aid/fafsa/>) as soon as possible. Students who do not meet the citizenship eligibility requirements to complete the FAFSA may be eligible to submit the Texas Application for State Financial Aid (TASFA) or the International Student Financial Aid Application (ISFAA). Information on these applications can be found on the Aggie One Stop Apply for Aid website (<https://aggie.tamu.edu/financial-aid/apply-for-aid/>). You must be admitted to Texas A&M, have a FAFSA, TASFA or ISFAA (whichever is applicable to you) on file with Texas A&M and have submitted all other requested documents to Scholarships & Financial Aid to receive a financial aid offer.

Financial aid offers for incoming students beginning in the fall semester are made early in the preceding spring semester. Financial aid offers for incoming students beginning in the Spring semester are made late in the preceding fall semester. Financial aid offers to continuing students (those who have completed at least one semester at Texas A&M) for the upcoming academic year are made after spring semester grades have been submitted. Summer financial assistance is offered to students with a FAFSA or other financial aid application on file who enroll at least half-time in Summer coursework at Texas A&M.

Financial aid offers are made based on the assumption that you will enroll full-time in the fall and spring semesters. Cost of attendance and offered financial aid amounts will be adjusted if you are enrolled less than full-time at Texas A&M University or through the Texas A&M-Blinn TEAM Program, the Texas A&M Engineering Academy at Blinn-Bryan or another approved consortium program.

You may receive federal financial aid only for courses that count towards your program of study/degree plan. State and institutional aid are not subject to the same regulatory restrictions. Regardless of the type(s) of aid offered, the cost of attendance will be reduced for courses that are not counting towards your program of study, which may result in a lower amount of federal, state and institutional aid eligibility. Financial aid offers may also be adjusted if you do not begin attendance in all courses for which you are registered.

If you are attending the College Station campus and have questions related to scholarships and financial aid, please visit the Aggie One Stop Contact Us website (<https://aggie.tamu.edu/resources/contact-us/>).

If you are attending a Galveston, McAllen, School of Law or Health Science Center program, please visit the Scholarships & Financial Aid Contact Us website (<https://financialaid.tamu.edu/about/contact-us/>) to locate the contact information for your campus or site.

Please visit the Aggie One Stop website (<https://aggie.tamu.edu/>) for the most current information on programs and any associated deadlines.

Grants

The Federal Pell Grant is available to undergraduate students who have not received a baccalaureate degree and who have demonstrated financial need as determined by the FAFSA. The Federal Pell Grant provides a foundation of financial assistance to which aid from other sources may be added.

The Federal Supplemental Educational Opportunity Grant (FSEOG) and the Texas Public Education Grant (TPEG) are offered to students based on financial need as determined by the FAFSA. These funds are offered on a first-come, first-served basis.

The Towards EXcellence, Access and Success (TEXAS) Grant is available to eligible Texas residents who have met certain levels of financial need according to the results of their financial aid application and have met the remaining program criteria, which may be reviewed on the Aggie One Stop Grants website (<https://aggie.tamu.edu/financial-aid/types-of-aid/grants/>). The TEXAS Grant is also subject to funds availability and eligibility guidelines as defined by the Texas Higher Education Coordinating Board.

Additionally, Texas A&M provides institutional grant aid to eligible students to assist with educational expenses. Student grants are subject to fund availability and may be single-year or renewable.

Scholarships

School/College/Department Level Scholarships

Several schools/colleges and departments at Texas A&M award scholarships to students interested in particular major fields of study based on academic record, service, activities and demonstrated leadership. The value of the awards varies, and the term of scholarships range from one to four years. Awarding schools/colleges and departments select recipients based upon predetermined criteria. Completed scholarship applications must be received no later than the specified deadlines. Awards are typically announced mid-spring for the following academic year.

For more information, please review the opportunities that may be available within your school/college and department at the Aggie One Stop Additional Scholarships website (<https://aggie.tamu.edu/financial-aid/types-of-aid/scholarships/additional-scholarships/>).

Incoming Freshmen Scholarship Programs

Opportunity Award: awarded to freshman students based on academic achievement, leadership roles, community/extracurricular participation during high school and, in some cases, financial need.

Achievement Scholarship: available to incoming freshman students who attended and graduated from targeted high schools in the State of Texas. Scholarships include the President's Achievement Scholarship and Century Scholars. Awards are based on academic achievement, leadership roles and community/extracurricular participation during high school.

Academic Scholarship: available to incoming freshman students admitted in the fall (only). Scholarships include the President's Endowed Scholarship, Lechner Scholarship and McFadden Scholarship. Awards are based on academic achievement, leadership roles and community/extracurricular participation during high school.

For more information, please visit the Aggie One Stop Undergraduate Scholarships website (<https://aggie.tamu.edu/financial-aid/types-of-aid/scholarships/undergraduate-scholarships/>).

Continuing Student Scholarships (students who have completed at least one semester at Texas A&M)

The University Scholarship Application is available to students with at least one semester completed at Texas A&M. Awards range in value from \$500 to \$7,500 and are available to undergraduate, graduate and

professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of University academic achievement, campus/community involvement, campus leadership roles and, for some scholarships, financial need. In addition to scholarships offered through Scholarships & Financial Aid, many colleges, departments, the Corps of Cadets and the Texas A&M Foundation use the University Scholarship Application for award consideration. Students are encouraged to complete the University Scholarship Application (<https://uwide.tamu.edu/>) beginning in October. The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

For more information, please visit the Aggie One Stop Undergraduate Scholarships website (<https://aggie.tamu.edu/financial-aid/types-of-aid/scholarships/undergraduate-scholarships/>).

Transfer Student Scholarships

Aggie Transfer student scholarships are designed to recognize outstanding students who transfer to Texas A&M. Scholarships are awarded based on a combination of college academic achievement, extracurricular activities, campus involvement at their current institution, leadership, major and, in some instances, financial need. In addition to scholarships offered through Scholarships & Financial Aid, many schools/colleges, departments, the Corps of Cadets and the Texas A&M Foundation use the transfer admissions application for award consideration.

For more information, please visit the Aggie One Stop Undergraduate Scholarships website (<https://aggie.tamu.edu/financial-aid/types-of-aid/scholarships/undergraduate-scholarships/>).

Scholarship Recipients and Non-Resident Tuition Waivers

The Competitive Scholarship waiver, authorized under Texas Education Code 54.213a, is an optional state waiver that institutions may offer. In this, an eligible non-resident student who holds competitive scholarships of a specified minimum dollar amount may be eligible to pay the fees and charges required of Texas residents without regard to the length of time the student has resided in Texas. The student must have applied for and competed with other students (including Texas residents) for the scholarships and the scholarships must be offered by a Texas A&M University school/college or department scholarship committee or authorized university representative.

The Texas Education Code requires that all male students (both registered and exempt) receiving state funding, waivers, or exemptions provide a one-time Selective Service Statement of Registration Status. Eligible students will be prompted to provide this documentation in the Financial Aid Portal in Howdy.

More information is available at the Aggie One Stop Competitive Scholarship Non-Resident Tuition Waiver website (<https://aggie.tamu.edu/financial-aid/types-of-aid/scholarships/competitive-scholarship-non-resident-tuition-waiver/>).

Loan Programs

The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for the Direct Loan program(s) through a financial aid offer.

Students and parents seeking the Parent Loan for Undergraduate Students (PLUS) may obtain information from the Aggie One Stop Federal Direct Parent PLUS Loans website (<https://aggie.tamu.edu/financial-aid/types-of-aid/loans/federal-direct-parent-plus-loans/>). This program requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to assist students who experience temporary financial difficulties with educationally-related expenses. Funding for this program is provided by The Association of Former Students, the Class of 1926, and other University resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their Texas A&M tuition and required fees. The loan is applied directly to the student's tuition and fee account.

Please refer to the Aggie One Stop website (<https://aggie.tamu.edu/>) for detailed information on all of these loan programs and more.

Changes in Status that Impact Financial Aid

Dropping or Q-dropping a course affects a student's enrollment status. In turn, enrollment status may impact certain funding sources as described in the below sections.

- **Enrollment Status** – A student's enrollment status continues to be adjusted throughout the semester when a student drops or Q-drops a course. The change in enrollment status may or may not have immediate impact, depending on timing. Falling to less than half-time enrollment will impact student loan repayment. Federal financial aid can pay only for courses included in the student's degree plan. Enrolling in courses not on the degree plan may result in reduced financial aid eligibility.
- **Scholarships & Financial Aid** – Financial aid checks enrollment status on two occasions – when a student's aid is released to their billing account and on the 12th class day of a fall or spring semester. A student's aid amount can be adjusted if the student's enrollment status changes between the time funds are disbursed to the billing account and the 12th class day. However, after the 12th class day, enrollment status is not a factor for aid that has already disbursed, unless a student withdraws or drops all courses. Instead, any changes in enrollment status will be reviewed through financial aid's satisfactory academic progress standards for subsequent semesters and will not impact current semester aid. If aid has not been disbursed prior to the 12th class day, then enrollment status is checked on the date the aid is disbursed. In the Summer semester, enrollment status is officially checked on the 4th class day of the Summer session(s) in which the student is enrolled.
- **Student Loan Repayment** – Students must maintain at least half-time enrollment throughout the semester for student loans to remain in an in-school deferred status. Dropping below half-time enrollment at any time during the semester will trigger student loans to enter any applicable grace period, with repayment required after the grace period has elapsed. Changes in enrollment status from full-time to half-time have no consequence on student loans. Half-time enrollment for an undergraduate student is defined as 6 hours for the fall and spring semesters.

The Federal/Texas College Work Study Programs

Federal and state programs provide part-time employment for U.S. citizens, permanent residents and eligible non-citizens (within fund limitations) who have an established financial need and desire on-campus employment. Off-campus employment may also be considered if it is at a Texas A&M System member institution, with a Community Service Program partner or for the Reads & Counts Program. Students seeking part-time job opportunities on campus and in the Bryan/College Station area may search the Jobs for Aggies (<https://employees.tamu.edu/jobsforaggies/>) job board.

To qualify for the Federal/Texas College Work Study Programs, a student must have submitted a financial aid application, have financial need, be eligible to work in the United States, be enrolled at least half-time or are accepted for enrollment and plan to enroll at least half-time and be making Satisfactory Academic Progress if enrolled. On a case-by-case basis, work study can be offered to students who are enrolled less than half-time through professional judgment.

The Community Service Program allows students who qualify for the Federal Work Study Program to work part-time with participating local non-profit, governmental and community-based organizations. This program is designed to improve the quality of life for community residents, particularly low-income individuals, or to solve problems related to community needs.

The Texas A&M University Reads and Counts Program is a partner of the national Every Student Succeeds Act (established initially as a part of the No Child Left Behind initiative). It is based on the philosophy that children are our nation's greatest asset. It calls on all Americans to support teachers and help ensure that every child can read well by the end of the third grade. Eligible and dedicated college students are called to serve as reading and math tutors, as well as mentors and role models for area elementary and middle school students.

All work study students are paid minimum wage or higher, work an average of 20 hours per week and are not eligible for paid holidays, retirement, vacation or sick leave. For more information on Federal/Texas College Work Study, the Community Service Program or Texas A&M University Reads and Counts, visit Jobs for Aggies (<https://employees.tamu.edu/jobsforaggies/>) or Aggie One Stop (<https://aggie.tamu.edu/>).

UNIVERSITY POLICIES

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees
- Demand high academic standards from all members of the Aggie community
- Actively promote academic integrity
- Confront instances of academic misconduct through engagement in the Aggie Honor System Office rules and procedures

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

"An Aggie does not lie, cheat or steal, or tolerate those who do."

Upon accepting admission to Texas A&M University or one of its branch campuses, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The website, <http://aggiehonor.tamu.edu>, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations – 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations – Ethics in Research, Scholarship and Creative Work – 15.99.03 (<https://www.tamus.edu/legal/policy/policy-and-regulation-library/>), and Texas A&M University rules and standard administrative procedures – Responsible Conduct in Research and Scholarship – 15.99.03.M1, 15.99.03. M1.01-06 (<http://rules-saps.tamu.edu/TAMURulesAndSAPs.aspx#15>)).

Contact information for each campus can be found at the following:

- Texas A&M University website - <http://aggiehonor.tamu.edu>
- Texas A&M at Galveston website - <https://www.tamug.edu/HonorSystem/>
- Texas A&M at Qatar website - <https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system> ([https://](https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system/)

www.qatar.tamu.edu/students/academic-services/aggie-honor-system/)

Intellectual Property

Intellectual Property includes patentable or unpatentable inventions, discoveries, works of authorship, software, plant varieties, trademarks, mask works, and trade secrets. The ownership, management, and commercialization of such Intellectual Property is set forth in System Policy 17.01 (<https://policies.tamus.edu/17-01.pdf>)– *Intellectual Property Management and Commercialization*. This policy is based on three fundamental principles: enhancing academic freedom, protecting all interested parties, and providing a clear pathway for pursuing technology commercialization.

The Texas A&M University System (TAMUS) recognizes and affirms the traditional academic freedom of its faculty, staff, and students to publish pedagogical, scholarly, or artistic works. In keeping with this philosophy, the System does not claim copyright to pedagogical, scholarly, or artistic works, regardless of their form of expression, except in certain circumstances. See System Regulation 17.01.01 – (<https://policies.tamus.edu/17-01-01.pdf>) *Ownership of Intellectual Property and Tangible Research Property* for more details. Such works include, but are not limited to, copyrightable works of students created in the course of their education, such as dissertations, theses, papers, and journal articles. Furthermore, the System does not claim ownership in popular nonfiction, novels, poems, musical compositions, or other works of artistic imagination that do not constitute significant use of resources and/or are not considered works for hire. Authors of copyrightable works not owned by the System, its members, or another party such as a research sponsor, own the copyright in their works and are free to publish them, register the copyright, and receive any revenues that may result.

As to other types of Intellectual Property, the determination of ownership of such Intellectual Property would generally include the following factors:

1. was the Intellectual Property conceived or developed as a result of activities related to an individual's employment (graduate students who receive a stipend from a member or accept a graduate assistant position at a member are generally considered employees) responsibilities and/or with support from university-administered funds, facilities, or personnel;
2. was the intellectual property conceived or developed in the course of, or resulting from, research supported by a grant or contract with the Federal Government, state government, a nonprofit, or for-profit nongovernmental entity; or
3. was there significant use of System's and/or a member's resources to create or develop the Intellectual Property.

For more information, see System Regulation 17.01.01, Section 2.2 (<https://policies.tamus.edu/17-01-01.pdf>).

Any Intellectual Property that is owned by the System will be disclosed to Texas A&M Innovation. Texas A&M Innovation will review the disclosure and make a determination if it will file for protection and commercialize such Intellectual Property. See System Regulation 17.01.02 – (<https://policies.tamus.edu/17-01-02.pdf>) *Evaluation and Protection of Intellectual Property*. The System will share in any income received that is associated with the licensing of that Intellectual Property with the individual(s) that created or authored such Intellectual Property. For more information on the distribution of such income, please see System Regulation 17.01.04 –

(<https://policies.tamusc.edu/17-01-04.pdf>) *Distribution of Royalties, License Fees and Sale Proceeds from Licensing*.

Responsible Conduct of Research

Texas A&M University is committed to supporting responsible and ethical conduct of research and scholarship among its faculty, staff, and students. As such, the university follows federal, state, and university guidelines regarding Responsible Conduct of Research (RCR). A campus-wide environment pertaining to responsible conduct of research requires researchers to have the knowledge, skills, and tools that enable them to be responsible for their research conduct.

The requirements outlined in University SAP 15.99.99.M0.04 (<https://rules-saps.tamu.edu/PDFs/15.99.99.M0.04.pdf>) apply to any graduate student, postdoctoral researcher, or undergraduate student participating in research. The specific requirements will depend on the *type of student* and the *type of funding* supporting the research.

Requirements for Graduate Students

Education and training in the ethical and responsible conduct of research are integral elements of research for all graduate students, postdoctoral researchers, and undergraduate students who engage in research in any field or who pursue advanced degrees at university facilities. The requirements for graduate students depend on whether the graduate student is participating in research funded internally, by research gift(s), or externally sponsored research. Internally funded research is not funded via an agreement with a sponsor, but is instead funded through internal sources that may or may not be restricted to research. Graduate students enrolled in a course, such as 685 (Directed Studies), 691 (Research), etc., that includes research as an integral element are also subject to these RCR requirements (e.g., any student conducting research as part of a course, honors thesis, master's thesis, or doctoral dissertation).

Graduate students participating in research through a course or funded internally or by research gift(s) *must complete the CITI RCR training within sixty (60) days from their commencement of the research activity*.

Graduate students participating in externally funded research *must complete the CITI RCR training and an additional four hours of face-to-face Core training*. The CITI training must be completed *within sixty (60) days following initiation of such support and the Core training must be completed within the first six months of the student's involvement in externally funded research*.

Additional Information

Additional information, including the specifics on how to complete the training, may be found on the VPR RCR website (<https://vpr.tamu.edu/manage-research/responsible-conduct-of-research/faqs/>). Questions related specifically to graduate students, please contact rcr.grad@tamu.edu.

Student Grievances and Appeals Procedures

Specific procedures at Texas A&M University allow students to pursue a grievance for any of the problems, issues, or concerns listed in the table below. **BEFORE** initiating a grievance, students are strongly encouraged to seek clarification and advice regarding appropriate procedures. The Office of the Vice Provost for Academic Affairs provides Undergraduate Ombuds services (p. 89) to assist students, faculty, staff, and administrators with resolving academic conflicts on an informal and

confidential basis. These are valuable resources for questions regarding grievances and appeals.

Type of Grievance/Issue	A&M Student Rule	University Panel Handling Appeals	Appeals Panel Preliminary and Formal Resolution Procedures
Discrimination and Discrimination Appeals	45 (http://student-rules.tamu.edu/rule45/)	See SAP 08.01.01.M1 (http://rules-saps.tamu.edu/PDFs/08.01.01.M1.pdf)	56 (http://student-rules.tamu.edu/rule56/)

University Statement for Individuals with Disabilities

Texas A&M University (TAMU) is committed to providing reasonable accommodations to qualified students, faculty, staff and visitors and to maintaining an accessible campus community, including making its web sites accessible and usable. Texas A&M University does not discriminate on the basis of an individual's disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in Texas A&M's programs and activities. #Texas A&M provides academic adjustments and auxiliary aides to accommodate the needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution's academic requirements.

Students with disabilities who would like to request accommodations may contact the following resources based on their campus location:

- Texas A&M University, College of Nursing, College of Dentistry, Irma Lerma Rangel College of Pharmacy-College Station, Naresh K. Vashisht College of Medicine, School of Public Health, Institute of Biosciences and Technology, EnMed Program, Bush School in Washington DC, Mays Business School – CityCentre, TAMU Engineering Academies, TAMU Higher Education Center at McAllen, and Texas A&M University at Galveston should contact Disability Resources (<https://disability.tamu.edu/>) at (979) 845-1637 or disability@tamu.edu.
- Texas A&M University School of Law should contact the Office of Student Affairs at (817) 212-4111 or law-disability@law.tamu.edu to request accommodations.
- Irma Lerma Rangel College of Pharmacy in Kingsville should contact the Disability Resource Center at Texas A&M University - Kingsville at (361) 593-3024 or drc.center@tamuk.edu to request accommodations.
- Texas A&M University College of Veterinary Medicine and Biomedical Sciences in Canyon should contact the Office of Student Accessibility at West Texas A&M University – Canyon at (806) 651-2335 or osa@wtamu.edu.
- Texas A&M University at Qatar (TAMUQ) should contact the campus psychologist, Dr. Steve Wilson +974-4423-0047 or stephen.wilson@qatar.tamu.edu.

Students with a disability who believe they have experienced discrimination may contact Jennifer Smith, Associate Vice President and Title IX Coordinator in the Office of Civil Rights and Title IX, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, civilrights@tamu.edu, or at (979) 458-8407. Students can also contact Julie Kuder, the Texas A&M ADA Coordinator, at (979) 845-8116 or ADA.Coordinator@tamu.edu. The office address is YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843. Allegations of discrimination will be immediately forwarded to the Office of Civil Rights and Title IX for review, investigation, or resolution.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (<http://student-rules.tamu.edu/rule46/>) or

TAMUG Student Rule 46, Disability Accommodations in Academic Programs (https://www.tamug.edu/studentrules/Student_Grievance_Procedures/46_Disability_Accommodations.html).

University Statement on Harassment and Discrimination

Texas A&M University is committed to providing a safe and non-discriminatory learning, living, and working environments for all members of the University community. The University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex (including pregnancy and related conditions), religion, national origin, age, disability, genetic information, and veteran status. Texas A&M University will promptly and equitably investigate and resolve all complaints of discrimination, harassment (including sexual harassment and sex-based misconduct), and related retaliation in accordance with applicable federal and state laws, University rules and standard administrative procedures.

The University's response to allegations of discrimination, harassment, and related retaliation will be 1) prompt and equitable, 2) intended to stop and prevent the recurrence of any harassment, and 3) intended to remedy discriminatory effects, as appropriate. A substantiated allegation of such conduct will result in disciplinary action, up to and including separation from the University. The University's student sanctioning guidance for substantiated allegations of discrimination on the basis of sex, including sexual harassment, sexual violence and related retaliation, can be found here: Title IX Cumulative Sanctioning Matrix. (<https://titleix.tamu.edu/wp-content/uploads/2019/03/title-ix-sanctioning-matrices.pdf>)

Students who have questions or believe they have experienced discrimination, harassment, sexual harassment/sex-based misconduct, and/or related retaliation are encouraged to contact Jennifer Smith, Associate Vice President and Title IX Coordinator, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, civilrights@tamu.edu, or at (979) 458-8167. The Office of Civil Rights & Title IX website can be found at titleix.tamu.edu (<https://titleix.tamu.edu/>).

To report incidents, request accommodations, or inquire about discrimination based on disability, you may contact Julie Kuder, ADA Coordinator, at (979) 845-8116 or ADA.Coordinator@tamu.edu. The office address is YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, or see the ADA website at <https://orec.tamu.edu/ada/>. Reported allegations of discrimination will be immediately forwarded to the Office of Civil Rights and Title IX for review, investigation, or resolution.

University Statement on Pregnancy and Related Conditions

Title IX prohibits discrimination on the basis of sex, including pregnancy and parental status in educational programs and activities. This includes harassment and discrimination against a student based on pregnancy, childbirth, false pregnancy, or recovery from any of these conditions.

The university is required to provide reasonable accommodations due to pregnancy and related conditions, including excused absences or alternative participation options when accommodations are medically necessary. Students seeking accommodations should contact Julie Kuder, Pregnancy Accommodations Coordinator, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843 or (979) 845-8116 or email address TIX.Pregnancy@tamu.edu, or Jennifer Smith, Associate

Vice President and Title IX Coordinator, at the YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. For more information, go to <https://titleix.tamu.edu/>.

Students who have questions or believe they have experienced discrimination and/or harassment based on pregnancy, pregnancy related conditions, or parenting status are encouraged to contact Jennifer Smith, Associate Vice President and Title IX Coordinator, at the YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. The Office of Civil Rights & Title IX website can be found at titleix.tamu.edu (<https://titleix.tamu.edu/>).

University Student Rules

Each student enrolled at Texas A&M University is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Students are encouraged to reference the website at <http://student-rules.tamu.edu> (<http://student-rules.tamu.edu/>) for current published rules and regulations.

For information concerning federal and state policies, please reference the appendices (p. 1411) in this catalog.

INTERNATIONAL OPPORTUNITIES FOR STUDENTS

Education Abroad

<https://global.tamu.edu/ea> (<https://global.tamu.edu/ea/>)

Texas A&M University is committed to providing access to high-impact international opportunities for all students. The ability to engage successfully across cultures and the development of international leadership skills and global awareness are crucial for success as graduates enter the workforce and commit to lifelong learning.

Texas A&M Education Abroad is part of the Department of Global Engagement <https://global.tamu.edu/>. Established in 2022, Global Engagement spearheads internationalization at Texas A&M by offering collaborative leadership, strategic coordination, and support for the development and sustainability of global programs and services across the university.

Education Abroad provides access for all Texas A&M students to a broad range of transformational and international experiences lasting from one week to an academic year. Typically, over 5,000 students each year participate in study, intern, volunteer, and research opportunities in over 100 different countries. Our office also contributes to the development of on-campus experiences that foster cultural awareness.

Students are encouraged to make an in-person or virtual appointment with an Education Abroad Advisor by visiting <https://global.tamu.edu/ea/students/advisor> (<https://global.tamu.edu/ea/students/advisor/>). Education Abroad, located on the 1st floor of the Pavilion, weekdays from 8 a.m. – 5 p.m. for additional information.

Faculty-led and Field Trip Programs

Programs led by a Texas A&M faculty member designed around specific A&M courses. To find the most recent offerings, visit <https://global.tamu.edu/ea/students/programs> (<https://global.tamu.edu/ea/students/programs/>).

Exchange Programs

Pay tuition at Texas A&M but “switch places” with counterparts at one of our foreign partner universities. Students can learn more about our exchange partners at <https://global.tamu.edu/ea/students/programs> (<https://global.tamu.edu/ea/students/programs/>).

Affiliate Provider Programs

Pursue a study, intern, volunteer, or research program through one of our third-party affiliate providers. Learn more at <https://global.tamu.edu/ea/students/programs> (<https://global.tamu.edu/ea/students/programs/>).

Intern and Volunteer

Students have a variety of options for credit or non-credit intern or volunteer abroad programs through Texas A&M offices and student organizations as well as third-party affiliate providers. Visit Education Abroad to learn more.

Research and Conferences

Texas A&M faculty engage in research around the world. Students who join faculty to research overseas, who develop independent research opportunities, or attend conferences, must also register with Education Abroad. Learn more at <https://global.tamu.edu/ea/students/programs> (<https://global.tamu.edu/ea/students/programs/>).

Other Opportunities

Students going abroad on a program not organized by a Texas A&M office or department or through an affiliate provider must complete the <https://global.tamu.edu/ea/students/programs> (<https://global.tamu.edu/ea/students/programs/>) if one or more of the following applies:

- Receiving credit (TAMU or transfer) for the experience
- Receiving any support from a TAMU entity (e.g. funding or arranging experience)
- Satisfying a degree or graduation requirement (e.g. thesis or dissertation research)
- Representing Texas A&M University in any way

Funding to Go Abroad

Federal and other financial aid may be adjusted to accommodate for extra costs associated with credit-bearing international experiences.

Students interested in exploring funding options should discuss this with your academic department, your education abroad advisor, and Scholarships & Financial Aid. Learn about funding available through Texas A&M, locally and nationally, and from affiliate providers at <https://global.tamu.edu/ea/funding> (<https://global.tamu.edu/ea/funding/>).

University Locations Abroad

Texas A&M has a research and education center in Costa Rica.

Soltis Center for Research and Education

The Soltis Center for Research and Education in north-central Costa Rica was established in January 2009 to support research, education, and outreach throughout Central America. The unique physical and cultural setting of the center provides students and faculty with research and educational opportunities in tropical ecology, civil engineering, ecosystem sciences, geosciences, public and rural health and agricultural economics.

On-Campus Engagement

Students don't have to go abroad to take advantage of international opportunities offered by Texas A&M. Students who remain on campus are encouraged to participate in many options available including the following:

- Center for International Business Studies (<http://cibs.tamu.edu/>)
- Corps Global Leadership Initiatives (<http://corps.tamu.edu/global/>)
- Global Career Accelerator (<https://www.globaltech.tamu.edu/>)
- Halliburton Engineering Global Programs (<http://engineering.tamu.edu/global/>)
- MSC L.T. Jordan Institute for International Awareness (<http://ltjordan.tamu.edu/>)
- MSC SCOLA (<https://scola.tamu.edu/>)
- MSC SCONA (<http://scona.tamu.edu/>)
- Norman Borlaug Institute for International Agriculture (<http://borlaug.tamu.edu/>)

- Public Policy Internship Program (<http://ppip.tamu.edu/>)
- Scowcroft Institute of International Affairs (<http://bush.tamu.edu/scowcroft/>)
- Student Organizations (<https://studentactivities.tamu.edu/>) – To find internationally focused student organizations, visit <https://getinvolved.tamu.edu/> and search international.
- Undergraduate Research (<http://ugr.tamu.edu/>)

Students should consult their department and college advisers for additional opportunities to engage in global education on or off campus.

HONORS, UNDERGRADUATE RESEARCH AND NATIONAL FELLOWSHIPS

Honors Academy

The Honors Academy provides a university-level Honors experience open to undergraduates from all majors through the minor in Honors. The Honors Academy mission is to challenge high-achieving undergraduate students to develop the personal, professional, and intellectual skills they will need to address tomorrow's multifaceted problems.

Admission to the Honors Academy

Students are admitted to the Honors Academy curriculum on a competitive basis. Incoming freshmen apply as part of their application for admission to the university. Continuing students may apply each spring for entry in the fall prior to completing 60 credit hours at Texas A&M. Transfer students are invited to apply as part of the continuing student application (for summer and fall entrants) or via a transfer student application in the late spring (for spring entrants).

Applications are evaluated on the basis of the student's record of academic achievement and demonstrated potential for creativity, intellectual ability, imagination, curiosity, willingness to try new things and self-awareness. Once admitted to the Honors Academy curriculum, students are designated as "Honors Students" and may then access specific privileges and resources, including additional advising, priority registration, professional development opportunities, contracting non-honors courses for Honors credit, and enrolling in graduate-level courses for undergraduate Honors credit. Honors Students also receive priority for the Honors Housing Community.

To remain in the program, all students (freshman and continuing students) must make progress toward the Honors Fellows distinction and meet minimum co-curricular participation requirements. See the section on Maintaining Honors Status (p. 116).

Continuing students with a minimum 3.5 cumulative GPA who have not applied or not been accepted to the Honors Academy may enroll in major- and major-aligned Honors course work during their assigned registration time. Students who would like to meet with an Honors Academy advisor may sign up for an appointment through our online appointment system (<https://launch.tamu.edu/honors/advising> (<https://launch.tamu.edu/honors/advising/>)). All students interested in Honors opportunities are encouraged to sign up for the Honors weekly email bulletin.

Honors Minor Curriculum

The minor in Honors requires 18 hours of Honors course work including 5 hours of Aggie Core Values Seminars and 13 hours of Honors course work in the student's major or major-aligned courses. Students will complete 2 hours of introductory seminars, 3 hours of 300-level seminars with at least 2 hours in the same topic, and a Culminating Experience. For more details, see Honors Minor (p. 124).

To graduate with the minor in Honors, students must be in good standing with the university at the time of graduation distinction audit and through graduation, must not have an F* on the transcript and not have been found responsible for an Honor Code violation as an Upper Division student. Upper Division status is defined as having earned 60 or more credit hours (including transfer hours and advanced placement credits)

on the date of the violation. This sanction is automatic upon a finding of responsibility and is imposed without regard to the severity of other sanctions imposed by the Aggie Honor System Office. (see Student Rule 16 (<https://student-rules.tamu.edu/rule16/>)).

Required Culminating Experience

To complete Honors Academy curriculum requirements, Honors Students must complete a culminating experience. The requirement may be met by engaging an academic research project in the Undergraduate Research Scholars Program (<https://launch.tamu.edu/undergraduate-research/urs/>), by preparing and teaching a seminar or adding enriching material to an existing course as part of the Undergraduate Teacher Scholars Program subject to approval by their school/college, by undertaking a community service project as a participant in the Undergraduate Service Scholars Program, creating an artistic performance through the Undergraduate Performance Scholars program, or by completing a capstone project designated by their home department that meets expectations described at <http://tx.ag/Capstones> (<http://tx.ag/Capstones/>). Students should consult with a Honors Academy advisor in the planning stages to seek approval for their capstone experience. Students should register for HONR 497 in the first semester of their capstone.

Honors Courses

The Honors Academy works with academic departments across the university to ensure that appropriate Honors courses are offered. Honors courses have limited enrollment and encourage participatory learning. Coursework in Honors courses is intended to provide increased breadth, depth, and complexity, not simply more work or greater difficulty. Honors classes may be special sections of regularly offered courses or courses developed specifically for Honors Students. Students are encouraged to visit regularly with Honors Academy advisors to ensure that their course selection meets Honors Fellows Minor curriculum requirements, as they would confer with a departmental advisor to ensure degree requirements are met.

Honors students are afforded other avenues to earn Honors credit in addition to regularly offered Honors courses. Honors students may contract for Honors credit or take graduate courses that count toward undergraduate degree requirements. Honors students should consult with Honors Academy advisors about these opportunities.

Maintaining Honors Status

To remain in the Honors Academy, Honors Students must:

1. Maintain a 3.5 cumulative GPA,
2. Maintain a 3.25 GPA in honors coursework,
3. Make progress toward curriculum requirements by taking at least 6 Honors credits per year,
4. Submit three reflections each year on professional development engagement.

Honors Students who fail to meet any of these requirements will be given a semester of probation to correct any deficiencies. Honors Students who fail to meet requirements after a semester of probation will be dismissed from the program. Students who are found responsible for an Aggie Honor Code violation that makes them ineligible to graduate with Latin Honors will be removed from the program.

Honors Student Services

Honors Students have access to numerous special services and programs. Throughout the academic year, the Honors Academy coordinates recreational and community-building events, lectures and workshops. Honors Students are invited to engage in leadership opportunities and contribute to the development of the Honors Academy through Honors Student Council and as members of the Honors Housing Community.

Honors Students can take advantage of supplemental advising to help them identify ways to enrich their college experience and complete the requirements for the prestigious Honors Fellows distinction. Throughout their time in the Honors Academy, students are encouraged to take on challenging and enriching experiences such as undergraduate research, study abroad, service learning, capstone experiences, and application to nationally-competitive scholarships and fellowships. This program is uniquely designed to make Honors Students good candidates for opportunities coordinated through the Office of National Fellowships. These include scholar programs such as the Rhodes, Truman, and Goldwater Scholarships. They also include other prestigious opportunities such as the Fulbright Program for U.S. Students and the National Science Foundation Graduate Research Fellowship Program.

Information about upcoming opportunities for Honors Students appear regularly in our email bulletins.

Graduation with Honors

All Honors courses are designated on a student's transcript demonstrating to future employers or graduate and professional admissions committees that the student has engaged with an enriched, challenging curriculum. Students who complete the Honors Academy curriculum and/or complete the Undergraduate Research Scholars program have these distinctions noted on their transcripts.

Undergraduates in some academic colleges and departments may pursue additional transcript distinctions (See <http://honorsprograms.tamu.edu> (<http://honorsprograms.tamu.edu/>)). These distinction requirements work in parallel with the Honors Academy minor but are separate and distinct from the Honors Academy. Many students elect to graduate with multiple distinctions from the Honors Academy, college, or departmental offerings. In general, all Honors transcript distinctions require that the student complete a substantial body of Honors coursework, hold a minimum cumulative Texas A&M GPA of 3.5, and a cumulative Honors course GPA of 3.25, and meet other program participation requirements. Students are encouraged to work through their college and/or departmental advisor to ensure satisfactory completion of the distinction requirements.

These Honors transcript distinctions are separate and distinct from "Latin Honors" such as *cum laude*, *summa cum laude* or *magna cum laude* which are conferred by the Office of the Registrar and are based upon cumulative GPA and residency requirements (See <https://aggie.tamu.edu/graduation/graduation-with-honors/#a-undergraduatestudents-v6rwHm> (<https://aggie.tamu.edu/graduation/graduation-with-honors/#a-undergraduatestudents-v6rwHm>)).

Undergraduate Research

The Office of Undergraduate Research at Texas A&M University enhances the undergraduate experience for all students across campus. Our initiatives foster connections between students, faculty, staff, as well as promote interdisciplinary collaboration and professional development.

Our office meets the evolving needs of students, faculty, and staff by helping shape campus-wide policies for undergraduate research, building programs that empower the Texas A&M community to engage in meaningful scholarly work, and expanding access to information and opportunities for undergraduates to engage in research activity.

Being involved in undergraduate research allows students to participate in a scholarly community of students with common interests, to learn more about their future professional field, and to develop a close working relationship with acclaimed faculty. Research experiences make students more competitive for scholarships, internships, jobs, international opportunities, and admission to top graduate and professional programs. Perhaps most importantly, engaging in undergraduate research allows students to experience the excitement of working collaboratively to create new knowledge, solve cutting-edge problems, and communicate more effectively—life skills that are increasingly valued in our world.

Campus-wide programs coordinated by the Office of Undergraduate Research include the Undergraduate Research Scholars thesis program, the Undergraduate Research Ambassadors outreach, and the publication of *Explorations: the Texas A&M Undergraduate Journal*. The office offers informational sessions and workshops for undergraduate students on getting started in research, finding summer research opportunities, developing research presentations, and organizing thesis writing, as well as workshops for faculty and graduate students on mentoring undergraduate researchers.

The Office of Undergraduate Research also works with groups across campus to promote and facilitate activities that support undergraduate research opportunities, such as Summer Undergraduate Research Experiences, National Science Foundation Research Experiences for Undergraduates (REU) programs, the Undergraduate Research Expo, and the Undergraduate Research Scholars Symposium. Lastly, the office provides assistance for developing externally-funded proposals and implementation of funded projects that have undergraduate research involvement, such as National Science Foundation REU, Beckman Scholars, and Howard Hughes Medical Institute Education grants.

Workshops and Events

The Office of Undergraduate Research hosts informational sessions and workshops on undergraduate research for undergraduate students, graduate students, and faculty. We also coordinate public events that celebrate and promote undergraduate research, providing venues for students to present their research projects, for faculty to recruit new student researchers, and for recognition of research efforts by both students and faculty.

Grant, Proposal, and Project Assistance

The Office of Undergraduate Research provides a wide variety of support services for undergraduate research programs, proposal development, and implementation. Please contact the office directly for more information.

Undergraduate Research Scholars Thesis Program

Completion of the Undergraduate Research Scholars thesis program confers a stand-alone, university-level Honors distinction upon graduation regardless of whether the participant is a member of any Honors program. The two-semester (fall-spring) experience requires undergraduates to engage in an independent research project that culminates in a written undergraduate thesis to be published in

the Undergraduate Research Scholars Capstone Collection in the Texas A&M OAKTrust Repository (<http://oaktrust.library.tamu.edu/handle/1969.1/3367/>).

Students can apply as individuals or as a team up to five members. Students must secure a project supervised by an eligible Texas A&M faculty member prior to applying, as faculty advisor approval is required upon application and upon completion of the project. Check the program page on the Office of Undergraduate Research website (<https://ugr.tamu.edu>) for eligibility requirements. Students are selected for this program based on the quality of their project proposals and their academic records.

The thesis or scholarly product may be a traditional research thesis, a professional report approved by the faculty advisor, or an accepted article in a professional journal. Theses may also include documentation of an exhibit, a performance, or other product as determined by the faculty advisor in collaboration with the Office of Undergraduate Research Office. Students are required to complete a public presentation of their work, such as at the Undergraduate Research Scholars Symposium, Student Research Week, or other venues. Students in the program must also meet specified thesis installment deadlines and formatting requirements.

Staff within the Office of Undergraduate Research support the students and faculty who participate in the program. While staff do not review research content, which is the responsibility of faculty advisors, they do provide students with thesis templates and formatting support, as well as other professional guidance and resources.

Explorations: The Texas A&M Undergraduate Journal

Explorations is an interdisciplinary, student-led journal guided by faculty and administrators that selects and publishes student-authored research, scholarly, and creative pieces of general interest in any area. *Explorations* is composed of an editorial board made of students that work to accomplish the many facets of editing, publishing, and marketing the journal while representing departmental diversity, critical thought, and creativity. The call for new board members is early in the fall semester each year. The call for submissions begins in the fall semester and extends into the early spring semester.

Manuscript submissions go through a two-stage, double-blind, peer-reviewed process. First, synopses of prospective manuscripts are reviewed by faculty-student teams; second, full-length manuscripts are evaluated in another round of peer review. Authors of accepted pieces are paired with student board members who provide editorial assistance and formatting guidance. *Explorations* hosts a journal release event every fall to recognize all who were involved in the making of the latest volume.

Acceptance to the journal is highly competitive—less than 20% of submitted synopses result in published articles. Published articles include a wide range of academic fields, including music, creative poetry, forensics, cancer biology, astrophysics, nanomedicine, computer algorithms, business, geosciences, sociology, aerospace engineering, cultural anthropology, and architecture. The target audience includes faculty, staff, and students of Texas A&M University, other institutions of higher learning, as well as parents, former students, and current high school seniors. To review recent volumes and to find upcoming deadlines, visit explorations.tamu.edu (<http://explorations.tamu.edu/>).

Undergraduate Research Ambassadors

The Undergraduate Research Ambassadors represent the Office of Undergraduate Research and work to inspire broader engagement in undergraduate research by educating and serving the Texas A&M University community and beyond. Undergraduate Research Ambassadors are available to share advice with fellow undergraduates on how to get started in research and help their peers find research projects, talk to faculty advisors, and make the most of their undergraduate research experience at Texas A&M.

The Office of Undergraduate Research seeks Ambassadors that will represent diverse academic disciplines across campus, including science, engineering, arts, humanities, business, social sciences, and more. Undergraduates with a background in research, a GPA of 3.0 or higher, outstanding oral communication skills, and the ability to describe research to a general audience are encouraged to apply to the program. They are trained in presentation and leadership skills, and participate in a variety of activities, including meeting with highly-placed members of the University Administration, distinguished faculty, outstanding alumni, prospective students, and parents.

Students in the Undergraduate Research Ambassadors program will gain knowledge in networking, public speaking, leadership opportunities, and will have increased competitiveness on graduate and professional school applications. Ambassadors often receive additional grant opportunities and other professional development experiences as a result of their involvement.

Capstones

Capstones provides a year-long integrative experience that allows students to combine their career goals, majors, and interests in faculty-mentored independent projects that focus on leadership, research, community service, teaching, or performance.

The Honors Academy offers one year Capstone experiences to any junior or senior with a cumulative Texas A&M GPA of 3.0 or above. A listing of capstone options can be found at <http://tx.ag/Capstones> (<http://tx.ag/Capstones/>).

The Undergraduate Teacher Scholars program allows students to collaborate closely with a Texas A&M University faculty member to create a one-credit hour seminar or to improve an existing course in collaboration with a faculty expert. The Teacher Scholar will have the opportunity to research, design, and arrange the content of the seminar. The Teacher Scholar will be responsible for the presentation of class material under the supervision of the Texas A&M University supporting faculty member.

The Undergraduate Service Scholars program pairs students with community leaders to develop and carry out projects that benefit the greater community. The Undergraduate Service Scholars capstone allows the student to draw upon their undergraduate education to plan, coordinate, and execute a project aimed at improving the community while learning about issues that affect that community.

The Undergraduate Performance Scholars program allows students to explore the impact of art on their academic career. Under the supervision of a working artist, students will create a performance project that creatively synthesizes their art and experience.

All capstones require a proposal and timeline, two semesters engaging with the project, supervision by a faculty member or similar expert, a

public presentation, regular reflection, and a scholarly project appropriate for the field. Students are selected for participation in these programs based on the quality of their proposals, their academic record and the recommendation of their faculty or community advisor.

The Office of National Fellowships

The Office of National Fellowships at Texas A&M University supports students in pursuing nationally and internationally competitive awards. Our office provides guidance throughout the application process, from identifying opportunities to developing strong application materials. We collaborate with faculty, staff, and campus partners to create an environment where students can excel in their academic and professional aspirations. Through mentorship, advising, and tailored resources, we help Texas A&M University students maximize their potential and achieve their goals.

About National Fellowships

National Fellowships provide students with the opportunity to reflect on their accomplishments and goals, synthesize their thoughts into a coherent whole, and achieve national recognition with access to unparalleled opportunities around the world.

We are eager to assist all Texas A&M students with the National Fellowships process. However, we also have awards that we emphasize in terms of our facilitation. We distinguish between two types of awards, namely, “core awards” and “non-core awards.”

Core Awards

Core awards are National Fellowships that require a campus nomination. For these awards, students need to apply through our internal campus process. These are awards that involve campus deadlines and review committees. These awards include the following National Fellowships:

- Rhodes Scholarship
- Marshall Scholarship
- Churchill Scholarship
- Truman Scholarship
- Barry Goldwater Scholarship
- Boren Scholarship and Boren Fellowship
- Fulbright U.S. Student Program
- Gilman Scholarship
- James C. Gaither Junior Fellows Program
- Udall Scholarship
- Freeman ASIA
- Astronaut Scholarship

Non-core Awards

Non-core awards are National Fellowships that do not require a campus nomination. Students have the ability to apply for these awards independently. While we are happy to assist students with these processes, core awards take priority in terms of the usage of our resources. These awards include, but are not limited to:

- Critical Language Scholarship
- Knight Hennessy Fellowship
- Pickering Fellowship
- SALAM Study Abroad Scholarship
- Yenching Academy Fellowship

- Payne Fellowship
- NSF Graduate Research Fellowship

Becoming a candidate

Becoming a competitive National Fellowship Candidate takes time, dedication, focus and ability. Some National Fellowships require Texas A&M to convene a selection committee and choose only a few students to receive an official nomination. It is highly unlikely that you will be able to walk in the door to the Office of National Fellowships for the first time and have an application that is competitive, especially for those National Fellowships that require Texas A&M to endorse you. Tips for becoming a competitive candidate include:

- Start Early
 - You will need an average of six months to create a competitive application, provided that you have all the experiences, qualifications, and skills required by the selection criteria of these National Fellowships. As soon as you find that you are interested in a National Fellowship, you should contact the National Fellowship advisor (natlfellows@tamu.edu (natlfellows@tamu.edu?subject=National%20Fellowships%20Inquiry))
- Know the requirements
 - Many fellowships have eligibility criteria based on factors such as GPR, citizenship, or major. It is your responsibility to know whether or not you are eligible for an award. If you have questions about the eligibility criteria, the National Fellowship advisor can help you determine whether or not there is an issue.
- Have a backup plan
 - No matter how strong of a candidate you are, there is no guarantee that you will win the award. You should have a contingency plan for what you will do if you are not selected.
- Do your research
 - A National Fellowship that is extremely prestigious or has a large monetary award may not necessarily be a good fit for you. You should research the fellowship to understand what qualities they are looking for in an applicant and what the awarding body hopes to accomplish by providing this opportunity.
- Be honest
 - Never exaggerate or lie about your accomplishments and/or activities. “Honesty is the best policy.”
- Be prepared to work
 - Preparing a strong application will require many hours of hard work. You will be researching, writing, editing, and revising your application throughout the process. Make sure to take advantage of resources like the University Writing Center and Career Center. In applying for a National Fellowship, you gain knowledge of not only the fellowship, but also deeper knowledge of yourself.
- National Fellowship Candidates often come with strengths in a particular group of areas.
 - Academics
 - It is unlikely that your application will look competitive without a successful academic record. Different fellowships have different requirements
 - Service
 - Leadership
 - Research
 - Foreign Language
- Value the process

- Since it is not guaranteed that you will receive a national fellowship, learn to value the process of applying for one. These are the skills you will hone while applying for national fellowships:
 - Writing and Communication Skills
 - Crafting compelling personal statements and research proposals
 - Writing concisely and persuasively
 - Tailoring messages to different audiences
 - Articulating academic and career goals clearly
 - Research and Analytical Skills
 - Conducting thorough background research on fellowship opportunities
 - Developing well-reasoned arguments and justifications for projects
 - Synthesizing complex ideas in an accessible way
 - Critical Thinking and Self-Reflection
 - Evaluating personal strengths, weaknesses, and long-term aspirations
 - Demonstrating intellectual curiosity and originality
 - Connecting past experiences to future goals in a meaningful way
 - Leadership and Initiative
 - Demonstrating leadership experiences through written narratives
 - Showcasing initiative in academic, extracurricular, and community work
 - Advocating for oneself and one's ideas in a compelling manner
 - Time Management and Organization
 - Balancing application preparation with academic and personal responsibilities
 - Meeting multiple deadlines for essays, recommendations, and interviews
 - Strategically planning coursework and experiences to align with selection criteria
 - Interview and Presentation Skills
 - Answering questions concisely and thoughtfully in high-stakes interviews
 - Engaging with interviewers confidently and authentically
 - Thinking on one's feet and adapting responses to different scenarios
 - Networking and Relationship-Building
 - Seeking mentorship and feedback from faculty and advisors
 - Building relationships with recommenders and potential collaborators
 - Learning to present oneself professionally in formal and informal settings
 - Resilience and Adaptability
 - Handling constructive criticism and revising application materials accordingly
 - Learning from setbacks and reapplying if necessary
 - Navigating uncertainty in competitive selection processes

TRANSITION ACADEMIC PROGRAMS

Transition Academic Programs

Transition Academic Programs (TAP) provides academic advising and administrative support for students transitioning between majors, as well as programming for students transitioning from high school to college. Campus-wide TAP programs include: the Texas A&M-Blinn TEAM co-enrollment partnership with Blinn College (TEAM), the Aggie Gateway to Success provisional admission program (Gateway), the university's transitional major (General Studies), a program and course for students to investigate academic majors (Explore), and a personalized, directed advising program for at-risk students (Aggies Thrive).

Academic Advising for Students in TAP Programs

Students in the TEAM and Gateway programs are supported by TAP academic advisors for the length of those programs. Continuing students approved to enter TAP to qualify for entry to a different degree-granting major are temporarily classified as "General Studies" (GEST) majors. The degree-granting major the student is pursuing is posted in the university's database so scholarships and financial can be applied to the student's costs of enrollment. A TAP academic advisor will help each General Studies and TEAM student develop a realistic academic plan for transitioning into a specific major and progressing toward timely graduation.

Aggie Gateway to Success

Qualified students are selected for provisional admission by the Office of Admissions to participate in the Aggie Gateway to Success (AGS or Gateway) program as General Studies major students. Students participating in this mandatory on-campus program are assigned 6 hours of University Core Curriculum courses plus a study skills class during the second summer session (July-August) prior to their first fall semester at Texas A&M University. They participate in peer-mentor led groups. Students are expected to live on-campus while participating in the program. Participating students must attend a designated New Student Conference prior to the start of the summer session. Gateway students may apply for summer Financial Aid.

Students who pass all assigned summer courses with at least a 2.0 grade point average and no failing grades earn the right to continue as fully admitted students for the fall semester. They gain the opportunity to earn acceptance into any major program for which they meet regular change of curriculum requirements. Gateway students are advised by Transition Academic Programs advisors about the best way to complete these requirements.

The Texas A&M-Blinn TEAM Program

The Texas A&M-Blinn TEAM Program (TEAM) is a two-year collaborative, co-enrollment partnership between Texas A&M University and Blinn College. To be considered for selection to the TEAM program, a prospective student must apply for regular freshman admission and meet all admission criteria. Participating TEAM students enroll in a minimum of 12 total credit hours per semester, divided between Texas A&M and Blinn. TEAM students are able to transition into degree-granting majors at Texas A&M via the change of major process when they satisfy

benchmark credit and grade point criteria at both schools, and complete departmental entry requirements. It is sometimes possible for TEAM students to transition to full enrollment at A&M in less than two years. TEAM students are able to access student services and programs on both campuses, to include participation in the Corps of Cadets and Greek Life. They may apply for on-campus housing at A&M, as well as financial aid (based upon their combined credit hours from both schools).

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

INTERDISCIPLINARY PROGRAMS

Minors

- Entrepreneurship Minor (p. 122)
- Honors Minor (p. 124)
- Leadership Minor (p. 124)

Masters

- Master of Agribusiness in Agribusiness (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/mab/>)

Entrepreneurship - Minor

This program fosters development of a creative, visionary mindset and spirit and prepares students to be opportunity seekers and creators that identify, evaluate, and implement innovative, value-added solutions.

The Entrepreneurship minor includes discipline-specific course clusters intended to aid students' course selection. Course clusters are not restrictive. Students may select courses within a single cluster or across multiple clusters to best meet their interests and professional goals.

¹ Choose 2 three-hour courses or 1 three-hour course plus 3 one-hour courses. Students following the Texas A&M University at Qatar cluster may substitute up to six credit hours transfer coursework from another Education City institution with advisor approval.

- ² Course has prerequisites; student should consult with academic advisor or instructor before enrolling.
- ³ Approval required.
- ⁴ Choose at least three hours at 300- to 400-level.
- ⁵ MARA 445 is for business majors only.
- ⁶ Students following the Texas A&M University at Qatar cluster may substitute up to 3 credit hours transfer coursework from another Education City institution with advisor approval.
- ⁷ Department code appropriate to research or internship focus; departmental approval required.
- ⁸ Qualifying undergraduates may complete MGMT 632 Technology Commercialization to meet this requirement; approval required.
- ⁹ Qualifying undergraduates may complete MGMT 632 Technology Commercialization or SOCI 689 Social Entrepreneurship to meet this requirement; approval required.
- ¹⁰ Capstone courses must be taken in residency at Texas A&M University at Galveston, no substitutions from outside universities will suffice this requirement.
- ¹¹ Students enrolled in the Texas A&M University at Galveston cluster must choose their capstone course based on their chosen degree to satisfy this requirement. MARA 446 is for business majors only, while MARA 461 is for non-business majors.

Honors - Minor

This program provides students the opportunity to refine personal goals, develop professional skills, and pursue intellectual challenge as part of an interdisciplinary community.

The Honors minor focuses on the Aggie Core Values as a framework for understanding personal motivation and opportunities to impact the greater good. The coursework and extracurricular requirements for the minor provide opportunities for values discernment, critical thinking, and practical application.

Program Requirements

Code	Title	Semester Credit Hours
Aggie core values		
Select one of the following:		2
HONR 101	Honors Seminar in Respect, & HONR 102 Excellence, and Leadership and Honors Seminar in Loyalty, Integrity, and Selfless Service ¹

Total Semester Credit Hours	
18	
¹	Sequence intended for first and second semester, first time in college students.
²	Intended for transfer and continuing students admitted to the program.
³	At least two seminars must focus on the same core value.
⁴	Select from Honors designated courses used to fulfill general education requirements (e.g. University Core Curriculum (p. 26), Cultural Discourse (p. 48), International and Cultural Diversity (p. 49), W- (writing) and C- (communication) (p. 34)).
⁵	Select from any 200-499 major-specific Honors designated courses. At least 3 hours must be from the 400-level. At least 3 hours must be from the 300-level or above.
⁶	Requires the application of acquired knowledge and regular reflection (e.g. existing Capstones (https://catalog.tamu.edu/undergraduate/honors-undergraduate-research/), major capstone classes).
⁷	Three professional development activities each academic year in the program are required with reflections submitted in an associated Canvas community.

Leadership - Minor

This program focuses on leadership practice with a grounding in leadership theory.

The university-level leadership minor provides students the skills and knowledge needed to become leaders demonstrated by an ability to apply ethical frameworks to varied settings and situations, respect others, and do what is right even if it is more difficult. The minor's curriculum consists of foundational courses in leadership theory, practice-focused courses that allow students to develop depth or breadth in areas that support their professional goals, a capstone experience that requires a leadership practicum, and a required reflection.

Courses used to fulfill requirements of the leadership minor may not be used to fulfill area of concentration requirements for university studies degrees.

¹ At least 3 of the 9 Depth and Breadth hours must be completed at the 300-400 level.

² Departmental approval required.

A grade of C or better is required in all courses. A grade of S cannot be used to meet the program requirements.

COLLEGE OF AGRICULTURE AND LIFE SCIENCES

Administrative Officers

Vice Chancellor and Dean - Jeffrey W. Savell, PhD

Executive Associate Dean - Patricia E. Klein, PhD

Associate Dean for Academic Affairs - Mary Bryk, PhD

Associate Dean for Programmatic Success - Craig Coates, PhD

Associate Vice Chancellor for Producer Relations and Associate Dean for Student Development - Chris L. Skaggs, PhD

Associate Dean for Faculty Affairs - Kim Dooley, PhD

Assistant Dean for Student Success - Jenna Kurten, PhD

General Statement

The College of Agriculture and Life Sciences is widely recognized as a leader in the academic programs offered by its departments. The students we educate and the scientific advancements we make and share improve the lives of Texans and people around the world through agriculture. Our faculty members and students are breeding crops to help conserve water, unlocking genetic mysteries to cure diseases, fostering best practices in environmental stewardship, and improving the safety, healthfulness, and abundance of the world's food supply. Through innovative curricula, we prepare students for careers as scientists, business leaders, engineers, educators, physicians, affiliated health professionals, sales representatives, and other professionals.

Our academic programs focus on high-impact learning experiences and the science, technology, engineering, and math (STEM) courses that prepare students for a variety of careers. Students gain technical expertise, learn to think creatively and critically, solve problems, make decisions, communicate effectively, and learn how to work effectively with people of varied backgrounds. Faculty members who teach undergraduate classes include many who are recognized nationally and internationally for research and other accomplishments in their disciplines. Undergraduate students also have opportunities to participate in research themselves.

All students are encouraged to participate in at least three high-impact experiences before graduation, such as undergraduate research, field study, an internship, or international experience. The college has study abroad programs in the Americas, Asia, Europe, Oceania, Africa, and the Caribbean. Honors programs are available in many of the college's academic departments. There are numerous student organizations sponsored by departments or the college, such as the College of Agriculture and Life Sciences Student Council. Participation in student organizations promotes interaction among students with similar interests and fosters the development of leadership skills.

The College of Agriculture and Life Sciences and its departments offer a variety of scholarships to students on a competitive basis. Many are reserved for incoming freshmen or transfer students. Additional information and application forms for college-level scholarships for current students can be obtained from the Scholarships & Financial Aid

Office. Information about departmental scholarships can be obtained from the departments directly.

College of Agriculture and Life Sciences Baccalaureate Degree Programs

Each major can be arranged to prepare students for graduate study or admission to professional schools in medicine, dentistry, veterinary medicine, other health professions, and law. Students in programs, such as biochemistry, genetics, and nutritional sciences, are highly recruited for medicine, nursing, and other health professions. Animal science and wildlife management are among several excellent choices for students interested in veterinary medicine. Students with a background in natural resources, the agricultural industry, forensics, or life sciences can use that knowledge to their advantage if they choose to enter law school. An environmental lawyer with a degree in a natural resource area is better equipped to integrate science with the law.

Advising is provided for each student in the college through advising centers based on academic discipline. Professional academic advisors assist with course selection and other academic issues. Along with departmental faculty, our academic advisors also serve as mentors for career planning and admission to graduate or professional school. Advisors serve as professional consultants for students in the College with the objective of avoiding problems if possible and solving problems if needed.

Requirements for Graduation

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades.

Internships

Internships provide real-world experience in industries related to a student's education and professional career preparation. Students return to campus with a broader perspective and more intense interest in their education. The experiences are so valuable that many students complete more than one internship. Most departments in the College offer academic credit for the satisfactory completion of an internship. In fact, an internship is required for graduation in some degree programs.

The Agricultural and Natural Resources Policy (ANRP) Internship Program places students from the College of Agriculture and Life Sciences in policy-based internships in Austin, TX, Washington, D.C. and Rome, Italy for a semester or summer. Selection for the program is based upon factors such as academic performance, leadership, and a student's general interest in learning the policy process.

Graduate Study

All departments in the College of Agriculture and Life Sciences offer graduate degrees at the masters and doctoral levels. Many departments offer courses and programs online.

Students are encouraged to contact the department in which they wish to obtain information about graduate study. Information on admission, programs available, etc., can be found in the *Texas A&M University Graduate and Professional Catalog*.

Teacher Certification

Texas teacher certification in agricultural science is available through the Department of Agricultural Leadership, Education, and Communications. Certification is granted through the State Board of Educator Certification (SBEC) upon a student's completion of the course of study administered by the department. The undergraduate major in agricultural education includes all coursework required for teacher certification. The requirements can be completed with any major in the College of Agriculture and Life Sciences. See an advisor in Agricultural Education, Department of Agricultural Leadership, Education, and Communications, for more information.

Department of Agricultural Economics

- Bachelor of Science in Agribusiness (p. 134)
- Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 135)
- Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 137)
- Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 138)
- Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 139)
- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 141)
- Bachelor of Science in Financial Planning (p. 143)

Department of Agricultural Leadership, Education, and Communications

- Bachelor of Science in Agricultural Communications and Journalism (p. 149)
- Bachelor of Science in Agricultural Education (p. 150)
- Bachelor of Science in Agricultural Leadership and Development (p. 151)

Department of Animal Science

- Bachelor of Science in Animal Science, Production/Industry Option (p. 157)
- Bachelor of Science in Animal Science, Science Option (p. 158)

Department of Biochemistry and Biophysics

- Bachelor of Science in Biochemistry (p. 162)
- Bachelor of Science in Genetics (p. 163)

Department of Biological and Agricultural Engineering

- Bachelor of Science in Agricultural Systems Management (p. 166)
- Bachelor of Science in Biological and Agricultural Engineering (p. 167) — offered in conjunction with the College of Engineering
- Bachelor of Science in Biological and Agricultural Engineering, Agricultural Engineering Track (p. 169)
- Bachelor of Science in Biological and Agricultural Engineering, Biological Engineering Track (p. 170)

- Bachelor of Science in Biological and Agricultural Engineering, Natural Resources Engineering Track (p. 172)

Department of Ecology and Conservation Biology

- Bachelor of Science in Ecology and Conservation Biology, Ecoinformatics Track (p. 175)
- Bachelor of Science in Ecology and Conservation Biology, Ecology and Conservation Biology Track (p. 177)
- Bachelor of Science in Ecology and Conservation Biology, Forest Resources Track (p. 178)
- Bachelor of Science in Ecology and Conservation Biology, Teaching Track (p. 180)
- Bachelor of Science in Ecology and Conservation Biology, Vertebrate Zoology Track (p. 181)

Department of Entomology

- Bachelor of Science in Entomology (p. 184)
- Bachelor of Science in Forensic and Investigative Sciences, Pre-Law Emphasis (p. 187)
- Bachelor of Science in Forensic and Investigative Sciences, Science Emphasis (p. 189)

Department of Food Science and Technology

- Bachelor of Science in Food Science and Technology, Food Industry Option (p. 192)
- Bachelor of Science in Food Science and Technology, Food Science Option (p. 194)

Department of Horticultural Sciences

- Bachelor of Arts in Horticulture (p. 198)
- Bachelor of Science in Horticulture (p. 200)

Department of Hospitality, Hotel Management and Tourism

- Bachelor of Science in Hospitality, Hotel Management and Tourism, Business Hospitality Track (p. 203)
- Bachelor of Science in Hospitality, Hotel Management and Tourism, Event, Tourism and Recreation Management Track (p. 204)
- Bachelor of Science in Hospitality, Hotel Management and Tourism, Hotel and Resort Management Track (p. 205)

Department of Nutrition

- Bachelor of Science in Nutrition, Didactic Program in Dietetics Track (p. 211)
- Bachelor of Science in Nutrition, Human Health Track (p. 212)

Department of Plant Pathology and Microbiology

- Bachelor of Science in Bioenvironmental Sciences (p. 215)
- Bachelor of Science in Environmental Studies (p. 217)

Department of Poultry Science

- Bachelor of Science in Poultry Science, Industry Emphasis (p. 219)
- Bachelor of Science in Poultry Science, Technical Emphasis (p. 220)

Department of Rangeland, Wildlife and Fisheries Management

- Bachelor of Science in Rangeland, Wildlife and Fisheries Management, Aquaculture and Fisheries Management Track (p. 222)
- Bachelor of Science in Rangeland, Wildlife and Fisheries Management, Natural Resources Management and Policy Track (p. 223)
- Bachelor of Science in Rangeland, Wildlife and Fisheries Management, Outdoor Enterprise Management Track (p. 225)
- Bachelor of Science in Rangeland, Wildlife and Fisheries Management, Rangeland Management Track (p. 226)
- Bachelor of Science in Rangeland, Wildlife and Fisheries Management, Wildlife Management Track (p. 227)
- Bachelor of Science in Rangeland, Wildlife and Fisheries Management and Master of Public Service Administration, 5-Year Degree Program (p. 228)

Department of Soil and Crop Sciences

- Bachelor of Science in Plant and Environmental Soil Science, Crops Emphasis (p. 232)
- Bachelor of Science in Plant and Environmental Soil Science, Soil and Water Emphasis (p. 233)
- Bachelor of Science in Turfgrass Science (p. 234)

Minors

Department of Agricultural Economics

- Agribusiness Entrepreneurship Minor
- Agricultural Economics Minor (p. 145)
- AgriFood Sales Minor (p. 145)
- Financial Planning Minor (p. 146)

Department of Agricultural Leadership, Education, and Communications

- Agricultural Communications and Journalism Minor (p. 152)
- Extension Education Minor (p. 153)
- International Agricultural Development Minor (p. 153)
- Leadership Minor (p. 154)
- Youth Development Minor (p. 154)

Department of Biochemistry and Biophysics

- Biochemistry Minor (p. 164)
- Genetics Minor (p. 165)

Department of Biological and Agricultural Engineering

- Agricultural Systems Management Minor (p. 173)
- Food Engineering Minor (p. 173)

Department of Ecology and Conservation Biology

- Ecology and Conservation Biology Minor (p. 182)

Department of Entomology

- Entomology Minor (p. 190)

Department of Horticultural Sciences

- Horticulture Minor (p. 201)

Department of Hospitality, Hotel Management and Tourism

- Recreation Management Minor (p. 207)
- Tourism Management Minor (p. 207)

Department of Nutrition

- Nutrition Minor (p. 214)

Department of Plant Pathology and Microbiology

- Bioenvironmental Sciences Minor (p. 218)

Department of Poultry Science

- Poultry Science Minor (p. 221)

Department of Rangeland, Wildlife and Fisheries Management

- Park and Natural Resource Management Minor (p. 229)
- Rangeland Management Minor (p. 230)
- Wildlife and Fisheries Management Minor (p. 230)

Department of Soil and Crop Sciences

- Agronomy Minor (p. 235)
- Environmental Soil Science Minor (p. 236)
- Plant Breeding Minor (p. 236)

Certificates

Department of Agricultural Economics

- International Trade and Agriculture Certificate (p. 146)

Department of Animal Science

- Equine Science Certificate (p. 160)
- Meat Science Certificate (p. 160)

Department of Entomology

- Public Health Entomology Certificate (p. 191)

Department of Food Science and Technology

- Coffee Processing and Quality Certificate (p. 196)
- Food Diversity Certificate (p. 197)

Department of Horticultural Sciences

- Floral Design Certificate (p. 201)
- Viticulture and Enology Certificate (p. 202)

Department of Hospitality, Hotel Management and Tourism

- Hospitality Management Certificate (p. 207)
- Professional Event Management Certificate (p. 208)
- Recreation and Park Management Certificate (p. 208)
- Tourism Management Certificate (p. 209)
- Youth Development Certificate (<https://catalog.tamu.edu/undergraduate/agriculture-life-sciences/hospitality-hotel-management-tourism/youth-development-certificate/>)

Department of Nutrition

- Culinary Health Certificate (p. 214)
- Sport Nutrition Certificate (p. 214)

Masters

Department of Agricultural Economics

- Master of Science in Agricultural Economics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-economics/ms/>)

Department of Agricultural Leadership, Education, and Communications

- Master of Agriculture in Agricultural Development (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/agricultural-development-agriculture-masters/>)
- Master of Applied Youth Development (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/applied-youth-development-may/>)
- Master of Science in Agricultural Leadership, Education, and Communications (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/agricultural-leadership-education-communications/ms/>)

Department of Animal Science

- Master of Agriculture in Animal Science (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/magr/>)
- Master of Equine Industry Management in Equine Industry Management (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/agriculture-life-sciences/animal-science/equine-industry-reproduction-ms/>)

Department of Agricultural Economics

The Department of Agricultural Economics offers Bachelor of Science degree programs in the fields of Agricultural Economics and Agribusiness. The BS in Agricultural Economics allows students to direct their plan of study towards their professional interests by selecting a concentration in either Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, or Rural Entrepreneurship (course requirements for the freshman and sophomore years are identical for all concentrations). The department also offers an accelerated five-year program in association with the Bush School of Government and Public Service that provides AGECE students with the opportunity to receive a BS in Agricultural Economics and a Masters of Public Service and Administration. The BS in Agribusiness is a selective program that provides students with a comprehensive and versatile business skill set designed to address the challenges of both agribusinesses and non-agricultural companies, incorporating coursework from the Mays Business School.

Department of Agricultural Economics Honors Program

The Department of Agricultural Economics at Texas A&M University offers an enhanced learning experience to qualified, academically-talented students majoring in Agricultural Economics and Agribusiness. Participation in the AGECE Honors Program enriches a student's college experience by offering scholastically-challenging curriculum and stimulating an interest in research. As honors classes are restricted in size, students also have the opportunity to work closely with the renowned faculty at Texas A&M University while developing the vital problem solving and critical thinking skills that are valued in today's fast-paced business culture. The coursework and co-curricular activities offered through this program are specially designed to promote academic and professional success. Honors distinctions are also beneficial to students who are planning to attend graduate school or law school by demonstrating one's ability to handle a challenging course of study.

The Department of Agricultural Economics Honors Program is administered through the AGECE Undergraduate Programs Office (located in Room 214 of the Agriculture and Life Sciences Building). For more information, contact the AGECE Undergraduate Programs Office at (979) 845-4911 or visit our website at <https://agecon.tamu.edu/undergraduate-honors-program/>.

Faculty

Baffoe-Bonnie, Anthony, Assistant Professor
Agricultural Economics
PHD, University of Georgia, 2018

Boadu, Frederick O, Professor
Agricultural Economics
JD, Georgia State University, 1988
PHD, University of Kentucky, 1981

Bohnsack, John, Visiting Lecturer
Agricultural Economics
MS, North Dakota State University, 2011

Bryant, Henry L, Research Professor
Agricultural Economics
PHD, Texas A&M University, 2003

Buenger, Sarah D, Visiting Lecturer
Agricultural Economics
MS, College for Financial Planning, 2015

Capps, Oral, Executive Professor
Agricultural Economics
PHD, Virginia Tech, 1979

Carpenter, Donnie, Visiting Lecturer
Agricultural Economics
MS, Texas Tech University, 2006

Choe, Kyoungin, Lecturer
Agricultural Economics
MA1, North Carolina State University, 2024

Crowe, Ronald E., Instructional Assistant Professor
Agricultural Economics
PHD, University of Central Florida, 1997

Dharmasena, Senarath, Instructional Associate Professor
Agricultural Economics
PHD, Texas A&M University, 2010

Durden, Aaron, Visiting Assistant Professor of the Practice
Agricultural Economics
MBA, City University of Seattle, 2007

Erskine, Didine M, Visiting Lecturer
Agricultural Economics
BA, University of Maine, 2023

Fei, Chengcheng, Assistant Professor
Agricultural Economics
PHD, Texas A&M University, 2019

Feldman, Paul, Assistant Professor
Agricultural Economics
PHD, University of California - San Diego, 2019

Field, Christopher C, Visiting Assistant Professor of the Practice
Agricultural Economics
MA, Abilene Christian University, 2013

Garcia, Lucas, Instructional Assistant Professor
Agricultural Economics
PHD, Walden University, 2019

Halliwell, Scott E, Assistant Professor of the Practice
Agricultural Economics
BS, Penn State University, 1990

Harness, Nathan J, Instructional Professor
Agricultural Economics
PHD, Texas Tech University, 2007

Ishdorj, Ariun, Associate Professor
Agricultural Economics
PHD, Iowa State University, 2008

Johnson, Joseph A, Instructor
Agricultural Economics
MS, Texas Tech University, 2020

Kafle, Kashi Ram, Assistant Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 2017

Kibriya, Shahriar R, Research Assistant Professor
Agricultural Economics
PHD, Texas A & M University, 2011

Kilmer, Nicholas G, Senior Lecturer
Agricultural Economics
MBA, University of Texas at Tyler, 2011

Leatham, David J, Professor
Agricultural Economics
PHD, Perdue University, 1983

Lepper, Marissa, Assistant Professor
Agricultural Economics
PHD, University of Pittsburgh, 2023

Li, Liqing, Assistant Professor
Agricultural Economics
PHD, University of Illinois at Urbana - Champaign, 2020

Liu, Yong, Assistant Professor
Agricultural Economics
PHD, University of Guelph, 2019

Lopez Barrera, Emiliano, Assistant Professor
Agricultural Economics
PHD, Purdue University, 2021

McCarl, Bruce A, Senior Professor
Agricultural Economics
PHD, The Pennsylvania State University, 1973

Melo Guerrero, Grace, Assistant Professor
Agricultural Economics
PHD, University of Georgia, 2017

Menzies, Max D, Instructional Associate Professor
Agricultural Economics
PHD, Texas A&M University, 2017

Mjelde, James W, Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 1985

Nayga, Rodolfo, Professor
Agricultural Economics
PHD, Texas A&M University, 1991

Newcomb, Deanna, Visiting Lecturer
Agricultural Economics
BBA, Stephen F Austin State University, 1992

Ng, Desmond W, Associate Professor
Agricultural Economics
PHD, University of Illinois at Urbana-Champaign, 2001

Onder, Harun, Associate Professor
Agricultural Economics
PHD, Florida International University, 2010

Palma, Marco A, Professor
Agricultural Economics
PHD, University of Florida, 2005

Park, Doyoung, Assistant Professor
Agricultural Economics
PHD, University of Colorado Boulder, 2019

Park, John, Professor
Agricultural Economics
PHD, Texas A&M University, 1996

Peguero, Felipe E. E., Assistant Professor
Agricultural Economics
PHD, Louisiana State University, 2018

Ratzlaff, Brandon, Visiting Lecturer
Agricultural Economics
MBA, The University of Texas at Dallas, 2010

Rister, M E, Professor
Agricultural Economics
PHD, Michigan State University, 1981

Roach, David S, Lecturer
Agricultural Economics
MBA, University of Texas at Permian Basin, 2019

Rouhi Rad, Mani, Assistant Professor
Agricultural Economics
PHD, University of Illinois, 2017

Somogyi, Simon, Professor
Agricultural Economics
PHD, University of Adelaide, 2012

Springfield, Clark, Professor of the Practice
Agricultural Economics
PHD, Texas A&M University, 2008

Thompson, Troy Neal, Assistant Professor of the Practice
Agricultural Economics
MS, Texas A&M University, 1989

Vedenov, Dmitry, Associate Professor
Agricultural Economics
PHD, Ohio State University, 2001

Villavicencio, Xavier Alfredo, Instructional Assistant Professor
Agricultural Economics
PHD, Texas A&M University, 2010

Webb, Samuel C, Visiting Lecturer
Agricultural Economics
DJ, Texas Tech University School of Law, 2010

Weber, Kaitlyn Maree Dinges, Instructional Assistant Professor
Agricultural Economics
PHD, Kansas State University, 2022

Whiddon, James, Visiting Assistant Professor of the Practice
Agricultural Economics
MS, The American College, 1998

Woodward, Richard T, Professor
Agricultural Economics
PHD, University of Wisconsin, 1997

Wu, Ximing, Professor
Agricultural Economics
PHD, University of California at Berkeley, 2003

Zapata Raudale, Samuel D, Associate Professor
Agricultural Economics
PHD, Clemson University, 2012

Zhang, Yvette Yu, Professor
Agricultural Economics
PHD, Texas A&M University, 2010

Majors

- Bachelor of Science in Agribusiness (p. 134)
- Bachelor of Science in Agricultural Economics, Finance and Real Estate Option (p. 135)
- Bachelor of Science in Agricultural Economics, Food Marketing Systems Option (p. 137)
- Bachelor of Science in Agricultural Economics, Policy and Economic Analysis Option (p. 138)
- Bachelor of Science in Agricultural Economics, Rural Entrepreneurship Option (p. 139)
- Bachelor of Science in Agricultural Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 141)
- Bachelor of Science in Financial Planning (p. 143)

Minors

- Agribusiness Entrepreneurship Minor (p. 144)
- Agricultural Economics Minor (p. 145)
- AgriFood Sales Minor (p. 145)
- Financial Planning Minor (p. 146)

Certificates

- International Trade and Agriculture Certificate (p. 146)

Agribusiness - BS

In this program, students learn about the nation's growing agribusiness sector and its contributions to the agriculture and natural resources industries. They also gain core business knowledge and a strong understanding of the unique institutional and managerial challenges facing agribusiness firms.

Curriculum in Agribusiness (BS)

The Bachelor of Science degree in Agribusiness combines selected Core Business Knowledge classes from a degree in business with coursework emphasizing the understanding of the unique institutional and managerial challenges facing agribusiness firms. By integrating business management principles with applied technical knowledge, students develop practical decision-making skills to address challenges facing agribusiness firms in the production, processing and distribution of food and fiber in Texas, the nation, and the world. Students in the BS Agribusiness degree program will take selected coursework in the Mays Business School.

Requirements for graduation are listed in the Texas A&M University Student Rules and this catalog. With the exception of general elective requirements, courses taken to satisfy degree requirements must be taken for letter grades. In addition, students pursuing the Agribusiness degree must have a GPA of 2.0 in the courses included in the Core Business Knowledge.

Upper-Level Entry into Agribusiness

The requirements and procedures for consideration for upper level are as follows:

1. In order to be considered for upper-level and possible admission into the program of study in agribusiness, a student must have:
 - a. Satisfactorily completed at least 60 semester credit hours.
 - b. Satisfactorily completed all of the following eight courses:

Code	Title	Semester Credit Hours
ACCT 229	Introductory Accounting	3
ACCT 230	Introductory Accounting	3
AGEC 217	Fundamentals of Agricultural Economics Analysis	3
ECON 202	Principles of Economics	3
ECON 203	Principles of Economics	3
MATH 140	Mathematics for Business and Social Sciences	3
MATH 142	Business Calculus	3

- c. Students should complete the freshman and sophomore sequence of courses as listed under Curriculum in Agribusiness. Following this sequence will allow the timely application for consideration for upper-level.
 - d. Admission, if granted, will be effective upon successful completion of the in-process courses; however, if all requirements are not met prior to the start of the next semester, admission will be revoked.
2. Transfer students: Transfer students admitted to the Agribusiness degree will be classified as AGBL (lower-level Agribusiness) students until they complete all requirements listed previously in item 1.

3. Change of curriculum students: Texas A&M students who change curriculum into the Agribusiness degree from another college or department at the University will be classified as AGBL (lower-level Agribusiness) students until they complete all requirements listed in item 1.

Program Requirements

First Year Fall

		Semester Credit Hours
AGEC 105	Introduction to Agricultural Economics ^{1,2}	3
MATH 140	Mathematics for Business and Social Sciences ²	3
	American History (p. 30) ³	3
	Communication elective (p. 27) ⁴	3
	Life and physical sciences elective (p. 27)	3
Semester Credit Hours		15

Spring

AGEC 117	Critical Thinking and Decision Making in Agricultural Economics ⁵	1
MATH 142	Business Calculus ²	3
	American History (p. 30) ³	3
	Creative arts elective (p. 30) ⁶	3
	Language, philosophy and culture elective (p. 28) ⁶	3
	Life and physical sciences elective (p. 27)	3
Semester Credit Hours		16

Second Year

Fall

ACCT 229	Introductory Accounting	3
ECON 202	Principles of Economics	3
MGMT 311	Legal and Social Environment of Business	3
	Government/Political science elective (p. 31) ³	3
	Life and physical sciences elective (p. 27)	3
Semester Credit Hours		15

Spring

ACCT 230	Introductory Accounting	3

¹ Satisfies the University Core Curriculum (p. 26) Social and Behavioral Sciences requirement.

² Must make a grade of C or better.

³ For those students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree (p. 34).

⁴ Three hours must be selected from ENGL 103 or ENGL 104.

⁵ All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.

⁶ The Graduation requirements include 3 hours of cultural discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

⁷ Six hours required. A complete list of approved international electives is available in the college Undergraduate Program Office, Room 214 of the Agriculture and Life Sciences Building, or can be found on our website.

⁸ Three hours of technical agriculture electives to be selected from any course offered by the College of Agriculture and Life Sciences except 285s, 484s, 485s and agricultural economics courses. To be selected in consultation with an advisor.

⁹ Any Texas A&M or transfer course (except ASCC 001- ASCC 003; and KINE 199) not used to meet other requirements.

Agricultural Economics - BS, Finance and Real Estate Option

This program is designed to assist in the development of economic theory and quantitative analysis skills that students can apply to analyze and communicate about the real estate and finance industries in Texas, the U.S., and the world.

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for the above Agricultural Economics options.

The Finance and Real Estate option equips students with the analytical and critical thinking skills to understand financial markets in the farm sector, corporate sector, and government sector. Students are especially prepared for work in the farm credit industry and with regional banks. Students can also choose to focus on real estate with a heavy emphasis placed on commercial real estate development, management, and appraisal. Students have high-impact activities available such as industry internships, study abroad opportunities, and the ability to directly work with faculty on research projects.

The program also prepares students for advanced degrees, such as, Master of Finance, Master of Real Estate, or Master of Business Administration. Graduates will have strong backgrounds in finance, real estate, accounting, and management. Additionally, students can earn credits through the Appraiser Qualifications Board, setting them up to become licensed appraisers via the Texas Appraiser Licensing and Certification Board. For more information on obtaining an appraisal license in Texas, students can visit the Texas Appraiser Licensing and Certification Board website.

Agricultural Economics - BS, Food Marketing Systems Option

This program is designed to assist in the development of economic theory and quantitative analysis skills that students can apply to analyze and communicate about the food marketing issues in Texas, the nation, and the world.

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for the above Agricultural Economics options.

The Food Marketing Systems option students apply analytical skills to address operations involved in movement of agricultural commodities from farmer to consumer via several intermediaries; functions involve buying, selling, transportation, storage, financing, grading, pricing and risk bearing; agricultural supply chain or value chain is studied in detail; marketing aspects of commodities and differentiated goods. A student's educational experience is further enriched with supportive high-impact opportunities such as business and industry internships, study abroad, directed studies and research, industry professional mentorship, and participation in prestigious sales competitions such as the National Agri-Marketing Association (NAMA) student competition.

The BS in Agricultural Economics with a Food Marketing Systems option is also offered at the Texas A&M Higher Education Center in McAllen, Texas.

Agricultural Economics - BS, Policy and Economic Analysis Option

This program is designed to assist in the development of economic theory and quantitative analysis skills that students can apply to analyze and communicate about agricultural policy and economic issues in Texas, the nation, and the world.

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for the above Agricultural Economics options.

The Policy and Economic Analysis option equips students with analytical skills to understand the causes, nature, and effects of government participation in agriculture; and interrelationship of the American agriculture and agribusiness sector with the political and economic system, public administration, and interest group representation. A student's educational experience is further enriched with supportive high-impact opportunities such as participation in the Agriculture and Natural Resource Program (ANRP) Congressional Internship; Texas State Government Internships, Commodity groups and Lobby internship; Study Abroad and Independent research. With the aid of faculty and staff advisors, students in the Policy and Economic Analysis option design

their plan of study reflecting their particular future goals by incorporating higher-level electives outside the department. Students interested in graduate education may focus on developing a strong background in the following areas: quantitative analysis, economic theory, and applied economics. Those interested in entering law school may focus on courses in law, political science, and technical writing. Furthermore, those students interested in careers in government and policy may focus on courses in policy, political science, and management.

Graduates are trained for a wide variety of careers in local, state, and federal governments, and also with commodity groups and lobby firms. The program prepares students to continue on to graduate school, or pursue the 5-year combined program (BS AGECE and MPS PSAA (p. 141)) with the Bush School of Government and Public Service. A good number of students have pursued this option and continued on to law school.

The BS in Agricultural Economics with a Policy and Economic Analysis option is also offered at the Texas A&M Higher Education Center in McAllen, Texas.

Agricultural Economics - BS, Rural Entrepreneurship Option

This program is designed to provide a well-founded basis in principles, concepts and methods for students interested in owning and/or managing or otherwise being engaged in working with a rural business.

The Bachelor of Science degree in Agricultural Economics offers students four options: Finance and Real Estate, Food Marketing Systems, Policy and Economic Analysis, and Rural Entrepreneurship. The course requirements for the freshman and sophomore years are the same for the above Agricultural Economics options.

Using "real world" application, students in the Rural Entrepreneurship option engage in firm-level problem identification, analysis, decision making, and management control. Integrating ideas, numbers, and mentor interactions are central to the courses' paradigms.

The option focuses on providing students 'hands-on' opportunities to develop economic and financial numerical evaluations of their business ideas. Numerous extracurricular 'outside-the-classroom' activities are used to supplement the course curriculum, providing transformational learning experiences for the students. The capstone characteristics of the classes afford the students connectivity opportunities to relate their other coursework to pragmatic applications in entrepreneurial pursuits of their individual interests.

Courses include frequent dialogues on contemporary rural and metropolitan entrepreneurial decision situations, applied computer analyses, and development of each student's management information system to accommodate their continued learning. Students are encouraged to 'think outside the box,' with exploration of non-traditional production, marketing, financing, and management opportunities being requisite components of students' individualized business plan development.

The program's pedagogy incorporates case studies, proprietary business enterprise spreadsheets, and direct mentorship in the lectures and labs, as students identify their unique business enterprises to research and develop as business plans. 'Real-world' visiting "Professors-for-a-Day" (Profs-for-a-Day) are an integral feature of these classes, with entrepreneurs, financial lenders, industry insurance representatives, marketing professionals, and others presenting in the classes.

Students pursuing this option are afforded opportunities to participate in numerous extracurricular activities made possible through donors to the Rister '74 Agribusiness Entrepreneurship Program. Included in such activities are the Edwards '73 Agribusiness Entrepreneurship Mentoring Forum, the Alpha Painting Business Pitch, and the Texas Farm

¹ Must make a grade of C or better.

² Students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree. (p. 34)

³ Any course offered by the College of Agriculture and Life Sciences, except 285s, 484s, 485s and agricultural economics courses.

⁴ The Graduation requirements include a requirement for 3 hours of international and cultural diversity courses and 3 hours of cultural discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

Credit Entrepreneurial Dreams Symposium. Objectives of the Rister '74 Agribusiness Entrepreneurship Program include the following:

- Launch new entrepreneurs.
- Enhance agribusiness entrepreneurship acumen for College of Agriculture and Life Sciences' and other Texas A&M University students; and
- Facilitate networking among current and former students and other professionals.

Agricultural Economics - 5-Year Bachelor of Science and Master of Public Service Administration

This program allows students to earn both a BS in Agricultural Economics and an MPSA degree with a focus on public policy analysis in five years.

The combined program between the Department of Agricultural Economics and the Bush School of Government and Public Service allows undergraduate Agricultural Economics students to enter the Master of Public Service and Administration Program at the beginning of their senior year (typically year four) at Texas A&M University.

To be considered for the 5-year combined degree program, Agricultural Economics students must have a minimum 3.25 GPA and have completed 103 of the 120 hours of course work required to receive a bachelor's degree. These courses must include all of the specific prerequisites for a BS in Agricultural Economics, as well as the courses required by the College of Agriculture and Life Sciences and by Texas A&M University for an undergraduate degree.

Students in the combined program will submit the same materials as other MPSA applicants; the one exception to this is the submission of a 2-page application found on the Bush School website rather than the application at the Texas A&M UniCAS application portal, hence no application fee. Students whose records are judged to be competitive by the mid-January deadline will be invited to attend the GBS Interview Conference Weekend in late February/early March. The admissions criteria for the five-year program will be the same as for other MPSA students.

Students who choose not to finish the MPSA degree after being admitted to the five-year program may exit the program at any time. Completed MPSA courses will be applied to their bachelor's degree in Agricultural Economics, and students will select the Agricultural Economics option area that is most appropriate for their interest. Failure to complete the MPSA program will in no way impede their ability to attain a bachelor's degree in Agricultural Economics when the requirements for that degree are completed.

Advising for the five-year program will involve a coordinated effort by academic advisors in the College of Agriculture and Life Sciences and the Director of the MPSA program in the Bush School. Academic advisors in the College of Agriculture and Life Sciences will help ensure that interested students have satisfied the prerequisite course requirements for their bachelor's degree by the beginning of their senior year. The MPSA director and GBS director of recruiting will also be available for Agricultural Economics students who wish to set up appointments to talk individually about the MPSA program's curriculum and career opportunities available to its graduates.

Students in the five-year program will be required to complete the same curriculum as other students admitted to the Bush School's MPSA program.

¹ This course meets the Social and Behavioral Sciences requirement.

² Completion of four semesters of upper-level ROTC may be substituted for 3 hours of American History and 3 hours of Government/Political Science. Students under ROTC contract, see Requirement 7 of the Requirements for Baccalaureate Degree. (p. 34)

³ All undergraduate students must take at least two courses in their major designated as writing intensive (W). This course is an approved W course.

⁴ The Graduation requirements include a requirement for 3 hours of international and cultural diversity courses and 3 hours of cultural discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

⁵ To be selected in consultation with an advisor.

⁶ Course double-counted.

The program includes a total of 168 hours with 16 hours being applied toward both the Bachelor of Science in Agricultural Economics and [the Master of Public Service Administration](#). (13 hours of electives and 3 hours of 600-level AGECE coursework).

See the MPSA program in the Graduate and Professional Catalog for the MPSA requirements.

Financial Planning - BS

This program prepares students to create personalized financial strategies for clients, covering topics like savings, investments, tax planning, retirement, debt management, estate planning, risk management, and client communication.

Financial planning is the study of financial decision-making throughout the life cycle of individuals, families, and organizations. Financial planning is ranked among the fastest-growing careers in the nation. Graduates of this program are qualified for careers in financial planning, financial counseling, financial literacy education, financial technology,

mutual fund companies, consumer banking, accounting, consulting, government agencies, and other related fields. This degree will also prepare students for advanced graduate studies in accounting, psychology, finance, law, and agribusiness.

The Bachelor of Science in Financial Planning degree program is registered with the Certified Financial Planning Board of Standards (CFP Board). All coursework meets the Certified Financial Planner™ education requirement. Upon completing the program, students are eligible to take the CFP® Certification Examination.

Students in this program will acquire marketable skills, including:

- In-depth knowledge of financial systems at the macro and microeconomic level
- Financial counseling and the ability to provide fundamental financial advice
- Client communication and in-depth understanding of the financial language used across multiple industries
- Identification of social and ethical issues related to household finances
- Data Analysis and Modeling of consumer choice
- Computer-based forecasting using household financial modeling
- Comprehensive knowledge of all areas (retirement, taxation, estate, investments, education, risk management, and ethics) of financial planning

Financial planning students will have access to:

- A case-based and experiential curriculum that will empower learners to engage and understand the impact of finances and financial decision-making across the lifecycle
- Structured mentorship and high-impact learning opportunities provided via existing relationships with local private and public organizations
- Opportunities to provide presentations to the local community and student body regarding financial planning and financial literacy
- National financial planning organizations and career placement

Agribusiness Entrepreneurship - Minor

The minor is for students interested in starting their own business, working in an existing family-owned business, working for an entrepreneur, pursuing employment with a bank or financial institution, or wanting a working knowledge of business development practices and strategies.

Using “real world” application, students engage in firm-level problem identification, analysis, decision making, and management control. Integrating ideas, numbers, and mentor interactions are central to the courses’ paradigms. The capstone characteristics of the classes afford the students connectivity opportunities to relate their other coursework to pragmatic applications in entrepreneurial pursuits of their individual interests.

Students will choose to develop a business plan for their own professional career pursuit, or to evaluate a business from an investor’s or consultant’s perspective in the coursework included in this minor. The instructor and student will mutually agree on a business venture and business settings selected. The options for students’ businesses are wide and varied, with locations in either a rural or metropolitan setting. Students are encouraged to ‘think outside the box,’ with exploration of non-traditional production, marketing, financing, and management opportunities being requisite components of students’ individualized business plan development.

A critical ingredient in the Agribusiness Entrepreneurship Minor is learning to establish and develop a large network with successful entrepreneurs and other professionals. This minor offers ample

opportunities for you to learn how to develop networking strategies in the classroom and in social settings.

Innovation and entrepreneurship are not limited to one field/degree area; therefore, the Agribusiness Entrepreneurship Minor is open to all majors.

¹ Must be taken as MGMT 489 Innovative Product Design: The Lean Startup Method.

Must have declared a major.

Must meet all prerequisites for each course listed above prior to enrolling in any required course.

Must make a grade of 'C' or better in each required course.

Must have a cumulative GPR of 2.0 or higher.

Agricultural Economics - Minor

This minor equips students with fundamental knowledge of how economics contributes to business solutions for industries across agriculture.

The minor in Agricultural Economics is available to all students enrolled at Texas A&M University. The primary educational objective of this minor program is to provide students, majoring in other fields, with a fundamental knowledge of the fields of agricultural economics. The courses required for this minor will cover the major business elements of the agricultural industry.

Program Requirements

Total Semester Credit Hours		18

¹ The following courses will not count toward the 6 hours of electives: AGEC 481, AGEC 484, and AGEC 485. Students are encouraged to visit the Agricultural Economics advisors to select the elective courses based on their career interests.

Students must make a grade of "C" or better in all courses.

AgriFood Sales - Minor

This minor is a great fit for students looking to pursue a career in professional sales, build a strong network of industry representatives and explore career development opportunities.

Elevate your career in professional sales and client management with our minor in AgriFood Sales. Tailored for students who want to understand how to build lasting client relationships, this program empowers you to master the art of sales with a focus on emotional intelligence and strategic self-management.

By joining our program, you'll expand your network through direct connections with industry leaders, gaining insights that open doors to dynamic career opportunities. Our innovative curriculum—grounded in hands-on industry partnerships and high-impact learning experiences—equips you with the skills to manage complex client interactions and drive business success.

While rooted in AgriFood, the core competencies you develop here seamlessly translate to diverse industries such as financial planning, technology, pharmaceuticals, and more. This minor is a powerful addition to any degree plan, setting you apart as a well-rounded, highly sought-after professional ready to excel in client management and sales.

Invest in your future, build a robust professional network, and transform your passion for sales and client management into a thriving career.

FINP 435	Financial Planning for Professionals	
Total Semester Credit Hours		16

Students must have a declared major.

Must meet all prerequisite requirements for each course listed prior to enrolling in the course.

Must have a cumulative GPR of 2.0 or higher.

Must must earn a grade of “C” or better in each required course.

Financial Planning - Minor

This program prepares students for leadership roles in the financial planning profession.

The minor in Financial Planning prepares students for leadership roles in a rapidly growing profession. Financial planners advise their clients about financial decisions, including investments, insurance, taxes, retirement, estate planning, and budgeting. The goal of a financial planner is to help households bring confidence and peace of mind through the establishment of a financial plan to meet their life goals.

Eligibility requirements to declare a Financial Planning minor:

1. Students must be junior or senior classification.
2. Students must have a declared major.
3. Students must have the ability to successfully complete all minor coursework before graduation.
4. Complete an introductory finance course before applying for the minor. The prerequisite course *does not apply* to the minor.
5. Complete a minor application and receive approval from the Financial Planning Program.

For more information about the minor, visit our website (<https://financialplanning.tamu.edu/>).

Must make a grade of C or better in all courses.

International Trade and Agriculture - Certificate

In this program, students learn how global forces shape agriculture and how they impact the exchange of capital, goods and services across international borders or territories.

The Certificate in International Trade and Agriculture (CITA) offered by the Department of Agricultural Economics is designed to provide students with a complete knowledge and understanding of the global forces shaping change in agriculture. The CITA is available to all students, provided that all prerequisites are met. Specific certificate requirements are available in the Undergraduate Programs Office in the Department of Agricultural Economics, Room 214 of the Agriculture and Life Sciences Building or at: <https://agecon.tamu.edu/minors-and-certificates/>.

Total Semester Credit Hours**15**

Study abroad, foreign languages, and international internships are encouraged and allowed to contribute toward the 15 hours required for the certificate. No more than three hours of foreign language or six hours of study abroad or six hours of international internship may be counted as credit toward the certificate.

Department of Agricultural Leadership, Education, and Communications

The Department of Agricultural Leadership, Education, and Communications (ALEC) includes a student-centered faculty and staff offering undergraduate degrees leading to professional careers. Using a blend of asynchronous and synchronous courses, our programs offer a unique combination of practical, hands-on experiences and critical people skills required for success in today's fast-paced careers. Upon graduation, our students are uniquely equipped for leadership, education, communications, and training roles in the broad field of agricultural education and human performance in both domestic and international settings.

We offer three Bachelor of Science degrees: Agricultural Communications and Journalism, Agricultural Education, and Agricultural Leadership and Development; and five minors: Agricultural Communications and Journalism, Extension Education, International Agricultural Development, Leadership, and Youth Development.

Degree Programs

Agricultural Communications and Journalism (AGCJ) (p. 149)

This program prepares the student to work in writing, broadcasting, public relations, advertising, and multimedia communications. Students in this program will complete courses in writing, editing, and basic digital design. Courses include professional skills in the areas of social media, scientific writing, journalism, magazine production, photography, public relations, advertising, and multimedia content creation.

Agricultural Leadership and Development (ALED) (p. 151)

This program prepares the student to work with people involved in agriculture and life sciences and other related fields. Students in this program will complete courses in personal and organizational leadership, ethics, and leading change. Specialized courses include courses such as

team leadership, leading volunteers, cultural pluralism, and agricultural extension-related courses.

Agricultural Education (AGED) (p. 150)

This program prepares the student for a degree and teacher certification in Agricultural Food and Natural Resources (AFNR Grades 6-12). Students in this program will study agricultural content areas, educational technologies, instructional design, and program planning in agricultural education. The program is aimed at creating high-quality secondary agricultural education teachers. Program graduates can succeed in agricultural education careers as well as industry careers.

For more information about each of our programs, visit the specific majors tab (<https://catalog.tamu.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-education-communications/#majorstext>) or visit our department website. (<https://alec.tamu.edu/academics/undergraduate/>)

Degree Minors

We offer five minors to complement a student's degree. Each minor provides our students with foundational knowledge and concepts required for success in future careers. Careers may include communication specialists, Extension educators, developers of youth programs, and students seeking positions as leaders in domestic or international settings.

- Agricultural Communications and Journalism (AGCJ)
- Extension Education (EXED)
- International Agricultural Development (IDAG)
- Leadership (LDAG)
- Youth Development (YDEV)

For more information on each minor, visit our department website (<https://alec.tamu.edu/academics/undergraduate/>).

Agricultural Communications and Journalism - BS

This program prepares students for a career in communications, marketing, public relations and more.

Students graduating with a Bachelor of Science in Agricultural Communications and Journalism are prepared for employment in agricultural businesses, organizations, associations, and government agencies at all levels. Students obtain an understanding of media and science communication theory and industry best-practices to apply what they learn outside of the classroom. Graduates gain skills in the areas of social media, scientific writing, journalism, magazine production, photography, public relations, advertising, and multimedia content creation.

Students who wish to develop specific career plans may do so in consultation with their Agricultural Communications and Journalism advisor. With approval of the advisor and the dean's office, substitutions may be made in the required scientific and technical agriculture courses to help meet the student's goals.

For more information about this major, visit our website (<https://alec.tamu.edu/b-s-ag-communications-journalism/>). (<https://alec.tamu.edu/academics/undergraduate/agricultural-communications/>)

- ⁵ Select from any AGCJ 300-499 (<https://catalog.tamu.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-education-communications/#coursestext>) course not used elsewhere (except AGCJ 311).
- ⁶ Agriculture emphasis area courses will be used to develop a cohesive career emphasis and are to be selected in consultation with an academic advisor. Select from any 100-499 course in the College of Agriculture and Life Sciences.
- ⁷ Select from any 100-499 course not used elsewhere (except AGCJ 100-499 (<https://catalog.tamu.edu/undergraduate/agriculture-life-sciences/agricultural-leadership-education-communications/#coursestext>) or ENGL 103).

A grade of C or better must be maintained in all AGCJ courses.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See an academic advisor.

Only one of the following will satisfy the requirements for AGCJ degree: AGCJ 105 or JOUR 102.

Only one of the following will satisfy the requirements for AGCJ degree: AGCJ 313 or JOUR 203.

Agricultural Education - BS

This program prepares students to successfully work toward teacher certification, resulting in the ability to teach Agriculture, Food, and Natural Resources (AFNR) classes in a secondary school setting.

The Agricultural Education curriculum includes a combination of courses in scientific agriculture and professional education that will meet requirements for employment and advanced study in careers emphasizing formal and informal programs of education. A student following this curriculum must meet the requirements of admission to the teacher education program as determined by the State of Texas. Enrollment in this program requires a passing score on the TExES 272 AFNR content exam and a full semester performing an off-campus professional teaching internship in a secondary classroom in order to graduate. After successful completion of the professional teaching semester, a student may be eligible to enter public schools as a teacher of AFNR certified by the Texas Education Agency.

In addition to teaching in a secondary agriculture program, career options may include working as an agricultural extension agent, working for a

marketing agency or agricultural supply company, or working in other industries related to agricultural education.

A student majoring in agricultural education will be counseled by an advisor to ensure that the program developed with the student will satisfy his or her unique interests, needs and professional aspirations, as well as requirements for teacher certification.

For more information on this major, visit our website (<https://alec.tamu.edu/b-s-agricultural-science/>).

A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See an academic advisor.

Agricultural Leadership and Development - BS

This program is multidisciplinary and designed to develop students for leadership positions in local, state, regional, and national organizations and agencies in the agriculture industry and beyond.

Students in this major will learn about the fundamentals of leadership and human development and develop their own leadership capabilities and communication skills to lead and work with people. The Agricultural Leadership and Development program includes a multidisciplinary curriculum emphasizing the development of tools to be successful both professionally and personally. Upon graduation, students are prepared for leadership positions in local, state, regional, and national groups, organizations, and agencies that are involved in the agricultural industry.

The degree requires students to declare a university-approved minor that serves as a context for students to apply their leadership knowledge.

For more information about this major, visit our website (<https://alec.tamu.edu/b-s-ag-leadership/>). (<https://alec.tamu.edu/academics/undergraduate/agricultural-communications/>)

³ Select course not taken the previous semester.

⁴ Select from ALEC 300-499 (p. 914); ALED 300-499. (p. 916)

Students are required to make a C or better for each of their courses in the major coursework area.

Before registering as a junior, students must develop a degree program in consultation with a departmental advisor.

At least 36 credits must be 300- and 400-level courses.

The Graduation requirements include 3 hours of International and Cultural Diversity (p. 49), and 3 hours of Cultural Discourse. (p. 48) A course satisfying a Core category, a college/department requirement or a free elective can be used to satisfy this requirement.

Agricultural Communications and Journalism - Minor

This program focuses on written communication, preparing students for roles in media relations.

Students seeking a minor in Agricultural Communications and Journalism (AGCJ) should begin the process by discussing the option with their academic advisor in their major. Students should then make an appointment with an AGCJ advisor to discuss interests.

The AGCJ minor is highly focused on written communication. Students should consider their interest in writing before beginning the minor. Students seeking to complete the AGCJ minor will graduate prepared to assist with writing news releases, social media posts, photography or other media relations activities in many communication fields.

Eligibility requirements to declare an AGCJ Minor

Students must:

1. Have a cumulative 2.5 GPA or higher and be in good standing with Texas A&M University;

2. Have completed less than 70 hours;
3. Meet with an AGCJ advisor for approval.

For more information about this minor, visit our website (<https://alec.tamu.edu/academics/undergraduate/minor-agricultural-communications-journalism/>).

Program Requirements

Code	Title	Semester Credit Hours
AGCJ 105	Introduction to Agriculture and Life Sciences Communications	3

AGCJ 406	Public Relations and Campaigns in Agriculture and Life Sciences	
AGCJ 408	Advertising Copy and Design in Agriculture and Life Sciences	
AGCJ 410	Risk Communications in Science and Society	
AGCJ 411	Advanced Research in Agriculture and Life Sciences Communications	
Total Semester Credit Hours		18

Students must make a grade of C or better in all courses.

Extension Education - Minor

This program provides students with formal instruction in Extension Education necessary to be successful Extension educators.

The curriculum prepares students in the history and philosophy of Extension education, extension educational methodologies, program management and program development. Students explore Extension educational roles in their future contexts; develop an awareness of program development, volunteer management, Extension educational theories and models for future application as an Extension educator. The curriculum includes foundational leadership concepts coursework, credits in a specialized area of leadership, and an Extension internship.

Eligibility requirements to declare minor in Extension Education

1. Students must have a cumulative 2.5 GPA or higher and be in good standing with Texas A&M University.
2. Students must have completed 75 hours or less at time of application.
3. Students must have a declared major.
4. Any prerequisite coursework for classes must be completed, but does not count towards the actual minor.

For more information about this minor, visit our website (<https://alec.tamu.edu/minors/>).

Minimum of 6 hours at 300- to 400-level.

International Agricultural Development - Minor

This program provides students with formal instruction in international agricultural development concepts and practical experiences through language acquisition, study/research abroad, and/or international fieldwork.

The International Agricultural Development (IDAG) curriculum prepares students for successful post-baccalaureate international careers or graduate studies particularly aligned with the Graduate Certificate in International Agriculture (INAG).

Students critically examine current international agriculture issues and/or topics in diversity and communications. IDAG coursework includes foundational concepts and upper-division foreign languages or approved international experiences.

Eligibility requirements to declare an IDAG Minor

Students must have:

1. A cumulative 2.0 GPA or higher and be in good standing with Texas A&M University;
2. A declared major;
3. Completed 75 hours or less at time of application;
4. A meeting with an IDAG advisor; and,
5. Complete an IDAG Minor application.

For more information about this minor, visit our website (<https://alec.tamu.edu/minors/>).

Leadership - Minor

This program provides students with formal instruction in leadership theory and the application of concepts necessary to be successful leaders in future careers.

The Leadership (LDAG) curriculum prepares students to be effective industry, community, and organizational leaders. Students explore leadership roles in their future contexts, develop an awareness of personal leadership characteristics, and apply leadership theories and models for future professional experiences. The coursework includes foundational leadership concepts and advanced leadership concepts.

Eligibility requirements to declare Minor in Leadership (LDAG)

1. Students are encouraged to have completed or be currently enrolled in ALED 202.
2. Students must have a cumulative 2.0 GPA or higher and be in good standing with Texas A&M University.
3. Students must have the ability to successfully complete all minor coursework before graduation – meaning 3 to 4 long semesters.
4. Students must have a declared major.

For more information about this minor, visit our website (<https://alec.tamu.edu/minors/>).

ALED 440	Leading Change	3
Total Semester Credit Hours		15

Must make a C or better in all minor coursework.

Youth Development - Minor

This program focuses on programs and services that contribute to the development of young people's personal, physical, social and educational abilities.

The Department of Agricultural Leadership, Education and Communications offers a minor in Youth Development as a supplement to other majors. Youth workers are program developers, leaders and managers who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with

young people, and societal factors that both contribute to and inhibit the development of young people.

For more information about this minor, visit the department's Undergraduate Minors website (<https://alec.tamu.edu/minors/>).

ALEC 474	Positive Youth Development in the Age of Artificial Intelligence	
Total Semester Credit Hours		15

Students must make a grade of C or better in all courses.

Department of Animal Science

The curricula in Animal Science are designed to prepare students for rewarding careers in animal-oriented agribusiness. The millions of domestic animals that provide food, fiber and recreation for humans offer a variety of career opportunities for animal science graduates.

Students completing the Bachelor of Science degree in Animal Science are in demand by both the private and public sectors. Career paths include livestock production and the extensive infrastructure that provides the products and services required for management, marketing and processing of livestock and livestock products. Students receive training in nutrition, breeding, reproductive physiology, meat science, dairy products, wool and mohair, and the production and management of livestock. Extensive laboratory facilities and livestock operations located on or near campus in the Animal Science Teaching, Research and Extension Complex facilitate practical application of the scientific principles.

Leadership skills are developed through participation in a wide array of extracurricular activities, including departmental clubs, judging teams and continuing education/youth programs. A substantial number of students gain experience in a variety of disciplines through high impact learning experiences such as internships, research, study abroad and field trips.

Wu, Guoyao, Professor
Animal Science
PHD, University of Alberta, Canada, 1989

Majors

- Bachelor of Science in Animal Science, Production/Industry Option (p. 157)
- Bachelor of Science in Animal Science, Science Option (p. 158)

Certificates

- Equine Science Certificate (p. 160)
- Meat Science Certificate (p. 160)

Animal Science - BS, Production/Industry Option

This program prepares students for careers in animal-oriented agribusinesses, including animal production, agricultural extension work, and feed sales.

This curriculum prepares students for careers in animal-oriented agribusinesses. Other courses, in addition to animal science courses, include accounting, economics, genetics and management. A wide array of internships giving students invaluable experience in all phases of livestock production and related industries is available. Career opportunities include sales, management, public relations, marketing, quality control and education. Students may concentrate on an emphasis area within this option, including the following.

Beef Cattle

Students receive training that enables them to pursue careers in ranch management, feedlot management, pharmaceutical sales and other service-oriented livestock industries. Students are trained in all aspects of production, marketing and merchandising techniques for employment in the beef industry. The University Beef Cattle Center gives students hands-on experience.

Dairy

The focus of this emphasis area is to develop a well-rounded, knowledgeable student. Students have the opportunity to apply scientific principles, problem-solving methods, state-of-the-art techniques and information transfer to complex dairy production systems.

Equine

Designed for students with professional or vocational interests in horses and the horse industry. Coursework emphasizes equine nutrition, breeding, reproduction, health, management, training and judging. Lectures are reinforced with laboratories in which students work with horses. Graduates are well prepared for careers with horse production farms, stallion stations, performance and race training stables, breed associations, performance horse organizations, feed and pharmaceutical companies, county extension positions, and other industries and agencies related to the horse industry.

Meat

Students prepare for a career in the meats industry by taking meat science and processing and evaluation courses. Students also can conduct research through special problems courses and can gain valuable work experience on campus in the Meat Science Section or the Rosenthal Meat Science and Technology Center or off campus through internships or summer jobs. Job opportunities are available in packing, processing, retailing, purveying, food service, promotion, public relations and government regulatory agencies.

Sheep

Designed to prepare students for careers in the sheep and goat industries and in the associated wool and mohair industries, this emphasis gives

students first-hand experience in sheep production and management practices, as well as procedures for processing and evaluating fleeces. Job opportunities are diverse and include flock management, marketing of lamb and fiber products, feed and pharmaceutical sales and county extension agent positions.

Swine

This emphasis area is designated for students planning to pursue a career in swine production or closely allied industries. Students are taught the principles of breeding and genetics, nutrition and feeding, animal health, environmental control and waste management as they relate to profitable swine production systems. These principles are reinforced by hands-on experience with the department's swine herd. Career paths include management of swine production units and technical service or sales for feed, pharmaceutical and breeding stock companies.

Program Requirements

First Year

Fall		Semester Credit Hours
ANSC 101	Introductory Seminar for Animal Science	1
ANSC 107 & ANSC 108	General Animal Science and General Animal Science Laboratory	4
CHEM 119	Fundamentals of Chemistry I	4
Language, philosophy and culture (p. 28) ¹		3
Mathematics (p. 27) ¹		3
Semester Credit Hours		15

Spring

ANSC 111	Animal Production Systems	3
ANSC 113	Farm Animal Biosystems	2
BIOL 107 or BIOL 111	Zoology or Introductory Biology I	4
Communication (p. 27) ¹		3
Mathematics (p. 27) ¹		3
Semester Credit Hours		15

Second Year

Fall		
ANSC 303/ NUTR 303	Principles of Animal Nutrition	3
CHEM 222	Elements of Organic and Biological Chemistry	3
Select one of the following:		3
AGEC 105	Introduction to Agricultural Economics	
ECON 202	Principles of Economics	
ECON 203	Principles of Economics	
Select one of the following:		3
ANSC 309	Applied Animal Record Keeping	
STAT 301	Introduction to Biometry	
STAT 302	Statistical Methods	
STAT 303	Statistical Methods	
American history (p. 30) ¹		3
Semester Credit Hours		15

Spring

ACCT 209	Survey of Accounting Principles	3

and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 48). Refer to the University Core Curriculum (p. 26) catalog page for a list of acceptable courses. A course satisfying another Core category, a college/department requirement or taken as a general elective can be used to satisfy these requirements. Select in consultation with an academic advisor.

- ² Select from the following courses: ANSC 404, ANSC 406, ANSC 408, ANSC 412, ANSC 414, ANSC 420, ANSC 429, ANSC 434, ANSC 437, ANSC 447, ANSC 451; DASC 418. 8 total hours required.
- ³ Any ANSC (p. 918) course that is not fulfilling part of your "major coursework" category.
- ⁴ All students are required to complete an animal science experience in order to graduate. May include but is not limited to: undergraduate research, study abroad, internships, and competitive judging teams. To be selected in consultation with your academic advisor.
- ⁵ Any course taught within the College of Agriculture and Life Sciences.

Students are required to make a C or better in each of their courses in their major (ANSC) coursework area.

All undergraduate students must take at least (2) specific courses in their major designated as writing or communication intensive (W or C). To be chosen in consultation with your academic advisor.

Maximum of 4hrs of ANSC 485 may be used in this program.

Maximum of 5hrs of ANSC 494 may be used in this program.

Animal Science - BS, Science Option

This program is designed to provide scientific expertise in chemistry, biological and physical sciences, and statistics and is recommended for students considering entry into the veterinary, medical, allied health field, law, or the graduate program of their choice.

This option provides a strong background for graduate study in a wide variety of disciplines. Animal scientists graduating with a Bachelor of Science degree in this option who do not enter graduate or professional school find employment in rewarding careers in the pharmaceutical, clinical and food-related industries. Students may concentrate on an emphasis area within this option, including the following.

Pre-Professional

Students planning to pursue a career in veterinary medicine can complete course requirements for admission to the professional curriculum in this emphasis. Students gain experience working with animals through direct contact in laboratory courses and directed field study. Students acquire knowledge of animal systems and animal behavior principles through coursework and interaction with livestock industry leaders. Students are also prepared to seek admission to the professional curricula in medicine, dentistry, pharmacy, optometry and physical therapy.

Pre-graduate Studies

This emphasis prepares students to pursue a Master of Science, Master of Agriculture or Doctor of Philosophy degree. Possible graduate programs include animal behavior, animal breeding, biochemistry, cellular and molecular biology, meats, dairy science, food science and technology, genetics, growth biology, nutrition and reproductive physiology. Experience gained through honors courses, internships, special problems courses and research laboratories helps the student identify specific disciplines of interest for graduate study. Students with advanced degrees are employed as university professors, research

¹ To be selected from the University Core Curriculum. The University Core Curriculum includes a requirement for 3 hours of International

scientists or technicians, extension livestock specialists and technical representatives for industry.

¹ To be selected from the University Core Curriculum. The University Core Curriculum includes a requirement for 3 hours of International and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 48). Refer to the the University Core Curriculum (p. 26) catalog page for a list of acceptable courses. A course satisfying another Core category, a college/department requirement or taken as a general elective can be used to satisfy these requirements. Select in consultation with an academic advisor.

² Students may choose to use general electives to complete a concentration in a pre-professional program, a pre-graduate study area, and/or a certificate program.

³ All students are required to complete an animal science experience in order to graduate. May include but is not limited to: undergraduate research, study abroad, internships, and competitive judging teams. To be selected in consultation with your academic advisor.

⁴ Select from the following courses: ANSC 404, ANSC 406, ANSC 408, ANSC 412, ANSC 414, ANSC 420, ANSC 429, ANSC 434, ANSC 437, ANSC 447, ANSC 451; DASC 418. 8 total hours required.

Students are required to make a C or better for each of their courses in the major (ANSC) coursework area.

All undergraduate students must take at least two (2) specific courses in their major designated as writing or communication intensive (W or C). To be chosen in consultation with your academic advisor.

Maximum of 4 hours of ANSC 485 may be used in this program.

Maximum of 5 hours of ANSC 494 may be used in this program.

Equine Science - Certificate

This program is designed to provide a knowledge base to those individuals who have an interest in pursuing a career in the equine industry.

The Department of Animal Science offers a certificate in Equine Science for students who wish to obtain specialization in this area. Please reference the program requirements tab for information on course of study requirements for the Equine Science certificate.

Program Requirements

Code	Title	Semester Credit Hours
ANSC 201	Introductory Equine Care and Use	2
ANSC 211	Equine Industry and Career Preparation	2
ANSC 311	Equine Behavior and Training	2
ANSC 411	Equine Nutrition and Health	3
ANSC 420	Equine Production and Management	4
ANSC 423	Issues in the Equine Industry	1
ANSC 494	Animal Science Internship	3
Total Semester Credit Hours		17

Meat Science - Certificate

This program is designed to provide a knowledge base to those individuals who have an interest in pursuing a career that involves the meat industry.

The Department of Animal Science offers a certificate in Meat Science for students who wish to obtain specialization in this area. Please reference the program requirements tab for information on course of study requirements for the Meat Science certificate.

Program Requirements

18

¹ Students who have taken ANSC 489, Special Topics in Advanced Meat Technology, will be credited with ANSC 447.

² Students who have taken ANSC 489, Special Topics in Meat Merchandising, will be credited with ANSC 337.

Department of Biochemistry and Biophysics

Curriculum in Biochemistry is administered by the Department of Biochemistry and Biophysics.

Biochemists seek to understand life at the molecular level, including the detailed structures of biological molecules and the chemical reactions in which they participate. They study the molecules of living systems of all kinds, from the simplest viruses and bacteria to higher plants and animals. In their work, biochemists use experimental tools ranging from x-ray crystallography and nuclear magnetic resonance to bioinformatics and genetic engineering. Biochemistry is a dynamic and diverse field that has become the basic discipline for the life sciences, and biochemists have made significant discoveries that relate to medicine, agriculture, and the environment.

Majors

- Bachelor of Science in Biochemistry (p. 162)
- Bachelor of Science in Genetics (p. 163)

Minors

- Biochemistry Minor (p. 164)
- Genetics Minor (p. 165)

Biochemistry - BS

This program is designed to provide a solid background in chemistry and the physical sciences, as well as in the biological sciences.

Biochemistry is an especially versatile major giving undergraduates many options when they complete their BS degree. A biochemistry major provides a strong background for entering graduate school in a variety of fields, and the majority of biochemistry majors go on to graduate school or to professional schools such as medicine, veterinary medicine or dentistry. Biochemistry majors excel in biomedical professional schools because of their strong background in the basic sciences. In addition, a wide variety of job opportunities is open to biochemistry majors with a BS degree. Many find rewarding careers working in laboratories as research scientists, forensic scientists and technicians in clinical, governmental and university laboratories. Biochemists are also employed by diverse companies in the chemical, pharmaceutical, agricultural, food and scientific equipment industries.

Program Requirements

First Year

Fall		Semester Credit Hours
BICH 101/ GENE 101	Introduction to Biochemical and Genetics Research Methods ¹	1
BIOL 111	Introductory Biology I	4

¹ Must make a grade of C or better.

² To be selected from the University Core Curriculum (p. 26). Of the 21 hours shown as University Core Curriculum (p. 26) electives, 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from POLS 206 and POLS 207. The graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses which may be met by courses satisfying the Core Curriculum requirements if they are also on the approved list of international and cultural diversity courses.

³ Select from any course 100-499 not used elsewhere (except BICH 303, BICH 410-412 (p. 947); MATH 100-104, 131-148 (p. 1135); STAT 201). Often used for a minor. Students intending to pursue an advanced degree in biochemistry are strongly encouraged to use some free electives for additional upper division courses in BICH (p. 947), GENE (p. 1053), BIOL (p. 951), CHEM (p. 964), MATH (p. 1135) or STAT (p. 1248).

⁴ The fourth registered hour of research must be taken as writing intensive.

⁵ Hours to be selected from any 400-level course in Biochemistry with approval of student's academic advisor. BICH 404, BICH 414, BICH 431/GENE 431, BICH 432/GENE 432, BICH 440, BICH 441, or BICH 491 may not be used to satisfy this requirement.

Genetics - BS

The program is designed to develop the knowledge and skills necessary for advanced studies in all disciplines related to life sciences from medicine/veterinary medicine to genetic engineering.

Curriculum in Genetics is administered by the Department of Biochemistry and Biophysics.

Genetics is one of the most exciting, rapidly expanding areas in the life sciences. More than an independent discipline, it has become the basis

for understanding many aspects of medical and agricultural systems, animal and plant diseases, and even animal behavior. Developments in molecular genetics have provided biotechnologies that will dramatically affect our lives from the improved diagnosis of human disease, to the production of viral-resistant crops, to environmental cleanup.

The undergraduate curriculum in genetics allows the study of several different aspects of genetics, including population genetics, human genetics and genetic engineering. This basic science curriculum also has enough flexibility to allow a student to prepare for such diverse careers as forensics, medicine, business or law.

University Core Curriculum (p. 26) ²		3
Genetics elective ^{1,4}		3
General elective ⁵		5
Semester Credit Hours		14
Total Semester Credit Hours		120

¹ Must make a grade of C or better.

² To be selected from the University Core Curriculum (p. 26). Of the 21 hours shown as University Core Curriculum (p. 26) electives, 3 hours must be from language, philosophy and culture, 3 hours from creative arts, 3 hours from social and behavioral sciences, 6 hours from American history, 6 hours from POLS 206 and POLS 207. The graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses which may be met by courses satisfying the language, philosophy and culture, creative arts, social and behavioral sciences, government/political science and American history requirements if they are also on the approved list of international and cultural diversity courses.

³ The fourth registered hour of research must be taken as Writing Intensive.

⁴ Hours to be selected from any 400-level course in Genetics (p. 1053) with approval of student's academic advisor. Excludes BICH 409, BICH 410, BICH 411, BICH 414, BICH 431/GENE 431, BICH 432/GENE 432, BICH 440, BICH 491, GENE 412, GENE 419/BICH 419, GENE 491.

⁵ Often used for a minor. Students intending to pursue an advance degree in Genetics are strongly urged to use some general electives for additional upper division courses in GENE, BICH, BIOL, CHEM, MATH or STAT. General electives may be any course numbered 100-499 that is not used elsewhere (except BICH 303, BICH 410, BICH 411, BICH 412, BICH 440, BICH 441; MATH 100-104 (p. 1135), MATH 130-148 (p. 1135); STAT 201).

Biochemistry - Minor

The Biochemistry minor provides a rigorous exploration of cellular processes at the molecular level, covering essential topics such as enzyme kinetics, metabolic pathways, and molecular interactions.

The Department of Biochemistry and Biophysics offers a minor in Biochemistry. Students seeking a minor must complete a minor form (<https://bcbp.tamu.edu/minors/>) and have it approved and signed by the BICH/GENE undergraduate advisor and their major academic advisor. Students are required to meet all minor course prerequisites.

Program Requirements

Code	Title	Semester Credit Hours
BICH 410 or BICH 440	Comprehensive Biochemistry I or Biochemistry I	3
BICH 411	Comprehensive Biochemistry II	3

or BICH 441 or Biochemistry II		
BICH 414	Biochemical Techniques I	2
or BICH 432/ or Laboratory in Molecular GENE 432 Genetics		
BICH 431/ GENE 431	Molecular Genetics	3
CHEM 327	Physical Chemistry I	3

Biochemistry elective (p. 947) ¹		3
Total Semester Credit Hours		17

¹ Hours to be selected from any 400-level course in biochemistry with approval of academic advisor.

Students must make a grade of C or better in all courses.

Genetics - Minor

This program delves deep into the fascinating realm of heredity, encompassing principles of inheritance, genetic variation, and the molecular mechanisms that govern gene expression.

The Department of Biochemistry and Biophysics offers a minor in Genetics. Students seeking a minor must complete a minor form (<https://bcbp.tamu.edu/minors/>) and have it approved and signed by the BICH/GENE undergraduate advisor and their major academic advisor. Students are required to meet all minor course prerequisites.

Program Requirements

GENE 412	Population, Quantitative and Ecological Genetics	3
GENE 431/ BICH 431	Molecular Genetics	3
STAT 302	Statistical Methods	3
Select one of the following:		3
GENE 301	Comprehensive Genetics	
GENE 302	Principles of Genetics	
GENE 303	Fundamentals of Genetics	
GENE 320/ BIMS 320	Biomedical Genetics	
Select one of the following:		3
BICH 450/ BIOL 450	Genomics	
BICH 464/ GENE 464	Bacteriophage Genomics	
BIOL 349	Bioinformatics	
BIOL 350	Computational Genomics	
GENE 419/ BICH 419	Computational Techniques for Evolutionary Analysis	
Total Semester Credit Hours		15

Students must make a grade of C or better in all courses.

Department of Biological and Agricultural Engineering

Biological and agricultural engineers apply their knowledge of physical and biological sciences, mathematics, engineering principles and engineering design to the production and processing of food and fiber, to the preservation of environmental quality, to biological systems and processes, and to machine systems that interface with all of these. Because of their broad general engineering background, biological and agricultural engineering graduates are sought by a wide variety of employers including environmental consulting firms, equipment manufacturers, crop storage and handling industries, the cotton and forest products industries, food and feed processing industries, animal production industries, biotechnology companies, electric utility companies, chemical companies, and governmental agencies. Biological and agricultural engineers make significant contributions to meeting many basic needs of society such as maintaining food quality, quantity and safety; improving environmental quality; and enhancing the quantity and quality of our water resources.

The Biological and Agricultural Engineering Department provides quality education, research and outreach in engineering and technology for the world's agricultural, biological, environmental and food systems. Our undergraduate programs provide a high quality education for engineering and systems management students to fulfill the needs of industries we serve and advance our reputation as a world leader in engineering and systems management education.

The Bachelor of Science program in Biological and Agricultural Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET. The Fundamentals of *Engineering (FE)* exam is generally your first step in the process to becoming a licensed professional engineer (P.E.). Students are eligible to obtain these licenses upon graduating from an EAC of ABET-accredited program.

PHD, North Dakota State University, 2023

Majors

- Bachelor of Science in Agricultural Systems Management (p. 166)
- Bachelor of Science in Biological and Agricultural Engineering (p. 167)
- Bachelor of Science in Biological and Agricultural Engineering, Agricultural Engineering Track (p. 169)
- Bachelor of Science in Biological and Agricultural Engineering, Biological Engineering Track (p. 170)

- Bachelor of Science in Biological and Agricultural Engineering, Natural Resources Engineering Track (p. 172)

Minors

- Agricultural Systems Management Minor (p. 173)
- Food Engineering Minor (p. 173)

Agricultural Systems Management - BS

This program integrates practical technology and business courses, preparing students for both technical and managerial roles in the food and agricultural industries.

Graduates of the Agricultural Systems Management program manage people, money and machines in the food and agricultural industries. They are typically employed as production or processing operations managers, equipment managers, or in technical sales and services. Employers include farm and industrial equipment companies, food processing plants, cotton gins, grain and seed companies, livestock feeding operations, irrigation companies, construction companies, manufacturers, and a variety of other employers who need technical managers.

The technological courses are applications-oriented and focus on practical experience in food processing systems, water management, machinery and power systems, electrical systems and electronics. Business courses include accounting, economics, marketing, management, law and finance. Students can obtain a minor in either Agricultural Economics or Business by taking the 15 hours of noted coursework, plus one additional 3-hour class per minor. Management and systems science techniques such as linear programming, simulation, optimization, queuing theory, inventory models, PERT/CPM and expert systems are taught along with applications for solving realistic problems faced by agribusiness managers. Supporting courses provide a foundation of mathematics, chemistry, computer and communications skills. Technical electives are available to develop a degree program that meets personal career objectives.

The curriculum is administered by the Department of Biological and Agricultural Engineering and leads to the Bachelor of Science degree in Agricultural Systems Management. AGSM 360 prepares students for the opportunity to pursue an occupational license. Students who participate in the class regularly and pass the course will be eligible for a "30 hour Course for General Industry" diploma from NASP. Please refer to the Notification for Students Pursuing an Occupational License (<https://catalog.tamu.edu/undergraduate/appendices/licensing/>) in our catalog for additional information.

¹ To be selected from the University Core Curriculum.

² The 3 hours of international and cultural diversity (p. 49) and 3 hours of cultural discourse (p. 48) courses, as required for graduation, may be met in the curriculum. Students may select Language, Philosophy, and Culture, Creative Arts, Technical Electives, or American History Electives that also meet the ICD/CD requirement.

³ A minor in Business may be obtained by completing the noted courses, plus ISTM 209. Each of these courses must be completed with a C or better.

⁴ A minor in Agricultural Economics may be obtained by completed the noted courses, plus AGECE 105. Each of these courses must be completed with a C or better.

⁵ Select six hours from the following: AGSM 335, AGSM 337, AGSM 435, AGSM 437, AGSM 477.

⁶ All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive (W). This course is an approved W course.

⁷ Technical electives must be selected in consultation with the student's advisor and from the current list of approved electives published by the department.

A grade of C or better is required for all Common Body of Knowledge (CBK) courses; ACCT 209, AGSM 301, CHEM 119, ECON 202, MATH 140, MATH 142 and PHYS 201, or equivalents and senior capstone courses AGSM 439 and AGSM 440.

Biological and Agricultural Engineering - BS

Students learn to apply fundamental knowledge of biological and physical sciences, mathematics, and engineering principles to formulate and solve engineering problems.

Graduates from the Biological and Agricultural Engineering program, will after several years, have:

- Successfully entered the biological and agricultural engineering profession.
- Successfully pursued graduate education and research at major universities in biological and agricultural engineering, and related fields.
- Advanced into leadership positions in their chosen fields, professions, and society.
- Engaged in life-long learning through professional licensure and professional development.
- Contributed to the impact of the profession by creating global and culturally relevant engineering solutions.

Engineering design is integrated throughout the curriculum, along with opportunities to develop communication, learning, and teamwork skills, culminating in a capstone design experience. Electives in the curriculum allow the student to focus in one of the following areas:

- **Environmental and Natural Resources Engineering**—design and management of systems affecting soil, water, and air resources.
- **Renewable Energy Engineering**—design and development of biomass, wind and solar energy systems.
- **Food and Bioprocess Engineering**—design and development of systems for processing and handling of food and agricultural products and processes involving cells, enzymes, or other biological components.
- **Machine Systems Engineering**—design and development of machines and machine systems for food, feed and fiber production and processing.

Students select courses with the assistance of the academic advisor in an individualized advising system. Faculty members assist with professional development and job placement for students.

The biological and agricultural engineering program is jointly administered by the College of Agriculture and Life Sciences and the College of Engineering. The department is one of the largest in North America and is consistently ranked as one of the top programs in the nation.

For graduates to become successful practicing biological and agricultural engineers, students need to acquire a set of skills, knowledge, and behaviors as they progress through the curriculum. We have established the following student outcomes outlining what students are expected to know and be able to do upon completion of the curriculum. At the time of graduation, students should have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.

5. An ability to function effectively on a team whose members together provide leadership, create a collaborative environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The Bachelor of Science program in Biological and Agricultural Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, <https://www.abet.org>.

Biological and Agricultural Engineering - BS, Agricultural Engineering Track

Agricultural engineers apply their knowledge of physical sciences, mathematics, engineering principles and engineering design to the production and processing of food and fiber, to agricultural systems and processes, and to machine systems that interface with all of these.

Because of their broad general engineering background, agricultural engineering graduates are sought by a wide variety of employers including equipment manufacturers, crop storage and handling industries, the cotton and forest products industries, food and feed processing industries, animal production industries, electric utility companies, and governmental agencies. Agricultural engineers make significant contributions to meeting many basic needs of society such as ensuring sustainable food production and harvesting and advancing manufacturing/processing technology.

⁹ Select from AGSM 473, ANSC 307, ANSC 320, ANSC 326/FSTC 326, ANSC 327/FSTC 327; BESC 320, BESC 357, BESC 367, BESC 401, BESC 402, BESC 403; BIOL 349, BIOL 351; ECCB 351, ECCB 407, ECCB 444; FSTC 305, FSTC 312, FSTC 313, FSTC 457/ANSC 457, FSTC 470/ANSC 470, FSTC 487/ANSC 487; GEOG 390; GEOL 410; MMET 307; NUTR 410/FSTC 410; POSC 309, POSC 326, POSC 406, POSC 427; SCSC 301, SCSC 311, SCSC 405. Other courses may be approved by request to the advising office.

Biological and Agricultural Engineering - BS, Biological Engineering Track

This program equips graduates with a broad engineering background to innovate in food, fiber, biological systems and processes, meeting essential societal needs in multiple industries.

Biological engineers apply their knowledge of physical and biological sciences, mathematics, engineering principles and engineering design to the production and processing of food and fiber and biological

systems and processes. Because of their broad general engineering background, biological engineering graduates are sought by a wide variety of employers including crop storage and handling industries, food and feed processing industries, animal production industries, biotechnology companies, chemical companies, and governmental agencies. Biological engineers make significant contributions to meeting many basic needs of society such as maintaining food quality, quantity and safety; manufacturing new products from biological materials and developing engineering sustainable and more efficient technologies to feed the world.

¹ Must make a grade of C or better.

² Entering students will normally be given a placement test in mathematics. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ The three hours of international and cultural diversity (p. 49) and three hours of cultural discourse (p. 48) courses, as required for graduation, may be met by courses that also satisfy a core curriculum course.

⁴ Select from CHEN 320; CVEN 302; MATH 304, MATH 417; MEEN 357; STAT 211.

⁵ All engineering students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the BAEN advising office.

⁶ All undergraduate students must take at least two (2) specific courses in their major designated as writing intensive.

⁷ Select from BAEN 400-478 (p. 942), BAEN 485, BAEN 489.

⁸ Select from BAEN 400- 478 (p. 942), BAEN 485, BAEN 489; CHEN 451, CHEN 455/SENG 455, CHEN 460/SENG 460; CVEN 301/EVEN 301, CVEN 303, CVEN 336, CVEN 339/EVEN 339, CVEN 402/EVEN 402, CVEN 450, CVEN 455, CVEN 458/EVEN 458, CVEN 462/EVEN 462; MEEN 363, MEEN 364, MEEN 441, MEEN 442, MEEN 444, MEEN 460; MTDE 333; SENG 310, SENG 312, SENG 321; Other courses may be approved by request to the advising office.

⁹ Select from AGSM 473, ANSC 307, ANSC 320, ANSC 326/FSTC 326, ANSC 327/FSTC 327; BESC 320, BESC 357, BESC 367, BESC 401, BESC 402, BESC 403; BIOL 349, BIOL 351; ECCB 351, ECCB 407, ECCB 444; FSTC 305, FSTC 312, FSTC 313, FSTC 457/ANSC 457, FSTC 470/ANSC 470, FSTC 487/ANSC 487; GEOG 390; GEOL 410; MMET 307; NUTR 410/FSTC 410; POSC 309, POSC 326, POSC 406, POSC 427; SCSC 301, SCSC 311, SCSC 405. Other courses may be approved by request to the advising office.

Biological and Agricultural Engineering - BS, Natural Resources Engineering Track

Natural resource engineers apply their knowledge of physical and biological sciences, mathematics, engineering principles and engineering design to the preservation of environmental quality, and to biological systems and processes.

Because of their broad general engineering background, natural resource engineering graduates are sought by a wide variety of employers including environmental consulting firms, the cotton and forest products industries, chemical companies, and governmental agencies. Natural resource engineers make significant contributions to meeting many basic needs of society such as improving environmental quality and enhancing the quantity and quality of our water, soil, and air resources.

Agricultural Systems Management - Minor

The minor in Agricultural Systems Management is available to all students enrolled at Texas A&M University. The primary educational objective of this minor program is to provide students, majoring in other fields, with a fundamental knowledge of the fields of agricultural systems management.

AGSM 360 prepares students for the opportunity to pursue an occupational license. Students who participate in the class regularly and pass the course will be eligible for a "30 hour Course for General Industry" diploma from NASP. Please refer to the Notification for Students Pursuing an Occupational License (p. 1416) in our catalog for additional information.

Program Requirements

Code	Title	Semester Credit Hours
Required Courses		
AGSM 201	Agricultural Energy and Power Systems	3
AGSM 301	Systems Analysis in Agriculture	3
Electives		12
Select four of the following:		
AGSM 105	The World Has a Drinking Problem - Global Water Scarcity	
AGSM 310	Agricultural Machinery Management	
AGSM 315/	Food Process Engineering	
FSTC 315	Technology	
AGSM 325	Agri-Industrial Applications of Electricity	
AGSM 335	Water and Soil Management	
AGSM 337	Technology for Environmental and Natural Resource Engineering	
AGSM 360	Occupational Safety Management	
AGSM 403	Processing and Storage of Agricultural Products	
AGSM 417	Food Process Engineering Technology II	
AGSM 435	Irrigation Principles and Management	
AGSM 437	Landscape Irrigation	
AGSM 470	Agricultural Electronics and Control	
AGSM 473	Project Management for Agricultural Systems Technology	
AGSM 477	Air Pollution Control and Regulatory Compliance	
AGSM 484	Internship ¹	
Total Semester Credit Hours		18

¹ Must be taken for 3 credit hours and approved by program coordinator.

Students must make a grade of C or better in all courses.

Food Engineering - Minor

This program offers knowledge and skills related to food and food processing complexities.

From the farm to the table, engineers play a role in producing tastier and healthier food for everybody in a sustainable manner. Food engineering is a hybrid of food science and an engineering science, resulting in the application of engineering principles to food systems and their components. With the complexity of food and food processing, the Minor in Food Engineering is aimed at students in the Chemical Engineering major whose graduates are routinely employed in the food industry.

The Minor in Food Engineering will provide students with the knowledge and skills for success in the ever-growing food industry by: (1) understanding the effect of physical, chemical and biological changes on the quality of raw materials and processed foods, (2) applying these

skills to the formulation, production and processing of new foods, (3) using innovative technologies that protect foods against spoilage and people against foodborne illnesses, and (4) applying innovations in food packaging that help improve appearance while increasing product convenience, safety, and shelf life.

Program Requirements

Code	Title	Semester Credit Hours
ANSC 326/ FSTC 326	Food Bacteriology	3
BAEN 420	Food Rheology	3
BAEN 422/ CHEN 422	Unit Operations in Food Processing	3
BAEN 427	Engineering Aspects of Packaging	3
CHEN 468	Zymology	3
CHEN 482	Bioprocess Engineering	3
Total Semester Credit Hours		18

Minimum of 6 hours at 300- to 400- level.

Department of Ecology and Conservation Biology

The Department of Ecology and Conservation Biology at Texas A&M University provides advanced educational opportunities that prepare undergraduate students for leadership in the stewardship and study of terrestrial and aquatic ecological systems. A Bachelor of Science degree in Ecology and Conservation Biology emphasizes fundamental ecological knowledge and its application to biodiversity conservation, environmental health, and management of complex systems, involving aspects of ecology from genes to ecosystems to the globe. Five degree tracks provide flexibility to pursue one's chosen career path and readies students for success in a future that needs their expertise.

Ecology and Conservation Biology - BS, Ecoinformatics Track

This program trains students to integrate digital and information technologies with ecological data analysis to detect, evaluate and predict ecological patterns, disturbances and processes.

The Department of Ecology and Conservation Biology at Texas A&M University provides advanced educational opportunities to prepare students for careers in the science and stewardship of biological diversity, ecosystems and their services, and the biosphere. Our undergraduate and graduate degrees in Ecology and Conservation Biology emphasize fundamental ecological knowledge and its application to biodiversity conservation, environmental health, and management of complex systems, involving diverse aspects of ecology, ranging from genes to ecosystems and microcosms to the entire biosphere. ECCB is home to more than 70 experts and 400 students, representing a community of scholars working to understand nature, to conserve our natural resources, and to maintain the health and services of natural and human-dominated systems that sustain our communities.

Ecoinformatics Track

Ecoinformatics is an emerging field that prepares graduates to become experts in integrating digital and information technologies, such as GPS (global positioning system), satellite and UAV (unmanned aerial vehicle) imagery, and advanced field sensors with ecological data analysis in complex ecosystems to detect, evaluate, and predict ecological patterns, disturbances, and processes. The Ecoinformatics track provides students with training in theories and applications of ecological data analysis, natural resources and ecological modeling, and spatial information sciences that will prepare them for handling complex and ever-increasing interdisciplinary ecological data and understanding of contemporary environmental challenges. Students who successfully complete this track will have the ability to use advanced technologies to collect data from genomic to landscape levels and beyond. The diversity of coursework provides opportunities for students to develop skills using analytical and computer-based methods to perform quantitative data analysis, spatial analysis, and ecological modeling.

¹ Select from any 100-499 course not used elsewhere.

² Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

³ Select from ECCB 285, ECCB 300/ENTO 300, ECCB 314, ECCB 316, ECCB 324, ECCB 385, ECCB 408, ECCB 417, ECCB 450/ENTO 450, ECCB 451/ENTO 451, ECCB 462, ECCB 484, ECCB 485, ECCB 491; RWFM 325, RWFM 400/ECCB 452, RWFM 408, RWFM 410, RWFM 485; STAT 307.

⁴ Select from ECCB 351, ECCB 406/GEOG 462, ECCB 407, ECCB 444, ECCB 446.

Must make a grade of C or better in BIOL 111, BIOL 112, and all ECCB major core coursework or any course substituted for an ECCB major core coursework requirement (ECCB 101, ECCB 205, ECCB 301, ECCB 302, ECCB 303, ECCB 304, ECCB 400, ECCB 403, and ECCB 485).

Ecology and Conservation Biology - BS, Ecology and Conservation Biology Track

This program teaches students the fundamentals of ecology and evolution and how to understand issues related to conserving, managing and restoring species, habitats, and ecosystems.

The Department of Ecology and Conservation Biology at Texas A&M University provides advanced educational opportunities to prepare students for careers in the science and stewardship of biological diversity, ecosystems and their services, and the biosphere. Our undergraduate and graduate degrees in Ecology and Conservation Biology emphasize fundamental ecological knowledge and its application to biodiversity conservation, environmental health, and management of complex systems, involving diverse aspects of ecology, ranging from genes to ecosystems and microcosms to the entire biosphere. ECCB is home to more than 70 experts and 400 students, representing a community of scholars working to understand nature, to conserve our natural resources, and to maintain the health and services of natural and human-dominated systems that sustain our communities.

Ecology and Conservation Biology Track

The Ecology and Conservation Biology track is designed to meet the needs of students interested in understanding issues related to conserving, managing, and restoring species, habitats, and ecosystems.

The curriculum prepares students for careers with natural resource agencies, conservation and environmental organizations, environmental consulting firms, and education and research institutions. Students enrolled in this track gain an understanding of the core body of knowledge used by ecologists and conservation biologists, including ecological concepts, ecological practices, human-environmental interactions, and biodiversity exploration and conservation. This track offers a diversity of courses, including several upper-level electives, that allow students to tailor their education to fit their interests. For example, students can take courses that position them for external certification through organizations such as the Ecological Society of America and the Society for Ecological Restoration. Students completing this track successfully will have a strong background in ecosystem functioning, field experience, human and ethical dimensions, organism biology, and quantitative applications, including the skills necessary for pursuing graduate degrees.

Program Requirements

First Year

		Semester Credit Hours
BIOL 111	Introductory Biology I	4

⁶ Select from ECCB 351, ECCB 406/GEOG 462, ECCB 407, ECCB 444; PHYS 201, PHYS 202, STAT 307.

⁷ Select from ECCB 319, ECCB 420, ECCB 430; RWFM 301, RWFM 314, RWFM 443, RWFM 470.

⁸ Select from AGECE 350; ECCB 308, ECCB 318, ECCB 319, ECCB 405, ECCB 420, ECCB 430, ECCB 460/RPTS 460; RWFM 301, RWFM 308, RWFM 314, RWFM 443, RWFM 470.

⁹ Select from AGECE 350; ECCB 308, ECCB 318, ECCB 405, ECCB 460/RPTS 460; RWFM 308, RWFM 436.

Must make a grade of C or better in BIOL 111, BIOL 112, and all ECCB major core coursework or any course substituted for an ECCB major core coursework requirement (ECCB 101, ECCB 205, ECCB 301, ECCB 302, ECCB 303, ECCB 304, ECCB 400, ECCB 403, and ECCB 485).

Ecology and Conservation Biology - BS, Forest Resources Track

This program prepares students for a broad array of career opportunities or graduate studies in forestry, natural resources, conservation and environmental-related fields.

The Department of Ecology and Conservation Biology at Texas A&M University provides advanced educational opportunities to prepare students for careers in the science and stewardship of biological diversity, ecosystems and their services, and the biosphere. Our undergraduate and graduate degrees in Ecology and Conservation Biology emphasize fundamental ecological knowledge and its application to biodiversity conservation, environmental health, and management of complex systems, involving diverse aspects of ecology, ranging from genes to ecosystems and microcosms to the entire biosphere. ECCB is home to more than 70 experts and 400 students, representing a community of scholars working to understand nature, to conserve our natural resources, and to maintain the health and services of natural and human-dominated systems that sustain our communities.

Forest Resources Track

The Forest Resources track builds on the ecology and conservation foundation of the ECCB major core. As such, it prepares students for a broad array of career opportunities, from that of a professional forester or natural resources specialist with government natural resource agencies, forest resources companies, conservation and environmental organizations, environmental or forestry consulting firms, urban forestry companies and agencies, or pursuing a graduate degree in natural resources. Students obtaining a degree in Ecology and Conservation Biology gain an understanding of ecological concepts and practices, human-environmental interactions, and principles of conservation. Students in the ECCB Forest Resources track also learn important concepts in forest biology and ecology, assessment, and management and are exposed to exciting areas of increasing importance such as climate change, forest fire management, remote sensing, forest insects and diseases, and forest genetics. Students may use free electives to broaden their experience outside of natural resources or to add additional courses of interest within the other ECCB tracks, including Education Abroad. The Forest Resources track is accredited by the Society of American Foresters (SAF). The Council for Higher Education Accreditation recognizes SAF as the specialized accrediting body for forestry education in the United States.

Ecology and Conservation Biology - BS, Teaching Track

This program trains future secondary school teachers in the life sciences.

The Department of Ecology and Conservation Biology at Texas A&M University provides advanced educational opportunities to prepare students for careers in the science and stewardship of biological diversity, ecosystems and their services, and the biosphere. Our undergraduate and graduate degrees in Ecology and Conservation Biology emphasize fundamental ecological knowledge and its application to biodiversity conservation, environmental health, and management of complex systems, involving diverse aspects of ecology, ranging from genes to ecosystems and microcosms to the entire biosphere. ECCB is home to more than 70 experts and 400 students, representing a community of scholars working to understand nature, to conserve our natural resources, and to maintain the health and services of natural and human-dominated systems that sustain our communities.

Teaching Track

This track consists of a major in Ecology and Conservation Biology and a minor in Secondary Education, to meet all course requirements to prepare students to take the teaching certification exam. After passing the teaching certification exam, graduates are certified to teach middle school science courses and high school life science courses. This track was developed to meet the increasing demand for science teachers in Texas middle and high schools.

Ecology and Conservation Biology - BS, Vertebrate Zoology Track

This program is for students with a deep interest in vertebrates, their diversity, ecology, and conservation, and satisfies all prerequisite requirements for veterinary school.

The Department of Ecology and Conservation Biology at Texas A&M University provides advanced educational opportunities to prepare students for careers in the science and stewardship of biological diversity, ecosystems and their services, and the biosphere. Our undergraduate and graduate degrees in Ecology and Conservation Biology emphasize fundamental ecological knowledge and its application to biodiversity conservation, environmental health, and management of complex systems, involving diverse aspects of ecology, ranging from genes to ecosystems and microcosms to the entire biosphere. ECCB is home to more than 70 experts and 400 students, representing a community of scholars working to understand nature, to conserve our natural resources, and to maintain the health and services of natural and human-dominated systems that sustain our communities.

Vertebrate Zoology Track (Pre-Vet)

The Vertebrate Zoology track is tailored specifically for those ECCB students with a deep interest in vertebrates, their diversity, ecology, and conservation and/or are interested in pursuing veterinary school. This

track capitalizes on the collective experience of ECCB faculty in the areas of vertebrate ecology, evolution, genetics, anatomy, physiology, and behavior to provide a comprehensive understanding of vertebrate biology and ecology. In addition to core courses in ecology and conservation, ECCB students in the Vertebrate Zoology track complete coursework in vertebrate ecology, diversity, and evolution, and enroll in national or international field courses that focus on vertebrates, including their collection and identification. This is a flexible track that permits the inclusion of courses specifically required by graduate programs as well as schools of veterinary medicine. Students on this track may use free electives to personalize or broaden their experience to meet certification requirements for vertebrate-focused professional societies (e.g., American Fisheries Society and The Wildlife Society). The Vertebrate Zoology track satisfies all prerequisite requirements for veterinary school.

Ecology and Conservation Biology - Minor

This program provides students with a foundation in the complex interactions of Earth's biodiversity and ecosystems.

The minor in Ecology and Conservation Biology is offered as a supplement to other related majors. By completing the minor, students will gain a foundation in the complex interactions of the Earth's biodiversity and ecosystems. These basic principles may be applied to biodiversity conservation, assessment of environmental health, and the management of complex systems involving aspects of ecology ranging from genes to ecosystems and their interactions with landscape, hydrology, and climate.

Program Requirement

ECCB 444	Remote Sensing of the Environment
ECCB 446	Drones for Environmental Remote Sensing
ECCB 450/ ENTO 450	Caribbean Conservation ¹
ECCB 451/ ENTO 451	Caribbean Research Seminar ¹
ECCB 462	Amazon River Tropical Biology
ECCB 485	Directed Studies
ECCB 491	Research
RWFM 400/Study Abroad in Natural Resources	
ECCB 452	
RWFM 410	Principles of Fisheries Techniques and Management
Human-environment interactions	
Select from the following:	
ECCB 304	Conservation Biology
ECCB 308	Fundamentals of Environmental Decision-Making
ECCB 319	Principles of Forestry
ECCB 420	Ecological Restoration of Wetland and Riparian Systems
RWFM 411	Ecosystem Management
RWFM 444	Aquaculture Hatchery Management
RWFM 470	Environmental Impact Assessment
Biodiversity	
Select from the following:	
ECCB 203	Forest Trees of North America

ECCB 301	Diversity and Evolution of Plants
ECCB 302	Diversity and Evolution of Vertebrates
ECCB 312	Diversity, Evolution, and Ecology of Grasses
ECCB 313	Diversity and Evolution of Invertebrates
ECCB 400	Molecular Ecology
RWFM 302	Wildland Plants of North America
Total Semester Credit Hours	
15	

¹ ECCB 300/ENTO 300, ECCB 450/ENTO 450, and ECCB 451/ENTO 451 require concurrent enrollment.

Department of Entomology

The Department of Entomology at Texas A&M University is one of the top entomology departments in the United States. We offer two undergraduate degrees, a Bachelor of Science degree in Entomology and a Bachelors of Science degree in Forensic and Investigative Sciences (FIVS). The FIVS degree has two tracks: Science (SCE) and Pre-Law (LWE). The FIVS-SCE degree is the only bachelors degree in the state of Texas that is nationally accredited by the Forensic Science Education Programs Accreditation Commission (FEPAC) of the American Academy of Forensic Sciences. Both undergraduate degrees provide students with the necessary curriculum requirements to pursue graduate study in entomology and related fields, as well as professional fields, such as law and medicine.

Faculty

Adelman, Zach N, Professor
Entomology
PHD, Colorado State University Fort Collins, 2000

Behmer, Spencer T, Professor
Entomology
PHD, University of Arizona, 1998

Bernal, Julio S, Professor
Entomology
PHD, University of California at Riverside, 1995

Brundage, Adrienne L, Instructional Associate Professor
Entomology
PHD, Texas A&M University, 2012

Coates, Craig J, Instructional Professor
Entomology
PHD, Australian National University, 1997

Coulson, Robert N, Professor
Entomology
PHD, University of Georgia, 1969

Fadamiro, Henry, Professor
Entomology
PHD, Green College, University of Oxford, 1995

Gillett-Kaufman, Jennifer Lynn, Instructional Associate Professor
Entomology
PHD, University of Florida Gainesville, 2003

Hamer, Gabriel L, Professor
Entomology
PHD, Michigan State University, 2008

Helms, Anjel Marie, Associate Professor
Entomology
PHD, The Pennsylvania State University, 2015

Kaufman, Phillip Edward, Professor
Entomology
PHD, University of Wyoming, 1997

Kmidowski, Shelby, Assistant Professor of the Practice
Entomology
MS, Duquesne University, 2023

Kovar, Scott J, Professor of the Practice
Entomology
MS, John Jay College of Criminal Justice, 2007

Magalhaes, Tereza, Assistant Professor
Entomology
PHD, University of Miami, 2005

Medina, Raul F, Professor
Entomology
PHD, University of Maryland, College Park, 2005

Motta, Erick, Assistant Professor
Entomology
PHD, University of Texas, 2019

Myles, Kevin M, Professor
Entomology
PHD, Colorado State University, 2003

Oswald, John D, Professor
Entomology
PHD, Cornell University, 1991

Penzes, Judit, Assistant Professor
Entomology
DVM, University of Veterinary Medicine Budapest, 2015
BVSc, University of Veterinary Medicine, 2009

Pietrantonio, Patricia, Professor
Entomology
PHD, University of California at Riverside, 1995

Rangel Posada, Juliana, Professor
Entomology
PHD, Cornell University, 2010

Song, Hojun, Professor
Entomology
PHD, The Ohio State University, 2006

Sword, Gregory A, Professor
Entomology
PHD, The University of Texas at Austin, 1998

Tamborindeguy Camacho, Cecilia, Professor
Entomology
PHD, Institut National Polytechnique de Toulouse, 2004

Tarone, Aaron M, Professor
Entomology
PHD, Michigan State University, 2007

Teel, Pete D, Research Professor
Entomology
PHD, Oklahoma State University, 1978

Tomberlin, Jeffery K, Professor
Entomology
PHD, University of Georgia, 2001

Wilson, Lloyd T, Professor
Entomology
PHD, University of California, Davis, 1977

Yoho, Kelie, Instructional Assistant Professor
Entomology
MS, Purdue University, 2019

Zhu Salzman, Keyan, Professor
Entomology
PHD, Purdue University, 1994

Majors

- Bachelor of Science in Entomology (p. 184)
- Bachelor of Science in Forensic and Investigative Sciences, Pre-Law Emphasis (p. 187)
- Bachelor of Science in Forensic and Investigative Sciences, Science Emphasis (p. 189)

Minors

- Entomology Minor (p. 190)

Certificates

- Public Health Entomology Certificate (p. 191)

Entomology - BS

Students in this program learn broadly about insects and their relationship to humans, the environment, and other organisms. Students gain a strong scientific foundation in entomology, biology, chemistry, mathematics, ecology and biotechnology, coupled with field experiences and lab work, which provides students with practical skills, needed for research or industry careers.

Entomology is a basic and applied science of insects and their relatives such as ticks and mites. Insects are one of the most numerous and diverse forms of life on earth; they are essential constituents of virtually every terrestrial and aquatic ecosystem. While society benefits from the diverse roles played by insects, some species may become limiting factors in the production, processing and storage of our food and fiber crops, and to the health and well being of humans and animals. The knowledge and skills possessed by entomologists are essential components of modern integrated pest management strategies designed to safely and efficiently produce adequate food supplies for a continuously expanding world population, and to impede the

transmission of insect-borne diseases, while at the same time protecting our endangered species and fragile ecosystems.

The Bachelor of Science degree in Entomology prepares students for career paths with strong employment demands among corporate and private agribusiness; urban pest management companies; scientific and technical organizations; public health agencies; local, state and federal governments; and international organizations. Employment opportunities exist in areas such as forensic entomology, conservation biology, environmental quality, food quality, regulatory inspection, public health and more. Our curriculum is sufficiently flexible such that students, in consultation with an academic advisor, may tailor the degree to meet their individual academic goals, including requirements for graduate studies and professional schools in health career areas (medical, veterinary, dental) as well as providing analytical skills needed for law school.

Students majoring in areas such as agronomy, animal science, horticulture, biology, genetics and biomedical sciences may wish to augment their knowledge and broaden their career opportunities by earning either a double major or a minor in entomology. Students interested in a double major or minor in entomology should contact an academic advisor for additional information.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 111	Introductory Biology I	4
CHEM 119	Fundamentals of Chemistry I	4
ENTO 101 or AGLS 101	Introduction to Academic Success in Entomology ¹ or Modern Agricultural Systems and Renewable Natural Resources	1
ENTO 201	General Entomology ¹	3
MATH 140	Mathematics for Business and Social Sciences ²	3
Semester Credit Hours		15
Spring		
BIOL 112	Introductory Biology II	4
CHEM 120	Fundamentals of Chemistry II	4
ENTO 102	Continuing Academic Success in Entomology ¹	1
MATH 142	Business Calculus ³	3
Communication (p. 27)		3
Semester Credit Hours		15

Second Year

Fall		
CHEM 222	Elements of Organic and Biological Chemistry ⁴	3
ENTO 482	Occupational and Professional Development ¹	2
POLS 206	American National Government	3
American history (p. 30) ⁵		3
Social and behavioral sciences (p. 31) ⁵		3

General elective		1
Semester Credit Hours		15
Spring		
POLS 207	State and Local Government	3
American history (p. 30) ⁵		3
Communication (p. 27)		3
Language, philosophy and culture (p. 28) ⁵		3

ENTO 481	Seminar ¹	1
GENE 301 & GENE 312	Comprehensive Genetics and Comprehensive Genetics Laboratory	4
Creative arts (p. 30) ⁵		3
Semester Credit Hours		15
Fourth Year		
Fall		
ENTO 428	Insect Biotechnology ¹	3
ENTO 429	Insect Biotechnology Laboratory ¹	1
Technical electives ⁶		7
General elective		5
Semester Credit Hours		16
Spring		
ENTO 435	Case Studies in Problem Solving ¹	3
ENTO 484 or ENTO 491	Professional Internship ¹ or Research	2
Technical electives ⁶		6
General electives		4
Semester Credit Hours		15
Total Semester Credit Hours		120

¹ Must earn a "C" or better in all required ENTO courses

² MATH 150, MATH 152 will be accepted in lieu of MATH 140.

³ MATH 151, PHIL 240 will be accepted in lieu of MATH 142.

⁴ CHEM 227, CHEM 257 will be accepted in lieu of CHEM 222.

⁵ To be selected in consultation with student's academic advisor in the department. Three hours of international and cultural diversity (p. 49) electives and three hours of cultural discourse (p. 48) are required for graduation; these courses may fulfill other degree requirements as well. See the list of approved courses.

⁶ Technical electives must be selected in consultation with the student's advisor or from the current list of approved electives published by the department. See Technical Electives table.

Additional Requirements for a Baccalaureate Degree

- Foreign Language (two years of the same language in high school or one year/two semester sequence in college)
- Writing Intensive Courses (two courses designated W in major or one W and one C course in major)
- International and Cultural Diversity Courses (three credit hours)
- Cultural Discourse Course (three credit hours)

Technical Electives

Code	Title	Semester Credit Hours

Forensic and Investigative Sciences - BS, Pre-Law Emphasis

This program teaches students how to use the life sciences, from DNA to ecology, to analyze crime scene evidence or solve mysteries in industrial, regulatory, or medical settings. The Pre-Law Emphasis operates at the crossroads of science and the legal profession, where strong research skills, analytical and problem-solving skills, and critical reading abilities are pivotal.

Forensic and Investigative Sciences (BS - Pre-Law Emphasis) is a major offered by the Department of Entomology. Molecular, organismal, environmental, and ecological sources of information are often analyzed and interpreted in industrial, regulatory, legal, medical and associated professions. Graduates will be competitive for employment opportunities in homeland security and investigative services at local, state and national levels. Graduates will also be well prepared for opportunities to enter post-graduate studies or law school.

Forensic and investigative sciences operate at the crossroads of science and the legal profession and provide opportunities for students to consider pre-law preparation. There are growing demands for attorneys with knowledge and understanding of science and research to address legal issues and cases where the interpretation of science and/or scientific data and analyses are pivotal. Law schools often seek candidates with diverse backgrounds and interests, and they look closely at curricula that stress analytical and problem-solving skills, critical reading abilities, writing skills, oral communication and listening abilities, general research skills, and task organization and management skills. The Forensic and Investigative Sciences program provides students with opportunities to build these essential skills and knowledge areas through a combination of required and elective courses.

Forensic science is a critical element of the criminal justice system. Forensic scientists examine and analyze evidence from crime scenes and elsewhere to develop objective findings that can assist in the investigation and prosecution of perpetrators of crime or absolve an innocent person from suspicion.

The forensic scientist's skill is to use all the information available to determine facts. Issues of law and/or fact that may require forensic science expertise range from questions of the validity of a signature on a will, to a claim of products liability, to questions of whether a corporation is complying with environmental laws. The work of the forensic scientist reduces the number of cases entering the overloaded court system by assisting the decision-makers before a case reaches the court. This decision is based on scientific investigation, not circumstantial evidence or the sometimes-unreliable testimony of witnesses.

Many forensic scientists work for universities, police agencies (state, city, and local agencies), federal agencies, and criminal investigation arms of the military forces and their support laboratories. Others work for coroners, medical examiners, hospitals, and district attorney's offices.

As crime continues to evolve with technology and society, forensic scientists will be challenged to respond by adapting established technologies and, where necessary, developing new ones. These emerging forensic science disciplines will continue to be of vital importance to the courts and to society in general.

The Forensic and Investigative Sciences program requires students to earn a grade of C or better in all courses within the program curriculum.

University Graduation Requirements:

- Foreign Language (two years of the same language in high school or one year/ two semester sequence in college)
- Writing Intensive courses (two courses designated W in major or one W and one C course in major)
- International and Cultural Diversity (p. 49) courses (three credit hours)
- Cultural Discourse (p. 48) course (three credit hours)

Forensic and Investigative Sciences - BS, Science Emphasis

This program teaches students how to use the life sciences, from DNA to ecology, to analyze crime scene evidence or solve mysteries in industrial, regulatory, or medical settings. The Science Emphasis is ideal for students seeking careers that deal with the collection, preservation, processing and use of evidentiary information to solve problems.

Forensic and Investigative Sciences (BS - Science Emphasis), an accredited program by the Forensic Science Education Programs Accreditation Commission (FEPAC), is a life sciences-based education, which develops skills in problem solving and critical thinking, essential for many career opportunities.

Forensic and investigative scientists rely upon state-of-the-art scientific discoveries and technologies as tools to seek answers to critical questions in a variety of settings. Molecular, organismal, environmental, and ecological sources of information are often analyzed and interpreted in industrial, regulatory, legal, medical and associated professions. Graduates will be competitive for employment opportunities in forensic quality assurance laboratories, homeland security and investigative services at local, state and national levels. Graduates will also be well prepared for opportunities to enter post-graduate studies or professional schools including medicine, law, forensic nursing, dentistry, pharmacy, and veterinary medicine.

Forensic science is a critical element of the criminal justice system. Forensic scientists examine and analyze evidence from crime scenes and elsewhere to develop objective findings that can assist in the investigation and prosecution of perpetrators of crime or absolve an innocent person from suspicion.

The forensic scientist's skill is to use all the information available to determine facts. Issues of law and/or fact that may require forensic science expertise range from questions of the validity of a signature on a will, to a claim of products liability, to questions of whether a corporation is complying with environmental laws. The work of the forensic scientist reduces the number of cases entering the overloaded court system by assisting the decision-makers before a case reaches the court. This decision is based on scientific investigation, not circumstantial evidence or the sometimes-unreliable testimony of witnesses.

Common forensic science laboratory disciplines include forensic molecular biology (DNA), forensic chemistry, trace evidence examination (hairs and fibers, paints and polymers, glass, soil, etc.), latent fingerprint examination, firearms and toolmarks examination, handwriting analysis, fire and explosives examinations, forensic toxicology, and digital evidence. Some forensic disciplines practiced outside forensic laboratories include forensic pathology, forensic nursing, forensic psychiatry, forensic entomology, and forensic engineering.

Many forensic scientists work for universities, police agencies (state, city, and local agencies), federal agencies, and criminal investigation arms of the military forces and their support laboratories. Others work for coroners, medical examiners, hospitals, and district attorney's offices.

As crime continues to evolve with technology and society, forensic scientists will be challenged to respond by adapting established technologies and, where necessary, developing new ones. These emerging forensic science disciplines will continue to be of vital importance to the courts and to society in general.

Social and behavioral sciences (p. 31)		3
General elective		2-3
Semester Credit Hours		15
Total Semester Credit Hours		120

¹ MATH 150 and MATH 152 will be accepted in lieu of MATH 140.

² MATH 151 will be accepted in lieu of MATH 142.

³ Students must choose directed electives in consultation with the student's advisor based on career and educational goals and from the current list of approved courses published by the department. Select from the following: ANSC 326/FSTC 326, ANTH 225, ANTH 425, ANTH 427; BIOL 213, BIOL 319, BIOL 320, BIOL 351, BIOL 413, BIOL 430, BIOL 454; CHEM 318, CHEM 325, CHEM 326, CHEM 327, CHEM 328, CHEM 362, CHEM 415, CHEM 434; ENTO 210, ENTO 403, ENTO 423, ENTO 426/VIBS 426, ENTO 428, ENTO 429, ENTO 441, ENTO 442; FIVS 200-499 (p. 1047); GENE 412, GENE 420/BICH 420; PHLT 300-499 (p. 1201); PHYS 221, PBSI 305, PBSI 306, PBSI 371; SCSC 301, SOCI 304; VIBS 305, VTPB 405, VTPP 425.

⁴ This course fulfills a writing requirement. See Requirement for a Baccalaureate Degree (p. 34) section.

The Forensic and Investigative Sciences program requires students to earn a grade of C or better in all courses within the program curriculum.

University Graduation Requirements:

- Foreign Language (two years of the same language in high school or one year/two semester sequence in college)
- Writing Intensive courses (two courses designated W in major or one W and one C course in major)
- International and Cultural Diversity (p. 49) courses (three credit hours)
- Cultural Discourse (p. 48) course (three credit hours)

Entomology - Minor

This program offers essential knowledge about how insects interact with ecology and public health, providing a strong foundation in the biological and ecological principles of insects.

Entomology is a basic and applied science of insects and their relatives such as ticks and mites. Insects are one of the most numerous and diverse forms of life on earth; they are essential constituents of virtually every terrestrial and aquatic ecosystem. While society benefits from the diverse roles played by insects, some species may become limiting factors in the production, processing and storage of our food and fiber crops, and to the health and well being of humans and animals. The knowledge and skills possessed by entomologists are essential components of modern integrated pest management strategies designed to safely and efficiently produce adequate food supplies for a continuously expanding world population, and to impede the transmission of insect-borne diseases, while at the same time protecting our endangered species and fragile ecosystems.

Students in majors such as agronomy, animal science, horticulture, biology, genetics and biomedical sciences may wish to augment their knowledge and broaden their career opportunities by electing to either double major or minor in entomology. All interested students should contact an academic advisor for additional information on these options.

Program Requirements

Code	Title	Semester Credit Hours
Select one of the following: ¹		3
ENTO 201	General Entomology	

ENTO 208	Veterinary Entomology & ENTO 209 and Veterinary Entomology Laboratory	
ENTO 301	Biodiversity and Biology of Insects ¹ or ENTO 321 or Insects and Human Society	3-4
Select 9 hours from the following:		9
ENTO 210	Global Public Health Entomology	
ENTO 300/ ECCB 300	Field Studies	
ENTO 306	Insect Structure and Function	
ENTO 320	Honey Bee Biology	
ENTO 401	Principles of Integrated Pest Management	
ENTO 402	Insects In Agriculture	
ENTO 403	Urban Entomology	
ENTO 423	Medical Entomology	
ENTO 424	Insect Ecology	
ENTO 428	Insect Biotechnology	
ENTO 429	Insect Biotechnology Laboratory	
ENTO 431/ FIVS 431	The Science of Forensic Entomology

ENTO 442	Mosquito - A History of Humankind's Struggle for Survival with the Deadliest Animal on the Planet	
ENTO 450/ ECCB 450	Caribbean Conservation	
ENTO 451/ ECCB 451	Caribbean Research Seminar	
ENTO 481	Seminar	
ENTO 482	Occupational and Professional Development	
ENTO 484	Professional Internship	
ENTO 485	Directed Studies	
ENTO 489	Special Topics in...	
ENTO 491	Research	
Total Semester Credit Hours		15

¹ Substitutions are not allowed for core courses.

Students are encouraged to visit the Department of Entomology Advising Office to select the appropriate directed elective courses based on their individual educational and career interests.

Students must earn a grade of C or better in each course used for the minor.

Public Health Entomology - Certificate

This program is focused on insects and other arthropods that serve as vectors and reservoirs of disease pathogens and are responsible for the direct and indirect causation of disease.

Population growth and distribution predicted over future decades pose increased risks of disease outbreaks and emergence of new diseases worldwide. Scientists from many disciplines, physicians, veterinarians, health-care practitioners, public health workers and policy makers are needed to provide public health surveillance, make new discoveries, and find solutions to address these risks.

Employment opportunities in the public health sector include environmental and health service agencies, mosquito control districts, the Centers for Disease Control and Prevention (CDC), the Department of Defense, the World Health Organization, and the PanAmerican Health Organization.

Students completing this certificate will be competitive for employment upon graduation, for graduate programs in related disciplines, such as Master's programs in Public Health, Epidemiology, and Entomology, as well as professional schools.

Eligibility requirements for entrance:

1. Completion of a minimum of one (1) course from both Category I and II with a grade of B or better and a cumulative TAMU GPA of 2.0+
2. Students must complete Eligibility Requirement 1 and submit an application before completion of 75 total credit hours.

For additional information and to discuss the scheduling of course requirements upon successful completion of your entrance requirements, please contact a member of the Entomology Academic Advising Team to submit your Certificate in Public Health Entomology application.

Program Requirements

Code	Title	Semester Credit Hours
CATEGORY I		
Select one of the following: ¹		3
BESC 314	Pathogens, the Environment and Society	
ENTO 210	Global Public Health Entomology	
VTPB 221	Great Diseases of the World

Total Semester Credit Hours	
15	

¹ Must make a grade of B or better.

² Must make a grade of C or better.

To be awarded the certificate, students must:

- Successfully complete courses in Category I-III **PRIOR** to enrollment in Category IV.
- Earn a cumulative 3.0 Program GPA or better in all certificate coursework.
- Complete exit survey.
- Meet the minimum qualifications for graduation as defined by Texas A&M University.

Department of Food Science and Technology

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being.

The undergraduate curriculum in food science and technology is approved by the Institute of Food Technologists (IFT) and offers two tracks, a food science option and an industry option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate

studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

- Coffee Processing and Quality Certificate (p. 196)
- Food Diversity Certificate (p. 197)

Food Science and Technology - BS, Food Industry Option

This program integrates knowledge from the basic disciplines of chemistry, microbiology, physics and biology and applies scientific principles from food engineering, food processing operations, sensory evaluation, food safety, HACCP, quality assurance and management to produce foods that are wholesome, affordable and safe.

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute to their health and well-being. For more information, visit <https://foodscience.tamu.edu>.

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

The goal of the Food Industry Option curriculum is to prepare Food Technologists for careers in the food and related industries. These careers may involve food processing, manufacturing, technical service, food product development, operations management, regulatory oversight and other technology based opportunities.

¹ MATH prefix required.

² Students may achieve a business minor by taking the following courses as general electives: ISTM 209, MGMT 209, FINC 409, MKTG 409.

³ The graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 48). Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information on core requirements visit the University Core Curriculum (p. 26) catalog page.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

Food Science and Technology - BS, Food Science Option

This program provides a strong knowledge base and fundamental understanding of chemistry, biology, engineering, physics, statistics, genetics, biochemistry, microbiology and nutrition that is applied toward the preservation, processing, packaging and distribution on foods that are wholesome, affordable and safe.

Food Science and Technology is an exciting multidisciplinary field that prepares majors with a comprehensive knowledge of the biological, physical and engineering sciences to develop new food products, design innovative processing technologies, improve food quality and nutritive value, enhance the safety of foods and ensure the wholesomeness of our food supply. Food Science majors apply the principles learned in the basic sciences such as food chemistry, biochemistry, genetics, microbiology, food engineering and nutrition to provide consumers with safe, wholesome and attractive food products that contribute

to their health and well-being. For more information, visit <https://foodscience.tamu.edu> (<https://foodscience.tamu.edu/>).

The undergraduate curriculum is approved by the Institute of Food Technologists (IFT) and offers two tracks, a Food Science Option and an Industry Option. These tracks provide promising career opportunities in areas such as food product/process design, technical service, research and development, quality assurance, food safety, food law, regulatory oversight, technological innovation, marketing, corporate sales, sensory evaluation and operations management. There are numerous opportunities available for corporate internships, scholarships and study abroad programs that provide real-world experience and enhance opportunities for employment after completing a baccalaureate degree. The major also provides an excellent background for those interested in professional schools, graduate studies, medicine, veterinary medicine, dentistry, pharmacy, physical therapy, nursing, occupational therapy and public health.

The goal of the Food Science Option curriculum is to prepare Food Scientists for career opportunities in the food and allied industries or for further studies in graduate or professional schools. See an academic advisor for specific course listings.

¹ MATH prefix required.² Students may earn a chemistry minor by taking 6 hours of additional chemistry courses from an approved list as general electives. See the Department of Chemistry for more details. Students seeking a minor in chemistry must complete the Declaration of Minor in Chemistry form and have it approved by the undergraduate advisor in chemistry and their FSTC advisor.³ The graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 26). Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information on core requirements visit the University Core Curriculum (p. 26) catalog page.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

Coffee Processing and Quality - Certificate

This program offers focused coursework on coffee production, processing, and quality evaluation, emphasizing their connections to various food products.

The Certificate in Coffee Processing and Quality, offered by the Department of Food Science and Technology, provides concentrated studies in coffee production, processing, and quality measurements as they relate to other food commodities. The program also explores the role of coffee and other food ingredients and products in human health and wellbeing. The undergraduate level stand-alone Certificate in Coffee Processing and Quality will prepare students in the College of Agriculture and Life Sciences, and other colleges, to effectively address the demand for a well-trained workforce in the coffee industry.

Food Diversity - Certificate

This program provides an in-depth study of religious and ethnic foods, focusing on food processing, quality control, record keeping, and global certifications for foods and food ingredients.

Our food supply is internationally connected and highly dependent on additives and ingredients from around the world representing different cultures and processing regulations. As such, issues of food safety, food authentication, and food certifications are prevalent and issues of food diversity are a nexus between the food industries and consumers. The Food Diversity Innovation Program (FDIP) encompasses key principles of increasing importance to the global food industry including religious and ethnic foods and certified food systems, such as organic, non-GMO, gluten-free, allergen-free, and other personal/socially conscious certifications. Certified food systems require extensive employee training and record-keeping to verify authenticity, safety, processing adulterations, and fraud. Our endowed FDIP program was established in 2016 as a sustainable high-impact *research* and *education* model based on religious and ethnic foods and other certified foods to educate students through high-impact learning in concert with the food industry. The current research and education portfolio of FDIP also includes the training program for environmental health and the interdisciplinary program in toxicology at the graduate and undergraduate levels with research in human exposure to toxins in food and water and environmental impacts of food production. These programs provide high-impact-learning modules for existing courses and research activities for graduate and undergraduate students who are exploring complexities of diverse food systems, environmental and food toxicology, food safety, and food authentication/adulteration/fraud while engaging in experiential learning and critical-thinking activities that increase their ability to thrive and excel in diverse work-environments.

Program Requirements

Department of Horticultural Sciences

The discipline of Horticultural Sciences encompasses an interdisciplinary blend of science, art, and technology. Horticultural food crops are unique in providing both nutrition and calories and include fruits, vegetables, and nuts. These crops are grown and utilized worldwide, constituting a significant proportion of the global food supply. Horticultural crops include trees, shrubs, ornamental plants, grasses, and flowers used in interior and exterior landscapes, botanical gardens, and parks. Consuming and interacting with Horticultural crops improves the quality of life, mental health, and overall wellness. The Department of Horticultural Sciences offers two undergraduate degrees: a Bachelor of Science in Horticulture and a Bachelor of Arts in Horticulture. Our flexible degree plans allow the students to develop programs tailored to their unique career goals. The horticulture industry is one of the largest in Texas economically and offers our graduates an abundance of employment and career opportunities.

Faculty

Arnold, Michael A, Professor
Horticultural Sciences
PHD, North Carolina State University, 1990

Burgner, Gerald S, Instructional Assistant Professor
Horticultural Sciences
PHD, Texas A&M University, 2019
MLA, Louisiana State University, 1994

Chavez, Luis R, Visiting Assistant Professor of the Practice
Horticultural Sciences
MBA, Universidad del Valle de Guatemala, 1998

Cisneros-Zevallos, Luis A, Professor
Horticultural Sciences
PHD, University of California at Davis, 1998

Crosby, Kevin M, Professor
Horticultural Sciences
PHD, Texas A&M University, 1999

Darwish, Ahmed, Assistant Professor
Horticultural Sciences
PHD, Hiroshima University, 2015

Dhingra, Amit, Professor
Horticultural Sciences
PHD, University of Delhi, 2002

Hall, Charlie, Professor
Horticultural Sciences
PHD, Mississippi State University, 1988

Klein, Patricia E, Professor
Horticultural Sciences
PHD, Texas A&M University, 1989

Koiwa, Hisashi, Professor
Horticultural Sciences
PHD, Kyoto University, 1996

Mahal, Navreet Kaur, Instructional Assistant Professor
Horticultural Sciences
DAG, Iowa State University, 2018

Masters, Gilbert Alan, Professor of the Practice
Horticultural Sciences
CERT, American Institute of Floral Designers, 2024

Osburn, Wendy Lynn, Assistant Professor of the Practice
Horticultural Sciences
BFA, University of North Texas, 1992

Patil, Bhimanagouda S, Professor
Horticultural Sciences
PHD, Texas A&M University, 1994

Riera-Lizarazu, Oscar, Professor
Horticultural Sciences
PHD, University of Minnesota, 1996

Rossi, Lorenzo, Assistant Professor
Horticultural Sciences
PHD, Scuola Superiore Sant'Anna, 2014

Svyantek, Andrej, Assistant Professor
Horticultural Sciences
PHD, North Dakota State University, 2021

Vales, Maria Isabel, Professor
Horticultural Sciences
PHD, University of Vigo, Spain, 1996

Zhen, Shuyang, Assistant Professor
Horticultural Sciences
PHD, University of Georgia, 2017

Majors

- Bachelor of Arts in Horticulture (p. 198)
- Bachelor of Science in Horticulture (p. 200)

Minors

- Horticulture Minor (p. 201)

Certificates

- Floral Design Certificate (p. 201)
- Viticulture and Enology Certificate (p. 202)

Horticulture - BA

This program blends horticultural sciences with plant-human interaction, preparing students for careers in floral design, education, marketing, event planning, and more.

This degree blends the concepts of horticultural sciences with the proven benefits of plant-human interaction. The students obtain the skills for preparing arrangements for various occasions, including everyday celebrations, weddings, funerals, and special events, by integrating the aesthetic and emotion-evoking aspects into floral masterpieces that

resonate on a personal level. This degree offers students the choice of pairing a horticulture degree with electives in social sciences, business, agricultural journalism, education, art, and design. The requirement of a minor of the student's choosing from outside of horticulture provides an opportunity for training in a complementary secondary area of emphasis. Employment opportunities include constructing educational programs for school gardens, preparing one for certification to teach in public schools, marketing and managing horticultural operations, sociohorticulture, agricultural journalism, planning gala events, operating floral shops, or pursuing advanced degrees. Graduates work in exciting and dynamic environments, including interior design firms, corporate settings, educational institutions, event and wedding planning companies, freelance entrepreneurial work, the hospitality industry, online floral services, theater and film production, museums, and cultural institutions.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 101 or BIOL 111	Botany or Introductory Biology I	4
HORT 281	Professions in Horticulture	1
Language, philosophy and culture (p. 28) ¹		3
Mathematics (MATH or STAT prefix required) (p. 27)		3
Social and behavioral sciences (p. 31)		3
Semester Credit Hours		14

¹ The Graduation requirements include a requirement for 3 hours of I (p. 49)International and Cultural Diversity (p. 49) courses and 3 hours of C (p. 48)ultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free or directed elective can be used to satisfy this requirement. See academic advisor.

² For all HORT majors and minors, a C or better is required in HORT 201.

³ Student must successfully complete a course of a foreign language beyond that required by the university in general.

⁴ Selected general elective courses should include a student's required minor or dual major. Any university approved minor or major is acceptable, except a minor or major in Horticulture as the intent is to provide a concentration in a second field of expertise.

⁵ This course fulfills a writing requirement (see Requirements for a Baccalaureate Degree (p. 32)).

⁶ Hours to be selected from among the following AGECE 105, AGECE 223, AGECE 300-499 (p. 906); AGLS 101; AGSM 435, AGSM 201, AGSM 300-499 (p. 912); ALED 339, ALED 340, ALED 341, ALED 426, ALED 440, ALED 441; ANSC 307, ANSC 326/FSTC 326, ANSC 327/FSTC 327, ANSC 487/FSTC 487; ATMO 201; BESC 201, BESC 204, BESC 300-499 (p. 946); BICH 411; BIOL 112, BIOL 113, BIOL 206, BIOL 213, BIOL 349, BIOL 401; CHEM 300-499 (p. 964); COMM 203, COMM 205; COSC 253, COSC 354; ECON 202, ECON 203; ENGL 320; ENTO 300-499 (p. 1031); ECCB 351; FINC 409; ECCB 408; FSTC 201, FSTC 470/ANSC 470, FSTC 485; GENE 310, GENE 411/SCSC 411; HMG 201 HMG 300-499 (p. 1081); ISTM 209; MGMT 209, MGMT 300-499 (p. 1146); MKTG 300-499 (p. 1149); NUTR 300/FSTC 300, NUTR 485; PHIL 314; PHYS 100-499 (p. 1205); ECCB 215, RWFM 411, RWFM 351; SCSC 105, SCSC 205, SCSC 300-499; (p. 1229) SPAN 102, SPAN 201, SPAN 202; UGST 181 or hours to be selected with approval by the student's academic advisor and the associate department head from 100-400-level courses in ACCT (p. 895), AGCJ, (p. 904) AGECE (p. 906), AGLS (p. 910), ALEC (p. 914), ANTH (p. 922), ARTS (p. 935), BESC (p. 946), COMM (p. 975), ECON (p. 1016), ECCB, ENDS (p. 1021), ENTO (p. 1031), EPSY (p. 1034), FINC (p. 1043), FSTC (p. 1051), GEOG (p. 1055), GENE (p. 1053), HLTH (p. 1079), HMG 201 (p. 1081), HORT (p. 1085), INST (p. 1092), ISTM (p. 1098), KINE (p. 1109), LAND (p. 1113), MEPS (p. 1145), MGMT (p. 1146), MKTG (p. 1149), NUTR (p. 1175), PBSI (p. 1184), RWFM (p. 1222), SCSC (p. 1229), SCMT (p. 1227), SOCI (p. 1233), SPAN (p. 1238), SPED (p. 1242), STAT (p. 1248).

⁷ Hours to be selected based on the emphasis area chosen in consultation with the student's academic advisor.

⁸ This course fulfills a communications requirement.

Horticulture - BS

This program offers hands-on training in horticulture and landscape management, preparing students for diverse careers and advanced studies in life sciences.

This degree is structured to provide students with hands-on training, knowledge, and skills needed for producing, improving, managing, and marketing fruit, nut, vegetable, landscape, floral, and other ornamental crops or designing, building, and maintaining residential or small-scale commercial landscapes. This degree also prepares students for undertaking graduate studies so that they can pursue science, technology, research, and development-focused careers in life sciences. Career prospects range from managing the production of horticultural crops in fields and in controlled environments, managing landscape businesses for growing communities, designing sustainable residential landscapes of the future, working with clientele in botanic and community gardens to enhance urban environments, to growing and marketing fruits, nuts, and vegetables, including those for healthier lifestyles. Former students have become leaders in the horticulture industry or entrepreneurs owning their horticultural crop production, greenhouse, nursery, or landscape operations. Several others work in upper management of large corporations, facilitate the implementation and development of new horticultural products and production services, serve in educational institutions, government agencies, or community service organizations, or travel the world developing, improving, and marketing future horticultural crops.

⁴ This course fulfills a writing intensive course requirement.

⁵ This course fulfills a communications requirement.

⁶ Hours to be selected based on the emphasis area chosen in consultation with the student's academic advisor.

Horticulture - Minor

This program covers topics like crop production, enology, greenhouse management, floral design, and biotechnology, providing students with essential horticultural skills.

An undergraduate minor in Horticulture provides students with a concentration of courses focusing on horticulture and floriculture. These may range from a broad-based, comparative perspective to a narrower application within the field. Students may choose such diverse topics as herb, fruit, nut, and vegetable production, viticulture and wine production (enology), greenhouse and nursery management, floral and landscape design, science and biotechnology, urban and environmental horticulture, and much more. Earning a minor in Horticulture provides students with the skills required to have a basic working knowledge of the field of Horticulture.

Program Requirements

Code	Title	Semester Credit Hours
HORT 201	Horticultural Science and Practices	3
HORT 202	Horticultural Science and Practices Laboratory	1
Upper-level requirement		9
Select from HORT 300 to 499 (p. 1085)		
Electives		5
Select from HORT 100 to 499 (p. 1085)		
Total Semester Credit Hours		18

Students must make a grade of "C" or better in all courses and must be in good academic standing with a GPA of 2.00 or above.

Floral Design - Certificate

This program is designed to provide a knowledge base for individuals interested in pursuing a career in the varied aspects of the floral design industry.

The Floral Design Certificate, offered by the Department of Horticultural Sciences, provides a concentrated study in designing floral arrangements for special occasions, events, parties, and weddings. The certificate provides specialized knowledge and skills to individuals interested in pursuing a career or affiliation with the floral design industry's many and varied aspects. The certificate is open to all majors; however, students should consult an academic advisor before applying for the Floral Design Certificate program.

Program Requirement

Code	Title	Semester Credit Hours
HORT 203	Floral Design	3
HORT 451	Retail Floristry	3
HORT 452	Floral Design: Weddings and Personal Flowers	3
HORT 453	Floral Art	2
HORT 454	Special Event Design and Production	2
Select one of the following:		3

HORT 335 Sociohorticulture

HORT 416 Understanding Wine - From Vines to Wines and Beyond

HORT 429 Floriculture Crop Production

Total Semester Credit Hours**16**

Viticulture and Enology - Certificate

This program is designed to provide a knowledge base for individuals interested in pursuing a career in the wine industry.

The Viticulture and Enology Certificate, offered by the Department of Horticultural Sciences, provides a concentrated study of viticulture, pre- and post-fermentation wine-making processes, wine etiquette, and sensory evaluation. The certificate provides specialized knowledge and skills, career advancement opportunities, or a pathway to further education to those interested in the burgeoning wine industry.

Program Requirements

Code	Title	Semester Credit Hours
CHEM 222	Elements of Organic and Biological Chemistry	3
FSTC 487/ ANSC 487	Sensory Evaluation of Foods	3
HORT 416	Understanding Wine - From Vines to Wines and Beyond	3
	or HORT 420 or Concepts of Wine Production	
HORT 419	Viticulture and Small Fruit Culture	3
	or HORT 311 or Fruit and Nut Production	
HORT 421	Enology	3
Total Semester Credit Hours		15

Applicants must be currently enrolled in a degree program at Texas A&M University and, if required, have permission from their departmental advisor to apply for the program.

Any major at Texas A&M University can apply.

An overall Texas A&M University GPA of 2.0 or higher is required for acceptance into the program.

Must complete Certificate in Viticulture and Enology program application.

Department of Hospitality, Hotel Management and Tourism

Head: Brian King

Associate Department Head for Graduate and Undergraduate Programs: John Crompton

The Department of Hospitality, Hotel Management and Tourism consists of a team of student-centered faculty and staff offering degrees, certificates, and minors that lead to professional careers. Using a blend of in-person and online delivery, courses emphasize problem-solving skills and experiential learning. Students in this major learn how to incorporate social and life sciences into the design of meaningful experiences and to manage and market organizations associated with hospitality and hotels, recreation, events, and tourism. The academic

programs couple theoretical foundations in hospitality, recreation, and tourism with real-world applications that provide students with tangible skills. Courses engage students in the study of planning, positioning, leadership, problem-solving, innovation, policy, marketing, and finance to enhance the quality of life and livability within Texas and beyond. Students have opportunities to apply course concepts by engaging in service-learning experiences both on-campus and in the community.

Within the Bachelor of Science degree students select one of three tracks: Business Hospitality; Event, Tourism and Recreation Management; or Hotel and Resort Management. Graduates of this degree develop their management careers in a range of settings - hotels and resorts, event venues, destination marketing organizations, municipal parks, performing arts facilities and on military bases.

The Department offers two certificates which are open to all majors:

- Professional Event Management Certificate (PEMC)
- Hospitality Management Certificate

The Department's two minors are open to all Texas A&M undergraduate students:

- Recreation Management
- Tourism Management

Hospitality, Hotel Management and Tourism - BS, Event, Tourism and Recreation Management Track

This program provides an industry-responsive curriculum with a focus on experience design and implementation, management of organizations and human capital, data-driven decision-making, service quality, marketing, risk management and financing of programs/services.

Through a four-year degree, the Bachelor of Science in Hospitality, Hotel Management and Tourism will prepare professionals to manage organizations and innovate change in a diverse and expanding field. The degree provides an industry-responsive curriculum with a focus on experience design and implementation, management of organizations and human capital, data-driven decision-making, service quality, marketing, risk management and financing of programs/services. Courses are offered in person, with some also available in distance formats.

The leisure experience industries continue to evolve and expand. University graduates who desire to work in the expansive hospitality and tourism industries require a knowledge and skillset that address the experiences people seek and the financial understanding required for economic viability. The hospitality industry (e.g., attractions, restaurants, resorts, hotel lodging) has become a major part of people's leisure, supporting tourism as one of the world's largest industries.

Hospitality, Hotel Management and Tourism - BS, Hotel and Resort Management Track

This program provides knowledge to develop skills and knowledge about food and beverage management, hotel and resort operations, entrepreneurship, and revenue management.

The four-year Bachelor of Science in Hospitality, Hotel Management and Tourism degree prepares professionals to manage organizations and innovate change in a diverse and expanding field. The degree provides an industry-responsive curriculum with a focus on experience design and implementation, management of organizations and human capital, data-driven decision-making, service quality, marketing, risk management and the financing of programs/services. Courses are offered in person, with some also available in distance format.

The leisure experience industries continue to evolve and expand. New businesses have emerged; both government and non-government agencies are looking towards more business-oriented operational models. University graduates who desire to work in the expansive hospitality and tourism industries require a knowledge and skillset that address the experiences that people are seeking and also the financial understanding that is needed to ensure economic viability. The hospitality industry (e.g., attractions, restaurants, resorts, hotel lodging) has become a major component of the leisure phenomenon, supporting tourism as one of the world's largest industries.

The Texas hotel industry generates over \$30 billion in annual wages. Significant career growth related to hospitality and hotels has been spurred by the increasing practice of blending business and leisure travel amongst travelers post-pandemic.

RWFM 323	Parks and Protected Area Management	
RWFM 400/Study Abroad in Natural Resources		
ECCB 452		
Total Semester Credit Hours		18

Students must make a grade of C or better in all courses.

Tourism Management - Minor

The Department of Hospitality, Hotel Management and Tourism offers a minor in Tourism Management as a supplement to other majors. The minor focuses on the planning, management, development and promotion of places and events as tourism attractions. Together, the various tourism courses are designed to explore and explain the linkages between local places and cultures, host populations, and various public, private, and special interest groups. Students in this minor can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, and other tourism-related service organizations.

Program Requirements

Code	Title	Semester Credit Hours

HMGT 331	Marketing in the Digital Age for Hospitality, Hotel Management and Tourism	
HMGT 340	Global Communities & Diverse Populations in Hospitality, Hotel Management and Tourism	
HMGT 352	Hotel and Resort Operations	
HMGT 353	Food and Beverage Management	
HMGT 424	Event Management Capstone	
HMGT 426	Sustainable Tourism	
HMGT 446	Information and Communication Technology in Hospitality, Hotel Management and Tourism	
HMGT 465	Revenue Management	
HMGT 467	Seminar for the Visitor Economy	
Total Semester Credit Hours		18

Students must make a grade of C or better in all courses.

Hospitality Management - Certificate

The Certificate in Hospitality Management offered by the Department of Hospitality, Hotel Management and Tourism provides students with an understanding of the planning, analysis, and decision-making techniques that are required by managers in the hospitality and tourism industries. Students will acquire skills and capabilities relating to the principles of management, sustainability, development, cultural intelligence, marketing, finance, and service quality as they apply to the hospitality and tourism industries.

This program is also approved for delivery via asynchronous distance education technology.

Program Requirements

Code	Title	Semester Credit Hours
Select five from the following:		15
HMGT 201	Foundations of Hospitality, Hotel Management and Tourism	
HMGT 211	Planning and Implementation of Events and Programs	
HMGT 223	Managing Hospitality and Tourism Organizations	
HMGT 312	Managing Human Capital in Hospitality, Hotel Management, and Tourism	
HMGT 314	Service Quality in Hospitality, Hotel Management, and Tourism	
HMGT 331	Marketing in the Digital Age for Hospitality, Hotel Management and Tourism	
HMGT 352	Hotel and Resort Operations	
Total Semester Credit Hours		15

Students must earn a grade of a C or better in each course used to meet the requirements.

Students must maintain a 2.5 GPA average in required courses.

Professional Event Management - Certificate

The Professional Event Management Certificate (PEMC) offered by the Department of Hospitality, Hotel Management and Tourism provides students with the knowledge and skills to plan, implement and evaluate festivals, fairs and special events in a variety of settings - governmental, not-for-profit and commercial. This certificate is open to all majors.

This program is also approved for delivery via asynchronous distance education technology.

Program Requirements

Code	Title	Semester Credit Hours
HMGT 211	Planning and Implementation of Events and Programs	3
HMGT 320	Event Management and Operations	3
HMGT 424	Event Management Capstone	3
Select one of the following:		3
HMGT 319	Event Management in Specialized Contexts	
HMGT 353	Food and Beverage Management

SPMT 366	Sport Facility and Event Management	
SPMT 412	Managing Sport Events	
THEA 245	Introduction to Theatrical Design	
Total Semester Credit Hours		15

The PEMC program requires a minimum of 15 credit hours in designated courses. Students must earn a grade of C or better in each course used to meet the requirements, and maintain a B average (3.0 GPA) in the required courses. Students who pursue the PEMC must complete all requirements prior to graduation. Details are available in the Undergraduate Programs Office of the Department of Hospitality, Hotel Management and Tourism and on our website.

Recreation and Park Management - Certificate

The Department of Hospitality, Hotel Management and Tourism (HMGT) offers a certificate in Recreation and Park Management.

Management of recreation, park and leisure-service agencies requires expertise in problem-solving, decision-making, assessment of social and environmental impacts, personnel, public relations, volunteer management, financing and fund-raising, marketing of services, and needs assessments. Skills in working with people in the legal and political environment are necessary, as well as the ability to assess and work with other organizations for cooperative developments in recreation and tourism. Students in this emphasis prepare for managerial careers

with public recreation and park agencies, youth agencies, not-for-profit recreation agencies, and commercial recreation enterprises.

¹ Select from HMGT 200-499 (p. 1081); RWFM 346, RWFM 375, RWFM 400/ECCB 452.

Students must have a minimum 2.0 overall GPA in courses within the certificate.

Tourism Management - Certificate

The Department of Hospitality, Hotel Management and Tourism (HMGT) offers a certificate in Tourism Management.

Tourism is one of the world's largest and most diverse industries. To help students prepare for tourism careers, the certificate in Tourism Management introduces issues pertaining to the management, development, and promotion of places and events as tourism attractions. Courses in tourism are designed to collectively build understanding about the links that exist between local places, host populations, and various public, private and special interest groups. Students also develop competencies in assessing economic, environmental, social and political impacts of tourism, as well as in tourism marketing. Students in this certificate can pursue careers in private sector enterprises, government agencies, convention and visitor bureaus, and other tourism-related service organizations.

This program is also approved for delivery via asynchronous or synchronous distance education technology.

Students must have a minimum 2.0 overall GPA in courses within the certificate.

Youth Development - Certificate

The Department of Hospitality, Hotel Management and Tourism (HMGT) offers a certificate in Youth Development.

This certificate focuses on programs and services that contribute to the development of young people's personal, physical, social and educational abilities in and out-of-school contexts. Youth workers are program developers, leaders and managers who need to be able to work with youth, families, organizations and communities. Coursework in this option focuses on positive youth development, program planning and evaluation, methods for working with young people, and societal factors that both contribute to and inhibit the development of young people. Students with an option in this field look forward to careers with non-profit, public and for-profit agencies that supply youth development opportunities for young people. Settings include after-school programs, community programs, camps, outdoor adventure and church-related recreation programs.

Program Requirements

Code	Title	Semester Credit Hours
ALEC 370	Principles of Positive Youth Development	3

¹ Select from HMGT 200-499 (p. 1081); RWFM 346, RWFM 375, RWFM 400/ECCB 452.

Students must have a minimum 2.0 overall GPA in courses within the certificate.

Department of Nutrition

Nutritional sciences prepares majors with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health. Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/ Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Two curriculum tracks are offered (Didactic Program in Dietetics and Human Health) to provide flexibility in one's chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit <https://nutrition.tamu.edu/>.

Nutrition - BS, Didactic Program in Dietetics Track

Nutritional sciences prepares students with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health.

Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the role of nutrients in biochemistry, genetics, physiology, microbiology and immunology that promotes wellness and enhances the quality of life. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in human or veterinary medicine; degrees in dentistry, pharmacy, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/ Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Two curriculum tracks are offered (Didactic Program in Dietetics and Human Health) to provide flexibility in one's chosen career path. The Nutrition major prepares one for graduate school, corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit <https://nutrition.tamu.edu/>.

Didactic Program in Dietetics Track

The Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and is designed to prepare students for meeting the requirements for the credential of Registered Dietician (RD). The DPD provides a strong science base and foundational courses in nutrition for students desiring a dietetic practice in a clinical, therapeutic, community wellness, public health or food production/service setting.

¹ MATH prefix required.² The Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 48). Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information on core requirements visit the University Core Curriculum (p.) catalog page. Use the Creative Arts Elective (p. 30) and ANTH 205, ANTH 210 as Language, Philosophy & Culture to satisfy degree requirements as well as international and cultural diversity and cultural discourse requirements.³ Select from any 100-499 course not used elsewhere.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

Nutrition - BS, Human Health Track

Nutritional sciences prepares students with a comprehensive knowledge of the biological and social sciences to understand the relationships between nutrients, food components and human health.

Prevention of diseases that are related to lifestyle, particularly diet and nutrition, is a focus of the curriculum. Core courses emphasize the integration of nutrients in biochemistry, genetics, physiology and anatomy, microbiology and immunology underlying wellness, disease, and enhancing the quality of life to promote a healthy lifespan. The major also provides an excellent background for those interested in pursuing graduate degrees in biological, nutritional or food sciences; professional degrees in medicine; dentistry, pharmacy, physician assistant, physical therapy, nursing, public health and other health professions; or dietetic internships.

The Didactic Program in Dietetics (DPD) and the Graduate Degree/ Dietetic Internship Program are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND). Students who successfully complete the DPD and a dietetic internship are eligible to take the Registration Examination to become a Registered Dietitian (RD).

Two curricular tracks are offered (Didactic Program in Dietetics and Human Health) to provide flexibility in one's chosen career path. In addition to post-graduate studies, the Nutrition major prepares students for corporate wellness positions, health promotion programs, the food industry, public health programs, pharmaceutical sales, clinical dietetics, medical and research laboratories, biotechnology firms, government agencies and related fields. For more information, visit the Department of Nutrition website. (<https://nutrition.tamu.edu>)

Human Health Track

The Human Health Track provides a wide range of approved electives in order to customize a degree suited to research interests and career objectives. Through this program, students are prepared to work in community nutrition programs, education, research, and as technical representatives in the nutrition and health industry. This program especially designed for students wanting to go to graduate or professional schools such as medicine, dentistry, physical therapy, physician assistant, or pharmacy.

¹ MATH prefix required.

² The Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 48). Selection must be from courses in the Core Curriculum. Selection can be courses that also satisfy the requirement for social and behavioral sciences; creative arts; language, philosophy and culture; or electives. For more information on core requirements visit the University Core Curriculum (p.) catalog page.

³ Select from any 100-499 course not used elsewhere.

⁴ Students may choose from the following technical electives: ACCT 209; BICH 431/GENE 431; BIOL 352, BIOL 413 or BIOL 414; CHEM 238, CHEM 315 and CHEM 318; COMM 203, COMM 315 or COMM 325; FINC 409; HLTH 236, HLTH 334, HLTH 354/PHLT 354, ISTM 209; MGMT 209, MGMT 309; MKTG 409, SOCI 205; PBSI 300-499 (p. 1184); PHYS 201, PHYS 202; VTPP 425.

A total of 120 hours is required for graduation; 36 hours of 300/400 level courses are required to meet the Texas A&M University residency requirement.

Nutrition - Minor

This program will prepare students with general knowledge about the role and impact of human nutrition on health and physiology and different nutritional requirements through the lifespan.

The Department of Nutrition offers a minor in Nutrition (NUTR). Students seeking the minor must complete a minor form (<https://nutrition.tamu.edu/minor-in-nutrition/>) and have it approved and signed by the NUTR undergraduate advisor and their major academic advisor.

Program Requirements

Code	Title	Semester Credit Hours
NUTR 202	Fundamentals of Human Nutrition ¹	3
	or NUTR 203 or Scientific Principles of Human Nutrition	
NUTR 301	Nutrition Through Life	3
NUTR 400	Ethics in Nutrition and Healthcare	1
NUTR 100-499 (p. 1175) ²		9
Total Semester Credit Hours		16

¹ NUTR 202 (non-majors only) or NUTR 203 (majors/minors only).

² At least 6 hours must be from the 300-400-level.

Culinary Health - Certificate

The certificate program in Culinary Health integrates scientific principles of nutrition, dietary recommendations, and food and cooking skills to facilitate healthy eating behaviors for health promotion.

Concepts from this program will be applied to recipe development and modification to meet dietary needs and sensory acceptability. Development of culinary presentations for community groups will provide a capstone using learned culinary skills and nutrition knowledge.

Program Requirements

Code	Title	Semester Credit Hours
CULN 305	Culinary Health	4
CULN 483	Culinary Health Practicum	2
NUTR 301	Nutrition Through Life	3
NUTR 404	Nutrition Assessment and Planning ¹	3
	or NUTR 41 or Nutritional Treatment of Disease	
NUTR 408	Professional Development in Nutrition and Dietetics ²	1
	or NUTR 400 or Ethics in Nutrition and Healthcare	
Total Semester Credit Hours		13

¹ Non-DPD students must complete NUTR 412.

² Non-DPD students must complete NUTR 400.

Sport Nutrition - Certificate

The certificate in Sports Nutrition equips students with the knowledge and skills necessary to optimize athletic performance through evidence-based nutrition practices.

This certificate is designed for dietetic students looking to enhance their understanding of the role of nutrition in sports, exercise, and overall health.

Through a dynamic curriculum, students will explore key topics such as macronutrient and micronutrient requirements for athletes, hydration strategies, recovery nutrition, and dietary supplements. Courses emphasize practical application, preparing students to assess individual needs, develop personalized nutrition plans, and work collaboratively with sports professionals in various settings.

Whether aiming to work with elite athletes or recreational fitness enthusiasts, this certificate provides a strong foundation in sports nutrition, integrating scientific principles with real-world experience.

Department of Plant Pathology and Microbiology

Our mission is to conduct leading edge research on plant diseases and plant-microbe interactions that directly and indirectly impact: Our ability to feed the world; human and animal health; environmental stewardship and sustainability. Educate and prepare leaders in the STEM fields of plant and environmental health through a creative and challenging educational environment that integrates scholarship, fundamental knowledge, and experiential learning. Convey information relevant to society through effective outreach and services that address plant health, food safety and environmental health to the citizens of Texas, the United States and the World.

An extension of this mission is to train the next generation of environmental professionals by providing them both the analytical and biological understanding to successfully protect the environment while promoting economic vitality.

Faculty

Antony Babu, Sanjay, Assistant Professor

- Bachelor of Science in Environmental Studies (p. 217)

Minors

- Bioenvironmental Sciences Minor (p. 218)

Bioenvironmental Sciences - BS

This program equips students with innovative science and technology skills to address environmental challenges, preparing them for diverse and impactful careers.

Major breakthroughs are taking place locally, regionally and globally concerning environmental awareness. Environmental hazards take many forms, including microbial threats, toxic wastes and the indirect impact of man's activities on a fragile ecosystem. As a result, there is a growing recognition that the solutions to environmental problems require innovative multi-disciplinary perspectives and technologically-intensive approaches. The Bioenvironmental Sciences curriculum (BESC) was designed in consultation with numerous industry representatives in order to comply with the most current thinking on the talents needed for tomorrow's environmental fields. Students will be prepared for a breadth of career choices in the environmental sciences. These choices include such areas as research and development, environmental consulting, remediation of wastes, site assessment and environmental sampling, and environmental law. Graduates from BESC find employment in federal, state and municipal environmental agencies; in industries concerned with the generation and clean-up of hazardous wastes; with environmental advocacy and educational groups. In addition, the strong science base in BESC prepares students for professional and graduate schools in a variety of disciplines.

The curriculum described combines a foundation of required courses of technical and free electives to allow the student the maximum flexibility to design a personalized course of study. Students are advised to focus on an area of emphasis with those electives that come from such categories as conservation/ecology, policy/ethics/regulations, the physical environment, engineering, plant studies, genetics/biotechnology and general environmental. The Department of Plant Pathology and Microbiology also supports the extracurricular activities needed to support a successful environmental professional.

¹ Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/departments requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

² Select 18 hours from BESC 203, BESC 204, BESC 311, BESC 314, BESC 320, BESC 357, BESC 367, BESC 401, BESC 402, BESC 403, BESC 411, BESC 421, BESC 431, BESC 489, SCSC 405. Other courses may be approved by advisor.

³ Courses may be selected from categories designed to reflect the professional aspirations of the student. Courses to be selected in consultation with academic advisor. Select 16 hours from ACCT 209; AGECE 344, AGECE 350, AGECE 429; AGSM 335, AGSM 360, AGSM 337, AGSM 477; ANSC 326/FSTC 326, ANSC 327/FSTC 327; ATMO 201; BESC 485, BESC 491; BICH 303, BICH 410, BICH 411; BIOL 213, BIOL 214, BIOL 357, BIOL 440; CHEM 242, CHEM 228, CHEM 237, CHEM 238, CHEM 316, CHEM 318; ECCB 308, ECCB 309, ECCB 320, ECCB 351, ECCB 403, ECCB 460/RPTS 460; ENSS 105; ENTO 201, ENTO 424; FINC 409; GENE 412, GENE 431/BICH 431, GENE 432/BICH 432; GEOG 201, GEOG 202, GEOG 203, GEOG 205, GEOG 213, GEOG 330, GEOG 380, GEOG 390, GEOG 398, GEOG 434, GEOG 435, GEOL 101, GEOL 104, GEOL 410, GEOL 420; HIST 359, HORT 201, HORT 202, HORT 313; HMG 207; ISTM 209; FSTC 201; MGMT 209, MGMT 309; MKTG 409; OCNG 320; PHIL 314; PHLT 305, PHLT 330, PHLT 331; PHYS 201, PHYS 202, PHYS 206; POLS 306, POLS 347, POLS 461; RWFM 308, RWFM 314, RWFM 375, RWFM 405, RWFM 406, RWFM 411, RWFM 420, RWFM 436, RWFM 440, RWFM 470, SCSC 105, SCSC 201, SCSC 205, SCSC 302, SCSC 310, SCSC 311, SCSC 315, SCSC 330, SCSC 406, SCSC 410, SCSC 411/GENE 411, SCSC 420, SCSC 421, SCSC 444, SCSC 455, SCSC 458; SOCI 328; URPN 360; URPN 370; URPN 460; VTPB 221, VTPB 423, WFSC 425.

Environmental Studies - BS

This program is designed to educate students about the scientific, human-dimension and policy aspects of environmental issues facing our state and nation as they work in regulatory agencies, industry and non-governmental organizations to resolve problems.

The increasing demands that population growth and affluence put on Earth's natural resources and environment require greater numbers of trained professionals and informed citizens. This Bachelor of Science degree in Environmental Studies blends an interdisciplinary understanding of Earth's surface processes and environmental problems, along with the policy and decision-making components of human interactions with the environment. Students focus upper division coursework in one of five environmental themes: 1) urban environment, 2) occupational health and safety, 3) environmental regulation and compliance, 4) Geographic Information Science and Technology (GIST), and 5) global environment.

Program Requirements

¹ Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

² Select five from the following in consultation with academic advisor: AGEC 344, AGEC 350, AGEC 429; BESC 314, BESC 357; ECCB 308; ECON 202, ECON 203, ECON 323, ECON 412; ENSS 105; ENTO 210, ENTO 431/FIVS 431; GEOG 205, GEOG 401, GEOG 406; PHIL 205, PHIL 314; URPN 202, URPN 360, URPN 370, URPN 460; PSAA 440; POLS 229, POLS 231, POLS 306, POLS 340/PSAA 340, POLS 342, POLS 347, POLS 461; RWFM 308, RWFM 436; SOCI 312, SOCI 328, SCSC 330.

³ Select four from the following in consultation with academic advisor: AGSM 301, AGSM 335, AGSM 337, AGSM 477, BESC 204, BESC 320, BESC 401, BESC 403, ECCB 203, ECCB 304, ECCB 320,

ECCB 403, ECCB 444, ENTO 201, ENTO 320, ENTO 403, ENTO 424; HMGT 426; HORT 301, POSC 427, RPTS 460/ECCB 460, RWFM 301, RWFM 323, RWFM 405, RWFM 411, RWFM 420, SCSC 105, SCSC 201, SCSC 205, SCSC 302, SCSC 310, SCSC 311, SCSC 315, SCSC 410, SCSC 420, SCSC 421, SCSC 444, SCSC 458.

A minimum of 120 semester hours will be required for a BS degree.

Bioenvironmental Sciences - Minor

The Bioenvironmental Sciences minor prepares students for a breadth of career choices in the environmental sciences.

This minor is available to all students enrolled in majors at Texas A&M University outside of the Department of Plant Pathology and Microbiology.

The minor requirements can be found on the Program Requirements tab. Note that all prerequisites for each core and elective course also must be met. Prerequisite courses will not be applied to the minor requirements and do not count toward the number of hours needed to complete the minor.

Program Requirements

Code	Title	Semester Credit Hours
BESC 201	Introduction to Bioenvironmental Sciences	3
PLPA 301 or BESC 361	Plant Pathology or U.S. Environmental Regulations	3
Select 9 hours from the following:		9
BESC 204	Molds and Mushrooms: The Impact of Fungi on Society and the Environment	
BESC 311	International Perspectives on Environmental Issues	
BESC 314	Pathogens, the Environment and Society	
BESC 320	Water and the Bioenvironmental Sciences	
BESC 357	Biotechnology for Biofuels and Bioproducts	
BESC 401	Bioenvironmental Microbiology	
BESC 402	Microbial Processes in Bioremediation	
BESC 403	Sampling and Environmental Monitoring	
BESC 411	Environmental Health and Safety Compliance

Total Semester Credit Hours		15

Department of Poultry Science

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive methods of poultry and food production. Students are trained in the necessary background, analytical skills, problem solving and leadership for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Poultry Science - BS, Industry Emphasis

Students are trained in the necessary background, analytical skills, problem solving and leadership roles for complex production units, hatcheries, integrated feed mills, processing plants and research laboratories.

Growth of the poultry industry has created the need for scientific, technical and business knowledge in the various fields important to successful poultry production. In few fields of science is an understanding of the basic sciences, nutrition, genetics, physiology, diseases, biotechnology, processing and marketing more rewarding than in the modern, intensive methods of poultry and food production. Rapid industry growth provides many career opportunities for graduates. Students are given two emphasis areas in which to specialize their education toward their selected career goals. The University Core Curriculum courses and the Poultry Science Core courses are required for both emphases. Students then complete a BS degree in either emphasis area by completing the respective emphasis area courses. All students are strongly encouraged to get early and frequent academic counseling which is readily available.

Students completing a BS degree in the industry emphasis find employment with the poultry and food industries in positions such as corporate management, quality assurance, sales or technical support in live production, processing or marketing. Students in this emphasis also get positions with pharmaceutical and equipment companies, with industry trade publications and in various university and public service positions.

Students completing a BS degree in the technical emphasis are prepared for advanced study in biochemistry, nutrition, physiology, molecular genetics, reproduction, processing technology, microbiology or environmental science and for eventual professional employment in research, teaching or public service. This curriculum can be easily tailored to meet the veterinary medicine preprofessional requirements.

Department of Rangeland, Wildlife and Fisheries Management

Head: Roel Lopez

Associate Head: Gerard Kyle

Undergraduate Advisors: Michael Werner

The mission of the Department of Rangeland, Wildlife and Fisheries Management (RWFM) is to prepare the next generation of natural resource stewards to generate sound, innovative solutions to address increasing demands of natural resources and associated challenges, such as population growth and land use changes. RWFM curriculum integrates foundational knowledge from several disciplines—biological, physical, and social sciences—along with leadership training, promotion of critical thinking skills and experiential learning opportunities rooted in evidence-based science and practical application.

This program offers students field experiences to best shape them to be natural resources leaders. The department has several partnerships in place to offer facilitated internships where students can experience career-specific jobs and build resume credentials for future employment. Hands-on field experience is offered in the majority of RWFM courses to reinforce classroom principles, and the degree curriculum includes a two-week summer course between sophomore and junior years.

Upon graduation, students are equipped with the necessary background and skills to qualify for career building certifications required in natural resource professions. The undergraduate program prepares students to continue their education in graduate and other professional programs or pursue a wide range of careers in leading conservation and science-based agencies at state and federal levels, as well as private land enterprises and non-governmental organizations. In response to the

complexity and diversity of the field, the BS in RWFM program offers five unique specialization tracks to further tailor a student's degree to best meet post-graduation needs. The Department also offers a unique, five-year combination program with The Bush School of Government and Public Service (<https://bush.tamu.edu/>) enabling undergraduate students to continue into the Master of Public Service and Administration (<https://bush.tamu.edu/psaa/degrees/mpsa/>) program, completing both degrees upon graduation.

Rangeland, Wildlife and Fisheries Management - BS, Aquaculture and Fisheries Management Track

The Aquaculture and Fisheries Management track blends chemistry, mathematics, and biology basics with the advanced techniques necessary to sustainably manage wild fish populations or inland fishery/aquaculture operations.

Courses are designed to focus on the integration of applied fisheries management and aquaculture production disciplines, preparing students to handle traditional and emerging, complex issues. Core areas of study include fish biology and disease, hatchery management, commercial aquaculture production, restoration and stock enhancement aquaculture aquatic ecosystem management, and water quality management.

Upon graduation, students will meet the basic qualifications to apply for the American Fisheries Society's Associate Fisheries Professional certification, and later the Certified Fisheries Professional certification following professional experience, providing competitive credentials in today's job market. Students will be prepared to seek employment in a variety of careers spanning government agencies, such as Texas Parks and Wildlife and the U.S. Fish and Wildlife Service, or private aquaculture operations.

Rangeland, Wildlife and Fisheries Management - BS, Natural Resources Management and Policy Track

The Natural Resources Management and Policy track prepares students to examine environmental and conservation issues through a multi-disciplinary framework that includes political, cultural, social, economic, regulatory and ecological dimensions.

Courses emphasize development of skill sets that promote strong interpersonal skills, leadership and collaboration with varied stakeholder groups. These critical skills are taught in the classroom and through field experiences, working in tandem to enhance students' abilities to assess complex environmental issues, envision a desired conservation outcome, and design and implement a plan needed to bring visions to fruition.

The diverse coursework of this track prepares students for a variety of careers in industries such as public service, outdoor education, park and protected area management, environmental planning and consultation, and non-profit organizations.

Rangeland, Wildlife and Fisheries Management - BS, Outdoor Enterprise Management Track

The Outdoor Enterprise Management track is a cross-disciplinary program that provides training in the basic principles of wildlife and fisheries ecology, hospitality and food services, and business management.

Training in this program prepares graduates for employment at any of thousands of hunting and fishing lodges, ranches, corporate retreat facilities, and other consumptive and non-consumptive use facilities worldwide.

Economic expenditures for hunting, fishing, and nature-based tourism are at an all-time high, and service sector businesses that specialize in providing hunting, fishing, and nature-based adventures have substantially increased over the last decade. These popular destinations for outdoor enthusiasts are unique enterprises because their successful operation requires a balance among work activities associated with wildlife management and conservation, hospitality, and business. The most successful enterprises ensure that the consumptive and non-consumptive uses of wildlife and fishery resources meet the ethical standards of society while ensuring that the customer has the experience of a lifetime.

Rangeland, Wildlife and Fisheries Management - BS, Rangeland Management Track

The Rangeland Management track combines the disciplines of ecology and range management to best promote the production, conservation, function and stewardship of rangelands found around the world.

Our curriculum focuses on fundamental ecological and rangeland principles used in addressing leading challenges, such as watershed health, invasive exotic plant control and wildland fires. Included in this track is a summer field camp providing intense field experience to solidify principles students will need to pursue advanced coursework in focal management areas.

The Society for Rangeland Management has recognized this track as an accredited program, exceeding acceptable standards in the profession. Upon graduation, students will meet the basic qualifications to apply for certificates as a Certified Professional in Rangeland Management and Certified Range Management Consultants, providing competitive credentials in today's job market. Students will be prepared to seek employment with government agencies, such as the Natural Resources Conservation Service, or head into environmental and natural resources consulting or private sector ranch management.

¹ Must make a grade of C or better.

² Select from AGECE 350, ANSC 107, ANSC 108, ANSC 302, ECCB 304, ECCB 416, RWFM 406, RWFM 345, RWFM 436, RWFM 440, RWFM 480, SCSC 310.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

Rangeland, Wildlife and Fisheries Management - BS, Wildlife Management Track

The Wildlife Management track builds a strong foundation in managing wildlife populations and their habitats, with courses targeting key topics such as wildlife population dynamics, anatomy and physiology, habitat management principles and wildlife techniques.

Included in this track are summer field practicum and internship requirements providing intense field experience opportunities to solidify principles students will need to understand to pursue advanced coursework in focal management areas.

Upon graduation, students will meet the basic qualifications to apply for The Wildlife Society's Associate Wildlife Biologist certification, and later the Certified Wildlife Biologist certification following professional experience, providing competitive credentials in today's job market. This program is designed to teach the necessary background and experience to seek careers in the growing wildlife management field and to prepare students to lead in the wildlife profession through advanced technical skills, professional communication, and scientific expertise. Students will be prepared to seek employment with government agencies, such as Texas Parks and Wildlife and the U.S. Fish and Wildlife Service, or venture into biological consulting, environmental non-profit agencies, or research-oriented professions.

Rangeland, Wildlife and Fisheries Management- 5-year Bachelor of Science and Master of Public Service Administration

This program integrates the science and practice of managing fish and wildlife populations with policies for these public resources on both public and private lands.

The five-year degree program with the Bush School of Government and Public Service allows undergraduate students in Rangeland, Wildlife and Fisheries Management to enter the Master of Public Service and Administration program at the beginning of their fourth year. Students are prepared for careers in conservation with a foundation in life and physical sciences, mathematics, and problem-solving skills that accommodate animals and their habitats within larger ecological systems. Upon graduation, students are prepared for a wide variety of post-graduate opportunities including employment in local, state, or federal government, non-profit organizations and private industry.

² Courses taken for credit in both the undergraduate and graduate degree for a combined total of 18 credits: BUSH 631, PSAA 601, PSAA 611, PSAA 621, PSAA 643, and RWFM directed elective.

³ Select a 600-level course from ECCB or RWFM.

⁴ Directed electives to be chosen to meet requirements for one of the three degree tracks in Master of Public Service and Administration (MPSA): Public Policy Analysis (PPA), Public Management (PM), or Non-Profit Management (NPM).

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Science in Rangeland, Wildlife and Fisheries Management and the Master of Public Service Administration.

Total Program Hours 168

Park and Natural Resource Management - Minor

This program focuses on integrating concepts of bio-environmental sciences, social and behavioral sciences, and policy and administrative decision-making to equip future land managers and related professionals with the background and skills necessary for the management of natural and cultural resources associated with conserving parks and other protected areas.

The minor in Park and Natural Resource Management is offered from the Department of Rangeland, Wildlife and Fisheries Management (RWFM) for undergraduate majors to further refine their studies.

This minor is ideal for students interested in careers in recreation, park, and tourism fields, including those offered by state and federal agencies, private enterprises, non-profit organizations, youth camps, and environmental education programs.

Program Requirements

Code	Title	Semester Credit Hours
RWFM 323	Parks and Protected Area Management	3

RWFM 322	Community Development and Sustainability	
RWFM 336	Research Methods in the Human Dimensions of Natural Resources	
RWFM 375	Conservation of Natural Resources	

RWFM 400/Study Abroad in Natural Resources
ECCB 452
RWFM 470 Environmental Impact Assessment

Total Semester Credit Hours**18**

¹ Students are responsible to check each course for required prerequisites.

Must make a grade of C or better in each course used towards minor.

Minimum of 6 hours must be 300-400 level.

Rangeland Management - Minor

This program focuses on developing and integrating the disciplines of ecology and range management to best promote the production, conservation, function, and stewardship of rangelands found around the world.

The minor in Rangeland Management is offered from the Department of Rangeland, Wildlife and Fisheries Management (RWFM) for undergraduate majors to further refine their studies. The minor is available to students in all majors except for RWFM students within Rangeland Management. Our curriculum focuses on fundamental ecological and rangeland principles used in addressing leading challenges, such as watershed health, invasive exotic plant control and wildland fires.

An internship, RWFM 484, is available for minors above the required 18 hours.

Program Requirements

Code	Title	Semester Credit Hours

RWFM 317	Vegetation Management	
RWFM 349	Rangeland and Wildlife Animal Nutrition	
RWFM 411	Ecosystem Management	
Total Semester Credit Hours		18

Minimum required 2.5 GPA to declare minor.

Must make a grade of C or better in each course used towards minor.

Minimum of 6 hours at 300-400 level.

Wildlife and Fisheries Management - Minor

This program focuses on developing a foundation in techniques of wildlife and fisheries management, including managing wildlife populations and their habitats as well as integration of applied fisheries management, preparing students to handle traditional and emerging, complex issues.

The minor in Wildlife and Fisheries Management provides the student with an introduction to the fundamentals of this area of study. The minor is available to students in all majors except for RWFM students within Wildlife Management or Aquaculture and Fisheries Management. The minor is administered by the Department of Rangeland, Wildlife and Fisheries Management.

An internship, RWFM 484, is available for minors above the required 18 hours.

Program Requirements

Code	Title	Semester Credit Hours
RWFM 305	Principles and Practices of Wildlife and Fisheries Management	3
RWFM 350	Wildlife and Fisheries Population Dynamics	3
Wildlife emphasis		
Select two of the following:		6
RWFM 405	Urban Wildlife and Fisheries	
RWFM 406	Wildlife Habitat Management

RWFM 370	Aquatic Vegetation Identification and Management	
RWFM 371	Fisheries and Small Impoundment Management	
RWFM 404	Aquatic Ecosystems	
Total Semester Credit Hours		18

Minimum required 2.5 GPA to declare minor.

Must make a grade of C or better in each course used towards minor.

Minimum of 6 hours at 300-400 level.

Department of Soil and Crop Sciences

Undergraduate students who complete the undergraduate course of study receive the degree of Bachelor of Science in Plant and Environmental Soil Science or Turfgrass Science.

The BS degrees require a minimum of 120 credit hours. Details of course requirements are given in the Texas A&M University Undergraduate Catalog by accessing the program pages. Information on undergraduate admissions can be obtained from the Office of Admissions (<http://>

admissions.tamu.edu/). We encourage prospective students to make an appointment with an academic advisor prior to applying.

Soil and Crop Sciences offers a wide variety of experiential learning opportunities for students to achieve their graduation needs. Undergraduates are required to complete an internship or undergraduate research experience. Study Abroad opportunities are also offered as an elective. Students are able to complete their experiential learning requirement regionally, nationally, or internationally. Information about undergraduate research and internship opportunities can be obtained from students' academic advisors and professors.

Plant and Environmental Soil Science - BS, Crops Emphasis

Students in this program develop and utilize basic scientific knowledge to understand the most fundamental resources, including plants, soils, and water, and the interaction of these resources in different environmental settings.

Curriculum in Plant and Environmental Soil Science is administered by the Department of Soil and Crop Sciences. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.

Based on professional goals and objectives, students majoring in Plant and Environmental Soil Science will select an emphasis in crops or soil and water. The crops emphasis focuses on the principles of production, management, marketing and use of fiber, forage, grain, biofuel and oilseed crops. The graduate in Plant and Environmental Soil and Science with a crops emphasis may choose a career in: education such as consulting, extension, or public relations, or in production agriculture such as biofuel or seed production, farming, or farm management.

Flexible curricula are provided so that each student, in consultation with their academic advisor, can design a degree program that best serves the student's career objectives.

Total Semester Credit Hours		120

¹ Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a University Core Curriculum (p.) category, a college/department requirement, or a general elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

² Select from BIOL 112, CHEM 119, CHEM 120, GEOL 101 and GEOL 102, HORT 201 and HORT 202, PHYS 201, PHYS 202.

³ Select from MATH 135, MATH 136, MATH 140, MATH 142, MATH 147, MATH 148, MATH 150, MATH 151, MATH 152, MATH 167, MATH 168, MATH 171, MATH 172.

⁴ Select from CHEM 222, CHEM 227, CHEM 316, BIOL 206, ECCB 205.

⁵ Statistics course should be selected in consultation with an academic advisor.

⁶ In consultation with academic advisor select from AGCJ 404, AGEC 325, AGEC 340, AGSM 201, AGSM 335, AGSM 301, AGSM 310, AGSM 435, ALED 339, ANSC 107, ANSC 320, ATMO 210, BESC 320, BESC 367, BESC 401, BESC 403, BICH 303, BICH 409, BICH 431/ GENE 431, BICH 432/GENE 432, BICH 450/BIOL 450, BIOL 112, BIOL 113, BIOL 206, BIOL 350, CHEM 119, CHEM 120, CHEM 222, CHEM 227, CHEM 228, CHEM 237, CHEM 238, CHEM 257, CHEM 258, CHEM 316, CHEM 318, CHEM 327, CHEM 328, CHEM 362, CHEM 383, CHEM 415, CSCE 111, ENTO 201, ENTO 401, ENTO 402, ECCB 311, ECCB 351, ECCB 406/GEOG 462, ECCB 407, ECCB 444, ECCB 446, GENE 301, GENE 312, GENE 412, GEOL 390, GEOL 101, GEOL 102, GEOL 443/GEOL 443, MATH 140, MATH 142, MATH 147, MATH 148, MATH 150, MATH 151, MATH 152, MATH 167, MATH 168, MATH 171, MATH 172, MATH 251, MATH 253, MGMT 309, OCNG 469, PHYS 201, PHYS 202, PHYS 206, PHYS 207, PLPA 301, PLPA 334, POSC 427, ECCB 205, RWFM 314, RWFM 317, RWFM 325, RWFM 440, SCSC 105-499 (p. 1229), STAT 404.

Plant and Environmental Soil Science - BS, Soil and Water Emphasis

Students in this program develop and utilize basic scientific knowledge to understand the most fundamental resources, including plants, soils, and water, and the interaction of these resources in different environmental settings.

Curriculum in Plant and Environmental Soil Science is administered by the Department of Soil and Crop Sciences. The required courses provide an essential foundation in several disciplines, while the elective courses can be selected to meet the interests, needs and objectives of individual students.

Based on professional goals and objectives, students majoring in Plant and Environmental Soil Science will select an emphasis in crops or soil and water. In the soil and water emphasis, students will study the nature, properties, management, conservation, and use of soils and water. The graduate in Plant and Environmental Soil and Science with a soil and water emphasis may choose a career in: soil and water resource management such as soil surveying, land appraisal, land use planning,

conservation and pollution abatement, or watershed management, or in environmental areas such as pollution control and environmental protection as affected by plant-soil-water interactions.

Flexible curricula are provided so that each student, in consultation with their academic advisor, can design a degree program that best serves the student's career objectives.

PLPA 303, PLPA 334, POSC 427, ECCB 205, RWFM 314, RWFM 317, RWFM 325, RWFM 440, SCSC 105-499 (p. 1229), STAT 404. At least 6 hours must be 300-level or above.

⁷ Statistics course to be selected in consultation with academic advisor.

Turfgrass Science - BS

Students in this program develop and utilize basic scientific knowledge to understand the most fundamental resources, including turfgrass, soils, and water, and the interaction of these resources in different environmental settings.

Curriculum in Turfgrass Science is administered by the Department of Soil and Crop Sciences. The required courses provide an essential foundation, while the elective courses (i.e., ornamental horticulture, plant protection, business, landscape architecture) can be selected to meet the interests, needs and objectives of individual students.

Turfgrass Science prepares graduates for careers in: management—golf courses, athletic fields, public, private or commercial grounds; production agriculture—turfgrass production, or plant breeding; agribusiness—seed sales, turf equipment and supplies, landscape contractor, commercial or home lawn care specialists; education—consulting, extension, or public relations.

Total Semester Credit Hours	120

¹ Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

² Select from MATH 135, MATH 136, MATH 140, MATH 142, MATH 147, MATH 148, MATH 150, MATH 151, MATH 152, MATH 167, MATH 168, MATH 171, MATH 172.

³ To be selected from SCSC 300-499 (p. 1229) courses not counting elsewhere on the degree plan and in consultation with an academic advisor.

⁴ Statistics course should be selected after consultation with academic advisor.

⁵ Students will complete an internship, study abroad or independent research experience.

Agronomy - Minor

The minor in Agronomy prepares agricultural majors for a career in the nation's food, feed, fiber, greenspace, shelter and bioenergy industries.

The Department of Soil and Crop Sciences offers a minor in Agronomy. Exposure to this academic discipline could lead students to the pursuit of advanced degrees and a career in the field of agronomy or several related agricultural fields. Agronomy is the cornerstone of modern agriculture that provides the necessities of human existence at a level unprecedented in human history. Continued advancement in productivity must be made in order to feed, clothe, shelter, and meet other basic human needs as global population continues to expand.

Please speak with an advisor concerning courses prior to registering.

Program Requirements

Code	Title	Semester Credit Hours

Required Courses:

SCSC 105	World Food and Fiber Crops	3

or SCSC 201	or Problem Solving in Plant and Soil Systems	

SCSC 301	Soil Science	4

SCSC 302-489 (p. 1229) ^{1, 2}		8

Total Semester Credit Hours	15

¹ Except SCSC 481, SCSC 484, SCSC 491

² Students with a major in the Department of Soil and Crop Sciences may not use courses already used elsewhere in their degree program.

Students must make a grade of C or better in all courses.

Environmental Soil Science - Minor

The minor in Environmental Soil Science prepares agricultural majors for a career in industry, government, and non-government organizations that address environmental issues related to soil, soil science, and water quality.

The Department of Soil and Crop Sciences offers a minor in Environmental Soil Science. Additional career avenues include industry and agencies dealing with food, feed, fiber, greenspace, shelter, and bioenergy. Exposure to this academic discipline could lead students to the pursuit of advanced degrees and a career in the field of soil science or several related agricultural fields. See an advisor for more details.

Program Requirements

Code	Title	Semester Credit Hours
SCSC 301	Soil Science	4
Select from the following:		11
SCSC 309	Water in Soils and Plants	
SCSC 310	Soil Morphology and Interpretations	
SCSC 401/ FIVS 401	Forensic Soil Science	
SCSC 405	Soil and Water Microbiology	
SCSC 406	Soil and Water Microbiology Laboratory	
SCSC 422	Soil Fertility and Plant Nutrient Management	
SCSC 432	Soil Fertility and Plant Nutrient Management Laboratory	
SCSC 455	Environmental Soil and Water Science	
SCSC 458	Watershed, Water and Soil Quality Management	
Total Semester Credit Hours		15

Students must make a grade of C or better in all courses.

Plant Breeding - Minor

The minor in plant breeding prepares agricultural majors for a career in nation's variety development industry and exposes the student to an academic discipline that could lead to the pursuit of advanced degrees and a career in the field of plant breeding.

The Department of Soil and Crop Sciences offers a Minor in Plant Breeding. Plant breeders develop new varieties that are the cornerstone of modern agriculture and improve the genetic basis of improved yield, quality, and resistance to biotic and abiotic stresses affecting or nation's food, feed, fiber, greenspace, shelter, and bioenergy plants.

The Plant Breeding minor offers the opportunity for students to explore their interest in applied biological sciences in the areas of plant breeding, crop improvement, crop biotechnology, and genetics. Students must have an overall GPA of 2.75 or better to enter the program.

Program Requirements

Code	Title	Semester Credit Hours
GENE 310	Principles of Heredity ¹	3
SCSC 304	Plant Breeding and Genetics	3
Select nine hours of the following:		9
GENE 411/ SCSC 411	Biotechnology for Crop Improvement	
SCSC 301	Soil Science	
SCSC 305	Professional Development in Agronomy	
SCSC 311	Principles of Crop Production	
SCSC 402	Crop Stress Management	
SCSC 410	International Agricultural Systems	
Total Semester Credit Hours		15

¹ GENE 301 may be substituted for GENE 310.
Must have an overall GPA of 2.75 to enter program.

COLLEGE OF ARCHITECTURE

Administrative Officers

Interim Dean - Patrick C. Suermann, PhD

Executive Associate Dean - Chanam Lee, PhD

Associate Dean for Academic Affairs - Shelley D. Holliday, ME

Associate Dean for International Programs and Facilities - Leslie Feigenbaum, MS

Assistant Dean for Graduate Programs - Katherine R. Reed, PhD

Assistant Dean for Business Services - Kevin Gustavus, MBA

General Statement

The College of Architecture offers undergraduate and graduate professional programs to prepare individuals to enter the professions of architecture, landscape architecture, construction management, urban and regional planning and land and property development. The planning, design and construction of the world's buildings, cities and landscapes involve a variety of professional skills. The faculty of architects, urban planners, landscape architects, engineers, computer scientists, constructors, lawyers, historians and artists, in collaboration with educators in the language, philosophy and culture and natural and social sciences, help students develop an understanding of the physical, social, economic and political forces that shape our environment.

Undergraduate degree programs are offered in architecture, landscape architecture, construction science, urban and regional planning, and university studies with a concentration in global arts, planning, design and construction. Minors in art and architectural history; global art, design and construction; architectural fabrication and product design; architectural heritage conservation and sustainable architecture and planning are offered through the Department of Architecture. A minor in urban and regional planning is offered through the Department of Landscape Architecture and Urban Planning. Minors in facility management; and leadership in the design and construction professions are offered through the Department of Construction Science. Master's degree programs are offered in architecture, landscape architecture, urban planning, land and property development and construction management. Doctor of Philosophy degrees are offered in architecture, construction science and urban and regional sciences.

Personal Computers

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the College of Architecture (<https://www.arch.tamu.edu/>) website.

Enrollment Management Policy

Students in the College of Architecture admitted into Architecture (p. 239) (ARCL) and Construction Science (p. 244) (COSL) enter with a lower level classification. Landscape Architecture (p. 250) (LAND), Urban and Regional Planning (p. 250) (URPN) and University

Studies Global Arts, Planning, Design and Construction (<https://www.arch.tamu.edu/academics/undergraduate-programs/majors/university-studies/>) (USAR) do not have a lower level classification. All students must comply with the guidelines in terms of coursework and process to be considered for upper level. Until students are accepted into upper level they could be prohibited from taking 300 and 400 level courses in their major.

Admission will be effective upon successful completion of in-progress courses. If all requirements are not met prior to the start of the following semester, admission will not be granted and registration in all upper level coursework in the College of Architecture will be cancelled. Admission is not guaranteed. If there are more qualified applicants than there is space available, preference will be given to students based on their academic achievement.

Transfer Students

Transfer students, who meet the University entrance requirements and who desire to enter a major field of study in the College of Architecture, will be admitted based on available space and current College of Architecture entrance criteria. This is a competitive review process. Transfer students may be admitted into the college with a lower-level classification and may apply for upper-level status after at least one semester at Texas A&M University. A minimum of a 2.5 GPA may be required to matriculate into an upper-level classification

Transfer students accepted into the Bachelor of Science in Architecture degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement. Additional information may be found on the Department of Architecture (<https://www.arch.tamu.edu/academics/undergraduate-programs/majors/bachelor-of-science-in-architecture/>) website.

Change of Major

Students currently enrolled in another major at Texas A&M University with fewer than 60 hours who desire to change their major field of study into the College of Architecture must fill out a Change of Curriculum application. For more information on deadlines and requirements, please refer to:

<https://us.tamu.edu/change-of-major> (<https://us.tamu.edu/change-of-major/>)

<https://tap.tamu.edu/change-of-major/index.html> (<https://tap.tamu.edu/change-of-major/>)

Not all majors have summer/spring applications

The College of Architecture will admit the best-qualified applicants based on the number of spaces available in their program of choice. Acceptance is limited and meeting the requirements alone will not guarantee acceptance. The admission process is a competitive application process.

Semester Away

The College of Architecture requires all upper-level undergraduate students to spend one semester studying abroad, at another university, or in a professional internship. Specific information on these programs is available through each department or the Texas A&M Education Abroad Office.

Academic Policies

For Architecture, Construction Science, Landscape Architecture, Urban Planning and University Studies Global Arts, Planning, Design and Construction: Students must make a grade of C or better in every College of Architecture course (ARCH, CARC, COSC, ENDS, LAND, LDEV, URPN) used to satisfy degree requirements. Students must also make a grade of C or better in any course used as an equivalent substitution for College of Architecture courses that satisfy degree requirements. All majors within the college require students to maintain a 2.0 or better GPA (for upper level consideration, may be a higher GPA requirement); the college does not offer academic probation.

Majors

College of Architecture

- Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 260)

Department of Architecture

- Bachelor of Science in Architecture (p. 241)

Department of Construction Science

- Bachelor of Science in Construction Science (p. 248)

Department of Landscape Architecture and Urban Planning

- Bachelor of Landscape Architecture in Landscape Architecture (p. 252)
- Bachelor of Science in Urban and Regional Planning, Urban Design Track (p. 253)
- Bachelor of Science in Urban and Regional Planning, Urban Policy Track (p. 254)
- Bachelor of Science in Urban and Regional Planning and Master of Land and Property Development, 5-Year Degree Program (p. 256)
- Bachelor of Science in Urban and Regional Planning and Master of Landscape Architecture, 6-Year Degree Program (p. 255)
- Bachelor of Science in Urban and Regional Planning and Master of Urban Planning, 5-Year Degree Program (p. 258)

Minors

Department of Architecture

- Architectural Fabrication and Product Design Minor (p. 242)
- Architectural Heritage Conservation Minor (p. 243)
- Art and Architecture History Minor (p. 243)
- Sustainable Architecture and Planning Minor (p. 244)

Department of Construction Science

- Facility Management Minor (p. 249)
- Leadership in the Design and Construction Professions Minor (p. 249)

Department of Landscape Architecture and Urban Planning

- Urban and Regional Planning Minor (p. 259)

Masters

Department of Architecture

- Master of Architecture in Architecture (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/architecture/march/>)

- Doctor of Philosophy in Urban and Regional Science (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/architecture/landscape-architecture-urban-planning/urban-regional-science-phd/>)

Department of Architecture

The undergraduate curriculum in Architecture at Texas A&M University is offered through the Department of Architecture. The four-year Bachelor of Science (BS) degree prepares students for challenging careers in industries supporting the built environments. The program produces graduates who are prepared to influence society with informed and visionary designs—designs that ensure resilience by responding to cultural, social, economic and ecological factors.

Students interested in professional registration as an architect must complete a National Architectural Accreditation Board (NAAB) accredited Master of Architecture program in addition to the four-year undergraduate Bachelor of Science degree.

Enrollment in Architecture Upper Level Program

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPA of 2.5 for those courses completed at Texas A&M University.
2. Students must satisfactorily complete the following courses as part of the 54 hours of coursework with a minimum of a 2.5 GPA to apply for upper level.

Code	Title	Semester Credit Hours
ARCH 105	Design and Visual Communications Foundations I	5
ARCH 106	Design and Visual Communication Foundations II	5
ARCH 115	Visual Communication Foundations I	3
ARCH 205	Architecture Design I	5
ARCH 206	Architecture Design II	5
ARCH 212	Social and Behavioral Factors in Design	3
ARCH 249	Survey of World Architecture History I	3
ARCH 250	Survey of World Architecture History II	3
ARCH 281	Seminar in Contemporary Architecture	1
CARC 481	Seminar	1
ENGL 104	Composition and Rhetoric	3
Select one of the following:		6
MATH 140 Mathematics for Business and Social Sciences & MATH 142nd Business Calculus		
MATH 151 Engineering Mathematics I and Engineering Mathematics II & MATH 15		
PHYS 201	College Physics	4
Total Semester Credit Hours		47

3. Students must apply to the upper level through the department. The application is to be submitted by the following date.
 - March 1 for Summer and Fall admission
4. Students applying for upper level must submit a portfolio that provides documentation of the applicant's design representation and creative problem solving ability. Portfolios will be reviewed as evidence supporting design ability. Guidelines are outlined on the application form and in the Office of Student Services.

Preparation for Professional Studies in Architecture

Although the four-year BS degree at Texas A&M University is a pre-professional degree and is not accredited by the National Architectural Accrediting Board (NAAB), those who have completed this pre-professional degree can apply to an accredited Master of Architecture program, which is offered at Texas A&M University.

In the United States, most state architectural registration boards require, as the prerequisites for licensure, a degree from a National Architectural Accrediting Board (NAAB) accredited professional degree program, the fulfillment of the National Council of Architectural Registration Board's (NCARB) Internship Development Program (IDP), and the successful completion of NCARB's Architectural Licensing Examination (ARE). The NAAB, which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture (BArch), the Master of Architecture (MArch), and the Doctor of Architecture (DArch). Students should consult the Texas A&M Master of Architecture, NAAB and NCARB websites for additional information.

Transfer and Change of Major Students

Transfer and change of major students (students currently enrolled in another major at Texas A&M University) who are admitted to the Department of Architecture are classified as lower level (ARCL). Transfer students who meet all the criteria for admittance to upper-level studies may immediately apply for admittance to upper level.

Transfer students who have completed at least 24 graded transferable hours, and change of major students who have completed at least 12 graded transferable hours are encouraged to participate in two 5-week summer design studio modules offered by the Department of Architecture. The summer modules are designed to provide an intensive first-year design studio sequence that will enable change of major and transfer students to qualify for sophomore design studios the following semester. These summer modules can enable Transfer and Change of Major students to complete the four-year degree in a more efficient and timely manner.

Transfer students accepted into the Bachelor of Science degree program must submit a portfolio to the Department of Architecture to receive credit for drawing and design studio classes taken at another university or college, unless the course is listed as an equivalent under the Texas common course numbering system. The review of the portfolio will ensure appropriate studio placement. Additional information may be found on the Department of Architecture website.

Majors

- Bachelor of Science in Architecture (p. 241)

Minors

- Architectural Fabrication and Product Design Minor (p. 242)
- Architectural Heritage Conservation Minor (p. 243)
- Art and Architecture History Minor (p. 243)
- Sustainable Architecture and Planning Minor (p. 244)

Architecture - BS

The four-year Bachelor of Science in Architecture degree prepares students for challenging careers in industries that support the built environment.

The program fosters creativity and problem-solving skills, provides access to extensive knowledge, and cultivates high levels of capability, interweaving the academic areas of design; architectural history, theory, and criticism; representation; building technology; as well as social, professional, and community engagement. Coursework encourages multidisciplinary and comparative perspectives that allow opportunities for communication and team-oriented methods of production. Global perspectives through mandatory semester-long study abroad and study away experiences and internships at national and international offices encourage students to bring the knowledge from the classroom out into the world and back to the university and their home communities to deepen lessons learned in a variety of contexts.

Students develop skills and acquire knowledge through a studio-based experience with a variety of theoretical, experimental, and practical design projects. Design studio projects place a shared emphasis on the technical and expressive content of design work; the processes by which students research, synthesize and document their design ideas; and create tangible products that achieve a high quality of graphic and physical craft.

The program encompasses a variety of design subjects that will enable students to pursue careers in graphic design, industrial design, interior design, robotics, and architecture design. Students interested in professional architecture registration must complete a National Architectural Accreditation Board (NAAB) accredited Master of Architecture program after completing the four-year undergraduate degree. Often, students earning the BS supplement their studies with Minors offered through the Department of Architecture. Those options include the Art and Architectural History, the Sustainable Architecture and

Planning, Architectural Fabrication and Product Design, and Architectural Heritage Conservation.

Program Requirements

First Year

Fall		Semester Credit Hours
ARCH 105	Design and Visual Communications Foundations I ¹	5
ARCH 249	Survey of World Architecture History I ¹	3
ARCH 281	Seminar in Contemporary Architecture ¹	1
Select one of the following:		3
MATH 140	Mathematics for Business and Social Sciences	
MATH 152	Engineering Mathematics II	
MATH 168	Finite Mathematics	
Semester Credit Hours		12
Spring		
ARCH 106	Design and Visual Communication Foundations II ¹	5
ARCH 250	Survey of World Architecture History II ¹	3
ENGL 104	Composition and Rhetoric	3
MATH 142	Business Calculus	3
or MATH 151	or Engineering Mathematics I	
Cultural discourse (p. 48) ²		3
Semester Credit Hours		17

Second Year

Fall		
ARCH 205	Architecture Design I ¹	5
ARCH 212	Social and Behavioral Factors in Design ¹	3
ARCH 330	The Making of Architecture ¹	3
PHYS 201	College Physics	4
Government/Political science (p. 31)		3
Semester Credit Hours		18
Spring

Directed elective ^{1,4}		3
Semester Credit Hours		14
Total Semester Credit Hours		120

¹ Must make a grade of C or better.

² To be selected from 100-499 level courses designated as cultural discourse (p. 48) (CD) not used elsewhere (such as CARC 101).

³ Study away electives will be selected with approval of the Assistant Dean for International Programs and Initiatives.

⁴ Select from ARCH 216, ARCH 246, ARCH 260, ARCH 317, ARCH 327, ARCH 328, ARCH 345, ARCH 421, ARCH 430, ARCH 433, ARCH 434, ARCH 438, ARCH 441, ARCH 458, ARCH 463, ARCH 481, ARCH 484; ARTS 330; COSC 253; GEOG 330; LAND 301; RWFM 375; URPN 340, URPN 361, URPN 370, URPN 470.

All proposals for undergraduate independent study must be signed by the supervising faculty and submitted to the department for approval; forms are available from the Department of Architecture Undergraduate Advisor.

Students must also make a grade of C or better in any course used as an equivalent substitution for School of Architecture courses satisfying degree requirements.

Architectural Fabrication and Product Design - Minor

The minor in Architectural Fabrication and Product Design complements several major fields of study and is open to all Texas A&M University undergraduate students.

The structure of the minor encourages students to gain a broad understanding of the terminology, history, prototyping and professional practices in Architectural Fabrication and Product Design. The minor includes six (6) credit hours of foundation coursework and nine (9) credit hours of design, theory and practice coursework.

Program Requirements

Code	Title	Semester Credit Hours
ENDS 101	Design Process	3
ARCH 216	Computational Methods in Architecture	3
ARCH 353	History of Product Design	3
ARCH 381	Design Seminar ¹	1
ARCH 317	Digital Fabrication for Architecture	3
Total Semester Credit Hours		15

¹ This is a 1 credit hour course that must be taken three times for a total of 3 credits.

Must make a grade of C or better in all courses.

Architectural Heritage Conservation - Minor

The minor in Architectural Heritage Conservation provides an interdisciplinary and global approach to understanding heritage conservation and its importance to sustainable conservation of the built environment.

The curriculum emphasizes an awareness of principles and theories impacting architectural heritage conservation. In addition, the minor enables students to explore technological advancements critical to documenting and assessing the built environment. The minor in Architectural Heritage Conservation can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad understanding of the foundations of conservation before advancing to specialized areas of interest.

Program Requirements

Code	Title	Semester Credit Hours
Foundation		
ARCH 246	Foundations of Historic Preservation	3
ARCH 346	Architecture, Heritage and Culture	3
Architectural History		
Select one of the following:		3
ARCH 350	History and Theory of Modern and Contemporary Architecture	
ARCH 430	History of Ancient Architecture in the Near East, Egypt, Greece and Rome	
ARCH 434	The Role of Sculpture and Painting in Ancient Architecture	
ARCH 438	World Religious Architecture	
ARCH 444	American Architecture	
Electives ¹		
Select two of the following:		6
ANTH 202	Introduction to Archaeology	
ANTH 313	Historical Archaeology	

ANTH 402	Archaeological Artifact Conservation	
ANTH 421/ MUST 421	Advanced Museum Studies	
ARCH 260	Comparative Theory in the Built and Virtual Environments	
ARCH 345	History of Building Technology	
ARCH 347	Documentation of Historic Buildings and Sites	
ARCH 489	Special Topics in... (Architectural Heritage or Conservation)	
HMG2 207	Interpretation of Natural and Cultural Resources	
ECCB 351	Geographic Information Systems for Resource Management	
RWFM 375	Conservation of Natural Resources	
URPN 201	The Evolving City	
URPN 240	More Than Monuments: Preservation as Social Justice	
URPN 460	Sustainable Communities	
Total Semester Credit Hours		15

¹ Eligible undergraduate students meeting prerequisite requirements may enroll in the ARCH 648.

Students must obtain a C or better in each course listed above (or in any transfer course used as an equivalent).

Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students applying for a minor in Architectural Heritage Conservation must have a 2.0 or better overall GPR. Some colleges and departments outside the College may permit their students to minor.

Coordination with Bachelor of Science in Architecture (BS-ARCH) Degree Plan - For students pursuing the BS-ARCH degree, upper level coursework for the minor may be applied to general or free electives, but may not be applied to directed electives or any other requirements for the BS-ARCH degree plan.

Art and Architecture History - Minor

The minor in Art and Architecture History provides undergraduate students with an interdisciplinary, global, and multicultural approach to understanding visual arts and the built environment.

The curriculum emphasizes an awareness of global cultures and historical traditions, an appreciation of context, visual understanding, and critical thinking. The Minor in Art and Architecture History can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad chronological understanding of art and architectural history before advancing to specialized areas of interest.

The application form can be found on the Department of Architecture's website. Per university guidelines, the student's home unit/department is responsible for advising students pursuing the Minor in Art and Architecture History.

Program Requirements

Code	Title	Semester Credit Hours
ARTS 149 or ARCH 249	Art History Survey I or Survey of World Architecture History I	3
ARTS 150 or ARCH 25	Art History Survey II or Survey of World Architecture History II	3
Select three of the following: ^{1,2,3}		9
ANTH 353/ CLAS 353	Archaeology of Ancient Greece	
ANTH 354/ CLAS 354	Archaeology of Ancient Italy	
ARCH 345	History of Building Technology	
ARCH 350	History and Theory of Modern and Contemporary Architecture	
ARCH 430	History of Ancient Architecture in the Near East, Egypt, Greece and Rome	
ARCH 434	The Role of Sculpture and Painting in Ancient Architecture	
ARCH 437	The Gothic Cathedral	
ARCH 438	World Religious Architecture	
ARCH 441	Baroque and Rococo Architecture	
ARCH 443	Aegean Art and Architecture	
ARCH 444	American Architecture	
ARCH 489	Special Topics in... (Art and Architectural History)	
ARTS 330	The Arts of America	
ARTS 335	The Art and Architecture of Rome	
ARTS 339	Themes in Contemporary Art	
ARTS 349	The History of Modern Art	
ARTS 350	The Arts and Civilization	
ARTS 445	Byzantine Art and Architecture	
ARTS 489	Special Topics in... (Art and Architectural History)	
Total Semester Credit Hours		15

¹ Coordination with Bachelor of Science (BS) in Architecture (ARCH) Degree Plan - For students pursuing the BS degree, upper level coursework for the minor may be applied to general or free electives, but may not be applied to directed electives or any other requirements for the BS-ARCH degree plan.

² Coordination with University Studies Architecture (USAR) Degree Plan - Students pursuing the University Studies Architecture degree cannot use a course in the concentration area for the Art and Architectural History Minor or the second minor, and no courses taken within the AAH Minor can count toward the concentration or the second minor. Courses that count toward University Core Curriculum can count for both the AAH minor and that specific core requirement.

³ Students must complete a minimum of 6 hours in residence at the 300-400 level.

Sustainable Architecture and Planning - Minor

The minor in Sustainable Architecture and Planning (SARP) provides undergraduate students with a multidisciplinary approach to understanding sustainability of the built environment.

The curriculum emphasizes an awareness of responsible practices at a variety of scales impacting the built environment: buildings, communities, architectural systems, global resource management, and social equity. Students will become aware of responsible architectural design and develop critical thinking skills to address the multifaceted issues facing the profession today.

The Minor in Sustainable Architecture and Planning can serve as a complement to several major fields of study and is open to all Texas A&M undergraduates. The structure of the minor encourages students to gain a broad understanding before advancing to specialized areas of interest. Per University guidelines, the student's home school/department is responsible for advising students pursuing the Minor in Sustainable Architecture and Planning.

Program Requirements

Code	Title	Semester Credit Hours
ARCH 213	Sustainable Architecture	3
URPN 460	Sustainable Communities	3
Select three courses from the following: ^{1,2,3}		9
ARCH 246	Foundations of Historic Preservation	
ARCH 421	Energy and Sustainable Architecture	
ENGR 101	Energy: Resources, Utilization and Importance to Society	
GEOG 202	Geography of the Global Village	
GEOG 306	Introduction to Urban Geography	
GEOG 330	Resources and the Environment	
PHIL 205	Technology and Human Values	
URPN 202	Building Better Cities	
URPN 361	Urban Issues	
Total Semester Credit Hours		15

¹ At least three of the nine hours must be at the 300-400 level. Six of the nine hours may be in coursework taken outside of the College.

² BED majors may not use directed electives to satisfy both the minor and graduation requirements. USAR majors may not use coursework to satisfy both the minor and the concentration area.

³ Students must complete a minimum of 6 hours in residence at the 300-400 level.

Students must make a grade of "C" or better in all courses.

Department of Construction Science

The construction industry is among the largest industry in the nation with more than 8 million employees who annually produce more than 5 percent of the nation's Gross Domestic Product. Managing the construction process requires a broad understanding of the principles of

construction science as well as leadership skills in motivating teams and integrating a wide range of tasks to produce a completed project.

The primary mission of the Department of Construction Science is to prepare students for successful careers and future leadership roles in construction and construction-related industries. The program integrates principles of architecture, technology, engineering, business and project management preparing students to effectively manage the total construction process. Courses taught by the Department include construction materials and methods, fundamental design courses in soils and foundations, mechanical and electrical systems and structures, project control systems and management, construction law, labor and contracts, and industry emphasis courses. In addition, related courses from other colleges are included to ensure a broad base of knowledge.

Enrollment in Construction Science Upper Level Program

1. Students must have satisfactorily completed at least 54 hours of coursework with a minimum GPA of 2.5 for those courses completed at Texas A&M University.
2. Students must satisfactorily complete the following courses as part of the 54 hours of coursework with a minimum of a 2.5 GPA to be considered to upper level:

Code	Title	Semester Credit Hours
Construction Science		
COSC 153	Introduction to the Construction Industry	3
COSC 175	Construction Graphics Communication	3
COSC 253	Construction Materials and Methods I	3
COSC 275	Estimating I	3
COSC 284	Introduction to Applied Workplace Ethics, Etiquette and Communications	1
ENGL 104	Composition and Rhetoric	3
ENGL 210	Technical and Professional Writing	3
MATH 140	Mathematics for Business and Social Sciences	3
MATH 142	Business Calculus	3
PHYS 201	College Physics	4
Select one of the following:		4
CHEM 119 Fundamentals of Chemistry I		
GEOL 101 Principles of Geology & GEOL 101:and Principles of Geology Laboratory		
Total Semester Credit Hours		33

3. Students must apply for upper level through the department. The application is to be submitted the semester or summer session in which all of the above criteria are met.

- March 1 for Summer admission
- June 1 for Fall admission
- October 1 for Spring admission

- Leadership in the Design and Construction Professions Minor (p. 249)

Construction Science - BS

The Construction Science undergraduate program provides specialized course work in building systems, materials and methods of construction, scheduling, cost estimating, structures, construction project management, law, surveying and business/labor relations with the goal of preparing students to effectively manage the total construction process.

Upon graduation from the Bachelor of Science in Construction Science, students have a wide range of opportunities within the construction industry to pursue careers such as estimators, project managers, safety managers, superintendents, quality assurance/control managers and Mechanical/Electrical/Plumbing coordinators.

In addition to their in class academic coursework, each student is required to successfully complete an approved internship of full-time practical work experience with a construction company during a spring or fall semester. This internship provides students with opportunities to hone skills in resume building, networking, evaluation of offers, and application of classroom knowledge in the field. The Department of Construction Science facilitates this process through one of the largest department level career fairs at Texas A&M University.

Following graduation, Construction Science graduates quickly become valued members of a construction team and participate in construction project planning, cost estimating, scheduling, supervision, and commissioning of complete facilities in a timely, safe and quality manner. They also possess the professional knowledge to confidently interact with trade contractors, professional engineers, registered architects, and owners to solve problems and execute at a high level.

The Bachelor of Science in Construction Science degree program is accredited by the American Council for Construction Education (ACCE). The Department maintains strong ties with the construction industry via the Construction Industry Advisory Council (CIAC), an organization of construction and construction-related companies and individuals committed to supporting the Department of Construction Science at Texas A&M University. Are you ready to begin your career in the construction industry? Explore our Department of Construction Science website (<https://www.arch.tamu.edu/cosc/>) to learn more!

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the College of Architecture website (<https://www.arch.tamu.edu/resources/technology-requirements/>). In addition to the requirements (<https://www.arch.tamu.edu/resources/technology-requirements/>) for all College of Architecture students, Construction Science majors also have additional requirements of:

- **Not a macOS laptop** (most of the software used in construction science industry is not compatible with macOS.)
- **Not a chromebook** (most of the software used in construction science industry is not compatible with chromebook.)
- Discrete graphics (the additional graphics chip provides the processing power required by industry standard software. The more RAM this chip has, the better it will be able to handle large, complex models. Nvidia chipset is recommended.)

This program is also offered at the Texas A&M Higher Education Center in McAllen, Texas.

Program Requirements

First Year

Fall		Semester Credit Hours
COSC 153	Introduction to the Construction Industry ¹	3
COSC 222	Social Issues in the History of the Construction Environment ¹	3
ECON 202 or ECON 203	Principles of Economics or Principles of Economics	3
HIST 105	History of the United States	3
MATH 140	Mathematics for Business and Social Sciences	3
Semester Credit Hours		15

Spring

ACCT 209	Survey of Accounting Principles	3
COSC 175	Construction Graphics Communication ¹	3
COSC 284	Introduction to Applied Workplace Ethics, Etiquette and Communications ¹	1
ENGL 104	Composition and Rhetoric	3
HIST 106 or HIST 226	History of the United States or History of Texas	3
MATH 142	Business Calculus	3
Semester Credit Hours		16

Second Year

Fall

COSC 253	Construction Materials and Methods I ¹	3
ENGL 210	Technical and Professional Writing	3
PHYS 201	College Physics	4
POLS 206	American National Government	3
Life and physical sciences (p. 27)		1
General Elective		3
Semester Credit Hours		17

Spring

COSC 275	Estimating I ¹	3
MGMT 209	Principles of Business Regulations and Law	3
POLS 207	State and Local Government	3
Select one of the following:		4
CHEM 119	Fundamentals of Chemistry I	
GEOL 101 & GEOL 102	Principles of Geology and Principles of Geology Laboratory	
Select one of the following: ¹		3
ARCH 249	Survey of World Architecture History I	
ARCH 250	Survey of World Architecture History II	
ARCH 350	History and Theory of Modern and Contemporary Architecture	
ARTS 150	Art History Survey II	
ENDS 101	Design Process	
Semester Credit Hours		16

Third Year**Fall**

COSC 301	Construction Surveying ¹	2
COSC 325	Mechanical, Electrical and Plumbing Systems in Construction I ¹	3
COSC 353	Construction Project Management ¹	3
COSC 375	Estimating II ¹	3
Directed elective ^{1,2}		3
Semester Credit Hours		14

Spring

COSC 321	Structural Systems I ¹	3
COSC 354	Construction Materials and Methods II ¹	3
COSC 463	Introduction to Construction Law ¹	3
COSC 475	Construction Project Planning ¹	3
Directed elective ^{1,2}		3
Semester Credit Hours		15

Fourth Year**Fall**

COSC 494	Internship ^{1,3}	6
MGMT 309	Survey of Management	3
FINC 409	Survey of Finance Principles	3
Semester Credit Hours		12

Spring

COSC 464	Construction Safety ¹	3
COSC 465	Advanced Topics in Construction Law ¹	3
COSC 477	Construction Project Controls ¹	3
Select one of the following: ^{1,4}		3
COSC 440	Interdisciplinary Capstone	
COSC 441	Residential Capstone	
COSC 442	Commercial Capstone	
COSC 443	Industrial Capstone	
COSC 446	Specialty Capstone	
Directed elective ^{1,2}		3
Semester Credit Hours		15
Total Semester Credit Hours		120

¹ Must make a grade of C or better.² Select from COSC 214, COSC 303, COSC 322, COSC 326, COSC 359, COSC 421, COSC 461, COSC 468, COSC 489. A maximum of 3 hours of 489 may be used.³ Internship must be Fall or Spring semester. Only online courses at Texas A&M can be taken during an official internship.⁴ Capstone must be taken in graduating semester.

Facility Management - Minor

The Department of Construction Science offers a minor in Facility Management.

Facility Management is an integral part of the built environment. Courses offered in this minor will provide the students both classroom instruction and site exposures of building equipment and systems, maintenance and operations, needs assessment and space planning, the owner/architect/contractor relationship and general industry practices.

Program Requirements

Code	Title	Semester Credit Hours
COSC 214	Introduction to Facilities Management	3
COSC 314	Immersion in Facilities Management	3
COSC 414	Contracted Services Management	3
COSC 474	Facility Management Internship	3
Select one of the following:		3
AGEC 105	Introduction to Agricultural Economics	
ACCT 209	Survey of Accounting Principles	
ACCT 229	Introductory Accounting	
ECON 202	Principles of Economics	
ECON 203	Principles of Economics	
Total Semester Credit Hours		15

College of Architecture students can apply no more than nine hours of coursework towards both the Facility Management Minor and their degree requirements.

Students must make a grade of C or better in all courses.

Leadership in the Design and Construction Professions - Minor

The Department of Construction Science offers a minor in Leadership in the Design and Construction Professions. The minor is designed to enhance leadership skills and increase each students understanding of themselves by encouraging and facilitating introspective looks into each individuals personality type, strengths and challenges. The goal of the minor is to focus on personal growth to become the most effective leaders in the design and construction industries.

Program Requirements

Code	Title	Semester Credit Hours
COSC 310	Design and Construction Leadership Education I	1
COSC 410	Design and Construction Leadership Education II	1
COSC 411	Seminar in Design and Construction Executive Leadership	1
Select from:		12
COSC 333	Project Management for Facility Managers	
COSC 353	Construction Project Management	
COSC 463	Introduction to Construction Law	
COSC 465	Advanced Topics in Construction Law	
COSC 475	Construction Project Planning	
COSC 440	Interdisciplinary Capstone	
COSC 441	Residential Capstone	
COSC 442	Commercial Capstone	

COSC 443	Industrial Capstone
COSC 446	Specialty Capstone
ARCH 305	Architecture Design III
ARCH 405	Architecture Design IV
ARCH 406	Architecture Design V
ARCH 451	Strategies in Architectural Management
ARCH 457	Ethics and Professional Practice
ENDS 101	Design Process
LAND 312	Landscape Design IV
LAND 412	Landscape Design VI
LAND 431	Professional Practice
URPN 202	Building Better Cities
URPN 401	Policy Implementation
URPN 483	Studio in Urban and Regional Science
URPN 493	Urban and Regional Studies Capstone Course
VIST 305	Visual Studies Studio II
VIST 405	Visual Studies Studio III

Must have at least a 2.5 TAMU GPA to apply for minor.

A grade of 'C' or better is required in all classes used towards the minor.

Department of Landscape Architecture and Urban Planning

Landscape Architecture

Landscape architecture is the profession providing landscape planning, design, and management services to enhance and protect natural and built environments. Landscape architecture as a discipline is devoted to understanding and managing the human and environmental forces that change the landscape. Landscape architects plan and design places for the health, safety, and welfare of citizens through systematic decision-making that integrates science, art, and technology. Individual and community quality of life are enhanced by a design process to improve, protect, and create ecologically sustainable, socially equitable, and economically feasible landscapes. Landscape architects work in urban, suburban and wilderness environments. Our graduates have gained distinction for projects as varied in scale as private gardens, residential communities, urban plazas, college campuses, park facilities and regional conservation plans.

The Bachelor in Landscape Architecture (BLA) program is nationally accredited as a professional degree program. The mission of the program is to prepare students to become professional landscape architects in private and public sector practice. Our educational goal is to produce graduates motivated to be leaders in the field and professionals who are intellectually active, broadly-educated citizens and life-long learners.

Urban and Regional Planning

The Bachelor of Science in Urban and Regional Planning degree program emphasizes the social, economic, cultural and natural factors that govern how communities and society are shaped. Coursework provides students with the knowledge and skills needed to develop solutions to community and regional growth and development issues that face our state and nation. Students have an opportunity to specialize in specific aspects

of community and regional planning and development issues along with internship and service-learning experiences locally, nationally, and/or internationally.

Landscape Architecture - BLA

The mission of the Bachelor of Landscape Architecture (BLA) program is to prepare students to become professional landscape architects in the private and public sectors of practice.

We foster a learning environment of creativity and critical analysis that uses evidence-based design principles as its core. This approach builds upon the knowledge of natural and built environments and how humans interact within various cultural settings. Our BLA graduates use this knowledge to produce spatial solutions at multiple scales from site design to land use planning. This creative process aims to advance human health, and social, economic and environmental sustainability. The program strives to produce graduates motivated to be life-long learners capable of working independently and leading interdisciplinary teams in the field of landscape architecture.

Graduates from the BLA program are prepared for employment with private practice firms in landscape architecture, engineering, architecture, or planning; and with federal, state, or local government agencies. Upon graduation and with additional two-year practical experience students are qualified to pursue licensure in the profession or post graduate education in landscape architecture or a related field.

Because of the important role of computing in the disciplines housed within the College of Architecture, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program. Financial aid is available to assist students in their computer purchases. No student will be denied admission to Texas A&M University based on an inability to purchase a computer. Additional information is available on the Department of Landscape Architecture and Urban Planning website.

¹ Must make a grade of C or better.

² This course will be selected in consultation with the student's advisor.

³ Select from any 300-499 courses not used elsewhere.

⁴ Select from URPN 201, URPN 203, URPN 302, URPN 325, URPN 340, URPN 360, URPN 361, URPN 369, URPN 370, URPN 371, URPN 450, URPN 460, URPN 471, URPN 489.

⁵ Semester Away: May be satisfied by study abroad, at another university, internship, or special arrangement by advisor or instructor. Electives may be taken during summer, online, distance education, at another university or college, or at a study abroad university.

⁶ Study abroad course.

⁷ If electing to study abroad, must take CARC 311 and CARC 331 as an elective.

⁸ Select from any 100-499 course that meets the cultural discourse (p. 48) graduation requirement.

Urban and Regional Planning - BS, Urban Design Track

The Urban and Regional Planning program equips students for entry-level positions in planning allied fields and prepares them for graduate studies in fields such as Urban Planning and Land Development.

The Bachelor of Science in Urban and Regional Planning degree program is based in the Department of Landscape Architecture and Urban Planning (LAUP) within the College of Architecture at Texas A&M University. The core curriculum, designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable.

Critical thinking and analytical skills are emphasized for problem-solving at the community and regional scale. Classroom service-learning experiences enable graduates to more reliably and realistically assess complex community problems, design solutions for overcoming those problems, and evaluate the outcomes of programs and policies in meeting community and regional needs.

The Urban Design Track emphasizes physical solutions and the urban form of communities and cities, related to land uses, site planning, the provision of infrastructure such as roads, sidewalks, and storm water management, and the provision of public spaces. Skill-building emphasizes graphic representation and the use of Geographic Information Systems (GIS) for both analysis and design.

If electing to study abroad, must take CARC 311 and CARC 331 as directed electives. If a student takes URPN 494 in fall of fourth year, 6 hours of directed electives must be added to different semesters other than this fall.

⁴ Must be selected in consultation with the student's advisor from: AGEC 422, ARCH 250, CSCE 110, ENDS 101, GEOG 352/GEOL 352, LAND 241, PBSI 315, POLS 340/PSAA 340, SOCI 312, SOCI 328, SOCI 404/RPTS 404, SOCI 419, URPN 302, URPN 340, URPN 360, URPN 361, URPN 369, URPN 370, URPN 371, URPN 409, URPN 440, URPN 450, URPN 451, URPN 460, URPN 469, URPN 470, URPN 471, URPN 489. If not participating in study abroad or taken elsewhere in the curriculum, 3 hours must come from list of approved International and Cultural Diversity (p. 49) courses.

Urban and Regional Planning - BS, Urban Policy Track

The Urban and Regional Planning program equips students for entry-level positions in planning allied fields and prepares them for graduate studies in fields such as Urban Planning and Land Development.

The Bachelor of Science in Urban and Regional Planning degree program is based in the Department of Landscape Architecture and Urban Planning (LAUP) within the College of Architecture at Texas A&M University. The core curriculum, designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of

neighborhoods, cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable.

Critical thinking and analytical skills are emphasized for problem-solving at the community and regional scale. Classroom service-learning experiences enable graduates to more reliably and realistically assess complex community problems, design solutions for overcoming those problems, and evaluate the outcomes of programs and policies in meeting community and regional needs.

The Urban Policy Track emphasizes policy solutions for building resilient, efficient, healthy, and sustainable communities. Policy evaluation and formulation address urban issues related to the equitable provision of public services, housing, environmental services, employment, and transportation. Skill-building emphasizes critical thinking, analytical skills, and written and verbal communication.

Urban and Regional Planning - 6-Year Bachelor of Science and Master of Landscape Architecture

The 6-year combination program, Bachelor of Science in Urban and Regional Planning and the Master of Landscape Architecture, allows high-performing undergraduate students in the Urban Design track to streamline their undergraduate and professional education.

The undergraduate core is designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the urban design, development, and policy, of cities and landscapes. Students acquire skills that enable them to apply planning theory and policy to design and plan communities, cities, and sites which are safe, healthy, and sustainable. While still completing undergraduate credits, students begin graduate coursework in the Master of landscape architecture program to refine and extend their skills in critical thinking, problem-solving, and communication, leading to an accredited professional degree.

⁶ Select from any 300-499 course not used elsewhere.

The program includes a total of 179 hours, which up to 15 hours may be applied toward both the Bachelor of Science in Urban & Regional Planning and the Master of Landscape Architecture.

Urban and Regional Planning - 5-Year Bachelor of Science and Master of Land and Property Development

The 5-year combination program, Bachelor of Science in Urban and Regional Planning and the Master of Land and Property Development, allows high-performing undergraduate students to streamline their undergraduate and professional education.

The undergraduate core is designed to equip students with knowledge and skills to deal effectively with the opportunities and challenges inherent in the development, growth and culture of neighborhoods,

cities, and regions, is based on theoretical training in the natural, physical, and social sciences. Students acquire skills that enable them to apply these theories to develop communities, cities, and regions which are safe, healthy, and sustainable. While still completing undergraduate credits, students begin graduate coursework in land and property development, where their core knowledge of urban growth and development can be enhanced with real estate, financial and management skills, leading to a fruitful career in real estate and land development.

If a student takes URPN 494 in fall of fourth year, 6 hours of directed electives must be added to different semesters other than this fall.

⁷ To be selected in consultation with graduate program advisor.

The program includes a total of 168 hours, which up to 18 hours may be applied toward both the Bachelor of Science in Urban & Regional Planning and the Master of Urban Planning.

Urban and Regional Planning - Minor

By pursuing a minor in urban planning at Texas A&M, students will earn an education within a multi-disciplinary atmosphere where analytical skills and critical thinking are harvested. Students will then apply this acquired knowledge to address real-world issues which communities and regions face on a daily basis. Those earning a minor in urban planning can effectively solve problems related to a number of complex issues involving the built and natural environment, transportation, health, economic development, among others.

The minor in urban planning program will provide a solid educational basis for those students wishing to pursue a post-graduate education within the planning field. Also, because of its broad scope, the minor program may serve as an effective introduction to graduate studies in other social science disciplines such as economics, geography, political science, and public policy.

The minor program will prepare students for entry-level positions in a variety of fields including state and local government; advocacy, grant-making and civic organizations; real estate management; environmental science; social assistance services; and health care services.

Program Requirements

Code	Title	Semester Credit Hours
URPN 201	The Evolving City ¹	3
URPN 202	Building Better Cities ²	3
Select 9 hours from the following:		9
URPN 340	Housing and Community

¹ The student's home college or major department may approve/disapprove GEOG 306.
² USAR students will have to take URPN 330.

University Studies

The College of Architecture offers a degree in University Studies. A University Studies degree differs from a traditional “major” in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility and interdisciplinary interest to combine areas of study that are of special interest in the built environment.

Majors

- Bachelor of Science in University Studies, Global Arts, Planning, Design and Construction Concentration (p. 260)

University Studies - BS, Global Arts, Planning, Design and Construction Concentration

The Global Arts, Planning, Design and Construction concentration is an interdisciplinary course of study that integrates multiple aspects of the built environment.

The course offerings for the Bachelor of Science in University Studies with a concentration in Global Arts, Planning, Design and Construction are from all of the professional undergraduate programs within the College of Architecture and are intended to give students an understanding of the interplay of professions that are required to work as a team in order to successfully complete built environment projects. These foundation courses are coupled with a required study abroad experience. All students in the College of Architecture are required to participate in a semester away experience that serves to expand the context of their education. The benefit of this experience is integrated into the concentration.

Chief Administrative Officer - Cheryl Hanks

General Statement

The College of Arts and Sciences develops transdisciplinary thinkers - graduates who will take a unique approach to solving society's greatest problems. We produce the next discoverers, the next industry leaders, tomorrow's creative thinkers and citizens who embody the Aggie core values and make a difference in their communities.

Our departments and academic programs offer students who want an impactful and rewarding future the opportunity to study subjects across the natural sciences, humanities, mathematics, social sciences, languages, and life sciences. With over 10,500 undergraduate students, 854 faculty members and 2.3 million square feet of space on campus, the College of Arts and Sciences is the academic heart of Texas A&M, the foundation from which any career path can begin. Employers often cite communication, critical thinking, problem-solving and intercultural competency as their most-desired traits in an employee. These are skills that students will perfect while earning a degree in the College of Arts and Sciences.

Our faculty conduct world-changing teaching and research. We teach tomorrow's leaders, advance research and innovation, and participate in impactful outreach that changes the lives of our students, communities and the nation. We do this through the discovery and dissemination of new knowledge to address the world's most critical challenges. Collaborating with colleagues across campus and throughout the world, our interdisciplinary approach to research and outreach achieves results and creates high-impact learning opportunities for our undergraduate

students such as study abroad, engaging in research projects, internships and field experiences.

Arts General Degree Requirements (<https://catalog.tamu.edu/undergraduate/arts-and-sciences/arts-requirements/>)

Anthropology, Classics, Economics, English, History, Modern Languages, Philosophy, Psychology, Sociology, Spanish, Women's and Gender Studies

Sciences General Degree Requirements (<https://catalog.tamu.edu/undergraduate/arts-and-sciences/science-requirements/>)

Applied Mathematics, Biology, Chemistry, Mathematics, Microbiology, Molecular and Cell Biology, Physics, Statistics, Zoology

Majors

College of Arts and Sciences

- Bachelor of Arts in Women's and Gender Studies (p. 271)
- Bachelor of Science in Environmental Studies (p. 266)
- Bachelor of Science in Environmental Systems Science (p. 269)
- Bachelor of Science in Women's and Gender Studies (p. 272)

Department of Anthropology

- Bachelor of Arts in Anthropology (p. 276)
- Bachelor of Arts in Anthropology, Archaeology Track (p. 278)
- Bachelor of Science in Anthropology (p. 279)

Department of Atmospheric Sciences

- Bachelor of Science in Meteorology (p. 284)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 285)

Department of Biology

- Bachelor of Arts in Biology (p. 298)
- Bachelor of Science in Biology (p. 299)
- Bachelor of Science in Microbiology (p. 301)
- Bachelor of Science in Molecular and Cell Biology (p. 302)
- Bachelor of Science in Neuroscience, Molecular and Cellular Neuroscience (p. 304)
- Bachelor of Science in Zoology (p. 305)

Department of Chemistry

- Bachelor of Arts in Chemistry (p. 311)
- Bachelor of Arts in Chemistry, Biological Chemistry or Medical, Dental, Pharmacy School Track (p. 312)
- Bachelor of Arts in Chemistry, Chemical Education Track (p. 314)
- Bachelor of Arts in Chemistry, Environmental Chemistry Track (p. 315)
- Bachelor of Science in Chemistry (p. 316)
- Bachelor of Science in Chemistry, Biological Chemistry Track (p. 318)
- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 319)

- Bachelor of Science in Chemistry, Materials Chemistry Track (p. 320)
- Bachelor of Science in Chemistry and Master of Science in Chemistry, 5-Year Degree Program (p. 321)

Department of Communication and Journalism

- Bachelor of Arts in Communication (p. 326)
- Bachelor of Arts in Communication and Master of Arts in Communication, 5-Year Degree Program (p. 327)
- Bachelor of Arts in Journalism (p. 332)
- Bachelor of Arts in Journalism and Master of Arts in Communication, 5-Year Degree Program (p. 333)
- Bachelor of Arts in Telecommunication Media Studies (p. 338)
- Bachelor of Arts in Telecommunication Media Studies and Master of Arts in Communication, 5-Year Degree Program (p. 339)
- Bachelor of Science in Communication (p. 329)
- Bachelor of Science in Communication and Master of Arts in Communication, 5-Year Degree Program (p. 330)
- Bachelor of Science in Journalism (p. 335)
- Bachelor of Science in Journalism and Master of Arts in Communication, 5-Year Degree Program (p. 336)
- Bachelor of Science in Telecommunication Media Studies (p. 341)
- Bachelor of Science in Telecommunication Media Studies and Master of Arts in Communication, 5-Year Degree Program (p. 342)

Department of Economics

- Bachelor of Arts in Economics (p. 348)
- Bachelor of Arts in Economics and Master of International Affairs, 5-Year Degree Program (p. 349)
- Bachelor of Arts in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 350)
- Bachelor of Arts in Economics and Master of Science in Economics, 5-Year Degree Program (p. 352)
- Bachelor of Science in Economics (p. 353)
- Bachelor of Science in Economics and Master of International Affairs, 5-Year Degree Program (p. 354)
- Bachelor of Science in Economics and Master of Public Service and Administration, 5-Year Degree Program (p. 355)
- Bachelor of Science in Economics and Master of Science in Economics, 5-Year Degree Program (p. 356)

Department of English

- Bachelor of Arts in English (p. 360)
- Bachelor of Arts in English, Middle School Teacher Certification (p. 362)
- Bachelor of Arts in English and Master of Arts in English, 5-Year Degree Program (p. 364)

Department of Geography

- Bachelor of Science in Geographic Information Science and Technology (p. 369)
- Bachelor of Science in Geographic Information Science and Technology and Master of Science in Geography, 5-Year Degree Program (p. 371)

- Bachelor of Science in Geography (p. 372)
- Bachelor of Science in Geography and Master of Geoscience in Geoscience, 5-Year Degree Program (p. 373)
- Bachelor of Science in Geography and Master of Science in Geography, 5-Year Degree Program (p. 375)

Department of Geology and Geophysics

- Bachelor of Arts in Geology (p. 379)
- Bachelor of Science in Geology (p. 382)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 383)
- Bachelor of Science in Geology and Master of Science in Geology, 5-Year Degree Program (p. 385)
- Bachelor of Science in Geophysics (p. 386)
- Bachelor of Science in Geophysics and Master of Science in Geophysics, 5-Year Degree Program (p. 387)

Department of Global Languages and Cultures

- Bachelor of Arts in Classics, Classical Civilization Track (p. 390)
- Bachelor of Arts in Classics, Language and Literature Track (p. 392)
- Bachelor of Arts in Global Studies (<https://catalog.tamu.edu/undergraduate/arts-and-sciences/global-languages-cultures/global-studies-ba/>)
- Bachelor of Arts in Modern Languages, French Option (p. 393)
- Bachelor of Arts in Modern Languages, German Option (p. 394)
- Bachelor of Arts in Modern Language, Russian Option (p. 396)
- Bachelor of Arts in Spanish (p. 397)
- Bachelor of Arts in University Studies - Race, Gender, Ethnicity Concentration (p. 399)
- Bachelor of Science in University Studies - Race, Gender, Ethnicity Concentration (p. 400)

Department of History

- Bachelor of Arts in History (p. 412)
- Bachelor of Arts in History and Master of Arts in History, 5-Year Degree Program (p. 414)
- Bachelor of Science in History (p. 415)

Department of Mathematics

- Bachelor of Science in Applied Mathematics, Actuarial Science Emphasis (p. 422)
- Bachelor of Science in Applied Mathematics, Biological Science Emphasis (p. 424)
- Bachelor of Science in Applied Mathematics, Computational Science Emphasis (p. 425)
- Bachelor of Science in Applied Mathematics, Cryptography Emphasis (p. 426)
- Bachelor of Science in Applied Mathematics, Economics Emphasis (p. 428)
- Bachelor of Science in Applied Mathematics, Math Emphasis (p. 429)
- Bachelor of Science in Applied Mathematics, Statistics Emphasis (p. 431)

- Bachelor of Science in Applied Mathematics and Master of Science in Economics, 5-Year Degree Program (p. 432)
- Bachelor of Science in Applied Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 434)
- Bachelor of Arts in Mathematics (p. 436)
- Bachelor of Arts in Mathematics, Teaching Emphasis (p. 437)
- Bachelor of Arts in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 439)
- Bachelor of Science in Mathematics (p. 440)
- Bachelor of Science in Mathematics and Master of Science in Mathematics, 5-Year Degree Program (p. 442)
- Bachelor of Science in University Studies, Mathematics for Teaching Concentration (p. 444)

Department of Oceanography

- Bachelor of Arts in Ocean Studies (p. 451)
- Bachelor of Science in Oceanography (p. 446)
- Bachelor of Science in Oceanography and Master of Ocean Science and Technology, 5-Year Degree Program (p. 448)

Department of Philosophy

- Bachelor of Arts in Philosophy (p. 453)
- Bachelor of Arts in Philosophy and Master of Arts in Philosophy, 5-Year Degree Program (p. 455)
- Bachelor of Arts in Society, Ethics, and Law (p. 456)

Department of Physics and Astronomy

- Bachelor of Arts in Physics (p. 461)
- Bachelor of Science in Physics (p. 462)
- Bachelor of Science in Physics, Astrophysics Track (p. 463)
- Bachelor of Science in Physics, Business Track (p. 464)
- Bachelor of Science in Physics, Computational Science Track (p. 465)
- Bachelor of Science in Physics, Physical Science Teaching Track (p. 466)
- Bachelor of Science in Physics, Physics and Mathematics Teaching Track (p. 468)
- Bachelor of Science in Physics, Semiconductors and Modern Materials Track (p. 469)

Department of Psychological and Brain Sciences

- Bachelor of Science in Behavioral and Cognitive Neuroscience (p. 473)
- Bachelor of Science in Neuroscience, Behavioral and Cognitive Neuroscience (p. 474)
- Bachelor of Arts in Psychology (p. 475)
- Bachelor of Science in Psychology (p. 477)

Department of Sociology

- Bachelor of Arts in Sociology (p. 482)
- Bachelor of Arts in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 483)
- Bachelor of Science in Sociology (p. 485)

- Bachelor of Science in Sociology and Master of Public Service and Administration, 5-Year Degree Program (p. 486)

Department of Statistics

- Bachelor of Science in Bioinformatics (p. 491)
- Bachelor of Science in Statistics (p. 493)
- Bachelor of Science in Statistics and Master of Science in Statistical Data Science, 5-Year Degree Program (p. 494)

Minors

College of Arts and Sciences

- Environmental Systems Science Minor (p. 274)
- Gender and Health Minor (p. 274)
- Women's and Gender Studies Minor (p. 275)

Department of Anthropology

- Anthropology Minor (p. 281)
- Archaeology Minor (p. 281)
- Medical Anthropology Minor (p. 282)
- Museum Studies Minor (p. 282)
- Nautical Archaeology Minor (p. 283)

Department of Atmospheric Sciences

- Climate Change Minor (p. 287)
- Meteorology Minor (p. 287)

Department of Biology

- Bioinformatics Minor (p. 306)
- Biology Minor (p. 307)
- Neuroscience Minor (p. 307)
- Pre-Medicine Minor (p. 308)

Department of Chemistry

- Chemistry Minor (p. 323)

Department of Communication and Journalism

- Communication Minor (p. 344)
- Journalism Minor (p. 344)

Department of Economics

- Economics Minor (p. 358)

Department of English

- English Minor (p. 366)
- Health Humanities Minor (p. 366)
- Professional Writing Minor (p. 367)
- Science Fiction and Fantasy Studies Minor (p. 368)

Department of Geography

- Geographic Information Science and Technology Minor (p. 376)
- Geography Minor (p. 377)

Department of Geology and Geophysics

- Geology Minor (p. 388)

Department of Global Languages and Culture

- Africana Studies Minor (p. 402)
- Arabic Studies Minor (p. 402)
- Chinese Minor (p. 403)
- Classical Studies Minor (p. 403)
- Comparative Cultural Studies-International Minor (p. 404)
- French Minor (p. 405)
- German Minor (p. 406)
- Hispanic Studies for Community Engagement Minor (p. 406)
- Italian Minor (p. 407)
- Japanese Minor (p. 407)
- Jewish Studies Minor (p. 408)
- Religious Studies Minor (p. 408)
- Russian Minor (p. 409)
- Spanish Minor (p. 409)
- Spanish for the Health Professions Minor (p. 410)

Department of History

- History Minor (p. 416)

Department of Mathematics

- Mathematics Minor (p. 444)

Department of Oceanography

- Oceanography Minor (p. 452)

Department of Philosophy

- Philosophy Minor (p. 457)

Department of Physics and Astronomy

- Astrophysics Minor (p. 470)
- Physics Minor (p. 471)

Department of Psychological Brain Sciences

- Psychology Minor (p. 479)

Department of Sociology

- Criminology Minor (p. 488)
- Latino/a and Mexican-American Studies Minor (p. 488)
- Sociology Minor (p. 489)

Department of Statistics

- Statistics Minor (p. 496)

Certificates

Department of Communication and Journalism

- Communication Leadership and Conflict Management Certificate (p. 344)
- Health Communication Certificate (p. 345)
- Social Media Certificate (p. 345)
- Strategic Communication Certificate (p. 346)

Department of Global Languages and Cultures

- Proficiency in Modern Languages Certificate (p. 410)

Department of History

- Legal History Certificate (p. 417)

Department of Philosophy

- Philosophy Pre-Law Certificate (p. 458)

Department of Psychological and Brain Sciences

- Behavioral Health Certificate (p. 479)
- Healthy Development Certificate (p. 479)
- Psychology of Diversity Certificate (p. 480)
- Work and Organizations Certificate (p. 480)

Masters

Department of Anthropology

- Master of Arts in Anthropology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/anthropology/ma/>)
- Master of Science in Maritime Archaeology and Conservation (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/anthropology/maritime-archaeology-conservation-ms/>)

Department of Atmospheric Sciences

- Master of Science in Atmospheric Sciences (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/atmospheric-sciences/ms/>)

Department of Biology

- Master of Science in Biology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/biology/ms/>)
- Master of Science in Microbiology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/biology/microbiology-ms/>)

Department of Chemistry

- Master of Science in Chemistry (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/chemistry/ms/>)

Department of Communication and Journalism

- Master of Arts in Communication (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/communication-journalism/communication-ma/>)

Department of Economics

- Master of Science in Economics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/economics/ms/>)
- Master of Science in Economics and Master of International Affairs Combined Degree Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/economics/ms-mia/>)

Department of English

- Master of Arts in English (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/english/ma/>)

Department of Geography

- Master of Geoscience in Geoscience (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/geography/mgsc/>)
- Master of Science in Geography (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/geography/ms/>)

Department of Geology and Geophysics

- Master of Science in Geology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/geology-geophysics/geology-ms/>)
- Master of Science in Geophysics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/geology-geophysics/geophysics-ms/>)

Department of Global Languages and Culture

- Master of Arts in Hispanic Studies (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/global-languages-cultures/hispanic-studies-ma/>)

Department of History

- Master of Arts in History (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/history/ma/>)

Department of Mathematics

- Master of Science in Mathematics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/mathematics/ms/>)

Department of Oceanography

- Master of Ocean Science and Technology in Ocean Science and Technology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/oceanography/most/>)
- Master of Science in Oceanography (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/oceanography/ms/>)

Department of Philosophy

- Master of Arts in Philosophy (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/philosophy/ma/>)

Department of Physics and Astronomy

- Master of Science in Astronomy (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/physics-astronomy/astronomy-ms/>)
- Master of Science in Physics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/physics-astronomy/physics-ms/>)

Department of Psychological and Brain Sciences

- Master of Science in Psychological Sciences (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/psychological-and-brain-sciences/psychological-sciences-ms/>)

Department of Sociology

- Master of Science in Sociology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/sociology/ms/>)

Department of Statistics

- Master of Science in Data Science (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/interdisciplinary/data-science-ms/>)
- Master of Science in Statistical Data Science (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/statistics/statistical-data-science-ms/>)

Doctoral

Department of Anthropology

- Doctor of Philosophy in Anthropology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/anthropology/phd/>)

Department of Atmospheric Sciences

- Doctor of Philosophy in Atmospheric Sciences (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/atmospheric-sciences/phd/>)

Department of Biology

- Doctor of Philosophy in Biology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/biology/phd/>)
- Doctor of Philosophy in Microbiology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/biology/microbiology-phd/>)

Department of Chemistry

- Doctor of Philosophy in Chemistry (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/chemistry/phd/>)

Department of Communication and Journalism

- Doctor of Philosophy in Communication (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/communication-journalism/communication-phd/>)

Department of Economics

- Doctor of Philosophy in Economics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/economics/phd/>)

Department of English

- Doctor of Philosophy in English (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/english/phd/>)

Department of Geography

- Doctor of Philosophy in Geography (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/geography/phd/>)

Department of Geology and Geophysics

- Doctor of Philosophy in Geology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/geology-geophysics/geology-phd/>)
- Doctor of Philosophy in Geophysics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/geology-geophysics/geophysics-phd/>)

Department of Global Languages and Cultures

- Doctor of Philosophy in Hispanic Studies (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/global-languages-cultures/hispanic-studies-phd/>)

Department of History

- Doctor of Philosophy in History (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/history/phd/>)

Department of Mathematics

- Doctor of Philosophy in Mathematics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/mathematics/phd/>)

Department of Oceanography

- Doctor of Philosophy in Oceanography (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/oceanography/phd/>)

Department of Philosophy

- Doctor of Philosophy in Philosophy (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/philosophy/phd/>)

Department of Physics and Astronomy

- Doctor of Philosophy in Applied Physics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/physics-astronomy/applied-physics-phd/>)
- Doctor of Philosophy in Astronomy (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/physics-astronomy/astronomy-phd/>)
- Doctor of Philosophy in Physics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/physics-astronomy/physics-phd/>)

Department of Psychological and Brain Sciences

- Doctor of Philosophy in Clinical Psychology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/psychological-and-brain-sciences/clinical-psychology-phd/>)
- Doctor of Philosophy in Industrial/Organizational Psychology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/psychological-and-brain-sciences/industrial-organizational-psychology-phd/>)
- Doctor of Philosophy in Psychology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/psychological-and-brain-sciences/psychology-phd/>)

Department of Sociology

- Doctor of Philosophy in Sociology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/sociology/phd/>)

Department of Statistics

- Doctor of Philosophy in Statistics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/statistics/phd/>)

Environmental Studies - BS

The Bachelor of Science degree in Environmental Studies blends an interdisciplinary understanding of Earth's surface processes and environmental problems, along with the policy and decision-making components of human interactions with the environment.

The increasing demands that population growth and affluence put on Earth's natural resources and environment require greater numbers of trained professionals and informed citizens. The degree is designed to educate students about the scientific, human-dimension and policy aspects of environmental issues facing our state and nation as they work in regulatory agencies, industry, and non-governmental organizations to resolve problems. Students focus upper division coursework in one of five environmental themes: 1) urban environment, 2) occupational health and safety, 3) environmental regulation and compliance, 4) Geographic Information Science and Technology (GIST), and 5) global environment.

Program Requirements

First Year

Fall		Semester Credit Hours
ECON 202	Principles of Economics	3
ENSS 105	Introduction to Environmental Systems Science	3
MATH 140 or MATH 168	Mathematics for Business and Social Sciences or Finite Mathematics	3
POLS 206	American National Government	3
Select one of the following: ¹		4
ATMO 201 & ATMO 202	Weather and Climate and Weather and Climate Laboratory	16
GEOG 203 & GEOG 213	Planet Earth and Planet Earth Lab	
GEOL 101 & GEOL 102	Principles of Geology and Principles of Geology Laboratory	
OCNG 251 & OCNG 252	The Blue Planet - Our Oceans and The Blue Planet - Our Oceans Laboratory	
Semester Credit Hours		
Spring		
ENGL 104	Composition and Rhetoric	3
GEOG 201	Introduction to Human Geography	3
MATH 142	Business Calculus	3
Select one of the following: ¹		4
ATMO 201 & ATMO 202	Weather and Climate and Weather and Climate Laboratory	16
GEOG 203 & GEOG 213	Planet Earth and Planet Earth Lab	
GEOL 101 & GEOL 102	Principles of Geology and Principles of Geology Laboratory	
OCNG 251 & OCNG 252	The Blue Planet - Our Oceans and The Blue Planet - Our Oceans Laboratory	
Semester Credit Hours		
Creative arts elective (p. 30) ²		3
Semester Credit Hours		16
Second Year		
Fall		
ATMO 210	Climate Change	3
ENSS 205	Environmental Programs Cornerstone	1
POLS 207	State and Local Government	3
Life and physical sciences elective ³		4
Select one of the following:		
BIOL 101	Botany	14
BIOL 107	Zoology	
BIOL 111	Introductory Biology I	
BIOL 112	Introductory Biology II	
CHEM 119	Fundamentals of Chemistry I	
CHEM 120	Fundamentals of Chemistry II	3
Communication elective (p. 27)		
Semester Credit Hours		14

Spring

GEOG 330	Resources and the Environment	3
GEOG 304	Economic Geography	3
Life and physical sciences elective ³		4
Select one of the following:		
BIOL 101	Botany	
BIOL 107	Zoology	
BIOL 111	Introductory Biology I	
BIOL 112	Introductory Biology II	
CHEM 119	Fundamentals of Chemistry I	
CHEM 120	Fundamentals of Chemistry II	
Language, philosophy and culture elective (p. 28) ²		3
Theme elective ⁴		3
Semester Credit Hours		16
Third Year		
Fall		
GEOG 335	Pattern and Process in Biogeography	3
GEOG 380	Workshop in Environmental Studies	3
PHIL 314	Environmental Ethics	3
STAT 303	Statistical Methods	3
Theme elective ⁴		3
Semester Credit Hours		15
Spring		
AGEC 350	Environmental and Natural Resource Economics	3
ATMO 444	The Science and Politics of Global Climate Change	3
GEOG 390	Principles of Geographic Information Systems	4
Environmental policy elective		3
Select one of the following:		
BESC 367	U.S. Environmental Regulations	
ECON 203	Principles of Economics	
ECON 323	Microeconomic Theory	
ENSS 431	Environmental Regulatory Compliance in Geoscience	
GEOG 306	Introduction to Urban Geography	
GEOG 309	Geography of Energy	
GEOG 401	Political Geography	
GEOG 406	Geographic Perspectives on Contemporary Urban Issues	
GEOG 430	Environmental Justice	
POLS 347	Politics of Energy and the Environment	
SOCI 328	Environmental Sociology	
URPN 202	Building Better Cities	
URPN 360	Issues in Environmental Quality	
URPN 361	Urban Issues	
URPN 371	Environmental Health Planning and Policy	
URPN 460	Sustainable Communities	
RWFM 470	Environmental Impact Assessment	
Theme Elective ⁴		3
Semester Credit Hours		16

Fourth Year**Fall**

ENSS 430	Global Science and Policy Making	3
American history elective (p. 30)		3
Technical elective ⁵		3
Select one of the following:		
ATMO 321	Computer Applications in the Atmospheric Sciences	
ATMO 464	Laboratory Methods in Atmospheric Sciences	
GEOG 312	Data Analysis in Geography	
GEOG 361	Remote Sensing in Geosciences	
GEOG 450	Field Geography	
GEOG 467	Dynamic Modeling of Earth and Environmental Systems	
GEOG 475	Advanced Topics in GIS (Geographic Information Systems)	
GEOG 352/ GEOL 352 or GEOG 352/ GEOG 352	GNSS in the Geosciences or GNSS in the Geosciences	
OCNG 470	Data Analysis Methods in Geosciences	
General elective ⁶		3
Theme elective ⁴		3

Semester Credit Hours	15

Spring

ENSS 405	Environmental Programs Capstone	3
American history elective (p. 30)		3
General elective ⁶		3
Theme elective ⁴		3

Semester Credit Hours	12

Total Semester Credit Hours	120

¹ Choose one introductory course in the first semester and an additional one in the second semester of the freshman year.

² It is recommended to select a course that also fulfills an international and cultural diversity (p. 49) and/or cultural discourse (p. 48) requirement. The graduation requirements include three hours of international and cultural diversity courses and three hours of cultural discourse courses.

³ Choose one Life and Physical Science Elective in the first semester and an additional one in the second semester of the sophomore year.

⁴ Choose 15 hours of courses in your chosen environmental theme from the list below.

⁵ Other courses which match the Environmental Programs' technical electives definition will be allowed by adjustment. Seek guidance regarding potential adjustments from the ENVP academic advisor.

⁶ KINE 199, MATH 102, MATH 150, and lower level AERS (p. 900), MLSC (p. 1151), NVSC (p. 1178), and SOMS (p. 1237) courses cannot be used as general electives.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. Also, international and cultural diversity electives (3 hours) and cultural discourse (3 hours) must be incorporated into the degree.

Environmental Theme Electives

Code	Title	Semester Credit Hours
Urban Environment		
GEOG 306	Introduction to Urban Geography	3
GEOG 406	Geographic Perspectives on Contemporary Urban Issues	3
	or ATMO 326 or Environmental Atmospheric Science	
URPN 202	Building Better Cities	3
URPN 361	Urban Issues	3
URPN 460	Sustainable Communities	3
Occupational Health and Safety		
PHLT 330	The Environment and Public Health	3
Select the remaining courses from the following:		
PHLT 331	Occupational Safety and Health I	3
PHLT 333	Accident Investigation	3
PHLT 334	Fire Safety and Workplace Hazards	3
PHLT 335	Hazardous Materials	3
PHLT 432	Human Factors and Ergonomic Health and Safety	3
PHLT 434	Project Cost Benefit and Economics	3
Environmental Regulation and Compliance		
BESC 367	U.S. Environmental Regulations	3
ENSS 431	Environmental Regulatory Compliance in Geoscience	3
GEOG 430	Environmental Justice	3
OCNG 350	Marine Pollution	3
Select the remaining courses from the following:		
BESC 403	Sampling and Environmental Monitoring	3
BESC 411	Environmental Health and Safety Compliance	3
Geographic Information Science and Technology (GIST)		
GEOG 352/ GEOL 352	GNSS in the Geosciences	3
GEOG 361	Remote Sensing in Geosciences	4
Select the remaining courses from the following:

GEOG 360	Natural Hazards	3
GEOG 435	Principles of Plant Geography	3
OCNG 413	Polar Regions of the Earth: Science, Society and Discovery	3

Environmental Systems Science - BS

This program embraces the disciplines of environmental systems science to give students a rigorous interdisciplinary education including issues associated with environmental policy.

The increasing demands that population growth and affluence put on the natural resources and the Earth's environment require greater numbers of trained professionals and informed citizens. The degree trains students for employment by industry, environmental and engineering consulting firms, non-governmental organizations, and governmental regulatory agencies, among other entities. Students focus on coursework in a particular environmental theme: coastal and marine environments, water, human impact on the environment, climate change, or biosphere.

Program Requirements

First Year

Fall		Semester Credit Hours
CHEM 119	Fundamentals of Chemistry I	4
ENSS 105	Introduction to Environmental Systems Science	3
MATH 151 or MATH 147	Engineering Mathematics I or Calculus I for Biological Sciences	4
Select one of the following: ^{1,2,3}		4
ATMO 201 & ATMO 202	Weather and Climate and Weather and Climate Laboratory	
GEOG 203 & GEOG 213	Planet Earth and Planet Earth Lab	
GEOL 101 & GEOL 102 or GEOL 150	Principles of Geology or Introduction to the Solid Earth	
OCNG 251 & OCNG 252	The Blue Planet - Our Oceans and The Blue Planet - Our Oceans Laboratory	
Semester Credit Hours		15
Spring		
CHEM 120	Fundamentals of Chemistry II	4
ENSS 205	Environmental Programs Cornerstone	1
MATH 152 or MATH 148	Engineering Mathematics II or Calculus II for Biological Sciences	4
Select one of the following: ^{1,2,3}		4
ATMO 201 & ATMO 202	Weather and Climate and Weather and Climate Laboratory	

GEOG 203 & GEOG 213	Planet Earth and Planet Earth Lab	
GEOL 101 & GEOL 102 or GEOL 150	Principles of Geology or Introduction to the Solid Earth	
OCNG 251 & OCNG 252	The Blue Planet - Our Oceans and The Blue Planet - Our Oceans Laboratory	
Social and behavioral sciences (p. 31) ⁴		3
Semester Credit Hours		16

Second Year

Fall

ATMO 210	Climate Change	3
ECCB 205 & ECCB 215	Fundamentals of Ecology and Fundamentals of Ecology-Laboratory	4
ENGL 104	Composition and Rhetoric	3
GEOL 208	Life on a Dynamic Planet	3
American history (p. 30)		3
Semester Credit Hours		16

Spring

GEOG 335	Pattern and Process in Biogeography	3
GEOG 390	Principles of Geographic Information Systems	4
Select one of the following:		4
PHYS 201	College Physics	
PHYS 206 & PHYS 226	Newtonian Mechanics for Engineering and Science and Physics of Motion Laboratory for the Sciences	
Language, philosophy and culture (p. 28)		3
Semester Credit Hours		14

Third Year

Fall

POLS 206	American National Government	3
STAT 303 or STAT 211	Statistical Methods ⁵ or Principles of Statistics I	3
Select one of the following: ⁶		3
ENSS 430	Global Science and Policy Making	
ENSS 431	Environmental Regulatory Compliance in Geoscience	
GEOG 330	Resources and the Environment	
PHIL 314	Environmental Ethics	
Communication (p. 27) ⁷		3
General elective ⁸		3
Semester Credit Hours		15

Spring

GEOG 410/ OCNG 412 or GEOL 443/ GEOG 443	Global Change or Global Biogeochemical Cycles	3
Select one of the following: ⁶		3
ATMO 321	Computer Applications in the Atmospheric Sciences	
GEOL 360	Analyzing Data in Geology	

OCNG 456	MATLAB Programming for Ocean Sciences	
OCNG 469	Python for Geosciences	
Environmental theme electives ⁹		6
General elective ⁸		3

Semester Credit Hours 15

Fourth Year

Fall

OCNG 470	Data Analysis Methods in Geosciences	4
American history (p. 30)		3
Environmental theme electives ⁹		9

Semester Credit Hours 16

Spring

ENSS 405	Environmental Programs Capstone	3
POLS 207	State and Local Government	3
Creative arts (p. 30)		3
Environmental theme elective ⁹		4

Semester Credit Hours 13

Total Semester Credit Hours 120

¹ Must take ATMO 201 & ATMO 202 if pursuing the Climate Change theme.

² Must take GEOL 101 & GEOL 102 or GEOL 150 and GEOG 203 & GEOG 213 if pursuing the Hazards and Resilience theme and Water Systems Science theme.

³ Must take OCNG 251 & OCNG 252 and GEOG 203 & GEOG 213 if pursuing the Biosphere theme.

⁴ ESST 201 is recommended.

⁵ STAT 211 is required for the Environmental Modeling and Data Science theme.

⁶ Select electives in consultation with your academic advisor or faculty mentor.

⁷ ENGL 210 is recommended.

⁸ Select from any 100-499 course not used elsewhere.

⁹ Select 19 hours of theme courses in your junior and senior years in consultation with your academic advisor or faculty mentor from the list below.

Two courses in the degree plan must be writing intensive courses designated by the Environmental Programs in the schedule of classes. The graduation requirements include three hours of international and cultural diversity courses and three hours of cultural discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

Environmental Theme Electives

Code	Title	Semester Credit Hours

Biosphere

Select from the following: 6-8

GEOG 435	Principles of Plant Geography	
OCNG 320	Biological Oceanography	
OCNG 355	The Blue Frontier - Harnessing Ocean Resources for Future Sustainability	
SCSC 301	Soil Science	

Select from the following: 3-8

BESC 403	Sampling and Environmental Monitoring	
GEOG 361	Remote Sensing in Geosciences	
GEOG 398	Interpretation of Aerial Photographs	
GEOG 450	Field Geography	
GEOG 461	Digital Image Processing in the Geosciences	
GEOG 475	Advanced Topics in GIS (Geographic Information Systems)	
OCNG 404	Ocean Observing Systems	

Select from the following: 3-8

PHIL 470	Animal Welfare, Ethics and Law	
ECCB 304	Conservation Biology	
ECCB 320	Ecosystem Restoration and Management	
ECCB 416	Fire Ecology and Natural Resource Management	
ECCB 417	Prescribed Fire	
ECCB 420	Ecological Restoration of Wetland and Riparian Systems	
GEOG 324	Global Climatic Regions	
OCNG 350	Marine Pollution	
OCNG 425	Microbial Oceanography	
RWFM 306	Wildlife and the Changing Environment	
RWFM 350	Wildlife and Fisheries Population Dynamics	
RWFM 404	Aquatic Ecosystems	

Total Semester Credit Hours 19

Code	Title	Semester Credit Hours

Climate Change

ATMO 444	The Science and Politics of Global Climate Change	3
GEOG 467	Dynamic Modeling of Earth and Environmental Systems	4
GEOG 442/ GEOL 442	Past Climates	3
PHIL 317	Climate Ethics	3

Select from the following: 6

GEOG 309	Geography of Energy	
GEOG 324	Global Climatic Regions	
GEOG 409	Geographies of Decarbonization	
ATMO 363	Introduction to Atmospheric Chemistry and Air Pollution

RWFM 440	Wetland Delineation	
SCSC 405	Soil and Water Microbiology	
SCSC 458	Watershed, Water and Soil Quality Management	
Total Semester Credit Hours		19

Women's and Gender Studies - BA

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world.

Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Majors in Women's and Gender Studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture. Core courses in Women's and Gender Studies have both theoretical and applied focuses; upper-division core courses in Women's and Gender Studies emphasize writing and research skills. Students enrolled in the BA are directed to complete several humanities-focused courses in Women's and Gender Studies, while also selecting their coursework in social sciences or humanities for their electives within their major.

Because gender has far-reaching influence on daily life, world culture, and public policy, this major equips students to enter a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flex-time, parental leave, and pay equity, just as specialists in women's and gender studies find opportunities in education, law, health care, social work, counseling, media, public policy, and a wide range of other fields.

¹ A minimum grade of C is required.

² Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

³ Select from WGST 333/ENGL 333, WGST 343/FILM 343, WGST 374/ENGL 374, WGST 394, WGST 428/COMM 428, WGST 445/SOCI 455, WGST 474/ENGL 474, WGST 476/HIST 476, WGST 477/HIST 477.

⁴ Select from WGST 100-499 (p. 1268).

⁵ Any 100-499 not used elsewhere. Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used for General Electives.

⁶ WGST course may not be used to fulfill this requirement.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

33 hours of WGST coursework required for the BA degree.

A minimum 2.0 GPR and a minimum grade of C for a course to count in the major. Completion of distribution requirements in the major as outlined.

At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M.

College and University Requirements

Students must complete a minimum of 36 hours of 300- or 400-level course work at Texas A&M University.

Women's and Gender Studies - BS

Women's and Gender Studies is a flexible interdisciplinary program devoted to the critical analysis of gender and the pursuit of knowledge about women throughout history and around the world.

Combining the methods and insights of traditional liberal arts disciplines with the special insights of scholarship on women's and gender studies, our courses yield fresh perspectives on the nature of gender as it intersects with race, ethnicity, class, religion, and nation, and encourage students to look beyond their own culture and era in examining gender's role in shaping society. Through interdisciplinary breadth and an emphasis on critical thinking, women's and gender studies prepares students to employ critical learning in their private lives as well as in public roles as citizens and members of a diverse and complex workforce.

Majors in Women's and Gender Studies receive training in both humanities and social sciences approaches and are required to complete coursework that focuses on material beyond dominant U.S. culture. Core courses in Women's and Gender Studies have both theoretical and applied focuses; upper-division core courses in Women's and Gender Studies emphasize writing and research skills. Students enrolled in the BS are directed to complete several science and social science-focused courses in Women's and Gender Studies, while also selecting their coursework in social sciences or humanities for their electives within their major. Students in the WGST BS also complete numerous science courses in their degree, allowing them to compare traditional perspectives with feminist critiques of science.

Because gender has far-reaching influence on daily life, world culture, and public policy, this major equips students to enter a wide range of fields. As a liberal arts degree, women's and gender studies is attractive to employers looking for recruits trained in critical thinking, organizational skills, reading, writing, and presenting in a wide range of subject areas. Expertise in women's and gender issues is increasingly important to businesses, governmental agencies, and other organizations dealing with matters such as sexual harassment, flextime, parental leave, and pay equity. The BS in Women's and Gender Studies is particularly useful for students interested in science-oriented fields such as health and medicine, environmental studies, urban planning, food security, or data science, and also excellent preparation for engaging in public policy, law, and education in science fields.

¹ A minimum grade of C is required.

² Select from POLS 317; WGST 300/PBSI 300, WGST 303, WGST 316/ SOCI 316, WGST 367/POLS 367, WGST 404/ANTH 404, WGST 407/ COMM 407, WGST 410/SOCI 410, WGST 420/COMM 420.

³ See WGST program advisor for list of additional science courses.

⁴ WGST course may not be used to fulfill this requirement.

⁵ Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used for General Electives

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement.

The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

33 hours of WGST coursework required for the BS degree.

A minimum 2.0 GPA and a minimum grade of C for a course to count in the major.

At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M.

College and University Requirements

Students must complete a minimum of 36 hours of 300- or 400-level course work at Texas A&M University.

Environmental Systems Science - Minor

The minor in Environmental Systems Science embraces all earth systems sciences to give the student a rigorous interdisciplinary education including issues associated with environmental policy.

Coursework of 15 credits centers on atmospheric sciences and air quality, resources and the environment, oceanography and marine pollution, environmental geology, and climate change. The minor prepares students for careers in industry, environmental and engineering consulting firms, non-governmental organizations, and governmental regulatory agencies, among other entities.

Program Requirements

Some of the courses have prerequisites so make sure to check the catalog before enrolling in the course.

Code	Title	Semester Credit Hours
ENSS 105	Introduction to Environmental Systems Science	3
Select remaining courses from at least three of the following five groups. ¹		12
Group 1		
ATMO 363	Introduction to Atmospheric Chemistry and Air Pollution	
ATMO 463	Air Quality	
ATMO 464	Laboratory Methods in Atmospheric Sciences

15	

¹ At least 6 hours must be upper level, 3 of which must be 400 level.

Students with majors in the College of Arts and Sciences must select only courses outside of their home department.

ENSS and ENST majors may not select this minor.

Gender and Health - Minor

The Gender and Health minor provides students with knowledge, skills, and experience utilized in various careers related to the intersection of gender, health, healthcare, and health policy in both domestic and transnational realms.

Students with this minor develop critical thinking, writing, teamwork, and analytical skills as they explore a wide range of topics that allow for an intricate and nuanced understanding of the social determinants of health. Many of our courses include case-study and experiential learning components, allowing students to engage in learning through direct contact with organizations, professionals, and clients in the healthcare community.

The healthcare industry is an area of continued growth, and health care professionals and related occupations are in high demand. The Gender and Health minor helps students recognize and understand the complex intersections of gender, race, sexuality, and class in relation to health, healthcare, and health policy in preparation for related graduate education and careers.

Program Requirements

Code	Title	Semester Credit Hours

WGST 401 or WGST 48	Feminist Theory or Senior Seminar	3

WGST 201-499 (<http://catalog.tamu.edu/undergraduate/course-descriptions/wgst/>)¹

Total Semester Credit Hours **15**

¹ At least 3 credits must be at the 300-400 level.

Students must make a grade of C or better in all courses.

Department of Anthropology

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in the biological and the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at TAMU select this major because of the opportunity it affords them to acquire a sound holistic education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

Minors

- Anthropology Minor (p. 281)
- Archaeology Minor (p. 281)
- Medical Anthropology Minor (p. 282)
- Museum Studies Minor (p. 282)
- Nautical Archaeology Minor (p. 283)

Anthropology - BA

Anthropology majors pursuing the general anthropology track receive foundations in the archaeology, biological anthropology and cultural anthropology subfields of anthropology as well as options to pursue upper-level courses in each of the subfields.

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in the biological and the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at Texas A&M select this major because of the opportunity it affords them to acquire a sound holistic education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

¹ Must make a grade of C or better.

² Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

³ No anthropology course will satisfy this requirement.

⁴ Select from ANTH 302, ANTH 308, ANTH 313, ANTH 316, ANTH 317/RELS 317, ANTH 318, ANTH 323, ANTH 330, ANTH 350, ANTH 351, ANTH 353/CLAS 353, ANTH 354/CLAS 354, ANTH 360, ANTH 401, ANTH 402, ANTH 417/CLAS 417, ANTH 418, ANTH 419, ANTH 420, ANTH 436/RELS 436, ANTH 444/CLAS 444, ANTH 447, ANTH 461, ANTH 464, ANTH 485, ANTH 489.

- ⁵ Required prerequisite for STAT 302 or STAT 303
- ⁶ Select from ANTH 312, ANTH 405, ANTH 423, ANTH 424, ANTH 425, ANTH 426, ANTH 427, ANTH 434, ANTH 485, ANTH 489
- ⁷ Select from ANTH 300, ANTH 301, ANTH 324/MUSC 324, ANTH 335, ANTH 340/RELS 340, ANTH 370, ANTH 403/RELS 403, ANTH 404/WGST 404, ANTH 419, ANTH 424, ANTH 430, ANTH 434, ANTH 435, ANTH 437, ANTH 440, ANTH 445, ANTH 485, ANTH 489.
- ⁸ Select from ANTH 200-499 (p. 922). Up to 6 hours may be selected for ANTH 200-299 (p. 922), 3 to 9 hours required from ANTH 300-499 (p. 922).

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Writing Courses

All students in each track are required to take two courses with the writing attribute, also known as “W-courses”, from the department. Substitutions with W-courses from other departments are not allowed. Please see the academic advisor for the most current list of Anthropology W-courses.

Minor Requirements

Anthropology majors may select a minor field of study from departments or divisions within or outside the College of Arts and Sciences or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). The minor will consist of 15-18 hours or coursework, at least 6 of which must be at the upper-division level. A grade of C or higher is required if a course is to count in the minor. A minor should be declared before the student has completed 90 credit hours.

College and University Requirements

Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Arts and Sciences. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - BA, Archaeology Track

Students who elect to pursue the Archaeology track in the Bachelor of Arts in Anthropology take the foundation courses but also have the opportunity to take multiple upper-level courses which focus on specific topics in archaeology. In addition, majors receive a broad yet rigorous liberal arts education.

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and

linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in the biological and the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at Texas A&M select this major because of the opportunity it affords them to acquire a sound holistic education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - BS

Majoring in anthropology will provide a background in behavioral studies ideal if you're interested in biological or social sciences. The Bachelor of Science option focuses slightly more on scientific and mathematical coursework.

Anthropology is the study of what it means to be human in the broadest sense, through an examination of culture and society (sociocultural and linguistic anthropology), the biology and evolution of humans and our closest relatives (biological anthropology) and the study of past human communities and material culture (archaeology). Students develop an appreciation of the value of physical and cultural differences at the local, national and global levels, and learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds.

The aim of the anthropology major is to provide a background in behavioral studies for students who desire a broad education in the biological and the social sciences. Anthropology majors can obtain research experience in science and the humanities through ethnographic or biological research, or archaeology field schools. Most undergraduates in Anthropology at TAMU select this major because of the opportunity it affords them to acquire a sound holistic education.

The curriculum is ideal for students who want to pursue professional careers or graduate study in anthropology and archaeology. However, students will also find the curriculum fully suitable to prepare them for employment opportunities or careers in: secondary or higher education; medicine; law; museum and foundation settings; the local, state and federal government (such as the National Park Service, Bureau of Indian Affairs, National Institute of Health and others); non-governmental organizations and non-profit organizations; foreign service with government agencies (such as the Agency for International Development, United Nations organizations and others); private archaeological research institutions; and nontraditional opportunities emerging in business and management.

Minor Requirements

Anthropology majors have the option of selecting a minor field of study from departments or divisions within or outside the College of Arts and Sciences or in a particular area of interest (as with interdisciplinary minors or career opportunity minors). Minors typically consist of 15-18 hours or coursework, at least 6 of which must be at the upper-division level. A minor should be declared before the student has completed 90 credit hours.

College and University Requirements

Other courses may qualify for this category. Students should consult the approved lists of courses available through the academic advisor in the Department of Anthropology or in the Undergraduate Student Services Office in the College of Arts and Sciences. The following list incorporates University Core Curriculum requirements. No course can be counted in more than one category, with the exception of courses used for the international and cultural diversity (p. 49) or the cultural discourse (p. 48) requirement. To promote the opportunity for anthropology majors to acquire a broad educational experience, anthropology students must satisfy their University requirements for language, philosophy and culture, social and behavioral sciences, and the sciences with courses other than those offered by anthropology.

Students must complete a minimum of 36 hours of 300- or 400-level coursework at Texas A&M University.

Anthropology - Minor

The minor in Anthropology introduces students to the subfields of sociocultural, biological, and archaeological anthropology.

The minor complements majors within all of the social sciences, humanities, and many of the natural sciences. Anthropology minors learn about issues relating to the human condition within a holistic, comparative and evolutionary context. They will develop the skills of scientific inquiry and will also learn critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds, in fields such as education, law, medicine, government and non-government organizations, and nontraditional opportunities emerging in business and management.

Program Requirements

Code	Title	Semester Credit Hours
Anthropology Requirement I		6
Select from ANTH 300-499. (p. 922)		
Anthropology Requirement II		9
Select from any ANTH 200-499 course not used above. (p. 922)		
Total Semester Credit Hours		15

Students must make a grade of C or better in all courses.

At least six hours must be taken at the upper level and must be in residence.

Archaeology - Minor

The minor in Archaeology introduces students to the subfield of archaeology.

The minor complements majors within all of the social sciences, humanities, and many of the natural and life sciences. Archaeology minors understand and appreciate humanity's shared past through the investigation of the archaeological traces left behind by past peoples. They develop critical thinking skills that support them in careers that involve working with individuals of diverse national or ethnic backgrounds in education, museum and foundation settings, government and non-profit agencies, archaeological research firms, and non-traditional opportunities emerging in the private sector.

At least six hours must be taken at the upper level and must be in residence.

Medical Anthropology - Minor

The minor in Medical Anthropology provides students with an introduction to this subfield of anthropology, which examines how biology, along with society and culture, shape health and disease.

Students interested in learning about differences and similarities in human biology through time and cross-culturally can select courses from the perspective of biological anthropology, such as ANTH 225, ANTH 226, ANTH 423, ANTH 425, ANTH 427, and ANTH 434. Those who are interested in learning about how society, culture, and the environment influence health care, wellness and health-related behaviors can select courses from the perspective of cultural anthropology, like ANTH 210, ANTH 222, ANTH 426, and ANTH 437. Another option is to select both biological anthropology and cultural anthropology courses to receive training in the biocultural perspective. Through this minor students interested in any health science field will develop critical thinking skills necessary for working in healthcare and with patients from diverse national and ethnic backgrounds.

15	

¹ Must be in a topic related to Medical Anthropology

Must make a grade of C or better in all courses.

At least six hours must be taken at the upper level and must be in residence.

Museum Studies - Minor

The minor in Museum Studies will provide students with a foundational understanding of museum studies while giving them professional experience working in a museum.

The minor is offered in cooperation with the College of Arts and Sciences, the College of Architecture, and the College of Agriculture and Life Sciences. The increase of collections, curatorial facilities and museums ensures this minor is a wise choice for any student with an interest in Anthropology or related fields.

Program Requirements

Code	Title	Semester Credit Hours
ANTH 421/	Advanced Museum Studies	3
MUST 421		
ANTH 484	Anthropology Internship	3
or MAST 48	or Undergraduate Internship	
MUST 221/	Foundations of Museum Studies	3
ARCH 221		
or MAST 220	or Introduction to Museums and Conservation	
Select from the following:		9
ANTH 313	Historical Archaeology	
ANTH 402	Archaeological Artifact Conservation	
ANTH 464	Cultural Heritage and Resource Management	
ARTS 330	The Arts of America	
ARTS 349	The History of Modern Art	
HIST 303	History and Memory	
HMGD 207	Interpretation of Natural and Cultural Resources	
HMGD 302	Application of Tourism Principles	
HMGD 340	Global Communities & Diverse Populations in Hospitality, Hotel Management and Tourism	
MAST 252	Crafts of the Maritime World	
MAST 365	Material Culture	
MAST 369	Collections Care and Management	

PERF 308	Performing Arts Administration	
PERF 338	Performing Communities	
PHIL 330	Philosophy of Art	
PSAA 344	Public Communication and Stakeholder Engagement	
PSAA 364	Fundraising and Philanthropy	
PSAA 442	Cross#Sector Collaboration	
PSAA 443	Managing Workplace Diversity in Public and Nonprofit Organizations	
VIST 465	Video and Time Based Media	
Total Semester Credit Hours		18

Students must make a grade of C or better in all courses.

Nautical Archaeology - Minor

The minor in Nautical Archaeology provides students with foundational training in shipwreck archaeology, one of the unique strengths of Texas A&M University.

Students learn how watercraft have shaped the human experience and changed history, as they gain fluency in ship construction technologies, underwater survey and excavation techniques, and the conservation of archaeological artifacts from submerged contexts. The legal protection of underwater cultural heritage and the ethics of treasure hunting engage critical thinking. Professional training may be acquired through archaeological fieldwork (ANTH 330), internships in conservation and/or archival research (ANTH 484), or supervised scholarly research (ANTH 485). The minor in Nautical Archaeology integrates with all majors in Arts and Sciences and exposes students to careers in maritime museums, cultural resource management firms, as well as state and federal government, educational, and non-profit agencies.

Program Requirements

Code	Title	Semester Credit Hours
Select five from the following:		15
ANTH 316	Nautical Archaeology	
ANTH 318	Nautical Archaeology of the Americas	
ANTH 323	Nautical Archaeology of the Mediterranean	
ANTH 330	Field Research in Anthropology	
ANTH 402	Archaeological Artifact Conservation	
ANTH 417/ CLAS 417	Naval Warfare and Warships in Ancient Greece and Rome	
ANTH 418	Romans, Arabs, and Vikings--Seafaring in the Mediterranean during the early Christian Era	
ANTH 484	Anthropology Internship ¹	
ANTH 485	Directed Studies ²	
ANTH 489	Special Topics in... ³	
Total Semester Credit Hours		15

¹ At Conservation Research Lab (CRL), Institute of Nautical Archaeology (INA), or the Center for Maritime Archaeology and Conservation (CMAC) labs

² With a Nautical Archaeology Program faculty member

³ As offered in a particular semester by a Nautical Archaeology Program faculty member

Students must make a grade of C or better in all courses.

Department of Atmospheric Sciences

Atmospheric sciences is an interdisciplinary field encompassing the physics and chemistry of the atmosphere, along with its interaction with the Earth's surface and oceans. Scientists in this field use their knowledge to improve weather forecasts, model cloud and precipitation processes, understand the climate system, observe the atmosphere with radar and satellites, and probe atmospheric chemistry and air quality. The study of this field is based on principles from physics, chemistry and mathematics, and well prepared students will have a solid grounding in all three disciplines.

Students in the Department of Atmospheric Sciences benefit from relatively small classes and low student-to-teacher ratios. Many opportunities are available for participating in faculty-led research programs, including national and international field campaigns, often culminating in presentations at national conferences.

Faculty

Baule, William James, Research Assistant Professor
Atmospheric Sciences
PHD, Michigan State University, 2022

Bowman, Kenneth P, Research Professor
Atmospheric Sciences
PHD, Princeton University, 1984

Brooks, Sarah D, Professor
Atmospheric Sciences
PHD, University of Colorado, 2002

Crawford, Max, Visiting Lecturer
Atmospheric Sciences
BS, Texas A&M University, 2013

Dessler, Andrew E, Professor
Atmospheric Sciences
PHD, Harvard University, 1994

Dickey, Judy, Instructional Assistant Professor
Atmospheric Sciences
PHD, Texas A&M University, 2024

Epifanio, Craig C, Associate Professor
Atmospheric Sciences
PHD, University of Washington, 1999

Fu, Dan, Assistant Professor
Atmospheric Sciences
PHD, Texas A&M University, 2018

Korty, Robert L, Professor
Atmospheric Sciences
PHD, Massachusetts Institute of Technology, 2005

Liu, Xiaohong, Professor
Atmospheric Sciences
PHD, Nanjing University, China, 1992

Logan, Timothy S, Associate Professor
Atmospheric Sciences
PHD, University of North Dakota, 2014

Nielsen, Erik Russell, Instructional Associate Professor
Atmospheric Sciences
PHD, Colorado State University, 2019

Nielsen-Gammon, John W, Professor
Atmospheric Sciences
PHD, Massachusetts Institute of Technology, 1990

Nowotarski, Christopher J, Associate Professor
Atmospheric Sciences
PHD, Pennsylvania State University, 2013

Nunez Ocasio, Kelly, Assistant Professor
Atmospheric Sciences
PHD, Pennsylvania State University, 2021

Rapp, Anita D, Professor
Atmospheric Sciences
PHD, Colorado State University, 2008

Saravanan, Ramalingam, Professor
Atmospheric Sciences
PHD, Princeton University, 1990

Schade, Gunnar W, Associate Professor
Atmospheric Sciences
PHD, Johannes Gutenberg Universitat at Germany, 1997

Schumacher, Courtney, Professor
Atmospheric Sciences
PHD, University of Washington, 2003

Szunyogh, Istvan, Professor
Atmospheric Sciences
PHD, Hungarian Academy of Sciences, 1994

Winkley, Shel, Lecturer
Atmospheric Sciences
BS, Texas A&M University, 2007

Xu, Yangyang, Associate Professor
Atmospheric Sciences
PHD, University of California at San Diego, 2014

Yang, Ping, Professor
Atmospheric Sciences
PHD, University of Utah, 1995

Zhang, Renyi, Professor
Atmospheric Sciences
PHD, Massachusetts Institute of Technology, 1994

Zhang, Yue, Assistant Professor
Atmospheric Sciences
PHD, Harvard University, 2010

Majors

- Bachelor of Science in Meteorology (p. 284)
- Bachelor of Science in Meteorology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 285)

Minors

- Climate Change Minor (p. 287)
- Meteorology Minor (p. 287)

Facilities

The Department of Atmospheric Sciences occupies the upper floors of the 15-story Oceanography and Meteorology Building. The Doppler weather radar on the roof of the building is a campus landmark and is used for both research and teaching. The department also operates a mobile Doppler radar for use in research projects. The department has four state-of-the-art chemistry labs, in which phenomena from ozone to aerosols are studied, as well as facilities for modeling the chemical environment. A continuous, comprehensive stream of meteorological data is received from ground stations, balloons, aircraft, radars, and satellites around the world. Two well-equipped computer labs are regularly upgraded to provide state-of-the-art educational equipment.

Meteorology - BS

The Bachelor of Science (BS) in Meteorology emphasizes weather and weather forecasting.

The Department of Atmospheric Sciences offers the BS in Meteorology. The undergraduate curriculum in meteorology emphasizes weather and weather forecasting, but also includes courses in climatology, atmospheric chemistry, cloud physics and remote sensing of the atmosphere with radar and satellites. As the curriculum makes clear, the study of these subjects relies on a foundation of physics, chemistry and mathematics. Meteorology also has connections to oceanography and other geosciences disciplines, which may be taken as elective courses.

Students who receive BS degrees in Meteorology often obtain employment with the National Weather Service, private meteorological consulting and weather forecasting companies, air quality consulting firms, airlines, TV stations, energy trading companies, universities, state governments, agricultural firms and computer-related industries. Some students choose to enter the military services as weather officers. Positions in teaching and research normally require a graduate degree.

Students interested in cooperative educational arrangements and internships should contact the department's academic advisor for information.

In the curriculum presented, students are advised to note the prerequisites for the courses in ATMO, which often depend on courses in mathematics, physics or chemistry.

Program Requirements

First Year

Fall		Semester
		Credit Hours
ATMO 201	Weather and Climate ¹	3

¹ A grade of C or better is required.

² General electives may not include ENGL 103; KINE 198-199 (p. 1109); MATH 102, MATH 141-142 (p. 1135), MATH 150-152 (p. 1135), MATH 171-172 (p. 1135), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 1205), PHYS 218-219 (p. 1205); AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237).

³ MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.

⁴ All students enter as Lower Level Meteorology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meteorology (METR), and they will be eligible to take upper-level electives. This change should occur following the fall semester of the junior year.

⁵ Select in consultation with faculty academic advisor. Select from ATMO 300-499 (p. 940) (except ATMO 321); BESC 403; BIOL 111; CHEM 227, CHEM 237; ECCB 308, ECCB 309; ENSS 400-499 (<https://catalog.tamu.edu/undergraduate/course-descriptions/enss/>); GEOG 400-499 (p. 1055); MATH 311, MATH 400-499 (p. 1135); OCNG 400-499 (p. 1182); SCSC 301. Up to 3 hours may be ATMO 484 (Broadcast Internship) and up to 6 hours may be ATMO 484 (NWS Internship). Only 6 hours of 484, 485, and 491 courses may apply towards this requirement.

Meteorology - 5-Year Bachelor of Science and Master of Ocean Science and Technology

This combination program offers motivated and exceptional students the opportunity to complete both the Bachelor of Science degree in the Department of Atmospheric Sciences Meteorology Program and the Master of Ocean Science and Technology degree in 5 years.

The concurrent degree program will enable these motivated students to coordinate the required BS coursework and Master of Ocean Science and

Technology coursework to complete the required credit hours for each degree without diminishing scope or quality of work and within 5 years.

Application and Eligibility

- Applications to the combined program will be submitted by June 15 after the completion of the student's junior year. Applications submitted after that time will be evaluated on a case by case basis. GRE scores are not required for admission to the program
- Applicants must have a minimum undergraduate GPA of 3.25. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor's and Master's degrees. Students will graduate at the completion of the 5th year in the combined program coursework (150 credit hours) with both Bachelor's and Master's degrees.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 90 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the combined program will complete the 120-hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

¹ A grade of C or better is required.

² Select in consultation with faculty academic advisor. Select from ATMO 300-499 (p. 940) (except ATMO 321); ENSS 400-499 (<https://catalog.tamu.edu/undergraduate/course-descriptions/enss/>); GEOG 400-499 (p. 1055); MATH 311, MATH 400-499 (p. 1135); OCNG 400-499 (p. 1182). Up to 3 hours may be ATMO 484-Broadcast Internship and up to 6 hours may be ATMO 484-NWS Internship. SCSC 301; BESC 403; BIOL 111; CHEM 227, CHEM 237; ECCB 308, ECCB 309. Only 6 hours of 484, 485, and 491 courses may apply towards this requirement.

³ If students use nine credits of allowed OCNG courses (e.g. OCNG 251, OCNG 252, OCNG 350, OCNG 451, OCNG 485) as technical electives and general electives, they will receive an OCNG minor with their BS in METR degree.

⁴ Students will not be permitted to receive credit for both undergraduate-level and graduate-level versions of stacked courses because the content and learning outcomes are too similar (e.g. OCNG 404/OCNG 604; OCNG 456/OCNG 656)."

⁵ General electives may not include ENGL 103; KINE 198-199 (p. 1109); MATH 102, MATH 131, MATH 141-142 (p. 1135), MATH 150-152 (p. 1135), MATH 171-172 (p. 1135), MATH 221, MATH 251, MATH 253; PHYS 101, PHYS 201-202 (p. 1205), PHYS 208, PHYS 218-219 (p. 1205); AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499. (p. 1237)

⁶ MLSC, NVSC and AERS courses can be used as general electives if a minor is completed in Military Science. See an academic advisor for more information.

⁷ All students enter as Lower Level Meteorology (METL) until completion of ATMO 335 and ATMO 336 and the associated prerequisite courses. Once students have completed these courses, their major will be changed to Upper Level Meteorology (METR), and they will be eligible to take upper-level electives. This change should occur following Fall of the junior year.

⁸ Two graduate courses will be taken for dual undergraduate/graduate credit and will contribute to the technical electives.

The program includes a total of 156 hours with 6 hours being applied toward both the Bachelor of Science in Meteorology and the Master of Ocean Science and Technology.

Climate Change - Minor

The minor in Climate Change aims to provide an overview of how the climate system works from an earth systems sciences perspective and how humans and the environment interact within it.

Climate change is one of the most pressing issues of our time. It will impact every aspect of our lives, and unless our economies take aggressive action to reduce emissions, today's students will live through climate change unprecedented in modern human history. The minor in Climate Change draws on multiple courses exploring the science of climate change as well as the multitude of impacts ranging from farming and food production, water availability, ocean acidification to the potential of sustainable energy to replace fossil fuels, as well as the policy decisions governments are making. Students learn about climate change and how to understand and forecast its potential impacts from varied disciplinary and interdisciplinary perspectives, while getting a firm grounding in the basic physical, ecological and social sciences.

Program Requirements

Code	Title	Semester Credit Hours
ATMO 210	Climate Change	3
ATMO 444	The Science and Politics of Global Climate Change	3
Select the remaining courses from the following: ¹		9
ATMO 201	Weather and Climate	
or ENSS	or Introduction to Environmental Systems Science	
ATMO 324	Physical and Regional Climatology	
GEOG 309	Geography of Energy	
GEOG 324	Global Climatic Regions	
GEOG 409	Geographies of Decarbonization	
GEOG 410/	Global Change	
OCNG 412		
GEOG 442/	Past Climates	
GEOL 442		
OCNG 413	Polar Regions of the Earth: Science, Society and Discovery	
Total Semester Credit Hours		15

¹ At least 3 hours of elective coursework must be selected from 400-level courses.

ENGS majors may not select this minor.

Meteorology - Minor

The minor in Meteorology begins with a broad survey of the atmospheric sciences and associated weather analysis.

It is then followed by a more detailed introduction to at least one subdiscipline of the atmospheric sciences, such as atmospheric chemistry, dynamics, computer applications, or severe weather. The minor also introduces students to related Earth systems topics, such as oceanography, Earth-surface processes, or atmosphere-biosphere interactions. Students interested in pursuing the minor are encouraged

to meet with the department’s academic advisor to identify appropriate courses.

Program Requirements

Code	Title	Semester Credit Hours
300-level requirement		
ATMO 300-399	(p. 940)	6
400-level requirement		
Select from the following:		3
ATMO 400-499	(p. 940)	
ENSS 400-499	(https://catalog.tamu.edu/undergraduate/course-descriptions/enss/)

ENSS 400-499	(https://catalog.tamu.edu/undergraduate/course-descriptions/enss/)	
Total Semester Credit Hours		16

Must maintain a minimum GPA of 2.000 in order to pursue this minor.

At least 9 hours of ATMO courses are required and a minimum of 3 hours at the 400 level.

Department of Biology

No one really knows what the world will be like 50 years from now, but it is certain that biologists will be at the forefront of science attempting to find solutions to many of the world’s problems and to find answers to intriguing questions about animals, plants and microbes at the molecular, cellular, organismal and ecosystem levels. Biologists will be concerned with pollution of the environment, cause and cure of disease, population control, recurring food shortages, preservation of species and many other aspects resulting from the impact of technological changes on life forms. Those who are astounded by the array of living things on the earth and who seek challenging, creative work should consider a career in biology or in a biology-related field. The Department of Biology offers six distinct four-year curricula which lead to the baccalaureate degree. These are the Bachelor of Arts in Biology, Bachelor of Science in Biology, Bachelor of Science in Molecular and Cell Biology, Bachelor of Science in Microbiology, Bachelor of Science in Neuroscience (Molecular and Cellular Neuroscience Track), and Bachelor of Science in Zoology. The curricula are designed to maximize postbaccalaureate opportunities in:

- 1. professional schools of medicine, veterinary medicine and dentistry;
- 2. allied health schools of physical and occupational therapy, physician assistant programs, optometry, pharmacy, and nursing;
- 3. graduate education leading to teaching and research careers in universities, in industry or in state or national agencies;
- 4. teaching at junior high or high school levels and
- 5. jobs in biotechnology, research laboratories, pharmaceutical companies and field biology.

The Department of Biology degree plans will enable students to complete all entrance requirements for graduate and professional schools as well as medical technology, pharmacy, optometry, nursing, physical therapy, and other paramedical and health support fields.

Advising

Because some careers in biology require advanced and/or specialized training, it is essential to take advantage of advising opportunities. In the Department of Biology, there are professional advisors in the Biology Undergraduate Programs Office. The advisor may be consulted prior to each registration period and as the student needs. Questions regarding registration, degree checks, transfer of courses, advanced placements and other academic matters are handled in the Office of Undergraduate Programs. Students with special interests in graduate study should consult the graduate advisor. Information concerning entrance to professional schools of medicine, dentistry and other health related fields is available from the Office of Professional School Advising.

Requirements for all Baccalaureate Degrees in the Department of Biology

Each student seeking a baccalaureate degree in the Department of Biology is required to master a common body of knowledge in science. In addition, the student must take courses essential to a liberal education. Students will note that the first two years of all curricula offered by the Department of Biology are similar. Electives must include a 3 hour international and cultural diversity elective and a 3 hour cultural discourse elective required for graduation. Students must also take at least two writing-intensive courses in biology. Other requirements for graduation are listed in the Texas A&M University Student Rules and this catalog.

Students in the Department of Biology must make a grade of C or better in BIOL 111 and BIOL 112. Additionally, students may have only one D in courses within the major used to satisfy required or directed electives for a given degree plan. It is required that the freshman and sophomore level biology, chemistry and math courses be completed before the start of the 5th full semester and before enrollment in any junior or senior level science.

Common Body of Knowledge

To assure that students have sufficient prerequisite training for advanced courses, Biology majors must complete a series of courses comprising a Common Body of Knowledge (CBK) prior to their junior year (5th full semester) and enrollment in upper level BIOL courses. A Biology student will be admitted into upper level Biology classes when he or she has met the following criteria:

Completion of a set of CBK courses (37-38 hours) before the student’s 5th full semester to include:

Code	Title	Semester Credit Hours
BIOL 111	Introductory Biology I	4
BIOL 112	Introductory Biology II	4
BIOL 213	Molecular Cell Biology	3
BIOL 214	Genes, Ecology and Evolution	3

STAT 201 Elementary Statistical Inference

Total Semester Credit Hours 37-38

A student must be in good academic standing with an overall grade point average of a 2.0 or better overall and in the major.

Process

Students will be audited by the department to monitor progress of the CBK. Students failing to complete the CBK within the first four full semesters (two full semesters for Transfer Students) at Texas A&M University may be blocked and forced to change majors or be required to meet with an academic advisor to see if they can be successful in the major. Students registering for upper-level Biology classes without completing the CBK, or without approval of the Undergraduate Advising Office, will be dropped from the roster.

Transfer Students

1. Transfer from within Texas A&M University: The Biology Department will accept changes of major from other departments at Texas A&M upon completion of AT LEAST one semester of an applicable BIOL course taken at Texas A&M and AT LEAST one semester of an applicable CHEM course taken at Texas A&M, with a minimum 2.5 grade point average overall for courses taken at Texas A&M, a 2.5 or better grade point average in BIOL courses taken at Texas A&M, and a 2.5 or better grade point average in CHEM courses taken at Texas A&M. Students still must complete the CBK before being admitted to upper level BIOL courses.
2. Transfer students from other institutions to Biology must have completed the following:
 - a. A minimum of 24 accredited college hours including prescribed coursework
 - b. Prescribed coursework:
 - i. Eight hours of General Biology (TAMU BIOL 111 and BIOL 112 or Texas Common Course Numbers BIOL 1406 and 1407) with B's or better in each course, and
 - ii. Eight hours of General Chemistry (TAMU CHEM 119 and CHEM 120 or Texas Common Course Numbers CHEM 1411 and CHEM 1412) with B's or better in each course, and
 - iii. Four hours of Calculus (TAMU MATH 147 or MATH 151 or MATH 171 and four hours of Calculus II (TAMU MATH 148 or MATH 152 or MATH 172 or three hours of Statistics STAT 201 or Texas Common Courses Numbers MATH 2413 and MATH 2414 or MATH1342) with C's or better
 - c. A minimum cumulative grade point average of a 3.0

- d. A minimum Biology and Chemistry grade point average of a 3.0 in each
- e. Please refer to admissions.tamu.edu (http://admissions.tamu.edu/transfer/apply/?_ga=2.156153723.1190088441.1615999771-1217340481.1615999771)

Biology Honors Program

The Biology Department Honors Program is open to highly talented and motivated students pursuing a major in any of our degree plans. Honors students will be part of a vibrant community within the department with enriched learning experiences in both the classroom and biology research laboratories.

Honors Requirements: Students wishing to graduate with honors distinctions in either Biology (BIOL), Microbiology (MBIO), Zoology (ZOO), or Molecular and Cellular Biology (BMCB) must earn 21 credits in Honors courses and meet the following minimum honors requirements in addition to those listed in the degree plan:

- 4 credits BIOL 111H or BIOL 112H*
- 3 credits BIOL 213H or BIOL 214H
- 3 credits at 300/400 BIOL honors or honors contract; any 600 BIOL; not to include BIOL 485H, BIOL 491H, or BIOL 495H
- 6 credits BIOL 491H
- 2 credits BIOL 495H
- 3 credits any honors course outside the College of Arts and Sciences

* This requirement may be waived with a score of 5 on the Biology AP exam, a score of 6 on the IB exam, or by taking an additional honors biology course at the 300 or 400 level.

Grade requirements at time of graduation:

- cumulative Texas A&M University GPA of 3.5 or higher
- cumulative honors GPA of 3.25 or higher
- no grade lower than a B in courses counting toward honors. If a student earns less than a B in an honors course, they will still receive University credit. However, they will need to take a different course to fulfill the honors requirement.
- no F*, given in cases of academic dishonesty, on the transcript

Honors recognition: All honors courses will be denoted as honors on students' official transcripts. Furthermore, students completing the honors program will have the departmental Biology honors distinction as well as any earned university or college distinction noted on the official transcript.

Admission to the Honors Program in Biology

Incoming Freshmen: Incoming freshmen applicants should indicate their interest in the departmental honors program through the ApplyTexas site and by choosing the "Apply to any Honors Program" after August 1. Qualified applicants will be contacted by the department with further information on joining Biology Honors. Current qualifications for freshman admission are detailed on the Biology Honors website (<https://artsci.tamu.edu/biology/academics/undergraduate/honors-program/>).

Students who have already completed their application and now wish to apply to the Biology Honors program can use the "Apply to any Honors Program" link at the Texas A&M Honors program site (<http://honorsprograms.tamu.edu/Home/>) or contact biohonors@bio.tamu.edu.

Current or transfer students: Current or transfer students with a cumulative GPA of 3.5 or better can apply for admission to the Biology Honors Program by writing a short (less than 300 word) email to the department's Honors Director. When applying students should keep in mind that they will need to fulfill all honors requirements. Please send email to: biohonors@bio.tamu.edu.

Remaining in the program

In order to remain in the Biology Honors program, students must maintain a cumulative GPA at Texas A&M of 3.5 and honors GPA of 3.25. Students falling below these standards will be placed on probation for the next semester. Students unable to meet these standards for a second semester may be dismissed from the Biology Honors Program.

Please direct any questions to biohonors@bio.tamu.edu or the Biology Undergraduate Advising office.

Course Recommendations

The following suggestions are to assist the student in course selections to support their career choice.

Human Biology

These are recommended courses for students interested in pursuing professional schools including medical, dental and allied health programs (e.g., nursing, occupational therapy, optometry, pharmacy, physical therapy and physician assistant). The focus of the science courses on human biology will better prepare these students for their chosen fields. Suggested courses include:

Code	Title	Semester Credit Hours
Social and Behavioral Science		
PBSI 107	Introduction to Psychology	3
	or SOCI 205 or Introduction to Sociology	
Biology Electives		
BIOL 319	Integrated Human Anatomy and Physiology I	4
BIOL 320	Integrated Human Anatomy and Physiology II	4
BIOL 351	Fundamentals of Microbiology	4
BIOL 388	Principles of Animal Physiology	4
BIOL 445	Biology of Viruses	3
BIOL 454	Immunology	3
BIOL 456	Medical Microbiology	3
Free Electives		
HLTH 335	Human Diseases	3
HLTH 354/ PHLT 354	Medical Terminology for the Health Professions	3
PBSI 107	Introduction to Psychology	3
	or SOCI 205 or Introduction to Sociology	
URPN 370	Health Systems Planning	3
International and Cultural Diversity		
HLTH 236	Introduction to Health Disparities and Diversity	3
HLTH 334	Women's Health	3
Total Semester Credit Hours		46

Students should consult their academic advisor about the courses that best fit their career interests.

Education

This is for students wishing to acquire state certification to teach at the secondary level upon graduation. Students should seek advice from the advisors within their department and from the School of Education and Human Development, as well as from the advisor in charge of their teaching option. The intention is to make the best possible use of social science, humanity, free and directed electives in the Bachelor of Arts in Biology, thereby condensing as many of the certification requirements as possible into the degree plan and allowing the student to obtain a minor in Secondary Education (SEED). Courses should include:

Code	Title	Semester Credit Hours
Social and Behavioral Science		
INST 210	Understanding Special Populations	3
INST 222	Foundations of Education in a Multicultural Society	3
Biology Electives		
	Upper-level BIOL courses, including two writing intensive courses (p. 951)	14
Free Electives		
RDNG 372	Reading and Writing across the Middle Grades Curriculum	3
	or RDNG 465 or Reading in the Middle and Secondary Grades	
TEFB 322	Teaching and Schooling in Modern Society	3
TEFB 324	Teaching Skills II	3
TEFB 406	Science in the Middle and Secondary School	3
	Student teaching	
Total Semester Credit Hours		32

Marine Biology

These are recommended courses for students desiring a more rigorous and in-depth foundation in biological courses that apply to marine environments and ecosystems. This suggested plan is ideal for students who intend to pursue graduate studies in marine biology or serve as field biologists at national seashores or sanctuaries. Suggested courses include:

Code	Title	Semester Credit Hours
Biology Electives		
BIOL 335	Invertebrate Zoology	4
BIOL 440	Marine Biology	4
	Related ZOOL research or field experience (p. 1271)	3
Free Electives		
ECCB 311	Ichthyology	3
OCNG 251	The Blue Planet - Our Oceans	3
WFSC 425	Marine Fisheries	3
Total Semester Credit Hours		20

Students should consult their academic advisor about the courses that best fit their career interests.

Ecology/Environmental Biology

This is for students who are interested in environmental consulting, environmental protection and ecosystem evaluation. This suggested plan can be adapted to focus on particular areas or populations within an ecosystem. Suggested courses include:

Code	Title	Semester Credit Hours
Communication		
ENGL 210	Technical and Professional Writing	3
Biology Electives		
Select one of the following:		3-4
BIOL 335	Invertebrate Zoology	
BIOL 357	Ecology	
BIOL 440	Marine Biology	
BIOL 467	Integrative Animal Behavior	
ECCB 462	Amazon River Tropical Biology	
Free Electives		
CHEM 315 & CHEM 318	Fundamentals of Quantitative Analysis and Quantitative Analysis Laboratory	4
ENTO 201	General Entomology	3
Select one of the following:		3-4
ECCB 311	Ichthyology	
ECCB 401	General Mammalogy	
ECCB 402	General Ornithology	
PLPA 301 & PLPA 303	Plant Pathology and Plant Pathology Laboratory	
Total Semester Credit Hours		17-18

Students should consult their academic advisor about the courses that best fit their career interests.

Liberal Education Requirements of the University, College or State

Code	Title	Semester Credit Hours
	American history (p. 30)	6
	Communication (p. 27)	6
	Language, philosophy and culture (p. 28)	3
	Government/Political science (p. 31)	6
	Social and behavioral sciences (p. 31)	3
	Creative arts (p. 30)	3
	International and cultural diversity (p. 49)	0-3
	Cultural Discourse (p. 48)	0-3
Total Semester Credit Hours		27-33

Faculty

Aramayo, Rodolfo, Associate Professor
Biology
PHD, University of Georgia, 1992

Bard, Jared Abraham, Assistant Professor
Biology
PHD, University of California, Berkeley, 2018

Basu, Samarpita, Instructional Assistant Professor
Biology
PHD, Indian Institute of Technology Guwahati, Assam, India, 2016

Bell-Pedersen, Deborah, Professor
Biology
PHD, State University of New York at Albany, 1991

Benedik, Michael J, Professor
Biology
PHD, Stanford University, 1982

Blackmon, Heath L, Associate Professor
Biology
PHD, University of Texas at Arlington, 2015

Butler, Chris, Instructional Associate Professor
Biology
PHD, Oxford University, 2004

Chakraborty, Mahul, Assistant Professor
Biology
PHD, University of Rochester, 2014

Cohn, William B, Instructional Associate Professor
Biology
PHD, Texas A&M University, 2000

Criscione, Charles D, Professor
Biology
PHD, Oregon State University, 2005

Dulin, Jennifer N, Associate Professor
Biology
PHD, University of Texas Health Science Center, 2012

Erickson, James W, Associate Professor
Biology
PHD, University of Wisconsin, Madison, 1989

Farhy, Isabella, Assistant Professor
Biology
PHD, Tel Aviv University, 2013

Fitzpatrick, Courtney, Assistant Professor
Biology
PHD, Duke University, 2012

Fletcher, Samantha A, Instructional Associate Professor
Biology
PHD, Texas A&M University, 2019

Garcia, Luis R, Professor
Biology
PHD, University of Texas, 1996

Ghose, Debarati, Instructional Assistant Professor
Biology
PHD, Northern Illinois University, 2018

Gomer, Richard H, Professor
Biology
PHD, California Institute of Technology, 1983

Griffing, Lawrence R, Associate Professor
Biology
PHD, Stanford University, 1981

Hardin, Paul E, Distinguished Professor
Biology
PHD, Indiana University, 1987

Hawkins, Angela K, Instructional Associate Professor
Biology
PHD, Texas A&M University, 2018

Herman, Benjamin, Professor
Biology
PHD, Iowa State University, 2010

Hooshyar, Mohsen, Lecturer
Biology
PHD, Carleton University, Canada, 2015

Janes, Donna M, Instructional Associate Professor
Biology
PHD, University of Illinois, 2004

Jones, Jeff, Assistant Professor
Biology
PHD, Vanderbilt University, 2015

Karpac, Jason S, Associate Professor
Biology
PHD, The University of Oklahoma Health Sciences Center, 2007

Keene, Alex Carl, Professor
Biology
PHD, University of Massachusetts, 2006

Koch, Matthias Daniel, Assistant Professor
Biology
PHD, University of Freiburg, Germany, 2015

Kuhn, Deborah, Instructional Assistant Professor
Biology
PHD, The University of South Florida, 2004

Leboeuf, Brigitte L, Instructional Associate Professor
Biology
PHD, Texas A&M University, 2009

Lee, Christopher P, Instructional Associate Professor
Biology
PHD, Texas A&M University, 2014

Li, Wanhe, Assistant Professor
Biology
PHD, Stony Brook University, 2011

Lillvis, Joshua, Assistant Professor
Biology
PHD, Georgia State University, 2012

Biology
PHD, University of Chicago, 2006

St. Clair, Allison, Senior Lecturer
Biology
PHD, Texas A&M University, 2017

Strader, Marie, Assistant Professor
Biology
PHD, The University of Texas at Austin, 2017

Tag, Andrew, Instructional Associate Professor
Biology
PHD, Texas A&M University, 2003

Taylor, Lathrop, Instructional Associate Professor
Biology
PHD, Texas A&M University, 1985

Tewari, Bhanu, Assistant Professor
Biology
PHD, National Institute of Mental Health and Neurosciences, 2014

Versaw, Wayne K, Professor
Biology
PHD, University of Wisconsin, Madison, 1995

Wicksten, Mary K, Professor
Biology
PHD, University of Southern California, 1977

Wright, Rachel N, Instructional Assistant Professor
Biology
PHD, Texas A&M University, 2011

Xie, Runshi, Instructional Assistant Professor
Biology
PHD, Texas A&M University, 2022

Zarin, Aref, Assistant Professor
Biology
PHD, The University of Dublin, 2013

Zoran, Mark J, Professor
Biology
PHD, Iowa State University, 1987

Majors

- Bachelor of Arts in Biology (p. 298)
- Bachelor of Science in Biology (p. 299)
- Bachelor of Science in Microbiology (p. 301)
- Bachelor of Science in Molecular and Cell Biology (p. 302)
- Bachelor of Science in Neuroscience, Molecular and Cellular Neuroscience (p. 304)
- Bachelor of Science in Zoology (p. 305)

Minors

- Bioinformatics Minor (p. 306)
- Biology Minor (p. 307)
- Neuroscience Minor (p. 307)
- Pre-Medicine Minor (p. 308)

Courses

- Biology (BIOL) (p. 293)
- Botany (BOTN) (p. 297)
- Microbiology (MICR) (p. 298)
- Zoology (ZOOL) (p. 298)

Biology (BIOL)

BIOL 100 Horizons in Biology

Credits 0-1. 0-1 Lecture Hours. Introduction to the study of biology at Texas A&M University; gain knowledge of departmental and campus resources to assist and enhance the pursuit of a degree in biology, microbiology, molecular and cellular biology or zoology. **Prerequisites:** First-year and first-time-in-college freshman majoring in BIOL, MBIO, BMCB and ZOOL.

BIOL 101 Botany

Credits 4. 3 Lecture Hours. 3 Lab Hours. Structure, physiology and development of plants with an emphasis on seed plants. (Not open to students who have taken BIOL 111 and BIOL 112 or BIOL 113.); includes laboratory that reinforces and provides supplemental information related to the lecture topics.

BIOL 104 Contemporary Issues in Science - Cosmos, Earth and Humanity

Credits 3. 3 Lecture Hours. Science for citizens; interdisciplinary survey of contemporary issues in the science of our universe or cosmos, Earth and humanity, including the big bang, evolution, genetics, vaccines and drugs; future outlook on humanity, including artificial intelligence, cryptography and cybersecurity; critically analyze science presented in the news, on television and on social media; ethical implications of research. **Cross Listing:** ARSC 104 and PHYS 104.

BIOL 107 Zoology

Credits 4. 3 Lecture Hours. 3 Lab Hours. (BIOL 1313 and 1113, 1413) Zoology. Survey of animal life with respect to cell organization, genetics, evolution, diversity of invertebrates/vertebrates, anatomy/physiology, and interaction of animals with their environment; includes laboratory that reinforces and provides supplemental information related to lecture topics. (Not open to students who have taken BIOL 111 and BIOL 112 or BIOL 113).

BIOL 111 Introductory Biology I

Credits 4. 3 Lecture Hours. 3 Lab Hours. (BIOL 1306 and 1106, 1406) Introductory Biology I. First half of an introductory two-semester survey of contemporary biology that covers the chemical basis of life, structure and biology of the cell, molecular biology and genetics; includes laboratory that reinforces and provides supplemental information related to the lecture topics; also taught at Galveston campus.

BIOL 112 Introductory Biology II

Credits 4. 3 Lecture Hours. 3 Lab Hours. (BIOL 1307 and 1107, 1407) Introductory Biology II. The second half of an introductory two-semester survey of contemporary biology that covers evolution, history of life, diversity and form and function of organisms; includes laboratory that reinforces and provides supplemental information related to the lecture topics. **Prerequisite:** BIOL 111; also taught at Galveston campus.

BIOL 113 Essentials in Biology

Credits 3. 3 Lecture Hours. (BIOL 1308, BIOL 1408) Essentials in Biology. One-semester biology for non-majors; overview of essential biological concepts and their application to real world and contemporary issues; topics include evolution, biodiversity, cellular, molecular and forensic biology, genetics and heredity to scientific literacy, human impact on the environment, genetically modified organisms and emerging diseases.

BIOL 206 Introductory Microbiology

Credits 4. 3 Lecture Hours. 4 Lab Hours. (BIOL 2320 and 2120, BIOL 2321 and 2121, BIOL 2420, BIOL 2421) Introductory Microbiology. Basic microbiology of prokaryotes and eukaryotes; main topics include morphology, physiology, genetics, taxonomy, ecology, medically important species and immunology; mandatory laboratory designed to give hands-on experience and to reinforce basic principles. **Prerequisites:** BIOL 101, BIOL 107, BIOL 111, or BIOL 113; CHEM 119. May not be used for credit by biology, molecular and cell biology, microbiology, zoology, pre dentistry or premedicine majors.

BIOL 213 Molecular Cell Biology

Credits 3. 3 Lecture Hours. Exploration of the molecular basis of cell structure, function and evolution; gene regulation, cell division cycle, cancer, immunity, differentiation, multicellularity and photosynthesis. **Prerequisite:** BIOL 112 and CHEM 120.

BIOL 214 Genes, Ecology and Evolution

Credits 3. 3 Lecture Hours. A genetically-based introduction to the study of ecology and evolution; emphasis on the interactions of organisms with each other and with their environment. **Prerequisite:** BIOL 112.

BIOL 285 Directed Studies

Credits 1 to 4. 1 to 4 Other Hours. Problems in various phases of plant, animal and microbial science. **Prerequisites:** Freshman or sophomore classification; approval of ranking professor in field chosen and Undergraduate Advising Office.

BIOL 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of biology. May be repeated for credit. **Prerequisite:** Approval of instructor.

BIOL 291 Research

Credits 0 to 4. 0 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. May be repeated for credit. **Prerequisites:** Freshman or sophomore classification and approval of faculty member.

BIOL 302 Careers in Biology

Credit 1. 1 Lecture Hour. Development of job search skills; utilization of career resources; self-assessment of career interests and career objectives; strategies for professional correspondence and networking; business etiquette and interviewing techniques; insight into life science career opportunities. **Prerequisites:** Junior or senior classification; department of biology majors only; or approval of instructor.

BIOL 318 Chordate Anatomy

Credits 4. 3 Lecture Hours. 3 Lab Hours. Classification, phylogeny, comparative anatomy, and biology of chordates; diversity, protochordates, vertebrate skeletons, shark and cat anatomy studied in laboratory. **Prerequisite:** BIOL 214 or approval of instructor.

BIOL 319 Integrated Human Anatomy and Physiology I

Credits 4. 3 Lecture Hours. 3 Lab Hours. Integrated approach to cellular, neural, skeletal, muscular anatomy and physiology; includes some histology, histopathology, radiology and clinical correlations. **Prerequisite:** BIOL 111 and BIOL 112, or BIOL 107.

BIOL 320 Integrated Human Anatomy and Physiology II

Credits 4. 3 Lecture Hours. 3 Lab Hours. Continuation of BIOL 319. Integrated approach to endocrine, cardiovascular, respiratory, digestive, urinary, reproductive and developmental anatomy and physiology; includes some histology, histopathology, radiology and clinical correlations. **Prerequisite:** BIOL 319 or approval of instructor.

BIOL 335 Invertebrate Zoology

Credits 4. 3 Lecture Hours. 3 Lab Hours. Morphology, taxonomy, natural history and phylogeny of invertebrate animals, with emphasis on biodiversity; class includes both lecture and lab. Labs include study of preserved material and demonstration of living animals in aquaria and terraria. **Prerequisite:** BIOL 214 or approval of instructor.

BIOL 349 Bioinformatics

Credits 3. 3 Lecture Hours. Comprehensive analysis of bioinformatics tools applicable to eukaryotic organisms; theoretical background of computational algorithms, with an emphasis on application of computational tools related to modern molecular biological research.

Prerequisites: BIOL 213; GENE 301, GENE 302, GENE 303, BIMS 320/GENE 320, or GENE 320/BIMS 320 recommended; or approval of instructor.

BIOL 350 Computational Genomics

Credits 3. 2 Lecture Hours. 2 Lab Hours. Hands-on approach to obtaining, organizing and analyzing genome-related data; emphasis on asking and answering biologically relevant questions by designing and performing experiments using computers; understanding biology from a computational perspective. **Prerequisite:** Junior or senior classification in life sciences, engineering, mathematics, chemistry.

BIOL 351 Fundamentals of Microbiology

Credits 4. 3 Lecture Hours. 4 Lab Hours. Introduction to modern microbiology with emphasis on prokaryotes; includes microbial cell structure, function, and physiology; genetics, evolution, and taxonomy; bacteriophage and viruses; pathogenesis and immunity; and ecology and biotechnology; includes laboratory experience with microbial growth and identification. **Prerequisites:** BIOL 112; CHEM 257, or CHEM 227 and CHEM 237, or CHEM 231; or approval of instructor; also taught at Galveston campus.

BIOL 352 Diagnostic Bacteriology

Credits 4. 2 Lecture Hours. 6 Lab Hours. Practical experience in handling, isolation and identification of pathogenic microorganisms using biochemical tests and rapid identification techniques. **Prerequisite:** BIOL 351 or approval of instructor.

BIOL 357 Ecology

Credits 3. 3 Lecture Hours. Analysis of ecosystems at organismal, population, interspecific and community levels. **Prerequisite:** BIOL 214 or approval of instructor.

BIOL 388 Principles of Animal Physiology

Credits 4. 3 Lecture Hours. 3 Lab Hours. Introduction to how animals function, including basics of neurophysiology, endocrinology, muscular, cardiovascular, respiratory, osmoregulatory, and metabolic physiology; broadly comparative in scope and encompassing adaptation of physiological systems to diverse environments; the laboratory stresses techniques used for monitoring and investigating physiological mechanisms and responses to environmental changes. **Prerequisites:** BIOL 214, CHEM 228, or CHEM 258, or approval of instructor.

BIOL 400 Tropical Ecology of Costa Rica

Credits 6. 2 Lecture Hours. 12 Lab Hours. Advanced field-intensive course conducted at multiple biological field stations located throughout Costa Rica; exposure to a wide variety of tropical ecological principles using largely observational and some sampling techniques; experience with amazing diversity of wildlife and habitats from hot, humid low land rainforests to the high elevations of the Talamanca páramo; development of a variety of natural history skills needed to understand the complex interactions of plants and animals in tropical environments; requires detailed journal of ecological principles observed while in Costa Rica to be used as basis for final written report; opportunities to experience the unique and friendly culture of one of Central America's most successful countries and discover how anthropogenic activities affect biodiversity.

Prerequisites: Junior or senior classification; approval of instructor; BIOL 357 preferred.

BIOL 401 Critical Writing in Biology

Credit 1. 1 Lecture Hour. Reading scientific papers and writing short synopses of papers with a focus on learning how to think and write like a scientist; fills the current Writing Intensive "W" course requirement for biology. **Prerequisite:** BIOL 213 or CHEM 228; junior or senior classification.

BIOL 402 Communicating Biological Research to the Public

Credit 1. 1 Lecture Hour. Interpretation of scientific papers; analysis of how research findings are communicated to lay audiences; creation of synopses of research findings for the general public. **Prerequisite:** BIOL 213 or CHEM 228; junior or senior classification.

BIOL 403 Medical Narratives

Credit 1. 1 Lecture Hour. Focus on reading and analyzing brief nonfiction stories about medicine; exploration of different perspectives and experiences with illness and medicine. **Prerequisites:** BIOL 213 or CHEM 228; junior or senior classification or approval of instructor.

BIOL 405 Comparative Endocrinology

Credits 3. 3 Lecture Hours. Basic principles of endocrinology including structure and functions of hormones in vertebrates; hormonal control of growth, metabolism, osmoregulation, and reproduction; endocrine techniques and mechanism of hormone action. **Prerequisites:** BIOL 214; CHEM 227 or CHEM 257.

BIOL 406/GENE 406 Bacterial Genetics

Credits 3. 3 Lecture Hours. A problem oriented course surveying the manipulation and mechanisms of genetic systems in bacteria; recombination, structure and regulation of bacterial genes, plasmids and phages. **Prerequisites:** BIOL 351; GENE 302. **Cross Listing:** GENE 406/BIOL 406.

BIOL 407 Biological Clocks

Credits 3. 3 Lecture Hours. Examination of the basic mechanisms of biological timing; in depth study of clocks in model organisms and the relationship between clocks and human health and disease. **Prerequisites:** BICH 431/GENE 431, BIOL 213 or GENE 431/BICH 431.

BIOL 411 Synthetic Biology of Microbes

Credits 3. 3 Lecture Hours. Underlying technical basis for synthetic biology; tools used to generate recombinant molecules; genetic circuitry and modules applied to bacteria; design and fabrication of genes, biological components and entire organisms; survey actual and theoretical applications. **Prerequisites:** BIOL 351 or BICH 431/GENE 431.

BIOL 413 Cell Biology

Credits 3. 3 Lecture Hours. Structure, function, and biogenesis of cells and their components; interpretation of dynamic processes of cells, including protein trafficking, motility, signaling and proliferation. **Prerequisites:** BIOL 213, GENE 302, or GENE 303; BICH 410 or BICH 440.

BIOL 414 Developmental Biology

Credits 3. 3 Lecture Hours. Concepts of development in systems ranging from bacteriophage to the mammalian embryo; use of recombinant DNA technology and embryo engineering to unravel the relationships between growth and differentiation, morphogenesis and commitment, aging and cancer. **Prerequisite:** BIOL 213 or GENE 302; BICH 410 or BICH 440.

BIOL 423 Cell Biology Laboratory

Credits 2. 1 Lecture Hour. 3 Lab Hours. Modern methods of study of cell structure and cell function. **Prerequisites:** BICH 410 and BIOL 413, or concurrent enrollment or approval of instructor.

BIOL 428 Cellular Neuroscience

Credits 3. 3 Lecture Hours. Cell biology, molecular biology and biophysics of neurons as it pertains to their fundamental role in the physiological basis of behavior; study of how neurons create, maintain and exploit electrical signals for information coding and transmission; principles of electrical and chemical signaling between neurons, and the role of intracellular signaling for signal modulation and synaptic plasticity; exploration of a broad range of state-of-the-art molecular tools currently used to study the nervous system, and the cellular basis for many of the most common neurological disorders affecting humans as well as the strategies and therapies for their treatment. **Prerequisites:** BIOL 213 and PSYC 235, or approval of instructor. **Cross Listing:** NRSC 428/BIOL 428.

BIOL 430 Biological Imaging

Credits 4. 3 Lecture Hours. 3 Lab Hours. Still and video photography and photomicrography, computerbased digital image analysis and processing of biological images; theory and principles of light and electron microscopy including transmission and scanning electron microscopy; optical contrast methods for light microscopy including phase contrast, DIC, polarizing light and confocal laser scanning microscopy. **Prerequisite:** Junior classification or approval of instructor.

BIOL 434/NRSC 434 Regulatory and Behavioral Neuroscience

Credits 3. 3 Lecture Hours. Cell biology and biophysics of neurons; functional organization of the vertebrate nervous system; physiological basis of behavior. **Prerequisites:** BIOL 213; BIOL 319, BIOL 320, BIOL 388, BIOL 413, or PBSI 235, or approval of instructor. **Cross Listing:** NRSC 434/BIOL 434.

BIOL 435 Laboratory for Regulatory and Behavioral Neuroscience

Credit 1. 3 Lab Hours. Study of modern methods and tools used to investigate nervous system structure and function. **Prerequisite:** BIOL 213; BIOL 319, BIOL 320, BIOL 388, BIOL 413, BIOL 428, BIOL 434/NRSC 434, NRSC 235, NRSC 335, NRSC 428/BIOL 428, NRSC 434/BIOL 434, or PBSI 235, or approval of instructor.

BIOL 438 Bacterial Physiology

Credits 3. 3 Lecture Hours. Structure and function of prokaryotic cells, with emphasis on evolutionary adaptations to different environmental, developmental, and pathogenic selections pressures; formation of teams and preparation of presentations on specific topics in microbiology. **Prerequisites:** BIOL 351; BIOL 406/GENE 406 or concurrent enrollment; BICH 410, BICH 431/GENE 431 and GENE 302 strongly recommended.

BIOL 440 Marine Biology

Credits 4. 3 Lecture Hours. 3 Lab Hours. Introduction to biology of common organisms inhabiting bays, beaches and near-shore oceanic waters with special reference to Gulf of Mexico biota; emphasis on classification, distribution, history, ecology, physiology, mutualism, predation, major community types and economic aspects of marine organisms. **Prerequisite:** BIOL 214 or approval of instructor.

BIOL 443 Early Stages of Animal Evolution

Credits 3. 2 Lecture Hours. 2 Lab Hours. Analysis of the earliest stages of animal evolution by integrating various scientific fields such as genomics, paleontology, metabolism, morphology, environment, development and behavior; includes hands-on exploration of fossils and modern animals to understand how evolution shaped our world. **Prerequisites:** BIOL 214; junior or senior classification.

BIOL 444/NRSC 444 Neural Development

Credits 3. 3 Lecture Hours. Cellular and molecular mechanisms of nervous system development including neural induction and the basis of complex behaviors; use of a wide range of model organisms with a specific emphasis on vertebrate nervous system development. **Prerequisites:** BIOL 213, BIOL 319, BIOL 320, BIOL 413, BIOL 388, or PBSI 235. **Cross Listing:** NRSC 444/BIOL 444.

BIOL 445 Biology of Viruses

Credits 3. 3 Lecture Hours. Structure, composition and life cycles of viruses; methods used to study viruses; their interaction with host cells; mechanisms of pathogenicity and cellular transformation; responses of the host to viral infection, and vaccine applications; in-depth study of the life cycles of the major classes of viruses and discussion of emerging viruses. **Prerequisite:** BIOL 213 or BIOL 351 or approval of instructor.

BIOL 450/BICH 450 Genomics

Credits 4. 3 Lecture Hours. 3 Lab Hours. The study of genomic data includes consideration of the logic behind the most important genomic approaches, as well as their capabilities and limitations in investigating biological processes; the science of accessing and manipulating genomic data; and practical applications, including development of an hypotheses-driven datamining experiment. **Prerequisites:** BIOL 213, GENE 301 or GENE 302, BICH 431/GENE 431 or GENE 431/BICH 431, or BIOL 351; junior or senior classification or approval of instructor. **Cross Listing:** BICH 450/BIOL 450.

BIOL 454 Immunology

Credits 3. 3 Lecture Hours. Introduction to basic immunological concepts and principles of serology. **Prerequisite:** BIOL 351 or equivalent or approval of instructor.

BIOL 455 Laboratory in Immunology

Credits 2. 6 Lab Hours. Practical application of serological principles which include precipitation, agglutination and blood banking principles; techniques in tissue culture and hybridoma technology also included. **Prerequisite:** BIOL 454 or registration therein.

BIOL 456 Medical Microbiology

Credits 3. 3 Lecture Hours. Microbiology, epidemiology and pathology of human pathogens with an emphasis on bacterial agents. **Prerequisite:** BIOL 351 or approval of instructor.

BIOL 461 Antimicrobial Agents

Credit 1. 1 Lecture Hour. Understanding of antimicrobial agents, limitations of use, biosynthesis and regulation, and challenges in development as new therapeutics. **Prerequisites:** BICH 410 or BICH 440 and BIOL 351 or VTPB 405.

BIOL 466 Principles of Evolution

Credits 3. 3 Lecture Hours. Evolutionary patterns, mechanisms and processes at the organismal, chromosomal and molecular levels; modes of adaptation and the behavior of genes in populations. **Prerequisite:** GENE 302 or approval of instructor.

BIOL 467 Integrative Animal Behavior

Credits 3. 3 Lecture Hours. Examines how behavior contributes to survival and reproduction, and how evolutionary history and ecological circumstance interact to shape the expression of behavior; focus on integrative nature of behavior; how the interaction of evolutionary processes, mechanistic constraints, and ecological demands determine behavioral strategies. **Prerequisite:** BIOL 214, BIOL 357, BIOL 388, BIOL 405, BIOL 434/NRSC 434, or BIOL 466, or approval of instructor.

BIOL 480 Departmental Colloquium

Credit 1. 1 Lecture Hour. Attend presentations given by renowned scientists from various fields of biology; learn about new developments in science; stay abreast of current and trending research topics. **Prerequisites:** Senior classification; majors in BIOL, MICRO, BMB and ZOO.

BIOL 481 Seminar in Biology

Credit 1. 1 Lecture Hour. Recent advances. **Prerequisite:** Senior undergraduate majors in biology, microbiology, botany or zoology.

BIOL 484 Internship

Credits 0 to 4. 0-1 Other Hours. Directed internship in a private firm or public agency to provide research experience appropriate to the student's degree program and career objectives. May be taken two times. **Prerequisite:** Approval of internship agency and advising office.

BIOL 485 Directed Studies

Credits 1 to 12. 1 to 12 Other Hours. Problems in various phases of plant, animal and bacteriological science. **Prerequisites:** Junior classification; approval of ranking professor in field chosen and Undergraduate Advising Office.

BIOL 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 10 Lab Hours. Selected topics in an identified area of biology. May be repeated once for credit.

BIOL 491 Research

Credits 0 to 4. 0 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. May be taken two times. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded. **Prerequisite:** Approval of departmental faculty member.

BIOL 492 Biomedical Therapeutics Development

Credit 1. 1 Lecture Hour. Basic aspects of the biotechnology business; includes key aspects of biotechnology patents, the main steps in preclinical drug development and company structure and funding. **Prerequisites:** BIOL 213 or equivalent; CHEM 227 and CHEM 228.

BIOL 495 Biology Capstone: Research Communication in the Life Sciences

Credits 2. 2 Lecture Hours. Culmination of capstone research experience; formalization of research results in written and oral forms; introduction to primary genres or scientific writing; apply principles of rhetoric and composition to diverse methods of professional communication. **Prerequisite:** BIOL 452, BICH 464/GENE 464, BIOL 400, BIOL 493 or BIOL 491 or approval of instructor.

BIOL 496 Ethics in Biological Research

Credit 1. 1 Lecture Hour. Fraud in science, how to recognize it, and how to avoid committing fraud; includes the basis of ethics and plagiarism, negotiation techniques and conflict management, the regulations and ethics covering animal and human experiments, record-keeping, data management and peer review. **Prerequisite:** BIOL 491, NRSC 491, BICH 491, GENE 491, BIMS 491, CHEM 491, BIOL 351, or BICH 410, or approval of instructor.

Botany (BOTN)

BOTN 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of botany. May be repeated for credit. **Prerequisite:** Approval of instructor.

BOTN 291 Research

Credits 1 to 4. 1 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

BOTN 485 Directed Studies

Credits 3. 3 Lecture Hours. Problems in various phases of plant, animal and bacteriological science. **Prerequisites:** Junior classification; approval of ranking professor in field chosen and Undergraduate Advising Office.

BOTN 491 Research

Credits 1 to 4. 1 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. **Prerequisites:** Junior or senior classification and approval of instructor.

Microbiology (MICR)

MICR 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of microbiology. May be repeated for credit. **Prerequisite:** Approval of instructor.

MICR 291 Research

Credits 1 to 4. 1 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

MICR 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of microbiology. May be repeated once for credit.

MICR 491 Research

Credits 1 to 4. 1 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. **Prerequisites:** Junior or senior classification and approval of instructor.

Zoology (ZOOL)

ZOOL 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of zoology. May be repeated for credit. **Prerequisite:** Approval of instructor.

ZOOL 291 Research

Credits 1 to 4. 1 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

ZOOL 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of zoology. May be repeated once for credit.

ZOOL 491 Research

Credits 1 to 4. 1 to 4 Other Hours. Active research of basic nature under the supervision of a Department of Biology faculty member. **Prerequisites:** Junior or senior classification and approval of instructor.

Biology - BA

The Bachelor of Arts (BA) in Biology, through the availability of a large number of electives, gives students maximum flexibility in earning a biology degree.

The BA has a minor requirement that includes advanced courses in a discipline other than biology and provides students with the opportunity to include significant coursework in areas such as foreign language, business, education, or social sciences. The BA program is recommended for students with broad educational objectives or who intend to pursue further education in areas such as allied health professions, professional schools, or teaching certification.

Program Requirements

First Year		Semester
Fall		Credit Hours
BIOL 111	Introductory Biology I ^{1,2}	4
CHEM 119	Fundamentals of Chemistry I ²	4
Select one of the following: ^{2,3}		4
MATH 147	Calculus I for Biological Sciences	
MATH 151	Engineering Mathematics I	
MATH 171	Calculus I	
Communication (p. 27)		3
Semester Credit Hours		15
Spring		
BIOL 112	Introductory Biology II ^{1,2}	4
CHEM 120	Fundamentals of Chemistry II ²	4
Select one of the following: ²		3-4
MATH 148	Calculus II for Biological Sciences	
MATH 152	Engineering Mathematics II	
MATH 172	Calculus II	
STAT 201	Elementary Statistical Inference	
Communication (p. 27)		3
Semester Credit Hours		14
Second Year		
Fall		
BIOL 213	Molecular Cell Biology ²	3
PHYS 201	College Physics	4
Select one of the following: ²		4
CHEM 257	Organic Chemistry I - Structure and Function	
CHEM 227 & CHEM 237	Organic Chemistry I and Organic Chemistry Laboratory	
American history (p. 30) ^{4,5}		3
Semester Credit Hours		14
Spring		
BIOL 214	Genes, Ecology and Evolution ²	3
PHYS 202	College Physics	4
Select one of the following: ²		4
CHEM 258	Organic Chemistry II - Reactivity and Applications	
CHEM 228 & CHEM 238	Organic Chemistry II and Organic Chemistry Laboratory	
American history (p. 30) ^{4,5}		3
Semester Credit Hours		14
Total Semester Credit Hours		57

¹ Grade of C or better required.
² Must be completed by start of 5th full semester.
³ Students may not use MATH 142 to satisfy this requirement.
⁴ Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 6 hours of American history courses (3 hours may be in Texas history).

⁵ Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

The following are CBK courses and must be completed prior to the start of 5th full semester: BIOL 111, BIOL 112, BIOL 213, BIOL 214, CHEM 119, CHEM 120, CHEM 257 (orCHEM 227 & CHEM 237), CHEM 258 (orCHEM 228 & CHEM 238), MATH 147, MATH 148 or STAT 201.

Third Year

Fall		Semester Credit Hours
BICH 410 or BICH 440	Comprehensive Biochemistry I or Biochemistry I	3
POLS 206	American National Government ⁵	3

Total Semester Credit Hours		63

⁶ Select from any 100-499 course not used elsewhere. (Except AGLS 101; ASCC 101, ASCC 102, ASCC 289; BIMS 101; BIOL 101, BIOL 107, BIOL 113, BIOL 206; CHEM 106, CHEM 116; MATH 102, MATH 142.) Only one KINE 199 may be used as a general elective.

⁷ Two courses in the major must be designated as writing intensive. A maximum combination of 7 hours of BIOL484/485/491 may be applied.

Total Program Hours 120 Biology - BS

The Bachelor of Science in Biology is designed for students to obtain a comprehensive, solid foundation in the major branches of Biology.

The degree provides the opportunity for extensive study across the breadth of biological disciplines, ranging from molecular and cellular biology to ecology and evolution. This degree plan is recommended for students preparing for graduate programs in biological sciences or any professional programs in health and medical sciences such as medical, dental or veterinary schools.

Total Program Hours 120

Microbiology - BS

The Bachelor of Science (BS) in Microbiology is designed to provide a comprehensive education in the biology of microorganisms.

A graduate of this program will have a thorough grounding in the classical areas of microbial physiology and biochemistry, microbial genetics, and developing areas like the molecular biology of microorganisms. The curriculum provides excellent training toward a career in any of the many areas of industrial microbiology and public health services. It is also an ideal preparation for advanced study or professional school in medicine, dentistry and other related fields, especially medical technology and biotechnology.

Molecular and Cell Biology - BS

Students who select Molecular and Cell Biology as their major will receive a strong background in the cellular and molecular aspects of biology with particular emphasis on eukaryotes. The major provides an excellent foundation for a career in biotechnology, genetic engineering, MD/PhD programs or basic biological research.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 111	Introductory Biology I ^{1,2}	4
CHEM 119	Fundamentals of Chemistry I ²	4
Select one of the following: ^{2,3}		4
MATH 147	Calculus I for Biological Sciences	
MATH 151	Engineering Mathematics I	
MATH 171	Calculus I	
Communication (p. 27)		3
Semester Credit Hours		15

Spring

BIOL 112	Introductory Biology II ^{1,2}	4
CHEM 120	Fundamentals of Chemistry II ²	4
Select one of the following: ²		3-4
MATH 148	Calculus II for Biological Sciences	
MATH 152	Engineering Mathematics II	
MATH 172	Calculus II	
STAT 201	Elementary Statistical Inference	
Communication (p. 27)		3
Semester Credit Hours		14

Second Year

Fall		
BIOL 213	Molecular Cell Biology ²	3
PHYS 201	College Physics	4
Select one of the following: ²		4
CHEM 257	Organic Chemistry I - Structure and Function	
CHEM 227	Organic Chemistry I & CHEM 237 and Organic Chemistry Laboratory	
American history (p. 30) ^{4,5}		3
Semester Credit Hours		14

Spring

BIOL 214	Genes, Ecology and Evolution ²	3
PHYS 202	College Physics	4
Select one of the following: ²		4
CHEM 258	Organic Chemistry II - Reactivity and Applications	

CHEM 228 & CHEM 238	Organic Chemistry II and Organic Chemistry Laboratory	
American history (p. 30) ^{4,5}		3
Semester Credit Hours		14
Total Semester Credit Hours		57

¹ Grade of C or better required.

² Must be completed by start of 5th full semester.

³ Students may not use MATH 142 to satisfy this requirement.

⁴ Students seeking teacher certification must take HIST 105 and HIST 106. Other students may choose HIST 105 and HIST 106 or any 6 hours of American history courses (3 hours may be in Texas history).

⁵ Students successfully completing the required four semesters of upper-level ROTC courses may substitute these courses for 3 hours of American history and 3 hours of government/political science.

The following are CBK courses and must be completed prior to the start of 5th full semester: BIOL 111, BIOL 112, BIOL 213, BIOL 214, CHEM 119, CHEM 120, CHEM 257 (orCHEM 227 & CHEM 237), CHEM 258 (orCHEM 228 & CHEM 238), MATH 147, MATH 148 or STAT 201.

Third Year

Fall		Semester Credit Hours
BICH 410 or BICH 440	Comprehensive Biochemistry I or Biochemistry I	3
BIOL 351	Fundamentals of Microbiology	4
GENE 302 & GENE 314	Principles of Genetics and Principles of Genetics Laboratory	4
STAT 312	Statistics for Biology	3

BIOL 456	Medical Microbiology	3

Neuroscience - BS, Molecular and Cellular Neuroscience

The Bachelor of Science (BS) in Neuroscience degree track administered by the Department of Biology focuses on the biological basis of neurological processes at the molecular and cellular level.

Neuroscience is the study of the nervous system and its impact on behavior and cognitive functions. This interdisciplinary field integrates several areas of study, including biology, chemistry, physics, biochemistry, psychology, and medicine. The core courses for this degree include a foundation in the life sciences, and a foundational sequence in neuroscience that will prepare students for more advanced NRSC courses. Students completing the BS in Neuroscience, Molecular and Cellular Neuroscience track, will be well prepared for jobs in medical and biotechnology fields, and they will be competitive for admission to medical or graduate school.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 111	Introductory Biology I ^{1,2}	4

¹ Course must be completed by start of fifth full semester.

² Must earn a grade of C or better.

³ Select any approved course in area from University Core Curriculum (p.) list.

⁴ Select from any 100-499 course not used elsewhere except AGLS 101; ASCC 101; ASCC 102; ASCC 289; BIMS 101; BIOL 101, BIOL 107, BIOL 113, BIOL 206; CHEM 106, CHEM 116; ECCB 101 MATH 102; MATH 142. Only one KINE 199 can be used as a general elective. Three hours must be in the area of International and Cultural Diversity (p. 49), and three hours must be in the area of Cultural Discourse (p. 48). These may be in addition to other University Core Curriculum courses, or, if a course in this category satisfies another area of the Core, it can be used to meet both requirements.

⁵ Select from BIOL 388; BIOL 430, BIOL 444/NRSC 444, BIOL 467; NRSC 300-499 (p. 1167); PBSI 311, PBSI 320, PBSI 332, PBSI 333,

PBSI 336, PBSI 340, PBSI 350, PBSI 360, PBSI 440, VIBS 450. Maximum combination of 7 hours from 485 and 491 may be used.

The following are CBK courses and must be completed prior to the start of 5th full semester: BIOL 111, BIOL 112, BIOL 213; PBSI 235 or VIBS 277; CHEM 119, CHEM 120, CHEM 257 or CHEM 227 and CHEM 237, CHEM 258 or CHEM 228 and CHEM 238; MATH 147, MATH 148 or STAT 201.

Graduation requirements must include two courses in the major with the Writing Intensive (UWRT) attribute. Please see advisor for options.

Zoology - BS

The Bachelor of Science in Zoology degree program is designed to expose students to all aspects of the study of animals.

Following foundation courses on the principles of vertebrate and invertebrate zoology, students may select from a broad range of classes in animal biology, ranging from cellular and developmental biology, physiology, and anatomy to ecology and evolution. Graduates enter into advanced studies in zoology, specialized zoological fields in agriculture and renewable resources, or such professional fields as medicine, veterinary medicine, dentistry and other health-related areas.

Bioinformatics - Minor

The minor in Bioinformatics aims to equip students with foundational skills in computational tools and data analysis, preparing them to lead in the rapidly evolving field of biological sciences.

In the early 21st century we have gained the ability to decipher and manipulate the genetic information of organisms. We have also seen dramatic advances in imaging technologies from the macro to nano scales (Satellites/UAVs, hyper-spectral imaging, GPS, MRI, confocal and two photon microscopy, x-ray crystallography, etc.). Concomitant with, and underlying these advances, has been a revolution in information technology in which we have seen ever accelerating computational processing speeds and ever more massive data sets. These changes are driving a fundamental transformation of the biological sciences. In order to provide our students with the educational foundation they need to not just flourish, but to lead in this dramatically altered environment, we are offering a minor in the area of Bioinformatics to provide effective training at the interface of biological applications and computational tools. While students will be trained using the most advanced tools and applications available, the minor will focus on core concepts and approaches, to provide a durable skill set that can be applied to new tools and applications that will inevitably develop. The core curriculum of the minor will cover the essentials of effective computation, as well as the handling, exploration and utilization of large data sets.

Program Requirements

Code	Title	Semester Credit Hours
Required Courses		
Introduction to Computation		4
CSCE 110 Programming I or CSCE 110r Introduction to Computer Science Concepts and Programming		
Bioinformatic Fundamentals		3

VTPP 438 Analysis of Genomic Signals	
Total Semester Credit Hours	16

Minimum of 16 hours required.

Minimum of 6 hours at the 300- to 400-level.

Must make a grade of C or better in all required Bioinformatics minor courses.

Students must complete at least one course in each of the five categories. If a course in statistics is not already required for a student's major, then STAT 211, STAT 301, STAT 302, or STAT 303 is strongly recommended. Independent research experiences through 491 courses is encouraged.

Biology - Minor

A minor in Biology should represent coursework taken in the discipline beyond courses that might be used to satisfy core curriculum science requirements. Therefore, though BIOL 111 and BIOL 112 are prerequisites to all of the listed courses, they are not considered part of the minor program. Some coursework will require organic chemistry. The coursework listed represents various sub-disciplines within the field of Biology and would give the student an overall knowledge base fitting a minor in Biology. Students majoring in Biomedical Sciences or pursuing any degree from the Department of Biology are not eligible to pursue this minor.

Program Requirements

Students must have a C average in all courses taken for a minor in Biology. BIOL 484, BIOL 491 and BIOL 485 credits will not be allowed to count for the minor, nor used in the Biology GPA calculation.

Code	Title	Semester Credit Hours
BIOL 213	Molecular Cell Biology	3
BIOL 214	Genes, Ecology and Evolution	3

BIOL 351	Fundamentals of Microbiology	4
Select two of the following:		6
BICH 409	Principles of Biochemistry	
BICH 464/ Bacteriophage Genomics		
GENE 464		
BIOL 300-499 (p. 951)		
GENE 302 Principles of Genetics		
& GENE 314and Principles of Genetics		
Laboratory

Total Semester Credit Hours 16

Neuroscience - Minor

A minor in Neuroscience is considered an interdisciplinary minor with course selections in Biology, Psychology, Philosophy and Veterinary Integrative Biosciences. Please be aware that each course selection may have prerequisite requirements that must be met.

To apply for admission to the Minor in Neuroscience, please visit the Texas A&M Institute for Neuroscience (<https://tamin.tamu.edu/>) website. A Neuroscience Minor Approval Form will need to be completed and must be signed by the NRSC academic advisor and then submitted to your major advisor. The minor must be declared before the student has completed 90 hours.

Program Requirements

The coursework listed represents various sub-disciplines within the field of Neuroscience and would give the student an overall knowledge base fitting a minor in Neuroscience. No grade below a C is acceptable to meet minor requirements.

Code	Title	Semester Credit Hours
Select from the following:		15
BIOL 388	Principles of Animal Physiology	
BIOL 435	Laboratory for Regulatory and Behavioral Neuroscience	
NRSC 289	Special Topics in...	
NRSC 401/ Developmental Neurotoxicology		
VIBS 401		
NRSC 407/ Core Ideas in Neuroscience		
VIBS 407		
NRSC 434/ Regulatory and Behavioral		
BIOL 434	Neuroscience	
NRSC 485	Directed Studies	
NRSC 489	Special Topics in...	
NRSC 491	Research	
PBSI 235	Introduction to Behavioral and Cognitive Neuroscience	
PBSI 311	Psychology of Animal Behavior	
PBSI 320	Sensation-Perception	
PBSI 332	Neuroscience of Learning and Memory	
PBSI 333	Biology of Psychological Disorders	
PBSI 340	Psychology of Learning	
PBSI 350	Cognitive Neuroscience	

PBSI 360	Health Psychology and Behavioral Medicine	
PHIL 320	Philosophy of Mind	
VIBS 277	Essential Neuroscience - From Molecules to Nervous Systems	
VIBS 450	Mammalian Functional Neuroanatomy	
Total Semester Credit Hours		15

The minor must be declared before the student has completed 95 credit hours.

Student must make a grade of C or better.

No more than 6 credit hours can be counted toward both the Neuroscience Minor and the student's major(s). Hours cannot be counted towards both the Neuroscience Minor and an additional minor.

A total of 6 hours of directed research (485/491) may be counted toward the minor. Directed studies may be conducted with any member of the faculty of Neuroscience. Research experiences must be approved by the NRSC faculty mentor.

Pre-Medicine - Minor

The minor in Pre-Medicine is designed for students intending to apply to medical or dental school and who are pursuing a major that does not already include the required prerequisite courses in their degree plan. Students majoring in Biomedical Sciences or pursuing any degree from the Department of Biology are not eligible to pursue this minor.

Program Requirements

Code	Title	Semester Credit Hours
BICH 409	Principles of Biochemistry	3
BIOL 213	Molecular Cell Biology	3
PHYS 202	College Physics ¹	4
	or PHYS 207 or Electricity and Magnetism for Engineering and Science	
Select one of the following:		3
STAT 211	Principles of Statistics I	
STAT 301	Introduction to Biometry	
STAT 302	Statistical Methods	
STAT 303	Statistical Methods	
STAT 312	Statistics for Biology	
Select one of the following:		4

BIOL 320	Integrated Human Anatomy and Physiology II	
BIOL 351	Fundamentals of Microbiology	
BIOL 388	Principles of Animal Physiology	
Total Semester Credit Hours		17

¹ If PHYS 207 is selected, 1 hour should be added from PHYS 217/ ENGR 217 or PHYS 227.

Department of Chemistry

An understanding of chemistry is critical to an understanding of life and its associated activities. Chemistry and chemical principles profoundly influence the way we live, communicate, and interact with one another, so it is little wonder that a strong background in chemistry provides a solid foundation for a variety of careers of major importance in the twenty-first century. Chemistry is uniquely positioned at the crossroad between the biological and physical sciences. By exploiting their understanding of both realms, chemists and other professionals with strong backgrounds in chemistry have made, and continue to make, major contributions to improve the human condition. Major technological and biological discoveries almost always depend on a fundamental understanding of chemistry and the pursuit of these discoveries, as a way to improve the world in which we live, drives those who seek to be a part of the process.

The Department of Chemistry offers coursework and research in all the major areas of chemistry, organized into programs leading to the degrees of Bachelor of Arts and Bachelor of Science. Both degree programs are suitable as terminal degree programs as well as for preparation for more advanced study in chemistry and related areas or as preparation for many professional programs in a variety of career fields. The BS program is more rigorous with respect to required mathematics and chemistry courses. It is particularly appropriate for those students who plan a career in the chemical industry or who intend to pursue advanced degrees in chemistry, biochemistry, chemical physics or forensics. An attractive number of free electives in this degree program allows students to take courses in interdisciplinary focus areas. The BA program offers the greatest degree of flexibility for students who see chemistry as a springboard into a related career field such as medicine, pharmacy, law, science writing, teaching or business, for example. Chemistry majors are counseled by PhD chemistry faculty advisors fully familiar with the many options available in the chemistry and other departments, so as to optimize each student's program of study to meet individual needs. The Department of Chemistry (<https://www.chem.tamu.edu/>) website provides additional information about the degree plans, advising, and career opportunities for chemistry majors.

Although students may choose a variety of electives and/or minors in either the BA or BS degree programs, the following chemistry tracks have been developed to guide students in choosing electives.

Chemistry Tracks

In addition to the traditional BS degree (which allows for optional minors) and the traditional BA degree (minor required), the Department of Chemistry offers six tracks to guide students in their selection of electives for particular career paths in biological chemistry, environmental chemistry, materials chemistry, chemical education, medicine, dentistry and pharmacy. A traditional minor requires that all minor courses must be taken from the same department and approved by the department granting the minor. These tracks provide the student an opportunity to replace a traditional minor with a broad spectrum of elective courses focused, not in a single department, but in an area of emphasis. A list of the recommended elective courses are included in the Program of Study for each track.

Cooperative Education Program in Chemistry

Under suitable circumstances, chemistry majors may participate in a cooperative education program in which the student alternates periods of attendance at the University with periods of employment in industry.

This year-round cooperative program of college study and industrial experience is educationally enriching and meaningful, and also has the benefit of providing substantial financial assistance to the student without unduly prolonging the completion of the BS or BA degree program.

Faculty

Altemose, Alicia Sioux, Instructional Associate Professor
Chemistry
PHD, Penn State University, 2020

Altman, Alison, Assistant Professor
Chemistry
PHD, University of California, Berkeley, 2017

Baker, Lane, Professor
Chemistry
PHD, Texas A&M University, 2001

Barondeau, David P, Associate Professor
Chemistry
PHD, Texas A&M University, 1996

Batteas, James D, Professor
Chemistry
PHD, University of California at Berkeley, 1995

Begley, Tadhg P, Distinguished Professor
Chemistry
PHD, California Institute of Technology, 1983

Bergbreiter, David E, Professor
Chemistry
PHD, Massachusetts Institute of Technology, 1974

Bluemel, Janet F, Professor
Chemistry
PHD, Technical University of Munich, Germany, 1989

Burgess, Kevin, Professor
Chemistry
PHD, The University of Cambridge, 1983

Cai, Yuguang, Instructional Associate Professor
Chemistry
PHD, Princeton University, 2003

Collins, Daniel P, Instructional Associate Professor
Chemistry
PHD, University of South Carolina, 2012

Cremar, Lee Daniel, Lecturer
Chemistry
PHD, University of Illinois at Urbana-Champaign, 2012

Darensbourg, Donald J, Professor
Chemistry
PHD, University of Illinois at Urbana-Champaign, 1968

Darensbourg, Marcetta, Distinguished Professor
Chemistry
PHD, University of Illinois at Urbana-Champaign, 1967

Edwards, Josh David, Instructional Assistant Professor
Chemistry
PHD, University of Utah, 2022

Fang, Lei, Professor
Chemistry
PHD, Northwestern University, 2010

Folden, Charles M, Professor
Chemistry
PHD, University of California at Berkeley, 2004

Fout, Alison, Professor
Chemistry
PHD, Indiana University, Bloomington, 2009

Gabbai, Francois P, Professor
Chemistry
PHD, Technische Universitat Munchen, Germany, 1999

Gaede, Holly C, Instructional Professor
Chemistry
PHD, University of California at Berkeley, 1995

Ghanbaripour, Rashid Ryan, Lecturer
Chemistry
PHD, Tarbiat Modares University, 2015

Gladysz, John A, Distinguished Professor
Chemistry
PHD, Stanford University, 1974

Goodey, Joanna R, Instructional Professor
Chemistry
PHD, University of Houston, 2001

HAN, SUNGYUB, Instructional Assistant Professor
Chemistry
PHD, University of South Florida, 2015

Hagler, Lauren, Assistant Professor
Chemistry
PHD, University of Illinois at Urbana-Champaign, 2020

Hall, Michael B, Professor
Chemistry
PHD, University of Wisconsin, Madison, 1971

Hampton, Joshua, Research Assistant Professor
Chemistry
PHD, Texas A&M University, 2023

Hilty, Christian B, Professor
Chemistry
PHD, Swiss Federal Institute of Technology Zurich, 2004

Karim, Afroz, Instructional Assistant Professor
Chemistry
MS, University of Texas at El Paso, 2018

Laganowsky, Arthur D, Professor
Chemistry
PHD, University of California Los Angeles, 2011

Lee, Edward J, Instructional Associate Professor
Chemistry
PHD, University of Virginia at Charlottesville, 2011

Lim, Soon Mi, Instructional Professor
Chemistry
PHD, Texas A&M University, 2006

Lindahl, Paul A, Professor
Chemistry
PHD, Massachusetts Institute of Technology, 1985

Liu, Wenshe, Professor
Chemistry
PHD, University of California at Davis, 2005

Lugo, Catherine Serrano, Instructional Associate Professor
Chemistry
PHD, University of Utah, 2015

Mandal, Arkajit, Assistant Professor
Chemistry
PHD, University of Rochester, 2021

Martinez, Zachary M, Instructional Assistant Professor
Chemistry
PHD, Texas A&M University, 2022

Mawk, Elmo J, Instructional Associate Professor
Chemistry
PHD, Texas A&M University, 1999

Michaudel, Justine N., Instructional Associate Professor
Chemistry
PHD, Scripps Research, 2019

Michaudel, Quentin, Associate Professor
Chemistry
PHD, The Scripps Research Institute, 2015

Nippe, Michael, Associate Professor
Chemistry
PHD, University of Wisconsin, Madison, 2011

North, Simon W, Professor
Chemistry
PHD, University of California at Berkeley, 1995

Ozerov, Oleg V, Professor
Chemistry
PHD, University of Kentucky, 2000

Pennington, James D, Instructional Associate Professor
Chemistry
PHD, University of Michigan, 1998

Pentzer, Emily B, Professor
Chemistry
PHD, Northwestern University, 2010

Ponnamperuma, Krishan, Senior Lecturer
Chemistry
PHD, University of Cambridge, UK, 1992

Powers, David C, Professor
Chemistry
PHD, Harvard University, 2012

Powers, Tamara M, Instructional Associate Professor
Chemistry
PHD, Harvard University, 2013

Pullanchery, Saranya, Assistant Professor
Chemistry
PHD, The Pennsylvania State University, 2019

Raushel, Frank M, Distinguished Professor
Chemistry
PHD, University of Wisconsin, Madison, 1976

Russell, David H, Professor
Chemistry
PHD, University of Nebraska at Lincoln, 1978

Salmani, Khalid, Lecturer
Chemistry
PHD, Drexel University, 2010

San Pedro, Joanna Maria N, Instructional Associate Professor
Chemistry
PHD, Johns Hopkins University, 2014

Schaefer, Amber J, Instructional Associate Professor
Chemistry
PHD, Rice University, 2007

Schweikert, Emile A, Professor
Chemistry
PHD, Universite de Paris, France, 1964

Sczepanski, Jonathan T, Professor
Chemistry
PHD, The Johns Hopkins University, 2010

Singleton, Daniel A, Professor
Chemistry
PHD, University of Minnesota, 1986

Son, Dong H, Professor
Chemistry
PHD, The University of Texas at Austin, 2002

Songok, Abigael C, Instructional Assistant Professor
Chemistry
PHD, Louisiana State University, 2018

Tabor, Daniel, Assistant Professor
Chemistry
PHD, University of Wisconsin, Madison, 2016

Thomas, Andy Alexander, Assistant Professor
Chemistry
PHD, University of Illinois at Urbana - Champaign, 2017

Thompson, Tye S, Instructional Assistant Professor
Chemistry
PHD, Texas A&M University, 2024

Waas, Jack R, Senior Lecturer
Chemistry
PHD, University of Michigan, 1997

Wang, Xuan, Instructional Associate Professor
Chemistry
PHD, Texas A&M University, 2016

Watanabe, Coran M, Professor
Chemistry
PHD, John Hopkins University, 1999

Weitzel, Christopher Shawn, Instructional Associate Professor
Chemistry
PHD, Indiana University, Bloomington, 2009

Wooley, Karen L, Distinguished Professor
Chemistry
PHD, Cornell University, 1993

Xu, Shiqing, Assistant Professor
Chemistry
PHD, Fudan University, 2009

Yan, Xin, Associate Professor

PHD, Purdue University, 2015

Yennello, Sherry J, Professor
Chemistry
PHD, Indiana University, 1990

Zhou, Hongcai J, Professor
Chemistry
PHD, Texas A&M University, 2000

Zhu, Lin, Instructional Professor
Chemistry
PHD, University of Hawaii at Manoa, 2000

Majors

- Bachelor of Arts in Chemistry (p. 311)
- Bachelor of Arts in Chemistry, Biological Chemistry or Medical, Dental, Pharmacy School Track (p. 312)
- Bachelor of Arts in Chemistry, Chemical Education Track (p. 314)
- Bachelor of Arts in Chemistry, Environmental Chemistry Track (p. 315)
- Bachelor of Science in Chemistry (p. 316)
- Bachelor of Science in Chemistry, Biological Chemistry Track (p. 318)
- Bachelor of Science in Chemistry, Environmental Chemistry Track (p. 319)
- Bachelor of Science in Chemistry, Materials Chemistry Track (p. 320)
- Bachelor of Science in Chemistry and Master of Science in Chemistry, 5-Year Degree Program (p. 321)

Minors

- Chemistry Minor (p. 323)

Chemistry - BA

The Bachelor of Arts program provides a firm and broadly-based foundation in chemistry.

The Bachelor of Arts (BA) program, through the availability of a generous number of electives, gives the student a firm and broadly-based foundation in chemistry, with the option of pursuing other educational objectives involving specialization in at least one other field in depth. This objective is accomplished by means of the BA program flexibility and by the inclusion of a minor area of study in another discipline. Additional elective hours allow further diversification.

The BA degree offers somewhat more flexibility than the Bachelor of Science program, in terms of tailoring a program of study that combines chemistry with an interest in subject areas such as biochemistry, biology, business, computer science, education, forensics, medicine or physics. Although the BA program may in any specific case turn out to be a somewhat less technical curriculum, it meets the needs of many students who plan to use chemistry as a springboard to a career in chemical sales, marketing, law, technical writing, teaching at a pre-college level, science journalism, etc., to name only a few possibilities.

A BA in Chemistry degree coupled with completion of a biological chemistry track or a minor in Pre-Medicine or Biology, is excellent preparation for a variety of careers in the health-related disciplines. In particular, a BA degree in Chemistry is excellent and proven preparation for pharmacy, medical, dental schools, and affords the superior student the opportunity to maintain flexibility for a broad spectrum of allied health careers.

Although not required for the BA program, abundant research opportunities are available to students. The BA program also permits and encourages non-technical elective courses.

Program Requirements

Course	Title	Semester Credit Hours
First Year		
Fall		
CHEM 100	Horizons in Chemistry	1
CHEM 119	Fundamentals of Chemistry I ¹	4
Select one of the following:		3
ENGL 103	Introduction to Rhetoric and Composition	
ENGL 104	Composition and Rhetoric	
ENGL 210	Technical and Professional Writing	
Select one of the following:		4
MATH 151	Engineering Mathematics I	
MATH 147	Calculus I for Biological Sciences	
MATH 171	Calculus I	
American history (p. 30)		3
Semester Credit Hours		15
Spring		
CHEM 120	Fundamentals of Chemistry II ¹	4
Select one of the following:		4
MATH 148	Calculus II for Biological Sciences	
MATH 152	Engineering Mathematics II	

MATH 172	Calculus II	
American history (p. 30)		3

BICH 412	Biochemistry Laboratory I	
CHEM 325	Physical Chemistry Laboratory I	
CHEM 326	Physical Chemistry Laboratory II	
CHEM 433	Advanced Inorganic Chemistry Laboratory	
CHEM 434	Analytical Instrumentation Laboratory	
Advanced chemistry ⁴		3

General elective ²	9
Semester Credit Hours	16
Spring	
Advanced chemistry ⁴	3
General elective ²	9
Semester Credit Hours	12
Total Semester Credit Hours	120

¹ Choose a section designated for chemistry majors.

² Select any course 100-499 not used elsewhere except AERS 100-299 (p. 900); CHEM 222, CHEM 242; MATH 102, MATH 140, MATH 142, MATH 167, MATH 168; MLSC 100-299 (p. 1151); NVSC 100-299 (p. 1178); PHYS 205. General elective hours must be used to complete a required minor approved by the granting department.

³ This is a designated oral communication (C) or writing (W) course.

⁴ Select from BICH 410, BICH 411, BICH 440, BICH 441; CHEM 327, CHEM 362, CHEM 415, CHEM 446, CHEM 456, CHEM 458, CHEM 462, CHEM 464, CHEM 466, CHEM 468, CHEM 470, CHEM 483, CHEM 489; PHYS 309.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

Chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement. (p. 34)

Chemistry - BA, Biological Chemistry or Medical, Dental, Pharmacy School Track

The Bachelor of Arts in Chemistry - Biological Chemistry or Medical, Dental, Pharmacy School track provides an effective way to use available free electives to satisfy the pre-professional requirements for these programs.

Many students planning to enter medical, dental, or pharmacy school prefer a bachelor of arts degree that contains a large number of elective courses that may be used to satisfy pre-professional school requirements. With that in mind, this track provides an effective way to use some of the available free electives in the Bachelor of Arts in Chemistry program to satisfy the pre-professional requirements for these programs. Courses in anatomy, biochemistry, biology, genetics, and microbiology are included. Additional free electives, of which there will be many, may be used to strengthen the student's program of study in a manner decided by the student and the academic advisor.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement. (p. 34)

Chemistry - BA, Chemical Education Track

The Chemical Education track for the Bachelor of Science in Chemistry provides an opportunity to obtain secondary teacher certification in addition to completion of the requirements for a degree in chemistry.

Many students who plan to become high school chemistry teachers or to pursue a master's degree in chemical education will find this track attractive. Students must complete the requirements for secondary teacher certification as defined by the College of Education and Human Development. Consultation with the College of Education and Human Development is required.

⁵ Students planning to become certified to teach should reserve this semester for a clinical teaching semester.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement. (p. 34)

Chemistry - BA, Environmental Chemistry Track

This Environmental Chemistry track for the Bachelor of Science in Chemistry provides an opportunity to select courses that provide for a career focus in environmental chemistry.

The large number of electives makes it possible for students to combine interests in environmental issues with other interests such as business, law, and politics. Electives may be chosen from recommended courses in atmospheric sciences, bioenvironmental science, biology, geography, geology, geosciences, microbiology and oceanography.

Semester Credit Hours		12
Total Semester Credit Hours		120

¹ Select a section designated for chemistry majors.

² This is a designated oral communication (C) or writing (W) course.

³ Select from BICH 410, BICH 411, BICH 440, BICH 441; CHEM 327, CHEM 362, CHEM 415, CHEM 446, CHEM 456, CHEM 458, CHEM 462, CHEM 464, CHEM 466, CHEM 468, CHEM 470, CHEM 483, CHEM 489; PHYS 309.

⁴ Select any course 100-499 not used elsewhere except AERS 100-299 (p. 900); CHEM 222, CHEM 242; MATH 102, MATH 140, MATH 142, MATH 167, MATH 168; MLSC 100-299 (p. 1151); NVSC 100-299 (p. 1178); PHYS 205.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

BA chemistry majors may take CHEM 485 or CHEM 491 as elective courses. The total hours of CHEM 485 and CHEM 491 taken on a graded (A-F) basis may not exceed 9. Additional hours of these courses may be taken on an S/U basis. A maximum of 6 hours of these courses may be included on the degree plan.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement. (p. 34)

Chemistry - BS

The Bachelor of Science (BS) in Chemistry program is arranged so that students obtain a comprehensive, solid foundation in all of the major branches of chemistry, combined with a suitable measure of individual flexibility.

The latter objective is met in part by a strong emphasis on involving the undergraduate BS chemistry major in exciting, innovative, state-of-the-art research programs. Students in the BS program may become involved in research as early as their first year and continue this until graduation. Students frequently receive research scholarships and fellowships, which include opportunities for summer research programs. It is not uncommon for an undergraduate chemistry major to be a coauthor of scientific publications in major research journals before graduation.

Undergraduate chemistry research activities involve substantial use of modern scientific equipment, including major instrumentation. The student involved in this activity also gains considerable insight into the

profession by means of substantial individual contact with chemistry department faculty.

The BS degree in Chemistry is the appropriate program for students planning advanced degree programs in chemistry, biochemistry, forensics, chemical physics and other fields. Students planning careers in chemical industry should also choose the BS degree in Chemistry. Students may wish to choose electives suggested in the biological or environmental chemistry tracks. This degree program satisfies fully the accreditation requirements of the American Chemical Society.

Program Requirements

First Year

		Semester Credit Hours
Fall		
CHEM 100	Horizons in Chemistry	1
CHEM 119	Fundamentals of Chemistry I ¹	4

¹ Select a section designated for chemistry majors.

² This is a designated oral communication (C) or writing (W) course.

³ Select any course 100-499 not used elsewhere except AERS 100-299 (p. 900); CHEM 222, CHEM 242; MATH 102, MATH 140, MATH 142, MATH 167, MATH 168; MLSC 100-299 (p. 1151); NVSC 100-299 (p. 1178); PHYS 201, PHYS 202, PHYS 205.

⁴ Students may substitute 3 hours of CHEM 484 for CHEM 491 in consultation with an advisor.

⁵ Students wishing to complete an American Chemical Society certified degree program must take at least one semester of biochemistry (i.e., BICH 410 or BICH 440).

⁶ Select from BICH 410, BICH 411, BICH 440, BICH 441; CHEM 446, CHEM 456, CHEM 458, CHEM 462, CHEM 464, CHEM 466, CHEM 468, CHEM 470, CHEM 483, CHEM 489; PHYS 309. (Note: 3 hours of BICH is required for ACS certification.)

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

The total hours of CHEM 484, CHEM 485, and CHEM 491 taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement. (p. 34)

Chemistry - BS, Biological-Chemistry Track

The Biological-Chemistry track for the Bachelor of Science in Chemistry has been designed for those students interested in pursuing graduate study in biological chemistry, biochemistry, pharmacology or related fields or a career in the pharmaceutical industry.

Students who wish to enter into a Doctor of Medicine (MD)/Doctor of Philosophy (PhD) program or medical, dental or pharmacy school will, in most cases, need to take an additional advanced biology course beyond those recommended for this track and should check the admission requirements for these programs with the Office of Professional School Advising. Courses in biology, biochemistry, genetics and statistics are recommended as electives.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement. (p. 34)

Chemistry - BS, Materials Chemistry Track

The Materials Chemistry track for the Bachelor of Science in Chemistry includes a breadth of coverage in both hard and soft materials and prepares students for further study in materials chemistry or employment in a variety of industries.

The Department of Chemistry offers a Bachelor of Science in Chemistry with a Materials Chemistry Track. In materials chemistry, molecular-level understanding drives the design, synthesis, and characterization of materials with interesting and useful properties. Insight into catalytic, electronic, optical, or structural characteristics of substances allows them to be tailored for different applications.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement. (p. 34)

Chemistry - 5-Year Bachelor of Science and Master of Science in Chemistry

This combination degree program allows ambitious and academically talented chemistry majors to earn both a bachelor's degree and a master's degree within five years.

The curriculum in the Bachelor of Science and Masters of Science (MS) in Chemistry 5-year combined program provides a comprehensive, solid foundation in all of the major branches of chemistry, including undergraduate research. Undergraduate chemistry research activities involve substantial use of modern scientific techniques and equipment, including major instrumentation. The student involved in this activity also gains considerable insight into the profession by means of substantial individual contact with chemistry department faculty. Students in this program pursue electives in science and related fields that provide a measure of flexibility to develop expertise in areas complementary to chemistry. Among the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- the professional industrial job marketplace;
- a career in educational technology, science policy, or science communication;
- a doctoral program in chemistry, or in a related discipline, particularly at international institutions that require an MS for admission.

¹ Select a section designated for chemistry majors.

² Select any course 100-499 not used elsewhere except AERS 100-299 (<https://catalog.tamu.edu/undergraduate/course-descriptions/aers/>); CHEM 222 (<https://catalog.tamu.edu/search/?P=CHEM%20222>), CHEM 242 (<https://catalog.tamu.edu/search/?P=CHEM%20242>); MATH 102 (<https://catalog.tamu.edu/search/?P=MATH%20102>), MATH 140 (<https://catalog.tamu.edu/search/?P=MATH%20140>), MATH 142 (<https://catalog.tamu.edu/search/?P=MATH%20142>), MATH 167 (<https://catalog.tamu.edu/search/?P=MATH%20167>), MATH 168 (<https://catalog.tamu.edu/search/?P=MATH%20168>); MLSC 100-299 (<https://catalog.tamu.edu/undergraduate/course-descriptions/mlsc/>); NVSC 100-299 (<https://catalog.tamu.edu/undergraduate/course-descriptions/nvsc/>); PHYS 201 (<https://catalog.tamu.edu/search/?P=PHYS%20201>), PHYS 202 (<https://catalog.tamu.edu/search/?P=PHYS%20202>).

catalog.tamu.edu/search/?P=PHYS%20202), PHYS 205 (<https://catalog.tamu.edu/search/?P=PHYS%20205>).

³ This is a designated C- or W-course.

⁴ Students may substitute 3 hours of CHEM 484 (<https://catalog.tamu.edu/search/?P=CHEM%20484>) for CHEM 491 (<https://catalog.tamu.edu/search/?P=CHEM%20491>) in consultation with an advisor.

⁵ 21 credit hours must be taken from CHEM 601-673 (<https://catalog.tamu.edu/graduate/course-descriptions/chem/>), CHEM 689; 6 of these credit hours will be applied towards both BS and MS degrees in Chemistry; 6 other hours of graduate courses in chemistry may be selected from CHEM 681 (up to 2 hours), CHEM 684 (up to 4 hours), CHEM 685 (up to 6 hours), CHEM 695 (up to 3 hours), or CHEM 697 (up to 2 hours); 9 additional credit hours of graduate courses may be taken from CHEM or other departments; consult with advisor for course selection information.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (<https://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/>) courses and 3 hours or Cultural Discourse (<https://catalog.tamu.edu/undergraduate/general-information/degree-information/cultural-discourse-requirements/>) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

The total hours of CHEM 484 (<https://catalog.tamu.edu/search/?P=CHEM%20484>), CHEM 485 (<https://catalog.tamu.edu/search/?P=CHEM%20485>), and CHEM 491 (<https://catalog.tamu.edu/search/?P=CHEM%20491>) taken by BS chemistry majors on a graded (A–F) basis may not exceed 15. Additional hours of these courses may be taken on a satisfactory/unsatisfactory basis.

Electives should be chosen in consultation with the chemistry advisor and should be selected to meet the residency requirement (36 hours at 300-400 level must be taken at Texas A&M).

The program includes a total of 156 hours, which up to 6 hours may be applied toward both the Bachelor of Science in Chemistry and the Master of Science in Chemistry (Non-thesis option).

Chemistry - Minor

Students seeking a minor in chemistry must complete the Declaration of Minor in Chemistry form and have it approved by the undergraduate advisor in chemistry and their academic advisor. A minor in Chemistry should represent course work taken in the discipline beyond courses that might be used to satisfy core curriculum science requirements (8 credits).

Therefore, though CHEM 119 or CHEM 107/CHEM 117 and CHEM 120 are prerequisites to all of the listed courses, they are not considered part of the minor program. The course work listed represents various sub-disciplines within the field of Chemistry and would give the student an overall knowledge base fitting a Minor in Chemistry. This is consistent with the statement on minors published by the American Chemical Society.

Program Requirements

The student will choose five lecture courses (14-15 credits) and three laboratory courses (3-5 credits) from categories A. through E. below. The student must take at least one course from four of the five categories. Students must have a C average in all courses taken for a minor in Chemistry. CHEM 491 and CHEM 485 credits will not

be allowed to count for the minor nor used in the Chemistry GPA calculation. Substitution of courses without the CHEM prefix will not be allowed.

Code	Title	Semester Credit Hours
A. Organic Chemistry		
CHEM 227	Organic Chemistry I ¹	3
CHEM 228	Organic Chemistry II ²	3
CHEM 237	Organic Chemistry Laboratory ¹	1
CHEM 238	Organic Chemistry Laboratory	1

CHEM 483	Green Chemistry	3
CHEM 489	Special Topics in...	1-4

¹ Students may not count both CHEM 227 and CHEM 237.

² Students may not count both CHEM 228 and CHEM 258.

³ Students may not count both CHEM 315 and CHEM 316.

⁴ Students may only count one from CHEM 310, CHEM 321, CHEM 322, or CHEM 327.

Department of Communication and Journalism

Communication is concerned with the most distinct human characteristics: the use of spoken and written language and the use of media to communicate information, maintain social contact, and influence others. Journalism is the ethical collection, research, analysis, and distribution of information in the public interest. Combined, communication and journalism tell the stories that promote human relationships, shape society, sell products and services, analyze and interpret data, support healthy practices, guide leaders, create strategies, implement tactics, guide discussions, and manage conflicts in the complex and wonderful world we live in today!

The Department of Communication and Journalism offers Bachelor of Arts and Bachelor of Science degrees in Communication, Journalism, and Telecommunication Media Studies. Communication and Journalism offers these various undergraduate degrees, minors, and certificates along with optional study abroad trips and field trips, internships, and leadership opportunities that when combined to meet a student's interests, provide unique approaches to acquiring the knowledge and the marketable skills needed to describe, interpret, evaluate, and transform the world around us through the use of communication and media.

Students may select a major in Communication, Journalism, or Telecommunication Media Studies and a minor from among any minor offered at Texas A&M University, in order to customize their choices of classes to their interests and goals. Other students may select to choose a major, a minor, and then pattern their courses to pursue a certificate. Honors students may participate in the the well-established and well-respected COMM-Honors program. *Academic Advisors are on hand to assist students in refining their pathway to their future.*

While some students choose advanced degrees in communication, law, business, or religion, many go straight into the work world to pursue careers in a vast array of areas. Typical choices include positions in strategic communication, public relations, marketing, advertising, promotions and sales, training and human resources, social media, journalism, digital communication, leadership and management, health fields related to communication, organizations and public policy, communication media, sports communication, entertainment and related areas of business, industry, government, and non-profit organizations.

- Communication Leadership and Conflict Management Certificate (p. 344)
- Health Communication Certificate (p. 345)
- Social Media Certificate (p. 345)
- Strategic Communication Certificate (p. 346)

Communication - BA

The Bachelor of Arts (BA) in Communication teaches how to influence and persuade others through the use of language, visual images and other media.

Students who want to transform the world through communication choose the Bachelor of Arts in Communication as a major. This is a major that affords a broad based, liberal arts education that draws from coursework from across the College of Arts and Sciences, and from across the Texas A&M University. In the Communication major, we pursue coursework giving students a background in the processes and theories of communication as well as in the marketable skills that are so valuable in the working world.

Coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of Communication and of Media while also involving them in small groups and acquainting them with Texas A&M University, our resources and our opportunities. We also welcome Transfer students, meeting them where they are and integrating them into the Communication family. All Communication majors take a core of required courses that establish a firm foundation in the field and then select additional coursework that suits their interests and needs. Students who wish to focus their studies further, may choose to earn a certificate in Health Communication, Strategic Communication, Leadership and Conflict Management, or Social Media.

With over a thousand students in the major, there is not one particular career path that they all choose. Many go into careers in public relations, advertising, sales, promotions and marketing. Others work in leadership positions in corporations, or in political, religious or social non-profits.

Still others work in tactics of communication such as spokespersons, event managers, market influencers, graphic designers or digital specialists. Other popular options are careers in sports, social media, international business, and health.

All BA in Communication students choose a minor. A minor area of study fits within the hours required for the degree and helps to further define and focus the student's interests. When making a choice of majors, remember that one can major in Communication and minor in a related area or in a widely divergent area.

Semester Credit Hours	15
Total Semester Credit Hours	120

some of these courses may become electives. Minors will range between 15 and 18 hours.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Included in graduation requirements are the following stipulations:

1. A minimum of 2.0 GPA
2. Minimum grade of C in each course applied to the major
3. Minimum of 12 hours of upper-level COMM coursework at Texas A&M

Communication - 5-Year Bachelor of Arts and Master of Arts in Communication

This combination program provides a direct pathway for BA COMM majors to transition seamlessly into the MA COMM program thereby earning both degrees in five or fewer years.

The program begins each fall semester. Interested students will apply for the program in the spring of the junior year and must have two full undergraduate terms remaining at the time of application. Academic advisors at both the undergraduate and graduate levels will guide students through the process every step of the way. This program increases students' opportunities to learn and grow while they are here at Texas A&M University. By allowing students additional time to pursue more advanced classes, they have increased opportunities to take advantage of the rich options our department has to offer.

This is a great choice for the many students who come to Texas A&M University with credit by examination, dual credit, and community college credit. The additional year for this program gives these particular students who would otherwise graduate in just two or three years, the time to become involved in student organizations, to take on leadership positions in the university, to pursue career path-altering internships, to participate in our study abroad programs, to collaborate with faculty and graduate students in their research projects, and to compete for fellowships and admission into other Texas A&M programs that can expand their horizons. A Master's degree is value-added and this degree will offer both our students and our faculty opportunities to cultivate stronger mentoring relationships, which often broaden students' horizons and expand their career interests.

3. Minimum of 12 hours of upper-level COMM coursework at Texas A&M

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Arts in Communication and the Master of Arts in Communication (Non-thesis).

Communication - BS

The Bachelor of Science (BS) in Communication provides a marketable set of skills aimed toward communication intervention in areas such as business, health communication, media, politics, non-profits and social issues.

The Bachelor of Science in Communication harnesses the power of collaborative communication to solve problems through the very essence of this degree, *communication intervention*. Communication intervention is the skill of collaborating with others effectively to modify outcomes, conditions and processes while also preventing harm with the goal of transforming system functioning. It draws from a transdisciplinary liberal arts and STEM knowledge base. It is a critical key to analyzing and addressing 21st century challenges. We address problem-solving by integrating the critical thinking and perspective taking skills embraced by the liberal arts with the analytical and quantitative proficiencies of STEM (science, technology, engineering and math). In addition to core curriculum required by the University and the State of Texas, Bachelor of Science students will take foundation coursework in the social

scientific study of communication and intervention, communication technology, communication research methods, acquisition, analysis and visualization of data, team facilitation and collaboration, and the design, implementation and assessment of communication interventions.

The field of communication is supremely varied as are the careers pursued by our majors. We address both the science and art of communication in human interactions. Embracing cutting-edge applications, communication specialists are found selling products and promoting initiatives, engaging in public relations, advertising, marketing strategies, digitizing messages, launching and sustaining new media entrepreneurial ventures, facilitating the relationship of doctors and patients, mounting health campaigns and measuring their effects, working on political campaigns, mobilizing the vote, analyzing the ROI of social media initiatives, leading interactions to heal public discord, managing and leading organizations, disseminating concepts, and describing, interpreting and evaluating a wide range of communication phenomena.

The BS is contrasted with the Bachelor of Arts (BA) in the following ways. First, within the major coursework, the courses central to the degree are social scientific in nature. Second, BS students pursue a set of quantitative courses which includes statistics, computer applications and two research methods courses. Third, the required minor may be replaced with a certificate from the Department of Communication and Journalism. The minor or the certificate will provide context and expertise for the communication intervention science focus. Currently, students may choose from any of the minors offered at Texas A&M or from one of these certificates offered by the Department of Communication and Journalism: Social Media, Strategic Communication, Leadership and Conflict Management, or Health Communication.

Similar to the BA in Communication, coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of Communication and of Media while also involving them in small groups and acquainting them with Texas A&M University, our resources and our opportunities. We also welcome Transfer students, meeting them where they are and integrating them into the Communication family. All Communication majors take a specified core of required courses that establishes a firm foundation in the field and then select additional coursework that suits their interests and needs.

¹ First semester, first time in college students must take COMM 101 and COMM 291 at Texas A&M University. Do not take SPCH 1311 elsewhere to fulfill this requirement.

² Must make a grade of C or better.

³ Except COMM 100-499 (p. 975).

⁴ Select from any 100-499 course not used elsewhere. Includes 12-18 hours of courses used to satisfy the required minor or certificate. Students must earn either a minor to be selected from among university-approved minors or a certificate from among approved Department of Communication and Journalism certificates, which require a grade of B or better in each course. The minor is required unless waived upon completion of the certificate. Consult with an advisor regarding how to declare the desired minor or certificate. Courses fulfilling other requirements may apply to the certificate or the minor; therefore, some of these courses may become general electives.

⁵ Select from any 100-499 course not used elsewhere. Includes 12-18 hours of courses used to satisfy the required minor or CMJR certificate and 3-9 hours of general electives. Only 14 hours of KINE 199; AERS 100-499 (p.); MLSC 100-499 (p. 1151); NVSC 100-499 (p.); SOMS 100-499 (p. 1237) may be used towards general electives.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Communication - 5-Year Bachelor of Science and Master of Arts in Communication

The combination 5-year Bachelor-Master program provides a direct pathway for BS COMM majors to transition seamlessly into the MA COMM program thereby earning both degrees in five or fewer years.

The combination program begins each fall semester. Interested students will apply for the combined program in the spring of the junior year and must have two full undergraduate terms remaining at the time of application. Accepted students will take one graduate course in each of the senior semesters while they complete the undergraduate coursework. These students will then complete the MA. Academic advisors at both the undergraduate and graduate levels will guide students through the process every step of the way. The ABM option increases students' opportunities to learn and grow while they are here at Texas A&M University. By allowing students additional time to pursue more advanced

classes, they have increased opportunities to take advantage of the rich options our department has to offer.

This is a great choice for the many students who come to Texas A&M University with credit by examination, dual credit, and community college credit. The additional year for this program gives these particular students who would otherwise graduate in just two or three years, the time to become involved in student organizations, to take on leadership positions in the university, to pursue career path-altering internships, to participate in our study abroad programs, to collaborate with faculty and graduate students in their research projects, and to compete for fellowships and admission into other Texas A&M programs that can expand their horizons. A Master's degree is value-added and this degree will offer both our students and our faculty opportunities to cultivate stronger mentoring relationships, which often broaden students' horizons and expand their career interests.

⁵ Select from any 100-499 course not used elsewhere. Includes 12-18 hours of courses used to satisfy the required minor or certificate. Students must earn either a minor to be selected from among university-approved minors or a certificate from among approved Department of Communication and Journalism certificates, which require a grade of B or better in each course. The minor is required unless waived upon completion of the certificate. Consult with an advisor regarding how to declare the desired minor or certificate. Courses fulfilling other requirements may apply to the certificate or the minor; therefore, some of these courses may become general electives.

⁶ Course will count toward undergraduate degree and graduate degree.

⁷ Student will select coursework in consultation with Graduate Director.

⁸ With pre-approval by the Graduate Director, students may select out of department graduate course.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

The program includes a total of 156 hours, which up to 6 hours may be applied toward both the Bachelor of Science in Communication and the Master of Arts in Communication (Non-Thesis).

Journalism - BA

This program is for journalists of the future who want to cover news, sports, business, politics, arts and entertainment, engage in magazine writing, and digital storytelling to name a few.

New journalists pursuing the Bachelor of Arts in Journalism will take at least 33 hours of journalism coursework, including course work in

media writing, fact gathering, and journalism as a profession. While many immersive experiences in journalism are encouraged, provided and facilitated, each BA student will complete a formal, supervised, credit-bearing, journalism internship relevant to their area of interest and focus.

BA journalism students also complete one of the many minors offered at Texas A&M University, and with the guidance of their academic advisor choose a four-course focus area that allows the student to customize and individualize their own, unique area of interest.

Journalism majors have the option to choose to earn one of the certificates offered by the Department of Communication and Journalism which include Health Communication, Leadership & Conflict Management, Social Media or Strategic Communication.

The Bachelor of Arts in Journalism offers preparation in the art of journalism to the journalists of the future. The new journalist must know how to communicate across platforms, across audiences and with fact-checked precision. Democracy depends on the ethical practice of journalism. The new journalist must understand, adapt to and be able to leverage new economic models that sustain and grow journalism. The new journalist must adhere strictly to the highest ethical principles and practices. There are ample jobs available for new journalists, as well as opportunities to address 'news deserts' state-wide. As a land-grant, sea-grant and space-grant university we are well resourced to prepare new journalists to take advantage of our curricula that incorporate immersive experiences both inside and outside the classroom 1) enabling skill-building in journalistic writing, broadcasting, and digital production, 2) prompting pragmatic and conceptual analyses of the corporate practice of journalism and implementation of entrepreneurial endeavors, and 3) directing the enactment of journalistic ethics articulated by the Society of Professional Journalists: seek truth and report it, minimize harm, act independently, and be accountable and transparent. The Bachelor of Arts in Journalism offers preparation in the art of journalism to the journalists of the future who must carry this torch.

To these ends, we also offer a Bachelor of Science in Journalism. Please examine that option before you make your choice.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Arts in Journalism and the Master of Arts in Communication (non-thesis).

Journalism - BS

This program is for journalists of the future who want to cover scientific topics, engage in data journalism, employ digital technologies and who are quantitatively oriented.

New journalists pursuing the Bachelor of Science in Journalism will take at least 33 hours of journalism coursework, including course work in media writing, fact gathering, and journalism as a profession. While many immersive experiences in journalism are encouraged, provided and facilitated, each BS student will complete a formal, supervised, credit-bearing internship relevant to their area of interest and focus. The science aspect of the degree is rounded out with a course in statistics, a course in research methods, and with the guidance of their academic advisor, the selection of a two-course combination to complete the individualized and customized focus area. Each Bachelor of Science in Journalism student will earn a minor in one of the many scientific minors offered at Texas A&M University.

Journalism majors have the option to choose to earn one of the certificates offered by the Department of Communication and Journalism which include, Health Communication, Leadership & Conflict Management, Social Media or Strategic Communication.

Democracy depends on the ethical practice of journalism. The Bachelor of Science in Journalism offers preparation in the science of journalism to the journalists of the future who must carry this torch. The new journalist must know how to communicate across platforms, across audiences and with fact-checked precision. The new journalist must

understand, adapt to and be able to leverage new economic models that sustain and grow journalism. The new journalist must adhere strictly to the highest ethical principles and practices. There are ample jobs available for new journalists, as well as opportunities to address 'news deserts' state-wide. As a land-grant, sea-grant and space-grant university we are well resourced to prepare new journalists to take advantage of our curricula that incorporate immersive experiences both inside and outside the classroom 1) enabling skill-building in journalistic writing, broadcasting, and digital production, 2) prompting pragmatic and conceptual analyses of the corporate practice of journalism and implementation of entrepreneurial endeavors, and 3) directing the enactment of journalistic ethics articulated by the Society of Professional Journalists: seek truth and report it, minimize harm, act independently, and be accountable and transparent.

To these ends, we also offer a Bachelor of Arts in Journalism. Please examine that option before you make your choice.

⁴ Any 100-499 course not used elsewhere. Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used towards general electives.

⁵ Minor to be selected from among approved university science minors. Consult with advisor regarding how to declare desired minor. Courses fulfilling core curriculum requirements may apply to the minor and therefore some of these courses may become electives. Minors will range between 15 and 18 hours.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Journalism - 5-year Bachelor of Science and Master of Arts in Communication

This combination program provides a direct pathway for BS JOUR majors to transition seamlessly into the MA COMM program thereby earning both degrees in five or fewer years.

The program begins each fall semester. Interested students will apply for the combination program in the spring of the junior year and must have two full undergraduate terms remaining at the time of application. Academic advisors at both the undergraduate and graduate levels will guide students through the process every step of the way. This program increases students' opportunities to learn and grow while they are here at Texas A&M University. By allowing students additional time to pursue more advanced classes, they have increased opportunities to take advantage of the rich options our department has to offer.

This is a great choice for the many students who come to Texas A&M University with credit by examination, dual credit, and community college credit. The additional year for this program gives these particular students who would otherwise graduate in just two or three years, the time to become involved in student organizations, to take on leadership positions in the university, to pursue career path-altering internships, to participate in our study abroad programs, to collaborate with faculty and graduate students in their research projects, and to compete for fellowships and admission into other Texas A&M programs that can expand their horizons. A Master's degree is value-added and this degree will offer both our students and our faculty opportunities to cultivate stronger mentoring relationships, which often broaden students' horizons and expand their career interests.

¹ Must make a grade of C or better.

² JOUR 100-499 (p. 1106) may not be used to fulfill this requirement.

³ Select any 100-499 course not used elsewhere. Only 14 hours of KINE 199, AERS 100-499 (p. 900), MLSC 100-499 (p. 1151), NVSC 100-499 (p. 1178), SOMS 100-499 (p. 1237) may be used towards general electives.

⁴ Minor to be selected from among approved university science minors. Consult with advisor regarding how to declare desired minor. Courses fulfilling core curriculum requirements may apply to the minor and therefore some of these courses may become electives. Minors will range between 15 and 18 hours.

⁵ Course will count toward undergraduate degree and graduate degree.

⁶ In consultation with the program director or designee, select from JOUR 100-499 (p. 1106) and/or other courses to form a supporting focus area. Obtain required, written approval of focus area courses.

⁷ Student will select coursework in consultation with the Graduate Director.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Science in Journalism and the Master of Arts in Communication (non-thesis).

Telecommunication Media Studies - BA

This program is designed to educate students for a productive future in an ever-changing world, preparing them for media-related positions in business, government, non-profit organizations, and higher education, and emphasizing the story.

Students with a passion for media, choose the Bachelor of Arts in Telecommunication Media Studies (TCMS). The BA in TCMS features a broad, liberal arts approach to media topics and is supported by classwork from across the College of Arts and Sciences, and beyond. The BA in TCMS requires study in communication technology skills, technology and communication, research methods and media theory, and then branches out to permit choices among a number of TCMS electives in communication, film studies, journalism and business. The BA is a flexible, liberal arts, media-oriented degree.

Coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of Communication and of Media while also involving them in small groups and acquainting them with Texas A&M University, our resources and our opportunities. We also welcome transfer students, meeting them where they are and integrating them into the Communication, Media and Journalism family.

A Bachelor of Arts degree in Telecommunication Media Studies serves well in a broad variety of careers. Our students may become social media experts, online marketers, broadcasters, producers, filmmakers, digital media specialists, industry leaders, government regulators, spokespeople, politicians, writers, artists, activists, and informed citizens.

TCMS-BA students will select a minor. They have the option to select a certificate in Health Communication, Leadership and Conflict Management, Social Media, and in Strategic Communication.

⁹ With prior approval of Graduate Director, student may select out of department graduate course.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students take 21 credit hours of the required undergraduate telecommunication media studies program core courses and 12 credit hours of telecommunication media studies elective courses for a total of 33 credit hours. At least 12 credits must be at the upper-division level. At least 12 credits must be taken in residence at Texas A&M University. A minimum grade of C in each undergraduate telecommunication course. No more than 3 credit hours of COMM 484; no more than 6 credit hours of COMM 485.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Science in Telecommunication Media Studies and the Master of Arts in Communication (Non-thesis).

Telecommunication Media Studies - BS

This program is designed to educate students for a productive future in an ever-changing world, preparing them for media-related positions in business, government, non-profit organizations, and higher education.

Students who are fascinated by media and media applications choose the Bachelor of Science in Telecommunication Media Studies (TCMS). The BS in TCMS features a specialized study of telecommunication, media and quantitative systems. Students select communication courses that address media industries, law and policy, technology and society, media audiences, processes, and effects. The practice of media and acquisition of media skills are included. Students may customize this degree by selecting additional coursework to round out their particular media interests. The degree is supported with the study of research methods and quantitative concepts in statistics and research design.

Coursework for incoming Freshmen begins with a dedicated first semester experience which introduces them to the breadth of the field of communication and of media while also involving them in small groups and acquainting them with Texas A&M University, our resources and our opportunities. We also welcome transfer students, meeting them where they are and integrating them into the Communication family.

A Bachelor of Science degree in Telecommunication Media Studies works well in a broad variety of careers. Our students may become media designers, data analysts, digital media experts, online administrators, digital storytellers, content producers, filmmakers, digital media specialists, industry leaders, government officials, politicians, writers, artists, and informed citizens.

TCMS BS students will select a minor. They have the option to also select a certificate in Health Communication, Leadership and Conflict Management, Social Media, or Strategic Communication.

¹ First semester, first time in college students must take COMM 101 and COMM 291.

² Must earn a grade of C or better.

³ Select from: COMM 100 to 499 (p. 975) (except COMM 203, COMM 243), CSCE 110, CSCE 206; ISTM 250, ISTM 310, ISTM 315, ISTM 325; ITSV 274; JOUR 102, JOUR 301/COMM 307; MGMT 209, MGMT 309; WGST 407/COMM 407.

⁴ COMM course may not be used to fulfill this requirement.

⁵ Minor to be selected from among approved university minors. Consult with advisor regarding how to declare desired minor. Courses fulfilling core curriculum requirements may apply to the minor and therefore some of these courses may become electives. Minors will range between 15 and 18 hours.

⁶ Select any 100-499 course not used elsewhere. Only 14 hours of KINE 199; AERS 100-499 (p.); MLSC 100-499 (p. 1151); NVSC 100-499 (p.); SOMS 100-499 (p. 1237) may be used towards general electives.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students take 24 credit hours of the required program core courses and 9-10 credit hours of telecommunication media studies elective courses for a total of 33 credit hours. At least 12 credits must be at the upper-division level. At least 12 credits must be taken in residence at Texas A&M University. Minimum grade of C in each course.

Telecommunication Media Studies - 5-Year Bachelor of Science and Master of Arts in Communication

This combination program provides a direct pathway for BS TCMS majors to transition seamlessly into the MA COMM program thereby earning both degrees in five years.

This program begins each fall semester. Interested students will apply for the combined program in the spring of the junior year and must have two full undergraduate terms remaining at the time of application. Accepted students will take one graduate course in each of the senior semesters while they complete the undergraduate coursework and will even be permitted to apply six hours of advanced undergraduate credit toward the master's program. These students will then complete the MA in two 12-hour semesters. Academic advisors at both the undergraduate and graduate levels will guide students through the process every step of the way. The combined option increases students' opportunities to learn and grow while they are here at Texas A&M University. By allowing students additional time to pursue more advanced classes, they have increased opportunities to take advantage of the rich options our department has to offer.

This is a great choice for the many students who come to Texas A&M University with credit by examination, dual credit, and community college credit. The additional year for this program gives these particular students who would otherwise graduate in just two or three years, the time to become involved in student organizations, to take on leadership positions in the university, to pursue career path-altering internships, to participate in our study abroad programs, to collaborate with faculty and graduate students in their research projects, and to compete for fellowships and admission into other Texas A&M programs that can expand their horizons. A master's degree is value-added, and this program will offer both our students and our faculty opportunities to cultivate stronger mentoring relationships, which often broaden students' career interests.

¹ First semester, first time in college students must take COMM 101 and COMM 291.

- ² Must earn a grade of C or better.
- ³ Select from: COMM 100 to 499 (p. 975) (except COMM 203, COMM 243), CSCE 110, CSCE 206; ISTM 250, ISTM 310, ISTM 315, ISTM 325; ITSV 274; JOUR 102, JOUR 301/COMM 307; MGMT 209, MGMT 309; WGST 407/COMM 407.
- ⁴ COMM course may not be used to fulfill this requirement.
- ⁵ Select any 100-499 course not used elsewhere. Only 14 hours of KINE 199; AERS 100-499 (p.); MLSC 100-499 (p. 1151); NVSC 100-499 (p.); SOMS 100-499 (p. 1237) may be used towards general electives.
- ⁶ Minor to be selected from among approved university minors. Consult with advisor regarding how to declare desired minor. Courses fulfilling core curriculum requirements may apply to the minor and therefore some of these courses may become electives. Minors will range between 15 and 18 hours.
- ⁷ Course will count toward undergraduate degree and graduate degree.
- ⁸ Courses will be selected in consultation with the Graduate Director.
- ⁹ With pre-approval by the Graduate Director, student may select out of department graduate course.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students take 24 credit hours of the required undergraduate telecommunication media studies program core courses and 9-10 credit hours of telecommunication media studies elective courses for a total of 33 credit hours. At least 12 credits must be at the upper-division level. At least 12 credits must be taken in residence at Texas A&M University. A minimum grade of C in each undergraduate telecommunication media studies course. No more than 3 credit hours of COMM 484; no more than 6 credit hours of COMM 485.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Science in Telecommunication Media Studies and the Master of Arts in Communication (Non-thesis).

Communication - Minor

The minor in Communication is a wonderful complement to any major, as communication is central to the experience of human life.

Communication is fundamental to all human behavior, to all human endeavors. The minor in Communication includes a skills class, a choice of one of three courses vital to the study of communication plus a choice of three additional courses from among the rich array of COMM offerings. Skills courses range from public speaking, interviewing, argumentation and debate to difficult dialogues or group communication, to note only a few. Communication courses (p. 975) afford the opportunity to examine how human communication and media can be described, critiqued, interpreted, and employed to influence and persuade in business, commerce, political, religious, social and personal contexts.

This minor is open to all majors with the exception of Communication majors.

Program Requirements

Code	Title	Semester Credit Hours
COMM 200-250 (p. 975)		3
Select one of the following:		3
	COMM 301 Rhetoric in Western Thought	
	COMM 305 Theories of Communication	
	COMM 350 Theories of Mediated Communication	
COMM 200-499 (p. 975)		3
COMM 300-499 (p. 975)		6
Total Semester Credit Hours		15

Students must earn a grade of C or better in each course.

Journalism - Minor

The Department of Communication and Journalism offers a minor in Journalism, which complements any major and provides essential tools for students who aspire to share ethically sourced and fact-checked reports with the public.

The Journalism minor offers foundational skills in reporting, including interviewing techniques and online research, as well as writing skills for deadline news stories, longer analytical pieces, and feature articles. Students also explore multi-media journalism and have the opportunity to take specialized advanced writing courses in areas such as political reporting, business reporting, sports journalism, arts and entertainment journalism, magazine writing, and investigative reporting—subjects that are particularly popular among students.

The required journalism internship offers another valuable opportunity for students to gain hands-on writing and production experience, while also serving as an impressive addition to their resume. Additionally, students can gain in-depth experience in the field of new media.

Contact the Department of Communication and Journalism to declare the minor in Journalism (<https://artsci.tamu.edu/comm-journalism/academics/undergraduate/minors.html>).

Program Requirements

Total Semester Credit Hours		18

Students must make a grade of C or better in all courses.

Communication Leadership and Conflict Management - Certificate

The Communication Leadership and Conflict Management Certificate (CLCM) is designed to enhance communication leadership skills in both

interpersonal and group collaborative settings, as well as in social and political arenas.

This certificate prepares individuals to effectively communicate in one-on-one interactions, across private and public boundaries, and to mediate conflict in groups, such as families, work teams, political and religious organizations, and those engaged in geopolitical conflicts.

CLCM certificate holders may opt to become certified in basic mediation by the State of Texas. All certificate recipients will also complete a capstone study focusing on the mediation process. The CLCM certificate provides students with a deep understanding of the growth and impact of communication leadership and conflict management, particularly within the context of communication. This certificate is beneficial for undergraduate students pursuing various career paths, including but not limited to public leadership, law, management, and religious leadership. For detailed certificate requirements, students should consult with an advisor.

Program Requirements

Code	Title	Semester Credit Hours

COMM 440	Political Communication	
COMM 447	Communication, Group Processes and Collaboration	
Other courses approved by CLCM committee for prescribed electives		
Total Semester Credit Hours		15

Students must earn a grade of B or better in each course used to meet the requirements. Students who pursue the CLCM must complete all requirements prior to graduation.

Health Communication - Certificate

This certificate provides a structured course of study and hands-on experience for students interested in health campaigns, mediated health communication, health policy and communication within healthcare organizations and provider-patient relationships.

Careers in health and communication are growing significantly faster than average, according to the Office of Occupational Outlook, Bureau of Labor Statistics. Health communication skills are becoming increasingly valuable in careers related to health and medicine, as well as in media, public relations, and strategic communication. These skills are applicable across a wide range of health and medical tasks, including provider-patient consultations, the formative research, design, implementation, and assessment of public health communication campaigns, the development of strategic communication initiatives for

health organizations, and leadership in public and private sector health agendas.

Health messaging is critical for reaching a variety of audiences and includes using advocacy to influence policy, as well as mediating and shaping public conversations on health issues—both face-to-face and through traditional and new media in local and global contexts. Health communication skills are essential in profit, nonprofit, and governmental organizations.

For specific certificate requirements, students should consult the Undergraduate Studies Office of the Department of Communication and Journalism.

Details are also available on the Department of Communication and Journalism (<http://communication.tamu.edu>) website.

Program Requirements

Code	Title	Semester Credit Hours
COMM 370	Health Communication	3
COMM 483	Health Communication Practicum	0

HHUM 482	Humanities	
Total Semester Credit Hours		12

Students must earn a grade of B or better in each course used to meet the requirements. Students who pursue the HCC must complete all requirements prior to graduation.

Social Media - Certificate

The Department of Communication and Journalism's certificate in Social Media is designed to prepare Communication, Journalism and Telecommunication Media Studies majors for roles in the social media-literate workforce.

Social media was once a platform primarily used for entertainment and leisure activities. As commercial, non-profit, political, religious, and social entities began utilizing social media for profit and influence, digital natives were employed to manage these platforms. Today, social media is ubiquitous, with people from all walks of life using it. These commercial and social entities now hire well-qualified social media users to handle various aspects of social media production, curation, management,

influence, response, and analytics. Social media entrepreneurship is at the forefront of many forms of commerce.

Program Requirements

COMM 407/ WGST 407	Gender, Race and Media	
COMM 438	Propaganda	
Total Semester Credit Hours		15

Students must earn a B or better in courses applied to this certificate.

Strategic Communication - Certificate

Strategic communication is the process that supports public relations, promotions, public information, marketing, corporate communication, public affairs and advertising.

Strategic communication is creation of the plan as well as the tools or tactics used to implement that plan effectively. The value of effective strategic communication is acknowledged by both profit and nonprofit corporations and by governmental agencies. The effect of strategic communication failures on the bottom line, on employee and stakeholder satisfaction, and on the efficient use of resources, is well documented.

Gathering and interpreting appropriate information, audience analysis, as well as harnessing the power of accurate language in crafting messages and telling stories, are further noted as key strategic communication functions. Tactics available for implementing strategic communication are expanding exponentially as digital communication and new media evolve. Mastery of the integration of these tactics in strategic plans augment the effectiveness of internal and public issues management while mitigating corporate frustration, offensive messages, and overspending.

Although effective strategic communication is critical to organizational success, many companies and agencies continue to need support and assistance in this arena. The U.S. Department of Labor Occupational Outlook Handbook notes that careers in various strategic communication areas are growing "faster than average" to "much faster than average."

The Certificate in Strategic Communication will prepare Communication majors, Telecommunication Media Studies majors, and University Studies-Journalism Studies majors to plan and execute communication strategically and to coordinate the integration of appropriate tactics to enhance commerce, government, and to further political, religious and social goals, as they lead us into the future. Specific certificate requirements are available in the Undergraduate Studies Office of the Department of Communication and Journalism. Details are also available on the Department of Communication and Journalism (<https://liberalarts.tamu.edu/communication/>) website.

The certificate in Strategic Communication is open to students majoring in Communication, Journalism, and Telecommunication Media Studies.

Program Requirements

Students must earn a grade of B or better in each course used to meet the requirements. Students who pursue the SCC must complete all requirements prior to graduation.

Department of Economics

The study of economics helps students develop a framework for understanding of how individuals, organizations and societies make choices and how those choices interact to determine the allocation of an economy's limited resources among alternative competing uses. Economists study how these choices are made in a variety of environments and consider how the outcomes vary under alternative forms of economic organization. Economists evaluate the outcomes of an economic system on a scorecard that includes several different criteria such as efficiency, equity, and stability.

The fundamental goal of our curriculum is to introduce students to the economic way of thinking—a particular way of asking questions and analyzing problems. We offer a core set of courses that teach the fundamental theoretical tools of economics, and a set of elective courses that demonstrate how economists apply these tools to study a wide variety of real-world economic issues. A key takeaway for students is a working knowledge of a useful and coherent structural approach to examining current public policy issues and an ability to identify the inherent tradeoffs involved in developing solutions to major social problems.

The economic style of thinking, when combined with training in the required tools of quantitative and qualitative analysis, provides students with a skill set that will serve them well in a wide array of post-graduate pursuits. The banking and financial sectors regularly hire undergraduate economics majors as do management consulting firms. A number of private corporations employ economists to prepare forecasts of future movements in firm costs and profits. Government agencies—local, state, national, international—hire economics majors for positions as budget analysts or government program evaluators. The study of economics also provides sound preparation for graduate school, either a Masters or PhD degree in economics or a professional degree in business, law, or public policy.

- Bachelor of Science in Economics and Master of Science in Economics, 5-Year Degree Program (p. 356)

Minors

- Economics Minor (p. 358)

Economics - BA

The Bachelor of Arts degree program in Economics offers a strong liberal arts curriculum aimed at enhancing students' analytical skills and applications to better understand human behavior.

The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad while focusing on quantitative skills and the development of rational thought and critical thinking. In addition to requiring four

semesters of a college-level foreign language, the Bachelor of Arts degree plan encompasses a broad spectrum of coursework from throughout the College of Arts and Sciences and Texas A&M University. By allowing for flexibility in courses that can be taken within the core curriculum, as well as for general electives, students can achieve a well-rounded education that can help with their future educational and professional goals.

To build a solid base of understanding, students take foundational courses in microeconomics, macroeconomics and mathematics, then refine those skills in statistics and intermediate economic theory classes. In upper-level courses these reasoning abilities are applied to specific situations, with a particular focus on understanding social problems from an economics perspective.

Students who graduate with a Bachelor of Arts degree in Economics have a wide spectrum of career fields to choose from. Many students pursue careers in business, law, government and public policy professions, non-profit organizations and more.

¹ MATH 148, MATH 152, or MATH 172 will be accepted in lieu of MATH 140.

² Students who wish to pursue a graduate degree in Economics (or other STEM Graduate Degree) are highly encouraged to take MATH 151 and MATH 152 in lieu of MATH 140 and MATH 142.

³ Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

⁴ MATH 147, MATH 151, or MATH 171 will be accepted in lieu of MATH 142.

⁵ ECON 323 is a pre-requisite for most ECON electives.

⁶ Select from ECMT 463, ECMT 475; ECON 301-499 (p. 1016).

⁷ ECON 100-499 (p. 1016) and ECMT 100-499 (p. 1016) may not be used to fulfill this requirement.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 36 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for all Economics and Econometrics coursework.

Economics - 5-Year Bachelor of Arts and Master of International Affairs

This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to international economic development along with skills in diplomacy, research, and development of a global perspective.

The combined program between the Department of Economics and The Bush School of Government and Public Service allows undergraduate Economics students to enter the Master of International Affairs Program, with a focus in International Economics and Development, at the beginning of their fourth year at Texas A&M University.

See the MPSA program in the Graduate and Professional Catalog for the MPSA requirements.

Economics - 5-Year Bachelor of Arts and Master of Science in Economics

Within the curriculum of this program, a student will receive rigorous training in economics, econometrics, analytical and quantitative skills in order to prepare them for immediate careers in business or government, or further study in top economics and finance PhD programs.

The Department of Economics offers a 5-year combined degree program that provides the opportunity to earn a Bachelor of Arts in Economics and a Master of Science in Economics with a concentration in either Financial Economics or Financial Econometrics. This Master's degree program was created in response to the increasingly high demand from students seeking a professional master's degree in economics and employers looking for candidates with advanced training.

- ¹⁰ 6 hours will count toward bachelor degree and master degree.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Arts in Economics and the Master of Science in Economics (Non-Thesis Option).

No more than 39 credits in undergraduate Economics and Econometrics can be applied to this degree. A grade of C or higher is required for all undergraduate Economics and Econometrics courses.

Economics - BS

The Bachelor of Science degree in Economics offers a strong liberal arts curriculum aimed at enhancing students' analytical skills and applications to better understand human behavior.

The degree plan is designed to allow opportunities for applied exploration of economic principles and theory through research, internship, and study abroad while focusing on quantitative skills and the development of rational thought and critical thinking. In addition to building skills in social science research and data analysis, the Bachelor of Science degree plan encompasses a broad spectrum of coursework from throughout the College of Arts and Sciences and Texas A&M University. By allowing for flexibility in courses that can be taken within the core curriculum, as well as for general electives, students can achieve a well-rounded education that can help with their future educational and professional goals.

To build a solid base of understanding, students take foundational courses in microeconomics, macroeconomics and mathematics, then refine those skills in statistics and intermediate economic theory classes. In upper-level courses, these reasoning abilities are applied to specific situations with a particular focus on understanding social problems from an economics perspective.

Students who graduate with a Bachelor of Science degree in Economics have a wide spectrum of career fields to choose from. Many students will pursue careers in business, law, finance, the nonprofit sector, and government, public policy and political professions.

¹ MATH 148, MATH 152, MATH 172 will be accepted in lieu of MATH 140.

² MATH 147, MATH 151, MATH 171 will be accepted in lieu of MATH 142.

³ ECON 323 is a pre-requisite for most ECON electives.

⁴ Student must complete ECMT 461 prior to ECMT 463.

⁵ Select from ECMT 475; ECON 301-499 (p. 1016)

⁶ Select any 100-499 course not used elsewhere (except ECMT 100-499 (p. 1016); ECON 100-499 (p. 1016)).

⁷ Course applies toward both degrees.

⁸ Public Service Administration graduate advisor will assist with Public Service Administration course selection for chosen track in graduate program.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 39 credits in economics and econometrics can be applied to this degree. A grade of C or higher is required for all Economics and Econometrics courses.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Science in Economics and the Master of Public Service Administration.

See the MPSA program in the Graduate and Professional catalog for the MPSA requirements.

Economics - 5-Year Bachelor of Science and Master of Science in Economics

Within the curriculum of this program, a student will receive rigorous training in economics, econometrics, analytical and quantitative skills in order to prepare them for immediate careers in business or government, or further study in top economics and finance PhD programs.

The Department of Economics offers a 5-year combined degree program that provides the opportunity to earn a Bachelor of Science in Economics and a Master of Science in Economics with a concentration in either Financial Economics or Financial Econometrics. This Master's degree program was created in response to the increasingly high demand from students seeking a professional master's degree in economics and employers looking for candidates with advanced training.

Program Requirements

¹ MATH 148, MATH 152, or MATH 172 will be accepted in lieu of MATH 140.

² Students who wish to pursue a graduate degree in Economics (or other STEM Graduate Degree) are highly encouraged to select MATH 151 and MATH 152 in lieu of MATH 140 and MATH 142.

³ MATH 147, MATH 151, or MATH 171 will be accepted in lieu of MATH 142.

⁴ Student must complete ECMT 461 or equivalent STAT course (Pre-approved by an advisor) prior to ECMT 463.

⁵ ECON 323 is a pre-requisite for most ECON electives.

⁶ Select from ECMT 475, ECON 301-499 (p. 1016).

⁷ ECON 100-499 (p. 1016) and ECMT 100-499 (p. 1016) may not be used to fulfill this requirement.

⁸ ECON graduate advisor will assist with graduate elective course selection. Select from ECON 607, ECON 611, ECON 612, ECON 614, ECON 617, ECON 618, ECON 633, ECON 680, ECMT 660, ECMT 670, ECMT 673, ECMT 674, ECMT 680.

⁹ 6 hours will count toward bachelor degree and masters degree.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48)

courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Science in Economics and the Master of Science in Economics (Non-Thesis Option).

No more than 39 credits in undergraduate Economics and Econometrics can be applied to this degree. A grade of C or higher is required for all undergraduate Economics and Econometrics courses.

Economics - Minor

A minor in economics provides knowledge and information that will make a student a better-informed consumer and participant in the world economy. It also provides a basis for a better understanding of world events.

The study of economics provides a rigorous structure for decision-making, whether on academic topics or day-to-day activities such as how to divide roommate expenses or how to allocate time between study and recreation. Economics teaches students how to think rationally about problems, a skill that is essential in any profession.

Program Requirements

Must make a grade of C or better in all courses.

Department of English

Contemporary English studies – like the English language itself – has a global reach. Our curriculum is shaped by the flow of English-speaking people and cultural production in English across both time and space, combining historical, linguistic and cultural analysis with creative work in literature, film, and emerging media. The varied interests of our faculty and students include creative writing, rhetoric and discourse studies, gender and women's studies, film studies, digital humanities, health humanities, science fiction, and the full range of literatures and varieties of English, including African American, the African Diaspora, Latinx, Asian American, Native American, and South Asian studies.

Through these wide and rich areas of inquiry, we impart key skills – thinking critically, analyzing complex texts and contexts, communicating persuasively, and appreciating the aesthetic and cultural value of literary and multimedia texts – that prepare our students for success in the workplace and in life.

The English major and minors offer flexibility by enabling students to pursue their own interests while acquiring important analytic and writing skills and discovering the riches of literature. The education English

students receive prepares them for careers in technical writing, editing and publishing, government services, public relations, teaching, and many other professions.

We encourage English students to pursue research opportunities, to perform and publish their creative work, and to seek internships to build on what they are learning and to prepare for their future careers. We make a positive impact at home and abroad through our internationally recognized faculty and through the success of our students in academia, industry, and the professions.

Teacher Certification Programs in English

Teacher Certification in English Language Arts/Reading - OPTION II (Secondary)

Students desiring certification by Option II to teach English language arts and reading in the secondary schools of Texas should consult an undergraduate English advisor as early as possible. Requirements include 27 semester hours in literature, language, reading, and rhetoric and composition (an optional 24-30 hours in a second teaching field is possible); and professional education courses.

Degree and Certification Program for Middle School in English Language Arts/Reading

The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires 36 hours of literature, linguistics, composition and rhetoric and 15 hours of reading along with an 18-hour professional education component.

All students seeking certification should consult an undergraduate English advisor for additional information.

Majors

- Bachelor of Arts in English (p. 360)
- Bachelor of Arts in English, Middle School Teacher Certification (p. 362)
- Bachelor of Arts in English and Master of Arts in English, 5-Year Degree Program (p. 364)

Minors

- English Minor (p. 366)
- Health Humanities Minor (p. 366)
- Professional Writing Minor (p. 367)
- Science Fiction and Fantasy Studies Minor (p. 368)

English - BA

The BA in English allows students to develop their own areas of expertise through concentrations in areas such as literature, composition and rhetoric, creative writing, science fiction and fantasy studies, and film.

The Department of English is dedicated to the study of literatures and cultures of those parts of the world in which English is a primary language. Our curriculum is shaped by the flow of English-speaking people and cultural production in English across both time and space, combining historical, linguistic and cultural analysis with creative work in literature, film, and emerging media. The varied interests of our faculty and students include creative writing, rhetoric and discourse studies, gender and women's studies, film studies, digital humanities, health humanities, science fiction, and the full range of literatures and varieties

of English, including African American, the African Diaspora, Latinx, Asian American, Native American, and South Asian studies.

Students who major in English learn how to communicate effectively and persuasively; develop writing skills (including in technical and business writing, and/or creative writing); learn textual analysis and effective research methods; and strengthen their critical thinking skills. This degree prepares students for a variety of careers including education, law, technical writing, publishing, entertainment, management, marketing and advertising, counseling and medicine.

¹ Must make grade of C or better.

² Complete 14 hours of a foreign language (<https://catalog.tamu.edu/undergraduate/liberal-arts/>) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

³ Middle School Certificate seekers should consult an undergraduate English advisor for required courses.

⁴ At least 3 hours must be in MATH. Three hours may be PHIL 240.

⁵ Select from ENGL 100-499 (p. 1021) and LING 200-499 (p. 1115). (except ENGL 103, ENGL 104, and ENGL 203).

⁶ Select from any 100-499 course not used elsewhere (except ENGL 100-299 (p. 1021)). Up to 18 hours of ENGL 300-499 (p. 1021) courses may be used. Only 14 hours of KINE 199; AERS 100-499 (p. 900),

MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used towards general electives.

Up to 51 credits in English can be applied to the degree; at least 21 credits must be in literature. A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Other courses may qualify for the following categories. All courses are to be selected with the approval of the student's academic advisor. The courses incorporate University Core Curriculum (p. 26) requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 49) and Cultural Discourse (p. 48) graduation requirements. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

English majors are advised, but not required, to select a minor field of study. Students who elect to complete a minor should contact the department or program that offers the minor to determine the requirements for that minor.

English - BA, Middle School Teacher Certification

Students in this degree program specialize in teaching-specific subjects, cultivate excellent communication skills, and develop an understanding of the social and intellectual development of children.

The Department of English offers a degree and certification program in English language arts/reading for prospective middle-school teachers. This program requires hours of major coursework in English, and hours of supporting specialized coursework in specific areas of educational planning and teaching. This certification is a field-based program that requires students spend extensive time in middle schools.

All students seeking certification should consult an undergraduate English advisor for additional information.

¹ Minimum grade of C required.

² Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

³ At least 3 hours must be in MATH. Three hours may be PHIL 240.

⁴ Select from ENGL 100-499 (p. 1021) and LING 200-499 (p. 1115). (except ENGL 103, ENGL 104, and ENGL 203).

⁵ Select from any 100-499 course not used elsewhere (except ENGL 100-299 (p. 1021)).

Up to 36 credits in English can be applied to the degree; at least 21 credits must be in literature. A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Other courses may qualify for the following categories. All courses are to be selected with the approval of the student's academic advisor. The following lists incorporate University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 49) and Cultural Discourse (p. 48) graduation requirements. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

English - 5-Year Bachelor of Arts and Master of Arts in English

This program offers a five-year path to a BA and MA in English, providing advanced training for teaching, writing-centered careers, or preparation for doctoral studies.

The Department of English offers a five-year combined degree program that provides the opportunity to earn a Bachelor of Arts in English and a Master of Arts in English.

In this program, the undergraduate degree requirements are slightly modified to require more theory and methods courses in an effort to prepare students for the more rigorous masters-level coursework.

At the completion of the degree, students are well-prepared to apply for doctoral programs in English and related humanities, positions teaching composition, and editorial and other writing-centered employment.

Students interested in this program will apply during the fall of their junior year and, if admitted, begin taking masters-level courses in the fall of their senior year with an undergraduate classification.

¹ Must make grade of C or better.

² Complete 14 hours of a foreign language (<https://catalog.tamu.edu/undergraduate/liberal-arts/>) through the intermediate level. If you choose to enroll in a language you have studies previously without receiving college credit, you must first take a placement test. See academic advisor.

³ At least 3 hours must be in MATH. Three hours may be PHIL 240.

⁴ Select from any 100-499 course not used elsewhere (except ENGL 100-299 (p. 1021)). Up to 18 hours of ENGL 300-499 (p. 1021) courses may be used. Only 14 hours of KINE 199; AERS 100-499 (p. 900), MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used towards general electives.

⁵ Select from ENGL 100-499 (p. 1021) and LING 200-499 (p. 1115). (except ENGL 103, ENGL 104, and ENGL 203).

⁶ Select from ENGL 608, ENGL 610/LING 610, ENGL 613, ENGL 618, ENGL 634, ENGL 650, ENGL 654/COMM 654, ENGL 655/COMM 655, and ENGL 671. Each course can only be taken once for credit.

⁷ Select from ENGL 600-699 (<https://catalog.tamu.edu/graduate/course-descriptions/engl/>) (excluding ENGL 691), LING 600-699 (<https://catalog.tamu.edu/graduate/course-descriptions/ling/>). See graduate advisor.

A grade of C or higher is required for a course to be counted in the major. For residency, a student must have at least 12 hours in 300- or 400-level English classes from Texas A&M University.

The program includes a total of 150 hours, of which up to 0 hours of graduate-level coursework may be applied toward both the Bachelor of Arts in English and the Master of Arts in English (Thesis).

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Other courses may qualify for the following categories. All courses are to be selected with the approval of the student's academic advisor. The courses incorporate University Core Curriculum (p. 26) requirements. No course can be counted in more than one category, except as allowed in the minor field of study and the International and Cultural Diversity (p. 49) and Cultural Discourse (p. 48) graduation requirements. A

minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University, with at least 12 of those hours being in the major.

English - Minor

An English minor teaches students to communicate clearly and effectively, learn how to critically read and examine complex texts, build effective arguments, and recognize other points of view.

The minor in English is offered by the Department of English and is open to all students. Students with a minor in English cultivate expertise in different literary forms, traditions, and approaches. Students have the opportunity to take courses in creative writing, rhetoric, science fiction and fantasy, African-American and Latinx literature, gender and sexuality studies, and digital humanities. The broadly applicable skills gained with this minor support and enhance the academic development of students who want to attend law or medical school, work in marketing or advertising, teach at a variety of levels, or work in STEM fields. Whatever their post-graduation plans, the written communication and analytical skills of English minors are essential for thriving in all endeavors.

Program Requirements

Code	Title	Semester Credit Hours
ENGL 100-499 (p. 1021)		9
ENGL 300-499 (p. 1021)		6
ENGL 400-499 (p. 1021)		3
Total Semester Credit Hours		18

A grade of C or higher is required for a course to be counted in the minor field of study.

Health Humanities - Minor

The minor in health humanities provides a critically-engaged, humanities-led approach to understanding health and illness.

The cross-disciplinary field of Health Humanities is growing in popularity at the baccalaureate level as more and more students realize the importance of having a critically-engaged, humanities-led approach to understanding health and illness. This minor fills the growing need by offering students a strong grounding in the humanistic study of health issues. Required courses develop skills of cross-disciplinary health studies in English, with students completing nine hours in courses such as narrative medicine and graphic medicine, literature and medicine, and health rhetoric. Students take an additional nine hours of electives, including courses that engage the ethics and philosophy of care, gender and race-based disparities in health, cross-cultural health communication, as well as social science and science electives. Students finish the minor with a required senior capstone course, which requires them to develop a unique Health Humanities research project related to their ongoing professional and educational goals. This minor is conceptualized with a critical framework: the coursework encourages students not only to take an interdisciplinary approach to understanding current and historical issues related to health, but also to critically reflect upon the methods of study they employ, and the future of Health Humanities as a field.

Program Requirements

¹ At least three credit hours must be taken at the 300-level or above.

² Topic must be related to Health Humanities. Consult with minor advisor.

³ If enrolled in a one credit hour class, student will have to select more than three courses from the list to meet the 9 hour elective requirement to complete the minor.

Professional Writing - Minor

Improve your job opportunities by developing technical and professional writing skills. Through this minor, you will learn how to effectively communicate complex information.

The cross-disciplinary field of Professional Writing is growing in popularity as the variety of genres and forms of communication increase, and as it becomes increasingly necessary for professionals and content creators to possess interdisciplinary backgrounds and skill sets. This minor fills a growing need by offering students a strong grounding in technical and professional writing with consideration of new media and technologies, which will improve their job opportunities. Required English courses focus on writing for professional and rhetorical situations, with students completing nine hours in courses such as technical and professional writing, technical editing, and modern rhetorical theory. The required coursework across disciplines encourages students to take a multifaceted approach to understanding professional and technical writing and its practical applications. Students take an additional nine hours of electives, including courses that incorporate interdisciplinary approaches to fundamental concepts of technical and professional communication through writing. This approach will allow them not only to effectively communicate complex information, but also to critically reflect upon the methods of study they employ, and the future of technical and professional writing as a field.

Program Requirements

¹ At least three credit hours must be taken at the 300-level or above.

Science Fiction and Fantasy Studies-Minor

This minor offers critical explorations of these two genres and the different ways that they have contributed to our understanding of humanity, our relationship to technology and science, our desire to explore other worlds and to imagine utopian societies.

The Science Fiction and Fantasy Studies minor is offered by the Department of English and is open to all undergraduate majors. Because these genres are rooted in visions of alterity, different futures and different worlds, these genres create templates for the new human experiences made possible by encounters with the different, unique, and strange.

The Science Fiction and Fantasy Studies interdisciplinary minor teaches students to communicate clearly and effectively, to read critically and examine complex texts and artifacts, to build effective arguments, and to recognize other points of view. These broadly applicable skills will not only enhance the academic development of liberal arts students, but they are also crucial for graduate school and for those who pursue a career in engineering and other STEM fields.

Program Requirements

Code	Title	Semester Credit Hours

Department of Geography

Geography is the study of the relationships between people and their environment, relationships that vary from place to place across the Earth. Geography students assess those factors responsible for the variable and changing character of Earth's systems, which over time have been transformed into human habitat. Geography integrates physical science, social science, and the humanities. The department requires that students understand both the physical and human components, and develop the spatial analytical skills to study these systems.

Physical geography emphasizes a systematic and interdisciplinary approach to the study of landforms, climate, soils, and vegetation. Human geography seeks to describe and explain the spatial patterns of human activities on Earth. These range from economic activities such as the distribution of retail sales and industrial production to cultural landscapes, which often have strong historical roots. Geographic Information Systems (GIS), quantitative methods, and remote sensing provide geographers with the analytical techniques to study spatial phenomena.

Minors

- Geographic Information Science and Technology Minor (p. 376)
- Geography Minor (p. 377)

Geographic Information Science and Technology - BS

The BS degree in Geographic Information Science and Technology (GIST) provides students a rigorous and modern-day education and training in GIST with applications in physical and human geography.

Employers require problem solvers not button pushers, to address problems in various application domains. The degree requires 53 hours of coursework, which is designed to:

- Provide modern-day exposure to the rapidly changing field of GIST.
- Balance education and training with a focus on competency.
- Provide application and problem-solving experiences.
- Support student activities and research.
- Provide students with professional experience.
- Produce high-quality geographers with strong GIST knowledge and skills.

Geospatial technology graduates are in extremely high demand and, according to the U.S. Department of Labor, are one of the highest growth areas in the federal government, particularly in homeland security activities, as well as in energy, software and engineering firms, biomedical and biohazard research, among many others. A 35% annual rate of

growth in geospatial technology-related degrees are projected by the U.S. Department of Labor. Students have employment opportunities with the following corporate and government entities:

- Government agencies (federal, state, county, and city): management and planning of urban infrastructure, inventory and assessment of natural resources including agriculture, forestry, and water resources.
- Energy industry: assessing biofuel production and identifying locations suitable for renewable energy resources and mineral exploration.
- Health science industry: determine hotspots of health events and explore causes.
- Military and intelligence community: numerous opportunities exist in military branches and agencies such as the Central Intelligence Agency, National Security Agency, and other intelligence organizations.
- Commercial industries: business analytics and marketing, as spatial information can be used to target marketing campaigns, and suitable site assessment to locate companies.
- Geospatial industries: software development, geotechnical engineering, and technology development.

⁵ Select from GEOG 461, GEOG 475, GEOG 479. A course used to fulfill this requirement cannot also be counted as fulfilling a GIST techniques elective.

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, 3 hours of International and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 48) must be incorporated into the degree.

Geographic Information Science and Technology - 5-Year Bachelor of Science and Master of Science in Geography

Intended for the highly motivated, exceptional students with an interest in research, this accelerated program provides students with rigorous and modern-day skills in GIST, combined with specialized expertise in human geography, physical geography, and human-environment interactions.

This 5-year program combines our bachelor of science in Geographic Information Science and Technology (GIST) with our thesis-based master of science in geography, providing a fast track to an advanced degree. In addition to preparing students to succeed in private industry, the public sector, education, and many other opportunities available to geographers, the thesis-based master of science degree also provides for career options in research, including doctoral programs in geography and many other related disciplines.

Application and Eligibility

- Applications to the combined program will be submitted by June 15 after the completion of the student's junior year, after 90 hours of coursework are completed. Applications submitted after that time will be evaluated on a case-by-case basis.
- Students must identify a faculty member from Geography who is willing to serve as the advisor and chair of the thesis committee.
- The bachelor's and master's degrees will be conferred concurrently after completion of 150 hours, and satisfying their master's requirements which include successfully defending their thesis.
- Students not admitted to or wishing to discontinue the graduate portion of the 5-year program will earn their bachelor of science degree in GIST after successfully completing 120 hours of coursework.

⁵ Select from GEOG 461, GEOG 475, GEOG 479. A course used to fulfill this requirement cannot also be counted as fulfilling a GIST techniques elective.

⁶ The MS degree non-thesis option is 36 total hours, with 6 hours double-counting with undergraduate general electives. The MS thesis option is 32 hours, with 2 hours double-counting with general electives. Graduate courses may be any 600-level geography course (except GEOG 651, GEOG 659, GEOG 660, GEOG 676, or GEOG 678,) or from a supporting area, chosen with approval of the student's advisory committee. Students in the thesis option may include up to 8 hours of GEOG 691 Research.

Two courses in the degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, 3 hours of International and Cultural Diversity (p. 49) and 3 hours of Cultural Discourse (p. 48) must be incorporated into the degree.

The program includes a total of 152 (thesis option) or 156 (non-thesis option) hours, of which up to 2 (thesis option) or 6 (non-thesis option) hours may be applied toward both the Bachelor of Science in Geographic Information Science and Technology and the Master of Science in Geography.

Geography - BS

Explore the physical and human environment with the interdisciplinary Bachelor of Science in Geography.

The Department of Geography offers exciting opportunities to explore the physical and human environment in the field, laboratory, and classroom. Students engage with faculty to examine the physical, environmental, cultural, economic, political, and social processes that drive our world.

This Bachelor of Science degree requires coursework taken in Geography, including a set of foundational courses followed by upper-level courses in Human Geography, Geography of the Natural Environment, Human-Environment Interactions, or Geographic Information Science and Technology. The degree offers the flexibility to explore double majors and minors in complementary fields.

Using geospatial methods, geography graduates are uniquely skilled to draw connections between human and physical processes, providing them career options in government agencies, industries, and businesses aimed at social services, research, natural resources, and spatial analysis. Geographers also often work in education, development, and private consulting.

Geography - 5-Year Bachelor of Science and Master of Geoscience in Geoscience

Intended for the highly motivated, exceptional individuals, this accelerated program prepares students in human geography, physical geography, and human-environment interactions, while also providing specialized geospatial skills.

This 5-year program combines our bachelor of science in Geography with our non-thesis master of geoscience, providing a fast track to an advanced, professional degree. Designed to emulate the Geographic Information Science and Technology track of our professional MGSc degree, the graduate portion of this 5-year program also includes some online (distance education) courses and prepares graduates to drive innovation and apply modern technologies to careers in nonprofit, government, or business sectors.

Application and Eligibility

- Applications to the combined program will be submitted by June 15, after the completion of the student's junior year, after 90 hours of coursework are completed. Applications submitted after that time will be evaluated on a case-by-case basis.

- A faculty advisor will be assigned to each student. Students may seek additional mentors, but a formal committee is not required.
- The bachelor's and master's degrees will be conferred concurrently after completion of 150 hours, and successful completion of the final project and final exam.
- Students not admitted to or wishing to discontinue the graduate portion of the 5-year program will earn their bachelor of science degree in Geography after successfully completing 120 hours of coursework.

The MS with Thesis Option is 32 hours, with 2 hours double-counting with General Electives. Graduate courses may be any 600-level geography course (except GEOG 660) or from a supporting area, chosen with approval of the student's advisory committee. Students in the Thesis Option may include up to 8 hours of GEOG 691 Research.

Two courses in the bachelor of science degree plan must be Writing Intensive courses designated by the department in the schedule of classes. Also, International and Cultural Diversity elective (3 hours) and Cultural Discourse (3 hours) must be incorporated into the degree.

The program includes a total of 152 (thesis option) or 156 (non-thesis option) hours, of which up to 2 (thesis option) or 6 (non-thesis option) hours may be applied toward both the Bachelor of Science in Geography and the Master of Science in Geography.

Geographic Information Science and Technology - Minor

Geographic Information Science and Technology (GIST) is used to solve geospatial problems associated with, for example, land administration, environment and natural resource management, planning and population studies, as well as traditional surveying and mapping applications. GIST applies geographic information science (GIS), remote sensing, and global positioning mapping to collect, analyze, and display spatial information.

Program Requirements

Code	Title	Semester Credit Hours
GEOG 352/ GEOL 352	GNSS in the Geosciences	3
GEOG 361	Remote Sensing in Geosciences ¹	4
GEOG 390	Principles of Geographic Information Systems	4
Select one of the following:		4
GEOG 392	GIS Programming	
GEOG 461	Digital Image Processing in the Geosciences	
GEOG 475	Advanced Topics in GIS (Geographic Information Systems) ²	
GEOG 477	Terrain Analysis and Mapping	
GEOG 478	WebGIS	
GEOG 479	Principles of Geocomputation	
Total Semester Credit Hours		15

¹ Fall semester course

² Spring semester course

General Requirements

1. Geographic Information Science and Technology (GIST): minimum of 15 credits in the discipline at 300-400 level.
2. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
3. Students must meet with the department's advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
4. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

Geography - Minor

Geography coursework for this minor integrates physical sciences, social sciences, and the humanities.

Geography explores the relationships between people and their environment, which vary from place to place across the Earth. Geographers compare and quantify the drivers of the variable and changing characteristics of Earth's systems, which have been transformed into human habitat and are thus undergoing change.

Program Requirements

Code	Title	Semester Credit Hours
GEOG 201	Introduction to Human Geography	3
GEOG 203 & GEOG 213	Planet Earth and Planet Earth Lab	4
Select one of the following:		3
400-level GEOG course (p. 1055)		
Electives		6

GEOG 450	Field Geography	
GEOG 489	Special Topics in...	
Total Semester Credit Hours		16

The selection of courses must be made in agreement with the geography department advisor for minor programs.

Minimum GPA of 2.000 must be maintained in the minor coursework. 6 hours must be upper division courses, 3 of which must be at the 400-level.

General Requirements

1. Geography Minor: minimum of 16 credits in the discipline with at least 6 hours in upper-division courses, 3 hours of which must be at the 400 level.
2. Minimum of 6 credits must be taken in residence at either Texas A&M University or Texas A&M at Galveston.
3. Students must meet with the department's advisor for minor programs for approval of courses selected (any substitutions must be approved by the department head).
4. Minimum cumulative GPR of 2.0 must be achieved for all courses in the minor.

Department of Geology and Geophysics

Geology

The field of geology includes the scientific study of all aspects of the solid Earth and the fluids within it, including the fundamental processes that shape it and the stewardship of its resources that benefits society. The undergraduate curricula in geology foster critical thinking, and the application of scientific skills to the study of Earth materials (rocks, minerals, fossils, structures, landforms and subsurface fluids) and geologic processes. Courses provide a broad background in geology, emphasize knowledge transfer from other sciences to geologic problems and emphasize hands-on application of knowledge through laboratories and field trips and promote application to practical problems in environmental management and energy science and transition.

The Department of Geology and Geophysics offers two undergraduate programs in geology, the Bachelor of Arts and the Bachelor of Science. The BS program is appropriate for students seeking careers as geologists or preparing for graduate school in geology, whereas the BA program is designed for students wishing to combine geology with other disciplines.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics).

Geophysics

Geophysics includes all areas of scientific inquiry that deal with the physical state of Earth and other planets and the dynamic processes that act on and within planetary bodies. The Bachelor of Science in Geophysics is for students who wish to combine a proficiency in mathematics with an interest in Earth. The objective of this program is to develop a physically-motivated approach to the study of Earth phenomena, with an emphasis on collection and analysis of geophysical data for probing and imaging the Earth's interior. Graduates will be well-prepared for careers in the energy and environmental industries, and for advanced study at top-ranked graduate programs.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics).

Minor in Geology

The Department of Geology and Geophysics offers a minor in Geology. The minor provides opportunities for broadening a student's background and tailoring the curriculum to specific career goals. A minor in Geology may be especially beneficial to students majoring in fields that deal directly or indirectly with geological processes, such as agriculture, anthropology, archaeology, architecture, business, education, engineering, and soil science.

Majors

- Bachelor of Arts in Geology (p. 379)
- Bachelor of Science in Geology (p. 382)
- Bachelor of Science in Geology and Master of Ocean Science and Technology, 5-Year Degree Program (p. 383)
- Bachelor of Science in Geology and Master of Science in Geology, 5-Year Degree Program (p. 385)
- Bachelor of Science in Geophysics (p. 386)
- Bachelor of Science in Geophysics and Master of Science in Geophysics, 5-Year Degree Program (p. 387)

Minors

- Geology Minor (p. 388)

Geology - BA

The Bachelor of Arts in Geology provides students the skills to understand Earth systems and the interactions between human societies and Earth processes.

The BA degree is designed for students who will apply a foundation in geologic knowledge to careers such as environmental law, science journalism, non-profit organizations, business, K-12 science education, resource management, sustainability, environmental monitoring, conservation, public health, public policy, and public service. The B.A. in Geology also allows students to build an interdisciplinary degree combining geology with other disciplines, such as biological, anthropological and social disciplines in preparation for interdisciplinary graduate work.

Students will supplement their geology coursework with courses from a disciplinary theme that aligns with their career goals. Disciplinary themes are elective courses designed to prepare students for professional programs and employment in careers that would benefit from a solid geological and STEM foundation. Theme courses may be combined with additional electives to form a minor in other programs, however, completion of theme courses does not in itself confer a minor. Application to most minor programs is made through the department that houses the minor. The BA degree requires a minimum of 18 credit hours in a disciplinary theme. Themes not listed can be approved in consultation with a Department of Geology and Geophysics Faculty Program Coordinator.

Program Requirements

First Year

¹ See theme descriptions and lists of approved theme courses below.

² Three hours must be selected from courses that also satisfy the International and Cultural Diversity requirement and three hours must be selected from courses that also satisfy the Cultural Discourse requirement.

³ Select from GEOL 207 or GEOL 208, GEOL 300-499 (p. 1059) (except GEOL 481, GEOL 485), GEOP 300-499 (p. 1062) (except GEOP 485). No more than 3 hours of GEOL 491 or GEOP 491 may apply toward this requirement.

⁴ Select from: ATMO 444; ENSS 430, ENSS 431, GEOG 205, GEOG 304, GEOG 309, GEOG 330, GEOG 331, GEOG 352/GEOL 352, GEOG 360, GEOG 361, GEOG 401, GEOG 410/OCNG 412, GEOG 430, GEOL 442/ GEOG 442, OCNG 251, OCNG 252, OCNG 320, OCNG 330, OCNG 340, OCNG 350, OCNG 469.

⁵ General electives may not include AERS 100-499 (p. 900); ENGL 103; GEOL 101-104 (p. 1059); KINE 199; MATH 102, MATH 142, MATH 150, MATH 151, MATH 168, MATH 171; MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237).

Approved Theme Courses

Theme courses can be combined with electives to form a minor in other programs. Themes not listed can be approved in consultation with a Department of Geology and Geophysics Faculty Program Coordinator.

Business and Finance Theme

This theme is available to students who have also declared a minor in Business (p. 504) from the Mays Business School and prepares them for careers in non-profit organizations, resource management, sustainability, public service, and marketing.

Code	Title	Semester Credit Hours
Select 18 hours from:		18
ACCT 209	Survey of Accounting Principles	
ACCT 210	Survey of Managerial and Cost Accounting Principles	
ISTM 209	Business Information Systems Concepts	
FINC 409	Survey of Finance Principles	
MGMT 209	Principles of Business Regulations and Law	
MGMT 309	Survey of Management	
MKTG 409	Principles of Marketing	
Total Semester Credit Hours		18

Paleontology and Paleoecology Theme

This theme is designed for students interested in paleontology, who want to take advantage of the broad spectrum of evolution and ecology courses available in the College of Arts and Sciences and College of Agriculture and Life Sciences. It prepares students for careers in science journalism, resource management, and conservation paleobiology. Students should take BIOL 111, BIOL 112, and BIOL 214 early because they are prerequisites for many of the upper-level courses.

Code	Title	Semester Credit Hours
Select 18 hours from:		18
BIOL 111	Introductory Biology I	
BIOL 112	Introductory Biology II	
BIOL 214	Genes, Ecology and Evolution	
BIOL 318	Chordate Anatomy	
BIOL 335	Invertebrate Zoology	
or ECCB 205	or Diversity and Evolution of Invertebrates	
BIOL 357	Ecology	
or ECCB 205	or Fundamentals of Ecology	
BIOL 440	Marine Biology	
ECCB 303	Fire Ecology and Biogeochemistry	
ECCB 315	Herpetology	
ECCB 320	Ecosystem Restoration and Management	
ECCB 401	General Mammalogy	
ECCB 402	General Ornithology	
RWFM 316	Range Ecology	
RWFM 404	Aquatic Ecosystems	
Total Semester Credit Hours		18

Geospatial Theme

This theme is designed for students who want to combine geology and Geographic Information Systems. It prepares students for careers in resource management, sustainability, environmental conservation, and public service. Students completing appropriate course work in this theme may be eligible for a GIST minor (<https://catalog.tamu.edu/undergraduate/geosciences/geography/geographic-information-science-and-technology-minor/>).

Code	Title	Semester Credit Hours
Select 18 hours from:		18
GEOG 352/ GEOL 352	GNSS in the Geosciences	
GEOG 361	Remote Sensing in Geosciences	
GEOG 390	Principles of Geographic Information Systems	
GEOG 392	GIS Programming	
GEOG 461	Digital Image Processing in the Geosciences	
GEOG 475	Advanced Topics in GIS (Geographic Information Systems)	
GEOG 477	Terrain Analysis and Mapping	
GEOG 478	WebGIS	
GEOG 479	Principles of Geocomputation	
Total Semester Credit Hours		18

Geology of the Human Past Theme

This theme is designed for students interested in geology, anthropology, and human evolution. It prepares students for careers in science journalism, government agencies, state and national parks, biomedical technology and research, and forensic science. In this theme, ANTH 225

and ANTH 226 are prerequisites for some of the upper-level anthropology courses, and BIOL 111 and BIOL 112 are prerequisites for BIOL 214.

Code	Title	Semester Credit Hours
Select 18 hours from:		18
ANTH 204	The Prehistoric World	
ANTH 225	Introduction to Biological Anthropology	
ANTH 226	Introduction to Biological Anthropology Laboratory	
ANTH 312	Fossil Evidence of Human Evolution	
ANTH 401	Ice Age Humans in North America	
ANTH 405	Introduction to the Primates	
ANTH 423	Bioarchaeology	
ANTH 425	Human Osteology	
ANTH 427	Human Biological Variation	
ANTH 461	Environmental Archaeology	
BIOL 111	Introductory Biology I	
BIOL 112	Introductory Biology II	
BIOL 214	Genes, Ecology and Evolution	
Total Semester Credit Hours		18

Pre-Law Theme

This theme is designed for students interested in environmental, land use, and water law. It prepares students for law school and for careers in science journalism, environmental conservation, and public service.

Code	Title	Semester Credit Hours
Select 18 hours from:		18
COMM 203	Public Speaking	
COMM 243	Argumentation and Debate	
COMM 325	Persuasion	
FIVS 205	Introduction to Forensic and Investigative Sciences

POLS 359	American Political Thought	
Total Semester Credit Hours		18

Life Sciences Theme

This theme is designed for students interested in geology who wish to pursue medical, physiological, and related life-science careers.

The courses listed may lead to a Pre-Medicine minor (<https://catalog.tamu.edu/undergraduate/science/biology/pre-medicine-minor/>) if additional requirements are met. Students interested in a Pre-Medicine minor should fulfill their Communications elective with a second ENGL course and take 6 hours of upper-level biology as their two general elective courses. Students in this theme should plan to take BIOL 111, BIOL 112 and BIOL 213 in this sequence, early in their degree program.

Code	Title	Semester Credit Hours
Select 18 hours from:		18

Secondary Education Theme

This theme helps to prepare students for pre-college teaching. Most of the courses in this theme require Junior or Senior classification and must be taken in the order listed below. However, completion of these courses does not in itself confer a teacher certification. Students entering this theme wishing to earn teacher certification should consult with a teaching certification advisor.

Code	Title	Semester Credit Hours
INST 210	Understanding Special Populations	3
INST 222	Foundations of Education in a Multicultural Society	3
or TEFB 273	or Introduction to Culture, Community, Society and Schools	
RDNG 465	Reading in the Middle and Secondary Grades	3
or RDNG 372	or Reading and Writing across the Middle Grades Curriculum

TEFB 324	Teaching Skills II	3
TEFB 406	Science in the Middle and Secondary School	3
or TEFB 407	or Mathematics in the Middle and Senior School	
Total Semester Credit Hours		18

Geology - BS

This program provides students with a strong foundation in geology as well as a background in other sciences and math, preparing students for careers in the environmental and energy industries, federal and state agencies, and private sector and nonprofit organizations.

The Bachelor of Science (BS) in Geology also prepares students for advanced study in graduate programs. The first two years of the BS program in Geology provide students with the basics of geology and the supporting fields of chemistry, physics and mathematics. The junior and senior years involve more advanced study in the subfields of geology and provide the opportunity for concentrated study in specific disciplines through the selection of technical electives. The Geology and Geophysics Department offers summer field camp (GEOL 350) in the Western US, in which students apply their geologic knowledge to collecting data and solving real problems. Seniors will participate in a group research capstone course (GEOL 450), in which they work in teams with a faculty advisor to solve a current problem and communicate their findings and experience. Students also have opportunities to become involved in

individual research projects with faculty members and can receive course credit for this activity through GEOL 291 and GEOL 491.

The BS in Geology is the appropriate degree for students intending to pursue graduate study in geology and for those seeking starting positions in the energy industry, environmental consulting, and as professional geologists in government and non-profit sectors. The required courses are supplemented by electives that prepare students for chosen career paths and graduate study within particular subfields.

Some of society's most pressing problems, including groundwater contamination and remediation, water resources, and geologic hazards such as landslides, flooding and subsidence are addressed in the field of environmental geology. Environmental geologists typically find careers with environmental and engineering consulting companies and other industrial corporations, governmental agencies or academia. Students are well-prepared for the Association of State Boards of Geology (ASBOG) Fundamentals of Geology professional licensing exam. Specific elective classes recommended include GEOL 351, GEOL 410, GEOL 412, GEOL 420, GEOL 440, GEOG 410/OCNG 412 and approved classes in other departments including Soil Science, Chemistry, Physics and Civil Engineering. Geologists may also be employed in the energy industry; recommended classes include GEOL 301, GEOL 404, GEOL 416, GEOP 313. Qualified students (GPA of 3.0 or higher with dean's permission) may also take related graduate courses during the senior year.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics). Some courses require field trips.

Geology - 5-Year Bachelor of Science and Master of Ocean Science and Technology

This program offers qualified students the opportunity to complete the Bachelor of Science (BS) degree in the Department of Geology and Geophysics and the non-thesis Master of Ocean Science and Technology in the Department of Oceanography in five years.

The concurrent degree program will enable motivated students to coordinate the required BS coursework and Master of Ocean Science and Technology coursework to complete the required credit hours for each degree without diminishing scope or quality of work.

Application and Eligibility:

- Applications to the combined program will be submitted by June 15 after the completion of the student's junior year. Applications submitted after that time will be evaluated on a case by case basis. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- Applicants must have a minimum undergraduate GPA of 3.25. Applicants should also earn a C or better in all Chemistry, Calculus and Physics courses. Once admitted to the program, students must maintain a minimum 3.0 GPA on all graduate coursework.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor's and Master's degrees. Students will graduate at the completion of the 5th year in the combined program coursework (150 credit hours) with both Bachelor's and Master's degrees.
- Students admitted to the program will change from U4 to G7 status when they are admitted having completed at least 90 hours (end of spring semester, year 3).
- Students not accepted or not allowed to continue with the combined program will complete the 120-hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

For additional information, please visit the Master of Ocean Science and Technology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/oceanography/most/>) catalog page.

Program Requirements

First Year**Fall**

Advanced specialized OCNG graduate course		3

Semester Credit Hours 12

Total Semester Credit Hours 150

¹ The Graduation requirements include a requirement for three hours of International and Cultural Diversity courses and three hours of Cultural Discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

² Any science, math or engineering course that augments the degree with the approval of the advisor.

³ Graduate courses may be in Geology, Geophysics or a supporting math or science area, chosen with approval of the student's advisory committee. Students in the Thesis Option may include up to 8 hours of Research courses.

⁴ Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (OCNG 404/OCNG 604; OCNG 470/OCNG 655)

⁵ The MS degree Non-Thesis Option is 36 total hours, with 6 hours double-counting with the undergraduate Technical Electives. OCNG 608 and OCNG 661 hours are applied toward both the Bachelor of Science in Geology and the Master of Ocean Science and Technology.

Any of the required courses may be taken during the Summer Sessions to diminish the heavy semester loads during Years 2 and 3.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Science in Geology and the Master of Ocean Science and Technology.

Geology - 5-Year Bachelor of Science and Master of Science in Geology

This program is designed to quickly prepare exceptional students who would like to either enter into the job market with an advanced degree or apply to PhD programs.

The combined program in Geology is a 5-year path leading to a Bachelor of Science (BS) and a Master of Science (MS) in Geology. Because the MS degree requires a thesis, it is highly recommended that interested students become involved in research project early in the undergraduate career. Areas of opportunity for research at both the undergraduate and MS levels include groundwater flow and use, paleontology and paleoecology, stratigraphy, structural geology, tectonophysics, petrology, geomorphology, environmental geology and geochemistry.

Application and Eligibility

- Students may apply for entrance to the graduate program when they reach 90 hours applied to their degree program, normally in the spring of their junior year.
- Applicants to this program are not required to submit GRE, but they must submit two letters of advocacy from faculty members, one of whom is willing to serve as the MS thesis advisor.
- Students admitted into the combined program must finish the entire 150 credit hours to obtain both the Bachelor's and Master's degrees. These students will be conferred with two degrees once they complete all requirements.
- Students not accepted into the combined program will complete the 120 hour Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

¹ The Graduation requirements include a requirement for three hours of International and Cultural Diversity courses and three hours of Cultural Discourse courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

² Any science, math or engineering course that augments the degree with the approval of the advisor. At least four credits should be GEOL 491 Research.

³ The MS degree Non-Thesis Option is 36 total hours, with 6 hours double-counting with the undergraduate Technical Electives. The MS with Thesis Option is 32 hours, with 2 hours double-counting with Technical Electives. Graduate courses may be in Geology, Geophysics or a supporting math or science area, chosen with approval of the student's advisory committee. Students in the Thesis Option may include up to 8 hours of Research courses.

The program includes a total of 152 or 156 hours which up to 2 or 6 hours may be applied toward both the Bachelor of Science in Geology and the Master of Science in Geology.

Geophysics - BS

The Bachelor of Science in Geophysics prepares students for employment opportunities in industrial, environmental, governmental, education, non-profit and related careers, but the rigor of this degree is also designed to prepare students for advanced study.

The first two years are similar to the BS in Geology, providing students with the fundamentals of geology, chemistry, physics, and mathematics. Courses during the junior and senior years emphasize knowledge transfer from the fields of math and physics to techniques and problems in both theoretical and applied geophysics. Technical electives allow students to focus on specific career objectives. Seniors will participate in a group research capstone course (GEOL 450), in which they work in teams with a faculty advisor to solve a current problem and communicate their findings. Students are also encouraged to become involved in research projects with faculty members and can receive course credit for this activity through GEOP 291 (<https://catalog.tamu.edu/search/?P=GEOP%20291>) and GEOP 491 (<https://catalog.tamu.edu/search/?P=GEOP%20491>). Some courses in geophysics require field trips.

Geophysicists contribute to the field of environmental science by working on traditional and emerging methods used for hydrogeological, structural, and stratigraphic characterization of the uppermost 100 meters of the Earth, with applications to shallow resource and groundwater assessment and solutions to environmental and engineering problems. Environmental geophysicists typically work as environmental consultants or with industrial corporations or government agencies.

Geophysicists may find employment in the energy industry, in which reflection seismology is the primary subsurface exploration tool. Students aiming for this field will supplement their background in seismic theory with electives that focus on subsurface structures and processes and industry techniques. These students will be prepared for graduate study, as well as industry jobs.

To remain in satisfactory academic standing, students must maintain a 2.0 or better GPA in all technical courses (geology, geophysics, chemistry, math and physics).

³ Any approved 400-level geophysics course not already required.

Geophysics - 5-Year Bachelor of Science and Master of Science in Geophysics

This program is designed to quickly prepare exceptional students who would like to either enter into the job market with an advanced degree or apply to PhD programs.

The combined program in Geophysics is a 5-year path leading to a Bachelor of Science (BS) and a Master of Science (MS) in Geophysics. Because the MS degree requires a thesis, it is highly recommended that interested students become involved in a research project early in the undergraduate career. Areas of opportunity for research at both the undergraduate and MS levels include earthquake mechanisms and seismic wave propagation, theoretical and experimental studies of deformation of rocks and soft sediment, petrophysics and reservoir

physics, marine studies of the structure of the oceanic crust and continental margins, near surface applied geophysics and archaeological geophysics.

Application and Eligibility

- Students may apply for entrance to the graduate program when they reach 90 hours applied to their degree program, normally in the spring of their junior year.
- Applicants to this program are not required to submit GRE, but they must submit two letters of advocacy from faculty members, one of whom is willing to serve as the MS thesis advisor.
- Students admitted into the combined program must finish all of the credit hours to obtain both the Bachelor's and Master's degrees. These students will be conferred with two degrees once they complete all requirements.
- Students not accepted into the combined program will complete the Bachelor's degree under the standard 4 year curriculum. These students may still apply to the traditional graduate program.

¹ The Graduation requirements include a requirement for three hours of International and Cultural Diversity courses and three hours of Cultural Discourse courses. A course satisfying a Core category, a college/departmental requirement, or a free elective can be used to satisfy this requirement. See academic advisor.

² Any science, math or engineering course that augments the degree with the approval of the advisor. At least four credits should be GEOL 491 Research.

³ Any Geophysics course.

⁴ The MS degree is either Non-Thesis Option (36 total hours, with 6 hours double-counting with the undergraduate Technical Electives) or Thesis Option (32 hours, with 2 hours double-counting with Technical Electives). Graduate courses may be in Geology, Geophysics or a supporting math or science area, chosen with approval of the student's advisory committee. Students in the Thesis Option may include up to 8 hours of Research courses.

The program includes a total of 152 or 156 hours which up to 2 or 6 hours may be applied toward both the Bachelor of Science in Geophysics and the Master of Science in Geophysics.

Geology - Minor

The minor in Geology provides students with a solid foundation in the fundamental principles of Geology, with an option to concentrate in Geophysics through elective courses.

This minor is especially suited to complement majors in science, policy, humanities, education, and business. Students will develop skills in scientific inquiry and critical thinking centered on Earth's evolution, processes, and history. Graduates with a Geology Minor will be better prepared for advanced academic degrees and careers in environmental public practice, energy industry business and policy, conservation, government, oversight, and regulation compliance.

Program Requirements

Code	Title	Semester Credit Hours
Select one of the following:		4
GEOL 101	Principles of Geology & GEOL 102 and Principles of Geology Laboratory	
GEOL 104	Physical Geology	
GEOL 150	Introduction to the Solid Earth	
Technical electives ¹		11
Select from the following:		
GEOL 200-499 (p. 1059) ^{2,3}		
GEOP 313	Geophysical Field Methods	
GEOP 341	Fundamentals of Geophysics	
GEOP 489	Special Topics In... ³	
GEOP 491	Research ³	
Total Semester Credit Hours		15

¹ Students must meet with the department academic advisor for approval of technical elective courses.

² No more than 2 credit hours of GEOL 330 may be applied to minor

³ No more than 3 credit hours of any combination from GEOL 489, GEOL 491, GEOP 489, GEOP 491 may be applied to minor.

Minimum of 6 credits must be taken in residence at Texas A&M University.

Minimum of 8 credits at the 300-400 level required.

Minimum of 2.5 cumulative GPA for all courses in the minor.

Department of Global Languages and Cultures

<https://artsci.tamu.edu/global-lang-cultures/>

Head: Stefanie Harris

Research in Hispanic Studies embraces cultural studies, digital humanities, film and performance, gender and diaspora studies, Hispanic literatures, historical and comparative linguistics, history and presence of Spanish in the U.S., iconography, language acquisition and pedagogy, language variation and change, photography, post-hegemonic and infrapolitical thought, and sociolinguistics. Among the Hispanic Studies faculty are skilled translators and accomplished creative essayists, narrators and poets.

Graduate work in Hispanic Studies prepares the student for academic careers concerned with Spanish and bilingualism, for teaching positions, and for government, diplomatic, non-profit and private sector jobs. A high competence in the Spanish language is required.

An interdisciplinary certificate is offered by the Africana Studies program in the College of Arts and Sciences. It offers interested masters or doctoral students an opportunity to develop an interdisciplinary graduate concentration in Africana Studies while they are also earning a degree in a disciplinary field. In addition to gaining knowledge of peoples and of issues with particular significance to the Africana world, students pursuing this certificate will also benefit from the interdisciplinary training that is the hallmark of Africana Studies. They will be exposed to the scholarship, methods, and theories of the multiple disciplines that contribute to the critical analysis and understanding of the Africana world. Awarding of the Africana Studies Certificate requires that the certificate candidate complete of Africana Studies approved coursework.

Classics - BA, Classical Civilization Track

The BA in Classics is designed to give students a thorough grounding in the culture, history, literature, and intellectual accomplishments of Ancient Greece and Rome from the Bronze Age to the dawn of the Middle Ages.

Studying the history and literature of these civilizations will not only help students to develop skills in close reading, writing, and critical thinking, but will also help them to see how fundamental concepts of Western

Civilization such as rationalism and democracy first arose in Classical Antiquity.

The Classical Civilization track focuses on the history, beliefs, and material culture of ancient Greek and Roman civilization. Students can fulfill the foreign language requirement by studying a classical or modern language.

A major in Classics signals a commitment to serious intellectual inquiry and is an excellent basis for careers in law, business, consulting, public service, and teaching. Those intending to pursue careers in medicine or finance will also find that a major in Classics can be easily combined with undergraduate courses required for those fields.

¹ Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

² At least 3 hours must be in MATH. Three hours may be PHIL 240.

³ Select from ANTH 300-499 (p. 922); ARCH 430, ARCH 434; ARTS 335; CLAS 220, CLAS 230-499 (p. 971); HIST 300-499 (p. 1069). Students must make a grade of C or better in all courses taken.

⁴ Select from any 100-499 courses not used elsewhere, except CLAS 300-499 (p. 971). Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used towards general electives.

⁵ Select from ANTH 316, ANTH 317/RELS 317; CLAS 220, CLAS 230-499 (p. 971); PHIL 410, PHIL 411. Students must make a grade of C or better in all courses taken.

⁶ Must make grade of C or better.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

All Classics majors are strongly encouraged to select 15-18 hours in a minor field of study.

Students must earn a C or better in all major coursework.

Courses cross-listed with other programs cannot be used under different prefixes to fulfill more than one requirement.

Classics - BA, Language and Literature Track

The BA in Classics is designed to give students a thorough grounding in the culture, history, literature, and intellectual accomplishments of Ancient Greece and Rome from the Bronze Age to the dawn of the Middle Ages.

Studying the history and literature of these civilizations will not only help students to develop skills in close reading, writing, and critical thinking, but will also help them to see how fundamental concepts of Western Civilization such as rationalism and democracy first arose in Classical Antiquity.

The Literature and Language track has a traditional focus on Latin and Greek philology (students choose either Latin or Ancient Greek to specialize in, but are encouraged to take both) and is intended to enable students to read and enjoy the great texts of Classical Antiquity (Homer, Herodotus, Thucydides, Livy, Tacitus, the New Testament, etc.) in the original languages.

A major in Classics signals a commitment to serious intellectual enquiry and is an excellent basis for careers in law, business, consulting, public service, and teaching. Those intending to pursue careers in medicine or finance will also find that a major in Classics can be easily combined with undergraduate courses required for those fields.

⁵ Select from ANTH 316, ANTH 317/RELS 317; CLAS 251/RELS 251, CLAS 330-381 (p. 971), CLAS 415-444 (p. 971), PHIL 410, PHIL 411. Students must make a grade of C or better in all courses taken.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

All Classics majors are strongly encouraged to select 15-18 hours in a minor field of study.

Students must earn a C or better in all major coursework.

Courses cross-listed with other programs cannot be used under different prefixes to fulfill more than one requirement.

Modern Languages - BA, French Option

A major in French provides students with language skills that translate into practical tools for use in today's interconnected world, whether in Texas, Europe, Africa, or beyond.

Above the practical aspect of the major, students of French acquire a rich view of the world through explorations into literature, history, and cultural studies. Focusing on analytical and critical thinking, as well as cultural awareness, our students are prepared to enter careers in fields such as education, international business, human resources, research, government, social service, tourism, journalism, and translation, as well as graduate studies in French and professional schools (medicine, law, business). To enhance their plan of study and create even more professional opportunities after graduation, French majors are encouraged to seek out a complementary minor or second major/degree, such as in the other languages and programs offered by Texas A&M's Department of Global Languages and Cultures.

To underscore the focus on cultural awareness and to support the achievement of increased linguistic proficiency, our majors are encouraged to study abroad in a French-speaking country. The French program offers summer study abroad programs for credit, and departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence. Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses.

¹ At least three hours must be in MATH. Three hours may be PHIL 240.

² FREN 101 and FREN 102 are prerequisites for intermediate FREN courses and will count as general electives in the degree plan. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See the Foreign Language paragraph.

³ See the Minor Field of Study paragraph.

⁴ Minimum of 9 hours at the 400- level.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Foreign Language

Students entering Modern Languages - French take a placement exam to determine the level of and number of required French courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 27 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 27 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 27 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 27 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 27 semester credit hours at the 300- or 400-level.

Minor Field of Study

All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Arts and Sciences or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than 9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women's and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on "Minor Field of Study" under the general requirements of the College of Arts and Sciences. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the School of Education and Human Development. Consult the School of Education and Human Development section under secondary teacher certification for additional information.

Any departmental major must earn a C or better in all major and minor coursework.

No more than 12 hours of FREN 200-299 (p. 1049) may be used for this degree.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Arts and Sciences. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

Modern Languages - BA, German Option

A major in German provides students with language skills that translate into practical tools for use in today's interconnected world, whether in Texas, Europe, or beyond.

Above the practical aspect of the major, students of German acquire a rich view of the world through explorations into literature, history, and cultural studies. Focusing on analytical and critical thinking, as well as cultural awareness, our students are prepared to enter careers in fields such as education, international business, human resources, research, government, social service, tourism, journalism, and translation, as well as graduate studies in German and professional schools (medicine, law, business). To enhance their plan of study and create even more professional opportunities after graduation, German majors are encouraged to seek out a complementary minor or second major/degree, such as in the other languages and programs offered by A&M's Department of Global Languages and Cultures.

To underscore the focus on cultural awareness and to support the achievement of increased linguistic proficiency, our major requires a minimum 10-week experience abroad in a German-speaking country. The German program offers summer study abroad programs for credit, and departmental faculty and advising staff also work closely with students to match their interests with semester and full-year programs abroad.

Students will be required to complete, by coursework or placement test, all 100- and 200-level courses in sequence. Once a student has received credit for a higher-level language course, the student is no longer eligible to receive credit for prerequisite courses.

- Students placed in 201 will take 201 and 202 and 27 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 27 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 27 semester credit hours at the 300- or 400-level

Minor Field of Study

All Modern Language majors must select a minor field of study from departments or divisions within or outside of the College of Arts and Sciences or in a particular area of interest (as in the case of interdisciplinary minors). The minor will consist of a minimum of 15 hours of coursework, as defined by the minor department. No more than

9 credit hours may be at the 100-299 level. Interdisciplinary minors such as women's and gender studies, classical studies, religious studies, and business have specific requirements; students should consult undergraduate advisors in these areas of study. A second major may substitute for the minor. Courses used to meet the minor requirements may not be used in the major. See also the statement on Minor Field of Study (<https://catalog.tamu.edu/undergraduate/arts-and-sciences/arts-requirements/>) under the general requirements of the College of Arts and Sciences. In general, the careful combination of foreign language skills with other major curricula enhances preparation for careers in business, industry and government. Teaching certification is available to majors through the School of Education and Human Development. Consult the School of Education and Human Development section under secondary teacher certification for additional information.

Any departmental major must earn a C or better in all major and minor coursework.

No more than 12 hours of RUSS 200-299 (p. 1221) may be used for this degree.

Other courses may qualify for the college and university requirements categories. Students should consult the approved list of courses available in the Undergraduate Student Services Office in the College of Arts and Sciences. The lists incorporate University Core Curriculum requirements. No course can be counted in more than one category.

Spanish - BA

A Spanish major provides students with language skills that translate into a practical tool for use in our increasingly bilingual landscape, whether in Texas, the American Southwest, one of the many areas in the U.S. with large Spanish-speaking populations, or beyond our borders where over 500 million Spanish speakers reside.

Above the practical aspect of the major, students of Spanish acquire a rich view of the world. Focusing on analytical and critical thinking, as well as cultural awareness, our students are prepared to enter professions in fields such as education, business, human resources, research, government, social service, tourism, journalism, and translation, as well as graduate studies in Spanish and professional schools (medicine, law, business). To enhance their career options, Spanish majors are encouraged to seek out a complementary minor or second major/degree, such as in the other languages offered by A&M's Department of Global Languages and Cultures, to create even more opportunities after graduation. Similarly, students can also complete an internship that will provide practical hands-on experience.

To underscore the focus on cultural awareness and to support the achievement of increased linguistic proficiency, our major requires a minimum 10-week experience abroad in a Spanish-speaking country. This experience abroad can be in a formal academic setting, through an internship or other comparable environment.

Semester Credit Hours 15**Total Semester Credit Hours** 120¹ Select any 100-499 course not used elsewhere, except SPAN 200-499 (p. 1238).² Select from the following: SPAN 301, SPAN 302 or SPAN 304, SPAN 303, SPAN 306, SPAN 307, SPAN 318, SPAN 350, SPAN 352, SPAN 407, SPAN 417, SPAN 452, SPAN 462.³ Select from the following: SPAN 311, SPAN 312, SPAN 320, SPAN 331, SPAN 332, SPAN 341, SPAN 342, SPAN 410, SPAN 411, SPAN 412, SPAN 413, SPAN 414, SPAN 421, SPAN 423, SPAN 445, SPAN 450, SPAN 460, SPAN 461.⁴ Select from SPAN 300-499 (p. 1238), HISP 100-499 (p. 1068); HISP-related courses (see HISP-Related Interdisciplinary Courses table), or any course, including 489 Special Topics, with 33% Hispanic focus.

A grade of C or higher is required if a course is to be counted in the major field.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Spanish majors are required to complete a credit-bearing 10-week minimum semester-long study or experience abroad in a Spanish-speaking country. Study abroad options include University-sponsored, reciprocal, affiliated, and independent programs. Selection of location and type of experience abroad should be made in consultation with departmental advisors. For students who are unable to study abroad, an internship may be used instead. This option is available only with prior approval by the Spanish advisor.

University Studies - BA, Race, Gender, Ethnicity Concentration

Students develop in-depth understanding of race, gender and ethnicity through an individualized, inquiry-rich program that integrates multiple disciplines.

This area of concentration is purposefully designed to require that students complete an individualized body of coursework that educates them in interdisciplinary knowledge. Inquiry-rich, research-based courses in multiple disciplines, along with senior-level courses provide students with in-depth understanding of the methodologies appropriate to interdisciplinary studies in the Race, Gender, Ethnicity Concentration. Other course offerings are drawn from areas such as Global Studies, Africana Studies, Jewish Studies, Latino/a and Mexican-American Studies, and Women's and Gender Studies.

In addition to a core of courses focused on race, ethnicity and gender, each student must complete two minors for the degree. It is expected

that at least one minor will be from outside the College of Arts and Sciences.

A student enrolled in the University Studies concentration of Race, Gender, Ethnicity may not pursue a double major or a double degree.

¹ Select from AFST 201, GLST 201, JWST 201/RELS 201, LMAS 201, WGST 200, or any course approved by the Department of Global Languages and Cultures.

² Students must complete Intermediate level foreign language coursework to complete degree requirements, however students will be required to complete or successfully place out of beginning level language courses prior to intermediate course enrollment. Students can apply the first eight hours (beginning 1 and 2) of foreign language courses as eight hours of general electives in their degree program.

³ Select from ANTH 404/WGST 404, ANTH 427; COMM 335, COMM 407/WGST 407, COMM 420/WGST 420; POLS 304, POLS 317, POLS 320, POLS 367/WGST 367, POLS 462/WGST 462; PBSI 300/WGST 300; SOCI 207/WGST 207, SOCI 317/AFST 317, SOCI 323/AFST 323, SOCI 403, SOCI 410/WGST 410, SOCI 421/WGST 421.

⁴ Select from AFST 201, AFST 302, AFST 325, AFST 326, AFST 481; ANTH 205, ANTH 301; ARAB 215, ARAB 258; CHIN 405, CHIN 465/FILM 465; CLAS 330; COMM 425/AFST 425, COMM 431; ENGL 204/AFST 204, ENGL 329/AFST 329, ENGL 333/WGST 333, ENGL 338, ENGL 339/AFST 339, ENGL 362/HISP 362, ENGL 374/WGST 374, ENGL 393/AFST 393, ENGL 403, ENGL 474/WGST 474; FILM 394; FREN 422, FREN 425/FILM 425; GERM 435/FILM 435, GERM 440, GERM 441; GLST 201, GLST 401/INTA 401, GLST 407, GLST 410/INTA 410, GLST 413, HISP 413, WGST 413; HISP 206, HISP 352/FILM 352, HISP 363, HISP 409; HIST 258, HIST 300/AFST 300, HIST 301/AFST 301, HIST 304, HIST 305, HIST 307, HIST 319, HIST 330, HIST 345/AFST 345; HIST 346/AFST 346, HIST 401, HIST 461/WGST 461, HIST 473/WGST 473, HIST 476/WGST 476, HIST 477/WGST 477; ITAL 251, ITAL 452, ITAL 453, ITAL 455/FILM 455, ITAL 456; JWST 201/RELS 201, JWST 301, JWST 315/FILM 315; PERF 326; PHIL 252/AFST 252, PHIL 283, PHIL 352/AFST 352, PHIL 353/AFST 353, PHIL 409, PHIL 464/RELS 464; RUSS 446/EURO 446, RUSS 447/EURO 447; SPAN 412; WGST 330, WGST 394.

⁵ Students must complete 48 hours of General Electives of which 30-36 hours should be used to satisfy the requirements for two university approved minors. Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used for General Electives. Minors will range between 15 and 18 hours. One minor must be chosen from outside of the college. Consult with advisor regarding how to declare desired minor.

⁶ Select from AFST 201, AFST 302, AFST 325, AFST 326, AFST 481; ANTH 205, ANTH 301; ARAB 215, ARAB 258; CHIN 405, CHIN 465/FILM 465; CLAS 330; COMM 425/AFST 425, COMM 431; ENGL 204/AFST 204, ENGL 329/AFST 329, ENGL 333/WGST 333, ENGL 338, ENGL 339/AFST 339, ENGL 362/HISP 362, ENGL 374/WGST 374, ENGL 393/AFST 393, ENGL 403, ENGL 474/WGST 474; FILM 394; FREN 422, FREN 425/FILM 425; GERM 435/FILM 435, GERM 440, GERM 441; GLST 201, GLST 401/INTA 401, GLST 407, GLST 410/INTA 410, GLST 413, HISP 413, WGST 413; HISP 206, HISP 352/FILM 352, HISP 363, HISP 409; HIST 258, HIST 300/AFST 300, HIST 301/AFST 301, HIST 304, HIST 305, HIST 307, HIST 319, HIST 330, HIST 345/AFST 345; HIST 346/AFST 346, HIST 401, HIST 461/WGST 461, HIST 473/WGST 473, HIST 476/WGST 476, HIST 477/WGST 477; ITAL 251, ITAL 452, ITAL 453, ITAL 455/FILM 455, ITAL 456; JWST 201/RELS 201, JWST 301, JWST 315/FILM 315; PERF 326; PHIL 252/AFST 252, PHIL 283, PHIL 352/AFST 352, PHIL 353/AFST 353, PHIL 409, PHIL 464/RELS 464; RUSS 446/EURO 446, RUSS 447/EURO 447; SPAN 412; WGST 330, WGST 394.

⁷ 100-499 courses not used elsewhere.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/departement requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

University Studies - BS, Race, Gender, Ethnicity Concentration

Students develop in-depth understanding of race, gender and ethnicity through an individualized, inquiry-rich program that integrates multiple disciplines.

This area of concentration is purposefully designed to require that students complete an individualized body of coursework that educates them in interdisciplinary knowledge. Inquiry-rich, research-based courses in multiple disciplines, along with senior-level courses provide students with in-depth understanding of the methodologies appropriate to interdisciplinary studies in the Race, Gender, Ethnicity Concentration. Other course offerings are drawn from areas such as Global Studies, Africana Studies, Jewish Studies, Latino/a and Mexican-American Studies, and Women's and Gender Studies.

The BS degree differs from the BA in being more focused on problem solving and analysis of data in examining major social and cultural issues. The BS degree therefore requires more courses in science and encourages statistics and mathematics.

In addition to a core of courses focused on race, ethnicity and gender, each student must complete two minors for the degree. It is expected that at least one minor will be from outside the College of Arts and Sciences.

A student enrolled in the University Studies concentration of Race, Gender, Ethnicity may not pursue a double major or a double degree.

⁸ Select any 100-499 courses not used elsewhere. Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used for General Electives.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Africana Studies - Minor

The interdisciplinary minor in Africana Studies provides students with a unique opportunity to think critically about the cultural, historical, and social contributions and experiences of people from Africa and of African descent across ethnic, regional, and national boundaries.

Africana Studies courses are a commingling of traditional approaches to the field and cutting edge scholarship that challenge stereotypical portrayals the world over.

Because the Africana Studies Minor is interdisciplinary, students can draw on courses from across the College of Arts and Sciences. Students also complete core classes in the Africana Studies discipline. The interdisciplinary nature of the program provides students opportunities to understand Africana Studies through different lenses, including art, literature, history, contemporary issues, individual and interpersonal experiences, performance, and politics.

A background in Africana Studies complements any career field by providing a strong foundation in key workplace skills: critical thinking, communication, research, writing, and cultural understanding. Additionally, the Africana Studies minor prepares students to address some of the crucial societal issues today: immigration, health policy, justice and law reform, international relations, and educational equality.

Program Requirements

Students must make a grade of C or better.

At least 6 hours must be at the 300-400 level.

Arabic Studies - Minor

This minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add an international dimension to their intellectual profile.

The minor in Arabic Studies is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Arabic language and culture with electives in Arabic studies, as well as a capstone project. A minor in Arabic Studies also helps to prepare students for careers in education, international development, non-profit agencies and NGOs, translating and interpreting, public relations and marketing, government service, international law, international business, engineering, and research. In addition, Arabic Studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Students must complete ARAB 101 and ARAB 102 before they may declare a minor in Arabic Studies.

Program Requirements

Code	Title	Semester Credit Hours

Total Semester Credit Hours		18

¹ A capstone project that is completed in an approved upper-division Arabic Studies course is required of all students pursuing a minor in Arabic Studies during their final year of the program. It consists of a

substantial research paper (15–20 pages) on an original topic and is conducted under the direction of a faculty member with the approval of the departmental advisors. Through the capstone course and project, students get a chance to integrate their classroom knowledge about the Arab world and use their study-abroad experiences and internships in an Arabic-speaking country, if any, to address an issue of interest to them. Issues that students can choose to address could be of linguistic, cultural, historical, religious, or political nature, among others. Upon its completion, and in coordination with the departmental advisors, the final project will be presented orally to Arabic classes in order to maximize its benefits.

Students must earn a C or better in all minor coursework.

Chinese - Minor

This minor is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add Chinese language proficiency and an international dimension to their intellectual profile.

The minor in Chinese is an academic program open to all students in the university. The minor is interdisciplinary in nature and combines courses in Chinese language and culture with electives in Chinese studies, as well as a capstone project. A minor in Chinese also helps to prepare students for careers in education, international development, non-profit agencies and NGOs, translating and interpreting, public relations and marketing, government service, international law, international business, engineering, global health, and research. In addition, Chinese studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Program Requirements

Code	Title	Semester Credit Hours
CHIN 201	Intermediate Chinese I	3
CHIN 202	Intermediate Chinese II	3
CHIN 301	Reading and Composition	3
CHIN 302	Reading and Composition II	3
CHIN 491	Research (Capstone course)	3
CHIN 303-489 (p. 971)		3
Total Semester Credit Hours		18

Students must earn a C or better in all minor coursework.

Capstone Project

The capstone project allows students to integrate knowledge and skills about topics pertaining to Chinese language, culture, history, geography, etc. that they have gained through their coursework, including any study abroad experience in China. Students will consult with the faculty in Chinese and meet regularly with a faculty advisor to complete an independent research project about a topic of their interest pertaining to China.

Classical Studies - Minor

The minor is interdisciplinary in nature and combines courses in Greek or Latin language with electives in multiple disciplines.

The minor in Classical Studies is an academic program open to all students in the university. The focus on the history, beliefs, and material culture of ancient Greek and Roman civilization helps students to see how fundamental concepts of Western Civilization first arose in Classical Antiquity, and is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences. A minor in Classics also helps to prepare students for careers in education, international development, non-profit agencies and NGOs, translating and interpreting, public relations and marketing, government service, international law, international business, engineering, global health, and research.

Students must earn a C or better in all minor coursework.

Comparative Cultural Studies International - Minor

The minor in Comparative Cultural Studies – International focuses on how culture and politics affect societies across the world.

The program's strong interdisciplinary approach in the humanities and social sciences gives students the skills and competencies they need to address complex and critical global issues. The minor provides students with tools to better understand cultural perspectives from around the world. The comparative and transnational focus encourages students to learn about other cultures and social systems, to reflect back on their own societies, and to discover how they want to position themselves as globally engaged citizens.

The courses recommended for the minor examine such issues as media, power, politics, literature, film, performance, globalization, international development, and global public health. The coursework gives students the opportunity to gain expertise in areas or cultures outside of the United States and allows them to develop comparative and international perspectives valued by public and private employers. It is critical for contemporary students to understand the impact of politics and policies on people's lives, global change, social movements, and conflict.

The minor will assist students who are seeking a wide variety of jobs, ranging from international development to social and popular media, as well as private business ventures, cultural organizations, public relations, marketing, international law, global health, and non-profit organizations. It is also beneficial for students who are pursuing a wide range of graduate and professional degrees, including law, education, non-profit administration, public policy, public health, communication, cultural studies, environmental studies, media studies, anthropology, social work, and business.

Hispanic Studies for Community Engagement - Minor

The minor in Hispanic Studies for Community Engagement offers students the opportunity to combine advanced Spanish language skills and Hispanic cultural knowledge with a service-learning experience.

This minor complements degrees from other disciplines as it can incorporate courses taught in English that address multiple themes from throughout the Hispanic world. Coursework for this minor consists of Spanish, Anthropology, English, Hispanic Studies, History, Philosophy,

Political Science, or Sociology; and a service-learning experience with an organization or institution whose primary focus is providing services to Hispanic or Spanish-speaking communities. A minor in Hispanic Studies for Community Engagement helps to prepare students for careers in education, international development, non-profit agencies and NGOs, translating and interpreting, public relations and marketing, government service, international law, international business, engineering, global health, and research.

Students must earn a C or better in all minor coursework.

Capstone Project

A capstone project completed in an approved upper-division Japanese course is required of all students pursuing a minor in Japanese during their final year of the program. The capstone project allows students to integrate knowledge and skills about topics pertaining to Japanese language, culture, history, geography, etc. that they gained through their previous classes, study abroad experience in Japan, or personal readings. Students will consult and regularly meet with an advisor to complete a reading/writing assignment about a topic of their interest pertaining to Japan.

Jewish Studies - Minor

The Jewish Studies Minor is an interdisciplinary minor that focuses on Jewish religious traditions, history, texts, art, and figures from the ancient to the contemporary period.

Coursework addresses key issues in Jewish studies from multiple traditions, including religious studies, literature, history, film, anthropology, and philosophy. The minor is open to students from any major, and allows students to cultivate knowledge and understanding of Judaism and of Israeli society, history, and culture in regional and comparative contexts. A minor in Jewish Studies also helps to prepare students for careers in education, international development, non-profit agencies and NGOs, public relations and marketing, government service, international law, international business, engineering, global health, and research.

RELS 480/ COMM 480	Religious Communication	
Total Semester Credit Hours		15

Students must make a grade of C or better in all minor coursework.

Religious Studies - Minor

The Religious Studies Minor offers students the opportunity to better understand how religion addresses core concerns about human existence across cultures.

The interdisciplinary Religious Studies Minor at Texas A&M University encourages students to explore the many ways people experience and articulate the sacred.

Students who minor in Religious Studies select from a range of courses that match their interests and goals from a variety of disciplines in the College of Arts and Sciences. Students have the opportunity to study specific religious traditions, to approach religion through the study of rituals, symbols, and literature, and to examine religion as a human phenomenon situated in culture and history. Topics of study include the history of religious traditions, religion in contemporary life, religion in the

arts and literature, and many other topics. Students gain perspective on the complexity of religious thought and practices in world cultures.

The Religious Studies Minor emphasizes a number of skills that are important to success in the workplace and as a citizen of the world: critical thinking, problem solving, cultural understanding, and written, oral, and visual communication. The ability to understand the significance of religion at individual, interpersonal, social, and cultural levels can serve students in nearly every career path, even those that do not focus on religion. The skills that students learn through the study of religion as a human endeavor provide an intellectual foundation for future careers in education, international development, non-profit agencies and NGOs, public relations and marketing, government service, international law, international business, engineering, global health, and research.

Program Requirements

Code	Title	Semester Credit Hours
RELS 200-499 (http://catalog.tamu.edu/undergraduate/course-descriptions/rels/) ¹		6
RELS 300-499 (http://catalog.tamu.edu/undergraduate/course-descriptions/rels/)		9
Total Semester Credit Hours		15

¹ Six semester credit hours in approved languages, including: ARAB 201, ARAB 202, ARAB 301, ARAB 302; CLAS 211, CLAS 221, CLAS 222, CLAS 311, CLAS 312, CLAS 313, CLAS 321, CLAS 322 will be accepted in lieu of RELS 200-499 (p. 1217).

Students must make a grade of C or better in all courses.

At least 9 semester credit hours must be 300-400 level courses.

Russian - Minor

The minor combines courses in Russian language and culture, and is a valuable complement to the academic portfolio of any student majoring in the humanities, social sciences, or natural sciences, who wishes to add linguistic proficiency in Russian and an international dimension to their intellectual profile.

The minor in Russian is an academic program open to all students in the university. A minor in Russian also helps to prepare students for careers in education, international development, non-profit agencies and NGOs, translating and interpreting, public relations and marketing, government service, international law, international business, engineering, global health, and research. In addition, Russian studies faculty offer study abroad programs in order to enrich student learning experiences and cultural knowledge while helping students attain higher proficiency in the language.

Program Requirements

Code	Title	Semester Credit Hours
RUSS 201 or RUSS 221 or Field Studies I	Intermediate Russian I	3
RUSS 202 or RUSS 222 or Field Studies II	Intermediate Russian II	3

RUSS 301 or RUSS 302 or Advanced Grammar and Composition II	Advanced Grammar and Composition I	3

RUSS 211 RUSS 300 to 499 (p. 1221) ¹	Russian Conversation	
Total Semester Credit Hours		18

¹ Any RUSS course at the 300- and 400-level not used for credit previously.

Students must earn a C or better in all minor coursework.

Spanish - Minor

The Spanish minor allows students with other majors to work on their linguistic skills while they gain Hispanic cultural competency.

A great way to complement coursework in many other majors, including those in science, health, and business, this minor focuses on language-based coursework that will serve as an asset upon entering the job market after graduation. A minor in Spanish also helps to prepare students for careers in education, international development, non-profit agencies and NGOs, translating and interpreting, public relations and marketing, government service, international law, international business, engineering, and research.

We have identified the following disciplinary themes as key focus areas that would prepare students for professional programs and employment in careers in a variety of fields that require or would benefit from the knowledge of Spanish. The themes are recommendations and may be combined with other themes or other elective courses. Completion of theme courses does not in itself confer a minor.

- Business-Law and Law Enforcement
- Culture, Art, and Cinema
- Heritage Language
- Linguistics
- Literature

For a list of recommended courses for each theme, please visit <https://artsci.tamu.edu/global-lang-cultures/academics/undergraduate/minors/spanish-minor.html>.

At least 9 of these 18 hours must be taken at Texas A&M. A grade of C or better is required for a course to be counted in the minor field.

Spanish for the Health Professions - Minor

The minor in Spanish for the Health Professions is designed to prepare students who are interested in developing Spanish proficiency in a culturally sensitive manner within the biomedical environment.

It is ideal for future professionals interested in serving Spanish-speaking clients in a clinical setting by developing Spanish language skills and cultural competency. Required coursework includes intermediate and advanced Spanish language classes with a focus on biomedical terminology and contexts. The program complements a variety of programs in areas such as nursing, life sciences, biomedical sciences, biology, psychological and brain sciences, dentistry, public health sciences, and other professional programs in medical fields. A minor in Spanish for the Health Professions helps to prepare students for careers in health care, global health, veterinary medicine, education, international development, non-profit agencies and NGOs, translating and interpreting, public relations and marketing, government service, international law, international business, engineering, and research.

Program Requirements

Must make a grade of C or better in each course used toward the minor requirements.

Proficiency in Modern Languages - Certificate

This certificate offers students of any major an internationally recognized proficiency in a modern language, enhancing career prospects in global fields and graduate studies.

The Certificate of Proficiency in Modern Languages is open to all students at the university regardless of their major. It is designed to prepare undergraduate students for jobs and/or graduate programs requiring a strong command of one of the languages offered through Texas A&M's Department of Global Languages & Cultures (Arabic, Chinese, French, German, Italian, Japanese, Russian, and Spanish) by providing them with an internationally-recognized marker of proficiency.

In addition to completing 12 credit hours at the 200-400 level in a single language with a passing grade, students pursuing the certificate of Proficiency in Modern Languages are required to demonstrate their ability in that language by achieving a score of Advanced-Low on the Oral Proficiency Interview (OPI) test developed by the American Council on the Teaching of Foreign Languages.

Program Requirements

Code	Title	Semester Credit Hours
Select 12 hours from the following: ¹		12
ARAB 200-499 (p. 927)		
CHIN 200-499 (p. 971)		
FREN 200-499 (p. 1049)		
GERM 200-499 (p. 1063)		
ITAL 200-499 (p. 1102)		
JAPN 200-499 (p. 1105)

SPAN 200-499 (p. 1238)		
Total Semester Credit Hours		12

¹ The 12 hours must be taken in a single foreign language from the list provided.

In order to be awarded the Certificate of Proficiency in Modern Languages, students must take the Oral Proficiency Interview (OPI) test and achieve a ranking of at least "Advanced Low."

Department of History

Welcome to the History Department!

The Department of History, through its dual functions of research and teaching, seeks to broaden and deepen our understanding of the past and prepare students to engage with the increasingly complex present. Upon earning a BA or BS in History, students will be able to apply critical thinking skills to, and communicate verbally and in written format about, contemporary events. Our undergraduate students also develop the skills necessary for quality research, the assessment of conflicting evidence, and the practice of effective writing, argumentation, and advocacy. As a result, they will become more informed citizens and more proficient in the abilities that most employers continue to value above all others. The faculty teach over one hundred undergraduate courses on peoples, ideas, and cultures from around the world and across the ages and are devoted to developing students' ability to understand how studying history can help solve some of today's most pressing problems. The department also encourages students to participate in Texas A&M University's numerous study-abroad programs to enhance their familiarity with global cultures and improve their foreign language proficiency.

The Department of History at Texas A&M offers the BA, BS, BA+MA, MA, and PhD. A major in history affords students both a broad education and valuable practical skills. By acquiring familiarity with people in multifaceted times, places, and circumstances, students of history develop a sophisticated human empathy which is the key to good scholarship and good citizenship alike. Teaching is one important career path for history majors. But many students utilize a major in history as preparation for a career in government agencies, law and law enforcement, the military, intelligence analysis, foreign service,

technology, business, public relations, non-profit work, parks and recreation, archival and library resources, museums, advertising, and religious leadership. History stands as the departure point for an array of jobs in any number of different fields.

History - BA

This program cultivates essential skills for understanding the present through the past, preparing students for success in various career fields.

Students who wish to major in History do so because they understand that the problems of the present are fundamentally rooted in the choices made by past peoples. History majors, therefore, do not memorize names and dates. Instead, they are detectives, busily scrutinizing and actively interpreting the historical record for a deeper understanding as to why the world looks as it does and how our society might be improved. And in doing so, history majors acquire a number of practical skills that many different employers look for in job candidates. Our majors become experts in both written and oral self-expression, argumentation, and advocacy. In addition, history majors acquire the skills necessary to conduct thorough research, assess evidence, and effectively present findings. It is no wonder, then, that our majors succeed in the fields of education, law, law enforcement, public service, consulting, and business, among many other careers. In today's global economy, there is persistent demand for job candidates familiar with wide-ranging cultures and points of view. In the History major, students take courses specializing in many different cultures and time periods. This array of classes helps familiarize students with multifaceted human experiences while developing marketable skills that make our graduates competitive in a variety of career fields. This is particularly true of majors who take advantage of the University's numerous opportunities for study abroad and foreign language instruction.

Teacher Certification

Some history majors may wish to pursue a career in education at the middle-, or high-school levels. The History Department is proud to welcome and help train the future teachers of both Texas and the nation. Students wishing to meet certification requirements to teach history or social studies in the secondary schools of Texas should contact the College of Education and Human Development for more complete information about the certification options available at Texas A&M University. To be eligible for these options, students must also consult with, and have approval of, their academic advisor in the Department of History.

Semester Credit Hours 13

Total Semester Credit Hours 120

¹ Must make a grade of C or better.

² Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

³ At least 12 hours at the 300- and 400-level. At least 3 hours of pre-modern history and at least 3 hours each from three of the five lists (United States; Europe; Latin America and Caribbean; Africa, Asia and the Middle East; Thematic). Maximum 3 hours of 200- level course may be used.

⁴ Select any 100-499 course not used elsewhere (except ASCC 100-499 (p. 937); HIST 100-299 (p. 1069)). Up to 12 hours of HIST 300-499 (p. 1069) may be used for this requirement. Only 14 hours of KINE 199; AERS 100-499 (p.); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used towards general electives.

⁵ Writing-intensive course.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students should plan a program of study in consultation with one of the department's undergraduate advisors.

A minimum of 33 hours in history may be applied to the degree. Students must take not less than 15 credit hours at upper level for history residency requirement. A grade of C or higher is required for a course to be counted in the major field. A student must complete not less than 18 hours of coursework in history at Texas A&M University.

History - 5-Year Bachelor of Arts and Master of Arts in History

This program is designed for students seeking advanced training in history for their future careers.

The Department of History offers a five-year joint degree program that provides qualified students the opportunity to simultaneously earn a Bachelor of Arts in History and a Master of Arts in History (BA/MA) in a shorter period of time and at a slightly lower financial cost. In this program, the undergraduate degree requirements are modified to prepare students for the rigor of graduate-level coursework. At the completion of the degree, students are well-prepared to apply for doctoral programs in history and other humanities disciplines, teaching positions, and public humanities.

Undergraduate students interested in this program apply during the spring of their junior year. If admitted, students begin taking graduate-level courses in the fall of their senior year. Please note that the BA/MA program is a rigorous and intellectually demanding curriculum and carries a heavy course load. Applicants should have a solid grounding in basic history and a strong interest in advanced historical study.

- ⁴ At least 9 hours at the 300- and 400-level. At least 3 hours from three of the five lists (United States; Europe; Latin America and Caribbean; Africa, Asia and the Middle East; Thematic). At least 3 of these hours must also qualify as pre-modern history.
- ⁵ Course will double-count toward both the undergraduate and graduate degree when completing the MA Non-Thesis track.
- ⁶ Select any course from HIST 600-699 (<https://catalog.tamu.edu/graduate/course-descriptions/hist/>). See graduate adviser about course selection as well as the use of HIST 685 independent studies for credit toward the degree.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students should plan a program of study in consultation with one of the department's undergraduate advisors.

A minimum of 33 hours in history may be applied to the degree. Students must take not less than 15 credit hours at upper level for history residency requirement. A grade of C or higher is required for a course to be counted in the major field. A student must complete not less than 18 hours of coursework in history at Texas A&M University.

The program includes a total of 150 hours (Thesis Track) or 156 hours (Non-Thesis Track). The Thesis track allows up to 0 hours of graduate coursework to be applied toward both the Bachelor of Arts in History and the Master of Arts in History. The Non-Thesis track allows up to 6 hours of graduate coursework to be applied toward both the Bachelor of Arts in History and the Master of Arts in History.

History - BS

This program cultivates essential skills for understanding the present through the past, preparing students for success in various career fields.

Students who wish to major in History do so because they understand that the problems of the present are fundamentally rooted in the choices made by past peoples. History majors, therefore, do not memorize names and dates. Instead, they are detectives, busily scrutinizing and actively interpreting the historical record for a deeper understanding as to why the world looks as it does and how our society might be improved. And in doing so, history majors acquire a number of practical skills that many different employers look for in job candidates. Our majors become experts in both written and oral self-expression, argumentation, and advocacy. In addition, history majors acquire the skills necessary to conduct thorough research, assess evidence, and effectively present

findings. It is no wonder, then, that our majors succeed in the fields of education, law, law enforcement, public service, consulting, and business, among many other careers. In today's global economy, there is persistent demand for job candidates familiar with wide-ranging cultures and points of view. In the History major, students take courses specializing in many different cultures and time periods. This array of classes helps familiarize students with multifaceted human experiences while developing marketable skills that make our graduates competitive in a variety of career fields. This is particularly true of majors who take advantage of the University's numerous opportunities for study abroad and foreign language instruction.

The BS in History differs from the BA because students are not required to earn foreign language credit. Instead, they are asked to complete additional credit hours in a variety of science, technology, engineering, and mathematics fields. BS degree candidates will be offered fairly wide latitude in selecting their STEM courses, but should consider enrolling in classes that align with their particular historical interests and prospective career paths. Many emerging fields in science, technology, and health are seeking employees who combine a working knowledge of STEM concepts with the enhanced analytical, critical thinking, and writing skills gained within history classrooms. A BS in History will provide opportunities to develop skillsets to answer this growing demand.

Teacher Certification

Some history majors may wish to pursue a career in education at the middle-, or high-school levels. The History Department is proud to welcome and help train the future teachers of both Texas and the nation. Students wishing to meet certification requirements to teach history or social studies in the secondary schools of Texas should contact the College of Education and Human Development for more complete information about the certification options available at Texas A&M University. To be eligible for these options, students must also consult with, and have approval of, their academic advisor in the Department of History.

¹ Must make a grade of C or better.² See departmental advisor for approved list³ At least 12 hours at the 300- and 400-level. At least 3 hours of pre-modern history and at least 3 hours each from three of the five lists (United States; Europe; Latin America and Caribbean; Africa, Asia and the Middle East; Thematic). Maximum 3 hours of 200- level course may be used.⁴ Select any 100-499 course not used elsewhere. (except ASCC 100-499 (p. 937); HIST 100-299 (p. 1069).) Up 12 hours of HIST 300-499 (p. 1069) may be used for this requirement. Only 14 hours of KINE 199; AERS 100-499 (p.); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used towards general electives.⁵ Writing-intensive course.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/departments requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Students should plan a program of study in consultation with one of the department's undergraduate advisors.

A minimum of 33 hours in history may be applied to the degree. Students must take not less than 15 credit hours at upper level for history residency requirement. A grade of C or higher is required for a course to be counted in the major field. A student must complete not less than 18 hours of coursework in history at Texas A&M University.

History - Minor

A minor in history broadens one's education and enhances job market competitiveness by developing strong writing and critical thinking skills.

The Department of History offers a minor in History. Students from all majors are welcome to pursue this credential, as history is the ideal complement to virtually any course of study at Texas A&M. Students in the sciences and engineering, for example, would greatly benefit by using a history minor to help sharpen their writing and critical thinking skills. Employers consistently cite a lack of proficiency in writing and reasoning as one of their chief complaints about prospective hires. Students with a history minor receive valuable training in precisely those things. Other students interested in graduate or professional programs such as law school or social work also stand to benefit from a historical perspective on the issues and problems that matter to our nation and world today.

To add a history minor, a student must make a request through academic advisors in their major.

Program Requirements

Code	Title	Semester Credit Hours
Lower-level history ¹		6
Upper-level history ²		9
Total Semester Credit Hours		15

¹ Select from HIST 101-106 (p. 1069), HIST 201, HIST 202, HIST 209, HIST 210, HIST 212-214 (p. 1069), HIST 220-222 (p. 1069), HIST 225, HIST 226, HIST 230-232 (p. 1069), HIST 234, HIST 236/CLAS 236, HIST 240-242 (p. 1069), HIST 258, HIST 289.

² Select from HIST 300-489 (p. 1069).

Students must make a grade of C or better in all courses.

Legal History - Certificate

The purpose of the Legal History Certificate is to provide students with historical knowledge and analytical skills that will give them a strong foundation for a law school education.

Students will learn about the historical development of the American legal system, read legal documents, perform legal research, and practice argumentative writing. The coursework includes two required classes, two elective courses from the History Department, and a directed studies course (zero-credit) that is fulfilled by submitting a paper from any History class about a legal topic.

The Legal History Certificate program is specifically focused on the skill set future lawyers need. The American Bar Association (ABA) and the Law School Admissions Council (LSAC) have identified background historical knowledge as an essential foundation for a law school education. Lawyers must understand historical precedent, the historical context in which laws were made, and the evolution of legal doctrine. The ABA and the LSAC also emphasize the importance of critical reading, research, and writing skills as important preparation for an advanced legal education. The Legal History Certificate will prepare students in all of these areas. It positions Aggies to succeed in law school and provides them with an advantage in the admissions process.

The Legal History Certificate is open to all majors. Students interested in the Legal History Certificate should contact the History Department academic advisor, Adrianna Rodriguez (adrianna_rodriguez@tamu.edu), or the program's primary faculty sponsor, Dr. Ryan Fletcher (rffletcher@tamu.edu).

Program Requirements

Code	Title	Semester Credit Hours

Total Semester Credit Hours **12**

¹ Must make a grade of C or better.

² Must be taken after or concurrent with the completion of the other credit hours for the certificate. Students must submit a writing sample covering some aspect of legal history, which may be a piece of writing previously submitted for one of the courses listed above.

³ Students must sign up for the certificate through an advisor before completing 105 credit hours.

Department of Mathematics

The Department of Mathematics offers curricula which lead to the following undergraduate degrees: Bachelor of Science in Applied Mathematics, Bachelor of Arts in Mathematics and Bachelor of Science in Mathematics. A combined baccalaureate/graduate degree program is also offered.

The curriculum for the BS in Applied Mathematics includes courses in economics, industrial engineering, statistics, computer science and mathematics. A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern technological industries and/or modern financial markets. On the other hand, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate programs. Advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

With carefully chosen electives in education, any one of the above three degree plans can lead to teacher certification. Students interested in teacher certification may find the BA degree plan the most suitable since this degree plan offers the greatest flexibility for the inclusion of teacher certification courses.

Minors

- Mathematics Minor (p. 444)

Applied Mathematics - BS, Actuarial Science Emphasis

The curriculum in the Bachelor of Science in Applied Mathematics with an Actuarial Science emphasis explores the application of analytical problem solving tools to challenges in the financial and insurance industries.

Students in the Actuarial Science emphasis investigate techniques in applied and pure mathematics and pursue electives in economics and finance that demonstrate how mathematics can be used to model financial concerns in the insurance and related industries.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern financial markets. Coursework in the Actuarial emphasis prepares students to take actuarial exams necessary for employment in the actuarial industry. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools. A minor in business or economics is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Program Requirements

First Year

		Semester Credit Hours
Fall		
ENGL 104 or ENGL 103	Composition and Rhetoric or Introduction to Rhetoric and Composition	3

Total Semester Credit Hours		120

¹ Of the 18 hours shown as University Core Curriculum (p. 26), 3 must be from Language, Philosophy and Culture; 3 from Creative Arts; 6 from American History; and 6 from Government/Political Science.

² Select 4 hours from ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107, CHEM 117. The remaining 4 hours may be selected from ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

³ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172. MATH 200 is also highly recommended for math majors co-enrolled in MATH 151, MATH 152, MATH 171 or MATH 172.

⁴ Select from any 100-499 course not used elsewhere (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, MATH 151-168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301 PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301 - 303 (p. 1248)).

⁵ MATH 411 should be taken the semester after taking MATH 221.

⁶ Except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291, CSCE 402.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two grades of D in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity courses (p. 49) and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Applied Mathematics - BS, Biological Science Emphasis

The curriculum in the Bachelor of Science in Applied Mathematics with a Biological Sciences emphasis explores the application of analytical problem-solving tools to problems in biology, medicine, and the environment.

Students in the Biological Sciences emphasis investigate techniques in applied and pure mathematics and pursue electives in biology and other sciences that demonstrate how mathematics models phenomena in the life sciences.

A student completing this program is prepared for a career in applications of mathematics to the life sciences. Furthermore, this degree program is designed to contain the coursework required for students interested in medical school, and it is recommended for pre-med students interested in pursuing a mathematics degree. With the appropriate electives chosen, the student is also prepared to enter quantitatively oriented graduate programs, including PhD programs in Applied Mathematics or Mathematics. A minor in biology is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Program Requirements

Biological Science Emphasis: Consult with departmental advisor.

First Year

		Semester Credit Hours
Fall		
BIOL 111	Introductory Biology I	4

Applied Mathematics - BS, Cryptography Emphasis

The curriculum in the Bachelor of Science in Applied Mathematics with a Cryptography emphasis explores the application of analytical problem solving tools to concrete problems in cybersecurity.

Students in the Cryptography emphasis investigate a broad array of techniques in applied and pure mathematics and pursue electives in computer science that demonstrate how mathematics is central to keeping information and data secure.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or government, especially in cybersecurity related fields. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including PhD programs in Applied Mathematics or Mathematics. A minor in computer science or cybersecurity is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Applied Mathematics - BS, Economics Emphasis

The curriculum in the Bachelor of Science in Applied Mathematics with an Economics emphasis explores the application of analytical problem-solving tools to challenges in business and financial industries.

Students in the Economics emphasis investigate techniques in applied and pure mathematics and pursue electives in economics and finance that demonstrate how mathematics can be used to model economic and financial concerns.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to modern financial markets. Coursework in the Economics emphasis prepares students to take actuarial exams necessary for employment in the actuarial industry. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including PhD programs in Applied Mathematics or Mathematics. A minor in business or economics is well suited to students in this program. All advising for

this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Total Semester Credit Hours	120

¹ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172. MATH 200 is also highly recommended for math majors co-enrolled in MATH 151, MATH 152, MATH 171 or MATH 172.

² Select 4 hours from ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

³ Of the 18 hours shown as University Core Curriculum (p. 26), 3 must be from Language, Philosophy and Culture; 3 from Creative Arts; 6 from American History; and 6 from Government/Political Science.

⁴ Select from any 100-499 course not used elsewhere (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, MATH 151-168 (p. 1135),

MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301; PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301, STAT 302, STAT 303).

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two grades of D in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Applied Mathematics - BS, Math Emphasis

The curriculum in the Bachelor of Science in Applied Mathematics with a Mathematics emphasis explores the application of analytical problem-solving tools to concrete problems in technology and business.

Students in the Mathematics emphasis investigate a broad array of techniques in applied and pure mathematics and pursue electives in related fields, such as computer science and statistics, that demonstrate how mathematics models challenges we face every day.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or modern financial markets. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including PhD programs in Applied Mathematics or Mathematics. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

¹ Select 4 hours from ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

² Of the 18 hours shown as University Core Curriculum (p. 26), 3 must be from Language, Philosophy and Culture; 3 from Creative Arts; 6 from American History; and 6 from Government/Political Science.

³ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172. MATH 200 is also highly recommended for math majors co-enrolled in MATH 151, MATH 152, MATH 171 or MATH 172.

⁴ Select from any 100-499 course not used elsewhere (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, MATH 151-168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301; PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301-303 (p. 1248)).

⁵ Except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291, CSCE 402.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 49)s and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Applied Mathematics - BS, Statistics Emphasis

The curriculum in the Bachelor of Science in Applied Mathematics with a Statistics emphasis explores the application of analytical problem-solving tools to concrete problems in the statistical analysis of data.

Students in the Statistics emphasis investigate a broad array of techniques in applied and pure mathematics and pursue electives in statistics that demonstrate how mathematics is central to acquiring information from the analysis of data sets.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or government. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including PhD programs in Applied Mathematics or Mathematics. A minor in computer science or statistics is well suited to students in this program. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Applied Mathematics - 5-Year Bachelor of Science and Master of Science in Economics

This combination 5-year program is uniquely designed to open doors for high-achieving undergraduate students to simultaneously pursue a Bachelor of Science in Applied Mathematics, Economics emphasis, and a Master of Science in Economics non-thesis option.

This innovative program equips students with a powerful blend of economic expertise and mathematical prowess, enabling them to cultivate a profound understanding of analytical theory and the technical skills essential for logical reasoning in economic modeling and financial analysis.

Upon completion of this program, students emerge as well-prepared professionals poised for immediate entry into careers spanning government, industry, and business. Students are equipped to work as consultants in domains such as finance, business strategy, international trade, and investment, showcasing their ability to navigate complex economic landscapes. Moreover, this program lays a robust foundation for those aspiring to pursue PhD programs in economics, finance, or related fields, placing a strong emphasis on quantitative analyses as they embark on their academic journeys.

¹ Select 4 hours from ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

² Of the 18 hours shown as University Core Curriculum (p. 26), 3 must be from Language, Philosophy and Culture; 3 from Creative Arts; 6 from American History; and 6 from Government/Political Science.

¹ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172. MATH 200

- is also highly recommended for math majors co-enrolled in MATH 151, MATH 152, MATH 171 or MATH 172.
- ² Of the 18 hours shown as University Core Curriculum (p. 26), 3 must be from language, philosophy and culture, 3 from creative arts, 6 from American history, and 6 from Government/Political Science.
- ³ Select 4 hours from ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.
- ⁴ Select from any 100-499 course not used elsewhere (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, MATH 151-168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301; PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301, STAT 302, STAT 303).
- ⁵ These hours will be applied towards the BS Applied Mathematics and MS Economics degrees.
- ⁶ Economics graduate advisor will assist with the graduate course electives.
- ⁷ Students may participate in an ECON 684 or enroll for two courses during the summer immediately following completion of their final Spring semester Bachelor course requirements.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 49)s and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

This program includes a total of 156 hours, which up to 6 hours may be applied toward both the Bachelor of Science in Applied Mathematics and the Master of Science in Economics (Non-Thesis Option).

Applied Mathematics - 5-Year Bachelor of Science and Master of Science in Mathematics

The curriculum in the Bachelor of Science in Applied Mathematics 5-year program explores the application of analytical problem solving tools to concrete problems in technology and business.

The combined program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering Texas A&M. Students in this program investigate a broad array of techniques in applied and pure mathematics and pursue electives in related fields, such as computer science and statistics, that demonstrate how mathematics models challenges we face every day.

Among the various advantages of the combined program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student's individual degree plan.

Fifth Year

Fall	Semester Credit Hours
Graduate Degree ⁷	32-36
Semester Credit Hours	32-36
Total Semester Credit Hours	32-36

¹ Select 4 hours from ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

² MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172. MATH 200 is also highly recommended for math majors co-enrolled in MATH 151, MATH 152, MATH 171 or MATH 172.

³ Select from any 100-499 course not used elsewhere (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, MATH 151-168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301; PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301 - 303 (p. 1248)).

⁴ Of the 18 hours shown as University Core Curriculum (p. 26), 3 must be from language, philosophy and culture, 3 from creative arts, 6 from American history, and 6 from Government/Political Science.

⁵ Except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291, CSCE 402.

⁶ For students in the MS Non-Thesis Track, these 6 hours will be used towards both the BS and MS degrees in Mathematics. For students in the MS Thesis Track, 2 of these hours will be used towards both the BS and MS degrees in Mathematics, and the remaining 4 hours will be selected from MATH 407-499 (p. 1135).

⁷ 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are MATH 691). Up to six hours of graduate courses may double count for the Non-Thesis Track and up to two hours of graduate courses may double count for the Thesis Track. Except for the MS teaching track, all courses used on the degree plan must be taken face-to-face. For the MS teaching track, students must take four distance courses (MATH 629, MATH 645, MATH 646 and MATH 696), and the remaining courses used on the degree plan must be taken face-to-face. MATH 601 is prohibited for all graduate degree plans, and MATH 696 is not allowed for the non-teaching MS tracks. All MS tracks require at least 24 credit hours of mathematics of which at most six may be undergraduate. Depending on the MS track, courses outside of mathematics may be required or optional. For additional information, reference the department website and select the track of interest.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151 / MATH 171, MATH 152 / MATH 172, MATH 221 / MATH 251 / MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity course (p. 49)s and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

The program includes a total of 152 hours (Thesis Track) or 156 hours (Non-Thesis Track). The Thesis track allows up to 2 hours of graduate coursework to be applied toward both the Bachelor of Science in Applied Mathematics and the Master of Science in Mathematics face-to-face program. The Non-Thesis track allows up to 6 hours of graduate coursework to be applied toward both the Bachelor of Science in Mathematics and the Master of Science in Mathematics face-to-face program.

Mathematics - BA

The curriculum in the Bachelor of Arts in Mathematics affords students to undertake a traditional liberal arts education in mathematics.

Students in this program investigate a broad array of techniques in mathematics and pursue electives in related fields that demonstrate how mathematics is fundamental to the world at large. The degree is well suited for students interested in pursuing mathematics and some other area, and a minor field of study is required for this degree.

A student completing this program is prepared to enter the professional work force, or with appropriately chosen electives, to pursue professional degrees in various fields, including education, law, and medicine.

Students in this degree can also pursue teaching certification programs. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

Program Requirements

First Year

¹ Of the 21 hours shown as University Core Curriculum (p. 26), 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from Government/Political Science.

² Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, PHYS 207/PHYS 227. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252, PHYS 207/PHYS 227.

³ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

⁴ Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102 - 148, MATH 151 - 168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301, PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301, STAT 302, STAT 303;).

⁵ A 15-18-hour minor field of study should be selected in conference with a departmental advisor.

⁶ Three hours can be from any 400-level MATH (excluding MATH 401), STAT 335 - STAT 482 (p. 1248), CSCE 210 - CSCE 470 (p. 985) (excluding CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291), or ISEN 320 - ISEN 430, (p. 1095) excluding any 485 course in any department without permission of a departmental advisor. Students seeking secondary certification must take MATH 403, MATH 467, and either MATH 415 or MATH 433. Students who plan to attend graduate school are encouraged to take MATH 416, MATH 447.

⁷ Nine hours of math elective courses are to be from any 400-level MATH, excluding MATH 401.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437, or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two Ds in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49)y (<https://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/>) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Mathematics - BA, Teaching Emphasis

The curriculum in the Bachelor of Arts in Mathematics, Mathematics Teaching Emphasis affords students to undertake a traditional liberal arts education in mathematics while pursuing requirements for teaching certification.

Students in this program investigate a broad array of techniques in mathematics and pursue electives in related fields that demonstrate how mathematics is fundamental to the world at large.

The main goal for the Mathematics Teaching Emphasis is to prepare students to each at the high school level, and the degree include coursework towards teaching certification as well as a semester of clinical teaching. Students are expected to participate in the AggieTEACH program and enroll in the Secondary Education (SEED) Minor. A student will typically seek admission to the AggieTEACH program after completing their first year.

Program Requirements

First Year

¹ Of the 18 hours shown as University Core Curriculum (p. 26), 3 must be from language, philosophy and culture, 3 from creative arts, 6 from American history, 6 from Government/Political Science.

² Select 4 hours from ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, PHYS 207/PHYS 227.

The remaining 4 hours may be selected from ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252, PHYS 207/PHYS 227.

³ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 171, or MATH 172. MATH 170 may be taken twice for credit.

⁴ Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102 - 148 (p. 1135), MATH 151 - 168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301, PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301, STAT 302, STAT 303).

⁵ Three hours of math elective courses are to be from MATH 325, MATH 407-499 (p. 1135). Students who plan to attend graduate school in mathematics are encouraged to take MATH 416 and MATH 446.

⁶ Three hours of math elective courses chosen from MATH 325, MATH 407-499 (p. 1135), CSCE 210-470 (p. 985) (except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291, CSCE 402); or ISEN 320-430 (p. 1095). Students who plan to attend graduate school in mathematics are encouraged to take MATH 416 and MATH 446.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437, or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 252, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two Ds in upper-level (MATH 325-499 (p. 1135)) courses. If a third D is earned, one of the three

courses in which a D was earned must be retaken and a grade of C or better earned.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) (<https://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/>) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

This degree requires that a student be admitted into the AggieTEACH program and complete the Secondary Education (SEED) minor. Courses for the SEED minor have already been incorporated in the planned coursework above.

Mathematics - 5-Year Bachelor of Arts and Master of Science in Mathematics

The curriculum in the Bachelor of Arts in Mathematics 5-year combined program affords students to undertake a traditional liberal arts education in mathematics.

The combined degree program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering Texas A&M. Students in this program investigate a broad array of techniques in mathematics and pursue electives in related fields that demonstrate how mathematics is fundamental to the world at large. The degree is well suited for students interested in pursuing mathematics and some other area, and a minor field of study is required for this degree.

Among the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student's individual degree plan.

MATH 691). Up to six hours of graduate courses may double count. MATH 601 is prohibited for all graduate degree plans. Except for the MS teaching track, no distance class may be used on the degree plan nor may MATH 696 appear. For the MS teaching track, students must take four distance courses: MATH 629, MATH 645, MATH 646 and MATH 696. All five tracks require at least 24 credit hours of mathematics of which at most six may be undergraduate. Depending on the MS track, courses outside of mathematics may be required or optional. For additional information, reference the department website and select the track of interest.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two Ds in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Mathematics - BS

The curriculum in the Bachelor of Science in Mathematics explores mathematical problems and their interplay with science and engineering.

Students in this program investigate a broad array of techniques in pure mathematics and pursue electives in science and related fields that demonstrate the crucial underpinnings of mathematics in our understanding of information, science, and technology.

A student completing this program is prepared to enter employment with analytical and quantitative tools relevant to technological industries or modern financial markets. Furthermore, with the appropriate electives chosen, the student is prepared to enter quantitatively oriented graduate schools, including PhD programs in Mathematics. All advising for this degree option is done through the Undergraduate Program Office in the Department of Mathematics.

¹ Of the 21 hours shown as University Core Curriculum (p. 26), 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from Government/Political Science.

² Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, PHYS 207/PHYS 227. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252, PHYS 207/PHYS 227.

³ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

⁴ Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, 151-168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301, PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301 - 303 (p. 1248)).

⁵ A 15-18-hour minor field of study should be chosen in conference with a departmental advisor.

⁶ Except CSCE 222/ECEN 222, CSCE 285, CSCE 289, CSCE 291.

⁷ This 6 hours will be applied towards both BA and MS degrees in Mathematics.

⁸ The overall program hours (156 hours) includes 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are

¹ Of the 21 hours shown as University Core Curriculum (p. 26), 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from Government/Political Science.

² Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

³ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

⁴ Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148 (p. 1135), MATH 151-168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301, PHYS 101-125 (p. 1205), PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301-303 (p. 1248);).

⁵ Four (4) hours must be selected from ATMO 335, ATMO 336, ATMO 435; ASTR 111; BICH 401-489 (p. 947); BIOL 111, BIOL 112, BIOL 200-470 (p. 951); CHEM 119, CHEM 120, CHEM 222-474 (p. 964); CSCE 110, CSCE 111, CSCE 206, CSCE 221; GENE 301-452 (p. 1053); OCNG 251, OCNG 252, OCNG 310, OCNG 320, OCNG 330, OCNG 340, OCNG 411, OCNG 425, OCNG 443, OCNG 451, OCNG 453; PHYS 221, PHYS 222, PHYS 302-305, PHYS 307-314 (p. 1205), PHYS 324-428 (p. 1205). Six (6) hours must be selected from ATMO 335, ATMO 336, ATMO 435; BICH 401-489 (p. 947); BIOL 200-470 (p. 951); CHEM 222-474 (p. 964); CSCE 120, CSCE 221, CSCE 320/STAT 335, CSCE 411, CSCE 421; GENE 301-452 (p. 1053); OCNG 251-252, (p. 1182) OCNG 310, OCNG 320, OCNG 330, OCNG 340, OCNG 411, OCNG 425, OCNG 443, OCNG 451, OCNG 453; PHYS 221,

(p. 1205) PHYS 222, PHYS 302-305, 307-314, 324-428 (p. 1205); STAT 211, STAT 212, STAT 335/CSCE 320, STAT 408, STAT 421.

⁶ Twelve hours must be selected from MATH 407-499 (p. 1135). Students are required to take at least one of the following: MATH 427, MATH 431, MATH 436, MATH 439. Students are encouraged to take MATH 412, MATH 414, MATH 442, or MATH 470. Students who plan to attend graduate school are encouraged to take MATH 447. Departmental permission is required to take MATH 485 or MATH 491.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Mathematics - 5-Year Bachelor of Science and Master of Science in Mathematics

The curriculum in the Bachelor of Science in Mathematics 5-year combined program explores mathematical problems and their interplay with science and engineering.

The combined degree program enables ambitious and academically talented mathematics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering Texas A&M. Students in this program investigate a broad array of techniques in pure mathematics and pursue electives in science and related fields that demonstrate the crucial underpinnings of mathematics in our understanding of information, science, and technology.

Among the various advantages of the program, upon its completion a student will be in an exceptionally strong position to enter:

- The professional industrial job marketplace;
- A career in secondary education;
- A doctoral program in mathematics, or in a related discipline, at Texas A&M or another university.

The related disciplines include computer science, engineering, physics, statistics, genetics, economics, business administration, education, and biology.

Eligibility for entering a doctoral program in one of these disciplines would depend in part on the undergraduate and graduate external options and areas of emphasis that were reflected in a student's individual degree plan.

¹ Of the 21 hours shown as University Core Curriculum (p. 26), 3 must be from language, philosophy and culture, 3 from creative arts, 3 from social and behavioral sciences, 6 from American history, 6 from Government/Political Science.

² Select 4 hours from: ASTR 111, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117. The remaining 4 hours may be selected from: ASTR 111, ATMO 201/ATMO 202, BIOL 111, BIOL 112, CHEM 119, CHEM 120, CHEM 107/CHEM 117, GEOL 101/GEOL 102, OCNG 251/OCNG 252.

³ MATH 170 is highly recommended for math majors co-enrolled in MATH 150, MATH 151, MATH 152, MATH 171 or MATH 172.

⁴ Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, MATH 151-168 (<http://catalog.tamu.edu/undergraduate/course-descriptions/math/>), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PHYS 109/ASTR 109, PBSI 301; PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301 - 303 (<http://catalog.tamu.edu/undergraduate/course-descriptions/stat/>)).

⁵ Four (4) hours must be selected from ATMO 335, ATMO 336, ATMO 435; ASTR 111; BICH 401-489 (p. 947); BIOL 111, 112, 200-470, 318-438 (p. 951); CHEM 119, 120, 222-474 (p. 964); CSCE 110, CSCE 111, CSCE 206, CSCE 221; GENE 301-452 (p. 1053); OCNG 251-252, (p. 1182)OCNG 310, OCNG 320, OCNG 330, OCNG 340, OCNG 411, OCNG 425, OCNG 443, OCNG 451, OCNG 453; PHYS 221, (p. 1205)PHYS 222, PHYS 302-305, 307-314, 324-428 (p. 1205). Six (6) hours must be selected from ATMO 335, ATMO 336, ATMO 435; BICH 401-489 (p. 947); BIOL 200-470 (p. 951); CHEM 222-474 (p. 964); CSCE 120, CSCE 320/STAT 335, CSCE 411, CSCE 421; GENE 301-452 (p. 1053); OCNG 251-252, (p. 1182) OCNG 310, OCNG 320, OCNG 330, OCNG 340, OCNG 411, OCNG 425, OCNG 443, OCNG 451, OCNG 453; PHYS 221, PHYS 222, PHYS 302-305, 307-314, 324-428 (p. 1205); STAT 211, STAT 212, STAT 335/CSCE 320, STAT 408, STAT 421.

⁶ For students in the MS Non-Thesis Track, these 6 hours will be used towards both the BS and MS degrees in Mathematics. For students in the MS Thesis Track, 2 of these hours will be used towards both the BS and MS degrees in Mathematics the remaining 4 hours to be selected from MATH 407-499 (p. 1135).

⁷ 36 hours for a non-thesis option or 32 hours for a thesis option (up to six of which are MATH 691). Up to six hours of graduate courses may double count for the Non-Thesis Track and up to two hours of graduate courses may double count for the Thesis Track. MATH 601 is prohibited for all graduate degree plans. Except for the MS teaching track, no distance class may be used on the degree plan nor may MATH 696 appear. For the MS teaching track, students must take four distance courses: MATH 629, MATH 645, MATH 646 and MATH 696. All five tracks require at least 24 credit hours of mathematics of which at most six may be undergraduate. Depending on the MS track, courses outside of mathematics may be required or optional. For additional

information, reference the department website and select the track of interest.

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

If a grade of D or F is earned in any of the following courses, MATH 151/MATH 171, MATH 152/MATH 172, MATH 221/MATH 251/MATH 253, MATH 300, MATH 323 or MATH 308, this course must be immediately retaken and a grade of C or better earned. The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Students desiring teacher certification should consult the requirements for certification before registering for electives.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

The program includes a total of 152 hours (Thesis Track) or 156 hours (Non-Thesis Track). The Thesis track allows up to 2 hours of graduate coursework to be applied toward both the Bachelor of Science in Mathematics and the Master of Science in Mathematics face-to-face program. The Non-Thesis track allows up to 6 hours of graduate coursework to be applied toward both the Bachelor of Science in Mathematics and the Master of Science in Mathematics face-to-face program.

University Studies - BS, Mathematics for Teaching Concentration

The BS in University Studies, Mathematics for Teaching area of concentration consists of courses that are designed to give students desiring a secondary-school teaching credential a solid foundation in mathematics.

The courses chosen for this program encompass the mathematical areas tested by the State of Texas and TExES secondary mathematics examination. These are the courses currently required for the secondary mathematics teaching field at Texas A&M University.

Program Requirements

Code	Title	Semester Credit Hours
MATH 300	Foundations of Mathematics ¹	3
MATH 304	Linear Algebra ¹	3
	or MATH 32 or Linear Algebra	
MATH 375	Intermediate Real Analysis ¹	3
MATH 376	Intermediate Abstract Algebra ¹	3
MATH 403	Mathematics and Technology ¹	3
MATH 467	Modern Geometry ¹	3

STAT 211	Principles of Statistics I ¹	3

Social and behavioral sciences (p. 31)		3
Minor 1		15-18
Minor 2		15-18
General Electives ³		19-25
Total Semester Credit Hours		120

¹ Must make a grade of C or better.

² Completion of four semesters of upper-level ROTC may be substituted for three hours of the requirement.

³ Select from any 100-499 course not used elsewhere, (except ALED 125; ASCC 102; ASTR 109/PHYS 109, ASTR 119/PHYS 119; BMEN 153; KINE 199; LAND 101; MATH 102-148, MATH 151-168 (p. 1135), MATH 304, MATH 309, MATH 311, MATH 365, MATH 366, MATH 367, MATH 375, MATH 376; PBSI 301, PHYS 109/ASTR 109, PHYS 119/ASTR 119, PHYS 201, PHYS 202, PHYS 205; STAT 201, STAT 301 - 303 (p. 1248).)

Maximum of 3 hours of MATH 300 or CSCE 222/ECEN 222 may be used in this degree program.

Maximum of 3 hours of MATH 411 or STAT 414 may be used in this degree program.

Maximum of 4 hours of MATH 417, MATH 437 or CSCE 442 may be used in this degree program.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 49) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

Mathematics - Minor

The Minor in Mathematics program enables non-mathematics majors to complete a course of study that highlights fundamental techniques and applications of mathematics.

The mathematics minor involves middle-level and upper-level coursework in mathematics, aimed at a broad view of topics.

Students wishing to earn a minor in mathematics do not need to visit the Mathematics Department to do so. They should see their advisor, and inform them of their intention to earn a minor in mathematics, and to have that information entered into COMPASS.

Students who are majoring in engineering or one of the sciences, may be able to obtain a second (double) major in mathematics. If that is of interest to you, contact the Mathematics Undergraduate Program Office.

Program Requirements

Non-math majors can obtain a minor in mathematics by meeting the following requirements:

Code	Title	Semester Credit Hours
Select one from the following:		4
MATH 148	Calculus II for Biological Sciences	
MATH 152	Engineering Mathematics II	
MATH 172	Calculus II	
Select 9 hours from the following:		9
MATH 221	Several Variable Calculus ¹	
MATH 251	Engineering Mathematics III ¹	
MATH 253	Engineering Mathematics III ¹	
MATH 300-499	(p. 1135) ^{2, 3, 4}	
MATH 400-499	(p. 1135) ⁴	3
Total Semester Credit Hours		16

¹ Only one of MATH 221, MATH 251, or MATH 253 can be taken to satisfy the minor, due to the course content.

² Only one of MATH 304, MATH 307, MATH 309, MATH 311 or MATH 323 can be taken to satisfy the minor, due to the course content.

³ Only one of MATH 307 or MATH 308 can be taken to satisfy the minor, due to the course content.

⁴ All 300-400 level MATH courses MUST be taken at Texas A&M University. No transfer work will be accepted.

Students must make a grade of C or better in all courses.

MATH 142, MATH 168, MATH 365, MATH 366, MATH 367, MATH 396, MATH 403, MATH 419, and MATH 485 may not be used to satisfy the requirements. MATH 485 will receive approval only under exceptional circumstances.

Department of Oceanography Studies in Oceanography

Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries. Undergraduate degree programs include BS in Oceanography and BA in Ocean Studies. In addition, qualified undergraduate students may participate in a 15-credit minor in Oceanography.

The BS in Oceanography provides students with an interdisciplinary education and training in one of three areas of ocean science: Ocean Observing Science and Technology (OOST), Ocean Climate (OC), Marine Ecosystems Processes (MEP) and Marine Chemistry and Geochemistry

(MCG). All students will gain skill in handling, evaluating and analyzing large datasets using computer programming.

The BA in Ocean Studies provides students with an interdisciplinary understanding of the oceans and allows them to pair it with a minor from another field to tailor the degree to their needs and the needs of the evolving workforce. All students will develop critical thinking and problem-solving skills.

The Department of Oceanography also has a combined 5-year Bachelor's/ Master of Ocean Science and Technology Program in conjunction with Atmospheric Sciences, Oceanography, and Geology. These combined programs offer motivated and exceptional students the opportunity to achieve aspirations in an efficient program at Texas A&M, completing a Bachelor's degree in one of these majors: Meteorology (BS), Geology (BS), Oceanography (BS), and the Master of Ocean Science and Technology (MOST) degree in 5 years. There are only two courses used for dual credit in this program. There is a total of 150 hours of coursework. The concurrent degree program enables these motivated students to coordinate the required BS coursework (114 undergraduate credit hours plus 6 dual credit graduate courses) and MOST coursework (36 credit hours including the 6 dual credit graduate courses) to complete the required credit hours for each degree without diminishing scope or quality of work within 5 years.

Majors

- Bachelor of Arts in Ocean Studies (p. 451)
- Bachelor of Science in Oceanography (p. 446)
- Bachelor of Science in Oceanography and Master of Ocean Science and Technology, 5-Year Degree Program (p. 448)

Minors

- Oceanography Minor (p. 452)

Oceanography - BS

This major provides students with an interdisciplinary education and training in one of four areas of ocean science: Marine Ecosystem Processes (MEP), Marine Chemistry and Geochemistry (MCG), Ocean Observing Systems and Technology (OOST), Ocean Climate (OC).

The BS in Oceanography curriculum: 1) Provides students with an interdisciplinary understanding of the oceans and the processes affecting them for use in careers in marine science or other related fields; 2)

Provides students with the skills to retrieve, evaluate, and analyze large oceanographic datasets such as those generated from long term oceanographic studies and observing systems; and 3) Emphasizes critical thinking and problem solving skills.

The BS in Oceanography has four themes: Ocean Observing Science and Technology (OOST), Ocean Climate (OC), Marine Ecosystems Processes (MEP) and Marine Chemistry and Geochemistry (MCG). All four themes share common requirements but allow for specialization depending on a student's interest. The OOST theme provides more emphasis in statistics and ocean observing systems; all students will gain skill in handling, evaluating and analyzing large datasets. The OC theme provides more emphasis in advanced math skills that can be applied to understanding ocean climate interactions; all students will gain skill in handling, evaluating and analyzing large datasets. The MEP theme provides more emphasis in biological and ecological processes; all students will gain skill in understanding and applying a biological framework to understanding the ocean. The MCG theme provides more emphasis on marine chemistry and geochemistry; all students will gain skill in understanding and applying a chemical and geochemical framework to understanding the ocean.

Many graduates will obtain jobs in a variety of fields including marine technical support, energy and transportation industries, insurance industries, hazard mitigation, marine operations, homeland security, oil spill response, etc. Students planning on attending graduate school are encouraged to also complete a minor in a STEM field.

For additional information, please visit <https://ocean.tamu.edu/>.

Oceanography - 5-Year Bachelor of Science and Master of Ocean and Science Technology

This accelerated 5-year program allows students to earn both a Bachelor of Science in Oceanography and a Master of Ocean Science and Technology, equipping them with interdisciplinary knowledge and advanced data analysis skills for various careers in marine science and related industries.

The Department of Oceanography offers a 5-year combination degree program that allows a Bachelor of Science in Oceanography major to enter the Master of Ocean Science and Technology at the start of their senior year (typically year four) at Texas A&M University. This enables students to receive their Oceanography undergraduate degree (BS) and a Master of Ocean Science and Technology (MOST) graduate degree in five years.

The BS in Oceanography curriculum: 1) Provides students with an interdisciplinary understanding of the oceans and the processes affecting them for use in careers in marine science or other related fields; 2) Provides students with the skills to retrieve, evaluate, and analyze large oceanographic datasets such as those generated from long term oceanographic studies and observing systems; and 3) Emphasizes critical thinking and problem solving skills.

The BS in Oceanography has four themes: Ocean Observing Science and Technology (OOST), Ocean Climate (OC), Marine Ecosystems Processes (MEP) and Marine Chemistry and Geochemistry (MCG). All four themes share common requirements but allow for specialization depending on a student's interest. The OOST theme provides more emphasis in statistics and ocean observing systems; all students will gain skill in handling, evaluating and analyzing large datasets. The OC theme provides more emphasis in advanced math skills that can be applied to understanding ocean climate interactions; all students will gain skill in handling, evaluating and analyzing large datasets. The MEP theme provides more emphasis in biological and ecological processes; all students will gain skill in understanding and applying a biological framework to understanding the ocean. The MCG theme provides more emphasis on marine chemistry and geochemistry; all students will gain skill in understanding and applying a chemical and geochemical framework to understanding the ocean.

The Master of Ocean Science and Technology (MOST) is a non-thesis degree. It provides students with education and training from scientists who are active researchers and educators working at the cutting edge of ocean sciences throughout the global ocean, from the Gulf to the waters around Antarctica.

The curriculum is designed to: 1) Provide students with a basic understanding of the major concepts in oceanography that can be applied in their Ocean Sciences careers, 2) Provide students with the skills and tools to evaluate and analyze data, particularly large datasets of the type generated by ocean observing systems, and 3) Facilitate critical thinking and problem solving.

Many graduates will obtain jobs in a variety of fields including marine technical support, energy and transportation industries, insurance

industries, hazard mitigation, marine operations, homeland security, oil spill response, etc.

Ocean Studies - BA

The Bachelor of Arts in Ocean Studies provides students with an interdisciplinary understanding of the oceans.

The ocean covers just over 70% of the earth's surface and societal dependence (e.g. transportation of goods, role in weather and hazards, primary source of food for many parts of the world, etc.) on the ocean is only increasing. Students will combine their oceanographic knowledge with a university approved minor to enhance their expertise in critical areas of the expanding Blue Economy.

The Bachelor of Arts in Ocean Studies curriculum will 1) provide students with an interdisciplinary understanding of the oceans; 2) provide students with the communication skills to articulate the problems and the solutions to issues relating to the stewardship of one of earth's greatest resources, the ocean; and, 3) emphasize critical thinking and problem-solving skills.

Oceanography - Minor

Oceanography is an interdisciplinary science that focuses on the oceans, their contents and their boundaries.

Degree programs include BA in Ocean Studies, BS in Oceanography, MS in Oceanography, PhD in Oceanography and Master of Ocean Science and Technology (MOST), a non-thesis master's degree. In addition, qualified undergraduate students may participate in a 15-credit minor in Oceanography. The following majors may not minor in Oceanography: BA Ocean Studies, BS Oceanography, BS Marine Science, and all combination Master of Ocean Science and Technology programs.

Department of Philosophy

The Greek philosopher Socrates once said that the unexamined life is not worth living. For more than 2,000 years, philosophy has been the source of the most intensely reflective, influential and argued versions of that examination. The concerns of philosophy range from the arts, the methods and foundations of the sciences, politics, education, and religion to the complex questions relating to the meaning of reality, truth, values and the significance of human history. The study of philosophy is an essential dimension of a well-educated person.

Philosophy seeks to establish standards of evidence, provide rational methods of resolving conflicts, and create techniques for evaluating ideas and arguments. Philosophy develops the capacity to see the world from the perspectives of other individuals and other cultures; it enhances one's ability to perceive the relationships among the various fields of study; and it deepens one's sense of the meaning and variety of human experience.

Toward these ends, the program in philosophy at Texas A&M is structured to provide students with the skills necessary to appreciate more fully the central concerns of human existence and develop abilities in problem-solving, communication, persuasion, writing, and critical thinking.

Students, along with parents and friends, often assume that the only undergraduates who major in philosophy are those who intend to pursue graduate degrees in philosophy, theology and law. However, the breadth of skills developed makes the study of philosophy appropriate for students entering professional fields such as medicine, business and education, and for those preparing for graduate work in the humanities or the social sciences.

It should be stressed that the non-academic value of a field of study must not be viewed mainly in terms of its contribution to obtaining one's first job after graduation. Students are understandably preoccupied with getting their first job, but even from a narrow vocational point of view it would be short-sighted to concentrate on that at the expense of developing potential for success and advancement once hired. Factors leading to initial employment are not necessarily those that lead to promotions or beyond a first position. This is because the needs of many employers alter with changes in social and economic patterns. It is therefore crucial to see beyond the specifics of a job description.

As this suggests, there are people trained in philosophy in just about every field. They have gone into not only such professions as teaching, medicine, and law, but also into computer science, management, publishing, sales, government service, criminal justice, public relations, and other fields.

Faculty

Bermudez, Jose Luis, Professor
Philosophy
PhD, Cambridge University, 1992

Climenhaga, Nevin, Assistant Professor
Philosophy
PHD, Notre Dame University, 2017

Conway, Daniel W, Professor
Philosophy
PHD, University of California at San Diego, 1985

Majors

- Bachelor of Arts in Philosophy (p. 453)
- Bachelor of Arts in Philosophy and Master of Arts in Philosophy, 5-Year Degree Program (p. 455)
- Bachelor of Arts in Society, Ethics, and Law (p. 456)

Minors

- Philosophy Minor (p. 457)

Certificates

- Philosophy Pre-Law Certificate (p. 458)

Philosophy - BA

This program cultivates critical thinking and problem-solving skills, empowering students to analyze complex issues and excel in various fields like law and business, preparing them for a rapidly changing world

Curiosity matters! Philosophers and those who are philosophically minded have long asked key questions, evaluated possibilities and arrived at those answers that have shaped and reshaped who we are, how we do things, and how we understand the world in which we live. The study of philosophy is not the study of antiquated views. It is not the study and use of a single method. The study of philosophy transforms intellectual curiosity into a potent, flexible set of skills by inculcating the ability to identify unstated assumptions, to take a critical attitude towards the information that others accept, and to evaluate and articulate the reasons that compel us to do and believe things. Philosophy is what college is all about: delving deeply into subjects that matter to you, while cultivating skills that will carry you the rest of your life.

Educational economists, such as G. Duncan, remind us that jobs that pay well are increasingly requiring employees to be able to solve unexpected problems as team members. In a world that is typified by unpredictable and complex professions, professionals who can cross intellectual boundaries and make connections between previously discrete domains of knowledge are primed to resolve unexpected problems; they are primed to succeed. While there is no single path to success, there is a set of skills that can help solve unexpected problems. Creativity researchers have identified two key factors: breadth of learning and an aptitude for broad conceptual thinking. You cannot combine what you don't know and you cannot combine if you have not cultivated an ability to move freely among conceptual categories. Philosophy is among the best intellectual activities for cultivating creative, critical thinking. Indeed, philosophy students typically score among the top in entrance exams for graduate school (GRE), and professional schools for law (LSAT) and business (GMAT) within national rankings.

The Department of Philosophy supports breadth of learning and broad conceptual thinking while offering a degree program with maximum flexibility. At its core are a limited number of requirements including three courses in the history of philosophy. These courses enable students to step outside of their own world-view and learn how to understand and critique unfamiliar perspectives. Students also take a course in formal logic in fulfillment of one of their core math requirements. Formal logic requires that students use one of the highest forms of reasoning in the taxonomy of learning: creative thinking. There is no algorithm for constructing a formal proof. Students who study formal logic learn a system, and use that system to create their own proofs.

In addition to history and logic, students are free to select among a range of courses that allow them to better understand the limits of knowledge, the limits of scientific thinking, the theories behind our legal and political system, the foundations of ethics, and more. In addition to traditional course work, high-achieving students in philosophy can undertake a sustained research project in the form of an honor's thesis, serve as Editor for our undergraduate journal, or complete internships either within the department or in other professional settings.

Students pursuing the BA in Philosophy have the option of pursuing early admission to Texas A&M's School of Law. Under this plan, students can complete both degrees in 6. Participation requires formal application to and admission by the School of Law during year 3. Admission is fully at the discretion of the School of Law. Careful planning is key, so interested students should work closely with an advisor from their first semester of study.

Program Requirements

First Year

Fall		Semester Credit Hours
ENGL 104	Composition and Rhetoric	3

¹ Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have

studied previously without receiving college credit, you must first take a placement test. See academic advisor.

² Philosophy courses cannot be used to meet this requirement.

³ Select from any 100-499 course not used elsewhere. Maximum of 3 hours of PHIL 484 may be used as general electives.

⁴ To be selected in consultation with an advisor PHIL 100-499 (p. 1198). At least four of the courses must be 300-400 level. Maximum of 3 hours of PHIL 484 may be used as Philosophy electives.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

30 credits minimum. A grade of C or higher is required for a course to be counted in the major field.

Philosophy - 5-Year Bachelor of Arts and Master of Arts in Philosophy

This combination program enables motivated students to efficiently complete both the Bachelor of Arts in Philosophy and the non-thesis Master of Arts in Philosophy degrees in five years.

The Department of Philosophy offers a 5-Year Bachelor of Arts and Master of Arts in Philosophy. The combined program includes a non-thesis version of the Master's curriculum. Interested students should apply in the first semester of their junior year in order to begin graduate work in their senior year. Students should work closely with their academic advisor to ensure a smooth transition.

This program provides a valuable option for students contemplating doctoral-level study in Philosophy or related fields. It is also recommended for students who, through a combination of credit by examination, dual credit, or community college credit, approach the end of their official undergraduate studies before having had the time to fully take advantage of the wealth of opportunities available at Texas A&M. Taking one more year to earn a Master's credential will enable students to pursue more demanding and creative philosophical projects while exploring their career options.

¹ Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

² Philosophy courses cannot be used to meet this requirement.

³ Select from any 100-499 course not used elsewhere. Maximum of 3 hours of PHIL 484 may be used as general electives.

⁴ In consultation with an advisor select from PHIL 300-499 (p. 1198).

Maximum of 3 hours of PHIL 484 may be used as Philosophy electives.

⁵ For students in the MA Non-Thesis Track, these 6 hours will count towards both the Philosophy elective on the BA and MA degree plans. For students in the MA Thesis Track, 0 hours will be used to complete both the BA and MA degree plans and these 6 hours will be selected in consultation with an undergraduate academic advisor.

⁶ Select from PHIL 600-699 (<https://catalog.tamu.edu/graduate/course-descriptions/phil/>), except for PHIL 684 and PHIL 691. No more than 6 hours of PHIL 685 (Directed Studies) may be used. Students in a

non-Thesis Option MA program cannot take PHIL 691. See graduate advisor.

A grade of C or higher is required for a course to be counted in the undergraduate major field.

The program includes a total of 150 hours (Thesis Track) or 156 hours (Non-Thesis Track). The Thesis track allows up to 0 hours of graduate coursework to be applied toward both the Bachelor of Arts in Philosophy and the Master of Arts in Philosophy. The Non-Thesis track allows up to 6 hours of graduate coursework to be applied toward both the Bachelor of Arts in Philosophy and the Master of Arts in Philosophy.

College and University Requirements

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Society, Ethics, and Law - BA

The Bachelor of Arts in Society, Ethics, and Law (SEAL) is designed for students preparing for careers in law, community service, or related fields.

Extensive coursework in moral, social, political, and legal philosophy is combined with courses utilizing historical and social science methodologies to explore relevant topics.

The SEAL major closely attends to the American Bar Association's (ABA) recommendations that undergraduates "pursue an area of study that interests and challenges you, while taking advantage of opportunities to develop your research and writing skills." More specifically, the ABA advises students to cultivate the following "Core Skills, Values, Knowledge, and Experience": problem solving; critical reading; writing and editing; oral communication and listening; research; relationship-building and collaboration; background knowledge about the historical and social development of the United States and the diversity of cultures within and beyond the U.S.; public service and promotion of justice; and exposure to the law.

SEAL students are directed to use their core courses to take logic (Math core) and oral communication. SEAL majors take two courses in ethics, two courses in social and political thought, two courses in philosophy of law, a two-course sequence in the history of law, two social science courses, either epistemology or philosophy of language, and technical writing. SEAL majors must also complete an internship. A minor is not required; however SEAL majors are encouraged to consider how a minor might contribute to the development of another distinctive skill set.

¹ Complete 14 hours of a foreign language (<https://catalog.tamu.edu/undergraduate/arts-and-sciences/arts-requirements/>) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

² Select from any 100-499 course not used elsewhere. No more than 3 hours of PHIL 484 may be used. Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used towards general electives.

³ Select from PHIL 205, PHIL 282, PHIL 314, PHIL 315, PHIL 376/ FILM 376, PHIL 381, PHIL 465/RELS 465, PHIL 470, PHIL 480, or PHIL 482.

⁴ Select from COMM 302, COMM 307/JOUR 301, COMM 317/JOUR 317, CSCE 402, MGMT 209, POLS 306, POLS 320, POLS 340/PSAA 340, POLS 353, POLS 355, POLS 462/WGST 462, SOCI 304, SOCI 317/ AFST 317, SOCI 328, SOCI 338, SOCI 412, SOCI 413, SOCI 421/ WGST 421, SOCI 422, SOCI 445, or an approved version of PHIL 491.

⁵ Students must complete an approved internship involving 150 hours of work in a professional setting. See academic advisor.

⁶ Students may substitute PHIL 491 Research with departmental approval.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Philosophy - Minor

This minor offers students the flexibility to explore various philosophical topics or delve into specific areas of interest, cultivating critical thinking and problem-solving skills applicable to a wide range of academic and professional pursuits.

Curiosity matters! Philosophers and those who are philosophically minded have long asked key questions, evaluated possibilities and arrived at those answers that have shaped and reshaped who we are, how we do things, and how we understand the world in which we live. The study of philosophy is not the study of antiquated views. It is not the study and use of a single method. The study of philosophy transforms intellectual curiosity into a potent, flexible set of skills by inculcating the ability to

identify unstated assumptions, to take a critical attitude towards the information that others accept, and to evaluate and articulate the reasons that compel us to do and believe things. Philosophy is what college is all about: delving deeply into subjects that matter to you, while cultivating skills that will carry you the rest of your life.

Educational economists, such as G. Duncan, remind us that jobs that pay well are increasingly requiring employees to be able to solve unexpected problems as team members. In a world that is typified by unpredictable and complex professions, professionals who can cross intellectual boundaries and make connections between previously discrete domains of knowledge are primed to resolve unexpected problems; they are primed to succeed. While there is no single path to success, there is a set of skills that can help solve unexpected problems. Creativity researchers have identified two key factors: breadth of learning and an aptitude for broad conceptual thinking. You cannot combine what you don't know and you cannot combine if you have not cultivated an ability to move freely among conceptual categories. Philosophy is among the best intellectual activities for cultivating creative, critical thinking.

Students may earn a minor in Philosophy by taking 15 credit hours, of which 6 may be earned at the 100-200 level. This allows students maximum flexibility in choosing among our diverse set of courses. Students pursuing the minor are free to sample from the great breadth of philosophical topics (from philosophy of science to philosophy of art) or to dive deep on particular topics of interest (such as ethics, logic and metaphysics, or the history of philosophical thought).

Program Requirements

Code	Title	Semester Credit Hours
PHIL 300-499 (p. 1198) ¹		9-15
PHIL 100-299 (p. 1198) ²		0-6
Total Semester Credit Hours		15

¹ Any course except PHIL 484, which may be used with departmental approval only.

² Up to six semester credit hours may be selected from PHIL 100-299 (p. 1198).

Students must make a grade of C or better in all courses.

Philosophy Pre-Law - Certificate

Aligned with American Bar Association recommendations, this Pre-Law Certificate cultivates essential legal skills, including problem-solving, critical reading, writing and editing, oral communication and listening, and research, preparing students for success in law school and legal careers.

The Department of Philosophy offers a Pre-law Certificate that is primarily guided by the published recommendations of the *American Bar Association* (A.B.A.).¹ The A.B.A. encourages prospective law students to pursue classes that cultivate a set of skills that will enhance the study of law. To this end, Philosophy's Pre-law Certification requires that students take classes that typically cultivate the A.B.A.'s recommended skill set:

1. Problem Solving involves "courses and other experiences that will engage [students] in critical thinking about important issues, challenge ... beliefs and improve ... tolerance for uncertainty and criticism."¹

2. Critical Reading involves "close reading and critical analysis of complex textual material."¹
3. Writing and Editing involves "preparing original pieces of substantial length and revising written work in response to constructive criticism. [...] Language is the most important tool of a lawyer, and lawyers must learn how to express themselves clearly and concisely."¹
4. Oral Communication and Listening involves "the ability to speak clearly and persuasively... and excellent listening skills."¹
5. Research involves "undertaking a project that requires significant library research and the analysis of large amounts of information obtained from that research."¹

Students pursuing the certificate must enroll through an advisor before completing 105 credit hours.

¹ Must earn a grade of C or higher.

² Must be taken after or concurrent with the completion of the other credit hours for the certificate. Students must submit a philosophical writing sample, which may be a piece of writing previously submitted for one of the courses listed above.

³ Students must sign up for the certificate through an advisor before completing 105 credit hours.

Department of Physics and Astronomy

Physics seeks to understand the fundamental workings of nature, from the constituents of matter deep within the nuclei of atoms, to the most distant galaxies of our expanding universe, to everyday phenomena of emergent complexity, self-organization and chaos. The resulting basic physical knowledge provides a firm foundation for innovations and is often the driving force of advanced technology. Computers, global positioning systems (GPS), the internet, lasers, magnetic resonance imaging (MRI) and other medical diagnostic tools, and space flight, along with many others, were all made possible by key advances in physics.

Physicists have a curiosity that thrives on the challenge of solving problems. Consistent with this, the physics program at Texas A&M strives to teach analytical thinking and quantitative problem-solving skills. This enables students to work productively in physics, in areas closely related

to physics, and in a wide variety of areas outside of physics proper. Physicists can be found in almost any discipline that requires complex problem-solving skills. Some engage in cutting-edge research to increase our basic knowledge of the universe. Some apply new-found knowledge to make practical advances in the fields of computer science, medical science, and engineering. Still, others use their knowledge to advocate, advise, inform, instruct and administrate as lawyers, consultants, journalists/writers, teachers, and managers.

The Department of Physics and Astronomy offers two undergraduate degree programs, a Bachelor of Arts and a Bachelor of Science, as well as minors in Astrophysics and Physics. The Bachelor of Science degree includes tracks in Astrophysics, Business, Computational Science, Materials Physics, Physics and Mathematics Teaching, and Physical Science Teaching, in addition to a no-track option. The Department of Physics and Astronomy also offers Master of Science degrees in Astronomy and Physics, and Doctor of Philosophy degrees in Applied Physics, Astronomy, and Physics.

The faculty members of the department carry out theoretical and experimental research in the areas of astronomy and astrophysics, atomic, molecular and optical physics, computational physics, cosmology, high-energy and elementary particle physics, condensed matter physics and materials science, nuclear physics, quantum optics, and physics education. During the course of their undergraduate experience at Texas A&M, physics majors have the opportunity to work with faculty in all of these areas.

Zubairy, M. Suhail, Professor
Physics & Astronomy
PHD, University of Rochester, 1979

Majors

- Bachelor of Arts in Physics (p. 461)
- Bachelor of Science in Physics (p. 462)
- Bachelor of Science in Physics, Astrophysics Track (p. 463)

- Bachelor of Science in Physics, Business Track (p. 464)
- Bachelor of Science in Physics, Computational Science Track (p. 465)
- Bachelor of Science in Physics, Semiconductors and Modern Materials Track (p. 469)
- Bachelor of Science in Physics, Physical Science Teaching Track (p. 466)
- Bachelor of Science in Physics, Physics and Mathematics Teaching Track (p. 468)

Minors

- Astrophysics Minor (p. 470)
- Physics Minor (p. 471)

Physics - BA

The Bachelor of Arts curriculum provides the student with a firm foundation in physics and with the flexibility to choose from a large number of elective courses, thus permitting the student to explore other interests.

Some of the program's elective courses are chosen to satisfy the requirements of a minor field of study. The student can, therefore, customize his or her program of study in preparation for a career in any science-related or science-required field, from intellectual property law and science reporting to physics teaching. Although not required for the BA program, students have the opportunity to become directly involved in any of the active research programs in the Department of Physics and Astronomy.

Program Requirements

First Year

Fall		Semester Credit Hours
ENGL 104 or ENGL 103	Composition and Rhetoric or Introduction to Rhetoric and Composition	3
MATH 171	Calculus I ¹	4
PHYS 101	Freshman Physics Orientation ¹	1
PHYS 150	Introduction for Programming for Physics ¹	3
American history (p. 30) ²		3
Semester Credit Hours		14

Spring

ASTR 102	Observational Astronomy	1
MATH 172	Calculus II ¹	4
PHYS 206 & PHYS 226	Newtonian Mechanics for Engineering and Science and Physics of Motion Laboratory for the Sciences ¹	4
American history (p. 30) ²		3
Language, philosophy and culture (p. 28) ²		3
Semester Credit Hours		15

Second Year

Fall		
MATH 221	Several Variable Calculus ¹	4

MATH 308	Differential Equations ¹	3
PHYS 207 & PHYS 227	Electricity and Magnetism for Engineering and Science and Electricity and Magnetism Laboratory for the Sciences ¹	4
PHYS 221	Optics and Thermal Physics ¹	3
Semester Credit Hours		14
Spring		
PHYS 225	Electronic Circuits and Applications	3
PHYS 309	Modern Physics ¹	3
PHYS 331	Theoretical Methods for Physicists I ¹	3

Creative arts (p. 30) ²		3
Physics elective ⁷		3
General electives ³		9
Semester Credit Hours		15
Total Semester Credit Hours		120

¹ A physics major must complete the foundation courses (PHYS 101, PHYS 150, ASTR 102/PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPA before taking non-foundation upper-level physics courses.

² Any course in this category from the approved University Core Curriculum list of courses.

³ A minor is required and, along with other free electives, should be chosen in consultation with the student's advisor. Three hours must be in the area of International and Cultural Diversity (p. 49), and three hours must be in the area of Cultural Discourse (p. 48). These may be in addition to other University Core Curriculum courses, or if a course in this category satisfies another area of the Core, it can be used to meet both requirements. Electives may be selected from any 100-499 course

not used elsewhere, except ENGL 103; MATH 100-148, MATH 165-166, MATH 365, MATH 366 (p. 1135); PHYS 201, PHYS 202.

⁴ PHYS 327 is an approved W course. PHYS 328 is an approved C course.

⁵ Any approved Communication course, except PERF 407.

⁶ Any upper-division course in geo/life/physical sciences, mathematics/statistics, or engineering (except 485/491).

⁷ Select from ASTR 314, PHYS 401, PHYS 414, PHYS 416, PHYS 489, MATH 460, or any graduate offering in PHYS or ASTR.

Physics - BS

The Bachelor of Science curriculum is more rigorous in its physics and mathematics course requirements than the Bachelor of Arts. An important part of the BS program is student participation in experimental or theoretical research guided by faculty.

Currently this program has a no-track option and five track options. The BS in Physics (no-track) is designed primarily for students who wish to pursue an advanced degree in physics or employment as a professional physicist in an industrial setting. The department also offers tracks in Astrophysics, Business, Computational Science, Physics and Mathematics Teaching and Physical Science Teaching for those who plan to seek employment or advanced degrees in these fields. Each track results in the BS in Physics degree and has the same core physics courses and the same total number of hours. Because physics forms the basis of many other sciences such as astronomy, chemistry, material science, oceanography, nanoengineering and geophysics, the BS program is excellent preparation for advanced degrees in these fields. In addition, physicists are increasingly applying their talents to molecular biology, biochemistry and medicine. An important part of the BS program is student participation in experimental or theoretical research guided by faculty.

Program Requirements

First Year

Fall		Semester Credit Hours
ENGL 104 or ENGL 103	Composition and Rhetoric or Introduction to Rhetoric and Composition	3

¹ A Physics major must complete the foundation courses (PHYS 101, PHYS 150, ASTR 102, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPA before taking non-foundation upper-level Physics courses.

² Any course in this category from the approved University Core Curriculum list of courses.

³ Any approved Communication course, except PERF 407.

⁴ PHYS 327 is an approved W course. PHYS 328 is an approved C course.

⁵ A combination of PHYS 291, PHYS 491, ASTR 291 and ASTR 491 must equal 4 hours. Students with a U1 or U2 classification should take PHYS 291/ASTR 291. Students with a U3 or U4 classification should take PHYS 491 /ASTR 491.

⁶ Select from ASTR 314, PHYS 414/PHYS 416, PHYS 489, MATH 460, or any graduate offering in PHYS or ASTR.

⁷ To register for PHYS 401 a student must be able to program in a high level language.

⁸ Any upper-division course in geo/life/physical sciences, mathematics/statistics, or engineering (except 485/491).

⁹ Electives should be chosen in consultation with the student's academic advisor. Three hours must be in the area of International and Cultural Diversity, and three hours must be in the area of Cultural Discourse. These may be in addition to other University Core Curriculum courses, or, if a course in this category satisfies another area of the Core, it can be used to meet both requirements. Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103; MATH 100-148, 165-166, 365-366 (p. 1135); PHYS 201, PHYS 202.

Physics - BS, Astrophysics Track

The BS Physics, Astrophysics track will provide students with a solid foundation in basic physics combined with knowledge of fascinating astrophysical objects and phenomena.

This program will prepare students for graduate studies in Astronomy, Astrophysics, and related fields. Students will also learn quantitative problem-solving skills, experimental research skills, and expertise in computer simulations that are highly valued in any field and any industry.

⁷ Any upper-division course in geo/life/physical sciences, mathematics/statistics, or engineering (except 485/491).

Physics - BS, Computational Science Track

This BS Physics, Computational Science Track equips students with advanced computer simulation and data analysis skills, preparing them for cutting-edge research and high-demand careers in multiple industries.

Physics and other sciences increasingly rely on advanced computer simulations and data analysis to develop realistic mathematical models of complex phenomena or process huge amounts of data coming

from particle accelerators and astronomical surveys. The BS Physics, Computational Science Track will provide students with the skills to pursue advanced studies in this area or directly enter the workforce in virtually any industry, as the demand for experts with advanced computer skills will only grow with time.

Physics - BS, Physical Science Teaching Track

This BS in Physics, Physical Science Teaching Track, provides students with a strong physics foundation and Texas teaching certification, while

also developing critical thinking and problem-solving skills valued in various industries.

The BS in Physics, Physical Science Teaching Track, will provide students with a solid foundation in physics and the courses required for the aggieTEACH – Arts & Sciences Program (<https://aggietechartsci.tamu.edu/>)(application required). Upon completion of this degree and one semester of clinical teaching, students will hold a Texas Physical Science (grades 6-12) certification. Although this degree is designed for students who want to teach, the physics courses also build a strong foundation in critical thinking and quantitative problem-solving skills that are attractive to many areas of industry.

¹ A Physics major must complete the foundation courses (ASTR 102, PHYS 101, PHYS 150, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309 PHYS 331, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPA before taking non-foundation upper-level physics courses.

² Any course in this category from the approved University Core Curriculum (<https://catalog.tamu.edu/undergraduate/general-information/university-core-curriculum/>) list of courses.

³ INST 222 is an approved Social and Behavioral Science, International and Cultural Diversity and Cultural Discourse class.

⁴ Any approved Communication (p. 27) course, except PERF 407.

⁵ INST 210 is an approved Social and Behavioral Science and Cultural Discourse class.

⁶ PHYS 327 is an approved W course. PHYS 328 is an approved C course.

⁷ Students must apply, and be admitted, to aggieTEACH - Science, before beginning this class. Students are required to have 2.75 overall GPA and a 2.5 GPA in content areas.

⁸ Electives should be chosen in consultation with the student's advisor. Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103; MATH 100-148, 165-166, 365-366 (p. 1135); PHYS 201, PHYS 202.

⁹ Any upper-division course in geo/life/physical sciences, mathematics/statistics, or engineering (except 485/491).

Physics - BS, Physics and Mathematics Teaching Track

This BS Physics, Physics and Mathematics Teaching Track provides students with a strong physics and mathematics foundation and Texas Physics/Mathematics teaching certification, while also developing critical thinking and quantitative problem-solving skills valued in various industries

The BS Physics, Physics and Mathematics Teaching Track, will provide students with a solid foundation in physics and the courses required for the aggieTEACH – Arts & Sciences Program (<https://aggieteacharts.tamu.edu/>) (application required). Upon completion of this degree and one semester of clinical teaching, students will hold a Texas Physics/Mathematics (grades 7-12) certification. Although this degree is designed for students who want to teach, the physics courses also build a strong foundation in critical thinking and quantitative problem-solving skills that are attractive to many areas of industry.

Program Requirements

First Year

Fall		Semester Credit Hours
ARSC 201	Self-Directed Experiences with Adolescents	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition or Composition and Rhetoric	3
MATH 171	Calculus I ¹	4
PHYS 101	Freshman Physics Orientation ¹	1
PHYS 150	Introduction for Programming for Physics ¹	3
American history (p. 30) ²		3

Science or Technical Elective ⁹		3
Semester Credit Hours		15
Total Semester Credit Hours		120

¹ A Physics major must complete the foundation courses (ASTR 102, PHYS 101, PHYS 150, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPA before taking non-foundation upper-level physics courses.

² Any course in this category from the approved University Core Curriculum (<https://catalog.tamu.edu/undergraduate/general-information/university-core-curriculum/>) list of courses.

³ INST 222 is an approved Social and Behavioral Science, International and Cultural Diversity and Cultural Discourse class.

⁴ Any approved Communication (p. 27) course, except PERF 407.

⁵ INST 210 is an approved Social and Behavioral Science and Cultural Discourse class.

⁶ PHYS 327 is an approved W course. PHYS 328 is an approved C course.

⁷ Students must apply, and be admitted, to aggieTEACH - Science, before beginning this class. Students are required to have 2.75 overall GPA and a 2.5 GPA in content areas.

⁸ Electives should be chosen in consultation with the student's advisor. Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103; MATH 100-148, 165-166, 365-366 (p. 1135); PHYS 201, PHYS 202

⁹ Any upper-division course in geo/life/physical sciences, mathematics/statistics, or engineering (except 485/491). Note: students seeking secondary certification through this degree must take MATH 403 for this elective.

Physics - BS, Semiconductors and Modern Materials Track

This BS Physics program track provides a comprehensive foundation for students interested in shaping the future of technology through a deep understanding of materials and their applications.

Materials form the basis of society and drive the modern technological revolution. The BS Physics, Semiconductors and Modern Materials Track is a highly interdisciplinary track designed to equip students with a solid foundation in physics, chemistry, computational skills, and technologies necessary for advanced studies of materials or immediately joining the workforce in any industry.

Total Semester Credit Hours	120

¹ A physics major must complete the foundation courses (ASTR 102, PHYS 101, PHYS 150, PHYS 206/PHYS 226, PHYS 207/PHYS 227, PHYS 221, PHYS 309, PHYS 331, MATH 171, MATH 172, MATH 221, MATH 308) with a grade of C or better and have a 2.0 cumulative GPA before taking non-foundation upper-level physics courses.

² Any course in this category from the approved University Core Curriculum (p. 26) list of courses.

³ Select from BAEN 354, CHEM 466, CHEM 468, ECEN 370, ECEN 440, MEEN 360, MEEN 455, MEEN 458, MEEN 471, MSEN 210, MSEN 250, MSEN 260, MSEN 305, MSEN 320, MSEN 325, MSEN 415, MSEN 420, MSEN 430, MSEN 458, MSEN 470, MSEN 472, NUEN 465, PHYS 416, PHYS 419. A minimum of 6 hours must be selected from MSEN 210, MSEN 250, MSEN 260, MSEN 305, MSEN 320, MSEN 325, MSEN 415, MSEN 420, MSEN 430, MSEN 458, MSEN 470, MSEN 472.

⁴ PHYS 327 is an approved writing intensive (W) course. PHYS 328 is an approved communication intensive (C) course.

⁵ Electives should be chosen in consultation with the student's advisor. Three hours must be in the area of International and Cultural Diversity (p. 49), and 3 hours must be in the area of Cultural Discourse (p. 48). These may be in addition to other University Core Curriculum (p. 26) courses, or, if a course in this category satisfies another area of the Core, it can be used to meet both requirements. Electives may be selected from any 100-499 course not used elsewhere, except ENGL 103, MATH 100-148, 165-166, 365-366 (p. 1135), PHYS 201, PHYS 202.

⁶ Any approved Communication course, except PERF 407.

⁷ Any upper-division course in geo/life/physical sciences, mathematics/statistics, or engineering (except 485/491).

Astrophysics - Minor

This minor is intended for anyone interested in the mathematical basis of astronomy and is especially relevant for engineering and physics students who will need a basic understanding of the physics of the Universe in their future careers.

Astrophysics encompasses physical law at the largest scales; from planets in the Solar System and planets around other stars to the evolution of galaxies and the stars that populate them, massive black holes in the center of galaxies, and the origin, growth, and ultimate fate of the Universe. Astrophysics unifies discoveries from many sciences including physics, chemistry, and biology using techniques in statistics, data mining, and applied mathematics.

The minor in Astrophysics helps to prepare students for entry into the competitive science, technology, engineering, and mathematics (STEM) workplace. Students develop technical skills and problem-solving experiences that expand the tools used in the modern, high-technology world. This minor is also suitable for students who intend to pursue careers in areas that may benefit from a technical knowledge of astronomy such as science writing, scientific journalism, or science teaching in schools.

To declare an Astrophysics minor, please follow the instructions on the Department of Physics and Astronomy website (<https://physics.tamu.edu/academics/current-undergraduates/minors/>).

Program Requirements

Code	Title	Semester Credit Hours
ASTR 314	Survey of Astronomy ¹	3
ASTR 320	Astrophysical Research Methods	3
PHYS 207 & PHYS 227	Electricity and Magnetism for Engineering and Science and Electricity and Magnetism Laboratory for the Sciences ²	4
Directed electives		6
Select two of the following:		
ASTR 401	Stars and Extrasolar Planets	
ASTR 403	Extragalactic Astronomy and Cosmology	
ASTR 420	Advanced Astrophysical Research Methods	
ASTR 491	Research ³	
Total Semester Credit Hours		16

¹ ASTR 314 is the prerequisite for ASTR 320, ASTR 401 and ASTR 403

² All Engineering majors will take ENGR 217/PHYS 217 in place of PHYS 227.

³ No more than three hours of ASTR 491 may be used for this requirement. Three credit hours of ASTR 491 must be taken in a single semester, and approval from the professor must be obtained prior to registering for ASTR 491.

Students must make a grade of C or better in all courses.

Physics - Minor

A Minor in Physics is designed for those who have a strong interest in physics, but don't want to make it a profession.

This program includes a set of classes that will give students a firm foundation in physics and the ability to pursue a more in-depth study in one of the physics areas of their choice. The Minor in Physics will develop analytical thinking and quantitative problem-solving skills that students can apply in any field. It will also give students the basic knowledge to make informed decisions, advise, instruct, or administrate in our modern science- and technology-dominated world.

To declare a Minor in Physics, please follow the instructions on the Department of Physics and Astronomy website (<https://artsci.tamu.edu/physics-astronomy/academics/current-undergraduates/minors.html>).

Program Requirements

Students who wish to complete a minor in physics must satisfy the following requirements:

Code	Title	Semester Credit Hours
PHYS 206 & PHYS 226	Newtonian Mechanics for Engineering and Science and Physics of Motion Laboratory for the Sciences ¹	4
PHYS 207 & PHYS 227	Electricity and Magnetism for Engineering and Science and Electricity and Magnetism Laboratory for the Sciences ¹	4
PHYS 221	Optics and Thermal Physics	3
PHYS 309	Modern Physics	3
300–400 level physics elective (p. 1205) ²		3
Total Semester Credit Hours		17

¹ All Engineering majors will take ENGR 216/PHYS 216 and ENGR 217/PHYS 217 in place of PHYS 226 and PHYS 227.

² Select from PHYS 300-499 (p. 1205) (except PHYS 485 or PHYS 491), or ASTR 314, in consultation with an advisor in the Department of Physics and Astronomy.

Students must make a grade of C or better in all courses.

Department of Psychological and Brain Sciences

The Department of Psychological and Brain Sciences offers three undergraduate degrees and a minor. These include programs of BA in Psychology, BS in Psychology, BS in Behavioral and Cognitive Neuroscience, and a minor in Psychology. All degree programs prepare students to pursue graduate study in related fields and to enter entry level positions for careers.

Psychology majors receive a rigorous program of undergraduate education and training that encourages critical thinking, lifelong learning, and the analysis and integration of information about individuals and groups of people. The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior. Students are prepared to enter a variety of graduate and professional programs in psychology and related fields (such as law, medical school), as well as to enter entry-level employment in a number of fields (such as business, human resources). BA/BS Degrees: Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences. The two degrees are offered to allow students to complete their non-psychology course of study in fields of greatest interest to them. Thus, students who have stronger interests in the natural and life sciences should pursue the BS degree, whereas those with stronger interests in foreign language and the humanities should pursue the BA degree. Both degrees provide students with the necessary curriculum requirements to pursue graduate study in psychology in most institutions, as well as other professional fields such as law. Students planning to apply to medical school or other physical health professional programs are advised to select the BS degree program.

Behavioral and Cognitive Neuroscience majors receive a rigorous program of undergraduate education and training in the life and physical sciences, with an emphasis on the study of how the nervous system impacts behavior and cognitive functions. This interdisciplinary field integrates several disciplines, including psychology, psychiatry, biology, chemistry, and physics. Because the study is interdisciplinary, the neuroscience major involves multiple units, including the Department of Psychological and Brain Sciences, the Department of Biology, and the School of Veterinary Medicine and Biomedical Sciences in collaboration with the Department of Neuroscience and Experimental Therapeutics (NExT) in the School of Medicine in offering this degree, as well as the Texas A&M Institute for Neuroscience (TAMIN). The concentration of this degree that focuses on Behavioral and Cognitive Neuroscience is housed within the Department of Psychological and Brain Sciences. Students will develop competency in foundational coursework in the life and physical sciences, including biology, chemistry, and physics. Based on their individual career aspirations and interests, students will complete coursework in neuroscience that involves psychological and biological processes, as well as translational issues relevant to medical science and/or pharmacology, neural engineering, and biochemistry. Nationwide, there is increasing interest in neuroscience programs and training. In part, this interest is driven by changes in the employment market that focus on technical and medical support jobs. Students completing a BS

in Neuroscience will be well prepared for graduate study, as well as to enter entry-level healthcare and technical occupations.

Honors: Students who qualify for the University Honors Program should contact the Department of Psychological and Brain Sciences about the department's own honors program which places an emphasis on small classes and independent research experience.

Minors: A non-psychology minor is optional for psychology majors. A psychology minor is available for non-psychology majors. For more information about psychology undergraduate programs, please visit the Department of Psychological and Brain Sciences website (<https://artsci.tamu.edu/psychological-brain-sciences/>).

Majors

- Bachelor of Science in Behavioral and Cognitive Neuroscience (p. 473)
- Bachelor of Science in Neuroscience, Behavioral and Cognitive Neuroscience (p. 474)
- Bachelor of Arts in Psychology (p. 475)
- Bachelor of Science in Psychology (p. 477)

Minors

- Psychology Minor (p. 479)

Certificates

- Behavioral Health Certificate (p. 479)
- Healthy Development Certificate (p. 479)
- Psychology of Diversity Certificate (p. 480)
- Work and Organizations Certificate (p. 480)

Behavioral and Cognitive Neuroscience - BS

At the upper level, students complete a directed curriculum that will provide them depth of training in behavioral and cognitive neuroscience.

Behavioral and Cognitive Neuroscience is the study of the nervous system and its impact on behavior and cognitive functions. This interdisciplinary field integrates several disciplines, including psychology, psychiatry, biology, chemistry, and computer science. As such, students in this degree will develop competency in foundational coursework in the life and physical sciences, including biology and chemistry.

Nationwide, there is increasing interest in neuroscience programs and training. Students completing a Bachelor of Science in Behavioral and

Cognitive Neuroscience will be well prepared careers focused on human behavior such as speech and language therapy, clinical neuropsychology, public health, and occupational therapy.

¹ Must make a grade of C or better.

² Except PBSI 107.

³ Select from BICH 410; BIOL 213, BIOL 413, BIOL 485, BIOL 491; CHEM 227, CHEM 228, CHEM 237, CHEM 238; GENE 301; NRSC 200-499 (p. 1167); PBSI 320, PBSI 333, PBSI 336, PBSI 340, PBSI 345, PBSI 360, PBSI 440, PBSI 483, PBSI 484, PBSI 485, PBSI 491; VIBS 401/ NRSC 401. Of the 30 hours from the prescribed electives, 6 hours must be from PBSI 320, PBSI 333, PBSI 336, PBSI 340, PBSI 345, PBSI 360, PBSI 440, PBSI 483, PBSI 484, PBSI 485, PBSI 491. No more than 3 hours PBSI 483, no more than 3 hours of PBSI 484, and no more than 12 hours of PBSI/NRSC/BIOL 483, 484, 485 and 491 combined.

Neuroscience - BS, Behavioral and Cognitive Neuroscience

This Neuroscience program bridges several scientific disciplines, equipping students with a strong foundation for advanced studies and careers in rapidly evolving healthcare and technical fields.

Neuroscience is the study of the nervous system and its impact on behavior and cognitive functions. This interdisciplinary field integrates several disciplines, including psychology, psychiatry, biology, chemistry, and physics. Because the study is interdisciplinary, the Neuroscience major involves multiple units, including the Department of Psychological and Brain Sciences, the Department of Biology, and the College of Veterinary Medicine and Biomedical Sciences in collaboration with the College of Medicine's Department of Neuroscience and Experimental Therapeutics (NExT) in addition to the Texas A&M Institute for

Neuroscience (TAMIN). The concentration of this degree that focuses on Behavioral and Cognitive Neuroscience is housed within the Department of Psychological and Brain Sciences.

Students will develop competency in foundational coursework in the life and physical sciences, including biology, chemistry, and physics. Based on their individual career aspirations and interests, students will complete coursework in neuroscience that involves psychological and biological processes, as well as translational issues relevant to medical science and/or pharmacology, neural engineering, and biochemistry. Nationwide, there is increasing interest in neuroscience programs and training. In part, this interest is driven by changes in the employment market that focus on technical and medical support jobs. Students completing a BS in Neuroscience will be well prepared for graduate study, as well as to enter entry-level healthcare and technical occupations.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 111	Introductory Biology I	4
CHEM 119	Fundamentals of Chemistry I	4
PBSI 105	Psychology as a Major and Profession ¹	1
PBSI 107	Introduction to Psychology	3
VIBS 277	Essential Neuroscience - From Molecules to Nervous Systems ¹	3
Semester Credit Hours		15
Spring		
BIOL 112	Introductory Biology II	4
CHEM 120	Fundamentals of Chemistry II	4
PBSI 235	Introduction to Behavioral and Cognitive Neuroscience ¹	3
Select one of the following:		4
MATH 147	Calculus I for Biological Sciences	
MATH 151	Engineering Mathematics I	
MATH 171	Calculus I	
General elective ²		1
Semester Credit Hours		16

Second Year

Fall		
PHYS 201	College Physics	4
Select one of the following:		4
MATH 148	Calculus II for Biological Sciences	
MATH 152	Engineering Mathematics II	
MATH 172	Calculus II	
STAT 201	Elementary Statistical Inference	
American history (p. 30)		3
Prescribed elective ³		3
Semester Credit Hours		14
Spring		
PHYS 202	College Physics	4
American history (p. 30)		3
Concentration elective ⁴		3
Prescribed elective ³		3

Prescribed elective ³		3
Semester Credit Hours		16
Third Year		
Fall		
ENGL 104	Composition and Rhetoric ¹	3
STAT 302 or STAT 312	Statistical Methods or Statistics for Biology	3
Concentration elective ⁴		3
Prescribed elective ³		3
General elective ²		3
Semester Credit Hours		15
Spring		
Communication (p. 27)		3
Government/Political science (p. 31)		3
Concentration elective ⁴		3
Prescribed elective ³		3
General elective ²		3
Semester Credit Hours		15
Fourth Year		
Fall		
Government/Political science (p. 31)		3
Language, philosophy and culture (p. 28)		3
Concentration elective ⁴		3
Concentration elective ⁴		3
Concentration elective ⁴		4
Semester Credit Hours		16
Spring		
Creative arts (p. 30)		3
Concentration elective ⁴		3
Concentration elective ⁴		3
Concentration elective ⁴		4
Semester Credit Hours		13
Total Semester Credit Hours		120

¹ Must make a grade of C or better.

² A minor field of study may fulfill this requirement, but a minor is not required. Only one KINE 199 allowed.

³ Select from PBSI 311, PBSI 320, PBSI 332, PBSI 333, PBSI 336, PBSI 340, PBSI 350, PBSI 360, PBSI 408, PBSI 440.

⁴ Select from BICH 410; BIOL 213, BIOL 413; BIOL 428; BIOL 434/ NRSC 434; BIOL 444/NRSC 444; CHEM 227, CHEM 237, CHEM 228, CHEM 238, CHEM 257, CHEM 258; NRSC 300-499 (p. 1167); PBSI 301, PBSI 302, PBSI 311, PBSI 320, PBSI 332, PBSI 333, PBSI 336, PBSI 340, PBSI 350, PBSI 360, PBSI 440, PBSI 471, PBSI 475, PBSI 483, PBSI 484, PBSI 485, PBSI 491; VIBS 201/NRSC 201; VIBS 401/ NRSC 401 VIBS 407/NRSC 407; VIBS 450.

Psychology - BA

The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior.

All psychology majors receive a rigorous program of undergraduate education and training that encourages critical thinking, lifelong learning,

and the analysis and integration of information about individuals and groups of people.

Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences.

Students interested in studying human behavior, with a humanities-oriented supporting curriculum, pursue a Bachelor of Arts degree. The BA can successfully prepare students interested in graduate and professional programs that stress a humanities background (e.g., counseling, social work, management, law), as well as students interested in employment in business or applied psychology.

Program Requirements

First Year

Fall		Semester Credit Hours
ENGL 104	Composition and Rhetoric	3
PBSI 105	Psychology as a Major and Profession	1
PBSI 107	Introduction to Psychology	3
Foreign language ¹		4
Mathematics (p. 27)		3
Social and behavioral sciences (p. 31) ²		3
Semester Credit Hours		17

Spring

PBSI 245	Introduction to Psychological Science Methods	3
Select one of the following:		3
ENGL 103	Introduction to Rhetoric and Composition	
ENGL 203	Writing about Literature	
ENGL 210	Technical and Professional Writing	
COMM 203	Public Speaking	
Foreign language ¹		4
Creative arts (p. 30)		3
General elective		2
Semester Credit Hours		15

Second Year

Fall		Semester Credit Hours
PBSI 235	Introduction to Behavioral and Cognitive Neuroscience	3
Foreign language ¹		3
Government/Political science (p. 31)		3
Life and physical sciences (p. 27)		3
Literature directed elective (p. 261)		3
Semester Credit Hours		15

Spring

Select one of the following:		3
PBSI 206/ AFST 206	Black Psychology	
PBSI 208	Stereotypes, Prejudice, and Minority Experience	

PBSI 209/ AFST 209	Psychology of Culture and Diversity	
PBSI 210/ WGST 210	Psychological Aspects of Human Sexuality	
PBSI 300/ WGST 300	Psychology of Women	
PBSI 303	Psychology of Women of Color	
PBSI 432	Diversity and Inclusion in Organizations	
Foreign language ¹		3
Government/Political science (p. 31)		3
Mathematics (p. 27)		3
General elective		3
Semester Credit Hours		15

Third Year

Fall

PBSI 301	Elementary Statistics for Psychology	4
Select one of the following:		3
PBSI 225	Lifespan Development	
PBSI 305	Psychology of Adjustment	
PBSI 306	Psychological Disorders	
PBSI 307	Developmental Psychology	
PBSI 315	Social Psychology	
PBSI 319	History and Systems of Psychology	
PBSI 323	Psychology of Adolescence	
PBSI 330	Personality	
PBSI 352	Organizational Psychology	
PBSI 353	Personnel Psychology	
PBSI 365	Psychology of Aging	
American history (p. 30)		3
Language, philosophy and culture (p. 28)		3
Life and physical sciences (p. 27)		3

Semester Credit Hours

16

Spring

PBSI 302	Research Methods and Design in Psychology	4
Select one of the following:		3
PBSI 311	Psychology of Animal Behavior	
PBSI 320	Sensation-Perception	
PBSI 332	Neuroscience of Learning and Memory	
PBSI 333	Biology of Psychological Disorders	
PBSI 336	Drugs and Behavior	
PBSI 340	Psychology of Learning	
PBSI 345	Human Cognitive Processes	
PBSI 350	Cognitive Neuroscience	
PBSI 360	Health Psychology and Behavioral Medicine	
American history (p. 30)		3
Language, philosophy and culture or creative arts (p. 28)		3
Psychology elective ³		3

Semester Credit Hours

16

Fourth Year

Fall

Select one of the following:		3

PBSI 311	Psychology of Animal Behavior	
PBSI 320	Sensation-Perception	
PBSI 332	Neuroscience of Learning and Memory	
PBSI 333	Biology of Psychological Disorders
