

MASTER OF SCIENCE IN HUMAN RESOURCE MANAGEMENT

Find your community. Impact people. Drive business success.

If you're looking to bring out the best in your organization's workforce and contribute strategically to business success, Purdue's online Master of Science in Human Resource Management is the right next step for you. Backed by a tech-focused, data-driven business school, we prepare graduates to connect with people, ground their insights in data, and make meaningful change.

Fully online and flexible, our program allows you to customize your plan of study according to your goals, industry and interests. We'll work with you to ensure you're set up for success when you graduate with a defined direction and intentional path forward.

As you learn, you'll work directly with our engaging and welcoming faculty who welcome 1:1 time with students, and you'll combine your current experiences with classroom learning to immediately apply new concepts. We're confident your time at Purdue will serve as a springboard to impact: on you, your organization's talent, and the success of the business you serve.

“The courses I have taken at Purdue University are rigorous and stimulating. They encourage you to become a four-dimensional thinker, a thinker who not only focuses on mastering the field but can also adapt and absorb ideas from other industries. Purdue is preparing its students to be analytical when faced with problems and training them to make informed decisions.”
