¹ Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

² Courses in psychology may not be used to satisfy this requirement.

³ Select from PBSI 100-499 (p. 1184), No more than a combined maximum of 6 hours of PBSI 484, PBSI 485 are permitted.

A grade of C or higher is required if a course is to be counted in the major field. A student must complete a minimum of 36 hours of 300- and 400-level courses at Texas A&M.

No course can be counted in more than one category.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/departments requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Psychology - BS

The curriculum leading to a degree in psychology provides students with an understanding of human behavior and the ability to use scientific methods to answer questions about human behavior.

All psychology majors receive a rigorous program of undergraduate education and training that encourages critical thinking, lifelong learning, and the analysis and integration of information about individuals and groups of people.

Students majoring in psychology may earn either the Bachelor of Arts or Bachelor of Science degree. The psychology course requirements for the two degrees are identical; they differ with respect to the requirements in other disciplines. For example, the BA degree requires courses in a foreign language and extra humanities hours, whereas the BS degree requires additional hours in the physical and biological sciences.

Students interested in studying human behavior, with a science-oriented supporting curriculum, pursue a Bachelor of Science degree. The BS can successfully prepare students interested in further study in a science-oriented psychology graduate program (such as neuroscience) or medical school, or other health-related graduate and professional programs (e.g., pharmacy, physical therapy), as well as students interested in entry-level positions in business or applied psychology.

Program Requirements

First Year

¹ Courses in psychology may not be used to satisfy this requirement.

² See departmental advisor for approved list

³ Select from PBSI 100-499 (p. 1184), No more than a combined maximum of 6 hours of PBSI 484, PBSI 485 are permitted.

A grade of C or higher is required if a course is to be counted in the major field.

No course can be counted in more than one category.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Psychology - Minor

This minor provides valuable insights into human behavior and develops essential interpersonal skills, enhancing students' ability to succeed in people-centered careers across multiple fields.

A minor in Psychology can be a valuable supplement to education in almost any field. Students select from a variety of courses that enhance understanding of animal or human behavior, the skills to intervene to change behavior and to create environments that support healthy behavior, and critical thinking skills related to asking and answering questions about human behavior. This knowledge prepares students to pursue a variety of careers where interacting with people is a central job component.

A Psychology minor is available for non-psychology majors. The minor must be declared before the student has completed 90 credit hours.

Program Requirements

Code	Title	Semester Credit Hours
PBSI 107	Introduction to Psychology	3
PBSI 200 to 499 (p. 1184) ^{1,2}		3
PBSI 300 to 499 (p. 1184) ^{1,2}		9
Total Semester Credit Hours		15

¹ Only 3 total hours from PBSI 484, PBSI 485 and PBSI 491 can count toward the minor.

² Registration in PBSI 301 and PBSI 302 is limited to PSYC majors only.

At least 9 semester credit hours of PBSI courses above the 200-level must be taken at Texas A&M.

Students must make a grade of C or better in all courses.

Behavioral Health - Certificate

This certificate provides specialized knowledge and practical skills within the major, enhancing student expertise and career prospects through focused coursework in areas like human development and mental health.

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. All certificates require 15 credits (5 courses). The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) human growth and development, both physically and psychologically and (b) positive and negative mental health, with an emphasis on mental health and developmental disorders.

The prescribed electives include courses that focus on a variety of aspects of health and well-being and five of the six courses include practical applications of psychology, including the deployment and interpretation of psychological tests, therapeutic techniques, creation and monitoring of plans for personal growth and change, and the creation and application of reward systems.

Program Requirements

Code	Title	Semester Credit Hours
PBSI 306	Psychological Disorders	3
PBSI 307	Developmental Psychology	3
Select three of the following:		9
PBSI 305	Psychology of Adjustment	
PBSI 336	Drugs and Behavior	
PBSI 360	Health Psychology and Behavioral Medicine	
PBSI 414	Behavior Principles	
PBSI 425	Psychology of Emotion	
PBSI 440	Hormones and Behavior	
PBSI 445	Psychological and Social Determinants of Health Disparities	
PBSI 450	Clinical Psychology	
PBSI 470	Psychological Testing and Measurement	
Total Semester Credit Hours		15

Student must make a minimum of a 3.0 GPA across the courses used to meet the certificate requirements.

Healthy Development - Certificate

This certificate provides specialized knowledge and practical skills within the major, enhancing student expertise and career prospects through focused coursework in areas like human development, interpersonal dynamics and therapeutic techniques.

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) human growth and development, both physically and psychologically and (b) interpersonal behaviors and intrapersonal processes that affect our understanding of and relationships with others. The prescribed electives fall into two sets. The first set focuses on healthy and atypical development at different life stages, including adolescence, old age, and childhood. The second is a skills-based set of courses through which successful students will develop skills in healthy adjustment, behavioral modification, or therapeutic techniques.

Program Requirements

Code	Title	Semester Credit Hours
PBSI 307	Developmental Psychology	3
PBSI 315	Social Psychology	3
Select two of the following:		6
PBSI 225	Lifespan Development	
PBSI 323	Psychology of Adolescence	
PBSI 365	Psychology of Aging	
PBSI 407	Behavioral Disorders of Children	
Select one of the following:		3
PBSI 305	Psychology of Adjustment	
PBSI 414	Behavior Principles	
PBSI 450	Clinical Psychology	
Total Semester Credit Hours		15

Student must make a minimum of a 3.0 GPA across the courses used to meet the certificate requirements.

Psychology of Diversity - Certificate

This certificate enhances student expertise within the major by focusing on interpersonal dynamics, cognitive processes and the psychological factors related to diverse populations.

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) interpersonal behaviors and intrapersonal processes that affect our understanding of and relationships with others and (b) human cognitive processes that people use to understand information and categorize people and objects. The prescribed electives include courses that focus on a variety of aspects of diversity. These courses focus on the experiences of understudied and/or underrepresented persons and the psychological processes associated with their interpersonal treatment from others.

Program Requirements

Code	Title	Semester Credit Hours
PBSI 315	Social Psychology	3
PBSI 345	Human Cognitive Processes	3
Select three of the following:		9
PBSI 206/ AFST 206	Black Psychology	
PBSI 208	Stereotypes, Prejudice, and Minority Experience

PBSI 210/ WGST 210	Psychological Aspects of Human Sexuality	

PBSI 300/ WGST 300	Psychology of Women	
PBSI 346	Psychology of Language	
PBSI 432	Diversity and Inclusion in Organizations	
PBSI 445	Psychological and Social Determinants of Health Disparities	
Total Semester Credit Hours		15

Student must make a minimum of a 3.0 GPA across the courses used to meet the certificate requirements.

Work and Organizations - Certificate

This certificate provides focused expertise within the major, exploring individual personalities, interpersonal dynamics and the psychological principles that drive effective workplaces and organizations.

The Department of Psychological and Brain Sciences offers embedded certificates as part of the major. The certificates are considered embedded because they require no additional coursework—beyond specific courses in the major itself—to earn the certificate. All certificates require 15 credits (5 courses). The certificates are designed to (a) bring greater depth and structure to the major, (b) provide students with guidance as to courses that build on each other, and (c) ultimately increase the employability of our students.

The required courses in this certificate reflect foundational component areas of psychology that focus on (a) individual personalities and the behavioral and skill implications of individual traits and (b) interpersonal behaviors and intrapersonal processes that affect our understanding of and relationships with others. The prescribed electives include courses that focus on a variety of aspects of work and organizations, including the psychological underpinnings of workplace practices like hiring and training, organizational behavior, sports, negotiation and conflict, and testing.

Program Requirements

Code	Title	Semester Credit Hours
PBSI 315	Social Psychology	3
PBSI 330	Personality	3
Select three of the following:		9
PBSI 304	Psychology of Sport and Physical Activity	
PBSI 352	Organizational Psychology	
PBSI 353	Personnel Psychology	
PBSI 432	Diversity and Inclusion in Organizations	
PBSI 470	Psychological Testing and Measurement	
Total Semester Credit Hours		15

Students must make a minimum of a 3.0 GPA across the courses used to meet the certificate requirements.

Department of Sociology

The Department of Sociology supports a diverse community of faculty, staff and students working together to research and address real world social issues and problems. Faculty offer courses in race and ethnicity, social class, gender, popular culture, social psychology, organizations, community, environment, criminology, religion, global sociology, medical sociology, demography, and gerontology, among others. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. To further complement our courses in these and other areas of sociology, students have opportunities to work one-on-one with professors engaged in sociological research. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses.

Sociological training prepares students for graduate school and/or employment in a variety of occupations. Employers increasingly look for job candidates to have the critical thinking, writing, and research skills students will develop in our program. Sociology coursework provides students with the ability to live and work effectively in a diverse and global society by better understanding social diversity, cultural trends, inequalities, organizational behavior, and community and world events. Sociology provides an excellent background for students wishing to enter into the helping professions like social services, ministry, nursing, teaching, and law enforcement, and it provides an outstanding foundation for law, marketing, human resources, journalism, government, business management, and entrepreneurialism.

Sociology - BA

A Bachelor of Arts in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and problems, while allowing students to explore a wide range of social topics and issues.

Some courses in this program include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students

accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The BA provides an excellent background for students aspiring to attend graduate school or enter a career in nonprofit community services or social work, health care and nursing, law or law enforcement, education, public policy, organizational management and entrepreneurialism, marketing, human resources, and/or journalism.

Marketable Skills Achieved with a BA in Sociology include:

- Being aware of other’s beliefs and behaviors and understanding why they believe and behave as they do
- The ability to address real-world problems and issues by developing realistic and equitable solutions
- Identifying complex problems and ideas and reviewing related information to analyze, develop and evaluate options, and implement solutions
- Communicating effectively in writing and speech as appropriate for the needs of the audience
- Developing and utilizing visual aids, graphs, tables and charts
- Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times
- Monitoring/Assessing performance of yourself, other individuals, or organizations to make improvements or take corrective action
- Managing one’s own time and the time of others
- Data analysis and interpretation
- Identifying the underlying patterns and principles of qualitative and quantitative information and explaining what that information means and how it can be used
- Bringing others together and trying to reconcile differences
- Establishing trust and ensuring input from all members of a group
- Working together to produce a shared product

¹ A grade of C or better is required.

² Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

³ Any 100-499 level course may be taken. No more than 6 semester credit hours for SOCI 484 may be applied to the Bachelor of Arts degree in Sociology.

⁴ SOCI courses do not count toward fulfilling this requirement.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/departments requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 33 hours in sociology may be applied to the major.

Other courses may qualify. Consult the approved list of courses available in the Undergraduate Student Services Office in the College of Arts and Sciences or from departmental advisors. No more than one course may be counted in more than one category.

Please note that university requirements specify that all students must take at least two courses in their major that are designated as fulfilling a writing requirement (W). See the section on general requirements for baccalaureate degrees for more information.

Minor Field of Study

Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

Sociology - 5-Year Bachelor of Arts and Master of Public Service Administration

This program enables students to receive their Sociology undergraduate degree (BA) and a Master of Public Service and Administration (MPSA) graduate degree in five years.

The Department of Sociology and the Bush School of Government and Public Service offer a 5-year combination degree program that allows Sociology majors to enter the Bush School at the start of their senior year (typically year four) at Texas A&M University.

To be considered for the 5-year combined degree program, Sociology students must have a minimum 3.25 GPA and have completed 102 of the 120 hours of course work required to receive a bachelor's degree. These courses must include all of the specific prerequisites for a Bachelor of Arts degree in Sociology, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Interested students are encouraged to contact an academic advisor for more information.

A Bachelor of Arts in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and

problems, while allowing students to explore a wide range of social topics and issues. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The Master of Public Service and Administration (MPSA) program develops principled leaders for the public and nonprofit sectors, providing students the tools and knowledge they will need in order to perform effectively and ethically in a time when public servants face new and increased challenges.

The MPSA program is fully accredited by the Network of Schools of Public Policy, Affairs, and Administration. The curriculum provides students with general knowledge and analytical skills in management, leadership, policy analysis, and research methods. MPSA students have ample opportunities to engage in public service and to develop leadership skills both inside and outside the classroom through interaction with high-level public leaders, real-world consulting projects, student organizations, and the School's Public Service Leadership Program. MPSA graduates leave the Bush School ready to make a difference, whether they choose to work in government, non-profit organizations, or the private sector.

¹ A grade of C or better is required.

² Complete 14 hours of a foreign language (p. 261) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See academic advisor.

³ Select from SOCI 100-499 (p. 1233), SOCI 608.

⁴ Any 100-499 level course may be taken. No more than 3 hours of SOCI 484 may be used toward fulfilling this requirement.

⁵ SOCI courses do not count toward fulfilling this requirement.

⁶ Course applies toward both degrees.

⁷ See Bush School advisor for course selection information.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

No more than 33 hours in sociology may be applied to the major.

Other courses may qualify. Consult the approved list of courses available in the Undergraduate Student Services Office in the College of Arts and Sciences or from departmental advisors. No more than one course may be counted in more than one category.

Please note that university requirements specify that all students must take at least two courses in their major that are designated as fulfilling a writing requirement (W). See the section on general requirements for baccalaureate degrees for more information.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Arts in Sociology and the Master of Public Service Administration.

See the MPSA program in the Graduate and Professional Catalog for the MPSA requirements.

Minor Field of Study

Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

Sociology - BS

A Bachelor of Science in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and problems, while allowing students to explore a wide range of social topics and issues.

Some courses in this program include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The BS provides an excellent background for students aspiring to attend graduate school or enter a career in nonprofit community services or social work, health care and nursing, law or law enforcement, education, public policy, organizational management and entrepreneurialism, marketing, human resources, and/or journalism.

Marketable Skills Achieved with a BS in Sociology include:

- Being aware of other's beliefs and behaviors and understanding why they believe and behave as they do
- The ability to address real-world problems and issues by developing realistic and equitable solutions
- Identifying complex problems and ideas and reviewing related information to analyze, develop and evaluate options, and implement solutions
- Communicating effectively in writing and speech as appropriate for the needs of the audience
- Developing and utilizing visual aids, graphs, tables and charts
- Giving full attention to what other people are saying, taking time to understand the points being made, asking questions as appropriate, and not interrupting at inappropriate times
- Monitoring/Assessing performance of yourself, other individuals, or organizations to make improvements or take corrective action
- Managing one's own time and the time of others
- Data analysis and interpretation
- Identifying the underlying patterns and principles of qualitative and quantitative information and explaining what that information means and how it can be used
- Bringing others together and trying to reconcile differences
- Establishing trust and ensuring input from all members of a group
- Working together to produce a shared product

No more than six hours from the minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

Sociology - 5-Year Bachelor of Science and Master of Public Service Administration

This program enables students to receive their Sociology undergraduate degree (BS) and a Master of Public Service and Administration (MPSA) graduate degree in five years.

The Department of Sociology and the Bush School of Government and Public Service offer a 5-year combination degree program that allows Sociology majors to enter the Bush School at the start of their senior year (typically year four) at Texas A&M University.

To be considered for the 5-year combined degree program, Sociology students must have a minimum 3.25 GPA and have completed 102 of the 120 hours of course work required to receive a bachelor's degree. These courses must include all of the specific prerequisites for a Bachelor

of Science degree in Sociology, as well as the courses required by the College of Liberal Arts and by Texas A&M University for an undergraduate degree. Interested students are encouraged to contact an academic advisor for more information.

A Bachelor of Science in Sociology provides a solid foundation in the knowledge and skills needed to address real-world social issues and problems, while allowing students to explore a wide range of social topics and issues. Some courses include hands-on service-learning opportunities in which students connect service and/or research in the community with course material. For sociology majors seeking to enter applied fields, we have a highly praised internship program that offers practical experience in community nonprofit organizations, government agencies, and businesses. To further complement our courses, students accepted into our honors program have opportunities to work one-on-one with professors engaged in sociological research.

The Master of Public Service and Administration (MPSA) program develops principled leaders for the public and nonprofit sectors, providing students the tools and knowledge they will need in order to perform effectively and ethically in a time when public servants face new and increased challenges. The MPSA program is fully accredited by the Network of Schools of Public Policy, Affairs, and Administration. The curriculum provides students with general knowledge and analytical skills in management, leadership, policy analysis, and research methods.

MPSA students have ample opportunities to engage in public service and to develop leadership skills both inside and outside the classroom through interaction with high-level public leaders, real-world consulting projects, student organizations, and the School's Public Service Leadership Program. MPSA graduates leave the Bush School ready to make a difference, whether they choose to work in government, non-profit organizations, or the private sector.

Minor Field of Study

Sociology majors are not required to select a minor field of study. If chosen, the minor must consist of 15-18 hours, with no more than 9 hours taken at a 100- or 200-level. No more than six hours from the

minor may be used to fulfill other requirements. A grade of C or higher is required if a course is to be counted in the minor field.

Criminology - Minor

Explore the complexities of crime and its impact on society with this Criminology minor.

A minor in Criminology prepares students for employment in criminal justice, criminology, forensic sciences, public service, and public policy fields, as well as those seeking advanced degrees in related disciplines. The minor focuses on the theories and research used to predict and explain the origins and nature of crimes, the determinants of crime patterns, the effects of crime on individuals, communities and society, and the solutions to reduce and prevent crime.

Program Requirements

Code	Title	Semester Credit Hours
SOCI 304	Criminology	3
Select four of the following:		12
ECON 421	Economics of Crime

SOCI 422	Race, Ethnicity, Crime and Justice	
SOCI 445	Sociology of Law	
SOCI 446	Sociology of War Crimes	
Total Semester Credit Hours		15

A grade of C or better is required to use a course for the minor.
A minimum of 9 hours of coursework must be at the 300/400 level.

Latino/a and Mexican-American Studies - Minor

The Latino/a and Mexican American Studies minor (LMAS) encourages students across the university to investigate the experiences and contributions of Latino/as in the United States and abroad.

Students minoring in LMAS will receive instruction from interdisciplinary faculty across the College of Arts and Sciences, and the University. LMAS courses draw on disciplines including, but not limited to, the areas of History, Sociology, English, Anthropology, Psychology, Communications, Political Science, Geography, Education, and Hispanic Studies. The courses provide students with broad knowledge about Latino/as

frequently omitted from the common curriculum and centered in the experiences of Latino/as.

The LMAS minor addresses topics such as race, ethnicity, gender, politics, religion, education, labor, immigration, and civil rights, among others. These topics include both historical and contemporary perspectives and draw on a variety of approaches, including literature, history, individual and interpersonal experiences, performance, policy analysis, and psychological research.

The LMAS minor complements any degree and future career by providing students with a strong foundation in key workplace skills: critical thinking, perspective taking, social and personal responsibility, communication, research, writing, and cultural understanding. Additionally, the LMAS minor prepares students to address societal changes that will occur as the state of Texas becomes a majority-minority state and continues to navigate its southern border. The LMAS minor prepares students to address some of the most crucial societal issues today: health policy, justice and law reform, civil rights, and labor and immigration practices.

Total Semester Credit Hours

15

¹ The two courses (6 hours) from the first area must come from two departments.

² Students will select 15 hours total from both lists with a minimum of 9 hours at the upper-division level (300- and 400-level).

Students must earn a C or higher in each course to be counted in the minor field.

Sociology - Minor

This minor equips students with the critical thinking and communication skills needed to navigate a diverse and global society, preparing them for impactful careers in fields ranging from social services to business.

A minor in Sociology can be a valuable complement to a degree in almost any field of study. Students select from a variety of courses to enhance the ability to live and work effectively in a diverse and global society by better understanding social diversity, cultural trends, inequalities, organizational behavior, and community and world events.

A Sociology minor will provide graduates with skills in applying knowledge to address real world problems through the development of realistic and equitable solutions, thinking critically about complex problems and ideas, engaging in communication processes with diverse audiences, practicing responsibility for one's own and others' performance to improve processes and make improvements, analyzing data to identify patterns and explain the meaning and application of data, and collaborating with others.

Sociology provides an excellent background for students wishing to enter into helping professions like social services, ministry, nursing, teaching, and law enforcement; it also provides an outstanding foundation for law, marketing, human resources, journalism, government, business management, and entrepreneurship.

Program Requirements

Code	Title	Semester Credit Hours
Select 6 hours from the following:		6
SOCI 200 to 499 (p. 1233)		
Select 9 hours from the following:		9
SOCI 300 to 499 (p. 1233)		
Total Semester Credit Hours		15

Students must make a grade of C or better in all courses.

At least 9 hours must be at the 300- or 400-level.

Department of Statistics

The science of statistics deals with the collection and summarization of data, design of experiments and surveys, measurement of the magnitude of variation in both experimental and survey data, estimation of population parameters with measures of their accuracy and precision, tests of hypotheses about populations and studies of the relationships between two or more variables. While the ideal of science is to achieve a systematic interrelationship of facts, scientific methods must be a pursuit of this ideal by experimentation, observation and logical arguments from various accepted postulates. Thus, the science of statistics is a set of scientific principles and methodologies that are useful in reaching conclusions about populations and processes when the available information is both limited and variable. Hence, statistical principles are useful in all the sciences, both physical and social. Many practical applications of statistics are found in a wide variety of fields, including biology, education, social sciences, engineering, business, government and agriculture.

The Department of Statistics offers training in statistics leading to degrees of Bachelor of Science, Master of Science and Doctor of Philosophy.

Minors

- Statistics Minor (p. 496)

Bioinformatics - BS

The Bioinformatics curriculum focuses on cultivating students with knowledge and expertise in biology, statistics, computer science, and, most importantly, the seamless integration of these diverse domains.

The recent explosion of high-throughput experimental techniques (e.g., next-generation sequencing, proteomics, metabolomics, imaging, etc.), coupled with rapid advances in computational and statistical technologies, has laid the foundation for the emergence of a highly interdisciplinary field of bioinformatics. The Bachelor of Science in Bioinformatics is strategically designed with core courses in statistics/mathematics, biology/genetics, and computer science, as well as comprehensive and advanced training in bioinformatics. Bioinformatics, at the intersection of Biology, Statistics, and Computer Science, bears resemblances to Computational Biology. However, Bioinformatics emphasizes quantitative skills to better harness large-scale biological data, whereas Computational Biology is mainly focused on addressing biological questions using computational approaches.

The overall purpose of this program is to empower graduates with a profound grasp of biological, genetic, and genomic principles, complemented by robust skills in statistics, computation, and data science. This program aims to nurture the next generation of bioinformaticians, computational biologists, data scientists, and researchers in various life science, biotechnology, and healthcare settings. This program will structurally and administratively reside in the Department of Statistics, in close partnership with the Department of Biology and with full support from the Department of Computer Science and Engineering.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 111	Introductory Biology I	4
CSCE 110 or CSCE 111	Programming I ¹ or Introduction to Computer Science Concepts and Programming	4
ENGL 104	Composition and Rhetoric	3
Select one of the following: ¹		4
MATH 147	Calculus I for Biological Sciences	
MATH 151	Engineering Mathematics I	
MATH 171	Calculus I	
Semester Credit Hours		15

Spring

BIOL 112	Introductory Biology II	4
CSCE 120	Program Design and Concepts	3
Select one of the following: ¹		4
MATH 148	Calculus II for Biological Sciences	
MATH 152	Engineering Mathematics II	
MATH 172	Calculus II	
Social and behavioral sciences (p. 31)		3
Semester Credit Hours		14

Second Year

Fall		
PHYS 201	College Physics	4
STAT 211	Principles of Statistics I	3
American history (p. 30)		3
Prescribed elective ²		3
General elective ³		3
Semester Credit Hours		16

Spring

STAT 205	Bioinformatics Cornerstone (Bioinformatics Cornerstone)	1
STAT 212	Principles of Statistics II	3
Select one of the following:		4
CHEM 107 & CHEM 117	General Chemistry for Engineering Students and General Chemistry for Engineering Students Laboratory	
CHEM 119	Fundamentals of Chemistry I	
Prescribed elective ²		3
General elective ³		3
Semester Credit Hours		14

Third Year

Fall		
MATH 304	Linear Algebra	3
STAT 315	Computational Data Science	3
POLS 206	American National Government	3
Language, philosophy and culture (p. 28)		3
Prescribed elective ²		3
Semester Credit Hours		15

Spring

GENE 301 or GENE 320/ BIMS 320	Comprehensive Genetics or Biomedical Genetics	3
POLS 207	State and Local Government	3
STAT 404	Statistical Computing	3
Prescribed elective ²		3
General elective ³		3
Semester Credit Hours		15

Fourth Year

Fall		
BIOL 450/ BICH 450	Genomics	4
STAT 446	Statistical Bioinformatics	3
STAT 447	Machine Learning for Computational Biology (Machine Learning for Computational Biology)	3
American history (p. 30)		3
Prescribed elective ²		3
Semester Credit Hours		16

Spring

STAT 486	Bioinformatics Capstone (Bioinformatics Capstone)	3
Select one of the following:		3
COMM 203	Public Speaking	
COMM 205	Communication for Technical Professions	
COMM 243	Argumentation and Debate	
Creative arts (p. 30)		3
Prescribed elective ²		3
General elective ³		3
Semester Credit Hours		15
Total Semester Credit Hours		120

¹ Must make a grade of C or better.

² Prescribed electives to be selected from the list below. 11 hours must be 300- and 400-level courses.

³ Select from any 100-499 course not used elsewhere.

Prescribed electives

Code	Title	Semester Credit Hours
BIOL 213	Molecular Cell Biology	3
BIOL 214	Genes, Ecology and Evolution	3
BIOL 349	Bioinformatics	3
BIOL 350	Computational Genomics	3
BIOL 351	Fundamentals of Microbiology	4
BIOL 406/ GENE 406	Bacterial Genetics	3
BIOL 430	Biological Imaging	4
BMEN 250	Biostatistics and Data Visualization	3
CSCE 206	Structured Programming in C	4
CSCE 222/ ECEN 222	Discrete Structures for Computing	3
CSCE 221	Data Structures and Algorithms	4

ECEN 419	Genomic Signal Processing	3
GENE 405/ BIMS 405	Mammalian Genetics	3
GENE 419/ BICH 419	Computational Techniques for Evolutionary Analysis	3
GENE 464/ BICH 464	Bacteriophage Genomics	3
STAT 335/ CSCE 320	Principles of Data Science	3
STAT 406	Design and Analysis of Experiments	3
STAT 408	Introduction to Linear Models	3
STAT 445	Applied Biostatistics and Data Analysis	3

The Department of Statistics will allow at most two D's in upper-level (300-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

This is a suggested schedule that includes the required courses for the BS in Bioinformatics. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Statistics - BS

This program equips students with the essential skills to analyze and interpret data, preparing them for high-demand careers in multiple fields or graduate studies.

Statistics is the science of collecting and analyzing data for the purpose of making decisions in the presence of uncertainty. Data are ubiquitous in the modern day and age, and statisticians are in high demand. Multidisciplinary application areas vary widely and include health and medicine, business, engineering, physical sciences, environmental studies, and government. The curriculum in statistics provides instruction in all necessary areas, including a foundation in mathematics and probability, strategies for designing studies and collecting data, the visualization and analysis of data using popular software such as R and Python, and the process of using sample data to draw conclusions about a population. Depending on the electives selected, a student completing this program will be prepared to enter employment as a statistical analyst or to continue to graduate school in statistics or a related field.

Program Requirements

The following is a suggested schedule that includes the required courses for the BS in Statistics. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
ENGL 104	Composition and Rhetoric	3
MATH 171	Calculus I ¹	4
STAT 182	Foundations of Statistics	1

¹ Must make a grade of C or better.² Select from ISEN 320, ISEN 340, ISEN 355; MATH 300, MATH 302, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, MATH 470.³ Students must take 12 hours in an outside specialization area upon approval by a departmental advisor. At least 6 hours must be upper-level hours.⁴ Select from ISEN 320, ISEN 340, ISEN 350, ISEN 355; MATH 300, MATH 302, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, MATH 470; STAT 315, STAT 335/CSCE 320, STAT 407, STAT 421, STAT 424/MATH 424,

STAT 426, STAT 436, STAT 438, STAT 445, STAT 446, STAT 459, STAT 484, STAT 485, STAT 489, STAT 491.

⁵ Select from ISEN 350; STAT 315, STAT 335/CSCE 320, STAT 407, STAT 421, STAT 424/MATH 424, STAT 426, STAT 436, STAT 438, STAT 445, STAT 446, STAT 459, STAT 484, STAT 485, STAT 489, STAT 491.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core (p. 26) category, a college/department requirement, or a general elective can be used to satisfy this requirement.

The department will allow at most two D's in upper-level (325-499) courses. If a third D is earned, one of the three courses in which a D was earned must be retaken and a grade of C or better earned.

Statistics - 5-Year Bachelor of Science and Master of Science in Statistical Data Science

This program enables students to receive their Statistics undergraduate degree (BS) and a Master of Science (MS) in Statistical Data Science graduate degree in five years.

Well-trained statisticians are in high demand in various application areas including health and medicine, business, engineering, physical sciences, environmental studies, and government. The combined degree program enables ambitious and academically talented statistics majors at Texas A&M University to earn both a bachelor's degree and a master's degree within a period of five years after entering Texas A&M as a freshman. Depending on the electives selected, a student completing the combined program will be prepared to enter:

- Employment as a statistical analyst or as a data scientist;
- The professional job marketplace for quantitatively trained professionals;
- A career in secondary education;
- A doctoral program in statistics, biostatistics, or in a related discipline, at Texas A&M or another university.

Program Requirements

The following is a suggested schedule that includes the required courses for the combined BS in Statistics /MS in Statistical Data Science. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

¹ Must make a grade of C or better.

- ² Select from ISEN 320, ISEN 340, ISEN 350, ISEN 355; MATH 300, MATH 302, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, MATH 470.
- ³ Students must take 12 hours in an outside specialization area upon approval by a departmental advisor. At least 6 hours must be upper-level hours.
- ⁴ Courses to be used towards both the BS in Statistics and MS degree in Statistical Data Science.
- ⁵ Select from ISEN 320, ISEN 340, ISEN 355; MATH 300, MATH 302, MATH 308, MATH 409, MATH 410, MATH 417 or MATH 437, MATH 442, MATH 446, MATH 447, MATH 469, MATH 470; STAT 315, STAT 335/CSCE 320, STAT 407, STAT 421, STAT 424/MATH 424, STAT 426, STAT 436, STAT 438, STAT 445, STAT 446, STAT 459, STAT 484, STAT 485, STAT 489, STAT 491.
- ⁶ Select from STAT 315, STAT 335/CSCE 320, STAT 407, STAT 421, STAT 424/MATH 424, STAT 426, STAT 436, STAT 438, STAT 445, STAT 446, STAT 459, STAT 484, STAT 485, STAT 489, STAT 491.
- ⁷ 32 hours for a non-thesis option. Graduate hours must be taken from 600 level STAT courses not including STAT 601, STAT 651, or STAT 652. Students are required to take two semester hours of STAT 692. For additional information concerning this and other requirements of the Master's program including the Master's diagnostic examination, reference the Master of Science in Statistical Data Science (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/statistics/statistical-data-science-ms/>) graduate catalog page.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity courses and 3 hours of Cultural Discourse courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement.

Students will not be permitted to receive credit for both the 400- and 600-level versions of certain courses because the content and learning outcomes are too similar (e.g. STAT 404/STAT 604, STAT 408/STAT 608, STAT 407/STAT 607, STAT 426/STAT 626, STAT 436/STAT 636, STAT 438/STAT 638, STAT 445/STAT 645, STAT 446/STAT 646, STAT 459/STAT 659).

The program includes a total of 152 hours which up to 2 hours may be applied toward both the Bachelor of Science in Statistics and the non-thesis option Master of Science in Statistical Data Science.

Statistics - Minor

This minor equips students with the essential skills to analyze and interpret data, preparing them for high-demand careers in multiple fields or graduate studies.

Statistics is the science of collecting and analyzing data for the purpose of making decisions in the presence of uncertainty. Multidisciplinary application areas vary widely and include health and medicine, business, engineering, physical sciences, environmental studies, and government. The statistics minor provides training in theoretical, applied and computational statistics with a two-semester sequence in statistical methods and a broad selection of upper-level elective classes. Depending on the electives selected, a student completing this program will be prepared to conduct statistical analysis in their professional work or to continue graduate study in fields involving statistical analysis.

For additional information, see the Department of Statistics website (<https://artsci.tamu.edu/statistics/>).

¹ To satisfy the University's *Cultural Discourse (CD)* graduation requirement students must take one course (3 credit hours) from a list of approved courses. If not satisfied through Core Curriculum, an approved *CD* [KUCD] course can be used to satisfy unmet *General Elective* requirement.

² Select from a list of approved BBA international electives for business students. In the BBA curricula, at least 3 credit hours must be selected from a list of approved international elective courses that simultaneously fulfill the University's International and Cultural Diversity (ICD) graduation requirement. See an academic advisor.

³ Management majors must take MGMT 450/IBUS 450.

³ Management majors are advised to take PBSI 107 or SOCI 205.

Bachelor of Science in Business

The Bachelor of Science in Business (BSB) degree allows students to combine a comprehensive business education with other areas of interest to create a custom degree plan. The unique features of the BSB prepare students for a wide variety of careers or graduate school. The BSB allows students to specialize in an area of focus by pursuing a minor or a certificate that complements their business education and personal interests.

The student completes 120 semester credit hours of study. The BSB curriculum includes the following requirements:

Code	Title	Semester Credit Hours
Core Curriculum - 42 hours		
	American history	6
	Communication	6
	Creative arts	3
	Government/political science	6
	Language, philosophy and culture	3
	Life and physical sciences	9
	Mathematics	6
	Social and behavioral science	3
Business Courses - 42 hours		
	Core Business Knowledge	36
	BSB capstone course	3

Upper-Level Entry into BBA and BSB Degree-Granting Majors

Students who meet the University and college entrance requirements enter Mays Business School as lower-level business (BUAD) students. Enrollment of Mays Business School students in junior- and senior-level business courses (i.e., 300- and 400-numbered) is limited to those who have been admitted to upper-level (also referred to as upper division) in one of the seven BBA majors—accounting, business honors, finance, management, management information systems, marketing, and supply chain management—or the Bachelor of Science in Business.

Upper-Level Entry Requirements and Application Procedures

Lower-level business (BUAD) students are encouraged to complete the freshman and sophomore sequence of courses as listed under Program Requirements.

The upper-level (UL) entry requirements and application procedures are as follows:

1. **Admission:** To be admitted to an UL major, a student must be admitted to Mays Business School and have:
 - a. Satisfactorily completed the following five courses:

Code	Title	Semester	Credit Hours
ACCT 229	Introductory Accounting		3
ECON 202	Principles of Economics		3
ECON 203	Principles of Economics		3
MATH 140	Mathematics for Business and Social Sciences		3
MATH 142	Business Calculus (or its equivalent)		3
 - b. Submitted application for UL admission no later than preregistration for the expected UL entry term. **NOTE:** For summer UL entry, ALL REQUIREMENTS must be completed BEFORE the first class day of the FIRST SUMMER SESSION.
 - c. BUAD students may preregister for upper-level business courses in the semester for which they have applied for upper level. However, students who fail to complete upper-level requirements shall not be permitted to remain registered in upper-level business classes.
2. **Transfer Students:** Transfer students admitted to Mays Business School will be classified as lower-level business (BUAD) majors until they complete all requirements listed previously in item 1, at which time they may apply for admission to an UL major. Transfer students may immediately apply for UL when admitted to Mays Business School if, and only if, they meet all UL requirements at that time.
3. **On-Campus Change of Major Students:** Texas A&M students who change major into Mays Business School from another college or department at the University enter the business school as lower-level Business (BUAD) majors until they complete all requirements listed previously in item 1. Change of major students who, when admitted to the business school, qualify to apply for admission to an UL major may do so.
4. **Junior- and Senior-Level Business Courses:** Preference for available seats in junior- and senior-level business courses (i.e., 300- and 400-numbered) will be given to students who have been admitted to an UL degree-granting major in Mays Business School. All ineligible students who preregister for UL business classes are subject to cancellation of their registration in these courses.

Cooperative Education

Cooperative education is designed to augment the academic program of study with on-the-job training. Academic requirements a business undergraduate must have to be eligible to participate are 45 completed credit hours and a minimum 2.5 cumulative GPA. Interested students may obtain more information from the Career Center (<http://careercenter.tamu.edu/>) website or (979) 845-5139 or in Room 209, Koldus Building.

Restrictions on Two Degrees

Mays Business School is enrollment managed; demand for admission to the undergraduate business program consistently exceeds available educational resources. Priority is given to qualified applicants for their initial bachelor's degree.

Double Major

Only Business Honors majors may elect a second major field of study within the BBA degree. The first major must be business honors. The Business Honors student must satisfy all University and Business School requirements and complete all curriculum requirements for each major. This option leads to the granting of one BBA degree with two majors. Additional restrictions may apply.

Double Degree

Approval of double degrees (BBA with BA or BS) is granted by exception only. A written appeal for a double degree may be submitted; the appeal should reflect an excellent academic record, support from the BA or BS granting college, and a compelling justification.

Second Degree

Postbaccalaureate admission to Mays is severely restricted and granted by exception only. Applicants for a postbaccalaureate business degree may present a case for an exception to this enrollment restriction in the essay of a complete Texas A&M admission application. Generally, eligible applicants are denied postbaccalaureate admission but may be encouraged to apply, instead, to an appropriate graduate degree program.

Certificate Programs

Mays offers certificate programs for undergraduate students who want to explore a particular topic area in more depth. Most are open to Mays undergraduate students, and some are designed for specific majors who wish to specialize in a particular area in the major field of study.

Students who pursue any of the certificate programs must complete all requirements for the specific program prior to graduation. Certificates are noted on the transcript after graduation. Information regarding certificate programs and requirements can be found in the Mays Business School Certificates section.

Majors

Mays Business School

- Bachelor of Business Administration in Business Honors (p. 502)
- Bachelor of Science in Business (p. 501)
- Bachelor of Science in University Studies, Business Concentration (p. 541)

James Benjamin Department of Accounting

- Bachelor of Business Administration in Accounting (p. 510)
- Bachelor of Business Administration in Accounting and Master of Financial Management, 5-Year Degree Program (p. 511)
- Bachelor of Business Administration in Accounting and Master of Science, 5-Year Degree Program (p. 513)

Adam C. Sinn '00 Department of Finance

- Bachelor of Business Administration in Finance (p. 518)

Department of Information and Operations Management

- Bachelor of Business Administration in Management Information Systems (p. 522)
- Bachelor of Business Administration in Supply Chain Management (p. 524)

Department of Management

- Bachelor of Business Administration in Management, Consulting/General Management Track (p. 527)
- Bachelor of Business Administration in Management, Entrepreneurial Leadership Track (p. 529)
- Bachelor of Business Administration in Management, Human Resource Management Track (p. 530)
- Bachelor of Business Administration in Management, Pre-Law Track (p. 531)

Department of Marketing

- Bachelor of Business Administration in Marketing, Advertising Strategy Track (p. 534)
- Bachelor of Business Administration in Marketing, Analytics and Consulting Track (p. 536)
- Bachelor of Business Administration in Marketing, Healthcare Marketing Track (p. 537)
- Bachelor of Business Administration in Marketing, Professional Selling and Sales Management Track (p. 538)
- Bachelor of Business Administration in Marketing, Strategic Retailing Track (p. 540)

Minors

Mays Business School

- Artificial Intelligence in Business Minor (p. 504)
- Business Minor (p. 504)

Certificates

Mays Business School

- Business of Technology Certificate (p. 504)
- International Business Studies Certificate (p. 505)
- Management Consulting Certificate (p. 507)

James Benjamin Department of Accounting

- Energy Accounting Certificate (p. 515)
- Internal Audit Certificate (p. 515)

Adam C. Sinn '00 Department of Finance

- Commercial Banking Certificate (p. 519)
- Corporate Finance Certificate (p. 519)
- Trading, Risk and Investments Certificate (p. 520)

Masters

Mays Business School

- Master of Business Administration in Business Administration (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/interdepartmental/mba/>), Mays Full-Time MBA Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/interdepartmental/mba/>)
- Master of Business Administration in Business Administration, (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/interdepartmental/executive-mba/>) Mays Executive MBA Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/interdepartmental/executive-mba/>)
- Master of Business Administration in Business Administration, (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/interdepartmental/professional-mba/>) Mays Professional MBA Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/interdepartmental/professional-mba/>)

- Master of Science in Entrepreneurial Leadership (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/management/entrepreneurial-leadership-ms/>)
- Master of Science in Human Resource Management (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/management/ms/>)

Department of Marketing

- Master of Science in Marketing (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/marketing/ms/>)

Doctoral

Mays Business School

- Doctor of Philosophy in Business Administration (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/interdepartmental/phd/>)

Department of Management

- Doctor of Philosophy in Management (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/business/management/phd/>)

Business - BS

This program provides students the opportunity to combine a comprehensive business administration education with other areas of interest to create a customized degree program.

The Bachelor of Science in Business (BSB) degree prepares students for careers in a variety of business roles. Students will acquire core business knowledge and pursue an area of emphasis via a minor, certificate, or program-approved directed electives.

The flexibility and customization features of the BSB prepare students for a broad range of degree options based on their unique interests and skill sets. Students may pursue employment in traditional business roles or a sector in line with their area of interest. The flexibility of the BSB program may also allow for pre-professional students (pre-med, pre-health, etc.) to incorporate some or all their non-business prerequisite courses into their degree plan.

Students must be admitted to the Bachelor of Science in Business degree program and may not major or double-major in a Mays Business School Bachelor of Business Administration (BBA) major, including accounting, business honors, finance, management, management information systems, marketing, and supply chain management.

Program Requirements

First Year

Fall

		Semester Credit Hours
BUSN 101 or BUSN 403	Freshman Business Initiative ¹ or Business Writing and Communication	3

¹ BUSN 403 is required for students admitted through change of major or transfer admissions process.

² MATH 148, MATH 152, MATH 168 and MATH 172 will be accepted in lieu of MATH 140.

³ MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

⁴ For those students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree (<http://catalog.tamu.edu/undergraduate/general-information/degree-information/>).

⁵ STAT 211 will be accepted in lieu of BUSN 203.

⁶ Includes 12-18 hours of courses that were used to satisfy the required Minor or Certificate requirement and 9-15 hours of 100-499 courses not used elsewhere, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory basis.

⁷ In consultation with advisor select from approved science and mathematics courses. Courses counting towards a certificate or minor may also fulfill these requirements.

Program requires the completion of a minor or certificate for degree to be awarded.

Business Honors - BBA

This program is designed for students whose academic excellence is matched by strong character, leadership skills, and teamwork. It prepares

students to begin careers in all fields or to continue on to a graduate program or professional school.

Mays Business School offers a Business Honors program. Selection through a separate application process is required to be eligible for participation in Business Honors. Prospective students apply to Business Honors as incoming freshmen or during the spring semester of their freshman year. Both selection cycles are competitive processes. More information is available at <https://mays.tamu.edu/undergraduate/bba/business-honors/>.

Bachelor of Business Administration

The Bachelor of Business Administration (BBA) in Business Honors degree is available only to students admitted to Mays' Business Honors program.

Students pursuing a BBA in Business Honors must maintain a cumulative GPA of 3.5 or higher and meet other program requirements to continue in Business Honors. Students are required to complete a total of 30 hours of honors coursework plus an internship for credit. Other program requirements apply.

Business Honors majors work closely with an academic advisor to identify a set of courses to meet their academic goals. They may pursue a double major in Business Honors and one of the six other BBA majors (accounting, finance, management, management information systems, marketing and supply chain management).

Upper-Level Entry Requirements

Admission to an upper-level (UL) major in Business Honors requires satisfactory completion of specific coursework, in addition to the application and selection process for Business Honors program participation. To review UL requirements and application procedures see Upper-Level Entry Requirements and Application Procedures. (p. 497)

Program Requirements

Lower-Level Business Program (BUAD)

¹ Refer to the specific major notes below for variations from the Business (lower level) requirements.

² MATH 148, MATH 152, MATH 168 and MATH 172 will be accepted in lieu of MATH 140.

³ For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree." (p. 32)

⁴ MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

⁵ STAT 211 will be accepted in lieu of BUSN 203.

Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to second year fall curriculum in Business (lower level). The communication elective can be taken during the third year fall.

Business Honors: Students admitted to Business Honors take BUSN 125 Business Learning Community I (3 credits) in place of BUSN 101 in the first year fall curriculum and must add BUSN 225 Business Competency (3 credits) to the second year spring curriculum in Business (lower level). The creative arts elective can be taken during the third year fall.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the fourth year can be reduced by 1 credit.

¹ Five of the nine Common Body of Knowledge classes listed must be taken as honors: ACCT 229, ACCT 230, FINC 341, ISTM 210, BUSN 203, SCMT 364, MGMT 311, MGMT 363, MKTG 321.

² Refer to the major specific paragraph on the Lower-Level Business Program (BUAD). Select from approved creative arts elective courses.

³ Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office. In the BBA curricula, three hours of approved international elective coursework simultaneously fulfills the university's International and Cultural Diversity Graduation requirement.

⁴ For those students under ROTC contract, see Requirement 7 of the 'Requirements for a Baccalaureate Degree (p. 32).'

⁵ Any 300- or 400-level business course (ACCT, FINC, IBUS, ISTM, MGMT, MKTG, SCMT) except FINC 341, FINC 409; MGMT 309, MGMT 363, MGMT 466; MKTG 321, MKTG 409; MGMT 311, SCMT 309, SCMT 364. At least one course must be designated as writing designated (W) or oral communication (C). Select in consultation with an academic advisor.

⁶ Select from ACCT 484, BUSN 484, FINC 484, IBUS 484, ISTM 484, MGMT 484, MKTG 484, SCMT 484.

⁷ Elective courses are open to any course offered for university credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

⁸ Must be taken as honors.

Total Program Hours 120

Artificial Intelligence in Business - Minor

This program equips students with cutting-edge Artificial Intelligence (AI) and machine learning (ML) skills essential for modern business leadership.

Mays Business School offers an Artificial Intelligence in Business minor for all undergraduate students. Students interested in utilizing Artificial Intelligence (AI) or machine learning (ML) in a business setting may find that when combined with skills from their major, an AI in Business minor provides the foundation required to efficiently and effectively utilize AI/ML to advance their career and company.

Students applying for the AI in Business minor must have a 3.0 or better overall GPA, 24 credit hours completed with at least 12 completed at Texas A&M University. Application is made in the student's home college or major department. Students are encouraged to start taking AI in Business minor courses as soon as the minor is declared.

To be awarded the minor and receive transcript recognition, students must obtain a 2.0 or better GPA overall in the courses. Once declared, minor requirements become graduation requirements. The minor will be recognized on the transcript after graduation, but not on the diploma.

Program Requirements

Code	Title	Semester Credit Hours
BUSN 450	Business Transformation with Generative Artificial Intelligence	3
BUSN 455	Automating Business Story Telling Using Artificial Intelligence	3
BUSN 460	Machine Learning, Predictive Modeling, and Business Applications	3
BUSN 465	Business Applications of Deep Learning - Image Audio and Video Data	3
BUSN 470	Applied Natural Language Processing for Business Decisions	3
Total Semester Credit Hours		15

Minimum of 6 hours at the 300-400 level.

Business - Minor

This program develops a foundational knowledge in the basic aspects of business, including accounting, finance, management information systems, management, and marketing.

Mays Business School offers a business minor (<https://mays.tamu.edu/undergraduate/non-business-major/business-minor/>) for undergraduate non-business majors. Students interested in pursuing a future MBA, or the MS Business (<https://mays.tamu.edu/graduate/masters/ms-programs/ms-business/>) Master's degree, may find that when combined with appropriate statistics and economics coursework, a business minor provides the business foundation required by most graduate business programs.

Students applying for a business minor must have a 2.0 or better overall GPA. Application is made in the student's home college or major

department. Students are encouraged to start taking business minor courses as soon as the minor is declared.

To be awarded the minor and receive transcript recognition, students complete required coursework. Once declared, minor requirements become graduation requirements. The minor will be recognized on the transcript after graduation, but not on the diploma.

Program Requirements

The minor in business consists of six specific courses chosen to develop foundational knowledge in the basic aspects of business, including accounting, finance, management, marketing, and management information systems.

The courses listed below constitute the 18 hours required for a minor in business.

Code	Title	Semester Credit Hours
ACCT 209	Survey of Accounting Principles	3
FINC 409	Survey of Finance Principles ¹	3
ISTM 209	Business Information Systems Concepts ²	3
MGMT 209	Principles of Business Regulations and Law	3
MGMT 309	Survey of Management ¹	3
MKTG 409	Principles of Marketing ¹	3
Total Semester Credit Hours		18

¹ Course must be taken in residence at Texas A&M. No transfer courses or substitutions will be allowed except through approved exchange and affiliate provider study abroad programs.

² The *Information Systems* CLEP exam is available for students who have not taken ISTM 209 and wish to demonstrate mastery of the course concepts. See your academic advisor for additional information.

Students must earn a grade of C or better in each course listed above to be awarded the business minor and receive transcript recognition.

Course equivalents may be available for lower-level business minor coursework (200-level courses). Refer to the business minor webpage for further information.

Business of Technology - Certificate

This program is designed to augment participants' understanding of rapidly changing technologies, equip them for roles within leading technology enterprises, provide mentorship and networking opportunities with industry executives, and equip them with foundational knowledge.

The Business of Technology certificate, available to students at Texas A&M University, represents a distinctive opportunity to explore the intersection of business and technology. The certificate is housed under the Aggies in Tech program – a high impact learning opportunity.

Students pursuing this certificate must fulfill specified coursework obligations at Texas A&M University, prior to graduation. Upon successful fulfillment of these requirements, a certificate will be issued by the Office of the Registrar.

International Business Studies - Certificate

This program is designed to offer Mays Business School undergraduate students the opportunity to establish an international business and culture knowledge base that will prepare them to meet global business challenges.

The Certificate in International Business Studies coursework can be integrated as part of the undergraduate business curriculum. An international experience is also required. Students who pursue this certificate program must complete all requirements prior to graduation.

Total Semester Credit Hours		18

¹ Three hours must be taken in the student's business major. Courses may be taken on campus or through a TAMU or Mays faculty-led, field trip, or exchange program. Prior approval is required for direct enrollment at a foreign institution or through a provider.

² Must be the same language (e.g. SPAN 101, SPAN 102) and taken at the university level. Credit-by-exam not allowed.

³ Non-business courses taken abroad as part of a TAMU or Mays faculty-led, field trip, or exchange program, or through direct enrollment at a foreign institution or through a provider may also be used to satisfy this requirement.

Approved International Experience

An approved international experience, one month minimum, is required. Options available include:

- Mays or university-wide exchange program
- Mays or TAMU faculty-led or field trip
- International internship (for IBUS 484 credit)
- Other study abroad or volunteer program (with prior approval)

Management Consulting - Certificate

This program provides students across Texas A&M University an opportunity to explore the management consulting industry.

This certificate in Management Consulting certificate will enhance students' analytical agility through use of systems methodologies, effective communication strategies, and practical application of client management and adaptive leadership

skills necessary to place and subsequently thrive in all levels of consulting firms.

James Benjamin Department of Accounting

The accounting profession continues to be recognized as one of the world's leading professions and as one offering many opportunities for a challenging career. The major challenge confronting the accounting profession today is the continuous development of accounting and information systems that can be utilized by business firms operating in an increasingly complex global environment. Within this environment, business firms and government units are generating and utilizing information at an accelerating rate.

A Bachelor of Business Administration ([BBA](#)) degree in accounting provides the opportunity for entry into a career offering a variety of different and challenging paths. Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, within all levels of government, and as accounting educators. All of these careers provide an opportunity to earn the Certified Public Accountant (CPA) license and to serve society by maintaining the highest levels of integrity.

The American Institute of Certified Public Accountants (AICPA) recognizes the need for technically competent graduates entering the accounting profession. The State Board of Public Accountancy in Texas requires a minimum of 150 semester hours of college coursework (including at least 27 hours of upper-division accounting courses) as well as other requirements for CPA licensure. Therefore, highly motivated students are encouraged to give serious consideration to pursuing advanced studies to enhance their potential for a successful accounting career. The BBA degree alone does not meet the requirements to sit for the CPA examination in Texas.

The James Benjamin Department of Accounting offers a 5-year combined professional program that students apply for admission to enter during their junior year. The Professional Program in Accounting (PPA) offers a curriculum integrating undergraduate and graduate education. Graduates receive a BBA and a Master of Science degree (MS) or receive a BBA and a Master of Financial Management (MFM). This program offers opportunities for successful and motivated students to pursue academic coursework that challenges both their interests and abilities. Courses are taught by experienced faculty with superior teaching and professional credentials and are limited in class size.

Objectives of PPA include developing sound conceptual, technical, analytical and communication skills that are required for success in the accounting profession. The program develops decision making and teamwork skills through extensive use of discussions and case studies. Also, the program enables the student to select a coursework specialization in audit, non-profit, information systems, financial management, marketing, entrepreneurship, taxation, consulting, supply chain management, wealth management, or human resource management. Each track offers the student an opportunity to participate in a professional accounting internship which can be taken for course credit, should the student elect to do so.

The department also offers a standalone traditional Master's program (Master of Science in Accounting) that students enter after completion of the Bachelor's degree. For more details about PPA or the traditional Master's program, refer to the *Texas A&M University Graduate and Professional Catalog* or contact the PPA Director in the James Benjamin Department of Accounting. Students must be able to complete the coursework of any of the aforementioned programs in College Station, TX.

Lastly, the department offers a Flex Online Master of Science in Accounting degree in a fully online format. This program is designed for working professionals looking to advance a current accounting career or to move into accounting from another field. Refer to the *Texas A&M University Graduate and Professional Catalog* or contact the director of the Flex Online Accounting Program in the James Benjamin Department of Accounting.

Questions related to eligibility requirements to take the CPA examination or for CPA licensure in Texas should be directed to the Texas State Board of Public Accountancy (or the licensing authority in other jurisdictions).

- Internal Audit Certificate (p. 515)

Accounting - BBA

This program develops students to understand business operations, communicate financial performance to different audiences, and use financial data to provide insights that will help businesses and individuals make better decisions.

A Bachelor of Business Administration (BBA) degree from an AACSB-Accredited (Association to Advance Collegiate Schools of Business) Accounting program prepares students for careers that offer numerous opportunities for growth and development. This degree program provides the minimum credentials necessary for entry into most accounting careers. However, the BBA degree does not meet the requirements to sit for the CPA examination in Texas. Questions related to eligibility requirements to take the CPA examination or for CPA licensure in Texas should be directed to the Texas State Board of Public Accountancy (or the licensing authority in other jurisdictions).

Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, within all levels of government, and as accounting educators.

Upper-Level Entry Requirements

Admission to the upper-level major of accounting requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

Total Semester Credit Hours 60

¹ Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office. In the BBA curricula, the 6 hours of approved international elective courses simultaneously fulfill the university's International and Cultural Diversity Graduation requirement.

² This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

³ For those students under ROTC contract, see Requirement 7 of the Requirements for a Baccalaureate Degree (<http://catalog.tamu.edu/undergraduate/general-information/degree-information/>).

⁴ General elective courses are open to any course offered for university credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, MGMT 209, MGMT 309, MKTG 409, SCMT 364. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

Total Program Hours 120

See the Department of Accounting academic advisors for more information on the licensure requirements for the Certified Public Accountant (CPA) license.

Professional Program students will follow the degree plan coordinated by the Professional Program office. Professional Program students will substitute ACCT 321 for ACCT 322. The additional credit hour required for ACCT 321 will to replace 1 hour of General Electives.

Accounting - 5-Year Bachelor of Business Administration and Master of Financial Management

This combination program offers students the opportunity to simultaneously earn a Bachelor of Business Administration in Accounting and a Master of Financial Management.

The James Benjamin Department of Accounting offers a 5-year Professional Program in Accounting (PPA) which prepares students for any path. Students must apply for admission into the PPA while, or after, taking ACCT 327 (Financial Reporting I). Students must be able to take the coursework in College Station, Texas.

The objectives of the PPA include developing sound conceptual, technical, analytical, and communication skills that are required for success in the accounting profession. Many accounting graduates are employed by public accounting firms that provide assurance, tax and other services to all types of organizations. Other accounting graduates pursue careers with business firms and financial institutions, within consulting firms, within all levels of government, and as accounting educators.

⁴ For those students under ROTC contract, see Requirement 7 of the 'Requirements for a Baccalaureate Degree (<http://catalog.tamu.edu/undergraduate/general-information/degree-information/>)'.

⁵ General elective courses are open to any course offered for university credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

⁶ May also take MGMT 680.

⁷ Students will follow the graduate coursework coordinated by the Professional Program in Accounting (PPA) office.

⁸ Accounting courses are subject to change based on the track students select.

⁹ Track courses are specific to the individual track that is chosen once you are admitted into the Professional Program of Accounting (PPA). Tracks other than Financial Management include Audit, Consulting, Tax, Entrepreneurship, Nonprofit, Technology, Human Resource Management, Marketing, Supply Chain and Analytics, and Wealth Management.

See the James Benjamin Department of Accounting academic advisors for more information on the licensure requirements to sit for the Certified Public Accountant (CPA) exam.

The program includes a total of 156 hours, of which up to 6 hours could be applied toward both the Bachelor of Business Administration in Accounting and the Master of Science in Accounting, Entrepreneurial

Leadership, Human Resource Management, Management Information Systems, Marketing, or Supply Chain and Analytics.

Total Program Hours 156

Energy Accounting - Certificate

This program offers coursework and experiences to prepare students for a career in the energy sector.

The Energy Accounting Certification (EAC) program offers Mays BBA Accounting and Finance majors who have an interest in working within the energy sector an opportunity to set themselves apart and find a place in an exciting, competitive industry that provides a wide variety of opportunities – including international. The EAC program is designed to provide undergraduate students high impact learning experiences related to the energy industry.

All EAC requirements must be completed prior to graduation. To meet the program requirements, students must complete the required coursework. Upon fulfilling the requirements, a certificate is issued by the Office of the Registrar.

Program Requirements

Code	Title	Semester Credit Hours
ACCT 328	Financial Reporting II ¹	3
ACCT 403	Energy Accounting ^{1,2}	3
ACCT 484	Accounting Internship ^{3,4}	3
	or FINC 484 or Professional Internship	
BUSN 213	Overview of the Energy Industry ¹	1
	Select one of the following: ^{1,5}	3
AGEC 350	Environmental and Natural Resource Economics	
AGEC 402	Survey of International Agricultural Economics: Study Abroad	
AGEC 422	Land Economics	
ATMO 201	Weather and Climate	
ATMO 210	Climate Change	
BESC 201	Introduction to Bioenvironmental Sciences	
CHEM 107	General Chemistry for Engineering Students	
CHEM 119	Fundamentals of Chemistry I	
CHEM 120	Fundamentals of Chemistry II	
ECON 433	Energy Markets and Policy ⁶	
ENGR 101	Energy: Resources, Utilization and Importance to Society	
ENSS 105	Introduction to Environmental Systems Science	
GEOG 202	Geography of the Global Village	
GEOG 203	Planet Earth	
GEOG 205	Environmental Change	
GEOG 309	Geography of Energy	
GEOG 330	Resources and the Environment	
GEOL 101	Principles of Geology	
HIST 359	American Environmental History	

HIST 360	History of Energy in America
OCNG 251	The Blue Planet - Our Oceans
PHYS 123	Physics for Future Presidents
PHYS 201	College Physics
PHYS 202	College Physics
PHYS 206	Newtonian Mechanics for Engineering and Science
RWFM 375	Conservation of Natural Resources
RWFM 400/Study Abroad in Natural Resources	
ECCB 452	

¹ Must make a grade of C or better.

² ACCT 603 will be accepted in lieu of ACCT 403.

³ Must be taken on a satisfactory/unsatisfactory basis.

⁴ ACCT 684 will be accepted in lieu of ACCT 484 or FINC 484.

⁵ Course availability will vary each semester. For a complete list of prescribed electives, please contact an Academic Advisor or the Certificate in Energy Accounting coordinator.

⁶ May take ECON 633 as an elective.

Internal Audit - Certificate

This program offers coursework and experiences to prepare students to work with one company across all departments to solve their biggest challenges.

Business students with a consulting mindset interested in serving an internal function with a broad focus on areas such as risk management, compliance, fraud investigation, and auditing for operational efficiency and effectiveness may be a good match for a career as an internal auditor.

To prepare students for such roles, the James Benjamin Department of Accounting offers an Internal Audit Certificate which is recognized as a Center of Excellence by The Institute of Internal Auditors (<https://www.theiia.org/en/>) (IIA). This certificate is available to undergraduate students enrolled in the Mays Business School at Texas A&M University. To be eligible for this certificate students must be pursuing a BBA in one of the following majors: ACCT (includes students admitted in the Professional Program in Accounting), BHNR, FINC, MGMT, MISY, MKTG, or SCMT. Students pursuing the BS in Business degree program are also eligible for this certificate. Students must apply and be accepted into the Internal Audit Program (<https://mays.tamu.edu/undergraduate/high-impact-programs/internal-audit-program/>) in order to be eligible to take some of the coursework required for this certificate.

To meet the program requirements, students must complete the required coursework in College Station, TX. All requirements must be completed prior to graduation. Upon fulfilling the certificate requirements, a certificate will be issued by the Office of the Registrar.

Program Requirements

Code	Title	Semester Credit Hours
ACCT 408	Internal Auditing	3
ACCT 427	Accounting and Financial Information Systems	3
ACCT 450	Accounting Ethics	3

Elective ^{1,2}	3
Select one of the following:	
ACCT 410 Fraud Examination	
FINC 361 Managerial Finance I	
FINC 447/ Financial Statement Analysis ACCT 447	
FINC 449 Financial Modeling	
ISTM 315 Database Programming	
ISTM 320 Business Systems Analysis and Design	
ISTM 455/ Cybersecurity Management SCMT 455	
MGMT 372 Advanced Concepts in Organizational Behavior	
MGMT 422 Management Consulting	
MGMT 475 Leadership Development	
MKTG 323 Marketing Research	
MKTG 431 Marketing Analytics	
SCMT 345 Business Process Design	
Internship ²	3
Select one of the following:	
ACCT 484 Accounting Internship	
FINC 484 Professional Internship	
ISTM 484 Management Information Systems Internship	
MGMT 484 Management Internship	
MKTG 484 Marketing Internship	
SCMT 484 Supply Chain Management Internship	
Total Semester Credit Hours	15

¹ Students may use another course in lieu of the course listed if approved by an Internal Audit Program Director in advance of the student registering for the course.

² An internship experience is required for the certificate and will be documented through registering and completing an internship course. If the student pursues an internship and earns less than three credit-hours in their internship course, an additional elective must be taken. Completing less than three credit-hours for the internship course and the selection of the appropriate elective must be approved in advance of registering for either course by an Internal Audit Program Director. At least 15 credit hours must be taken to earn the certificate.

Adam C. Sinn '00 Department of Finance

The Adam C. Sinn '00 Department of Finance (<https://mays.tamu.edu/departments-of-finance/>) at Mays Business School is one of the country's top finance departments. The department's goal is to provide students with the theoretical and empirical tools necessary to achieve high levels of expertise in all areas of finance. The business enterprise must raise capital, use it to maximum advantage, and reward investors. Finance is the set of management challenges (and career opportunities) concerned with succeeding at these tasks.

The department offers a Bachelor of Business Administration (BBA) in Finance. The finance (FINC) major involves both required and elective courses in three areas.

- **Corporate Finance** encompasses the tools and techniques for valuing productive assets, choosing ways of funding them, and gauging financial success. This area focuses on how corporations determine funding sources, capital structure, and investment decisions.
- **Investments** encompasses the theoretical and practical models that help assess risks and rewards of stocks, bonds, derivatives, and other "financial assets" (individually and in portfolios), as well as the financial health of firms and institutions offering them to the investing public.
- **Markets and Institutions** explores the ways in which bankers, brokers, and other financial institutions convert savings into productive capital.

Mays Business School BBA-FINC graduates with good academic records place well in all the above career areas, as well as in graduate and professional schools. Firms in a variety of industries, along with major financial firms such as commercial and investment banking, brokerage, wealth management and consulting, seek finance graduates. Accordingly, the Adam C. Sinn '00 Department of Finance emphasizes scholarship in its faculty, professionalism in its programs, and innovation in its relationships with employers and mentors.

For more information visit the Adam C. Sinn '00 Department of Finance (<https://mays.tamu.edu/departments-of-finance/>) website.

Majors

- Bachelor of Business Administration in Finance (p. 518)

Certificates

- Commercial Banking Certificate (p. 519)
- Corporate Finance Certificate (p. 519)
- Trading, Risk and Investments Certificate (p. 520)

Finance - BBA

This program equips students with the theoretical and empirical tools necessary to achieve high levels of expertise in all areas of finance.

The Adam C. Sinn '00 Department of Finance (<https://mays.tamu.edu/departments/finance/>) offers a Bachelor of Business Administration (BBA) in Finance. Finance is the study of how individuals, companies, and governments allocate resources over time, under conditions of risk or uncertainty. The BBA Finance (FINC) major equips students in the core financial areas of corporate finance, investments, and markets and institutions.

In addition to earning a BBA FINC degree, majors may apply for one of several specialized fields of study:

- Aggies on Wall Street (AOWS)
- Commercial Banking Certificate Program (CBP)
- Corporate Finance Certificate Program (CFP)
- Trading, Risk and Investments Certificate Program (TRIP)

Finance students also have access to applied finance courses including *Titans of Investing*, which exposes students to a broad perspective of financial markets and global developments; the *Tanner Fund* and *Reveille Fund*, which allow students to manage real money for credit; *Financial Modeling*, in which students build Excel-based financial models in the context of company valuations, leveraged buyout investments, and mergers and acquisitions; and multiple commercial real estate analysis classes.

BBA FINC graduates are qualified for careers including investment bankers, commercial bankers, investment fund managers, traders, corporate treasurers, comptrollers, chief financial officers, investor relations officers, risk managers, investment analysts, and commercial real estate analysts.

Upper-Level Entry Requirements

Admission to the upper-level major of finance (FINC) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

Program Requirements

Lower-Level Business Program (BUAD)

First Year		Semester
Fall		Credit Hours
BUSN 101	Freshman Business Initiative ¹	3
MATH 140	Mathematics for Business and Social Sciences ²	3
American history (p. 30) ³		3

¹ Refer to the specific major notes below for variations from the Business (lower level) requirements.

² MATH 148, MATH 152, MATH 168 and MATH 172 will be accepted in lieu of MATH 140.

³ For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree." (p. 32)

⁴ MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

⁵ STAT 211 will be accepted in lieu of BUSN 203.

Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to second year fall curriculum in Business (lower level). The communication elective can be taken during the third year fall.

Business Honors: Students admitted to Business Honors take BUSN 125 Business Learning Community I (3 credits) in place of BUSN 101 in the first year fall curriculum and must add BUSN 225 Business Competency (3 credits) to the second year spring curriculum in Business (lower level). The creative arts elective can be taken during the third year fall.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the fourth year can be reduced by 1 credit.

¹ This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

² Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office. In the BBA curricula, three of the 6 hours of approved international elective courses simultaneously fulfill the university's International and Cultural Diversity Graduation requirement.

³ For those students under ROTC contract, see Requirement 7 of the 'Requirements for a Baccalaureate Degree (<http://catalog.tamu.edu/undergraduate/general-information/degree-information/>)'.

⁴ Any 300- or 400-level accounting course except ACCT 327 and ACCT 328. Before enrolling in ACCT 489, students should consult with the finance department advisor.

⁵ Any 300- or 400-level finance course except FINC 341, FINC 350, FINC 409, and FINC 484.

⁶ Elective courses are open to any course offered for university credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

⁷ Refer to the major specific paragraph on the Lower-Level Business Program (BUAD). The general elective taken in the fourth year should be reduced by 1 credit.

Total Program Hours 120 Commercial Banking - Certificate

This program is designed to equip students with the best practices for a career in commercial banking.

The Adam C. Sinn '00 Department of Finance (<https://mays.tamu.edu/departments/finance/>) offers specialized, industry-relevant study through the Commercial Banking Certificate Program (CBP). The CBP is designed to equip BBA FINC students with the banking and finance skills needed to prepare for and transition into successful careers in commercial banking, serving the personnel needs of the industry in the state of Texas and the United States.

The CBP requires completion of prescribed coursework and a paid summer internship with a member bank of the CBP Advisory Board. The required curriculum is representative of banking industry requirements for CBP graduates to be favorably recruited by the banking industry for commercial banking careers. Business student applicants must be U.S. citizens or permanent residents.

Students who pursue the CBP must complete all program requirements prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

Program Requirements

Code	Title	Semester Credit Hours
FINC 462	Commercial Bank Management	3
FINC 463	Seminar in Commercial Banking	3
FINC 464	Commercial Credit Analysis	3
MKTG 337	Selling Financial Products and Services	3
Total Semester Credit Hours		12

An internship with a banking institution or regulatory agency is required.

Corporate Finance - Certificate

This program is designed to prepare BBA Finance students focused on careers in corporate finance and accounting.

The Adam C. Sinn '00 Department of Finance (<https://mays.tamu.edu/departments/finance/>) offers specialized study through the Corporate Finance Certificate Program (CFP).

The CFP requires completion of a set of guided finance, accounting, and data analytics electives which have been selected to prepare students for the many roles available in the corporate world of finance and accounting. Business students must be U.S. citizens or permanent residents.

Students who pursue the CFP must complete all program requirements prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

Program Requirements

Code	Title	Semester Credit Hours
FINC 345	Success Factors in Corporate Finance	1
FINC 436	Corporate Finance Capstone	3
FINC 443	Valuation	3
FINC 447/ ACCT 447	Financial Statement Analysis	3
FINC 449	Financial Modeling	3
ISTM 313	Foundations of Data Analytics for Non-MIS Majors	3
Total Semester Credit Hours		16

Trading, Risk and Investments - Certificate

This program is designed to prepare BBA FINC and BBA Business Honors/FINC undergraduate students in the fields of energy trading, investments, and risk management by combining exceptional class instruction with hands-on internship-based experience.

The Adam C. Sinn '00 Department of Finance (<https://mays.tamu.edu/departments/finance/>) offers specialized study through the Trading, Risk and Investments Program (TRIP). Three paid internships with different board member companies are required and provided. TRIP students must be U.S. citizens or permanent residents.

Students who pursue TRIP must complete all program requirements prior to graduation. Upon graduation a certificate notation will be added to the official transcript.

Program Requirements

Code	Title	Semester Credit Hours
ACCT 327	Financial Reporting I	3
BUSN 392	Cooperative Education in Business ¹	2
FINC 368	Trade Floor Dynamics	3
FINC 485	Directed Studies ((Final Presentation))	0
Select three of the following:		9
FINC 422	Applied Investment Analysis	
FINC 423	Options and Financial Futures	
FINC 424	Trading Risk Management	

FINC 425	Active Portfolio Management
FINC 426	Trading Markets
FINC 427	Titans of Investing
FINC 428	Fixed Income Analysis
FINC 443	Valuation
FINC 446	Technical Analysis of Financial Markets
FINC 448	Advanced Investments
FINC 449	Financial Modeling

Total Semester Credit Hours

17

¹ This certificate requires completion of three internships. Spring-semester internships require enrollment in BUSN 392, a 2-credit course, repeatable for credit. A maximum of 4 credits can be earned through BUSN 392.

Department of Information and Operations Management

The Department of Information and Operations Management (<https://mays.tamu.edu/departments/information-and-operations-management/>) (INFO) ranks among the top departments internationally in research productivity, impact and visibility. The INFO department offers two undergraduate degree programs: a Bachelor of Business (BBA) in Management Information Systems and a BBA in Supply Chain Management.

Management Information Systems (MISY) is a people-oriented field with an emphasis on service through technology. The BBA MISY degree program is the study of people, technology, organizations, and the relationships among them. MISY professionals help firms realize maximum benefit from investment in personnel, equipment, and business processes. This major is designed for students who have an interest in technology and have the desire to use technology to improve people's lives.

Supply Chain Management (SCMT) includes all the activities that must take place to get the right product into the right consumer's hands in the right quantity and at the right time – from raw materials extraction to consumer purchase. The BBA SCMT degree program is primarily concerned with the efficient integration of suppliers, factories, planning and forecasting, purchasing, product assembly, moving, storage, distribution, sales, and customer service. This major is designed for students who have an interest in problem solving, are detail-oriented, and a desire to help businesses achieve a sustainable competitive advantage by building and delivering products better, faster and cheaper.

In each degree program, students learn how to use technology to make businesses more efficient, effective, and competitive. Coursework includes both the technical and managerial aspects of MISY and SCMT to ensure that students are well-equipped for successful careers in the dynamic, global business environment.

For more information, visit the Department of Information and Operations Management (<https://mays.tamu.edu/departments/information-and-operations-management/advising/>) website.

Majors

- Bachelor of Business Administration in Management Information Systems (p. 522)
- Bachelor of Business Administration in Supply Chain Management (p. 524)

Management Information Systems - BBA

This program addresses the impact of computer-based information systems in a variety of organizational settings.

The Department of Information and Operations Management offers a Bachelor of Business Administration (BBA) degree in Management Information Systems (MISY). The degree program produces graduates who are both business analysts (i.e., professionals who understand accounting, marketing, finance, etc.) and information system specialists (i.e., professionals who can implement information systems strategies).

Graduates of the program possess the business, technical, and leadership skills to meet the challenges presented by rapidly evolving information technology and the need to effectively incorporate this technology into business strategy and day-to-day operations.

For more information, visit the BBA Management Information Systems (<https://mays.tamu.edu/undergraduate/bba/management-information-systems/>) website.

Upper-Level Entry Requirements

Admission to the upper-level major of MISY requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

Program Requirements

¹ Refer to the specific major notes below for variations from the Business (lower level) requirements.

² MATH 148, MATH 152, MATH 168 and MATH 172 will be accepted in lieu of MATH 140.

³ For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree." (p. 32)

⁴ MATH 147, MATH 151 and MATH 171 will be accepted in lieu of MATH 142.

⁵ STAT 211 will be accepted in lieu of BUSN 203.

Management Information Systems: Students intending to major in Management Information Systems must add ISTM 250 Business Programming Logic and Design (3 credits) to second year fall curriculum in Business (lower level). The communication elective can be taken during the third year fall.

Business Honors: Students admitted to Business Honors take BUSN 125 Business Learning Community I (3 credits) in place of BUSN 101 in the first year fall curriculum and must add BUSN 225 Business Competency (3 credits) to the second year spring curriculum in Business (lower level). The creative arts elective can be taken during the third year fall.

Finance: Students intending to major in Finance must add FINC 210 to freshman year curriculum in Business (lower-level). The general elective taken in the fourth year can be reduced by 1 credit.

¹ Students must take three semesters of ISTM 281 or ISTM 481 for a total of three credits.

² Refer to major specific paragraph on the Lower-Level Business Program (BUAD). Select from any courses with the Core Communication (KCOM) attribute.

³ This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

⁴ For those students under ROTC contract, see Requirement 7 of the 'Requirements for a Baccalaureate Degree (p. 32).'

⁵ A complete list of approved courses is available in the Undergraduate Advising Office. Three of the six required hours simultaneously fulfill the university's International and Cultural Diversity Graduation requirement.

⁶ Select in consultation with a management information systems (MISY) academic advisor. A list of acceptable courses is available in the department academic advising office.

⁷ Elective courses are open to any course offered for university credit, except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

Total Program Hours 120

Supply Chain Management - BBA

This program prepares students for careers in designing and managing the activities that deliver products and services to customers.

The Department of Information and Operations Management offers a Bachelor of Business Administration (BBA) degree in Supply Chain Management (SCMT). The SCMT major is primarily concerned with the efficient integration of suppliers, factories, warehouses, and retail outlets. Supply chain activities add direct value to the customer and thus, are extremely valuable to firms.

The SCMT program produces graduates with strong analytical and problem-solving skills and the ability to work in and coordinate team activities. Graduates possess the business, technical, and leadership skills needed to meet the challenges of the rapidly evolving global marketplace.

For more information, visit the BBA Supply Chain Management (<https://mays.tamu.edu/undergraduate/bba/supply-chain-management/>) website.

Upper-Level Entry Requirements

Admission to the upper-level major of SCMT requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

Total Program Hours 120 Department of Management

Welcome to Mays Business School's Department of Management - a distinguished leader in the field of management education and research - where tradition meets innovation in creating tomorrow's business leaders. Our globally recognized programs combine academic excellence with real-world application, preparing students to make their mark in the ever-evolving business landscape. For an inside look at our transformative community, visit the Department of Management website (<https://mays.tamu.edu/departments/management/>).

The Bachelor of Business Administration (BBA) in Management (MGMT) delivers a powerful combination of cutting-edge theory and real-world experience. Our graduates emerge ready to excel in diverse roles across Fortune 500 companies, innovative consulting firms, dynamic startups, impactful nonprofits, and government agencies. This versatile degree opens doors to countless opportunities while providing the robust foundation that employers value and families trust for their student's future success.

In our program, students develop essential leadership capabilities that set them apart in the marketplace. Through immersive experiences, they master the art of strategic thinking, effective communication, and collaborative leadership – skills that remain valuable throughout their entire careers.

Our students choose from four powerful specialization tracks, each designed to align passion with purpose:

- *Consulting and General Management* - Transform organizations through strategic problem-solving and innovative solutions. Whether working with established consulting firms or leading corporate initiatives, you'll drive positive change across industries.
- *Entrepreneurial Leadership* - Unleash your innovative spirit and learn to build successful ventures from the ground up. Master the tools of entrepreneurship while developing the leadership skills to inspire teams and drive growth.
- *Human Resource Management* - Shape the future of work by becoming a strategic partner in talent management. Learn to build and lead high-performing organizations while developing initiatives that drive both employee success and business results.
- *Pre-Law* - Bridge the worlds of business and law in this distinctive track. Prepare for leadership roles in corporate compliance, public policy, or advanced legal studies while developing a valuable foundation in business principles.

The BBA MGMT program offers both immediate career advantages and long-term professional growth potential. Whether launching directly into a rewarding career or pursuing advanced degrees, our graduates

¹ This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

² For those students under ROTC contract, see Requirement 7 of the 'Requirements for a Baccalaureate Degree (p. 32)'.

³ Select in consultation with a supply chain management academic advisor. A list of acceptable courses is available in the department academic advising office.

⁴ A complete list of approved courses is available in the Undergraduate Advising Office. Three of the six required hours simultaneously

enter the next phase of their journey with confidence, competence, and connections that last a lifetime.

Management - BBA, Consulting/General Management Track

This program is designed for students interested in problem-solving and helping individuals or organizations navigate the business environment.

Transform your passion for business into impactful solutions with a Bachelor of Business Administration (BBA) in Management. Our dynamic program empowers future leaders with cutting-edge knowledge and essential professional skills needed to thrive in today's rapidly evolving business landscape. Students customize their educational journey by choosing from four specialized tracks aligned with their career aspirations.

The BBA Management - Consulting and General Management track opens doors to endless possibilities for ambitious problem-solvers and strategic thinkers. Whether you dream of joining a consulting firm or leading organizations from within, this track prepares you to tackle real-world business challenges head-on. Through our innovative curriculum, you'll develop advanced analytical and strategic thinking skills while learning to identify opportunities that drive organizational success. You'll emerge ready to guide businesses through complex decisions, implement transformative solutions, and make a lasting impact in any industry you choose to pursue.

Management - BBA, Entrepreneurial Leadership Track

This program is designed for students interested in learning the entrepreneurial process and the role of creativity in identifying and/or developing entrepreneurial opportunities.

Unleash your entrepreneurial spirit with a Bachelor of Business Administration (BBA) in Management. Our innovative program equips tomorrow's business leaders with cutting-edge knowledge and essential professional skills needed to thrive in today's dynamic business landscape. Students chart their own path to success by choosing from four specialized tracks aligned with their professional aspirations.

The BBA Management - Entrepreneurial Leadership track is your launchpad to entrepreneurial success, whether you dream of launching (or growing) your own venture or driving innovation within established organizations. Through our immersive curriculum, you'll master the art of opportunity recognition, harness creative problem-solving, and develop the leadership skills essential for building thriving enterprises. From crafting compelling business plans to leading high-performing teams, you'll gain hands-on experience in every aspect of entrepreneurial leadership. Graduate ready to transform your innovative ideas into successful ventures, inspire others to achieve their potential, and make your mark in the business world.

Management - BBA, Human Resource Management Track

This program is designed for students interested in learning how HR professionals develop and implement workplace policies and initiatives regarding employee recruiting, selection, compensation, training &

development, performance management, career planning, and employee & labor relations.

Chart your path to becoming a strategic people leader with a Bachelor of Business Administration (BBA) in Management. Our comprehensive program equips tomorrow's business leaders with cutting-edge knowledge and essential professional skills needed to excel in today's evolving workplace. Students customize their educational journey by choosing from four specialized tracks aligned with their career aspirations.

The BBA Management - Human Resource Management track empowers you to become a catalyst for organizational success by mastering the art and science of talent management. Through our innovative curriculum, you'll develop expertise in creating dynamic workplace cultures, attracting top talent, and nurturing employee potential. From designing competitive compensation packages to implementing strategic development programs, you'll learn to align human capital with organizational goals. Graduate ready to shape the future of work, drive organizational transformation, and build thriving workplace communities that give companies their competitive edge in today's global marketplace.

Upper-Level Entry Requirements

Admission to the upper-level major of management (MGMT) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

Management - BBA, Pre-Law Track

This program is designed to expose students to opportunities that combine law and business, preparing them for careers in corporate law, international affairs, public policy, conflict resolution, and more.

Forge a powerful intersection between business and law with a Bachelor of Business Administration (BBA) in Management. Our innovative program equips future leaders with sophisticated knowledge and professional skills needed to excel in today's complex business-legal landscape. Students tailor their educational journey by choosing from four specialized tracks aligned with their professional aspirations.

The BBA Management - Pre-Law track opens doors to a world where business acumen meets legal expertise. This distinctive program prepares you to navigate the intricate relationship between commerce and law, whether your ambitions lead you to corporate law, international business, public policy advocacy, or dispute resolution. Through our

rigorous curriculum, you'll develop critical thinking, analytical reasoning, and strategic decision-making skills valued by top law schools and employers alike. Graduate ready to pursue advanced legal education or launch directly into careers where business and legal knowledge create unique competitive advantages in fields ranging from regulatory compliance to international trade negotiations.

Department of Marketing

The Department of Marketing at the Mays Business School is a distinguished leader in the field of marketing education and research. Our programs and curricula receive global recognition for their strength and continued contributions to the field of marketing. For more information visit the Department of Marketing (<https://mays.tamu.edu/departments-of-marketing/>) website.

Marketing involves developing goods and services to satisfy customers' needs and then making them available at the right places, at the right times and at competitive prices. Marketing also provides information to help customers decide whether specific goods and services will meet their needs.

Recent changes in social and economic systems have created new challenges for marketing professionals. Increasingly, they must focus on both domestic and global opportunities and the explosive changes that new technology brings. They must also be continually responsive to cultural differences, quality concerns and ethical issues.

The Bachelor of Business Administration (BBA) in Marketing prepares students to work effectively in corporate and nonprofit organizations that are part of a global economy. Marketing students will be proficient in marketing analytics, digital marketing, customer experience management, creativity, and brand management. Students completing a degree in marketing choose among five tracks: advertising strategy, analytics and consulting, healthcare marketing, professional selling and sales management, and strategic retailing. A career path in marketing typically begins in an entry-level position in advertising, retailing, marketing analytics, marketing consulting, professional selling, or

healthcare marketing. Opportunities are available in manufacturing, wholesale and retail, as well as nonprofit organizations such as universities, government agencies, relief agencies and charitable organizations.

Success in marketing requires understanding a number of fundamental concepts, principles, theories, tools and techniques. Courses are designed to help students acquire this knowledge and to develop competencies needed throughout a marketing career.

Marketing - BBA, Advertising Strategy Track

This program prepares students for careers in advertising account services, brand management, or related fields like media planning and public relations.

The Bachelor of Business Administration (BBA) in Marketing prepares students to work effectively in corporate and nonprofit organizations that are part of a global economy. Marketing students will be proficient in marketing analytics, digital marketing, customer experience management, creativity, and brand management.

The BBA Marketing (MKTG) Advertising Strategy track offers students interested in advertising several opportunities for building skills specific to this career path, and for networking with advertising professionals. In addition to taking advertising courses, students can attend professional conferences, participate in local, regional, and national advertising campaign competitions, and tour top advertising agencies.

The BBA MKTG Advertising Strategy track supplements the degree by tailoring directed elective courses and building specific advertising skills. Also, it provides recruiters a means of identifying top students interested in advertising.

Upper-Level Entry Requirements

Admission to the upper-level major of marketing (MKTG) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

Marketing - BBA, Analytics and Consulting Track

This program prepares students for careers in marketing analytics and consulting across various domains.

The Bachelor of Business Administration (BBA) in Marketing prepares students to work effectively in corporate and nonprofit organizations that are part of a global economy. Marketing students will be proficient in marketing analytics, digital marketing, customer experience management, creativity, and brand management.

The BBA Marketing (MKTG) Analytics and Consulting track offers students interested in analytics and consulting several opportunities for building skills specific to this career path, and for networking with analytics and consulting professionals. In addition to taking courses geared to analytics and consulting, students can attend professional conferences and participate in local, regional, and national consulting competitions.

The BBA MKTG Analytics and Consulting track complements the student's degree and provides tangible evidence of rigorous academic and experiential preparation for a career in analytics or consulting. The curriculum emphasizes project-based learning with client-based organizations.

Students who complete the BBA MKTG Analytics and Consulting degree program are well-prepared to work in marketing analytics or consulting positions for marketing, information systems, or organizational structure.

Upper-Level Entry Requirements

Admission to the upper-level major of marketing (MKTG) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

¹ This course is an approved writing-designated (W) or oral communication (C) business course. See your academic advisor for additional information.

² For those students under ROTC contract, see Requirement 7 of the "Requirements for a Baccalaureate Degree (p. 32)."

³ Directed elective. Required courses MKTG 430, MKTG 431 and MKTG 438.

⁴ Six hours required. A complete list of approved courses is available in the Undergraduate Advising Office. Three of the six hours of approved international elective courses simultaneously fulfill the university's International and Cultural Diversity Graduation requirement.

⁵ Three hours required. Any MKTG course (except required MKTG courses and MKTG 409) and IBUS 401-403 (p. 1089).

⁶ General electives are any courses offered for university credit except ACCT 209, ACCT 210, FINC 409, IBUS 301, ISTM 209, MGMT 209, MGMT 309, MKTG 409, SCMT 309. Additional restrictions may apply; see academic advisor for information. May be taken on a satisfactory/unsatisfactory basis.

Marketing - BBA, Healthcare Marketing Track

This program prepares students with the skills needed for roles in healthcare marketing, focusing on service quality and healthcare technology.

The Bachelor of Business Administration (BBA) in Marketing prepares students to work effectively in corporate and nonprofit organizations that are part of a global economy. Marketing students will be proficient in marketing analytics, digital marketing, customer experience management, creativity, and brand management.

The BBA Marketing (MKTG) Healthcare Marketing track complements the student's degree and provides tangible evidence of rigorous academic and experiential preparation for a career in healthcare marketing. The curriculum emphasizes healthcare service quality, the business of healthcare, and healthcare technology.

Upper-Level Entry Requirements

Admission to the upper-level major of marketing (MKTG) requires satisfactory completion of specific coursework. To review requirements and application procedures see Upper-Level Entry Requirements and Application Procedures (p. 497).

Marketing - BBA, Professional Selling and Sales Management Track

This program prepares students for diverse roles in sales and marketing, with enhanced communication skills and extensive networking opportunities.

The Bachelor of Business Administration in Marketing (BBA MKTG) prepares students to work effectively in corporate and nonprofit organizations that are part of a global economy. Marketing students will be proficient in marketing analytics, digital marketing, customer experience management, creativity, and brand management.

Students who are looking to expand their communication and relationship-building skills should consider the BBA MKTG Professional Selling and Sales Management track. Students in this program take three sales-related directed electives that provide real-world scenarios and role-plays that help them build skills that are critical for a successful career in sales and marketing.

In addition to taking sales courses, students in the BBA MKTG Professional Selling and Sales Management track benefit from the many opportunities offered by the Reynolds and Reynolds Sales Leadership Institute which is part of the Department of Marketing at Mays Business School. The Sales Leadership Institute provides students opportunities to explore different careers in sales, to learn and hone the skill set that will differentiate them in the workforce, and to network with sales professionals in a wide range of roles and industries. Students will have opportunities to attend professional conferences, participate in local, regional, national, and international sales competitions, and network with sales partners.

Students completing the BBA MKTG Professional Selling and Sales Management degree will have enhanced their interpersonal communication skills in a business environment, giving them a distinct advantage in the job market regardless of the planned career path.

Marketing - BBA, Strategic Retailing Track

This program prepares students for careers in management, merchandising, retail financial planning, and marketing.

The Bachelor of Business Administration (BBA) in Marketing prepares students to work effectively in corporate and nonprofit organizations that are part of a global economy. Marketing students will be proficient in marketing analytics, digital marketing, customer experience management, creativity, and brand management.

The BBA Marketing (MKTG) Strategic Retailing track offers students interested in retail several opportunities for building skills specific to this career path and for networking with retailing professionals. In addition to taking retail courses, students can attend professional conferences, and participate in regional and national retailing campaign competitions.

The BBA MKTG Strategic Retailing track supplements the degree by tailoring directed elective courses and building specific retailing skills. Also, it provides recruiters with a means of identifying top students interested in retailing. Completion of the program provides tangible evidence of commitment to and expertise in retailing.

The Center for Retailing Studies is a nationally known and respected center that is part of the Department of Marketing in Mays Business School at Texas A&M University. The Center is a bridge between the academic and business community, and serves students, faculty, and partner firms in a variety of ways, one of which is the Strategic Retailing track of the BBA in Marketing.

Upper-Level Entry Requirements

University Studies

The Bachelor of Science in University Studies is offered by Texas A&M University.

Students who earn a Bachelor of Science (BS) in University Studies are able to tailor their undergraduate coursework to align with future personal and career objectives. Specific requirements, course offerings, and restrictions exist for the University Studies-Business degree.

The University Studies-Business curriculum consists of a 24 credit hour business concentration and two minors of 15 to 18 hours each. The degree program offers a number of unique features and benefits:

- **Foundational knowledge:** The business concentration provides students with a firm grasp of the basic aspects of business including accounting, finance, management, management information systems, marketing and supply chain management.
- **Interdisciplinary study:** Students pursue two minors that involve coursework in other Texas A&M colleges and departments. Students are encouraged to identify minors that complement the business concentration and reflect their individual interests and strengths.
- **Flexibility for the future:** Students who earn this degree find they have flexible options after graduation since they are prepared to pursue a wide range of careers and graduate programs.

Careers pursued by University Studies-Business graduates include financial advisor, account manager, marketing coordinator, sales representative, web developer, public relations specialist, consultant, and human resource specialist.

Majors

- Bachelor of Science in University Studies, Business Concentration (p. 541)

University Studies - BS, Business Concentration

This program enables students to tailor their undergraduate coursework to align with future personal and career objectives.

Specific requirements, course offerings, and restrictions exist for the Bachelor of Science (BS) in University Studies degree. The degree program offers a number of unique features and benefits:

Foundational knowledge: The business concentration provides students with a firm grasp of the basic aspects of business including accounting, finance, management, management information systems, marketing and supply chain management.

Interdisciplinary study: Students pursue two minors that involve coursework in other Texas A&M colleges and departments. Students are encouraged to identify minors that complement the business concentration and reflect their individual interests and strengths.

¹ Two university approved minors are required for this degree program. The minors must be completed in colleges other than Mays Business School. Includes the 30-36 hours used to satisfy the two minor requirements.

² 21-27 hours selected from any 100-499 course not used elsewhere.

³ Enrollment of University Studies majors in courses offered at Mays Business School is limited to the required business concentration courses plus the following courses to be used as electives: ACCT 210, BUSN 481, and MGMT 312.

⁴ This course is an approved writing-designated (UWRT) business course. See your academic advisor for additional information.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) coursework and 3 hours of Cultural Discourse (p. 48) coursework. A course satisfying a core category, a college/department requirement, or a general elective can be used to satisfy this requirement. See academic advisor.

COLLEGE OF DENTISTRY

Administrative Officers

- Dean – Lily T. García, DDS, MS
- Associate Dean, Academic Affairs – Douglas J. Gould, PhD, FAAA
- Associate Dean, Clinical Affairs – Jennifer J. Barrington, DDS
- Associate Dean, Faculty Affairs - Lisa F. Mallonee, MPH
- Associate Dean, Graduate and Professional Programs - Reginald W. Taylor, DMSc, DMD
- Associate Dean, Research - Chunlin Qin, PhD, DDS, MS
- Associate Dean, Student Affairs - Ernestine S. Lacy, DDS, MA
- Assistant Dean, Finance - Sarah Barron, MEd
- Interim Director, Recruitment and Admissions - Alicia M. Spence, DDS

General Statement

The College of Dentistry has been a distinguished resource for dental education in Texas for more than 100 years and is dedicated to combining higher education and research with community service.

Known internationally for producing excellent clinicians, the college opened in 1905. Since then, it has graduated more than 8,000 dentists and dental hygienists. Nearly one-third of all dentists in Texas are College of Dentistry graduates. The college also graduates a large number of dental hygienists with bachelor's degrees in the state. In addition to a doctor of dental surgery and bachelor's degree in dental hygiene, postdoctoral certificate and degree programs are offered.

Today, the college works toward innovative treatments, leading-edge technology, and better ways to deliver care. It not only ensures that Texas has qualified generations of dentists, dental hygienists, and scientists, but also provides care for patients who have no other access to oral health care.

This program prepares students for the opportunity to pursue an occupational license. Please refer to the Notification for Students Pursuing an Occupational License in our catalog for additional information. If you are unsure if your program is affected by the recent approval of this new law (HB 1508), you will need to contact the accrediting agency and inquire.

Location

The College of Dentistry is located in Dallas, Texas, adjacent to the rapidly expanding Baylor University Medical Center. The Dallas-Fort Worth metroplex is an area noted for the vigor, optimism, and friendliness of its population. The ever-changing skyline reflects the continuing growth of the area.

Opportunities for educational, cultural, and religious enrichment are numerous. Within a 100-mile radius of Dallas are more than 40 colleges and universities. Dallas has a professional theater, opera, symphony, and dance companies. Among the many museums and galleries in the area, the Dallas Museum of Art has received international acclaim for both its design and its exhibits.

For sports enthusiasts, Dallas has professional and college football, basketball, baseball, hockey, and soccer teams. The metroplex annually hosts competitions in golf, tennis, bowling, soccer, and running that attracts many of the world's best athletes. Numerous lakes and parks

provide recreational opportunities for boating, fishing, swimming, jogging, biking, and horseback riding.

Dallas is served by a variety of transportation modes, including several interstate highways, the Amtrak rail system, and the Dallas Area Rapid Transit system. The Dallas/Fort Worth International Airport, with many major and feeder airline connections, is one of the busiest air terminals in the nation. Airline connections also can be made at nearby Love Field, which is a 20-minute car ride from the college.

The College of Dentistry is centrally located in the city of Dallas, about one mile east of the downtown business district. This is an area where restored historic homes and varied types of new construction create diverse neighborhoods. The Texas State Fairgrounds and the downtown arts district, with its world-class performance halls and art museum, help make this part of Dallas an exciting place to live and work. Living accommodations are located as close as one block from the campus.

Caruth School of Dental Hygiene

The Caruth School of Dental Hygiene is an integral part of the College of Dentistry. The dental hygiene program was equipped in 1954 through a generous gift from the Caruth Foundation of Dallas and W.W. Caruth, Jr., in honor of W.W. Caruth, Sr., a pioneer Texas philanthropist.

The first dental hygiene students were accepted in fall 1955. At that time, there was no requirement for previous college experience. In 1964, the Caruth School of Dental Hygiene established prerequisite courses prior

to professional study. During the same year, the Bachelor of Science degree was offered in addition to the traditional certificate program. All graduates since 1973 have received the degree of Bachelor of Science in Dental Hygiene. In 1997, the Master of Science degree was added.

Purpose

The purpose of the Caruth School of Dental Hygiene is to educate preventive oral health professionals, eligible for licensure as dental hygienists, who are capable of providing educational, clinical and therapeutic services that support total health through the promotion of optimal oral health.

Opportunities

The services of a dental hygienist are offered in private dental practices and clinics, public health agencies, school systems, hospitals, nursing homes and corporate health facilities. Dental hygienists also teach in dental and dental hygiene programs and participate in health research. The baccalaureate degree offered through the Caruth School of Dental Hygiene by the College of Dentistry satisfies the educational requirement for eligibility for state licensure. Graduates are provided with diverse experiences to prepare for a variety of employment settings and to pursue graduate education. A Master of Science in Education for Healthcare Professionals with a focus in dental hygiene is also offered.

This program prepares students for the opportunity to pursue an occupational license. Please refer to the Notification for Students Pursuing an Occupational License (p. 1416) in our catalog for additional information.

Dental Hygiene - BS

Dental Hygiene is an exciting career choice for anyone interested in promoting oral health. A dental hygienist is a licensed preventive oral health professional who provides educational, clinical and therapeutic services supporting total health through the promotion of optimal oral health.

The Caruth School of Dental Hygiene is dedicated to delivering the most innovative techniques for educating future dental hygienists, as well as provide respectful public clinical services with the utmost integrity and ethical standards. The program fosters a sense of community, embraces a diverse group of students and faculty, and supports personal growth. The Caruth School of Dental Hygiene is committed to being a national leader in dental hygiene education and with that our school takes pride in the students who choose to maintain a high level of diligence, are dedicated, and achieve success within our program.

The goals of the Dental Hygiene Program are:

- The curricular program will support student competency and prepare them for dental hygiene practice.
- The Dental Hygiene program facilitates student learning.
- The Dental Hygiene faculty will demonstrate participation in teaching, service and scholarly activity.
- The Dental Hygiene students will provide quality care to patients.

Dental hygiene offers an excellent opportunity to serve the community. The services of a dental hygienist are offered in private dental practices and clinics, public health agencies, school systems, hospitals, nursing homes and corporate health facilities. Dental hygienists also teach in dental and dental hygiene programs and participate in health research. The baccalaureate degree offered through the Caruth School of Dental Hygiene by Texas A&M University College of Dentistry satisfies the educational requirement for eligibility for state licensure. Graduates are provided with diverse experiences to prepare for a variety of employment settings and to pursue graduate education.

Registered dental hygienists assess a patient's oral condition in order to offer patient-specific preventive and educational services. In addition to providing tailored treatment plans, dental hygienists motivate their patients to understand and improve their current oral conditions. A major role of a dental hygienist is to perform periodontal therapy which includes evaluating the current state of the oral cavity through periodontal charting and providing treatment based upon the health of the gingival tissues and surrounding periodontium.

This program in dental hygiene is accredited by the Commission on Dental Accreditation and has been granted the accreditation status of "approved without reporting requirements." The Commission is a specialized accrediting body recognized by the United States Department of Education. The Commission on Dental Accreditation can be contacted at (312) 440-4653 or at 211 East Chicago Avenue, Chicago, IL 60611-2678. The Commission's web address is <https://coda.ada.org/en> (<https://coda.ada.org/en>).

The length of the program is two years. Application deadline is January 5 of the year of anticipated entrance into the program with a start term in the Fall.

The BS in Dental Hygiene is offered in Dallas, Texas.

Program Requirements

Coursework totaling 60 semester credit hours, including core courses for BS degree.

Third Year

Fall		Semester Credit Hours
DDHS 3110	Introduction To Dentistry	1
DDHS 3120	Dental Anatomy	2
DDHS 3160	Preclinical Dental Hygiene	6
DDHS 3220	Oral Radiology	
DDHS 3250	Biomedical Sciences I	5
DDHS 3425	Health Promotion and Disease Prevention	2.5
Semester Credit Hours		16.5

Spring

DDHS 3020	Theory of Dental Hygiene Practice I	2
DDHS 3220	Oral Radiology	2

DDHS 3340	Biomedical Sciences II	4
DDHS 3310	Health Education and Behavioral Science	1
DDHS 3410	Introduction to Pathology	1
DDHS 3325	Microbiology	2.5
DDHS 3530	Applied Dental Materials	3
DDHS 3830	Clinical Dental Hygiene I	3

Semester Credit Hours 18.5

Summer

DDHS 4110	Medical Emergencies	1
DDHS 4220	Comprehensive Care Seminar ¹	2
DDHS 4310	Oral Radiography ¹	1
DDHS 4510	Pediatric Dentistry	1
DDHS 4820	Clinical Dental Hygiene II	2

Semester Credit Hours 7

Fourth Year

Fall

DDHS 4015	Pharmacology	1.5
DDHS 4025	Oral Pathology	2.5
DDHS 4110	Medical Emergencies ¹	
DDHS 4140	Clinical Dental Hygiene III	4
DDHS 4210	Professional Ethics	1
DDHS 4220	Comprehensive Care Seminar	
DDHS 4310	Oral Radiography (continued) ¹	
DDHS 4410	Gerontology	1
DDHS 4530	Public and Community Health	
DDHS 4610	Periodontics	1
DDHS 4620	Theory of Dental Hygiene Practice II	2
DDHS 4715	Research Methods	1.5

Semester Credit Hours 14.5

Spring

DDHS 4010	National Board Review	1
DDHS 4220	Comprehensive Care Seminar	
DDHS 4240	Clinical Dental Hygiene IV	4
DDHS 4310	Oral Radiography (continued) ¹	
DDHS 4320	Perspectives in Dental Hygiene	2
DDHS 4530	Public and Community Health	3
DDHS 4710	Applied Research Methods	1
DDHS 4810	Local Anesthesia and Nitrous Oxide/ Oxygen Sedation	1

Semester Credit Hours 12

Total Semester Credit Hours 68.5

COLLEGE OF EDUCATION AND HUMAN DEVELOPMENT

Administrative Officers

Dean - Michael de Miranda, PhD

Senior Associate Dean for Academic Affairs - Beverly Irby, EdD

Associate Dean for Undergraduate Academic Affairs - Christopher Cherry, PhD

Associate Dean for Research - James Fluckey, PhD

Associate Dean for Faculty Affairs - Dalun Zhang, PhD

Assistant Dean for Finance and Business Services - Jill Hobbs

General Statement

The College of Education and Human Development is dedicated to transforming and enriching lives with programs built on the core Aggie values of leadership, excellence, integrity, loyalty, respect and selfless service.

Consistent with the land grant mission of our university, the teaching, research and service activities of the college foster innovation and development, influence policy and practice, and transform the lives of individuals in our state and across the nation. With outstanding faculty and students, the college creates a community of scholars who impact the world. Its faculty provide innovative, high-impact educational experiences with an emphasis on transformational learning opportunities.

The college has a history of preparing high-quality teachers and administrators and is consistently among the leading institutions in the state for producing the highest number of certified teachers in high-need areas. It continues this tradition of preparing professionals and leaders in education, sport, business, government, and kinesiology through programs in four academic departments: Educational Administration and Human Resource Development (EAHR), Educational Psychology (EPSY), Kinesiology and Sport Management (KNSM), and Teaching, Learning and Culture (TLAC).

The college manages programs for the preparation of certified school personnel as well as human service professionals in the private sector, state and community agencies. Undergraduate majors include education leading to certification in early childhood, early childhood through sixth grade, middle grades, bilingual and special education; human resource development; kinesiology; and sport management. Students interested in any programs should meet with a college advisor regarding all program options.

Requirements for Admission to Teacher Education Programs

The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, College of Education and Human Development and department/program requirements for matriculation into a teacher education program. Students are responsible for contacting the departmental advisors

to obtain information about specific requirements for their major and program areas.

Teacher Education Retention Policy

A student, after being admitted to teacher education, who fails to continue to meet all requirements, will be dropped from the program and may not continue in or register for any professional teacher education course. Any student removed from or who discontinues student teaching because of unsatisfactory performance will be dropped from the teacher education program. A student dropped from the teacher education program may apply through their respective department for readmission to the teacher education program.

Majors

Department of Educational Administration and Human Resource Development

- Bachelor of Science in Human Resource Development (p. 549)
- Bachelor of Science in Learning Technology and Performance Systems (p. 550)

Department of Educational Psychology

- Bachelor of Science in Education, Bilingual Education-EC6 (p. 555)
- Bachelor of Science in Education, Special Education-EC12 (p. 556)
- Bachelor of Science in Human Development and Family Sciences (p. 557)

Department of Kinesiology and Sport Management

- Bachelor of Science in Kinesiology, Exercise and Sport Science Track (p. 563)
- Bachelor of Science in Kinesiology, Exercise Science Track, Applied Exercise Physiology Concentration (p. 564)
- Bachelor of Science in Kinesiology, Exercise Science Track, Basic Exercise Physiology Concentration (p. 566)
- Bachelor of Science in Kinesiology, Exercise Science Track, Motor Behavior Concentration (p. 567)
- Bachelor of Science in Kinesiology and Master of Science in Athletic Training, 5-Year Degree Program (p. 568)
- Bachelor of Science in Sport Management (p. 570)

Department of Teaching, Learning and Culture

- Bachelor of Science in Early Childhood Development and Education, Leadership Track (p. 575)
- Bachelor of Science in Early Childhood Development and Education, Teaching (Non-Licensure) Track (p. 576)
- Bachelor of Science in Education, Early Childhood-3 Certification (p. 577)
- Bachelor of Science in Education, English Language Arts/Social Studies, Middle Grades Certification (p. 578)
- Bachelor of Science in Education, Math/Science, Middle Grades Certification (p. 579)
- Bachelor of Science in Education, Pre-K-6, Generalist Certification (p. 580)

Certification

- Secondary Graduate Certification Program (p. 582)

Minors

Department of Educational Administration and Human Resource Development

- Human Resource Development Minor (p. 552)
- Learning Technology and Performance Systems Minor (p. 552)

Department of Educational Psychology

- Creative Studies Minor (p. 558)
- Educational Supports for Individuals with Disabilities Minor (p. 559)

Department of Kinesiology and Sport Management

- Coaching Minor (p. 571)
- Sports Management Minor (p. 571)

Department of Teaching, Learning and Culture

- Secondary Education - Clinical Teaching Minor (p. 581)
- Secondary Education Minor (p. 582)

Certificates

Department of Educational Psychology

- Interdisciplinary Studies Certificate (p. 559)

Department of Educational Administration and Human Resource Development

The Department of Educational Administration and Human Resource Development prepares people for many professional careers associated with the broad fields of corporate education. The Bachelor of Science in Human Resource Development is designed to encourage students to achieve a bachelor's degree and to enter the profession in their area of specialty. The programs prepare graduates to assume responsibility for enhancing technology, developing workplace competence and strengthening student achievement in their career paths.

Human Resource Development - BS

The curricula for Human Resource Development provides students with the content and course sequence to enter the workforce in either education, business or industry.

This program stresses application in real settings as well as strong foundations in knowledge, and has strong field-based components. The courses have been combined to give students a well-rounded foundation in the roles and responsibilities in education and business settings.

This program is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

Program Requirements

¹ MATH 148, MATH 152, MATH 168, and MATH 172 will be accepted in lieu of MATH 140.

² MATH 147, MATH 151, and MATH 171 will be accepted in lieu of MATH 142.

³ Must make a grade of C or better.

⁴ To be chosen in consultation with academic advisor, if necessary.

⁵ Writing or Communication Intensive course requirement.

⁶ Professional Phase.

Students must have completed 60 hours to register for 300- or 400-level courses.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences, creative arts, language, philosophy and culture, or electives.

Foreign Language Requirement - 2 years of the same foreign language in high school or 1 full year (2 semesters) of the same foreign language in college.

Learning Technology and Performance Systems - BS

The Learning Technology and Performance Systems (LTPS) program focuses on the profound importance of connecting people, information and technology from a multidisciplinary perspective for the betterment of society.

The students of the Learning Technology and Performance Systems program can expect to obtain integrated knowledge of human development, management, and technology competencies within a dynamic and rapidly evolving environment through innovative learning.

The Bachelor of Science degree in Learning Technology and Performance Systems will inculcate students with the knowledge, skills, abilities, and attitudes to leverage technology opportunities in all organizations.

The BS LTPS program will provide students with in-depth knowledge, hands-on experience, and practical skills of managing information technology and developing IT personnel to achieve organizational goals. Through our program, graduates will:

- Gain in-depth knowledge that covers the full spectrum of information technology, including database, networking, systems administration, data analytics, and information security
- Obtain hands-on experience with a wide variety of technical tools commonly used in today's IT industry
- Understand the human decision making process and managerial implications when interacting with information technology

- Learn practical skills of managing the various technology, human, and business components in an organizational environment to achieve goals

Our strong internship program provides graduates with direct experience in the development and management of information technology in a real-world organizational environment. These internships are designed to match the backgrounds and career interests of students.

The program could lead to a wide variety of careers in IT/data analytic fields, such as:

- IT Support
- Business Analyst
- Data analyst
- User Experience Technologist
- Information Security Analyst

Program Requirements

First Year

Total Semester Credit Hours		120

¹ MATH 147, MATH 151, and MATH 171 will be accepted in lieu of MATH 140.

² Must make a grade of C or better.

³ MATH 148, MATH 152, MATH 168, and MATH 172 will be accepted in lieu of MATH 142.

⁴ Must be taken on a satisfactory/unsatisfactory basis.

⁵ Consult with an advisor, select from any 100-499 course not used elsewhere.

Students must have completed 60 hours to register for 300- to 400-level courses.

Three hours of International and Cultural Diversity (p. 49) and three hours of Cultural Discourse (p. 48) are required. Selection must be from courses on the approved list. Selection can be courses that also satisfy the requirement for social and behavioral sciences, creative arts, language, philosophy and culture, or electives.

Foreign Language Requirement - two years same foreign language in high school OR one full year (two semesters) of same foreign language in college.

Human Resource Development - Minor

Human Resource Development (HRD) is the process of improving learning and performance in individual, group and organization contexts through domains of expertise such as lifelong learning, career development, training and development, and organization development. A minor in HRD allows for a wider range of potential employment and accommodation to a diverse education professional experience.

Please refer to the website <https://eahr.tamu.edu/> for information, requirements, and application deadlines for adding the minor.

Program Requirements

Code	Title	Semester Credit Hours
EHRD 203	Foundations of Human Resource Development	3
EHRD 210	Legal and Ethical Environment of Human Resource Development	3
EHRD 372	Learning and Development in HRD	3
EHRD 374	Organizational Development	3
Select 6 credit hours from the following:		6
EHRD 315	Applied Human Resource Development in the Workplace	
EHRD 371	Applied Learning Principles ¹	
EHRD 405	Principles and Practices of Leadership in Human Resource Development and Technology Management	
EHRD 408	Globalization and Diversity in the Workplace	
EHRD 413	Conflict Management and Dialogue

¹ Writing or Communication Intensive course.

Students must make a grade of C or better in each course taken towards the minor.

Students must have completed 60 hours to register for 300/400-level courses.

Minimum required GPA to declare minor is a 2.5.

Achieve overall GPA of 2.5 in approved minor coursework. Student must enroll after completing 12 hours at Texas A&M and a maximum of 75 hours total.

Learning Technology and Performance Systems - Minor

The Learning Technology and Performance Systems Minor is designed to provide the knowledge and skills to succeed in a variety of roles using technology applications. The minor allows for a wider range of potential employment and accommodation to a diverse education and professional experience.

Program Requirements

Code	Title	Semester Credit Hours
ITSV 272	Foundations of Information Technology Management	3
ITSV 274	Foundations of Networking	3
Select three from the following:		9
ITSV 303	Unix System Administration Practices	
ITSV 308	Cybersecurity and Digital Ethics	
ITSV 316	Database Systems Administration and Application	
ITSV 412	Contemporary Issues in Technology Management	
TCMG 476	Technical Network Capstone	
Total Semester Credit Hours		15

Minimum required GPA to declare minor is a 2.5.

Obtain a C or better in each courses taken towards minor

Achieve overall GPA of 2.5 in approved minor coursework.

Students must enroll after completing 12 hours at Texas A&M and a maximum of 75 hours total.

Department of Educational Psychology

The Department of Educational Psychology offers a Bachelor of Science (BS) degree in Education with teacher certification concentrations in Bilingual Education or Special Education. The department currently has two minors: 1) Creative Studies focuses on developing and growing one's creative thinking ability for personal and professional situations, and 2) Educational Supports for Individuals with Disabilities provides students with increased knowledge of supporting individuals with disabilities in school and community settings. Students interested in EPSY should contact the EPSY undergraduate advisor in Harrington Tower.

Requirements for Admission to Professional Phase

The undergraduate curricula in the Department of Educational Psychology are composed of two phases: the pre-professional phase

and the professional phase. Upon acceptance into the department, all students enter the pre-professional phase. The pre-professional phase consists of University Core Curriculum requirements and introductory courses to the major field of study. After successful completion of these requirements, students are eligible to apply for admission into the professional phase. Cohorts in bilingual and special education are limited in number and students are admitted on a competitive basis; meeting the minimum program prerequisites does not guarantee admission to the professional phase. The professional phase consists of advanced work in the major field of study and professional development courses with field-based experiences.

Requirements for Admission to the Professional Phase of Teacher Education Programs

The State of Texas establishes standards for teacher education programs. All certification programs at Texas A&M are in compliance with these requirements. Students must meet state, University, college and department/program requirements for matriculation into a teacher education program. Below are the requirements for the traditional certification program. Students are responsible for contacting a departmental advisor to obtain information about specific requirements for majors and program areas, as some programs have requirements beyond those listed below. University-wide requirements for admission to teacher education include the following:

- An approved degree plan or certification and teaching field plan(s).
- Minimum GPA of 2.75 for the special education program and 2.75 for the bilingual education program based on all coursework completed at Texas A&M University. (See departmental advisor for additional grade requirements.)
- Completion of all required University core courses.
- A grade of B or higher in all certification courses. (See departmental advisor for additional grade requirements).
- Satisfaction of English proficiency requirement by:
 - Earning a grade of B or higher in ENGL 103 or ENGL 104 (or receiving credit by exam for the course); or
 - Earning a grade of B or higher in ENGL 210, ENGL 235 or ENGL 241; and
 - Earning no grade below C in any course taken in (a) or (b) above.
- Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
- Oral interview required for admission to upper level for Hispanic Bilingual Education.
- Documentation of foreign language and computer literacy requirements on file in the Texas A&M University Office of Admissions.
- Transcripts from all institutions of higher education on file in the Texas A&M University Office of Admissions.

Requirements for Admission to Student Teaching

- Successful admission to Professional Phase of Teacher Education.
- Complete Application for Clinical Teaching by the given deadlines for each semester.

- Completion of all courses listed on the degree plan. All coursework must have a grade of C or better. See departmental advisor for additional grade requirements.
- A minimum GPA of 3.0 in upper-level courses in Special Education. See departmental advisor for additional grade requirements.
- A minimum GPA of 2.75 on all coursework completed at Texas A&M. See departmental advisor for additional grade requirements.
- Satisfaction of Spanish proficiency requirements (Hispanic Bilingual Education ONLY).
 - Additionally, satisfactory performance on the written and oral Spanish proficiency component of the Hispanic Bilingual Education program admission process.

Majors

- Bachelor of Science in Education, Bilingual Education-EC-6 (p. 555)
- Bachelor of Science in Education, Special Education-EC-12 (p. 556)
- Bachelor of Science in Human Development and Family Sciences (p. 557)

Minors

- Creative Studies Minor (p. 558)
- Educational Supports for Individuals with Disabilities Minor (p. 559)

Certificates

- Interdisciplinary Studies Certificate (p. 559)

Education - BS, Bilingual Education EC-6

This program prepares teacher candidates to instruct students who are served in bilingual/ESL classes at the elementary level.

The Department of Educational Psychology (EPSY) offers an undergraduate degree program, Bachelor of Science in Education that includes certification in bilingual/ESL education and general elementary education, grades EC through 6. Classes also include a minor in Spanish. Students interested in certification should contact the EPSY undergraduate advisor in Harrington Tower or the Bilingual/ESL Undergraduate Program at undergraduate.besl@tamu.edu

Program Requirements

The following curriculum leads to the Bachelor of Science degree in Education with certification in Bilingual Education, EC-6. Students

are required to meet with their assigned academic advisor prior to registration each semester.

⁵ Must be taken S/U.

A minimum of 2.75 GPA on all coursework that applies to the degree plan and a minimum of 2.5 GPA on all coursework completed at Texas A&M is required for this degree.

Education - BS, Special Education EC-12

The Special Education program focuses on preparing teachers to instruct students with disabilities in both general education and special education settings.

The Department of Educational Psychology (EPSY) offers an undergraduate degree program, Bachelor of Science in Education, that

prepares students to become special education teachers. Completion of this program leads to teaching certifications in special education (EC through grade 12) and general education (EC through grade 6) within the constraints of the Texas Education Agency (TEA). Students interested in becoming special education teachers should contact the EPSY undergraduate advisor in Harrington Tower.

Program Requirements

The following curriculum leads to a Bachelor of Science degree in Education with certification in Special Education K-12. Students are required to meet with their assigned academic advisor prior to registration each semester.

¹ Must make a grade of C or better.

² Must make a grade of B or better.

³ Must be taken at Texas A&M University.

⁴ Depending upon your catalog, you may choose any 100 - 499 course except MATH 102 - 104. Only 1 credit KINE 199 may be used. Please consult with your academic advisor to confirm your choice.

⁵ Must be taken S/U.

A minimum of 2.75 GPA on all coursework that applies to the degree plan and a minimum of 2.5 GPA on all coursework completed at Texas A&M is required for this degree.

Human Development and Family Sciences - BS

The Bachelor of Science in Human Development and Family Sciences (HDFS) degree program will allow undergraduates to study how people develop physically, cognitively, emotionally, and socially across their life spans.

This program is geared towards individuals interested in careers that address the needs of youth ages 5-17 (grades K-12), adults, and the family unit. Upon graduation from the degree, students will be equipped to serve and optimize positive developmental outcomes and family well-being across civic, social, or educational sectors, including: family and community services, social or religious organizations, hospitals or non-profit organizations, private practice, or school systems.

Creative Studies - Minor

The Department of Educational Psychology offers a minor in Creative Studies. This minor provides students with increased knowledge and innovative thinking that can be applied to one's professional and personal life. Students interested in declaring the Creative Studies minor may seek additional information from the EPSY Undergraduate Advisor in Harrington Tower.

Program Requirements

Code	Title	Semester Credit Hours
EPSY 430	Creativity Theories and Research	3
EPSY 433	Lateral Thinking	3
Select one of the following options:		9

Option 1

Select three of the following:

ENDS 101	Design Process	
EPSY 431	Personal Creativity and Giftedness	
EPSY 432	Creativity and Creative Problem Solving	
EPSY 485	Directed Studies	

Option 2

Select two of the following:

ENDS 101	Design Process	
EPSY 431	Personal Creativity and Giftedness	

EPSY 432	Creativity and Creative Problem Solving	
EPSY 485	Directed Studies	
Select one of the following:		
ARCH 115	Visual Communication Foundations I	
ARTS 111	Drawing I	
ARTS 115	Drawing for Visualization	
ENGL 347	Writers' Workshop: Prose	
ENGL 348	Writers' Workshop: Poetry	
EPSY 459	Practicum in Educating the Gifted and Talented	
HORT 203	Floral Design	
MKTG 345	Social Media Strategy	
MKTG 442	Innovation and Product Management	
Total Semester Credit Hours		15

Educational Supports for Individuals with Disabilities - Minor

This minor provides students with increased knowledge of supporting individuals with disabilities in school and community settings.

The Department of Educational Psychology offers a minor in Educational Supports for Individuals with Disabilities (ESID). This minor does not provide teacher certification. Students interested in declaring the ESID minor may seek additional information from the EPSY Undergraduate Advisor in Harrington Tower.

Program Requirements

¹ Must make a grade of C or better.

Interdisciplinary Studies - Certificate

The Interdisciplinary Studies Certificate through the Department of Educational Psychology is designed for the Aggie ACHIEVE Program.

Aggie ACHIEVE is a four-year postsecondary program for young adults with intellectual and developmental disabilities (IDD) at Texas A&M University. Aggie ACHIEVE aims to provide an inclusive and immersive college education and equip students for employment in the community. The program aligns coursework, internship opportunities, and extracurricular activities with each student's academic interests and employment goals. Please reference the program requirements tab for information on course of study requirements for the Interdisciplinary Studies certificate. For additional information about the program, please reference the Aggie ACHIEVE website (<https://aggieachieve.tamu.edu/>).

¹ Eight zero-credit courses are required. See advisor for complete list of options.

² Five zero-credit courses are required. See advisor for complete list of options.

Department of Kinesiology and Sport Management

The department offers Bachelor of Science degrees in Kinesiology and Sport Management. Kinesiology majors can choose from a variety of tracks to best suit their professional preparation. Sport Management majors apply for a Culminating Experience and can choose between an internship, research, international experience, or capstone to support their

professional goals. All students majoring in the department are assigned an advisor in accordance with their career choice.

The curricula offer opportunities to obtain professional preparation for careers such as sport managers, clinical and applied exercise physiologists, exercise scientists, recreational leaders, sports marketing professionals, coaches, and athletic administrators. The department also provides academic preparation for students interested in athletic training and medical related professional schools, (e.g., physical therapy, occupational therapy, physicians' assistant, or medicine). Students in Kinesiology and Sport Management are provided opportunities for practical experiences as well as undergraduate research and directed studies under the guidance of experienced faculty members.

In addition to undergraduate degrees, the department offers a broad array of activity-based electives as well as core curriculum courses in Life and Physical Science; Social and Behavioral Science; Creative Arts; Language, Philosophy and Culture; and International and Cultural Diversity. The Kinesiology and Sport Management graduate program includes Master of Science and Doctor of Philosophy degrees.

Departmental Advising

Because of the wide variety of careers in Kinesiology and Sport Management and the difference in course requirements for each, it is essential for students to take advantage of the opportunity to work with their academic advisor during their time at Texas A&M. Students are assigned to an academic advisor in accordance with their degree choice and are encouraged to consult with their advisor on course sequencing and timing for completion of degree plan requirements. It is recommended for students to declare career intentions early so appropriate coursework may be planned. The advisors in the Undergraduate Advising Office (<https://education.tamu.edu/undergraduate-advising/>) handle all undergraduate advising matters. Information concerning entrance to professional schools in health-related fields is available from the Office of Professional School Advising.

Students are encouraged to become engaged in professional organizations and extracurricular activities that afford opportunities for involvement in their respective professions.

Faculty

Arrants, Courtlandt, Instructional Assistant Professor
Kinesiology & Sport Management
MS, Texas A&M University, 2023

Ballouli, Khalid W, Adjunct Assistant Professor

Majors

- Bachelor of Science in Kinesiology, Exercise and Sport Science Track (p. 563)
- Bachelor of Science in Kinesiology, Exercise Science Track, Applied Exercise Physiology Concentration (p. 564)
- Bachelor of Science in Kinesiology, Exercise Science Track, Basic Exercise Physiology Concentration (p. 566)
- Bachelor of Science in Kinesiology, Exercise Science Track, Motor Behavior Concentration (p. 567)
- Bachelor of Science in Kinesiology and Master of Science in Athletic Training 5-Year Program (p. 568)
- Bachelor of Science in Sport Management (p. 570)

Minors

- Coaching Minor (p. 571)
- Sport Management Minor (p. 571)

Kinesiology - BS, Exercise and Sport Science Track

The Exercise and Sport Science track option is offered to students wishing to pursue careers in exercise development and coaching/sport training.

The Bachelor of Science degree in Kinesiology offers several tracks designed to prepare students for a variety of careers. The track options available develop a strong science background making students excellent candidates for employment opportunities in human movement/exercise related areas (corporate or private fitness) or advanced graduate studies (motor neuroscience, kinesiology, exercise physiology). Additional program and track information is available on the Department of

Kinesiology and Sport Management website or may be obtained by contacting the advising office in the department.

This program offers a solid foundation in scientific principles related to the biology of sport, and practical knowledge in various areas of coaching (pedagogy) and exercise training, preparing students to be future coaches and trainers. Students planning to pursue a graduate degree in Exercise or Sport Science may enroll in independent study leading to an undergraduate research project.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

First Year

Fall		Semester Credit Hours
BIOL 107	Zoology ¹	4
Select one of the following: ¹		3
COMM 203	Public Speaking

Total Semester Credit Hours 120

¹ Must make a grade of C or better.

² Must meet Core Curriculum (p. 26) requirements.

³ MATH 148, MATH 152, MATH 168, or MATH 172 will be accepted in lieu of MATH 140.

⁴ Course selection should meet the International and Cultural Diversity (p. 49) (ICD) or the Cultural Discourse (p. 48) (CD) graduation requirement, if needed.

⁵ Courses must be chosen in consultation with your advisor.

⁶ MATH 147, MATH 151, or MATH 171 will be accepted in lieu of MATH 142.

⁷ Must be chosen from the following courses and in consultation with your advisor BIOL 112, BIOL 206; CHEM 119, CHEM 120; HLTH 354/PHLT 354; KINE 216/HLTH 216, KINE 325, KINE 485, KINE 491; NUTR 222, NUTR 300-499 (p. 1175); PHIL 111, PHIL 251; PHYS 202; PBSI 300-499 (p. 1184); STAT 201, or STAT 301, or STAT 302, or STAT 303; SOCI 205; SPMT 304.

⁸ Must take KINE 199 Majors Resist Flex. Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit and must be taken for a grade. Must have HKAE attribute.

⁹ Must be taken at Texas A&M University.

¹⁰ Meets Coaching Minor requirement.

¹¹ Select from the following courses KINE 312, KINE 314, KINE 317, KINE 321, KINE 334, KINE 335, KINE 345, KINE 351, KINE 353, and KINE 355.

¹² Recommend KINE 199 Majors Aerobic Movement, KINE 199 Majors Resist Flex prior to registering.

¹³ Meets Core Curriculum (p. 26) writing requirement.

Kinesiology - BS, Exercise Science Track, Applied Exercise Physiology Concentration

The Applied Exercise Physiology track prepares students to become clinical exercise physiologists working in cardiopulmonary rehabilitation programs.

The Bachelor of Science degree in Kinesiology offers several tracks designed to prepare students for a variety of careers. The track options available develop a strong science background making students excellent candidates for employment opportunities in human movement/exercise related areas (cardiac rehabilitation, corporate or private fitness), advanced graduate studies (motor neuroscience, kinesiology, exercise physiology), or professional school (physical or occupational therapy or medical and dental school). Course prerequisites are included in the various programs under all tracks to support students wishing to pursue professional school study or graduate school study. Additional program and track information is available on the Department of Kinesiology and Sport Management website or may be obtained by contacting the advising office in the department.

This program contains a strong science background making students excellent candidates for professional schools such as Physical Therapy School. Students can also prepare for immediate employment in clinical fields to include areas like cardiac and pulmonary rehabilitation, pharmaceutical sales and medical equipment sales and service. In

addition, students also train for jobs as personal trainers or corporate/private fitness specialists. This track also enables students to continue their education in fields such as Clinical Exercise Physiology, Sport Physiology and Nutrition.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

⁷ MATH 147, MATH 151, or MATH 171 will be accepted in lieu of MATH 142.

⁸ Must take Majors Majors Res/Flex. Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activity cannot be repeated for credit and must be taken for a grade.

⁹ Meets Core Curriculum (p. 26) writing requirement.

Kinesiology - BS, Exercise Science Track, Basic Exercise Physiology Concentration

The Basic Exercise Physiology track provides a background in the physical and biological sciences required for additional graduate study in Exercise Physiology or entry into medical or dental professional school.

The Bachelor of Science degree in Kinesiology offers several tracks designed to prepare students for a variety of careers. The track options available develop a strong science background making students excellent candidates for employment opportunities in human movement/exercise related areas (cardiac rehabilitation, corporate or private fitness), advanced graduate studies (motor neuroscience, kinesiology, exercise physiology), or professional school (physical or occupational therapy or medical and dental school). Course prerequisites are included in the various programs under all tracks to support students wishing to pursue professional school study or graduate school study. Additional program and track information is available on the Department of Kinesiology and Sport Management website or may be obtained by contacting the advising office in the department.

Students pursuing medical or dental school use professional directed elective hours to meet professional school entrance requirements.

Students planning to pursue a graduate degree in Exercise Physiology may enroll in independent study leading to an undergraduate research project.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

¹ Must make a grade of C or better.

² Course must meet Core Curriculum (p. 26) requirements.

³ MATH 148, MATH 152, MATH 168, or MATH 172 will be accepted in lieu of MATH 140.

⁴ Must be taken at Texas A&M University.

⁵ MATH 147, MATH 151, or MATH 171 will be accepted in lieu of MATH 142.

⁶ Course selection should meet the International and Cultural Diversity (p. 49) and/or Cultural Discourse (p. 48) graduation requirement, if needed.

⁷ To be chosen in consultation with your academic advisor. Select from BICH 411, BICH 412; BIOL 206, BIOL 213, BIOL 405, BIOL 434/NRSC 434, BIOL 454; COMM 370; GENE 310, GENE 320/BIMS 320; HLTH 240, HLTH 354/PHLT 354; KINE 216/HLTH 216, KINE 285, KINE 305, KINE 340, KINE 485, KINE 491; NUTR 202, NUTR 300-499 (p. 1175); PHIL 111, PHIL 251, PHIL 480; PBSI 300-499 (p. 1184); PBSI 225 or PBSI 307; SOCI 205; SPMT 304; VTPB 409, VTPP 425; ISTM 209 or ISTM 210.

⁸ Activities should be chosen in consultation with advisor. Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit.

⁹ Meets Core Curriculum (p. 26) writing requirement.

Kinesiology - BS, Exercise Science Track, Motor Behavior Concentration

The Motor Behavior track provides students a broad science background with special emphasis on aligning the cognitive/perceptual processes underlying human movement with the neural areas associated with those processes.

The Bachelor of Science degree in Kinesiology offers several tracks designed to prepare students for a variety of careers. The track options available develop a strong science background making students excellent candidates for employment opportunities in human movement/exercise related areas (cardiac rehabilitation, corporate or private fitness), advanced graduate studies (motor neuroscience, kinesiology, exercise physiology) or professional school (physical or occupational therapy or medical and dental school). Course pre-requisites are included in the various programs under all tracks to support students wishing to pursue professional school study or graduate school study. Additional program and track information is available on the Department of Kinesiology and Sport Management website or may be obtained by contacting the advising office in the department.

Professional directed electives allow students to obtain the prerequisites unique to the professional school of choice, physical or occupational therapy, medical or dental school. This track provides the background for students that wish to pursue graduate work in Motor Neuroscience or Human Movement Science programs. Students in this track may enroll in independent study leading to an undergraduate research project in motor behavior areas (development, learning, or control).

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

⁸ To be chosen in consultation with your academic advisor.
Select from BICH 410, BICH 411, BICH 412; BIOL 206, BIOL 213, BIOL 351, BIOL 405, BIOL 434/NRSC 434, BIOL 454; CHEM 257, CHEM 258; COMM 370; GENE 301 and GENE 312 or GENE 310 or GENE 320/BIMS 320; HLTH 354/PHLT 354; KINE 216/HLTH 216, KINE 285, KINE 305, KINE 340, KINE 485, KINE 491, NUTR 202, NUTR 300-499 (p. 1175); PHIL 111, PHIL 251, PHIL 480; PBSI 225, 300-305 (p. 1184), PBSI 308-499 (p. 1184); SPMT 304; VTPB 409, VTPP 425; HLTH 240 or ISTM 209 or ISTM 210.

⁹ Meets University writing requirement.

Kinesiology - 5-Year Bachelor of Science and Master of Science in Athletic Training

This combination program enables motivated students to efficiently complete both the Bachelor of Science in Athletic Training and the Master of Science in Athletic Training in five years.

The combination degree program allows undergraduate Kinesiology students to enter the Master of Science in Athletic Training (MSAT) program at the beginning of their fourth year at Texas A&M University and earn a Bachelor of Science in Kinesiology and a Master of Science in Athletic Training (MSAT) degree in five years.

Students will follow departmental requirements for admission into the professional phase of the BS in Kinesiology. Kinesiology majors who have at least a 3.25 GPA by the end of the fall semester of their junior year and who will have completed all of their prescribed courses by the spring of their junior year will be eligible to apply for the five-year program.

Applicants to the combination program will follow the same criteria as traditional students with the addition of having earned a B or better in specific courses. They will submit the same materials as other MSAT applicants by the spring deadline of their junior year. Students applying to the MSAT program from the combination option will receive priority review for admission into the MSAT program with the top five applicants from the combination option having a secured seat in the MSAT program. Other combination applicants who meet minimum requirements will have their applications reviewed on a competitive basis.

Students continuing into the 4th year of the combination program must finish all required hours to obtain both the Bachelor's and Master's degrees. Students will be conferred with two degrees once they complete the 5th year of the concurrent combination program.

Students in the combination program are required to complete the same two-year curriculum as other students admitted to the MSAT program. Students will take undergraduate courses, and graduate course work which will be applied to the undergraduate degree. Students are required to maintain a 3.25 GPA through the first 24 hours of graduate course work at which time the student must maintain a 3.0 GPA as is required of all graduate students. Students continuing in the dual degree program will change from U4 to G7 status upon completion of 96 hours.

Students not accepted or unable to continue with the combination program may complete the remaining requirements for the BS degree in Kinesiology in a concentration that best suits their needs (e.g., Motor Behavior, Applied Exercise Physiology). Students who transition to the traditional bachelor's degree will still be welcome to apply to the MSAT program upon completion of their bachelor's degree.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the program. The undergraduate portion of the plan is a suggested plan and should be followed closely. There may be some modifications in course order that can occur but students should consult with the departmental academic advisor for the combined degree program before changes are made in order to ensure they are meeting all requirements.

¹ Must make a grade of C or better.

² Must be taken at Texas A&M University.

³ MATH 148, MATH 152, MATH 168, or MATH 172 will be accepted in lieu of MATH 140.

⁴ MATH 147, MATH 151, or MATH 171 will be accepted in lieu of MATH 142.

⁵ Must make a grade of B or better.

⁶ Activities should be chosen in consultation with your advisor. Participation in band or athletics cannot be used for KINE 199 credit. KINE 199 activities cannot be repeated for credit.

⁷ Course must meet core curriculum requirements.

⁸ Course selection should meet the International and Cultural Diversity (p. 49) and/or Cultural Discourse (p. 48) graduation requirement if needed.

⁹ Meets core curriculum writing requirement.

¹⁰ Course will count in undergraduate and graduate program.

Students may elect to take PHYS or CHEM courses during the summer semester between freshman and sophomore year to reduce the fall course load.

The program includes a total of 180 hours, of which up to 24 hours may be applied toward both the Bachelor of Science in Kinesiology and the Master of Science in Athletic Training.

Sport Management - BS

The Bachelor of Science degree in Sport Management is designed to prepare students for careers as administrators and managers in athletic, health, and country club industries, as well as entry-level management positions in college and professional athletic organizations.

Through this program, students are prepared for diverse roles in the areas of sport marketing and promotions, sales, marketing analysis, and fan behavior along with proficiency in facility and event management and planning, financial management, leadership management, and business planning. The curriculum stays in tune with the sport industry to ensure graduating students are competitive in the field. Students complete their degree plan with a culminating experience that consists of four (4) options; (1) internship, (2) capstone project, (3) international experience, and (4) undergraduate research. The internship, following coursework, provides students with on-the-job experience and networking opportunities. The capstone project is a multifaceted assignment that serves as a culminating academic and intellectual experience for students. The international experience is a unique blend of academic programming which provides students with global experience. The undergraduate research option provides an opportunity for students to

develop and investigate their own research project under the guidance of SPMT faculty. The degree plan allows freedom for students to obtain a minor from a list of approved minors (i.e., business, journalism, speech communications, etc.).

As part of the directed electives, students may choose courses to fulfill a minor in approved departments. Please contact your advisor for a list of approved minors. Up to 3 hours of KINE 199 may be taken; must be taken at Texas A&M University.

⁵ The culminating experience has 4 unique options; these options are explained in the Culminating Experience seminar SPMT 295. The following courses, among other courses, may satisfy the completion of the culminating experience: SPMT 401, SPMT 402, SPMT 450, SPMT 455, SPMT 481, SPMT 484, SPMT 485 and SPMT 491. Students will gain approval of additional courses through consultation with faculty.

Coaching - Minor

This minor is designed for students who are pursuing coaching in various settings, such as public and private schools, club sports, and youth sport leagues.

This program may also be useful for those who plan to work in the fitness industry. Admission to this minor is by application only and requires completion of BIOL 111. Students should consult with a College of Education and Human Development academic advisor (<https://education.tamu.edu/undergraduate-advising/>) for admission requirements and application. Students should allow a minimum of three semesters to complete this minor.

Program Requirements

Code	Title	Semester Credit Hours
KINE 215	Fundamentals of Coaching	3
KINE 318	Care of the Athlete	3
KINE 325	Administrative and Athletic Operations for Coaches	3
KINE 370	Basic Biology of Performance for Coaches	3

KINE 353	Coaching of Softball	
KINE 355	Coaching of Track	
Total Semester Credit Hours		18

Students must make a grade of C or better in all courses.

Sport Management - Minor

The Sport Management minor is designed for students who want an introduction to working with sport organizations.

The Sport Management Minor provides a foundational understanding of the multifarious sport industry from the perspectives of management, marketing, and other business principles. The minor provides an introductory understanding of the broadly defined sport management discipline and potential careers that can be leveraged in the sport industry.

Department of Teaching, Learning and Culture

The Department of Teaching, Learning and Culture is responsible for undergraduate programs that lead to certification at the early childhood/elementary, middle and secondary levels. Note these exceptions:

- Students interested in teaching agricultural science must major in the Department of Agricultural Education;
- Students interested in secondary certification can be certified through the secondary Graduate Certification Program or the aggieTEACH program.

Early Childhood/Elementary or Middle Grades Certification

Baccalaureate Degree Programs. Most students interested in early childhood/elementary (PreK–6) or middle school (4–8) certification pursue a program leading to the Bachelor of Science degree (BS) with a major in Education. The EDUC degree certification programs prepare students for the many diverse instructional roles assumed by public school teachers. A minimum of 123 credit hours is required for the EDUC degree. Within this program, students may focus on:

- Early Childhood (PreK–Grade 6);
- Middle School (Grades 4–8 Math and Science); or
- Middle School (Grades 4–8 English Language Arts and Social Studies).

For complete information, see an advisor in the Department of Teaching, Learning and Culture's Office of Undergraduate Advising in Harrington Tower (EDCT 111).

Eligibility. Students must meet the requirements for a bachelor's degree in the college and the department in which they are majoring. Further, they must meet specific admission and performance standards established by the Department of Teaching, Learning and Culture as well as requirements for professional education and certification

established by the State of Texas. These requirements include admission to teacher education, admission to clinical teaching and qualification for initial certification. **It is the responsibility of the student to contact the Department of Teaching, Learning and Culture's Office of Undergraduate Advising for specific information pertaining to program changes.**

Please see an advisor in the Office of Undergraduate Advising for current information.

Requirements for Admission to Teaching Education Early Childhood/Elementary and Middle Grades Education Program

- Pass the THEA, ACCUPLACER, ASSET or COMPASS test or show proof of exemption from the test with appropriate STAAR, SAT or ACT scores.
- Completion of a minimum 45 hours of pre-professional coursework from degree program (includes University Core Curriculum courses).
- Completion of a minimum of 32 hours of University Core Curriculum courses with no grade lower than a C.
- Completion of TEFB 273 and INST 210 with a grade of B or higher (equivalent courses from a community college may be substituted), two three-hour core MATH and two four-hour Life and Physical Sciences (p. 27) core courses.
- Completion of Communications Core Course with no grade lower than a C.
- A GPA of 2.75 on all coursework on a degree plan with no grade lower than a C.
- Transcripts for all institutions of higher education on file in the Texas A&M University Office of the Registrar.
- Approved and signed degree plan on file in the Advising Office of the Department of Teaching, Learning and Culture.

These requirements must be seen as minimum standards only. Successful fulfillment of all of the above requirements does not guarantee admission to the program. Admission also depends upon the number of places available, and the number of applications received each year. If more qualified students apply than the available number of spaces, admission may be based on selection factors at the time of application, such as GPA in pre-professional courses, number of hours needed to complete the program, and enrollment in prerequisite courses.

Secondary Certification Pathways

Two routes leading to initial teacher certification at the secondary level are available. These include the aggieTEACH program and the Graduate Certification Program. Information is available from the Undergraduate Advising Office.

Requirements for Admission to Clinical Teaching

- Complete a clinical teaching application by the given deadlines and complete all coursework prior to Clinical 3. Students must see their advisors for deadlines.
- Admission to teacher education.
- Pass certification content exam required for Texas teacher certification aligned to the degree sought, and if required for

certification, the Science of Teaching Reading certification exam, by established Department of Teaching, Learning & Culture deadlines.

- Completion of all courses listed on the degree plan. All Education and professional courses with a grade of C or better.
- All certification coursework must be completed. Each emphasis/teaching field must have a grade of C or better in each course with a minimum GPA of 2.75 in teacher emphasis/teaching field.
- ENGL 103 or ENGL 104 must be completed with a grade of C or better.
- A minimum of 2.50 on all coursework completed at Texas A&M.
- A minimum of 2.75 on all coursework that applies to the degree plan, taken at Texas A&M.
- A minimum of 2.75 on all coursework that applies to the emphasis/teaching field, taken at Texas A&M.

Majors

- Bachelor of Science in Early Childhood Development and Education, Leadership Track (p. 575)
- Bachelor of Science in Early Childhood Development and Education, Teaching (Non-Licensure) Track (p. 576)
- Bachelor of Science in Education, Early Childhood-3 Certification (p. 577)
- Bachelor of Science in Education, English Language Arts/Social Studies, Middle Grades Certification (p. 578)
- Bachelor of Science in Education, Math/Science, Middle Grades Certification (p. 579)
- Bachelor of Science in Education, Pre-K-6, Generalist Certification (p. 580)

Certification

- Secondary Graduate Certification Program (p. 582)

Minors

- Secondary Education - Clinical Teaching Minor (p. 581)
- Secondary Education - Minor (p. 582)

Early Childhood Development and Education - BS, Leadership Track

The ECDE Leadership Track is ideal for students interested in leadership roles within service agencies or educational settings that support young children and their families.

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (BS) in Early Childhood Development and Education (ECDE), which equips students with the knowledge and experience necessary to serve children from birth to age 8 and their families. Graduates will be prepared to lead initiatives that positively impact early childhood development.

Program Requirements

First Year

Fall		Semester Credit Hours

¹ In consultation with advisor select from any 100-499 course not used elsewhere.

Must make a grade of C or better in each course.

Early Childhood Development and Education - BS, Teaching (Non-Licensure) Track

This track is designed for students who wish to pursue careers as teachers or caregivers for young children outside public school classrooms by providing the skills necessary to nurture and educate children in various settings.

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (BS) in Early Childhood Development and Education (ECDE) which prepares undergraduates interested in pursuing careers as teachers/caregivers of young children birth-age 8 and their families through a non-licensure program.

Education - BS, Early Childhood-3 Certification

The EC-3 program focuses on preparing teachers to teach children in early childhood through 3rd grade general education settings, which is an area of specialization identified by the Texas Education Agency.

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (BS) in Education. Completion of this program leads to teacher certification in grades EC-3 General Education, with supplemental English as a Second Language certification within the constraints outlined by the Texas Education Agency. For additional information, see an academic advisor in the Education and Human Development Undergraduate Advising Office. Details and contact information can be found at <https://education.tamu.edu/undergraduate-advising/>.

Programs in the Department of Teaching, Learning and Culture are based upon State of Texas standards. Students should check with advisors for the most current program policies and procedures.

Program Requirements

The following curriculum leads to the Bachelor of Science degree in Education with certification in Early Childhood, EC-3. Students

are required to meet with their assigned academic advisor prior to registration each semester.

First Year

Fall

¹ KINE 120 is recommended.

Must make a grade of C or better in each course.

A minimum of 2.75 GPA on all coursework that applies to the degree plan and a minimum of 2.5 GPA on all coursework completed at Texas A&M is required for this degree.

Education - BS, Math/Science, Middle Grades Certification

This program is for those seeking Texas teacher certification in Math/Science for grades 4-8.

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (BS) in Education. Completion of this program leads to teacher certification in Math and Science - Grades 4-8, and supplemental English as a Second Language certification within the constraints outlined by the Texas Education Agency. For complete information, see an academic advisor in the Education and Human Development Undergraduate Advising Office. Details and contact information can be found at <https://education.tamu.edu/undergraduate-advising/>.

Programs in the Department of Teaching, Learning and Culture are based upon State of Texas standards. Students should check with advisors for the most current program policies and procedures.

This program is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

¹ Must be taken at Texas A&M University.

² KINE 120 is recommended.

Must make a grade of C or better in each course.

A minimum of 2.75 GPA on all coursework that applies to the degree plan and a minimum of 2.5 GPA on all coursework completed at Texas A&M is required for this degree.

Education - BS, Pre-K-6, Generalist Certification

This program is for those seeking Texas teacher certification in General Education for grades PreK-6.

The Department of Teaching, Learning and Culture (TLAC) offers a Bachelor of Science (BS) in Education. Completion of this program leads to teacher certification in grades PreK-6 General Education, with supplemental English as a Second Language certification within the constraints outlined by the Texas Education Agency. For complete information, see an academic advisor in the Education and Human Development Undergraduate Advising Office. Details and contact information can be found at <https://education.tamu.edu/undergraduate-advising/>.

Programs in the Department of Teaching, Learning and Culture are based upon State of Texas standards. Students should check with advisors for the most current program policies and procedures.

Secondary Education - Clinical Teaching Minor

This program is for Secondary Education minors seeking Texas teacher certification, completing the required clinical teaching phase after Educator Preparation Program admission.

The Department of Teaching, Learning and Culture (TLAC) offers a minor in Secondary Education – Clinical Teaching to students with non-education majors seeking secondary teacher certification who are declared Secondary Education (SEED) minors previously admitted to the College of Education and Human Development's Educator Preparation Program (EPP). Only students who have added the Secondary Education (SEED) minor and accepted admission into the EPP can add the Secondary Education – Clinical Teaching minor. The SEED minor establishes and meets the mandatory 300-hour clock hour Texas Education Agency coursework, field experiences, and certification testing requirements. The Secondary Education – Clinical Teaching minor supports students in the capstone phase required for teacher certification.

Program Requirements

Code	Title	Semester Credit Hours
Select one of the following:		6-12
MEFB 497	Supervised Clinical Teaching	
TEFB 426	Supervised Clinical Teaching	
TEED 425	Supervised Clinical Teaching	
Educator content area ¹		3-9
Total Semester Credit Hours		15

¹ To be selected in consultation with advisor. Students will apply coursework taken for the certification area claimed.

Secondary Education - Minor

This minor is for non-education majors seeking middle or high school teacher certification.

The Department of Teaching, Learning and Culture (TLAC) offers a minor in Secondary Education to students with non-education majors. The minor requires 18 semester credit hours of education coursework, and 6 hours of clinical teaching, for students seeking teacher certification for middle and high school content areas. Students must declare a major in a subject area for which teacher certification options are available in order to be eligible for this minor. For complete information, see the College of Education and Human Development Secondary Education (SEED) minor program coordinator. Details and contact information are available at <https://tlac.tamu.edu/academics/aggieteach-secondary-education/>

To meet Teacher Certification requirements, student must also successfully complete clinical teaching (MEFB 497-6 hours). A 2.5 GPA is required in minor courses to pursue teacher certification and a 2.75 cumulative GPA to be admitted to Teacher Education.

Program Requirements

Code	Title	Semester Credit Hours
INST 210	Understanding Special Populations	3
INST 222	Foundations of Education in a Multicultural Society	3
RDNG 372	Reading and Writing across the Middle Grades Curriculum	3
or RDNG 465 or Reading in the Middle and Secondary Grades

MEFB 450	Social Studies Methods in the Middle Grades	
TEFB 406	Science in the Middle and Secondary School	
RDNG 490	Assessment in Reading Instruction in Middle Grades	
TEFB 407	Mathematics in the Middle and Senior School	
Total Semester Credit Hours		18

¹ English majors must take RDNG 470. The course is taken concurrently with RDNG 490.

Students must make a grade of C or better in all courses.

A 2.75 GPA is required in minor courses to pursue teacher certification.

Substitutions must be approved by the Department of Teaching, Learning and Culture advisors.

A semester of clinical teaching is also required for teacher certification; clinical teaching is scheduled after all coursework is complete.

Secondary Graduate Certification Program

This program is designed for those candidates who have completed the baccalaureate degree and desire initial certification at the secondary level. Candidates are admitted upon recommendation of departmental advisors and progress through summer, fall and spring as a cohort. The certification program requires completion of 21 graduate semester credit hours and the successful completion of appropriate State examinations. A full public school year internship and the opportunity to apply all coursework toward the Master of Education degree are unique features of this program. The candidate may, upon approval by the department and a cooperating school district, serve as an intern in a full-time salaried teacher of record position, in a part-time salaried teaching position, or as a paid substitute teacher. All candidates will serve a full public school year internship whether in a salaried or non-salaried position.

Prerequisites

Completion of the following prior to the first summer session:

1. Baccalaureate degree from an accredited institution with a GPA of 2.75.
2.

Code	Title	Semester Credit Hours
Nine (9) semester credit hours		9
INST 210	Understanding Special Populations	
TEFB 322	Teaching and Schooling in Modern Society	
TEFB 324	Teaching Skills II	
3. Coursework for one teaching field as approved by the teaching field advisor.
4. Pass the appropriate content area TExES exam.

Course of Study for Secondary Certification at the Post-Baccalaureate Level

Enrollment in the following courses is limited to candidates pursuing initial secondary certification in the post-baccalaureate program.

Course	Title	Semester Credit Hours
First Year		
Summer		
BESL 622	Teaching English as a Second Language	3
TEED 602	Contemporary Perspectives on Education	3
TEED 649	Instructional Strategies in Academic Specialties in Middle and Senior HS: Principles & Applications	3
Semester Credit Hours		9
Fall		
TEED 682	Seminar	3

TEED 684	Professional Internship ²	3-6
Semester Credit Hours		6-9
Spring		
TEED 682	Seminar	3
TEED 684	Professional Internship ²	3-6
Semester Credit Hours		6-9
Total Semester Credit Hours		21-27

² Candidates in a one-half time paid or non-paid internship may, with approval of an advisor, enroll in 3 credit hours of approved coursework, providing it does not interfere with the internship day.

Recommendation for Certification. Upon successful completion of the three prerequisite courses, the teaching field plan (minimum of 24 credit hours) during the summer, fall and spring semesters, a demonstrated competency in speech and technology, and passing scores on all State-required examinations, candidates will be recommended for certification.

NOTE: To complete the Master of Education degree, candidates will enroll in Teaching, Learning and Culture foundation courses and courses in their teaching field(s) as approved by their graduate advisory committee. The department also offers a "certification only" option for secondary certification. Contact the TLAC office for information.

Secondary Certification through the aggieTEACH Program

Students interested in pursuing a secondary education minor should contact their content area undergraduate advising office. They can also meet with the Department of Teaching, Learning and Culture Secondary Education (SEED) Minor program coordinator. Details can be found at the aggieTeach Secondary Education (<https://tlac.tamu.edu/academics/aggieteach-secondary-education/>) webpage.

COLLEGE OF ENGINEERING

Administrative Officers

Vice Chancellor and Dean of Engineering - Robert H. Bishop, PhD

Executive Associate Dean - Arul Jayaraman, PhD

Senior Associate Dean for Research - Rodney Bowersox, PhD

Senior Associate Dean for Academic Affairs - Harry Hogan, PhD

Associate Dean for Faculty Success - Jean-Francois Chamberland, PhD

Associate Dean for Graduate Programs - Duncan M. "Hank" Walker, PhD

Associate Dean for Undergraduate Programs - Angie Hill Price, PhD

Associate Dean for Engineering at Texas A&M University Galveston - Jay Porter, PhD

Associate Dean for Research – Arum Han, PhD

Associate Dean for Research – Jodie Lutkenhaus, PhD

Associate Dean for Research – Lin Shao, PhD

Associate Dean for Student Success – Arun Srinivasa, PhD

Assistant Dean for Engineering Academies - Cecelia Lawley, PhD

Assistant Dean for Student Success - Andrea M. Ogilvie, PhD

Assistant Dean for Finance - Lesley Bell

General Statement

Engineering is the application of science and mathematics to the solution of relevant problems in our society. To a great extent, our current standard of living and high level of technology are due to the diligent and innovative efforts of engineers. In spite of the increasing expense of basic resources, modern engineers have succeeded in maintaining stable costs for a wide variety of goods, and at the same time have used their design and analysis abilities to introduce new products and technologies for the betterment of society.

The accelerating pace of industrial and technological developments has created an ever-increasing demand for highly qualified, professional engineers to maintain the momentum already achieved, and to extend and direct the course of these developments. The ever-expanding population and the increased demands for goods and services have imposed new challenges to provide effective solutions while minimizing unwanted side effects. Engineers recognize that all actions taken have their respective costs, and that solutions to long-standing societal problems are found in careful, thorough planning and study. With a pragmatic background in problem solving, engineers are perhaps best qualified to address society's problems.

The complexities of the current environment are such that all resources must be used in the best possible manner. Thus, the College of Engineering, through its curricula, strives to educate and train engineers who have the breadth of vision to formulate and solve the problems of today and the future. It is expected that students who conscientiously apply themselves and successfully complete an engineering program will

be technically trained and socially educated, thereby being well prepared to make a significant contribution to the world in which they work.

The mission of the College of Engineering is to serve Texas, the nation and the global community by providing engineering graduates who are well founded in engineering fundamentals, instilled with the highest standards of professional and ethical behavior, and prepared to meet the complex technical challenges of society.

To achieve this mission the College of Engineering is committed to:

- ensuring an academic environment conducive to our faculties achieving the highest levels of academic and research excellence;
- building upon our traditional partnerships with industry, engineering practitioners and former students, to enhance our impact on the profession of engineering;
- encouraging excellence, innovation and cross-disciplinary initiatives in education and research;
- providing national and international leadership in undergraduate and graduate engineering education;
- becoming the engineering college of choice for the increasingly diverse citizenry of the state; and
- encouraging and supporting opportunities for our students to grow beyond their chosen disciplines by participation in ethics courses, leadership programs, study-abroad programs and research.

A student engineer can pursue any one of several degree plans, according to personal ambitions, interests and abilities. The student may choose the traditional BS degree and consider advanced research-oriented graduate programs leading to the MS and PhD degrees. Alternatively, at the graduate level, the student may select the Master of Engineering or the Doctor of Engineering program which are directed toward professional engineering.

Within the College of Engineering, the undergraduate programs in aerospace engineering, architectural engineering, biological and agricultural engineering, biomedical engineering, chemical engineering, civil engineering, computer engineering, electrical engineering, environmental engineering, industrial engineering, interdisciplinary engineering, materials science and engineering, mechanical engineering, nuclear engineering, ocean engineering, and petroleum engineering are accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org (<https://www.abet.org/>). The electronic systems engineering technology program, manufacturing and mechanical engineering technology program, industrial distribution program, and multidisciplinary engineering technology program are accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET, www.abet.org (<https://www.abet.org/>). The BS computer science program is accredited by the Computing Accreditation Commission (CAC) of ABET, www.abet.org (<https://www.abet.org/>).

Enrollment Requirements and First Year Curriculum

The minimum requirements for entrance to the University are listed in the earlier pages of this catalog. Because of the importance of science and mathematics to engineering, high school students who aspire to pursue a career in engineering are encouraged to take as many of these courses as possible. In particular, high school preparation should include four years of mathematics and four years of science emphasizing algebra, geometry, trigonometry, calculus, chemistry, physics and biology.

A critical step in an engineering education is proper individual placement in the first courses undertaken. The College of Engineering strongly recommends the following guidelines to students participating in the math advanced placement examinations in high school. Incoming engineering students can earn advanced placement (AP) credits for MATH 151 with a score of 4 on the Calculus AB exam or 3 on the BC exam, and for MATH 151 and MATH 152 by a score of 4 on the BC exam. While the student can accept these AP credits and enroll in the next course in the engineering mathematics sequence, the college recommends a more conservative decision about accepting advanced placement credits in math. Students who earn a 4 or 5 on the Calculus AB exam or a 3 or 4 on the BC exam are recommended to begin in MATH 151. Students who score a 5 on the Calculus BC exam are recommended to begin in MATH 151 or MATH 152. These conservative recommendations help ensure students have thoroughly mastered the content that is fundamental to the engineering curriculum. Students should discuss their choice with their assigned undergraduate academic advisor before registering for mathematics classes. All first time in college students admitted into the College of Engineering are required to complete the Math Placement Exam (MPE) (<https://engineering.tamu.edu/academics/undergraduate/math-placement-exam/>) and should review algebra, trigonometry, and geometry prior to taking the MPE.

Students who begin in general engineering programs in College Station (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>), (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>) Galveston (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-galveston/>) or McAllen (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/>) or who are in Texas A&M Engineering at Blinn (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-blinn-bryan/>), or the Texas A&M Engineering Academy Programs (<https://engineering.tamu.edu/academics/>) pursue a common first year engineering curriculum to provide them opportunities to explore the various engineering majors (<https://engineering.tamu.edu/academics/explore-engineering/>). Students are introduced to the different engineering majors in the first year engineering courses, ENGR 102, ENGR 216/PHYS 216 and ENGR 217/PHYS 217. Additionally, students are encouraged to leverage additional resources, including the Career Center (<https://careercenter.tamu.edu/>), faculty, and academic advisors, to gain more information about engineering majors. All general engineering students must complete the following first year engineering curriculum requirements over the course of at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses. The entry-to-a-major (ETAM) process (<https://engineering.tamu.edu/academics/undergraduate/entry-to-a-major/>) enables general engineering students to take ownership of their future by identifying at least three majors that are a good match for their academic and career goals. The ETAM process is designed to place students in the highest rank major possible based upon academic performance, ETAM application content, and program capacities. Students who begin in general engineering programs in College Station (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>), (<https://engineering.tamu.edu/admissions-and-aid/incoming-students/>) Galveston (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-galveston/>) or McAllen (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-mcallen/>) or who are in Texas A&M Engineering at Blinn (<https://engineering.tamu.edu/admissions-and-aid/engineering-at-blinn-bryan/>), or the Texas A&M Engineering Academy Programs (<https://engineering.tamu.edu/academics/>) are encouraged to

be in a major as early as possible; and must be in a major by the end of the fourth semester.

It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care and in consultation with an academic advisor to ensure that prerequisites for all courses are met.

Bring Your Own Device (BYOD) (<https://engineering.tamu.edu/easa/areas/academics/byod/>)

Just as students are required to have specific textbooks and supplies in order to gain the highest quality engineering educational experience, the College of Engineering requires students to purchase a computer to complement the course instruction. Because of the importance of computing in the disciplines housed within the college, all entering students are required to possess a portable, network-ready personal computer capable of running software appropriate to their academic program, as well as other required technology (<https://engineering.tamu.edu/academics/byod/devices/>). The vast majority of the students entering the College already bring some form of desktop or laptop computer with them when they begin school. Unfortunately, the variation in the types of computers makes it next to impossible for instructors to routinely ask students to use their own computers in the classroom. A computer designated by the College and purchased by entering students will provide students the convenience to explore course content anytime, anywhere.

While there are many computers available, the College can only guarantee performance and provide support for the specific computers identified by the College of Engineering. These computers will accommodate most of the needs of an engineering student throughout a four-year degree plan, balancing performance, cost and expected life of the computer. The computers have been negotiated with the various vendors, which are external to Texas A&M University, at a price point that is lower than what an individual would likely be able to negotiate. The price for each computer includes up to a four-year warranty.

For financial aid recipients, purchase of the computer device can be considered in the cost of attendance. To request this, please complete the Request to Change Cost of Attendance (<https://aggie.tamu.edu/resources/forms-and-media/>) form for Scholarships & Financial Aid. Submission of documentation does not guarantee additional aid will be awarded. In certain situations, students may not be eligible for additional funding.

Your engineering education requires a computer to complement the course instruction. Undergraduate students entering the college of engineering are strongly encouraged to purchase from our list of recommended and supported devices (<https://engineering.tamu.edu/academics/byod/devices/>). Doing so guarantees performance, and hardware and software support throughout your years here as an engineering student. Should you choose a device not on this list, know that we cannot guarantee that the required software will run effectively, or that our IT team will be able to support your device. No student will be denied admission to Texas A&M University based on an inability to purchase a computer.

Texas A&M Engineering students co-enrolled in the Texas A&M Engineering Academies (<https://engineering.tamu.edu/academics/>) must apply for financial aid from the partner community college. Any questions about

including the purchase of a computer in the cost of attendance should be directed to the community college financial aid office.

For more information, including specific requirements, visit the Bring Your Own Device (BYOD) website (<http://engineering.tamu.edu/easa/areas/academics/byod/>).

ENGR^[X]

ENGR^[X] is a zero-credit-hour required program that is composed of approved engineering-centric activities that meet the criteria of high-impact learning experiences. Undergraduate students can use their participation in one of these activities to satisfy in part their ENGR^[X] requirement. Full satisfaction of the ENGR^[X] requirement includes participating in an engineering-centric activity and submitting a meaningful, self-reflection that discusses the impact and overall experience on the student's education.

Each department in the College of Engineering identifies the activities it will accept in satisfying a student's ENGR^[X] requirement. Some activities may include the following:

- Education Abroad (<https://abroad.tamu.edu/>)
- Internship or Co-op Experience (<http://careercenter.tamu.edu/current-students/>)
- Grand Challenge Scholars Program (<https://engineering.tamu.edu/student-life/gcsp/>)
- The University, College, or Departmental Honors Program (<http://honorsprograms.tamu.edu/>)
- Aggies Invent (<https://engineering.tamu.edu/student-life/aggies-invent/>)
- Aggie Challenge (<https://engineering.tamu.edu/academics/undergraduate/aggie-challenge/>)
- Undergraduate research (<https://engineering.tamu.edu/academics/undergraduate/undergraduate-bridges.html>)
- TAMU Minor or Certificate Programs, like the Zachry Leadership Program (<https://engineering.tamu.edu/student-life/zachry-leadership-program/>)
- Department design competitions
- Leadership in student organizations (<https://engineering.tamu.edu/student-life/student-orgs.html>)

College Prerequisite Policy

The following prerequisite policy applies to any student in a College of Engineering undergraduate degree program and to any student who seeks admission to an undergraduate degree program in the College of Engineering. This policy is in addition to prerequisite policies imposed by the University (Texas A&M University Student Rules). For complete details concerning this policy, students should contact their Undergraduate Advising Office.

Students must earn a grade of C or better in all courses identified in each College of Engineering undergraduate degree program and any prerequisites for these courses. If a student earns a grade of D or F in any of these courses, the student is required to repeat the course before enrolling in a more advanced course that has the D/F course as a prerequisite. A student may attempt a course no more than three times, including courses graded Q or W but excluding those graded NG, unless approval has been received from their department. A student must complete all

prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course.

A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by their department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans' benefits, and eligibility to participate in extracurricular activities.

Other Requirements

All required coursework must be taken for a grade to satisfy requirements for a degree in the College of Engineering. Courses cannot be taken on a satisfactory/unsatisfactory basis to satisfy this requirement.

Fast Track Program

This program allows students to begin making progress toward a master's degree while completing the undergraduate program. Each participating department in the College of Engineering has streamlined its program for Fast Track participants by substituting specific graduate courses for selected undergraduate offerings. Academically qualified students take these 600-level courses during their senior year, earning graduate credit while fulfilling undergraduate requirements through "credit by exam." The individual department sets its own grade and exam requirements for earning dual credit. The department also establishes the maximum number of credit hours allowed for acceleration, usually five to seven.

Industry-University Cooperative Education

Cooperative education is a study-work plan of education in which a student alternates periods of attendance in college or university with periods of employment in industry related to his or her major. The practice of engineering is an art which is learned through practice as well as in the classroom. The cooperative education program provides the education that can be achieved from practice by having the student work with professional engineers on the job. Consequently, the students who graduate with cooperative education experience have both the academic background and the practical experience to enhance qualifications and preparation for successful employment in the profession of engineering. The cooperative education work periods also provide an income for students that allows them to pay for their school expenses.

Those who wish additional information concerning this program should contact the Career Center (<https://careercenter.tamu.edu/current-students/find-an-internship-job/co-op/>).

Advanced Study

Students who rank in the upper half of their undergraduate class should give serious consideration to developing their full intellectual potential in engineering by continuing with advanced studies at the graduate level. Two routes are available for students. The traditional master of science and doctor of philosophy degrees should be considered by students who wish to go into research fields. For those students interested in

the practice of professional engineering, the master of engineering and doctor of engineering degrees should be given serious consideration. The professional doctor of engineering degree was established in the fall of 1974 to fill a need for better-educated engineers in the practice of engineering. Students may enter this program at any time after they receive the bachelor's degree in engineering by applying and being accepted to a departmental graduate program within the College of Engineering. Master's level degrees require a minimum of one year of course work after the bachelor's, and the doctoral degrees require a minimum of an additional two years of coursework. The doctor of philosophy also requires a dissertation based on research by the student, and the doctor of engineering requires at least one year of internship experience in industry or government.

For more information concerning these programs, please refer to the *Texas A&M University Graduate and Professional Catalog* or contact the College of Engineering Graduate Programs website (<https://engineering.tamu.edu/academics/graduate/>).

The engineering programs also provide a foundation for further education in the fields of medicine, law or business. An engineering background will prepare the individual to understand, contribute to and embrace technical advances in these fields. Students can become physicians with the EnMed (<https://enmed.tamu.edu/>) program which is available for outstanding Texas A&M University College of Engineering students who are interested in obtaining a medical degree with the Texas A&M Naresh K. Vashisht College of Medicine. EnMed students earn both a Medical Doctorate (MD) and Master of Engineering (MEng) degree concurrently, which uniquely positions them to pursue a career as a physician, or physician scientist, or medical innovator.

The Texas A&M Engineering Academies

The Texas A&M Engineering Academies are co-enrollment programs between the College of Engineering and select two-year institutions. Students in the Texas A&M Engineering Academy program are Texas A&M engineering students who take math, science, and core courses from the two-year institution and engineering courses from the College of Engineering. Except for the co-enrollment program Texas A&M Engineering at Blinn, the admission process for the Texas A&M Engineering Academies is unique to each partner institution, with the offer of admission to the Texas A&M Engineering Academy made by Texas A&M University. Students enrolled in a Texas A&M Engineering Academy who satisfy the program GPA requirements, may be considered for entry to a major as early as the end of the first year.

Eligible students receive financial aid based upon their combined credit hours from both institutions.

For more information, including specific requirements for each of the partner institutions, visit Texas A&M Engineering Academies (<https://engineering.tamu.edu/academies/>).

Majors

College of Engineering

- Bachelor of Science in Biological and Agricultural Engineering (p. 167) — offered in conjunction with the College of Agriculture and Life Sciences

Department of Aerospace Engineering

- Bachelor of Science in Aerospace Engineering (p. 595)

Department of Biomedical Engineering

- Bachelor of Science in Biomedical Engineering (p. 599)

Artie McFerrin Department of Chemical Engineering

- Bachelor of Science in Chemical Engineering (p. 605)

Zachry Department of Civil and Environmental Engineering

- Bachelor of Science in Civil Engineering, Coastal Engineering Track (p. 611)
- Bachelor of Science in Civil Engineering, Construction Engineering and Management Track (p. 614)
- Bachelor of Science in Civil Engineering, Environmental Engineering Track (p. 616)
- Bachelor of Science in Civil Engineering, General Civil Engineering Track (p. 618)
- Bachelor of Science in Civil Engineering, Geotechnical Engineering Track (p. 620)
- Bachelor of Science in Civil Engineering, Structural Engineering Track (p. 623)
- Bachelor of Science in Civil Engineering, Transportation and Infrastructure Materials Engineering Track (p. 625)

- Radiological Health Engineering Minor (p. 704)

Certificates

The College of Engineering has designed the following certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses. Each certificate will be recognized on the candidate's transcript. A coordinator reviews each student's coursework via a certificate worksheet and requirements met prior to certification. Certificate coordinators are given the discretion to determine the eligibility of students in other colleges and/or majors to pursue College of Engineering certificates. For specific information on each certificate available, visit the College of Engineering website.

College of Engineering

- Engineering Concept, Creation, and Commercialization Certificate (p. 591)
- Holistic Leadership in Engineering Certificate (p. 592)
- International Engineering Certificate (p. 592)

Artie McFerrin Department of Chemical Engineering

- Engineering Therapeutics Manufacturing Certificate (p. 606)
- Safety Engineering Certificate (<https://catalog.tamu.edu/undergraduate/engineering/chemical/safety-engineering-certificate/>)

Department of Computer Science and Engineering

- Cyber Operations Certificate (p. 641)

Wm Michael Barnes '64 Department of Industrial and Systems Engineering

- Data Center Operations Engineering Certificate (p. 675)
- Data Engineering Certificate (p. 676)
- Engineering Systems Management Certificate (p. 676)

Department of Materials Science and Engineering

- Corrosion Science and Engineering Certificate (p. 681)
- Polymer Specialty Certificate (p. 682)

Harold Vance Department of Petroleum Engineering

- Data Analytics for Petroleum Industry Certificate (p. 711)
- Petroleum Ventures Certificate (p. 711)

Department of Nuclear Engineering

- Doctor of Philosophy in Nuclear Engineering (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/nuclear/phd/>)

Department of Ocean Engineering

- Doctor of Philosophy in Ocean Engineering (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/ocean-phd/>)

Harold Vance Department of Petroleum Engineering

- Doctor of Philosophy in Petroleum Engineering (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/petroleum/phd/>)

Engineering Concept, Creation, and Commercialization - Certificate

This program focuses on developing an entrepreneurial mindset which will be valuable to students as employees of companies or as creators of their own startup.

The Engineering Concept, Creation, and Commercialization Certificate provides students with the training and experience to develop their ideas, create/design solutions to solve customer needs, and to understand the process of commercializing developed solutions. Students from any engineering major may find great value in the knowledge and skills this certificate develops. The certificate is offered by the Engineering Entrepreneurship Program (<https://engineering.tamu.edu/student-life/eep/>), which offers a range of engagement opportunities to complement in-class learning.

Program Requirements

Code	Title	Semester Credit Hours
MTDE 252 or ENGR 462 or Engineering Entrepreneurship Hour	Engineering Entrepreneurship Hour	1
MTDE 461	Product Lean Launch for Engineers	3
Select three of the following: ¹		9
BMEN 406	Medical Device Path to Market	
BMEN 469	Entrepreneurial Pathways in Medical Devices	
ENDS 101	Design Process	
MTDE 311	Enterprise Basics for Technical Entrepreneurs	
MTDE 312	Sales, Operations and Manufacturing for Technology Companies	
MTDE 313	Engineer to Chief Executive Officer	
MTDE 421	Technology Company Management, Leadership, and Corporate Culture	
PETE 453	Petroleum Entrepreneurship	
Total Semester Credit Hours		13

¹ Other courses may be approved as prescribed electives by the Certificate Program Director.

Holistic Leadership in Engineering - Certificate

The Holistic Leadership in Engineering Certificate will help students develop intra- and interpersonal skills to complement the technical knowledge they are acquiring in the engineering degree.

This certificate is designed to provide students with a deeper level of self-awareness, a broader perspective to see more possibilities, a better understanding of the dynamics and factors that drive engineering organizational success, and a personal commitment to service. In completing this certificate, students will have an opportunity to form meaningful, lasting relationships with a diverse group of peers who are all committed to personal growth and engineering leadership development.

The courses include unique multidisciplinary experiential learning opportunities, accomplished guest speakers, small group discussions with industry professionals, simulations, and case studies.

After five semesters, students will have strengthened leadership capabilities and will be confident in their ability to influence people. Students will understand how businesses operate within a free enterprise system and the duty of a leader to serve, empowering them to make an impact early in whatever career they choose to pursue—whether that be in a large corporation, a local business, a start-up, or a nonprofit or governmental organization.

Program Requirements

Code	Title	Semester Credit Hours
ENGR 251	Creating a Self-Aware Leader	3
ENGR 350	Leading for Impact in Engineering, Business and Society	3
ENGR 351	The Role of Engineering and Business in Society	3
ENGR 450	Finding Your Leadership Qualities	3
ENGR 451	Leading for a Lifetime: Continual Learning and Influence	3
Total Semester Credit Hours		15

International Engineering - Certificate

This certificate prepares engineering students for the global industry by developing essential cross-cultural skills and international awareness, enhancing their professional effectiveness.

Today's engineering industry is global and interconnected with supply, demand and service providers located around the world. An effective engineer in this global environment is one that complements their core technical knowledge with excellent cross-cultural competencies and international exposure. Students completing the International Engineering Certificate will be better prepared to join the global job market they will face following graduation. The International Engineering Certificate is only available to undergraduate, engineering degree-seeking students within the Texas A&M University College of Engineering. The certificate is annotated on the student's permanent transcript. Students completing the International Engineering Certificate will be better prepared to work effectively (professional, productive and culturally

sensitive) as an engineer in multicultural and multidisciplinary work environments. By completing the certificate, students will learn to:

- Integrate and apply skills required to solve an engineering design problem considering different perspectives;
- Understand intercultural differences and similarities, and their relevance to effectiveness in the workplace;
- Apply intercultural knowledge for self-knowledge/improvement (Intrapersonal competence);
- Apply intercultural knowledge for effective teamwork (Interpersonal competence).

The International Engineering Certificate may be completed by students pursuing College of Engineering degree programs and requires completion of three credit hours of coursework with an international experience.

For additional information, contact the Halliburton Engineering Global Programs Office via email at engineeringglobalprograms@tamu.edu, via phone at (979) 862-5880, or in-person at the Zachry Engineering Education Complex, Suite 410.

Program Requirements

Code	Title	Semester Credit Hours
Required Courses ¹		
Global engineering design		3
Select one of the following:		
ENGR 410	Global Engineering Design ²	
Pre-approved 200 level or above engineering course with a significant international component ³		
International engineering experience ⁴		
	Cultural discourse ⁵	3
	International and cultural diversity ⁶	3
	International experience ⁷	3
	Language ⁸	3
Total Semester Credit Hours		15

¹ No course may be used more than one (1) time to fulfill certificate requirements.

² Course only offered in the Fall term.

³ Pre-approval must be requested and granted prior to course completion. The Director of Halliburton Engineering Global Programs, the respective course faculty, and the student must meet to determine the specific course content or project that will suffice the "significant international component" requirement.

⁴ After the International experience component is satisfied, engineering course credit received on a study abroad program, international field trip, international internship, international research experience, or another approved course or field experience may be used to fulfill this requirement.

⁵ To be selected from approved Cultural Discourse (p. 48) courses.

⁶ To be selected from approved International and Cultural Diversity (p. 49) courses. Course listing can be found at icd.tamu.edu.

⁷ May be satisfied by course credit received on a study abroad program, international field trip, international internship, international research experience, or another approved course or field experience.

⁸ Three (3) credit hours of a 200-level or higher course in a single language. Students are not allowed to use English to fulfill this requirement unless the TOEFL was required for their admission to Texas A&M University. If the TOEFL was required for their admission, students may use ENGL 210 to fulfill this requirement. Students may obtain course credit for this requirement by accepting AP credits or credits obtained through the on-campus language proficiency exam onto their transcript.

Department of Aerospace Engineering

Aerospace Engineering is a complex, rapidly changing field that includes aerodynamics, structures and materials, propulsion, dynamics and control, and astrodynamics. The primary application of Aerospace Engineering is to design and develop flight vehicles, such as aircraft, missiles, spacecraft and satellites. Aerospace engineering is also important and applicable to other vehicles and systems, such as rotorcraft, submarines, automobiles, wind turbines, advanced robotics, re-entry vehicles, exotic materials and computational simulations.

The mission of the Aerospace Engineering program is

1. to provide a quality undergraduate and graduate aerospace engineering education.
2. to advance the engineering and science knowledge base through research.
3. to assist industry in technical applications and innovations.
4. to serve the aerospace engineering profession through leadership in these areas.

To achieve this mission, the Aerospace Engineering undergraduate program has established the following educational objectives. Within three to five years of graduation, graduates are expected to:

1. have successful and impactful careers in industry, private practice, or government, or will have pursued advanced graduate studies;
2. be well-prepared practitioners who apply their knowledge and skills to solve relevant engineering problems in the aerospace or a related profession;
3. be life-long learners, keep abreast of developments in aerospace or related technologies, and be leaders in their peer group and active participants in their professional organizations.

To carry out these educational objectives, the goals of the program are:

1. using a high quality faculty, to provide a comprehensive aerospace engineering education that provides students with the fundamental knowledge and skills necessary for the design, analysis and advancement of aircraft, spacecraft and other high technology complex systems; and
2. to prepare students for the aerospace engineering profession and related fields by developing the attributes needed, so that they can contribute successfully to society and to the engineering profession now and in the future.

The Department offers a Bachelor of Science in Aerospace Engineering with Honors degree option. This option was proposed by our students and implemented for our students. Very few programs across the country offer this type of experience within Aerospace Engineering. Students in this program are part of an honors community and are provided with

the opportunity to enhance their learning experience through one-on-one research with a faculty mentor, introduction to advanced aerospace theories, and much more. The Department also offers a Fast Track program, which is tailored for high-achieving undergraduate students who wish to extend their knowledge and gain an edge by earning a Master of Engineering (ME) degree. Fast Track allows qualified students to earn up to nine hours of credit toward their Aerospace Engineering undergraduate and graduate degrees. Consequently, through Fast Track a student can earn a ME degree in two semesters beyond their undergraduate degree.

Laboratories supplement theoretical studies in the major disciplines in the department. Numerous wind tunnels for low-speed and supersonic aerodynamic studies, a jet engine test facility, a flight simulator, a satellite laboratory with Integrated Concurrent Engineering Capability, a robotics laboratory, and state-of-the-art materials and structures testing equipment are available, equipped with modern instrumentation. The department and Texas A&M University also provide an extensive array of computing resources.

Students are encouraged to enrich their undergraduate experience through a variety of ways in the department, including co-op and internship positions, student competition design projects, and undergraduate research. In addition, students have the opportunity to study abroad or participate in an international exchange program.

Before commencing course work in Aerospace Engineering, students must be admitted to the major or have the approval of the department.

The department also offers programs of study leading to the MEN, MS, and PhD degrees (see the Texas A&M University Graduate and Professional Catalog).

The Aerospace Engineering undergraduate program is accredited by the Engineering Accreditation Commission of ABET (www.abet.org) under the commission's General Criteria and Program Criteria for Aerospace Engineering.

PHD, Massachusetts Institute of Technology, 2023

Majors

- Bachelor of Science in Aerospace Engineering (p. 595)

Aerospace Engineering - BS

This program blends rigorous theoretical study with practical application of modern engineering tools, culminating in advanced design projects that prepare students for aerospace careers.

Coursework in aerodynamics, materials and structures, propulsion, and dynamics and control of aircraft and spacecraft provide a strong fundamental basis for advanced study and specialization, while senior technical electives offer a concentration of study in fields of special interest. Design is emphasized particularly in senior design electives and a senior-level two-semester design sequence involving specific goals, objectives, and constraints, which integrates analysis and design tools and requires students working in teams to design, and in some cases build, test, and deploy an aerospace system, such as an aircraft, rotorcraft, flight simulator, morphing air or space structure, space suit, space habitat, or a mission to Mars. Application of modern engineering and computational tools is required and emphasized in most courses.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Total Program Hours 128

Department of Biomedical Engineering

The objectives of the Biomedical Engineering program are to produce high-quality graduates with a broad-based education in engineering, life sciences and natural sciences applied to the fields of biomechanics, cellular and molecular bioengineering, computational bioengineering, medical devices, regenerative medicine, or imaging, sensing, and digital health who:

1. Are well prepared for further graduate studies, careers in the biomedical or biotechnology industries or entry into medical or other professional schools;
2. Will make significant contributions in biomedical industries, medicine and other sectors;
3. Will apply acquired knowledge appropriately, work professionally with others, effectively communicate ideas and technical information and continue to learn and improve their knowledge base and skills.

These objectives are met through a modern and comprehensive curriculum taught by a well-prepared, professionally active and dedicated faculty. In addition, the program actively supports professional development among the students through individual study and research opportunities, cooperative education and internships, and student society activities. These goals are measured by the success of the graduates

in finding rewarding professional employment, and by admission to respected graduate and professional schools.

Design is an important part of biomedical engineering and design skills are cultivated through a series of design courses, beginning in the first year in the program, culminating in the two-semester senior design course sequence that requires the application of a wide range of engineering methods to a focused design project. Other courses in biomedical engineering and in supporting disciplines include examples of the application of the principles to design, as well as specific design exercises. The biomedical engineering curriculum is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Before commencing coursework in the department, students must be admitted to the major or minor.

Faculty

Alge, Daniel L, Professor
Biomedical Engineering
PHD, Purdue University, 2010

Avazmohammadi, Reza, Assistant Professor
Biomedical Engineering
PHD, University of Pennsylvania, Philadelphia, PA, 2014

Bagnato, Vanderlei S, Professor
Biomedical Engineering
PHD, Massachusetts Institute of Technology, 1987

Biswas, Saurabh, Professor of the Practice
Biomedical Engineering
PHD, Texas A&M University, 2011

Bujnoch, Zachary W, Associate Professor of the Practice
Biomedical Engineering
MBA, University of Texas - San Antonio, 2022

Carrell, Travis James, Instructional Assistant Professor
Biomedical Engineering
PHD, Texas A&M University, 2022

Ceylan Koydemir, Hatice, Assistant Professor
Biomedical Engineering
PHD, MIDDLE EAST TECHNICAL UNIVERSITY, 2013

Chukkapalli, Sasanka S, Research Assistant Professor
Biomedical Engineering
PHD, Post Graduate Institute of Medical Education & Research (PGIMER)
Chandigarh, India, 2009

Cote, Gerard L, Professor
Biomedical Engineering
PHD, University of Connecticut, 1990

Criscione, John C, Professor
Biomedical Engineering
MD, Johns Hopkins University, 1999
PHD, Johns Hopkins University, 1999

Diaz Garelli, Franck, Instructional Associate Professor
Biomedical Engineering
PHD, University of Texas Health Science Center Houston, 2016

Gaharwar, Akhilesh K, Professor
Biomedical Engineering
PHD, Purdue University, 2011

George, Jason T, Assistant Professor
Biomedical Engineering
MD, Baylor College of Medicine, 2020
PHD, Rice University, 2019

Gibbs, Holly C, Research Assistant Professor
Biomedical Engineering
PHD, Texas A&M University, 2014

Grunlan, Melissa A, Professor
Biomedical Engineering
PHD, University of Southern California, 2004

Hanks, John Philip, Professor of the Practice
Biomedical Engineering
MS, University of Texas, Austin, 1989

Haridas, Balakrishna, Professor of the Practice
Biomedical Engineering
PHD, University of Cincinnati, 2001

Hedman, Annie, Instructional Assistant Professor
Biomedical Engineering
PHD, Texas A&M University-College Station, 2022

Horn, John D, Instructional Assistant Professor
Biomedical Engineering
PHD, Texas A&M University, 2018

Horn, Staci Jessen, Research Assistant Professor
Biomedical Engineering
PHD, Texas A&M University, 2016

Hoyt, Kenneth L, Professor
Biomedical Engineering
PHD, Drexel University, 2005

Hwang, Wonmuk, Professor
Biomedical Engineering
PHD, Boston University, 2001

Jain, Abhishek, Associate Professor
Biomedical Engineering
PHD, Boston University, 2012

Kaunas, Roland R, Associate Professor
Biomedical Engineering
PHD, University of California at San Diego, 2003

Lele, Tanmay P, Professor
Biomedical Engineering
PHD, Purdue University, 2002

Ligler, Frances S, Professor
Biomedical Engineering
DSC, Oxford University, Oxford, UK, 2000
PHD, Oxford University, Oxford, UK, 1977

Mabbott, Samuel Bernard, Associate Professor
Biomedical Engineering
PHD, University of Manchester, Manchester Interdisciplinary Biocentre, 2012

Maitland, Duncan J, Senior Professor
Biomedical Engineering
PHD, Northwestern University, 1995

McDougall, Mary P, Professor
Biomedical Engineering
PHD, Texas A&M University, 2004

McShane, Mike, Professor
Biomedical Engineering
PHD, Texas A&M University, 1999

Menon, Jyothi U., Associate Professor
Biomedical Engineering
PHD, University of Texas, Southwestern Medical Center, 2014

Monroe, Mary B, Associate Professor
Biomedical Engineering
PHD, Texas A&M University, 2013

Montgomery, William D, Visiting Associate Professor of the Practice
Biomedical Engineering
MS, US Army War College, 2016

Patrick, Charles W, Professor of the Practice
Biomedical Engineering
PHD, Rice University, 1994

Pires, Layla, Assistant Professor
Biomedical Engineering
PHD, University of Sao Paulo, 2017

Raghavan, Shreya Artha, Associate Professor
Biomedical Engineering
PHD, Virginia Tech-Wake Forest University School of Biomedical Engineering and Sciences, 2014

Rahbar, Elaheh, Associate Professor
Biomedical Engineering
PHD, Texas A&M University, 2011

Reynolds, Jeff, Professor of the Practice
Biomedical Engineering
PHD, Purdue University, 1996

Southard, Derek, Visiting Associate Professor of the Practice
Biomedical Engineering
MBA, Penn State, 2020

Tian, Limei, Associate Professor
Biomedical Engineering
PHD, Washington University in St. Louis, 2014

Timmins, Lucas, Associate Professor
Biomedical Engineering
PHD, Texas A&M University, 2010

Walsh, Alexandra, Associate Professor
Biomedical Engineering
PHD, Vanderbilt University, 2015

Ware, Taylor H, Professor
Biomedical Engineering
PHD, University of Texas at Dallas, 2013

Yakovlev, Vladislav V, Professor
Biomedical Engineering
PHD, Moscow State University, 1990

Zhao, Feng, Professor
Biomedical Engineering
PHD, Tianjin University, 2001

Majors

- Bachelor of Science in Biomedical Engineering (p. 599)

Minors

- Biomedical Engineering Minor (p. 601)

Biomedical Engineering - BS

This program allows students to gain a comprehensive foundation in biomedical engineering, opening doors to multiple career paths in industry, research and advanced professional studies.

Department Head: M. McShane

Director of Undergraduate Programs: C. Patrick

Committed to solving the world's greatest health problems through the exploration of new ideas, integrated research and innovation, the Department of Biomedical Engineering at Texas A&M University is producing the next generation of biomedical engineers in industry and at tier-one research institutions, developing new technologies and new jobs, and achieving revolutionary advancements for the future of health care.

The undergraduate curriculum in biomedical engineering involves the development and application of engineering science and technology for living and medical systems. Based around a basic core of courses, the bachelor's degree is designed to prepare students for team involvement with other engineers and with physicians and life scientists to solve a wide array of biological and medical problems. Elective courses are included to accommodate individual student specialty interests within the fields of biomechanics, cellular and molecular bioengineering, computational bioengineering, medical devices, regenerative medicine, or imaging, sensing, and digital health. Students interested in specialized professional school programs such as medical school can meet admission prerequisites through slight modifications and additions to the curriculum.

The department offers a Bachelor of Science degree and a minor. For more information, including degree requirements and application deadlines, visit <http://engineering.tamu.edu/biomedical> (<http://engineering.tamu.edu/biomedical/>).

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear

engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours

⁶ Writing intensive (W) course.

⁷ All students are required to complete a high-impact experience in order to graduate. A list of possible high-impact experiences is available in the BMEN advising office.

⁸ Technical electives are to be selected from the course list below.

Students must select one of the following tracks and take 15 hours from within that track: Bioinstrumentation, Biomaterials, Biomechanics, or Biomolecular and Cellular Engineering. Course selection should be done in consultation with student's advisor and track coordinator, and may use up to 3 hours of BMEN 491. Please note ACCT 640 is for students pursuing the MSF program and ENGR 410 is for students pursuing the International Engineering Certificate.

Biomedical Engineering - Minor

The Department of Biomedical Engineering offers a minor to students within the College of Engineering who are interested in biomedical applications of engineering related to the sub-specialty fields of biomechanics, cellular and molecular bioengineering, computational bioengineering, medical devices, regenerative medicine, or imaging, sensing, and digital health. Students interested in the Biomedical Engineering minor can visit the Biomedical Engineering Minor website (<https://engineering.tamu.edu/biomedical/academics/degrees/undergraduate/minor.html>).

Total Semester Credit Hours

15

¹ Students must select courses exclusively from one of the six areas represented and not mixed.

Students must be admitted to a degree sequence in the College of Engineering or the degree sequence in Biological and Agricultural Engineering. Students should know that all tracks require completion of math through Differential Equations (MATH 308). Students may use no more than 6 hours from their home department to satisfy minor requirements. All substitutions must be approved by the BMEN academic advisor and director. The application is available on the Biomedical Engineering website. Applications are reviewed on a competitive basis at the end of every fall and spring semester after final grades are posted.

Artie McFerrin Department of Chemical Engineering

Chemical engineering is a broad field of engineering and thus requires a diverse preparation in science and engineering. Distinguishing chemical engineering from other engineering disciplines is its use of chemical and biochemical reactions to produce products and materials for society. Traditionally, chemical engineers have provided

leadership in the petrochemical, refining, chemical, polymer, and food processing industries. Because of strengths in the foundation sciences of mathematics, chemistry, physics and biology, as well as in engineering, this leadership role has now extended to the biochemical, biomedical, high-tech materials, semi-conductor and microelectronics, nanotechnology, environmental quality, safety, and a host of other areas. Chemical engineers have consistently commanded starting salaries among the highest of all college graduates because of the combined breadth and depth of their education.

The mission of the Artie McFerrin Department of Chemical Engineering at Texas A&M is to educate and prepare students for national and international leadership roles in industry, government, and academia; to attract top students to chemical engineering; to define and develop new directions in chemical engineering fundamentals and practices, and in chemical engineering education and curricula; to be a valuable resource and service base to the State and to industry; and to provide leadership in solving problems of social and economic importance.

Objectives of the chemical engineering program are that

1. graduates will have successful chemical engineering careers in industry, academia or government,
2. graduates will obtain, apply and transfer knowledge across disciplines and into emerging areas of chemical engineering and related fields,
3. graduates will communicate effectively, be leaders in their fields and work competently in interdisciplinary teams, and
4. graduates will be professionally responsible and ethical and engage in professional activities to impact the society on a global scale.

To supplement coursework, well-equipped laboratories provide our students with experiences in operating and analyzing a variety of unit operations and process control equipment and in the use of the modern computational tools and software used in chemical engineering. The department offers vibrant undergraduate research, co-op and study abroad programs that provide students with additional enrichment and experiential opportunities.

The undergraduate program in Chemical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org, and compares favorably with the best in the nation.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Faculty

Abbassi, Rouzbeh, Professor
Chemical Engineering
PHD, Memorial University, 2010

Abdel-Wahab, Ahmed I, Professor
Chemical Engineering-Qatar Campus
PHD, Texas A&M University, 2003

Majors

- Bachelor of Science in Chemical Engineering (p. 605)

Certificates

- Engineering Therapeutics Manufacturing Certificate (p. 606)
- Safety Engineering Certificate (<https://catalog.tamu.edu/undergraduate/engineering/chemical/safety-engineering-certificate/>)

Chemical Engineering - BS

This program provides a strong foundation in chemical engineering principles and practice, integrating fundamentals with real-world applications and design experience, preparing graduates for multiple industry roles.

The chemical engineering curriculum provides a balanced education in virtually all aspects of chemical engineering principles and practice and includes education in economics, language, philosophy and culture and communication. Chemical engineering courses emphasize fundamentals and methods that are applicable to the analysis, development, design and operation of a wide variety of chemical engineering systems and processes, thereby providing the necessary background for entry into the wide array of activities described above. At the same time, specific example applications provide the student with insight into the ability of chemical engineers to work in such a variety of areas. The curriculum is structured to offer students an opportunity to extend and apply the fundamentals developed in the basic courses toward more focused areas of specialization. The sequence of courses converges in the senior year into a comprehensive capstone design course that includes elements of economics, safety and environmental issues. The course provides an experience much like that of an industry design project. It is this philosophy of fundamentals, applications and design that has enabled our chemical engineering graduates to adapt readily to a dynamic and rapidly changing world and to solve problems they have not previously experienced.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year		Semester
Fall		Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3
ENGR 102	Engineering Lab I - Computation ¹	2
MATH 151	Engineering Mathematics I ^{1,2}	4
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16
Spring		
ENGR 216/PHYS 216	Experimental Physics and Engineering Lab II - Mechanics ¹	2
MATH 152	Engineering Mathematics II ¹	4
PHYS 206	Newtonian Mechanics for Engineering and Science ¹	3
University Core Curriculum (p. 26) ³		3
Select one of the following:		3-4
CHEM 120	Fundamentals of Chemistry II ^{1,4}	
University Core Curriculum (p. 26) ^{3,5}		
Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative

arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

Second Year

Fall

		Semester Credit Hours
CHEM 201	Elementary Chemical Engineering Lab	1
CHEM 204	Elementary Chemical Engineering	3
ENGR 217/ PHYS 217	Experimental Physics and Engineering Lab III - Electricity and Magnetism	2
MATH 251	Engineering Mathematics III ¹	3
PHYS 207	Electricity and Magnetism for Engineering and Science ¹	3
Select one of the following: ¹		4
CHEM 227 & CHEM 237	Organic Chemistry I and Organic Chemistry Laboratory	
CHEM 257	Organic Chemistry I - Structure and Function	
Semester Credit Hours		16

Spring

CHEM 205	Chemical Engineering Thermodynamics I	3
ENGL 210	Technical and Professional Writing	3
MATH 308	Differential Equations ¹	3
Select one of the following: ¹		4
CHEM 228 & CHEM 238	Organic Chemistry II and Organic Chemistry Laboratory	
CHEM 258	Organic Chemistry II - Reactivity and Applications	
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16

Third Year

Fall

CHEM 304	Chemical Engineering Fluid Operations	3
CHEM 320	Numerical Analysis for Chemical Engineers	3
CHEM 322	Chemical Engineering Materials	3
CHEM 354	Chemical Engineering Thermodynamics II	3
CHEM 481	Seminar	1
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16

Spring

CHEM 322	Physical Chemistry for Engineers ¹	3

CHEM 323	Chemical Engineering Heat Transfer Operations	3
CHEM 324	Chemical Engineering Mass Transfer Operations	3
CHEM 364	Kinetics and Reactor Design	3
CHEM 374	Chemical Engineering Process Industries	2
University Core Curriculum (p. 26) ³		3
High Impact Experience ⁷		0
CHEM 399	Mid-Curriculum Professional Development	
Semester Credit Hours		17

Fourth Year

Fall

CHEM 425	Process Integration, Simulation and Economics	3
CHEM 432	Chemical Engineering Laboratory I	2
CHEM 461	Process Dynamics and Control	3
CHEM 482	Bioprocess Engineering	3
University Core Curriculum ³		3
CHEN specialty options ⁶		3
Semester Credit Hours		17

Spring

CHEM 426	Chemical Engineering Plant Design	3
CHEM 433	Chemical Engineering Laboratory II	2
CHEM 455/ SENG 455	Process Safety Engineering	3
University Core Curriculum (p. 26) ³		3
CHEN specialty options ⁶		3
Semester Credit Hours		14
Total Semester Credit Hours		96

⁶ For a list of approved specialty options, please see a chemical engineering advisor.

⁷ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the CHEN advising office.

A grade of C or better is required in all CHEN courses.

Total Program Hours 128 Engineering Therapeutics Manufacturing - Certificate

The Engineering Therapeutics Manufacturing Certificate is intended to meet the requirements of industry by educating engineering Bachelor of Science graduates how to economically, ecologically and safely design and operate equipment used for the production and separation of biological materials.

By the end of the certificate program, students will be able to:

1. understand the processing of biological materials
2. analyze functions and properties of biological materials
3. understand the impact of the use/misuse of biological materials

4. understand the life cycle and evolution of biological materials
5. design, operate and optimize biological process units

For additional information, contact the Engineering Therapeutics Manufacturing Certificate coordinator or the Chemical Engineering Advising Offices, 1st Floor Jack E Brown Chemical Engineering Building, (979) 845-3361.

Safety Engineering - Certificate

Designed for professionals aspiring to make a tangible impact, graduates emerge equipped to enhance safety protocols across diverse sectors, from offshore and onshore oil and gas facilities to renewable energy and carbon sequestration processes.

The graduate certificate in Safety Engineering requirements are achievable and relevant to all engineering disciplines. Graduate students in any engineering discipline can choose this option as part of their curriculum. Through this option, students are exposed to principles and case histories from a wide variety of engineering disciplines. The curriculum emphasizes the interdisciplinary nature of safety, health, and environmental engineering. It also emphasizes the knowledge and skills most likely to be needed by any engineer, as well as those who specialize in Safety Engineering.

The graduate certificate in Safety Engineering seeks to serve all engineering disciplines equally well.

This program is also approved for delivery via asynchronous distance education technology.

Program Requirements

The certificate requires 12 hours of coursework. It is the intent that these hours are applicable to the hours necessary for graduation and not an additional load, but this will depend on the disciplines' specific course requirements. Receiving the certificate is not dependent on conferral of a degree. Of the total hours required for the certificate, six hours are dedicated to Basic Topics and are required for everyone in the program. An additional six hours address more specific or advanced topics. The advanced topics are cross-listed with numerous departments.

Code	Title	Semester Credit Hours
SENG 655/ CHEN 655	Process Safety Engineering	3

Zachry Department of Civil and Environmental Engineering

Introduction

The Zachry Department of Civil and Environmental Engineering (<http://engineering.tamu.edu/civil/>) at Texas A&M University offers two undergraduate degree programs: Bachelor of Science in Civil Engineering and Bachelor of Science in Environmental Engineering.

What is Civil Engineering?

Civil engineers plan, design, supervise the construction, operate, maintain, inspect, retrofit, and manage many of the facilities and systems in both public and private sectors that are essential to modern life. The civil engineering profession is one of the most stable and most diverse of the engineering disciplines. Civil engineers are employed by consulting firms, public agencies, and start and operate their own businesses. Workplaces range from construction sites to design offices. Most civil engineers work with some engineering or construction aspect of private and/or public facilities, such as airports, bridges, buildings, coastal structures, dams, environmental remediation of contaminated sites, harbors, highways, offshore structures, pipelines, railroads, transportation systems, tunnels, water collection systems, water distribution systems, water and wastewater treatment facilities, and waterways. Civil engineers are on the

forefront of applying the newest technology innovations in engineering and construction.

Civil engineering projects are unique because they require individual planning, analysis, design, construction supervision, performance monitoring, management, and retrofitting. Civil engineering projects often require technical, governmental, legal, financial, and social evaluations. The primary objective is to provide the best service for the users while minimizing costs and other undesirable impacts.

What is Environmental Engineering?

Environmental engineers use a multidisciplinary approach to solve environmental challenges facing public and environmental health, such as water treatment, waste management, and climate change. Environmental engineers work to protect human health and welfare while minimizing the adverse effects of human activity on the environment. Environmental engineers are also employed by consulting firms, public agencies, and start and operate their own businesses.

Department Mission and Objectives

Mission Statement

The mission of the Zachry Department of Civil and Environmental Engineering (<http://engineering.tamu.edu/civil/>) at Texas A&M University is to prepare our graduates to become professional engineers and leaders in the engineering profession by providing our students with a solid education that will enable them to integrate fundamental scientific engineering principles and that will couple with the latest technological advances to facilitate the development of their problem-solving skills. Additionally, the department provides opportunities for educational enhancement through meaningful interactions with the profession. In summary, we expect our graduates to be fully prepared for life-long learning experiences that will strengthen their abilities to successfully and effectively solve the complex engineering problems facing society.

Objectives

The faculty of the Zachry Department of Civil and Environmental Engineering strives to ensure that our ever-evolving educational programs accomplish several objectives.

1. Our faculty must prepare the students to address the current and future civil and environmental engineering needs of the State of Texas, the nation and the world by being able to recognize the important geopolitical and public policy needs; and solve technical problems.
2. The department provides a curriculum that integrates scientific and technical knowledge with an appreciation for social, economic, and political concerns.
3. The curriculum and programs provide opportunities for our students to:
 - a. build leadership skills,
 - b. learn professionalism and ethical responsibility, and
 - c. develop an understanding of the need to engage in lifelong learning.
4. Our faculty promote the highest academic standards of excellence, quality, and ethics in both our undergraduate and graduate programs, and in doing so create both a culture of excellence and a community of scholars.
5. Through our programs, our faculty and graduates provide local, state, national, and international leadership to a profession that must

solve the civil and environmental engineering problems facing an increasingly complex society.

BS in Civil Engineering Program Educational Objectives

The program educational objectives for the undergraduate civil engineering program within the Zachry Department of Civil and Environmental Engineering at Texas A&M University are as follows.

Within a few years after graduation, Texas A&M University Civil Engineering graduates will:

- Actively engage in civil engineering practice or pursue graduate programs in civil engineering or related fields.
- Achieve a level of technical competency allowing them to become licensed professional engineers.
- Complement their education through advanced studies, professional development, and continuing education courses.

Accreditation

The undergraduate program in civil engineering within the Zachry Department of Civil and Environmental Engineering at Texas A&M is accredited by the Engineering Accreditation Commission of ABET, www.abet.org (<http://www.abet.org/>).

Areas of Specialization

Students pursuing a BS in Civil Engineering can follow a general track or specialize in one of seven areas. Eight tracks are available for undergraduate study within Civil Engineering as follows:

1. General Civil Engineering
2. Coastal and Ocean Engineering
3. Construction Engineering and Management
4. Environmental Engineering
5. Geotechnical Engineering
6. Structural Engineering
7. Transportation and Infrastructure Materials Engineering
8. Water Resources Engineering

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Graduate Degrees

Graduate programs in civil engineering are also available. These programs allow further specialization and offer more in-depth study to address more complex technical and management issues. Graduate degrees also offer additional employment opportunities.

BS in Environmental Engineering Program Educational Objectives

The program educational objectives for the undergraduate environmental engineering program within the Zachry Department of Civil and Environmental Engineering at Texas A&M University are as follows.

Within a few years after graduation, Texas A&M University Environmental Engineering graduates will:

- Actively engage in environmental engineering practice or pursue graduate programs in environmental engineering or related fields.

- Achieve a level of technical competency allowing them to become licensed professional engineers.
- Complement their education through advanced studies, professional development, and continuing education courses.

Program Highlights

Our environmental engineering curriculum is unique in that it:

1. Has a specific focus on the protection of public and environmental health by solving environmental challenges;
2. Showcases a broad range of coursework to pursue specific environmental interests in natural or engineered systems;
3. Is multidisciplinary in every approach, melding earth science, life science, chemistry, social science, and engineering;
4. Provides the tools to develop solutions to solve emerging and existing issues such as water treatment, climate change, and other environmental challenges.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Graduate Degrees

Graduate programs in civil engineering with a focus on environmental engineering are also available. These programs allow further specialization and offer more in-depth study to address more complex technical and management issues. Graduate degrees also offer additional employment opportunities.

Majors

- Bachelor of Science in Civil Engineering, Coastal Engineering Track (p. 611)
- Bachelor of Science in Civil Engineering, Construction Engineering and Management Track (p. 614)
- Bachelor of Science in Civil Engineering, Environmental Engineering Track (p. 616)
- Bachelor of Science in Civil Engineering, General Civil Engineering Track (p. 618)
- Bachelor of Science in Civil Engineering, Geotechnical Engineering Track (p. 620)
- Bachelor of Science in Civil Engineering, Structural Engineering Track (p. 623)
- Bachelor of Science in Civil Engineering, Transportation and Infrastructure Materials Engineering Track (p. 625)
- Bachelor of Science in Civil Engineering, Water Resources Engineering Track (p. 627)
- Bachelor of Science in Environmental Engineering (p. 630)

Civil Engineering - BS, Coastal Engineering Track

The Coastal Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across civil engineering with a focus on working in coastal environments.

The focus electives prepare students to analyze and design civil engineering systems suited to aspects of the coastal region. The track is appropriate for a career related to coastal engineering and resilience, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3

Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

⁶ A total of 35 hours of technical coursework is required. Technical coursework is divided into five categories: breadth courses, design courses, focus courses, a science course, and a capstone design course. The total number of hours between breadth, design, and focus courses must add up to 29 hours. The choice of courses to be taken in each of the five categories depends on the track chosen and must be made in consultation with the student's advisor and/or the Civil and Environmental Engineering Undergraduate Student Services Office to ensure pre- and co-requisites are satisfied. Capstone design courses must include more than one civil engineering context.

⁷ All students must take at least two courses in their major that are designated as writing intensive (W). CVEN 207 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

Total Program Hours 128

Coastal Engineering Track - Technical Coursework

Technical coursework for the BS in Civil Engineering, Coastal Engineering Track are composed of breadth courses (10-12 semester credit hours), design courses (6-15 semester credit hours), focus courses (2-13 semester credit hours), a science course (3 semester credit hours), and a capstone design course (3 semester credit hours), as delineated below, for a total of 35 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil and Environmental Engineering Undergraduate Student Services Office.

⁸ The following courses satisfy the laboratory course requirement, CVEN 304/EVEN 304, CVEN 336, CVEN 342 or CVEN 343, CVEN 365, EVEN 404.

⁹ Up to 2 hours of CVEN 485 or CVEN 491 may be used.

Civil Engineering - BS, Construction Engineering and Management Track

This program develops knowledge, tools and methods that can add value to construction projects and organizations with a focus on risk management.

The Construction Engineering and Management Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in the fundamentals of construction engineering and project management. This track blends the principles of basic science, engineering, and technology with a strong component of business coursework. This track is appropriate for students interested in a career in the construction industry.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. Civil Engineering - BS, General Civil Engineering Track

The General Civil Engineering Track to fulfill the BS in Civil Engineering degree emphasizes breadth across the civil engineering field.

Students take courses in all major sub-disciplines of civil engineering with advanced design and focus electives allowing deeper learning in selected areas. This track is appropriate for a career in any area of civil engineering, with particular relevance for those interested in public works, land development, and general civil, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours

Total Semester Credit Hours	31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

¹⁰ Up to 2 hours of CVEN 485 or CVEN 491 may be used. A proposal must be submitted to the undergraduate office and approved before credit can be awarded towards the degree.

Civil Engineering - BS, Geotechnical Engineering Track

This program focuses on geotechnical engineering, equipping students for engineering design and management of infrastructure roles.

The Geotechnical Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in applied soil mechanics and foundation engineering, as well as civil engineering sub-disciplines with

strong geotechnical engineering connections such as structures, water resources, construction, transportation, environmental, and coastal and ocean engineering. This track is appropriate for those wishing to pursue careers in engineering design and management of infrastructure in a wide array of sectors that can include energy, transportation, and water resources.

Civil Engineering - BS, Structural Engineering Track

This program in structural engineering is designed to provide students with a fundamental understanding of the basic sciences and engineering applied to structural systems.

The Structural Engineering track to fulfill the BS in Civil Engineering degree provides coursework in the areas of structural analysis and structural design that equip the student to analyze and design the frameworks that support buildings, bridges, offshore installations, and civil infrastructure projects. This track is appropriate for careers related to the structural design of engineered facilities to safely resist the forces found in their environment, and for those planning on further specialization in graduate studies.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. ⁸ The following courses satisfy the laboratory course requirement, CVEN 342 or CVEN 343, CVEN 365.

⁹ Only one of the following courses, CVEN 314 or CVEN 315, can be used to meet the focus elective.

¹⁰ Up to 2 hours of CVEN 485 or CVEN 491 may be used. A proposal must be submitted to the undergraduate office and approved before credit can be awarded towards the degree.

Civil Engineering - BS, Transportation and Infrastructure Materials Engineering Track

This track is appropriate for those wishing to pursue careers in engineering related to the planning, design, construction, operation, and maintenance of various elements of the transportation system, including roads, rail, transit, and aviation.

The Transportation and Infrastructure Materials Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in transportation and infrastructure materials engineering. This includes the planning, design, and operations of transportation facilities along with the design, construction, and maintenance of transportation infrastructure.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1

Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

⁶ A total of 35 hours of technical coursework is required. Technical coursework is divided into five categories: breadth courses, design courses, focus courses, a science course, and a capstone design course. The total number of hours between breadth, design, and focus courses must add up to 29 hours. The choice of courses to be taken in each of the five categories depends on the track chosen and must be made in consultation with the student's advisor and/or the Civil and Environmental Engineering Undergraduate Student Services Office to ensure pre- and co-requisites are satisfied. Capstone design courses must include more than one civil engineering context.

⁷ All students must take at least two courses in their major that are designated as writing intensive (W). CVEN 207 and CVEN 424 taken at Texas A&M satisfy this requirement. Other CVEN courses may be approved as W courses at a later date. A grade of C or better is required in these courses.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

Total Program Hours 128

Transportation and Infrastructure Materials Engineering Track - Technical Coursework

Technical coursework for the BS in Civil Engineering, Transportation and Infrastructure Materials Engineering Track are composed of breadth courses (12 semester credit hours), design courses (9 semester credit hours), focus courses (8 semester credit hours), a science course (3 semester credit hours), and a capstone design course (3 semester credit hours), as delineated below, for a total of 35 semester credit hours. A substitution for any course in the track must be approved in writing by the Civil and Environmental Engineering Undergraduate Student Services Office.

¹⁰ Up to 2 hours of CVEN 485 or CVEN 491 may be used.

Civil Engineering - BS, Water Resources Engineering Track

This program specializes in hydraulics and hydrology, preparing students for careers in water resource design and management.

The Water Resources Engineering Track to fulfill the BS in Civil Engineering degree emphasizes specialized coursework in applied hydraulics and hydrology as well as civil engineering sub-disciplines with strong water resources connections such as environmental, transportation, geotechnical, and coastal engineering. This track is appropriate for those wishing to pursue careers in engineering design and management for water quantity and quality issues.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. Environmental Engineering - BS

The BS in Environmental Engineering degree coursework is specifically designed to educate students to solve environmental challenges facing public and environmental health, such as water treatment, waste management, and climate change.

This degree offers a broad range of coursework in the natural sciences and engineering, providing a multidisciplinary approach that merges with engineering principles to solve emerging and existing environmental issues. The program is appropriate for those who wish to protect human health and welfare while minimizing the adverse effects of human activity on the environment.

This program is approved to be offered at the Texas A&M University at Galveston campus.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. Semester Credit Hours		14
Total Semester Credit Hours		97

⁶ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the EVEN advising office.

⁷ All students must take at least two courses in their major that are designated as writing intensive (W) or communications intensive (C). EVEN 201 and EVEN 400 taken at Texas A&M satisfy this requirement. Other EVEN courses may be approved as W/C courses at a later date. A grade of C or better is required in these courses.

⁸ Select from ATMO 363, BAEN 464, BAEN 468, BESC 357, BESC 367, BESC 403, CVEN 306, CVEN 307, CVEN 315, CVEN 454, CVEN 455, ECCB 420, EVEN 485, EVEN 491, GEOG 410/OCNG 412, GEOG 467, MTDE 433, OCEN 362, OCNG 350, SCSC 405, SENG 310.

⁹ Up to 3 hours of EVEN 485 or EVEN 491 may be used. A proposal must be submitted to the undergraduate office and approved before credit can be awarded towards the degree.

A grade of C or better is required in all science, mathematics and engineering courses taken to satisfy degree requirements.

Total Program Hours 128

Department of Computer Science and Engineering

Computing devices are all around us and computer algorithms support almost every aspect of our daily activities, decisions, and transactions. Our majors are at the center of these exciting activities; in envisioning new forms of services, in applications to address existing or emerging needs, in formulation and evaluation of algorithms to build the necessary computer and networking systems, and in development of the necessary software infrastructures to deploy the resulting solutions. In this, they rely on skills learned in our degree programs; skills that include algorithm design and analysis, programming languages, computer system design, artificial intelligence and machine learning, graphics, human-computer interaction, and many more. Our graduates are found in a wide range of industries, both public and private, reflecting the ubiquity of computing in society.

The Department of Computer Science and Engineering prepares our students to become computing experts who are equipped to address the many and varying challenges that they will encounter in their careers. We offer three degree programs, which are designed to address a variety of student goals and industry demands.

Mission

The mission of the Department of Computer Science is to develop the human and intellectual resources needed to meet the future technological challenges in the field of computing. This includes developing computer scientists and computer engineers for positions of leadership in industry, government, and academia.

BS in Computer Science

The curriculum in Computer Science is designed to prepare students to enter the rapidly expanding computer field. Curricula and courses are based upon recommendations by the Institute of Electrical and Electronic Engineering Computer Society and the Association for Computing Machinery. The Computer Science program is accredited by the Computing Accreditation Commission of ABET, www.abet.org.

BS in Computer Engineering

The Computer Engineering curricula provide a balanced view of hardware, software, hardware-software trade-offs, analysis, design, and implementation techniques. It is a dynamic and broadly interdisciplinary field that continues to experience rapid growth that impacts every area of human endeavor. The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

BA in Computer Science

The Bachelor of Arts in Computer Science allows students to couple foundational skills in computing, both theoretical and practical, with a sound knowledge of an intersecting area of interest.

Faculty

Azad, Ariful, Associate Professor
Computer Science & Engineering
PHD, Purdue University, 2014

Beideman, Calvin J, Instructional Assistant Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 2023

Bettati, Riccardo, Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 1994

Botacin, Marcus Felipe, Assistant Professor
Computer Science & Engineering
PHD, Federal University of Paraná (UFPR), 2021

Budimlic, Zoran, Instructional Associate Professor
Computer Science & Engineering
PHD, Rice University, 2001

Carlisle, Martin C, Professor of the Practice
Computer Science & Engineering
PHD, Princeton University, 1993

Caverlee, James, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 2007

Chen, Jianer, Professor
Computer Science & Engineering
PHD, Columbia University, 1990
PHD, New York University, 1987

Choe, Yoonsuck, Professor
Computer Science & Engineering
PHD, The University of Texas at Austin, 2001

Chu, Wenhui, Instructional Assistant Professor
Computer Science & Engineering
PHD, University of Houston, 2021

Crawford, Victoria G, Assistant Professor
Computer Science & Engineering
PHD, University of Florida, 2022

Da Silva, Dilma M, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 1997

Davis, Timothy A, Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 1989

Duysak, Alpaslan, Instructional Associate Professor
Computer Science & Engineering
PHD, Bournemouth University, 2004

Galanti, Tomer, Assistant Professor
Computer Science & Engineering
PHD, Tel Aviv University, 2021

Garay, Juan A, Professor
Computer Science & Engineering
PHD, The Pennsylvania State University, 1989

Goktas, Unal, Instructional Associate Professor
Computer Science & Engineering
PHD, Colorado School of Mines, 1998

Gu, Guofei, Professor
Computer Science & Engineering
PHD, Georgia Institute of Technology, 2008

Gutierrez-Osuna, Ricardo, Professor
Computer Science & Engineering
PHD, North Carolina State University, 1998

Hamilton, John Andrew, Professor
Computer Science & Engineering
PHD, Texas A&M University, 1996

Hammond, Tracy A, Professor
Computer Science & Engineering
PHD, Massachusetts Inst of Technology, 2007

Hawley, Douglas D, Instructional Associate Professor
Computer Science & Engineering
EDD, University of Missouri - Columbia, 2005

Houngninou, David Kebo, Instructional Associate Professor
Computer Science & Engineering
PHD, Southern Methodist University, 2017

Huang, Kuan-Hao, Assistant Professor
Computer Science & Engineering
PHD, University of California, Los Angeles, 2023

Huang, Ruihong, Associate Professor
Computer Science & Engineering
PHD, University of Utah, 2014

Huang, Shaoming, Professor
Computer Science & Engineering
PHD, Hong Kong University of Science and Technology, 2012

Ioerger, Thomas R, Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 1996

Ji, Shuiwang, Professor
Computer Science & Engineering
PHD, Arizona State University, 2010

Jiang, Anxiao, Professor
Computer Science & Engineering
PHD, California Institute of Technology, 2004

Jimenez, Daniel A, Professor
Computer Science & Engineering
PHD, The University of Texas at Austin, 2002

Kalantari, Nima, Associate Professor
Computer Science & Engineering
PHD, University of California, Santa Barbara, 2015

Keyser, John C, Professor
Computer Science & Engineering
PHD, University of North Carolina at Chapel Hill, 2000

Kim, Eun J, Professor
Computer Science & Engineering
PHD, The Pennsylvania State University, 2003

Kim, Jeeun, Assistant Professor
Computer Science & Engineering
PHD, University of Colorado - Boulder, 2019

Klappenecker, Andreas, Professor
Computer Science & Engineering
PHD, Universitat Karlsruhe, 1998

Kuhle, Alan D, Assistant Professor
Computer Science & Engineering
PHD, University of Florida, 2018

Kumar, Sandeep, Associate Professor of the Practice
Computer Science & Engineering
PHD, Purdue University, 1995

Kumar, Shreyas, Professor of the Practice
Computer Science & Engineering
MS, Texas A&M University, 2005

Lee, Hyunyoung, Senior Lecturer
Computer Science & Engineering
PHD, Texas A&M University, 2001

Leyk, Teresa S, Instructional Professor
Computer Science & Engineering
PHD, Australian National University, 1998

Leyk, Zbigniew, Professor of the Practice
Computer Science & Engineering
PHD, University of Warsaw, 1988

Lightfoot, Robert H, Associate Professor of the Practice
Computer Science & Engineering
PHD, Texas A&M University, 2024

Loguinov, Dmitri, Professor
Computer Science & Engineering
PHD, City University of New York, 2002

Lupoli, Shawn V, Instructional Assistant Professor
Computer Science & Engineering
MS, Towson University, 2004

Mahapatra, Rabi N, Professor
Computer Science & Engineering
PHD, Indian Institute of Technology, Kharagpur, 1992

Mahmood, Suleman, Instructional Assistant Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 2023

Merchant, Amit Ashok, Professor of the Practice
Computer Science & Engineering
MS, Carnegie Mellon University, 1989

Moore, Michael, Instructional Associate Professor
Computer Science & Engineering
PHD, Texas A&M University, 2007

Mortazavi, Bobak Jack, Associate Professor
Computer Science & Engineering
PHD, University of California, Los Angeles, 2014

Muzahid, Abdullah Al, Associate Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 2012

Nguyen, Khanh, Assistant Professor
Computer Science & Engineering
PHD, University of California, Los Angeles, 2019

Nguyen, Tung, Instructional Associate Professor
Computer Science & Engineering
PHD, Iowa State University, 2013

O'Kane, Jason M, Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 2007

Quinn, Michael D, Associate Professor of the Practice
Computer Science & Engineering
MS, University of Southern California, 1978

Ritchey, Philip, Instructional Associate Professor
Computer Science & Engineering
PHD, Purdue University, 2015

Sarin, Vivek, Associate Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 1997

Saxena, Nitesh, Professor
Computer Science & Engineering
PHD, University of California, Irvine, 2006

Schaefer, Scott D, Professor
Computer Science & Engineering
PHD, Rice University, 2006

Sharon, Guni, Associate Professor
Computer Science & Engineering
PHD, Ben-Gurion University, 2015

Shell, Dylan A, Professor
Computer Science & Engineering
PHD, University of Southern California, 2008

Shipman, Frank M, Professor
Computer Science & Engineering
PHD, University of Colorado, 1993

Stoleru, Radu, Professor
Computer Science & Engineering
PHD, University of Virginia, 2007

Sueda, Shinjiro, Associate Professor
Computer Science & Engineering
PHD, University of British Columbia, 2010

Sze, Sing H, Associate Professor
Computer Science & Engineering
PHD, University of Southern California, 2000

Taele, Paul P, Instructional Associate Professor
Computer Science & Engineering
PHD, Texas A&M University, 2019

Thomas, Shawna, Instructional Associate Professor
Computer Science & Engineering
PHD, Texas A&M University, 2010

Tran, Han Duc, Instructional Assistant Professor
Computer Science & Engineering
PHD, The University of Texas at Austin, 2010

Tsai, Chia-Che, Assistant Professor
Computer Science & Engineering
PHD, Stony Brook University, 2017

Tu, Zhengzhong, Assistant Professor
Computer Science & Engineering
PHD, The University of Texas at Austin, 2022

Tyagi, Aakash, Professor of the Practice
Computer Science & Engineering
PHD, University of Louisiana, 1993

Veldt, Nate, Assistant Professor
Computer Science & Engineering
PHD, Purdue University, 2019

Wade, Pauline C, Professor of the Practice
Computer Science & Engineering
MS, Columbia University, 1991

Walker, Duncan M, Professor
Computer Science & Engineering
PHD, Carnegie Mellon University, 1986

Wang, Wenping, Professor
Computer Science & Engineering
PHD, University of Alberta, 1992

Xia, Meng, Assistant Professor
Computer Science & Engineering
PHD, Hong Kong University of Science and Technology, 2020

Yang, Tianbao, Professor
Computer Science & Engineering
PHD, Michigan State University, 2012

Yum, Ki H, Senior Lecturer
Computer Science & Engineering
PHD, The Pennsylvania State University, 2002

Zhang, Cheng, Assistant Professor
Computer Science & Engineering
PHD, The Ohio State University, 2022

Zhang, Yu, Assistant Professor
Computer Science & Engineering
PHD, University of Illinois at Urbana-Champaign, 2024

Zhou, Samson S, Assistant Professor
Computer Science & Engineering
PHD, Purdue University, 2018

Zhou, Yi, Associate Professor
Computer Science & Engineering
PHD, The Ohio State University, 2018

Majors

- Bachelor of Arts in Computer Science (p. 637)
- Bachelor of Science in Computer Engineering (p. 635)
- Bachelor of Science in Computer Science (p. 638)

Minors

- Computer Science Minor (p. 640)
- Cybersecurity Minor (p. 640)
- Game Design and Development Minor (p. 641)

Certificates

- Cyber Operations Certificate (p. 641)

Computer Engineering - BS

This program's curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective.

All computer engineering students take courses in the following areas: electrical circuits, electronics, digital circuits, computer architecture ranging from embedded systems to data centers, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and computer systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

The curriculum encompasses much of the core material of traditional Computer Science and Electrical Engineering degrees. Students are able to further enhance their knowledge by taking electives in a broad range of topics: computer networks, computer system architecture, artificial intelligence, machine learning, computer graphics, robotics, cybersecurity, computer languages, large-scale hardware and software systems, Very Large Scale Integrated (VLSI) circuits and systems, microprocessor interfacing and system design, hardware-software interaction and embedded systems.

The bachelor's degree program in computer engineering has been accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>). The program's emphasis on design and engineering fundamentals prepares the student for licensing as a professional engineer as well.

Program Mission

The mission of the computer engineering program is threefold:

- The computer engineering program provides students with an education that ensures an excellent understanding of hardware and software systems and the necessary system design and development skills, and that fosters professional curiosity and imagination that drives them throughout their career.

- The program stimulates and challenges the students with exceptional, highly motivated faculty members who share knowledge and excitement about computer engineering; well-designed undergraduate and graduate curricula; research opportunities at all levels; and a first-class educational infrastructure.
- The program strives to produce graduates who are well prepared to excel in industry, academia and government, and who will take on leadership roles in shaping the technological landscape of the future.

Program Educational Objectives

The educational objectives of the computer engineering program are to produce graduates whose expected accomplishments within a few years of graduation is:

1. Graduates who choose to pursue a career in industry or government will become productive and valuable computer engineers.
2. Graduates who choose to pursue advanced degrees will gain admission and succeed in top graduate programs.
3. Graduates will lead and work effectively on diverse teams to promote a breadth of perspectives in developing, communicating, and executing solutions across a broad range of computer systems application areas.
4. In keeping with the legacy of an Aggie engineer, graduates will be successful in attaining positions of leadership in their professional careers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall			Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}		3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}		1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric		3
ENGR 102	Engineering Lab I - Computation ¹		2

MATH 151	Engineering Mathematics I ^{1,2}	4
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16
Spring		
ENGR 216/ PHYS 216	Experimental Physics and Engineering Lab II - Mechanics ¹	2
MATH 152	Engineering Mathematics II ¹	4
PHYS 206	Newtonian Mechanics for Engineering and Science ¹	3
University Core Curriculum (p. 26) ³		3
Select one of the following:		3-4
CHEM 120	Fundamentals of Chemistry II ^{1,4}	
University Core Curriculum (p. 26) ^{3,5}		
Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

Second Year

Fall		Semester Credit Hours
CSCE 120	Program Design and Concepts ¹	3
ECEN 248	Introduction to Digital Systems Design ¹	4
MATH 251 or MATH 253	Engineering Mathematics III ¹ or Engineering Mathematics III	3

Semester Credit Hours		17

Fourth Year

Fall

Senior design ^{1,6}		3
University Core Curriculum (p. 26) ³		3
Area elective ^{1,7}		6
Engineering elective ^{1,8}		3
High Impact Experience ⁹		0
CSCE 399 or ECEN 399	High-Impact Experience or High Impact Professional Development	
Semester Credit Hours		15

Spring

Senior Design ^{1,6}		3
University Core Curriculum (p. 26) ³		6
Area elective ^{1,7}		6
Semester Credit Hours		15
Total Semester Credit Hours		97

⁶ 6 hours chosen from either (ECEN 403 and ECEN 404) or (CSCE 483 and an additional 3 hours of Area electives.)

⁷ Area electives chosen in consultation with academic advisor.

⁸ Select from: MATH 407, MATH 412, MATH 414, MATH 431, MATH 471, MEEN 315, MEEN 221, MEEN 222/MSEN 222, PHYS 221, PHYS 222.

⁹ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the CSE or ECE advising office.

Total Program Hours 128

Computer Science - BA

This program blends computing skills with multiple fields, preparing students for interdisciplinary careers.

The Bachelor of Arts degree with a major in Computer Science provides students with the opportunity to obtain computing knowledge and skills to be coupled with their non-computing interests in a wide variety of areas such as liberal arts, science, education, business, data science, robotics, etc. The degree allows students to build up strong computational fundamentals that are custom-fit to domains of interest that require such skills. The degree program is designed to provide flexibility in the choice of courses, both in computing and in the students' field of interest, so that students, after graduation, can have a broader range of career options, both in industry and in academia, reflecting the increasing demand for interdisciplinary talent where computing plays a major role.

Program Mission

The mission of the Computer Science program at Texas A&M University is to prepare intellectual, professional, and ethical graduates with a strong background in computing, who use computing skills to solve multidisciplinary challenges.

¹ All CSCE courses (excluding the prescribed electives) require a grade of C or better.

² Students who select MATH 140 and MATH 142 as their Math options must take MATH 140 and receive a grade of C or better before taking MATH 142.

³ Of the 30 hours shown as University Core Curriculum electives, 9 must be from life and physical sciences, 3 from creative arts, 3 from language, philosophy and culture, 3 from social and behavioral sciences, 6 from American history and 6 from government/political science. The required 3 hours of International and Cultural Diversity and 3 hours of Cultural Discourse may be met by courses also satisfying the creative arts, language, philosophy and culture, social and behavioral sciences and American history requirements if they are also on the approved list of International and Cultural Diversity (p. 49) and Cultural Discourse (p. 48).

⁴ To be selected in consultation with major advisor.

⁵ Select from CSCE 305, CSCE 310, CSCE 320/STAT 335, CSCE 400#479 (p. 985), CSCE 489.

Computer Science - BS

The computer science curriculum is designed to prepare students to enter the rapidly expanding field of computing.

The four-year undergraduate curriculum in Computer Science at Texas A&M provides a sound preparation in computing, as well as in science, mathematics, English, and statistics. Students take a broad set of core computer science courses in the early semesters, which exposes them to the main concepts in computing. During the later semesters, students take elective computer science courses drawn from four tracks (algorithms and theory, computer systems, software, and information and intelligent systems) to provide both breadth and depth. The electives can be used to tailor the curriculum to match the student's interests. Graduate courses may be taken by qualified students for some of the electives.

A major in Computer Science includes an area of concentration that allows students to design a course of study that complements their computer science coursework and takes advantage of opportunities offered by other departments across the university.

Program Mission

The mission of the computer science program is to prepare intellectual, professional and ethical graduates, capable of meeting challenges in the field of computer science.

Program Educational Objectives

The Program Educational Objectives of the BS in Computer Science program describe what the program's graduates are expected to attain within a few years of graduation:

1. Graduates will use computer science principles to identify and solve emerging technological and societal problems.
2. Graduates who choose to enter the workforce will become technological leaders and innovators in their fields.
3. Graduates who choose to pursue advanced degrees will gain admission to and succeed in prestigious graduate programs.
4. Graduates will engage in life-long learning to adapt to new technologies, tools, and methodologies needed to respond to a changing world.

This program is approved to be offered at the Texas A&M University at Galveston campus.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

⁶ If the student takes ENGR 217/PHYS 217 and PHYS 207, the 3 hours of PHYS 207 go towards the science requirement along with 1 hour of ENGR 217/PHYS 217. The other hour of ENGR 217/PHYS 217 can be used as general elective.

⁷ See advisor for list of acceptable science courses.

⁸ The emphasis area should be chosen only after consultation with a departmental advisor who will help the student arrange a program appropriate to his or her plans following graduation. Students should file a degree plan before taking minor courses to ensure their use in the degree plan.

⁹ Of the 18 hours shown as Computer science electives, 3 must be from systems directed electives, 3 must be from software directed electives, 3 must be from info/intel systems directed electives, 6 must be from upper level CSCE electives, and 3 must be from CSCE electives. See advisor for list of acceptable course choices.

¹⁰ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the CSCE advising office.

Total Program Hours 126

Computer Science - Minor

The minor in Computer Science provides the student with an introduction to the fundamentals of this area of study.

The minor, available to students in all majors (except for CPSC, COMP, CECN, CEEN, and CPEN), focuses on developing a basic foundation in computing, including components of programming, data structures and algorithm analysis, and computer architecture. The minor is administered by the Department of Computer Science and Engineering. Eligible students must submit an application in order to be considered for and allowed to pursue a minor in Computer Science.

Program Requirements

Code	Title	Semester Credit Hours
CSCE 120 or CSCE 121	Program Design and Concepts or Introduction to Program Design and Concepts	3-4
CSCE 221	Data Structures and Algorithms	4
CSCE 222/ ECEN 222	Discrete Structures for Computing	3
CSCE 312	Computer Organization	4
CSCE 313 or CSCE 314	Introduction to Computer Systems or Programming Languages	3-4
Total Semester Credit Hours		17

Students must make a grade of C or better in all courses.

Completion of all minor coursework with GPA of 2.75 or better required.

All 300-level CSCE courses must be taken at TAMU; no transfer coursework will be accepted.

Cybersecurity - Minor

This minor provides cybersecurity fundamentals, including programming and ethics, tailored to various student interests and majors.

The Cybersecurity Minor is designed to appeal to both less technically-oriented and more technically-oriented undergraduate students, across multiple departments, in multiple colleges. All students who enroll in the minor will acquire a basic understanding of programming, and a firmly grounded understanding of cybersecurity, to include cyber ethics. The inclusion of these courses in the minor will allow students to specialize in the area of cybersecurity that is most closely aligned with their respective interests and their degree plans.

¹ Course must be approved by the Director of Interdisciplinary Engineering for inclusion in the minor and include applications in cybersecurity.

² Course may be applied to latter category only if it is not applied above.

Minimum required GPA to declare minor is a 2.5.

Must make a grade of C or better in each course used towards minor.

Must achieve an overall GPA of 2.5 in approved minor coursework.

Minimum of 6 hours at 300-400 level.

Game Design and Development - Minor

This minor provides a foundation in the principles of game design and software development.

The Minor in Game Design and Development is offered in cooperation with the Department of Visualization. Enrollment in the minor is managed through the Department of Visualization. The minor offers students the

opportunity to develop the knowledge and skills associated with the aesthetic and technical aspects of game creation. Students develop core competencies, collaborate on the design and development of game projects, and engage in authentic, situated creative problem-solving to broaden their horizons as interdisciplinary team members. A minimum GPA of 3.2 is required for admittance into the minor.

Program Requirements

Cyber Operations - Certificate

The certificate in Cyber Operations was created for students who have a deeply technical education with a particular emphasis on technologies and techniques related to specialized cyber operations (e.g., collection, exploitation, and response), critical to intelligence, military, and law enforcement organizations authorized to perform these specialized operations. This curriculum supports Texas A&M's designation as a Center of Academic Excellence in Cyber Operations by the National Security Agency.

This certificate is available only to students enrolled in the Computer Science major.

Program Requirements

Must earn a grade of C or better in each course used towards certificate.

Department of Electrical and Computer Engineering

Almost any technology that distinguishes the 20th and 21st centuries from previous history has the imprint of electrical and computer engineering - electric power, radio, television, radar, satellite communication, global positioning system, medical diagnostic and procedure systems, sophisticated domestic appliances, cell phones, computers and sophisticated sensors and control systems used in underwater, space exploration and national security. Electrical and computer engineering has advanced national and global prosperity through research, development and application of electrical and computer technologies and sciences for the benefit of humanity, and has helped create the global village. By choosing electrical or computer engineering our graduates embark on an exciting and productive career with endless opportunities and help in shaping a better future for mankind.

The curriculum is designed to prepare the undergraduate for work in the highly diverse electrical and computer engineering profession. A solid foundation in physics, chemistry and mathematics is used to support courses in the fundamentals of electrical and computer engineering. The use of computers is integrated throughout the curriculum, and basic studies in circuits, electronics, electromagnetic fields and digital logic lead to a flexible program of electives in the junior and senior year. Electives may be chosen from the broad fields of analog and mixed-signal electronics, biomedical imaging, sensing and genomic signal processing, computer engineering and systems, device science and nanotechnology, electric power systems and power electronics, electromagnetics and microwaves, and information science and learning systems. Laboratory work is structured to first familiarize the student with the basic concepts and then to apply these concepts to solve engineering problems.

Undergraduate education plays a major part in helping the department to achieve its mission. The Electrical and Computer Engineering programs are accredited by the Engineering Accreditation Commission of ABET, www.abet.org. More information on these efforts can be found at the Department of Electrical and Computer Engineering (<http://engineering.tamu.edu/electrical/>) website by clicking on the link for ABET Accreditation.

Majors

- Bachelor of Science in Computer Engineering (p. 644)
- Bachelor of Science in Electrical Engineering (p. 646)

Minors

- Electrical Engineering Minor (p. 648)

Computer Engineering - BS

This program's curriculum is designed to cover the engineering aspects of both hardware and software—a total computer systems perspective.

All computer engineering students take courses in the following areas: electrical circuits, electronics, digital circuits, computer architecture ranging from embedded systems to data centers, interfacing, programming languages ranging from assembler to high level, data structures, analysis of algorithms, operating systems, software engineering and computer systems. A solid foundation in the basic sciences of physics, chemistry and mathematics is used to support these courses.

The curriculum encompasses much of the core material of traditional Computer Science and Electrical Engineering degrees. Students are able to further enhance their knowledge by taking electives in a broad range of topics: computer networks, computer system architecture, artificial intelligence, machine learning, computer graphics, robotics, cybersecurity, computer languages, large-scale hardware and software systems, Very Large Scale Integrated (VLSI) circuits and systems, microprocessor interfacing and system design, hardware-software interaction and embedded systems.

The bachelor's degree program in computer engineering has been accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>). The program's emphasis on design and engineering fundamentals prepares the student for licensing as a professional engineer as well.

Program Mission

The mission of the computer engineering program is threefold:

- The computer engineering program provides students with an education that ensures an excellent understanding of hardware and software systems and the necessary system design and development skills, and that fosters professional curiosity and imagination that drives them throughout their career.
- The program will stimulate and challenge the students with: exceptional, highly motivated faculty members who share knowledge and excitement about computer engineering; well-designed undergraduate and graduate curricula; research opportunities at all levels; and a first-class educational infrastructure.
- The program strives to produce graduates who are well prepared to excel in industry, academia and government, and who will take on leadership roles in shaping the technological landscape of the future.

Program Educational Objectives

The educational objectives of the computer engineering program are to produce graduates whose expected accomplishments within a few years of graduation are:

1. Graduates who choose to pursue a career in industry or government will become productive and valuable computer engineers.
2. Graduates who choose to pursue advanced degrees will gain admission and succeed in top graduate programs.
3. Graduates will lead and work effectively on diverse teams to promote a breadth of perspectives in developing, communicating, and executing solutions across a broad range of computer systems application areas.
4. In keeping with the legacy of an Aggie engineer, graduates will be successful in attaining positions of leadership in their professional careers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year		Semester Credit Hours
Fall		
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3

Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from

American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

⁷ Area electives chosen in consultation with academic advisor.

⁸ Select from: MATH 407, MATH 412, MATH 414, MATH 431, MATH 471, MEEN 315, MEEN 221, MEEN 222/MSEN 222, PHYS 221, PHYS 222.

⁹ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the CSE or ECE advising office.

Total Program Hours 128

Electrical Engineering - BS

This program prepares students for careers in electrical engineering, covering multiple specializations with graduates excelling in industry, academia, and leadership roles.

The Department of Electrical and Computer Engineering at Texas A&M University offers a Bachelor of Science degree option to its undergraduate students desiring to major in Electrical Engineering.

Electrical engineers design, develop, test and supervise the manufacture of sophisticated electrical and electronic systems such as: cell phones, iPods, digital TVs, medical imaging, smart appliances, automobiles and advanced satellite systems. Many electrical engineers also work in areas closely related to computers. Areas of specialization include analog and mixed-signal electronics; biomedical imaging, sensing and genomic signal processing; computer engineering and systems; device science and nanotechnology; energy and power; electromagnetics and microwaves; and information science and systems.

The bachelor's degree program in electrical engineering has been accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org/>). With ABET accreditation, students, parents, employers

and the society we serve can be confident that a program meets the quality standards that produce graduates prepared to enter a global workforce.

Program Mission

The mission of the electrical engineering program is threefold:

- To create new knowledge and challenge young minds by participation in the process of discovery and invention;
- To educate electrical engineers with a solid background of fundamentals, stretching their imagination, and preparing them for an exciting future; and
- To serve the society through research, education, and outreach activities.

Program Educational Objectives

The educational objectives of the electrical engineering program are to produce graduates whose expected accomplishments within a few years of graduation are:

1. Graduates who choose to pursue a career in industry or government will become productive and valuable electrical engineers.
2. Graduates who choose to pursue advanced degrees will be able to gain admission to graduate programs and succeed in top graduate programs.
3. Graduates will lead and work effectively on diverse teams to promote a breadth of perspectives in developing, communicating, and executing solutions across a broad range of electrical engineering application areas.
4. In keeping with the legacy of an Aggie Engineer, graduates will be successful in attaining positions of leadership in their professional careers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year Fall

		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3
ENGR 102	Engineering Lab I - Computation ¹	2
MATH 151	Engineering Mathematics I ^{1,2}	4
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16

Spring

ENGR 216/ PHYS 216	Experimental Physics and Engineering Lab II - Mechanics ¹	2
MATH 152	Engineering Mathematics II ¹	4
PHYS 206	Newtonian Mechanics for Engineering and Science ¹	3
University Core Curriculum (p. 26) ³		3
Select one of the following:		3-4
CHEM 120	Fundamentals of Chemistry II ^{1,4}	
University Core Curriculum (p. 26) ^{3,5}		
Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

Second Year

Fall		Semester Credit Hours

Semester Credit Hours	16
Total Semester Credit Hours	97

⁶ Select from ASTR 314, CSCE 313, CSCE 314, ESET 352, MATH 401, MATH 407, MATH 412, MATH 414, MATH 417, MATH 470, MATH 471, MEEN 221, MEEN 222/MSEN 222, MEEN 315, MSEN 325, PHYS 221.

⁷ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ECEN advising office.

⁸ Select from ECEN 326, ECEN 333, ECEN 338, ECEN 360, ECEN 410-480 (p. 1009), ECEN 489.

Total Program Hours 128

Electrical Engineering - Minor

The Department of Electrical and Computer Engineering offers a minor to students who are interested in electrical engineering applications related to circuits, signals and systems, electronics, instrumentation, and digital systems. Students interested in the Electrical Engineering minor should contact the undergraduate advising office of the Electrical and Computer Engineering Department for further information.

Program Requirements

Code	Title	Semester Credit Hours
ECEN 215	Principles of Electrical Engineering or ECEN 214 or Electrical Circuit Theory	3
ECEN 248	Introduction to Digital Systems Design	4
ECEN 314	Signals and Systems	3
ECEN 325	Electronics	4
ECEN Elective (p. 1009) ¹		3
Total Semester Credit Hours		17

¹ Select course from ECEN 303, ECEN 322, ECEN 340, ECEN 350/CSCE 350, ECEN 370.

Students must make a grade of "C" or better in all courses. All courses must be taken at Texas A&M University; no transfer work will be accepted.

Further Requirements: A minimum grade point average of 2.75 is required for entering the minor. Prerequisite coursework includes the calculus sequence, MATH 308, and PHYS 207 or equivalents. Students majoring in Computer Engineering will not be permitted to minor in Electrical Engineering since the coursework prescribed for the minor is required coursework for the Computer Engineering degree.

Department of Engineering Technology and Industrial Distribution

The Department of Engineering Technology and Industrial Distribution offers four baccalaureate degree programs in electronics systems

engineering technology, industrial distribution, manufacturing and mechanical engineering technology, and multidisciplinary engineering technology. While these degrees are distinct, they share several common features including a sound foundation of mathematics and basic sciences, a strong core of technical courses, and an emphasis on written and oral communications. The curricula emphasize the latest state-of-the-art technologies, innovation and entrepreneurship. Finally, all four degrees are designed to prepare students for careers in industry with strong opportunities for advancement. Because these programs are highly applied and have a focus on project-based learning and experiential education, most of the department's courses have hands-on laboratories that allow students to put theory to practice.

The mission of the Department of Engineering Technology and Industrial Distribution is to:

- maintain nationally recognized programs in engineering technology and industrial distribution
- focus on educating highly-qualified students with hands-on skills, providing them with experiences in advanced integration of both conventional and emerging technologies, a unique understanding of management and business practices, and an entrepreneurial point of view
- provide leadership within the COE and university in interdisciplinary applied research, to include the development and deployment of new technology
- promote and develop long term partnerships with industry and government that foster enhancements and interactions in education, research, and professional development

Electronic Systems Engineering Technology (ESET)

Electronic Systems Engineering Technology (ESET) prepares graduates for careers in electronic product and system design, development, and test across a diverse range of industries. These industries include semiconductor, telecommunications, networking, manufacturing, energy and power, and medical.

The ESET program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org> (<https://www.abet.org/>). For more information about the Electronic Systems Engineering Technology program including the mission and program educational objectives, please see the program requirements (p. 654).

Graduates are awarded the Bachelor of Science in Electronic Systems Engineering Technology.

Industrial Distribution (IDIS)

Bachelor of Science in Industrial Distribution prepares graduates for technical sales, sales management, business development, procurement, supply chain management, operations management, and other managerial positions. Students are prepared for employment in industry segments that include: aerospace; automation solutions; building materials; chemical and petrochemical; electrical; electronics; information systems and technology; healthcare; fluid power; general line; heating, ventilation and air conditioning; management consulting; mechanical power; metals; oil and gas; plastics; pipe, valve, and fitting; plumbing; safety equipment; semiconductor; specialty tools; and welding. The day-to-day challenges faced by the industrial distributor or the manufacturer's representative require the person to be a professional with many capabilities. To fulfill this demand, the curriculum provides

studies in distribution, business, communications, finance/profitability, information technology, applied technology, analytics management, engineering, ethics, and project management. Graduates receive a Bachelor of Science degree in Industrial Distribution.

The BS in Industrial Distribution program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org> (<https://www.abet.org/>). For more information about the Industrial Distribution program, please see the program requirements (p. 655).

Graduates are awarded the Bachelor of Science in Industrial Distribution.

Manufacturing and Mechanical Engineering Technology (MMET)

Manufacturing and Mechanical Engineering Technology (MMET) prepares students for dynamic careers in a wide range of industries ranging from oil and gas, to aerospace, and food and beverage. These careers involve design, manufacturing, maintenance, and sometimes sales. Graduates are versatile and effective in diverse areas that require understanding of the dependencies among material properties, product design, costs, manufacturing systems, and process technologies.

The Manufacturing and Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org> (<http://www.abet.org/>). For more information about the Manufacturing and Mechanical Engineering Technology program including the mission and program educational objectives, please see the program requirements (p. 657).

Graduates are awarded the Bachelor of Science in Manufacturing and Mechanical Engineering Technology.

Multidisciplinary Engineering Technology (MXET)

Multidisciplinary Engineering Technology (MXET) combines core concepts from the electronics and mechanical engineering technology disciplines and provides students with a strong background in embedded systems, electronic system design, instrumentation, controls, statics, dynamics, thermodynamics, mechanical system design, and project management. The curriculum is then augmented through a technical focus area. The Mechatronics and STEM Education focus areas are currently available and additional focus areas will be identified and created. The Mechatronics focus prepares graduates for diverse careers in aerospace, automotive, oil and gas, medical and communications industries where entry-level employees require a broad-based education in system-level design, development, documentation and delivery of new and innovative products. The STEM Education focus prepares graduates to teach math, science, and engineering at the secondary education level.

The BS in Multidisciplinary Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org> (<https://www.abet.org/>). For more information about the Multidisciplinary Engineering Technology program, please see the program requirements (p. 653).

Graduates are awarded the Bachelor of Science in Multidisciplinary Engineering Technology.

Department Academic Policies

The Department of Engineering Technology and Industrial Distribution (ETID) imposes academic requirements in addition to those imposed by

the University (Texas A&M University Student Rules) and college. For complete details concerning these and other academic policies, students should contact the ETID Undergraduate Advising Office and are referred to the ETID (<http://engineering.tamu.edu/etid/>) website.

A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course. A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by the department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans' benefits, and eligibility to participate in extracurricular activities.

The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their engineering technology education.

Before commencing course work in the major students must be admitted to the major or have the approval of the department.

- Embedded Systems Integration Minor (p. 665)
- Information Technology Service Management Minor (p. 665)
- Technical Sales Minor (p. 666)

Electronic Systems Engineering Technology - BS

The program combines engineering and industrial knowledge and methods to develop, design, and implement new innovative products.

Electronic Systems Engineering Technology (ESET) prepares graduates for careers in electronic product and system development across a diverse range of industries that include the medical, computer, power, automotive, oil and gas, information/communication technologies, and quality of life sectors. While graduates of the program receive a rigorous technical education and take engineering and technology positions within industry, they are also well prepared for positions in technical sales and project management. The ESET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes analog and digital electronics, embedded systems design, software development using C and assembly language, wired/wireless communications, electronics test, statistical tools for engineers, instrumentation and control systems. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate hardware and software systems. One of the most unique aspects of the Electronic Systems Engineering Technology program is that almost every technical course provides a hands-on laboratory experience using facilities equipped with state-of-the-art computer systems, test equipment, and industry-standard computer-aided design and analysis packages. The technical curriculum is augmented with coursework in written and oral communications, product/system development, device/system testing and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solving a real-world problem.

The Electronic Systems Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org/>.

ESET Program Mission

The Electronic Systems Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in electronics product development, test, system integration, and engineering research.

ESET Program Vision

To be a nationally recognized educational leader in innovative electronic product/systems development and applied research solutions.

ESET Program Educational Objectives

Graduates of the electronic systems engineering technology Program:

1. continue to develop technical skills to be productive, innovative, and have successful careers in regional, state, national and global electronic product and system development industries.
2. continue to develop increasing levels of leadership, teamwork, and be able to communicate information to technical and non-technical stakeholders.
3. continue to exhibit a commitment to professional ethics in their careers.

4. continue professional growth through a desire for a lifetime of further opportunities, learning, and flexibility to adapt to a fast-changing environment in engineering industries.

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Electronic Systems Engineering Technology program continues to offer a state-of-the-art curriculum that produces successful graduates.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

		Semester Credit Hours
Fall		
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3

⁶ See departmental advisor for a list of approved electives. ENTC 485 is not for general use as a technical elective.

⁷ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the ETID advising office.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

Total Program Hours 127

Industrial Distribution - BS

The Bachelor of Science in Industrial Distribution prepares graduates for technical sales, sales management, business development, procurement, supply chain management, operations management and other managerial positions.

Students are prepared for employment in industry segments that include: aerospace; automation solutions; building materials; chemical and petrochemical; electrical; electronics; information systems and technology; healthcare; fluid power; general line; heating, ventilation and air conditioning; management consulting; mechanical power; metals; oil and gas; plastics; pipe, valve, and fitting; plumbing; safety equipment; semiconductor; specialty tools; and welding. The day-to-day challenges faced by the industrial distributor or the manufacturer's representative require the person to be a professional with many capabilities. To fulfill this demand, the curriculum provides studies in distribution, business, communications, finance/profitability, information technology, applied technology, analytics management, engineering, ethics, and project management. Graduates receive a Bachelor of Science degree in Industrial Distribution.

The Industrial Distribution program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org/>.

For more information about the IDIS program, please see the program requirements.

IDIS Program Mission

The mission of the Industrial Distribution Program at Texas A&M University is to:

- Prepare graduates for sales engineering, sales management, supply chain operations and logistics management mid-management positions with wholesale distributors, who purchase, warehouse, sell, distribute and service a wide variety of products, and with manufacturers who sell through distributors.
- Conduct applied research and develop new best practices in industrial distribution, logistics, and supply chain management that mutually benefits the university and its industrial, governmental, and academic collaborators.
- Provide service and leadership in the promotion and advancement of the department, the university and the industrial distribution profession.
- Maintain a nationally recognized program through excellence in hands-on education, applied research, and service.

IDIS Program Vision

The mission of the Industrial Distribution Program at Texas A&M University is:

- To be a nationally recognized leader in Industrial Distribution education and applied research, including technical sales and distribution operations and supply chain management.

IDIS Program Educational Objectives

Graduates of the industrial distribution program are:

1. Successful in designing, integrating, and implementing technical sales, operations, and customer services management systems in industrial distribution and supply chain management-related industries.
2. Exemplifying ethical standards in their professional careers.
3. Providing leadership in their respective organizations during their careers.
4. Actively engaged in lifelong learning and sustainable productivity in a dynamic work environment.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. Manufacturing and Mechanical Engineering Technology - BS

This program prepares students for multiple industries, equipping them with skills in design, automation, and manufacturing, and a deep understanding of material and process dependencies.

Manufacturing and Mechanical Engineering Technology (MMET) prepares students for dynamic careers in a wide range of industries including and not limited to oil/gas, aerospace, transportation, technical service, and food/beverage. These careers involve design, manufacturing, automation, maintenance, technology development /integration, and technical field service. Graduates are versatile and effective in diverse areas that require understanding of dependencies among material properties, product design, costs, manufacturing systems, and process technologies.

The Manufacturing and Mechanical Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org/>.

For more information about the MMET program, please see the program requirements.

MMET Program Mission

To actively recruit, train, and support qualified future professionals for industrial practice, applied research, and to develop innovative interdisciplinary technologies that create mutual benefits for the university, industry, government, and academic partners.

MMET Program Vision

To lead the advancement of manufacturing and mechanical engineering technology education and applied research for industry and academia.

MMET Program Educational Objectives

Graduates of the manufacturing and mechanical engineering technology program:

1. Apply manufacturing and mechanical technical knowledge, problem solving skills, and implementation skills for careers in design, installation, operations, technical sales, or service functions in industry.
2. Provide increasing level of leadership and responsibility.
3. Continue engaging in sustainable productivity in a dynamic work environment.

Program Requirements

Multidisciplinary Engineering Technology - BS, Electro Marine Engineering Technology Track

Multidisciplinary Engineering Technology (MXET) prepares students for careers requiring an understanding of technical problems and systems

that combine principles from two or more engineering technology disciplines.

This degree is designed to be flexible, giving the student a strong background in electronic and mechanical systems, which is then augmented with a 29-hour focus area. Graduates of the program receive a rigorous technical education and typically take engineering and technology positions appropriate to their focus area of study. The MXET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes mechanical, electronic and embedded systems/software fundamentals, principles and design concepts. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate mechanical and electronic hardware and software systems. One of the most unique aspects of the Multidisciplinary Engineering Technology program is that most technical courses provide a hands-on laboratory experience using state-of-the-art equipment and industry-standard design and analysis software. The technical curriculum is augmented with courses in written/oral communications and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solve a real-world problem.

The Multidisciplinary Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org/>.

For more information about the MXET program, please see the program requirements.

MXET Program Mission

The Multidisciplinary Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in mechanical, electronic, control, computer, communication systems, and robotics.

MXET Program Vision

Provide a high-quality undergraduate education with a multidisciplinary curriculum that evolves to keep pace with the rapid growth of engineering and technology in various areas of multidisciplinary engineering technology.

MXET Program Educational Objectives

Graduates of the multidisciplinary engineering technology program:

1. Are engaged in building and using technical knowledge of the design, manufacture, supply chain, and service of complex systems that span multiple engineering technology disciplines.
2. Continue providing leadership in their respective organizations.
3. Are engaged productively in a dynamic work environment through a commitment to lifelong learning.
4. Practice high standards of professional ethics in their careers.

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Multidisciplinary Engineering Technology program offers a state-of-the-art curriculum that produces successful graduates.

MXET Tracks

The MXET program has a common core of courses and 29 additional credit hours that allow students to gain further experience with the focus area of choice. Currently, there are three focus areas, each representing a track of the MXET program. These tracks are mechatronics, STEM education, and electro-marine engineering technology.

Electro Marine Engineering Technology Track

The Electro Marine Engineering Technology track has an emphasis in marine mechatronics, a multidisciplinary field that includes a combination of electrical, mechanical, communications, control, and marine engineering technology topics. Students interested in wireless communications, automation, instrumentation and/or robotics will gain hands-on experience with a focus on marine electronic systems. Additionally, students graduating with this degree and obtaining a license will be well prepared to become an electronic technology officer (ETO). In the near future, at least one ETO will be required on each sailing vessel.

This program is approved to be offered at the Texas A&M University at Galveston campus.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

Total Program Hours 127**Multidisciplinary Engineering Technology - BS, Mechatronics Track**

Multidisciplinary Engineering Technology (MXET) prepares students for careers requiring an understanding of technical problems and systems

that combine principles from two or more engineering technology disciplines.

This degree is designed to be flexible, giving the student a strong background in electronic and mechanical systems, which is then augmented with a focus area. Graduates of the program receive a rigorous technical education and typically take engineering and technology positions appropriate to their focus area of study. The MXET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes mechanical, electronic and embedded systems/software fundamentals, principles and design concepts. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate mechanical and electronic hardware and software systems. One of the most unique aspects of the Multidisciplinary Engineering Technology program is that most technical courses provide a hands-on laboratory experience using state-of-the-art equipment and industry-standard design and analysis software. The technical curriculum is augmented with courses in written/oral communications and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solve a real-world problem.

The Multidisciplinary Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org/>.

For more information about the MXET program, please see the program requirements.

MXET Program Mission

The Multidisciplinary Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in mechanical, electronic, control, computer, communication systems, and robotics.

MXET Program Vision

Provide a high-quality undergraduate education with a multidisciplinary curriculum that evolves to keep pace with the rapid growth of engineering and technology in various areas of multidisciplinary engineering technology.

MXET Program Educational Objectives

Graduates of the multidisciplinary engineering technology program:

1. Are engaged in building and using technical knowledge of the design, manufacture, supply chain, and service of complex systems that span multiple engineering technology disciplines.
2. Continue providing leadership in their respective organizations.
3. Are engaged productively in a dynamic work environment through a commitment to lifelong learning.
4. Practice high standards of professional ethics in their careers.

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Multidisciplinary Engineering Technology program offers a state-of-the-art curriculum that produces successful graduates.

MXET Tracks

The MXET program has a common core of courses and 29 additional credit hours that allow students to gain further experience with the focus area of choice. Currently, there are three focus areas, each represents a track of the MXET program. These tracks are mechatronics, STEM education, and electro marine engineering technology.

Mechatronics Track

The Mechatronics track prepares students to design, develop and support products and systems that combine mechanical, electronic, robotics, automation, communication, control, and embedded computing principles.

This program is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

Multidisciplinary Engineering Technology - BS, STEM Education Track

Multidisciplinary Engineering Technology (MXET) prepares students for careers requiring an understanding of technical problems and systems that combine principles from two or more engineering technology disciplines.

This degree is designed to be flexible, giving the student a strong background in electronic and mechanical systems, which is then augmented with a focus area. Graduates of the program receive a rigorous technical education and typically take engineering and technology positions appropriate to their focus area of study. The MXET curriculum is based on a strong underpinning of engineering math and science courses followed by a core technical sequence. This core includes mechanical, electronic and embedded systems/software fundamentals, principles and design concepts. Throughout their curriculum, students work on multiple open-ended projects to design, implement, test, and evaluate mechanical and electronic hardware and software systems. One of the most unique aspects of the Multidisciplinary Engineering Technology program is that most technical courses provide a hands-on laboratory experience using state-of-the-art equipment and industry-standard design and analysis software. The technical curriculum is augmented with courses in written/oral communications and technical project management. A team-based industry-sponsored capstone design sequence provides a challenging opportunity to apply technical, managerial, and communications skills to solve a real-world problem.

The Multidisciplinary Engineering Technology program is accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org/>.

For more information about the MXET program, please see the program requirements.

MXET Program Mission

The Multidisciplinary Engineering Technology Program at Texas A&M University prepares graduates for immediate impact and long-term career success by providing a real-world experiential education coupled with personalized undergraduate experiences in mechanical, electronic, control, computer, communication systems, and robotics.

MXET Program Vision

Provide a high-quality undergraduate education with a multidisciplinary curriculum that evolves to keep pace with the rapid growth of engineering and technology in various areas of multidisciplinary engineering technology.

MXET Program Educational Objectives

Graduates of the multidisciplinary engineering technology program:

1. Are engaged in building and using technical knowledge of the design, manufacture, supply chain, and service of complex systems that span multiple engineering technology disciplines.
2. Continue providing leadership in their respective organizations.
3. Are engaged productively in a dynamic work environment through a commitment to lifelong learning.
4. Practice high standards of professional ethics in their careers.

A continuous cycle of assessment and program improvement is used to ensure that these objectives are being met. Through interactions with industry and academic partners, the Multidisciplinary Engineering Technology program offers a state-of-the-art curriculum that produces successful graduates.

MXET Tracks

The MXET program has a common core of courses and 29 additional credit hours that allow students to gain further experience with the focus area of choice. Currently, there are three focus areas, each represents a track of the MXET program. These tracks are mechatronics, STEM education, and electro marine engineering technology.

STEM Education Track

The STEM education track has been established through a partnership with the College of Education and Human Development and includes twenty-nine credit hours of coursework in education. These courses, including a semester-long practicum, specifically prepare graduates to teach at the secondary education level. Graduates from this program will be qualified to take the State of Texas math, physical science, and engineering teaching certification exam.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Total Program Hours 127

Embedded Systems Integration - Minor

The Embedded Systems Integration minor offered by the Department of Engineering Technology and Industrial Distribution teaches students about embedded systems hardware and software development and how these systems are used in modern products.

Our cars, cell phones, health care devices, every-day appliances and physical devices that are connected to form the internet-of-things (IoT) operate based on small "computers" that sense the environment, make decisions, communicate, and control operations; essentially making our devices "smart." These "computers" or embedded processors/microcontrollers are a fundamental component in most modern products and systems and are used across a wide range of industries that include medical, oil/gas, process control, automotive, communications, and quality of life.

The minor is available to not only engineering students, but also students outside the College of Engineering who are interested in studying technology and understanding the devices that power our lives.

Students interested in an Embedded Systems Integration minor should see an advisor in Engineering Technology and Industrial Distribution for more information.

Program Requirements

Code	Title	Semester Credit Hours
ESET 219	Digital Electronics	4
ESET 269	Embedded Systems Development in C	3
ESET 333	Product Development	3
ESET 349	Microcontroller Architecture	4
ESET 369	Embedded Systems Software	4
Total Semester Credit Hours		18

Students must make a grade of "C" or better in all courses.

Information Technology Service Management - Minor

The Information Technology Service Management (ITSM) minor is designed to provide students with a solid understanding of the ITSM framework and its critical role in creating value for organization.

In addition to fundamental IT technical competencies, the ITSM minor focuses on teaching concepts, management techniques, and values that align IT activities with organizational goals. Some topics covered in the ITSM minor include engaging IT stakeholders through the service value network, creating value streams and value-generating processes through IT-enabled products and services, planning and delivering continual improvement with necessary agility for the digital transformation, and integrating development and operational practices to optimize digital value generation. The ITSM minor allows students from a wide variety of backgrounds to expand their expertise to IT service management and enhance their capabilities to contribute to overall organizational success.

Program Requirements

Code	Title	Semester Credit Hours
ITSV 101	Introduction to Information Technology Service Management	1
ITSV 272	Foundations of Information Technology Management	3
ITSV 274	Foundations of Networking	3
ITSV 303	Unix System Administration Practices	4
ITSV 385	Information Technology Management and Service Delivery	3
ITSV 465	DevOps and High Velocity Service Delivery	4
Total Semester Credit Hours		18

Minimum required GPA to declare minor is a 2.5.

Must make a grade of C or better in each course used towards minor.

Must achieve an overall GPA of 2.5 in approved minor coursework.

Technical Sales - Minor

This program equips non-industrial distribution majors with B-2-B industrial sales skills, focusing on solution-based selling and communication, to position them as trusted problem solvers.

The Technical Sales Minor offered by the Department of Engineering Technology and Industrial Distribution is very specific to Business-to-Business (B-2-B) Industrial Sales. The courses in this minor will teach students about an Industrial Solution-based Sales Process and help them understand the strategies and structures of Industrial Sales organizations.

These courses will help engineering and professional students improve their interpersonal communication skills. They will learn to effectively engage others in the conversation to better understand issues to which solutions can be provided in areas of product or systems design, integration, fabrication, etc. Students who complete the Technical Sales Minor will be capable of presenting themselves such that they will be perceived as solution providers rather than someone trying to sell something.

The minor is available to non-industrial distribution majors only. Interested undergraduate students from all the other engineering and engineering technology majors and those from outside the College of Engineering who are interested in pursuing a career in industrial sales or simply want to better understand how industrial sales organizations operate can apply for the minor.

Program Requirements

Code	Title	Semester Credit Hours
IDIS 240	Introduction to Industrial Distribution	3
IDIS 330	Sales Engineering	4
IDIS 340 or IDIS 344	Manufacturer Distributor Relations or Distributor Information and Control Systems	3

IDIS 371	Industrial Distribution Technical Sales Seminar	1
IDIS 433	Industrial Sales Force Development	3
IDIS 471	Industrial Business to Business Marketing	3
Total Semester Credit Hours		17

Must make a grade of C or better in each course used towards the minor.

Wm Michael Barnes '64 Department of Industrial and Systems Engineering

Industrial and systems engineering is an engineering discipline devoted to the design, installation, improvement and control of integrated systems of people, materials, and facilities in a wide range of organizations that produce goods or render services. Like other engineering fields, industrial engineering is concerned with solving problems through the application of specialized knowledge in mathematics and science, as well as the principles of engineering. Two major distinctions of our discipline, among the engineering disciplines, is the unique focus of industrial and systems engineering on human factors and the quantification and systematic removal of uncertainty from production systems. Industrial and systems engineering has five major focus areas: advanced manufacturing, operations research, data sciences and machine learning, health and human systems, and systems engineering.

An important characteristic of industrial and systems engineering is its systems approach to integrate the basic resources of production and service systems and other relevant resources, such as information and energy, in such a way as to create a smooth, efficient and competitive operation within an enterprise. Industrial and systems engineers are needed in virtually all types of enterprises, ranging from industries such as manufacturing, distribution, logistics, transportation, and construction; service sectors such as health care, telecommunications, retail, banking, and engineering consulting to government agencies, military, and non-profit organizations.

The mission of the Wm Michael Barnes '64 Department of Industrial and Systems Engineering is to serve the state, nation, and global community by educating industrial engineering students to be well founded in engineering fundamentals and to have the knowledge and skills required to design, develop, improve, implement and control sophisticated production and service systems in an environment characterized by complex technical and social challenges. Throughout this educational process, students will be instilled with the highest standards of professional and ethical behavior. It is the intent of the undergraduate industrial engineering program to equip its graduates to achieve the following accomplishments a few years after graduation:

1. Graduates are successful in advancing the practice of industrial engineering.
2. Graduates are providing leadership in their respective organizations exemplifying ethical standards and practices.
3. Graduates are actively engaged in lifelong learning through professional development.

The undergraduate program in Industrial Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Industrial and systems engineering students may participate in one of two accelerated programs: the Accelerated Bachelor of Science and Master of Public Health or the Accelerated Bachelor of Science and Master of Science in Finance. Students who successfully complete either of these programs graduate with both degrees in just five years. The department also has a combination program for academically qualified students who want to take selected graduate courses in industrial and systems engineering and receive both graduate and undergraduate credit by meeting specific requirements.

Students may also participate in the Undergraduate Minor Program offered by Texas A&M University. This program is usually comprised of 15 to 18 hours, some of which may be substituted as technical electives. The most common minors are math, business and engineering project management. The department encourages students to participate in industrial internships or the Cooperative Education Program to acquire practical experience to complement their industrial engineering education. Internships are generally encouraged during the summer months only. Students who participate in the Co-op program during three academic semesters may count the three credit hours as a technical elective in their curriculum.

Graduate degrees including the Master of Science (MS), Master of Engineering (MEng), and Doctor of Philosophy (PhD) are also offered by the department in addition to the Bachelor of Science in Industrial Engineering and the two accelerated programs. For graduate degree information, please see the Texas A&M University Graduate Catalog.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Majors

- Bachelor of Science in Data Engineering (p. 668)
- Bachelor of Science in Industrial Engineering (p. 670)
- Bachelor of Science in Industrial Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 671)
- Bachelor of Science in Industrial Engineering and Master of Science in Finance, 5-Year Degree Program (p. 673)

Minors

- Industrial Engineering Minor (p. 675)

Certificates

- Data Center Operations Engineering Certificate (p. 675)
- Data Engineering Certificate (p. 676)
- Engineering Systems Management Certificate (p. 676)

Data Engineering - BS

The Data Engineering program trains students in data handling, manipulation, mining, visualization, and storage methods that lead to optimal information and knowledge extraction to facilitate decision-making in complex systems.

Data Engineering is an emerging field focused on transforming data into contextual information using quantitative and computational tools. The program includes a two-semester long capstone senior design experience, which is a part of the hands-on experience with workshop-style real-world problem-solving situations.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering,

manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3
ENGR 102	Engineering Lab I - Computation ¹	2
MATH 151	Engineering Mathematics I ^{1,2}	4
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16
Spring		
ENGR 216/PHYS 216	Experimental Physics and Engineering Lab II - Mechanics ¹	2
MATH 152	Engineering Mathematics II ¹	4
PHYS 206	Newtonian Mechanics for Engineering and Science ¹	3
University Core Curriculum (p. 26) ³		3
Select one of the following:		3-4
CHEM 120	Fundamentals of Chemistry II ^{1,4}	
University Core Curriculum (p. 26) ^{3,5}		
Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and

CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

Industrial Engineering - BS

Industrial and systems engineering is a discipline devoted to the design, installation, improvement and control of integrated systems of people, materials, and facilities across a wide range of organizations that produce goods or render services.

Like other engineering fields, industrial and systems engineering is concerned with solving problems through the application of specialized knowledge in mathematics and science, as well as the principles of engineering. Two major distinctions of our discipline, among the engineering disciplines, is the unique focus of industrial and systems engineering on human factors and the quantification and systematic removal of uncertainty from production systems. Industrial and systems engineering has five major focus areas: advanced manufacturing, operations research, data sciences and machine learning, health and human systems, and systems engineering.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. ⁶ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the industrial engineering advising office.

⁷ A total of 18 hours of technical electives is required, of which 12 hours must be industrial engineering courses. The choice of courses to be taken must be made in consultation with the student's advisor and/or the industrial engineering advising office.

The Bachelor of Science degree in Industrial Engineering requires a grade of C or better for required industrial engineering (ISEN) courses and supporting courses. If a course is repeated, only the most recent grade is used in fulfilling this requirement.

Total Program Hours 128

Industrial Engineering - 5-Year Bachelor of Science and Master of Public Health in Occupational Safety and Health

This combination program enables motivated students to efficiently complete both the Bachelor of Science in Industrial Engineering and the Master of Public Health in Occupational Safety and Health in five years.

This combination program, BS in Industrial Engineering and MPH in Occupational Safety and Health, helps satisfy the need for engineers with

formal education in health to bolster the quality of life to the public in underserved areas. In particular, industrial engineers are immersed in the practical health related issues prevalent in these areas and help engineer technologies that can overcome the barriers usually faced by point-of-care devices.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. ⁷ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the INEN advising office.

⁸ ISEN/PHEO electives are approved by the BS/MPH program director and graduate advisor. ISEN electives must be taken for a grade of C or better.

The program includes a total of 173 hours which up to 12 hours may be applied toward both the Bachelor of Science in Industrial Engineering and the Master of Public Health in Occupational Safety and Health.

Total Program Hours 173**Industrial Engineering - 5-year Bachelor of Science and Master of Science in Finance**

This combination program enables motivated students to efficiently complete both the Bachelor of Science in Industrial Engineering and the Master of Science in Finance in five years.

Industrial and systems engineering has a long-standing history and unique place among engineering majors as the academic discipline responsible for the economic viability of productive systems across industries. Industrial engineers are keenly aware of the goals and objectives of the enterprise. Additionally, industrial engineers receive a core curriculum in the rigorous underpinnings requisite for the quantification of uncertainty and the mitigation of financial risk to the enterprise. This combination degree ensures that the successful graduate from the Mays Business School, department of finance, has a solid background in both the stochastic processes used to characterize and model the uncertainty coupled with the financial acumen requisite to ensure the economic viability of the enterprise. Students of the industrial and systems engineering program will take advantage of a series of internships and practicums that expose the undergraduate to various facets of financial stability and instability in industry. This program will produce a select and skilled group of industrial leaders that will take their place in the industrial world ensuring the viability of productive organizations around the globe.

Program Requirements

⁶ MSF prerequisite course that counts towards ISEN degree.

⁷ Course will double count towards both undergraduate and graduate program.

⁸ A total of 9 hours of technical electives is required. The choice of courses to be taken must be made in consultation with the student's advisor and/or the Industrial Engineering Advising Office.

⁹ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the INEN advising office.

¹⁰ The MS Finance degree requires students to take 9 hours of electives in support of their career goals.

The Bachelor of Science degree in Industrial Engineering requires a grade of C or better for required industrial engineering (ISEN) courses.

The program includes a total of 164 hours which up to 9 hours may be applied toward both the Bachelor of Science in Industrial Engineering and the Master of Science in Finance.

Total Program Hours 164 Industrial Engineering - Minor

This program provides students from any major with core industrial and systems engineering skills, including data analytics and process design, enhancing their marketability across multiple industries.

The minor in Industrial and Systems Engineering provides students with the knowledge, skills, and experience related to several of the core areas of ISEN including: operations research, data analytics, human systems design, and production system engineering. Quantification of uncertainty, mathematical modeling, decision making, and process design are skills endemic to ISEN. The electives reflect the diverse nature of the discipline and are aligned with the needs of industry. Industrial and systems engineering, based on the latest Bureau of Labor Statistics numbers, stands as the second largest engineering discipline in the U.S. Industrial and systems engineers are employed across the nearly 450 industry types as identified in the Standard Industrial Classification system. Industrial and systems engineering is focused on the economic viability of productive organizations within those industries. This minor provides the student with a highly marketable knowledge base and skillset that is in high demand in today's global economy.

Program Requirements

Code	Title	Semester Credit Hours
ISEN 230	Informatics for Industrial Engineers	3
ISEN 310	Uncertainty Modeling for Industrial Engineering	3
ISEN 320	Operations Research I	3
Select two of the following:		6
ISEN 340	Operations Research II	
ISEN 350	Quality Engineering	
ISEN 355	System Simulation	
ISEN 370	Production Systems Engineering	
Total Semester Credit Hours		15

Must make a grade of C or better in all courses.

Data Center Operations Engineering - Certificate

This program equips engineers with data systems management skills, focusing on system-level understanding and design, to meet the growing demand in technology-driven industries.

With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of data system management

and an understanding of the system level of complex data center processing systems. In both government and industry there is a growing need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to complex data systems management and this certificate program includes a set of courses to assure students develop this knowledge and skill set. Completion of this certificate requires completion of the following educational outcomes:

1. to know and apply principles of engineering management
2. to understand principles of systems level engineering and their application to specific data center system operations
3. to be able to go beyond understanding concepts and demonstrate appropriate usage of systems engineering principles in a design context

Program Requirements

Code	Title	Semester Credit Hours
ISEN 440	Systems Thinking	3
Select one of the following:		4
CSCE 110	Programming I	
CSCE 111	Introduction to Computer Science Concepts and Programming	
CSCE 206	Structured Programming in C	
Select two of the following:		6
CSCE 438	Distributed Systems	
CSCE 444	Structures of Interactive Information	
CSCE 470	Information Storage and Retrieval	
ECEN 455	Digital Communications	
ISEN 340	Operations Research II	
ISEN 350	Quality Engineering	
ISEN 411	Engineering Management Techniques	
ISEN 413	Advanced Data Analytics for Industry	
ISEN 414	Total Quality Engineering	
ISEN 442	Organizational Systems	
MEEN 421	Thermal-Fluids Analysis and Design	
MEEN 436	Principles of Heating, Ventilating and Air Conditioning	
MEEN 461	Heat Transfer	
Total Semester Credit Hours		13

Students must make a grade of C or better in all courses.

Data Engineering - Certificate

The Certificate in Data Engineering (DAEN) will equip students with fundamental and advanced technical skills for data-driven decision-making.

The global information-age we are in today has resulted in an increasing demand for technical skills required for storage and handling of complex data, as well as extracting information and knowledge from data to guide decision-making in business, science, and engineering settings, among others.

For additional information, contact the industrial and systems engineering undergraduate advising office at (979) 845-5531 or ieundergradadvising@tamu.edu.

Program Requirements

Code	Title	Semester Credit Hours
ISEN 310	Uncertainty Modeling for Industrial Engineering	3
ISEN 311	Introduction to Data Analytics and Engineering	3
ISEN 413	Advanced Data Analytics for Industry	3
ISEN 427/ DAEN 427	Decision and Risk Analysis	3
Total Semester Credit Hours		12

Students must make a grade of C or better in all courses.

Engineering Systems Management - Certificate

This program provides engineers with essential systems management skills, addressing the industry's demand for expertise in complex engineered systems and management principles.

In many areas of government and industry there is a significant need for undergraduate engineering students that possess the requisite knowledge and skill sets pertaining to engineering systems management in addition to their basic engineering discipline. With the rapid acceleration of technology through innovation on a global basis, industries recognize the need for young engineers who possess base line knowledge in areas of management and an understanding of the system level of complex engineered systems. This certificate program includes a set of courses to assure students develop this knowledge and skill set.

Program Requirements

Code	Title	Semester Credit Hours
ISEN 440	Systems Thinking	3
ISEN 442	Organizational Systems	3
or ISEN 411	or Engineering Management Techniques	
Technical Elective		
Select one of the following:		3
AERO 426	Space System Design	
CHEN 461	Process Dynamics and Control	
CVEN 402/ EVEN 402	Engineered Environmental Systems	
ECEN 420	Linear Control Systems	
ECEN 460	Power System Operation and Control	
ISEN 414	Total Quality Engineering	
MEEN 441	Design of Mechanical Components and Systems	
PETE 325	Petroleum Production Systems	
Business Elective		

Select one of the following:	3
ACCT 209 Survey of Accounting Principles	
ISTM 209 Business Information Systems Concepts	
MGMT 209 Principles of Business Regulations and Law	
MGMT 309 Survey of Management	
Total Semester Credit Hours	12

Must make a grade of C or better in each course used towards certificate.

Department of Materials Science and Engineering

The Department of Materials Science and Engineering is jointly operated by the College of Engineering and College of Arts and Sciences.

The department offers Bachelor of Science, Master of Engineering, Master of Science, and Doctor of Philosophy degrees. This multidisciplinary department includes faculty members from several disciplines, including aerospace engineering, biology, biomedical engineering, chemical engineering, chemistry, electrical engineering, mechanical engineering, nuclear engineering, and physics. Many of today's most pressing scientific problems stem from the limitations of materials currently available, and this department is at the forefront of new knowledge and discovery at Texas A&M University.

What is Materials Science and Engineering?

Materials science and engineering involves the characterization of the physical and chemical properties of solid materials—metals and alloys, ceramics, magnetic materials, polymers, optical materials, semiconductors, superconductors, and composites—for the purpose of using, changing or enhancing inherent properties to create or improve end products. Materials science and engineering involves examining how the microstructure (crystalline or amorphous) of a material can be changed to influence the strength, electrical conductivity, optical, or magnetic properties of a material. This field is inherently multidisciplinary, encompassing mechanical, chemical, biomedical, civil, electrical, and aerospace engineering; physics; and chemistry.

Materials science comprises the study of materials from the macro to the atomic scale—from highway building materials to carbon nanotubes—but, independent of scale, the study of materials is concerned fundamentally with the effect of structure and chemistry on the properties of materials. Materials have historically been so important that different eras of civilization were named according to the materials from which tools were fabricated: the Stone Age, the Bronze Age, and the Iron Age. The development of the semiconductor spawned the modern era of information technology, often called the Silicon Age. Advances in materials science might make this new millennium the Biomaterials/Nanomaterials/Optical Materials Age.

What do Materials Scientists and Engineers do?

In industry, materials scientists and engineers work with natural or synthetic materials and, most often, with combinations of materials to improve existing products or develop novel products. For instance, at Intel, the developer of the processing chip used in most PCs, materials

scientists optimize the materials used in chip packaging, balancing differing coefficients of thermal expansion, heat dissipation, brittleness and compliancy, and cost for optimum performance and economic feasibility.

Other materials scientists are at the forefront of the revolution in biotechnology, developing materials for the components of artificial joints, heart valves, and other replacement body parts. Smart materials in medical and dental applications show tremendous potential, such as compressible stents that reform to their intended shape upon contact with body heat once inserted into an artery, ceramic cement for bone repair, or shape-memory alloys to correct misplaced teeth or spine curvature. (Smart materials have one or more properties that can be dramatically altered, such as multi-viscosity oil, with a viscosity that varies with temperature.)

Related research involves developing smaller and more reliable components, such as ferromagnetic activators acting as tiny machines in military and other applications. In aerospace engineering, materials scientists are developing airframe and fuselage materials with high strength-to-weight ratios and developing smart materials into integrated sensors and actuators for reconfigurable wings and other adaptive structures.

Why is Materials Science and Engineering Important?

Many of the technologies that we need to solve pressing societal problems (efficient energy generation, access to clean water, information processing and storage, safe and efficient transportation, as examples) are fundamentally limited by the materials that we have available to us. Materials scientists and engineers are critical to discovering new materials to advance these technologies.

Materials Science and Engineering at Texas A&M University

The face of materials science and engineering is continuously evolving. Currently, there is massive interest domestically and internationally in new manufacturing processes (3-D printing, additive manufacturing, etc.) and in utilizing computational and informatics approaches to intelligently and rapidly design new materials. Here at Texas A&M, our faculty embrace these new aspects while maintaining vigorous educational and research efforts in the classical core tenants of materials structure, thermodynamics, and kinetics.

Materials Science and Engineering - BS

This program builds a foundation in materials science, merging chemistry, physics, and math to develop and engineer materials for diverse applications, from batteries to semiconductors.

Materials Science and Engineering is an interdisciplinary field centered on understanding the physical and chemical properties of matter and designing materials to serve a specific function (a battery cathode that can store more charge, a lightweight but strong alloy to improve the efficiency in cars, smaller faster semiconductors to make our electronics smarter and more efficient, as a few examples). Materials scientists study the connections between how we make and manufacture a material and how it affects its structure and resulting properties. Materials engineers develop materials and manufacturing techniques and integrate these materials into commercial products.

The BS curriculum builds on a strong foundation in chemistry, physics, and mathematics to explore the fundamental concepts and techniques critical to the field of materials science and engineering. Students have the flexibility to explore interdisciplinary studies or to focus in greater depth on one or more areas of concentration in the allotted technical electives and specialty electives.

This department also offers additional studies in the following Academic Areas of Interest:

- Corrosion Science and Engineering
- Electronic Materials
- Materials Characterization and Failure Analysis
- Soft Materials
- Structural Materials

For your success, our program offers:

- Hands-on lab series starting in sophomore year, culminating in a capstone design course
- Flexibility to choose three specialty electives outside of the major to complement your BS curriculum
- Industry-relevant capstone projects
- Faculty mentoring program starting sophomore year

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering,

manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3

⁶ This is a writing intensive course.

⁷ All students are required to complete a high-impact experience in order to graduate. A list of possible high-impact experiences is available in the MSEN advising office.

⁸ With MSEN department approval, students may use up to a combined total of 6 hours of 484, 485, 491, and ENGR 385 courses to meet Specialty and Technical Elective requirements on their degree plan.

⁹ Select from any MSEN 300-499 (p. 1155) course not used elsewhere.

¹⁰ Select in consultation with advisor from MSEN 300-499 (p. 1155); AERO 300-499 (p. 897); BAEN 300-499 (p. 942); BMEN 300-499 (p. 955); CHEN 300-499 (p. 967); CVEN 300-499 (p. 990); CSCE 110, CSCE 300-499 (p. 985); ECEN 300-499 (p. 1009); ENGR 300-499 (p. 1029); ISEN 300-499 (p. 1095); MEEN 221, MEEN 300-499 (p. 1140); NUEN 300-499 (p. 1168); BIOL 300-499 (p. 951); CHEM 220, CHEM 227, CHEM 228, CHEM 300-499 (p. 964); MATH 300-499 (p. 1135); PHYS 222, PHYS 300-499 (p. 1205); STAT 211, STAT 212, STAT 300-499 (p. 1248); MGMT 309; MKTG 409; FINC 409. All non-MSEN specialty electives must be approved by the Undergraduate Advising Office, on the basis of satisfying one or more of the MSEN BSE program outcomes (e.g., integrating scientific and engineering principles across disciplines).

Materials Science and Engineering - Minor

This program is intended for students interested in enriching their major undergraduate program of study to incorporate a fundamental understanding of materials processing and structure-property relationships to complement their primary degree.

The Materials Science and Engineering minor program is designed to provide a strong materials science educational program for undergraduate science and engineering majors and to integrate a materials focus into their undergraduate training. Students will have the flexibility to select relevant coursework to customize this program of study to best suit their intended area of focus through consultation with an MSEN faculty advisor.

All students are required to have completed an introductory materials science and engineering prerequisite course before applying for the minor. The prerequisite course *does not apply* to the minor. Completion of the minor will be recorded on the student's university transcript.

For more information, visit the Department of Materials Science and Engineering website.

Total Semester Credit Hours		15

¹ Except MSEN 201, MSEN 205, MSEN 222/MEEN 222, MSEN 281, MSEN 301, MSEN 302, MSEN 380, MSEN 400, MSEN 401, MSEN 402, MSEN 485, MSEN 491.

² Up to 2 of these electives (6 credits total) could consist of "Materials-focused course(s)" within the student's home major.

³ Except MSEN 201, MSEN 205, MSEN 222/MEEN 222, MSEN 281, MSEN 301, MSEN 302, MSEN 380, MSEN 400, MSEN 401, MSEN 402.

⁴ Maximum of 3 credits of MSEN 485 or MSEN 491

Students must make a grade of C or better in all courses.

Student must achieve an overall GPA of 2.5 in approved minor courses.

Corrosion Science and Engineering - Certificate

This program trains engineers in multiple corrosion science applications to address widespread industry demands.

The Certificate in Corrosion Science and Engineering was designed in response to industry demand and the national need in strategic sectors, such as infrastructure renewal, energy (extraction, conversion, and transportation), utilities (in particular water), transportation, production, and manufacturing.

The curriculum incorporates:

- cross-disciplinary components on materials science and engineering, thermodynamics, kinetics, and electrochemistry;
- interdisciplinary, integrative courses on the forms of corrosion, the electrochemical and degradation processes in extreme environments, and the control and mitigation strategies to prevent these processes in specific environments; and
- elective courses related to different engineering disciplines and applications as well as professional internships in industry and national laboratories.

The goals of the corrosion science and engineering certificate program are to train the next generation of scientists and engineers:

1. who will serve as a trained, advanced workforce for industry, academia, and government agencies with a basic understanding of environmental degradation assets required to optimize asset life cycle, production efficiency, and worker safety;
2. are familiar with the technological and computational tools and methods for corrosion and material degradation evaluation, inspection, detection, and prevention;
3. have interdisciplinary collaborative experience in materials preservation and degradation, with individuals from different science and engineering disciplines;
4. contribute to interdisciplinary efforts while developing a comprehensive understanding of the potentials and limitations of corrosion science and engineering; and
5. acquire skills necessary to thrive in their chosen career path.

Program Requirements

Code	Title	Semester Credit Hours
MSEN 440	Materials Electrochemistry and Corrosion	3
MSEN 444	Corrosion and Electrochemistry Lab	3
MSEN 446	Corrosion Prevention and Control Methods	3
Select one of the following:		3

AERO 413	Aerospace Materials Science	
BMEN 344	Biological Interactions and Testing	
CHEN 322	Chemical Engineering Materials	
CVEN 306	Materials Engineering for Civil Engineers	
MMET 207	Metallic Materials	
MSEN 201	Fundamentals of Materials Science and Engineering	
MSEN 222/ MEEN 222	Materials Science	
NUEN 265	Materials Science for Nuclear Energy Applications	
Select one of the following:		3
AERO 411	Applications of Fracture Mechanics to Aerospace Structures	
CHEM 466	Polymer Chemistry	
CHEM 470	Industrial Chemistry	
CHEN 430/ SENG 430	Risk Engineering	
CHEN 457	Environmental Engineering	
MEEN 460	Corrosion Engineering	
NUEN 465	Nuclear Materials Engineering	
PETE 355	Drilling Engineering	
Total Semester Credit Hours		15

Polymer Specialty - Certificate

The Polymer Specialty Certificate is designed to provide a strong interdisciplinary educational program for undergraduate engineering and suitably prepared science students interested in pursuing a polymer career.

This certificate will also provide knowledge to reduce the training time required to turn Texas A&M students into productive members of the industrial workforce. This program is the first of its kind offered in the State of Texas and is administered by the Polymer Technology Consortium. No other universities in the State of Texas offer a formal polymer curriculum, despite the significant role the polymer industry plays in the state's economy.

Benefits of this certificate:

- Gain an interdisciplinary education with an emphasis in polymers
- Be better prepared for jobs focusing on polymers
- Acquire an edge over students from other universities who have no documented polymer knowledge
- Obtain knowledge to foster entrepreneurial thinking
- Receive recognition on university transcript upon completion of certificate requirements and graduation
- Broaden your exposure to a diverse polymer science and engineering curriculum
- Expand employment horizons beyond the traditional industrial jobs

For additional information, contact MSEN Undergraduate Advising (msen-ug-advising@tamu.edu).

Program Requirements

Code	Title	Semester Credit Hours
Select two of the following:		6
BMEN 482	Polymeric Biomaterials	
CHEM 466	Polymer Chemistry	
CHEN 451	Introduction to Polymer Engineering	
MEEN 455	Engineering with Plastics	
MEEN 458	Processing and Characterization of Polymers	
MSEN 250	Soft Matter	
MSEN 420	Polymer Science	
Select two of the following:		6
BAEN 427	Engineering Aspects of Packaging	
BMEN 482	Polymeric Biomaterials	
BMEN 483	Polymeric Biomaterial Synthesis	
CHEM 466	Polymer Chemistry	
CHEN 451	Introduction to Polymer Engineering	
MEEN 455	Engineering with Plastics	
MEEN 458	Processing and Characterization of Polymers	
MSEN 250	Soft Matter	
MSEN 418	Composites Processing and Performance	
MSEN 420	Polymer Science	
MSEN 426	Polymer Laboratories	
MSEN 485	Directed Studies ¹	
or MSEN 491 Research		
Total Semester Credit Hours		12

¹ Up to 3 hours of credit can be substituted with research emphasizing polymers (provided polymer coursework has been initiated). Research must be approved by the director of the Polymer Technology Center.

Students should take at least 2 courses outside their department to receive the Polymer Specialty Certificate.

Must earn a grade of C or better in each course used towards certificate.

Must achieve an overall program GPA of 2.5 in approved certificate coursework.

J. Mike Walker '66 Department of Mechanical Engineering

What is Mechanical Engineering?

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products and control systems, and works with the generation, conversion, transmission, and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal, and fluid systems. Mechanical engineers are also responsible for characterization, specification, and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices, and control systems are also the purview of the mechanical

engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting, and research organizations. The undergraduate program in Mechanical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Where do Mechanical Engineers Work?

The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

Mechanical Engineering at Texas A&M

The mission of the Department of Mechanical Engineering is to serve the students of Texas A&M University, the State of Texas, and the nation by:

- providing quality education that is well-grounded in the fundamental principles of engineering, fostering innovation and preparing students for leadership positions and successful careers in industry, government, and academia;
- advancing the knowledge base of mechanical engineering to support the competitiveness of existing industry and to spawn new economic development in Texas and the nation through active involvement in basic and applied research in a global context; and
- successfully pursue life-long learning and advanced study opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

The objectives of the Mechanical Engineering program are to produce graduates who will:

- have successful careers, and become leaders, in industry and the public sector;
- appropriately apply acquired knowledge, work well with other people, effectively communicate ideas and technical information, and continue to learn and improve; and
- successfully pursue advanced studies, if they so choose, opportunities, and subsequently contribute to the development of advanced concepts and leading edge technologies.

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the

student, working with departmental advisors and within the curriculum guidelines.

Experiential Education in Mechanical Engineering

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department. The full bachelors program is offered on College Station and Qatar campuses. All mechanical engineering undergraduate coursework is offered on both campuses, whereas some coursework is offered via distance learning.

Faculty

Abido, Mahmoud Ymy, Instructional Assistant Professor
Mechanical Engineering
PHD, University of California, Merced, 2024

Aguilar, Guillermo, Professor
Mechanical Engineering
PHD, University of California - Santa Barbara, 1999

Allaire, Douglas L, Associate Professor
Mechanical Engineering
PHD, Massachusetts Institute of Technology, 2009

Ambrose, Robert O, University Distinguished Professor
Mechanical Engineering
PHD, University of Texas at Austin, 1991

Anand, N. K., Regents Professor
Mechanical Engineering
PHD, Purdue University, 1983

Antao, Dion S, Associate Professor
Mechanical Engineering
PHD, Drexel University, 2013

Balas, Mark J, Professor
Mechanical Engineering
PHD, University of Denver, 1974

Balawi, Shadi Omar, Instructional Professor
Mechanical Engineering
PHD, University of Cincinnati, 2007

Bandyopadhyay, Arkasama, Instructional Assistant Professor
Mechanical Engineering
PHD, University of Texas Austin, 2020

Banerjee, Debjyoti, Professor
Mechanical Engineering
PHD, University of California at Los Angeles, 1999

Borazjani, Iman, Professor
Mechanical Engineering
PHD, University of Minnesota, 2008

Charoenphol, Ploy Phapanin, Instructional Associate Professor
Mechanical Engineering
PHD, University of Michigan, 2012

Chen, Wei, Assistant Professor
Mechanical Engineering
PHD, University of Maryland, 2019

Claridge, David E, Professor
Mechanical Engineering
PHD, Stanford University, 1976

Cooper, Marcia A, Associate Professor
Mechanical Engineering
PHD, California Institute of Technology, 2004

Cope, Dale A, Professor of the Practice
Mechanical Engineering
PHD, Wichita State University, 2002

Corleto, Carlos Roberto, Professor of the Practice
Mechanical Engineering
PHD, Texas A&M University, 1990

Darbha, Swaroop V, Professor
Mechanical Engineering
PHD, University of California at Berkeley, 1994

Delgado, Adolfo, Associate Professor
Mechanical Engineering
PHD, Texas A&M University, 2008

Elliott, Matt S, Instructional Associate Professor
Mechanical Engineering
PHD, Texas A&M, 2013

Erdemir, Ali, University Distinguished Professor
Mechanical Engineering
PHD, Georgia Institute of Technology, 1986

Felts, Jonathan R, Associate Professor
Mechanical Engineering
PHD, University of Illinois Urbana Champaign, 2013

Friesen, Rebecca F, Assistant Professor
Mechanical Engineering
PHD, Northwestern University, 2020

Gao, Wei, Associate Professor

Majors

- Bachelor of Science in Mechanical Engineering (p. 686)

Mechanical Engineering - BS

This program trains versatile engineers in mechanical systems, design and manufacturing, equipping them with analytical and practical skills for multiple industries and advanced roles.

What is Mechanical Engineering?

Mechanical engineering is a highly diversified profession. The mechanical engineer designs machines, devices, various products

and control systems, and works with the generation, conversion, transmission, and utilization of mechanical and thermal power. Assignments often include analysis and synthesis of mechanical, thermal, and fluid systems. Mechanical engineers are also responsible for characterization, specification, and analysis of materials used in design and manufacturing. Manufacturing systems, robotics, electromechanical devices, and control systems are also the purview of the mechanical engineer. Graduates in mechanical engineering are among the most versatile engineers and enjoy professional employment in industry, government, consulting, and research organizations. The undergraduate program in Mechanical Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Where do Mechanical Engineers Work?

The work of mechanical engineers varies from general engineering to numerous, narrow specialties, as required by the wide variety of employers. A general list, though not in any way exhaustive, of the areas of professional employment opportunities available to mechanical engineers includes: design, construction, controls, materials specification and evaluation, analysis of thermal systems, fluid and solid mechanics, manufacturing, plant engineering, research and development, and technical sales. Many mechanical engineers are promoted to management and administrative positions as well.

Mechanical Engineering at Texas A&M

Mechanical engineers should possess a thorough understanding of engineering science as well as analytical and practical skills in one of many basic mechanical engineering specialties. The mechanical engineering curriculum at Texas A&M requires students to develop and apply logical thinking, innovative approaches, and ethical standards as a prerequisite for professional competence. The curriculum consists of basic theory courses complemented by laboratory experiences in dynamic systems and controls, design, experimentation, fluid mechanics, heat transfer, manufacturing, and materials. Elective courses are offered in numerous areas including air conditioning, automotive engineering, computer-aided design, control systems, corrosion, energy conversion, internal combustion engines, manufacturing, materials, mechanical design, polymers, mechatronics, metallurgy, power generation, robotics, stress analysis, fluid mechanics, turbomachinery, and others. The selection of elective courses is dictated by the interests and goals of the student, working with departmental advisors and within the curriculum guidelines.

Experiential Education in Mechanical Engineering

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor. The mechanical engineering program culminates with a senior capstone design course sequence highlighted by real-life projects sponsored by various industries. Students benefit from the challenges and gratification that come through direct interaction with practicing engineers.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3
ENGR 102	Engineering Lab I - Computation ¹	2
MATH 151	Engineering Mathematics I ^{1,2}	4
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16
Spring		
ENGR 216/ PHYS 216	Experimental Physics and Engineering Lab II - Mechanics ¹	2
MATH 152	Engineering Mathematics II ¹	4
PHYS 206	Newtonian Mechanics for Engineering and Science ¹	3
University Core Curriculum (p. 26) ³		3
Select one of the following:		3-4
CHEM 120	Fundamentals of Chemistry II ^{1,4}	
University Core Curriculum (p. 26) ^{3,5}		
Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from

American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

Second Year

Fall		Semester Credit Hours
ENGR 217/ PHYS 217	Experimental Physics and Engineering Lab III - Electricity and Magnetism ¹	2

⁶ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the MEEN advising office.

⁷ Technical electives: See the Mechanical Engineering Academic Advisor's Office for lists of approved courses. Students must take at least three MEEN technical electives of which at least one course is from the Thermo-fluids Systems area; at least one from Data Science & Experimentation area; and at least one course is from Mechanical & Manufacturing Systems area.

⁸ Select from any 300-499 course.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

Total Program Hours 128

Department of Multidisciplinary Engineering

The Department of Multidisciplinary Engineering provides opportunities for engineering study outside the constraints of traditional engineering curricula. Students may engage with the department in a variety of ways including four-year engineering degrees, combination degree programs that award baccalaureate and graduate/professional degrees in a shortened timeframe, minors, certificates, courses, and a range of engaging programs such as Engineering Entrepreneurship (<https://engineering.tamu.edu/student-life/eep/>) and Subsea Engineering (<https://engineering.tamu.edu/mtde/academics/degrees/graduate/mse-subsea/about-the-subsea-engineering-program.html>).

The mission of the Department of Multidisciplinary Engineering is to:

1. Utilize the strength of the College of Engineering's core discipline departments to ensure graduates have strong technical skills appropriate to engineering practice,
2. Provide a vehicle for innovation in both engineering curriculum design and pedagogy, including active classroom techniques, laboratories, and other experiential learning activities such as fabrication, research, internship, and co-op,
3. Offer customizable opportunities for regional and/or underserved populations,
4. Enable means for students to have unique interdisciplinary/multidisciplinary educational experiences, which may include non-engineering disciplines,
5. Support access for students to develop knowledge and skills in emerging and even not-yet-existing fields, and
6. Prepare leaders and engineers who exhibit a dedication to life-long learning, professional and ethical behaviors, sensitivity to global and cultural awareness and impact, and being agents of positive change.

In addition to activities at the College Station campus, the department maintains strong presences at the Galveston and McAllen campuses and through distance education worldwide. The department is an active innovator in engineering education through the creation and delivery of programs as well as granting students the ability to create new fields of study through the interdisciplinary engineering degree programs.

Majors

- Bachelor of Science in Architectural Engineering, Mechanical Systems for Buildings Track (p. 690)
- Bachelor of Science in Architectural Engineering, Structural Systems for Buildings Track (p. 692)
- Bachelor of Science in Interdisciplinary Engineering (p. 693)
- Bachelor of Science in Interdisciplinary Engineering and Master of Public Health in Occupational Safety and Health, 5-Year Degree Program (p. 695)
- Bachelor of Science in Interdisciplinary Engineering and Juris Doctor, 6-Year Degree Program (p. 697)

Minors

- Engineering Entrepreneurship Minor (p. 699)
- Engineering Project Management Minor (p. 700)

Architectural Engineering - BS, Mechanical Systems for Buildings Track

This program prepares engineers for the architectural, engineering and construction industry, focusing on mechanical building systems like HVAC and energy efficiency.

The BS in Architectural Engineering degree prepares graduates for professional engineering careers within the architectural, engineering and construction industry. Specifically, it prepares them to become licensed professional engineers, achieve leadership positions in consulting firms, suppliers or government agencies, as well as successfully complete graduate studies in engineering or other areas. The Mechanical Building Systems Track to fulfill the BS in Architectural Engineering degree prepares students for careers with more emphasis on energy efficiency, HVAC (Heating, Ventilation, and Air-Conditioning), building environmental controls, and building environment. The focused electives prepare students to design and analyze mechanical systems for buildings.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1

Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative

arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

⁶ All students must take at least two courses in their major that are designated as writing intensive (W) or one writing intensive and one communications intensive (C) course. AREN 200 and AREN 401 taken at Texas A&M University satisfy this requirement. A grade of C or better is required in these courses.

⁷ The three architectural (ARCH) history electives all satisfy the University Core Curriculum requirements for Creative Arts and International and Cultural Diversity (ICD).

⁸ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the AREN advising office.

⁹ Select from ARCH 328, ARCH 335, ARCH 421, COSC 253, COSC 325, COSC 326, COSC 461; BAEN 477/MEEN 477, CVEN 306, CVEN 363, CVEN 365, CVEN 444, CVEN 445, MEEN 439, MEEN 469, MEEN 477/BAEN 477, SENG 422.

¹⁰ PHIL 482 - Engineering Ethics satisfies the University Core Curriculum requirements for Language/Philosophy/Culture and Cultural Discourse (CD).

¹¹ Select from ATMO 363, ECCB 205, GEOG 205, GEOL 101, GEOL 104, MATH 304, MATH 311, MATH 401, PHYS 222, RWFM 375, STAT 211, STAT 414.

A grade of C or better is required in all science, mathematics, and engineering courses taken to satisfy degree requirements.

This curriculum lists the minimum number of classes required for graduation. Additional courses may be taken.

Total Program Hours 128

Architectural Engineering - BS, Structural Systems for Buildings Track

This program prepares engineers for the architectural, engineering and construction industry, emphasizing structural building systems design and safety, leading to professional licensure and advanced career opportunities.

The BS in Architectural Engineering degree prepares graduates for professional engineering careers within the architectural, engineering and construction industry. Specifically, it prepares graduates to become licensed professional engineers, achieve leadership positions in consulting firms, suppliers or government agencies, as well as successfully complete graduate studies in engineering or other areas. The Structural Building Systems Track to fulfill the BS in Architectural Engineering degree prepares students for careers with more emphasis on the structural design and safety of buildings. The focused electives prepare students to design and analyze structural systems for buildings.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. Total Program Hours 128

Interdisciplinary Engineering - BS

This program offers a tailored engineering education, allowing students to specialize in emerging fields or unique interdisciplinary studies, leading to distinct skill sets.

Earning a Bachelor of Science (BS) degree in interdisciplinary engineering (ITDE) allows students to develop unique skill sets and specialize in areas that may not be provided in a traditional department degree program. Such specializations may be driven by emerging technical fields or by a student's desire to have an immersive interdisciplinary experience. ITDE students graduate with a specific set of skills resulting from a unique program of study.

In addition to the coursework students must take, remaining credits of specialization may either be determined through a pre-approved program of study or through a student-led design with approval from the ITDE Advisory Committee.

Many students enhance their education by participating in cooperative education and/or professional internships, which offer opportunities for employment in engineering positions while working toward a degree. Numerous study abroad programs are also available for gaining experience and perspectives in the international arena. Participation in student chapters of professional and honor societies provides leadership opportunities, collegial activities, and learning experiences outside the classroom. Many students also participate in research projects through individual directed studies courses with a professor.

Before commencing course work in the major, students must be admitted to the major or have the approval of the degree program.

The BS in ITDE degree is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas, and the Texas A&M University at Galveston campus. The program has not undergone ABET accreditation review at the Galveston campus.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. Interdisciplinary Engineering - 5-Year Bachelor of Science and Master of Public Health in Occupational Safety and Health

This program combines engineering and public health, training students to create safer work environments by integrating biomedical technology and public health interventions.

The College of Engineering and School of Public Health offer a combination degree program leading to the BS in Interdisciplinary Engineering (ITDE) and Master of Public Health (MPH) in Occupational Safety and Health degrees. This program is structured to allow students to complete it in five academic years, reducing the typical time to completion for sequential degrees by one year.

This combined degree program will educate students in biomedical technology and public health aspects of occupational environments. It utilizes an interdisciplinary approach to integrate relevant aspects of human health monitoring, ergonomics and workplace design, and public education and intervention for the purpose of creating healthier and safer working environments. This program has developed from university interdisciplinary research initiatives that are addressing the grand challenge of overcoming the human and economic burden of diabetes, heart disease, and other chronic conditions in underserved communities.

Students who enroll in the combined program complete their first three academic years in the College of Engineering. Upon the conclusion of the spring semester of the third year, students begin concurrent coursework in the School of Public Health and College of Engineering for the fourth and fifth academic years. Students must complete all curriculum requirements and all additional graduation requirements published in the applicable undergraduate and graduate catalogs for the BS-ITDE degree and the MPH degree.

Students interested in this combined program are strongly advised to meet with an academic advisor in the BS in Interdisciplinary Engineering program as early as possible to understand issues related to admission to both the BS and MPH programs, course scheduling, minimum academic performance standards, and others. Admission to the BS degree program does not guarantee admission to the MPH portion, and students must apply to the School of Public Health in the third academic year in order to begin public health studies in the fourth academic year.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in

Total Program Hours 128

any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1

University Core Curriculum (p. 26) ^{3,5}		
Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

⁶ A total of 46 semester credit hours of technical electives are required. To be selected in consultation with ITDE advisor.

⁷ Select from ASTR 314; ATMO 363; BIOL 111, BIOL 113; CHEM 222, CHEM 227, CHEM 310, CHEM 311, CHEM 315, CHEM 316, CHEM 318, CHEM 322; ECCB 205; GEOG 205; GEOL 101, GEOL 104; MARS 408, MARS 410; MATH 304, MATH 311, MATH 323, MATH 401; PHYS 222; RWFM 375; STAT 211, STAT 414.

⁸ Courses taken for credit for both the undergraduate and graduate degree for a combined total of 12 semester credit hours: PHEO 618, PHEO 640, PHEO 678, PHEO 679.

⁹ A total of 6 semester credit hours of PHEO electives are required. To be selected in consultation with PHEO advisor.

The combined program includes a total of 161 semester credit hours, which includes 12 semester credit hours applied both to the Bachelor of Science in Interdisciplinary Engineering and Master of Public Health in Occupational Safety and Health.

Total Program Hours 161

Interdisciplinary Engineering - 6-Year Bachelor of Science and Juris Doctor

This program merges engineering and law, preparing students for legal careers requiring technical expertise, like patent or environmental law, through a streamlined six-year curriculum.

The College of Engineering and School of Law offer a combination degree program leading to the BS in Interdisciplinary Engineering (ITDE) and Juris Doctor (JD) degrees. This program is structured to allow students to complete it in six academic years, reducing the typical time to completion for sequential degrees by one year.

This combined degree program educates students in engineering and technology as a precursor to studies and practice in the law. Areas of legal practice that require advanced understanding of the engineering and technology development process include patents and intellectual property law, environmental law, and workplace health and safety law, among others. This program allows a streamlining of studies with mutual reinforcement of the respective degree disciplines.

Students who enroll in the combined program complete their first three academic years at the College of Engineering on the College Station campus. Upon the conclusion of the spring semester of the third year, students begin coursework in the School of Law for the fourth and fifth academic years in Fort Worth. For the sixth and final year, students have their primary curricula with the School of Law with coursework taken from both the School of Law and the College of Engineering, and they have the option to reside on either the Fort Worth or College Station campus to facilitate choices of specific courses. Students must complete all curriculum requirements and all additional graduation requirements published in the applicable undergraduate and graduate catalogs for the BS-ITDE degree and the JD degree.

Students interested in this combined program are strongly advised to meet with an academic advisor in the BS in Interdisciplinary Engineering program as early as possible to understand issues related to admission to both the BS and JD programs, course scheduling, minimum academic performance standards, and others. Admission to the BS degree program does not guarantee admission to the JD portion, and students must apply to the School of Law in the third academic year in order to begin law studies in the fourth academic year.

Semester Credit Hours		14
Total Semester Credit Hours		157

⁶ A total of 40 semester credit hours of technical electives are required. To be selected in consultation with ITDE advisor.

⁷ Select from the following courses: ASTR 314; ATMO 363; BIOL 111, BIOL 113; CHEM 222, CHEM 227, CHEM 310, CHEM 311, CHEM 315, CHEM 316, CHEM 318, CHEM 322; ECCB 205; GEOG 205; GEOL 101, GEOL 104; MARS 408, MARS 410; MATH 304, MATH 311, MATH 323, MATH 401; PHYS 222; RWF 375; STAT 211, STAT 414.

⁸ Students must successfully complete a minimum of six credit hours in one or more upper-level experiential courses. As part of the six credit hours, the student must successfully complete an approved externship or a clinic that involves advising or representing one or more actual clients or serving as a third-party neutral. An experiential course must be a simulation course, a law clinic, or a field placement.

⁹ One LARW III course is required.

¹⁰ Courses taken for credit for both the undergraduate and professional degree for a combined total of 30 semester credit hours: ITDE 301, ITDE 401, ITDE 402, 6 semester credit hours of technical electives, and 18 semester credit hours of upper level LAW electives. All double-counted elective courses are to be selected in consultation with both ITDE and LAW advisors.

The combined program includes a total of 188 semester credit hours, which includes 30 semester credit hours applied both to the Bachelor of Science in Interdisciplinary Engineering and Juris Doctor degrees.

The JD degree is conferred on students who satisfactorily complete the program with a cumulative grade point average of 2.33 or better in LAW classes. In addition, each student must complete an upper-level rigorous writing requirement, a six-hour experiential requirement, and a 30-hour *pro bono* requirement. Students must complete their degree requirements

within 72 months of starting law school, which occurs at the start of the fourth year of this combined program.

Total Semester Credit Hours for Combination Program 188

Engineering Entrepreneurship - Minor

The College of Engineering offers a minor in Engineering Entrepreneurship, designed to equip engineering students with the essential skills and knowledge to understand the role of entrepreneurs and innovators in businesses.

This minor emphasizes the intersection of engineering expertise with business acumen, preparing students to transform technical ideas into viable business opportunities. It provides a comprehensive understanding of the entrepreneurial process, from ideation to market realization, and the unique challenges of entrepreneurial ventures in engineering and technology domains.

Students completing the minor will gain proficiency in recognizing and evaluating technological opportunities, understanding customer and market dynamics, developing lean business strategies, and leading entrepreneurial initiatives. They will gain awareness of the dynamic landscape of technology startups and the innovation point of view within established engineering companies.

Areas of focus for the Engineering Entrepreneurship Minor are

- Innovation and Idea Generation: techniques for identifying and evaluating engineering-based entrepreneurial opportunities
- Business Strategy and Models: developing effective strategies and business models for technology-driven ventures
- Financial Acumen and Funding: understanding financial principles, venture capital, and funding strategies for startups
- Entrepreneurial Leadership: leadership skills and team management relevant in enterprise and startup environments
- Practical Entrepreneurship: hands-on experience through projects, incubator programs, or collaboration with startups

This minor aligns with the growing need for engineers who are not only technically proficient but also capable of leading innovative business ventures, making it an ideal choice for engineering students aiming to become leaders in the innovation-driven tech entrepreneurial world.

Total Semester Credit Hours 16

Students must earn a C or better in all minor coursework.

Engineering Project Management - Minor

The Engineering Project Management minor is intended to help meet the requirements of industry by educating undergraduate engineering students to understand complex engineering projects, project organizations, and project management methods.

Students completing this minor will be able to work effectively in multidisciplinary engineering projects immediately after completion and to advance more rapidly within the project management organization and profession. The management of projects entails technical knowledge, engineering skills, and management skills.

To earn the minor, a student must complete credit hours that include prerequisite introductory core courses and courses selected from the following 3 categories:

1. *Business management and leadership.* The courses listed under this category provide required skills to understand the key management principles and provide leadership in project planning and execution.
2. *Economics, systems, and decisions.* The courses listed under this category provide advanced understanding of the analytical tools required to support project planning and execution.
3. *Project management applications.* The courses listed under this category provide examples of the application of project management principles.

Program Requirements

Code	Title	Semester Credit Hours
MTDE 333	Project Management for Engineers	3

Total Semester Credit Hours

16

Minimum required GPA to declare minor is a 2.5.

Must earn a grade of C or better in each course used towards minor.

Must achieve an overall GPA of 2.5 in approved minor coursework.

Department of Nuclear Engineering

Nuclear Engineering

Nuclear engineering deals with the application and utilization of nuclear processes and radiation. The use of nuclear energy for the production of electrical power is a mature industry. Nuclear engineers work on all aspects of the nuclear fuel cycle and for many different types of employers such as government and private labs, regulatory agencies, reactor vendors, utilities and architect engineers. In addition, nuclear energy for space applications is a rapidly expanding field. Radionuclide technology in industry and medicine requires a large number of well-trained radiological health engineers. To supply qualified engineers, the Department of Nuclear Engineering offers curricula leading to the Bachelor of Science degree in Nuclear Engineering and is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The missions of the Department of Nuclear Engineering are:

- to produce high-quality graduates from the undergraduate through the doctoral levels to help meet the technical manpower needs of our state, region, nation, and the international community;
- to conduct research, including collaboration with research in related fields, to advance the state of knowledge in these disciplines in support of the needs of society; and
- to perform service in these disciplines for many constituencies including our College and University, industry, government and national laboratories, professional organizations, and the public.

In fulfilling these missions, the objective of the undergraduate program is to prepare students for success in their professional endeavors following the baccalaureate degree. These endeavors may include direct employment in the private or public sectors, graduate studies in engineering or science, professional studies in medicine, business, law or public administration, service in the military, or entrepreneurial activities. To achieve this purpose, four principal educational objectives are identified. Graduates of our Bachelor of Science program in Nuclear Engineering:

1. will work on the challenges of maintenance, improvement, innovation, education, and research in nuclear power and industrial utilization of nuclear radiation and radionuclides. In this work, they will fulfill independent assignments, engage in collaborations, and manage the work of others with effective communications characterizing all phases of their responsibilities;

2. will conduct their professional activities with full recognition of the choices and challenges implicit to their work, to its ethical dimensions, and to their implications for matters beyond their immediate tasks;
3. will take the local, global, historical, social, economic, and political settings into account in both their domestic and international endeavors; and
4. will recognize and utilize both the accumulated body of results from prior work and the continuing evolution of science and technology as essential resources for the effective conduct of their work.

The nuclear engineering baccalaureate degree programs stress engineering science fundamentals and mathematics. However, considerable numbers of elective hours are available in the curriculum to permit students to broaden their educations as desired.

Most of the facilities used in the MS and PhD programs are also used in the undergraduate degree programs. These facilities make the Department of Nuclear Engineering one of the best equipped in the United States. Texas A&M is now the only University in the United States with two nuclear reactors on its campus.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Nuclear Engineering - BS

This program prepares future nuclear engineers for a range of fields, from reactor operations to radiation technologies, for careers across research and industry.

The Bachelor of Science in Nuclear Engineering degree program aims to educate and prepare future nuclear engineering professionals,

researchers and leaders in the fields of nuclear science and nuclear technologies, including nuclear reactor design/operation/simulation/maintenance, nuclear energy production, radiation detection, radiological health technologies, computational method developments, nuclear materials, nuclear security and nuclear policies. The program is built upon a solid foundation and training from physics, mathematics and mechanical engineering. The program integrates fundamentals, applications and hands-on practices in nuclear-specific topics. Upon graduation, students are ready for jobs in academic fields, national laboratories, industry and professional schools. Students can expect to be instilled with the highest standards of professional and ethical behavior and prepared to meet the complex challenges associated with nuclear science and engineering.

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

First Year

Fall		Semester Credit Hours
CHEM 107	General Chemistry for Engineering Students ^{1,4}	3
CHEM 117	General Chemistry for Engineering Students Laboratory ^{1,4}	1
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	3
ENGR 102	Engineering Lab I - Computation ¹	2
MATH 151	Engineering Mathematics I ^{1,2}	4
University Core Curriculum (p. 26) ³		3
Semester Credit Hours		16

Spring

ENGR 216/ PHYS 216	Experimental Physics and Engineering Lab II - Mechanics ¹	2
MATH 152	Engineering Mathematics II ¹	4
PHYS 206	Newtonian Mechanics for Engineering and Science ¹	3
University Core Curriculum (p. 26) ³		3
Select one of the following:		3-4
CHEM 120	Fundamentals of Chemistry II ^{1,4}	

introduce them to concepts of nuclear reactor theory, isotope detection, reactor analysis, and an approach to nuclear engineering experiments. The minor is ideal for those wanting to further expand their knowledge in a complex discipline, or for those that seek a basic understanding of nuclear engineering principles for work within industry.

Program Requirements

Code	Title	Semester Credit Hours
NUEN 301	Nuclear Reactor Theory	3
NUEN 302	Introduction to Nuclear Engineering II ¹	3
NUEN 303	Radiation Detection and Isotope Technology Laboratory ²	3
	or NUEN 405 or Nuclear Engineering Experiments	
NUEN 300-499 ³		6
Total Semester Credit Hours		15

¹ NUEN 201 is not needed as a prerequisite. Waiver requires instructor approval

² Taking NUEN 405 without NUEN 304 as the prerequisite is allowed for this minor program. Waiver requires instructor approval

³ Selects from approved departmental list.

Students must make a grade of C or better in all courses.

Radiological Health Engineering - Minor

This program provides a broad radiological health engineering foundation, preparing specialists for multiple roles in nuclear industries, government, hospitals and research.

The Department of Nuclear Engineering offers a minor in Radiological Health Engineering. Expanding and emerging nuclear applications have created a strong demand for specialists in radiological health engineering. Well-educated individuals are, and will be, required in all aspects of the nuclear power industry from mining all the way to disposal of wastes from spent fuel. There are needs for radiological health specialists in government, hospitals, educational institutions and private industry. This program at Texas A&M is designed to give students a broad background so they will be able to assume positions in any area of the nuclear industry.

Program Requirements

Code	Title	Semester Credit Hours
NUEN 302	Introduction to Nuclear Engineering II ¹	3
NUEN 303	Radiation Detection and Isotope Technology Laboratory	3
NUEN 309	Radiological Safety	3
NUEN 475	Environmental Nuclear Engineering	3

¹ NUEN 201 is not needed as a prerequisite. Waiver requires instructor approval

² Select from approved departmental list.

Students must make a grade of C or better in all courses.

Department of Ocean Engineering Ocean Engineering

Ocean engineering is the application of basic engineering principles to the analysis, design, construction, and management of systems that operate in the ocean environment or near shore. Typical ocean engineering application areas include: beach protection and nourishment, coastal structures and erosion, wave and current structure interaction, development of ocean energy resources, instrumentation for coastal and offshore measurements, marine dredging and dredged material placement, ocean mining, offshore petroleum recovery, offshore structures and vessels, marine hydrodynamics, marine risers, moored and towed systems, numerical and physical modeling, ports and harbors, remotely operated and autonomous underwater vehicles, renewable ocean energy systems, search and salvage, suspended and dissolved constituent transport, subsea pipelines and cables, seafloor pipeline and umbilical layouts, flow assurance, submersible vehicles, sustainable and resilient ocean systems, and underwater acoustics. Employment opportunities exist with private industry, defense contractors, consulting firms, and government agencies. Ocean engineering students are encouraged to pursue summer internships and study abroad program and may participate in the University cooperative education program. The undergraduate program in ocean engineering in the Department of Ocean Engineering at Texas A&M University is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The mission of the Ocean Engineering Program is to conduct research, serve the public, and educate students in a broad program of instruction encompassing traditional and emerging areas of ocean engineering. Graduates are prepared for entering engineering practice, continuing onto graduate study, life-long learning and professional development. Students develop a sense of professionalism and an appreciation for the obligations of a professional engineer. The Program offers ocean engineering continuing education activities for the people and marine industry of the state, nation and international community. The Program serves the public and engineering profession in Texas and the nation through participation of faculty and students in public and professional activities. Applied and fundamental research is conducted that contributes to the better understanding of ocean engineering and supports student educational development.

The undergraduate ocean engineering program within the Department of Ocean Engineering at Texas A&M University will produce graduates who will:

- Work in ocean engineering and related engineering fields with private and government organizations;
- Advance to positions of increased responsibility and develop professionally through training, technical conferences, and continuing education activities; and adapt to emerging technologies and issues;
- Become professional engineers and members of ocean engineering related professional societies; and

- Pursue graduate studies in ocean engineering and related fields and receive post-baccalaureate degrees.

The Department of Ocean Engineering is a two-campus department with campuses located in College Station and Galveston, Texas. The laboratory facilities accessible to the Department of Ocean Engineering are among the most comprehensive in the nation for testing offshore, underwater, and coastal systems. The College Station facilities are located in the Offshore Technology Research Center, Zachry Engineering Education Complex, and the Haynes Engineering Building. These facilities include a large deep water wave basin, a wave channel, fluid dynamics laboratory equipment, and data acquisition systems. The facilities in Galveston include naval architecture, fluid dynamics, and geotechnical experimental equipment, and two wave channels. The Galveston campus also provides access to the Gulf of America through the use of small boats and research vessels that are available for education and research. Additional information is available on the Department of Ocean Engineering website.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department head.

Majors

- Bachelor of Science in Ocean Engineering (p. 705)

Ocean Engineering - BS

The BS in Ocean Engineering degree emphasizes breadth across the various fields of ocean engineering.

Students take courses in all major sub-disciplines of ocean engineering with advanced electives allowing for deeper learning in focus areas. The degree is appropriate for any discipline of ocean engineering, with particular relevance for those interested in coastal works, off-shore energy (oil and gas and renewables), naval architecture, underwater robotics, and for those planning on further specialization in graduate studies.

This program is approved to be offered at the Texas A&M University at Galveston campus.

For more information please see <https://engineering.tamu.edu/ocean/index.html> (<https://engineering.tamu.edu/ocean/>)

Program Requirements

The freshman year is identical for degrees in aerospace engineering, architectural engineering, civil engineering, computer engineering, computer science, data engineering, electrical engineering, electronic systems engineering technology, environmental engineering, industrial distribution, industrial engineering, interdisciplinary engineering, manufacturing and mechanical engineering technology, mechanical engineering, multidisciplinary engineering technology, nuclear engineering, ocean engineering, and petroleum engineering. The freshman year is slightly different for chemical engineering, biomedical engineering and materials science and engineering degrees in that students take CHEM 119 or CHEM 107/CHEM 117 and CHEM 120. Students pursuing degrees in biological and agricultural engineering should refer to the specific curriculum for this major. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

University Core Curriculum (p. 26) ^{3,5}		
Semester Credit Hours		15-16
Total Semester Credit Hours		31-32

¹ A grade of C or better is required.

² Entering students will be given a math placement exam. Test results will be used in selecting the appropriate starting course which may be at a higher or lower level.

³ Of the 21 hours shown as University Core Curriculum electives, 3 must be from creative arts (see AREN curriculum for more information), 3 from social and behavioral sciences (see DAEN and IDIS curriculum for more information), 3 from language, philosophy and culture (see CVEN, EVEN and PETE curriculum for more information), 6 from

American history and 6 from government/political science. The required 3 hours of international and cultural diversity and 3 hours of cultural discourse may be met by courses satisfying the creative arts, social and behavioral sciences, language, philosophy and culture, and American history requirements if they are also on the approved list of international and cultural diversity (p. 49) courses and cultural discourse (p. 48) courses.

⁴ BMEN, CHEN and MSEN require 8 hours of fundamentals of chemistry which are satisfied with CHEM 119 or CHEM 107/CHEM 117 and CHEM 120; Students with an interest in BMEN, CHEN and MSEN can take CHEM 120 second semester freshman year. CHEM 120 will substitute for CHEM 107/CHEM 117.

⁵ For BS-PETE, allocate 3 hours to core communications course (ENGL 210, COMM 203, COMM 205, or COMM 243) and/or 3 hours to UCC elective. For BS-MEEN, allocate 3 hours to core communications course (ENGL 203, ENGL 210, COMM 203 or COMM 205) and/or 3 hours to UCC elective.

⁶ All students are required to complete a high-impact experience in order to graduate. The list of possible high-impact experiences is available in the OCEN advising office.

⁷ This technical elective must be approved by the department head or the undergraduate advisor. Technical electives are chosen from the approved technical elective list.

⁸ All students must take at least two courses in their major that are designated as writing intensive (W). OCEN 407 and OCEN 410 taken at Texas A&M satisfy this requirement.

A grade of C or better is required in all required mathematics (MATH) and ocean engineering (OCEN) courses taken to satisfy degree requirements.

Total Program Hours 128

Harold Vance Department of Petroleum Engineering

Petroleum Engineers provide the world with energy while safeguarding the environment. Petroleum Engineering is concerned primarily with the safe and economic extraction of oil, gas, and other natural resources from the earth. Oil and gas is produced through the design, drilling and operation of wells and well systems, and the integrated management of the underground reservoirs in which the resources are found.

The mission of the Petroleum Engineering Department is to create, preserve, integrate, transfer and apply petroleum engineering knowledge and to enhance the human capability of its practitioners. The Petroleum Engineering Program has two educational objectives:

- graduates will have the technical depth and breadth to be successful professionals early in their careers; and

- graduates will have the broad technical knowledge and soft skills needed to rise to positions of professional leadership.

In essence, the goal of the Petroleum Engineering curriculum is to provide a modern engineering education with proper balance between fundamentals and practice, and to graduate engineers capable of being productive contributors immediately who are also prepared for life-long learning. The curriculum includes study of:

- design and analysis of well systems and procedures for drilling and completing wells;
- characterization and evaluation of subsurface geological formations and their resources;
- design and analysis of systems for producing, injecting and handling fluids;
- application of reservoir engineering principles and practices for optimizing resource development and management; and
- use of project economics and resource valuation methods for design and decision making under conditions of risk and uncertainty.

There is a heavy emphasis on mathematics, computer applications, communication skills and interdisciplinary problem solving. As a result, Aggie petroleum engineers are in high demand in the industry, and their starting salaries are consistently among the top in the University and the nation.

The department is well known for its curriculum, facilities and faculty, and its undergraduate program is recognized as one of the top petroleum engineering programs in the United States. The faculty comprises more than 36 professors and lecturers, many of them widely known and globally involved in the petroleum industry. Three (3) of the faculty are members of the prestigious National Academy of Engineering, and 20 are Distinguished Members of the Society of Petroleum Engineers. The Bachelor of Science program is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Students must work as interns within the Energy Industry. A minimum of one internship, six weeks of approved experience, is required for graduation. The department also participates in the Cooperative Education Program.

In addition to the Bachelor of Science degree in Petroleum Engineering, the department also offers both masters and doctoral degrees, including Master of Science, Master of Engineering, and Doctor of Philosophy (see the *Texas A&M University Graduate and Professional Catalog*).

The department offers a combined program designed to help students complete both a Bachelor's degree and a Master's degree within 5 years. For more information, please contact the advising office.

Before commencing course work in the major, students must be admitted to the major or have the approval of the department.

Data Analytics for Petroleum Industry - Certificate

This program equips students from diverse fields with data analytics skills for the oil and gas industry, addressing the growing need for data-driven expertise in exploration and operations.

There is a growing trend towards the use of data analytics in the upstream and downstream oil and gas industry. With the large-scale deployment of sensors in exploration, drilling, production, asset management, supply chain, and various commercial operations, oil and gas industry has become a massive data intensive industry. Analyzing seismic and micro-seismic data, improving reservoir characterization and simulation, reducing drilling time and increasing drilling safety, optimization of the performance of production pumps, improved petrochemical asset management, improved shipping and transportation, and improved occupational safety are among some of the applications of data analytics in oil and gas industry. Oil and gas industry needs petroleum engineers, geophysicists, geoscientists, and managers to be better equipped with data analytics skills.

This certificate program will appeal to students majoring in geology, geophysics, petroleum engineering, statistics, computer science, and business. With the data analytics skills, students will become more competitive in the job market of the oil and gas industry. Students in statistics or business will acquire domain knowledge in the oil and gas industry and will obtain experience working with real world data. This certificate will equip these students with the skills and experiences for employment in the oil and gas industry.

Program Requirements

Code	Title	Semester Credit Hours
PETE 201	Introduction to Petroleum Engineering	1
STAT 483	Interdisciplinary Data Analytics Practicum	3
Computation and Programming		3
Select one of the following:		
CSCE 310	Database Systems	
CSCE 314	Programming Languages	
GEOP 361	Geophysical Signal Processing	
ISTM 313	Foundations of Data Analytics for Non-MIS Majors	
ISTM 315	Database Programming	
PETE 404	Integrated Reservoir Modeling	
STAT 404	Statistical Computing	
Statistics and Data		3
Select one of the following:

ISTM 360	Applied Predictive Analytics	
PETE 419	Petroleum Data Analytics and Machine Learning	
STAT 436	Multivariate Analysis and Statistical Learning	
Total Semester Credit Hours		13

Petroleum Ventures - Certificate

This program blends engineering and finance, preparing petroleum engineers for leadership and expanded technical roles in the energy sector through business concepts and industry collaboration.

The Petroleum Ventures Certificate Program (PVP) sets Aggie petroleum engineers apart by giving them unparalleled exposure to business concepts, entrepreneurship, industry leaders and case-based learning opportunities where they work together with business students to solve problems and study real world energy companies. This interdisciplinary environment prepares them for leadership and expanded technical roles within the industry. The program is set up in collaboration with the Finance Department of the Mays Business School. PVP certificate holders are viewed as students who are committed to working hard to further their education and to better prepare themselves for integrated roles in the industry. With the engineering, finance and leadership skills combined, students become more competitive in the energy job market.

The Petroleum Ventures Certificate Program (PVP) impacts the following student groups:

- Undergraduate petroleum engineering and finance students who have a desire to work in Energy Finance, Petroleum Investment Management, or have a goal of senior management of an oil and gas company and/or a goal of one day creating and managing their own energy company.
- Petroleum engineers and finance undergraduate students who are seeking specialized training.

BUSH SCHOOL OF GOVERNMENT AND PUBLIC SERVICE

bush.tamu.edu (<http://bush.tamu.edu>)

Administrative Officers

- Dean – Hon. John B. Sherman '92
- Executive Associate Dean – Maria C. Escobar-Lemmon, PhD
- Senior Associate Dean for Faculty Affairs – Leroy G. Dorsey, PhD
- Associate Dean for Research and Graduate Education – Michelle M. Taylor-Robinson, PhD
- Associate Dean for Undergraduate Programs – Robert R. Shandley, PhD
- Assistant Dean for Graduate Career and Student Services – Matthew Upton, PhD
- Assistant Dean for Finance and Administration – Joe Dillard
- Assistant Dean for Development, Alumni Relations, and Strategic Initiatives – Joy Monroe

About the Bush School of Government and Public Service

The Bush School of Government and Public Service offers degree programs at all levels of study: Bachelor's degrees and Master's degrees in International Affairs, Political Science, and Public Service and Administration, a Doctor of Philosophy in Political Science, and diverse certificate programs.

Master degrees are offered in five areas: Master of Public Service and Administration (MPSA), Master of International Affairs (MIA), Master of International Policy (MIP), Master of National Security and Intelligence (MNSI), and Master of Science (MS) in Political Science. These degree programs prepare students for careers in public service spanning the public and nonprofit sectors, in the United States and in the international arena. The MPSA and MIA degrees are offered at the College Station campus, the MIP degree is offered both in College Station and at the Bush School's Washington, D.C. teaching site, and the MNSI is offered at the Washington D.C. teaching site. Admission into the MIP degree program requires six years of international experience, broadly understood. For students with five or more years of professional experience, we also offer the Executive Master of Public Service and Administration (EMPSA), which is an online degree program with two required one-week sessions in residence.

Students in the International Affairs and Political Science undergraduate programs—as well as students from Economics, Agricultural Economics, Sociology, and Rangeland, Wildlife and Fisheries Management—can also apply for the Bachelor's and Master's combination program. Students begin their studies in the relevant undergraduate major and then apply to the MPSA or MIA program in the fall semester of their junior year.

A Doctor of Philosophy (PhD) in Political Science is offered through the Department of Political Science. The PhD program emphasizes theoretical and methodological rigor and is designed to train applied

social scientists for careers in research. All PhD students complete a common core of formal theory, statistical modeling, and general substantive requirements, in addition to developing expertise in a major and two minor fields selected from: American Politics, Comparative Politics, International Relations, Political Theory, Public Administration/ Public Policy, Advanced Research Methodology, and Race, Ethnic, and Gender Politics. In all of these fields of study the program emphasizes the role of incentives, institutions, and strategies in the aggregation of preferences and ultimately the allocation of resources.

The Bush School also offers certificate programs on diverse topics. For those seeking to strengthen their skills in international affairs or homeland security, the graduate certificate in Advanced International Affairs, or the graduate certificate in Homeland Security are offered. For those who seek to enhance their understanding of nonprofit organizations and management practices appropriate to the nonprofit sector we have the graduate certificate in Nonprofit Management and the graduate certificate in Public Management. The certificate in Geospatial Intelligence is for those seeking the combination of a technical skill set, knowledge of intelligence processes and critical thinking ability required of practitioners. The graduate certificate in National Security Affairs is an executive-level program tailored to the needs of the Department of Energy National Security Laboratories and Facilities. Certificates vary in residence requirements and some certificates have remote learning or combined format options.

General Degree Requirements

Degree requirements for Bush School of Government and Public Service majors are organized into:

1. General Requirements, including University Core Curriculum requirements and Bush School of Government and Public Service requirements
2. Requirements of the Major Field of Study
3. Requirements of the Minor Field of Study (if appropriate)
4. Electives

A minimum of 120 acceptable hours of coursework is required for the baccalaureate degree. A minimum of 36 hours of 300- or 400-level coursework must be completed at Texas A&M University.

General Requirements

The areas listed below include University Core Curriculum requirements and Bush School requirements. The completion of requisite hours in these areas will thus satisfy both University Core Curriculum and Bush School requirements.

International Cultures and Diversity ⁵	
Cultural discourse (p. 48)	3
International and cultural diversity (p. 49)	3
Total Semester Credit Hours	74

¹ Students must demonstrate the ability to express themselves in acceptable written English. The school requirement is satisfied if a student earns a grade of C or better in ENGL 104. Students who do not meet this standard must repeat the course prior to completing 60 hours and earn a grade of C or better.

² No course used to fulfill this requirement may fulfill any other college or University requirement except in the minor field of study.

³ Students must take a foreign language placement test if they:

- intend to enroll for the first time in a college Spanish, French, German, Russian, Arabic, Chinese, Japanese, Classical Greek, Italian, or Latin course and
- have knowledge of the language acquired in any way

The placement test serves as a basis for credit by examination. Placement tests are offered throughout the calendar year by the Department of Global Languages and Cultures.

Students who have taken the Advanced Placement (AP) test or the Reading Achievement test in their foreign language of choice may substitute the test results for the placement exam.

⁴ Courses in military, air or naval science may not be substituted for required courses.

⁵ The list of approved courses is available in the degree audit for each major.

Major Field of Study

Each department sets its own requirements for the major, including no fewer than 27 hours of coursework and no more than 33 hours. At least 12 semester hours in the major must be completed in advanced courses (300- and 400-level), and at least 12 semester hours in the major field must be completed in residence at Texas A&M. A grade of C or higher is required in a course to be counted toward the major.

Minor Field of Study

Completion of a minor is not a requirement of the school; however, individual departments may require their majors to have a minor. Students should consult with an advisor in their major department to determine if a minor is required. The minor program comprises 15–18 hours with a minimum of 6 hours in residence at the 300- to 400-level. Minor programs are recognized on the official transcript after graduation,

but not on the diploma. Each student who is required to complete a minor, or who chooses to do so, should contact the department that offers the minor to determine which specific courses are mandated. No student may have more than two minors. The student's home department is responsible for advising after the student receives signed approval from the department, program, or college granting the minor program.

Electives

Elective courses may be chosen from any field within the University. (See section on "Requirements for a Baccalaureate Degree" in this catalog.) All other elective hours must be selected with the approval of the student's advisor and dean.

- ASCC 289 and ASCC 101 may only be taken on an S/U basis.
- Only 14 hours of KINE 199; AERS 100-499 (p. 900); MLSC 100-499 (p. 1151); NVSC 100-499 (p. 1178); SOMS 100-499 (p. 1237) may be used toward General Electives
- Any undergraduate student may take up to four semester credit hours of KINE 199 on an S/U basis.
- Students who have less than a 2.0 GPA and who enroll in KINE 199 must enroll in the course on an S/U basis.

Majors

Department of International Affairs

- Bachelor of Arts in International Affairs (p. 729)
- Bachelor of Arts in International Affairs and Master of International Affairs, 5-Year Degree Program (p. 730)

Department of Political Science

- Bachelor of Arts in Political Science (p. 735)
- Bachelor of Arts in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 737)
- Bachelor of Science in Political Science (p. 738)
- Bachelor of Science in Political Science and Master of Public Service and Administration, 5-Year Degree Program (p. 739)

Department of Public Service and Administration

- Bachelor of Arts in Public Service and Administration (p. 745)
- Bachelor of Science in Public Service and Administration (p. 746)

Minors

Department of Political Science

- American Politics and Policy Minor (p. 740)
- Comparative Politics Minor (p. 741)
- International Relations Minor (p. 741)
- Legal Foundations Minor (p. 742)
- Political Data and Research Minor (p. 742)
- Political Theory Minor (p. 742)
- Race, Ethnicity, and Gender Politics Minor (p. 743)

Department of Public Service and Administration

- Homeland Security and Emergency Management Minor (p. 747)
- Nonprofit Studies Minor (p. 747)
- Public Management Minor (p. 748)
- Public Policy Analysis Minor (p. 748)

Department of International Affairs

A pioneering, interdisciplinary and career-focused degree backed by Bush School excellence for global citizens with an interest in public service

The BA in International Affairs gives students a strong foundation in key areas such as international economics, global politics, and transnational social processes and issues. Students tailor their coursework to align with their interests, enabling a truly personalized educational experience, whether students' interests lie in East Asian political systems, European economic policies, African debt, or Middle Eastern conflicts.

Foreign language: Achieving competency in a foreign language is a fundamental part of our curriculum. This skill not only enhances students' abilities to communicate globally but also deepens cultural understanding, essential for a successful career in international fields.

International study experience: Students also participate in an immersive international study experience. This opportunity allows students to experience a different culture and gain firsthand insights into global affairs, enriching academic and personal growth.

Majors

- Bachelor of Arts in International Affairs (p. 729)
- Bachelor of Arts in International Affairs and Master of International Affairs, 5-Year Degree Program (p. 730)

International Affairs - BA

The Bachelor of Arts in International Affairs is an interdisciplinary program designed to foster a comprehensive understanding of international dynamics.

This program is ideal for students who are passionate about tackling the complex human, social, political, and economic challenges that define today's interconnected world. Our program offers a comprehensive international perspective on critical issues related to economics, political science, social change, and world history and provides students with the flexibility to dive deeper into specific subjects and geographical regions of their interest. The degree program allows students to develop career legible tools necessary to succeed in an increasingly globalized world. Students will be qualified to pursue a range of professions including positions in the federal government, in the private sector with firms dealing with the international economy, and in the state and local governments that interface globally.

Principle Objectives

1. Analyze international political, economic, and social issues;
2. Recognize varying approaches to argumentation, what counts as viable data, and how it is gathered and presented;
3. Write clearly and present their findings convincingly;
4. Become proficient in a language other than English;
5. Successfully navigate terrain, both literally and figuratively, that is foreign to them, through successful completion of an international experience

Curriculum

The degree plan consists of a combination of INTA core courses, directed electives tailored for each focus area, foreign language courses, and at least one long semester or 10-week summer international experience with an emphasis on cultural and linguistic immersion.

¹ Must make a grade of C or better.

² Students completing a Bachelor of Arts in the Bush School are required to complete 14 hours of a foreign language through the intermediate level. Students in International Affairs are required to complete an additional 6 hours of a foreign language through the advanced level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. See the Foreign Language paragraph.

³ The course will be used to track student's completion of the International Experience Requirement.

⁴ Select courses from an approved list on the INTA website in consultation with an advisor. Courses numbered 485 or 489 that contain significant international content can be taken in any department to meet part of the track or area requirement. Students must obtain International Affairs advisor approval before taking the 485 or 489 course.

⁵ Select 12 hours from one Concentration Area from the list below.

⁶ Select from INTA 400-499 (p. 1093)

⁷ Students can substitute INTA 497.

⁸ Select any 100-499 course not used elsewhere.

International Affairs - 5-Year Bachelor of Arts and Master of International Affairs

This combination program enables motivated students to efficiently complete both the Bachelor of Arts in International Affairs and the Master of International Affairs in five years.

5-Year Bachelor of Arts International Affairs and Master of International Affairs

The Bush School of Government and Public Service offers a five-year combination degree program in which undergraduate students majoring in International Affairs (INTA) can apply to and enter the Master of International Affairs (MIA) program at the start of their senior year at Texas A&M University. This selective and accelerated program allows students to receive both a Bachelor of Arts in International Affairs and a Master of International Affairs graduate degree in only five years. Coupling the breadth of an interdisciplinary BA degree with the focus and career preparation of an MA professional degree, this intensive 5-

year program provides unparalleled value to students pursuing careers in international affairs and public service.

Eligibility Requirements

To apply to the combination MIA-INTA degree program, students must:

- be classified as a U3 majoring in International Affairs, and
- have a 3.5 GPA or above by the start of the fall semester in which they will enter the combination program (if admitted), and
- work with their undergrad advisor to map out courses the student must complete prior to entry into the combination program (if admitted), and
- have approximately 66-78 credit hours completed by the time they apply to the combination program in the fall of their senior year (including all required courses for INTA major, college, and Texas A&M), and
- have approximately 102 credit hours completed before entry into the combination program in the fall of their senior year (including all required courses for INTA major, college, and Texas A&M), and
- complete their study abroad prior to the start of the fall semester in which they will enter the combination program, and
- be in good academic standing with their undergrad department, and
- not be expected to graduate during the academic year in which they are applying, and
- understand that failure to satisfy ALL of these requirements will result in the combination admission (if offered) being revoked.

Advising

It is imperative for students interested in the combination MIA work with their undergrad INTA advisor as soon as possible to ensure the student is on track to complete all necessary courses (including study abroad) prior to applying for the program.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse

(p. 48) courses. A course satisfying a core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Foreign Language

Students entering International Affairs take a placement exam to determine the level of and number of required foreign language courses. Exam results may fulfill a maximum of 14 semester credit hours.

- Students placed in 101 will take 101, 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 102 will take 102, 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 201 will take 201 and 202 and 6 semester credit hours at the 300- or 400-level.
- Students placed in 202 will take 202 and 6 semester credit hours at the 300- or 400-level.
- Students placing out of 101, 102, 201 and 202 will take 6 semester credit hours at the 300- or 400-level.

International Experience Requirements

The International Experience must generate at least 3 hours of Texas A&M University credit. Departmental approval is required before travel. **Any international experience that does not meet these criteria will not count toward the degree.**

- Must be at least one long semester or one 10-week summer approved experience.
- Must be taken after completion of 100- and 200-level language requirement and INTA 211.
- Must be completed before student is eligible to enroll in INTA 481, INTA 491, INTA 497.
- Must be an immersion experience in the foreign culture and language, which can be satisfied by:
 - An internship at a company, government agency or non-profit operation involving significant use of the foreign language. Three hours of INTA 484 elective credit can be given.
 - Courses taken at a foreign university. Courses may count for Texas A&M University credit with approval of the advisor of the relevant department. These courses cannot apply to the International Studies core. One course must be taken in the foreign language at the 300- or 400-level.
 - Selected Texas A&M University Study Abroad programs which involve intensive cultural and language immersion.
 - A combination of the above to equal the requirement of a long semester or a 10-week summer-approved experience.
- Must be taken outside of the student's country of origin.
- Must be taken in one foreign country that matches with the foreign language and the area study requirement unless approved by the department head before travel.

Other courses may qualify for the college, university requirements categories. Students should consult the approved list of courses available in the International Affairs Degree Program Office. The list incorporates University Core Curriculum requirements. No course can be counted in more than one category, except as allowed in the International and Cultural Diversity and Cultural Discourse Graduation requirement.

Department of Political Science

What is Political science?

Political Science is a social science focused on the study of politics, government, and public policy at the local, state, national, and international levels. When we talk about politics, we're examining the dynamics of power and control, and exploring Harold Laswell's concept of "who gets what, when, and how." It helps us answer essential questions such as: How influential is citizen engagement? Do elections truly hold leaders accountable? How effective are different political institutions and systems across countries? How do states interact with each other in the international system? The study of government focuses on the different institutions that make public policies for a country, examining how these structures cooperate and conflict with each other as policies are developed. Public policy studies the decisions crafted by governing bodies—like laws, budgets, and rulings. It attempts to figure out which issues are prioritized in politics and why particular actions are taken. Through the study of politics, government mechanisms, and public policies, political science stands out in its capacity to analyze significant contemporary issues, including authority, influence, identity, ethics, law, freedom, fairness, justice, representation, wealth distribution, and conflict.

Why Study Political Science?

The field of political science offers students a diverse set of skills and experiences that are valuable for their future. This degree equips students with analytical tools to comprehend how people interact in different social settings. It involves learning about common patterns and issues in politics and how to gather and assess data and evidence. Studying political science also enhances critical thinking and communication abilities, positioning students for jobs in law, government, and industry.

Undergraduate Courses

The Department of Political Science offers courses in all facets of the discipline: American Politics, International Relations, Comparative Politics, Political Theory, Political Methodology, Public Administration and Policy, and Race and Ethnic Politics.

American Politics

American politics involves the study of the institutions of national government, law, mass political behavior, elections, political communication and media, interest groups, political parties, state and local governments, urban politics, and identity in politics in the United States.

International Relations

International relations involve the study of relations between the governments of the world. Courses are offered in world politics, American foreign relations, and national security policy.

Comparative Politics

This area of political science allows students to develop an in-depth understanding of foreign governments and politics. Courses are offered in European governments, Latin American governments, Asian governments, Russia and the former Soviet states, and in the politics of inequality and globalization.

Political Theory

The study of political theory provides students with an understanding of the fundamental relationships between governments and people. Courses range from the study of Greek antiquity to contemporary political ideologies.

Public Administration and Policy

This area of political science encompasses the study of public administration and the role of public policy in American politics. Study in this area will provide the student with the opportunity to understand the fundamentals of administration within a political environment. Courses are offered in bureaucracy and administration, state and local finance, urban administration, and government and the economy.

Political Methodology

These courses introduce students to scientific research design, statistical analysis, and game theory.

Race and Ethnic Politics

These courses provide the student with an in-depth understanding of the role of diversity in politics.

5-Year Combined Degree Programs

The Political Science Department offers a combined degree program in conjunction with the Bush School of Government and Public Service. This program enables students to receive either a BA or BS in political science and a Master of Public Service and Administration (MPSA) degree in five years.

The Political Science Department also offers a combined degree program that enables students to receive either a BA or BS in political science and a Master of Arts or a Master of Science in Political Science in four and a half years.

Honors Program

The Department of Political Science participates actively in the University honors program. Honors courses are available in all areas of political science. In addition, students may graduate with honors distinction in political science. Honor students also are offered individual instruction under POLS 497. Students interested in the Department's Honors Program should contact the Political Science Undergraduate Programs Office.

Teacher Certification

Students desiring certification to teach civics or government in secondary schools in Texas must meet special additional requirements.

More complete information on requirements for teacher certification may be found in the College of Education and Human Development section under secondary certification.

- Political Theory Minor (p. 742)
- Race, Ethnicity and Gender Politics Minor (p. 743)

Political Science - BA

The Bachelor of Arts (BA) degree program in Political Science provides a solid education in liberal arts.

This program focuses on improving students' understanding of local and global politics. This program also teaches vital skills in social science research methods, boosting critical thinking, and improving students' abilities in writing, speaking, and visual communication. At Texas A&M, students pursuing this degree need to complete four semesters of a foreign language course. Alongside this requirement, the degree covers a wide range of courses, offering flexibility in the core curriculum and electives. This flexibility helps students get a comprehensive education that supports their future academic and professional goals.

Within their major area of study, students will be able to further their education in American political institutions and political behavior; international relations; comparative politics; political theory; research

methodology; public policy and administration; and race and ethnic politics.

Students who graduate with a degree in Political Science have a wide spectrum of career fields to choose from. Many students will pursue careers such as government, law, education, business, non-profits, and journalism.

¹ Must make a grade of C or better.

² Complete 14 hours of a foreign language (p. 713) through the intermediate level. If you choose to enroll in a language you have studied previously without receiving college credit, you must first take a placement test. Select in consultation with an academic advisor.

³ Select from MATH 140, MATH 142, MATH 151, MATH 152; PHIL 240.

⁴ Students must complete this course before taking more than 6 hours of 300- or 400-level courses in Political Science.

⁵ POLS 100-499 (p. 1209) cannot be used to fulfill this requirement.

⁶ Select from POLS 100-499 (p. 1209) (except POLS 206, POLS 207, POLS 209).

⁷ Select any 100-499 course not used elsewhere (except POLS 100-499 (p. 1209)).

No more than 36 credits in political science may be applied to the degree.

Other courses may qualify for the college and university requirements.

Student should consult the approved list of courses in the Undergraduate Student Services Office. No course can be counted in more than one category.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

Political Science - 5-Year Bachelor of Arts and Master of Public Service Administration

This program combines the teaching of analytical thinking skills and applications to better understand human behavior as it relates to public policy and management along with skills in leadership and research methods.

The combined degree program between the Department of Political Science and The Bush School of Government and Public Service allows undergraduate Political Science students to enter the Master of Public Service Program, with a focus in Public Policy Analysis, at the beginning of their fourth year at Texas A&M University.

Students will be required to complete the same curriculum as other students admitted to the Bush School's MPSA program. At the completion of the program, students are prepared for a wide variety of post-graduate opportunities including: employment in local, state or federal government, non-profit organizations, or government contracting.

Students interested in this program will apply during the spring semester of their junior year and, if admitted, begin taking masters-level courses in the fall semester of their senior year with an undergraduate classification. Students are reclassified as degree seeking master's students upon completing the first two semesters of the program. Prior to being reclassified, a student must have completed all requirements for their bachelor's degree in Political Science.

⁸ Course counted towards the general electives of the BA program.

⁹ Course counted towards the Political Science electives of the BA program.

¹⁰ BUSH school graduate advisor will assist with BUSH/PSAA course selection for chosen track in the graduate program.

No more than 36 credits in political science may be applied to the degree.

Other courses may qualify for the college and university requirements. Student should consult the approved list of courses in the Undergraduate Student Services Office. No course can be counted in more than one category.

Students are reclassified as degree seeking master's students typically in the second year of the graduate portion of this program.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Arts in Political Science and the Master of Public Service Administration.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

Political Science - BS

The Bachelor of Science (BS) degree program in Political Science focuses on teaching research skills and data analysis while deepening understanding of politics.

At Texas A&M, this program stands out for its unique approach within the undergraduate political science curriculum. It's intended to introduce

students to political research methods, making it a starting point for those interested in technical careers like policy analysis, data science, or graduate studies. This BS program is one of the largest and most science-oriented political science undergraduate programs in the world.

Beyond emphasizing research skills and data analysis, the BS degree plan at Texas A&M offers a wide range of courses. This flexibility in both core curriculum and elective courses allows students to gain a comprehensive education beneficial for their future academic and professional pursuits. Within their major area of study, students will be able to further their education in American political institutions and political behavior; international relations; comparative politics; political theory; research methodology; public policy and administration; and race and ethnic politics.

Students who graduate with a degree in Political Science have a wide spectrum of career fields to choose from. Many students will pursue careers such as government, law, education, business, non-profits, and journalism.

³ Select from any 100-499 course not used elsewhere (except POLS 100-499 (p. 1209)); BUSH 632 or BUSH 635 or PSAA 630; PSAA 622 or PSAA 634; 6 hours PSAA 600-699 (<https://catalog.tamu.edu/graduate/course-descriptions/psaa/>).

⁴ Students must complete this course before taking more than 6 hours of POLS 100-499 (p. 1209) level courses in Political Science.

⁵ POLS 100-499 (p. 1209) cannot be used to fulfill this requirement.

⁶ Select from POLS 100-499 (p. 1209) (except POLS 206, POLS 207, POLS 209, POLS 308, POLS 309); BUSH 631; PSAA 601, PSAA 611, PSAA 621.

⁷ Course counted towards the General electives of the BS program.

⁸ Course counted towards the Political Science electives of the BS program.

⁹ BUSH school graduate advisor will assist with BUSH/PSAA course selection for chosen track in the graduate program.

Other courses may qualify for the college and university requirements. Student should consult academic advisor for additional options.

Students are reclassified as degree seeking master's students in second year of the graduate portion of this program.

The program includes a total of 168 hours which up to 18 hours may be applied toward both the Bachelor of Science in Political Science and the Master of Public Service Administration.

Graduation requirements include a requirement for 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with an academic advisor.

American Politics and Policy - Minor

The Minor in American Policy and Politics provides students with opportunities to examine the structures, processes and institutions of the

United States government, critically assessing public policies, political behavior and the intersection of power dynamics in American society.

Department of Public Service and Administration

The Department of Public Service and Administration (PSAA) develops principled leaders for the public and nonprofit sectors, providing students with the tools and knowledge they need for impactful public service careers. Students in PSAA develop the analytical, communication and leadership skills needed to tackle complex challenges in the public and nonprofit sectors as thoughtful, objective, effective, and ethical public servants.

The PSAA Department offers the highly ranked and NASPAA (Network of Schools of Public Policy, Affairs, and Administration) accredited

Master of Public Service and Administration (MPSA) and Executive Master of Public Service and Administration (EMPSA) degree, as well as graduate certificates in Nonprofit Management, Public Management, and Homeland Security.

Undergraduates in PSAA can pursue either a Bachelor of Arts or a Bachelor of Science degree in Public Service and Administration. These degrees equip students with a deep understanding of the intricate workings of the public and nonprofit sectors while developing the leadership and decision-making skills necessary for driving meaningful change and effective governance. The BA-PSAA degree should be particularly appealing to students who are interested in serving their communities (e.g., those planning to work for organizations such as the Texas Department of Health and Human Services, the U.S. Department of Homeland Security, or the Red Cross) while the BS-PSAA degree should be particularly appealing to students who are interested in building better connections between science and public policy (e.g., those planning to work for organizations such as the Environmental Protection Agency, the Texas Education Agency, or the Sierra Club). Potential careers in the government and nonprofit sectors include public affairs specialists, grant writers, program assistants, project management specialists, parks supervisors, fundraisers, research assistants, budget analysts, management and administrative analysts, program analysts or policy coordinators.

Undergraduates with an interest in public service careers can also develop expertise in key public service specialties by pursuing one of the four PSAA undergraduate minors: Public Management (PBMG), Public Policy Analysis (PPAN), Nonprofit Studies (NPST) or Homeland Security and Emergency Management (HSEM). All students pursuing a bachelor's degree in PSAA are encouraged to also pursue one of these minors.

Public Service and Administration - BA

The Bachelor of Arts in Public Service and Administration (BA-PSAA) is an interdisciplinary degree designed to ensure that students develop the professional skills necessary for effective leadership in the public and nonprofit sectors.

Students in this degree program will gain a comprehensive understanding of the dynamic public and nonprofit sectors, along with the skills and expertise to drive meaningful change. The practical and impactful curriculum focuses on the management, economics, communications, and social science skills that are needed for good decision-making within the management, policy, and homeland security fields. The BA-PSAA degree should be particularly appealing to students who are interested in serving their communities (e.g., those planning to work for organizations such as the Texas Department of Health and Human Services, the U.S. Department of Homeland Security, or the Red Cross).

Students who graduate with a Bachelor of Arts in Public Service and Administration will be well-prepared for a variety of careers in the public and nonprofit sectors. Specific examples include public affairs specialists, grant writers, program assistants, project management specialists, parks supervisors, fundraisers, or research assistants.

Public Service and Administration - BS

The Bachelor of Science in Public Service and Administration (BS-PSAA) is an interdisciplinary degree designed to ensure students develop the professional skills necessary for effective leadership in the public and nonprofit sectors.

Students in this degree program will learn the practical skills needed to conduct policy-relevant research and effectively communicate research recommendations. Students will also gain a comprehensive understanding of the dynamic public and nonprofit sectors and learn how to participate in and contribute to the public policy process. The BS-PSAA degree should be particularly appealing to students who are interested in building better connections between science and public policy (e.g., those planning to work for organizations such as the Environmental Protection Agency, the Texas Education Agency, or the Sierra Club).

Students who graduate with a Bachelor of Science in Public Service and Administration will be well-prepared for a variety of careers in the public and nonprofit sectors. Specific examples include public affairs specialists, grant writers, research assistants, budget analysts,

management and administrative analysts, program analysts or policy coordinators.

Public Management - Minor

The Public Management (PBMG) minor prepares students for impactful careers in the public sector.

One in every seven Texas jobs are in the public sector and a minor in public management can help prepare you for nearly all of them. Come be part of using the power of government to change the world for the better. PBMG minors develop a deep understanding of the many ways the public sector affects us all, and hone the skills required to lead and manage in the public sector.

Program Requirements

Code	Title	Semester Credit Hours
PSAA 210	Integrated Solutions to Public Service Problems	3
PSAA 340/ POLS 340	Public Administration	3
PSAA 430	Leading and Managing Public Service Organizations	3
Select two of the following:		6
PSAA 205	Data and Decision#Making in Public Service	

PSAA 303	Leadership in Public Service
PSAA 403	Public and Nonprofit Budgeting
PSAA 404	Ethics in Public Service
PSAA 405	Cultural Competency in Public Service
PSAA 440	Public Policies and Policymaking
PSAA 441	Program Assessment and Evaluation
PSAA 442	Cross#Sector Collaboration
PSAA 443	Managing Workplace Diversity in Public and Nonprofit Organizations

Total Semester Credit Hours **15**

Students must make a grade of C or better in all courses.

Public Policy Analysis - Minor

The Public Policy Analysis (PPAN) minor prepares students for impactful careers in public policy.

Changing the world takes time and money and we cannot afford to waste either of them on policies that do not work. Policy analysis teaches us how to identify programs that work and helps government to redirect money away from programs that do not work. The PPAN minor complements majors within all of the social sciences, humanities, and many of the natural sciences or engineering departments. PPAN students learn about the context and tools of public policy analysis and can focus on specific policy topics such as environmental policy, health policy, or education policy.

Program Requirements

Code	Title	Semester Credit Hours
PSAA 210	Integrated Solutions to Public Service Problems	3
PSAA 350	Economics of Public Policy	3
or ECON 32	or Microeconomic Theory	
PSAA 440	Public Policies and Policymaking	3
PSAA 450	Using Data to Make a Difference	3
Select one of the following:		3
ECON 312	Poverty, Inequality and Social Policy	
ECON 441	Policy Economics	
PSAA 352	Immigration Policy	
PSAA 354	Education Policy	
PSAA 404	Ethics in Public Service	
PSAA 452	Energy Policy	
PSAA 453	Environmental Policy	
Total Semester Credit Hours		15

Students must make a grade of C or better in all courses.

COLLEGE OF NURSING

Administrative Officers

Dean – Leann Horsley, PHD, RN, CHSE, CNE

Executive Associate Dean – Lisa Haddad, PhD, RN

Chief of Staff – James Batchelder, EdD, MBA

Associate Dean for Graduate Nursing Education – Matthew Sorenson, PhD, APRN, ANP-C, FAAN

Associate Dean for Clinical and Outreach Affairs – Nicole Peters Kroll, PhD, APRN, ANP-C, FNP-BC, PMHNP-BC

Interim Associate Dean for Research – Vacant

Associate Dean for Finance – Vacant

Assistant Dean for Undergraduate Nursing Education, Bryan/College Station – Angela Mulcahy-Spence, PhD, RN, CMSRN, CHSE

Assistant Dean for Undergraduate Nursing Education, Round Rock – Matt F. Hoffman, DNP, APRN, FNP-C

Assistant Dean for Undergraduate Nursing Education, McAllen – Vacant

Assistant Dean for Student Affairs – Todd Stricherz, MS

General Statement

The four-year Bachelor of Science in Nursing (BSN) degree provides the educational and experiential base for entry-level professional nursing practice and provides the platform on which to build a career through graduate-level study for roles such as advanced practice registered nurse (nurse practitioner, nurse midwife, clinical nurse specialist, nurse anesthetist), as well as a career in nursing administration, research, and nursing education.

The education of today's nurses transcends the traditional areas, such as chemistry and anatomy, to enable a deeper understanding of health promotion, disease prevention, screening, genetic counseling, and immunization. BSN education provides nurses with an understanding of how health problems may have a social cause, often referred to as the social determinants of health, such as poverty and environmental contamination, as well as provide insight into human psychology, behavior, cultural mores, and values.

The transformation of today's healthcare system offers unlimited opportunities for nurses as care in urban and rural settings becomes more accessible. According to the U.S. Bureau of Labor Statistics, employment of RNs will grow faster than the average for all occupations through 2026, due largely to growing demand in settings such as hospitals, community health centers, home care, and long-term care. The increased complexity of health problems and the move toward community-based care require highly educated and well-prepared nurses at the baccalaureate and graduate levels. It is an exciting era in nursing, one that holds exceptional promise for nurses with a Bachelor of Science in Nursing degree.

Locations

Bryan/College Station Campus

Majors

College of Nursing

- Bachelor of Science in Nursing, Honors (p. 752)
- Bachelor of Science in Nursing, RN to BSN (p. 753)
- Bachelor of Science in Nursing, Second Degree BSN (p. 755)
- Bachelor of Science in Nursing, Traditional BSN (p. 756)

Masters

College of Nursing

- Master of Science in Nursing in Family Nurse Practitioner (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/family-practitioner-msn/>)

- Master of Science in Nursing in Forensic Nursing (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/forensic-nursing-msn/>)
- Master of Science in Nursing in Nursing Education (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/nursing-education-msn/>)

Professional

College of Nursing

- Doctor of Nursing Practice (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/nursing/nursing-dnp/>)

Nursing - BSN, Honors

This program is provided for honors students who examine the role and career path of nurse scientists and explore the impact of nursing research on health outcomes and nursing practice.

The BSN Honors Program is designed for exceptional undergraduate nursing students aiming to excel in nursing science. Upon acceptance in the program, honors students are paired with a nurse faculty mentor for experiential research opportunities. Honors students investigate specific nursing problems and conduct defined research activities as part of the mentors' research team. The program concludes with students presenting their research findings in the form of a professional poster, presentation, or publication, all while receiving guidance and support from their mentor. Honors students graduate with the designation of Honors in Nursing.

Program Requirements

First Year

Fall

	Semester Credit Hours
BIOL 107 Zoology or BIOL 111 or Introductory Biology I	4
PBSI 107 Introduction to Psychology	3
American history (p. 30) ¹	3

Total Semester Credit Hours **124**

¹ Core Curriculum courses are listed on the University Core Curriculum (p.) page. STAT 201 is recommended to fulfill 3 hours of Mathematics but is not required.

² Indicates Nursing Science Course.

³ These courses may be taken at a community college but must be completed by the first day at the School of Nursing. Students may elect to place these courses anywhere in their schedule, though it is encouraged that these be completed over the summer.

⁴ Texas common courses BIOL 2401 and 2402 taken at any Texas accredited public institution will meet the requirement for BIOL 319 and BIOL 320.

BSN students must make a minimum grade of C in all courses.

Foreign Language

Proficiency in a foreign language is required. This can be met by taking two years of the same language in high school or college credit.

Prerequisite Courses

Prerequisites may be planned or in progress during the application cycle, but must be completed with a grade of C or better before the program start date. The courses may be completed at any regionally accredited college or university

Nursing - BSN, RN to BSN Track

The RN to BSN program enables applicants who hold a Registered Nursing license to earn a baccalaureate degree in nursing.

Students must have an associate degree in nursing from an accredited college and hold a current, unencumbered Registered Nurse license to participate.

This program is approved for delivery via distance education technology. It is delivered asynchronously online to accommodate family and professional responsibilities of the working nurse while advancing

their education. The upper division program can be completed in 3 or 4 semesters of study.

ASCEND

The Aggie Student-Centered Express Nursing Degree track (ASCEND) is an RN-to-BSN option exclusively for Blinn College nursing students. The ASCEND program is offered to qualified students who have completed have completed the first or second semester of the associate degree nursing (ADN) program. Once accepted, ASCEND students will co-enroll in Nursing courses at Blinn College and TAMU CON. ASCEND students will complete their BSN within 1 or 2 semesters after earning their ADN.

Application for the ASCEND program must include a written attestation of program eligibility signed by the ADN program director.

Entry to the RN to BSN (Bachelor of Science in Nursing) Program

Admission to the College of Nursing RN to BSN Program is competitive.

Admission decisions are based on multiple elements in the student's academic and professional background.

Minimum requirements include:

- Must graduate from a nationally accredited associate degree in nursing (ADN) program
 - The Accreditation Commission for Education in Nursing (ACEN)
 - The Commission for Nursing Education Accreditation (CNEA)
 - The State Board of Nursing (for select states)
- Grade of C in each prerequisite course
- Cumulative grade point average of 2.5 (on a 4.0 scale); GPA associate degree in nursing course work grade point average of 2.5; ASCEND students must have earned a minimum of 3.0 GPA in Texas A&M College of Nursing prerequisite, nursing science, and Blinn College ADN coursework by the start of classes.
- One professional reference from either a professor or the student's current supervisor
- Professional resume
- Limited number of course repeats, withdraws, or failures in academic history
- The Undergraduate Admissions, Progression, and Graduation Committee may require select applicants to complete timed verbal and written assessments of the student's experiences and attributes, to include community service, leadership, honors and awards and work experience.
- Applicants who complete their Associate Degree in Nursing (ADN) through an LVN to RN or Paramedic to RN bridge program must have earned a minimum of 35 transferable credits in their program to apply.

Minimum enrollment requirements for RN-BSN students:

- Must hold a current, unencumbered RN license
- New ADN graduates enrolled in the ASCEND program may continue enrollment in the RN-to-BSN program but must pass the NCLEX by the end of the next semester following ADN graduation. RN-to-BSN students who do not hold a valid RN license by the end of the first semester of enrollment will be suspended from the program.

- ASCEND Program students must submit an attestation of ongoing program eligibility from the ADN program director prior to enrollment each semester.

Articulation Agreements

Blinn College, South Texas College, and Angelina College

This program is also approved for delivery via asynchronous distance education technology.

¹ Core Curriculum courses are listed on the University Core Curriculum (p. 26) page. STAT 201 is recommended to fulfill 3 hours of Mathematics, but is not required.

² Indicates Nursing Science course.

³ These courses may be taken at a community college, but must be completed by the first day at the School of Nursing. Students may elect to place these courses anywhere in their schedule, though it is encouraged that these be completed over the summer.

⁴ Texas common courses BIOL 2401 and 2402 taken at any Texas accredited public institution will meet the requirement for BIOL 319 and BIOL 320.

⁵ Consult with an academic advisor for acceptable courses.

BSN students must make a minimum grade of C in all courses.

Nursing - BSN, Second Degree BSN Track

This program is for students who hold a bachelor's degree in another field of study and want to pursue a nursing degree through an accelerated program.

Acceptance into this track (offered in Round Rock, Texas) requires successful completion of prerequisite coursework prior to beginning upper-division courses. #All students will be required to complete core curriculum requirements if these were not met in the previous degree program. #Contact the Office of Student Affairs for more information.

Upper-Level Entry to the Second Degree Bachelor of Science in Nursing

Admission to the College of Nursing professional program is competitive.

Admission decisions are based on:

- The strength of multiple elements in the student's academic background
- Minimum grade of C in each prerequisite course and required 3.3 prerequisite and 3.3 Nursing science GPA.
- One NursingCAS application completed by the published deadline for the desired admission term. All academic information included on the application must be posted to and appear in the student's official record at Texas A&M.
- HESI A2 score – minimum score of 75% in each required section
- Timed verbal and written assessments of the student's attributes and experiences, to include community service, leadership, work experience, and activities in health care
- Limited number of course repeats, withdraws, or failures in academic history

External Transfer Applicants

All applicants to the second-degree program use the external transfer application.

NURS 318	Professional Identity I - The Role of the Professional Nurse	3
NURS 330	Management of Care I - The Fundamentals of Nursing Care Across the Lifespan	5
NURS 340	Patho-Pharm I - Connecting Pathophysiology and Pharmacology to Common Patient Conditions	4
NURS 343	Building Healthy Communities I - Wellness and Health Promotion Across the Lifespan	4
Semester Credit Hours		16
Spring		
NURS 319	Professional Identity II - Interprofessional Practice and Evidence-Based Decision-Making	3
NURS 332	Management of Care II - Nursing Care of Adults with Common and Chronic Conditions	5
NURS 341	Patho-Pharm II - Connecting Pathophysiology and Pharmacology to Complex Patient Conditions	3
NURS 342	Mental Health Nursing Care Across the Lifespan	3

NURS 344	Building Healthy Communities II - Fostering Health Infrastructure	3
Semester Credit Hours		17
Summer		
NURS 418	Professional Identity III - Development in the Professional Nurse Role	3
NURS 433	Management of Care III - Nursing Care of Adults with Complex, High-Acuity Conditions	5
NURS 436	Maternal and Child Health	5
NURS 442	Application of Pharmacology Principles Across the Lifespan	3
Semester Credit Hours		16
Fourth Year		
Fall		
NURS 419	Professional Identity IV - The Professional Nurse Leader	3
NURS 435	Management of Care IV - Synthesis of Knowledge, Skills and Attitudes for Professional Success	6
NURS 445	Writing for Nursing Professionals - The Nurse's Role in Health Advocacy and Healthcare Quality	3
Semester Credit Hours		12
Total Semester Credit Hours		120

¹ Core Curriculum courses are listed on the University Core Curriculum (p.) page. STAT 201 is recommended to fulfill 3 hours of Mathematics, but is not required.

² Indicates Nursing Science course.

³ These courses may be taken at a community college, but must be completed by the first day at the School of Nursing. Students may elect to place these courses anywhere in their schedule, though it is encouraged that these be completed over the summer.

⁴ Texas common courses BIOL 2401 and 2402 taken at any Texas accredited public institution will meet the requirement for BIOL 319 and BIOL 320.

BSN students must make a minimum grade of C in all courses.

Nursing - BSN, Traditional BSN

This is for students who have at least two years of prerequisite coursework and are interested in a traditional 2-year nursing program.

The traditional BSN track requires the successful completion of prerequisite coursework prior to beginning upper-division courses.

Academic advisors will be able to advise students regarding equivalencies to common course numbers. Information is also available regarding courses at www.tccns.org and through the Texas A&M Transfer Course Equivalency.

Applicants with a previous bachelor's degree may apply to either the traditional BSN track or the second-degree BSN track (offered in Round Rock, Texas) and must follow the same requirements as noted above.

This program is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

Entry to the Traditional Bachelor of Science in Nursing

Admission to the College of Nursing professional program is competitive.

Admission decisions are based on:

- The strength of multiple elements in the student's academic background
- Minimum grade of C in each prerequisite course and required 3.3 pre-requisite and 3.3 Nursing science GPA
- One Nursing#CAS application completed by the published deadline for the desired admission term. All academic information included on the application must be posted to and appear in a student's official record at Texas A&M.
- HESI A2 score – minimum score of 75% in each required section
- Timed verbal and written assessments of the#student's attributes and experiences, to include community service, leadership, work experience, and activities in health care
- Limited number of course repeats, withdraws, or failures in academic history

Internal Applicants

An#Internal Applicant#is a current Texas A&M University undergraduate in a non-nursing major who meets specific requirements to apply to the upper division course sequence in nursing. Meeting requirements does not guarantee#admission but#allows a student the opportunity to apply for entry to the nursing program.

Students must submit the application no later than the published deadline in the term in which they are applying. #Note: All academic information included on the application must be posted to and appear in a student's official record at Texas A&M.

External Transfer Applicants

External Transfer Applicants from colleges and universities outside of Texas A&M University may be considered for admission through the competitive application process.

Current Texas A&M University students who will earn a bachelor's degree prior to the start date should also follow this process when applying for either the traditional or second-degree program.

Students participating in the Program for Transfer Admission (PTA) must follow the external transfer process foundhere.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 107 or BIOL 111	Zoology or Introductory Biology I	4
PBSI 107	Introduction to Psychology	3
American history (p. 30) ¹		3
Communication (p. 27) ¹		3
Semester Credit Hours		13
Spring		
PBSI 225	Lifespan Development ^{2,3}	3

Select one of the following: ² 4

CHEM 106 & CHEM 116	Molecular Science for Citizens and Molecular Science for Citizens Laboratory	
CHEM 107 & CHEM 117	General Chemistry for Engineering Students and General Chemistry for Engineering Students Laboratory	
CHEM 119	Fundamentals of Chemistry I	
CHEM 120	Fundamentals of Chemistry II	
American history (p. 30) ¹		3
Communication (p. 27) ¹		3
Mathematics (p. 27) ^{1,2}		3
Semester Credit Hours		16

Second Year

Fall		
BIOL 319 or VIBS 305	Integrated Human Anatomy and Physiology ^{2,3,4} or Biomedical Anatomy	4
NUTR 222	Nutrition for Health and Health Care ²	3
Creative arts (p. 30) ¹		3
Government/Political science (p. 31) ¹		3
Mathematics (p. 27) ^{1,2}		3
Semester Credit Hours		16

Spring

BIOL 320 or VTPP 423	Integrated Human Anatomy and Physiology II ^{2,3,4} or Applied Biomedical Physiology I	4
PHIL 111 or PHIL 251	Contemporary Moral Issues or Introduction to Philosophy	3
Select one of the following: ²		4
BIOL 206	Introductory Microbiology	
BIOL 351	Fundamentals of Microbiology	
VTPB 405	Biomedical Microbiology	
Government/Political science (p. 31) ¹		3
Semester Credit Hours		14

Third Year

Fall		
NURS 318	Professional Identity I - The Role of the Professional Nurse	3
NURS 330	Management of Care I - The Fundamentals of Nursing Care Across the Lifespan	5
NURS 340	Patho-Pharm I - Connecting Pathophysiology and Pharmacology to Common Patient Conditions	4
NURS 343	Building Healthy Communities I - Wellness and Health Promotion Across the Lifespan	4
Semester Credit Hours		16
Spring		
NURS 319	Professional Identity II - Interprofessional Practice and Evidence-Based Decision-Making	3
NURS 332	Management of Care II - Nursing Care of Adults with Common and Chronic Conditions	5

NURS 341	Patho-Pharm II - Connecting Pathophysiology and Pharmacology to Complex Patient Conditions	3
NURS 342	Mental Health Nursing Care Across the Lifespan	3
NURS 344	Building Healthy Communities II - Fostering Health Infrastructure	3
Semester Credit Hours		17
Fourth Year		
Fall		
NURS 418	Professional Identity III - Development in the Professional Nurse Role	3
NURS 433	Management of Care III - Nursing Care of Adults with Complex, High-Acuity Conditions	5
NURS 436	Maternal and Child Health	5
NURS 442	Application of Pharmacology Principles Across the Lifespan	3
Semester Credit Hours		16
Spring		
NURS 419	Professional Identity IV - The Professional Nurse Leader	3
NURS 435	Management of Care IV - Synthesis of Knowledge, Skills and Attitudes for Professional Success	6
NURS 445	Writing for Nursing Professionals - The Nurse's Role in Health Advocacy and Healthcare Quality	3
Semester Credit Hours		12
Total Semester Credit Hours		120

¹ See the University Core Curriculum (p.) course list. STAT 201 is recommended to fulfill 3 hours of Mathematics, but is not required.

² Indicates Nursing Science course.

³ These courses may be taken at a community college, but must be completed by the first day at the School of Nursing. Students may elect to place these courses anywhere in their schedule, though it is encouraged that these be completed over the summer.

⁴ Texas common courses BIOL 2401 and BIOL 2402 taken at any Texas accredited public institution will meet the requirement for BIOL 319 and BIOL 320.

BSN students must make a minimum grade of C in all courses.

Foreign Language

Proficiency in a foreign language is required. This requirement can be met by taking two years of the same language in high school or college credit.

Prerequisite Courses

Prerequisites may be planned or in progress during the application cycle, but must be completed with a grade of C or better before the program start date. The courses may be completed at any regionally accredited college or university.

COLLEGE OF PERFORMANCE, VISUALIZATION AND FINE ARTS

General Statement

The College of Performance, Visualization and Fine Arts is the home of the visual and performing arts at Texas A&M University. The college offers students the opportunity to prepare for careers in creative practices and to develop intellectual responsiveness to the problems, questions, and values that will confront them in their professions and as lifelong learners.

The faculty of the college includes artists, computer scientists, designers, historians, performers, creative technologists, and critical theorists. At the foundation of the college's academic programs is an interdisciplinary approach to exploring where art, science, technology and theory combine through dance, music, theater, and visual art and design.

Undergraduate degrees are offered in Performance and Visual Studies, Music Performance, Theatre, Dance Science, Kinesiology, and Visualization with undergraduate minors in Art, Artificial Intelligence in the Arts, Choreography, Dance Performance, Devised Theatre, Film and Media Studies, Game Design and Development, Graphic Design, Music, Music Technology, Performance Studies, Studio Art, and Virtual Production and an undergraduate certificate in Performing Social Activism.

Graduate degrees include the Master of Arts in Performance Studies, Master of Fine Arts in Dance, Master of Fine Arts in Visualization, and Master of Science in Visualization. Graduate Certificates are offered in Film and Media Studies.

Faculty

Adinku, Grace Uchechukwu, Senior Lecturer
College of Performance, Visualization & Fine Arts
PHD, Kwame Nkrumah University, 2013
MA, Texas A&M University, 2020

Akleman, Ergun, Professor
College of Performance, Visualization & Fine Arts
PHD, Georgia Institute of Technology, 1992

Andreassen, Mayet Maria, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, School of Animation and Visual Effects, Academy of Art University, 2006

Armstrong, Carisa L, Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Case Western Reserve University, 2002

Ball, James R, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, New York University, 2012

Bedford, Diane C, Clinical Associate Professor
College of Performance, Visualization & Fine Arts
MFA, The Florida State University, 2010

Bergeron, Christine S, Clinical Professor
College of Performance, Visualization & Fine Arts
MFA, Florida State University, 1998

Bieber, Susanneh, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, Freie Universitat Berlin, 2012

Bologan, Anatol, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Texas A&M University, 2018

Boone, Jessica, Visiting Lecturer
College of Performance, Visualization & Fine Arts
MFA, The University of Utah, 2023

Boran, John David, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, The School of Visual Arts, New York, 2019

Bruner, Michael A, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, University of Texas, Austin, 2021

Budzise-Weaver, Tina M, Associate Professor
College of Performance, Visualization & Fine Arts
MLS, University of North Texas, 2012

Bujnoch, Emily A, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Texas A&M University, 2022

Campbell, Matthew Alan, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
PHD, The Ohio State University, 2019

Cardoso, Leonardo, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, The University of Texas at Austin, 2013
MMU, The University of Texas at Austin, 2010

Cartwright, John T, Lecturer
College of Performance, Visualization & Fine Arts
MFA, The Ohio State University, 2023

Chetty, Deepak, Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, University of Texas at Austin, 2015

Chin, Abby Williams, Lecturer
College of Performance, Visualization & Fine Arts
MFA, University of Illinois at Urbana-Champaign, 2023

Connor, William Klugh, Senior Lecturer
College of Performance, Visualization & Fine Arts
PHD, Royal Holloway University of London, 2012

Cook, Meg C, Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Texas A&M University, 2019

Dexter, Rayna M, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Kent State University, 2009

Donkor, David A, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, Northwestern University, 2008

Edwards, Andrea G, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MA, University of Illinois at Urbana Champaign, 1992

Fan, Hongshuo, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, The University of Manchester, 2022

Figueiredo, Virginia, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
PHD, University of California, LA, 2009
MMU, California State University, Fullerton, 2006

Finch, Krista S, Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Maryland Institute College of Art, 2000
MFA, Maryland Institute, College of Art, 2000

Gayk, Michael James, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, University of Washington, 2001

Gibson, Elijah, Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, University of Wisconsin-Milwaukee, 2013

Goodman, Jeanne M, Clinical Associate Professor
College of Performance, Visualization & Fine Arts
MLS, Simmons College, 2012

Guerra, Merli V., Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Rutgers University, Mason Gross School of the Arts, 2021

Hammonds, Hollis, Associate Professor
College of Performance, Visualization & Fine Arts
MFA, University of Cincinnati, 2001

Hatchell, Rusty E, Visiting Lecturer
College of Performance, Visualization & Fine Arts
MA, University of Texas at Austin, 2018

Hatt, Nicholas, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
DMA, Florida State University, 2018

Hays, Rebecca, Associate Professor
College of Performance, Visualization & Fine Arts
MMU, University of North Texas, 2003
DMA, University of Illinois at Urbana-Champaign, 2008

Holman, Anna, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, University of California, Santa Barbara, 2023

Honeycutt, Amanda Jill, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Texas A&M University Commerce, 2020

Honeycutt, Wade, Visiting Lecturer
College of Performance, Visualization & Fine Arts
BS, Texas A&M University, 2018

House, Benjamin R, Visiting Lecturer
College of Performance, Visualization & Fine Arts
MS, Texas A&M University, 2019

House, Donald H, Senior Professor
College of Performance, Visualization & Fine Arts
PHD, University of Massachusetts Amherst, 1984

House, Felice L, Associate Professor
College of Performance, Visualization & Fine Arts
MFA, The University of Texas at Austin, 2011

Humphrey, Daniel, Professor
College of Performance, Visualization & Fine Arts
PHD, University of Rochester, 2006

Imhoff-Jones, Sarah, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Texas Women's University, 1999
PHD, Pacifica Graduate Institution, 2021

Kattari, Kimberly A, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, The University of Texas at Austin, 2011

Kicklighter, Caleb L, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Texas A&M University, 2018

Kim, Seung Beom, Associate Professor of the Practice
College of Performance, Visualization & Fine Arts
BFA, School of Visual Arts, 1993

Kim, You-Jin, Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Duke University, 2016
PHD, University of California, Santa Barbara, 2024

Klein, Barbara, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Texas A&M University, 2019

Koustov, Dmitri V, Senior Lecturer
College of Performance, Visualization & Fine Arts
BFA, Ivanovo Art institute, 1987

Kumar, Suryansh, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, Australian National University, 2019

LaFevers, Cory James, Senior Lecturer
College of Performance, Visualization & Fine Arts
PHD, University of Texas at Austin, 2018

Lee, Jong-in, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, Simon Fraser University, 2024

Leiderman, Daniil M, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
PHD, Princeton University, 2016

Li, Xin, Professor
College of Performance, Visualization & Fine Arts
PHD, Stony Brook University, 2008

Mallory, Jason, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
DMA, University of Iowa, 2014

March, Scott, Visiting Associate Professor of the Practice
College of Performance, Visualization & Fine Arts
BA, Baylor University, 1994

Marini, Francesca, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, University of California at Los Angeles, 2005

McConnell, George D, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, University of Minnesota, 2011

McLaughlin, Timothy D, Professor
College of Performance, Visualization & Fine Arts
MS, Texas A&M University, 1994

McNamara, Ann M, Professor
College of Performance, Visualization & Fine Arts
PHD, University of Bristol, UK, 2000

Misemer, Sarah M, Professor
College of Performance, Visualization & Fine Arts
PHD, University of Kansas, 2001

Morris, Jeffrey M, Professor
College of Performance, Visualization & Fine Arts
PHD, University of North Texas, 2007

Nichols, Jeff, Visiting Lecturer
College of Performance, Visualization & Fine Arts
MS, Texas A&M University, 2020

Parrish, David, Associate Professor of the Practice
College of Performance, Visualization & Fine Arts
MS, Texas A&M University, 1995

Perez, Francisco, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
PHD, University of Kentucky, 2018

Perry-Johnson, Everett, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, New York University, 2014

Poblete, Michael, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, University of Hawaii at Manoa, 2022

Pugh, Rebecca, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, University of Nevada, Las Vegas, 2015

Quackenbush, Anne, Assistant Professor of the Practice
College of Performance, Visualization & Fine Arts
BA, Scripps College, 1986

Rabbers, Carolyn Marie, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, University of the Arts, Philadelphia, 2020

Ralph-Nurhikim, Gulnigar, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, University of Southern California School of Cinematic Arts, 2021

Ramadan, Hadeel M, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Virginia Tech, 2014

Regan, Martin P, Professor
College of Performance, Visualization & Fine Arts
PHD, University of Hawai'i at Manoa, 2006

Reiser, Vanessa, Visiting Lecturer
College of Performance, Visualization & Fine Arts
MS, Trinity Laban Conservatoire of Music & Dance, 2022

Rhim, Jimin, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, Korea Advanced Institute of Science & Technology, 2024

Rojas-Munoz, Edgar, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, Purdue University, 2020

Roykovich, JR, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Rutgers University, 2014

SIMMS, MICHELLE, Lecturer
College of Performance, Visualization & Fine Arts
PHD, Texas A&M University, 2011

Sachdeva, Riti, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, University of New Mexico, 2011

Schuld, Dawna L, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, The University of Chicago, 2009

Scott, Andee, Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Texas Woman's University, 2001

Seo, Jinsil, Professor
College of Performance, Visualization & Fine Arts
PHD, Simon Fraser University, 2011

Smith, Mason A, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MS, Texas A&M University, 2018

Spalink, Angenette Marie, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, Bowling Green State University, 2014

Spiers, Aurore, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, University of Chicago, 2022

Starrett, Courtney, Associate Professor
College of Performance, Visualization & Fine Arts
MFA, Temple University, 2005

Sullivan, Patrick, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, University of Rochester, 2022

Sutherland, Susan, Lecturer
College of Performance, Visualization & Fine Arts
MA, University of Wisconsin, Madison, 1994

Tao, Jian, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, Washington University in St. Louis, 2008

Thibault, Aaron, Associate Professor of the Practice
College of Performance, Visualization & Fine Arts
BS, University of Texas, Austin, 2004

Tong, Wai, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, The Hong Kong University of Science & Technology, 2023

Uchacz, Tianna Helena, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, University of Toronto, 2016

Vartan, Lynn, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, University of Southern California, 2004

Vigus, Glen W, Visiting Lecturer
College of Performance, Visualization & Fine Arts
MED, Texas A&M University, 2005

Walsh, Michael M, Associate Professor of the Practice
College of Performance, Visualization & Fine Arts
MFA, University of Southern California, 2001

Weaver, Timothy, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MS, Texas A&M University, 2010

Wilborn, David F, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, The University of Texas at Austin, 1994

Wingfield, Emma C, Lecturer
College of Performance, Visualization & Fine Arts
MA, University College London, 2012

Woodfin, Samuel, Instructional Assistant Professor
College of Performance, Visualization & Fine Arts
MFA, Laguna College of Art and Design, 2018

Yadav, Dinesh, Associate Professor
College of Performance, Visualization & Fine Arts
PHD, Indira Gandhi National Open University, 2018

Ziff, Stewart Edward, Instructional Associate Professor
College of Performance, Visualization & Fine Arts
MFA, School of Visual Arts, 1995

Zika, Joel, Assistant Professor
College of Performance, Visualization & Fine Arts
PHD, Swinburne University, 2021

Majors

College of Performance, Visualization and Fine Arts

- Bachelor of Arts in Performance and Visual Studies (p. 767)
- Bachelor of Fine Arts in Music Performance (p. 765)
- Bachelor of Fine Arts in Theatre (p. 768)
- Bachelor of Science in Dance Science (p. 763)
- Bachelor of Science in Kinesiology, Dance Science Track (p. 764)
- Bachelor of Science in Visualization (p. 769)

Minors

College of Performance, Visualization and Fine Arts

- Art Minor (p. 770)
- Artificial Intelligence in the Arts Minor (p. 771)
- Choreography Minor (p. 771)
- Dance Performance Minor (p. 771)
- Devised Theatre Minor (p. 772)
- Film and Media Studies Minor (p. 772)
- Game Design and Development Minor (p. 773)
- Graphic Design Minor (p. 773)
- Music Minor (p. 773)
- Music Technology Minor (p. 774)
- Performance Studies Minor (p. 774)
- Studio Art Minor (p. 775)
- Virtual Production Minor (p. 775)

Masters

College of Performance, Visualization and Fine Arts

- Master of Arts in Performance Studies (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/performance-visualization-fine-arts/performance-studies-ma/>)
- Master of Fine Arts in Dance (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/performance-visualization-fine-arts/dance-mfa/>)
- Master of Fine Arts in Visualization (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/performance-visualization-fine-arts/visualization-mfa/>)
- Master of Science in Visualization (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/performance-visualization-fine-arts/visualization-ms/>)

Doctoral

College of Performance, Visualization and Fine Arts

- Doctor of Philosophy in Visual Computing and Interactive Media (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/performance-visualization-fine-arts/visual-computing-interactive-media-phd/>)

Dance Science - BS

This program is offered for students with prior dance experience who are interested in careers in dance education or dance science.

This degree's flexibility allows those interested in professional school after graduation the ability to fulfill their prerequisites and focus on the art and science of dance. Many of our students go on to study physical therapy, occupational therapy, or medicine. The educators that graduate from our program have the knowledge and skills to train dancers at the highest level while decreasing the prevalence of injury.

Performance

Performance opportunities include an annual dance concert (Perpetual Motion), undergraduate and graduate student concerts, informal showings, student organization concerts, as well as state, regional, and national/international performances. Students are also given the opportunity to attend various festivals and conferences.

The Dance Program and the College of Performance, Visualization and Fine Arts bring in guest artists to work with students each year. These guests provide an array of opportunities for students including concerts, workshops, and setting repertory. This not only gives students a unique opportunity to build their resumes but to work with a variety of professionals in the field.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed specifically. Students should use this information in conjunction with their advisor or program director when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses in a timely manner and meeting all grade requirements.

First Year

Fall		Semester Credit Hours
BIOL 107	Zoology	4
DCED 222	Introduction to Dance Science ¹	2
KINE 120	The Science of Basic Health and Fitness	1
American history (p. 30)		3
Ballet technique ^{1,2}		2
Mathematics (p. 27) ³		3
Semester Credit Hours		15
Spring		
DCED 202	Dance Appreciation ^{4,5,6}	3
DCED 215	Pilates Apparatus I ¹	2

ENGL 104	Composition and Rhetoric	3
PHYS 201	College Physics	4
Ballet technique ^{1,2}		2
Modern technique ^{1,7}		2

Semester Credit Hours 16

Second Year

Fall

DCED 201	Dance History ^{4,8,9}	3
DCED 230	Conditioning for Dancers ⁴	2
American history (p. 30)		3
Ballet technique ^{1,2}		2
Communication (p. 27)		3
Modern technique ^{1,7}		2

Semester Credit Hours 15

Spring

DCED 303	Health Practices for Dancers ³	3
PBSI 107	Introduction to Psychology	3
Ballet technique ^{1,2}		2
Mathematics (p. 27) ³		3
Modern technique ^{1,7}		2
Science elective ^{4,10}		3

Semester Credit Hours 16

Third Year

Fall

BIOL 319	Integrated Human Anatomy and Physiology I	4
DCED 308	Safe Practices in Teaching Dance ^{4,11}	3
POLS 206	American National Government	3
Modern technique ^{1,7}		2
Dance technique elective ^{1,12}		2
Prescribed elective ^{4,13}		3

Semester Credit Hours 17

Spring

BIOL 320	Integrated Human Anatomy and Physiology II	4
DCED 403	Dance Movement Analysis ⁴	3
POLS 207	State and Local Government	3
Dance technique elective ^{1,12}		2
Science elective ^{4,10}		3

Semester Credit Hours 15

Fourth Year

Fall

DCED 310	Research Methods in Dance ^{4,11}	2
DCED 315	Special Populations in Dance ³	3
Dance technique elective ^{1,12}		2
Prescribed elective ^{4,13}		3
Science elective ^{4,10}		3

Semester Credit Hours 13

Spring

DCED 411	Wellness and the Performing Artist ⁴	3
DCED 416	Conducting Dance Science Research ⁴	1
Prescribed elective ^{4,13}		3

Prescribed elective ^{4,13}	3
Science elective ^{4,10}	3
Semester Credit Hours	13
Total Semester Credit Hours	120

¹ Must make a grade of B or better.

² Select 8 hours from DCED 260, DCED 261, DCED 361, DCED 362, DCED 462, DCED 463. Course offerings vary by semester. Consult with an academic advisor for course offerings.

³ MATH 150 may not be used to fulfill this requirement.

⁴ Must make a grade of C or better.

⁵ Satisfies the Creative Arts requirement.

⁶ Satisfies the International Cultural Diversity requirement.

⁷ Select 8 hours from DCED 271, DCED 272, DCED 372, DCED 373, DCED 473, DCED 474. Course offerings vary by semester. Consult with an academic advisor for course offerings.

⁸ Satisfies the Language, Philosophy and Culture requirement.

⁹ Satisfies the Cultural Discourse requirement.

¹⁰ Select 12 hours from BIOL 111, BIOL 112, KINE 305, KINE 318, KINE 404, KINE 406, KINE 433, KINE 435, KINE 426, PHYS 202, PBSI 225, PBSI 307, PBSI 304, NUTR 202, PHLT 336, PHLT 360, PHLT 342/HLTH 342, PHLT 354/HLTH 354.

¹¹ Satisfies the Writing Intensive requirement.

¹² Select 6 hours from DCED 240, DCED 242, DCED 250, DCED 297, DCED 351, DCED 387, DCED 398, DCED 488, DCED 292.

¹³ Select 12 hours from CHEM 119, CHEM 120, DCED 304, DCED 401, DCED 410, DCED 419, HLTH 354/PHLT 354, PBSI 206/AFST 206, PBSI 209/AFST 209, STAT 301, STAT 302, STAT 303, DCED 203, DCED 217, DCED 216/VIST 216 or additional science electives.

Kinesiology - BS, Dance Science Track

This program offers several options designed to prepare students for a variety of careers in public school education, exercise science, and dance science.

The Bachelor of Science degree in Kinesiology also offers some options providing academic preparation for students interested in professional schools, e.g., physical therapy, occupational therapy, physician's assistant, or medicine. There are some common course requirements for all kinesiology options. Additional hours for each option are specifically designed to prepare students for that field of study. The sequencing of courses should be determined in consultation with an appropriate academic advisor.

The Dance Science track for the BS in Kinesiology is offered to prepare and educate students to enter the field of dance science or dance education. Dance Scientists are professionals who are employed by dance companies and dance training facilities throughout the world to devise effective training programs as well as advise the dancers regarding nutrition, injury prevention/care, and dance psychology. Graduates of this program have become researchers, dance therapists, massage therapists, physical therapists, and better-informed dancers and teachers.

Performance

Performance opportunities include an annual dance concert (Perpetual Motion), student concerts, informal showings, student organization concerts, as well as state, regional, and national/international

performances. Students are also given the opportunity to attend various festivals and conferences.

The Dance Program and the College of Performance, Visualization and Fine Arts bring in guest artists to work with students each year. These guests provide an array of opportunities for students including concerts, workshops, and setting repertory. This not only gives students a unique opportunity to build their resumes but to work with a variety of professionals in the field.

Program Requirements

This degree plan has been laid out showing students the number of hours they must take each semester in order to complete the degree in four years without attending summer school. This is a suggested plan and does not have to be followed as laid out below. Students should use this information in conjunction with advising documents available from their advisor or the department website when scheduling courses each semester to ensure they are meeting all prerequisites, taking courses for admission to professional phase in a timely manner and meeting all grade requirements.

¹ Must meet Core Curriculum requirements.

² Must make a grade of C or better.

³ Must make a grade of B or better.

⁴ To be chosen in consultation with your academic advisor.

⁵ Meets Creative Arts core curriculum requirement.

⁶ Course selection should meet the International and Cultural Diversity (p. 49) and/or Cultural Discourse (p. 48) Graduation requirement if needed.

⁷ Meets Social Science core curriculum requirement.

⁸ To be chosen in consultation with your academic advisor and selected from the following courses: Additional DCED/KINE tech courses; BIOL 112; CHEM 119, CHEM 120; DCED 201, DCED 304, DCED 400, DCED 402, DCED 405; HLTH 354/PHLT 354, INST 210; INST 222 or TEFB 273; KINE 175, KINE 210, KINE 305, KINE 407, KINE 427, KINE 435; KNFB 450/HEFB 450; NUTR 202; PHYS 202; PBSI 307 or PBSI 225; STAT 301, STAT 302, STAT 303.

⁹ Select one of the following: Pilates, Yoga, Country and Western Dance, Strength Training, Zumba, Tai Chi, or Meditation for Stress.

¹⁰ Meets the University Writing Requirement.

Music Performance - BFA

This unique program provides a comprehensive grounding in music while emphasizing the InterArts connections of music with other art forms such as dance, theatre, game design, or the visual arts.

The Bachelor of Fine Arts (BFA) in Music Performance provides musicians with the comprehensive skill set essential for developing traditional and original musical performances while fostering artistic collaboration and innovation. Coursework includes instruction in

music performance, interdisciplinary collaboration, music technology, music entrepreneurship, and global and popular music studies. The combination of courses blending tradition with front-line innovation encourage creative ways of thinking about performance, innovative ways of integrating music performance in social engagements, creative applications of music performance and technology, and flexible interdisciplinary skills. Skills developed through course applications encourage innovation in problem solving, critical thinking, collaboration, time management, stress management, communication and social competency. Students are guided in transferring acquired marketable skills to the contemporary workplace, balancing preparation for professional musical careers with personal and artistic fulfillment.

Performance and Visual Studies - BA

This program combines elements from Art History, Anthropology, Cultural Studies, Ethnomusicology, Media Studies, and the Dramatic Arts, offering a comprehensive and diverse educational experience.

The mission of the BA in Performance and Visual Studies is to cultivate a dynamic and interdisciplinary learning environment where students explore the depths of performance and visual culture and develop crucial skills in research, writing, and interpretation. To this end, the program fosters contemplation and analytical reflection about the role and meaning of artistic and creative practices in the world and trains students in humanities practices (Visual and Performing Arts Analysis, Historical and Archival Research, Criticism, Ethnography, Critical Theory, Performance as Research, and Public Humanities). Objects of study include theatre, music, dance, film and television, performance art, visual art, material culture, sports, politics, folklore, ritual, performance of self, social media, video games, and other expressive practices and art forms.

The core of the program is the seminar class—a small collaborative, discussion-based class, which historically and/or theoretically explores a topic of performance and visual culture in-depth. Students complete a two-semester long, individualized research project. The program's position within the College of Performance, Visualization and Fine Arts affords its students the opportunity to work closely with artists and to engage with cutting-edge media technology. Students in the program are able to research the arts in a collaborative environment, working with students and faculty pursuing a variety of unique and dynamic creative practices. The program encourages and supports study abroad, community-focused internships, and independent studies, where students can pursue their interests under guidance from faculty members.

The overarching goal of the program is to empower graduates to be thoughtful contributors and innovators in the broader cultural landscape. Graduates of this program are well equipped for diverse career paths, such as professions in curating, teaching, criticism, arts administration, and non-profit. Alternatively, graduates of the degree will be well positioned for further studies at the MA and PhD level.

¹ Must make a grade of C or better on all major coursework.

² Select from ARTS 100-499 (p. 935), DCED 100-499 (p. 997), FILM 100-499 (p. 1041), MSTC 100-499 (p. 1158), MUSC 100-499 (p. 1161),

PERF 100-499 (p. 1192), PVFA 100-499 (p. 1215), THEA 100-499 (p. 1251), VIST 100-499 (p. 1259). 6 hours must be taken at the 300-400 level.

³ Select from any 100-499 course. 9 hours must be taken at the 300-400 level.

⁴ Select from FILM 215/GLST 215, PERF 156, PERF 301, PERF 325, MUSC 323, MUSC 324/ANTH 324, THEA 200

⁵ Select from ARTS 149, ARTS 150, ARTS 329, ARTS 330, ARTS 341, ARTS 343, ARTS 345, ARTS 349, ARTS 350, COMM 360, DCED 201, FILM 299, MUSC 224, MUSC 225, MUSC 226, MSTC 150, PERF 310, PERF 311, PERF 312, THEA 281.

⁶ Select from ARTS 339, FILM 399/PERF 399, FILM 417, FILM 469, FILM 470, FILM 481, PERF 450, PERF 451, PERF 452, PERF 453, PERF 454, PERF 455, PERF 456, PERF 457, PERF 460, PERF 461.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a free elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

General Degree Requirements:

Minimum 2.0 GPA overall and a minimum 2.0 GPA in major coursework.

A grade of C or higher is required in all coursework within the major.

Complete 36 hours of upper division (300-400 level) hours in residence, 12 hours of which must be completed in major coursework.

Complete two PERF courses formally designated as writing or communication intensive. At least one course must be completed with the writing intensive designation.

Theatre – BFA

This degree will include instruction in performance and directing, design and production, arts administration and entrepreneurship, and civic dramaturgy and community engagement.

The Bachelor of Fine Arts (BFA) in Theatre prepares individuals to manage the planning, design, preparation, and production of theatrical programs. The BFA in Theatre trains artists in the range of skills necessary to stage new and original theatrical works and performers to be creative and independent agents. Those who complete the degree are flexible and innovative creators, who can communicate across cultures and media, and thrive in highly varied and ever-changing milieus. Theatre makers develop unique global, cultural, and social competencies to work with diverse populations and communities, leveraging their artistic skills to address the challenges facing our society. Performing artists working in theatre hone their empathy, active listening skills, and critical inquiry abilities through collaborative performance-making.

Graduation requirements include 3 hours of International and Cultural Diversity (p. 49) courses and 3 hours of Cultural Discourse (p. 48) courses. A course satisfying a Core category, a college/department requirement, or a general elective can be used to satisfy this requirement. The required 6 hours may be met by courses satisfying other areas of a degree program. See your academic advisor for further information.

Visualization - BS

This program integrates elements of fine arts, three-dimensional design, programming, and digital technology to provide a broad, wide-ranging educational experience for creating visual imagery.

The mission of the Bachelor of Science in Visualization program is to engage and develop the student's visual, intuitive and analytical capabilities through the scientific and aesthetic issues surrounding the use of technology in visual communication. To fulfill its mission, the program requires both a creative spirit and the technical understanding to adapt to the changing demands of the visual industries served by the departmental programs.

The core of the program is the studio experience, which explores the relationship between theory and practices through a variety of exercises and projects using traditional and electronic media. Upon completion of

the foundational courses, students will have the opportunity to select one of Visualization focus areas: Animation, Game Creation, or Interactive Design. A semester away from Texas A&M University is required during the junior year. This is followed by a capstone proposal and studio during the junior and senior years. A broad range of directed electives allows the student to gain an in-depth understanding of an area of specialization.

Graduates of the program are prepared to be technically adept artists, designers and/or tool-makers capable of utilizing interactive and directed media. Employment may be found in such fields as user interface and web design, the entertainment industry (game design and development, animation and visual effects), as well as fields such as modeling and simulation, data analytics and other fields where visualization contributes to understanding. Alternatively, graduates may enter graduate programs that emphasize digital media in either computer science or art/design. Two such programs, the Master of Science (MS) in Visualization and the Master of Fine Arts (MFA) in Visualization, are offered by the College of Performance, Visualization and Fine Arts at Texas A&M University.

¹ Must make a grade of C or better.

² Select from ARTS 210, ARTS 212, ARTS 303, ARTS 304, ARTS 305, ARTS 308, ARTS 312, ARTS 315, ARTS 325, ARTS 328, ARTS 341, ARTS 353, VIST 235, VIST 282, VIST 283, VIST 284, VIST 310, VIST 357, VIST 370, VIST 372, VIST 386, VIST 439, VIST 465, VIST 470, VIST 472, VIST 474, VIST 476/CSCE 447, VIST 477/CSCE 446, VIST 480, VIST 487/CSCE 443.

³ Select from ARTS 200-499 (p. 935); VIST 200-499 (p. 1259) (except 301, 311, 331, 494).

⁴ Semester Away: May be satisfied by study abroad, at another university, internship, or special arrangement by advisor or instructor. Electives may be taken online, distance education, at another university or college, or at study abroad university.

⁵ Select from any 300-499 course not used elsewhere. If you do not participate in study abroad, 3 hours will come from International and Cultural Diversity (p. 49).

Students must also make a grade of C or better in any course used as an equivalent substitution for Visualization courses that satisfy degree requirements.

Art - Minor

This minor provides students with a prevalent view of the world of art.

A broad orientation to the visual arts is offered by the College of Performance, Visualization and Fine Arts to non-Visualization majors. Students must have a minimum cumulative GPA of 3.5 with 70 or fewer credit hours completed to apply and must maintain a C average or better in all Art minor courses. The student's home school/college/department may grant, with agreement from the College of Performance, Visualization and Fine Arts, transfer credit of no more than 6 credit hours. Transfer credit will not be accepted for any 300- or 400-level courses. Credit for study abroad (CARC) courses may not be applied to the minor in Art if an on-campus course containing similar content is offered.

Per University guidelines, the student's home school/college/department is responsible for advising students pursuing the minor in Art.

To apply, download the Art Minor Form via the PVFA website, complete it, and turn it into the Program Director, Jill Honeycutt at jhoneycutt@tamu.edu.

Exact application due dates will be posted on the PVFA website: Summer/Fall Due: Mid-March |Spring Due: Mid-October.

Minimum of 6 hours of 300- or 400-level courses are required.

Students must make a grade of C or better in all courses.

Artificial Intelligence in the Arts - Minor

This minor offers essential training and qualifications, positioning students for success in the evolving landscape of AI-enhanced art.

Artificial Intelligence (AI) is revolutionizing the way artists create, enhancing both the creative process and productivity across various art forms. The Minor in Artificial Intelligence in the Arts is designed to meet the growing demand for AI integration in artistic practice, equipping students with the skills to incorporate AI into visual arts, dance, theatre, interactive media, and music. The program provides a comprehensive education on the use of AI tools, emphasizing critical decision-making, ethical considerations, and the social implications of AI.

¹ Select from ARTS 301, DCED 307, MSTC 245, VIST 371.

Choreography - Minor

This minor allows students to focus on dance making through knowledge in music, movement exploration, choreographic principles, and dance production.

The Dance Program offers a minor in choreography which can be used to enhance the major in dance or performance studies. At the end of the choreography minor students will self-produce a concert with one to two other choreography minor students including new work, costume construction, lighting design, marketing, and stage crew management. This capstone experience prepares students to self-produce their work preparing them for careers as choreographers, artistic directors, and studio teachers. Students can also participate in program-based events throughout the year including concerts such as the Student Choreography Showcase.

The Dance Program and the College of Performance, Visualization and Fine Arts bring in guest artists to work with students each year. These guests provide an array of opportunities for students including concerts, workshops, and setting repertory. This not only gives students a unique opportunity to build their resumes but to work with a variety of professionals in the field.

Program Requirements

DCED 400	Group Choreography	3
DCED 402	Concert Choreography and Production	3

Total Semester Credit Hours 18

Students must make a grade of C or better in all courses.

Minimum of 2.5 GPA in minor coursework.

Dance Performance - Minor

This minor allows students to deepen their technical training and focuses on the performance of concert dance.

Overview Admission to the dance performance minor requires an audition. Refer to the Dance Program website for information on auditions.

The Dance Program offers a minor in dance performance which can be used to enhance the major in dance. Dance is an important part of the visual and performing arts educational experience. A minor in performance can enhance a student's academic experience. Dance minor students are part of the Dance Program and can participate in program-based events throughout the year.

Performance Opportunities

Performance opportunities include an annual dance concert (Perpetual Motion), student concerts, informal showings, student organization concerts, as well as state, regional, and national/international performances. Students are also given the opportunity to attend various festivals and conferences.

The Dance Program and the College of Performance, Visualization and Fine Arts bring in guest artists to work with students each year. These guests provide an array of opportunities for students including concerts, workshops, and setting repertory. This not only gives students a unique opportunity to build their resumes but to work with a variety of professionals in the field.

Minimum of 2.5 GPA in minor coursework.

Devised Theatre - Minor

This minor equips students to be well-rounded, dynamic, and flexible artists and scholars.

The minor in Devised Theatre provides the essential skills in devising and collective creation, enabling artists from varied fields to add theatrical practice to their repertoire, and build performance into their art and scholarship. The minor emphasizes the practice of theatre making as it builds on Performance Studies' strength in practice as research and inquiry-based performance.

Devised theatre decenters the text in theatrical performance-making, to embrace the collective efforts of an ensemble of artists, and challenge entrenched hierarchies in traditional forms of theatrical production. Artists at the forefront of theatre and performance are increasingly turning to methods of collective creation and devising to generate new works. This minor introduces the form, trains students to work with a variety of sources, surveys multiple devising methods, and includes a studio course in which students collaborate to create original performances. In addition, students may take courses in acting, design, music composition, and other areas to expand the repertoire of skills they may draw on to make theatrical performances.

Minimum 2.7 GPA.

Film and Media Studies - Minor

This minor prepares undergraduate students to think and write critically about film and media from multiple perspectives.

The interdisciplinary minor in Film and Media Studies offers courses in the history, criticism, and theory of film and media, and provides opportunities to pursue analyses of the aesthetic, cultural, economic, technological, and international dimensions of film. The foundational courses set the stage for advanced courses in film and media. A major goal of the program is to connect the student's major field of study with an understanding of film and media's cultural and social significance. Drawing from the expertise of affiliated faculty across the university, the minor can be tailored to the student's interests.

The Film and Media Studies minor supports student development for any career field because it provides opportunities to obtain skills that are critical to success in today's workplaces: critical thinking, problem solving, oral and visual communication, writing, research, cultural understanding, and global perspectives. The minor builds foundational skills for student success, leadership in the workplace, future graduate studies, and becoming an informed citizen.

Students must make a grade of C or better in all courses.

At least 9 credits must be at the 300-400 level.

Game Design and Development - Minor

This minor provides a foundation in the principles of game design and software development.

The minor in Game Design and Development offers students the opportunity to develop the knowledge and skills associated with the aesthetic and technical aspects of game creation. Students develop core competencies, collaborate on the design and development of game projects, and engage in authentic, situated creative problem-solving to broaden their horizons as interdisciplinary team members.

¹ CSCE majors must take this course instead of CSCE 110 and CSCE 111.

Minimum GPA of 3.2 for admittance into the minor.
A grade of C or better is required for all courses used towards the minor.

Graphic Design - Minor

This minor is designed to provide students with a general understanding of typography, the use of image and color, layout, relevant software skills, and the language of graphic design.

The Graphic Design Minor allows you to specialize in design foundations. The program will also offer students the opportunity to have introductory exposure to the methods of the discipline of design.

Students must have a minimum cumulative GPA of 3.25 with 70 or fewer credit hours completed to apply and must maintain a C average or better in all Graphic Design Minor courses. The student's home school/college/department may grant, with agreement from the College of Performance, Visualization and Fine Arts, transfer credit of no more than six credit hours. Transfer credit will not be accepted for any 300- or 400-level courses. Per University guidelines, the student's home school/college/department is responsible for advising students pursuing the minor in Graphic Design.

To apply, download the Graphic Design Minor Form via the PVFA website (<https://pvfa.tamu.edu/academics/undergraduate-programs/minors/minor-in-graphic-design/>), complete it, and turn it into the Program Director.

Music - Minor

This minor prepares students to develop a fundamental understanding of music through introductory music theory, musicianship, and music history.

The Minor in Music gives students the opportunity to pursue musical interests while developing skills and exploring the history and context of music. Through individual instruction or group performance, students will have opportunities to perform, to develop skills on their preferred instrument(s), and/or to learn new instruments and styles. Students can choose from a variety of electives, tailoring their course of instruction

to their own needs and interests. This flexible minor allows students to complement their major field of study and prepares them for post-graduation pathways that integrate music into their personal and professional life.

³ Select from MUSC 100-499 (p. 1161), PERF 328 not applied elsewhere in the minor.

Minimum of 6 hours at 300-400 level.

Students must make a grade of C or better in all courses.

Music Technology - Minor

This program focuses on preparing students to think about music and sound in new ways,

Beyond clean audio editing and using off-the-shelf products in conventional ways, the minor in music technology guides students in exploring novel approaches to musical expression through technology-based live performance, fixed media art, installation art, and interdisciplinary creative work.

Required courses provide a broad range of experiences in composing with sound, digital audio editing and signal processing, recording techniques, and merging music with other disciplines in novel and thought-provoking ways. Electives leverage our faculty's particular strengths and areas of research toward helping students discover and develop their own unique approaches to making technology-based music. Such topics include analog circuitry, analog equipment, digital and hybrid musical instrument building, making music by programming a computer, artificial intelligence, synthesis techniques, musical structures, interactivity, generative (or algorithmic) music, feedback systems, live coding, and more than a century of historical developments.

Throughout the minor, students will build a portfolio of creative work demonstrating their experience and unique voices as twenty-first century musicians ready to make the most creative use of emerging technologies. Students will gain skills that apply to conventional work in audio editing, recording, live sound reinforcement, and sound design but

will be able to approach these activities with the artistic sensibility of a musician.

Program Requirements

MSTC 101	Introduction to Performance Technology	3
MSTC 221	Fixed Media Composition	3
MSTC 100-499 ¹		12
Total Semester Credit Hours		18

¹ 6 hours must be selected from 300-400-level.

Students must make a grade of C or better in all courses.

Performance Studies - Minor

The minor in Performance Studies offers students the opportunity to apply the methods of performance studies and the practice of performance to their other academic and artistic interests. In Performance Studies, performance is used to understand and change the world. Performance is part of everyday life; it is a way to express one's self, identity, experience, and values. Performance Studies is the study of music, theatre, and dance as modes of artistic expression; but also the performative aspects of film and TV, podcasts, tourist attractions, religious services, public ceremonies, sports and games, rituals and festivals, dress and costuming, political debates, social media, and more.

Because performance studies combines theory and practice, our courses combine scholarly research and creative performance. Students select seminars and electives that engage with their own particular academic and artistic interests. In addition to being introduced to the theory of the discipline, students analyze and create live performance in their classes. Minors in Performance Studies cultivate an analytical perspective about the role and meaning of performance in global culture that contributes to their academic development, creative practices, and professional success.

Program Requirements

Minimum 2.7 GPA.

Studio Art - Minor

The minor in Studio Art allows you to explore your creative side through the combination of art and digital tools. In this program, you will develop and hone your skills through practice of the visual arts in multiple mediums. Online and in-person coursework contains both a hands-on exploration of traditional art making and instruction with innovative digital tools. Throughout the minor, students will build a portfolio of creative work exploring a personal style as artists, while building a general studio art foundation.

Students must have a minimum cumulative GPA of 3.25 with 70 or fewer credit hours completed to apply and must maintain a C average or better in all Studio Art Minor courses. The student's home school/college/department may grant, with agreement from the College of Performance, Visualization and Fine Arts, transfer credit of no more than six credit hours. Transfer credit will not be accepted for any 300- or 400-level courses. Per University guidelines, the student's home school/college/department is responsible for advising students pursuing the minor in Studio Art.

Virtual Production - Minor

Virtual Production has become common in entertainment media production for films, television, and commercials. Its use is expanding into other areas including architectural/engineering visualization, manufacturing, product design, simulation and training, and live performances for music, theater, and broadcast. The curriculum includes virtual production techniques, storyboarding, visual computing, lighting, and cinematography. On completion of the minor, students will be prepared to fulfill roles in production as Technical Artists, Lighting Specialists, Technical Designers, Digital Asset Artists in a Virtual Art Department, Virtual Imaging Technician/Grip, Pipeline Technical Directors, and Virtual Production Technical Generalists.

SCHOOL OF PUBLIC HEALTH

Administrative Officers

Dean - Shawn Gibbs, PhD, MBA, CIH

Senior Associate Dean for Research - Tiffany A. Radcliff, PhD

Associate Dean for Academic Affairs - Rhonda Rahn, PhD

Associate Dean for Faculty Affairs - Tamika Gilreath, PhD

Associate Dean for Student Services - Donald J. Curtis, Jr., PhD

Assistant Dean for Accountability and Strategic Initiatives - Eric Wilson, PhD

Assistant Dean for Business Affairs - Stephen Bockelmann

General Statement

Founded in 1998 as the first public health school in the nation with a focus on rural and underserved communities, the School of Public Health developed into a nationally ranked, fully accredited public health academic, research, and service program.

Offering classes at the College Station campus as well as other Texas locations through distance education, the school provides a bachelors program and graduate level programs including two master's degrees (Master of Public Health and Master of Health Administration) in several public health disciplines: epidemiology, biostatistics, environmental health, occupational safety and health, health administration, policy and management, and health behavior. The school also offers a Doctor of Public Health with concentrations in epidemiology, environmental health, and health behavior, and a Doctor of Philosophy in health services research.

The school provides an excellent forum for tomorrow's public health leaders to engage in a learning environment that builds on a wide array of research strengths and scholarly inquiry of a stellar faculty (ten of whom have received the prestigious designations of Regents Professor, and one Distinguished Professor). Further, the research and practice links established by the faculty provide an extensive diversity of opportunities for students to work closely with professionals in applied public health settings.

Providing a forum for future public health leaders, the school builds an array of research strengths and practice skills for rural and urban settings.

History

The School of Public Health is the first of its kind in the nation. The Texas Legislature established the school in 1995 as part of a rural health initiative to better address rural health needs in the state. After receiving degree-granting authority for the Master of Public Health degree in April 1998 from the Texas Higher Education Coordinating Board, the School of Rural Public Health welcomed its inaugural class in September 1998.

In 2014, the School of Public Health welcomed its first students into the brand-new Bachelor of Science in Public Health program, the first program of its kind in the state affiliated with a fully accredited School of Public Health. With a mission to serve the public health needs of the entire state, the undergraduate program is based on a philosophy of health promotion and disease prevention to improve the quality of life of

individuals, families, and communities in the State of Texas and beyond. Graduates of the BSPH program will be able to assess factors influencing health in populations as well as plan, design, implement and successfully manage effective healthcare programs and interventions as well as be well-positioned for careers in medicine, nursing and other allied health professions.

Blake, Jamilia J, Professor
Health Behavior
PHD, University of Georgia, 2007

Bolick, Barbara Jean, Instructor
Health Behavior
BA, The University of Texas at Austin, 1994

Boyce, Matt, Assistant Professor
Health Policy & Management
PHD, Georgetown University, 2024

Brinkmeyer-Langford, Candice L, Associate Professor
Environmental & Occptnl Hlth
PHD, Texas A&M University, 2006

Buckley, John J, Professor of the Practice
Health Policy & Management
MBA, George Washington University, 1969

Burdine, James N, Professor
Health Behavior
DrPH, University of North Carolina at Chapel Hill, 1979

Butkus, Shannon E, Adjunct Assistant Professor
Health Policy & Management
PHD, Texas A&M University, 2018

Carrillo, Genny, Professor
Environmental & Occptnl Hlth
PHD, Tulane University, 1993

Chen, Lei-Shih, Professor
Health Behavior
PHD, Texas A&M University, 2007

Chiang, Shawn, Assistant Professor
Health Behavior
MPH, George Washington University, 2017

Cizmas, Leslie H, Instructional Associate Professor
Environmental & Occptnl Hlth
PHD, Texas A&M University, 2003

Clark, Heather R, Assistant Professor of the Practice
Health Behavior
DrPH, Texas A&M University, 2014

Clendenin, Angela G, Instructional Associate Professor
Epidemiology & Biostatistics
PHD, Texas A&M University, 2017

Cobb, Cory, Assistant Professor
Health Behavior
PHD, University of Central Arkansas, 2019

Colwell, Brian, Professor
Health Behavior
PHD, Indiana University at Bloomington, 1992

Costa, Michael George, Adjunct Assistant Professor
Health Policy & Management
MA, University of Cincinnati, 2021

Cote, Murray J, Associate Professor
Health Policy & Management
PHD, Texas A&M University, 1996

Cuevas, Carolyn, Adjunct Assistant Professor
Health Policy & Management
PHD, Texas A&M University, 2021

Deleon, Joy Yong Barros, Instructional Assistant Professor
Health Behavior
PHD, University of Alabama - Birmingham, 2017

Dixon, Benika, Assistant Professor
Epidemiology & Biostatistics
DrPH, Texas A&M University, 2020

Douphrate, David, Associate Professor
Environmental & Occptnl Hlth
PHD, Colorado State University, 2008

Erickson, Timothy, Assistant Professor
Epidemiology & Biostatistics
PHD, University of Texas Health Science Center, 2019

Fehr, Sara K, Instructional Associate Professor
Health Behavior
PHD, University of Cincinnati, 2015

Ferdinand, Alva O, Associate Professor
Health Policy & Management
PHD, University of Alabama Birmingham, 2013

Fischer, Rebecca SB, Associate Professor
Epidemiology & Biostatistics
PHD, The University of Texas, 2014

Flores, Krystal, Instructional Associate Professor
Health Behavior
DrPH, Texas A&M University, 2019

Ford, Eric W, Adjunct Professor
Health Policy & Management
PHD, University of Alabama at Birmingham, 2000

Fulton, Sam, Visiting Professor of the Practice
Health Policy & Management
MBA, Sam Houston State University, 2012

Garney, Whitney R, Associate Professor
Health Behavior
PHD, Texas A&M University, 2015

Gibbs, Shawn Glen, Professor
Environmental & Occptnl Hlth
PHD, University of Cincinnati, 2002

Gilreath, Tamika D, Professor
Health Behavior
PHD, The Pennsylvania State University, 2007

Golla, Vijay, Associate Professor
Environmental & Occptnl Hlth
PHD, The University of Iowa, 2007

Gorman, Dennis M, Professor
Epidemiology & Biostatistics
PHD, University of Essex, 1988

Griffith, Jennifer M, Instructional Professor
Health Policy & Management
DrPH, University of North Carolina at Chapel Hill, 2004

Haeder, Simon, Associate Professor
Health Policy & Management
PHD, University of Wisconsin-Madison, 2022

Han, Daikwon, Associate Professor
Epidemiology & Biostatistics
PHD, University of Buffalo, 2003

Han, Gang, Professor
Epidemiology & Biostatistics
PHD, The Ohio State University, 2008

Hanik, Bruce W, Instructional Associate Professor
Health Behavior
PHD, Texas A&M University, 2011

Hong, Liang, Professor
Public Health Sciences
DDS, University of Tennessee, 2015
PHD, University of Iowa, 2004

Howell, Kristen Elaine, Assistant Professor
Epidemiology & Biostatistics
PHD, University of Memphis School of Public Health, 2021

Huber, John C, Visiting Lecturer
Health Policy & Management
PHD, University of Texas, HSC, 2004

Jennings, Jason, Visiting Associate Professor of the Practice
Health Policy & Management
MBA, University of Texas at Tyler, 2003

Ji, Qian, Instructional Assistant Professor
Health Behavior
PHD, Texas A&M University, 2021

Johnson, Dennis P, Professor of the Practice
Environmental & Occptnl Hlth
MPH, University of Oklahoma Health Science Center, 1979

Johnson, Natalie M, Associate Professor
Environmental & Occptnl Hlth
PHD, Texas A&M University, 2010

Zheng, Qi, Professor
Epidemiology & Biostatistics
PHD, Texas A&M University, 1993

Majors

School of Public Health

- Bachelor of Science in Public Health, Internship Track (p. 781)
- Bachelor of Science in Public Health, Non-Internship Track (p. 783)
- Bachelor of Science in Public Health and Master of Public Health in Epidemiology, 5-Year Degree Program (p. 786)
- Bachelor of Science in Public Health and Master of Public Health in Health Policy and Management, 5-Year Degree Program (p. 789)
- Bachelor of Science in Public Health and Master of Public Health in Health Behavior, 5-Year Degree Program (p. 792)
- Bachelor of Science in Public Health and Master of Public Health in Occupational Health and Safety, 5-Year Degree Program (p. 795)

Minors

School of Public Health

- Health Behavior Minor (p. 798)
- Occupational Safety and Health Minor (p. 799)
- Public Health Studies Minor (p. 799)

Masters

School of Public Health

- Master of Health Administration in Health Administration (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/interdepartmental/health-administration-mha/>)

Department of Environmental and Occupational Health

- Master of Public Health in Environmental Health (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/environmental-occupational-health/environmental-health-mp/>)
- Master of Public Health in Occupational Safety and Health (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/environmental-occupational-health/occupational-safety-health-mp/>)

Department of Epidemiology and Biostatistics

- Master of Public Health in Biostatistics (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/epidemiology-biostatistics/biostatistics-mp/>)
- Master of Public Health in Epidemiology (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/epidemiology-biostatistics/epidemiology-mp/>)

Department of Health Behavior

- Master of International Affairs and Master of Public Health (HBEH) Combined Degree Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/government-public-service/international-affairs/combined-inta-hbeh/>)
- Master of Public Health in Health Behavior (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/health-behavior/mph/>)

Department of Health Policy and Management

- Master of International Affairs and Master of Public Health (PHPM) Combined Degree Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/government-public-service/international-affairs/combined-inta-phpm/>)
- Master of Public Health in Health Policy and Management (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/health-policy-management/mph/>)
- Master of Public Health in Health Policy and Management (PHPM) and Juris Doctor (JDLW) Combined Degree Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/health-policy-management/combination-mp-hj/>)
- Master of Science in Public Health in Health Policy and Management (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/health-policy-management/msph/>)

Doctoral

School of Public Health

- Doctor of Public Health in Public Health Sciences (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/interdepartmental/public-health-sciences-drph/>)

Department of Health Policy and Management

- Doctor of Philosophy in Health Services Research (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/health-policy-management/health-services-research-phd/>)
- Master of Public Service and Administration (PSAA) and Doctor of Philosophy (HRSA) Combined Degree Program (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/government-public-service/public-service-administration/psaa-hrsa/>)

Health Education Programs

- Doctor of Philosophy in Health Education (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/public-health/health-education-programs/health-education-phd/>)

Public Health - BS, Internship Track

This program provides students with hands-on job experience while developing a program they envision for themselves in health education.

Public Health professionals with a Bachelor of Science in Public Health-Internship Track (BS-PHLT-PHI) are prepared to:

- understand the context and impact of public health history and ethics on the nation's health.
- determine the scope and influential factors for public health challenges and how they impact individuals and communities.
- assess community and public health needs and develop strategies to positively impact quality of health.
- communicate to individuals, communities, and other stakeholders about public health challenges and opportunities with cultural competence.
- function in a variety of government and private health agencies, clinical settings, nonprofit organizations, volunteer agencies, and other community organizations as a public health advocate.

The Bachelor of Science (BS) in Public Health program is based on a philosophy of health promotion and disease prevention, to improve the quality of life of individuals, families and communities through education and program intervention. The BS in Public Health focuses on four areas:

1. the determinants of health, including biological, environmental, sociocultural, health service, and economic factors;
2. identification of scientific data, tools of informatics, and other information for identifying factors that both foster and hinder the health and well-being of individuals and communities;
3. addressing major local, state, national, and global health challenges; and
4. designing public health approaches and interventions that improve health outcomes, population health, and well-being.

The BS in Public Health-Internship Track is unique in that it offers a wide range of approved electives permitting the student to develop a program according to the student's needs and interests. A student can complement or enrich a pre-health professions degree plan for students intending further education in nursing, occupational therapy, and some additional health professions.

The BS in Public Health-Internship Track is more than a means to produce ready public health practitioners. The curriculum for the BS-PHLT-PHI

exposes a student to pre-professional training through a non-paid, full semester internship during the final semester. This experience provides the student with on-the-job training and employment opportunities. This internship track places students in a setting which best fits their professional goals.

The Internship Track is not available for students wanting to pursue a BS in Public Health combination program.

The coursework for this program will qualify students to sit for the Certified Health Education Specialist (CHES (<https://www.nchec.org/ches/>)) exam and the Certified in Public Health (CPH (<https://www.nbphe.org/>)) exams.

Program Requirements

First Year

Fall		Semester Credit Hours
BIOL 111	Introductory Biology I	4
Select one of the following:		3
COMM 203	Public Speaking	
COMM 205	Communication for Technical Professions	
COMM 243	Argumentation and Debate	
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	
ENGL 203	Writing about Literature	
ENGL 210	Technical and Professional Writing	
Select one of the following:		3
MATH 140	Mathematics for Business and Social Sciences	
MATH 142	Business Calculus	
MATH 147	Calculus I for Biological Sciences	
MATH 148	Calculus II for Biological Sciences	
MATH 151	Engineering Mathematics I	
MATH 152	Engineering Mathematics II	
MATH 168	Finite Mathematics	
MATH 171	Calculus I	
MATH 172	Calculus II	
PHIL 240	Introduction to Logic	
STAT 201	Elementary Statistical Inference	
Social and behavioral sciences (p. 31)		3
Semester Credit Hours		13

Spring

BIOL 112	Introductory Biology II	4
Select one of the following:		3
COMM 203	Public Speaking	
COMM 205	Communication for Technical Professions	
COMM 243	Argumentation and Debate	
ENGL 103 or ENGL 104	Introduction to Rhetoric and Composition ¹ or Composition and Rhetoric	
ENGL 203	Writing about Literature	
ENGL 210	Technical and Professional Writing	

Select one of the following:	3
MATH 140 Mathematics for Business and Social Sciences	
MATH 142 Business Calculus	
MATH 147 Calculus I for Biological Sciences	
MATH 148 Calculus II for Biological Sciences	
MATH 151 Engineering Mathematics I	
MATH 152 Engineering Mathematics II	
MATH 168 Finite Mathematics	
MATH 171 Calculus I	
MATH 172 Calculus II

Semester Credit Hours	16
Spring	
PHLT 484 Internship ³	12
Semester Credit Hours	12
Total Semester Credit Hours	120

¹ Cannot use both ENGL 103 and ENGL 104.

² Chosen in consultation with BSPH academic advisor.

³ Must make a grade of C or better.

⁴ A list of approved courses that fulfill the directed elective hours is available below. Courses that constitute the major are those offered by the School of Public Health and those approved for public health studies electives. Additional courses may be available. Students must check with their academic advisor.

Directed Electives

Public Health (PHLT) directed electives are courses that are specifically approved for the curriculum. A student must select 3 semester credit hours from the following list of approved courses in consultation with their academic advisor. Directed Electives must have a letter grade of C or better.

Code	Title	Semester Credit Hours
ACCT 209	Survey of Accounting Principles	3
BESC 314	Pathogens, the Environment and Society	3
BESC 401	Bioenvironmental Microbiology	3
BICH 303	Elements of Biological Chemistry	3
BICH 410	Comprehensive Biochemistry I	3
BICH 411	Comprehensive Biochemistry II	3
BICH 412	Biochemistry Laboratory I	1
BIOL 206	Introductory Microbiology	4
BIOL 319	Integrated Human Anatomy and Physiology I	4
BIOL 320	Integrated Human Anatomy and Physiology II	4
BIOL 351	Fundamentals of Microbiology	4
CHEM 120	Fundamentals of Chemistry II	4
CHEM 227	Organic Chemistry I	3
CHEM 228	Organic Chemistry II	3
CHEM 237	Organic Chemistry Laboratory	1
CHEM 238	Organic Chemistry Laboratory	1
ENTO 210	Global Public Health Entomology	3
ENTO 423	Medical Entomology	2
ENTO 427	Medical Entomology Laboratory	1

PHLT 370	Broad Street Learning Community II	3			

- communicate to individuals, communities, and other stakeholders about public health challenges and opportunities with cultural competence.
- function in a variety of government and private health agencies, clinical settings, nonprofit organizations, volunteer agencies, and other community organizations as a public health advocate.

The Bachelor of Science (BS) in Public Health program is based on a philosophy of health promotion and disease prevention, to improve the quality of life of individuals, families and communities through education and program intervention. The BS in Public Health focuses on four areas:

1. the determinants of health, including biological, environmental, sociocultural, health service, and economic factors;
2. identification of scientific data, tools of informatics, and other information for identifying factors that both foster and hinder the health and well-being of individuals and communities;
3. addressing major local, state, national, and global health challenges; and
4. designing public health approaches and interventions that improve health outcomes, population health, and well-being.

The Bachelor of Science in Public Health-Non-Internship Track is more than a means to produce ready public health practitioners. The curriculum for the BS-PHLT-PHN can complement or enrich a traditional biology-based pre-health professions degree plan for students intending further education in medicine, nursing, occupational therapy, physician's assistant, physical therapist, and other allied health professions.

The Bachelor of Science in Public Health-Non-Internship Track is approved to be offered at the Texas A&M Higher Education Center in McAllen, Texas.

The coursework for this program will qualify students to be able to sit for the Certified Health Education Specialist (CHES (<https://www.nchec.org/ches/>)) exam and the Certified in Public Health (CPH (<https://www.nbphe.org/>)) exams.

Approval of degree plan does not guarantee access to courses. Students must satisfy prerequisites, and some course (writing intensive classes included) are available to majors only. It is the responsibility of the

student to ascertain whether there are any restrictions or prerequisites for courses in their degree plan.

Public Health - 5-year Bachelor of Science and Master of Public Health in Epidemiology

This program delivers students with a well-rounded understanding of the role that Epidemiology and Public Health play in medicine, nursing, allied or other health professions.

The Bachelor of Science in Public Health and Master of Public Health in Epidemiology 5-year combined degree program is more than a means to produce next-level Epidemiologists. It will deliver graduates who immediately impact the field of Epidemiology.

The undergraduate component of the program is based on a philosophy of health promotion and disease prevention, to improve the quality of life of individuals, families and communities through education and program intervention. The BSPH discipline focuses on four areas:

- the determinants of health, including biological, environmental, sociocultural, health service, and economic factors,
- identification of scientific data, tools of informatics, and other information for identifying factors that both foster and hinder the health and well-being of individuals and communities,
- addressing major local, state, national, and global health challenges, and
- designing public health approaches and interventions that improve health outcomes, population health, and well-being.

The MPH in Epidemiology focuses on the distributions and determinants of disease (or health-related outcomes) among populations and the methods employed to describe them. Students leave the MPH in Epidemiology program with the ability to understand and develop evidence-based public health research, policy, and practice.

The MPH in Epidemiology prepares students to:

- Select epidemiologic methods that are appropriate to address epidemiologic content areas.
- Analyze strengths and limitations of study designs for providing evidence for causal associations.
- Apply appropriate advanced data analysis and management techniques to analyze epidemiologic data.
- Assess and compare different reporting formats to communicate epidemiologic data to a variety of audiences.
- Explain the role of epidemiology in developing, implementing, and evaluating health policy.

The graduate MPH component is a non-thesis degree program with culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem-solving skills and complete a rigorous capstone class.

The coursework for this program will qualify students to be able to sit for the Certified Health Education Specialist (CHES (<https://www.nchec.org/ches/>)) exam and the Certified in Public Health (CPH (<https://www.nbphe.org/>)) exams.

Program Requirements

The following is a suggested schedule that includes the required courses for the combination BS and MPH in Public Health-Epidemiology. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

The program includes a total of 165 hours which up to 15 hours may be applied toward both the Bachelor of Science in Public Health and the Master of Public Health in Epidemiology.

Approval of degree plan does not guarantee access to courses. Students must satisfy prerequisites, and some courses (writing intensive classes included) are available to majors only. It is the responsibility of the student to ascertain whether there are any restrictions or prerequisites for courses in their degree plan.

Public Health - 5-Year Bachelor of Science and Master of Public Health in Health Policy and Management

This program provides students with the ability to evaluate health programs, develop budgets, manage projects, propose policies, and communicate effectively on a national level.

The Bachelor of Science in Public Health and Master in Public Health in Health Policy and Management (HPM) 5-year combination program is an accelerated program to produce next-level HPM experts. It will deliver graduates who can not only immediately impact the delivery and administration of health care programs and policies nationwide, but also deliver individuals with a well-developed skill set to manage medicine, nursing, population health, and other health professions.

The undergraduate component of the program is based on a philosophy of workplace health promotion and proactive prevention of illness to improve the quality of life of individuals, employees, families and communities through education and program intervention. The BSPH focuses on four areas:

- the determinants of health, including biological, environmental, sociocultural, health service, and economic factors,
- identification of scientific data, tools of informatics, and other information for identifying factors that both foster and hinder the health and well-being of individuals and communities,
- with a well developed skill set to be policy analyst, policy makers, or to apply project management and strategic management tools for programs,
- addressing major local, state, national, and global health challenges, and
- designing public health approaches and interventions that improve health outcomes, population health, and well-being.

The Master of Public Health (MPH) is a multi-disciplinary professional degree program designed to provide graduate level practical training in areas of specialized public health practice. The MPH in Health Policy and Management provides the study of health policy topics and concerns and policy formation, development and evaluation strategies, coupled with key operational management tools and techniques. Classroom instruction is supplemented with opportunities to apply knowledge and practice-related skills in a professional setting. The MPH in Health Policy and Management prepares students to:

- Use policy and management tools to evaluate implications of specific programs, policies, and interventions on organizations and populations.
- Develop and justify budgets that support programs and organizations in the public health and health care sectors.

- Communicate evidence-based options to address public health management and policy problems.
- Apply project management and strategic management tools to create public health program goals, strategies, and objectives.
- Recommend and justify policies or organizational initiatives for implementation after examining their feasibility and implications.

The graduate MPH component is a non-thesis degree program with applied and culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem-solving skills and complete a rigorous capstone class.

The coursework for this program will qualify students to sit for the Certified Health Education Specialist (CHES (<https://www.nchec.org/ches/>)) exam and the Certified in Public Health (CPH (<https://www.nbphe.org/>)) exams.

Program Requirements

The following is a suggested schedule that includes the required courses for the combined BS/MPH in Public Health-Health Policy and Management. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

¹ Cannot use both ENGL 103 and ENGL 104.² Chosen in consultation with BSPH academic advisor. Select from any 100-499 course.³ Must make a grade of C or better.⁴ These 15 hours will be used towards both the BS and MPH degree in Public Health.⁵ PHPM elective options includes courses from PHPM or other SPH departments may be taken. For courses outside SPH, please get approval from the departmental advisor.⁶ A list of approved courses that fulfill the directed elective hours is available below. Courses that constitute the major are those offered by the School of Public Health and those approved for public health

studies electives. Additional courses may be available. Students must check with their academic advisor.

Directed Electives

Public Health (PHLT) directed electives are courses that are specifically approved for the curriculum. A student must select 3 semester credit hours from the following list of approved courses in consultation with their academic advisor. Directed Electives must have a letter grade of C or better.

Code	Title	Semester Credit Hours
ACCT 209	Survey of Accounting Principles	3
BESC 314	Pathogens, the Environment and Society	3
BESC 401	Bioenvironmental Microbiology	3
BICH 303	Elements of Biological Chemistry	3
BICH 410	Comprehensive Biochemistry I	3
BICH 411	Comprehensive Biochemistry II	3
BICH 412	Biochemistry Laboratory I	1
BIOL 206	Introductory Microbiology	4

PHLT 485	Directed Studies	1-4			
PHLT 489	Special Topics In...	1-4			

develop, plan, and evaluate effective programs and policies to address these problems.

The MPH in Health Behavior prepares students to:

- analyze the determinants of health at individual, community, and societal levels and the systems in which these factors operate.
- conceptualize and implement appropriate interventions to improve health outcomes and improve quality of life.
- apply behavioral theories, concepts, and tools in addressing health problems in different populations and at different levels.
- judge appropriate quantitative and qualitative methods at various stages of health promotion program development, implementation, and evaluation.
- develop and defend communication materials to inform policymakers and community members.
- apply program management principles and tools to develop a program management plan, organize resources and work, and address frequently encountered problems.

The graduate MPH component is a non-thesis degree program with culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem-solving skills and complete a rigorous capstone class.

The coursework for this program will qualify students to sit for the Certified Health Education Specialist (CHES (<https://www.nchec.org/ches/>)) and the Certified in Public Health (CPH (<https://www.nbphe.org/>)) exams.

Program Requirements

The following is a suggested schedule that includes the required courses for the combination BS and MPH in Public Health-Health Promotion & Community Health Sciences. It is recognized that many students will change the sequence and number of courses taken in any semester. Deviations from the prescribed course sequence, however, should be made with care to ensure that prerequisites for all courses are met.

The program includes a total of 165 hours which up to 15 hours may be applied toward both the Bachelor of Science in Public Health and the Master of Public Health in Health Promotion & Community Health Sciences.

Approval of degree plan does not guarantee access to courses. Students must satisfy prerequisites, and some courses (writing intensive classes included) are available to majors only. It is the responsibility of the student to ascertain whether there are any restrictions or prerequisites for courses in their degree plan.

Public Health - 5-year Bachelor of Science and Master of Public Health in Occupational Safety and Health

This program prepares students with a well-rounded understanding of the specific roles that Occupational Safety and Health play in medicine, nursing, population health, and other health professions

The Bachelor of Science in Public Health and Masters in Public Health in Occupational Safety and Health combined program delivers graduates who immediately impact workplace health and safety.

The undergraduate component of this program is based on a philosophy of workplace health promotion and proactive prevention of illness, to improve the quality of life of individuals, families, and communities through education and program intervention. The BSPH discipline focuses on four areas:

- the determinants of health, including biological, environmental, sociocultural, health service, and economic factors,

- identification of scientific data, tools of informatics, and other information for identifying factors that both foster and hinder the health and well-being of individuals and communities,
- addressing major local, state, national, and global health challenges, and
- designing public health approaches and interventions that improve health outcomes, population health, and well-being.

The MPH in Occupational Safety and Health focuses on evaluating and providing interventions to reduce risk of injury and illness using ergonomics, human factors, and wellness for future, current and past workers.

The MPH in Occupational Safety and Health prepares students to:

- Evaluate occupational health risk in work settings.
- Implement theoretical models relevant to Occupational Health risk evaluation in the lab or field.
- Appraise experimental designs to appropriately address specific research questions in the field of Occupational Health.
- Synthesize knowledge of analytical techniques with theoretical models in Occupational Health to solve field problems.
- Develop and defend research plans appropriate for industrial or academic audience.

The graduate MPH component is a non-thesis degree program with culminating experiences as part of the degree requirements. Students will participate in a practicum demonstrating overall public health problem-solving skills and complete a rigorous capstone class.

- Students must complete a minimum of two required MPH Core classes prior to taking SOPH 680 Public Health Capstone.

The coursework for this program will qualify students to be able to sit for the Certified Health Education Specialist (CHES (<https://www.nchec.org/ches/>)) exam and the Certified in Public Health (CPH (<https://www.nbphe.org/>)) exams.

NUTR 202	Fundamentals of Human Nutrition	3	VTPP 425	Pharmacology	3
NUTR 222	Nutrition for Health and Health Care	3	The program includes a total of 165 hours which up to 15 hours may be applied toward both the Bachelor of Science in Public Health and the Master of Public Health in Occupational Safety and Health. Approval of degree plan does not guarantee access to courses. Students must satisfy prerequisites, and some courses (writing intensive classes included) are available to majors only. It is the responsibility of the student to ascertain whether there are any restrictions or prerequisites for courses in their degree plan.		
NUTR 320/ FSTC 320	Understanding Obesity - A Social and Scientific Challenge	3			
PBSI 225	Lifespan Development	3			
PBSI 235	Introduction to Behavioral and Cognitive Neuroscience	3	Health Behavior - Minor The health behavior minor is designed for students who want to develop knowledge in health behavior-related topics and engage in courses which complement or enhance the myriad of degree programs available at Texas A&M University. Some courses offered in the health behavior minor meet the International and Cultural Diversity or Cultural Discourse requirements for core curriculum graduation requirements. To declare the Health Behavior Minor, students must have a minimum GPA of 2.0, at least 12 graded hours at Texas A&M and fewer than 90 credit hours. Requirements must be met at the time of application.		
PBSI 306	Psychological Disorders	3			
PBSI 307	Developmental Psychology	3			
PHIL 111	Contemporary Moral Issues	3			
PHIL 251	Introduction to Philosophy	3			
PHIL 480	Medical Ethics	3

Total Semester Credit Hours		15

¹ Course meets International and Cultural Diversity or Cultural Discourse graduation requirements.

Must make a grade of C or better in each course.

Occupational Safety and Health - Minor

Students with a minor in Occupational Safety and Health minor are prepared to recognize factors that make a workplace unsafe and learn how to reduce risks for everyone.

The Occupational Safety and Health minor consists of upper-level Public Health coursework that should be selected in consultation with a School of Public Health Undergraduate Academic Advisor.

Students applying for an OCSH minor must have a 3.0 or better overall GPA. Students are required to meet a minimum cumulative GPA of 3.0 or better in their minor coursework. Proper classification is required for the course level taken and any minor course prerequisites must be met.

Program Requirements

Code	Title	Semester Credit Hours
PHLT 331	Occupational Safety and Health I	3
PHLT 333	Accident Investigation	3
PHLT 432	Human Factors and Ergonomic Health and Safety	3
PHLT 434	Project Cost Benefit and Economics	3

PHLT 330	The Environment and Public Health	
PHLT 332	Occupational Safety and Health II	

PHLT 415	Emergency Management in Public Health	
Total Semester Credit Hours		15

Minimum of 15 hours required.

Minimum of 6 hours at 300- to 400-level.

Minimum 2.0 TAMU GPA and a completed minor form filed in the Public Health Studies advising office.

Public Health Studies - Minor

The Public Health Studies minor consists of selected upper-level Public Health coursework. Students are encouraged to select courses in consultation with a School of Public Health Undergraduate Academic Advisor.

Students with a minor in Public Health are prepared to: understand factors influencing health in individuals, communities and populations; contribute to society as citizens armed with the knowledge and skills to promote the common good; promote healthier lifestyles and environments; and contribute to the implementation of programs and interventions.

Minimum 15 hours required.

Minimum of 6 hours at 300- to 400-level.

Minimum 2.0 TAMU GPA and a completed minor form filed in the Public Health Studies advising office.

COLLEGE OF VETERINARY MEDICINE AND BIOMEDICAL SCIENCES

Administrative Officers

Dean - John R. August, MS, MRCVS, BVetMed

Executive Associate Dean - Ramesh Vemulapalli, PhD, MVSc, BVSc

Associate Dean for Professional Programs - Karen Cornell, PhD, DVM

Associate Dean for Research and Graduate Studies - Michael Criscitiello, PhD, MS

Assistant Dean for Research and Graduate Studies - William Murphy, PhD

Associate Dean for Undergraduate Education - James D. Herman, PhD, DVM, MS

Associate Dean for Administration at VERO in Canyon - Susan Eades, PhD, DVM

Associate Dean for Hospital Administration - Stacy Eckman, DVM

Associate Dean for Global One Health - Gerald Parker, PhD, DVM, MS

General Statement

The College of Veterinary Medicine and Biomedical Sciences consists of five academic departments: Veterinary Integrative Biosciences, Veterinary Large Animal Clinical Sciences, Veterinary Pathobiology, Veterinary Physiology and Pharmacology, and Veterinary Small Animal Clinical Sciences. Each department is administered by a department head, who is responsible to the Dean of Veterinary Medicine and Biomedical Sciences for all programs assigned or developed in the department, including teaching, research, outreach, and service.

The College provides a professional doctoral program in veterinary medicine, a bachelors program in biomedical sciences, and graduate level programs including master's and doctoral degrees in several biomedical science disciplines.

A Veterinary Medical Teaching Hospital and Field Service Clinic are operated within the college to provide clinical laboratories for the veterinary medical educational program.

An extensive research program in animal health and disease is conducted by the faculty and staff of the college, and a substantial number of the teaching faculty members are engaged in research. The faculty makes research information available to the students in the classroom and laboratories in a timely manner.

An outreach program carries research information to veterinarians, animal owners, and others in the state and nation with the least possible delay.

The typical land-grant institutional mandate of teaching, research, patient care and service provides the organizational framework necessary to meet the dynamics in the ever-changing field of veterinary medicine.

Graduate programs leading to the Master of Science (Non-Thesis and Thesis Options) and Doctor of Philosophy degrees are available through a College of Veterinary Medicine and Biomedical Sciences umbrella

Graduate Program focused in four training tracks (Biomedical Genomics and Bioinformatics, Diagnostics and Therapeutics, Infection, Immunity and Epidemiology, and Physiology and Developmental Biology). The Department of Veterinary Integrative Biosciences offers a Science and Technology Journalism MS program and a Veterinary Epidemiology and Public Health MS program. Clinical specialty training programs are also available to provide effective training in the areas of professional specialization. The Interdisciplinary Faculty of Toxicology, a MS and PhD granting program composed of faculty from five colleges, is administratively housed in the College of Veterinary Medicine and Biomedical Sciences.

Majors

College of Veterinary Medicine and Biomedical Sciences

- Bachelor of Science in Biomedical Sciences (p. 801)
- Bachelor of Science in University Studies, Biomedical Sciences Concentration (p. 805)

Minors

College of Veterinary Medicine and Biomedical Sciences

- Biomedical Sciences Minor (p. 804)

Certificates

Department of Veterinary Physiology and Pharmacology

- Biomedical Research Certificate (p. 811)

Masters

Professional

College of Veterinary Medicine and Biomedical Sciences

- Doctor of Veterinary Medicine in Veterinary Medicine (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/veterinary-medicine-biomedical-sciences/interdepartmental/dvm/>)

Biomedical Sciences - BS

Biomedical sciences are the interventional applied life sciences that connect clinical, service, and research experiences to improve human, animal, and environmental health.

This degree is offered on both the College Station campus and at the Texas A&M Higher Education Center in McAllen, Texas. Our mission is to educate and prepare students to catalyze the improvement of human, animal, and environmental health through innovation, discovery, and global service and outreach. The program both emphasizes versatility in the biological and medical sciences, and prioritizes a One Health approach to education through courses that emphasize the interconnectedness of human, animal, and environmental health; while bringing together students with interest in medical careers that impact all three. A highly effective counseling program assists the students with the development of an individualized approach and course package that orients and prepares the students for entry into the medical, allied health field or graduate program of their choice. Such an approach enhances their educational experiences, improves their placement in professional and graduate programs, and facilitates their entry into the biomedical science job market.

Biomedical Sciences graduates enter professional programs in human medicine, veterinary medicine, dentistry, osteopathy, podiatry, optometry, and pharmacy. Some become medical technologists, physician assistants, nurses, and laboratory and research technicians. Others pursue radiation technology, hospital administration, and a wide variety of health-related fields. Many Biomedical Sciences students continue their education in graduate schools and specialize in various biology- and medicine-related disciplines. Other graduates are employed by clinical practices, industrial companies, government agencies, private foundations, public schools, colleges and certain aspects of business. Positions are available in pharmaceutical and drug marketing, research equipment manufacture and sales, food safety, biomedical research, disease control, zoonoses and epidemiology, laboratory animal care, zoo and aquatic animal supervision, health-related inspection and regulatory work. The BS in Biomedical Sciences is also awarded to students who

complete the three year Early Admission Option to Professional Schools and one year of professional school.

A complete list of BIMS courses can be found in the course descriptions section of the catalog.

Program Requirements

First Year		Semester Credit Hours

Semester Credit Hours 14

Total Semester Credit Hours 120

¹ Common Body of Knowledge Courses (CBK) must be completed with a grade of C or better. All CBK courses must be complete prior to advancing to the third and fourth year upper-division requirements.

² Complete 6-8 hours of mathematics core courses as follows:

- Select one of the following: MATH 142, MATH 147, MATH 151, MATH 171. This is a CBK course and must be completed with a grade of C or better.
- Select one of the following: MATH 140, MATH 148, MATH 150, MATH 152, MATH 172, STAT 201

³ A minimum of 4 total credits are required. Select from the following: VIBS 111, VTPB 221, VIBS 210, BIMS 110, VIBS 222, VTPP 330, VIBS 413.

⁴ HIST 105 and HIST 106 are recommended, however students may choose from other American History core courses.

⁵ Anatomy and Physiology Sequence: Students who select BIOL 319, MUST take BIOL 320 as second part of sequence. Consult an advisor for permissible course sequencing.

⁶ Select any course 100-499 except MATH 102-104 (p. 1135); only 1 credit KINE 199 may be used.

⁷ Students who complete STAT 201 in Mathematics core must take STAT 312.

⁸ A list of approved courses that fulfill the directed elective hours is available below and on the BIMS Program website. Please consult a BIMS advisor for specific questions.

When satisfying the required 16 hours of BIMS directed electives and 3 hours of general electives: Any combination of variable credit 285, 291, 484, 485, and/or 491 courses may not exceed 9 credit hours.

BIMS 484 on its own or in combination with other variable credit courses may not exceed 6 total credit hours. Any combination of 289/489 courses may not exceed 9 credit hours. Restrictions will be enforced by the BIMS academic advising office.

A minimum of two courses designated to fulfill the university's writing and oral communication graduation requirement.

All students are required to complete 3 hours of International and Cultural Diversity (p. 49) credit (ICD) and 3 hours of Cultural Discourse (p. 48) (CD) credits. A course satisfying a core category, a college department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with academic advisor.

Directed Electives

Biomedical Science (BIMS) directed electives are courses that are specifically approved for the curriculum. A student must select at least 16 semester credits from the following list of approved courses. The list of approved BIMS directed electives will also be available on the BIMS Program website:

Code	Title	Semester Credit Hours
ANSC 107	General Animal Science	3
ANSC 108	General Animal Science Laboratory	1

Biomedical Sciences - Minor

The Biomedical Sciences minor consists of coursework related to and directed toward the understanding of health and disease.

Students are encouraged to select courses in consultation with an academic advisor.

Students applying for a BIMS minor must meet with an advisor to declare the minor. Successful completion of the minor will be certified by a degree audit in Howdy during the semester of the student's graduation.

The minor will be recognized after graduation on the student's transcript, but not on the student's diploma.

Requirements to apply for a BIMS minor:

- Must have a 2.0 Texas A&M GPA
- Must have completed CHEM 119 with a minimum grade of C if taken at Texas A&M or a minimum grade of B if taken at a community college
- Must be declared before 75 hours are completed

Program Requirements

A selection from among the following courses will constitute a minor field of study. The following 15 hours of coursework is required. Proper classification must be met for the course level being taken. A minimum of 9 hours must be 3/400-level coursework.

Code	Title	Semester Credit Hours

VTPP 491	Research

Total Semester Credit Hours **15**

¹ Directed Electives are taken in consultation with a Biomedical Sciences Academic Advisor.

Students must maintain a minimum GPA of 2.000 in this minor area.

University Studies

The College of Veterinary Medicine and Biomedical Sciences offers a degree in University Studies with a Biomedical Sciences Concentration. A University Studies degree differs from a traditional "major" in that it consists of a concentration and two minors of 15-18 hours each.

The degree program offers a number of unique features:

- **Foundational knowledge:** The biomedical sciences concentration provides students with a firm grasp of the basic aspects of biomedical sciences including biology, chemistry, and biochemistry.
- **Interdisciplinary study:** Students pursue two minors that involve coursework in other Texas A&M colleges and departments. Students are encouraged to identify minors that complement the biomedical sciences concentration and reflect their individual interests and strengths.

- **Flexibility for the future:** Students who earn this degree find they have flexible options after graduation since they are prepared to pursue a wide range of careers and graduate programs.

The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest. The careers pursued by University Studies-Biomedical Sciences graduates are as varied and diverse as the students who pursue the degree.

Majors

- Bachelor of Science in University Studies, Biomedical Sciences Concentration (p. 805)

University Studies - BS, Biomedical Sciences Concentration

This program provides a flexible biomedical foundation, allowing tailored interdisciplinary study and preparing students for multiple career and graduate opportunities.

Students who earn a Bachelor of Science (BS) in University Studies with a concentration in Biomedical Sciences, are able to tailor their undergraduate coursework to align with future personal and career objectives. Specific requirements, course offerings, and restrictions exist for this degree.

The degree program offers a number of unique features:

- **Foundational knowledge:** The biomedical sciences concentration provides students with a firm grasp of the basic aspects of biomedical sciences including biology, chemistry, and biochemistry.
- **Interdisciplinary study:** Students pursue two minors that involve coursework in other Texas A&M colleges and departments. Students are encouraged to identify minors that complement the biomedical sciences concentration and reflect their individual interests and strengths.
- **Flexibility for the future:** Students who earn this degree find they have flexible options after graduation since they are prepared to pursue a wide range of careers and graduate programs.

The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Program Requirements

First Year

Fall		Semester Credit Hours
BIMS 101	Introduction to Biomedical Sciences	1
BIOL 111	Introductory Biology I	4
CHEM 119	Fundamentals of Chemistry I	4
Mathematics ^{1,2}		3-4
Social and behavioral sciences (p. 31)		3
Semester Credit Hours		15
Spring		
BIOL 112	Introductory Biology II	4
CHEM 120	Fundamentals of Chemistry II	4
Select one of the following:		3
ENGL 103	Introduction to Rhetoric and Composition	

ENGL 104	Composition and Rhetoric	
ENGL 203	Writing about Literature	
ENGL 210	Technical and Professional Writing	
Mathematics ^{1,2}		3-4
Semester Credit Hours		14
Second Year		
Fall		
Select one of the following:		4
CHEM 227	Organic Chemistry I	
& CHEM 237	and Organic Chemistry Laboratory	
CHEM 257	Organic Chemistry I - Structure and Function	
American history (p. 30) ³		3
Creative arts (p. 30)		3
Government/Political science (p. 31) ³		3
Directed electives ⁴		3
Semester Credit Hours		16
Spring		
BIMS 250	Professionalism, Skill Development, Career Exploration, and Ethical Conduct in BIMS	1
American history (p. 30) ³		3
Government/Political science (p. 31) ³		3
Language, philosophy and culture (p. 28)		3
Directed electives ⁴		4
Semester Credit Hours		14
Third Year		
Fall		
VTPB 421	Infectious Diseases of Humans and Animals	3
Directed electives ⁴		3
General electives ⁵		9
Semester Credit Hours		15
Spring		
BIMS 320/ GENE 320	Biomedical Genetics	3
Communication (p. 27)		3
Directed electives ⁴		3
General electives ⁵		6
Semester Credit Hours		15
Fourth Year		
Fall		
General electives ⁵		15
Semester Credit Hours		15
Spring		
Directed electives ⁴		3
General electives ⁵		13
Semester Credit Hours		16
Total Semester Credit Hours		120

¹ Complete 6-8 hours of mathematics core courses as follows:
 • Select one of the following: MATH 142, MATH 147, MATH 151, MATH 171.

• Select one of the following: MATH 140, MATH 148, MATH 150, MATH 152, MATH 172, STAT 201.

² Must make a grade of C or better.

³ Completion of four semesters of upper-level ROTC may be substituted for 3 hours of American history and 3 hours of political science.

⁴ Select from ANSC 107, ANSC 108, ANSC 210, ANSC 303/NUTR 303, ANSC 318, ANSC 320, ANSC 326/FSTC 326, ANSC 327/FSTC 327; BICH 409, BICH 410, BICH 411, BICH 412, BICH 414, BICH 431/ GENE 431, BICH 432/GENE 432; BIMS 101, BIMS 110, BIMS 125, BIMS 201, BIMS 250, BIMS 289, BIMS 291, BIMS 303, BIMS 380, BIMS 402/VIBS 402, BIMS 405/GENE 405, BIMS 421/GENE 421, BIMS 481, BIMS 484, BIMS 485, BIMS 489, BIMS 491, BIMS 499; BIOL 401, BIOL 402, BIOL 403; CHEM 258; COMM 370; ENTO 208, ENTO 209, ENTO 210, ENTO 423, ENTO 425, ENTO 427, ENTO 431/ FIVS 431, ENTO 432/FIVS 432; MKTG 443/PHLT 426; NUTR 222; POSC 454; URPN 370; VIBS 111, VIBS 201/NRSC 201, VIBS 204, VIBS 210, VIBS 211, VIBS 222, VIBS 243, VIBS 277, VIBS 285, VIBS 289, VIBS 305, VIBS 310, VIBS 311, VIBS 343, VIBS 401/NRSC 401, VIBS 407/NRSC 407, VIBS 408, VIBS 411, VIBS 413, VIBS 422, VIBS 424/VTPP 424, VIBS 426/ENTO 426, VIBS 443, VIBS 445, VIBS 446, VIBS 447, VIBS 450, VIBS 456, VIBS 485, VIBS 489, VIBS 491; VLCS 422, VLCS 485, VLCS 491; VSCS 485, VSCS 491; VTPB 212, VTPB 221, VTPB 285, VTPB 289, VTPB 301/RWFM 309, VTPB 303, VTPB 407, VTPB 408, VTPB 409, VTPB 410, VTPB 411, VTPB 415, VTPB 425, VTPB 426, VTPB 438, VTPB 460, VTPB 485, VTPB 487, VTPB 489, VTPB 491; VTPP 123, VTPP 207, VTPP 208, VTPP 223, VTPP 224, VTPP 234, VTPP 235, VTPP 281, VTPP 285, VTPP 289, VTPP 291, VTPP 330, VTPP 401/BMEN 400, VTPP 404, VTPP 405, VTPP 420, VTPP 423, VTPP 425, VTPP 427, VTPP 438, VTPP 444, VTPP 452, VTPP 481, VTPP 485, VTPP 489, VTPP 491.

⁵ Includes 30-36 hours used to satisfy the two minor requirements and 7-13 hours any 100-499 course not used elsewhere (except MATH 102); only 1 KINE 199 may be used in this area.

No more than 9 hours combined of 291, 285, 491, 485 may be included as part of the 120 total hours required by the degree plan. No more than 6 hours of BIMS 484 may be used. Restriction to be enforced by the BIMS advising office.

All students are required to complete 3 hours of International and Cultural Diversity (p. 49) credit (ICD) and 3 hours of Cultural Discourse (p. 48) (CD) credits. A course satisfying a core category, a college department requirement, or a free elective can be used to satisfy this requirement. Select in consultation with academic advisor.

Graduation requirements require two courses with the (UWRT) Writing Intensive or 1 course with the Writing Intensive (UWRT)/1 course Oral communication (UCRT) attribute. Consult your academic advisor for choices. These credits may come from the concentration field of study or the minor areas.

Students must complete 36 hours 300/400 level coursework in residency at TAMU.

Department of Veterinary Integrative Biosciences

Department website: <http://vetmed.tamu.edu/vibs/>

Interim Head: Christine M Budke

The Department of Veterinary Integrative Biosciences (VIBS) has a mission to educate the next generation of veterinarians and biomedical scientists and to conduct novel biomedically-oriented research that is integrative in scope, approach and methodology. VIBS training programs deliver quality learning experiences for undergraduate, graduate, and veterinary medical professional students, preparing them for contributions to society through professional service, scientific inquiry, communication in scholarly journals, and robust educational outreach programs developed within the department and in partnership with outside agencies and organizations. State-of-the-art research is conducted across a variety of interactive focus areas, each of which brings the expertise of multiple disciplines to bear on complex issues of societal importance and maximizes each student's and investigator's potential for interdisciplinary synergy. The department is comprised of faculty with specialties in anatomy, epidemiology/public health, genetics/genomics, neuroscience, reproductive biology, and Science and Technology Journalism (STJR). Many of the department faculty participate in University-wide training programs in Neuroscience, Reproductive Biology, Genetics, Biotechnology, and Ecology and Evolutionary Biology.

Department of Veterinary Pathobiology

The Department of Veterinary Pathobiology (VTPB) focuses on advancing animal and human health through innovative research, preparing next-generation veterinary and biomedical professionals and scientists through impactful teaching, and supporting animal health care through expert clinical laboratory service. Protecting the health of animals and humans requires understanding the causes of disease, biological mechanisms of disease, and the body's defense mechanisms against disease. Expertise in VTPB spans infectious diseases, pathology, biomedical genetics, and cell biology. VTPB research strengths are in the areas of infectious diseases and immunology, antimicrobial resistance and stewardship, genetics of disease susceptibility and resistance, and wildlife ecosystems and conservation genetics. VTPB faculty members teach courses in undergraduate, graduate, and veterinary medicine professional programs. Instruction at the undergraduate level includes courses in biomedical microbiology, virology, and parasitology, introduction to immunology, mechanisms of disease, biomedical genetics, poultry diseases, and great diseases of the world. VTPB faculty members also provide high-impact research and other experiential learning opportunities to undergraduate students, including study abroad programs into South Africa and Costa Rica. Students learn to investigate the mechanisms of health and disease at the molecular, cellular, organismal, or population levels.

Department of Veterinary Physiology and Pharmacology

The Department of Veterinary Physiology and Pharmacology (VTPP) has a rich tradition of excellence in education, research and outreach that impacts both veterinary and human medicine. The department has

expertise in toxicology, reproductive science, cardiovascular biology, tissue regeneration and bone biology. In addition, VTPP is the home department for the undergraduate Biomedical Research Certificate (BRC) program, the largest undergraduate research experience program in the country.

The primary research focus areas within the department are extramurally funded, internationally renowned and significantly contribute to improving human and veterinary health. Extensive research collaborations with the Colleges of Agriculture and Life Sciences, Science, Engineering and Education and Human Development, as well as with the Texas A&M University Health Science Center, School of Public Health, Texas A&M AgriLife Research and the Texas A&M Engineering Experiment Station provide exceptional resources that enhance all departmental research efforts.

Our faculty, many of whom are leaders in their fields and key contributors to the scientific and educational literature, are also strong mentors that form the basis for a strong graduate and undergraduate research and education experience. Most importantly, they are accessible, focused and student-friendly with a deep understanding of the art and science of education and research.

Certificates

- Biomedical Research Certificate (p. 811)

Biomedical Research - Certificate

The Biomedical Research Certificate will provide students the opportunity to gain advanced training in biomedical research.

Students in the Certificate Program will gain a broader understanding of the creation, evaluation, and dissemination of new knowledge while performing publishable original biomedical research within a research-intensive community. The Biomedical Research Certificate program includes engagement in inquiry-based research.

Program Requirements

Code	Title	Semester Credit Hours
VTPP 123	Foundations of Physiology	3
VTPP 444	Practicum in Biomedical Research	3
VTPP 491	Research ¹	6
Prescribed Elective Courses		6

Select one of the following:

VTPP 207 Methodologies of Physiology
& VTPP 208 Education Research
and Analysis and Evaluation of
Physiology Education

VTPP 223 Design of Experiments for
& VTPP 224 Physiology Research
and In Vitro Experimentation in
Physiology Research

VTPP 234 Design of Models for Physiology
& VTPP 235 Research
and Analysis and Validation of
Models for Physiology Research

Total Semester Credit Hours

18

¹ Two (three hour) courses are required for 6 hours total.

SCHOOL OF MILITARY SCIENCES

Administrative Officers

Commandant - Lieutenant General James W. Bierman Jr, USMC (Ret.)

General Statement

The School of Military Sciences is composed of three departments: Aerospace Studies, Military Science and Naval Science.

The University's commitment to providing highly skilled and disciplined leaders to the Armed Forces requires all students enrolled in ROTC programs at Texas A&M to be members of the Corps of Cadets.

All courses offered by the School of Military Sciences are accredited by the Texas A&M University. However, the credit granted for degree plans varies by college and often by department. For precise information, consult an academic advisor or department head.

Students not enrolled in an ROTC program may be permitted to take ROTC courses as electives with the advance approval of the professor of military science, the professor of aerospace studies, or the professor of naval science, as appropriate, and the concurrence of the head of the School of Military Sciences.

State law permits the substitution of 3 hours of history and 3 hours of political science for a student in the program of an approved senior ROTC unit. With the approval of the dean of the appropriate college, students successfully completing their required four semesters of upper-level ROTC curriculum will be deemed to have completed the equivalent of POLS 206 or POLS 207 plus HIST 105 or HIST 106 (or another appropriate course) for a total of 6 hours. Students pursuing teacher certification are not allowed to substitute ROTC credits for this requirement.

Undergraduate Studies' units have modified services available to students enrolled via distance education, at branch campuses, or at other instructional locations.

Department of Aerospace Studies

The Air Force Reserve Officer Training Corps (AFROTC) program at Texas A&M University is the largest in the United States and designed to prepare students to be commissioned officers in the United States Air Force and Space Force. AFROTC curriculum includes classroom instruction and hands-on activities.

The first two years include Aerospace Studies (AERS) 100- and 200-level courses with a focus on the culture and organization of the Air Force, followership, teamwork, and professionalism. Cadets attend class one hour per week and Leadership Lab two hours per week each semester.

These courses prepare cadets to lead as juniors and seniors and for selection to Field Training.

During their sophomore year, cadets may apply for continued enrollment for their junior and senior year. Competitive selection is limited to students of high moral character who are academically qualified, are physically fit, and have demonstrate aptitude and leadership potential.

Cadets selected to continue in AFROTC enlist into the Air Force Reserve and sign a contract with the government agreeing to complete the course and, upon graduation, accept a commission as an officer in the United States Air Force or Space Force. They also must agree to serve on active duty for no less than four years after being commissioned or ten years after completion of flying training if selected for aviation. Continuing cadets must attend Field Training during the summer months typically between the sophomore and junior years.

AERS 300- and 400-level courses focus on critical thinking, effective supervision and feedback, communication, leadership, ethics, joint operations, national security affairs, military justice system, and air and space competencies. Junior and senior attend class three hours per week and Leadership Lab two hours per week during each semester.

Leadership Laboratory includes practical instruction conducted within the framework of an organized cadet unit with a progression of experiences designed to develop each student's leadership potential. Leadership Laboratory involves a study of Department of the Air Force customs and courtesies, drill and ceremonies, physical fitness activities and Air Force and Space Force career opportunities. Students develop leadership skills in a supervised laboratory environment.

Students enrolled in the four-year program may compete for two- or three-year AFROTC scholarships. Four-year scholarships must be applied for during the senior year of high school. AFROTC scholarship students are eligible to receive tuition payment, textbook allowance, and monthly subsistence allowance. Contracted cadets receive a monthly subsistence allowance.

Upon completion of AFROTC and graduation from the University, students are commissioned as Second Lieutenants in the United States Air Force or Space Force. Instructors are active duty officers assigned to the University by the Department of the Air Force. Information about the AFROTC program may be obtained by contacting the Detachment or visiting the AFROTC website.

Department of Military Science

Overview

Military instruction has been conducted at Texas A&M University since its founding in 1876. In 1916, the Army Reserve Officers' Training Corps (ROTC) was formally established as a federal program and the Army ROTC program at Texas A&M University was one of the first nationally recognized programs. Army ROTC Cadets are proud members of the Texas A&M Corps of Cadets known as the "Guardians of Tradition" and the "Keepers of the Spirit" in Aggieland. Army ROTC cadets are leaders in a wide variety of university activities including student government, campus athletics, the Fightin' Texas Aggie Band, Ross Volunteer Company, Parsons Mounted Calvary and Fish Drill Team. Members of the Army ROTC Ranger Challenge Team are selected from the famed Rudder's Rangers student organization. The Texas A&M Ranger Challenge team has won multiple Army ROTC national competitions and

consistently places in the top five at the Sandhurst International Military Skills Competition competition held at U.S. Military Academy.

Army ROTC classes are electives preparing qualified cadets to earn a commission as a Second Lieutenant in the Army, Army National Guard, or US Army Reserve. The Army offers a variety of career fields to match a student's education and interests with virtually no restrictions on the field of study (except for General Studies). Army ROTC graduates who accept a commission may enter one of 18 full-time or part-time career fields such as the Corps of Engineers, Aviation, Military Intelligence, Infantry, Armor, Air Defense Artillery, Field Artillery, Cyber, Signal, Finance, Chemical, Military Police, Ordnance, Transportation, Quartermaster, Adjutant General Corps, Medical Service Corps, or Nursing.

Highly qualified cadets may apply for an education delay program to pursue advanced degrees in divinity, medical, or law. Qualified cadets may also attend formal military training including: Air Assault, Airborne Course, Sapper Leaders Course, Basic Military Mountaineering Course, Cold Weather Operations Course, Jungle Warfare Course, or Combat Diver Qualification Course.

Curriculum

Basic Course (100 and 200 level MLSC Curriculum)

Army ROTC curriculum for the 100- and 200- level courses is designed to provide college students with foundational military training while also preparing them for leadership roles in the U.S. Army. These courses focus on developing teamwork, physical fitness, military knowledge, and personal discipline. The outcome is a foundation for the more advanced 300- and 400 level courses that are part of the ROTC program.

Cadets develop and refine their leadership by participating in physical training, tactically focused leadership labs, and one field training exercise per semester. There is **NO** military obligation for participation in the Basic Course. Students who are not part of the Corps of Cadets and who do not desire a commission in the Army may take Basic Course classes for academic credit as a participating student but are not permitted to attend leadership labs or conduct physical training. Cadets who have not completed four semesters of Basic Course classes and desire a commission in the Army (cadets from other ROTC programs, transfer students, graduate students) may attend the 30-day Basic Camp at Fort Knox, Kentucky during the summer after their freshman or sophomore year. Basic Camp provides an immersive experience in basic Soldier skills and replaces Military Science 100-200 level Army ROTC requirements preparing those Cadets for acceptance to the Advance Course.

Advanced Course (300 and 400 level MLSC Curriculum)

The Advanced Course curriculum for Army ROTC is designed for cadets in their junior and senior years (300- and 400- level courses) and focuses on preparing them to become commissioned officers in the U.S. Army. This stage of the program emphasizes physical fitness, advanced leadership development, military tactics, decision-making under pressure, critical thinking, and the skills necessary to lead Soldiers in a wide variety of operational environments.

At the 300 level (Junior Year), cadets are expected to contract with Army ROTC and will generally assume a military service obligation. 300 level classes focus on military operations and tactics, include required physical training, and a leadership laboratory once a week. This intermediate level of instruction is designed for cadets to take on greater responsibilities and deepen their tactical expertise by preparing them for Cadet Summer Training (CST). CST is a 5-week, hands on, leadership evaluation event held at Fort Knox, Kentucky. Army ROTC Juniors from

across the United States seeking a commission in the U.S. Army attend CST after successfully passing their 300 level courses. Passing CST is a requirement for commissioning.

The 400 level (Senior Year) represents the final phase of the ROTC curriculum. Cadets are expected to take on even greater leadership roles, learn more complex military processes, and refine their thinking in preparation for commissioning as officers. As part of the required leadership laboratory, cadets in the 400 level curriculum are also assigned leadership roles within the Aggie Warrior Battalion responsible for planning, resourcing, and conducting training for the cadets in the 100-300 levels. This model is designed to prepare cadets to transition from college students to commissioned officers in the U.S. Army. Cadets will work with instructors in deciding which component (Active-Duty, Army Reserves, or Army National Guard) they will commission in, their selection of Army career fields, and begin preparing for their first duty assignment.

Qualified veterans may enroll directly into the ROTC Advanced Course. Veterans in the Advanced Program receive a tiered subsistence allowance of up to \$500 per month in addition to their veterans' benefits.

Stipends

All qualified cadets in the Army ROTC program who sign a commissioning contract receive a monthly subsistence allowance while a full time student (not during the summer, and prorated in August and May). Army ROTC cadets are also encouraged to take courses in strategic languages. Through the Army's Culture and Language Incentives Program, students can earn up to \$300 per credit hour for completing classes in qualifying languages.

Qualified students who join the Army National Guard or US Army Reserve, may participate in the Simultaneous Membership Program (SMP). This program allows student to train with local US Army Reserve or Army National Guard units while a cadet and earn approximately \$250 extra per month. The total dollar amount for SMP cadets can reach up to \$750 per month during their junior and senior years in Army ROTC. Tuition assistance paying between 75-100% of tuition costs is available through the U.S. Army Reserves and Texas Army National Guard.

Scholarships

The Army ROTC Scholarship program awards scholarships on a competitive basis to students entering Army ROTC as college freshmen. Qualified college students already enrolled in Army ROTC may compete for scholarships if federal funding is available. These scholarships pay the cost of tuition and required fees *or* room and board. Once a cadet is contracted with Army ROTC, they may qualify for the Texas A&M Patriot Scholarship through the Corps of Cadets. This additional scholarship covers remaining room and board fees (restrictions apply). Army ROTC Scholarship Cadets also receive a textbook allowance of \$600 per semester for the duration of the scholarship.

The U.S. Army Health Profession Scholarship Program (HPSP) offers a unique opportunity for financial support to cadets who desire to continue their education beyond their undergraduate work by enrolling in a program that leads to a professional degree in medicine, dentistry or veterinary medicine.

Contact

Texas A&M Army ROTC Staff and Cadre have a plethora of military and academic experience, and most have served multiple combat and

operational deployments. They are dedicated to developing academically superior and physically fit commissioned officers recognized as outstanding leaders of character for the U.S. Army Officer Corps. For more information on Army ROTC programs, contact the Military Science Department and the Recruiting Operations Officer at (979) 845-2814 or at armyrotc@corps.tamu.edu.

Department of Naval Science

Mission

The Naval ROTC Unit at Texas A&M University provides qualified young men and women the opportunity to learn the mission of the Naval Services and pursue a commission as an officer in the United States Navy or United States Marine Corps. The Naval ROTC Unit operates as the Department of Naval Science at Texas A&M and is one of the largest Naval ROTC Units in the United States. Graduates from our program can be found serving around the world. Officers commissioned as Ensigns in the United States Navy have the option, based on physical and aptitude qualification, to serve in the Aviation (Pilot or Naval Flight Officer), Surface Warfare (Conventional or Nuclear), Nuclear Submarine, or Special Warfare (SEAL or Explosive Ordnance Disposal) communities. Officers commissioned as Second Lieutenants in the United States Marine Corps can serve in one of more than 36 military operational specialties in three categories including Aviation (Pilot or Naval Flight Officer), Combat Arms (Infantry, Artillery, Assault Amphibians, Combat Engineers, etc.), or Combat Service Support (Logistics, Supply, Communication, Finance, etc.).

Naval ROTC students may participate fully in all aspects of university life. This includes serving in positions with Student Government or the Memorial Student Center, belonging to campus clubs and service organizations, or participating in religious, social, professional or personal interest organizations.

Scholarships

The Naval ROTC program provides numerous scholarship opportunities for qualified individuals who are seeking a commission upon graduation as an officer in either the United States Navy or United States Marine Corps. The four-year Naval ROTC scholarship program is a nationally competitive program. High school students seeking a four-year Navy or Marine Corps Option Naval ROTC scholarship may apply as early as the spring of their junior year in high school, and should apply no later than December of their senior year in high school. College freshmen with less than 30 college credit hours may also apply for the 4-year Naval ROTC scholarship during the fall of their freshman year. If awarded the scholarship, it would come into effect during the fall of their sophomore year. The Naval ROTC scholarship pays for all tuition, most university fees, some uniform fees, and provides the student with a monthly stipend and a semester book allowance. Three- and two-year scholarships with the same benefits listed above are available for qualifying students who apply while enrolled as NROTC students at Texas A&M. The four-year national scholarship application can be found at www.nrotc.navy.mil (<https://www.nrotc.navy.mil/>).

College Program

Students without NROTC scholarships that desire to commission into the Navy or Marine Corps are Basic College Program Students. Basic College Program students are guided by the same goals as the NROTC Scholarship students; to include meeting the respective service physical requirements, maintaining a required minimum GPA, and possessing

the aptitude and motivation for service above self. The Basic College Program exists to provide students the opportunity to learn about the United States Navy and United States Marine Corps and provide an alternate means for a commission for those not on scholarship. Basic College Program students can apply for a two-year or three-year Navy or Marine Corps Option Naval ROTC scholarship. Students who do not qualify for a scholarship but still desire a commission in the Navy can apply for acceptance into the College Program (Advanced Standing). The College Program (Advanced Standing) begins during the junior year and pays a monthly stipend, but does not pay for tuition and fees. All NROTC students are provided Naval Science textbooks, which are returned at the end of each semester, at no cost.

Naval Science Students

Students who join the Texas A&M Corps of Cadets are required to participate with an ROTC for a minimum of three semesters. Students who choose to join the Naval ROTC, but do not intend to pursue a commission into the Navy or Marine Corps are considered Naval Science Students. They are required to take a Naval Science (NVSC) class and attend specified Leadership Laboratories. They are not required to do physical fitness with the NROTC or be advised by a military advisor.

Leadership

All Scholarship and College Program (Basic and Advanced Standing) NROTC students are also members of the Texas A&M Midshipman Battalion, an organization providing distinct training and leadership opportunities for students pursuing Navy and Marine Corps commissions. This training is accomplished through the NROTC's physical fitness program and leadership laboratory. Associated with each Naval Science class and conducted every Tuesday afternoon, Leadership Laboratory is a combination of classroom study and practical hands-on application that exposes the students to many facets of the Navy and Marine Corps and provides them the opportunity to develop their leadership skills.

Academic Requirements

Academic requirements vary by program, but all freshmen and sophomore Naval ROTC students must take a Naval Science (NVSC) class each fall and spring semester. These courses provide a basic understanding of the Navy and Marine Corps organization and mission; address the concepts of leadership, ethics, and management; and provide a basic understanding of the history of American sea power and the evolution of warfare throughout the ages. All Scholarship and College Program (Advanced Standing) students continue to take Naval Science courses during their junior and senior year. These courses cover additional topics such as navigation, weapons systems, amphibious warfare and leadership and ethics for the junior officer. All students on scholarship or College Program (Advanced Standing) can choose from any major offered by Texas A&M. Students who are recipients of the NROTC scholarship Navy option, must also complete two courses of calculus and two courses of physics, regardless of major.

Summer Cruise

Scholarship students receive four to six weeks of additional training every summer with operational Navy and Marine Corps units around the world. Between the freshman and sophomore years, students receive orientation training with naval aviation, surface combatant, submarine and Marine Corps units. Between the sophomore and junior years, Navy Option students experience the life of enlisted sailors aboard ships and submarines and Marine Option students experience the life of enlisted

marines with Marine units in the field. For the final training session between the junior and senior years, all Scholarship and College Program (Advanced Standing) students receive service-specific training in final preparation for commissioning. Navy Option students are assigned to aviation units, surface combatants or submarines depending upon their qualifications and desires and receive hands-on training working closely with qualified junior officers. Marine Option students attend Officer Candidate School at Quantico, VA where they are screened, trained and evaluated in an intense, competitive environment alongside other Marine Option students from around the country. Students participating in summer cruises are provided government travel, medical and dental care, commissary and exchange privileges, and are paid for the duration of the training.

Commissioning

Upon graduation, qualified Naval ROTC Marine Option Scholarship students receive commissions as Second Lieutenants in the United States Marine Corps and serve a minimum of four years of active duty. Qualified Naval ROTC Navy Option Scholarship students receive commissions as Ensigns in the United States Navy and serve a minimum of five years of active duty. Qualified Naval ROTC College Program (Advanced Standing) Navy Option students receive commissions as Ensigns in the United States Navy and serve a minimum of three years of active duty. Those Navy Option graduates who are academically qualified and accepted to graduate school in certain disciplines may apply for active duty deferments to complete their post-graduate education.

NROTC Staff

The staff of the Naval Science Department is dedicated to producing officers of the highest quality for the United States Navy and United States Marine Corps. All instructors are active duty Navy or Marine Corps officers and senior enlisted personnel assigned to the University by the United States Navy or United States Marine Corps. In addition, they work with the Corps of Cadets and act as military advisors to the Companies/Outfits within the naval regiment. This group of highly trained professionals places specific emphasis on the academic and professional development of every student assigned. Additional information about the Naval ROTC program at Texas A&M University can be obtained by calling the Department at (979) 845-1775, or by visiting the Texas A&M Naval ROTC website.

Military Studies - Minor

The School of Military Sciences offers a minor in Military Studies. This minor is available to all Texas A&M students; ROTC or Corps of Cadets participation is not required. All students desiring to enroll in the Military Studies minor should visit <https://tx.ag/corpsacademics> (<https://tx.ag/corpsacademics/>) or email academics@corps.tamu.edu to request more information.

Program Requirements

The Military Studies minor requires 18 hours. Nine hours must be completed in approved upper-level Aerospace Studies, Military Science, or Naval Science courses with an additional 9 hours from approved university courses with a military-related focus. A minimum of 12 hours must be at the 300-400 level. A grade of C or higher is required if a course is to be counted towards the minor field. Minor programs are recognized on the transcripts after graduation, but not on the diploma. The student's college and/or major department determines the number of minor programs a student may seek and shall be responsible for advising after

the student receives signed approval from the Assistant Commandant for Academics and International Programs.

¹ Minimum of 6 hours of School of Military Sciences courses (NVSC, AERS, and MLSC) must be at the 400 level.

TEXAS A&M UNIVERSITY AT GALVESTON

Administrative Officers

Col. Michael E. Fossum, USAFR (Ret.) - Chief Operating Officer, Texas A&M University at Galveston; Vice President, Texas A&M University; Superintendent, Texas A&M Maritime Academy

Dr. Debbie Thomas, Executive Associate Vice President for Academic Affairs and Chief Academic Officer, Texas A&M University at Galveston; Dean, College of Marine Sciences and Maritime Studies; Associate Provost, Texas A&M University

Dr. Pete van Hengstum - Interim Associate Vice President for Research and Graduate Studies, Texas A&M University at Galveston; Associate Dean, College of Marine Sciences and Maritime Studies, Texas A&M Professor

Dr. Donna C. Lang - Executive Associate Dean, College of Marine Science and Maritime Studies, Texas A&M University Associate Vice President for Academic Operations, Texas A&M University at Galveston

Ms. Susan Hernandez Lee - Associate Vice President for Finance and Compliance Officer

Mr. Grant W. Shallenberger - Associate Vice President for Administration and Auxiliary Services

Dr. Todd Sutherland - Associate Vice President for Student Affairs and Assistant Superintendent of Cadets

General Statement

Texas A&M University at Galveston, a branch campus of Texas A&M University, houses the College of Marine Sciences and Maritime Studies, selected programs of the College of Engineering and the Texas A&M Maritime Academy. The College of Marine Sciences and Maritime Studies offers ocean-oriented academic degrees, research, continuing education, and public service in marine science, engineering, business, transportation and liberal arts. Degrees are awarded from Texas A&M University. Ocean voyages, sailing in Galveston Bay, beachfront experiments and independent study complement the rigorous classroom experience at Texas A&M University at Galveston. In addition to its academic programs, the Texas A&M Maritime Academy offers training programs leading to officer licensing in the U.S. Merchant Marine.

Texas A&M University at Galveston is located near the mouth of Galveston Bay with close access to the Gulf of America. Most instructional programs are taught at the 130-acre Mitchell Campus on Pelican Island (with housing for 1,400+ students). The training ship serves as a floating classroom, laboratory and dormitory for annual sea term training of the U.S. Maritime Service cadets. During the regular school year, the ship is berthed at Pelican Island and provides valuable dockside laboratory facilities for instruction in the practical aspects of the maritime curricula.

Courses of Study

The College of Marine Sciences and Maritime Studies provides undergraduate degree programs in Marine Biology (MARB), Marine Sciences (MARS), Marine Engineering Technology (MARR), Marine Transportation (MART), Marine Fisheries (MARF), Maritime

Business Administration (MARA), Maritime Studies (MAST), Coastal Environmental Science and Society, and University Studies (USGA) (with concentrations in Oceans and One Health; and Tourism and Coastal Community Development). A 5-year program is offered to allow Coastal Environmental Science and Society majors to complete the Master of Marine Resources Management (MARM) degree, combining their senior year of the undergraduate program with the first year of MARM. A similar 5-year program is offered to allow Maritime Business Administration majors to complete the Master of Maritime Business Administration and Logistics (MMAL) in addition to the bachelor's degree program in a total of 5 years. All students complete the University Core Curriculum requirements set by Texas A&M University to ensure a broad-based education.

The College of Engineering offers the first year engineering program as well as degrees in Computer Science, Environmental Engineering, Interdisciplinary Engineering, Multidisciplinary Engineering Technology and Ocean Engineering in residence on the Galveston campus.

The College of Marine Sciences and Maritime Studies offers advanced degrees including MS (thesis or non-thesis) and PhD in Marine Biology, a thesis and non-thesis Master of Marine Resource Management degree, a thesis and non-thesis Master of Maritime Business Administration and Logistics degree and a PhD in Marine and Coastal Management and Science.

Texas A&M University at Galveston is fully accredited as a branch campus of Texas A&M University by the Southern Association of Colleges and Schools Commission on Colleges. Marine Engineering Technology is accredited by the Engineering Technology Accreditation Commission of ABET and the license option programs of the Texas A&M Maritime Academy including are certified by the U.S. Coast Guard.

Texas A&M University Maritime Academy Corps of Cadets

Texas A&M University at Galveston houses the Texas A&M Maritime Academy, one of six state maritime academies in the U.S., preparing graduates for licensing as officers in the United States Merchant Marine. This program provides an opportunity for students to learn how to operate and maintain an ocean-going vessel. In addition to classroom and field training during the regular school year, students will sail aboard a training vessel or appropriate commercial placement during three sea terms to gain practical experience in seamanship, navigation and operations. At the conclusion of the program, cadets test to become licensed as officers in the U.S. Merchant Marine and may seek employment in the field of marine transportation as a licensed Third Mate or Third Assistant Engineer. Please see the Texas A&M Maritime Academy (<https://www.tamug.edu/corps/>) website for more information.

The NROTC Program offers men and women an opportunity to qualify for a commission in the Navy while attending Texas A&M University at Galveston. All NROTC students are required to participate in the Texas A&M Maritime Academy Corps of Cadets. Any student may join the NROTC Program either as a National Scholarship winner or as a non-subsidized college program student. Applications for National Scholarships can be obtained through a Navy recruiting office before the submission deadline of January 30 of the year for which the student is applying.

Mission Statement

Texas A&M University at Galveston is a special-purpose institution of higher education for undergraduate and graduate instruction in marine and maritime studies in science, engineering and business and for research and public service related to the general field of marine resources. The institution is under the management and control of the Board of Regents of The Texas A&M University System, with degrees offered under the name and authority of Texas A&M University at College Station.

Research Programs

Faculty, post-doctoral fellows, research staff, and students are actively involved in research throughout the world. Research is conducted under the direction of more than 50 faculty members with funding from federal, state, private and university sources including the National Science Foundation, National Oceanic and Atmospheric Administration, National Aeronautics and Space Administration, Department of the Interior, National Institutes of Health, Department of Energy, Environmental Protection Agency, Texas General Land Office, Texas Commission on Environmental Quality, Texas Parks and Wildlife Department, CONACYT, Consortium for Ocean Leadership, Texas Institute of Oceanography and Research Development Fund. Externally funded research expenditures were over \$4.1 million. Total research expenditures were over \$5.6 million. Research encompasses both the basic and applied aspects of fields such as marine biology, oceanography, coastal/ocean engineering, marine geology, marine policy and management, environmental studies, conservation, business, admiralty law and coastal zone management. Research is focused largely in the areas of coastal and beach processes (e.g., physical profiling of coastal regions and erosion processes and control), marine life studies (e.g., marine mammal, fish, shellfish, algae and sea turtle biology and ecology), bay and estuary ecosystems (e.g., wetlands management and toxic contaminant analysis), geochemical cycling in marine/aquatic/atmospheric systems and offshore/deep water environments. Many of the faculty researchers hold dual graduate appointments in multiple Texas A&M University departments. Undergraduate students have many opportunities to participate in research, such as the Texas Institute of Oceanography Undergraduate Student Research Program, working as student workers and technicians on funded research programs, taking independent study classes or participating in the Undergraduate Research Scholars Program. Undergraduate students may work in the laboratory and at field sites throughout the world, participate in research cruises, present results at local, national and international meetings, and serve as authors on publications

Marine Biology
PHD, State University of Campinas, 2016

Cresswell, Jacquelyn N, Visiting Lecturer
Marine Biology
PHD, Texas A&M University, 2019

Davidson, Dillon, Assistant Professor of the Practice
Maritime Transportation
MIA, Texas A&M University, 2024

Davis, Randall W, Professor
Marine Biology
PHD, University of California at San Diego, 1980

Davlasheridze, Meri, Associate Professor
Marine and Coastal Environmental Science
PHD, Pennsylvania State University, 2013

Dellapenna, Timothy M, Professor
Marine and Coastal Environmental Science
PHD, The College of William & Mary, 1999

DiGeorgio-Lutz, JoAnn, Professor
Maritime Studies
PHD, University of North Texas, 1993

Dobberstine, Jim, Visiting Lecturer
Marine Biology
MS, University of Houston-Clear Lake, 2007

Domsky, Darren K, Associate Professor
Maritime Studies
PHD, York University, 2006

Du, Jiabi, Assistant Professor
Marine and Coastal Environmental Science
PHD, College of William and Mary, 2017

Earle, Thomas, Associate Professor
Maritime Studies
PHD, Rice University, 2017

Echols, Katherine E, Instructional Professor
Maritime Studies
PHD, University of Houston, 2015

Edenfield, George, Professor of the Practice
Maritime Transportation
MA, American Military University, 2013

Falvo, Kathryn R, Assistant Professor
Maritime Studies
PHD, Pennsylvania State University, 2018

Faris, Joseph Basam, Associate Professor of the Practice
Maritime Transportation
BS, Texas A&M University at Galveston, 2011

Fathi, Nima, Assistant Professor
Marine Engineering Technology
PHD, University of New Mexico, 2017

Fazioli, Andrea L, Assistant Professor of the Practice
Maritime Transportation
BS, Texas A&M University at Galveston, 1994

Fertitta Woods, Kelli, Instructional Assistant Professor
Maritime Business Administration
JD, South Texas College of Law, 2013

Foroughirad, Vivienne, Assistant Professor
Marine Biology
PHD, Duke University, 2019

Furth, Brett H, Instructional Assistant Professor
Maritime Studies
PHD, Texas A&M University, 2015

Galan, Jhenny F, Instructional Professor
Foundational Sciences
PHD, University of Connecticut, 2006

Galvan Mandujano, Martha C, Lecturer
Maritime Studies
PHD, The University of Oklahoma, 2015

Gard, Joel, Visiting Instructional Assistant Professor
Foundational Sciences
PHD, University of Houston, 2023

Gillespie, Patrick Joesph, Assistant Professor of the Practice
Maritime Transportation
BS, Ferris State University, 2009

Griffitts, Joshua Todd, Assistant Professor of the Practice
Maritime Transportation
BS, Texas A&M University, 2017

Gurtu, Amulya, Professor
Maritime Business Administration
PHD, Toronto Metropolitan University, 2014

Hala, David, Associate Professor
Marine Biology
PHD, Brunel University, 2007

Hammady Brho, Mazen, Assistant Professor
Maritime Business Administration
PHD, University of North Texas, 2018

Haney, Adam D, Instructional Associate Professor
Maritime Studies
MA, Texas A&M University Commerce, 2014

Hark, John F, Senior Lecturer
Maritime Business Administration
BS, Texas A&M University, 1989

Hochman, Mona E, Senior Lecturer
Marine Biology
MS, University of Maryland, 2000

Jazairy, Amer, Assistant Professor
Maritime Business Administration
PHD, KTH Royal Institute of Technology, 2020

Jonkman, Sebastiaan, Research Professor
Marine and Coastal Environmental Science
PHD, Delft University of Technology, 2007

Josvoll, Kristin K, Instructional Associate Professor
Maritime Studies
MA, Johns Hopkins University, 2015

Kaiser, Karl, Professor
Marine and Coastal Environmental Science
PHD, University of South Carolina, 2009

Kang, Cong X, Associate Professor
Foundational Sciences
PHD, The University of Texas at Austin, 1999

Kates, Cindy, Lecturer
Maritime Studies
EDD, University of South Dakota, 2000
MMU, University of South Dakota, 1995

Khan, Irfan, Assistant Professor
Marine Engineering Technology
PHD, Carnegie Mellon University, 2018

Kieffer, Kristi R, Associate Professor of the Practice
Maritime Transportation
BS, Texas A&M University at Galveston, 2012

Kieffer, Stephen A, Lecturer
Maritime Transportation
BS, Arizona State University, 1987

Kitchen, Sheila, Assistant Professor
Marine Biology
PHD, Oregon State University, 2016

Kress, Lisa M, Lecturer
Maritime Studies
MFA, University of Houston, 2001

Labonté, Jessica, Associate Professor
Marine Biology
PHD, University of British Columbia, 2013

Lamphere, Jenna A, Assistant Professor
Maritime Studies
PHD, University of Tennessee Knoxville, 2016

Ledford, Chris, Instructional Associate Professor
Maritime Studies
MS, Texas A&M University at Corpus Christi, 2003

Liu, Hui, Associate Professor
Marine Biology
PHD, University of Alaska Fairbanks, 2006

Luxemburg, Leon A, Associate Professor
Foundational Sciences
PHD, Texas A&M University, 1987

MATICH, PHILIP, Instructional Associate Professor
Marine Biology
PHD, Florida International University, 2014

Mark, Samuel E, Professor
Maritime Studies
PHD, Texas A&M University, 2000

Marshall, Christopher, Professor
Marine Biology
PHD, University of Florida, 1997

McQueen, Vanicha, Associate Professor of the Practice
Marine Engineering Technology
BS, US Merchant Marine Academy, 1988

Miglietta, Maria P, Associate Professor
Marine Biology
PHD, Duke University, 2005

Moore, Andrew L, Assistant Professor of the Practice
Marine Engineering Technology
MS, Texas Tech University, 2018

Morrison, Robert Dean, Professor of the Practice
Maritime Business Administration
PHD, University of Texas Rio Grande Valley, 2015
PHD, Indiana State University, 2008

Moser, Melanie J, Instructional Professor
Marine and Coastal Environmental Science
PHD, University of Houston, 1977

Murray, Ny'Eshia N, Assistant Professor of the Practice
Maritime Transportation
BS, Texas A&M University at Galveston, 2012

Musgrove, Liz, Instructional Assistant Professor
Maritime Studies
MA, University of North Texas, 2005

Mykoniatas, Nikolaos, Instructional Associate Professor
Maritime Business Administration
PHD, The Pennsylvania State University, 2013

Nair, Radhika P, Instructional Associate Professor
Foundational Sciences
PHD, University of Nevada, 2009

Nealon, Bill H, Lecturer
Maritime Studies
MED, Lamar University, 2018

Nelick, Timothy F, Senior Professor
Maritime Transportation
BS, Texas A&M University at Galveston, 1987

Nwabueze, Uchenna M, Instructional Professor
Maritime Business Administration
PHD, Sheffield Hallam University, City Campus, 1995

Nyakiti, Luke, Instructional Associate Professor
Marine Engineering Technology
PHD, Texas Tech University, 2008

Nyman, Elizabeth A, Associate Professor
Maritime Studies
PHD, Florida State University, 2010

Ottman, Rebecca D, Assistant Professor
Maritime Studies
PHD, Indiana University Bloomington, 2021

Park, Kyeong, Professor
Marine and Coastal Environmental Science
PHD, College of William and Mary, 1993

Peterlin, John G, Associate Professor of the Practice
Maritime Transportation
BS, United States Merchant Marine Academy, 1976

Petersen, Lene H, Instructional Associate Professor
Marine Biology
PHD, Memorial University of New Foundland, 2010

Pintacuda, Jesse C, Lecturer
Maritime Studies
BS, Texas A&M University at Galveston, 2008

Potier, Paul A, Professor of the Practice
Marine Engineering Technology
PHD, Prairie View A&M University, 2012

Presswood, Phillip H, Instructional Assistant Professor
Maritime Studies
MA, University of Houston at Clear Lake, 2011

Qiu, Lin, Instructional Associate Professor
Foundational Sciences
PHD, University of Alabama, 2006

Quigg, Antonietta S, Professor
Marine Biology
PHD, Monash University, 2000

Rantschler, James O, Instructional Assistant Professor
Foundational Sciences
PHD, University of Alabama, 2003

Reeves, Adam, Assistant Professor of the Practice
Marine Engineering Technology
BS, Massachusetts Maritime Academy, 1993

Retchless, David P, Associate Professor
Marine and Coastal Environmental Science
PHD, Pennsylvania State University, 2015

Rodrigue, Jean-Paul, Professor
Maritime Business Administration
PHD, Université de Montréal, 1994

Rodriguez, Andrea, Assistant Professor of the Practice
Maritime Transportation
BS, Texas A&M University at Galveston, 2013

Roelke, Daniel L, Professor
Marine Biology
PHD, Texas A&M University, 1997

Rooker, Jay R, Professor
Marine Biology
PHD, The University of Texas at Austin, 1997

Ross, Ashley D, Associate Professor
Marine and Coastal Environmental Science
PHD, Texas A&M University, 2010

Roth, Augusta D, Professor of the Practice
Maritime Transportation
DBA, Walden University, 2018

Schulze, Anja, Professor
Marine Biology
PHD, University of Victoria, Canada, 2001

Schwarz, John R, Senior Professor
Marine Biology
PHD, Rensselaer Polytechnic Institute, 1972

Schwehr, Kathleen A, Instructional Assistant Professor
Foundational Sciences
PHD, Texas A&M University, 2004

Shah Esmaeili, Yasmina, Visiting Assistant Professor
Marine Biology
PHD, State University of Campinas, 2023

Shrestha, Khim Raj, Instructional Assistant Professor
Foundational Sciences
PHD, Syracuse University, 2015

Slatton, Katie J, Instructional Associate Professor
Maritime Studies
MED, University of Montevallo, 2003

Smith, Christopher Wayne, Instructional Assistant Professor
Marine and Coastal Environmental Science
PHD, University of Georgia, 2019

Steichen, Jamie L, Instructional Associate Professor
Marine Biology
PHD, Texas A&M University, 2013

Takir, Driss, Visiting Lecturer
Marine and Coastal Environmental Science
PHD, University of Tennessee, 2013

Tian, Guanyu, Assistant Professor
Marine Engineering Technology
PHD, University of Central Florida, 2022

Townsend, Grace L, Instructional Associate Professor
Foundational Sciences
MS, University of Houston at Clear Lake, 1983

Traber, Daniel S, Professor
Maritime Studies
PHD, University of Houston, 2000

Vechan, Ryan J, Associate Professor of the Practice
Maritime Transportation
JD, University of Houston, 2014

Verma, Alok, Professor
Marine Engineering Technology
PHD, Old Dominion University, 2005

Viser, Victor J, Instructional Associate Professor
Maritime Studies
PHD, Temple University, 1995

Wang, Zhaojun, Assistant Professor
Marine and Coastal Environmental Science
PHD, University of Delaware, 2021

Warren, Jesse T, Lecturer
Foundational Sciences
MS, University of Houston at Clear Lake, 2005

Weaver, Stephen R, Assistant Professor of the Practice
Maritime Transportation
BS, Texas A&M University at Galveston, 2017

Wells, Robert J, Professor
Marine Biology
PHD, Louisiana State University, 2007

Williams, Sara S, Senior Lecturer
Maritime Studies
BS, Texas A&M University, 2000

Wolski, Chris, Adjunct Professor of Law
Maritime Business Administration
MBA, University of Maryland Global Campus, 2018

Yi, Eunjeong, Professor
Foundational Sciences
PHD, University of Houston, 2003

de Avillez, André Rosenbaum, Visiting Lecturer
Maritime Studies
PHD, The Pennsylvania State University, 2016

van Hengstum, Peter J, Professor
Marine and Coastal Environmental Science
PHD, Dalhousie University, Canada, 2011

Programs

Interdisciplinary

- Bachelor of Science in Computer Science (p. 638)
- Bachelor of Science in Environmental Engineering (p. 630)
- Bachelor of Science in Interdisciplinary Engineering (p. 693)
- Bachelor of Science in Multidisciplinary Engineering Technology, Electro Marine Engineering Technology Track (p. 659)
- Bachelor of Science in Ocean Engineering (p. 705)

General Information

General Information

General Information for Galveston Students

General Academics Major (GACD)

The General Academics major at Texas A&M University at Galveston is to be utilized by continuing students who are not able to immediately enter their major of choice. A student must have completed at least one semester at TAMUG prior to entering the General Academics major. Interested students must complete the General Academics Change of Major Application by the designated deadline in order to be reviewed for potential entry to GACD. Review criteria for entry to the major will include the student's ability to meet the minimum requirements to enter into their intended major in one to two semester(s), as well as review of any previous academic or honor code issues. Students admitted to the General Academics major have two (2) semesters to work toward entry to their major of choice; an extension of one additional semester will be considered on a case-by-case basis.

For additional information, visit the General Academics Major website (<https://www.tamug.edu/cals/gacd/>).

Academic Deficiency

Any GPA below 2.0 at Texas A&M University at Galveston is considered academically deficient; this applies to term GPA, major GPA, and cumulative GPA. At the conclusion of each academic term, all students with a deficient GPA will be reviewed. Depending on the severity of their case, and extenuating circumstances when relevant, the student will be placed into one of the following categories:

- Probation One – Students placed on Probation One are able to fully continue within their program, but must show consistent progress towards regaining good standing. Failure to show consistent academic progress, per terms set by the academic department, could result in the student being moved to another deficiency category.
- Probation Two – Students placed on Probation Two are able to fully continue within their academic program, but must meet additional probationary terms as well as showing consistent progress towards regaining good standing. These terms include completion of the Academic Coaching and Success program, as well as remediation as deemed appropriate by the academic department. Failure to meet the full terms of probation and/or to show consistent academic progress, per terms set by the academic department, could result in the student being moved to another deficiency category.
- Departmental Suspension – Students placed on Departmental Suspension will not be able to continue within their academic program. Any classes that student has registered for will be dropped,

and they will not be able to register for additional classes until they have successfully applied and been accepted into a new major. Admission to another major is not guaranteed.

- Campus Suspension – Students placed on Campus Suspension will not be able to continue at Texas A&M University at Galveston for a minimum of one (1) full semester. During that time, the student is required to develop an action plan addressing the specific issues causing their academic difficulty. After the semester suspension concludes, the student is eligible to reapply to the campus; readmission is not guaranteed.
- University Suspension – Students placed on University Suspension will not be able to continue at Texas A&M University for a minimum of 12 months. Following the completion of the 12-month suspension, the student may apply for readmission; readmission is not guaranteed.

For additional information, contact the Seibel Learning Center at (409) 741-4343.

Academic Calendar

Texas A&M University and Texas A&M University at Galveston Calendar

All dates and times are subject to change.

2025 Summer Term I

May 12	Monday. Graduation application opens for all students planning to graduate in August 2025.
May 23	Friday, 5 p.m. Last day to register for first term semester classes. Refer to Student Business Services for tuition and fee due dates.
May 26	Monday. Memorial Day - No classes. Faculty and Staff Holiday.
May 27	Tuesday. First day of first term classes. Refer to Student Business Services for the Refund Policy for Withdrawals and Dropped Courses.
May 30	Friday. Last day for adding/dropping first term classes. Official census date for first term classes.
June 16	Monday, 5 p.m. Last day for all students to drop courses with no penalty for the first term (Q-drop). Last day to change Kinesiology 198/199 grade type for the first term. Last day to officially withdraw from the University for the first term.
June 19	Thursday. Juneteenth Emancipation Day - No classes. Faculty and Staff Holiday.
June 24	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 30	Monday. Last day of first term classes.
July 1	Tuesday. First term final examinations.
July 4	Friday. Independence Day - No classes. Faculty and Staff Holiday. Midsummer break at Bush School Washington, D.C. site.

July 7	Monday. First term final grades due at noon. Grades will be available for viewing in Howdy after 5 p.m.
July 11	Friday. Last day to apply online for all degrees to be awarded in August 2025 without a late fee.
July 23	Wednesday. Summer 2025 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
August 5	Tuesday. Last day to apply for all degrees to be awarded in August.
August 8	Friday. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 9	Saturday. Commencement and Commissioning for degrees in College Station and Galveston. Additional details will be posted on graduation.tamu.edu as they become available.
August 13	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2025 Summer Term II

May 12	Monday. Graduation application opens for all students planning to graduate in August 2025.
June 24	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
July 1	Tuesday. Last day to register for second term classes. Refer to Student Business Services for tuition and fee due dates.
July 2	Wednesday. First day of second summer term classes.
July 4	Friday. Independence Day. Faculty and staff holiday. No classes.
July 8	Tuesday, 5 p.m. Last day for adding/dropping courses for the second term. Official census date for the second term.
July 11	Friday. Last day to apply online for all degrees to be awarded in August 2025 without a late fee.
July 23	Wednesday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop) for the second term. Last day to change Kinesiology 198/199 grade type for the second term. Last day to officially withdraw from the University for the second term.
August 5	Tuesday. Last day of second term classes. Last day to apply for all degrees to be awarded in August.
August 6	Wednesday. Second term final examinations for all students.
August 8	Friday.

	Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m.
	5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 8-9	Friday - Saturday. Commencement and Commissioning for degrees in College Station and Galveston. Additional details will be posted on graduation.tamu.edu as they become available.
August 12	Tuesday, noon. Final grades for second term classes due. Grades will be available for viewing in Howdy after 5 p.m.
August 13	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2025 10-Week Summer Semester

May 12	Monday. Graduation application opens for all students planning to graduate in August 2025.
May 23	Friday, 5 p.m. Last day to register for 10-week semester classes. Refer to Student Business Services for tuition and fee due dates.
May 26	Monday. Memorial Day. Faculty and Staff holiday. No classes.
May 27	Tuesday. First day of 10-week classes. Refer to Student Business Services for the Refund Policy for Withdrawals and Dropped Courses.
May 30	Friday. Last day for adding/dropping 10-week classes. Official census date for 10-week classes.
June 2	Monday. First day of classes at the Bush School Washington, D.C. site.
June 19	Thursday. Juneteenth Emancipation Day. Faculty and Staff Holiday. No classes.
June 24	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 30-July 4	Monday-Friday. Midsummer break at the Bush School Washington, D.C. site.
July 1	Tuesday. No 10-week classes.
July 4	Friday. Independence Day. Faculty and staff holiday. No classes.
July 11	Friday. Last day to apply online for all degrees to be awarded in August 2025 without a late fee.
July 17	Thursday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop) for 10-week classes. Last day to officially withdraw from the University for 10-week classes.
July 23	Wednesday. Summer 2025 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
July 28	Monday. No classes held at the Bush School Washington, D.C. site.
July 29	Tuesday. Last day of classes at the Bush School Washington, D.C. site.
July 30-31	Wednesday-Thursday. Bush School Washington, D.C. site final examinations.

August 5	Tuesday. Last day of 10-week classes.
	Last day to apply for all degrees to be awarded in August.
August 6-7	Wednesday - Thursday. 10-week final examinations for all students.
August 8	Friday. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 8-9	Friday - Saturday. Commencement and Commissioning for degrees in College Station and Galveston. Additional details will be posted on graduation.tamu.edu as they become available.
August 12	Tuesday, noon. Final grades for 10-week classes due. Grades will be available for viewing in Howdy after 5 p.m.
August 13	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2025 Fall Semester

August 11	Monday. Graduation application opens for all students planning to graduate in December 2025.
August 13	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.
August 22	Friday, 5 p.m. Fall semester open registration ends. Late registration and course add/drop period begins.
August 25	Monday. First day of fall semester classes.
August 29	Friday. Last day for adding/dropping courses for the fall semester.
September 1	Monday. Labor Day. Faculty and Staff Holiday. No classes.
September 10	Wednesday. Fall official census date.
September 22	Monday. Undergraduate deadline to submit a request for change of curriculum.
September 26	Friday. Last day to apply for all degrees to be awarded in December without a late fee.
September 30	Tuesday. Undergraduate degree plan approval deadline. See Student Rule 1.9.
October 13	Monday, noon. Mid-semester grades due.
October 13-14	Monday-Tuesday. Fall break. No classes.
November 5	Wednesday. Last day to apply online for December 2025 graduation.
November 6-21	Thursday-Friday. Preregistration for 2026 spring semester.
November 11	Monday. Veterans Day. No classes held at the Bush School Washington, DC site.
November 18	Tuesday. Bonfire 1999 Remembrance Day.
November 19	Wednesday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop). Last day to change Kinesiology 198/199 grade type for fall 2025.

	Last day to officially withdraw from the University. Fall 2025 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
November 26	Wednesday. Reading day. No classes.
November 27-28	Thursday-Friday. Thanksgiving holiday. Faculty and Staff holiday. No classes.
December 8	Monday. Last day of fall semester classes. Last day to apply for all degrees to be awarded in December.
	No regular course examinations (except for laboratory and one-hour courses).
December 9	Tuesday. Redefined day for students at the Bush School Washington, DC site.
December 9-10	Tuesday - Wednesday. Reading days. No classes.
December 10	Wednesday. Reading Day for Bush School Washington, DC site.
December 11-12, 15-16	Thursday-Friday, Monday-Tuesday. Fall semester final examinations for all students.
December 17	Wednesday. 5 p.m. Last day for December undergraduate degree candidates to apply for Tuition Rebate (https://aggie.tamu.edu/graduation/tuition-rebate) in Howdy. 6 p.m. Grades due for degree candidates. Grades will be available for viewing in Howdy after 10 p.m.
	Commencement and Commissioning for all degrees in College Station (tentative). Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.
December 18	Thursday. Commencement and Commissioning for all degrees in College Station. Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.
December 19	Friday. Commencement and Commissioning for all degrees in College Station (tentative). Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available. Commencement and Commissioning - All degrees in Galveston.
December 22	Monday, noon. Final grades for all students due. Grades will be available for viewing in Howdy after 5 p.m.
December 23	Tuesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.
December 24-January 1	Wednesday-Thursday. Faculty and Staff holiday.

All dates and times are subject to change.

2026 Spring Semester

December 22	Monday. Graduation application opens for all students planning to graduate in May 2026.
January 9	Friday, 5 p.m. Spring semester open registration ends. Late registration and course add/drop period begins.
January 12	Monday. First day of spring semester classes.

January 16	Friday. Last day for adding/dropping courses for the spring semester.
January 19	Monday. Martin Luther King, Jr. Day. Faculty and Staff holiday. No classes.
January 28	Wednesday. Spring official census date.
February 9	Monday. Undergraduate deadline to submit a request for change of curriculum.
February 13	Friday. Last day to apply for all degrees to be awarded in May without a late fee.
February 16	President's Day observed. No classes. Bush School Washington, D.C. site.
March 2	Monday, noon. Mid-semester grades due.
March 9-13	Monday-Friday. Spring break. No classes.
March 12-13	Thursday-Friday. Faculty and Staff Holiday.
March 25	Wednesday. Last day to apply for spring 2026 graduation online.
March 26 - April 10	Thursday -Friday. Preregistration for the 2026 summer and fall semesters.
April 3	Friday. Reading day. No classes. Does not apply to clinical placements for the School of Nursing.
April 14	Tuesday, 5 p.m. Last day for all students to drop courses with no academic penalty (Q-drop). Last day to change KINE 198/199 Grade Type for spring 2026.
	Last day to officially withdraw from the University. Spring 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
April 21	Tuesday. Muster. Campus ceremony.
April 27	Monday. No regular course examinations (except for laboratory and one-hour courses).
April 28	Tuesday. Redefined day. Students attend their Friday classes. Does not apply to programs offered by the College of Nursing. Redefined day. Students attend their Monday classes. Bush School Washington, D.C. site.
	Last day of spring semester classes. No regular course examinations (except for laboratory and one-hour courses). Last day to apply for all degrees to be awarded in May.
April 29	Wednesday. Reading day. No classes.
April 30-May 1, May 4-5	Thursday-Friday, Monday-Tuesday. Spring semester final examinations for all students.
May 6	Wednesday. 5 p.m. Last day for May undergraduate degree candidates to apply for Tuition Rebate in Howdy. 6 p.m. Grades for degree candidates due. Grades will be available for viewing in Howdy after 10 p.m.
May 7-9	Thursday - Saturday. Commencement and Commissioning for all degrees in College Station – additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.

May 11 Monday, noon. Final grades for all students due. Grades will be available for viewing in Howdy after 5 p.m.

May 12 Tuesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2026 Summer Term I

May 11 Monday. Graduation application opens for all students planning to graduate in August 2026.

May 22 Friday, 5 p.m. Last day of open registration for first term semester classes.

May 25 Monday. Memorial Day. Faculty and Staff holiday. No classes.

May 26 Tuesday. First day of first term classes.

May 29 Friday.

Last day for adding/dropping first term classes.

Official census date for first term classes.

June 15 Monday, 5 p.m.

Last day for all students to drop courses with no penalty for the first term (Q-drop).

Last day to change Kinesiology 198/199 grade type for the first term.

Last day to officially withdraw from the University for the first term.

June 19 Friday. Juneteenth Emancipation Day. Faculty and staff holiday. No classes.

June 23 Tuesday. Undergraduate deadline to submit a request for change of curriculum.

June 29 Monday. Last day of first term classes.

June 30 Tuesday. First term final examinations.

July 6 Monday. First term final grades due at noon. Grades will be available for viewing in Howdy after 5 p.m.
Last day to apply online for all degrees to be awarded in August 2026 without a late fee.

Last day to apply online for all certificates to be awarded in August 2026.

July 21 Tuesday. August 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline (<https://aggie.tamu.edu/graduation/degree-requirement-verification> (<https://aggie.tamu.edu/graduation/degree-requirement-verification/>)) per Student Rule 14.2.

August 4 Tuesday. Last day to apply for all degrees to be awarded in August.

August 7 Friday. Commencement and Commissioning - All degrees in Galveston.

Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m.

5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.

August 8 Saturday. Commencement and Commissioning for degrees in College Station. Additional details will be posted on <https://registrar.tamu.edu/graduation> (<https://registrar.tamu.edu/graduation/>) as they become available.

August 12 Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2026 Summer Term II

May 11 Monday. Graduation application opens for all students planning to graduate in August 2026.

June 23 Tuesday. Undergraduate deadline to submit a request for change of curriculum.

June 30 Tuesday. Last day to register for second term classes. Refer to Student Business Services for tuition and fee due dates.

July 1 Wednesday. First day of second summer term classes.

July 6 Monday. Last day to apply online for all degrees to be awarded in August 2026 without a late fee.

Last day to apply online for all certificates to be awarded in August 2026.

July 8 Tuesday, 5 p.m.

Last day for adding/dropping courses for the second term.

Official census date for the second term.

July 21 Tuesday, 5 p.m.

Last day for all students to drop courses with no penalty (Q-drop) for the second term.

Last day to change Kinesiology 198/199 grade type for the second term.

Last day to officially withdraw from the University for the second term.

Summer 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.

August 4 Tuesday.

Last day of second term classes.

5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate (<https://aggie.tamu.edu/graduation/tuition-rebate> (<https://aggie.tamu.edu/graduation/tuition-rebate/>)) in Howdy.

August 5 Wednesday. Second term final examinations for all students.

August 7 Friday. Commencement and Commissioning - All degrees in Galveston.

Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m.

5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.

August 8 Saturday. Commencement and Commissioning for degrees in College Station. Additional details will be posted on <https://registrar.tamu.edu/graduation> (<https://registrar.tamu.edu/graduation/>) as they become available.

August 11 Tuesday, noon. Final grades for second term classes due. Grades will be available for viewing in Howdy after 5 p.m.

August 12 Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

2026 10-Week Summer Semester

May 11	Monday. Graduation application opens for all students planning to graduate in August 2026.
May 22	Friday, 5 p.m. Last day to register for 10-week semester classes. Refer to Student Business Services for tuition and fee due dates.
May 25	Monday. Memorial Day. Faculty and Staff holiday. No classes.
May 26	Tuesday. First day of 10-week classes.
May 29	Friday. Last day for adding/dropping 10-week classes. Official census date for 10-week classes.
June 19	Thursday. Juneteenth Emancipation Day. Faculty and Staff Holiday. No classes.
June 23	Tuesday. Undergraduate deadline to submit a request for change of curriculum.
June 29-July 3	Monday-Friday. Midsummer break at the Bush School Washington, D.C. site.
June 30	Tuesday. No 10-week classes. Does not apply to undergraduate Nursing courses.
July 6	Monday. Last day to apply online for all degrees to be awarded in August 2026 without a late fee. Last day to apply online for all certificates to be awarded in August 2026.
July 15	Wednesday, 5 p.m. Last day for all students to drop courses with no penalty (Q-drop) for 10-week classes. Last day to officially withdraw from the University for 10-week classes.
July 21	Wednesday. Summer 2026 Degree Candidates: Degree Requirement Verification (DRV) deadline per Student Rule 14.2.
July 23	Thursday. Last day of classes for Bush School Washington, DC site.
July 29-30	Wednesday-Thursday. Bush School Washington, D.C. site final examinations.
August 4	Tuesday. Last day of 10-week classes. Last day to apply for all degrees to be awarded in August.
August 5-6	Wednesday - Thursday. 10-week final examinations for all students.
August 7	Friday. Commencement and Commissioning - All degrees in Galveston. Noon. Grades due for degree candidates. Grades will be available for viewing in Howdy after 5 p.m. 5 p.m. Last day for August undergraduate degree candidates to apply for Tuition Rebate in Howdy.
August 8	Saturday. Commencement and Commissioning for degrees in College Station. Additional details will be posted on https://registrar.tamu.edu/graduation (https://registrar.tamu.edu/graduation/) as they become available.

August 11	Tuesday, noon. Final grades for 10-week classes due. Grades will be available for viewing in Howdy after 5 p.m.
August 12	Wednesday. Undergraduate change of curriculum period begins. See Student Rule 5.1.

All dates and times are subject to change.

Admission

Admission to Texas A&M University at Galveston

Admission into Texas A&M University at Galveston (TAMUG) requires a separate application from Texas A&M University at College Station. Applicants may apply for admission to any program on the Galveston campus at www.applytexas.org (<https://www.applytexas.org/>), and freshman may apply on www.commonapp.org (<https://www.commonapp.org/>). The SAT or the ACT admission examinations are acceptable. Students should submit scores to Texas A&M University Galveston at (Code 6835 for SAT and Code 6592 for ACT). Scores will only be accepted directly from the College Board or ACT.

Admission to the Texas A&M Maritime Academy (TAMMA) requires an additional application. Acceptance to an academic program by the Office of Admissions does not constitute admission to the TAMMA and U.S. Maritime Service License Option Program. Full information regarding TAMMA application and required documents are located at Prospective Cadets - Texas A&M Galveston, TX (tamug.edu) (<https://www.tamug.edu/corps/pages/Prospective-Cadets/prospective-cadets.html>)

To obtain an information packet or schedule a campus visit, call toll free at 1-87-SEAAGGIE, write Office of Admissions, Texas A&M University at Galveston, P.O. Box 1675, Galveston, TX 77553-1675, or visit www.tamug.edu/admissions (<http://www.tamug.edu/admissions/>).

Admission Statement and Policy on Individuals with Disabling Conditions

Texas A&M University at Galveston has a strong institutional commitment to the principle of diversity in all areas. In that spirit, admission to Texas A&M University and any of its sponsored programs is open to all qualified individuals. Texas A&M does not discriminate on the basis of an individual's disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended in its admissions, accessibility, treatment and employment of students in its programs and activities. Services and facilities are available to students with disabilities. Individuals should contact the Office of Student Affairs if they have special needs before they commit to enrollment.

Applying for Admission

Students can apply for undergraduate admission to any Texas public university by using the ApplyTexas Application. You may access the appropriate application from the ApplyTexas application website: www.applytexas.org (<https://www.applytexas.org/>). Freshmen admissions applications are also available on Common App: www.commonapp.org (<https://www.commonapp.org/>).

The admission guidelines presented here are for admission to the Spring, Summer or Fall 2026 semester. While they are the best guide available, admission criteria are subject to change. The TAMU Galveston website (www.tamug.edu (<http://www.tamug.edu>)) contains the admission policies and procedures in effect for 2026 admission.

The application for Spring 2026, Summer 2026 and Fall 2026 will be available at ApplyTexas beginning August 1, 2025.

Types of Admission and Application Calendars

At the Time of Application	Term	Opening Date	Closing Date
Freshman			
An applicant who: • is a citizen or permanent resident of the United States or qualifies for Texas residency. • is a degree-seeking applicant and is without college credit ¹ or • is still in high school, with or without college credit	Spring 2026	Aug 1, 2025	Dec 1, 2025
	Fall 2026	Aug 1, 2025	May 1, 2026
Transfer			
An applicant who: • is a citizen or permanent resident of the United States or qualifies for Texas residency • is a degree-seeking applicant • has graduated from high school or equivalent • has enrolled in a post-secondary institution after graduation from high school • does not have a bachelor's degree • does not qualify for readmission	Spring 2026	Aug 1, 2025	Dec 1, 2025
	Summer 2026	Jan 1, 2026	May 1, 2026
	Fall 2026	Jan 1, 2026	Jul 1, 2026
International Freshman			

An applicant who: • is not a citizen or permanent resident of the United States (or applicant for permanent residency) and does not qualify for Texas residency • after high school graduation has never enrolled at a university as an undergraduate degree-seeking student	Spring 2026	Aug 1, 2025	Oct 15, 2025
	Fall 2026	Aug 1, 2025	Dec 1, 2025
International Transfer			
An applicant who: • is not a citizen or permanent resident of the United States (or applicant for permanent residency) and does not qualify for Texas residency • is an applicant seeking a bachelor's degree • has graduated from high-school or equivalent • has enrolled in a post-secondary institution, and • is not eligible for readmission (has never enrolled at Texas A&M University as an undergraduate degree-seeking student).	Spring 2026	Aug 1, 2025	Oct 15, 2025
	Summer/Fall 2026	Jan 1, 2026	Mar 1, 2026
Readmission			

An applicant who: • is a former degree-seeking Texas A&M undergraduate student (including an international student) • does not have a bachelor's degree	Spring 2026	Aug 1, 2025	Jan 1, 2026
	Summer 2026	Jan 1, 2026	May 1, 2026
	Fall 2026	Jan 1, 2026	Jul 31, 2026
• did not officially register for the previous semester (excluding summer sessions) at Texas A&M Readmission does not include applicants whose only previous enrollment at Texas A&M has been as a non-degree student.			

Postbaccalaureate Undergraduate

An applicant who: • has a bachelor's degree	Spring 2026	Aug 1, 2025	Dec 1, 2025
	Summer 2026	Jan 1, 2026	May 1, 2026
• wishes to pursue a second undergraduate degree	Fall 2026	Jan 1, 2026	Jul 1, 2026

Non-degree Undergraduate

An applicant who: • does not wish to pursue a degree at Texas A&M • wishes to take specific undergraduate coursework	Summer 2026	Jan 1, 2026	May 1, 2026

Required Immunizations

- Texas Education Code (TEC) 51.9192 requires all entering students (under the age of 22) to provide evidence of vaccination against bacterial meningitis received within the last 5 years or a signed affidavit declining the vaccine at least 10 days prior to the start of classes for any given semester. Learn more about bacterial meningitis at Admitted Students - Texas A&M

Galveston, TX (tamug.edu) (<https://www.tamug.edu/admissions/AdmittedStudents.html#Checklist>).

Guidelines for Requesting Application Fee Waivers

Fee waivers are not available for international students.

Freshman Waivers

Applicants who qualify for federally funded free/reduced lunch programs may qualify for a fee waiver. Students must certify their eligibility on the application. Please see our admissions website, Freshman Admissions - Texas A&M Galveston, TX (tamug.edu) (<https://www.tamug.edu/admissions/Prospective-Students/Freshman.html>), for additional information relating to fee waivers. *Checking the fee waiver box on the application will not satisfy the fee waiver requirement.*

Transfer or Readmit Waivers

To request a fee waiver, please provide your Student Aid Report (SAR), which you will find within your current FAFSA or a copy of an award letter from your current institution. The documents can be uploaded through the Applicant Information System (<https://applicant.tamu.edu/?s=gw>) (AIS) portal, faxed to (409) 740-4731 or provided by U.S. mail. *Checking the fee waiver box on the application will not satisfy the fee waiver requirement.*

All fee waiver request documents may be mailed to the following address:

Texas A&M University at Galveston
Office of Admissions
P.O. Box 1675
Galveston, TX 77553-1675

Credit by Examination

Information concerning credit by examination may be obtained from the Center for Academic Learning Support staff by calling (409) 741-4343. For information regarding current procedures for accepting credit, please visit the Center for Academic Learning Support - Texas A&M Galveston, TX (tamug.edu) (<https://www.tamug.edu/cals/>).

Gateway Program

The Galveston Gateway Program helps incoming students become fully prepared for their academic program. Students will be selected for the Gateway Program during initial review of their application for admission to the University; any student offered provisional admission through the Gateway Program is required to satisfactorily complete the program in order to gain full admission to the University.

Galveston Gateway students begin at TAMUG for the Summer II term and complete preparatory coursework, some of which will apply towards their major. At the conclusion of the summer term, students who have met the terms of the program will continue as full students in good standing for the fall term. Students who do not meet the terms of the program will be reviewed for possible continuation on probation or full suspension.

For additional information, contact the Center for Academic Learning Support at (409) 741-4343.

Entry to a Major – College of Engineering

Freshmen in General Engineering, Engineering at Galveston, or Engineering Academy programs have a common first year engineering curriculum to allow time for students to learn about the engineering degree granting majors. It is recognized that in most cases students are not made aware of all of our engineering majors while in high school. Students are introduced to the different engineering majors in the first

year engineering courses. Students are encouraged to leverage additional resources, including the career center, faculty, as well as advisors to get career advice. Students must complete the following courses in at least two semesters before applying to an engineering major: two engineering courses, two math courses, and two science courses in the freshman year engineering curriculum. Exceptions will be made as needed for students entering with credit for the required courses. The entry-to-a-major process is designed for students to take ownership of their future to identify at least three majors that are a good match for their career goals and academic performance. The entry-to-a-major process is designed to place students in the highest rank major possible based upon capacity and student performance. Students are encouraged to enter a major as early as possible. Students in the General Engineering and Engineering at Galveston programs must be in a major by the end of their third semester in engineering. Students in the Engineering Academy program must be in a major by the end of their fourth semester in engineering.

Transfer students are admitted directly to a degree granting major through the admissions process.

Tuition and Fees

Tuition and Fees for Texas A&M University at Galveston

Payment of Tuition and Fees

Students must meet all financial obligations to the University by their due dates to avoid late penalties, regardless of timing of payment assistance (scholarships, loans, tuition assistance, etc.). Failure to pay amounts owed may result in blocked access to online course material, cancellation of the student's registration, and their being barred from future enrollment. Students who wish to pay fees in installments can select the payment plan option in the bill payment suite (<https://billpay.tamu.edu>).

- Payments to Student Business Services may be in the form of cashier's check, personal check, or money order payable to Texas A&M University at Galveston (or TAMUG). All checks and money orders are accepted subject to final payment. Cash is not accepted at the Cashier's booth.
- Visa, Discover, Mastercard and American Express credit cards and E-checks are accepted for tuition and fee payments over the website via the Howdy Portal/ My Finance Tab. Convenience fees will be charged for online credit card transactions.

No tuition and fee statements will be mailed. Notices of amounts owed should be obtained through the Howdy Portal/ My Finance Tab.

Students may choose to pay tuition and fees in installments. Students on the installment plan will receive notification through their University email account that the fee statement is available to view on line and when each installment payment is due and payable. In addition, students will be notified through this medium when any changes have occurred to their tuition and fee statement and if and when they have a refund available. All financial aid or loans must be accepted before being applied toward the student's account.

Late Payment Penalty

There are severe penalties for failure to pay student account balances and installments by their specified due dates. If a payment is delinquent when a semester ends, the student will be blocked and may not receive

credit for academic work performed. Students will not be readmitted to the University until all past due balances, including late charges, are paid. A late fee will be assessed for each payment not received on or before it is due. If a student is removed from the rolls of the University or is withdrawn or blocked for failure to pay amounts owed the University, a reinstatement fee of \$200 will be assessed in addition to any other late fees or penalties already incurred and must be paid before the student will be reinstated. Current due dates can be found at the Student Business Services website, <https://sbs.tamu.edu>.

Late Registration Fees

Students who register on or after the first day of classes are assessed a late registration fee of \$100. Students who register after the official census date (12th class day for fall and spring, 4th day for summer) are assessed a late registration fee of \$200. Students who add classes after the official census date are assessed a late fee of \$50. Note: Penalties, late registration and late add fees also apply to students who are required to re-enroll because their registrations were cancelled for nonpayment.

Registrations are subject to cancellation and/or financial penalties if sufficient payment is not received before 5:00p.m. on the semester due date.

Use of Collection agencies and Credit Bureau

If amounts become past due, the University reserves the right to report the account to the Credit Bureau. This will also initiate internal collection efforts and could cause the University to employ an outside collection agency to collect the debt. If any collection efforts must be made, the student will be required to reimburse the University for the fees of any collection agency, which may be based on a percentage at a maximum of 30% of the debt, and all costs and expenses, including reasonable attorney's fees the University incurs in such collection efforts.

Cancelling Registration

Once students have registered for classes, they must select one course of action from the following to remain in good standing with the University:

- pay all amounts due by the specified due date.
- use online registration to drop all classes prior to the first day of classes.
- initiate the withdrawal process online in Howdy to begin the process to withdraw from the University after the first day of classes.

Following this procedure is especially important for students who have been awarded scholarships or financial aid since the aid may automatically pay tuition and fees and cause the registration to be held even though the student has decided not to attend. Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be required to reimburse the University for scholarships and other financial aid applied to their account and will be held responsible for paying all fees for the semester, regardless of whether they attended classes.

Cancellation for Nonpayment of Tuition and Fees

The University reserves the right to cancel registrations not paid by their due date, or the official census date for a semester or summer term, to comply with state laws requiring payment of tuition and fees, to free the classroom spaces for other students, and to ensure the most efficient use of university resources.

One Time Only Fees

Housing Application (not refundable)	\$ 75.00
Freshman New Student Conference Fee (not refundable)	\$ 225.00
New Transfer Student Conference Fee (not refundable)	\$ 153.00
General Property Deposit (refundable)	\$ 100.00

Housing and Meal Plans

With limited exception, all undergraduate students enrolled in more than nine credit hours are required to reside in campus housing (if available), unless residing in Albatross or Polaris Halls, and are required to purchase a meal plan. Information concerning a request to live off-campus can be obtained at <https://www.tamug.edu/cll/PoliciesProcedures.html>. Any student living off campus at the beginning of the semester who adds enough hours to require living on campus must pay for room and board for the entire semester. Residence hall fees are included in the fee schedules at <https://www.tamug.edu/cll/HousingOptions.html#Pricing>. In certain cases, single room housing is offered. The fee for that room is the normal rate plus 50%.

Upon admission to the University, students who will be living on campus must submit a \$75 housing application fee to reserve their spot in the residence halls. A waiver for the housing application may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a FAFSA submitted to TAMUG. The waiver request can be emailed to c1l@tamug.edu or mailed to TAMUG Campus Living and Learning, P.O. Box 1675, Galveston, TX, 77553-1675.

Students requesting to downgrade their meal plans during the semester have until the Census Date (identified on the academic calendar) to make any changes and the cost of those changes will adhere to the University's refund schedule. Downgrades can only be made if the student is not already on the minimum required plan. In order to add or upgrade a meal plan, please do so by 7 weeks from the start of the semester. All changes must be made through the Dining Services Office at (409) 740-4508.

Meal Plan Fees: <https://mealplans.tamu.edu/> (<https://mealplans.tamu.edu/>)

Tuition and Fees: Texas Resident and Non-Texas Resident (Both undergraduate and graduate)

Tuition and fees can be found at <https://tuition.tamu.edu/galveston> (<https://tuition.tamu.edu/galveston/>). The student will need to know their chosen tuition plan for determination of tuition and fees.

Tuition and Fees: Texas A&M Maritime Academy Cadets

Cadets enrolled in MARB LO, MARS LO, MART, or MARR LO curricula pay a special tuition rate regardless of their state residency status (in-state or out-of-state). For more information regarding the License Option program, please visit <https://www.tamug.edu/corps/pages/Prospective-Cadets/prospective-cadets.html>.

Tuition and fees can be found at <http://tuition.tamu.edu/galveston/> (<https://tuition.tamu.edu/galveston/>). The Cadet's cohort will determine the applicable Tuition and Fees. NROTC Midshipmen, Drill

and Ceremonies Cadets, or International Cadets are not eligible for this special License Option tuition and must pay normal Texas Resident or Non-Resident as applicable.

Summer Sea Term

Cadets in the License Option Program must achieve the minimum sea service aboard ships required by the U.S. Coast Guard within four (4) years. In order to obtain federal financial aid, students must enroll in a minimum of six semester credit hours during the summer term. Cadets may meet this requirement by completing two additional semester credit hours by distance or by completing an additional course on campus. Either of these options will result in additional tuition expenses.

The Summer Sea Term expense for training aboard the Texas A&M Maritime Academy assigned training ship or a designated alternate ship includes tuition and fees plus a sea term (cruise) fee. There could be additional travel expenses to and from the ports plus lodging in addition to the cost of the sea term. The Summer Sea Term meal plan expense includes state and city tax of 8.25%. Final costs are shared with cadets during the preceding Spring Semester.

Other Expenses

This may include uniforms with an initial outlay of \$1,500, special training such as Fire Fighting School and incidentals.

Students who are dismissed or withdraw from a license-option degree plan after the semester begins will have fees adjusted to the appropriate resident or nonresident rate retroactive to the beginning of the semester.

License-option Cadets who are granted a leave of absence for the summer and who enroll in the onshore summer program at the Mitchell Campus instead of the summer sea term will pay license-option fees as appropriate for that period.

License-option Cadets must complete all required sea service within four (4) years.

Emergency Tuition and Fee Loans

Emergency tuition and fee loans are available to help students get through the crunch at fee payment time. Students can borrow up to the amount of their tuition and fees for a maximum term of 90 days in the Fall and Spring semester and 30 days in the Summer semester. The loan proceeds are applied directly to the student's account to cover current due charges. Students that anticipate their financial aid or some other third-party payment may be delayed are encouraged to pursue an emergency tuition and fees loan so they will not get dropped from their classes or incur additional fees. Students may apply for this loan in the Howdy Portal/ My Finances Tab.

Short-term loans are also available to pay optional fees, such as residence hall fees, meal plans, parking, etc. They can be repaid within 12 months. To qualify you must be registered for 6 hours in the fall or spring semester and 3 hours in the summer term and be clear of all past due loans and blocks.

Returned Payments

Any payment that is rejected by the paying bank, credit card company, or other financial institution is subject to returned item charges of \$30 or more. Rejected payments may also result in cancellation of the student's registration and additional late registration penalties.

Fees

Please note that not all fees listed below are relevant to all students.

Application Fee

Students who submit an application for undergraduate studies pay a \$75 fee. Students who submit an application for graduate studies pay a \$50 fee. International students pay a \$90 application fee

Distance Education Fee

\$46 per semester credit hour is assessed to students taking courses using distance education resources.

Field Trip Fees

A field trip fee ranging from \$15 to \$6,000 may be charged for courses that include field trips.

Diploma/Graduation Fee

A non-refundable fee of \$47.50 per degree sought is assessed the semester a student applies for graduation. This must be paid within the first 15 class days of the student's final semester. Late payment of the Graduation Fee will result in a \$50 late charge.

International Student Service Fee

International students who are not sponsored are assessed an \$85 fee each semester to defray administrative support costs.

Independent Study Abroad Fee

In the event that a student is planning to Study Abroad, this fee of \$100 is to cover services provided by the TAMU Education Abroad Office.

International Student Health Insurance

International students (students who are not U.S. Citizens or Lawful Permanent Residents of the United States) enrolled at Texas A&M are required to have health insurance. International students will be automatically enrolled in and charged for the System Student Health Insurance Plan (SSHIP) unless they apply for and are granted a waiver. Individually purchased plans from vendors other than the Texas A&M University System provider will not be eligible for a waiver of automatic enrollment in the SSHIP. This is to ensure that medical treatment will be available in the event of injury or illness during enrollment at the University. International students can receive more detailed information about this requirement by visiting <https://admissions.tamu.edu/resources/future-students/international-students/> (<https://admissions.tamu.edu/resources/future-students/international-students/>). Specific questions may be directed to International Student Services by emailing ISSS@tamu.edu.

General Property Deposit

A deposit of \$100 is required of every student to ensure the institution against losses, damages, and breakage for which the student is responsible, or to be used to offset in part amounts owed by the student to the institution. General deposits are returned to students, less any such amounts owed to the institution, within a reasonable period after the date of the student's graduation from the institution, not to exceed 180 days. The deposit retention period provides the University sufficient time to identify all amounts owed and to determine if the student intends to enroll in the semester or summer session immediately following the student's withdrawal or graduation or, if the student withdraws or graduates in the spring semester, in the next fall semester. If a student leaves the University without graduating or officially withdrawing,

they must submit a written request to Student Business Services to receive a refund of their deposit. Deposits for students that do not graduate, withdraw or otherwise request a refund remain on file for four years. Those deposits are forfeited to the University's General Deposit Scholarship Fund, after deducting any amounts owed the University.

Health Services Fee

This fee is required of all students enrolled in Galveston-based classes. This fee will finance health services provided by a local clinic in Galveston, and medical services on the summer training cruise.

Housing Application Fee

An application fee of \$75 is required as part of a completed housing application. Exact stipulations and details regarding the use and return of that deposit are listed within the contract signed with the application. A waiver for the housing application fee may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a current FAFSA on file with Financial Aid. The waiver request can be emailed to cll@tamug.edu or mailed to Campus Living and Learning, P.O. Box 1675, Galveston, TX, 77553-1675.

Identification Card Maintenance Fee

All students must have an identification card. This card is used in registration procedures, collection of fees, for dining hall privileges, etc. If the card is lost or stolen, a reissuing fee will apply.

Payment Plan Fee

A student who chooses to pay using the installment plan pays an installment payment service charge. This charge is non-refundable. You may add the installment plan by selecting the installment option through the online registration system at <https://howdy.tamu.edu> (<https://howdy.tamu.edu/>).

Laboratory Fees

A laboratory fee ranging from \$8 to \$30 is charged for each laboratory course each semester.

MMAL (Master of Maritime Administration and Logistics) and MMRM (Master of Marine Resources Management) Program Fee

This fee is required of all graduate students enrolled in the MMAL and MMRM program and assessed at \$750.00 for instate residents and \$1500 for non-residential per semester. The MMAL and MMRM program fee will be utilized to provide program administration and departmental operating costs in order to sustain a quality graduate program, as well as to provide for innovative growth.

Mail Service Fee

Limited availability exists for students residing in non-university owned or operated housing to rent a campus mailbox. The fee is \$20 per semester and \$20 per ten-week summer term. Inquiries should be directed to the Bookstore (409-740-4488). Students have mail services included as part of the University's room charge if they are residing in university owned housing.

Cadet Drug Test Fee

The Cadet Drug Test Fee is \$30 per semester and is required for all License-Option Cadets.

New Student Conference Fee - Graduate

The Graduate New Student Conference fee is required of all new graduate students enrolling in the fall or spring semesters and selected summer terms at the rate of \$50 per student. This fee supports the provision of advanced materials to accepted students and the activities and food during the orientation.

New Student Conference Fee - Undergraduate

The New Student Conference fee is required of all new freshmen students at the rate of \$225. New transfer students enrolling in fall or spring semesters and selected summer terms will be charged \$153 per student. This fee supports the provision of advanced materials to accepted students, the presentation of new student conferences (including some meals) and student activities.

Parking Permit

All students parking an automobile or motorcycle on the campus pay a fee of \$250 for the academic year (Fall, Spring, Summer). By request, prorated refunds can be issued for terms not used. Parking rates are subject to change each fiscal year.

Recreational Sports Fee

This mandatory fee will provide building maintenance and programming support for recreational sports facilities.

Student Center Complex Fee

The mandatory Student Center Complex Fee is required for all students. This fee will be used for the operation, maintenance, programming improvement and purchase of equipment for the student center complex and for the acquisition and construction of additions to the complex.

Supplementary Fee for Courses Attempted More than Twice

Certain courses that are attempted by a student more than twice at a public institution of higher education in Texas may not be reported for state funding. As a result, the institution must either pass the non-funded portion to all students, or charge a supplementary fee to the student who is repeating the course. Texas A&M has chosen to assess a supplementary fee to those students repeating a course more than twice. A student attempting certain courses more than twice at Texas A&M University will be subject to a supplementary fee of \$125 per semester credit hour (\$375 for a 3 hour course) for the repeated course, in addition to tuition and required fees associated with the course. The general criteria for determining which courses are subject to the supplementary fee are:

- A course is subject to the fee if a student has completed it twice at Texas A&M University with a grade of A, B, C, D, F, F* (academic dishonesty), S (satisfactory), U (unsatisfactory), I (incomplete), Q or W (authorized drop after the add/drop period), X (no grade submitted), or NG (administrative no grade).
- Courses identified by the University as repeatable for credit are not subject to the fee. The Three Peat Exclusion attribute is displayed under course attributes in the Schedule of Classes for each course identified as repeatable for credit.

Students will be notified at the time they register for a course that it has been taken twice at Texas A&M University and is subject to the supplementary fee.

Testing Administrative Fee

A \$50 per test fee will be used to pay for personnel to proctor credit-by-exams and TSI tests and to pay shipping costs to send tests to testing centers.

Texas A&M Maritime Academy Orientation Week Fee

The Texas A&M Maritime Academy Orientation Week (O-Week) Fee is \$43 and covers equipment and supplies needed during the Corps of Cadets O-Week. Meals for O-Week are a separate charge and will be added to the semester bill following O-Week.

University Advancement Fee

The variable University Advancement Fee is a required fee charged to all Texas A&M University students. The Advancement fee funds services such as advising, technology, library, and administrative services such as ID services, utilities, access to discounted software, and many services provided through Student Services.

University Authorized Tuition

This variable fee is assessed to compensate for occupancy, services, use, and/or availability of all or any of the property, buildings, structures, activities, operations, and other facilities of the campus.

Other Expenses

Textbooks and Supplies: The cost of textbooks and supplies will vary with the quality of items purchased and with the course of study pursued.

License Option Cadet Expenses: License-option Cadets must purchase uniforms with initial outfitting estimated at \$1,500. Other items such as caps, belt buckles, and name tags may be required to be purchased from the TAMUG Bookstore.

A Sports Pass which will allow a student to attend Texas A&M University home games may also be purchased at registration. Refunds are not allowed for individual games or games missed.

The University operates a bookstore that supplies textbooks, stationery, drawing instruments, toiletries, and other supplies. All merchandise is sold at retail prices prevailing in the area. Major credit cards are accepted in the bookstore.

Student Fiscal Appeals

If a student finds themselves in an issue related to the application of University Student Fiscal Policy, such as excess hours, please access the information under Student Forms at <https://sbs.tamu.edu/sbs-galveston/index.html> (<https://sbs.tamu.edu/sbs-galveston/>) for an explanation of the Student Fiscal Appeal Process and an application for appeal.

Scholarships

For entering students, including freshman, transfer, and domestic graduate students, all scholarships are awarded based on information from the ApplyTexas application for admissions, including information collected in the Scholarship section of the application. If any awards require additional information, those students that are deemed qualified based on the ApplyTexas will be notified. The priority deadline for incoming student scholarships is December 1st. The final deadline for the Freshman Terry Scholarship is January 24th. The deadline for the Levy Fellowship is January 1st.

For continuing students, the University Scholarship Application (<https://uwide.tamu.edu/>) is used for awarding institutional scholarships. In

order to receive a scholarship from Texas A&M University at Galveston for the upcoming school year, a student must complete the University Scholarship Application online by February 1st. Award recipients are primarily selected by a committee of faculty and staff from across the university who utilize this application and any other necessary supplemental information. In some cases, the selection is made directly by the donor of the scholarship funds

To view scholarships available, visit <https://www.tamug.edu/scholarships/index.html> (<https://www.tamug.edu/scholarships/>). For additional information, contact the Scholarship Office at scholarships@tamug.edu or 409-740-4500.

Tuition Insurance

Texas A&M University has teamed up with GradGuard™ (<https://gradguard.com/tuition/tamug/>) to offer optional tuition insurance to Aggie students and families. This protection strengthens our existing refund policy (<https://sbs.tamug.edu/billing-payments/withdrawing/>) and can provide reimbursement for tuition, housing, and other fees if a student withdraws for a covered medical reason at any time during the covered semester.

Maritime Academy

Texas A&M Maritime Academy

The Texas A&M Maritime Academy (TAMMA), formed in 1962, is a specialized, maritime education and training program within Texas A&M University at Galveston (TAMUG) where Academy Cadets complete a rigorous academic program with a regimented lifestyle. The Maritime Academy educates and trains professional U.S. Coast Guard-credentialed mariners, Navy Reserve Officer Training Corps (ROTC), as well as Drill and Ceremony cadets who carry on the maritime and military traditions of our campus while they pursue other career goals serving the needs of the State, the Nation and the global marketplace.

Admission to the Texas A&M Maritime Academy

Applicants to the Texas A&M Maritime Academy (TAMMA) must apply to the university and to TAMMA. Admission to the TAMU Galveston Campus does not guarantee admission to the TAMMA. In addition to the common application, ([Applytexas.org](http://applytexas.org)) prospective students must submit

an application to the TAMMA to one of the three programs embedded into the Corps of Cadets. Each individual programs has additional admissions requirements. Refer to the License Option, NROTC, and Drill and Ceremony program requirements found on the TAMMA website [3].

Due to program and professional requirements established in Federal law (*46 CFR Part 310*) by the U.S. Coast Guard (USCG) and the Maritime Administration (MARAD), the application for admission to TAMMA requires additional application elements detailed below.

- Evidence of the ability to meet the most current medical and physical standards established by USCG regulations. Applicants must apply to the USCG for a medical certificate. The medical and physical evaluation process includes a vision test, hearing test, general medical exam, and demonstration of physical ability [1]. License Option (LO) Cadets must demonstrate ability to meet USCG medical and physical standards within nine (9) months of enrollment. LO Cadets must continue to meet the USCG medical and physical standards throughout enrollment in an LO program. LO Cadets who fail to demonstrate ability to meet most current USCG medical and physical standards will be transferred out of the LO programs until the individual is able to meet the most current USCG medical and physical standards. Additional programs such as D&C and NROTC admission requirements can be found on the TAMMA website application page [3].
- Evidence that the Cadet or Midshipman is not a user of dangerous drugs. According to Federal regulations [2], TAMMA maintains a program for testing individuals for evidence of dangerous drug use. During O-Week, TAMMA will test entering freshmen and Cadets transferring into TAMMA for evidence of the use of dangerous drugs. In addition, TAMMA conducts random tests throughout the academic year. Any Cadet who tests positive for the use of dangerous drugs or refuses to be tested will be immediately suspended from the Corps and all LO courses and activities for a period of at least one (1) calendar year, depending upon the outcome of a Return-to-Duty process prescribed and monitored by the USCG. There is no guarantee that a Cadet who is suspended will be permitted to re-enroll in a LO program.
- A criminal background check.

Prospective Cadets may download a TAMMA application through the TAMMA website [3] for a complete detailed list of all admissions requirements.

License Option Graduation Requirements

TAMMA's Cadets may receive diplomas from Texas A&M University only after 1) successfully completing the courses of study in their academic degree plans, 2) successfully completing required sea service 3) passing a comprehensive professional examination administered by the USCG, and 4) demonstrating knowledge, understanding, and proficiency competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

The following degree plans offer a License Option:

- BS Marine Biology
- BS Marine Sciences
- BS Marine Engineering Technology
- BS Marine Transportation
- Any Graduate Program offered by TAMUG

All students enrolled in the Marine Transportation program are required to be in the LO program.

Cadets who select an LO degree plan must be motivated, honorable, and willing to experience the rigor and discipline of the regimental structure of the Corps of Cadets for the duration of their enrollment in the program.

License Option Requirements

In addition to the degree requirements contained in the Texas A&M at Galveston Students Rules and the University catalog, LO Cadets must complete the requirements to achieve a Merchant Mariner Credential (MMC)[4] issued by the USCG. The requirements for the MMC are determined by International conventions, Federal law and regulations, and policies established by the USCG and the Maritime Administration (MARAD). The requirements for an MMC are subject to change according to developments at the International Maritime Organization, Congressional action, the Federal rule-making process, and consultations between the USCG, MARAD, and the Maritime Academies.

The international convention with the most direct impact on TAMMA and the requirements for an MMC is the International Convention on Standards for Training, Certification and Watchkeeping for Seafarers (STCW Convention). The main purpose of the STCW Convention is to establish international agreement on training and education standards to promote safety of life and property at sea and the protection of the marine environment.

The STCW Convention establishes endorsements that LO Cadets must achieve in order to graduate and serve aboard commercial vessels in international trade. "Deck Cadets" must achieve the STCW international endorsement as Officer In Charge of a Navigation Watch (OICNW). "Engine Cadets" must achieve the STCW international endorsement as Officer In Charge of an Engineering Watch (OICEW).

LO Cadets must also pass each course required for the desired STCW Convention international endorsement with at least a C and demonstrate each of the required competencies contained in each course. Attendance in LO courses is mandatory.

LO Cadets, regardless of age, prior experience as a mariner, or prior military service must maintain membership in the Corps and complete all of the requirements of the LO program. The minimum period of training is three (3) years or six (6) full semesters as a full-time student. **All License Option Cadets and NROTC must participate in the Corps of Cadets until graduation.** Applicants who desire to transfer into TAMMA from other State or Federal Maritime Academies are encouraged to inquire regarding current policy and provide documentation regarding prior coursework, sea service, and conduct records from other Academies.

LO Cadets are required to attend all classes in each course required for the desired STCW Convention international endorsement. These courses are identified in the Texas A&M University Catalog. Unexcused absences are not permitted. All sea service must be achieved according to TAMMA's USCG-approved License Option programs.

Sea Service Requirements

Under Federal law all LO Cadets are required to complete 360 days of sea service. Cadets may achieve the required sea service through a combination of TAMMA-approved assignments aboard training vessels, commercial ships, military vessels, USCG-approved courses that employ simulators, watches aboard TAMMA's training vessel, and maintenance work. Cadets assigned to approved training vessels receive 1.5 days of sea service for each 1 day assigned. Cadets assigned to commercial or

government vessels receive 1 day of sea service for each 1 day assigned. All assignments must be approved by the Superintendent or delegate.

Corps of Cadets

The Corps of Cadets (Corps) focuses on leadership development and provides Cadets and Midshipmen enrolled in the Navy Reserve Officer Training Corps program (NROTC) a disciplined environment designed to prepare its members to become successful Merchant Marine or military officers.

Members of the Corps are required to attend formations, drills (including parades at College Station), stand announced and unannounced personnel and room inspections, participate in physical fitness activities, and perform other duties required by the *Corps Operations Manual* and *Sea Term manual (LO cadets)*.

TAMMA's Superintendent is responsible for TAMMA's administration and the operations of the Corps of Cadets. The Corps of Cadets includes

1) **License Option Cadets** (LO Cadets) who are studying and training to fulfill the professional requirements to become Merchant Marine Officers through TAMMA's USCG-approved training program. These Cadets enroll in TAMMA's License Option (LO) programs and must maintain membership in good standing in the Corps,

2) **Midshipmen** who meet the qualifications for acceptance into TAMUG's NROTC program. Midshipmen seek commissions in the U.S. Navy upon graduation. Midshipmen integrate fully into the Corps, and must complete all degree requirements as well as courses required by the Navy.

Students may join the NROTC program as National Four-Year Scholarship Winners or as non-subsidized college program applicants. Interested prospective Midshipmen may obtain information on the National Four-Year Scholarship program through any Navy recruiting office. The application deadline is January 15 of the year of admission. All NROTC scholarships cover the costs of tuition, fees, and uniforms. All scholarship- junior and senior-level Midshipmen receive a monthly allowance and are paid for summer training periods.

3) **Drill and Ceremony (D&C) Cadets** who desire the structure, rigor, leadership training, and camaraderie of membership in the Corps. D&C Cadets are full members of the Corps, must purchase all required uniforms, perform drills, stand formation, and participate in personal and room inspections. Drill and Ceremony cadets do not participate in summer sea term courses aboard the training ship. Each D&C Cadet will receive a certificate indicating voluntarily participation and membership in the TAMUG Corps of Cadets.

Corps members are encouraged to participate in on-campus sports, clubs and educational activities and may compete for places on the Hearn Honor Guard, the Drill Team, the Sea Aggie Band, and the Flag Color Guard.

Members of the Corps are generally required to live on campus in the state-of-the-art Texas A&M Maritime Academy Hall.

Standards of Conduct

In addition to the Texas A&M University at Galveston Student Rules and the Texas A&M University Rules the Corps operates according to rules and standards contained in the *Corps Operations Manual* and the *Cadet Instructions Manual*[5]. Among other things, these publications

establish mandatory uniform regulations, standards of dress, grooming, and discipline.

The Corps' conduct and discipline system, administered by the Commandant, is a method for assessing the aptitude and motivation of each corps member for becoming a mariner or military officer.

Corps members who violate the Corps' standards of conduct receive demerits and Cadets that consistently violate the Corps' standards of conduct may be suspended or dismissed from the Corps. Cadets enrolled in any of the LO programs must maintain membership in good standing in the Corps. LO Cadets who are dismissed or suspended from the Corps but who are permitted to remain at TAMUG may not enroll in LO courses and will be removed from the Corps housing. Cadets who are not Texas residents, will be required to pay to out-of-state tuition costs retroactively to the beginning of the term.

The Corps includes a special unit called "Victor Company". Victor Company is veterans of the U.S. Armed Services or individuals who are married and/or with dependents or over the age of 25 when first enrolled in TAMMA. The Victor Company Cadet Commander reports directly to the Commandant and Victor Company members follow all Corps regulations including watches and practical training aboard TAMMA's training vessel. Cadets in Victor Company are permitted to live off campus.

The Corps also includes International Cadets. With approval, international Cadets may pursue the LO education and training required to become Merchant Marine Officers and earn a degree from Texas A&M University. However, International Cadets are subject to U. S. immigration laws and may not take the USCG license exams. Instead, international Cadets receive a certificate of completion of their respective degree plans.

TAMMA will provide each Cadet accepted into the Corps a list of required uniform items along with procedures for purchasing uniforms. Entering Cadets should order uniforms as soon as they learn they have been accepted into the Corps.

TAMMA will issue uniforms during Orientation Week prior to the start of the Fall Semester.

Orientation Week

Prior to the beginning of the Fall semester, all freshman and transfer students entering TAMMA, NROTC, or D&C must attend Orientation Week (O-Week).

Under the guidance of the Commandant, members of the Corps of Cadets' leadership team plan and execute O-Week to introduce each new member to the Corps' routines and traditions. Cadets also learn military bearing and customs, basic seamanship, engineering, and nautical science skills. O-Week training includes, military formations, marching to class and meals, team-building exercises, hands-on seamanship training, and other training to enable new members to hit the decks running when the entire Corps returns from training sea terms and/or assignments at sea.

Student Incentive Program (SIP)

LO Cadets may qualify for financial support through MARAD's Student Incentive Program (SIP).[6] LO Cadets who receive financial support through SIP participate in the Navy Strategic Sealift Midshipman program (SSO) program and receive a commission as Ensign, USNR upon graduation and may apply for active duty service with the Navy following graduation.

In order to qualify for the financial support under SIP, LO Cadets must:

1. Pass a Navy physical examination and maintain Navy medical standards,
2. Pass semi-annual Navy Physical Readiness Tests,
3. Maintain a minimum GPA of 2.5 (4.0 system),
4. Be under the age of 27 by graduation. Waivers are available for prior service students.

Upon graduation, LO Cadets who accept financial support through SIP, must:

1. Complete the course of instruction at TAMMA,
2. Within three (3) months of completion of the TAMMA course of study, achieve a merchant mariner license with appropriate national and international endorsements for service aboard vessels in domestic and international voyages with unlimited endorsements,
3. For at least six (6) years maintain a valid 1) merchant mariner license with appropriate national and international endorsements for service aboard vessels in domestic and international voyages with unlimited endorsements, 2) transportation worker identification credential, and 3) USCG medical certificate.
4. Apply for and accept, if tendered, an appointment as a commissioned officer in the Navy Reserve including the Strategic Sealift Officer Program, the USCG Reserve, or any other reserve component of the Armed Forces of the United States for at least eight (8) years.
5. Serve the foreign and domestic commerce and the national defense for at least three (3) years after graduation.

LO Cadets with interest in the SIP are encouraged to speak with TAMMA and NROTC staff about the details of applying and the obligations following graduation.

Additional LO Requirements

In addition to minimum requirements associated with courses within USCG-approved program of study and training for international STCW Endorsements, Cadets are required to obtain several training endorsements required by the USCG. Some of these include, but are not limited to Basic Safety Training, Basic and Advanced Firefighting, Radar and Automated Radar Plotting Aids, Global Marine Distress System (GMDSS), and Bridge Resource Management.

LO Cadets are also required to apply for and maintain a valid Transportation Workers Identification Credential (TWIC), and a current Passport. TAMMA will assist each Cadet in obtaining the required endorsements and documents. **However, it is each Cadet's responsibility to maintain a current portfolio of all required documentation.** A complete list of these requirements and costs will be available during New Student Conferences.

[1] See 46 CFR Subpart C – Medical Certification. The USCG's Application for Merchant Mariner Medical Certificate may be accessed at: <https://www.tamug.edu/corps/pages/About/Application-Maritime.html>

[2] See 46 CFR Part 16 and 49 CFR Part 40

[3] <http://www.tamug.edu/corps/apply.html>

[4] 46 CFR §10.107(b) defines *Merchant Mariner Credential* as combining the individual merchant mariner's document, license, and the STCW

endorsement into a single mariners qualification document, certificate of identification, and certificate of service.

[5] <https://www.tamug.edu/corps/pages/About/Application-Maritime.html>

[6] Cadets enrolled in TAMMA's License Option (LO) program may apply for Student Incentive Payments (SIP) provided by the Department of Transportation's Maritime Administration. Title 46 USC 51509-51511 describes the details of the SIP. Cadets are encouraged to seek guidance from TAMMA staff regarding SIP.

Services

Services for Texas A&M University at Galveston Students

Campus Dining

Dining information listed below is based on information available at time of printing and is subject to change.

With the exception of students residing in Albatross or Polaris Halls, students residing in campus housing must select a minimum meal plan. All Dining Plans are loaded onto the Student ID card to make access and use easy. Fees for the selected meal plan will be added to your Texas A&M University student account, and are separate from housing fees.

On campus dining plans, generally, are either a declining balance only plan (known as Dining Dollars), or an All Access plan that allows unlimited access into Captain's Landing (dining hall located in the student center) with a limited number of Dining Dollars.

The All Access plans allow students unlimited access into Captain's Landing during open hours (must wait 30 minutes between entries) by presenting their student ID card to the staff member at entry. "Dining Dollars" are declining balance dollars that can be spent like cash or a debit card, and are accepted at all dining locations. Each purchase is automatically deducted from the account.

Meal plans may also be used at any dining location in College Station.

Dining Dollars are only accepted on campus, assuring parents and guardians that this money is spent only on food, beverages and convenience items.

Applicable sales tax will be added at checkout.

Students wanting to downgrade their meal plans during the semester have until the Census Date (identified on the academic calendar (<https://registrar.tamu.edu/academic-calendar/>)) to make these changes and the cost of the changes will adhere to the University's refund schedule. Downgrades can only be made if the student is not already on the minimum required plan. In order to add or upgrade a meal plan, please do so by 7 weeks from the start of the semester. Any plan purchases or additions made after the seventh week of class cannot be charged to the student's account and must be paid via credit card. All changes must be made through the Dining Services Office at (409) 740-4508.

Meal Plan Pricing: <https://dineoncampus.com/tamug> (<https://dineoncampus.com/tamug/>)

Campus Recreation

The Campus Recreation Department commits to Aggies learning for a lifetime by providing programs promoting wellness of mind, body, and

spirit while developing marketable skills which enrich the education of our students and the campus community.

The Campus Recreation Department features six programmatic areas: Intramural Sports, Club Sports, Outdoor Program, Aquatics, Fitness, and Wellness.

The Intramural Sports program offers the campus community the opportunity to compete in a variety of open and/or co-rec leagues or tournaments. Intramural sports are open to all currently enrolled students as well as TAMUG faculty and staff. There are no registration fees charged for participation. Instructions on how to sign-up for an intramural sport can be found within the Intramural Sports page.

The Club Sports program provides students with the chance to focus on a particular sport or recreational activity, and compete against other universities.

The Outdoor Program provides students, faculty, and staff the opportunity to participate in outdoor pursuits such as surfing, camping, stand-up paddleboarding, and kayaking through the Outdoor Rental Center and the Boulderling Wall in the Campus Recreation Center. The Outdoor Program also manages the campus challenge course, which helps with group team building and communication skills.

Additionally, the Campus Recreation Department oversees aquatic facility operations at the campus outdoor pool including open swim hours, hiring of lifeguards, and facility rentals.

The Fitness program allows students, faculty, and staff the chance to participate in group exercise classes and small group functional training classes.

The Student Wellness program creates educational opportunities for students around the eight dimensions of the wellness wheel—Spiritual, Physical, Intellectual, Emotional, Environmental, Social, Financial, and Occupational.

Career Services

Career Services can offer a variety of services for students in every stage of the career planning process, from your freshman year through graduation. These services include:

- Web based job and internship postings
- Resume and cover letter assistance
- Interview preparation and mock interviews
- On-campus interviews and employer presentations
- Specialized workshops for employment research, job and graduate school searches.
- Job search and networking tips
- Email distribution list for job and internship postings.
- Career counseling
- Two annual career fairs, one in Fall and another in the Spring

Center for Academic Learning Support

The Center for Academic Learning Support (CALs) strives to increase awareness of campus resources, foster community formation and student belonging, develop skills to build and reach personal and academic goals, and build major commitment and marketable skills. We support high impact learning opportunities by integrating students' holistic academic careers into a purposeful academic journey. Vital aspects of this effort include fostering development through academic

communities, coaching navigation skills and learning behaviors for an ever-evolving learning environment, and providing individualized student solutions.

Specific CALS programs include Academic Advising, Academic Coaching, Course Support, Guided Group Study, the FIRST Program, and Hullabaloo U. For additional information, please visit the Center for Academic Learning Support website (<https://www.tamug.edu/cals/>).

Counseling Services

The Office of Student Counseling provides services to undergraduate and graduate students at Texas A&M University at Galveston. The Office is staffed by licensed counselors and the services rendered to students are free, voluntary, and confidential. The Office staff is dedicated to assisting students in their pursuit of personal and academic growth, to helping students gain a better understanding and appreciation of themselves, and to supporting students as they make important decisions about their lives.

What is counseling?

Counseling, most simply stated, is an interaction between a person who is struggling in some way and in need of help, and another person who is trained in helping people find solutions for their struggles. The reasons for coming are many, and the counseling strategies employed also vary from counselor to counselor. The one constant is that the counselor focuses all energies on trying to help the student. It doesn't always work, but our student evaluation forms suggest that most students who seek counseling believe that it has been helpful to them. And, if you feel uncertain about whether counseling is for you, we encourage you to make an initial appointment and discuss any reservations you might have with one of our counselors. There is no obligation to continue.

Course Support

Course Support sessions aim to provide students with deeper understanding, extra practice at applied theory, and intellectual skill building. Peer Consultants guide learning in foundational courses such as Chemistry, Math, and Physics, as well as discipline-specific courses including Accounting, Economics, Engineering, Marine Transportation, and Statistics. Course Consultants are successful students who made a high grade in the course and are endorsed by faculty; they facilitate sessions in one-on-one and small group settings guiding students through homework problems and difficult course concepts using example problems. Groups of five to seven students work together in small blocks of time throughout the week.

www.tamug.edu/tutoring (<https://www.tamug.edu/tutoring/>)

Disability Resources

<http://disability.tamu.edu>

- Collaborates with faculty, staff and students to achieve access for students with disabilities.
- Interacts with students to determine reasonable accommodations to remove barriers.
- Facilitates accommodations including (but not limited to): exam accommodations, sign language interpreting and transcription, assistive technology, and classroom accommodations.
- Consults with all campus entities on providing access for disabled students.

Guided Group Study (GGS)

Supplemental Instructors design fun and collaborative study sessions based on course topics to reinforce challenging concepts and strengthen understanding. GGS support is offered for historically difficult courses usually in the first year. These guided group study sessions are taught by successful students who made a high grade in the course and are endorsed by faculty. GGS leaders partner with faculty to design active learning sessions and prepare students for exams; these sessions are taught at three times weekly for broad access to all students. Regular attendance throughout the semester helps students stay on track or get ahead, build confidence through critical thinking and problem-solving, and meet other students and form study groups.

www.tamug.edu/tutoring (<https://www.tamug.edu/tutoring/>)

Health Services

Texas A&M University at Galveston contracts health services for our enrolled undergraduate students with the University of Texas Medical Branch (UTMB) Family Medicine clinic. Under the contract, office visits to the doctor are free of charge. Medications, inoculations, x-rays, physicals, and other services provided at the clinic may be covered under students' private insurance or at the student's expense. Hospitalization and emergency room visits are full-charge at the student's expense.

Group Insurance

Since there are numerous health needs and costs which are not provided or paid for by Student Health Service, students are strongly encouraged to maintain medical insurance. A group plan is available to all students in the Texas A&M University System. Information about this program will be distributed during new student orientation and are available from the student counseling office. Additional information can be found online at <https://tamug.myahpcare.com/>. Students and parents should give careful consideration prior to dropping any current health insurance.

Emergency Medical Transport

Please note that if an ambulance or other emergency transport is called, it is the responsibility of the student to cover any cost incurred; it is not the liability of the University.

Honors Program

Texas A&M University at Galveston Honors Program believes in and promotes student success by motivating and challenging students to expand their education to a deeper, more enriched, and intellectually stimulating level.

Students in the Galveston Honors Program are encouraged to design an individualized Honors plan of study that could include independent study, research, or a thesis based on the individual student's academic, personal, and professional goals.

Honors Program Eligibility

Invitation into the Galveston Honors Program is open to:

Incoming freshmen with a minimum score of 1250 on the SAT or 28 on the ACT and in the top 10 percent of their graduating high school class, as well as National Merit Finalists, National Achievement Finalists, or National Hispanic Scholars, are automatically admitted into the Texas A&M University at Galveston Honors Program. Incoming students entering Galveston Honors may be required to participate in the Honor Experience their 1st semester (Fall) to maintain Honors status at the discretion of the Honors Program chair.

Continuing students with a cumulative Grade Point Average (GPA) of 3.5 or higher at Texas A&M University will receive an invitation to join the Honors Program at the end of each successful semester until they have reached over 90 credit hours.

A 3.5 cumulative GPA is required to remain eligible for participation in the Honors Program.

Honors Program Requirements

The following minimum requirements must be completed for students to receive an Honors designation on their official transcript:

1. A minimum of 18 Honors credit hours
2. No more than 6 Honors credit hours can come from the Texas Common Core of Curriculum or Common Body of Knowledge
3. At least 9 Honors credit hours must come from the student's major or minor requirements; this can include research, independent study, and/or internships (that are university/department sponsored)
4. Student must take 3 one credit hour Honors seminars

To make progress toward the Honors distinction, Texas A&M University at Galveston Campus students must:

1. Maintain a Texas A&M University GPA of 3.5 and a cumulative Honors GPA of at least 3.25.
2. Receive advising toward Galveston Honors distinction each semester.
3. Fulfill annual co-curricular participation and service requirements, including at least two Honors Program events each semester.

In the event an Honors student fails to meet any of these requirements, a probationary semester is granted. Continued failure to meet these requirements results in dismissal from the Honors Program.

Honors Program Core Coursework

The following three Honors Seminars are required:

GALV 101 (Connections): Exploration of connections between academic disciplines, including science and the humanities; proposes and engages with "big questions," such as what it means to be human.
 GALV 201 (Research Methods): Interdisciplinary research methods and research practices with an emphasis on writing for and presenting to different audiences.
 GALV 401 (Service Learning): Experiential learning opportunity in which students apply the objectives of the course to engage with and reflect upon meaningful community service to better understand civic responsibility.

Housing

The Office of Campus Living and Learning coordinates on-campus housing in modern student residence halls. Rooms are double and single occupancy and furnished with beds, desks, chairs, wardrobes or closets, and dressers. Students are expected to furnish pillows, blankets, shower curtains, linens, and cleaning supplies.

Students not enrolled in the Texas A&M Maritime Academy (TAMMA) are required to live on campus until the first Fall semester that they turn the age of 21 (one must be 21 *prior* to the start of the Fall term to qualify). Exceptions may be granted for special circumstances that are listed below.

Permission to live off-campus is *typically* granted if one of the following circumstances are met:

- The student is married and living with their spouse in the local Galveston area.

- The student is a single parent/guardian and their child resides with them at their local Galveston area residence.
- The student is a veteran of the U.S. Armed Forces (copy of DD-214; not active duty for training only).
- The student will live with a parent/guardian in the Galveston area. (A typed verification letter will be required)
- The student will enroll in 9 credit hours or less for the duration of the semester.
- The student has an approved medical accommodation through the Office of Disability Services.

On-campus housing is required for all Cadets enrolled in TAMMA who are under the age of 25 unless they have been granted Victor company status through the Corps of Cadets.

Any student who believes they qualify to live off campus must apply for permission to seek off-campus housing. Approximately 60 percent of the undergraduate students are housed on campus, and returning students are given priority in receiving permission to live off campus. Campus residents accepting housing in the fall semester are required to sign a Fall and Spring Semester contract and are not permitted to move off campus for the spring semester. An online application for campus housing, which is separate from the application for admission to the University, is available from the Office of Campus Living & Learning website (<https://www.tamug.edu/cll/>). Rooms are assigned in accordance with the date on which the housing application and one-time/non-refundable application fee of \$75 are received through the online housing application. Applicants for Living-Learning Communities (LLC's) are typically assigned first, with windows for students to choose their assignments through the Housing System allocated in blocks based on the date of their applications. Applications received after May 1st may be subject to assignment by Campus Living and Learning professional staff.

Upon admission to the University, students who will be living on campus must submit an application containing a housing agreement and one-time, non-refundable housing application fee to be eligible to receive a Residence Hall Assignment. A waiver for the \$75 non-refundable application fee may be submitted. To do so, the student should submit the housing application with an attached letter stating reasons for the waiver request. In order to be considered, the student must have a FAFSA submitted to TAMUG. The waiver request can be emailed to CLL@tamug.edu (reslife@tamug.edu) or mailed to TAMUG Campus Living and Learning, P.O. Box 1675, Galveston, TX, 77553-1675.

It is recommended that housing applications be submitted early. In the event that on-campus housing is not available, information concerning off-campus housing will be provided upon request. Since TAMMA Cadets are required to live on campus, Cadets will be able to pursue a license option only if campus housing is available for them.

Housing Costs

The cost of housing for each semester will vary based on the residence hall and room style a student resides in. Visit our website (<https://www.tamug.edu/cll/HousingOptions.html#Pricing>) for current costs.

International Student and Scholar Services

Student Assistance Services serves as the liaison with the International Student and Scholar Services Office at Texas A&M University in College Station. Personal counseling, financial planning, liaison with embassies and consulates, legal referrals, academic referrals, immigration matters, orientation programs, and advisement to groups, are among the services offered in collaboration with the TAMUG CARE Team, Office of Counseling

Services, Financial Aid, and International Student Services in College Station, TX.

For more information regarding International Student and Scholar Services, contact Student Assistance Services by calling (409) 740-4836.

Library

The Jack K. Williams Library hosts student-centered services and an electronic, print, and archival collection devoted to Marine and Maritime subjects in conjunction with students' courses; the Studio, a multimedia support service; the Writing Lab; course-support spaces and consultations; equipment checkout; and individual, small group, and large group study spaces. The Library supports learning with research instruction, technology and information discovery tools. The Library has access to the same electronic resources as the main campus in addition to electronic and print resources focused on the programs of the Galveston campus.

The Library promotes student success by connecting Sea Aggies with information resources in and beyond the Library. In addition, the Library helps students and faculty acquire information literacy skills and promotes inquiry and critical thinking.

Jack K. Williams Library (<http://www.tamug.edu/library/>)

Parking

Vehicles parked on the Galveston campus are required to display a valid parking permit, except for those parked in designated visitor spaces. When not purchased for the full year, the annual cost of the permit is prorated. For more information or to purchase a faculty, staff, or student permit, visit <http://www.tamug.edu/police/parking/>.

Vehicles parked in designated visitor spaces must pay for parking either by mobile app, ParkMobile, or at a kiosk located in either in Lot M200 in front of MAIN or in Lot N305 in front of the Sea Aggie Center. While designated visitor parking does not require anything to be displayed in the vehicle, the vehicle license plate is recorded as part of the transaction and is used to enforce the visitor parking rules.

Registration and Academic Status

The Texas A&M University at Galveston follows the same guidelines and definitions as the College Station campus. Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New Student Conferences serve as an opportunity for new undergraduate students to register. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of the Registrar. The schedule of classes is available online.

Scholarships & Financial Aid

We want to partner with students to pay for their college expenses. There are different options to assist with cost.

Need-based financial aid programs are designed for students who have a demonstrated financial need as defined by their financial aid application, such as the Free Application for Federal Student Aid (FAFSA). All financial aid is contingent upon students enrolling and making Satisfactory

Academic Progress (SAP), as defined by Scholarships & Financial Aid or the specific aid program.

Financial Aid

Financial aid has two forms: Gift Aid (not repayable) and Self-Help (may be repayable, such as with a loan).

Gift Aid

- Grants (Federal, State, Institutional)
- Scholarships
- Waivers

Self-Help

- Loans (Federal, State, Institutional, Alternative)
- Student Employment (Work Study, Part-time Employment, Internships, Assistantships)

There is limited gift aid available to undergraduate students. Gift aid is offered on a first-come, first-served basis based on priority dates published on the Aggie One Stop website (<https://financialaid.tamu.edu/planner-dates/>).

To apply for financial aid, students must submit a financial aid application. The Free Application for Federal Student Aid (FAFSA) becomes available on October 1 each year for the next academic year. Students are encouraged to submit their FAFSA online at the Federal Student Aid website (<https://studentaid.gov/h/apply-for-aid/fafsa/>) as soon as possible. Students who do not meet the citizenship eligibility requirements to complete the FAFSA may be eligible to submit the Texas Application for State Financial Aid (TASFA). Information on this application can be found on the Aggie One Stop Apply for Aid website (<https://aggie.tamu.edu/financial-aid/apply-for-aid/>). You must be admitted to Texas A&M University, have a FAFSA or TASFA (whichever is applicable to you) on file with Texas A&M and have submitted all other requested documents to Scholarships & Financial Aid to receive a financial aid offer.

Financial aid offers for incoming students beginning in the fall semester are made early in the preceding spring semester. Financial aid offers for incoming students beginning in the spring semester are made late in the preceding fall semester. Financial aid offers to continuing students (those who have completed at least one semester at Texas A&M) for the upcoming academic year are made after spring semester grades have been submitted. Summer financial assistance is offered to students with a FAFSA or other financial aid application on file who enroll at least half-time in summer coursework at Texas A&M.

Financial aid offers are made based on the assumption that students will enroll full-time in the fall and spring semesters. Cost of attendance and offered financial aid amounts will be adjusted if you are enrolled less than full-time at Texas A&M University or through the Texas A&M-Blinn TEAM Program, the Texas A&M Engineering Academy at Blinn-Bryan, or another approved consortium program.

Students may receive federal financial aid only for courses that count towards their program of study/degree plan. State and institutional aid are not subject to the same regulatory restrictions. Regardless of the type(s) of aid offered, the cost of attendance will be reduced for courses that are not counting towards a student's program of study, which may result in a lower amount of federal, state, and institutional aid eligibility. Financial aid offers may also be adjusted if students do not begin attendance in all courses for which they are registered.

Student questions may be sent to:

Scholarships & Financial Aid
Texas A&M University at Galveston
P. O. Box 40005
College Station, TX 77842
financialaid@tamug.edu (financialaid@tamug.edu)
FAFSA School Code 003632

Please visit the Aggie One Stop website (<https://aggie.tamu.edu/>) for the most current information on programs and any associated deadlines.

Grants

The Federal Pell Grant is available to undergraduate students who have not received a baccalaureate degree and who have demonstrated financial need as determined by the FAFSA. The Federal Pell Grant provides a foundation of financial assistance to which aid from other sources may be added.

The Federal Supplemental Educational Opportunity Grant (FSEOG) and the Texas Public Education Grant (TPEG) are offered to students based on financial need as determined by the FAFSA. These funds are offered on a first-come, first-served basis.

The Towards EXcellence, Access and Success (TEXAS) Grant is available to eligible Texas residents who have requisite levels of financial need according to the results of their financial aid application and have met the remaining program criteria, which may be reviewed on the Aggie One Stop Grants website (<https://aggie.tamu.edu/financial-aid/types-of-aid/grants/>). The TEXAS Grant is also subject to funds availability and eligibility guidelines as defined by the Texas Higher Education Coordinating Board.

Additionally, Texas A&M provides institutional grant aid to eligible students to assist with educational expenses. Student grants are subject to fund availability and may be single-year or renewable.

Federal/Texas College Work Study Programs

Federal and state programs provide part-time employment for U.S. citizens, permanent residents, and eligible non-citizens, within fund limitations, who have an established financial need and desire on-campus employment.

To qualify for the Federal/Texas College Work Study programs, a student must have submitted a financial aid application, have financial need, be eligible to work in the United States, be enrolled at least half-time, and be making Satisfactory Academic Progress.

All Work Study students are paid minimum wage or higher, work an average of 20 hours per week, and are not eligible for paid holidays, retirement, vacation, or sick leave.

Loans

The Federal Direct Loan Programs are available to students who have submitted a FAFSA. Students will be notified of their eligibility for the Direct Loan program(s) through a financial aid offer.

Students and parents seeking the Parent Loan for Undergraduate Students (PLUS) may obtain information from the Aggie One Stop Federal Direct Parent PLUS Loans website (<https://aggie.tamu.edu/financial-aid/types-of-aid/loans/federal-direct-parent-plus-loans/>). This program requires the FAFSA to be on file with Scholarships & Financial Aid.

Short-term loans are available to assist students who experience temporary financial difficulties with educationally-related expenses.

Funding for this program is provided by The Association of Former Students, the Class of 1926, and other university resources. This program is not intended to provide long-term assistance or to replace other assistance available through Scholarships & Financial Aid. Students must be degree-seeking and enrolled at least half-time to be eligible for short-term loans.

The Emergency Tuition and Required Fees loan program is available to help students pay their Texas A&M tuition and required fees. The loan is applied directly to the student's tuition and fee account.

Please refer to the Aggie One Stop website (<https://aggie.tamu.edu/>) for detailed information on all of the aforementioned programs and more.

Scholarships

Incoming Freshmen Scholarship Programs

- Achievement Scholarships are available to incoming freshmen who attended and graduated from targeted high schools in the state of Texas. Awards are based on academic achievement, leadership ability, and extracurricular participation. For priority consideration, students must complete and submit the ApplyTexas (<https://www.applytexas.org/>) scholarship application no later than December 1 of their senior year of high school.
- Scholarships are available to incoming freshmen based upon a holistic review of their application. For priority consideration, students must complete and submit the ApplyTexas (<https://www.applytexas.org/>) freshmen scholarship application no later than December 1 of their senior year of high school.

Continuing Student Scholarships

- The University Scholarship Application is available to students with at least one semester completed at Texas A&M. Awards range in value from \$500 to \$10,000 and are available to undergraduate, graduate, and professional students currently enrolled at Texas A&M. Some awards are limited to certain fields of study and to individuals who have attained a necessary academic classification, while others are unrestricted. Awards are made to outstanding students based on a combination of academic achievement, campus/community involvement, campus leadership roles, and, for some scholarships, financial need. Students are encouraged to complete the application beginning in October via the scholarships website (<https://aggie.tamu.edu/financial-aid/types-of-aid/scholarships/undergraduate-scholarships/>). The deadline for submitting applications is February 1, prior to the academic year for which the student will be awarded.

Transfer Student Scholarships

- Aggie Transfer Student scholarships are designed to recognize outstanding students who will be transferring to Texas A&M University at Galveston. Scholarships are awarded based on a combination of academic achievement, extracurricular activities, campus involvement at their current institution, leadership, major and, in some instances, financial need. These award amounts can range from \$500 to \$4,000 and the application is available to students through the ApplyTexas (<https://www.applytexas.org/>) application.

Scholarship Recipients and Non-Resident Tuition Waivers

The Non-Resident Tuition Waiver for Competitive Scholarship Recipients, authorized under Texas Education Code 54.213a, is an optional waiver that institutions can implement. An eligible non-resident student who holds a competitive scholarship of a specified minimum dollar amount for the academic year or summer term for which the student is enrolled may be eligible to pay the fees and charges required of Texas residents

without regard to the length of time the student has resided in Texas. The student must have competed with other students, including Texas residents, for the scholarship, and the scholarship must be awarded by a Texas A&M University school/college or departmental scholarship committee or university representative.

The Texas Education Code requires that all male students receiving a state waiver or exemption must provide one-time proof of Selective Service registration or a Selective Service Statement of Registration Status in order to be considered eligible. Documentation will be requested through the Financial Aid Portal in Howdy.

More information is available at the Aggie One Stop Competitive Scholarship Non-Resident Tuition Waiver webpage (<https://aggie.tamu.edu/financial-aid/types-of-aid/scholarships/competitive-scholarship-non-resident-tuition-waiver/>).

Changes in Status that Impact Financial Aid

Dropping or Q-dropping a course affects a student's enrollment status. In turn, enrollment status may impact certain funding sources as described in the below sections.

- **Enrollment Status** – A student's enrollment status continues to be adjusted throughout the semester when a student drops or Q-drops a course. The change in enrollment status may or may not have an immediate impact, depending on timing. Falling to less than half-time enrollment will impact student loan repayment. Federal financial aid can pay only for courses included in the student's degree plan. Enrolling in courses not on the degree plan may result in reduced financial aid eligibility.
- **Health Insurance** – With the implementation of the Affordable Care Act (ACA), a dependent can be covered under their parent's insurance plan until the age of 26 regardless of their enrollment status as a student.
- **Scholarships & Financial Aid** – Financial aid checks enrollment status on two occasions – when a student's aid is released to their billing account and on the 12th class day of a fall or spring semester. A student's aid amount can be adjusted if the student's enrollment status changes between the time funds are disbursed to the billing account and the 12th class day. However, after the 12th class day, enrollment status is not a factor for aid that has already disbursed, unless a student withdraws or drops all courses. Instead, any changes in enrollment status will be reviewed through financial aid's satisfactory academic progress standards for subsequent semesters and will not impact current semester aid. If aid has not been disbursed prior to the 12th class day, then enrollment status is checked on the date the aid is disbursed. In the summer semester, enrollment status is officially checked on the 4th class day of the summer session(s) in which the student is enrolled.
- **Student Loan Repayment** – Students must maintain at least half-time enrollment throughout the semester for student loans to remain in an in-school deferred status. Dropping below half-time enrollment at any time during the semester will trigger student loans to enter any applicable grace period, with repayment required after the grace period has elapsed. Changes in enrollment status from full-time to half-time have no consequence on student loans. Half-time enrollment for an undergraduate student is defined as 6 hours for the fall and spring semesters.

Student Activities

It is easy to get involved at Texas A&M University at Galveston, and there are many good reasons to do so.

As would be expected, student life at TAMUG is often centered around the ocean. Many clubs and sports often involve water, but we have numerous active student organizations including many professional organizations that cover a wide variety of interests. The only question is which organization, or organizations, are right for you?

We follow Aggie traditions such as Yell Practice, Muster, Silver Taps, SALT Camp (Sea Aggies Learning Traditions), The Big Event and the cherished Aggie Ring. Students may also get involved with the Student Government Association, the Nautilus (newspaper), or Sea Spray (literary magazine).

As you can see, there are numerous opportunities to enrich your college career by practicing the six core values of Texas A&M University: Excellence, Integrity, Leadership, Loyalty, Respect, and Selfless Service.

Student Affairs

The Division of Student Affairs, Suite 101 in the Seibel Student Services Center, is responsible for the social, moral, and intellectual development of Texas A&M University Galveston Campus students through their involvement in student organizations, leadership activities, recreational sports, and other co-curricular and extracurricular activities. Student Affairs also oversees Campus Living & Learning (Housing, Community Standards, Campus CARE Team, Camps and Conferences, CPM compliance, Healthy Relationship Programming), Student Assistance Services (Campus Pantry, the 1973 Center), Counseling and Career Services, Campus Recreation (Rec Center, Outdoor Programming, Wellness, Intramurals, and Club Sports programs), and the Office of Student Activities which advises student organizations about program planning, risk management and the function of organizations to students throughout their college career. Furthermore, Student Activities allocate funding for eligible student organizations and aid in campus wide events such as Aggie Muster, Maritime Ball, Family Weekend, Springfest and many other events. In addition to providing students an avenue to participate in several club activities, Student Affairs is also responsible for dispersing football tickets and ordering and dispersing the highly honored Aggie Ring.

The Studio

The Studio aims to support targeted communication and presentation needs for students, staff, and faculty exploring visual and audio communication mediums. Services include equipment checkout, dedicated audio room, individual and group editing stations, lightboard, green screen, interview station, presentation station, lighting, audio mixing boards, and microphones. The Studio encourages discovery of visual mediums by hosting Adobe Creative Suite software along with additional audio, video, graphic, and story boarding software. Projects are supported by Video and Speech Consultants who assist in the creation and use of media for students and faculty and development of public speaking skills.

www.tamug.edu/studio (<http://www.tamug.edu/hypermedia/>)

Undergraduate Research

Undergraduate Research at TAMUG promotes student success by providing high-impact hands-on learning experiences for students in all academic disciplines to pursue an enriched, intellectually-stimulating curriculum. The TAMUG Undergraduate Research Program brings together outstanding students and faculty to build a community of

life-long learners, nationally-recognized scholars, and world citizens. Research opportunities are open to all undergraduates and are a collaborative effort between undergraduate students, graduate students, and faculty using an inquiry-based approach to generate new knowledge.

Being involved in undergraduate research allows students to participate in a scholarly community of students with common interests, to learn more about their future professional field, and to develop a close working relationship with acclaimed faculty. Research experiences make students more competitive for scholarships, internships, jobs, international opportunities, and admission to top graduate and professional programs. Perhaps most importantly, engaging in undergraduate research allows students to experience the excitement of working collaboratively to create new knowledge, solve cutting-edge problems, work collaboratively, and communicate more effectively—life skills that are increasingly valued in our world.

Visit the Undergraduate Research Program website (<https://www.tamug.edu/undergraduateresearch/>) for more information.

Undergraduate Research Scholars

The Undergraduate Research Scholars (URS) program provides eligible undergraduate students with a graduate student experience by offering students an opportunity to participate in research, thesis writing, and presentation of their research via a 2-semester long enrollment in the URS program.

Undergraduates who participate in the Undergraduate Research Scholars (URS) program will ultimately:

- Produce a written undergraduate thesis to be published in the Undergraduate Research Scholars Capstone Collection in the Texas A&M OAKTrust Repository (<http://oaktrust.library.tamu.edu/handle/1969.1/3367/>)
- Make a public presentation
- Gain knowledge that didn't come from a classroom
- Improve their chances for acceptance into graduate or professional schools, fellowships, and grants
- Gain a better understanding of graduate school
- Network with students and faculty

To apply for the Undergraduate Research Scholars (URS) program, students must:

- Be actively involved in an independent undergraduate research project throughout both the fall and spring semesters under the mentorship of a Texas A&M faculty member
- Have completed at least 90 credit hours (senior status) of undergraduate course work (juniors are eligible to apply with a letter of recommendation from the faculty advisor)
- Have at least 12 credit hours at Texas A&M University
- Have and maintain a cumulative GPA of at least 3.0
- Be expecting to graduate May the following year or later

Undergraduate Research Scholarships

The UGR scholarships will fund undergraduates engaged in high-impact learning and research experiences under the mentorship of TAMUG faculty.

The purpose of undergraduate research scholarships is to empower and encourage all students to engage in research, as well as offer professional and leadership skills to foster their interest and aptitude

toward pursuing a graduate degree and/or professional employment upon graduation.

Undergraduate research scholarship students will receive a stipend per semester and renewal from the Fall to Spring semester will depend on successful recommendation of the faculty sponsor and demonstration of appropriate progress. Recipients are required to present project results at the TAMUG Student Research Symposium and/or other professional conferences. Selection of students will be based on meeting the eligibility criteria (faculty-mentored research), the quality of the application, and a letter of support from the Faculty Mentor.

University Police

The University Police are responsible for the protection of persons and property of Texas A&M University, and for the enforcement of the laws of the State of Texas and the rules and regulations of Texas A&M University. University police are commissioned peace officers involved in regular foot and vehicle patrol of campus, late-night security escorts, crime prevention programs for the campus community, and criminal investigations for the recovery of property and apprehension of criminals. Officers also provide regular security checks of buildings and property on campus. All members of the campus community are requested to cooperate with University police officers.

Writing Support

Students can meet with peer writing consultants in one-on-one sessions, targeted workshops for course assignments, and in group visits. By making an appointment through Navigate, students can ask questions about research and organizing/brainstorming or request a review for revision, editing, formatting, citations, and references. Services are available during any stage of the writing life-cycle and for any written or verbal project. Writing Consultants teach strategies and techniques to improve writing for academic growth, career success, and lifelong learning.

www.tamug.edu/writing/ (<http://www.tamug.edu/writing/>)

Facilities

Texas A&M University at Galveston Facilities

Classrooms, laboratories and meeting spaces are housed within 23 major buildings on the Mitchell Campus on Pelican Island. The Ocean and Coastal Studies building is the largest and best-equipped marine research facility on the Gulf of America. The Jack K. Williams Library provides access to a variety of services and collections in various formats and contains museum exhibit space, archives and special collections, group study rooms, a classroom, computer lab, collections services workspace, a media lab, writing center and tutoring spaces. The training ship provides additional classroom, meeting and training space during the school year, and an additional fleet of small boats serve as floating classrooms and research stations. Other buildings include seven residence halls, the Aggie Special Events Center (ASEC), the James McCloy Arena and the Mary Moody Northen Student Center, which includes our primary dining facility. The Texas A&M University Galveston Campus has telecommunications systems established to communicate statewide within The Texas A&M University System universities and agencies. The Galveston campus has direct access to the Texas A&M University computer network in College Station via remote job entry connect lines.

Housing applications are available from Texas A&M University Galveston Office of Campus Living and Learning website <http://www.tamug.edu/cll/> and must be completed online with the one-time application fee. Applications can be cancelled or withdrawn by calling the Campus Living and Learning office, (409) 740-4445, or emailing cll@tamug.edu.

Policies

Texas A&M University at Galveston Policies

University Statement for Individuals with Disabilities

Texas A&M University (TAMU) is committed to providing reasonable accommodations to qualified students, faculty, staff and visitors and to maintaining an accessible campus community, including making its web sites accessible and usable. Texas A&M University does not discriminate on the basis of an individual's disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in Texas A&M's programs and activities. #Texas A&M provides academic adjustments and auxiliary aides to accommodate the needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution's academic requirements.

Students with disabilities who would like to request accommodations may contact the following resources based on their campus location:

- Texas A&M University, College of Nursing, College of Dentistry, Irma Lerma Rangel College of Pharmacy-College Station, Naresh K. Vashisht College of Medicine, School of Public Health, Institute of Biosciences and Technology, EnMed Program, Bush School in Washington DC, Mays Business School – CityCentre, TAMU Engineering Academies, TAMU Higher Education Center at McAllen, and Texas A&M University at Galveston should contact Disability Resources (<https://disability.tamu.edu/>) at (979) 845-1637 or disability@tamu.edu.
- Texas A&M University School of Law should contact the Office of Student Affairs at (817) 212-4111 or law-disability@law.tamu.edu to request accommodations.
- Irma Lerma Rangel College of Pharmacy in Kingsville should contact the Disability Resource Center at Texas A&M University - Kingsville at (361) 593-3024 or drc.center@tamuk.edu to request accommodations.
- Texas A&M University College of Veterinary Medicine and Biomedical Sciences in Canyon should contact the Office of Student Accessibility at West Texas A&M University – Canyon at (806) 651-2335 or osa@wtamu.edu.
- Texas A&M University at Qatar (TAMUQ) should contact the campus psychologist, Dr. Steve Wilson +974-4423-0047 or stephen.wilson@qatar.tamu.edu.

Students with a disability who believe they have experienced discrimination may contact Jennifer Smith, Associate Vice President and Title IX Coordinator in the Office of Civil Rights and Title IX, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, civilrights@tamu.edu, or at (979) 458-8407. Students can also contact Julie Kuder, the Texas A&M ADA Coordinator, at (979) 845-8116 or ADA.Coordinator@tamu.edu. The office address is YMCA Building Ste

108, 365 Houston St. #108, College Station, TX 77843. Allegations of discrimination will be immediately forwarded to the Office of Civil Rights and Title IX for review, investigation, or resolution.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (<http://student-rules.tamu.edu/rule46/>) or TAMUG Student Rule 46, Disability Accommodations in Academic Programs (https://www.tamug.edu/studentrules/Student_Grievance_Procedures/46_Disability_Accommodations.html).

University Statement on Harassment and Discrimination

Texas A&M University is committed to providing a safe and non-discriminatory learning, living, and working environments for all members of the University community. The University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex (including pregnancy and related conditions), religion, national origin, age, disability, genetic information, and veteran status. Texas A&M University will promptly and equitably investigate and resolve all complaints of discrimination, harassment (including sexual harassment and sex-based misconduct), and related retaliation in accordance with applicable federal and state laws, University rules and standard administrative procedures.

The University's response to allegations of discrimination, harassment, and related retaliation will be 1) prompt and equitable, 2) intended to stop and prevent the recurrence of any harassment, and 3) intended to remedy discriminatory effects, as appropriate. A substantiated allegation of such conduct will result in disciplinary action, up to and including separation from the University. The University's student sanctioning guidance for substantiated allegations of discrimination on the basis of sex, including sexual harassment, sexual violence and related retaliation, can be found here: Title IX Cumulative Sanctioning Matrix. (<https://titleix.tamu.edu/wp-content/uploads/2019/03/title-ix-sanctioning-matrices.pdf>)

Students who have questions or believe they have experienced discrimination, harassment, sexual harassment/sex-based misconduct, and/or related retaliation are encouraged to contact Jennifer Smith, Associate Vice President and Title IX Coordinator, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, civilrights@tamu.edu, or at (979) 458-8167. The Office of Civil Rights & Title IX website can be found at titleix.tamu.edu (<https://titleix.tamu.edu/>).

To report incidents, request accommodations, or inquire about discrimination based on disability, you may contact Julie Kuder, ADA Coordinator, at (979) 845-8116 or ADA.Coordinator@tamu.edu. The office address is YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, or see the ADA website at <https://orec.tamu.edu/ada/>. Reported allegations of discrimination will be immediately forwarded to the Office of Civil Rights and Title IX for review, investigation, or resolution.

University Statement on Pregnancy and Related Conditions

Title IX prohibits discrimination on the basis of sex, including pregnancy and parental status in educational programs and activities. This includes harassment and discrimination against a student based on pregnancy, childbirth, false pregnancy, or recovery from any of these conditions.

The university is required to provide reasonable accommodations due to pregnancy and related conditions, including excused absences or alternative participation options when accommodations are medically necessary. Students seeking accommodations should contact Julie Kuder, Pregnancy Accommodations Coordinator, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843 or (979) 845-8116 or email address TIX.Pregnancy@tamu.edu, or Jennifer Smith, Associate Vice President and Title IX Coordinator, at the YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. For more information, go to <https://titleix.tamu.edu/>.

Students who have questions or believe they have experienced discrimination and/or harassment based on pregnancy, pregnancy related conditions, or parenting status are encouraged to contact Jennifer Smith, Associate Vice President and Title IX Coordinator, at the YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. The Office of Civil Rights & Title IX website can be found at titleix.tamu.edu (<https://titleix.tamu.edu/>).

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University. Academic integrity requires a commitment by all faculty, students, and administrators to:

- Remain constantly focused on the quality of the academic programs
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University degrees
- Demand high academic standards from all members of the Aggie community
- Actively promote academic integrity
- Confront instances of academic misconduct through engagement in the Aggie Honor System Office rules and procedures

All Texas A&M University students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

"An Aggie does not lie, cheat or steal, or tolerate those who do."

Upon accepting admission to Texas A&M University or one of its branch campuses, a student immediately assumes a commitment to uphold the Honor Code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System. A student will be required to state his/her commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the processes of the Honor System.

The Honor System Office is charged with promotion of the honor code and administration of academic misconduct cases. The Honor Council, comprised of students and faculty from colleges and offices across the University, will investigate all such infractions of the honor code and recommend appropriate sanctions. The website, <http://aggiehonor.tamu.edu>, defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific

Misconduct Regulations — 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations — Ethics in Research, Scholarship and Creative Work — 15.99.03 (<https://www.tamus.edu/legal/policy/policy-and-regulation-library/>), and Texas A&M University rules and standard administrative procedures — Responsible Conduct in Research and Scholarship — 15.99.03.M1, 15.99.03. M1.01-06 (<http://rules-saps.tamu.edu/TAMURulesAndSAPs.aspx#15>)).

Contact information for each campus can be found at the following:

- Texas A&M University website - <http://aggiehonor.tamu.edu>
- Texas A&M at Galveston website - <https://www.tamug.edu/HonorSystem/>
- Texas A&M at Qatar website - <https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system> (<https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system/>)

University Student Rules

Each student enrolled at Texas A&M University at Galveston is responsible for being fully acquainted with and complying with the Texas A&M University Student Rules. Specific rules, information and procedures may be found in publications pertaining to each particular service or department. Students are encouraged to reference the website at <http://www.tamug.edu/studentrules> (<http://www.tamug.edu/studentrules/>) for current published rules and regulations.

Fishing Rules

Texas A&M University at Galveston (TAMUG) is an institution of higher education and does not include any public fishing facilities. Due to significant safety and security concerns TAMUG only allows current students, current TAMUG employees and approved guests to fish on property owned or controlled by TAMUG. Approved guests must be accompanied by an affiliated individual, unless otherwise authorized. Fishing is only permitted on the Mitchell Campus on Pelican Island.

1. Guests of affiliated students and employees are permitted to fish as long as the TAMUG student or employee is with them. Employees and students are responsible for the conduct, compliance, safety and actions of their guests. All fishermen are expected to be courteous and respectful at all times.
2. Students and staff may have a reasonable number of guests at any one time (Campus Police will determine what is reasonable for the situation).
3. Fishermen may only deploy one or two fishing rods at a time, per fishermen. Fishing rods may not be left unattended.
4. All children must be in the immediate care of an adult. Children 12 years old and under must wear an approved USCG flotation device while on TAMUG docks, piers, and beaches, as well as when they are in or near the water. In addition to dangerous drop-offs and currents, equipment and vehicles in the vicinity of authorized fishing areas can pose a danger to unsupervised children.
5. Fishing is not permitted from the dock at any time. Fishing is allowed on the beach, between the dock and the Pelican Island Causeway, or on the fishing pier. The area around the small boat basin is not open for fishing during normal hours of operations or if port operations require it to close temporarily. Open mainly on weekends and holidays.

6. Fishing is allowed at night but may be limited or forbidden during certain times for, training, repairs and/or cruise preparation.
7. No wade fishing is allowed in the oil spill compound, the small boat basin, the Oceanography docks or any areas marked as "No Fishing". Fishing on the Teichman Road campus is strictly limited to affiliated students and employees of TAMUG.
8. All fishermen must have a valid Texas fishing license with a salt water stamp and must present it upon request.
9. No alcoholic beverages, drugs or firearms are allowed on-campus at any time. Anyone found in possession of contraband will be subject to immediate removal and/or citation or arrest.
10. All vehicle operators on-campus must obey traffic signs and directions from University Police officers or University Officials. Vehicles operated on-campus without a valid campus parking hang-tag must be registered with University Police and display a TAMUG parking pass.
11. Vehicles may be parked in campus parking areas with authorized parking permits, obtained from the Campus Police Department. Parking on the docks, the beach area or within fire lanes or any other space which is not a clearly marked parking space, is strictly prohibited. Vehicles in violation of these rules will be cited and subject to tow at the owners expense. Failure to pay parking citations (University cashiers office-SAGC) will result in revocation of fishing authorization for one year from date of violation.
12. No littering. All fishermen are responsible for any trash or debris that they may accumulate while on TAMUG property. Fish cleaning is not allowed at any time on campus property.
13. All rules will be enforced by the Campus Police Department. Anyone who fails to follow the instructions of a Campus Police Officer will be subject to revocation of campus fishing authorization, and/or citation or arrest. All unauthorized individuals will be asked to leave. All fishermen shall be considered "notified" of the rules from posted signs.
14. Texas parks and Wildlife agents frequently check fisherman on campus and notify campus officers if University rules are violated.
15. We reserve the right to investigate all containers left tied to any structure on the TAMUG water front. Anyone that suspects a container may present a problem should immediately call the officer on duty for inspection-409-740-4545. We recommend that all who leave a container in the water make sure it has their name and phone number on it, for verification. Homeland Security rules prohibit containers of any kind to be left near the ship or between the dock and the ship. These containers will be removed and discarded without notification. No ropes, strings or lines of any kind will be fastened to water lines, gas lines, electrical conduit or any other piece of infrastructure on the water front. They will be removed and discarded without notification. Any authorized staff or researcher, who finds any unauthorized containers or fastening in the normal course of their duties may remove and discard such objects without notice (report to Campus Police at time of removal).
16. The fishing pier, located in the southwest corner of campus, is small and can only accommodate a small number of fishermen at any one time. Campus Police may relieve any overload situation by whatever reasonable means are available at the time. Safety is number one.
17. No exception to these rules may be made without the approval of the TAMUG CEO or Executive Vice President or their designee.

Title IX – Sexual Discrimination, Sexual Harassment, Sexual Assault and Violence

"No person in the United States shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance..."

(20 U.S.C. Section 1681)

Notice of Nondiscrimination and Abuse

Texas A&M University at Galveston is committed to providing a safe and non-discriminatory learning, living, and working environment for all members of the University community. The University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex, religion, national origin, age, disability, genetic information, veteran status, sexual orientation, or gender identity. Texas A&M University at Galveston will promptly investigate and resolve all complaints of discrimination, harassment (including sexual harassment), and related retaliation in accordance with applicable federal and state laws.

The University's response to allegations of discrimination, harassment, and related retaliation will be 1) prompt and equitable; 2) intended to prevent the recurrence of any harassment; and 3) intended to remedy its discriminatory effects, as appropriate. A substantiated allegation of such conduct will result in disciplinary action, up to and including separation from the University. Visitors, contractors, and third parties who commit discrimination, harassment, retaliation, or complicity may have their relationships with the University terminated and/or their privileges of being on University premises withdrawn.

Reporting Responsibilities

Any employee who observes or has knowledge of discrimination, harassment, retaliation, or complicity must promptly report all known information about the incident(s) to the University's Designated Official unless they are designated as a "confidential employee" below. Pursuant to state law, the sanction for failure to report an incident of sexual harassment, sexual assault, dating violence, or stalking is termination of employment.

Students who are not employed by the University and non-affiliated members of the public are encouraged, but not required, to report incidents.

Confidential Employees

Certain University employees have been designated as Confidential Employees: licensed health care personnel and licensed counselors when acting in this capacity as part of their official employment. These employees only report de-identified statistics to the Designated Official.

Where to Report an Incident

The University has designated Jennifer Smith, Assistant Vice President and Title IX Coordinator as the official to receive all reports of discrimination, harassment, retaliation and complicity related to a protected class or status. Protected classes or statuses include: race, color, sex, gender identity, age, religion, disability, national origin, immigration status, citizenship status, sexual orientation, genetic information, or veteran status.

To file a report with the University, please contact:

Ms. Jennifer M. Smith, TAMU Assistant Vice President and Title IX Officer

Medical Sciences Library
202 Olsen, Suite 007
College Station, TX 77845
(979) 845-0977
civilrights@tamu.edu

Local Campus Contact (Allegations against Students): For making inquiries regarding allegations of discrimination by students, you may contact:

Dr. Todd Sutherland, TAMUG Associate VP of Student Affairs

Seibel Student Services Center #101G,
Galveston, TX 77554
(409) 740-4598
titleixstudents@tamug.edu

Local Campus Contact (Allegations against Employees and Third Parties): For making inquiries regarding allegations of discrimination by employees and third parties, you may contact:

Ron Sorensen '87 TAMUG Executive Director of Human Resources

Aggie Special Events Center (Building #3035) Suite #115,
Galveston, TX 77554,
(409) 740-4503
titleix@tamug.edu
r_sorensen@tamug.edu

Section 504 and ADA Coordinator

For reporting incidents, requesting accommodations, or inquiring about discrimination based on disability, Galveston Campus support goes through Counseling, Career and Ability Services at (409) 740-4736 or studentservices@tamug.edu.

- **Federal Agencies:** Inquiries or complaints about discrimination may be directed to the U.S. Equal Employment Opportunity Commission at (800) 669-4000 or to the U.S. Department of Education Office for Civil Rights at (214) 661-9600.
- **Texas A&M System Hotline (anonymous reporting option available):** The Risk, Fraud and Misconduct Hotline at (888) 501-3850 or <https://secure.ethicspoint.com/domain/media/en/gui/19681/index.html> (<https://secure.ethicspoint.com/domain/media/en/gui/19681/>)
- **Texas A&M University at Galveston CARE Team (anonymous reporting option available):** "Tell Somebody" online reporting at <https://tamug.edu/care/>.

Reporting to Law Enforcement

Anyone who has experienced or witnessed discrimination, harassment or related retaliation has the option to file a criminal complaint with the appropriate local law enforcement agency. A complainant will be assisted by campus authorities in reporting to law enforcement authorities, but a complainant may also choose to decline to notify law enforcement.

A report to law enforcement, even to the University Police Department (UPD), is separate from a report to the University. An individual pursues disciplinary remedies through the University and criminal remedies through law enforcement. Disciplinary and criminal remedies may be pursued separately or at the same time. An individual wishing to pursue disciplinary remedies and criminal remedies simultaneously should make a report to both entities.

For emergencies, call 9-1-1. For non-emergencies, contact local law enforcement:

- Texas A&M University at Galveston Police Department (409) 740-4545
- Galveston Police Department (409) 765-3702
- Galveston County Sheriff's Office (409) 766-2300

To Report Abuse or Neglect of Persons Age 65 or Older, Persons with Disabilities, or Minors

State law requires all persons having cause to believe that a child's physical or mental health or welfare has been adversely affected by abuse or neglect to *immediately* make a report (even if the belief is premised upon incomplete or dated information) to: any local or state law enforcement agency; the Department of Family and Protective Services (DFPS); the state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred; or the agency designated by the court to be responsible for the protection of children. Further, all persons having cause to believe that an individual 65 years or older or a disabled person 18 years of age or older is in the state of abuse, neglect, or exploitation are required to notify the DFPS.

To report abuse or neglect to DFPS contact: The Texas Abuse Hotline at (800) 252-5400 or https://www.dfps.texas.gov/Contact_Us/report_abuse.asp.

Amnesty for Students and Employees

When a student or employee in good faith reports or assists in the investigation of a report of an incident of sexual harassment, sexual assault, dating violence, domestic violence, or stalking, the University will not take disciplinary action against the student or employee for any violations of the University's rules or Codes of Conduct which are reasonably related to the incident reported. The University may, however, investigate to determine whether a report of an incident of sexual harassment, sexual assault, dating violence, domestic violence, or stalking was made in good faith. The amnesty will not apply to a student or employee who reports their own commission or complicity in the commission of sexual harassment, sexual assault, dating violence, domestic violence, or stalking.

Retaliation

Students, faculty and staff are prohibited from retaliating against a person for 1) making a good faith report of a violation of Texas A&M System policies, university rules, student rules, and or/the law; or 2) participating in any proceeding related to the investigation or resolution of such report. Retaliation includes threatening, intimidating, harassing, coercing or any other conduct that would discourage a reasonable person from engaging in activity protected under this policy. Retaliation may be present even where there is a decision of "unsubstantiated," "insufficient information to substantiate," "not responsible" or "not guilty" on the allegations of discrimination, harassment, or related retaliation. Retaliation does not include good faith actions lawfully pursued in response to a report of discrimination, harassment, or related retaliation. Violation of an interim, remedial, or protective measure will be considered retaliation.

False Complaints

Any person who knowingly files a false complaint of discrimination, harassment, complicity or retaliation is subject to disciplinary action, up to and including dismissal or separation from the University. A finding of

"unsubstantiated" or "insufficient information to substantiate" does not imply that a complaint was false.

Confidentiality

The confidentiality of a complaint of sexual misconduct and all documents, correspondence, and information collected during an investigation will be maintained by the University on a need-to-know basis to the extent permitted by law.

Rights, Resources, and Options

A student or an employee who is a **victim** of sexual harassment (including sexual misconduct or stalking), domestic violence, or dating violence, whether it occurred on or off-campus, has certain resources, rights and options. Information is available at TAMUG Title IX Resources, Rights, and Options for Individuals Subjected to Sexual Harassment, Sexual Misconduct, Stalking, Domestic Violence, or Dating Violence

A student or an employee who is **accused** of sexual harassment (including sexual misconduct or stalking), domestic violence, or dating violence, whether it occurred on or off-campus, has certain resources, rights and options. Information is available at TAMUG Title IX Resources, Rights, and Options for Individuals Accused of Sexual Harassment, Sexual Misconduct, Stalking, Domestic Violence, or Dating Violence

For additional information concerning federal and state policies, please reference the appendices (p. 1411) in this catalog.

College of Marine Sciences and Maritime Studies

The College of Marine Sciences and Maritime Studies is housed on the Galveston campus of Texas A&M University. The newly organized college named in 2024 defines the interdisciplinary approach to academic programs that span business, transportation, engineering, sciences, and humanities relating to the oceans and coastal environments. The college is situated in a natural laboratory with direct access to the Galveston and Houston ports and shipping lanes, estuaries, coastline, and the Gulf of America. The college serves as a critical contributor to Texas A&M's land-, sea-, and space-grant mission.

The breadth of academic programs are intertwined to study the economic, social, political and ecological vitality of our oceans, coasts, and surrounding ecosystems to improve our understanding, stewardship and sustainability of our coasts and ocean resources. We engage in scholarship and research that helps protect our coastal communities and conserve our marine life and oceans. We are discovering smart shipping and safe port solutions, and contributing to an inclusive ecosystem with improved livelihoods and future jobs.

As Texas's premier marine and maritime public institution of higher education, we serve the state and nation by providing excellence in education and training for the next generation of marine and maritime professionals.

Majors

College of Marine Sciences and Maritime Studies

- Bachelor of Science in University Studies, Oceans and One Health Concentration (p. 879)

- Bachelor of Science in University Studies, Tourism and Coastal Community Development Concentration (p. 880)

Department of Marine and Coastal Environmental Science

- Bachelor of Science in Coastal Environmental Science and Society (p. 852)
- Bachelor of Science in (p. 854)Coastal [Environmental Science and Society](#) and Master of Marine Resources Management, 5-Year Degree Program
- Bachelor of Science in Marine Sciences (p. 855)
- Bachelor of Science in Marine Sciences, License Option (p. 856)

Department of Marine Biology

- Bachelor of Science in Marine Biology (p. 859)
- Bachelor of Science in Marine Biology, License Option (p. 861)
- Bachelor of Science in Marine Fisheries (p. 862)

Department of Marine Engineering Technology

- Bachelor of Science in Marine Engineering Technology (p. 865)
- Bachelor of Science in Marine Engineering Technology, License Option (p. 866)

Department of Maritime Business Administration

- Bachelor of Science in Maritime Business Administration (p. 869)
- Bachelor of Science in Maritime Business Administration and Master of Maritime Business Administration and Logistics, 5-Year Degree Program (p. 871)

Department of Maritime Studies

- Bachelor of Arts in Maritime Studies (p. 874)

Department of Maritime Transportation

- Bachelor of Science in Marine Transportation (p. 877)

Minors

Interdisciplinary

- Entrepreneurship Minor (p. 122)

Department of Foundational Sciences

- Clinical Laboratory Sciences Minor (p. 851)

Department of Marine and Coastal Environmental Science

- Coastal Environmental Science and Society Minor (p. 858)

Department of Marine Biology

- Marine Biology Minor (p. 863)
- Marine Fisheries Minor (p. 864)

Department of Marine Engineering Technology

- Marine Electro-Technology Minor (p. 868)
- Marine Engineering Technology Minor (p. 868)

Department of Maritime Business Administration

- Maritime Business Administration Minor (p. 872)
- Maritime Cybersecurity Minor (p. 872)

Department of Maritime Studies

- Diving Technology and Methods Minor (p. 875)
- Maritime Environmental Law and Policy Minor (p. 876)

Masters

Interdisciplinary

- Master of Engineering in Ocean Engineering (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/ocean-meng/>)
- Master of Science in Ocean Engineering (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/engineering/ocean/ocean-ms/>)
- Master of Science in Oceanography (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/oceanography/ms/>)

Department of Marine and Coastal Environmental Science

- Master of Marine Resources Management in Marine Resources Management (<https://catalog.tamu.edu/graduate/galveston/marine-sciences-maritime-studies/marine-and-coastal-environmental-science/mmrms/>)

Department of Marine Biology

- Master of Science in Marine Biology (<https://catalog.tamu.edu/graduate/galveston/marine-sciences-maritime-studies/marine-biology/ms/>)

Department of Maritime Business Administration

- Master of Maritime Business Administration and Logistics in Maritime Business Administration and Logistics (<https://catalog.tamu.edu/graduate/galveston/marine-sciences-maritime-studies/maritime-business-administration/mmal/>)
- Master of Maritime Business Administration and Logistics (MBAA) and Juris Doctor (JDLW) Combined Degree Program (<https://catalog.tamu.edu/graduate/galveston/marine-sciences-maritime-studies/maritime-business-administration/mmb-jd/>)

Doctoral Interdisciplinary

- Doctor of Philosophy in Oceanography (<https://catalog.tamu.edu/graduate/colleges-schools-interdisciplinary/arts-and-sciences/oceanography/phd/>)

Department of Marine and Coastal Environmental Science

- Doctor of Philosophy in Marine and Coastal Management and Science (<https://catalog.tamu.edu/graduate/galveston/marine-sciences-maritime-studies/marine-and-coastal-environmental-science/phd-mcms/>)

Department of Marine Biology

- Doctor of Philosophy in Marine Biology (<https://catalog.tamu.edu/graduate/galveston/marine-sciences-maritime-studies/marine-biology/phd/>)

Department of Foundational Sciences

The mission of the Department of Foundational Sciences (FSCI) is to be a community of engaged faculty who offer academically excellent and pedagogically innovative classes in mathematics, chemistry, physics and statistics. We envision that all Galveston students will be challenged and successful in the high quality coursework we offer. Our faculty are proactively engaging the students with hands-on high impact learning experiences and support activities for their coursework.

FSCI advises for and facilitates minors supporting the Oceans and One Health degree and other programs on the Galveston Campus. The department offers the coursework needed for minors in Mathematics, and Chemistry, through the respective departments at Texas A&M. The department also facilitates the Secondary Education minor, which will lead to students in Marine Biology, Marine Coastal and Environmental Science or Oceans and One Health being certified for teaching life science, physical science, or chemistry for grades 7-12.

PHD, University of Houston, 2003

Minors

- Clinical Laboratory Sciences Minor (p. 851)

Clinical Laboratory Sciences - Minor

This specialized Clinical Laboratory Sciences minor, offered through a unique partnership with UTMB, provides advanced training in laboratory sciences.

The Department of Foundational Sciences offers a minor in Clinical Laboratory Sciences (CLBS) through a partnership with the University of Texas Medical Branch (UTMB) in Galveston. Students who wish to obtain this minor must be University Studies, Oceans and One Health majors who have been admitted to the Clinical Laboratory Sciences program at UTMB. Seven hours of coursework taken during the first semester in

that program will be applied towards the CLBS minor at TAMUG. More information is available from the Oceans and One Health advisor.

Program Requirements

Code	Title	Semester Credit Hours
TAMUG		
MARB 315	Natural History of Vertebrates	4
MARB 420	Comparative Animal Physiology	4
UTMB ¹		
CLLS 3200	Basic Operations Methods and Introduction to Clinical Lab	2
CLLS 3514	Clinical Chemistry	5
Total Semester Credit Hours		15

¹ Admission to University of Texas Medical Branch (UTMB) for the two CLLS courses is required.

This minor will be completed in 15 credit hours, 8 of which are taught at TAMUG and 7 are taught at UTMB.

Department of Marine and Coastal Environmental Science

The Department of Marine and Coastal Environmental Science (MCES) educates undergraduate and graduate students to be future leaders in coastal and marine science as well as in management and policy decision-making for the utilization and preservation of marine resources. We recognize today's professional careers demand strong interdisciplinary as well as interpersonal skills and have designed our educational programs to provide a core education in the physical, chemical and geological sciences and the necessary training for applying this knowledge to the maintenance and improvement of our marine resources. Our faculty conducts cutting-edge research in coastal marine geology, physical oceanography, marine geochemistry, and coastal resources management that emphasize and support our degrees and course curricula. Our strength is the diversity of our faculty who utilize their experience from private, governmental, and academic careers to create extraordinary learning opportunities for students through "hands on" and "on the water" field and laboratory research as well as internships that give our students a competitive advantage for employment after graduation.

We offer a variety of majors and minors in subjects centered on the coastal and marine environment. We offer a BS in Marine Sciences (MARS) and a BS in Coastal Environmental Science and Society (CESS). The License Option Program (MARS-LO) is also available to MARS majors to obtain a third mate's license in the Merchant Marine upon graduation. We offer a minor in CESS. Graduate programs offer a Master of Marine Resources Management (MARM) and a PhD program in Marine and Coastal Management and Science (MCMS). We also offer a combination program in which the student can attain a BS in CESS with a MARM degree in 5 years. Our faculty advise students in diverse MS and PhD graduate degrees on our campus such as the graduate program in Marine Biology (MARB) and programs in conjunction with departments in College Station campus such as Oceanography (OCNG) and Landscape Architecture and Urban Planning (LAUP). The departmental website (<https://www.tamug.edu/mars/faculty/index.html>) (<https://www.tamug.edu/mars/faculty/>) provides more information of

our faculty's fields of expertise and appointments with other departments and programs.

Coastal Environmental Science and Society - BS

This specialized program prepares students for a successful future in marine resource development through an increased focus on geological and biological sciences, along with economics, political science and law.

The Coastal Environmental Science and Society program is a Bachelor of Science degree that focuses on natural environmental processes (physical, chemical/biogeochemical, and geological) and social issues (policy, management, economics, law, etc.) related to the development, exploitation and conservation of oceanic and coastal resources and ecosystems. The Coastal Environmental Science and Society curriculum provides a solid foundation in oceanography, geology, chemistry, biology and physics with additional coursework in economics, policy and management. The curriculum is specifically geared towards understanding the societal and environmental impacts of resource development and exploitation, with the focus on environmental pollution, sustainable development, biological diversity, fisheries and mariculture development and management, or oil and gas extraction and exploration, coastal ecosystems (e.g., wetlands), and global climate change. There is a growing demand for trained entry-level professionals from both government, industry and non-governmental organizations who understand and can use scientific information in the planning and management processes and policy designs. With a solid scientific foundation, the Coastal Environmental Science and Society graduates are ideally poised to pursue their careers at the interface between government and businesses operating in marine realm. With suitably chosen electives, our graduates are well qualified to enter Master or PhD programs in marine resource management and policy, environmental sciences, oceanography or related disciplines.

Students in Coastal Environmental Science and Society may choose to establish a minor field of study, for example, in Economics (TAMU) or in Maritime Business Administration (TAMUG) through completion of credits as outlined in the available minors' curriculum pages. Obtaining a minor from a department located at TAMU in College Station with coursework completed in Galveston is also possible. An advisor in the Department of Marine and Coastal Environmental Science can help

with course selection and facilitate the minor approval process through another department.

Program Requirements

First Year

Fall		Semester Credit Hours
CHEM 119	Fundamentals of Chemistry I	4
ENGL 104	Composition and Rhetoric	3
MATH 147 or MATH 151	Calculus I for Biological Sciences or Engineering Mathematics I	4
MARS 102	Earth and Ocean Science ¹	4
Semester Credit Hours		15
Spring		
BIOL 111	Introductory Biology I	4
CHEM 120	Fundamentals of Chemistry II	4
MARB 101	Succeeding in Science ¹	3
Select one of the following:		4
MATH 148	Calculus II for Biological Sciences	
MATH 150	Functions, Trigonometry and Linear Systems	
MATH 152	Engineering Mathematics II	
Semester Credit Hours		15

Second Year

Fall		
BIOL 112 or GEOL 106	Introductory Biology II or Historical Geology	4
ECON 202	Principles of Economics	3
MARS 210	Marine Geography ¹	3
MARS 280	Coastal and Ocean Resources ^{1,2}	3
MARS 281	Sophomore Seminar in Marine Sciences ¹	1
Professional elective ^{1,3}		3
Semester Credit Hours		17
Spring		
ECON 203	Principles of Economics	3
MARS 303	Computing and Data Display ¹	3
Select one of the following:		4
PHYS 201	College Physics	
PHYS 206 & PHYS 226	Newtonian Mechanics for Engineering and Science and Physics of Motion Laboratory for the Sciences

¹ Indicates required courses in the major. These courses will be used to compute the major GPR.

² Designated writing intensive course.

³ Recommended professional electives include, but are not limited to: ATMO 363; CHEM 227, CHEM 237, CHEM 228, CHEM 238, CHEM 316, CHEM 318; FSCI 360, GEOG 331; MARA 470, MARB 300-499 (p. 1119); MARS 303, MARS 305, MARS 306, MARS 310, MARS 330, MARS 370/ GEOG 370, MARS 408, MARS 410, MARS 412, MARS 415, MARS 425, MARS 426, MARS 432, MARS 440, MARS 470, MARS 484, MARS 489, MARS 491; MATH 251, MATH 308; POLS 347; OCEN 201, OCEN 265, OCEN 300, OCEN 311; STAT 303.

⁴ Select any 100-499 course not used elsewhere.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language, or the 3-hour University Core Curriculum requirement for International and Cultural Diversity and the 3-hour requirement for Cultural Discourse.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum for a listing of course options for Communication, Mathematics, Life and Physical Sciences, Language Philosophy and Culture, Creative Arts, American History, Government and Political Sciences and Social and Behavioral Sciences. The Graduation requirements include a requirement for 3 hours of I (p. 49)nternational and Cultural Diversity (p. 49) courses and 3 hours of C (p. 48)ultural Discourse (p. 48) courses. A course satisfying a Core category, a college/ department requirement, or a free or directed elective can be used to satisfy this requirement. See academic advisor.

Coastal Environmental Science and Society - 5-Year Bachelor of Science and Master of Marine Resources Management

This degree program views marine natural resources management and policy development from both an ecological and policy perspective, which serves the needs of both private and public sector jobs in a great range of companies and agencies.

The Coastal Environmental Science and Society (CESS) and Master of Marine Resources Management (MMRM) Program allows CESS majors to enter the MMRM graduate program at the beginning of their senior year, enabling students to receive their CESS undergraduate degree (BS) and a MMRM graduate degree in five years. CESS majors who have at least a 3.25 GPA and have fulfilled all of their prerequisite course requirements and otherwise completed 101 or 102 hours by the fall of their fourth year are eligible to apply for the 5-year combined program during their junior year. Applicants to the 5-year combined program submit the same materials (including GRE scores) and are subject to the same admission process and criteria as other MMRM program applicants. Those students whose credentials are judged to be competitive by the mid-January deadline will be admitted.

Admitted students enroll in MMRM graduate courses with an undergraduate classification (U4) during the fall of their fourth year. They are then reclassified as degree-seeking master's students (G7) upon completing 120 credit hours, which typically occurs at the beginning of the fall semester of the fifth year. Students are required to complete the same 2-year, 36-hour curriculum as other graduate students admitted to the MMRM Professional Track (see MMRM curriculum). Students who are interested in the MMRM Research (Thesis) Track are afforded additional flexibility to replace required courses with up to nine hours of research courses (MARS 691) and electives chosen with the approval of their student advisory committee. To comply with the course and work requirements of the Research Track, this program may extend beyond the 5-year window. For specific requirements to comply with the Research Track curriculum, students are asked to consult the MMRM section of the catalog.

Students who choose not to finish the MMRM degree after being admitted to the 5-year combined program may exit the program at any time. Completed MMRM courses will be applied to their bachelor's degree in CESS, as appropriate. Failure to complete the MMRM program will in no way impede their ability to attain a bachelor's degree in CESS when the requirements for that degree are completed. Those who pursue the 5-year combined program obtain both degrees upon the completion of the 5-year combined program, receiving both their Bachelor of Science in CESS and the MMRM degrees at the end of year five. Advising for the 5-year combined program is coordinated by the Department of Marine and Coastal Environmental Science undergraduate and graduate advisors and by the Office of Graduate Studies. Advising will help ensure that interested students have satisfied the prerequisite course requirements for the bachelor's degree so that they may enter the 5-year combined program. CESS students should consult an undergraduate advisor and a graduate advisor for more information.

¹ Indicates required courses in the major. These courses will be used to compute the major GPA.

² Designated writing intensive course.

³ Recommended professional electives include but are not limited to: ATMO 363; CHEM 227, CHEM 237, CHEM 228, CHEM 238, CHEM 316, CHEM 318; FSCI 360, GEOG 331; MARA 470; MARB 300-499 (p. 1119); MARS 303, MARS 305, MARS 306, MARS 310, MARS 330, MARS 370/ GEOG 370, MARS 408, MARS 410, MARS 412, MARS 415, MARS 425, MARS 426, MARS 432, MARS 440, MARS 470, MARS 484, MARS 485, MARS 489, MARS 491; MATH 251, MATH 308; POLS 347; OCEN 201, OCEN 265, OCEN 300, OCEN 311, STAT 303,

⁴ Credit by exam for MARS 325 and ECON 203 will be awarded after successful completion of MARS 625 and MARA 604, respectively.

⁵ The 36-hour professional track curriculum is structured with 24 hours of required courses and 12 hours of optional elective courses. The required courses include a 1 hour seminar to be taken in the student's first year, 8 hours of management, 3 hours of Geographic Information Systems (GIS), 6 hours of resource economics and statistical methods, and 6 hours of law/policy courses. The student in the professional track will choose electives for the remaining 12 credit hours. See MARM curriculum pages of the graduate catalog for additional requirements for the research track (thesis option) curriculum.

⁶ Course to be used towards both the undergraduate degree and graduate degree.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

The program includes a total of 156 hours which up to 6 hours may be applied toward both the Bachelor of Science in Coastal Environmental Science and Society and the Master of Marine Resources Management.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language, International and Cultural Diversity, and Cultural Discourse courses.

See program admission criteria for more information.

Marine Sciences - BS

The Marine Sciences (MARS) program is a Bachelor of Science degree that focuses on the geological, chemical and physical science aspects of the estuarine, coastal and marine environment.

The coastal location of the campus enables students to acquire extensive hands-on field experience in addition to rigorous course work in chemistry, geology, physics, biology, oceanography and mathematics. All MARS majors take four courses of oceanography with labs and a course in geographic information systems (GIS). During the senior year students will participate in research with faculty members culminating in the writing of a senior thesis and the formal presentation of their research. We offer various elective courses, including geosciences, chemical/ biogeochemical oceanography, and physical oceanography, or a broader interdisciplinary courses. Academic advisors in the Department of Marine and Coastal Environmental Science can help with course selection depending on the student's areas of interest.

A course satisfying a Core category, a college/department requirement, or a free or directed elective can be used to satisfy this requirement.

Marine Sciences - BS, License Option

The license option (LO) in the Marine Sciences (MARS) program leads toward a license as a deck officer in the United States Merchant Marine.

This program retains the physical science core of the MARS curriculum and adds coursework that prepares the student to sit for the U.S. Coast Guard (USCG) examination as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels. Students combine a broad base of courses in physical science and mathematics and practical instruction in seamanship and navigation with three oceanography courses. The objective of the program is to provide students with a sound intellectual and educational background to function in a scientifically and technologically advanced society, while also providing the practical hands-on training needed for employment in the maritime industry. Graduates are particularly well qualified to serve on research vessels where an understanding of the scientific purpose of the voyage is required. Students who wish to enter a physical science graduate program will need to take additional course work in science and mathematics. Cadets who enroll in and apply to graduate under one of the license option curricula must complete the appropriate license examination for Third Mate or Third Assistant Engineer in order to

graduate from Texas A&M University as well as licensing requirements outlined in the program requirements. Certain license option courses require a minimum grade of C (70%).

- ¹ Indicates required courses in the Marine Sciences License Option major. These courses will be used to compute the major GPA. Also, if any upper level MARS or OCNG elective courses are taken, they will be used in the major GPA.
- ² Indicates license courses leading to a USCG license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Midshipmen will be required to repeat the course until they earn a grade of C (70%) or better. MART 307 GMDSS requires a score of 75% or better.
- ³ Designated writing intensive course. MARS-LO majors must take two writing intensive courses; MART 215 and MARS 430 .

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity and 3-hour requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language, International and Cultural Diversity, or Cultural Discourse courses.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited-Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

Coastal Environmental Science and Society - Minor

This minor provides students a base of knowledge in the economic, environmental, and social issues concerning the development of marine resources, along with a strong scientific background needed to understand these issues.

Students in other majors may establish a minor field of study in Coastal Environmental Science and Society (CESS) through the completion of coursework. Coursework in environmental management, policy and economics of the coastal zone can round out the education of those students who are interested in conservation and societal issues

associated with fisheries, marine protected areas, sensitive wetlands, coastal development and community resilience. Therefore the CESS minor pairs well with majors in Marine Biology (p. 859), Marine Fisheries (p. 862), Maritime Studies (<https://catalog.tamu.edu/undergraduate/galveston/marine-sciences-maritime-studies/liberal-studies/maritime-studies-ba/>), Maritime Business Administration (p. 869), or Ocean Engineering (p. 705).

Department of Marine Biology

The Department of Marine Biology offers undergraduate Bachelor of Science degrees in Marine Biology, Marine Fisheries, and Marine Biology-License Option from Texas A&M University. At the graduate level, the department offers Master of Science and Doctoral degrees in Marine Biology. Teaching and research facilities are located in Galveston, Texas along the shore of Galveston Bay. The semitropical climate provides students and faculty with year-round access to a variety of estuarine, coastal and pelagic marine ecosystems, including salt marshes, oyster reefs, seagrass meadows and coastal sand dunes and beaches. A state-

of-the-art Sea Life Facility is available for additional hands-on experiences with marine organisms.

The faculty have research expertise in marine fisheries, marine invertebrate and vertebrate zoology, marine botany, marine mammalogy, biological oceanography, wetlands ecology, marine conservation and management, biodiversity, microbiology, virology, genomics, toxicology, physiology, marine acoustics, and evolutionary biology.

Marine biology undergraduate students obtain employment with state and federal agencies, private industry, environmental consulting entities, biomedical research, marine parks, aquariums and zoos, and teaching. Many undergraduates pursue postgraduate studies in marine biology, as well as in the fields of medicine, veterinary sciences and environmental law.

Marine Biology - BS

The Marine Biology Bachelor of Science degree emphasizes high impact, hands-on learning, with courses offering lab and field-based experiences.

This program’s curriculum spans a broad range of topics, including ichthyology and fish physiology, marine mammalogy, ecology, marine botany and coastal plant ecology, vertebrate and invertebrate zoology, coral biology, and marine conservation. Our diverse curriculum allows students to tailor their education to realize their career goals. With state-of-the-art labs and classrooms, a fleet of vessels, and world-class faculty, our educational and research opportunities prepare graduates to become leaders in their field.

Learn from Experts in the Field

The faculty of the Department of Marine Biology comprises some of the top researchers in their respective fields. This international group of scientists, hailing from 10 different countries around the world, is eager to share their knowledge and foster the passions of our undergraduates. Our faculty recognizes the power of networking, and provides students research and professional opportunities through affiliations with NOAA, FDA, EPA, Texas Parks and Wildlife Department, Texas Commission on Environmental Quality, Galveston Bay Foundation, General Land Office, and numerous others. Whether a student desires to study the smallest microbes and plankton to the largest marine organisms, or ecosystems along the coastline to the deepest reaches of the ocean, the faculty of the Marine Biology Department equips each student with the knowledge needed to succeed.

Career Opportunities

The unique flexibility of courses and the unparalleled access to top quality professors, training, and the sea puts our students in a great position to succeed in any number of career paths, including:

- Conservation
- Environmental Consulting
- Research
- Biomedical Sciences
- Veterinary and Medical degrees
- Law Enforcement
- Environmental Outreach
- Higher/Secondary Education

Endless Learning Opportunities

The courses offered to Marine Biology undergraduates are tailored to give students a solid foundational knowledge of life in the ocean while allowing students to pursue their specific interests. The diverse array of electives includes such courses as: Biology of Marine Mammals, Tropical Marine Ecology, Marine Toxicology, Animal Behavior, Life in Extreme Environments, and Conservation Biology.

Learning Outside the Classroom

Sometimes the greatest lessons are learned away from the classroom. For this reason, the Marine Biology Department offers field-based courses in Puerto Rico and at SeaWorld San Antonio. Additionally, students can take advantage of our on-campus Sea Life Facility for extensive hands-on opportunities. Undergraduates in our program get more than just a degree, they get experiences of a lifetime.

Double Your Career Options

Marine Biology majors have the option to pursue a U.S. Merchant Marine License Option through the Texas A&M Maritime Academy. Those who complete the program will have not only their Bachelor of Science degree,

but will also qualify to take the U.S. Coast Guard license examination in order to become a Third Mate for ocean going vessels, a vital asset in a number of career fields.

Program Requirements

First Year		Semester
Fall		Credit Hours
MARB 101	Succeeding in Science ¹	3
CHEM 119	Fundamentals of Chemistry I	4
ENGL 104	Composition and Rhetoric	3
MATH 147 or MATH 151	Calculus I for Biological Sciences or Engineering Mathematics I	4
Semester Credit Hours		14
Spring		
BIOL 111	Introductory Biology I ^{1,2}	4
MARS 102	Earth and Ocean Science ¹	4
CHEM 120	Fundamentals of Chemistry II	4
Select one of the following:		4

Total Semester Credit Hours 120

¹ Indicates required courses in the Marine Biology major. These courses will be used to compute the major GPA.

² A grade of C or better is required before advancing to upper level courses.

³ 18 credit hours of marine biology electives selected from the following: BIOL 351; FSCI 360, MARB 300-499 (p. 1119); MARS 305, MARS 325. Students can only select 2 mammals courses (MARB 400, MARB 401, MARB 403, or MARB 407).

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements. Up to 4 hours of MARB 491 and/or MARB 484 may be used as marine biology elective courses in your curriculum. Please consult with your academic advisor.

Marine Biology - BS, License Option

The Marine Biology License Option program allows the marine biology student to prepare for a career as an officer aboard a sea going vessel by participating in the Texas A&M Maritime Academy License Option program.

This program's curriculum provides the basics of marine biology, as well as courses leading toward licensing as a Third Mate of any gross tonnage upon oceans, steam, or motor vessels in the U.S. Merchant Marine.

The Marine Biology License Option curriculum is an abbreviated version of the Marine Biology curriculum and is oriented toward field activities consistent with service aboard research vessels. Midshipmen who enroll in and apply to graduate in this curriculum must pass the license examination and all other requirements for the Third Mate in order to graduate from Texas A&M University. Certain United States Coast Guard courses require a minimum grade of C (70%).

¹ Indicates required courses in Marine Biology License Option major.

These courses will be used to compute the major GPA.

² Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or accrual. Students will

be required to repeat the course until they earn a grade of C (70%) or better. MART 307 requires a grade of 75% or better.

³ A grade of C or better is required before advancing to upper level courses.

⁴ Select from CHEM 227 and CHEM 237, CHEM 228 and CHEM 238, CHEM 257, CHEM 258, MARB 300-400 (p. 1119).

⁵ MART 498 must be taken within one year of graduation to receive USCG approval.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses, or any of the six hour cruise options. The six hour cruise options (NAUT 300, NAUT 400) do not add any required hours to the degree plan.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section on the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited-Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

Marine Fisheries - BS

This program provides educational opportunities in the biological sciences, with emphasis on marine management.

Ecology, taxonomy, zoogeography, culture, and general biology of commercial species are emphasized in this program. Course offerings are structured to provide not only a strong basis of formal academic instruction but also considerable hands-on field and collection experience by taking advantage of the coastal location of the university. A strong preparation in the sciences is recommended. Marine Fisheries graduates are prepared to work as fisheries managers or research biologists for state and federal agencies, ecological consulting firms, and educational institutions. Qualified degree recipients may undertake postgraduate

studies in resource management, mariculture, systematics, and fisheries economics.

¹ Indicates required courses in the Marine Fisheries major. These courses will be used to compute the major GPA.

² A grade of C or better is required before advancing to upper level courses.

³ Select from MARB 300-499 (p. 1119).

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language, Cultural Discourse or International and Cultural Diversity courses.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity may be met with courses used to satisfy other degree requirements. The 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

Marine Biology - Minor

Coupled with the appropriate major, a minor in marine biology is a powerful asset and can prepare a student for a number of exciting and rewarding career opportunities. This coursework combines top quality classroom, laboratory, and hands-on experiences to diversify a student's education and prepare them for a future in research, conservation, education, and more.

Program Requirements

Code	Title	Semester Credit Hours
Select four of the following: ¹		16
MARB 301	Genetics	
MARB 311	Ichthyology	
MARB 315	Natural History of Vertebrates	
MARB 360	Marine Conservation Biology	
MARB 400	Biology of Marine Mammals	
MARB 425	Marine Ecology

Department of Marine Engineering Technology

Texas A&M University at Galveston is a special purpose institution for teaching, research, and public service pertaining to marine and maritime studies in science, engineering, and business. The Marine Engineering Technology Department offers programs that prepare students to become leaders in the maritime industry. Within this context, the Marine Engineering Technology (MARR) program produces graduates who are prepared to perform engineering work in the maritime sector onboard a vessel or marine-related shore-based industries involving the design, production, operation, maintenance, and management of engineering and power generation systems. The program is available in a License Option version as part of the Texas A&M Maritime Academy for students who want to serve as an engineering officer aboard seagoing vessels.

Opportunities for such work abound in the vicinity of the campus, which is located just south of the fourth largest metropolis in the United States. The Houston/Galveston area has extensive port facilities, considerable commercial, recreational, and military ship traffic, and

offshore and onshore infrastructure associated with the oil industry. Career opportunities of various kinds are therefore available for these graduates who are ideally suited for working on ships, at port facilities, and at shore facilities, particularly in power generation, distribution, and associated auxiliary support systems.

Our goal is to produce graduates with a strong background in engineering fundamentals, mathematics, and analytical methods, which is reinforced by practical machine shop, welding, and laboratory experiences (including several on the training ship). The curriculum builds on a foundation of basic engineering topics such as fluid mechanics, thermodynamics, electricity, drafting, and materials science to develop inter-disciplinary skills required for the practice of marine engineering. In particular, the program's educational objectives are to produce graduates who can plan, design, construct, operate, and maintain systems used in marine, offshore and onshore power systems such as propulsion, electrical power generation and distribution, refrigeration, and potable water production and sterilization. Graduates also support the maritime sector (the Navy and Coast Guard), companies operating sea-going vessels, the offshore oil and gas industry; and, are well-prepared to engage in lifelong education, professional development, and continuous improvement.

Marine Engineering Technology - BS

The Marine Engineering Technology (MARR) program is designed to prepare the student for a career as an engineering professional in the maritime industry.

Students receive an education in applied engineering with a maritime focus. The MARR curriculum is a thermal power-oriented specialization of a classical Mechanical Engineering Technology program. A thorough preparation in mathematics, science, and engineering courses is the foundation for further study in ship propulsion plants, electrical power generation and distribution equipment. Marine Engineering Technology focuses on power cycles, principles, and methods used to convert various forms of energy into useful power. The Maritime industry is moving toward clean energy production onboard its vessels. The use of alternative fuels and Hybrid Energy Storage Systems (HESS) is becoming common. The curriculum explores the selection and operation of the major components and support systems in the power cycle. Courses in marine engineering are supplemented with studies in automation and control systems, naval architecture and the maritime application of electrical engineering fundamentals. The students' education is enhanced through the use of computer simulation of propulsion plants and direct operation of marine machinery aboard the University's training ship. Students who wish to pursue USCG license should enroll in the license option. Marine Engineering Technology (MARR) Program is accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org (<http://www.abet.org/>).

¹ Indicates required courses in Marine Engineering major. These courses will be used to compute the major GPA.

² Required to earn a grade of C or better in MATH 151, MATH 152, PHYS 206, PHYS 207, PHYS 226, PHYS 227, MARE 202, MARE 205, MARE 206, MARE 207, and MARE 209. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite. Although they may count for credit, grades from another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering programs toward the degree.

³ Technical electives may be any course with the following prefixes: MARE (p. 1122), MARS (p. 1126), MART (p. 1129), OCEN (p. 1179), CVEN (p. 990), MATH (p. 1135), PHYS (p. 1205), or OCNG (p. 1182) in consultation with the student's advisor. At least one elective must be at the 300 or 400 level.

⁴ Designated Writing intensive course.

⁵ Students may take any of the 300 or 400-level courses (except MARE 402 and MARE 405) offered by the Marine Engineering Department in their senior year which are offered to license option students.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at <http://core.tamu.edu/> for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity and the 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements.

Although they may count for university credit, grades from another institution below a C in engineering, mathematics and physics will not be accepted by the TAMUG engineering technology program toward the degree.

The total hours may be increased if the student is required to take remedial math, remedial English, computer science, foreign language or if the creative arts; language, philosophy and culture or social science requirements do not fulfill the International and Cultural Diversity requirement.

Marine Engineering Technology - BS, License Option

The purpose of the Marine Engineering Technology License Option (MARR LO) program is to train students to serve as engineering officers aboard sea-going vessels.

The MARR curriculum is a power-oriented specialization of a classical Mechanical Engineering Technology program. A thorough preparation in mathematics, science, and engineering courses is the foundation

for further study in ship propulsion plants, electrical power generation and distribution equipment. Marine Engineering Technology focuses on power cycles, principles, and methods used to convert various forms of energy into useful power. The Maritime industry is moving toward clean energy production onboard its vessels. The use of alternative fuels and Hybrid Energy Storage Systems (HESS) are common. The curriculum explores the selection and operation of the major components and support systems in the power cycle. Courses in marine engineering are supplemented with studies in automation and control systems, naval architecture and the maritime application of electrical engineering fundamentals. The students' education is enhanced through the use of computer simulation of propulsion plants and direct operation of marine machinery aboard the University's training ship. Marine Engineering Technology (MARR) is accredited by the Engineering Technology Accreditation Commission of ABET, <https://www.abet.org/>.

In addition to the degree requirements for the Marine Engineering Technology Degree, MARR LO Cadets must complete the requirements to achieve a Merchant Mariner Credential (MMC) issued by the USCG. The requirements for the MMC are determined by International conventions, Federal law and regulations, and policies established by the USCG and the Maritime Administration (MARAD). The requirements for an MMC are subject to change according to developments at the International Maritime Organization (IMO), Congressional action, the Federal rulemaking process, and consultations between the USCG, MARAD, and the Maritime Academies. The student who successfully completes the program will be qualified to sit for the U.S. Coast Guard license examination as a Third Assistant Engineer of any gross tonnage upon oceans, steam and motor vessels and issuance of Standards of Training, Certification and Watchkeeping (STCW) international endorsement as Officer-In-Charge of an Engineering Watch (OICEW). Unlimited tonnage gas turbine endorsement also available.

MARR LO students must also complete all the requirements as a cadet in the Texas A&M Maritime Academy, described previously in this catalog, in order to receive the degree. Cadets who enroll in and apply to graduate in Marine Engineering Technology must successfully complete the license examination for Third Assistant Engineer in order to graduate from Texas A&M University. Courses earning USCG or STCW qualifications, sea-time remission or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

¹ Indicates license courses leading to a USCG/STCW license endorsement or sea time or workshops skills credit accrual which require a minimum grade of C (70%) or better to earn the endorsement or workshop skills accrual. Cadets will be required to repeat the course until they earn a grade of C (70%) or better. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.

² Students are required to earn a grade of C or better in MATH 151, MATH 152, PHYS 206, PHYS 207, PHYS 226, PHYS 227, MARE 202, MARE 205, MARE 206, MARE 207, and MARE 209. Failure to meet this requirement will prevent the student from continuing any sequence in which the course is a prerequisite.

³ Indicates required courses in the Marine Engineering Technology License Option major. These courses will be used to compute the major GPA.

⁴ Designated Writing intensive course.

⁵ Technical electives may be any course with the following prefixes: CSCE (<https://catalog.tamu.edu/undergraduate/course-descriptions/csce/>), MARE (p. 1122), MART (p. 1129), OCEN (p. 1179), MATH (p. 1135), PHYS (p. 1205), MARS (p. 1126), or OCNG (p. 1182) at the 300 or 400 level in consultation with the student's advisor.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum at <http://core.tamu.edu/> for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 3-hour University Core Curriculum requirement for International and Cultural Diversity and the 3-hour University Core Curriculum requirement for Cultural Discourse may be met with courses used to satisfy other degree requirements. Although they may count for university credit, grades from an other institution below a C in engineering, mathematics

and physics will not be accepted by the TAMUG engineering programs toward the degree.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity courses.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified License Option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements
- Pass a comprehensive professional examination (either the Third Mate Unlimited- Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

Marine Electro-Technology - Minor

The Marine Engineering Electro-Technology Minor provides students with the knowledge and skills to maintain, troubleshoot and repair shipboard electrical equipment.

As vessels become increasingly automated, the need for mariners and shoreside employees with advanced electronics and networking skills has become essential. This minor's curriculum consists of electrical theory and practical application of troubleshooting and diagnostics of shipboard machinery. Machinery includes engine room equipment, deck equipment, computer networking, High Voltage, and navigation systems.

This program requires a grade of "C" or better for the courses to be used as evidence of meeting "Option 2" of MCP-FM-NMC5-216 (03) for approved training toward the Electro-Technical Officer endorsement. A student can use this minor towards an original electro-technical rating when combined with Qualified Assessor Endorsed Assessments for IMO's Section A-III/6 and A-III/7 of the STCW code with required sea service. Endorsement options for post-completion should be discussed with a MARE advisor to determine eligibility based on the student's degree and this minor.

Program Requirements

Code	Title	Semester Credit Hours
MARE 301	Digital Fundamentals for Marine Engineers	3
MARE 325	Shipboard Networking Systems	3
MARE 335	Power Electronics for Shipboard Applications	3
MARE 345	High Voltage Technology for Marine Engineers	3

MARE 445	Marine Navigation Systems	3
Total Semester Credit Hours		15

Marine Engineering Technology - Minor

The MARE minor provides training in marine engineering, project management, shipboard, and port operations.

Students will receive instruction in shipboard safety and attend firefighting school. An in-depth study of the ship's propulsion and auxiliary systems will allow the student to understand the interconnectivity between engineering principles and their applications. The minor will culminate in an at-sea experience aboard the training ship or approved placement. While at sea, the students will stand watch and perform maintenance and repairs onboard the vessel. This minor is intended to complement other engineering or Galveston-based majors.

The student must meet Texas A&M Maritime Academy documentation requirements to enroll in MARE 200. All at-sea placements require medical review, possession of a Transportation Workers Identification Card (TWIC), Merchant Mariners Credential (MMC), and a Passport. The department will not track sea time for use towards licensing beyond the minor. Each student will receive a discharge from the vessel, including the number of days sailed aboard the vessel as a cadet and a letter grade for completion of the MARE 200. This program does not lead to direct USCG licensure, but sea time gained onboard the vessel will be acknowledged as service and can be used towards endorsements after graduation. Endorsement options for post-completion should be discussed with a MARE advisor to determine eligibility based on the student's degree and this minor.

Program Requirements

Code	Title	Semester Credit Hours

- Maritime Cybersecurity Minor (p. 872)

Maritime Business Administration - BS

A business degree for the sea, this program offers students the chance to learn the skills needed for the maritime industry.

The Maritime Business Administration undergraduate curriculum, offered through the College of Marine Sciences and Maritime Studies, provides a solid background in the key areas of accounting, finance, marketing, law, economics and international trade that are critical for today's business professionals. These courses lay the foundation for more advanced courses in international trade, inland waterways management, brokerage and chartering, organizational behavior, transportation economics, port and terminal management and other areas related to the maritime industry.

International trade is expanding as a result of the general increase in world-wide economic and political stability and this trend is expected to increase, as major economies participate more fully in world-wide economic growth. The great majority of this expanded trade will be carried by ship. As a result, activity in American ports is expected to more than double in the next 20 years, and some ports in the Gulf of America are expected to see a tripling of port activity. Taken together, these forces are currently and will continue to positively affect demand for trained maritime professionals ashore. Maritime Business Administration graduates are ideally poised to meet the increasing demand for well educated maritime professionals.

Additionally, qualified undergraduate students have the opportunity to earn a Bachelor of Science and a Master of Maritime Business Administration and Logistics (p. 871) in five years time through the Department of Maritime Business Administration's combination program.

The Maritime Business Administration program is also offered at the Texas A&M Higher Education Center in McAllen, Texas.

¹ Indicates required courses in the Maritime Business Administration major. These courses will be used to compute the major GPA. At the time of graduation, a MBAU major must have a GPA of at least 2.25 in their major. A MBAU major must achieve a grade of C or better in ACCT 229, ACCT 230, ECON 202, and ECON 203 as a graduation requirement. These courses may be repeated as necessary to meet this requirement, and the requirement applies to courses taken at Texas A&M University Galveston Campus or offered for transfer from other institutions.

² Students must register for MARA 205 their first semester at Texas A&M University Galveston Campus.

³ MATH 148, MATH 150, MATH 152, MATH 168, and MATH 172 will be accepted in lieu of MATH 140.

⁴ MATH 147, MATH 151, and MATH 171 will be accepted in lieu of MATH 142.

⁵ Students may satisfy the 9-credit hours of Life and Physical Science requirement through any combination of one, three or four credit hour courses.

⁶ Students should select 18 hours from the following courses: ECON 311, ECON 323, ECON 452; MARA 201, MARA 342, MARA 345, MARA 346, MARA 347, MARA 348, MARA 350, MARA 360, MARA 401, MARA 402, MARA 403, MARA 416, MARA 424, MARA 435, MARA 445, MARA 446, MARA 450, MARA 461, MARA 470, MARA 475, MARA 484, MARA 485, MARA 489, MARA 490, MARA 491, MARA 493 and SCMT 336.

⁷ Satisfies the 3 credit hour Cultural Discourse (p. 48) (CD) requirement.

⁸ Designated writing intensive course.

⁹ Satisfies the 3 credit hour International and Cultural Diversity (p. 49) (ICD) requirement.

TOTAL PROGRAM HOURS 120

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum (p.) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences.

The total hours may be increased if the student is required to take remedial math, remedial English or foreign language courses.

To earn the economics minor, the student's elective hours must include ECON 311, ECON 323, and ECON 452. For additional requirements of the economics minor, please see the Economics - Minor (<https://catalog.tamu.edu/undergraduate/liberal-arts/economics/minor/>).

Maritime Business Administration - 5-Year Bachelor of Science and Master of Maritime Business Administration and Logistics

This combination program enables motivated students to receive their Bachelor of Science in Maritime Business Administration (MBAU) undergraduate degree and a Master of Maritime Business Administration and Logistics (MBAA) graduate degree in five years.

This program allows Maritime Business Administration (MBAU) majors to enter the graduate program for a Master of Maritime Business Administration and Logistics at the beginning of their senior year.

Students admitted to the 5-year combined degree program will have completed coursework required to receive a bachelor's degree. These courses must include the specific prerequisites for a Bachelor of Science degree in Maritime Business Administration, as well as the required Texas A&M University core curriculum courses.

Maritime Business Administration majors who have at least a 3.00 GPA and who have taken all of their prerequisite courses and otherwise completed 60 hours by the spring of their third year will be eligible to apply for the 5-year combined program during their junior year. Applicants interested in the 5-year program should contact the MARA Chair of Graduate Studies and also consult the MARA website. The 5-year combined degree applicants will be judged competitively by the same admission criteria as for other MBAA applicants.

Students will be required to complete graduate hours that include core courses in economics, management, operations and logistics. The electives will be chosen according to the interest of the student in consultation with an academic adviser.

All undergraduate courses are offered on the Galveston Campus. Graduate level courses may be offered as traditional format courses on the Galveston Campus or via asynchronous distance education technology.

⁴ MATH 147, MATH 151, and MATH 171 will be accepted in lieu of MATH 142.

⁵ Students may satisfy the 9-credit hours of Life and Physical Science requirement through any combination of one, three or four credit hour courses.

⁶ Students are required to complete 18 credit hours of MARA electives. Students should choose from the following courses: ECON 311, ECON 323, ECON 452, MARA 201, MARA 342, MARA 345, MARA 346, MARA 347, MARA 348, MARA 350, MARA 360, MARA 401, MARA 402, MARA 403, MARA 424, MARA 435, MARA 445, MARA 446, MARA 450, MARA 461, MARA 470, MARA 475, MARA 484, MARA 485, MARA 489, MARA 490, MARA 491, MARA 493 and SCMT 336.

⁷ Satisfies the writing intensive (W) requirement.

⁸ Satisfies the 3 credit hour International and Cultural Diversity (p. 49) (ICD) requirement.

⁹ Satisfies the 3 credit hour Cultural Discourse (p. 48) (CD) requirement.

¹⁰ Credit by examination given for MARA 421 and MARA 466.

¹¹ Select 15 credit hours from the following graduate level elective courses: MARA 604, MARA 616, MARA 624, MARA 636, MARA 645, MARA 650, MARA 660, MARA 670, MARA 673, MARA 675, MARA 678, MARA 684, MARA 685, MARA 689, MARA 690 and MARA 691.

¹² Courses to be used to meet both undergraduate and graduate requirements.

TOTAL PROGRAM HOURS 156

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum (p.) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language,

Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences.

The total hours may be increased if the student is required to take remedial math, remedial English, or foreign language courses.

To earn the economics minor, the student's elective hours must include ECON 311, ECON 323, and ECON 452. For additional requirements of the economics minor, please see the Economics - Minor (<https://catalog.tamu.edu/undergraduate/liberal-arts/economics/minor/>).

Maritime Business Administration - Minor

A minor in maritime business administration gives students a solid foundation in areas concerning maritime business, such as accounting, management and port operations.

The minor in Maritime Business Administration, offered through the College of Marine Sciences and Maritime Studies, is designed to provide students with fundamental knowledge in the business of water transportation. Students are required to complete coursework in general business and the maritime industry, as well as maritime course electives.

Program Requirements

Code	Title	Semester Credit Hours
ACCT 229	Introductory Accounting	3
MARA 301	Ocean Transportation	3
MARA 363	The Management Process	3
Electives ^{1, 2, 3}		9
Total Semester Credit Hours		18

¹ Students should meet with an advisor in the Department of Maritime Business Administration to select the courses most appropriate for their area of interest.

² Select from: ACCT 230, FINC 341, MARA 212, MARA 304, MARA 342, MARA 373, MARA 401, MARA 402, MARA 416, MARA 421, MARA 424, MARA 435, MARA 440, MARA 450, MARA 470, MARA 475, MARA 484, MARA 485, MARA 489, MARA 491, MARA 493 and MKTG 321.

³ To ensure students have adequate depth in the maritime field, electives must be approved for the MBAU-minor dependent on a students' major. Students with no other background or coursework in Maritime Business Administration will be required to select at least 9 hours of MARA courses to support the student's competency in the maritime field.

Maritime Cybersecurity - Minor

Students gain specialized knowledge in protecting maritime IT and operational systems, preparing them to safeguard critical infrastructure in a field of increasing global importance.

The Maritime Cybersecurity Minor is designed to develop the knowledge and skills of students interested in maritime careers. This encompasses protecting both information technology (IT) and operational technology (OT) systems while also safeguarding data in the maritime environment. The world economy, security, and global well-being rely on maritime commerce to transport and distribute goods, services, and personnel either overseas or through inland waterways. These components

collectively comprise the maritime transportation systems which are increasingly targeted by cyberattacks with potentially disastrous results both nationally and internationally. Courses will be focused on developing foundational knowledge and skills.

Program Requirements

Code	Title	Semester Credit Hours
MARA 201	Foundations of Maritime Cyber Security	3
MARA 360	Maritime Cybersecurity Issues	3
MARA 403	Law and Policy in Cybersecurity	3
Select two of the following:		6

Must make a grade of C or better in each course used towards minor.

Minimum required GPA to declare minor is a 2.5.

Department of Maritime Studies

The Department of Maritime Studies in the College of Marine Sciences and Maritime Studies offers the Bachelor of Arts in Maritime Studies. The degree encompasses the past and present relationships between humans and the sea including nautical archaeology, cultural anthropology, world politics, maritime history, maritime literature, tall ship sail training, museum studies, tourism, domestic and international public service, and environmental concerns.

The mission of the Department of Maritime Studies is to provide a robust intellectual foundation for students pursuing occupational and leadership roles in areas such as government, communication, business, non-governmental organizations, public policy, tourism policy, journalism and public relations, archaeology and anthropology, museums and archives, professional diving, and preparation for graduate studies and law school.

Maritime Studies students participate in a variety of state and national programs such as the Model United Nations, Student Conference on National Affairs, and the Bush School Public Service Institute. Students are encouraged to avail themselves of the international educational opportunities available through courses offered in the Texas A&M University Education Abroad Programs Office (<http://abroad.tamu.edu/>).

With faculty maintaining research agendas in a variety of disciplines including politics, history, mass media and communication, English, popular culture, archeology, philosophy, museum studies, anthropology, genocide studies, African-American studies, and mathematics, Maritime Studies builds within students enhanced critical thinking and strong communication skills, while emphasizing the critical nature of multicultural thinking and collaboration in a global economy.

The Department of Maritime Studies provides the skills necessary for students to:

- Lead others through critical thinking, multi-dimensional problem solving, and issue advocacy;
- Be competitive in a multicultural world increasingly interested in college graduates with interdisciplinary backgrounds;
- Inform public policy creation and decision-making from both the governmental and business perspectives;
- Earn internships in areas such as politics, law and legal affairs, communication, for-profit and non-profit organizations, artifact conservation and museum management;
- Prepare for graduate school and law school opportunities;
- Understand the inalienable connections between education, freedom, and democracy.

Majors

- Bachelor of Arts in Maritime Studies (p. 874)

Minors

- Diving Technology and Methods Minor (p. 875)
- Maritime Environmental Law and Policy Minor (p. 876)

Maritime Studies - BA

Maritime Studies (MAST) offers students a unique opportunity to examine the varied ways humans use and impact coastal and maritime environments.

This program is well suited for students seeking to understand the vital and synergistic relationship humans have with the sea.

With 40% of the world's population living within 60 miles of a coastline, a myriad of interests and demand for jobs dependent upon coastal areas exist, such as:

- Energy exploration and use
- Preservation and conversation of culture
- Historical research
- Underwater archaeology
- Contract archaeology
- Commercial fisheries
- Museums and their management
- Policy changes
- The effects of rising sea levels and changing coastal climates on coastal communities
- Human rights at sea

By studying the history, archaeology, literature, and politics of maritime peoples and cultures from ancient times to present, Maritime Studies graduates gain a comprehensive understanding of the interconnected issues, while achieving an excellent broad-based interdisciplinary education with a distinctive, international emphasis.

Working closely with their undergraduate advisor, students tailor the MAST degree program to suit their interests and career goals, and have many opportunities for enrichment activities contribute to a healthy graduation portfolio. Activities can include enrollment in an internship suited to their career interest, participation in field studies, concentration on a particular topic with a professor of their choice, and/or studying abroad for a semester. MAST students are able to train as a crew member on a working 19th century tall ship, The Elissa. MAST students are encouraged to pursue at least one minor, usually in Anthropology, English, Diving, Museum Studies or History, and many earn two.

Employers understand that students of the liberal arts bring advanced comprehensive problem-solving capabilities to the job market. Upon graduation with the MAST degree, students have acquired valuable critical thinking, reasoning, and communication skills. They are prepared for a diverse choice of fields including, but not limited to, oil and gas administration, environmental management, state and federal agencies, historical and non-profit foundations, museums conservation and

administration, mass and niche communication, nautical and contract archaeology, journalism, education, management, law school, and graduate studies in related fields.

Program Requirements

First Year

Fall		Semester Credit Hours
ENGL 104	Composition and Rhetoric	3
MAST 240	Introduction to Maritime Studies ^{1,2}	3
Life and physical sciences (p. 27)		1
Mathematics (p. 27)		3
Directed elective ^{1,3}		3
Semester Credit Hours		13
Spring		
ENGL 203	Writing about Literature	3
Government/Political science (p. 31)		3
Language, philosophy and culture (p. 28)		3
Mathematics (p. 27)		3

Semester Credit Hours		15
Total Semester Credit Hours		120

¹ Must make a grade of C or better.

² Required the first semester in the MAST program.

³ Select from ANTH 202, ANTH 313, ANTH 350, ANTH 409, ANTH 423, ANTH 485; COMM 203, COMM 365/JOUR 365; ENGL 330, ENGL 334, ENGL 338, ENGL 339/AFST 339, ENGL 374/WGST 374, ENGL 484, ENGL 485; HIST 226, HIST 370, HIST 373, HIST 374, HIST 405, HIST 485; KINE 199; MARA 212, MARA 421, MARA 435, MARA 470; POLS 353, POLS 366; SPAN 101, SPAN 102, SPAN 201, SPAN 202. A maximum of 3 hours of KINE 199, and a maximum of 3 hours of 484 or 485 may be used for directed electives.

⁴ Select from ANTH 318, ANTH 330, ANTH 351, ANTH 484; CLAS 371; MAST 200-499 (p. 1133) (except MAST 365, MAST 480, MAST 481); PHIL 314; POLS 231, POLS 347. A maximum combination of 6 hours of 484, 485 and/or 491 may be used as MAST electives.

Students in the BA-MAST program must maintain a portfolio of artifacts from MAST required coursework. The portfolio is developed over the course of the undergraduate career, and upon completion, will contain artifacts from each MAST required course. The Portfolio is assessed for completion during the last term of enrollment, after the student submits the graduation application. The completion of the portfolio requirement will be assessed by the Maritime Studies faculty.

Diving Technology and Methods - Minor

The minor in Diving Technology and Methods combines practical scuba training with advanced coursework highlighting scientific and specialized applications of diving.

Students gain professional diving certifications and experience in scientific diving research. Students in any major may establish a minor field of study in Diving Technology and Methods through completing hours from the designated courses.

In addition to the course requirements, students must:

- Maintain compliance with training agency requirements
- Maintain a GPA of 2.5

- Maintain good health and fitness appropriate to the level of diving required. Adverse behaviors that put the diver or other participants at risk such as the use of alcohol or certain medicines may require the diver to be removed from the program.

Program Requirements

Code	Title	Semester Credit Hours
Select from:		16
KINE 199	Required Physical Activity (Conditioning Swimming)	
KINE 199	Required Physical Activity (Positive Impact Diving)	
DIVE 250	SCUBA Diving I	
DIVE 251	SCUBA Diving II	
DIVE 260	Scuba Diving III	
DIVE 310	Techniques in Boat and Wreck Diving	
DIVE 330	Rescue Diving	
DIVE 331	Alternative Diving Technology	
DIVE 357	Dive Leadership – Divemaster	
DIVE 405	Expedition Planning	
DIVE 410	AAUS Scientific Diving	
DIVE 411	Offshore Research Diving	
DIVE 430	Techniques in Overhead Environment Diving	
DIVE 440	Decompression and Mixed Gas Procedures	
DIVE 489	Special Topics In...	
Total Semester Credit Hours		16

Minimum of 8 hours at 300-400 level.

Must complete a medical statement or have recreational scuba divers physician examination.

Must maintain a GPA of 2.5.

Must maintain good health and fitness appropriate to the level of diving required.

Maritime Environmental Law and Policy - Minor

This minor provides the perfect platform for students looking to launch a career in law, business or public policy.

The Maritime Environmental Law and Policy minor focuses on the rules that govern acceptable human impacts on the environment, the policy processes for creating those rules, as well as the incentives created by those rules. As maritime environmental issues become more prominent, students will understand relevant statutes and doctrine and their real-world application in maritime affairs, as well as interdisciplinary approaches to maritime and environmental management while exploring legal aspects of ocean and coastal policy issues.

Program Requirements

Code	Title	Semester Credit Hours
POLS 232	Introduction to Maritime Public Policy	3
POLS 347	Politics of Energy and the Environment	3
MARA 470	Environmental Law	3
Select two of the following:		6
MARA 421	Admiralty Law	
MARA 435	Labor Law and Policy	
MARS 280	Coastal and Ocean Resources	
PHIL 314	Environmental Ethics	
SOCI 328	Environmental Sociology	
Total Semester Credit Hours		15

Minimum of 2.5 GPA in minor coursework.

Students must make a grade of C or better in all courses.

Department of Maritime Transportation

The Department of Maritime Transportation courses prepare students to ensure they meet all the requirements to hold a U.S. Coast Guard Third Mate's license of any gross tonnage upon oceans, steam, or motor vessels and issuance of International Standards of Training, Certification and Watchkeeping (STCW) endorsements. Earning a deck license means students will learn to navigate a vessel, handle cargo, and operate and maintain a variety of ship systems. Skills are learned through extensive theoretical education that is applied practically via navigation, seamanship, ship construction, ship handling, and stability training on campus in state-of-the-art ship simulators as well as aboard training vessels and commercial vessels. The Marine Transportation core also provides a broad maritime education to produce a well-trained and knowledgeable ship's officer and combines studies in the humanities and sciences.

Cadets are also provided with solid fundamentals in business topics related to the maritime industry, ashore and afloat. Cadets take courses which provide a broad understanding of management issues and specific skills required for critical thinking and decision making in business. These skills complement the maritime operations education and strengthen their performance as shipboard officers. Cadets gain a foundation in business administration allowing them to pursue shore-side opportunities in maritime business, logistics, and operations.

The department also offers advanced elective courses in relevant subject areas. These courses can be grouped by cadets interested in pursuing an academic minor to gain a more in-depth exposure to a particular subject area. Students should contact their academic advisor for specific information and advice.

In addition to satisfying the institution's higher education accreditation requirements, the department's program must also comply with domestic and international laws and standards related to maritime education. The International Convention on Standards of Training, Certification and Watchkeeping for Seafarers (STCW), as amended, sets qualification standards for masters, officers, and watch-keeping personnel on

seagoing merchant ships. The STCW Code and the U.S. Code of Federal Regulations establish the standards that the U.S. Coast Guard uses to license U.S. Merchant Mariners. Courses earning USCG or STCW qualifications, sea-time, or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

Cadets who enroll in and apply to graduate in Marine Transportation must successfully complete the license examination for Third Mate to graduate from Texas A&M University.

Majors

- Bachelor of Science in Marine Transportation (p. 877)

Marine Transportation - BS

This degree combines maritime expertise with business acumen, enabling students to excel as licensed officers and pursue advanced opportunities in global shipping and logistics.

The Department of Maritime Transportation program combines instruction and training in maritime disciplines with studies in the humanities and sciences to ensure students satisfy the institution's higher education accreditation requirements for a Bachelor of Science degree in Marine Transportation. The program also meets all the training and education requirements to prepare students to hold a U.S. Coast Guard Third Mate's license of any gross tonnage upon oceans, steam, or motor vessels and for issuance of an International Standards of Training, Certification and Watchkeeping (STCW) endorsement as Officer-In-Charge of a Navigation Watch (OICNW). Earning a deck merchant mariner credential means students will learn to navigate a vessel, handle cargo, and operate and maintain a variety of ship systems. Skills are learned through extensive theoretical education that is applied practically via navigation, seamanship, ship construction, ship handling, and stability training on campus in state-of-the-art ship simulators as well as aboard training vessels and commercial vessels. The Marine Transportation core provides a broad maritime education to produce a well-trained and knowledgeable ship's officer.

Cadets are also provided with solid fundamentals in business topics related to the maritime industry, ashore and afloat. Cadets take courses which provide a broad understanding of management issues and specific skills required for critical thinking and decision making in business. These skills complement the maritime operations education and strengthen their performance as shipboard officers. Cadets gain a foundation in business administration allowing them to pursue shore-side opportunities in maritime business, logistics, and operations.

The department also offers advanced elective courses in relevant subject areas. These courses can be grouped by cadets interested in pursuing an academic minor to gain a more in-depth exposure to a particular subject area. Students should contact their academic advisor for specific information and advice.

The department's program must also comply with domestic and international laws and standards related to maritime education. The International Convention on Standards of Training, Certification and Watchkeeping for Seafarers (STCW), as amended, sets qualification

standards for masters, officers, and watch-keeping personnel on seagoing merchant ships. The STCW Code and the U.S. Code of Federal Regulations establish the standards that the U.S. Coast Guard uses to license U.S. Merchant Mariners. Courses earning USCG or STCW qualifications, sea-time, or STCW competency certification require a minimum grade of C (70%). In addition, all STCW proficiencies must be satisfactorily completed with a grade of 70% or better (See applicable course outlines available through the department).

Cadets who enroll in and apply to graduate in Marine Transportation must successfully complete the license examination for Third Mate to graduate from Texas A&M University.

Program Requirements

First Year

Fall		Semester Credit Hours

Directed Elective ^{1,4}		3
Semester Credit Hours		13
Total Semester Credit Hours		135

- ¹ Indicates required courses in the Marine Transportation major. These courses will be used to compute the major GPA, which must be at least 2.25.
- ² Indicates license courses leading to a USCG/STCW license endorsement or sea time credit accrual which require a minimum grade of C or better to earn the endorsement or accrual. Students will be required to repeat the course until they earn a grade of C or better. MART 307 GMDSS requires a score of 75 percent or better.
- ³ Indicates a course that satisfies the writing intensive course requirements of the University.
- ⁴ Approved MART Directed Electives include but are not limited to ACCT 229; MARA 304, MARA 342, MARA 346, MARA 348, MARA 360, MARA 363, MARA 373, MARA 401, MARA 402, MARA 424, MARA 435, MARA 440, MARA 450; MART 100-499 (<https://catalog.tamu.edu/undergraduate/course-descriptions/mart/>).
- ⁵ MART 498 must be taken within one year of graduation to receive USCG approval.
- ⁶ Indicates a course that satisfies the oral communication course requirements of the University.

All electives must be chosen in consultation with, and approved by, the student's academic advisor. Unless courses are specifically listed, see University Core Curriculum (p. 26) for a listing of course options for Communication; Mathematics; Life and Physical Sciences; Language, Philosophy and Culture; Creative Arts; American History; Government and Political Sciences; and Social and Behavioral Sciences. The 6-hour University Core Curriculum (p. 26) requirement for International and Cultural Diversity (<https://catalog.tamu.edu/undergraduate/general-information/degree-information/international-cultural-diversity-requirements/>) and Cultural Discourse (<https://catalog.tamu.edu/undergraduate/general-information/degree-information/cultural-discourse-requirements/>) may be met with courses used to satisfy other degree requirements.

MART students are required to earn a grade of C or better in all MART courses, including electives in field.

The total hours may be increased if the student is required to take remedial math, remedial English, foreign language or International and Cultural Diversity (p. 49) courses.

This degree requires full participation in the Texas A&M University Maritime Academy Corps of Cadets as a qualified license option cadet. Refer to the University catalog section for the Texas A&M Maritime Academy for additional information. In addition to the academic requirements outlined here, the cadet must also complete the following requirements to receive the degree:

- Successfully complete required sea service and minimum training cruise requirements.
- Pass a comprehensive professional examination (either the Third Mate Unlimited- Oceans or Third Assistant Engineering Unlimited) administered by the U.S. Coast Guard (USCG).
- Successfully complete all competencies required by the International Convention on Standards for Training, Certification and Watchkeeping (STCW).

Note: STCW competency certifications expire 5 years after completion. If the cadet does not complete the degree within that time period, the cadet will be required to revalidate the expired competency prior to graduation.

University Studies Programs

The College of Marine Sciences and Maritime Studies offers degrees in University Studies. A University Studies degree differs from a traditional "major" in that it consists of a concentration and two minors of 15-18 hours each. The University Studies degree format was created to provide students the flexibility to combine areas of study that are of special interest.

Majors

- Bachelor of Science in University Studies, Oceans and One Health Concentration (p. 879)
- Bachelor of Science in University Studies, Tourism and Coastal Community Development Concentration (p. 880)

University Studies - BS, Oceans and One Health Concentration

Oceans and One Health is an interdisciplinary concentration that allows the student to explore the intersection between human, animal, and environmental health specific to the coastal environment.

This degree program is intended for students who wish to pursue medical, dental, veterinary, or health-professional degrees or those interested in health issues in urbanized coastal communities. It is a flexible but robust program that provides opportunities for students to have a solid background in the physical and biological sciences, environmental science, and/or health-related disciplines. Students can choose their focus from a diverse list of concentration electives and minors to tailor their degree to their professional goals.

Through a partnership with the University of Texas Medical Branch (UTMB) in Galveston our Oceans and One Health students who apply and are admitted to UTMB after completing 95 hours at TAMUG have the option to obtain a minor in Clinical Laboratory Sciences, which includes the first semester coursework for the MS degree in Clinical Laboratory Sciences at UTMB.

This concentration is housed in the Foundational Sciences Department.

Students in this program may choose to pursue secondary (grades 8 thru 12) science teaching certification. Please consult with Department of Foundation Sciences.

Program Requirements

Code	Title	Semester Credit Hours
FSCI 281	Oceans and One Health Sophomore Seminar	1
FSCI 334	One Health in Coastal Regions	3
FSCI 360	Biochemistry	4
FSCI 428	Coastal Development and Human Health	3
MARB 303	Biostatistics	3
or STAT 303 or Statistical Methods		

OCNG 251	The Blue Planet - Our Oceans	4
& OCNG 252	and The Blue Planet - Our Oceans Laboratory	
Select 6 hours from the following:		6
BIOL 351	Fundamentals of Microbiology	
CHEM 383	Chemistry of Environmental Pollution	
MARB 301	Genetics	
MARB 310	Introduction to Cell Biology	
MARB 401	Physiological Ecology of Marine Mammals	
or MARB or Comparative Animal Physiology		
MARB 414	Toxicology	
MARB 430	Coastal Plant Ecology	
MARS 325	Introduction to GIS for Marine Sciences	
OCNG 320	Biological Oceanography	
University and College Requirements		
BIOL 111	Introductory Biology I	4
CHEM 119	Fundamentals of Chemistry I	4
CHEM 120	Fundamentals of Chemistry II	4
ENGL 104	Composition and Rhetoric	3
POLS 206	American National Government	3
POLS 207	State and Local Government	3
PBSI 107	Introduction to Psychology	3
or MARS 21 or Marine Geography		
American history (p. 30)		6
Communication (p. 27)		3
Creative arts (p. 30)		3
Language, philosophy and culture (p. 28)		3
Mathematics (p. 27)		6
Minor 1		15-18
Minor 2		15-18
General electives		15-21
Total Semester Credit Hours		120

All University Studies degree plans require at least 120 hours for completion. A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the college that provides the concentration for the student's degree.

University Studies - BS, Tourism and Coastal Community Development Concentration

This concentration transforms students into a new class of professionals with the knowledge and skills to help coastal communities progress, while maintaining sound ecological and environmental practices.

Students who are currently enrolled at Texas A&M University Galveston campus may submit proposals to enroll as University Studies majors.

The University Studies degree format was created to provide students the flexibility to combine areas of study within either or both campuses that are of special interest. This flexibility may be attractive to students who have particular career paths or post-baccalaureate degree paths in mind.

Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the college that provides the concentration for the student's degree.

Students must submit a Proposed Course Form that lists the courses for the individual degree plan the student hopes to complete to the University Studies admissions committee. The application includes a required 2-3 page essay in which the student can explain how the degree will help the student meet the desired educational and personal goals. Once it is determined that the Proposed Course Form has been completed with appropriate information, it will be reviewed by the department that offers the concentration. Students must be in good academic standing, and they must have good academic standing in previous courses that count toward the area of concentration or minors.

A University Studies major will be considered a student in the department that offers the concentration; the Tourism and Coastal Community Development concentration is housed in the Maritime Studies department. The student's diploma will list Bachelor of Arts or Bachelor of Science in the same place it is currently listed, and University Studies will be listed in the place the major is currently listed. The student's area of concentration and the two minors will be indicated on the student's transcript.

The concentration in Tourism and Coastal Community Development requires major coursework and equips students with the knowledge and skills to help coastal communities progress, while maintaining sound ecological and environmental practices. Such thinking involves an interdisciplinary approach that engenders creative and critical thinking about such issues as maritime public policy, communication, marine science, sociology, and ecology. Students graduate with the capability to guide industry and community toward a path that is both sustainable and economically beneficial. TCD career opportunities include:

- Ecotourism
- Coastal community planning and development
- Environmental policy and legislative affairs
- Sports tourism
- Convention and tourism offices
- Hospitality industry liaison
- Tourism sociological impact researcher
- Ecological economics
- NGOs and international social justice legal centers
- Congressional and legislative assistant

The student must complete a minimum coursework in residence at Texas A&M University Galveston campus.

Program Requirements

Code	Title	Semester Credit Hours
HMGT 302	Application of Tourism Principles	3
HMGT 426	Sustainable Tourism	3

SOCI 205	Introduction to Sociology ¹	3
SOCI 320	Demographic Methods	3
SOCI 404/ RPTS 404	Sociology of the Community	3
Concentration Electives ²		9
University and College Requirements		
ENGL 104	Composition and Rhetoric	3
COMM 203	Public Speaking	3
Mathematics (p. 27)		6
Life and physical sciences (p. 27)		9
Creative arts (p. 30)		3
Language, philosophy and culture (p. 28)		3
Social and behavioral sciences (p. 31)		3
American history (p. 30)		6
POLS 206	American National Government	3
POLS 207	State and Local Government	3
Minor 1		15-18
Minor 2		15-18
General electives ³		18-24
Total Semester Credit Hours		120

¹ Required the first semester in the TCC Program.

² Select from COMM 365/JOUR 365; ECON 202; HMG 331, HMG 340; MARS 280; MAST 425, MAST 484, PHIL 314; POLS 232, POLS 340/PSAA 340; SOCI 312, SOCI 328, SOCI 484.

³ Hours must be in 100-499 courses not used elsewhere.

⁴ All University Studies degree plans require at least 120 hours for completion. A University Studies Degree consists of a concentration of 21-24 hours and two minors of 15-18 hours each. Specific courses may be required for the completion of the hours in the concentrations and minors. Some concentrations and minors contain required courses that have additional prerequisites. One of the two minors must be completed in a college outside of the college that provides the concentration for the student's degree.

TEXAS A&M UNIVERSITY AT QATAR

General Statement

Texas A&M's branch campus in Qatar, part of the 2,500-acre multi-institutional campus known as Education City, formally opened on September 7, 2003, offering undergraduate degree programs in chemical, electrical, mechanical, and petroleum engineering. Texas A&M's engineering program is widely considered among the best in America, and the curricula offered at the Qatar campus are materially the same as those offered at the main campus located in College Station, Texas. Texas A&M University at Qatar is fully funded by the Qatar Foundation for Education, Science, and Community Development and provides a unique opportunity for the University to expand its international presence and provide educational and research opportunities for faculty and students.

Mission Statement

The mission of the Qatar campus is to develop exemplary engineers and leaders through internationally recognized undergraduate and graduate degree programs. Texas A&M at Qatar generates new knowledge and intellectual capital through innovative research and collaborative partnerships that yield sustainable impacts. In all of its efforts, Texas A&M at Qatar serves the needs of the State of Qatar and the region through broad expertise and engagement that expands human capital.

Texas A&M University at Qatar Joint Advisory Board

The Joint Advisory Board (JAB) of Texas A&M University at Qatar was established May 25, 2003, between Texas A&M University and Qatar Foundation for Education, Science and Community Development to provide advice regarding the management and operation of Texas A&M at Qatar the Dean and CEO and to Qatar Foundation. The JAB is primarily responsible for ongoing review and evaluation of the success of Texas A&M at Qatar.

Joint Advisory Board Members

His Excellency Dr. Mohammed bin Saleh Al-Sada — Chairman
Former Minister of Energy and Industry, State of Qatar

Dr. Alan R. Sams — Vice Chair
Provost and Executive Vice President, Texas A&M University

Dr. N. K. Anand
Regents Professor of Mechanical Engineering, Texas A&M University

Engineer Mohamed Salem Al-Marri
Executive Vice President of Projects, Engineering and Procurement Services, QatarEnergy

Dr. Robert H. Bishop
Vice Chancellor for Engineering, The Texas A&M University System
Dean of Engineering, Texas A&M University
Director, Texas A&M Engineering Experiment Station

Mr. Bill Bullock, Jr.
Executive Vice President and Chief Financial Officer, ConocoPhillips

Dr. Mounir Hamdi
Founding Dean, College of Science and Engineering

Hamad Bin Khalifa University

Mr. Taher Hamid
President and General Manager, ExxonMobil Qatar

Mr. Shannon Slocum
President, Eastern Hemisphere, Halliburton

Ex-officio Members

Mr. Francisco J. Marmolejo
Higher Education President and Education Advisor, Qatar Foundation for Education, Science and Community Development (QF)

Dr. César O. Malavé
Dean, Texas A&M University at Qatar

Dr. Patrick Linke, Secretariat
Executive Associate Dean, Texas A&M University at Qatar

Texas A&M University at Qatar Senior Leadership

The leadership of Texas A&M University at Qatar is responsible for the vision of the campus. This vision is simple: to be the premier provider of engineering education in the region, a significant contributor to knowledge internationally and an essential resource to the State of Qatar.

Dr. César O. Malavé, PhD, PE
Dean

Dr. Patrick Linke, PhD
Senior Associate Dean

Dr. Brady Creel, PhD
Assistant Dean for Strategic Communication and Chief of Staff

Dr. Ryan McLawhon, PhD
Assistant Dean for Academic Services and Student Affairs

Ms. Rosalie Nickles
Assistant Dean for Finance, Compliance and Administrative Procedure

Qatar Foundation and Education City

Founded in 1995 by His Highness Sheikh Hamad bin Khalifa Al-Thani, who was then the emir and now is the father emir, the Qatar Foundation for Education, Science and Community Development's guiding principle is that a nation's most valuable natural resource is its people. The foundation's symbol is the Sidra tree, whose deep, solid roots reflect the foundation's regard for Qatari culture and whose fruits carry the seeds of hope for a better tomorrow.

Her Highness Sheikha Moza bint Nasser serves as chairperson of the Qatar Foundation and guides the nonprofit organization's programs and philosophies. Among those philosophies is a commitment to making Qatar a world-renowned center for higher learning.

To that end, the Qatar Foundation's most visionary undertaking, Education City, was founded in 1997. The 2,500-acre complex in Doha, Qatar, boasts state-of-the-art facilities and a forward-thinking agenda that has enticed some of the world's top universities to open branch campuses. In 2003, Texas A&M at Qatar joined Virginia Commonwealth

University School for the Arts and Weill Cornell Medical College in offering undergraduate degree programs at Education City. In 2004, Carnegie Mellon University came aboard, followed by Georgetown University in 2005, Northwestern University in 2008 and HEC Paris in 2011. It is also the home of Hamad bin Khalifa University. In addition, the Qatar Science and Technology Park, an extensive, state-of-the-art research complex, is providing opportunities for research partnerships between business, government and academic institutions.

The missions of Education City are clearly defined: to prepare world-class graduates capable of assuming professional leadership positions in Qatar, throughout the Gulf region, and around the world, and to make Qatar a world leader in higher education and cutting-edge research. Texas A&M at Qatar is proud to take part in achieving the goals of the Qatar Foundation, which so closely resemble its own commitments to education and community service.

General Information (p. 883)

Minors

- Chemistry Minor (p. 323)
- Electrical Engineering Minor (p. 648)
- Geology Minor (p. 388)
- Mathematics Minor (p. 444)
- Physics Minor (p. 471)

Interdisciplinary

- Entrepreneurship Minor (p. 122)

Certificates

The College of Engineering has designed several certificate programs to offer ambitious students the opportunity to go beyond the traditional curriculum and gain specific knowledge in a concentration area. Students are required to consult with their academic advisor prior to submitting an application for a certificate. Enrolling and being accepted into a certificate program does not guarantee registration into required courses or that courses will be offered at Texas A&M University at Qatar. For specific information on each certificate available, visit the College of Engineering website.

Texas A&M Qatar Campus

General Information

General Statement

The accelerating pace of industrial and technological developments has created an ever-increasing demand for highly qualified, professional engineers to maintain the momentum already achieved, and to extend and direct the course of these developments. The ever-expanding population and the increased demands for goods and services have imposed new challenges to provide effective solutions while minimizing unwanted side effects. Engineers recognize that all actions taken have their respective costs, and that solutions to long-standing societal problems are found in careful, thorough planning and study. With a pragmatic background in problem solving, engineers are perhaps best qualified to address society's problems.

Texas A&M University's College of Engineering strives to provide its students with a high-quality education that will prepare them for a wide range of careers at the forefront of the engineering field. The curriculum

is designed to accomplish this by closely integrating cutting-edge basic and applied research with innovative classroom instruction. Texas A&M University's engineering programs are routinely ranked among the best in the U.S., and graduates are highly recruited to provide leadership and innovative solutions to global challenges.

Our faculty members maintain active research programs in a wide range of areas. In addition, our undergraduate students participate in numerous co-op and internship programs, which give them the opportunity to apply their knowledge to real-world challenges in a variety of settings.

At Texas A&M University at Qatar, engineering students take courses in the fundamental disciplines—mathematics, sciences, and liberal arts—that will prepare them for the rigorous technical training that follows. This training is dedicated to specialized studies in one of the four engineering fields offered at Texas A&M University at Qatar. Combining intensive and demanding coursework with practical experience means students are ready to step into their professional fields and make immediate and meaningful contributions.

College Prerequisite Policy

The following prerequisite policy applies to any student in a College of Engineering undergraduate degree program and to any student who seeks admission to an undergraduate degree program in the College of Engineering. This policy is in addition to prerequisite policies imposed by the University (Texas A&M University Student Rules). For complete details concerning this policy, students should contact their Undergraduate Advising Office.

Students must earn a grade of C or better in all courses identified in each College of Engineering undergraduate degree program and any prerequisites for these courses. If a student earns a grade of D or F in any of these courses, the student is required to repeat the course before enrolling in a more advanced course that has the D/F course as a prerequisite. A student may attempt a course no more than three times, including courses graded Q or W but excluding those graded NG, unless approval has been received from their department. A student must complete all prerequisites for a course with a grade of C or better by the start of the semester in which the student plans to enroll in the course.

A student is responsible for checking the prerequisites for each course to ensure the prerequisite requirements have been satisfied. A student who registers for a course for which he/she lacks the necessary prerequisite course(s) and/or the prerequisite grade requirement will be required to drop the course. A student who is told to drop a course and is still enrolled by the deadline set each semester may be administratively dropped by their department. If a student is administratively dropped from a course, the student is responsible for all financial obligations associated with the drop. An administrative drop may adversely impact (including, but not limited to): health insurance benefits, financial aid, athletic eligibility, INS status, veterans' benefits, and eligibility to participate in extracurricular activities.

Other Requirements

All required coursework must be taken for a grade to satisfy requirements for a degree in the College of Engineering. Courses cannot be taken on a satisfactory/unsatisfactory basis to satisfy this requirement.

ENGR^{IX}

ENGR^{IX} is a college-wide, zero-credit-hour required program that is composed of approved engineering-centric activities that meet the criteria of high-impact learning experiences. Undergraduate students

can use their participation in one of these activities to partially satisfy their ENGR^[X] requirement. Full satisfaction of the ENGR^[X] requirement includes participating in an engineering-centric activity and submitting a meaningful, self-reflection that discusses the experience and overall impact on the student's education.

Each engineering department identifies the activities it will accept in satisfying a student's ENGR^[X] requirement. Students should consult with their academic advisor for approved activities.

More information on ENGR^[X] at Texas A&M University at Qatar can be found at <https://www.qatar.tamu.edu/students/academic-services/engrx> (<https://www.qatar.tamu.edu/students/academic-services/engrx/>).

Course Credit

Credit by Examination

Undergraduate students at Texas A&M University at Qatar may earn course credit by demonstrating superior achievement on tests offered through several examination programs. Credit earned by examination does not contribute to a student's grade point ratio. The university awards credit for scores on certain tests published by the Advanced Placement Program (AP), the SAT Subject Tests and the International Baccalaureate (IB) Program. Score minimums to be eligible for credit can be found on the Testing Services website (<https://testing.tamu.edu/>). In some instances, Texas A&M University at Qatar also offers qualified students opportunities to earn credits by taking departmental examinations prepared by the faculty. Additional information concerning credit by examination or departmental examinations may be obtained from the Academic Services Office (<https://www.qatar.tamu.edu/students/academic-services/>).

Registration and Academic Status

Registration for the fall and spring semesters is accomplished at several times. During the fall and spring semesters (in November and April), a preregistration period is held for currently enrolled and readmitted students to register for the next semester. There are periods of announced open registration for students who were unable to preregister during the scheduled preregistration period. New undergraduate students are registered by staff in the Academic Services Office prior to and after Aggie Life 101. Further information concerning registration may be obtained from the academic calendar published in this catalog or from the Office of Records. The schedule of classes is available online.

More information may be found here (p. 79).

Grading System

Because students attend a college or university to extend their education, grades are usually given as an indication of the proficiency of their endeavors. The student's semester grade in a course shall be based upon performance and/or participation in class, exercises and tests, laboratory work and final examination as applicable to the course. The proportionate weight assigned to each of the factors shall be determined by the department administering the course.

More information may be found here (p. 81).

Withdrawal from Texas A&M University at Qatar

An official withdrawal from the university will result when a student drops all in progress and courses not yet started in a particular term. A student who withdraws from the university before the completion of a semester or summer term is required to comply with the official withdrawal procedure. This process is initiated by submitting a request through the Howdy portal; the University Clearance Form (<https://www.qatar.tamu.edu/students/office-of-records/student-forms/>) found on the Office of Records website must also be submitted. Students may not withdraw after the Q-drop deadline. The student's dean will retain the authority to support a student withdrawal after the deadline.

If a student is enrolled in one or more inter/intra-session ("minimesters") or summer terms and chooses to withdraw, all current and future in progress courses for the entire semester will be dropped. The student will be ineligible to register for courses for the remainder of that semester.

STUDENTS RECEIVING FINANCIAL AID or SPONSORSHIPS should contact their sponsor before withdrawing. Withdrawing from the university does not cancel all tuition and fees. Failure to comply may result in owing a substantial sum rather than having a zero balance or refund. In addition, withdrawing may affect immigration status. Please check this carefully before initiating the withdrawal process.

For university policy regarding withdrawal, see the Texas A&M University Student Rules (<http://student-rules.tamu.edu/>).

Transcripts

Students applying for admission to Texas A&M are required to submit transcripts of previous academic work and in some cases, results of standardized tests. The submission of altered documents or the failure to furnish complete and accurate information on admissions forms will be grounds for disciplinary action.

Individuals who previously attended Texas A&M University at Qatar may obtain an official transcript of their completed coursework, provided they have no financial obligations to Texas A&M University, Texas A&M University at Qatar, or the Qatar Foundation. A fee, which according to state law must be paid in advance, will be charged for each copy. During grading and degree posting, official transcripts may be produced for enrolled students only if all courses for that semester or term are shown as in progress (IP) or have all final grades posted.

Current Students

Current students may order an official transcript through the Howdy Portal (<https://howdy.tamu.edu/>).

Former Students

Former students who attended Texas A&M University at Qatar may be able to purchase an official transcript online through the Howdy Portal (<https://howdy.tamu.edu/>).

Graduation Application, Diploma and Commencement

Formal application for a degree at Texas A&M University at Qatar is made by submitting an Application for Graduation via the Howdy Portal. Students must also pay the required diploma/graduation fee and the optional regalia fee (if planning to attend the commencement ceremony) using the online payment portal (<https://tamu.estore.flywire.com/products/?storeCatalog=1202>). Applications for graduation should be submitted by the deadline stated in the Texas A&M University at Qatar academic calendar. Under certain circumstances, an application for a degree may be accepted after the stated deadline.

Students must have settled all financial obligations to the university and Qatar Foundation prior to receiving a diploma.

Texas A&M University at Qatar graduate and undergraduate students completing their degree in July or December will have the opportunity to participate in the commencement ceremony in May, following

the completion of their degree. Students must participate in the commencement ceremony at their home campus.

Language of Instruction

The language of instruction at Texas A&M University at Qatar is English. All teaching, exercise and practical material are provided in English.

Academic Calendar

Texas A&M University at Qatar Calendar

Fall Semester 2025*

August 24	Sunday. First day of fall classes First day to apply for fall graduation Undergraduate change of curriculum period begins. See Student Rule 5.1, https://student-rules.tamu.edu/rule05 (https://student-rules.tamu.edu/rule05/)
August 28	Thursday. Last day to add/drop courses with no record for the fall term, 4:30 PM
September 8	Monday. Official census date (12th class day)
September 18	Thursday. Undergraduate change of curriculum period ends, 4:30 PM
September 25	Thursday. Last day to apply for December graduation, 4:30 PM
September 30	Tuesday. Undergraduate degree plan approval deadline
October 12-16	Sunday-Thursday. Fall Break (No classes. Offices remain open)
October 23	Thursday. Mid-term grades due by noon to the Office of Records
November 18	Tuesday. Bonfire 1999 Remembrance Day
November 20	Thursday. Last day to drop courses with no academic penalty (Q-drop), 4:30 PM Last day to officially withdraw from the university, 4:30 PM
December 7	Sunday. Last day of fall term classes Pursuant to Student Rule 8.3 (https://student-rules.tamu.edu/rule08 (https://student-rules.tamu.edu/rule08/)), no regular course examinations (except for laboratory and one-hour courses) shall be given after the 14th week of classes
December 8	Monday. Reading day (No classes; offices remain open)
December 9-11	Tuesday-Thursday. Fall term final examinations
December 14	Sunday. Fall term final examinations
December 17	Wednesday. Final grades due by 6:00 PM to the Office of Records
December 18	Thursday. Qatar National Day (Offices closed)
December 21-29	Sunday-Monday. Winter break (Offices closed)

Spring Semester 2026*

December 30	Tuesday. Offices reopen after winter break
January 4	Sunday. First day of spring classes First day to apply for spring graduation Undergraduate change of curriculum period begins. See Student Rule 5.1, https://student-rules.tamu.edu/rule05 (https://student-rules.tamu.edu/rule05/)

January 8	Thursday. Last day to add/drop courses with no record for the spring term, 4:30 PM
January 19	Monday. Official census date (12th class day)
January 29	Thursday. Undergraduate change of curriculum period ends, 4:30 PM
February 5	Thursday. Last day to apply for spring graduation, 4:30 PM
February 10	Tuesday. Qatar National Sports Day (No classes; Offices closed)
February 18	Wednesday. Projected first day of Ramadan
February 22-26	Sunday-Thursday. Spring break (No classes; Offices remain open)
March 5	Thursday. Mid-semester grades due by noon, Office of Records
March 22-24	Sunday-Tuesday. Eid Al-Fitr** (No classes; Offices expected to be closed)
April 8	Wednesday. Last day to drop courses with no academic penalty (Q-drop), 4:30 PM Last day to officially withdraw from the university, 4:30 PM
April 21	Tuesday. Aggie Muster
April 22	Wednesday. Last day of spring term classes Redefined Day - Students attend their Tuesday classes Pursuant to Student Rule 8.3 (https://student-rules.tamu.edu/rule08 (https://student-rules.tamu.edu/rule08/)), no regular course examinations (except for laboratory and one-hour courses) shall be given after the 14th week of classes
April 23	Thursday. Reading Day (No classes: Offices remain open)
April 26-29	Sunday-Wednesday. Spring term final examinations
April 30	Thursday. Final grades due by 6:00 PM to the Office of Records
May 2	Friday. Commencement Ceremony
May 5	Tuesday. Qatar Foundation Convocation* Final grades due for all students by 6:00 PM to the Office of Records

Summer Semester 2026*

May 17	Sunday. First day of summer classes First day to apply for summer graduation
May 20	Wednesday. Official census date (4th class day) Last day to add/drop courses with no record for the summer term, 4:30 PM
May 27-31	Wednesday-Sunday. Eid Al-Adha** (Offices expected to be closed)
June 9	Tuesday. Last day to apply for summer graduation, 4:30 PM
June 23	Tuesday. Last day to drop courses with no academic penalty (Q-drop), 4:30 PM Last day to officially withdraw from the University, 4:30 PM
July 6	Monday. Redefined Day – Students attend their Wednesday classes
July 7	Tuesday. Last day of summer term classes

	Redefined Day – Students attend their Thursday classes
July 8-9	Wednesday-Thursday. Summer term final examinations
July 15	Wednesday. Final grades due by noon to the Office of Records

*Dates are subject to change without notice.

^Dates for the Eid holidays are subject to change; however, the University will be closed for a three-day period during Eid.

Tuition and Fees

Tuition and Fees for Texas A&M University at Qatar

Tuition and Fees

As a state institution, Texas A&M has held firmly to the premise that the Qatar campus should remain affordable, and therefore should follow the same tuition and fee structure as that of the main campus. All tuition and fee amounts provided herein represent the most accurate figures available at the time of this publication and are subject to change without notice.

Full details on tuition rates are available at www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships (<http://www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships/>).

Educational expenses for the nine academic months will vary according to personal needs. University rules regarding tuition and fees and all related payments in place at the time of publishing are reflected here. All are subject to change.

Payment of Tuition and Fees

Students must meet all financial obligations to the university by their due dates. Officials at Texas A&M at Qatar calculate the appropriate tuition and fees of each student enrolled, and the Qatar Foundation issues to each student his or her respective tuition statement. Students are then responsible for making payment to the Qatar Foundation's cashier office. Students will receive their invoices via their Texas A&M at Qatar email addresses. Failure to pay amounts owed may result in cancellation of the student's registration and being barred from future enrollment and receiving official transcripts. Qatar Foundation policy requires that tuition and fees be paid as early as possible in the semester. Arrangements for paying tuition in installments should be made with the Academic Services Office and the Qatar Foundation Finance Office.

Financial Obligation for Graduating Students

According to Texas A&M University Student Rules and Chapter § 54.007 (c) of the Texas Education Code, all financial obligations owed to the university and/or to the Qatar Foundation must be paid by the end of the semester. Failure to settle all financial obligations will result in withholding a student's diploma at graduation. Additionally, a block will be placed on the student's account, which will prohibit registration in subsequent semesters and the receipt of official transcripts.

Citations

- Section 14.15 of the Texas A&M University Student Rules states "The student must have settled all financial obligations to the University."

- Chapter § 54.007 (c) of the Texas Education Code states "A student who fails to make payment prior to the end of the semester may be denied credit for the work done that semester."

Cancelling of Registration

Once students have registered for classes and subsequently wish to withdraw from the university prior to the first day of classes, they must do the following to prevent being charged tuition/fees for the term:

1. Submit the online Student Withdrawal request via the Howdy Portal.
2. Once processed, submit the University Clearance Form found on the Office of Records website (<https://www.qatar.tamu.edu/students/office-of-records/student-forms/>).

Following this procedure is especially important for students in order to prevent being assessed tuition/fees for the term even if the student has decided not to attend. **Failure to request cancellation of an unwanted registration may result in grades of F or I in all courses for the semester. The student will be held responsible for paying all fees for the semester, regardless of whether they attended classes.**

Cancellation for Nonpayment of Tuition or Fees

If notified by the Qatar Foundation of nonpayment, the university reserves the right to cancel registration for any semester in which a student is enrolled.

Fees for Special Items or Services

Application Fees

The application-for-admission fee for undergraduate and graduate applicants is: QAR 330, or \$90 USD, and is non-refundable.

Diploma Fee

A non-refundable fee per degree sought is assessed the semester a student applies for graduation. This fee is payable each time a student applies for graduation. A late diploma fee is charged at the rate of QAR 185, or \$50 USD, in addition to the diploma fee above, to those who apply for graduation after the set deadline.

Refund Policy

Withdrawal from Texas A&M at Qatar

Once registered for classes, a student is considered officially enrolled unless otherwise restricted from enrolling. Stopping payment to the Qatar Foundation or allowing the check or bank draft to be returned unpaid by the bank for any reason does not constitute official withdrawal. The withdrawal process is specified in the section "Cancelling of Registration." Failure to follow procedures for withdrawing from the university may result in financial penalties and delays with future enrollment, and coursework may be recorded as incomplete and failed. Once a student registers, they are responsible for the total cost of the tuition and fees assessed if the withdrawal process is not followed properly, and refunds will occur only within the specified refund time periods as listed in the section "Tuition and Fee Adjustments." **Recipients of Qatar Foundation financial assistance should talk to a financial aid representative at the Qatar Foundation before withdrawing. Sponsored students should talk to a representative from their respective sponsoring agency prior to withdrawing.**

Tuition and Fee Adjustments

Fall and Spring Semester and Eight-Week Summer Semester

By 4 p.m. on the last business day 100%
before the first day of class

During the first five class days 80%

During the second five class days	70%
During the third five class days	50%
During the fourth five class days	25%
After the fourth five class days	None

Five-Week Summer Term

By 4 p.m. on the last business day before the first day of class	100%
During the first, second or third class day	80%
During the fourth, fifth or sixth class day	50%
Seventh day of class and thereafter	None

Financial Assistance/Scholarships

The financial assistance program is designed for all students who have a demonstrated financial need for assistance to meet college expenses and who are making satisfactory academic progress, as defined by the policies of the Qatar Foundation Financial Services Office's financial aid agreement that students sign upon receiving financial assistance. Texas A&M at Qatar submits academic program reports to Qatar Foundation, following the guidelines of the Family Educational Rights and Privacy Act (FERPA). University scholarships, on a limited basis, are available to selected students and are also awarded based on academic excellence. Students who are on conduct probation are not eligible for university-awarded scholarships.

In determining the type and amount of financial assistance necessary to meet a student's financial need, Qatar Foundation expects parents to make a maximum effort to assist with college expenses. The financial assistance resources of Qatar Foundation and university scholarships should be viewed only as supplementary to the financial resources of the applicant and family.

Only those students who have been accepted for enrollment into the university may apply for Qatar Foundation financial aid and/or for university scholarships. Information about Qatar Foundation financial aid can be found at www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships (<https://www.qatar.tamu.edu/students/tuition-financial-aid-and-scholarships/>).

Services

Services for Qatar Campus Students

Academic Advising

The primary purpose of academic advising at Texas A&M at Qatar is to assist students in the development of meaningful educational plans that are compatible with their personal abilities and goals. The ultimate responsibility for making decisions about personal goals and educational plans rests with the individual student. The academic advisor assists by helping to identify and assess alternatives and the consequences of decisions. Academic advising is a continuous process of clarification and evaluation.

The objectives for academic advising for the university and its component units include facilitating the following for each student:

- Clarifying personal and career goals
- Developing suitable educational plans
- Selecting appropriate courses and other educational experiences

- Interpreting institutional requirements
- Increasing student awareness of available educational resources
- Evaluating student progress toward established goals
- Enhancing decision-making skills
- Reinforcing responsible student self-direction
- Using referrals to other institutional and community support services, where appropriate

The advising system of Texas A&M at Qatar includes professional staff advisors, faculty liaisons and administrators working together to ensure the total educational development of students by meeting intellectual, academic, personal and career needs. All students are required to meet with an academic advisor each semester in order to register for courses in the subsequent semester, or they will be blocked from registration.

More information can be found at <https://www.qatar.tamu.edu/students/academic-services/academic-advising> (<https://www.qatar.tamu.edu/students/academic-services/academic-advising/>).

The Center for Teaching & Learning

The Center for Teaching & Learning (CTL) welcomes all students seeking to enhance their academic skills and to engage in deep learning. The CTL staff, which includes peer tutors and professional writing consultants, offers one-to-one tutoring and small-group collaborations that cover topics/subjects including writing, mathematics, physics, chemistry, core introductory and sophomore-level engineering courses, presentation skills, and digital composing. The CTL team also provides support for students who want to improve their overall study skills.

Aggie Life 101 for New Freshman and Transfer Students (Orientation)

Each year, Aggie Life 101 is held for undergraduate students entering Texas A&M at Qatar. New students are required to attend Aggie Life 101 after accepting their offer of admission and prior to registering for courses. Families are encouraged to attend Aggie Life 101 with their students and participate in sessions designed especially for them to learn more about what their students will be experiencing as Aggies.

Aggie Life 101 provides students with the tools they will need to begin their careers at Texas A&M at Qatar and offers a chance to learn about the many opportunities available to members of the Aggie community. During this program, new students will meet with academic advisors, register for their first semester courses, and learn the traditions and values of being a Texas A&M Aggie. Since the first year is important to continued success at Texas A&M at Qatar, the program will acquaint new students with student life activities and services available at the university. In addition, Aggie Life 101 offers social programs that provide an opportunity to make connections and interact with other students. Each year, current students volunteer as orientation leaders to help new students and their families learn about Texas A&M at Qatar. For questions concerning Aggie Life 101, please contact the Department of Student Affairs at dsa@qatar.tamu.edu or (+974) 4423-0047.

The Association of Former Students

The Association of Former Students traces its history to the Ex-Cadets Association that formed in 1879, and later to the A&M Alumni Association and Alpha Phi Fraternity. In 1919, a coalition of multiple alumni groups formed under the name The Association of Former Students. Since 1879, much has changed in organization and details, but the fundamental objectives of The Association remain the same: strengthening the Aggie Network, promoting Texas A&M, perpetuating the ties of affection formed

in university days, and serving the student body. More information can be found at <https://www.aggienetwork.com/>.

Campus Safety and Security

- In an emergency situation dial +974.4454.0999 from within Education City or 999 from outside Education City.
- Report incidents immediately to Texas A&M University at Qatar security (333 from a Texas A&M Engineering Building phone or +974.4423.0333 from a mobile or outside phone).

Information on campus safety and security is available here (<https://www.qatar.tamu.edu/other/safety-and-security/>); and the Annual Security Report is located here (<https://www.qatar.tamu.edu/other/safety-and-security/>).

Career Services

The Career Services unit offers advising and assistance to students seeking internships and full-time employment, while supporting the recruiting initiatives of local and international companies. Career Services assists students as they prepare for their job searches by coordinating informational sessions and workshops on topics such as resume writing, interview skills and career readiness. The office also hosts two annual recruiting events, the Career Networking Event at Texas A&M at Qatar and the spring career fair in collaboration with all Education City universities. A variety of guest speakers from industry are hosted each year. Students learn about opportunities in specific companies and on general issues related to the workplace. The Career Services Office provides students with other opportunities for industry engagement ranging from corporate competitions to participation in local and regional conferences.

More information can be found at <https://www.qatar.tamu.edu/students/career-services> (<https://www.qatar.tamu.edu/students/career-services/>)

Critical Incident Response Team

The purpose of the Critical Incident Response Team (CIRT) is to respond to incidents involving Texas A&M at Qatar students and to serve as the university contact when students are involved in incidents away from the campus.

Texas A&M at Qatar is committed to providing an educational climate that is conducive to the personal safety and professional development of each individual. Even with a small university community, Texas A&M at Qatar and the Department of Student Affairs realize that crises, or critical incidents, will occur and that these crises can have a significant effect on the entire university, Education City and local communities. Such critical incidents require an effective and timely response. The Department of Student Affairs has developed the CIRT consisting of Texas A&M at Qatar staff to best respond to these critical student incidents. More information can be found on the CIRT website (<https://www.qatar.tamu.edu/students/student-affairs/student-resources/>) and the team can be reached by calling (+974) 4423-0333.

The goals of the CIRT are as follows:

- To coordinate the university's response to critical incidents involving students while paying special attention to the safety and security needs of members of the university community.
- To offer counseling, guidance and appropriate support to members of the university community, their families and university caregivers.
- To use critical incidents, when appropriate, as teachable moments that may enhance the quality of life for all those affected.

Disability Services

The mission of Disability Services is to ensure accessibility for all students to University programs. The Department of Student Affairs Counseling and Wellness Program administers Disability Services at Texas A&M University at Qatar. Disability Services, with the assistance of Disability Services at Texas A&M University, offers accommodations counseling, evaluation referral, disability-related information, and adaptive technology counseling and equipment for academically related purposes. Disability Services does not offer disability evaluation and/or testing, tutoring, assistance with personal expenses, attendants or scholarships, but referral information is provided.

More information can be found at <https://www.qatar.tamu.edu/students/student-affairs/disability-services> (<https://www.qatar.tamu.edu/students/student-affairs/disability-services/>)

The Engineering Enrichment Program

The Engineering Enrichment Program (EEP) is designed to drive innovation and entrepreneurship and empower students with an exceptional engineering experience. The program offers a series of short training courses throughout the year, providing more hands-on experience in different engineering fields such as electronics, fabrication, machining, and programming. It inspires students and enriches their knowledge with new valuable skills to become experts and make a difference. Students will have the chance to complement their engineering degree with additional certifications and participate in international competitions. This program encourages all students to build competencies and share big ideas, as they work toward becoming unique engineering leaders.

Global Educational Opportunities

Higher education is not immune to the trend of globalization. To adapt to this phenomenon and prepare graduates for an increasingly interdependent global community, Texas A&M University at Qatar is committed to providing global learning opportunities for all students. Whether it be study abroad programs, service-learning trips, research abroad, language training, international conferences or workshops, or global leadership programs, students at Texas A&M University at Qatar can choose from a variety of experiences that can increase their cultural competence, expand their global worldview, and augment their marketability in a rapidly globalizing world. Opportunities include but are not limited to:

Study Abroad

Texas A&M University at Qatar students are able to study in a variety of different locations and countries. The flagship program is an exchange with the Texas A&M main campus in College Station, Texas. This program is offered every semester and during the summer term. The program operates as a cohort model, and students are selected through a competitive application process. Texas A&M University at Qatar assists in arranging flights, housing, transportation and university check-ins.

Texas A&M University at Qatar students are also eligible to participate in programs offered through the Education Abroad Office operated by the main campus. Students can choose from many different disciplines, programs and countries. These programs can differ in length from summer sessions, semester-long programs or intersessions.

Faculty-Led Programs

Every year, Texas A&M faculty lead groups of students on a variety of global academic experiences. Traveling with a faculty mentor, a group of students will travel to an international location, be exposed to engineering topics in a global context, and experience a different culture. Often,

students will be joined by fellow Texas A&M students from the main campus and students from the host institution. Faculty-led programs provide students a rich experience that can impact their academic and professional careers by providing them with unique networking opportunities and an enriching cultural experience that can assist with increasing cultural competence.

Research Exchange for Undergraduates

Texas A&M University is a Tier I research institution. Boasting world-renowned faculty, Texas A&M University is known for producing groundbreaking research. Students at Texas A&M University at Qatar are eligible to participate in the Texas Summer Research Experience, a program designed to partner Texas A&M at Qatar students with a faculty member on the main campus in College Station. This experience allows students to understand engineering research in a global context and contribute to the growing field of knowledge. This program provides students an opportunity to network with faculty members on the main campus, experience a new culture, and have the potential to publish their research.

Information Technology

The mission of the Information Technology (IT) department is to provide a robust, secure and innovative environment that supports Texas A&M University at Qatar's goals in teaching and lifelong learning, research, and engagement. IT strives to embody and uphold Texas A&M's tradition of organizational excellence. The department is comprised of five groups that provide services to faculty, staff and students.

Educational Technology

The Educational Technology group serves faculty and students by promoting and assisting in the use of technology for instruction. Providing systems such as Canvas and Echo360 Lecture Capture, the group also manages classroom technologies and academic software including audiovisual systems.

Enterprise Applications

The Enterprise Applications (EA) group performs business process analysis and develops, administers, and maintains automation to achieve greater efficiencies. EA oversees all electronic communication with the Texas-based administrative systems for student information, financial accounting and payroll, including troubleshooting the processes, applications, and data feeds employed and ensuring secure operation. EA also provides support for many of the university's web resources, including Marhaba, the intranet portal.

Network and Security

The Network and Security group provides and manages the network, telecommunications and security infrastructure of the branch campus. The group ensures compliance with all laws, policies, procedures, guidelines and industry best practices for operating and securing the Texas A&M at Qatar network. The group strives to increase community awareness regarding cyber-security, prevent cyber-attacks, and remediate the effects of viruses, worms, spyware and other malware.

Service Desk

The Service Desk provides a single point of contact for all IT-related queries, service requests and communications. The team provides user orientation and training. The Service Desk proactively communicates information regarding IT services, updates and policies.

Systems Engineering

The Systems Engineering group is responsible for providing computing infrastructure and services. This team maintains and supports mission-

critical systems including physical and virtual infrastructure, directory and authentication services, file and database services, e-mail services, data backups and disaster recovery, data center monitoring, desktop and server security, and print services.

Leadership Activities

The Department of Student Affairs offers a wide variety of leadership development programs that provide an excellent opportunity for students to develop personal leadership in a global and intercultural context. The Student Leadership Exchange Program takes place every spring break and allows a group of student leaders from the Doha campus to visit the College Station campus during their spring break and then a group of student leaders from College Station to visit Doha during their spring break. An emphasis is placed on these students using their Aggie connection to communicate across cultural differences and build leadership. The Department of Student Affairs offers service opportunities each year for students to give back to others. The most well known of these is the Aggie Service Learning Experience, which is an international service trip that allows Aggies to use collective strengths and talents in order to meet an expressed community need while learning about another culture and expanding personal horizons. Additional programs include LeaderShape, which is a six-day residential experience focused on introducing student leadership concepts to all students and challenges them to be a force for change within their student organizations and communities.

The Texas A&M Qatar Campus Library

The Texas A&M at Qatar Campus Library supports the teaching, research and outreach missions of the university in an environment that fosters learning and inquiry. A core professional collection of over 7,000 titles is complemented by a basic collection in the arts and humanities of around 3,000 volumes. The library also features collections dedicated to course reserve textbooks, devices and equipment, visual media, and test prep materials. Students may also request books and journal articles from the five libraries on main campus, where there is a print collection of around 5 million volumes.

Extensive online resources are available to students both within the library and on desktop or mobile devices via remote access. This includes more than 100,000 electronic journals and newspaper titles, over 1,000 databases, and more than 1.3 million electronic books.

Students can locate books and thousands of journals by author, title, subject and keyword using the basic online catalog at catalog.library.tamu.edu (<https://catalog.library.tamu.edu/>). Alternately, they can use the time-saving multi-search tool Quick Search, located on the library homepage, which allows searching of multiple databases at one time.

Experienced librarians are also available at main campus during Texas business hours via online chat, which is a great way to get help when starting a research project. GetItForMe (<https://getitforme.library.tamu.edu/>) is a document delivery service that supplies print books or electronic copies of journal articles and book chapters free of charge to all students. Print books borrowed from the main campus generally arrive in approximately two weeks. Electronic items are usually e-mailed within two working days. Material not available from the main campus libraries can often be obtained from other libraries around the world. Professional librarians are also available on campus to assist with using library tools and resources.

More information and resources can be found at library.qatar.tamu.edu (<https://qatar.library.tamu.edu/>). For questions or requests, please email library@qatar.tamu.edu.

Department of Student Affairs

The mission of the Department of Student Affairs at Texas A&M at Qatar is to create a vibrant campus culture that:

- Embodies the Texas A&M Core Values
- Resonates with Aggie Spirit
- Upholds Qatar's unique, rich culture
- Promotes the holistic and intercultural development of students
- Prepares students for excellence in the engineering discipline in a diverse global society

If students experience problems or difficulties or just need advice about where to go for assistance, they are encouraged to contact the Department of Student Affairs at dsa@qatar.tamu.edu or (+974) 4423-0047.

More information can be found at <https://www.qatar.tamu.edu/students/student-affairs/>

Student Activities

The Department of Student Affairs empowers students to organize into recognized organizations and clubs and plan their own campus activities. Program coordinators within the department advise student organizations and assist them in managing their own events.

Involvement in one or more of the campus's 30-plus organizations can add an important dimension to one's college experience. It is a way to balance one's life, meet new people, and develop interpersonal and leadership skills. In addition, prospective employers often look at what students have accomplished and experienced outside of their coursework. The recognized student organizations include the Institute of Electrical and Electronic Engineers, the American Society of Mechanical Engineers, the Society of Petroleum Engineers, the American Institute of Chemical Engineers, the Society of Women Engineers, the Qatari Student Association, and many others. The recognized student organizations schedule a variety of events such as business meetings, conferences, social events, sponsored guest speakers, workshops and field trips. For all these reasons, Student Affairs supports the belief that students can learn from experiences as well as from textbooks.

Texas A&M at Qatar sports teams are part of the activities offered and include basketball, soccer and cricket for men and basketball and soccer for women. Tryouts will be held for these teams each fall semester.

Student Government Association

The representative governing body for all students at Texas A&M at Qatar is the Student Government Association (SGA). This body is directly responsible for representing the interests of students to the administration and to the entire university community. SGA works with the administration on issues of concern to the general student population.

SGA consists of three representatives elected from each class, committee chairs, a vice president and the student body president. These officers are elected annually in April. SGA can be reached by email at SGA@qatar.tamu.edu.

More information can be found at <https://tamuqatar.campuslabs.com/engage/organization/student-government-association> ([https://](https://tamuqatar.campuslabs.com/engage/organization/student-government-association)

tamuqatar.campuslabs.com/engage/organization/student-government-association/)

Student Wellness and Counseling

The Student Wellness and Counseling Program promote the process of developing a healthy lifestyle. By participating in awareness activities, educational programs and counseling, Aggies can enhance their personal wellness with improved physical health, emotional stability, supportive relationships, spiritual growth and academic/career satisfaction. Services in the Wellness and Counseling Program include academic skills counseling and testing, career counseling and testing, personal counseling, stress management and biofeedback, outreach programming, crisis and consultation, and disability services.

More information can be found at <https://www.qatar.tamu.edu/students/student-affairs/health-and-wellness/>

Ombudsperson

Based in the Office of Student Affairs, the Undergraduate Ombuds assists students with resolving conflicts on an informal and confidential basis. The Ombuds is equally open and accessible to all parties in disputes that may arise when there are differing expectations or conflicting policies regarding academic issues. Such occurrences may happen to undergraduates in their roles as students, employees, interns, or in many of the other roles that affect their education. Students should visit the Department of Student Affairs in the Texas A&M Engineering Building for more information regarding Ombuds services.

On-Campus Housing

Student housing in Education City is available to students enrolled with Texas A&M University at Qatar (TAMUQ) on a first-come, first-served basis.

Living on campus can be an excellent way to make new friends from around the world in what will prove to be one of the most diverse living environments possible. In addition to making new friends, you will find a supportive community environment with staff members who are available to assist you and will offer programs and events for residents. To learn more about living on campus, visit the following website: <http://www.hbku.edu.qa/en/life-hbku/hbku-student-housing> (<http://www.hbku.edu.qa/en/life-hbku/hbku-student-housing/>)

If you wish to live in Education City student housing, please complete the following:

- Submit an online request for housing
- Once the Department of Student Affairs (DSA) receives a student's information, the Qatar Foundation will be notified the TAMUQ student is eligible for housing and wishes to submit an application for a space in the residence halls
- The Qatar Foundation will create an account for the student and send an email invitation to complete the full housing application, including:
 - the Housing Application Form filled in its entirety
 - a scanned passport photo and a scanned copy of the student's passport
 - a scanned receipt showing payment of the refundable Damage Deposit (2000 QR)
 - confirmation of the date of arrival in Doha, Qatar

Please note: If eligible for family housing, additional documentation is required (i.e., visa status, marriage certificate, dependent(s) birth certificate, residency permit, etc.).

Any remaining balance of the housing fees (depending on the housing option selected) will be due upon check in. The Housing Agreement for the academic year will be made available with the Housing Application. Please read this document carefully.

Assignments within student housing are open on a rolling basis where applications are processed in the order they were completed and submitted, and will be done based on eligibility, preference, and availability. There is no deadline to apply, but once all rooms are filled students will be placed on a waiting list and are not guaranteed housing.

There are separate residence halls for male and female students. In addition, students have access to a communal lounge with computers, printers, cable television, DVDs, and video in each residential area. Laundry facilities with washers and dryers are available. Wireless internet is available throughout the residence halls.

Qatar Foundation Housing and Residence Life staff work closely with student residents to maintain a safe, comfortable and healthy living-learning environment. Staff members are available to help students with life transitions associated with living in a community residential environment.

For more information about student housing or to check the status of your application after receiving notification from Qatar Foundation, please email housing@qf.org.qa.

For questions about the application process, contact TAMUQ DSA at dsa@qatar.tamu.edu.

Facilities

Texas A&M University at Qatar Facilities

The Texas A&M University at Qatar engineering building is one of the most advanced facilities for engineering education in the world. Designed by the famous father-son Mexican architect team Legoretta + Legoretta, the 55,000 square meter (592,000 square feet) facility combines modernist elements with traditional Islamic architectural motifs. The building is fully wireless and features high-tech classrooms, teaching laboratories and computer laboratories. The research rotunda provides additional research laboratories that give future Aggie engineers firsthand experience.

The campus's home in Education City also includes a library with a core professional collection of 10,000 titles and a number of journals and DVDs focused on engineering, but also covering the liberal arts, humanities, and basic sciences. Students have access to books and journals from the libraries on the main campus, which include collections that exceed 5 million volumes. Extensive online resources are available to students in the library and remotely, including more than 2 million electronic books and thousands of subscription electronic journals and databases.

Policies

University Statement for Individuals with Disabilities

Texas A&M University (TAMU) is committed to providing reasonable accommodations to qualified students, faculty, staff and visitors and to maintaining an accessible campus community, including making its web sites accessible and usable. Texas A&M University does not discriminate on the basis of an individual's disability and complies with Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act (ADA) as amended.

Students are protected from discrimination regarding access to and participation in Texas A&M's programs and activities. #Texas A&M provides academic adjustments and auxiliary aides to accommodate the needs of students with disabilities, as defined under the law, who are otherwise qualified to meet the institution's academic requirements.

Students with disabilities who would like to request accommodations may contact the following resources based on their campus location:

- Texas A&M University, College of Nursing, College of Dentistry, Irma Lerma Rangel College of Pharmacy-College Station, Naresh K. Vashisht College of Medicine, School of Public Health, Institute of Biosciences and Technology, EnMed Program, Bush School in Washington DC, Mays Business School – CityCentre, TAMU Engineering Academies, TAMU Higher Education Center at McAllen, and Texas A&M University at Galveston should contact Disability Resources (<https://disability.tamu.edu/>) at (979) 845-1637 or disability@tamu.edu.
- Texas A&M University School of Law should contact the Office of Student Affairs at (817) 212-4111 or law-disability@law.tamu.edu to request accommodations.
- Irma Lerma Rangel College of Pharmacy in Kingsville should contact the Disability Resource Center at Texas A&M University - Kingsville at (361) 593-3024 or drc.center@tamuk.edu to request accommodations.
- Texas A&M University College of Veterinary Medicine and Biomedical Sciences in Canyon should contact the Office of Student Accessibility at West Texas A&M University – Canyon at (806) 651-2335 or osa@wtamu.edu.
- Texas A&M University at Qatar (TAMUQ) should contact the campus psychologist, Dr. Steve Wilson +974-4423-0047 or stephen.wilson@qatar.tamu.edu.

Students with a disability who believe they have experienced discrimination may contact Jennifer Smith, Associate Vice President and Title IX Coordinator in the Office of Civil Rights and Title IX, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, civilrights@tamu.edu, or at (979) 458-8407. Students can also contact Julie Kuder, the Texas A&M ADA Coordinator, at (979) 845-8116 or ADA.Coordinator@tamu.edu. The office address is YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843. Allegations of discrimination will be immediately forwarded to the Office of Civil Rights and Title IX for review, investigation, or resolution.

For more information about disability accommodations, see TAMU Student Rule 46, Disability Accommodations in Academic Programs (<http://student-rules.tamu.edu/rule46/>) or TAMUG Student Rule 46, Disability Accommodations in

Academic Programs (https://www.tamug.edu/studentrules/Student_Grievance_Procedures/46_Disability_Accommodations.html).

University Statement on Harassment and Discrimination

Texas A&M University is committed to providing a safe and non-discriminatory learning, living, and working environments for all members of the University community. The University provides equal opportunity to all employees, students, applicants for employment or admission, and the public regardless of race, color, sex (including pregnancy and related conditions), religion, national origin, age, disability, genetic information, and veteran status. Texas A&M University will promptly and equitably investigate and resolve all complaints of discrimination, harassment (including sexual harassment and sex-based misconduct), and related retaliation in accordance with applicable federal and state laws, University rules and standard administrative procedures.

The University's response to allegations of discrimination, harassment, and related retaliation will be 1) prompt and equitable, 2) intended to stop and prevent the recurrence of any harassment, and 3) intended to remedy discriminatory effects, as appropriate. A substantiated allegation of such conduct will result in disciplinary action, up to and including separation from the University. The University's student sanctioning guidance for substantiated allegations of discrimination on the basis of sex, including sexual harassment, sexual violence and related retaliation, can be found here: Title IX Cumulative Sanctioning Matrix. (<https://titleix.tamu.edu/wp-content/uploads/2019/03/title-ix-sanctioning-matrices.pdf>)

Students who have questions or believe they have experienced discrimination, harassment, sexual harassment/sex-based misconduct, and/or related retaliation are encouraged to contact Jennifer Smith, Associate Vice President and Title IX Coordinator, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, civilrights@tamu.edu, or at (979) 458-8167. The Office of Civil Rights & Title IX website can be found at titleix.tamu.edu (<https://titleix.tamu.edu/>).

To report incidents, request accommodations, or inquire about discrimination based on disability, you may contact Julie Kuder, ADA Coordinator, at (979) 845-8116 or ADA.Coordinator@tamu.edu. The office address is YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843, or see the ADA website at <https://orec.tamu.edu/ada/>. Reported allegations of discrimination will be immediately forwarded to the Office of Civil Rights and Title IX for review, investigation, or resolution.

University Statement on Pregnancy and Related Conditions

Title IX prohibits discrimination on the basis of sex, including pregnancy and parental status in educational programs and activities. This includes harassment and discrimination against a student based on pregnancy, childbirth, false pregnancy, or recovery from any of these conditions.

The university is required to provide reasonable accommodations due to pregnancy and related conditions, including excused absences or alternative participation options when accommodations are medically necessary. Students seeking accommodations should contact Julie Kuder, Pregnancy Accommodations Coordinator, at YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843 or (979) 845-8116 or email address TIX.Pregnancy@tamu.edu, or Jennifer Smith, Associate Vice President and Title IX Coordinator, at the YMCA Building Ste 108,

365 Houston St. #108, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. For more information, go to <https://titleix.tamu.edu/>.

Students who have questions or believe they have experienced discrimination and/or harassment based on pregnancy, pregnancy related conditions, or parenting status are encouraged to contact Jennifer Smith, Associate Vice President and Title IX Coordinator, at the YMCA Building Ste 108, 365 Houston St. #108, College Station, TX 77843. Her telephone number is: (979) 458-8167 and email address is civilrights@tamu.edu. The Office of Civil Rights & Title IX website can be found at titleix.tamu.edu (<https://titleix.tamu.edu/>).

Aggie Honor Code

Integrity is a fundamental core value of Texas A&M University at Qatar. Academic integrity requires a commitment by all faculty, staff, and students to:

- Remain constantly focused on the quality of the academic programs;
- Achieve and maintain academic excellence in all courses and programs to assure the value of Texas A&M University at Qatar degrees; and,
- Demand high academic standards from all members of the Aggie community.

All Texas A&M University at Qatar students, graduate and undergraduate, part-time or full-time, in residence or in distance education, are expected to follow the guiding rule of the Aggie Honor Code:

"An Aggie does not lie, cheat or steal, or tolerate those who do."

Upon accepting admission to Texas A&M University at Qatar, a student immediately assumes a commitment to uphold the honor code, to accept responsibility for learning, and to follow the philosophy and rules of the Honor System, which are found at <https://aggiehonor.tamu.edu/>. Students are required to state their commitment on examinations, research papers, and other academic work. Ignorance of the rules does not exclude any member of the Texas A&M community from the requirements or the process of the Honor System.

Academic Services at Texas A&M University at Qatar, in conjunction with the Honor System Office at Texas A&M, is charged with promotion of the honor code and administration of academic misconduct cases. Academic integrity violations are taken seriously, and are adjudicated by the Academic Services Office (ASO). ASO is responsible for educating the campus community regarding the Aggie Honor Code, responding to academic violation reports, and facilitating remediation efforts for students found to be in violation of the Aggie Honor Code. The website, <https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system> (<https://www.qatar.tamu.edu/students/academic-services/aggie-honor-system/>), defines the types of infractions and the possible consequences. Students are urged to review this information.

In addition to adherence to the Honor Code, a student (graduate students in particular) who is completing a thesis, record of study, dissertation, and publication may fall under the additional federal requirements promulgated by the Office of Research Integrity (Scientific Misconduct Regulations – 42 CFR part 50), as well as Texas A&M System Regulations and Texas A&M University Rules (Texas A&M System Regulations – Ethics in Research and Scholarship – 15.99.03, and Texas A&M University rules and standard administrative procedures

– Responsible Conduct in Research and Scholarship – 15.99.03.M1, 15.99.03.M1.01-06).

University Student Rules

Each student enrolled at Texas A&M University Qatar Campus is responsible for being fully acquainted and complying with the Texas A&M University Student Rules. Specific rules, information and procedures are found in publications pertaining to each particular service or department. Students are encouraged to reference the website at <http://student-rules.tamu.edu> (<http://student-rules.tamu.edu/>) for current published rules and regulations.

For information concerning federal and state policies, please reference the appendices (p. 1411) in this catalog.

Division of Arts and Sciences

The Texas A&M Core Curriculum, in compliance with the Texas Core Curriculum, provides students with a foundation of knowledge of human cultures and the physical and natural world, develops principles of personal and social responsibility for living in a diverse world, and advances intellectual and practical skills that are essential for all learning. In support of the Core Curriculum, the Division of Arts and Sciences enhances the individual degree programs and university graduation requirements.

The core curriculum focuses on the development of six skills that have been shown to be effective in preparing students for the job market and their role in a diverse world and democratic society.

- *Critical Thinking Skills* – to include creative thinking, innovation, inquiry, and analysis, evaluation and synthesis of information.
- *Communication Skills* – to include effective development, interpretation and expression of ideas through written, oral and visual communication.
- *Empirical and Quantitative Skills* – to include the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
- *Teamwork* – to include the ability to consider different points of view and to work effectively with others to support a shared purpose or goal.
- *Personal Responsibility* – to include the ability to connect choices, actions and consequences to ethical decision-making.
- *Social Responsibility* – to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.

For additional information, please reference <http://core.tamu.edu>.

Liberal Arts

Liberal Arts

Examples of history show us that a liberal arts education is the foundation of a strong and progressive society. The Division of Arts and Sciences offers students an opportunity to explore the intellectual achievements of humankind through a disciplined and responsible study of issues that have been of enduring importance to people. Thus, courses in liberal arts help students develop sensitivity to the questions and values that confront them in their daily lives. At the same time, skills are built that can be put to use in solving complex problems. One of the division's principal objectives is to achieve the hallmark of an educated person: a fundamental knowledge of the forces that have shaped and continue to direct our cultural identities.

Sciences

Sciences

Chemistry

An understanding of chemistry is critical to an understanding of life and its associated activities. Chemistry and chemical principles profoundly influence the way we live, communicate and interact with one another, so it is little wonder that a strong background in chemistry provides a solid foundation for a variety of careers of major importance in the 21st century. Chemistry is uniquely positioned at the crossroads between the biological and physical sciences. By exploiting their understanding of both realms, chemists and other professionals with strong backgrounds in chemistry have made, and continue to make, major contributions to improve the human condition. Major technological and biological discoveries almost always depend on a fundamental understanding of chemistry, and the pursuit of these discoveries, as a way to improve the world in which we live, drives those who seek to be part of the process.

The Division of Arts and Sciences at Texas A&M at Qatar offers coursework and research in various areas of chemistry, organized into a program leading to a minor in chemistry.

Mathematics

A comprehensive understanding of mathematics is a key foundation to engineering. The Texas A&M at Qatar mathematics curriculum is structured to teach mathematical concepts that enhance students' analytical abilities and to use quantitative mathematical tools and apply them to problems in engineering. Students will learn coordinate systems, vectors, analytical geometry, functions, differentiation and integration techniques, computer algebra systems (Maple and Matlab), multiple integration techniques, gradients, line and surface integrals, Stokes' theorems, differential equations, matrices, determinants, and topics in applied mathematics, such as Fourier series and wavelets with application to data compression and signal processing.

Physics

Physics is the science that investigates and tries to understand the basic laws of nature. In this pursuit, it deals with the entire range of natural

phenomena, from the smallest domain of subnuclear particles to the largest domain of distant objects in the universe.

This breadth of interests is reflected in the type of work pursued by physicists. Some physicists are interested in research on problems that are at the frontiers of knowledge. Some apply this newly acquired knowledge to make practical advances. Still others use knowledge of physics as a basis for careers in teaching or administration.

COURSE DESCRIPTIONS

All undergraduate courses offered in the University are described on each subject page. The course numbering scheme is as follows: 100–199, primarily open to freshmen; 200–299, primarily open to sophomores; 300–399, primarily open to juniors; and 400–499, primarily open to seniors.

Figures in parenthesis before the course description indicate the Texas Common Course Number(s). Those figures identified with an asterisk should reference the Texas Common Course Numbering System (p. 1417) in this catalog for additional information.

The unit of credit is the semester hour, which involves one hour of theory or from two to four hours of practice per week for one semester of 15 weeks. Figures following the credit hours indicate the contact hours per week devoted to theory and practice, respectively. Theory includes recitations and lectures; practice includes work done in the laboratory, shop, drawing room, field or other. When courses are cross-listed, credit cannot be received for both courses. Any course may be withdrawn from the session offerings in case the number of registrations is too small to justify offering the course.

Field trips may be required for which departmental fees may be assessed to cover costs.

AALO - Arabic & Asian Language (AALO)

AALO 285 Directed Studies

Credits 1 to 4. 1 to 4 Other Hours. Individual supervision of readings or assigned projects in an Asian Language, selected for each student individually; written or oral reports. **Prerequisite:** Approval of Arabic and Asian Language Office Director.

AALO 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Selected topics in an identified area of an Asian language. May be repeated for credit. **Prerequisite:** Approval of Arabic and Asian Language Office Director.

AALO 485 Directed Studies

Credits 1 to 4. 1 to 4 Other Hours. Individual supervision of readings or assigned projects selected for each student individually; written or oral reports. **Prerequisite:** Approval of Arabic and Asian Language Office Director.

AALO 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Selected topics in an identified area of an Asian language. May be repeated for credit. **Prerequisite:** Approval of Arabic and Asian Language Office Director.

ACCT - Accounting (ACCT)

ACCT 200 Opportunities in Accounting

Credit 1. 1 Lecture Hour. Introduction to career paths in accounting and assessment aptitudes and interests with respect to these career paths. **Prerequisite:** Business honors, business administration, or accounting majors.

ACCT 209 Survey of Accounting Principles

Credits 3. 3 Lecture Hours. Accounting survey for non-business majors; non-technical accounting procedures, preparation and interpretation of financial statements and internal control. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis.

ACCT 210 Survey of Managerial and Cost Accounting Principles

Credits 3. 3 Lecture Hours. A survey of managerial and cost accounting for non-business majors; accounting responsibility of the manager, job and process cost systems, budgeting, cost-volume-profit analysis for decision-making. May not be used to satisfy degree requirements for majors in business. Business majors who choose to take this course must do so on a satisfactory/unsatisfactory basis. **Prerequisite:** ACCT 209 or ACCT 229.

ACCT 229 Introductory Accounting

Credits 3. 3 Lecture Hours. (ACCT 2301, 2401) Introductory Accounting. Analysis, recording and reporting of business transactions; partnership and corporation accounting; analysis and use of financial statements. **Prerequisite:** Business, Agribusiness, and Maritime Business Administration majors; also taught at Galveston campus.

ACCT 230 Introductory Accounting

Credits 3. 3 Lecture Hours. (ACCT 2302, 2402) Introductory Accounting. Continuation of ACCT 229. Use of budgets; introduction to cost accounting; cost control techniques and methods of measuring performance. **Prerequisites:** ACCT 229; Business, Agribusiness, and Maritime Business Administration majors; also taught at Galveston campus.

ACCT 321 Professional Development Seminar

Credits 2. 2 Lecture Hours. Exposure to professional issues of professional accounting practice using a workshop format. **Prerequisite:** Admission to Professional Program.

ACCT 322 Professional Development Seminar – BBA

Credit 1. 1 Lecture Hour. Exposure to professional issues in the practice of accounting, including potential careers and employers. **Prerequisite:** Accounting major or approval of instructor.

ACCT 327 Financial Reporting I

Credits 3. 3 Lecture Hours. Study of theoretical basis for financial accounting concepts and principles related to financial reporting; emphasizing income measurement and accounting for assets. BBA accounting majors must earn a minimum grade of C for graduation. **Prerequisite:** Grade of C or higher in ACCT 229; admission to upper division in Mays Business School.

ACCT 328 Financial Reporting II

Credits 3. 3 Lecture Hours. Continued study of accounting concepts and principles related to reporting long-debt and owners' equity; including reporting issues of leases, retirement benefits, income taxes and international accounting standards. **Prerequisite:** ACCT 327 with a grade of C or better.

ACCT 329 Cost Management and Analysis

Credits 3. 3 Lecture Hours. Theory, concepts and methods relating to use of information and design of systems to aid managers in planning, controlling, decision making, evaluating performance and reporting financial results. **Prerequisite:** ACCT 315 or ACCT 327 with a grade of C or better.

ACCT 403 Energy Accounting

Credits 3. 3 Lecture Hours. Overview of the oil and gas industry and specialized financial accounting procedures associated with the industry; emphasis on accounting for exploration, development, production, depletion and amortization, joint operations, asset impairment and retirement obligation; includes reserve accounting/disclosure related to the above topics. **Prerequisite:** ACCT 327 with C or better.

ACCT 405 Income Tax

Credits 3. 3 Lecture Hours. Introduction to federal income tax legislation pertaining primarily to corporations and individuals. **Prerequisite:** ACCT 327 with a grade of C or better.

ACCT 407 Auditing

Credits 3. 3 Lecture Hours. Introduction to auditing theory and procedures pertaining to financial statements, in the context of both external auditing, by certified public accountants, and internal auditing; preparation of working papers. **Prerequisite:** ACCT 327 with a grade of C or better.

ACCT 408 Internal Auditing

Credits 3. 3 Lecture Hours. Reading and evaluation of current theory and procedures used by internal auditors; selected case studies; statistical methods of forming auditing judgment. **Prerequisite:** Grade of C or better in ACCT 427.

ACCT 410 Fraud Examination

Credits 3. 3 Lecture Hours. Principles and methodologies of detecting and deterring fraud using accounting, auditing, and investigative skills; includes skimming, larceny, misappropriations, fraudulent statements, interviewing witnesses and support for litigation. **Prerequisites:** ACCT 327 with a grade of C or better; junior or senior classification.

ACCT 421 Critical Communication Skills for Accountants

Credits 3. 3 Lecture Hours. Development of oral and written communication skills necessary for successful careers in public and corporate accounting. **Prerequisite:** ACCT 327 with a grade of C or better.

ACCT 427 Accounting and Financial Information Systems

Credits 3. 3 Lecture Hours. Overall data flow systems emphasizing financial data and computerized systems, for accounting majors; flow and logic concepts, developing meaningful control concepts and data reporting techniques. **Prerequisite:** ACCT 229 with a grade of C or better.

ACCT 430/IBUS 430 Global Immersion in Accounting

Credits 3. 3 Lecture Hours. Combination of classroom work in the spring and a field trip to the selected country in summer; introduction to international opportunities within the public accounting firms; meet with former students to gain a local and corporate view of business in the selected country. May be taken two times for credit. **Prerequisites:** ACCT 327 and approval of instructor. **Cross Listing:** IBUS 430/ACCT 430.

ACCT 445/IBUS 445 International Accounting

Credits 3. 3 Lecture Hours. Introduction and examination of accounting issues unique to multinational enterprises and international business activity; only ACCT 445/IBUS 445 sections count for the accounting coursework requirements for the CPA exam. **Prerequisites:** ACCT 315 or ACCT 327; FINC 341. **Cross Listing:** IBUS 445/ACCT 445.

ACCT 447/FINC 447 Financial Statement Analysis

Credits 3. 3 Lecture Hours. Development of an analytical approach to financial statements, integrating relevant finance and accounting concepts and principles; current topics in financial analysis. **Prerequisites:** Grade of C or better in ACCT 327 and FINC 341. **Cross Listing:** FINC 447/ACCT 447.

ACCT 450 Accounting Ethics

Credits 3. 3 Lecture Hours. Integration of ethical reasoning, objectivity, independence and other core values into the development of a professional accountant; critical analysis of the ethical lapses which have occurred in business and the accounting profession; exploring ways to integrate ethical behavior into professional life. **Prerequisites:** ACCT 427; junior or senior classification.

ACCT 484 Accounting Internship

Credits 0 to 3. 0 to 3 Other Hours. A directed internship in an organization to provide on-the-job training under the supervision of accounting professionals in organizational settings appropriate to the student's professional objectives. May be taken for credit up to three hours. Must be taken on a satisfactory/unsatisfactory basis. **Prerequisites:** Accounting major or approval of department head.

ACCT 485 Directed Studies

Credits 1 to 3. 1 to 3 Other Hours. Directed study of selected problems in the area of accounting not covered in other courses. **Prerequisites:** Accounting major and approval of department head.

ACCT 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of accounting. May be repeated for credit. **Prerequisites:** Admission to upper division in Mays Business School and approval of instructor.

ACCT 491 Research

Credits 1 to 4. 1 to 4 Lecture Hours. Research conducted under the direction of an accounting faculty member in Mays Business School or a faculty member in the Office of Undergraduate Research. May be repeated one time for credit. **Prerequisites:** Junior or senior classification and approval of instructor.

AERO - Aerospace Engineering (AERO)

AERO 201 Introduction to Flight

Credits 3. 3 Lecture Hours. 1 Lab Hour. Standard atmosphere, basic aerodynamic theory, airfoil and wing descriptions, introduction to orbital mechanics, elementary aerospace vehicle performance, and experiential introduction to aerospace engineering. **Prerequisite:** Grade of C or better in ENGR 102 and PHYS 206; grade of C or better in ENGR 216/PHYS 216 or PHYS 216/ENGR 216; grade of C or better in MATH 251 or MATH 253 or concurrent enrollment; Aerospace Engineering majors only.

AERO 211 Aerospace Engineering Mechanics

Credits 3. 3 Lecture Hours. Fundamentals of Newtonian mechanics; static equilibrium of particles, system of particles and rigid bodies; free body diagrams; rectilinear and curvilinear motion of particles; linear momentum; angular momentum; friction; plane motion of rigid bodies; beams and trusses. **Prerequisites:** Grade of C or better in ENGR 102 and PHYS 206; grade of C or better in ENGR 216/PHYS 216 or PHYS 216/ENGR 216; grade of C or better in MATH 251 or MATH 253, or concurrent enrollment; Aerospace Engineering majors only.

AERO 212 Introduction to Aerothermodynamics

Credits 3. 3 Lecture Hours. 1 Lab Hour. Study of thermodynamic properties and processes, heat and work, first and second laws of thermodynamics, ideal cycles for power and refrigeration applications; emphasis on the Brayton jet-engine cycle. **Prerequisite:** Grade of C or better in CHEM 107 and CHEM 117, or CHEM 120; grade of C or better in MATH 251 or MATH 253, or concurrent enrollment; AERO majors.

AERO 214 Introduction to Aerospace Mechanics of Materials

Credits 3. 2 Lecture Hours. 2 Lab Hours. Fundamental concepts for deformable bodies (conservation of linear and angular momentum, kinematics and thermoelasticity); notions of stress and strain and illustrative examples for engineering applications; introduction to experimental methods and reporting, instrumentation and uncertainty analysis; measurement of elastic and thermal material properties.

Prerequisites: Grade of C or better in AERO 211; grade of C or better in MATH 308, or concurrent enrollment.

AERO 221 Analytical Methods for Aerospace Engineering

Credits 3. 3 Lecture Hours. 1 Lab Hour. Matrix operations, Gaussian elimination, linear transformations, coordinate transformations, eigenvalues, eigenvectors, diagonalization, including programming and computer implementation, applied to solid mechanics, fluid mechanics, dynamics and control of air and space vehicles. **Prerequisites:** Grade of C or better in ENGR 102, MATH 152, PHYS 206, and ENGR 216/PHYS 216 or PHYS 216/ENGR 216.

AERO 222 Introduction to Aerospace Computation

Credits 3. 2 Lecture Hours. 2 Lab Hours. Review of basic skills required for developing computer programs and introduction to more advanced concepts in scientific computing to solve aerospace engineering problems; numerical and analytical methods of solving engineering problems involving interpolation and extrapolation; function approximation; numerical differentiation; integration; solutions to linear and non-linear equations and systems of equations; eigenvalues and eigenvectors, numerical integration of differential equations with aerospace engineering applications. **Prerequisites:** Admitted to major degree sequence in aerospace engineering; grade of C or better in ENGR 102; grade of C or better in MATH 308 or concurrent enrollment.

AERO 285 Directed Studies

Credits 0 to 4. 0 Lecture Hours. 0 Lab Hours. 0 to 4 Other Hours. Directed study of special problems in aerospace engineering. **Prerequisites:** Freshman or sophomore classification, or approval of instructor. May be repeated for credit.

AERO 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Selected topics in an identified area of aerospace engineering. May be repeated for credit. **Prerequisite:** Approval of instructor.

AERO 291 Research

Credits 0 to 4. 0 to 4 Other Hours. Research conducted under the direction of faculty member in aerospace engineering. May be taken three times. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

AERO 299 Mid-Curriculum Professional Development

Credits 0. 0 Other Hours. Participation in an approved high-impact learning practice; reflection on professional outcomes from engineering body of knowledge; documentation and self-assessment of learning experience at mid-curriculum point.

AERO 301 Theoretical Aerodynamics

Credits 3. 3 Lecture Hours. Conservation of mass and momentum; Reynolds transport theorem; fundamentals of incompressible flow, rotationality, potential flow, superposition, circulation, lift, thin airfoil theory, elliptic wing theory and induced drag. **Prerequisite:** Grade of C or better in AERO 201, AERO 212; grade of C or better in AERO 222 and MATH 308, or concurrent enrollment.

AERO 303 High Speed Aerodynamics

Credits 3. 3 Lecture Hours. Fundamentals of compressible flow; governing Euler equations; adiabatic and isentropic flow; normal and oblique shocks and expansion waves, moving shocks, shock interactions, wedge and cone flow; supersonic airfoils, exact and thin theory, choked flow and wind-tunnel design, two-dimensional gas dynamics, and method of characteristics. **Prerequisite:** Grade of C or better in AERO 301.

AERO 304 Aerospace Structural Analysis I

Credits 3. 3 Lecture Hours. Three-dimensional beam theory; applications of elasticity theory to beam extension and compression, bending, torsion and transverse shearing; combined loading; analysis of thin-walled structures; stress concentrations; analysis of stability of aerospace structures; elements of structural failure, buckling; structural design considerations. **Prerequisite:** Grade of C or better in AERO 214 and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.

AERO 306 Aerospace Structural Analysis II

Credits 3. 3 Lecture Hours. Work and energy principles; analysis of indeterminate structures by classical virtual work and finite elements; introduction to elastic stability of columns; application of energy methods to determine stresses, strains and displacements in typical aerospace structures; design considerations in aerospace structures. **Prerequisite:** Grade of C or better in AERO 304.

AERO 307 Aerospace Engineering Laboratory

Credits 3. 2 Lecture Hours. 3 Lab Hours. Intermediate and advanced topics in instrumentation, signal conditioning, data acquisition analysis for aerospace-related measurements; emphasis on technical reporting and data presentation; measurements of materials strain, deformation, pressure, velocity and aerodynamic forces; experimental investigations of static and dynamic response of structures; use of nonintrusive optical techniques; uncertainty analysis; linear regression, Fourier transform and power spectra; tests for statistical significance; design of experiments. **Prerequisites:** Grade of C or better in ENGL 103 or ENGL 104; grade of C or better in AERO 222, AERO 301, AERO 304, AERO 310, ECEN 215, or concurrent enrollment.

AERO 310 Aerospace Dynamics

Credits 3. 3 Lecture Hours. Spatial kinematics; general motion of particles; Euler angles; Newton-Euler methods for translation and rotation of rigid bodies; work-energy and impulse momentum principles applied to aerospace systems; Linear theory of free dynamic response of single and multi-degree of freedom systems; frequency response of first and second order systems with instrumentation applications. **Prerequisite:** Grade of C or better in AERO 211 and MATH 308; grade of C or better in AERO 222 or concurrent enrollment.

AERO 321 Dynamics of Aerospace Vehicles

Credits 3. 3 Lecture Hours. Derivation of the nonlinear air and space vehicle dynamics equations; attitude representation with Euler angles and quaternions; forces and moments due to aerodynamics, thrust and gravity gradient; linearization; development of state-space models for aircraft and spacecraft; static and dynamic stability analysis for aircraft and satellites; spin and gravity gradient stabilization; stability derivatives; longitudinal and lateral modes and transfer functions for aircraft; aircraft flying qualities; elements of aircraft configuration design; response to control inputs. **Prerequisite:** Grade of C or better in AERO 301 and AERO 310.

AERO 351 Aerothermodynamics and Propulsion

Credits 3. 3 Lecture Hours. Aerothermodynamics of gases; laws of thermodynamics; equilibrium conditions; mixtures of gases; combustion and thermochemistry; compressible internal flows with friction, heat transfer and shock; turbojet cycle analysis and performance; chemical rockets. **Prerequisite:** Grade of C or better in AERO 303.

AERO 401 Aerospace Design Principles

Credits 3. 2 Lecture Hours. 3 Lab Hours. Study of systems engineering; project lifecycle; stakeholder, concept of operations (CONOPS) & requirements definition; cost assessment; risk management; trade studies; decomposition and design of an aerospace system; engineering ethics; technical communications. **Prerequisite:** Grade of C or better in AERO 306, AERO 307, AERO 321, and AERO 351, or concurrent enrollment.

AERO 402 Aerospace Systems Design

Credits 2. 6 Lab Hours. Continuation of AERO 401; detailed design; subsystem integration; realization of the system through prototyping, modeling, and/or simulation; verification and validation through experimentation and analysis; documentation and presentation of results. **Prerequisite:** Grade of C or better in AERO 306, AERO 307, AERO 321, AERO 351, and AERO 401.

AERO 404 Mechanics of Advanced Aerospace Structures

Credits 3. 3 Lecture Hours. Advanced analysis techniques for aerospace structures; material anisotropy, plasticity, fatigue and fracture; laminated materials; solution of plane elasticity, plate and multi-component structural configurations; buckling of beams and plates; application of finite element analysis. **Prerequisites:** Grade of C or better in AERO 304 and junior or senior classification.

AERO 405 Aerospace Structural Design

Credits 3. 3 Lecture Hours. Overall structural integrity of complete aerospace systems; structures subjected to critical loads; design considerations in aerospace structures. **Prerequisite:** Grade of C or better in AERO 306.

AERO 411 Applications of Fracture Mechanics to Aerospace Structures

Credits 3. 3 Lecture Hours. Foundations of linear elastic fracture mechanics of aerospace structure; calculation of stress intensity factors and energy release rates; crack growth under fatigue loading; ASTM standards for fracture testing; the role of fracture mechanics in the analysis and design of aerospace structures. **Prerequisite:** AERO 304 or equivalent with a grade of C or better.

AERO 413 Aerospace Materials Science

Credits 3. 3 Lecture Hours. Relationship between aerospace engineering material properties and microstructure; mechanical and thermal properties; environmental degradation; mechanical failure. **Prerequisite:** Grade of C or better in AERO 304.

AERO 414 Human Performance in Aerospace Environments

Credits 3. 3 Lecture Hours. Current physiological and psychological aspects affecting human performance during space missions using a quantitative approach and engineering methods. **Prerequisite:** Grade of C or better in AERO 321.

AERO 415 Computational Fluid Dynamics for Aerospace Applications

Credits 3. 3 Lecture Hours. Present methods for solving internal and external flow problems for inviscid and viscous compressible flow; Euler, Navier-Stokes and Large Eddy Simulation solvers, boundary conditions formulation, and basics of parallel processing. **Prerequisite:** Grade of C or better in AERO 303 and AERO 351.

AERO 417 Aerospace Propulsion

Credits 3. 3 Lecture Hours. Air breathing propulsion; design and analysis of inlets, compressors, combustors, turbines and nozzles; application to aeronautical and ground transportation. **Prerequisite:** Grade of C or better in AERO 351.

AERO 419 Chemical Rocket Propulsion

Credits 3. 3 Lecture Hours. Nozzles and heat transfer in rockets, liquid and solid propellant systems; combustion and combustion stability; flight performance including trajectories, multistaging and exchange rate curves; rocket testing. **Prerequisite:** Grade of C or better in AERO 351.

AERO 420 Aeroelasticity

Credits 3. 3 Lecture Hours. Classical analysis of fundamental aeroelastic phenomena with application to aerospace vehicles; flutter, divergence, control effectiveness. **Prerequisites:** Grade of C or better in AERO 303, AERO 306, and AERO 310.

AERO 422 Active Controls for Aerospace Vehicles

Credits 3. 3 Lecture Hours. Introduction to the Theory of Automatic Control specifically applied to aerospace vehicles; techniques for analysis and synthesis of linear control systems, stability criteria, systems response and performance criteria; design studies of active controls to improve aerospace vehicle performance. **Prerequisite:** Grade of C or better in AERO 321.

AERO 423 Orbital Mechanics

Credits 3. 3 Lecture Hours. Two-body problem, restricted three-body problem, orbital perturbations, orbital maneuvers, interplanetary trajectories, orbit determination and other selected topics. **Prerequisite:** Grade of C or better in AERO 310.

AERO 424 Spacecraft Attitude Dynamics and Control

Credits 3. 3 Lecture Hours. Introduces fundamental concepts of satellite attitude dynamics and control; includes derivations of environmental disturbances due to gravity gradient, aerodynamic, and solar radiation pressure; includes treatments of attitude control subsystems, such as thrusters, reaction wheels, CMGs, and magnetic torquers, and their designs. **Prerequisites:** Grade of C or better in AERO 321.

AERO 425 Flight Test Engineering

Credits 3. 2 Lecture Hours. 3 Lab Hours. Application of performance and stability and control theory to flight test measurements; standard atmosphere and airspeed equations for pilot-static system calibrations; flight test methods for evaluating performance, stability and control, and stall-spin characteristics; laboratory practice in planning and conducting small flight test project. **Prerequisite:** Grade of C or better in AERO 321.

AERO 426 Space System Design

Credits 3. 3 Lecture Hours. Introduces prevailing practices and processes used in modern space system design; applies knowledge in component engineering disciplines to a design challenge of interest to NASA or DoD; utilizes instruction in systematic methods of design and on dynamics of teamwork; when possible concludes with detailed design using an engineering design facility. **Prerequisites:** Grade of C or better in AERO 306, AERO 321, AERO 351.

AERO 428 Electromagnetic Sensing for Space-Borne Imaging

Credits 3. 3 Lecture Hours. Study IR and Visible range imaging systems to obtain high resolution imaging of objects from space; this area has numerous applications and areas of advanced development; following instruction in needed background on optics, telescopes, and interferometry, perform preliminary design of imaging system with a different imaging design offered each year. **Prerequisites:** Grade of C or better in AERO 306, AERO 321, AERO 351.

AERO 430 Numerical Simulation

Credits 3. 3 Lecture Hours. Numerical and analytical simulation of physical problems in sciences and engineering using applied methods; developing and using numerical techniques for physical problems described by nonlinear algebraic equations, ordinary and partial differential equations. **Prerequisite:** Grade of C or better in AERO 222 or MATH 417.

AERO 435 Aerothermochemistry

Credits 3. 3 Lecture Hours. Composition of chemically reacting gases (air and propellant); thermodynamic functions based on classical and quantum mechanical theories; calculation of gas temperatures; equilibrium, frozen and non-equilibrium flows through nozzles and shock waves. **Prerequisite:** Grade of C or better in AERO 303.

AERO 436/ISEN 432 Human Factors Engineering for Aerospace Designs

Credits 3. 3 Lecture Hours. Physiological and psychophysiological issues encountered in aviation and space environments and their effect on human cognitive and physical performance; survey methods for human workload and performance evaluations; apply human-systems design principles to an aerospace design project. **Prerequisites:** Junior or senior classification. **Cross Listing:** ISEN 432/AERO 436.

AERO 438/MEEN 407 Intuitive and Counter-Intuitive Mechanisms

Credits 3. 2 Lecture Hours. 2 Lab Hours. Spatial descriptions and transformations; forward and inverse kinematics of mechanical manipulators; manipulation; dexterity and manipulability; principles of manipulator-mechanism design; mobility; motion planning; control, reachability and complexity measures; workspace analysis. **Prerequisites:** Senior classification. **Cross Listing:** MEEN 407/AERO 438.

AERO 440 Cockpit Systems and Displays

Credits 3. 3 Lecture Hours. Design, development, and implementation of cockpit systems and multi-function displays; cockpit system requirements and specifications; human-machine interfaces, Flight Management Systems, navigation and guidance systems; 3-D real-time displays of weather, traffic, and terrain; characteristics and missions of air vehicles; project design and cost analysis. **Prerequisite:** Grade of C or better in AERO 321 or junior or senior classification in computer science.

AERO 445 Vehicle Management Systems

Credits 3. 3 Lecture Hours. Introduction to vehicle management systems for manned and unmanned air and space vehicles; system centric concepts, requirements definition, specifications, and architectures; reliability analysis, health monitoring, and mission management; SISO digital design of integrated flight control, propulsion control and structural control; introduction to vehicle autonomy; design and analysis methods, industrial examples. **Prerequisite:** Grade of C or better in AERO 422.

AERO 451 Human Spaceflight Operations

Credits 3. 3 Lecture Hours. Essential aspects of human spaceflight operations as performed by NASA; in-depth understanding of the state-of-the-art in spacecraft operations, including spacecraft systems, ground and launch operations, mission management and on-orbit activities such as science, robotics, spacewalking and human health maintenance; applications to future space systems. **Prerequisite:** Grade of C or better in AERO 310 or equivalent; senior classification.

AERO 452 Heat Transfer and Viscous Flows

Credits 3. 3 Lecture Hours. Navier-Stokes and boundary layer equations; exact and approximate solutions; laminar boundary layers; basic concepts of transition and turbulence; turbulent boundary layers; one and two dimensional heat transfer; methods for steady and transient heat conduction; thermal boundary layers; convection; radiation. **Prerequisite:** Grade of C or better in AERO 303 and AERO 351.

AERO 455 Helicopter Aerodynamics

Credits 3. 3 Lecture Hours. Hovering theory, hovering and vertical flight performance, factors affecting hovering and vertical flight performance, auto-rotation in vertical descent, concepts of blade motion and control, aerodynamics of forward flight, forward flight performance, operational envelope and introduction to conceptual design of helicopters. **Prerequisites:** Grade of C or better in AERO 222, AERO 301, and AERO 310.

AERO 472 Airfoil and Wing Design

Credits 3. 3 Lecture Hours. Subsonic airfoil design and analysis, subsonic wing design and analysis, swept and delta wings, vortex lift, transonic flow methods, viscous transonic phenomena, transonic airfoil and wing design, optimization and advanced topics such as supersonic panel methods. **Prerequisite:** Grade of C or better in AERO 303.

AERO 478 Low Temperature Plasma - Theory, Modeling, Applications

Credits 3. 3 Lecture Hours. Basic theory and fundamentals of low-temperature plasma, elements of plasma kinetic theory, equilibrium and non-equilibrium plasma, modeling approaches, plasma discharges. **Prerequisites:** Grade of C or better in AERO 303 and MATH 308.

AERO 481 Seminar

Credit 1. 1 Lecture Hour. Readings, reports, conferences and discussion. Must be taken on a satisfactory/unsatisfactory basis. **Prerequisite:** Senior classification in aerospace engineering.

AERO 485 Directed Studies

Credits 0 to 4. 0 to 4 Other Hours. Special problems in aerospace engineering assigned to individual students or groups. **Prerequisite:** Junior or senior classification or approval of instructor.

AERO 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Selected topics in an identified field of aerospace engineering. May be repeated for credit. **Prerequisite:** Approval of instructor.

AERO 491 Research

Credits 0 to 4. 0 to 4 Other Hours. Research conducted under the direction of faculty member in aerospace engineering. May be repeated 3 times for credit. **Prerequisites:** Junior or senior classification and approval of instructor.

AERS - Aerospace Studies (AERS)

AERS 101 Air Force Heritage and Values I

Credit 1. 1 Lecture Hour. Introduction to the Department of the Air Force (DAF) and Air Force Reserve Officer Training Corps (AFROTC); overview of officership, officer opportunities and benefits, and DAF heritage and values and operations. **Prerequisites:** Concurrent enrollment in AERS 105.

AERS 102 Air Force Heritage and Values II

Credit 1. 1 Lecture Hour. Continuation of AERS 101; introduction to the Department of the Air Force (DAF) and Air Force Reserve Officer Training Corps (AFROTC); overview of officership, officer opportunities and benefits, and DAF heritage and values and operations. **Prerequisites:** AERS 101; concurrent enrollment in AERS 106.

AERS 105 AFROTC Leadership Lab I

Credit 1. 2 Lab Hours. Dynamic leadership development activities designed to prepare prospective Department of the Air Force second lieutenants and complement the AFROTC academics with experiential learning. May be taken six times for credit. Must be taken on a satisfactory/unsatisfactory basis.

AERS 106 AFROTC Leadership Lab II

Credit 1. 2 Lab Hours. Continuation of AERS 105; dynamic leadership development activities designed to prepare prospective Department of the Air Force second lieutenants and complement the AFROTC academics with experiential learning. May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis. **Prerequisites:** AERS 105.

AERS 201 Team and Leadership Fundamentals I

Credit 1. 1 Lecture Hour. Fundamental survey of leadership and team building through topics such as followership, listening, ethical decision-making, and conflict management. Must be taken on a satisfactory/unsatisfactory basis. **Prerequisites:** Grade of C or better in AERS 102; concurrent enrollment in AERS 105; or approval of department head.

AERS 202 Team and Leadership Fundamentals II

Credit 1. 1 Lecture Hour. Continuation of AERS 201; fundamental survey of leadership and team building through topics such as followership, listening, ethical decision-making, and conflict management.

Prerequisites: Grade of C or better in AERS 201; concurrent enrollment in AERS 106 if seeking a military contract; or approval of department head.

AERS 303 Leading People and Effective Communication I

Credits 3. 3 Lecture Hours. In-depth look at leadership through topic-guided discussions and verbal communications in Department of the Air Force formats; leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, and leadership ethics with case studies of leadership and management situations as a means of demonstrating and exercising practical application of concepts.

Prerequisites: Grade of C or better in AERS 202; concurrent enrollment in AERS 105 if seeking a military contract; or approval of department head.

AERS 304 Leading People and Effective Communication II

Credits 3. 3 Lecture Hours. Continuation of AERS 303 with an in-depth look at leadership through topic-guided discussions and verbal communications in Department of the Air Force formats; leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, and leadership ethics with case studies of leadership and management situations as a means of demonstrating and exercising practical application of concepts. **Prerequisites:** Grade of C or better in AERS 303; concurrent enrollment in AERS 106 if seeking a military contract; or approval of department head.

AERS 403 National Security Affairs, Leadership Responsibilities, and Commissioning Preparation I

Credits 3. 3 Lecture Hours. Examination of the Constitution, national security processes, the military's role in society, and the military justice system; preparation for life as a second lieutenant in the Department of the Air Force. **Prerequisites:** Grade of C or better in AERS 304; concurrent enrollment in AERS 105 if seeking a military contract; or approval of department head.

AERS 404 National Security Affairs, Leadership Responsibilities, and Commissioning Preparation II

Credits 3. 3 Lecture Hours. Continuation of AERS 403; examination of the Constitution, national security processes, the military's role in society, and the military justice system; prepares students for life as a second lieutenant in the Department of the Air Force. **Prerequisites:** Grade of C or better in AERS 403; concurrent enrollment in AERS 106 if seeking a military contract; or approval of department head.

AERS 485 Directed Studies

Credits 1 to 3. 1 to 3 Other Hours. Directed study of problems in the field of aerospace studies. **Prerequisites:** Grade of C or better in AERS 404; Air Force ROTC Cadet; approval of department head.

AFST - Africana Studies (AFST)

AFST 201 Introduction to Africana Studies

Credits 3. 3 Lecture Hours. Introduction to the field of Africana Studies; interdisciplinary approach drawing from history, philosophy, sociology, political studies, literature and performance studies; explores the African foundational relationship to and connections with its diaspora populations; covers Africa, the United States, the Caribbean, Europe and South America; also taught at Qatar.

AFST 204/ENGL 204 Introduction to African-American Literature

Credits 3. 3 Lecture Hours. Introduction to the writings of African Americans from the 18th century to the present, emphasizing the major themes and traditions; ENGL-204 also taught at Galveston campus. **Cross Listing:** ENGL 204/AFST 204.

AFST 205/ENGL 205 Introduction to Africana Literature

Credits 3. 3 Lecture Hours. Works, literary movements and genres of authors of African descent in the Americas, Europe and Africa. **Cross Listing:** ENGL 205/AFST 205.

AFST 206/PBSI 206 Black Psychology

Credits 3. 3 Lecture Hours. Critical examination of psychological experience, theories, and methods from perspectives grounded in the "Black experience." **Cross Listing:** PBSI 206/AFST 206.

AFST 209/PBSI 209 Psychology of Culture and Diversity

Credits 3. 3 Lecture Hours. Introduction to various issues surrounding an increasingly interconnected and globalized world by critically examining the dynamic relationship between psychological processes and diverse (e.g., motivation, memory, self, prejudice) socio-cultural contexts. **Prerequisite:** PBSI 107. **Cross Listing:** PBSI 209/AFST 209.

AFST 225 Reframing Public Memory - Texas and the African American

Credits 3. 3 Lecture Hours. Exploration of the connections between Texas and the African American cultural lens and their impact on the understanding of memory and mythmaking; examination through class lectures, readings, viewings, visits, reaction/research papers, and individual projects of public memory and the creation, maintenance, promotion, contestation, erasure, and remaking of ideas of race, dispositions, behaviors, and histories in Texas and globally.

AFST 252/PHIL 252 Introduction to Hip-Hop Philosophy

Credits 3. 3 Lecture Hours. Introduction to philosophy by way of the major themes and subjects of Hip-Hop; critical advocacy of various philosophical ideals. **Cross Listing:** PHIL 252/AFST 252.

AFST 261/INTA 261 Contemporary Issues in the Global South

Credits 3. 3 Lecture Hours. Exploration of current political and cultural issues in the Global South. May be repeated once for credit. **Cross Listing:** INTA 261/AFST 261.

AFST 285 Directed Studies

Credits 0 to 4. 0 to 4 Other Hours. Directed studies in the field of Africana Studies. May be taken two times for credit. **Prerequisite:** AFST 201; Freshman or sophomore classification; approval of instructor and director.

AFST 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in Africana Studies. May be repeated for credit.

AFST 291 Research

Credits 0 to 3. 0 to 3 Other Hours. Research conducted under the direction of a faculty member in Africana Studies. May be taken three times for credit. **Prerequisites:** AFST 201; freshman or sophomore classification; and approval of instructor.

AFST 300/HIST 300 Blacks in the United States, 1607-1877

Credits 3. 3 Lecture Hours. Blacks in the United States from the colonial period to 1877; the slave trade, slavery, free blacks and the impact of the Civil War and Reconstruction on blacks. **Prerequisite:** Junior or senior classification. **Cross Listing:** HIST 300/AFST 300.

AFST 301/HIST 301 Blacks in the United States Since 1877

Credits 3. 3 Lecture Hours. Blacks in the United States from the end of Reconstruction to the present; ideologies of black leaders, disfranchisement, lynching and the quest for equality in the 1950s and 1960s. **Prerequisite:** Junior or senior classification; HIST-301 also taught at Qatar campus. **Cross Listing:** HIST 301/AFST 301.

AFST 302 Gateway Course

Credits 3. 3 Lecture Hours. Gateway to a series of courses offered for the minor in Africana Studies; explores topics such as Afrocentrism, postcolonial studies, black cultural studies, black feminist theory for a close study of issues among African and African diaspora populations in Africa, the United States, Caribbean, Europe and South America.

AFST 303 Psychology of Women of Color

Credits 3. 3 Lecture Hours. Interdisciplinary theories to study the unique yet intersectional experiences of women from different racial groups, ethnicities, nationalities and cultural backgrounds; scholarly research from the diversity science field; contemporary topics that have developed in a global context; examination of complex issues, which affect women of color across the lifespan. **Prerequisites:** Grade of C or better in AFST 201, PBSI 107, or WGST 200, or approval of instructor. **Cross Listing:** PBSI 303 and WGST 303.

AFST 317/SOCI 317 Racial and Ethnic Relations

Credits 3. 3 Lecture Hours. Status of racial and ethnic groups such as Native Americans, African Americans, Latino Americans, Asian Americans, European Americans, and other groups in the political, economic, legal and social systems of the United States. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** SOCI 317/AFST 317.

AFST 323/SOCI 323 Sociology of African Americans

Credits 3. 3 Lecture Hours. Major elements of the Afro-American subculture in relation to white American society and its major social institutions. **Prerequisites:** SOCI 205. **Cross Listing:** SOCI 323/AFST 323.

AFST 324 Africana Social Sciences

Credits 3. 3 Lecture Hours. Exploration of a significant topic pertaining to Africa and/or its diaspora in the social sciences. **Prerequisite:** Junior or senior classification.

AFST 325 Africana Humanities

Credits 3. 3 Lecture Hours. Exploration of a significant topic pertaining to Africa and/or its Diaspora in the humanities and arts. **Prerequisite:** Junior or senior classification.

AFST 326 Africana Popular Culture

Credits 3. 3 Lecture Hours. Dynamics of popular culture and classic theories of society; popular and public cultural forms in context of globalization and the Africana Diaspora. **Prerequisite:** Junior or senior classification or approval of instructor.

AFST 327/MUSC 327 Popular Musics in the African Diaspora

Credits 3. 3 Lecture Hours. Examination of a range of popular musics from the twentieth century that have emerged in conjunction with the historical global spread of peoples and cultures from the African continent; technical knowledge about music is not required; focus on social and cultural contexts for popular music. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** MUSC 327/AFST 327.

AFST 329/ENGL 329 African-American Literature Pre-1930

Credits 3. 3 Lecture Hours. Major works of the African-American literary tradition from the 18th century to 1930 studied within cultural and historical context. **Prerequisites:** 3 credits of literature at 200-level or above. **Cross Listing:** ENGL 329/AFST 329.

AFST 338/COMM 338 Critical Race Discourse

Credits 3. 3 Lecture Hours. Critical analysis of communication and dialogue on race; causes and symptoms of structural racism; social/racial hierarchies as they influence and are influenced by communication and dialogue. **Prerequisites:** Junior or senior classification or approval of instructor. **Cross Listing:** COMM 338/AFST 338.

AFST 339/ENGL 339 African-American Literature Post-1930

Credits 3. 3 Lecture Hours. Major works of the African-American literary tradition from the 1930s to the present studied in their cultural and historical context. **Prerequisites:** 3 credits of literature at 200-level or above. **Cross Listing:** ENGL 339/AFST 339.

AFST 344/HIST 344 History of Africa to 1800

Credits 3. 3 Lecture Hours. Origins of humankind in Africa; development and spread of pastoralism, agriculture and iron-working; formation of states and empires; impact of Christianity and Islam; rise of international trade in gold, ivory and slaves; African diaspora. **Prerequisite:** Junior or senior classification. **Cross Listing:** HIST 344/AFST 344.

AFST 345/HIST 345 Modern Africa

Credits 3. 3 Lecture Hours. Survey of Africa since 1800; pre-colonial African states and societies; establishment and impact of European colonial rule; rise of nationalist movements; achievement of independence; problems of political stability and economic development in contemporary Africa; South Africa's apartheid regime and its opponents. **Prerequisite:** Junior or senior classification. **Cross Listing:** HIST 345/AFST 345.

AFST 346/HIST 346 History of South Africa

Credits 3. 3 Lecture Hours. Selected themes in the history of South Africa from the African Iron Age to the Apartheid regime; history of race relations in the 19th and 20th centuries and the rise of modern industrial state. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** HIST 346/AFST 346.

AFST 352/PHIL 352 Africana Philosophy

Credits 3. 3 Lecture Hours. Presentation of the seminal ideas of several influential Africana thinkers; recovery of the neglected traditions in which these thinkers locate themselves. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** PHIL 352/AFST 352.

AFST 353/PHIL 353 Radical Black Philosophies of Race and Racism

Credits 3. 3 Lecture Hours. Critical evaluation of white supremacy, colonialism and the modern construction of race; examination of the historical background for contemporary theories of race. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** PHIL 353/AFST 353.

AFST 357/HIST 357 Out of Africa: The Black Diaspora and the Modern World

Credits 3. 3 Lecture Hours. History and cultures of the peoples of the African Diaspora from the fourteenth through the nineteenth centuries; social, political, and economic impact on Africa, the Americas, Europe, and the Arab World; emphasis on race, gender, identity, and migration. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** HIST 357/AFST 357.

AFST 362/HIST 302 Women and War in the African Diaspora

Credits 3. 3 Lecture Hours. Case studies of women and war in the African diaspora in a wide historical and comparative context; social, economic, and cultural influence of war on women's lives; women as victims, combatants, and refugees; historical construction of race, ethnic and gender identity during times of conflict. **Prerequisite:** Junior or senior classification. **Cross Listing:** HIST 302.

AFST 377 Africana Women's History

Credits 3. 3 Lecture Hours. Black women's history from the precolonial era to the present; emphasis on the cultural, political, legal, economic, sexual, social, and religious factors that shaped their experiences across the African Diaspora and the world. **Prerequisites:** Junior or senior classification. **Cross Listing:** HIST 377 and WGST 377.

AFST 379/ENGL 379 Postcolonial Literatures

Credits 3. 3 Lecture Hours. Exploration of key terms, themes and debates within global literature written by colonized, occupied and diasporic peoples. **Prerequisites:** 3 credits of literature at the 200-level or above. **Cross Listing:** ENGL 379/AFST 379.

AFST 391 Africana Feminisms

Credits 3. 3 Lecture Hours. Exploration of a significant topic in feminist theory by and about women from Africa and/or its Diaspora, from various disciplinary perspectives and historical periods, and with application to societal debates and controversies. **Prerequisite:** Junior or senior classification.

AFST 393/ENGL 393 Studies in Africana Literature and Culture

Credits 3. 3 Lecture Hours. Literary movements, genres, groups of authors, topics or issues in the literature and culture of people of African descent. **Prerequisites:** 3 credits of literature at 200-level or above; junior or senior classification or approval of instructor. **Cross Listing:** ENGL 393/AFST 393.

AFST 398/FILM 398 Africana Cinema

Credits 3. 3 Lecture Hours. Overview of African cinema; historical survey of cinema from Africa and the African Diaspora; introducing films produced in several geographical regions and reflecting different filmmaking traditions. May be taken two times for credit. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** FILM 398/AFST 398.

AFST 400/GLST 400 Global Africa

Credits 3. 3 Lecture Hours. Exploration of African diaspora around the world; examination of the historic globality of Africa with a focus on Black artistic expression and its impact on global culture; investigation of Black cultures' interactions with music, literature, performing arts, visual arts, religions, and social movements. **Prerequisites:** Junior or senior classification or approval of instructor. **Cross Listing:** GLST 400/AFST 400.

AFST 401 Slavery in World History

Credits 3. 3 Lecture Hours. Comparative history of human slavery; slavery in the Ancient World, Asia, Africa; varieties of modern slavery in the New World since 1500; abolition of slavery and continuing forms of human bondage in the contemporary world. **Prerequisite:** Junior or senior classification. **Cross Listing:** ASIA 401 and HIST 401.

AFST 422 Race, Ethnicity, Crime and Justice

Credits 3. 3 Lecture Hours. Racial/ethnic disparities in criminal offending and victimization, as well as different experiences with law enforcement, judicial, and correctional agencies. **Prerequisites:** SOCI 220 or equivalent. **Cross Listing:** SOCI 422 and LMAS 422.

AFST 425/COMM 425 Communication and Black Freedom Dreams

Credits 3. 3 Lecture Hours. Examination of historical and contemporary communication practices of Black freedom activities, movements, and organizations in the United States and around the globe. **Prerequisite:** Junior or senior classification. **Cross Listing:** COMM 425/AFST 425.

AFST 430/RELS 430 African American Muslim Culture

Credits 3. 3 Lecture Hours. Exploration of popular culture and its impact on African American Muslims' intersectional identity formation and faith tradition through films, documentaries, readings, and lectures on and about Muslims emanating from enslaved narratives and the colonial period to the contemporary era. **Prerequisites:** Junior or senior classification, or approval of instructor. **Cross Listing:** RELS 430/AFST 430.

AFST 481 Seminar

Credits 3. 3 Lecture Hours. Comparative studies of slave societies in the modern world; history and analysis of African American feminism; comparative analyses of the social, political, and economic condition of African Americans and other African peoples of the diaspora. **Prerequisite:** AFST 302; junior or senior classification.

AFST 484 Internship

Credits 0 to 4. 0 to 4 Other Hours. Directed internship in a public or private organization to provide students with applied experience; opportunity to observe first hand issues and problems covered in Africana Studies courses; designed to enhance and clarify the student's career objectives. **Prerequisite:** Approval of instructor.

AFST 485 Directed Studies

Credits 0 to 3. 0 to 3 Other Hours. Selected fields of Africana Studies not covered in depth by other courses. Reports and extensive reading required. May be repeated for credit. **Prerequisite:** AFST 201; junior or senior classification; approval of instructor.

AFST 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in Africana Studies. May be repeated for credit.

AFST 491 Research

Credits 0 to 3. 0 to 3 Other Hours. Research conducted under the direction of a faculty member in Africana Studies. May be taken for a maximum of 18 hours credit. **Prerequisites:** AFST 201; junior or senior classification; and approval of instructor.

AGCJ - Ag Comm & Journalism (AGCJ)

AGCJ 105 Introduction to Agriculture and Life Sciences Communications

Credits 3. 3 Lecture Hours. Introduction to journalism and mass communication, its history, role in society, and unique role in agriculture; importance of journalism mass communication and the communication methods used in modern society; foundation for an understanding of agricultural news and information and how it is delivered to broad audiences. Only one of the following will satisfy the requirements for a degree: AGCJ 105 or JOUR 102.

AGCJ 281 Media Concepts in Agriculture and Life Sciences

Credits 3. 3 Lecture Hours. Preparation for the job and internship search process, practicing interview skills, and identification of the skills necessary to grow in and contribute to the agricultural communications and journalism profession; identification of challenges and opportunities facing professional agricultural communicators and journalists; identification and analysis of industry-wide issues; learning how to think critically about the news. **Prerequisite:** Grade of C or better in AGCJ 105 or concurrent enrollment.

AGCJ 285 Directed Studies

Credits 1 to 4. 1 to 4 Other Hours. Directed study of selected issue in field of agricultural communications with emphasis on collection, synthesis and interpretation of information. **Prerequisite:** Approval of department advisor.

AGCJ 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Special topics in an identified area of agricultural development. May be repeated for credit. **Prerequisite:** Approval of department advisor.

AGCJ 291 Research

Credits 1 to 4. 1 to 4 Other Hours. Research conducted under the direction of faculty member in agricultural communications and journalism. May be repeated 2 times for credit. **Prerequisites:** Freshman or sophomore classification and approval of department advisor.

AGCJ 301 Media Production in Agriculture and Life Sciences

Credits 3. 3 Lecture Hours. Application of principles of media production in photography, videography, and podcasting within the context of agriculture and life sciences; exploration of pre-production planning and writing, production, post-production, camera techniques, equipment use, video editing and graphics, and sound editing; exploration of unique techniques used for media production in the complex fields of agriculture and life sciences. **Prerequisites:** Grade of C or better in AGCJ 105 and AGCJ 281.

AGCJ 306 Theory and Practice of Public Relations in Agriculture and Life Sciences

Credits 3. 3 Lecture Hours. Exploration of the unique relationships among agricultural stakeholders; topics include writing public relations objectives, strategies, tactics, and evaluation of public relations plans and strategies. **Prerequisites:** Grade of C or better in AGCJ 105 or concurrent enrollment.

AGCJ 307 Design for Agricultural Media

Credits 3. 2 Lecture Hours. 2 Lab Hours. Principles and practices of agricultural media design, including design and production of printed publications and graphics; computer assisted design and production of media pieces. Required for AGCJ majors and minors. **Prerequisite:** Junior or senior classification.

AGCJ 308 Agricultural Photography

Credits 3. 2 Lecture Hours. 2 Lab Hours. Develop knowledge of photography, editing software, and composition techniques used in the agricultural communications field; develop photography and photo editing skills to a satisfactory level as demonstrated by performance on assignments and exams. **Prerequisite:** Junior or senior classification.

AGCJ 309 Data Storytelling in Agriculture & Life Sciences Communications

Credits 3. 3 Lecture Hours. Data Storytelling in Agriculture & Life Sciences Communications. Fundamentals of effective data-driven storytelling; detection and articulation of the stories behind datasets; communication in visual, oral, and written contexts for various audiences and publics; use of data analysis, evaluation, and other tools to create media stories in the context of agricultural and life sciences.

Prerequisites: Grade of C or better in AGCJ 281 and AGCJ 311.

AGCJ 311 Introduction to Research in Agriculture and Life Sciences Communications

Credits 3. 3 Lecture Hours. Explanation of research and its ethics; development of research questions for audience, journalism and communications research; analysis of research designs and methods use of journalism, audience and communications research; topics include describing data collection methods and strategies, including interviews, observations, focus groups, surveys and content analyses; identification of research problems. **Prerequisites:** Grade of C or better in AGCJ 105 and AGCJ 281.

AGCJ 312 Editing in Agriculture and Life Sciences

Credits 3. 2 Lecture Hours. 2 Lab Hours. Principles and practices of editing for agricultural and technical audiences including improving and tightening copy; writing headlines, titles, and subheads; photo editing and captions, graphics and layout; print, broadcast, interactive and other media. **Prerequisites:** Grade of C or better in AGCJ 105; junior or senior classification.

AGCJ 313 Media Writing in Agriculture and Life Sciences I

Credits 3. 2 Lecture Hours. 2 Lab Hours. Newsgathering, writing, editing and ethics for all types of media used in agriculture and life sciences communications. **Prerequisites:** Grade of C or better in AGCJ 312.

AGCJ 314 Media Writing in Agriculture and Life Sciences II

Credits 3. 2 Lecture Hours. 2 Lab Hours. Examination of interpretative news gathering and writing for all types of media; basic media law and ethics, interviewing skills with assigned practice writing about agriculture; science and technology topics. **Prerequisites:** Grade of C or better in AGCJ 313; junior or senior classification.

AGCJ 355 Digital Storytelling in Agriculture and Life Sciences I

Credits 3. 3 Lecture Hours. Identification and pitching of digital story ideas in the agriculture and life sciences; recognition of technical and aesthetic aspects of visual design and storytelling that appeal to scientific and non-scientific audiences; design and creation of digital stories for dissemination through broadcast channels; composition of compelling and engaging stories for scientific and non-scientific audiences; management of digital storytelling projects. **Prerequisites:** Grade of C or better in AGCJ 301 and AGCJ 313.

AGCJ 366 Radio Broadcasting

Credits 3. 2 Lecture Hours. 2 Lab Hours. Survey of American broadcasting, development, and impact; influence on society, basic principles, mass communication theory, station operating programming, advertising, rating services, regulation, and censorship; in-depth analysis of current issues and developments. **Prerequisite:** Junior or senior classification.

AGCJ 404 Science Communications and Public Engagement in Agriculture and Life Sciences

Credits 3. 3 Lecture Hours. Integration of science communications experience in agriculture and life sciences research, education, and extension; overview of how to communicate effectively about science, technology, engineering, and math; application of the basics of science communication; examination of conducting science communication research and becoming an effective science influencer. **Prerequisite:** Grade of C or better in AGCJ 313 or approval of instructor.

AGCJ 405 Design and Publication in Agriculture and Life Sciences

Credits 3. 3 Lecture Hours. 0 Lab Hours. Examination of how to design, publish, and disseminate a print magazine; includes writing a journalism feature story for the print publication; designing and selling advertising for the publication. May be taken two times for credit. **Prerequisite:** Grade of C or better in AGCJ 312 and AGCJ 313.

AGCJ 406 Public Relations and Campaigns in Agriculture and Life Sciences

Credits 3. 3 Lecture Hours. Analysis of agricultural public relations campaign; topics include examination of public relations case studies and methods including writing public relations plans for agricultural entities, production of public relations components and evaluation of public relations objectives, strategies and tactics. **Prerequisites:** Grade of C or better in AGCJ 306 and AGCJ 313.

AGCJ 408 Advertising Copy and Design in Agriculture and Life Sciences

Credits 3. 2 Lecture Hours. 2 Lab Hours. Examination of creative aspects of advertising strategy, copywriting, typography and design in a variety of visual media; topics include learning to make and evaluate advertising. **Prerequisites:** Grade of C or better in AGCJ 313.

AGCJ 410 Risk Communications in Science and Society

Credits 3. 3 Lecture Hours. Expansion of understanding of risk communications and public-focused risk communication related to environmental, agricultural and public health contexts; examination of how risk is defined, assessed, quantified, perceived, and communicated; application of best practices of risk communication to crisis and risk-related events. **Prerequisites:** Grade of C or better in AGCJ 306 and AGCJ 313.

AGCJ 411 Advanced Research in Agriculture and Life Sciences Communications

Credits 3. 3 Lecture Hours. Development of research hypothesis, questions, and variables for audience and communications research; implementation of qualitative and quantitative research designs; collection, analysis, visualization, and reporting of qualitative and quantitative data; participation in research activities to apply research methods and analyses guided by sociological, psychological, and anthropological theories. **Prerequisite:** Grade of C or better in AGCJ 311; junior or senior classification.

AGCJ 413 Emerging Media in Agriculture and Life Sciences

Credits 3. 3 Lecture Hours. Examination of the use of popular emerging media in agriculture to communicate; exploration of building and marketing a brand online; understanding the strategy behind the posts and other communications; creation of emerging media communications strategies for academic or business entities that may be implemented upon completion of course. **Prerequisite:** Grade of C or better in AGCJ 313; junior or senior classification.

AGCJ 455 Digital Storytelling in Agriculture and Life Sciences II

Credits 3. 3 Lecture Hours. Application of advanced storytelling, shooting, and editing techniques for digital storytelling within the context of agriculture and life sciences; building of visual narratives using a combination of still images, HD video, ambient audio, and natural voices that appeal to scientific and non-scientific audiences; application of the journalistic standards of truth, fairness and accuracy with the tools and techniques of digital storytelling to tell compelling stories in the agriculture and life sciences. **Prerequisites:** Grade of C or better in AGCJ 301 and AGCJ 355.

AGCJ 481 Seminar

Credits 3. 3 Other Hours. Identification of communication-related issues; examination of the effects of media on the dissemination of scientific information and consumers' behavioral change; write, design, create and distribute communications products; exposure to work in teams. **Prerequisites:** Grade of C or better in AGCJ 314; senior classification.

AGCJ 485 Directed Studies

Credits 1 to 4. 1 to 4 Lecture Hours. Directed individual study of selected problems in agricultural communications, communication methods and the communication profession with emphasis on collection, analysis and presentation of information. **Prerequisites:** Junior or senior classification; approval of department advisor.

AGCJ 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Special topics in an identified area of agricultural communications and journalism. May be repeated for credit. **Prerequisite:** Junior or senior classification.

AGCJ 491 Research

Credits 1 to 4. 1 to 4 Other Hours. Research conducted under the direction of faculty member in agricultural communications and journalism. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. **Prerequisites:** Junior or senior classification and approval of department advisor.

AGCJ 494 Internship

Credits 1 to 6. 1 to 6 Other Hours. Supervised internship and independent study related to the student's professional interest. **Prerequisites:** Junior or senior classification; approval of department advisor.

AGEC - Agricultural Economics (AGEC)

AGEC 101 Concepts in Agricultural Economics - First Year Experience

Credits 0-1. 0-1 Lecture Hours. 0 Lab Hours. 0 Other Hours. Discussion-based designed to connect first-year AGECE and AGBL students with peers, faculty and staff while providing an overview of the experiential learning and high impact opportunities available in these majors; highlights key issues at Texas A&M University, in agriculture, and in the field of Agricultural Economics.

AGEC 105 Introduction to Agricultural Economics

Credits 3. 3 Lecture Hours. (AGRI 2317) Introduction to Agricultural Economics. Characteristics of our economic system and basic economic concepts; survey of the farm and ranch firm and its organization and management; structure and operation of the marketing system; functional and institutional aspects of agricultural finance; government farm programs.

AGEC 117 Critical Thinking and Decision Making in Agricultural Economics

Credit 1. 1 Other Hour. An introductory seminar in the Department of Agricultural Economics; emphasis on resources and opportunities available in the department; awareness and understanding of professional development; emphasis on writing as a critical communication skill. **Prerequisite:** AGECE 105, ECON 203, or grade of C or better in ECON 202; ENGL 103 or ENGL 104; Agricultural Economics and Agribusiness majors.

AGEC 216 Fundamentals of the AgriFood Sales Industry

Credit 1. 1 Lecture Hour. Fundamentals of professional business to business sales in AgriFood firms; opportunities to interact with successful salespeople in AgriFood firms; focus on career development, exploration of undergraduate internships in professional sales and identification of basic sales theories currently in use in AgriFood firms; learning to network extensively with AgriFood industry professionals and developing a mentor relationship.

AGEC 217 Fundamentals of Agricultural Economics Analysis

Credits 3. 2 Lecture Hours. 2 Lab Hours. Relates contemporary agribusiness issues to economic and financial management, illustrating their integration toward pragmatic applications in the agricultural industry; lab focuses on the integration of mathematics and economics with computer skills directed toward spreadsheets, databases, web pages, and communications software. **Prerequisites:** Grade of C or better in AGECE 105; grade of C or better in AGECE 117 or concurrent enrollment; grade of C or better in MATH 141 or MATH 168 or MATH 140; grade of C or better in MATH 142; sophomore or junior agricultural economics or agribusiness majors; or approval of department head.

AGEC 223 Establishing Agribusiness Entrepreneurship Networks I

Credit 1. 1 Lecture Hour. Introduction to successful entrepreneurs and other professionals, identifying suggested strategies and tactics in starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of and how to develop relationships with a broad spectrum of mentors. **Prerequisite:** Freshman or sophomore classification.

AGEC 285 Directed Studies

Credits 0 to 4. 0 to 4 Other Hours. Directed study of selected problems in agricultural economics. **Prerequisite:** AGECE 105 or concurrent enrollment; freshman or sophomore classification in agricultural economics, agribusiness, or approval of instructor and department head; 2.5 GPR in major, overall, and CBK courses, if applicable; see an academic advisor in Room 214 AGLS.

AGEC 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of agricultural economics. May be repeated for credit. **Prerequisites:** Freshman or sophomore classification and approval of department head.

AGEC 291 Research

Credits 0 to 4. 0 to 4 Other Hours. Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit. **Prerequisites:** Freshman or sophomore classification and approval of department head; see an academic advisor in Room 214 AGLS.

AGEC 314 Marketing Agricultural and Food Products

Credits 3. 3 Lecture Hours. Operations involved in movement of agricultural commodities from farmer to consumer via several intermediaries; functions involve buying, selling, transportation, storage, financing, grading, pricing and risk bearing; agricultural supply chain or value chain is studied in detail; marketing aspects of commodities and differentiated goods. **Prerequisites:** AGECE 105 or 3 hours of economics; and junior or senior classification.

AGEC 315 Food and Agricultural Sales

Credits 3. 3 Lecture Hours. Principles of professional sales techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional salespersons. **Prerequisite:** Junior or senior classification.

AGEC 316 Building Customer Relationships in AgriFood Selling

Credits 3. 3 Lecture Hours. Use of emotional intelligence factors in developing business-to-business customer relationships for AgriFood, real estate, finance and other industrial products and services; developing customer relationships with regard to the unique aspects of technical products and services in these industries. **Prerequisite:** Grade of C or better in AGECE 315; junior or senior classification; approval of instructor.

AGEC 317 Economic Analysis for Agribusiness Management

Credits 3. 3 Lecture Hours. Quantitative methods used to address managerial problems, specifically calculus-based optimization, marginal analysis, elasticities, statistical and forecasting techniques, linear programming, and risk analysis; emphasis on theoretical aspects and applied analysis of managerial problems faced by agricultural firms. **Prerequisites:** AGECE 217; ECON 323; BUSN 203 for agribusiness majors or STAT 301, 302, or 303 for agricultural economics majors; junior or senior classification; agricultural economics, agribusiness majors only; or approval of department head.

AGEC 324 Agribusiness Entrepreneurship – Budgeting

Credits 3. 2 Lecture Hours. 2 Lab Hours. Case study approach to demonstrate a process for evaluating the economic feasibility of a single-enterprise rural or metropolitan business venture; relevant production, marketing and financing costs, in combination with capital ownership and overhead costs; computer spreadsheets including attention to deterministic sensitivity analyses; computer capabilities are essential. **Prerequisites:** Grade of C or better in AGECE 105 or ECON 202; grade of C or better in ACCT 209 or ACCT 229; junior or senior classification or approval of instructor.

AGEC 325 Principles of Farm and Ranch Management

Credits 3. 3 Lecture Hours. 0 Lab Hours. Agribusiness managerial decision making and analysis in different market environments; emphasis is on profit maximization; focuses on using computerized methods for evaluating management alternatives for farming and ranching problem situations. **Prerequisites:** AGECE 105 or ECON 202; junior or senior classification; knowledge of Excel.

AGEC 330 Financial Management in Agriculture

Credits 3. 3 Lecture Hours. Principles of financial management of farms, ranches, and other agribusiness firms; financial statements, financial statement analysis, time value of money, investment analysis, firm growth, risk management, credit analysis and best business management practices. **Prerequisites:** AGECE 105 or 3 hours of economics; ACCT 209 or ACCT 229; and junior or senior classification.

AGEC 340 Agribusiness Management

Credits 3. 3 Lecture Hours. Survey of management practices using case studies to evaluate management issues in agribusiness firms in the context of the four functions of management such as planning, organizing, leading and controlling; emphasis on best practices throughout the food marketing chain; examination of how businesses and business executives succeed; application of previously learned knowledge in making business decisions similar to those encountered in professional careers. **Prerequisites:** AGECE 105 or 3 hours of economics; and junior or senior classification.

AGEC 344 Food and Agricultural Law

Credits 3. 3 Lecture Hours. Legal principles relevant to the farm family and business; characteristics of legal decisions and rules on property rights, and fencing laws; analysis of global, national, state, and local legal issues in contracts, torts, water, pollution, and natural resources. **Prerequisite:** Junior or senior classification.

AGEC 350 Environmental and Natural Resource Economics

Credits 3. 3 Lecture Hours. Inspection of issues such as environmental degradation, population growth, recycling, water use and depletion, natural habitat protection, water and air pollution, acid deposition, fishery management, and global warming using economically derived principles and tools. **Prerequisite:** Junior or senior classification.

AGEC 401 Global Agri-Industries and Markets - Study Abroad

Credits 3. 3 Lecture Hours. Understanding agriindustries and markets; analysis of production; importing; exporting; provides classroom experience with an exposure to a variety of global cultures in an international setting. May be taken three times for credit. **Prerequisites:** AGECE 105 or 3 hours of economics; junior or senior classification or approval of department head.

AGEC 402 Survey of International Agricultural Economics: Study Abroad

Credits 3. 3 Lecture Hours. Examine, from an international setting, the shape of international agriculture; how culture, history, politics and geography in foreign countries affect the production and management of agricultural products; agricultural policy formation; countries' natural resources and competitive strategies; may be taken 3 times for credit. **Prerequisites:** AGECE 105 or 3 hours of economics; junior or senior classification or approval of department head.

AGEC 408 Economics of Foreign Intervention, Conflict and Development

Credits 3. 3 Lecture Hours. Economic models of conflict and development; dynamic socio-political models of conflict; conflict and vulnerable groups; quantitative techniques and methods in conflict and development research; interaction between poverty, natural resources and conflict in developing countries; role of multilateral, bilateral, and strategic stakeholders in conflict resolution and promotion of economic development. **Prerequisites:** AGECE 105 or ECON 202 or equivalent; ENGL 104; or approval of instructor.

AGEC 413 Agricultural Cooperatives

Credits 3. 3 Lecture Hours. Historical development and principles of cooperative associations in our economic system; organizational and operational aspects of cooperatives; legal considerations, financing, management, and member relations; and future role of cooperatives. **Prerequisites:** AGECE 105; AGECE 314; and junior or senior classification.

AGEC 414 Agribusiness and Food Market Analysis

Credits 3. 3 Lecture Hours. Application of economic and marketing principles to contemporary food and agribusiness marketing; practical marketing management for agribusiness firms; market analysis; and marketing strategy and planning as related to the emerging trends in the global food and agribusiness sector of the economy. **Prerequisites:** AGECE 317; MKTG 321; and junior or senior agribusiness majors only.

AGEC 415 Food and Agribusiness Strategic Market Planning

Credits 0 to 3. 0 to 3 Lecture Hours. Development of a market plan targeting the food and agribusiness market sector; market analysis; business propositions; action plans for executing the 4 P's (Product, Price, Place, Promotion); monitoring and measurement. **Prerequisites:** AGECE 314 or MKTG 321 or MKTG 409; AGECE 315; junior or senior classification or approval of instructor.

AGEC 416 Sales Management and Advanced Techniques in Professional Technical Selling for AgriFood Firms

Credits 3. 3 Lecture Hours. Principles and practices of sales management in food and agricultural firms; focus on business-to-business selling situations, theoretical and practical information about sales management for AgriFood firms; application of principles. **Prerequisites:** Grade of C or better in AGECE 216, AGECE 315, and AGECE 316.

AGEC 420 Food Security, Climate and Conflict

Credits 3. 3 Lecture Hours. Economic models of food production and consumption in conflict regimes; the micro-economics of violence; the dynamic relationships of climate and agricultural production; potential impacts of climate change on food and socio-political security; food security among insurgent groups; conflict resistant food systems; and the shifting relationships between poor and rich nations in relationship to climate, food and conflict. **Prerequisites:** AGECE 105 or ECON 202, junior or senior classification, or approval of instructor.

AGEC 422 Land Economics

Credits 3. 3 Lecture Hours. Economic, institutional, and physical factors involved in the use and control of natural resources; includes elements of introductory land economics as a discipline, economic foundations of land economics, institutional influences on land use, and the effects of public policy on land use. **Prerequisites:** AGECE 105 or 3 hours economics; and junior or senior classification.

AGEC 423 Establishing Agribusiness Entrepreneurship Networks II

Credit 1. 1 Lecture Hour. Engagement opportunities with successful agri/metropolitan entrepreneurs and other professionals, focusing on strategies and tactics for starting and sustaining viable rural and metropolitan business ventures; emphasis on importance of, and how to, develop relationships with a broad spectrum of mentors. **Prerequisites:** Junior or senior classification or approval of instructor. May not enroll in AGECE 223 and AGECE 423 during the same semester.

AGEC 424 Agribusiness Entrepreneurship – Economic Analysis

Credits 3. 2 Lecture Hours. 2 Lab Hours. Strategic planning regarding economic feasibility of a single-enterprise rural or metropolitan business venture; emphasis on processes for developing a comprehensive enterprise budget and construction and evaluation of risk management alternatives; exchanges with “real-world” entrepreneurs, financial experts and other management personnel; computer capabilities essential. **Prerequisites:** Grade of C or better in AGECE 105 or ECON 202; grade of C or better in ACCT 209 or ACCT 229; junior or senior classification or approval of instructor.

AGEC 425 Agribusiness Entrepreneurship – Financial Analysis

Credits 3. 2 Lecture Hours. 2 Lab Hours. Strategic planning regarding rural and metropolitan business ventures; emphasis on processes for developing comprehensive economics and financial prospectuses, including enterprise budgets, risk management planning, cash flow budgeting, net worth statements, income budgets, reconciliation statements and shock analysis; mentoring exchanges with “real-world” entrepreneurs, financial experts and other management personnel. **Prerequisites:** AGECE 424; and junior or senior classification.

AGEC 429 Agricultural Policy

Credits 3. 3 Lecture Hours. Analysis of the causes, nature, and effects of government participation in agriculture; and interrelationship of the American agriculture and agribusiness sector with the political and economic system, public administration, and interest group representation. **Prerequisites:** AGECE 105, ECON 202 or ECON 203; ENGL 103 or ENGL 104; and junior or senior classification.

AGEC 430 Macroeconomics of Agriculture

Credits 3. 3 Lecture Hours. Basic functioning of U.S. economy and relationship to agriculture; the differential effects of macroeconomic policy on disposable income, interest rates, unemployment, inflation and exchange rates; impact on agricultural commodity prices, farm input costs, net farm income, farmland values and key financial indicators. **Prerequisites:** AGECE 105 or 3 hours of economics; AGECE 317 or concurrent enrollment; AGECE 429; AGECE 330 or FINC 341 or FINC 409; and junior or senior classification.

AGEC 431 Cases in Agribusiness Finance

Credits 3. 3 Lecture Hours. Financial management of agribusiness firms; advanced topics in financial statement analysis, liquidity management, investment analysis, and capital structure illustrated through examination of agribusiness cases. **Prerequisites:** AGECE 317; AGECE 340; FINC 341; and junior or senior agribusiness majors only.

AGEC 432 Rural Real Estate and Financial Analysis

Credits 3. 3 Lecture Hours. Advanced topics in investment analysis; financial intermediation in agriculture; real estate markets and market analysis; and appraisal valuation. **Prerequisites:** AGECE 317 (waived for nonmajors); AGECE 330 or FINC 341 or FINC 409; AGECE 422; and junior or senior classification.

AGEC 434 Rural Financial Markets and Financial Planning

Credits 3. 3 Lecture Hours. Organization, structure, conduct and regulation of lending institutions serving commercial agriculture and rural borrowers; borrower financial statement analysis, business forecasting, investment analysis and loan application process; lender credit application underwriting standards, credit scoring and loan decision making process; agricultural loan portfolio analysis. **Prerequisites:** ACCT 209 or ACCT 229; ACCT 210 or ACCT 230; AGECE 330 or FINC 341 or FINC 409; junior or senior classification.

AGEC 440 Agribusiness Strategic Analysis

Credits 3. 3 Lecture Hours. Strategic management and economic principles for the agribusiness system; problem recognition and applied managerial/economic decision making with related considerations in marketing, production, or finance for agribusiness firms. **Prerequisites:** AGECE 317; AGECE 340; MGMT 363; and junior or senior agribusiness majors only.

AGEC 447 Food and Agricultural Price Analysis

Credits 3. 3 Lecture Hours. Factors influencing the level of food and agricultural prices; price trends and seasonal variation; methods of forecasting demands and prices; and futures trading. **Prerequisites:** AGECE 314; AGECE 317; and junior or senior classification.

AGEC 448 Agricultural Commodity Futures

Credits 3. 3 Lecture Hours. Activities of commodity futures exchanges; the mechanics of trading futures contracts; the use of futures trading for hedging and forward pricing; and options, basis behavior, and hedging strategies for selected commodities. **Prerequisites:** AGECE 105 or 3 hours of economics; AGECE 314; AGECE 317 or concurrent enrollment; and junior or senior classification; or approval of department head.

AGEC 452 International Trade and Agriculture

Credits 3. 3 Lecture Hours. Changing role of U.S. agriculture in a dynamic world economy; national and international policies and institutions affecting agriculture; and exchange rates, tariffs, and non-tariff barriers. **Prerequisites:** AGECE 105 or 3 hours of economics; and junior or senior classification.

AGEC 453 International Agribusiness Marketing

Credits 3. 3 Lecture Hours. Basic competencies in international marketing of agri-foods; and market entry, pricing, payment, finance, and promotion. **Prerequisites:** AGECE 105 or 3 hours of economics; and junior or senior classification.

AGEC 460 Cross-Cutting Issues in Agricultural Economics

Credits 0 to 3. 0 to 3 Lecture Hours. Examination of economic theory and its history; emphasis on the areas of agricultural business, finance, macroeconomics, management, marketing, microeconomics, quantitative analysis, resources, and economics policy; emphasis on the ability to properly analyze economic problems. **Prerequisites:** AGECE 317; AGECE 314 or MKTG 321 or MKTG 409; AGECE 330 or FINC 341 or FINC 409; AGECE 429; agricultural economics and agribusiness majors only; junior or senior classification or approval of instructor.

AGEC 481 Ethics in Agribusiness and Agricultural Economics

Credit 1. 1 Lecture Hour. Examination of the principals of ethical business behavior; context created through assigned readings, guest speakers from various law enforcement branches and private industry; written reports about personal experiences relative to this context; attention given to establishing personal principles for an ethical business career.

Prerequisites: AGECE 217; senior classification; agricultural economics or agribusiness majors only.

AGEC 484 Internship

Credits 0 to 6. 0 to 6 Other Hours. Supervised experience program conducted in the area of the student's interest in agricultural economics and agribusiness. May be taken two times. **Prerequisite:** See an advisor in Room 214 AGLS Building.

AGEC 485 Directed Studies

Credits 0 to 6. 0 to 6 Other Hours. Special problems not covered by other courses. Content will depend upon problem studied. **Prerequisite:** See an advisor in Room 214 AGLS Building.

AGEC 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of agricultural economics. May be repeated for credit. **Prerequisite:** Junior or senior classification.

AGEC 491 Research

Credits 0 to 6. 0 to 6 Other Hours. Research conducted under the direction of faculty member in agricultural economics. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. **Prerequisites:** Junior or senior classification and approval of department head; see an advisor in Room 214 AGLS Building.

AGEC 495 International Agribusiness and Industry Practices

Credits 0 to 3. 0 to 3 Lecture Hours. Exposure to agribusiness operations in a international cross-cultural context and production operations, marketing and distribution of agriculture products from around the world; quantitative methods used for engaging in critical thinking about issues confronting the agribusiness industry. **Prerequisite:** AGECE 105 and junior classification.

AGLS - Ag & Life Sciences (AGLS)

AGLS 101 Modern Agricultural Systems and Renewable Natural Resources

Credit 1. 1 Lecture Hour. (AGRI 1131) Modern Agricultural Systems and Renewable Natural Resources. An introduction to modern agriculture and the natural, human and scientific resources upon which it depends. **Prerequisite:** Freshman or sophomore classification.

AGLS 125 Life Sciences Learning Community I

Credits 0-1. 0-1 Lecture Hours. Development of personal and professional competencies in the life sciences: learning styles, leadership skills, appreciation for the arts; ethics in science, problem solving skills, experimental design, data gathering and interpretation, introduction to life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit. **Prerequisites:** Freshman classification and approval of instructor.

AGLS 225 Life Sciences Learning Community II

Credits 0 to 6. 0 to 6 Lecture Hours. Continuation of the development of personal and professional competencies in the life sciences: ethics in science, problem solving skills, experimental design, data gathering and interpretation, examination of life sciences literature, critical analysis skills, and the connectivity between life science disciplines. May be taken two times for credit. **Prerequisites:** Approval of instructor.

AGLS 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of agriculture and life science. May be repeated for credit. **Prerequisite:** Freshman or sophomore.

AGLS 292 Cooperative Education in Agriculture

Credits 2. 4 Other Hours. Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required. **Prerequisite:** Approval of the college coordinator of cooperative education.

AGLS 301 College of Agriculture and Life Sciences Study Abroad

Credits 1 to 18. 1 to 18 Other Hours. For students in approved programs abroad. May be repeated for credit. **Prerequisites:** Admission to approved program and approval of academic dean.

AGLS 392 Cooperative Education in Agriculture

Credits 2. 40 Other Hours. Educational work assignment by a student in the field of his or her career interest and course of study. Supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required.

Prerequisite: AGLS 292.

AGLS 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of agricultural and life sciences.

AGLS 492 Cooperative Education in Agriculture and Natural Resource Policy

Credits 0 to 3. 0 to 3 Other Hours. Educational work assignment by a student in the field of his or her career interest and course of study; supervision of the student by the cooperating employer and the instructor; a technical report, approved by the instructor, on a related subject area required. **Prerequisites:** AGLS 392 or approval of Agricultural and Natural Resources Policy Internship Program staff.

AGSC - Agricultural Science (AGSC)

AGSC 285 Directed Studies

Credits 1 to 4. 1 to 4 Lecture Hours. Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit. **Prerequisite:** Approval of instructor.

AGSC 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Special topics in an identified area of agricultural science. May be repeated for credit. **Prerequisite:** Approval of department head.

AGSC 291 Research

Credits 1 to 4. 1 to 4 Other Hours. Research conducted under the direction of faculty member in agricultural science. May be repeated 2 times for credit. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

AGSC 302 Teaching School-Based Agricultural Education & Clinical Professional Experience

Credits 4. 3 Lecture Hours. 3 Lab Hours. Teaching School-Based Agricultural Education & Clinical Professional Experience. Foundations of school-based agricultural education (SBAE) teaching; an overview of preparing teachers for a changing world including knowledge of learners, subject matter and teaching within the context of agricultural science; clinical field experience for teaching agricultural science in public schools of Texas. **Prerequisites:** Junior or senior classification.

AGSC 305 Management of Supervised Agricultural Experiences

Credits 3. 3 Lecture Hours. Overview of supervised agricultural experiences (SAEs) and content that can be used in the secondary agricultural science program; engagement in SAE programs; management practices for SAE projects including record keeping and student reports. **Prerequisite:** Junior or senior classification.

AGSC 363 Teaching Skills in Agricultural Metal Technology

Credits 3. 2 Lecture Hours. 2 Lab Hours. Instructional design using science, technology, engineering and math and computer aided design (CAD); teaching methods in agricultural metal technology and fabrication; metalworking skills, electric arc welding, oxyfuel torch and plasma arc.

Prerequisite: Junior or senior classification or approval of instructor.

AGSC 373 Managing Safety in the Agricultural Science Program

Credits 3. 2 Lecture Hours. 2 Lab Hours. Safety principles and procedures, methods of teaching and motivating students in agricultural mechanics; design for those preparing to teach agricultural science in Texas public schools. **Prerequisite:** Junior or senior classification; grade of C or better in AGSC 302.

AGSC 380 Workshop in Agricultural Science

Credits 1 to 4. 1 to 4 Other Hours. The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams. **Prerequisite:** Junior or senior classification.

AGSC 383 Teaching Agricultural Mechanics

Credits 3. 2 Lecture Hours. 3 Lab Hours. Methods of teaching and motivating students in agricultural mechanics; designed for students preparing to teach agricultural science in Texas public schools. **Prerequisite:** Grade of C or better in AGSC 302.

AGSC 402 Designing Instruction for Secondary Agricultural Science Programs

Credits 3. 2 Lecture Hours. 3 Lab Hours. Theory and practice in designing instruction for secondary agricultural science programs including effective planning and delivery methods; designed for students preparing to teach agricultural science in Texas public schools. **Prerequisite:** Grade of C or better in AGSC 302; grade of C or better or concurrent enrollment in AGSC 405, AGSC 373, AGSC 383, and INST 210.

AGSC 405 Facilitating Complete Secondary Agricultural Science Programs

Credits 3. 2 Lecture Hours. 3 Lab Hours. Theory and practice in facilitating secondary agricultural science programs: includes classroom instruction, supervised experience, and youth leadership development; designed for students preparing to teach agricultural science in Texas public schools. **Prerequisite:** Grade of C or better in AGSC 302; grade of C or better or concurrent enrollment in AGSC 402, AGSC 373, AGSC 383, and INST 210.

AGSC 425 Learner Centered Instruction in Agricultural Science

Credits 3. 3 Lecture Hours. Preparing curriculum materials for secondary agricultural science and adult education programs. **Prerequisites:** Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 436, AGSC 481, and AGSC 484.

AGSC 436 Professional Teaching Internship in AGSC

Credits 6. 2 Lecture Hours. 12 Lab Hours. Planning for and teaching secondary agricultural science in selected high schools in Texas; includes 12 weeks of professional teaching experience under the guidance of a university supervisor and a cooperating teacher in the school. **Prerequisites:** Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 425, AGSC 481, and AGSC 484.

AGSC 481 Seminar

Credit 1. 1 Lecture Hour. Review of current literature and research as related to program development in light of legislation and policies affecting education in agriculture. **Prerequisite:** Grade of C or better in AGSC 402 and AGSC 405.

AGSC 484 Field Experience

Credits 1 to 6. 1 to 6 Other Hours. An on-the-job supervised experience program conducted in the area of the student's specialization. **Prerequisites:** Grade of C or better in AGSC 402 and AGSC 405 and concurrent enrollment in AGSC 425, AGSC 436, and AGSC 481.

AGSC 485 Directed Studies

Credits 1 to 4. 1 to 4 Lecture Hours. Directed individual study of selected problems in agricultural science with emphasis on collection, analysis and presentation of information. May be repeated for credit. **Prerequisite:** Junior or senior classification; approval of instructor.

AGSC 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Special topics in an identified area of agricultural science. May be repeated for credit. **Prerequisite:** Approval of department head.

AGSC 491 Research

Credits 1 to 4. 1 to 4 Other Hours. Research conducted under the direction of faculty member in agricultural science. May be repeated 3 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. **Prerequisites:** Junior or senior classification; approval of instructor.

AGSM - Agricultural Systems Mgmt (AGSM)

AGSM 105 The World Has a Drinking Problem - Global Water Scarcity

Credits 3. 3 Lecture Hours. Study of how drinking water maintains and improves human health, availability of fresh water throughout the world; includes how population changes, cultural influences, and political power affect quality, distribution and cost of water for children, rural communities and under-represented peoples.

AGSM 125 Introduction to Agricultural Systems Management

Credit 1. 2 Lab Hours. Introduction to technical management of agricultural systems using management projects presented by agricultural managers from industry; problem definition, information search, idea generation and development of management solutions. **Prerequisite:** Freshman or sophomore classification or approval of instructor; majors only.

AGSM 201 Agricultural Energy and Power Systems

Credits 3. 2 Lecture Hours. 2 Lab Hours. (AGRI 2301) Agricultural Energy and Power Systems. A study of the types of power and energy sources used in agricultural equipment and systems; management considerations for selecting, operating and maintaining internal combustion engines, electric equipment and motors, and renewables as power sources.

AGSM 284 Internship

Credits 0. 0 Lecture Hours. 0 Lab Hours. 0 Other Hours. No Credit. Practical experience working in a professional agricultural systems management setting. May be taken three times. **Prerequisite:** Freshman or sophomore classification; approval of the instructor.

AGSM 285 Directed Studies

Credits 0 to 4. 0 to 4 Other Hours. Selected problems in any phase of agricultural systems management; credit and specific content dependent upon background, interest, ability and needs of student enrolled; individual consultations and reports required. **Prerequisites:** Freshman or sophomore classification; approval of department head.

AGSM 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of agricultural systems management. May be repeated for credit. **Prerequisite:** Approval of instructor.

AGSM 291 Research

Credits 0 to 3. 0 to 3 Other Hours. Research conducted under the direction of faculty member in agricultural systems management. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

AGSM 301 Systems Analysis in Agriculture

Credits 3. 3 Lecture Hours. Operations research and systems theory applied to management problems in food and agricultural industries; linear programming, queuing theory, simulation and critical path method; provides the knowledge and computer skills to better manage resources for the evolving agricultural industries. **Prerequisites:** Grade of C or better in MATH 140 or MATH 168 and MATH 142 or MATH 151.

AGSM 310 Agricultural Machinery Management

Credits 3. 2 Lecture Hours. 2 Lab Hours. Selection of a matched complement of power units and machines for farming operations; consider constraints such as crops, season, weather, personnel and capital; apply systems techniques such as linear programming, optimization, queuing theory and inventory models; utilize available software programs and learn to develop electronic spreadsheets and other customized software. **Prerequisites:** AGSM 201; grade of C or better in AGSM 301 or concurrent enrollment; grade of C or better in PHYS 201 or PHYS 206.

AGSM 315/FSTC 315 Food Process Engineering Technology

Credits 3. 2 Lecture Hours. 2 Lab Hours. Elementary mechanics, physical and thermal properties of food and processing materials, heat transfer, mass and energy balances, psychrometrics (properties of air), insulation. **Prerequisites:** Grade of C or better in PHYS 201 or PHYS 206, or approval of instructor. **Cross Listing:** FSTC 315/AGSM 315.

AGSM 325 Agri-Industrial Applications of Electricity

Credits 3. 2 Lecture Hours. 2 Lab Hours. Elements of electric current generation and transmission, applications of electric heating, lighting and power, wiring, motors, energy rates, meter reading, safety rules and regulations. **Prerequisite:** AGSM 201; AGSM majors or minors only.

AGSM 335 Water and Soil Management

Credits 3. 2 Lecture Hours. 3 Lab Hours. Elementary principles of surface and ground water supply, flood control, water distribution systems and irrigation systems; principles of drainage, soil conservation and erosion control; elementary surveying, chaining, leveling and mapping applied to agricultural and natural resource needs; illustrated by practical examples of terracing and farm pond design. **Prerequisite:** Grade of C or better in MATH 140 or MATH 168; grade of C or better in CHEM 107 and CHEM 117, or CHEM 119; or approval of instructor.

AGSM 337 Technology for Environmental and Natural Resource Engineering

Credits 3. 3 Lecture Hours. For the nonengineering student in the environmental and management sciences; concentrates on the application of technology for solving local environmental problems while considering global issues; reduction of water, air and hazardous waste pollutants; legislative issues and modeling. **Prerequisites:** Grade of C or better in MATH 140 or MATH 168 and MATH 142, or MATH 151 and MATH 152, or AGSM 301.

AGSM 360 Occupational Safety Management

Credits 3. 3 Lecture Hours. 0 Lab Hours. Safety considerations in the work environment, including safety mandates, safety mission, personal and business liability, fire, chemical, dust, machine noise, personal protective devices; design and implementation of safety programs. **Prerequisite:** Junior or senior classification.

AGSM 403 Processing and Storage of Agricultural Products

Credits 3. 2 Lecture Hours. 2 Lab Hours. Factors influencing the nature of biological materials and the preservation of quality throughout the harvesting, handling and processing system; a systems approach to cereal grains includes principles of drying, quality deterioration, storage, conveying and handling; processing of fiber crops. **Prerequisites:** AGSM 310 and AGSM 315/FSTC 315; or approval of instructor.

AGSM 411 Cotton Gin Management

Credits 3. 3 Lecture Hours. Principles of cotton operation, selection, maintenance, repair of machinery used in ginning; discussion of unit operations in ginning, determination of appropriate operating parameter; introduction to the industry, classification, textile processing; management of safety, labor, regulatory issues in gins and other processing facilities; economics of gin operation and machinery investment decisions. **Prerequisites:** Junior or senior classification or approval of instructor.

AGSM 417 Food Process Engineering Technology II

Credits 3. 3 Lecture Hours. Applications of basic engineering concepts to understand common unit operations in the food (and related) industry. **Prerequisites:** AGSM 315/FSTC 315 or FSTC 315/AGSM 315; approval of instructor.

AGSM 435 Irrigation Principles and Management

Credits 3. 2 Lecture Hours. 3 Lab Hours. Principles of irrigation and management for efficient use of water; soil-water-plant relationships; methods of application; power and labor requirements; automated systems and components. **Prerequisite:** Grade of C or better in MATH 140 or MATH 168; grade of C or better in CHEM 107 and CHEM 117 or CHEM 119.

AGSM 437 Landscape Irrigation

Credits 3. 3 Lecture Hours. Design, installation, operation, and management of landscape irrigation systems; includes principles of hydraulics such as friction losses and design pressure, customer service, site evaluation, and a final design project; fulfills the education requirements for obtaining a State of Texas Irrigation License. **Prerequisites:** Junior or senior classification or approval of instructor.

AGSM 439 Management of Agricultural Systems I

Credits 3. 3 Lecture Hours. Application of agricultural systems management principles in solving realistic problems faced by agribusiness managers; project selection from problems posed by biological and agricultural industrial consultants; project feasibility study and outline; management and application philosophy; teamwork and communication, economics; product liability and reliability; standards and codes; goal setting and time management. **Prerequisites:** ENGL 210, AGSM 310, AGSM 325, and AGSM 360; AGECE 330 or FINC 409 or concurrent enrollment; must be taken prior to AGSM 440; AGSM majors only.

AGSM 440 Management of Agricultural Systems II

Credits 3. 3 Lecture Hours. Management of agricultural systems through team solution of management problems posed by agribusiness managers, farmers, extension specialists and other industry consultants; application of management principles to give experience in solving realistic problems faced by agribusiness managers; critical evaluation of results by students, staff and consultants. **Prerequisite:** COMM 203; grade of C or better in AGSM 439; should be taken last spring semester prior to graduation.

AGSM 461 Geographic Information Systems for Resource Management

Credits 3. 2 Lecture Hours. 2 Lab Hours. Geographic Information Systems (GIS) approach to solving spatial problems and managing natural resources, including the acquisition, management, manipulation, analysis, and mapping of spatial and non-spatial databases; identification of natural and relevant features from various data sources; integration of relevant technologies and data; extensive use of GIS software to solve real-world problems. Only one of the following will satisfy the requirements for a degree: AGSM 461, ECCB 351, ECCB 651, BAEN 651, or RENR 651. **Prerequisites:** Junior or senior classification or approval of instructor. **Cross Listing:** ECCB 351 and RWFM 351.

AGSM 470 Agricultural Electronics and Control

Credits 3. 2 Lecture Hours. 2 Lab Hours. Technology of electronic systems in agricultural production and processing, sensors, actuators, and controllers, controller hardware and computer bases. **Prerequisite:** AGSM 325; or approval of instructor.

AGSM 473 Project Management for Agricultural Systems Technology

Credits 3. 3 Lecture Hours. Development of fundamental skill set in project management; basic knowledge of project management methods, tools and techniques; includes organization and life cycle, management processes, integration management, time management, cost management, quality management, communications management, risk management, procurement management, stakeholder management. **Prerequisites:** Grade of C or better in AGSM 301; senior classification.

AGSM 477 Air Pollution Control and Regulatory Compliance

Credits 3. 3 Lecture Hours. Overview of federal and state environmental regulations focusing on permitting requirements for agricultural operations; operation of air pollution abatement systems to include cyclones, bag filters, and scrubbers; dispersion modeling; National Ambient Air Quality Standards. **Prerequisite:** Grade of C or better in AGSM 301, or grade of C or better in MATH 140 and MATH 142, or equivalent.

AGSM 481 Seminar

Credit 1. 1 Lecture Hour. Professional development; ethics; career opportunities and topics of interest related to the practice of agricultural systems management. **Prerequisite:** Senior classification.

AGSM 484 Internship

Credits 0 to 6. 0 to 6 Other Hours. Practical experience working in a professional agricultural and/or food systems management setting. May be taken three times. **Prerequisites:** Junior or senior classification; approval of the instructor.

AGSM 485 Directed Studies

Credits 0 to 4. 0 to 4 Other Hours. Selected problems in any phase of agricultural systems management; credit and specific content depend on background and interest of student; individual consultations and reports required. **Prerequisites:** Junior classification; approval of department head; 2.0 GPR.

AGSM 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Special topics in an identified area of agricultural systems management. May be repeated for credit.

AGSM 491 Research

Credits 0 to 3. 0 to 3 Lecture Hours. Research conducted under the direction of faculty member in agricultural systems management. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. **Prerequisites:** Junior or senior classification and approval of instructor.

ALEC - Ag Leadrshp, Ed & Comm (ALEC)

ALEC 285 Directed Studies

Credits 1 to 4. 1 to 4 Other Hours. Directed study of selected issue in field of agricultural leadership, education, and communications with emphasis on collection, synthesis and interpretation of information. May be taken four times for credit. **Prerequisite:** Approval of department advisor.

ALEC 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Special topics in an identified area of agricultural development. May be repeated for credit. **Prerequisite:** Approval of department advisor.

ALEC 291 Research

Credits 1 to 4. 1 to 4 Lecture Hours. Research conducted under the direction of faculty member in agricultural communications and journalism. May be taken two times for credit. **Prerequisites:** Freshman or sophomore classification and approval of department advisor.

ALEC 350 Global Agricultural Issues

Credits 3. 3 Lecture Hours. Review of global agricultural issues (products, environment, people, and culture) affecting international agricultural development; concepts and principles underlying the processes of teaching, research, and service opportunities in international agricultural development and education situations. **Prerequisites:** Junior or senior classification or approval of instructor.

ALEC 370 Principles of Positive Youth Development

Credits 3. 3 Lecture Hours. Fundamental concepts of youth development practices, programs, organizations and services; development of a critical understanding of the changing views of adolescence and youth culture; overview of youth development theories and principles of positive youth development; aspects of youth development programs; developmental outcomes associated with participation in youth development programs.

Prerequisite: Junior or senior classification.

ALEC 371 Skills and Techniques for Youth Development Professionals

Credits 3. 3 Lecture Hours. Development of skills for effective activity leadership to meet the needs of diverse youth populations; focus on applying experiential learning approaches, multiple activity styles, the role of intentionality, specificity, and application in activity selection, activity sequencing, and activity debriefing. **Prerequisite:** Junior or senior classification.

ALEC 372 Designing and Delivering Effective Youth Programs

Credits 3. 3 Lecture Hours. Comprehensive concepts of program design for youth programs; focuses on key programming issues; development of implementation plans; overview of equipment and facilities; focus on program flexibility, risk management and evaluation (formative and summative). **Prerequisites:** Junior or senior classification.

ALEC 375 Youth Development Programming in Sport and Physical Activities

Credits 3. 3 Lecture Hours. Role of community-based sports in developing healthy youth; ways in which sport programs can be designed to maximize physical, intellectual, emotional, and social outcomes; role of key adults and institutions in the delivery of youth sport experiences. **Prerequisites:** Junior or senior classification.

ALEC 377 Camp Management and Administration

Credits 3. 3 Lecture Hours. Structure and organization, administration and leadership, and challenges and opportunities facing professionals interested in careers in residential camping for youth. **Prerequisites:** Junior or senior classification.

ALEC 380 Workshop in Agricultural Leadership, Education, and Communications

Credits 1 to 4. 1 to 4 Lecture Hours. The study, understanding and solution of human-agricultural problems based on theory learned in the classroom, library, laboratory and fieldwork completed by individuals and teams. May be taken three times for credit. **Prerequisite:** Junior or senior classification.

ALEC 399 High-Impact Experience

Credits 0. 0 Lecture Hours. Participation in an approved high-impact learning practice; documentation and self-assessment of learning experience. **Prerequisites:** Junior or senior classification; or approval of instructor.

ALEC 412 Technology-Enhanced Instructional Design Strategies for Agriculture

Credits 3. 3 Lecture Hours. Techniques and applications of technology to enhance instruction of agricultural topics; instructional design principles, instructional strategies, technological tools; the design, development and delivery of technology-enhanced instruction for agriculture and the life sciences. Not intended for majors in education. **Prerequisite:** Junior or senior classification.

ALEC 425 Principles of Program Evaluation

Credits 3. 3 Lecture Hours. Evaluation principles applied to educational programs in agriculture and life science; basic understanding of skills in program evaluation processes, concepts, and theories; develop expertise needed to design and conduct evaluations of youth and adults in extension, community, and school-based programs. **Prerequisite:** Junior or senior classification.

ALEC 450 Global Social Justice Issues in Agriculture

Credits 3. 3 Lecture Hours. An in-depth evaluation of global social justice issues and leadership skills necessary to effectively solve and manage issues in agricultural development; topics include awareness, knowledge and understanding of teaching, research and service opportunities for those seeking careers in global social justice and agricultural leadership. **Prerequisite:** Junior or senior classification or approval of instructor.

ALEC 460 Applying International Development Theories in Agriculture

Credits 3. 2 Lecture Hours. 2 Lab Hours. Practical application of agricultural development theories (geographical, communal, societal, etc.) in real-world settings; high-impact learning, research skill development, international travel or participation in a service-learning project with an international organization. **Prerequisites:** Junior or senior classification or approval of instructor.

ALEC 472 Grant Writing and Program Evaluation for Youth Development Organizations

Credits 3. 3 Lecture Hours. Development of knowledge and skills to successfully write grant proposals and design program evaluation plans for youth development organizations; appropriate funding opportunities and considerations; grant guidelines; budget, timeline, and personnel; program evaluation plan development; evaluating grant proposals. **Prerequisites:** Grade of C or better in ALEC 370 or RPTS 370; or approval of instructor; junior or senior classification.

ALEC 473 Diversity, Equity, and Inclusion in Youth Development Organizations

Credits 3. 3 Lecture Hours. 0 Lab Hours. Understanding of youth diversity (e.g., ability and disability, socio-economic background, race, ethnicity, and cultural background, beliefs and religion, and gender characteristics); implementation of inclusive and equitable programming; development of cultural competencies. **Prerequisites:** Grade of C or better in ALEC 370.

ALEC 474 Positive Youth Development in the Age of Artificial Intelligence

Credits 3. 3 Lecture Hours. Understanding the intersection of positive youth development and artificial intelligence; exploration of data science and machine learning techniques and how they can be leveraged to support and enhance the well-being and potential of young people.

Prerequisites: Grade of C or better in ALEC 370; junior or senior classification.

ALEC 478 Youth Development Practice

Credits 3. 3 Lecture Hours. Application of youth development philosophy in community settings; principles and practices of community youth development and existing youth development models; local efforts related to community youth development. **Prerequisite:** Grade of C or better in ALEC 370 and ALEC 371 and junior or senior classification.

ALEC 485 Directed Studies

Credits 0 to 4. 0 to 4 Other Hours. Directed individual study of selected problems in international agriculture leadership, education and communications. **Prerequisites:** Junior or senior classification; approval of department advisor.

ALEC 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Special topics in an identified area of international agriculture leadership, education, and communications. May be taken four times for credit. **Prerequisite:** Junior or senior classification.

ALEC 491 Research

Credits 1 to 4. 1 to 4 Lecture Hours. Research conducted under the direction of faculty member in international agricultural leadership, education, and communications. May be taken three times for credit.

Prerequisites: Junior or senior classification; approval of department advisor.

ALEC 494 Internship

Credits 1 to 6. 1 to 6 Other Hours. Supervised internship and independent study related to the student's professional interest. May be taken six times for credit. **Prerequisites:** Junior or senior classification; approval of departmental advisor.

ALED - Ag Leadership & Dev (ALED)

ALED 125 Leadership Learning Community I

Credit 1. 1 Lecture Hour. Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of developing personal leadership while participating in co-curricular activities; emphasis on the relational model of leadership and global perspective building. **Prerequisites:** Freshman classification or approval of instructor; on-campus residence.

ALED 202 Introduction to Leadership

Credits 3. 3 Lecture Hours. Introduction to the academic and scholarly development of leadership theory and leadership models; investigation of leadership theory when applied to a specific context; development of a leadership definition as an inquiry investigation.

ALED 225 Leadership Learning Community II

Credit 1. 1 Lecture Hour. Offered to students living in the Freshmen Leadership Living Learning Community; fundamentals of peer mentoring while participating in co-curricular activities; emphasis on building supportive relationships on a college campus. **Prerequisites:** Freshman classification or approval of instructor; on-campus residence; ALED 125.

ALED 285 Directed Studies in Agricultural Leadership and Development

Credits 1 to 4. 1 to 4 Other Hours. Directed study of selected issue in agricultural leadership and development with emphasis on collection, synthesis and interpretation of information. **Prerequisite:** Approval of department advisor.

ALED 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Special topics in an identified area of agricultural development. May be repeated for credit. **Prerequisite:** Approval of department advisor.

ALED 291 Research

Credits 1 to 4. 1 to 4 Lecture Hours. Research conducted under the direction of faculty member in agricultural development. May be repeated 2 times for credit. Please see academic advisor in department. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

ALED 301 Personal Leadership Education

Credits 3. 3 Lecture Hours. Development, application and reflection of personal leadership capabilities through self-assessments and experiential learning activities; development of leadership identity through personal leadership inventories including strengths, personality type, values, vision and emotional intelligence. **Prerequisite:** ALED or USAL-LED major; junior, or senior classification; grade of C or better in ALED 202.

ALED 322 Cultural Leadership and Exploration for Society

Credits 3. 3 Lecture Hours. Social theories in terms of class, gender, race, ethnicity, and nationality; multidisciplinary approach to the study of leadership with a special emphasis on culture.

ALED 323 Leadership for a Multicultural World

Credits 3. 3 Lecture Hours. Principles of multicultural leadership; how to be an effective leader while understanding the self in terms of class, gender, race, ethnicity, and nationality; special emphasis on culture through experiential learning.

ALED 324 Leadership and Identity Development

Credits 3. 3 Lecture Hours. Identity development and leadership; dialogue about the implications of their multiple identities in the classroom organizations and in their careers; self-reflections concerning leadership development and active community-based service learning. **Prerequisites:** Junior or senior classification.

ALED 339 Agricultural Extension Philosophy and the Land-Grant Mission

Credits 3. 3 Lecture Hours. Philosophy of Cooperative Extension and roles within the land-grant system; history, organization, program areas and guiding principles; relationship with the teaching and research branches of the land-grant system. **Prerequisite:** Junior or senior classification or approval of instructor.

ALED 340 Survey of Leadership Theory

Credits 3. 3 Lecture Hours. Exploration of leadership as a scholarly discipline; critical analysis of and evolution of multiple leadership models and theories; synthesis of leadership theory through experiential learning; integration of course content with personal experiences. **Prerequisites:** ALED or USAL-LED major, junior or senior classification.

ALED 341 Team Learning

Credits 3. 3 Lecture Hours. Team development theory; emphasizes research on team member behaviors, team decision making models and positive conflict in team environments. **Prerequisites:** Grade of C or better in ALED 340; junior or senior classification.

ALED 344 Leadership of Volunteers

Credits 3. 3 Lecture Hours. Principles, theories, concepts, techniques and applications for leading volunteers in agriculture and life sciences nonprofit, governmental and community organizations. **Prerequisites:** Grade of C or better in ALED 340; junior or senior classification.

ALED 400 Public Leadership Development

Credits 3. 3 Lecture Hours. Major issues in the study of public leadership, development of leadership skills, and a field investigation done in conjunction with local public leaders. **Prerequisites:** Junior classification and approval of instructor.

ALED 401 Advanced Professional Leadership Development

Credits 3. 3 Lecture Hours. Investigation of the best practices of successful leaders representing various organizational contexts; merging of scholarly mastery of theory with practice. **Prerequisites:** Selection for ALED Leadership Fellows Program; grade of C or better in ALED 340 or ALED 301; junior or senior classification.

ALED 419 Followers and Followership

Credits 3. 3 Lecture Hours. Examination of the role of followers and followership; identification of follower motivations, followership styles, leader and follower dynamics, and characteristics of courageous followers. **Prerequisites:** Grade of C or better in ALED 340; junior or senior classification.

ALED 422 Cultural Pluralism in Agriculture

Credits 3. 3 Lecture Hours. Selected topics on the diversity of human resources in agriculture; emphasis on working in a multicultural society and developing a sensitivity toward different cultures; explores the interrelationships between the contributions of diverse individuals and the state, nation and global success of agriculture. **Prerequisite:** Junior or senior classification.

ALED 424 Applied Ethics in Leadership

Credits 3. 3 Lecture Hours. Exploration of ethical and moral theories and the application to multiple leadership contexts and situations. **Prerequisites:** Junior or senior classification.

ALED 426 Leading and Training Adult Learners

Credits 3. 3 Lecture Hours. Planning educational training programs, including leadership programs, to implement with an adult audience; includes needs assessment, instructional design, lesson plan development, evaluation and other items related to leading adults.

Prerequisites: Grade of C or better in ALED 340, junior or senior classification.

ALED 440 Leading Change

Credits 3. 3 Lecture Hours. Analysis of change models and theories and the leadership application on individual, organizational and societal changes. **Prerequisite:** Junior or senior classification; grade of C or better in ALED 202.

ALED 441 Agricultural Extension Organization and Methods

Credits 3. 3 Lecture Hours. Cooperative extension in agriculture and home economics; development, objectives, organization, program building and methods of teaching. **Prerequisite:** Junior or senior classification.

ALED 481 Seminar

Credits 3. 3 Lecture Hours. Individual and team approaches to the review of leadership concepts and their application; observation and discussion of current leadership trends and issues. **Prerequisites:** ALED or USAL-LED major; senior classification; grade of C or better in ALED 202, ALED 301, ALED 340, ALED 440, and ALED 424.

ALED 485 Directed Studies in Agricultural Leadership Development

Credits 1 to 4. 1 to 4 Other Hours. Directed individual study of selected problems in agricultural leadership and development with emphasis on collection, analysis and presentation of information. **Prerequisites:** Junior or senior classification and approval of instructor.

ALED 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Special topics in an identified area of agricultural development. May be repeated for credit. **Prerequisite:** Junior or senior classification.

ALED 491 Research

Credits 1 to 4. 1 to 4 Lecture Hours. Research conducted under the direction of faculty member in agricultural development. May be repeated 2 times for credit. Registration in multiple sections of this course are possible within a given semester provided that the per semester credit hour limit is not exceeded. Please see academic advisor in department. **Prerequisites:** Junior or senior classification; approval of instructor.

ALED 494 Internship

Credits 1 to 6. 1 to 6 Other Hours. Supervised internship and independent study related to student's professional interest. **Prerequisites:** Grade of C or better in ALED 301; junior or senior classification; 2.0 GPR; approval of instructor.

ANSC - Animal Science (ANSC)

ANSC 101 Introductory Seminar for Animal Science

Credit 1. 1 Lecture Hour. Orientation to programs and opportunities in the Department of Animal Science, to create an awareness of campus resources for financial aid and tutoring, to develop goals for college career and to initiate planning for internship and job opportunities.

ANSC 107 General Animal Science

Credits 3. 3 Lecture Hours. (AGRI 1319, 1419*) General Animal Science. General understanding of all aspects of the livestock industry; basic agriculture nomenclature of breeds, species and types of livestock; reproduction, nutrition, genetics, food safety, growth and development of beef cattle, sheep, horses, swine, dairy cattle and poultry; brief description of the companion animal industry.

ANSC 108 General Animal Science Laboratory

Credit 1. 2 Lab Hours. (AGRI 1119, AGRI 1419*) General Animal Science Laboratory. General overview of the beef cattle, dairy cattle, horse, sheep, swine and poultry industries; information on major breeds, anatomy, phenotypic and genotypic selection criteria and production practices for each species; major disciplines of the animal industry including breeding and genetics, nutrition, reproductive physiology and products; utilization of live animals, models and feedstuffs/equipment to enhance experiential learning approach. **Prerequisite:** Concurrent enrollment in ANSC 107.

ANSC 111 Animal Production Systems

Credits 3. 2 Lecture Hours. 2 Lab Hours. Transformative experiences related to beef cattle, dairy cattle, equine, sheep, swine, goats, companion animals, meats, food products and food safety; exposure to available animal science careers and potential areas of future/additional study. **Prerequisites:** Grade of C or better in ANSC 101 or AGLS 101, ANSC 107, and ANSC 108.

ANSC 113 Farm Animal Biosystems

Credits 2. 2 Lecture Hours. Information regarding the processes by which networks of cells are controlled and coordinated within the farm animal. **Prerequisites:** Grade of C or better in ANSC 107 and ANSC 108.

ANSC 117 Texas Barbecue

Credit 1. 1 Lecture Hour. Survey, demonstration and participation in preparation techniques of Texas barbecue; comparison of regional and international barbecue methods. **Prerequisite:** First year students.

ANSC 201 Introductory Equine Care and Use

Credits 2. 2 Lecture Hours. Survey of basic equine care and use; breeds of horses and their use; care and maintenance of equines including feeding, health care, housing and equipment.

ANSC 205 Animal Science Laboratory Preparation Methods

Credits 2. 1 Lecture Hour. 2 Lab Hours. . Study of basic animal production systems knowledge and effective pedagogical techniques to prepare animal science laboratories and animal handling methods; includes high-impact learning opportunity to allow the practice of pedagogical techniques learned in a controlled and supported environment.

Prerequisite: Grade of C or better in ANSC 107, ANSC 108, and ANSC 111.

ANSC 207 Art and Heritage of Livestock

Credits 3. 3 Lecture Hours. Using art as a venue to understand the legacy and heritage of livestock production and livestock's contribution to civilization and society; from man as hunter, agriculturalist, and finally, as industrialist; from cave paintings to Russell and Remington; history of the effects of painting, poetry, architecture and sculpture on agriculture.

ANSC 210 Companion Animal Science

Credits 3. 3 Lecture Hours. Types, care, physiology, common diseases and common treatments of companion animals (dogs, cats, exotic pets); careers including biomedical research; solutions for problems such as behavior and overpopulation.

ANSC 211 Equine Industry and Career Preparation

Credits 2. 2 Lecture Hours. Identify opportunities and skill sets required to pursue a career in the equine industry; development of resume, communication, professional etiquette and interview skills.

ANSC 215 Introduction to Livestock Evaluation

Credits 2. 1 Lecture Hour. 3 Lab Hours. (AGRI 2321) Introduction to Livestock Evaluation. Live market animal appraisal in relation to carcass and composition; criteria for selection of breeding livestock; techniques for preparation and delivery of oral reason.

ANSC 221 Equine Handling and Safety

Credits 3. 2 Lecture Hours. 2 Lab Hours. Working around horses safely and effectively; includes equine behavior, proper handling techniques, controlling movement of horses, health assessment and basic management. **Prerequisite:** ANSC 201.

ANSC 235 Animal Welfare Judging

Credits 2. 1 Lecture Hour. 3 Lab Hours. . Preparation for competition in Intercollegiate Animal Welfare Judging/Assessment competition; use of primary literature to strengthen knowledge of welfare issue present in the species chosen for competition scenario; required for participation on the Animal Welfare Judging Team. **Prerequisites:** ANSC 107.

ANSC 242 Growth and Development of Livestock

Credits 3. 2 Lecture Hours. 2 Lab Hours. Evaluation of slaughter livestock as related to growth and development, production efficiency, carcass value; selection of breeding animals based on performance, production records, visual appraisal; principles of growth biology; biotechnological tools used to manage growth and development. **Prerequisites:** ANSC 107 and ANSC 108.

ANSC 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Selected topics in an indented area of animal science. May be repeated for credit.

Prerequisite: Approval of instructor.

ANSC 291 Research

Credits 0 to 4. 0 to 4 Other Hours. Research conducted under the direction of faculty member in animal science. May be repeated 2 times for credit. **Prerequisites:** Freshman or sophomore classification and approval of instructor; 2.0 GPR in major and overall.

ANSC 302 Basic Beef Cattle Production

Credits 3. 3 Lecture Hours. Fundamental concepts of beef management and production principles; service course recommended for non-animal science majors. **Prerequisites:** ANSC 107 and ANSC 108.

ANSC 303/NUTR 303 Principles of Animal Nutrition

Credits 3. 3 Lecture Hours. Scientific approach to nutritional roles of water, carbohydrates, proteins, lipids, minerals, vitamins, and other dietary components; emphasis on the comparative aspects of gastrointestinal tracts and on digestion, absorption, and metabolism of nutrients.

Prerequisites: CHEM 119 and a grade of C or better in ANSC 113, or CHEM 222, CHEM 227 or CHEM 257; junior classification or approval of instructor. **Cross Listing:** NUTR 303/ANSC 303.

ANSC 305 Animal Breeding

Credits 3. 2 Lecture Hours. 2 Lab Hours. A systems approach to selection and mating of livestock; gene frequency, heritability, relationship, inbreeding, linebreeding, heterosis, crossbreeding, direct and correlated response to selection, and use of pedigree, family, progeny testing and indices for selection. **Prerequisites:** Grade of C or better in ANSC 111 and ANSC 113; GENE 301; STAT 301, STAT 302, STAT 303, or ANSC 309; junior classification or approval of instructor.

ANSC 307 Meats

Credits 3. 2 Lecture Hours. 3 Lab Hours. Integrated studies of the meat animal processing sequence regarding the production of meat-type animals and the science and technology of their conversion to human food. **Prerequisites:** Grade of C or better in ANSC 113; junior classification or approval of instructor.

ANSC 309 Applied Animal Record Keeping

Credits 3. 2 Lecture Hours. 2 Lab Hours. Keeping, analyzing and interpreting records to make fully-informed decisions on a day-to-day basis for production and management scenarios; practical application unique to animal science and meat processing. **Prerequisite:** Junior or senior classification.

ANSC 311 Equine Behavior and Training

Credits 2. 1 Lecture Hour. 3 Lab Hours. Equine behavior and application of principles of psychology to training horses; systematic approaches to horse training emphasizing principles of learning; equipment and its use; stable management and preparation of horses for competition; separate laboratory sections for students with varying backgrounds. **Prerequisite:** Junior or senior classification.

ANSC 314 Wool Evaluation and Grading

Credits 2. 1 Lecture Hour. 3 Lab Hours. Evaluation of U.S.D.A. grades for wool and mohair; steps involved in processing raw wool into finished fabric; genetic and environmental factors affecting quality characteristics of wool and mohair; grading, evaluation and selection of fleeces for economic value; oral and written defense of judgments.

ANSC 315 Livestock Judging

Credits 2. 1 Lecture Hour. 3 Lab Hours. Selection and evaluation of beef cattle, swine, sheep and horses. Ability to present accurate, clear and concise oral and written reasons stressed. **Prerequisites:** ANSC 107 and ANSC 108; junior or senior classification.

ANSC 316 Equine Selection and Judging

Credits 2. 1 Lecture Hour. 3 Lab Hours. Detailed evaluation and comparison of horses; selection and critique of athleticism and performance in horses; industry trends addressed; oral and written defense of judgments also explained and expected; required for participation on the Horse Judging Team. **Prerequisite:** Junior or senior classification or approval of instructor.

ANSC 317 Meat Selection, Evaluation and Grading

Credits 2. 1 Lecture Hour. 3 Lab Hours. Selection and grading of carcasses and wholesale cuts of beef, pork and lamb; principles of evaluation included in carcass contests and progeny testing. **Prerequisites:** ANSC 107 and ANSC 108.

ANSC 318 Animal Feeds and Feeding

Credits 3. 2 Lecture Hours. 3 Lab Hours. Scientific approaches associated with precision feeding and diet formulation to match nutrient availabilities of feedstuffs with requirements of various classes of livestock species; emphasis on cost-effective feeding strategies to optimize animal productivity, and end-product quality and safety, while mitigating environmental impacts and enhancing animal health and welfare. **Prerequisite:** Grade of C or better in ANSC 111, ANSC 113 and ANSC 303/NUTR 303; junior classification or approval of instructor.

ANSC 320 Animal Nutrition and Feeding

Credits 3. 3 Lecture Hours. Nutritional functions of water, protein, carbohydrates, fats, minerals and vitamins and their digestion, absorption, use and excretion; energy, protein and forage feedstuff characteristics and processing; nutritional requirements, ration formulation and feeding methods for farm animals; general course for non-animal science majors. **Prerequisite:** Junior or senior classification or approval of instructor; restricted to students in the college of agriculture and life sciences.

ANSC 325 Advanced Livestock and Product Evaluation

Credits 2. 1 Lecture Hour. 3 Lab Hours. Advanced evaluation of cattle, swine, sheep and equine; products produced or associated with each species; advanced oral or written defense of judgments associated with changing trends in these industries. May be repeated three times for credit. **Prerequisite:** Junior or senior classification.

ANSC 326/FSTC 326 Food Bacteriology

Credits 3. 3 Lecture Hours. Microbiology of human foods and accessory substances; raw and processed foods; physical, chemical and biological phases of spoilage; standard industry techniques of inspection and control. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** FSTC 326/ANSC 326.

ANSC 327/FSTC 327 Food Bacteriology Lab

Credit 1. 3 Lab Hours. Laboratory to accompany ANSC 326/FSTC 326 or FSTC 326/ANSC 326. **Cross Listing:** FSTC 327/ANSC 327.

ANSC 333 Reproduction in Farm Animals

Credits 2. 2 Lecture Hours. Physiological principles of reproductive processes in cattle, sheep, swine, and horses including sperm and ova production, estrus, fertilization, gestation and parturition. **Prerequisites:** Grade of C or better in ANSC 113 or ANSC 303/NUTR 303.

ANSC 334 Reproduction in Farm Animals Laboratory

Credit 1. 0 Lecture Hours. 2 Lab Hours. . Laboratory techniques relevant to reproductive processes in cattle, sheep, swine, and horses including sperm and ova production, estrus, fertilization, gestation, and parturition. **Prerequisite:** Grade of C or better in ANSC 333 or concurrent enrollment.

ANSC 337 Meat Merchandising

Credits 2. 1 Lecture Hour. 3 Lab Hours. Steps of meat processing and merchandising of retail and foodservice; merchandising practices such as selection, identification, fabrication, pricing, packaging and distribution. **Prerequisites:** ANSC 307; junior or senior classification.

ANSC 360 System Dynamics for Animal Sciences

Credits 2. 2 Lecture Hours. . System dynamics modeling for the analysis of business policy and strategy; study of visualization of a business organization in terms of structures and policies that create dynamics and regulate performance; emphasis on animal production. **Prerequisite:** Grade of C or better in ANSC 303/NUTR 303 or ANSC 320, or approval of the instructor.

ANSC 380 Animal Science for Agricultural Science

Credits 3. 3 Lecture Hours. . Preparation to become agriculture, food and natural resources (AFNR) teachers with an opportunity for the expansion of knowledge of the primary livestock species; information relating to breeding and genetics, reproduction, physiology, nutrition, management systems, products and disease; a brief exploration of companion animals. **Prerequisite:** ANSC 107 and Agricultural Science major.

ANSC 399 Animal Science Experience

Credits 0. 0 Lecture Hours. Participation in an approved high-impact learning practice; reflection on professional outcomes from animal science body of knowledge; documentation and self-assessment of learning experience at mid and final curriculum points. **Prerequisite:** Junior or senior classification.

ANSC 404 Behavior and Management of Domestic Animals

Credits 4. 3 Lecture Hours. 2 Lab Hours. Application of behavior of cattle, horses, sheep, goats and swine to their management; basic principles, physiology of behavior, perception, training, predators, use of dogs in livestock production, stress and animal welfare. **Prerequisites:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.

ANSC 406 Beef Cattle Production and Management

Credits 4. 3 Lecture Hours. 2 Lab Hours. Principles involved for profitable and sustainable, integrated beef cattle production as considered from the perspective of the U.S. cow-calf sector and from an overall systems-based approach. **Prerequisites:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.

ANSC 408 Management of Stocker and Feedlot Cattle

Credits 4. 3 Lecture Hours. 2 Lab Hours. Basic principles involved in feeding, management, marketing and disease control of stocker and feeder cattle from weaning through slaughter for economical production of beef. **Prerequisites:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318, and ANSC 333; STAT 301, STAT 302, STAT 303, or ANSC 309; junior or senior classification.

ANSC 411 Equine Nutrition and Health

Credits 3. 3 Lecture Hours. Designed to provide knowledge of nutrition and health in the horse; gastrointestinal anatomy, nutrient utilization, feeding management and nutritional requirements; metabolic diseases, infectious diseases, internal and external parasites, and herd health management. **Prerequisite:** Junior or senior classification.

ANSC 412 Swine Production and Management

Credits 4. 3 Lecture Hours. 2 Lab Hours. Basic principles and their practical application in efficient, economical pork production; all areas of production—breeding and selection, nutrition, housing and equipment, marketing, herd health and economic management. **Prerequisites:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.

ANSC 414 Sheep and Goat Production and Management

Credits 4. 3 Lecture Hours. 2 Lab Hours. In-depth hands-on experiences related to sheep and goat production and management providing an advanced understanding of small ruminant production. **Prerequisites:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.

ANSC 415 Brazil: Comparative Ruminant Production

Credits 3. 3 Lecture Hours. Contrast two scenarios of ruminant production in Brazil; the effects of globalization on the two different production systems. **Prerequisites:** ANSC 303/NUTR 303 or ANSC 320 or approval of instructor.

ANSC 418 Equine Exercise Physiology

Credits 3. 2 Lecture Hours. 2 Lab Hours. Changes within the systems of the horse resulting from the physical stresses of exercise, adaptations of systems in response to a training regimen; methodology for measuring improvement in physical condition; foundation for development of training programs for horses in moderate, intense or prolonged performance activities. **Prerequisites:** Junior or senior classification and approval of instructor.

ANSC 420 Equine Production and Management

Credits 4. 3 Lecture Hours. 2 Lab Hours. Application of biological and biotechnological principles and concepts in areas including genetics, breeding, nutrition, reproduction, immunology, parasitology, anatomy and exercise physiology to efficient production of horses for market; management of equine enterprises. **Prerequisite:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318, and ANSC 333; junior or senior classification or approval of instructor.

ANSC 423 Issues in the Equine Industry

Credit 1. 1 Lecture Hour. Integration of cumulative knowledge acquired in the equine science curriculum to demonstrate critical thinking and communication skills to address critical issues in the equine industry. **Prerequisite:** Junior or senior classification; approval of instructor.

ANSC 429 Dairy Production Management

Credits 4. 3 Lecture Hours. 2 Lab Hours. Major principles for profitable and sustainable dairy production for a commercial dairy operation; provides hands-on experiences in dairy cattle management; develops critical thinking skills to make dairy cattle management decisions. **Prerequisite:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.

ANSC 432 Equine Industry Tour

Credits 2. 2 Lecture Hours. All facets of the Texas Equine Industry, including breed associations, large events, breeding and production operations, large ranches, performance horse training barns, media, history, veterinary medicine, retail, sports medicine, and nutrition; network and gain a holistic perspective on the inner workings of the equine industry. **Prerequisites:** Junior or senior classification; approval of instructor.

ANSC 434 Animal Reproduction Management

Credits 4. 3 Lecture Hours. 2 Lab Hours. Available and emerging technologies including control of ovulation, artificial insemination, embryo manipulation and transfer, in vitro fertilization and animal cloning for managing reproduction of farm animals; hands-on sessions using available technologies including artificial insemination of cattle. **Prerequisites:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318 and ANSC 333; junior or senior classification or approval of instructor.

ANSC 436 Texas Panhandle Beef Production Tour

Credits 2. 2 Lecture Hours. Facets of beef production from cow/calf operations to retail product; experiential knowledge of technologies and practices to enhance efficiency to enlighten students regarding the array of career opportunities in the beef production industry. **Prerequisites:** Junior or senior classification or approval of instructor.

ANSC 437 Marketing and Grading of Livestock and Meat

Credits 4. 3 Lecture Hours. 2 Lab Hours. Study of USDA livestock and carcass grades; understanding current market trends for beef, pork, lamb and goat; review of branded and certified programs; principles applied in contracting, breakeven determination, hedging, and grid or formula pricing. **Prerequisite:** Junior or senior classification or approval of instructor.

ANSC 439 Feedlot Risk Management

Credits 2. 2 Lecture Hours. Advanced study of livestock marketing techniques; cash sales, video sales, futures and options markets, forward contracting; problem solving in real-time livestock marketing situations; risk of ownership of hypothetical livestock operations. **Prerequisites:** junior or senior classification or approval of instructor.

ANSC 447 Advanced Meat Science and Technology

Credits 4. 3 Lecture Hours. 3 Lab Hours. Advanced basic and applied studies of meat science and/or technology utilizing the underlying physiological and structural components for conversion to human food; understanding the influence of pre- and post-harvest factors on meat quality, composition, color, packaging, sensory and preparation factors; applying scientific and business principles to manufacturing and process flow of commercial meat food products and demonstrating knowledge of these principles through development of meat products. **Prerequisites:** Grade of C or better in ANSC 305, ANSC 307, ANSC 318 and ANSC 333; GENE 301; STAT 301, 302, 303, or ANSC 309; junior or senior classification or approval of instructor.

ANSC 451 Current Issues in Animal Agriculture

Credits 4. 3 Lecture Hours. 2 Lab Hours. Preparation to project a professional image and the use of communication skills to describe animal agriculture; converse about the strengths and weaknesses of animal agriculture. **Prerequisites:** Junior or senior classification or approval of instructor.

ANSC 455 System Dynamics for Animal Science

Credits 2. 2 Lecture Hours. Exploration of system dynamics modeling emphasizing animal science; mapping of complex system structures; development and testing of computer-based models of animal science. **Prerequisites:** Grade of C or better in ANSC 303/NUTR 303 or ANSC 320, or approval of instructor.

ANSC 457/FSTC 457 Hazard Analysis and Critical Control Point System

Credits 3. 3 Lecture Hours. Hazard Analysis and Critical Control Point (HACCP) principles specifically related to meat and poultry; microbiological and process overviews; good manufacturing practices and standard operating procedures development. **Prerequisite:** FSTC 326/ANSC 326 or ANSC 326/FSTC 326, or approval of instructor. **Cross Listing:** FSTC 457/ANSC 457.

ANSC 467 Processed Meat Food Operations

Credits 3. 2 Lecture Hours. 2 Lab Hours. Application of scientific and business principles to manufacturing and process flow of commercial meat food products. **Prerequisites:** ANSC 307 or FSTC 307 or approval of department head.

ANSC 470/FSTC 470 Quality Assurance for the Food Industry

Credits 3. 3 Lecture Hours. Principles of food system process control including statistical process control (SPC) and the tools required to assure uniform communication and understanding of quality assurance systems. **Prerequisite:** Junior or senior classification. **Cross Listing:** FSTC 470/ANSC 470.

ANSC 481 Seminar

Credit 1. 1 Lecture Hour. Review of literature and research problems related to the livestock and food industries; preparation of a technical report including an oral presentation supported by a written technical paper. **Prerequisite:** Senior classification.

ANSC 484 Livestock Practicum

Credit 1. 2 Other Hours. Provides an opportunity to learn skills required in livestock production; planned for students who have had limited farm and ranch experience in one or more species. **Prerequisite:** Junior or senior classification in animal science or approval of instructor.

ANSC 485 Directed Studies

Credits 0 to 4. 0 to 4 Other Hours. Directed individual study of selected problem in field of animal science. **Prerequisites:** Junior or senior classification; written approval of professor supervising the activity; 2.0 GPR in major and overall.

ANSC 487/FSTC 487 Sensory Evaluation of Foods

Credits 3. 2 Lecture Hours. 2 Lab Hours. Application of sensory science principles and practices to food systems including an understanding of discriminative, descriptive and consumer sensory techniques. **Prerequisites:** CHEM 222 or CHEM 228; junior or senior classification. **Cross Listing:** FSTC 487/ANSC 487.

ANSC 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 8 Lab Hours. Selected topics in an identified area of animal science. May be repeated for credit. **Prerequisite:** Junior or senior classification.

ANSC 491 Research

Credits 0 to 4. 0 to 4 Other Hours. Research conducted under the direction of faculty member in animal science. May be repeated 3 times for credit. Registration in multiple sections of this course is possible within a given semester provided that the per semester credit hour limit is not exceeded. **Prerequisite:** Junior or senior classification and approval of instructor; 2.0 GPR in major and overall.

ANSC 494 Animal Science Internship

Credits 0 to 5. 0 to 5 Other Hours. Independent study and supervised field experience related to the student's professional interest. **Prerequisites:** Junior or senior classification or approval of instructor; 2.0 GPR in major and overall.

ANSC 495 International Agriculture and Animal Production

Credits 3. 3 Lecture Hours. Study of international agriculture and animal production in the world market; impact on foreign economies and culture; considerations of import and export marketing on products to and from the U.S. to provide students the exposure to international economies and cultures; study abroad. **Prerequisites:** Grade of C or better in ANSC 107 or approval of instructor.

ANSC 498 Animal Science Capstone

Credits 4. 4 Lecture Hours. Senior capstone project for students preparing to enter a career related to animal science or a professional school; individual projects based on a self-selected topic in animal science; includes a paper containing both translational and technical descriptions plus statements regarding the expected financial and social impacts of selected topic. **Prerequisites:** Grade of C or better in ANSC 303/NUTR 303, ANSC 307, ANSC 333, and ANSC 334; senior classification.

ANTH - Anthropology (ANTH)

ANTH 201 Introduction to Anthropology

Credits 3. 3 Lecture Hours. (ANTH 2346, HUMA 2323) Introduction to Anthropology. An introduction to the discipline of anthropology through the examination of its four sub-fields: archaeology, physical anthropology, sociocultural anthropology and linguistics; also taught at Qatar campus.

ANTH 202 Introduction to Archaeology

Credits 3. 3 Lecture Hours. (ANTH 2302) Introduction to Archaeology. An introduction to the study of the human past through the retrieval, analysis, and interpretation of material remains; also taught at Galveston campus.

ANTH 204 The Prehistoric World

Credits 3. 3 Lecture Hours. Exploration of the development of human societies and world prehistory from the beginnings of humanity more than two million years ago to emergence of complex civilizations.

ANTH 205 Peoples and Cultures of the World

Credits 3. 3 Lecture Hours. Survey of human cultures around the world using case studies of customs and cultural organization; case studies exemplifying contrasting types of cultures and societies.

ANTH 210 Social and Cultural Anthropology

Credits 3. 3 Lecture Hours. (ANTH 2351) Social and Cultural Anthropology. Evolution of cultures; differences, similarities and effects of material and non-material culture on economic, social and political organization; also taught at Galveston campus.

ANTH 222 Cross Cultural Competency

Credits 3. 3 Lecture Hours. Development of skills vital for effective engagement in an increasingly diverse and interconnected world; personal awareness of biases, attitudes, values, beliefs and ways of knowing; exploration of the impact of culture on our ability to think critically and communicate effectively.

ANTH 225 Introduction to Biological Anthropology

Credits 3. 3 Lecture Hours. (ANTH 2301, 2401*) Introduction to Biological Anthropology. Study of human biology including an examination of evolutionary processes acting on human populations; human genetics; non-human primate anatomy, classification and ecology of primates; the primate paleontological record, and human variation and adaptation. **Prerequisites:** Concurrent registration in ANTH 226 recommended; also taught at Galveston campus.

ANTH 226 Introduction to Biological Anthropology Laboratory

Credit 1. 3 Lab Hours. (ANTH 2101, 2401*) Introduction to Biological Anthropology Laboratory. Exploration of basic evolutionary principles through population genetics; hands-on exposure to the fossils of primate and human evolution along with opportunity to measure, compare, contrast and observe trends that have occurred throughout the Cenozoic era. **Prerequisites:** Concurrent registration in ANTH 225 is recommended; also taught at Galveston campus.

ANTH 229 Introduction to Folklore

Credits 3. 3 Lecture Hours. Study of folklore through selected examples of traditional cultures, their beliefs, customs and art forms such as: tales, folksongs, proverbs, riddles and material culture.

ANTH 285 Directed Studies

Credits 0 to 3. 0 to 3 Other Hours. For individual research in anthropology on subjects not included in established courses. May be taken two times for credit. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

ANTH 289 Special Topics In...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Selected topics in an identified area of anthropology. May be repeated for credit.

ANTH 291 Research

Credits 0 to 3. 0 to 3 Other Hours. Research conducted under the direction of a faculty member in Anthropology. May be taken two times for credit. **Prerequisites:** Freshman or sophomore classification and approval of instructor.

ANTH 300 Cultural Change and Development

Credits 3. 3 Lecture Hours. Anthropological strategies for the study of cultural change and the implication of these strategies for the development of Western and non-Western societies.

ANTH 301 Indians of North America

Credits 3. 3 Lecture Hours. Native North American cultures from the Arctic to Mesoamerica; their origins, cultures prior to extensive acculturation and their contemporary situations.

ANTH 302 Archaeology of North America

Credits 3. 3 Lecture Hours. Overview of archaeology and prehistory of North America from the arrival of humankind through the development of agriculture to Euro-American contact. **Prerequisite:** ANTH 201, ANTH 202, ANTH 204, ANTH 205, or ANTH 210.

ANTH 304 Archaeology Roadshow

Credits 3. 3 Lecture Hours. Interdisciplinary field-trip in the archaeology and paleoecology of a specific region; high-impact learning experiences in a field setting. May be repeated two times for credit. **Prerequisites:** ANTH 201, ANTH 202, ANTH 204, ANTH 205, or ANTH 225; approval of instructor.

ANTH 305 Fundamentals of Anthropological Writing

Credit 1. 1 Lecture Hour. Basic types of writing expected of anthropology students; emphasis on the subject matter of an upper-division anthropology course in which the student is currently enrolled. **Prerequisites:** Junior or senior classification and co-enrollment in another upper-division anthropology course (the "companion course").

ANTH 308 Archaeology of Mesoamerica

Credits 3. 3 Lecture Hours. Development of Indian civilizations in Mexico and Guatemala, including prehistory of the Olmec, Maya, Aztec and other regional cultures to the time of the Spanish conquest.

ANTH 312 Fossil Evidence of Human Evolution

Credits 3. 3 Lecture Hours. Detailed review of fossil antecedents of humans including theoretical implications for an understanding of human evolution. **Prerequisite:** ANTH 225 or approval of instructor.

ANTH 313 Historical Archaeology

Credits 3. 3 Lecture Hours. Use and methods of historical archaeology in locating, documenting, restoring and preserving our historical resources; also taught at Galveston campus.

ANTH 316 Nautical Archaeology

Credits 3. 3 Lecture Hours. Nautical Archaeology Underwater shipwrecks, sunken harbors, and other submerged evidence of human activities; relationship to cultural geography in general; problems of diving technology, surveying and preservation; relevance to modern problems. **Prerequisite:** Junior or senior classification; also taught at Galveston campus.

ANTH 317/RELS 317 Introduction to Biblical Archaeology

Credits 3. 3 Lecture Hours. Application of archaeology in biblical research; basic overview of the material cultures that are the setting for the biblical narratives. **Cross Listing:** RELS 317/ANTH 317.

ANTH 318 Nautical Archaeology of the Americas

Credits 3. 3 Lecture Hours. Seafaring in the Americas from the 16th to the 20th centuries based on shipwreck archaeology; ship construction, exploration, commerce, naval warfare and related activity; influence of seafaring on the cultures, economics and history of the Western Hemisphere; also taught at Galveston campus.

ANTH 323 Nautical Archaeology of the Mediterranean

Credits 3. 3 Lecture Hours. The archaeology of ancient seafaring in the Mediterranean from the Stone Age through the Roman Empire. **Prerequisite:** Junior or senior classification.

ANTH 324/MUSC 324 Music in World Cultures

Credits 3. 3 Lecture Hours. Examination of music from an ethnomusicological perspective focusing on musical performance and the complex interrelationship of music to culture, society and daily life; examination of music from a variety of cultures through a series of case studies. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** MUSC 324/ANTH 324.

ANTH 330 Field Research in Anthropology

Credits 1 to 9. 1 to 9 Other Hours. Training for students in formulating and solving anthropological problems through field research; problem oriented field research under supervision. **Prerequisites:** Grade of C or better in ANTH 201, ANTH 202, ANTH 204, ANTH 205, ANTH 210, or ANTH 225; approval by instructor.

ANTH 335 Cultures of Central Asia

Credits 3. 3 Lecture Hours. Study of anthropological research in Central Asia: ecological adaptations; colonialism and post-colonialism; ethnic politics and ethnic conflict; religion and identity; gender and family; globalization and modernization. **Prerequisite:** Junior or senior classification.

ANTH 340/RELS 340 Folklore and the Supernatural

Credits 3. 3 Lecture Hours. Traditional expressions of the supernatural such as superstition, belief tale and divination classified as folklore genres and their relationships to the cultures in which they develop; theories drawn from anthropology, folklore and related social sciences. **Prerequisite:** Junior or senior classification or approval of instructor. **Cross Listing:** RELS 340/ANTH 340.

ANTH 350 European Archaeology

Credits 3. 3 Lecture Hours. Overview of archaeology and prehistory of Europe from the evolution of the hominids to the development of agriculture and the rise of civilization; also taught at Galveston campus.

ANTH 351 Classical Archaeology

Credits 3. 3 Lecture Hours. Origins and spread of Western civilization through the material remains of Minoan, Mycenaean, Etruscan, and early Greek and Roman cultures. **Prerequisite:** Junior or senior classification or approval of instructor; Galveston campus.

ANTH 353/CLAS 353 Archaeology of Ancient Greece

Credits 3. 3 Lecture Hours. Archaeology of ancient Greece from the Stone Age until the ascent of Rome in the Hellenistic Period; remains of ancient Greek art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions). **Prerequisite:** Junior or senior classification. **Cross Listing:** CLAS 353/ANTH 353.

ANTH 354/CLAS 354 Archaeology of Ancient Italy

Credits 3. 3 Lecture Hours. Archaeology of ancient Italy from the Stone Age until the collapse of the Roman Empire in the fourth century; remains of ancient Etruscan and Roman art (sculpture, mosaic, painting), architecture (temples, homes, civic structures), religion (figurines, votive offerings), and social history (coins, inscriptions). **Prerequisite:** Junior or senior classification. **Cross Listing:** CLAS 354/ANTH 354.

ANTH 360 Ancient Civilizations of the World

Credits 3. 3 Lecture Hours. Explores recent discoveries and efforts by archaeologists to understand the rise and fall of states and civilizations that emerged in the Near East, Africa, India, Europe, China, Mesoamerica, and Peru between 3500 BCE and 1500 CE. **Prerequisite:** Junior or senior classification.

ANTH 370 Cultural Diversity and Ethics

Credits 3. 3 Lecture Hours. Examination of the cultural construction of ethical values and how cultural diversity, including beliefs, values and ways of doing business, impacts human technological innovation; focuses on developing a holistic, social-science mindset and application of critical thinking skills.

ANTH 382/HIST 382 Conflict Archaeology and Military History

Credits 3. 3 Lecture Hours. Military history; conflict archaeology; human conflict; diplomacy, ethics, and leadership in conflicts; warfare; modern global issues; public service. **Prerequisites:** Junior or senior classification or approval of instructor. **Cross Listing:** HIST 382/ANTH 382.

ANTH 401 Ice Age Humans in North America

Credits 3. 3 Lecture Hours. Archaeological, environmental and geological evidence related to the timing of human entry into the Americas and megafaunal extinctions at the end of the Pleistocene. **Prerequisite:** ANTH 202 or equivalent.

ANTH 402 Archaeological Artifact Conservation

Credits 4. 3 Lecture Hours. 3 Lab Hours. Analysis of the treatments for artifacts of clay, stone, glass, wood, shell, bone, fiber and metal from archaeological excavations or ethnographic, and historic collections presented in an integrated series of lectures and hands-on laboratory experience. **Prerequisite:** Junior or senior classification or approval of instructor.

ANTH 403/RELS 403 Anthropology of Religion

Credits 3. 3 Lecture Hours. Cross-cultural, theoretical analysis of religion as a cultural phenomenon; exploring the relationships between religion, culture, society and the individual; also taught at Galveston campus. **Cross Listing:** RELS 403/ANTH 403.

ANTH 404/WGST 404 Women and Culture

Credits 3. 3 Lecture Hours. Examines women's lives in evolutionary and cross-cultural perspective; women's roles in subsistence, politics, religion and economics in traditional cultures; women's roles in international development; the cultural and social construction of women's biology cross-culturally including circumcision, menstruation, pregnancy, childbirth and motherhood. **Prerequisite:** Junior or senior classification; approval of instructor. **Cross Listing:** WGST 404/ANTH 404.

ANTH 405 Introduction to the Primates

Credits 3. 3 Lecture Hours. Survey of nonhuman primates from ecological and evolutionary perspectives covering numerous topics including: taxonomy; primate evolution; behavioral observation; reproductive strategies; diet; and conservation. **Prerequisite:** Junior or senior classification.

ANTH 409 Science, Pseudoscience and Critical Thinking in Anthropology

Credits 3. 3 Lecture Hours. Close scrutiny of fantastic claims made across a broad spectrum of media regarding anthropology, biological anthropology and archaeology; distinction of science from pseudoscience; critical evaluation of scientific and pseudoscientific research; evaluation of media portrayal of science; development of critical thinking skills for skeptical investigation of extraordinary claims. **Prerequisite:** Junior or senior classification or approval of instructor; also taught at Galveston campus.

ANTH 410 Anthropological Theory

Credits 3. 3 Lecture Hours. A systematic examination of the basic principles of anthropology. **Prerequisite:** ANTH 210 or ANTH 205.

ANTH 412 Archaeological Theory

Credits 3. 3 Lecture Hours. History of scientific archaeological exploration; major theoretical paradigms and movements in archaeological theory; current trends in archaeology; intellectual developments from other disciplines that influenced archaeological thought. **Prerequisites:** Junior or senior classification, ANTH 202 or approval of instructor.

ANTH 415 Anthropological Writing

Credits 3. 3 Lecture Hours. Reading and discussion of the classic genres of anthropological literature; instruction in writing styles and techniques appropriate to each genre, followed by guided writing assignments. **Prerequisite:** Junior or senior classification.

ANTH 417/CLAS 417 Naval Warfare and Warships in Ancient Greece and Rome

Credits 3. 3 Lecture Hours. Extensive survey of Greek and Roman warships, naval warfare, naval strategy and tactics drawing upon archaeological evidence, literary documentation and iconographic material, from the Bronze Age (Ancient Egypt and the mythical Trojan War) to the Imperial Roman Navy. **Prerequisite:** Junior or senior classification. **Cross Listing:** CLAS 417/ANTH 417.

ANTH 418 Romans, Arabs, and Vikings-- Seafaring in the Mediterranean during the early Christian Era

Credits 3. 3 Lecture Hours. Examination of seafaring, maritime commerce, naval affairs, and shipbuilding in the Mediterranean from the late Roman Period until the fall of Constantinople in 1453. **Prerequisite:** Junior or senior classification.

ANTH 419 Indians of Texas

Credits 3. 3 Lecture Hours. Study of diverse native/immigrant Texas Indian lifeways/cultures from late pre-European to contemporary times; exploration of historical underpinnings, traditional cultures, especially land-use patterns; assessment of tribal relationships with colonial powers, U.S., and Texas governments as evidenced in ethnographic, ethnohistoric, and historical materials; application toward anthropological, archaeological, and human ecology research. **Prerequisites:** Junior or senior classification; ANTH 201, ANTH 202, ANTH 205, ANTH 210, ANTH 301, HIST 258, or HIST 308, or approval of instructor.

ANTH 420 Pirates, Privateers, and Sea Raiders

Credits 3. 3 Lecture Hours. History and archaeology of piracy, privateering, and sea raiding from ancient times in the Mediterranean, through the Viking Era in the Northern Atlantic, and the advent of piracy in the New World and Caribbean; sociology of contemporary piracy in Africa and the Indian Ocean; sensationalism of pirate legend and the cultural responses to the influences of the pirate phenomenon, both cinematographic and literary. **Prerequisites:** Junior or senior classification.

ANTH 421/MUST 421 Advanced Museum Studies

Credits 3. 2 Lecture Hours. 3 Lab Hours. Exploration of advanced topics in museum programs; preservation, research, education, outreach; development and implementation; emphasis on historical contexts, disciplinary intersections, ethical obligations and professional responsibilities; service to community, state and national interest and advancement of sciences. **Prerequisite:** Grade of C or better in MUST 221/ARCH 221, ARCH 221/MUST 221, or MAST 220; junior or senior classification. **Cross Listing:** MUST 421/ANTH 421.

ANTH 423 Bioarchaeology

Credits 3. 3 Lecture Hours. Role of human skeletal studies in reconstructing the biological and cultural past of humans; evidence gleaned from human skeletal remains recovered from archaeological sites such as data regarding diet, health, genetics and migration.

Prerequisites: ANTH 225; junior or senior classification; also taught at Galveston campus.

ANTH 424 Human Evolutionary Ecology: Culture and Cooperation

Credits 3. 3 Lecture Hours. Examination of evolutionary perspective to explore culture, cooperation and sociality and subsistence behaviors across a wide variety of human cultures; part of the Human Evolutionary Ecology series along with ANTH 434. **Prerequisite:** Junior or senior classification.

ANTH 425 Human Osteology

Credits 3. 2 Lecture Hours. 3 Lab Hours. Concepts and methods used by anthropologists to identify, describe and analyze human skeletal remains from forensic and archaeological contexts. **Prerequisites:** ANTH 225 and ANTH 226, or VIBS 305; junior or senior classification.

ANTH 426 Anthropology of Food and Nutrition

Credits 3. 3 Lecture Hours. Anthropological study of human foodways and their nutritional consequences; how environmental, biological and cultural factors interact to produce patterns of food intake, and the effects of such patterns on health, growth and fertility; examples drawn primarily from non-Western societies. **Prerequisite:** ANTH 201 or ANTH 210 or ANTH 225 or NUTR 202 or approval of instructor.

ANTH 427 Human Biological Variation

Credits 3. 3 Lecture Hours. Biological basis of variation in the physical features of modern humans; details of anatomical and physiological differences of living populations to understand their adaptive and historical significance; history of human variation studies rooted in the historical notion of "race." **Prerequisites:** ANTH 225 and ANTH 226, or BIOL 214 or BIOL 225; junior or senior classification.

ANTH 430 Applied Anthropology

Credits 3. 3 Lecture Hours. Theory, ethics and practical applications of anthropological methods and concepts as they relate to planned programs of sociocultural change. **Prerequisites:** ANTH 210; junior or senior classification.

ANTH 434 Human Evolutionary Ecology: Reproduction and Parenting

Credits 3. 3 Lecture Hours. Evolutionary ecology perspective on family-formation patterns, sexuality, reproduction and parenting of humans throughout the life course and across different cultures; part of a Human Evolutionary Ecology series along with ANTH 424. **Prerequisites:** Junior or senior classification.

ANTH 435 Medical Anthropology

Credits 3. 3 Lecture Hours. Overview of medical anthropology, a subfield in anthropology which examines the biological and cultural basis of health and disease in order to understand the influence of culture on the illness experience and treatment. **Prerequisite:** Junior or senior classification or approval of instructor.

ANTH 436/RELS 436 Ancient Egypt I

Credits 3. 3 Lecture Hours. Archaeology and history of ancient Egypt from earliest times to the end of the New Kingdom period. **Prerequisites:** Junior or senior classification or approval of instructor. **Cross Listing:** RELS 436/ANTH 436.

ANTH 437 Ethnobotany

Credits 3. 3 Lecture Hours. Interdisciplinary study of the complex and dynamic relationships that exist between people and plants. **Prerequisite:** Junior or senior classification or approval of instructor.

ANTH 438/RELS 438 Ancient Egypt II

Credits 3. 3 Lecture Hours. Archaeology and history of ancient Egypt from the end of the New Kingdom to the end of the Graeco-Roman period. **Prerequisites:** Completion of ANTH 436/RELS 436 or RELS 436/ANTH 436 recommended but not required; junior or senior classification or approval of instructor. **Cross Listing:** RELS 438/ANTH 438.

ANTH 440 Studies in Globalization

Credits 3. 3 Lecture Hours. Selected issues on the anthropology of globalization such as the impact of global circulations of media, money and people on local cultures, identities and politics, migration and political economy. May be taken three times for credit. **Prerequisites:** Junior or senior classification or approval of instructor.

ANTH 444/CLAS 444 Classical Archaeology

Credits 3. 3 Lecture Hours. History of the discipline through the individuals, organizations, excavations, theoretical models and ethical issues that have shaped it. **Prerequisites:** Junior or senior classification. **Cross Listing:** CLAS 444/ANTH 444.

ANTH 445 Studies in African Diaspora

Credits 3. 3 Lecture Hours. Examination of topics related to global African diaspora including African descent populations outside of Africa wherever found (the Americas, the Caribbean, Europe, Asia, etc.); construction of blackness in Latin America; diversity of past and present African descent populations in the Old World; social and political mobilization; religion; popular culture; cultural politics; politics of identity. May be taken three times for credit. **Prerequisite:** Junior or senior classification.

ANTH 447 Lithic Artifact Analysis

Credits 3. 2 Lecture Hours. 3 Lab Hours. Laboratory-based course reviewing methods archaeologists use to analyze stone tools and debitage, including identification of tool-stone sources, reconstruction of technology, explanation of assemblage variability, and microscopic use-wear analysis. **Prerequisite:** ANTH 202 and approval of instructor; junior or senior classification.

ANTH 448 Quantitative Methods in Anthropology

Credits 3. 3 Lecture Hours. Quantitative analytical methods employed by anthropologists; includes statistical analyses, statistical software and sampling theory commonly used in anthropological research. **Prerequisites:** Junior or senior classification; STAT 302 or STAT 303.

ANTH 458 Quantitative Ethnographic Methods

Credits 3. 3 Lecture Hours. Quantitative data collection and analytical methods employed by anthropologists; includes standardized observation, structured interviews, demography and network analysis; hands-on assignments involving data collection among local community. **Prerequisite:** Junior or senior classification.

ANTH 461 Environmental Archaeology

Credits 3. 2 Lecture Hours. 3 Lab Hours. Exploration of the paleoecological context in which past humans interacted with the natural environment encompassing plants, animals and landscape; advanced method, theory and applications in paleoenvironmental reconstruction.

Prerequisites: ANTH 202 or approval of instructor; junior or senior classification.

ANTH 464 Cultural Heritage and Resource Management

Credits 3. 3 Lecture Hours. Evaluation of modern ideas about how and why archaeological, architectural, ethnographic, and natural resources should be preserved and presented to current and future societies; critical examination of the theories, methods, regulations, and ethics that guide efforts to preserve and protect cultural heritage within a context of past endeavors and future directions. **Prerequisites:** Junior or senior classification or approval of instructor.

ANTH 484 Anthropology Internship

Credits 0 to 3. 0 to 3 Other Hours. Provides students with the opportunity to gain practical experience in a variety of settings, including local, state or federal agencies; museums; non-profit organizations; non-governmental organizations; private firms. May be taken four times for credit. **Prerequisite:** Junior or senior classification.

ANTH 485 Directed Studies

Credits 0 to 9. 0 to 9 Other Hours. For individual research in anthropology on subjects not included in established courses. May be repeated for credit. **Prerequisite:** Junior or senior classification or approval of instructor; also taught at Galveston campus.

ANTH 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of anthropology. May be repeated for credit.

ANTH 491 Research

Credits 0 to 3. 0 to 3 Other Hours. Research conducted under the direction of a faculty member in Anthropology. May be taken two times for credit. **Prerequisites:** Junior or senior classification and approval of instructor.

ARAB - Arabic (ARAB)

ARAB 101 Beginning Arabic I

Credits 4. 4 Lecture Hours. (ARAB 1411) Beginning Arabic I. Introduction to Modern Standard Arabic in its written and spoken forms; emphasis on conversation, rudimentary vocabulary, simple grammar, and reading.

ARAB 102 Beginning Arabic II

Credits 4. 4 Lecture Hours. (ARAB 1412) Beginning Arabic II. Introduction of more complex grammatical constructions; vocabulary building; emphasis on putting acquired vocabulary and grammar to conversational use. **Prerequisite:** ARAB 101 or equivalent.

ARAB 104 Intensive Beginning Arabic

Credits 8. 8 Lecture Hours. Accelerated elementary language study, with oral, listening, reading and writing practice. Equivalent to ARAB 101 and ARAB 102.

ARAB 201 Intermediate Arabic I

Credits 3. 3 Lecture Hours. (ARAB 2311) Intermediate Arabic I. Practice of listening, speaking and writing skills; vocabulary building; discussion of topics related to daily life and general aspects of Arab culture.

Prerequisite: ARAB 102 or ARAB 104, or equivalent.

ARAB 202 Intermediate Arabic II

Credits 3. 3 Lecture Hours. (ARAB 2312) Intermediate Arabic II. Emphasis on comprehending printed material, perfecting pronunciation, and attending to more complex grammar; discussion of topics holding general and professional interest; knowledge of Arab culture and history.

Prerequisite: ARAB 201 or equivalent.

ARAB 204 Intensive Intermediate Arabic

Credits 6. 6 Lecture Hours. Accelerated intermediate language study, with oral, listening, reading and writing practice. Equivalent to ARAB 201 and ARAB 202. **Prerequisite:** ARAB 102 or ARAB 104.

ARAB 215 Introduction to Modern Arab Culture

Credits 3. 3 Lecture Hours. Exploration of cultural, linguistic, religious, and ethnic diversity in the Arab world; investigation of the impact of tradition and modernity on modern Arab culture; relating diverse cultural practices and products to diverse perspectives in the Arab world; taught in English.

ARAB 221 Introduction to Arabic Language and Society

Credits 3. 3 Lecture Hours. Examination of critical linguistic issues in the Arab world from a sociolinguistic perspective, including language and religion; language and power; language and nationalism; and language and education. **Prerequisite:** Approval of instructor.

ARAB 222 Field Studies I: Language, Culture, and Society

Credits 3. 3 Lecture Hours. Arabic language and culture taught in an Arabic-speaking country; living with a host family; supervised travel of cultural interest; participation in activities of host institution. **Prerequisite:** ARAB 102 or ARAB 104, or equivalent.

ARAB 258 Global Middle Eastern Cultures

Credits 3. 3 Lecture Hours. Exploration of the contemporary and historical cultures of the Middle East region; investigation of intercultural connections between the Middle East and the rest of the globe; emphasis on cultural traditions, religious communities, societal change, social movements, migration, and diaspora.

ARAB 285 Directed Studies

Credits 1 to 4. 1 to 4 Other Hours. Individual supervision of readings or assigned projects in an Asian Language, selected for each student individually; written or oral reports. **Prerequisite:** Approval of Arabic and Asian Language Office Director.

ARAB 289 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. 0 to 4 Lab Hours. Selected topics in an identified area of Arabic studies. May be repeated for credit.

Prerequisite: Approval of instructor.

ARAB 301 Reading and Composition

Credits 3. 3 Lecture Hours. Advanced Arabic grammar and readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials in order to develop awareness of cultural products, perspectives, and practices found in the Arab world. **Prerequisites:** ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 302 Reading and Composition II

Credits 3. 3 Lecture Hours. Readings of average difficulty and of different genres, including literary and journalistic texts and other culturally-enriched materials; development of writing skills with emphasis on grammatical constructions; expansion of vocabulary and oral expression. **Prerequisites:** ARAB 301; junior or senior classification or approval of instructor.

ARAB 321 Business Arabic

Credits 3. 3 Lecture Hours. Business and financial terminologies useful in the Arab World; cultural etiquette for effective communication in Arabic business settings; oral and written business reports from a variety of authentic sources; language skills and communication strategies for traveling, shopping and conducting financial transactions in the Arab World. **Prerequisites:** ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 322 Field Studies II: Language, Culture, and Society

Credits 3. 3 Lecture Hours. Arabic language and culture taught in an Arabic-speaking country; living with a host family; supervised travel of cultural interest; participation in activities of host institution. **Prerequisites:** ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 323 Media Arabic

Credits 3. 3 Lecture Hours. Analysis of current events in the Arab World; use of print and electronic materials in Arabic from variety of media sources; discussion of different points of view in media representation/coverage; issues pertaining to business, politics, culture and entertainment in the Arab World. **Prerequisites:** ARAB 202 or ARAB 204, or equivalent; junior or senior classification or approval of instructor.

ARAB 475 Media and the Middle East

Credits 3. 3 Lecture Hours. Examination of how media (e.g., literature, news, film, television) contribute to our understanding of historical events in the Middle East; analysis of cultural, social, political and historical circumstances of media representation of events; exploration of various media genres' techniques and narrative structure. May be taken two times for credit with a focus on different medium. **Prerequisite:** Junior or senior classification or approval of instructor.

ARAB 485 Directed Studies

Credits 1 to 4. 1 to 4 Other Hours. Individual supervision of readings or assigned projects selected for each student individually; written or oral reports. **Prerequisite:** Approval of instructor and Director of AALO.

ARAB 489 Special Topics in...

Credits 1 to 4. 1 to 4 Lecture Hours. Selected topics in an identified area of Arabic studies. May be repeated for credit. **Prerequisite:** Approval of instructor.

ARAB 491 Research

Credits 1 to 4. 1 to 4 Other Hours. Research in Arabic studies conducted under the direction of faculty member approved by the Director of AALO. May be taken 2 times for credit. **Prerequisites:** Junior or senior classification and approval of instructor.

ARCH - Architecture (ARCH)

ARCH 105 Design and Visual Communications Foundations I

Credits 5. 2 Lecture Hours. 10 Lab Hours. Architectural design principles; development of skills in perception, thought and craft as they apply to the formation of two- and three-dimensional relationships; introduction to and practice of tools, methods, techniques available for graphic communication; graphic communication and the design process; observation and other forms of free-hand drawing and drawing systems that develop representational and descriptive capabilities. **Prerequisites:** BS in Architecture major.

ARCH 106 Design and Visual Communication Foundations II

Credits 5. 2 Lecture Hours. 10 Lab Hours. Approaches to problem identification and problem solving emphasizing human, physical and cultural factors influencing architectural design; understanding of space, materiality and tectonics in a human body scale; development of drawing methods with emphasis on analytical drawing; reinforcement of visual and verbal communication as applied to design processes. **Prerequisites:** Grade of C or better in ARCH 105; major in BS in Architecture.

ARCH 115 Visual Communication Foundations I

Credits 3. 3 Lecture Hours. 0 Lab Hours. Introduction to and practice of tools, methods, techniques available for graphic communication; graphic communication and the design process; observation and other forms of free-hand drawing and drawing systems that develop representational and descriptive capabilities.

ARCH 205 Architecture Design I

Credits 5. 2 Lecture Hours. 10 Lab Hours. Issues and methods in designing environments for human habitation and well-being; projects addressing site, functional planning, spatial ordering, form generation through a recognition of the synthesis of space, structure, use and context; reinforcement of appropriate graphic and model building techniques. **Prerequisites:** Grade of C or better in ARCH 105 and ARCH 106.

ARCH 206 Architecture Design II

Credits 5. 2 Lecture Hours. 10 Lab Hours. Fundamental issues of innovative design processes and creation explored through the creative use of past, present and future materials, tools, and technologies; with an emphasis upon the research of materials, methods, scale, craft and technique as instruments of design, fabrication, and production. **Prerequisites:** Grade of C or better in ARCH 205.

ARCH 212 Social and Behavioral Factors in Design

Credits 3. 3 Lecture Hours. Social and behavioral factors in the built and natural environment; environmental perception and spatial cognition; social-environmental processes such as privacy and crowding; setting-oriented discussion on residences, education, and the workplace; the psychology of nature and natural resource management; social design and social science contribution to architectural design.

ARCH 213 Sustainable Architecture

Credits 3. 3 Lecture Hours. A comprehensive introduction to sustainability concepts, techniques and applications at all levels of the built environment, history of contemporary development of sustainable architecture from 1960 to the present; design strategies, environmental technologies and social factors for reducing building energy needs and carbon foot prints; global applications of sustainable approaches.

ARCH 216 Computational Methods in Architecture

Credits 3. 2 Lecture Hours. 2 Lab Hours. Software and processes for computation design in architecture; image editing and creation, vector drawing, 3D modeling, parametric modeling, rendering techniques and simulation.

ARCH 221/MUST 221 Foundations of Museum Studies

Credits 3. 3 Lecture Hours. Introduction to museums, cultural heritage and collections care; best practices for non-profit institutions, public engagement and the collection, preservation and exhibition of material culture; emphasis on archaeological, ethnographic, and historical collections, or other collections of cultural significance. **Cross Listing:** MUST 221/ARCH 221.

ARCH 246 Foundations of Historic Preservation

Credits 3. 3 Lecture Hours. Exploration and evaluation of the cross-disciplinary work of historic preservation; emphasis on the significance of historic places to societal well-being and conservation alternatives for historic and cultural environments; review of preservation projects and treatments; guest presentations and case studies from practicing professionals and researchers in a variety of fields.

ARCH 249 Survey of World Architecture History I

Credits 3. 3 Lecture Hours. (ARCH 1301) Survey of World Architecture History I. A survey of world architecture and the human-designed and built environment from prehistory to the 13th century.

ARCH 250 Survey of World Architecture History II

Credits 3. 3 Lecture Hours. (ARCH 1302) Survey of World Architecture History II. A survey of world architecture and the human-designed and built environment from the 13th to the 19th century.

ARCH 260 Comparative Theory in the Built and Virtual Environments

Credits 3. 3 Lecture Hours. Introduction of cultural theory and the environment; theories, special concepts and ideas relevant to the built and virtual environments with primary focus on the last fifty years; theory, theory building, and application to buildings and urban design; formation of ideas and critical ways of assessing the environment.

ARCH 281 Seminar in Contemporary Architecture

Credit 1. 1 Lecture Hour. Presentations by and discussions with professionals representing specialty areas related to environmental design through the Department of Architecture Lecture Series. May be taken four times for credit. Must be taken on a satisfactory/unsatisfactory basis.

ARCH 289 Special Topics in...

Credits 1 to 5. 0 to 10 Lab Hours. 1 to 5 Other Hours. Selected topics in an identified area of Architecture. May be repeated for credit.

ARCH 291 Research in Architecture Innovation

Credits 0 to 4. 0 to 4 Other Hours. Research conducted under the direction of faculty member in the College of Architecture. May be repeated 2 times for credit. **Prerequisite:** Approval of instructor and department head.

ARCH 305 Architecture Design III

Credits 5. 2 Lecture Hours. 10 Lab Hours. Integration of architectural theories and philosophy with environmental design systems; study of theoretical approaches to graphic and analytical thinking, problem identification and design dissemination through various media, case studies and problem resolution; conditions and forces associated with a variety of building types and the generation design solutions.

Prerequisites: Admission to upper level in BS in Architecture; ARCH 249 and ARCH 250.

ARCH 317 Digital Fabrication for Architecture

Credits 3. 1 Lecture Hour. 4 Lab Hours. Digital fabrication for architecture including software, numerically controlled tools, translation applications and management strategies for digital fabrication workflows; production of building components from three dimensional datasets of virtual architecture proposals. **Prerequisites:** Junior or senior classification or approval of instructor; ARCH 216 or approval of instructor.

ARCH 327 Conceptual Structural Analysis

Credits 3. 1 Lecture Hour. 4 Lab Hours. A non-mathematical investigation of structural systems and components with respect to behavior; selection of the most appropriate structural system for various building typologies. **Prerequisite:** Junior or senior classification or approval of instructor.

ARCH 328 Architectural Envelopes

Credits 3. 3 Lecture Hours. Study of roof, wall, glazing and screen systems of significant works in contemporary architecture and the strategies behind their making; focus on innovative materials, surface effects, and performance aspects. **Prerequisite:** Junior or senior classification in environmental design.

ARCH 330 The Making of Architecture

Credits 3. 3 Lecture Hours. Study of significant works of contemporary architecture and materials and strategies used in their making; focus on innovative materials, systems, and partnerships necessary to realize the design. **Prerequisites:** Junior or senior classification in environmental design or approval of instructor or ARCH classification.

ARCH 331 Architectural Structures

Credits 3. 2 Lecture Hours. 2 Lab Hours. Physical principles that govern statics and strength of materials through the design of architectural structures from a holistic view, in the context of architectural ideas and examples; introduction to construction, behavior of materials, and design considerations for simple and complex structural assemblies; computer applications. **Prerequisites:** Junior or senior classification in environmental design; MATH 142 or equivalent; PHYS 201.

ARCH 335 Architectural Systems

Credits 3. 2 Lecture Hours. 2 Lab Hours. Theory and applications of building energy use, envelope design, shading analysis, heating and cooling systems, lighting design; building water supply, plumbing and drainage systems; electrical, acoustical, fire and lightning protection; life safety; transportation systems and construction materials; calculations, equipment selection, and component sizing as they relate to building design. **Prerequisites:** Junior or senior classification in environmental design; PHYS 201.

ARCH 345 History of Building Technology

Credits 3. 3 Lecture Hours. Chronological development of civilization and building technology from prehistoric cultures to present; classic and modern materials, structural devices past and present, machine-produced products, prefabrication, construction methodology and servicing.

ARCH 346 Architecture, Heritage and Culture

Credits 3. 3 Lecture Hours. Global exploration of how architecture and the built environment express culture and identity; theoretical and practical approaches to cultural heritage and conservation. **Prerequisite:** Junior or senior classification.

ARCH 347 Documentation of Historic Buildings and Sites

Credits 3. 1 Lecture Hour. 4 Lab Hours. Techniques for recording historic buildings and sites; measuring and drawing to Historic American Building Survey Standards; field experience in photography, laser scanning, photogrammetry, hand measuring, field notes and record drawing preparation. **Prerequisites:** Junior or senior classification or approval of instructor.

ARCH 350 History and Theory of Modern and Contemporary Architecture

Credits 3. 3 Lecture Hours. Development of modern and contemporary architecture in the 20th and 21st centuries; materials, structure, social and economic changes as well as architectural theory. **Prerequisites:** Junior or senior classification.

ARCH 353 History of Product Design

Credits 3. 3 Lecture Hours. History of product design in Europe and America including the relationship between designer and object, the relationship of design, industry and media over time and design criticism; focus on material/technical and typological approaches, comparative method and content analysis in context of original environment and social history. **Prerequisite:** Junior or senior classification or approval of instructor.

ARCH 360 Topics in Design Build Community Service

Credits 3. 1 Lecture Hour. 4 Lab Hours. Contemporary topics in architectural design-build practices including high impact interdisciplinary learning experiences developed through a project-based learning model with a focus on the planning, design, pre-construction, construction and project delivery; team-based approach with those outside of the architecture discipline to design, plan and complete project documents, estimates and undertake the construction activities necessary to make a fully functioning community service project.

Prerequisites: Junior or senior classification or approval of instructor.

ARCH 381 Design Seminar

Credit 1. 1 Lecture Hour. Presentations by and discussions with professionals representing specialty areas related to architectural fabrication and product design. May be taken three times for credit.

Prerequisite: Junior or senior classification or approval of instructor.

ARCH 401 Design Creativity

Credits 3. 3 Lecture Hours. Fundamental critical and creative thinking skills needed to participate in and create the future; study of how design can impact the physical environment and society. **Prerequisites:** Junior or senior classification or approval of instructor.

ARCH 405 Architecture Design IV

Credits 6. 2 Lecture Hours. 12 Lab Hours. A comprehensive design studio focused on the integration of design theory with functionally sustainable environmental and structural systems; consideration of a project from site analysis and programming through design detailing. **Prerequisites:** ARCH 305, ARCH 331, ARCH 335; CARC 301 or ARCH 494; concurrent enrollment in ARCH 431 and ARCH 435.

ARCH 406 Architecture Design V

Credits 5. 2 Lecture Hours. 10 Lab Hours. Topical approaches to design, emphasizing theory and practice of architecture or related disciplines, such as urban design, interior design, health care design, etc. **Prerequisites:** Junior or senior classification; admission to upper level in BS in Architecture; grade of C or better in ARCH 305, ARCH 331 and ARCH 335; grade of C or better in CARC 301 or ARCH 494; students may with approval of the department enroll in the course during the summer term prior to taking ARCH 405, ARCH 431 and ARCH 435 if they are within 20 credit hours of graduation prior to the beginning of the following fall semester.

ARCH 413 Elements of Urban Design

Credits 3. 3 Lecture Hours. Investigation of design elements shaping the urban environment; emphasis placed on contemporary precedents in architecture, landscape and urbanism to evaluate design complexity on multiple levels: social, political, environmental, economic, cultural and geographic. **Prerequisite:** Admission to upper level division in BED or BS-URPN.

ARCH 421 Energy and Sustainable Architecture

Credits 3. 3 Lecture Hours. Understanding the various design decisions impacting sustainability and energy efficiency; includes participation in an "academic" LEED-NC rating project; interdisciplinary team approach with a design studio architect to perform the LEED-NC rating on the architect's building; application of reference material, standards, and USGBC material. **Prerequisite:** Junior and senior classification or approval of instructor.

ARCH 430 History of Ancient Architecture in the Near East, Egypt, Greece and Rome

Credits 3. 3 Lecture Hours. Examination of stylistic, structural and theoretical advancements in ancient architecture, with case studies from the Near East, Egypt, Greece and Rome. **Prerequisite:** ARCH 249 or ARTS 149; junior or senior classification or approval of degree coordinator or instructor.

ARCH 431 Integrated Structures

Credits 2. 1 Lecture Hour. 2 Lab Hours. Selection and economics of structural systems in the context of integrating structural systems into a building through good design; analysis and design of wood, steel, concrete, and composite systems and members in relation to building design. **Prerequisites:** Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405 and ARCH 435.

ARCH 433 Architectural Lighting

Credits 3. 3 Lecture Hours. Theory and practice of lighting design as an art and science; aperture design for sunlight control; selecting and locating luminaries to enhance interior and exterior surfaces and spaces. **Prerequisite:** ARCH 335 or junior or senior classification in EDAS.

ARCH 434 The Role of Sculpture and Painting in Ancient Architecture

Credits 3. 3 Lecture Hours. Interrelationships of architecture, painting and sculpture in the ancient world including Egypt, Mesopotamia, Crete, Greece and Rome. **Prerequisite:** ARCH 249 or ARTS 149; junior or senior classification or approval of degree coordinator or instructor.

ARCH 435 Integrated Systems

Credits 2. 1 Lecture Hour. 2 Lab Hours. Understanding how to integrate sustainable environmental systems into a building through good design; lectures support studio; systems faculty participate in studio critiques throughout the project. **Prerequisites:** Admission to upper level in environmental design; ARCH 305, ARCH 331, ARCH 335; concurrent enrollment in ARCH 405 and ARCH 431.

ARCH 437 The Gothic Cathedral

Credits 3. 3 Lecture Hours. A critical study of monumental church-building in Europe during the later Middle Ages (ca. 1140–1500 C.E.); investigation of works of architecture, sculpture and painting in relation to issues of craft, ritual and power; exploration of the afterlives of the Gothic style in the Americas, Asia and Africa. **Prerequisite:** ARCH 250 or ARTS 150; junior or senior classification or approval of degree coordinator or instructor.

ARCH 438 World Religious Architecture

Credits 3. 3 Lecture Hours. Exploration of the diverse architectural traditions of the world's major religions with an emphasis on issues of place-making, representation, ritual, identity, and culture, past and present. **Prerequisite:** Junior or senior classification.

ARCH 441 Baroque and Rococo Architecture

Credits 3. 3 Lecture Hours. The investigation of the history of architecture, the arts and society, and major creative individuals from the late sixteenth to the early eighteenth centuries. **Prerequisite:** ARCH 250 or ARTS 150; junior or senior classification or approval of degree coordinator or instructor.

ARCH 443 Aegean Art and Architecture
