Calling all ambitious thinkers

We're searching for independent-minded students with the courage to challenge convention and make a real difference to the future of this world.

Together we form a diverse community of bold visionaries, free thinkers, and eternally curious minds.

Welcome to UCL

Why choose UCL?

- 04 Why UCL?
- 06 UCL200: Innovating since 1826
- 08 Learn how to think – not what to think
- 10 Our Nobel laureates
- 12 Work in progress
- 14 Disagreeing Well
- 16 Supporting entrepreneurs
- 18 Cutting-edge facilities
- 20 Our creative culture
- 22 Our sustainable university

Student life

- 24 London is your classroom
- 26 Enhancing your student experience
- 28 UCL in London
- 30 A place to call home
- 32 A vibrant social life
- 34 Our global community
- 36 Support when you need it
- 38 Your future career

QS World University Rankings 2026

- World-leading, world-impacting research *
- 400+ degree courses
- Students from more than 150 countries
- 33 Nobel laureates
- 3rd in the world for environmental sustainability[^]
- Over 440 student clubs and societies
- In the heart of London, Europe's best student city^{**}
- UCL graduates earn above the Russell Group and UK median average^{^^}

We're proud of our groundbreaking history, distinguished present and exciting future. UCL is a great place to be a student for so many reasons.

* Research Excellence Framework (REF 2021)

[^] QS World University Rankings: Sustainability 2026

^{**} QS Best Student Cities 2026

^{^^} Three years following graduation, UCL undergraduate students earn 19.7% above the Russell Group median average and 32.6% above the UK median average excluding professions with standardised salary scales and all other subjects excluding Creative arts and design (2022-23 Longitudinal Education Outcomes [LEO]).

UCL200: Innovating since 1826

Here, centuries of discoveries have been made by people thinking non-stop about the future. Where thousands of staff and students gather from hundreds of countries to create a unique city within a city. We are University College London. And here, it can happen.

Scan the NaviLens QR code, or search: 'UCL200' to find out more.

UCL has confronted humanity's biggest issues since 1826. At that time, attending university was a rare privilege. If you weren't a man from a wealthy background and a member of the established church, higher education was off limits.

Our founders tore up that rule book. We were the first university in England to welcome students of any religion or social background. We were also the first in England to welcome women to university education.

We have challenged inequality ever since, and we hold a Silver Athena SWAN award in recognition of our progressive work practice. UCL is committed to widening access to higher education. Each year, we invest £13.5 million in bursaries and activities to support students from diverse backgrounds to enter and succeed. Students who are from groups that may be underrepresented at UCL may be eligible for a contextual offer as part of the Access UCL scheme (see p.88).

We have expanded from our beginnings in Bloomsbury with UCL East, a campus on Queen Elizabeth Olympic Park in Stratford, East London, that is fit for the 21st century and beyond. With physical spaces that are publicly accessible and

programmes built around working with local communities, this chapter for UCL embodies our founding principles – to better understand global challenges by bringing together diverse viewpoints.

Since our founding we have continually innovated our teaching methods and we make research the cornerstone of our students' activity. Our Arts and Sciences BASc leads the way in interdisciplinary study; elsewhere, collaborative teaching methods breaking down the boundaries between student and teacher, encouraging the thinkers of tomorrow.

In February 2026 we began our exciting year-long programme of activities and events to celebrate UCL's bicentenary, including three new publications, a public art programme and the *Two Centuries Here*

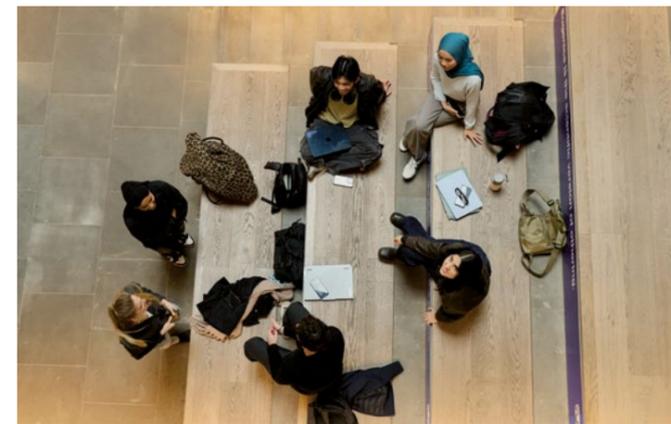

exhibition, which invites you to explore and discuss UCL's rich history, influence and role in society through photography, stories and interactive experiences, both on campus and online.

Throughout the year, the UCL200 Programme celebrates and reinforces our founding values, highlights the impact of UCL's groundbreaking work, the excellence of our diverse community of staff, students, alumni and partners and presents an ambitious and inspiring portrait of our future. Scan the QR code above to find out more about UCL200 and how our student communities can get involved.

Learn how to think – not what to think

We are here to further your knowledge, develop your skills of analysis and problem-solving and give you a truly global outlook that draws on diverse cultural perspectives.

Studying in London, you'll be living, learning and growing your network in one of the world's greatest cities. At UCL you'll have the chance to work alongside some of the world's leading researchers. They will drive you to think more analytically and independently – providing opportunities to undertake research activities of your own and create original output.

Learning as part of an international community of great minds, you will develop the cultural fluency and global outlook that are prized by employers.

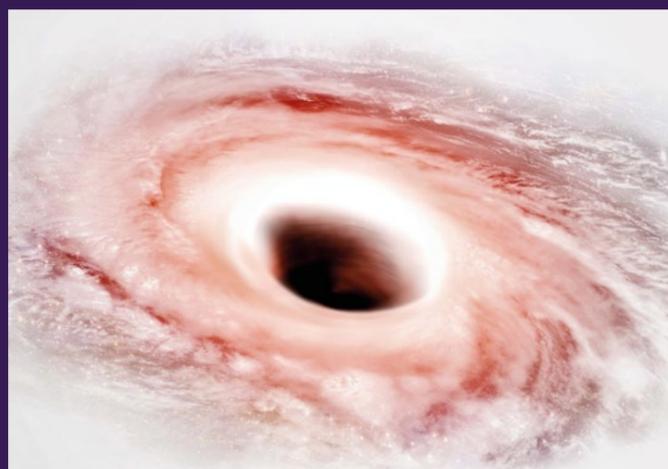

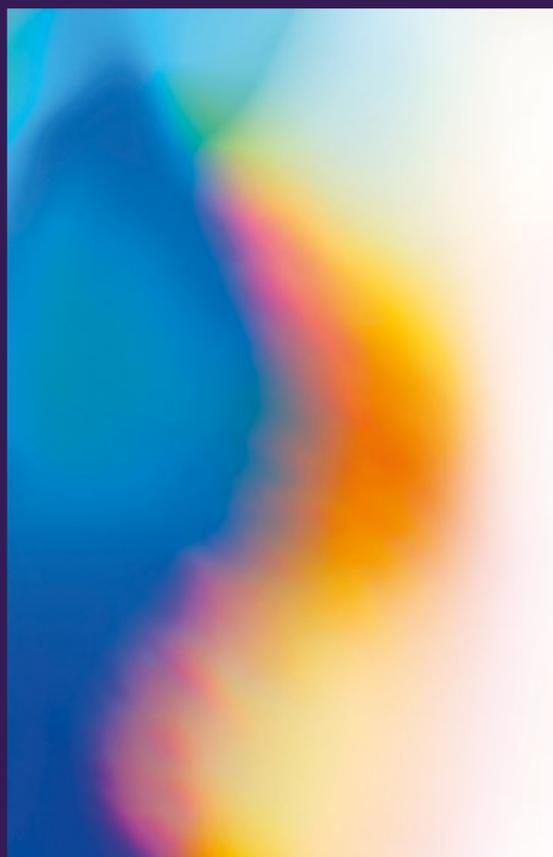

Throughout your time here, you'll have many opportunities to shape our curriculum and how it's delivered. Our collaborative approach also helps build the essential skills that make UCL graduates so in-demand, such as analytical and creative thinking, leadership, resilience and technological literacy.

Scan the NaviLens QR code, or search: 'Discover UCL' in YouTube to find out more.

UCL staff and alumni have won at least one Nobel Prize each decade since the award began in 1901, with more than half of our 33 Nobel laureates born outside the UK.

Our Nobel laureates

1904 – Chemistry
Sir William Ramsay
Discovered the noble gases: helium, argon, neon, krypton and xenon.

1913 – Literature
Rabindranath Tagore
Wrote profoundly sensitive, fresh and beautiful verse.

1915 – Physics
Sir William Henry Bragg
Analysed the structure of crystals using X-rays.

1921 – Chemistry
Frederick Soddy
Invented the concept of isotopes.

1922 – Physiology or Medicine
Archibald Vivian Hill
Founded biophysics.

1928 – Physics
Owen Willans Richardson
Discovered the law of thermionic emission.

1929 – Physiology or Medicine
Sir Frederick Gowland Hopkins
Discovered growth-stimulating vitamins.

1936 – Physiology or Medicine
Sir Henry Hallett Dale and Otto Loewi
Discovered neurotransmitters.

1938 – Physiology or Medicine
Corneille Jean Francois Heymans
Revealed how respiration is regulated.

1944 – Chemistry
Otto Hahn
Made discoveries leading to the development of nuclear technology.

1947 – Chemistry
Robert Robinson
Discovered the structure of morphine and strychnine.

1955 – Chemistry
Vincent du Vigneaud
Carried out the first synthesis of a polypeptide hormone, oxytocin.

1959 – Chemistry
Jaroslav Heyrovsky
Discovered polarography, widely used in clinical and environmental analysis.

1960 – Physiology or Medicine
Peter Brian Medawar
Discovered the key to successful organ and tissue transplantation.

1962 – Physiology or Medicine
Francis Harry Compton Crick
Discovered the molecular structure of nucleic acids (DNA).

1963 – Physiology or Medicine
Andrew Fielding Huxley
Revealed how activity is co-ordinated by a central nervous system.

1967 – Chemistry
George Porter (Baron Porter of Luddenham)
Devised flash photolysis to observe free radicals.

1970 – Physiology or Medicine
Sir Bernard Katz and Ulf Svante von Euler
Advanced remedies against nervous and mental disturbances.

1988 – Physiology or Medicine
Sir James Black
Discovered the first beta-blocker, propranolol.

1991 – Physiology or Medicine
Bert Sakmann
Discovered the role of ion channels in diseases, revolutionising cell biology.

2000 – Economics
James Heckman
Developed statistical analysis of individual and household behaviour.

2001 – Physiology or Medicine
Sir Paul Nurse
Enabled new avenues of research in tumour diagnostics and therapy.

2007 – Physiology or Medicine
Sir Martin Evans
Introduced gene modifications in mice.

2009 – Physics
Sir Charles Kao
Developed the transmission of light for optical communication.

2013 – Physics
Peter Higgs
Predicted the Higgs boson particle.

2013 – Physiology or Medicine
James Rothman
Revealed how cells transport material.

2014 – Physiology or Medicine
John O'Keefe
Discovered the 'inner GPS' in the brain.

2020 – Physics
Sir Roger Penrose
Proved that the general theory of relativity predicts the formation of black holes.

2024 – Physics
Geoffrey E. Hinton
Made foundational discoveries and inventions that enable machine learning with artificial neural networks.

2024 – Chemistry
Sir Demis Hassabis
Used artificial intelligence to predict the structures of almost all known proteins.

2025 – Economic Sciences
Philippe Aghion
Developed the theory of sustained growth through creative destruction.

Work / Projects / Research / Studies / Experiments / Tests / Collaborations / Trials / Hypotheses / Excavations / Masterpieces / in progress

UCL staff and students come from richly diverse backgrounds across the world. We use this truly global perspective to help solve the pressing issues of our times.

Turning ideas into action: learning through real-world challenges

The world's biggest challenges don't fit neatly into one subject. Issues such as climate change, inequality, mental health and cultural understanding demand new ways of thinking — and learning.

At UCL, the Grand Challenges initiative helps students explore how knowledge from different disciplines can come together to tackle complex, real-world problems. Whether you study science, engineering, arts, humanities or social sciences, this approach helps you connect your subject to the wider world.

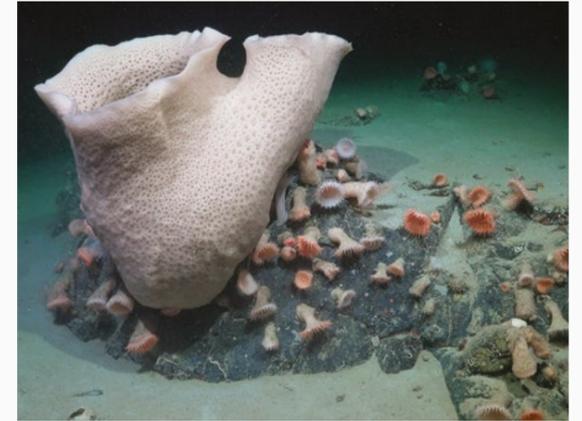

Through challenge-led learning, partnerships with external organisations and interdisciplinary opportunities both inside and beyond the curriculum, you'll develop skills that employers value — including creativity, collaboration, adaptability and critical thinking — while making a positive impact.

Scan the NaviLens QR code, or search: 'UCL research news' to find out more.

Gene therapy appears to slow Huntington's disease progression

A clinical trial led by Professors Sarah Tabrizi and Ed Wild (both UCL Huntington's Disease Research Centre, UCL Queen Square Institute of Neurology) found that patients receiving a new gene therapy experienced 75% less progression of the disease overall, compared to a matched cohort of people with Huntington's who were not receiving the treatment. This is the first time that this condition, a fatal neurodegenerative disease caused by a single genetic mutation, has been treated successfully.

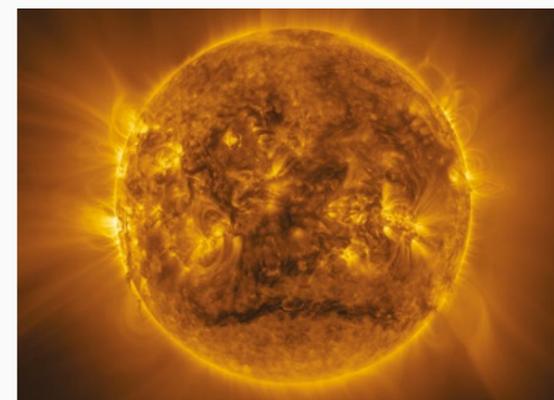

Beautiful ecosystem thrives underneath Antarctic ice shelves

When an iceberg the size of Chicago broke away from Antarctica's George VI ice shelf, it provided a rare opportunity for scientists to peek underneath the remaining ice shelf to an environment that had never been accessible to humans. An expedition co-led by UCL's Geography's Dr Aleksandr Montelli discovered a thriving ecosystem including sponges, icefish, giant seaspiders, octopus and large, slow-growing cup corals, some of which may be newly discovered to science.

First-ever look at the Sun's south pole

Humanity's first-ever look at the south pole of the Sun was achieved by the spacecraft Solar Orbiter, which includes instruments designed and built at UCL. Professor Lucie Green (Mullard Space Science Laboratory at UCL) said it was the "missing piece of the puzzle" in terms of understanding how the Sun's magnetic field operates on a global scale.

World-first treatment for previously incurable blood cancer

A gene therapy developed by Professor Waseem Qasim (UCL Great Ormond Street Institute of Child Health) and Great Ormond Street Hospital (GOSH) was found to reverse previously incurable blood cancer in some children. The therapy was achieved using base-editing, an advanced version of CRISPR technology that can precisely change single letters of DNA code inside living cells.

Left: Interactive panel event discussing the topic: Disagreeing Well on Diplomacy – Are diplomatic institutions effective at resolving global crises? on 3 July 2025 at the Bloomsbury Theatre

Below: UCL alumna Mia Forbes Pirie

Check out our Disagreeing Well skills series videos

Explore the essential skills for open productive debate with UCL alumna and international conflict mediator Mia Forbes Pirie (pictured above). This video series includes tips and advice on preparing to listen, preparing to speak and being empowered in conversation. Scan the QR code below to access the series from the Disagreeing Well webpage.

Explore our learning resources on Disagreeing Well

As a UCL undergraduate student, you can enrol on a signature module on what it means to foster civil discourse on key political, civic and social controversies, and learn the value of disagreement, why it is essential for us to flourish and how to persuade and learn from others. Get started today with a 20-question quiz to discover your natural approach to handling disagreements and conflicts – scan the QR code below for details.

Disagreeing well

Listen to *The Bridge*, our student-hosted podcast

In each episode of *The Bridge: A Disagreeing Well podcast* from UCL and Students' Union UCL, our student hosts tackle issues such as a blanket social media ban for children, the representation of ethnic minority voters by right-wing parties and whether tourism is exploitative. Through discussions with informed and passionate guests, we provide the tools to bridge the divide between conflicting views.

Disagreeing well

UCL works with partners locally, nationally and across the world, to co-create fair solutions to pressing challenges. In this time of increasingly polarised debate, it has never been more important for us to be able to disagree well.

Having the tools, techniques and platforms to be able to discuss and debate with people who hold very different views is a vital part of how diverse communities can co-exist together, which is one of the reasons that UCL has launched its Disagreeing Well campaign. We're engaging both our staff and students and promoting respectful dialogue, helping people listen, engage and challenge ideas without hostility.

When you become a student at UCL, you can join our efforts to get better at respectful disagreement and create a more united society, one conversation at a time.

Scan the NaviLens QR code, or search: '[UCL Disagreeing Well](#)' to find out more.

Incador

Incador is an ethical fine jewellery house that transforms discarded electronics into beautiful heirlooms. The startup founded by UCL alumnae and sisters Karen (UCL Chemical Engineering) and Alice Chave (UCL Civil, Environmental and Geomatic Engineering), has teamed up with UCL to install two waste collection bins for students and staff to dispose of electronics safely.

Supporting entrepreneurs

Stasher

Stasher provides a flexible, secure, and budget-friendly solution for travellers, allowing them to book insured luggage storage at vetted local businesses such as hotels and shops. The startup has partnered with companies including Booking.com, GetYourGuide, Premier Inn, and Expedia. The business co-founded by Jacob Wedderburn-Day (UCL Economics) and his friend Anthony Collias now handles more than two million bags a year. The platform operates in over 1,000 cities across 75 countries.

ZNotes

Education technology and social impact startup ZNotes, founded by UCL alumnus Zubair Junjuna (UCL Mathematics), has evolved into a global force, reaching over six million students. ZNotes addresses educational inequalities by giving millions of students across 190 countries unrestricted access to high-quality educational content. The platform has developed into a global community and empowers learners to become active contributors in the education system.

Whether you want to boost your employability, tackle global issues or start your own venture, we can help you develop entrepreneurial skills to achieve your goals.

Our tailored, free extracurricular entrepreneurship programme, run by UCL Innovation and Enterprise, provides you with the skills, knowledge and hands-on experience you need to make a difference in the world.

If you want to grow your own venture, join our equity free Hatchery incubator programme at UCL's dedicated entrepreneurship hub BaseKX (near King's Cross). Here you'll have access to the co-working space, advice and connections you need to succeed.

Scan the NaviLens QR code, or search: '[UCL entrepreneurship](#)' to find out more.

We are investing in a university fit for the 21st century and beyond. At UCL you'll find all the cutting-edge facilities you need to achieve great things.

Cutting-edge facilities

UCL is creating campuses that help you do your best work, connect with others and feel part of a supportive community.

Through thoughtful placemaking and vibrant neighbourhoods, we're designing sustainable, adaptable environments that enrich learning, spark collaboration and support your wellbeing every day.

Designed entirely around our students' needs, our Student Centre includes 1,000 individual, group and open-plan study spaces, quiet contemplation areas and easy

access to help and support at the dedicated Student Enquiries Centre.

Our UCL East campus includes state-of-the-art laboratories, fabrication workshops, collaboration areas and public spaces, providing facilities for cross-disciplinary research and open innovation, as well as new approaches to practical learning.

This world-class academic hub sits alongside contemporary student accommodation that provides an exciting student living experience in London's vibrant East End.

Right: Interior of UCL's Student Centre

Across UCL, we are creating an environment and student experience that encourages new ideas and invention and sparks creative connections.

Our creative culture

We are establishing a living laboratory of learning in an area committed to biodiversity throughout the parklands and waterways that run through the Olympic Park. Wander through the landscaped park with its wetlands and wildlife and you will soon find Hackney Wick, a lively destination day or night, with its quirky cafés, eateries, craft breweries and bars along the riverside.

Left: Public art installation *Trēow of Time* by UCL alumni Larry Achiampong and David Blandy, commissioned for the central atrium of the Marshgate building on our UCL East campus

Top: The landscaped parklands of UCL East

Right: The auto-icon of UCL's spiritual founder Jeremy Bentham is showcased in the public atrium of UCL's Student Centre
Below: The Flaxman Gallery, Main Library

UCL East is home to a 160-seat cinema and art installation spaces, while we also have a treasured venue in the Bloomsbury Theatre – which hosts plays, live music and comedy – as well as performances by our students and staff.

UCL's historic libraries, collections, museums and galleries – spanning everything from Egyptology to pathology, zoology to fine art – are actively used in teaching. The Grant Museum of Zoology, established on our Bloomsbury campus in 1828, reopened to the public in 2024 after an extensive improvement programme and includes new displays connecting the museum's collections to biodiversity and conservation research, as well as showcasing how UCL research is responding to the planetary crisis.

Scan the NaviLens QR code, or search: 'UCL Culture' to find out more.

Our sustainable university

Main image, far left: Gordon Square, close to our Bloomsbury campus, is a popular place to relax

Our world-leading research, addressing the climate and ecological crises, informs the changes we're making here at UCL. We hope to inspire a generation of change makers to take the lead on climate and sustainability action across the world.

Sustainability is at the heart of how we operate. Ranked third in the world (and first in the UK) in environmental sustainability*, UCL's award-winning sustainable campus is powered by 100% renewable electricity and we send no waste to landfill.

UCL East has been designed with sustainability at its core: by turning rubble into skateboard ramps, harvesting rainwater, using low energy lighting and highly efficient mechanical ventilation, we have worked to minimise the carbon footprint of the campus.

Our UCL Sustainability Plan (2025–2035) will further embed sustainability across UCL, encompassing carbon emissions reduction, fostering biodiversity and advancing sustainable education and research.

As a student at UCL, you will have the opportunity to get involved in one of our many sustainability societies, learn climate leadership skills through our Sustainability Ambassador Programme, and join events such as our monthly clothes swap shops.

We offer over 4,000 sustainability modules across the courses offered at UCL and through our teaching programmes, we pass on our knowledge of sustainability best-practice to our students, to ensure that they become sustainability advocates to benefit the wider world.

*QS World University Rankings: Sustainability 2026

Scan the NaviLens QR code, or search: 'The ripple starts here UCL' in YouTube to find out more.

London is your classroom

Your life in London is a crucial part of your education and you will have the opportunity to study, live and play in not just one iconic part of London but two, with the opening of our campus in Stratford to complement our established home in Bloomsbury.

Bloomsbury itself is the historic home of Virginia Woolf and her 'Bloomsbury Group': writers, intellectuals, philosophers and artists who proudly challenged convention in both their lives and their work during the first half of the 20th century.

A wealth of knowledge and culture is on your doorstep at the world-renowned British Museum and British Library. And as part of London's 'Knowledge Quarter', we are surrounded by more than 75 academic, research, cultural, media and technology institutions of all shapes and sizes – from Google to the Charles Dickens Museum.

On Queen Elizabeth Olympic Park in Stratford, UCL joins partners the BBC, Sadler's Wells, UAL London College of Fashion and the V&A (Victoria and Albert Museum) at East Bank, a new destination for London, with world-class culture and education at its heart.

In addition to the UCL East campus, the university has teaching locations across the capital, including the School of Management in Canary Wharf, which has new facilities opening in 2026.

With easy transport links across London, to the rest of the UK and continental Europe, there's always something to do, see and learn.

Enhancing your student experience

We are equipping the next generation of bold thinkers with valuable opportunities for collaborative exchange as they rise to meet humanity's greatest challenges.

The UCL experience brings together diverse minds and different cultural perspectives, providing a wealth of opportunity for you to make friends and create professional networks across a range of fields that will last through your lifetime and career.

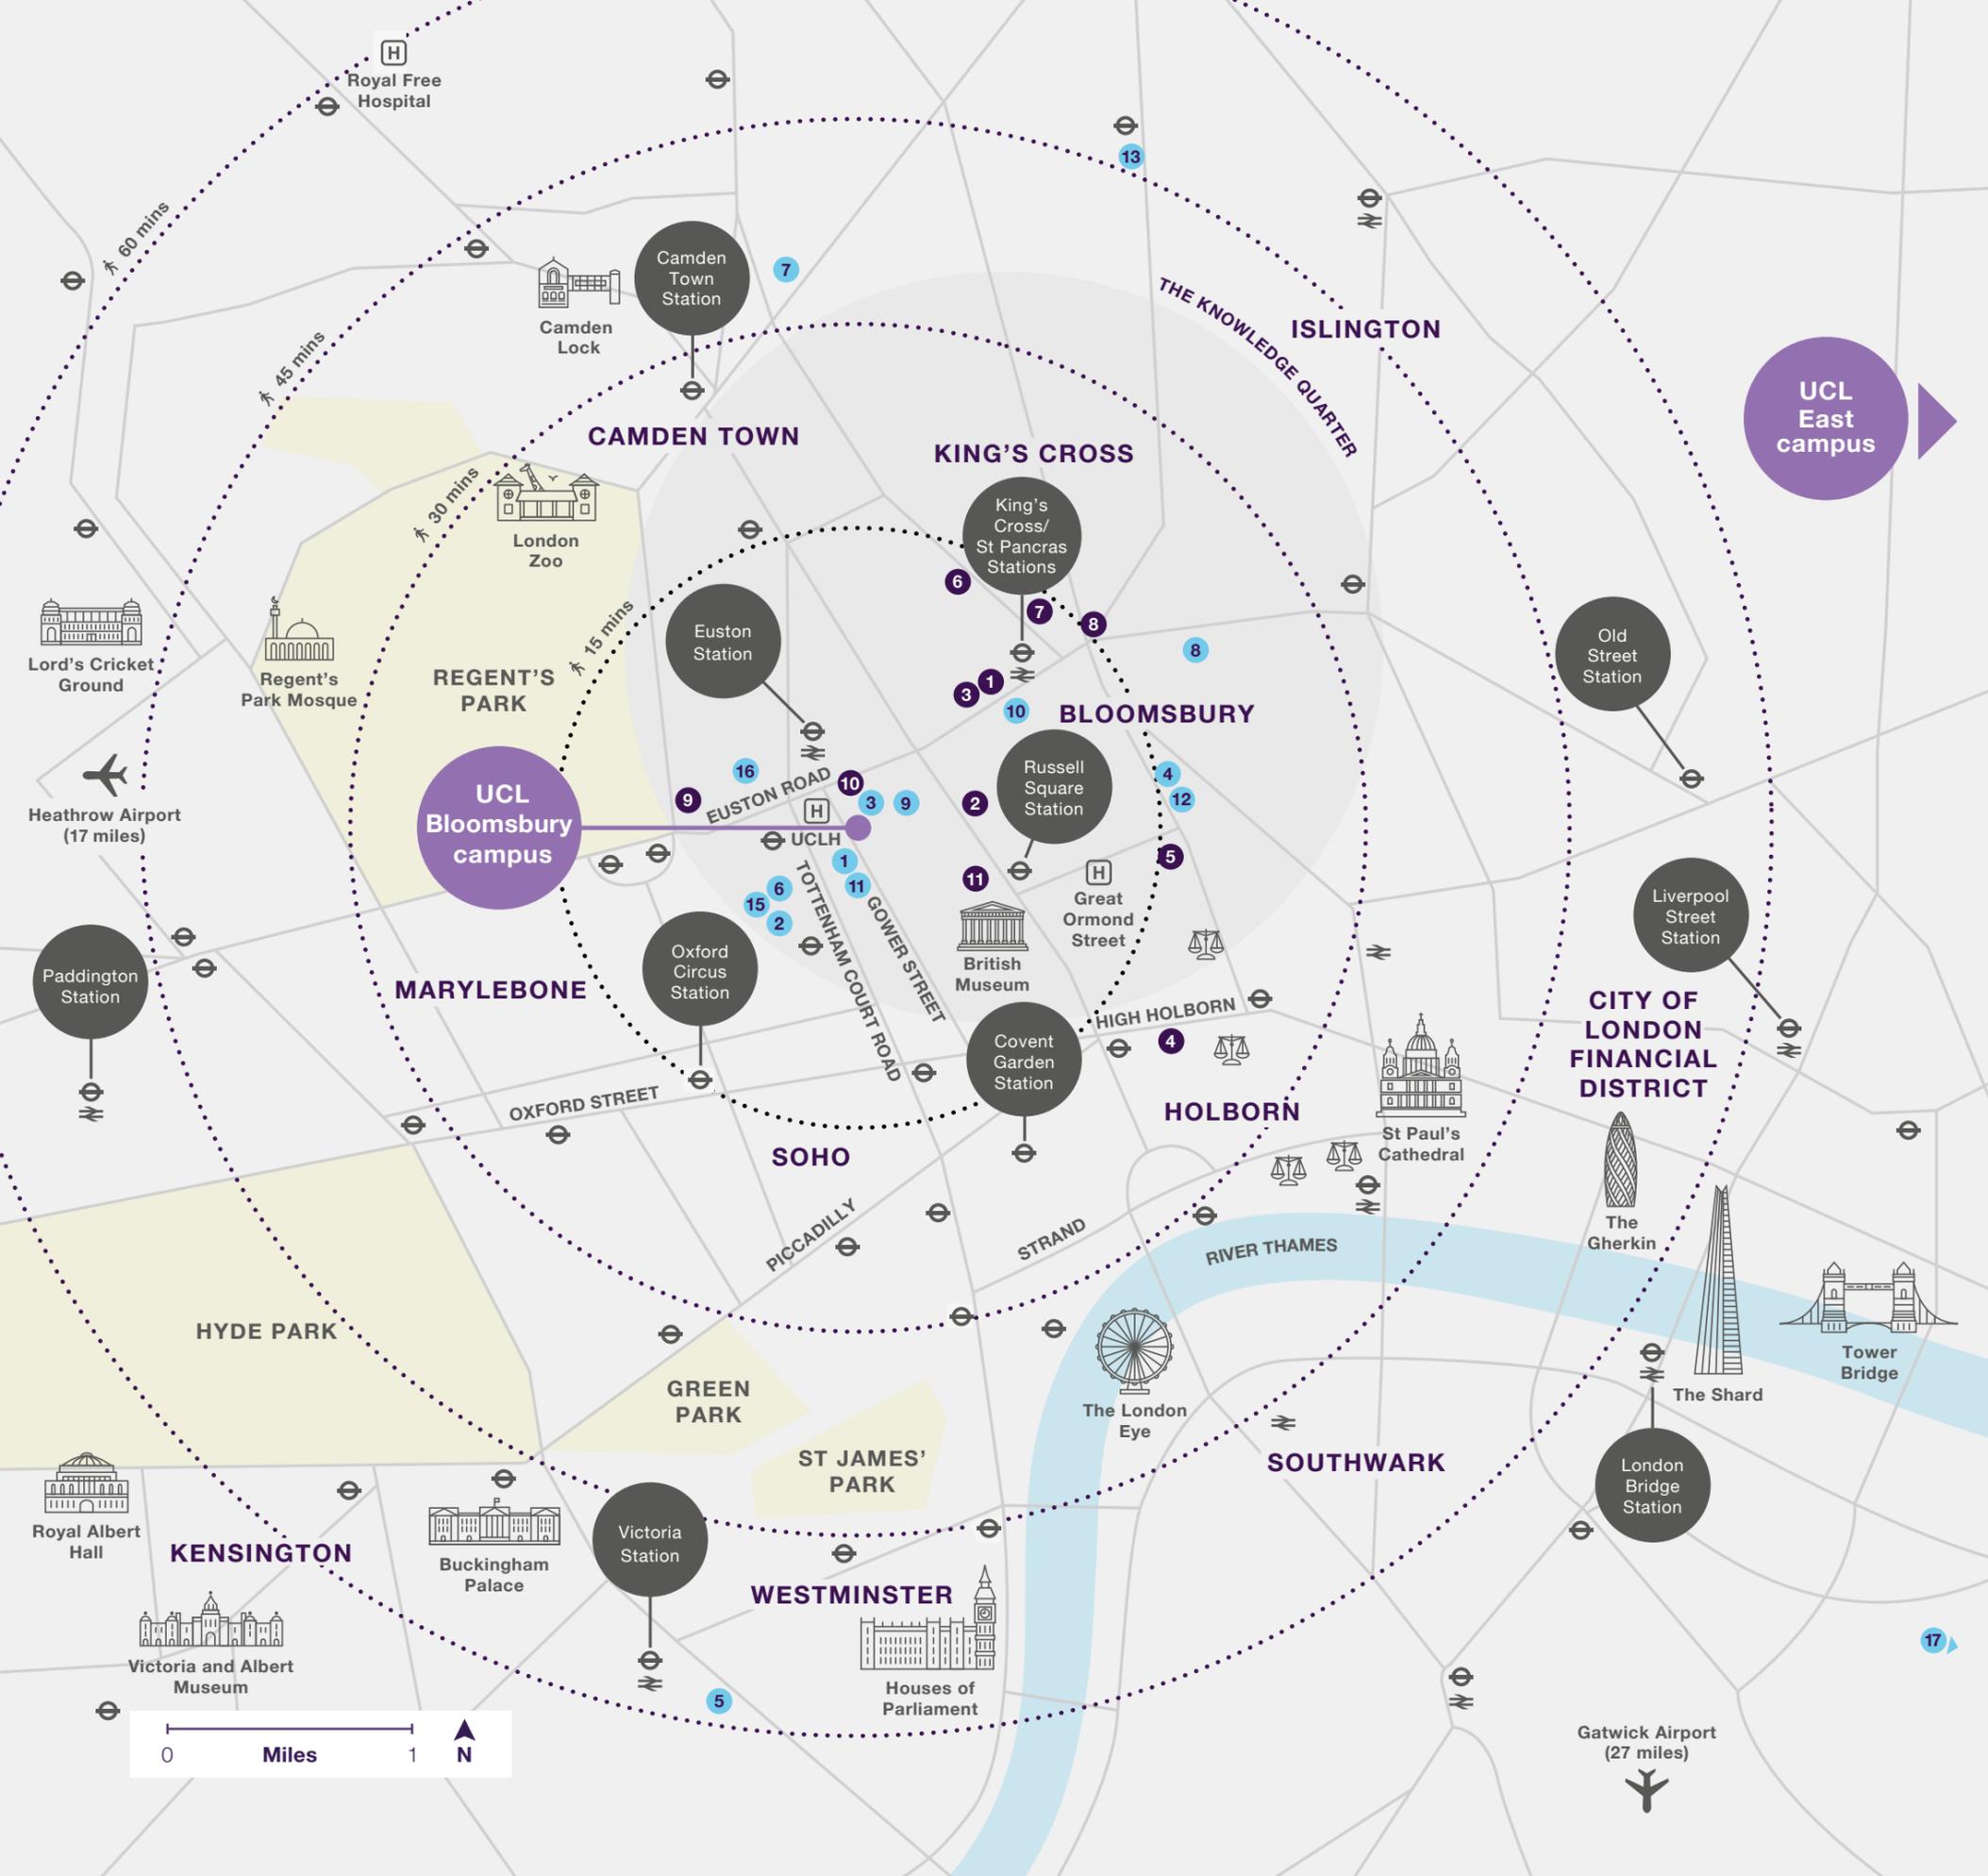

We are harnessing the diverse experience of UCL's Grand Challenges programme – which tackles complex global, national and local issues through interdisciplinary research – to equip our students with the skills and knowledge to work collaboratively on some of the world's biggest challenges and to drive meaningful change.

Our UCL East campus in Stratford is made for collaboration. Whatever you choose to study – our innovative courses offer a wide choice of modules from business and industry – you will have the chance to get involved in projects that make an impression beyond the laboratory or lecture theatre and give you vital skills for the workplace.

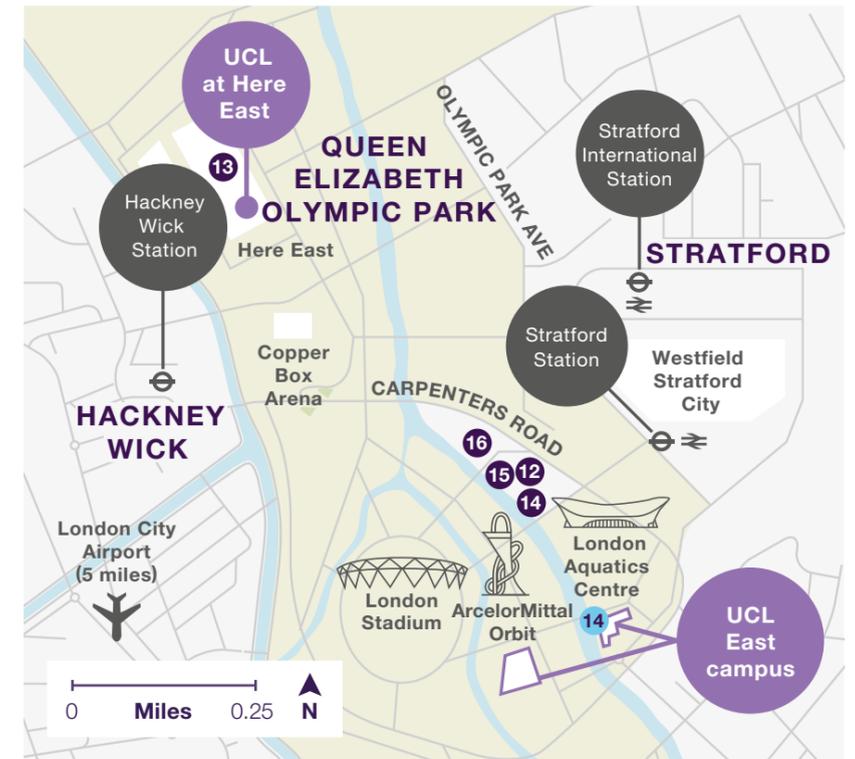

Below: The UCL Innovation Lab is a dynamic interdisciplinary teaching space where students can build and test their designs. The lab's annual Robotics Challenge, pictured here, is a highlight

A place to call home

Moving to a new city as a first-year undergraduate can be a major change, but you'll find a warm welcome at UCL.

Top: A shared kitchen at John Dodgson House
Left: Student residents enjoying a board game on moving-in day
Right: Student residents socialising on campus

Join our hugely diverse student community, and you'll make friends for life from all over the world at UCL. But first, you need a place to call home while you study.

UCL will guarantee an offer of accommodation to all full-time, first-year undergraduate students who are studying at UCL for the first time. The guarantee applies as long as:

- you will be a single, first-year undergraduate, or are studying for a full academic year on Junior Year Abroad, Erasmus+ or Exchange programmes
- you apply for a single room (accommodation for couples and families is very limited)
- you have chosen UCL as your firm choice through UCAS by the deadline (currently 10 June of the year of entry)
- you submit your accommodation application online by the deadline (currently 10 June of the year of entry)
- you have not previously lived in London (inside the M25 motorway) while studying at a university or higher education institution. (This does not include attending school in London.)

Places are allocated to eligible applicants in order of date submitted, so we recommend submitting your UCL accommodation application as early as possible after choosing UCL as your firm choice.

Types of accommodation available

- Catered accommodation in which meals are included (breakfast and an evening dinner from Monday to Friday and brunch on Saturday and Sunday). You also have access to a small kitchen to prepare meals outside these times.
- Self-catered accommodation with shared kitchen facilities where you prepare your own meals. Flats are equipped with a cooker, refrigerator, freezer, kettle, toaster and microwave.

All UCL accommodation (see maps on p28-29) is offered for 39 weeks and is located in central London (Zones 1 or 2 of London's public transport network).

The fees you pay vary depending on location and facilities. A guide to current fee ranges can be found on p92.

Students with additional requirements

UCL accommodation welcomes and supports applications from students with additional requirements. We will work with individuals to ensure they are allocated rooms that meet their needs.

This can include:

- Students with disabilities and health conditions
- Students that are care experienced or estranged. We will provide 365-day accommodation in the first year and, if needed, for subsequent years of study.

Email accommodation@ucl.ac.uk for details.

Further details about accommodation can be found on p92.

clubs and societies

Scan the NaviLens QR code, or search: 'UCL Students' Union' to find out more.

Through our Students' Union, you'll make lifelong memories and make the most of London.

A vibrant social life

When you join UCL you become a member of the Students' Union and can start making the most of all the things it has to offer. There are 440 student-led groups that will become your social group on campus, your support network, and your route to experiences you won't find anywhere else.

At UCL, your academic studies are enriched by an extensive programme of extra and co-curricular opportunities through the Students' Union. These opportunities are part of your educational experience and support you to develop skills, get real-life experiences, and explore your subject area more deeply. We've invested to transform student life and create thousands more inclusive opportunities to take part in sport, explore the arts, volunteer

and experience the amazing culture and diversity of our community.

TeamUCL is the collective name for all of our sports teams at UCL. They compete nationally against universities across the UK and there are lots of ways for you to get involved and play and train regularly. You can also stay active through the Students' Union's social sport programme, disability sport programme, or no-experience-necessary Project Active programme.

Beyond clubs and societies, the Students' Union can help you find volunteering opportunities in London, lead projects to make positive change and give you impartial advice and support when you need it most.

“The attitude at UCL is both fun and focused. You realise that the people you meet on your programme, in the Cloisters and halls will be future game-changers – as will you – and that is inspiring!”

Abigail Irozuru (Law LLB, 2012)
GB Olympic Long Jump Athlete
British Indoor Champion 2020

Our global community

Scan the NaviLens QR code, or search: ‘UCL alumni’ to find out more.

As a UCL student, you become a lifelong member of a truly global community. Our extraordinary alumni, with their bold, brilliant and inquisitive minds, go on to discover and achieve remarkable things across the globe.

Over 465,000 UCL alumni live in more than 190 countries worldwide. We count Nobel Prize winners, poets, novelists, BAFTA winners, Olympians, inventors and Turner Prize-winning artists among our graduates.

From your first day at UCL, this network is there to support and inspire you. Experienced alumni volunteers provide guidance as mentors and share their insights through panel discussions, skills workshops and internship opportunities.

You will also have the chance to make valuable contacts to accelerate your career at alumni-led networking events and social gatherings, in the UK and overseas.

Wherever life takes you after graduation, UCL's global community will be there to support you. From social events and groups to professional development programmes, there's no shortage of ways to stay connected with people who will support you to reach your next goal.

We are here to support you through any challenges you face while studying here, beginning with a wealth of resources to help new students prepare and settle in – including useful newsletters, apps and guides.

Support when you need it

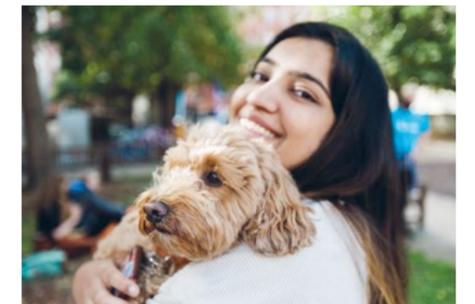

Our Transition Programme is designed to help you adapt to university life and includes access to a mentor and social sessions to help you find your feet. You'll also be assigned a Personal Tutor, who can give you academic guidance and steer you towards any help you might need on practical and personal matters.

New international students are invited to a series of online orientation events before they arrive in the UK, followed by in-person orientation events that run the week before term starts.

UCL Student Support and Wellbeing Services offers information, advice and services to help all our students thrive.

Throughout the academic year, we run a wide range of wellbeing events designed to empower you to take proactive steps towards looking after yourself and covering a range of topics, including mindfulness and community-building activities.

We offer free, easy-to-access mental health and wellbeing advisers, counselling and disability assistance, as well as in-the-moment support via our UCL 24/7 Student Support Line, where you can speak to our diverse team of advisers in more than 35 languages.

Scan the NaviLens QR code, or search: 'UCL wellbeing' to find out more.

Your future career

We take your future ambitions seriously and provide you with the support you need to realise your full potential. UCL graduates are in-demand and more than 900 employers attend our careers events every year.

At UCL our team of experienced careers professionals is dedicated to helping you find the right path to ensure success in your future career. We provide support to help you find graduate jobs or further study positions and advise you on the opportunities you have during your time at UCL.

From your first day at UCL and up to three years after you graduate, you can access:

Bespoke one-to-one advice

Whether you're starting out with general queries, exploring options, writing applications or want support with preparing for specific interviews, our range of different in-person and online appointments will provide tailored one-to-one support.

Our employer connections

We are connected to thousands of employers in the UK and around the world. Recruiters and employers engage with us throughout the year to participate in a range of career events and activities, as well as providing job opportunities for UCL students.

Confidence-boosting insights

There are regular opportunities, both on campus and online, to connect with employers and UCL alumni, where you can hear their perspectives on career paths and recruitment processes in a wide range of different sectors, as well as the skills and attributes you need to be successful.

Online resources

You'll find a wide range of curated resources related to your career planning, such as the Careers Discovery Feed, helping you to quickly identify key starting points for the areas you are researching.

Opportunities to increase your employability

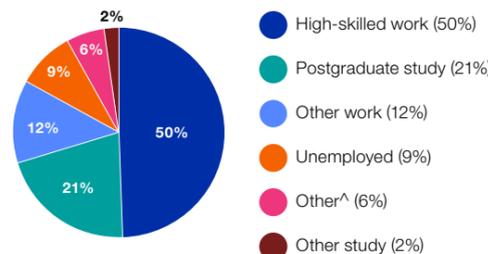

We know students gain a variety of skills through internships and work experience. The myUCLCareers jobs board is updated regularly with internships and graduate roles, as well as opportunities available in London, the rest of the UK and internationally. You can opt in to receive regular email updates about new jobs on the system that meet your preferences. We also offer resources and funding advice for students who would like to undertake an internship in another country.

“I was given exactly the advice and support I was hoping to get... as well as lots of websites and resources to help me with internship applications, CV and cover letter writing. I walked out knowing exactly what my next steps were.”

Chemistry BSc student, one-to-one appointment

Career destinations of UCL graduates 15 months after graduation*

This shows the first career destinations of students 15 months after their graduation from UCL in 2023. The median starting salary of those graduates in full-time work is £34,000.

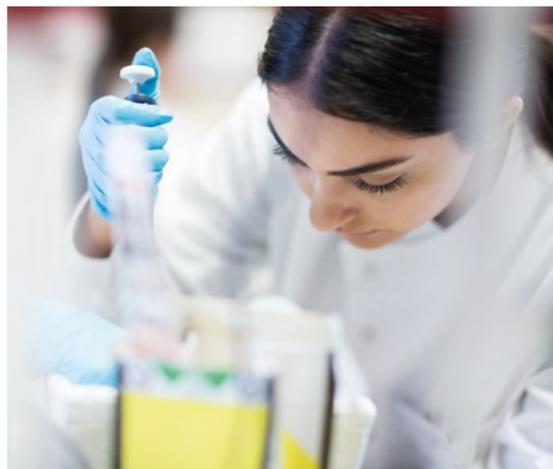

* All data taken from the Graduate Outcomes survey undertaken by the Higher Education Statistics Agency (HESA), looking at the destinations of graduates in the 2022/23 cohort

^ 'Other' represents a grouping of activities in which personal circumstances or choice has influenced the graduate's immediate options, this includes those: travelling (e.g. taking a gap year); looking after the home or family/ temporarily sick or unable to work; not employed but not looking for employment, further study or training; permanently unable to work or retired

Our world-leading faculties

UCL is organised into 11 faculties. Whichever course you choose, you'll be surrounded by fellow curious minds, learn from world-class academics and benefit from outstanding facilities. We provide a place to belong, be yourself and realise your potential.

Discover more about each faculty over the following pages.

Faculty of Arts and Humanities

Our faculty spans traditional humanities and the creative arts: Arts and Sciences (Liberal Arts), English, European and International Social and Political Studies, Fine Art, Greek and Latin (Classics), Hebrew and Jewish Studies, Information Studies, Modern Languages and Cultures and Philosophy.

- UCL's arts and humanities are ranked seventh in the world* and our ten departments offer more than 250 distinctive undergraduate degree courses.
- Students have access to London's vast range of cultural organisations, including the British Library, British Museum, the National Gallery, the British Film Institute and the Tate galleries.
- Our approach to teaching is rooted in a desire to innovate and equip our students with future-focused skills.
- We bring together over 30 languages to offer the widest range of language and language-related degrees in the UK.

* Times Higher Education World University Rankings by Subject 2025

You can find our courses in:

- Arts and Sciences [p58](#)
- Economics, Geography, Politics and Social Sciences [p65](#)
- English and Comparative Literature [p70](#)
- Fine Art and Art History [p71](#)
- Historical and Philosophical Studies [p72](#)
- Languages and Cultural Studies [p74](#)

UCL Bartlett Faculty of the Built Environment

Whether your ambition is to design better buildings, plan better cities, build sustainable communities, or help meet the challenge of climate change, the Bartlett could help you realise it.

- The Bartlett is the UK's largest multidisciplinary faculty of the built environment; it is ranked first in the world for architecture and built environment studies*.
- With a wealth of diverse resources, communities and history on our doorstep, our London setting puts us in a position to understand and directly impact the built environment field. We work with local communities and global organisations to find bold new solutions for the world's most pressing challenges – from the climate crisis to urban inequalities. We're here to build a better future.
- The Bartlett Promise Scholarship helps to tackle the lack of diversity within the built environment by providing full funding and additional support for students from underrepresented groups.

* QS World University Rankings by Subject 2025

You can find our courses in:

- Architecture, Construction, Planning and Sustainability [p56](#)

Faculty of Brain Sciences

A global leader in research and education in the mind, brain, vision and hearing; we use our expertise to solve some of the world's greatest health challenges, transforming society by reducing the burden of disease.

- UCL's Faculty of Brain Sciences is the best in the UK for neuroscience, psychiatry and psychology, with more than two thirds of our research in these areas rated as world-leading (4*)^{*}.
- We are home to some of the world's most influential and creative researchers in the field of brain sciences: 16 of our faculty's professors are named among the most influential in the world[^].
- UCL is ranked fourth in the UK for Psychology and third for Linguistics^{**}.

^{*} Research Excellence Framework (2021)

- Psychology and Language Sciences [p85](#)

UCL Institute of Education

UCL Institute of Education has been ranked first in the world for education since 2014*. We offer a lens to examine society and understand more about the world, promoting equity and inclusion.

- Our research improves lives – from shaping international early years education policy, to working with autistic people to turn research into action and based violence.
- Students are important collaborators. Your real-life experiences give meaning to new ideas and research. Our graduates influence future generations for the better, from individual lives to societal change.
- Our work helps us understand how and why people are different, the challenges this presents, and how to create a fairer, more just and equitable society.

* QS World University Rankings by Subject 2014–2025

You can find our courses in:

- Communications and Media [p63](#)
- Economics, Geography, Politics and Social Sciences [p65](#)

- Psychology and Language Sciences [p85](#)

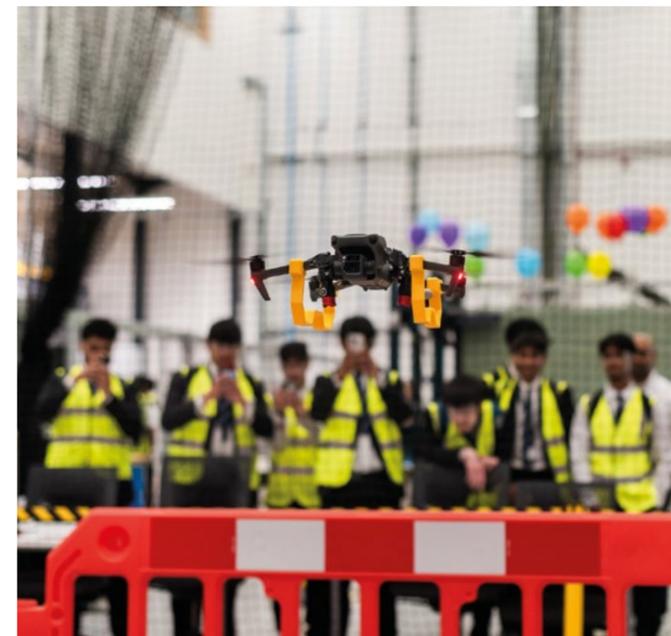

Faculty of Engineering Sciences

Since its founding over 150 years ago, UCL Engineering has remained at the forefront of engineering innovation. We are uniquely interdisciplinary – home to courses across all of engineering and beyond, including management and crime science.

- We do work that changes the world. Many essential technologies originated from studies and research projects at UCL, including the rapid production of vaccines, fibre-optic communications and the Internet infrastructure.
- We work closely with industrial partners, including Arup, Cisco, GSK, Google, Microsoft and Rolls Royce. This industry engagement provides our students with vital business skills, authentic experiences, and a network through which to kickstart their careers.
- We believe that good engineering happens when people with complementary skills work together. We've pioneered transformative approaches to education, such as the Integrated Engineering Programme (IEP) and the How to Change the World exercise, which encourages our students to think beyond disciplinary boundaries to solve global challenges collaboratively and creatively.

You can find our courses in:

- Business and Management Studies [p62](#)
- Computer Science [p64](#)
- Economics, Geography, Politics and Social Sciences [p65](#)
- Engineering [p68](#)
- Physical Sciences [p83](#)

Faculty of Laws

UCL Laws is an inclusive law school for the world: a diverse and progressive community of academics, researchers, students and alumni embedded in a leading research-oriented university in the heart of legal London.

- UCL Laws is consistently listed as one of the top law schools in the world, including second in the UK*.
- We have a strong commitment to small-group teaching and student support, with excellent graduate outcomes from one of the most highly respected and recognised qualifying law degrees in the common law world.
- Our students make a valuable contribution to society by undertaking a wide range of pro bono voluntary opportunities, for example, through the award-winning Centre for Access to Justice, which offers free legal services to those otherwise unable to afford them.

You can find our courses in:

- Law [p78](#)

Faculty of Life Sciences

UCL Life Sciences offers an outstanding portfolio of courses in biological and biomedical sciences, neuroscience, pharmacy, pharmacological and pharmaceutical sciences – studied in state-of-the-art facilities with world-renowned researchers and clinicians.

- Our world-class research institutes include the Centre for Biodiversity and Environment Research, the Institute for Healthy Ageing and the Sainsbury Wellcome Centre for Neural Circuits and Behaviour.
- UCL Life Sciences staff and students are actively engaged in research and innovation in global biodiversity, health, disease and pharmaceuticals. Recent student entrepreneurs were awarded the Hult Prize, worth \$1 million, for developing a sustainable and cost-saving approach to rice production.
- Associated with 11 Nobel Prize winners over the years, today UCL Life Sciences continues to change the way we understand the world from the challenges of environmental change to the 3D printing of pharmaceuticals.

You can find our courses in:

- Biological and Life Sciences [p60](#)
- Medicine, Health and Allied Subjects [p81](#)

Faculty of Mathematical and Physical Sciences

The faculty encompasses the logical, experimental and mathematical study of our universe. Frontline research feeds directly into our teaching, and our students benefit from access to outstanding facilities.

- Many of our departments rank in the top 10 for the Mathematical and Physical Sciences in the UK*.
- Our students and academics have been part of exciting discoveries, including new supernovas, water on habitable planets and the first images of a black hole.
- We are proud to count Dame Kathleen Lonsdale, UCL scientist, Quaker and pacifist, as one of our inspiring alumni. She conducted groundbreaking research in crystallography and in 1945 was one of the first women ever to be elected a Fellow of the Royal Society.

* QS World University Rankings by Subject 2025

You can find our courses in:

- Historical and Philosophical Studies [p72](#)
- Mathematics and Statistics [p79](#)
- Physical Sciences (Chemistry, Earth Sciences, Natural Sciences, Physics and Astronomy) [p83](#)

Faculty of Medical Sciences

We are at the forefront of fighting the world's biggest health problems. Study one of our exciting degrees to launch your career in fields including medicine, medical technology, pharmaceuticals, public health and beyond.

- UCL is ranked eighth in the world for medicine*.
- Our Medicine MBBS is internationally renowned and our innovative Medical Sciences BSc degrees are tailored to the needs of our changing world.
- Our Medical Sciences degrees have a shared first year. This gives you core knowledge and techniques, but also the flexibility to switch degrees if your interests change.
- Our groundbreaking research, leading academics and clinicians, cutting-edge facilities and outstanding partner hospitals and institutions create an unrivalled environment for medical sciences teaching and learning.

* QS World University Rankings by Subject 2025

You can find our courses in:

- Biological and Life Sciences [p60](#)
- Medicine, Health and Allied Subjects [p81](#)

Faculty of Population Health Sciences

We offer a learning environment that is rooted in cutting-edge research and academic excellence. Our staff are at the forefront of advancing knowledge in infectious diseases, heart disease and cancer. They are also contributing to innovations within healthcare management and addressing the health impacts of climate change.

- Our Population Health Sciences degrees will teach you to understand and address the pressing health issues of our time, harnessing the power of data to drive impactful change.
- The innovative Business and Health degrees integrate core business and health skills. They provide an interdisciplinary education with real-world applications and the flexibility to specialise in healthcare management, health science or health technology.
- UCL is ranked fourth in the world for public health* and we are the top-rated university in the Russell Group for research in medicine, health and life sciences^.
- Our academics collaborate with world-renowned institutions including the World Health Organization, the NHS, Great Ormond Street Hospital and the Wellcome Trust, ensuring that the most up-to-date findings are being used to improve health systems and health outcomes around the world, as well as being taught in our classrooms.

* ShanghaiRanking Global Ranking of Academic Subjects 2025

^ Research Excellence Framework (2021)

You can find our courses in:

- Medicine, Health and Allied Subjects [p81](#)

Faculty of Social and Historical Sciences

Our departments and institutes – Anthropology, Archaeology, the Americas, Economics, Geography, History, History of Art and Political Science – explore the social, political, economic, cultural and environmental processes that shape our world.

- We are intellectually diverse and world-leading, with our social sciences subjects ranked 14th in the world and our arts and humanities disciplines ranked 7th*.
- Our academics develop cutting-edge, cross-disciplinary research and education that has positive, real-world impact. We'll challenge you to think in new ways, engage critically with global issues and look for creative solutions.
- Our students have unrivalled access to world-leading resources nearby, including the British Library, British Museum, the Wellcome Collection and the Warburg Institute, as well as on-site collections and remarkable facilities on campus.
- We're proud that 91% of our graduates achieve a positive destination following their studies. Many go into graduate-level work or higher study in a variety of sectors, including financial services, consultancy, the creative arts and law^.

Architecture, Construction, Planning and Sustainability

We are UCL Bartlett Faculty of the Built Environment. We work with students from around the world to imagine, plan, design and build a better future for everyone.

Studying with us at the Bartlett is about the bigger picture. It's about excelling at an individual discipline within the context of many others and discovering specialisms, themes and passions that take you where you want to be. Whether your ambition is to design better buildings, plan better cities, build sustainable communities or help meet the challenge of climate change, our courses could be a big step towards it.

➤ First career destinations:

- Architects
- CAD, drawing and architectural technicians
- Chartered architectural technologists, planning officers and consultants
- Civil engineers
- Construction project managers and related professionals

🔗 Related courses can be found in:

Arts and Sciences

UCL's liberal Arts and Sciences (BASc) degrees provide enormous flexibility, allowing you to create a bespoke course incorporating arts, social sciences and science subjects.

You apply directly to your major pathway – Cultures; Societies; Health and Environment; or Sciences and Engineering – which determines the subjects in which you will specialise. You'll also study a language, plus 'core courses' specially designed to help you make links between different subject areas and provide you with the tools necessary for interdisciplinary study. Innovative methods of teaching and assessment include vlogs, blogs and presentations.

To be eligible to study abroad in certain destinations, some students may be required to meet external partner requirements in respect of the students'

progression profile. Further information on study abroad is provided at the start of Year 1.

An optional internship at the end of the second year will help you prepare for the world of work.

➤ **First career destinations:**

- Arts officers, producers and directors
- Business associate professionals
- Business and related research professionals
- Business sales executives
- Finance and investment analysts and advisers

Pathways with broad areas of study:

Students apply to one major pathway from the list below. If you choose an Arts major pathway you will then choose a Science minor pathway and vice versa if you choose a Science major pathway.

Arts pathways

Cultures

- Anthropology
- Creative Writing
- Cultural Studies
- Design and Visualisation
- Drawing Methodology
- Film and Documentary Film-making
- History of Art
- Languages
- Literature
- Philosophy

Societies

- Archaeology
- Economics
- Geography
- International Relations
- Law
- Management
- Philosophy
- Political Economy
- Politics
- Sociology
- Science and Technology Studies

Science pathways

Health and Environment

- Anthropology (Biological)
- Biochemistry
- Earth Sciences
- Ecology
- Environmental Sciences
- Geography (Physical)
- Health Sciences
- Life Sciences
- Neuroscience
- Psychology

Sciences and Engineering

- Chemistry
- Computer Science
- Data Science
- Earth Sciences
- Engineering
- Mathematics
- Physics
- Statistics

Communications and Media

Our degrees set the benchmark for ambitious future communications and media professionals, combining the highest standards of academic and critical rigour with practice, state-of-the-art professional skills and an insight into a range of different communications and media.

Our Media BA helps you integrate creative practice with critical media theory. You will produce impactful interdisciplinary work while developing artistic confidence, research skills and an industry-aware mindset for a range of global and cultural contexts. You will also have the opportunity to create your own film and interactive media projects using the cutting-edge media facilities at UCL East and showcase your work at the end-of-degree show.

On our Communications BA, you'll explore contemporary issues related to communication theory, development, and practice. You will develop the theoretical understanding, research, production and design skills needed to optimise communication processes and outcomes in a range of professional fields.

➤ **First career destinations:**

The first cohort of students admitted to the Media BA graduated in 2024. The first cohort of students admitted to the Communications BA are not due to graduate until 2028. Therefore, no first career destinations for students on these courses are currently available.

Education

These degrees prepare students to take a lead role in understanding and transforming society through the multifaceted lens of education.

Education is at the heart of global efforts to create more fair and equal societies. These interdisciplinary degrees draw on sociology, philosophy, psychology, history, youth studies and sustainability, to provide our students with the critical tools necessary to reflect on education as a dynamic force at the centre of social, cultural and political change.

➤ **First career destinations:**

- Early education and childcare practitioners
- Primary education teaching professionals
- Secondary education teaching professionals
- Teaching assistants
- Youth and community workers

Engineering

Engineers use insights and discoveries from across the academic spectrum to develop products and processes that truly change the world.

From vaccine manufacturing to designing ships and the distribution of sustainable energy, engineers solve problems for the good of humanity. Throughout your degree, you'll learn the fundamentals of engineering with a focus on cross-team working, real-world scenarios and developing professional skills. Whichever discipline you choose to specialise in, you'll be ready to make an impact in the world from the moment that you graduate.

➤ **First career destinations:**

- Civil engineers
- Finance and investment analysts and advisers
- Management consultants and business analysts
- Production and process engineers
- Programmers and software development professionals

🔗 **Related courses can be found in:**

- Architecture, Construction, Planning and Sustainability [p56](#)

English and Comparative Literature

With one of the most enduring and respected English departments in the country and an exceptional range of modern and ancient languages and interdisciplinary humanities on offer, UCL provides a stimulating environment for the study of literature and the creative arts.

Our degrees require you to undertake careful critical and creative reading, reflection and writing. We aim to develop your analytical and interpretative skills, allowing you to develop a sensitivity to subtext and context. Our Creative Arts and Humanities BA – the first of its kind in the UK – is unique in bringing together creative writing, moving image and performance.

➤ **First career destinations:**

Fine Art and Art History

Whether you're a practitioner or a theorist, a creator or a critic, UCL offers outstanding staff, facilities and expertise across a variety of degree courses in the prestigious Slade School of Fine Art and Department of History of Art.

A world-leading centre of scholarship in the history, practice and theory of art, our central location in London gives you easy access to national collections such as the Tate and National Gallery and a wealth of specialist and independent galleries and collections, not to mention UCL's own museums and collections, to inform and enrich your learning. The Slade's new Art and Technology BA, based at UCL East in Stratford, is focused on the interconnections between art and practice.

➤ **First career destinations:**

- Artists
- Furniture makers and other craft woodworkers
- Marketing associate professionals
- Other elementary services occupations

Historical and Philosophical Studies

Did you know?

UCL is currently ranked third in the world for archaeology.

QS World University Rankings by Subject 2025

This wide-ranging subject area covers everything from the history of the world, the ideas of philosophers – ancient and modern – and practical and analytical techniques for discovering how our ancestors lived.

Students on these degrees develop strong research and analytical skills and a sensitivity to different cultures and ideas. They learn to communicate effectively verbally, visually and in writing to diverse audiences. Studying these subjects could lead to careers in government and the civil service, international agencies and non-governmental organisations (NGOs), consultancy (economic, political risk and security, including within the AI sector and marketing) financial services, law, media, teaching, heritage and museums, as well as academia.

➤ First career destinations:

Languages and Cultural Studies

UCL offers a remarkable range of languages and associated cultural studies, including art, film, history, literature and linguistics, philology, philosophy and politics.

A degree in this area equips students with skills much sought after by employers, such as the ability to speak, understand and write in a foreign language, intercultural understanding, translation and communication skills, and critical and analytical rigour. You may choose languages that you have studied before or start others from scratch, depending on the course. The year abroad, integral to most degrees, allows you to immerse yourself in another culture at one of our prestigious overseas partner institutions.

➤ First career destinations:

- Arts officers, producers and directors
- Higher education teaching professionals
- Management consultants and business analysts
- Managers and directors in the creative industries
- Public relations professionals

Modern language combinations

This grid shows the range of languages that can be combined (subject to entry requirements and availability) to create a four-year degree course. The final degree awarded on completion will reflect whatever combination you choose, for example, Bulgarian and French BA, Italian and Spanish BA.

You can combine the study of two languages on an equal basis – either two languages that you have already studied, or one language at beginner's level alongside one you already know.

French and Spanish are not available at beginner's level within these combinations. If you wish to study French or Spanish from beginner's level, you can apply for the Language and Culture BA (see p76), where they are available as minor languages.

For most combinations, it is also possible to study two languages from beginner's level if you have an A level (or equivalent) in any modern foreign language.

If you wish to combine two Scandinavian languages, please see the Icelandic BA (see p76) or Scandinavian Studies BA (see p77).

For guidance on how to apply, as well as the UCAS code for each language combination, please see: ucl.ac.uk/prospectus.

Entry requirements:

Course-specific entry requirements (including contextual offers and other qualifications) can be found at: ucl.ac.uk/prospectus or scan the NaviLens QR code.

Law

UCL Laws is consistently ranked as one of the UK's top law schools, recognised for the quality of its teaching by both students and the legal profession.

Through lectures, seminars and small group tutorial teaching, you can explore the principles of law and understand its role in governing the relations between the individual, the state, and society. You will be encouraged to develop a critical understanding of how the law works and how it can be changed. Students benefit from specialist career support and can choose to participate in an array of activities, including mooting, pro-bono opportunities and an exciting and varied events programme, organised in conjunction with the Student Law Society.

➤ First career destinations:

- Business associate professionals
- Legal professionals
- Legal associate professionals

Mathematics and Statistics

So many activities and industries – engineering and science, business and finance, data science and computing – depend, in large part, on mathematical and statistical insights.

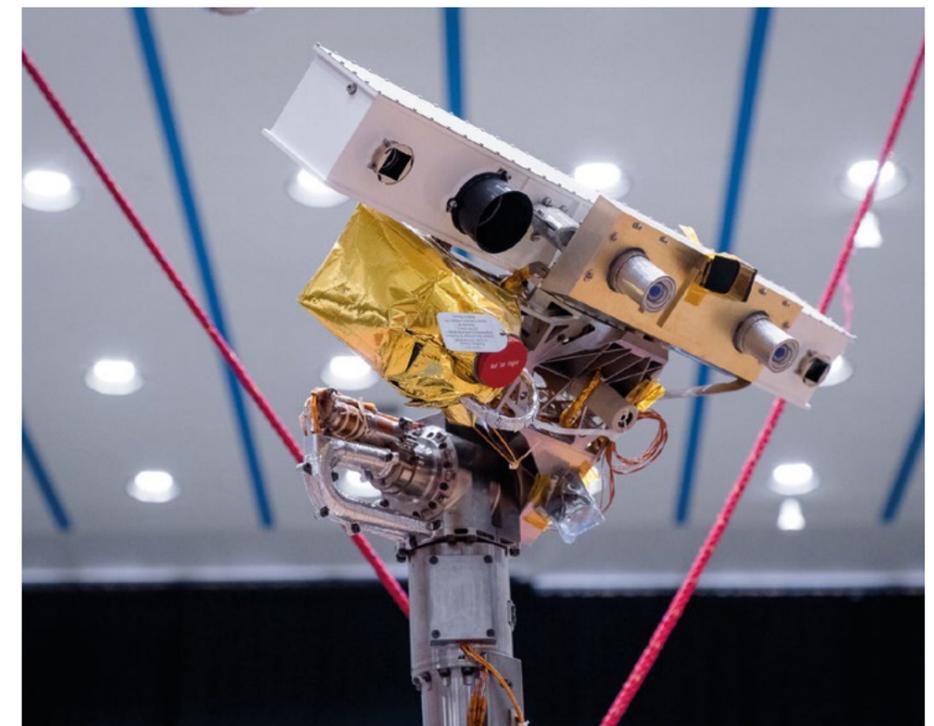

Our courses will encourage you to develop your imagination and critical thinking abilities. They will enhance your ability to think strategically and argue clearly. You will gain advanced quantitative and computing skills, as well as honing your logical, analytical and problem-solving abilities, giving you a wealth of options for your future career. Our graduates go into a diverse array of careers and a large proportion go on to further study in both theoretical and applied fields.

➤ First career destinations:

- Actuaries, economists and statisticians
- Business and related research professionals
- Chartered and certified accountants
- Finance and investment analysts and advisers

Physical Sciences

This area covers the natural sciences linked to the study of non-living systems, forces and properties of the cosmos – from molecules to galaxy clusters, from the Earth’s core to the edge of the observable universe.

Study in these areas is renowned for developing highly sought-after analytical skills, the ability to undertake field and laboratory research and an understanding of mathematics and the principles and techniques of your chosen subject. A scientific training also equips you with practical transferable skills in rational argument and problem-solving, perfect for careers in areas such as research, design, development, computing, finance, planning and teaching.

➤ First career destinations:

- Actuaries, economists and statisticians
- Data analysts
- Physical scientists
- Programmers and software development professionals
- Teaching professionals

🔍 Related courses can be found in:

- Computer Science [p64](#)
- Economics, Geography, Politics and Social Sciences [p65](#)
- Engineering [p68](#)
- Historical and Philosophical Studies [p72](#)
- Mathematics and Statistics [p79](#)

Did you know?

In 2019, UCL researchers detected water vapour in the atmosphere of a super-Earth with habitable temperatures in a world first.

Psychology and Language Sciences

UCL is a world leader in research and teaching of mind, behaviour and language.

Our researchers cover a range of disciplines such as cognition, neuroscience, linguistics, education, communication, neurological disorders, mental health, speech sciences and development across the human lifespan. You will have the chance to acquire quantitative and qualitative skills by critically evaluating research data and conducting your own research studies. In addition to subject-specific skills you will also develop a range of highly transferable skills including problem-solving, communication, data analysis, writing for different audiences and critical thinking, which are essential for a range of graduate careers, which could include law, computing, healthcare, marketing, commerce and industry. Students can also progress into becoming chartered psychologists or speech and language therapists.

➤ **First career destinations:**

- Business associate professionals
- Business and related research professionals
- Psychologists
- Public relations professionals
- Welfare and housing associate professionals

Key: ✈️ Study abroad 🏆 Placement or internship opportunity 🏆 Accreditation See [p87](#) for explanation of symbols

Course symbols

Throughout the course pages we've used the following symbols:

➤ First career destinations

This shows a selection of first career destinations for courses in the section (excluding courses from which the first cohort of students has not yet graduated), taken from the Graduate Outcomes survey carried out by the Higher Education Statistics Agency (HESA) for 2022/23. The survey looks at what UK/EU graduates have gone on to do approximately 15 months after graduating from UCL.

🔗 Related courses

Many of our degrees are interdisciplinary, working across two or more subject areas – so it's possible that you'll find courses of interest in more than one section. We have indicated where there are overlaps so you can see the full choice of courses available to you.

✈ Study abroad

Courses with study abroad as an integral part of the curriculum – for example, courses in the Languages section – are marked with this symbol. Please note that you may also choose to study abroad as an option within many other courses too.

📄 Placement or internship opportunity

This symbol indicates courses where a placement or internship opportunity is an integral part of the curriculum – for example, the Pharmacy MPharm. Please note that many other courses also offer optional placements or internships.

🎓 Accreditation

Many degrees are accredited by professional bodies, meaning that when you graduate you will either be eligible for membership, or will have fulfilled the academic requirements for membership, of the accrediting body. Our Law courses are compliant with the QAA Subject Benchmark Statement for Law and contain the Foundations of Legal Knowledge. Completion of the Medicine MBBS BSc enables provisional General Medical Council (GMC) registration.

Choosing your university is a big decision

We know that the process can be daunting, so we've tried to make the information on the following pages as straightforward as possible. We've also provided details of where you can find more help and advice.

Entry requirements:

Course-specific entry requirements (including contextual offers and other qualifications) can be found at: ucl.ac.uk/prospectus or scan the NavILens QR code.

Entry requirements

We're seeking the brightest minds to join the UCL community and you must satisfy our specific entry requirements to study here.

For A levels, UCL typically makes offers in the range of A*A*-ABB. For all courses, you must have at least two A levels from our list of preferred subjects.

Please note that we do not consider General Studies, Critical Thinking or Global Perspectives and Research to meet the entry requirements for any of our courses.

As well as A levels, we accept a wide range of other UK and overseas qualifications, for which requirements will be listed under each individual course in the online prospectus.

Please note that for some courses there may be additional admissions tests that will need to be taken. These will be indicated on the course page in the online prospectus.

If you are not a national of a majority English speaking country (as defined by the UK Visas and Immigration, Home Office) you must provide recent evidence of your English proficiency. The English language requirements for each course are shown on the relevant page in the online prospectus.

For more information about entry requirements (including GCSE requirements which vary across undergraduate courses), accepted qualifications and English language requirements, see the NavILens QR code above.

Access UCL contextual offer scheme

As part of our commitment to increasing participation from underrepresented groups, UK-domiciled students who meet specific criteria may receive a contextual offer through the Access UCL scheme.

If an eligible applicant is selected for an offer, they will receive a contextual offer which is lower than the standard UCL offer. Standard and contextual entry requirements are listed each course on the online prospectus. For more information on eligibility criteria, visit: ucl.ac.uk/prospective-students/undergraduate/access-ucl-scheme

Engineering Foundation Year

Our Engineering Foundation Year is exclusively for students eligible for UK/home fee status, who aspire to become engineers but do not meet the entry requirements for our undergraduate engineering degrees. It accepts a wide range of vocational and academic qualifications.

The Engineering Foundation Year is a widening participation initiative. Applicants must meet specific criteria related to their backgrounds and circumstances. For information about entry requirements, visit: ucl.ac.uk/prospective-students/undergraduate/degrees/engineering-foundation-year

Scan the NavILens QR code, or search: '[UCL entry requirements](#)' to find out more.

How to apply

If you're inspired by what we offer and meet our entry requirements, we look forward to reading your application. Here's what you need to do.

1. Find your degree course

It's important to research the degree courses and universities that interest you before you make your choices. You can find out detailed information about each of our courses by visiting ucl.ac.uk/prospectus. You could also attend one of our Open Days, see ucl.ac.uk/openday

2. Apply online

Applications can be submitted from 1 September 2026

Undergraduate applications to UCL are made through UCAS. Our UCAS code is **UCL U80**; there is no campus code. Advice on completing your application, including fees, is on the UCAS website: ucas.com

For more information about the application process, including deadlines, please see the NavILens QR code above.

3. Considering your application

For more information on how we assess applications and when we will respond, please see the NavILens QR code above.

The selection criteria may vary across courses at UCL. Each course page on the online prospectus will have specific selection criteria including information about interviews, selection events or open days (if relevant).

Scan the NavILens QR code, or search: '[UCL undergraduate application](#)' to find out more.

Admission to UCL

We strive to admit the academically brightest students to UCL, regardless of background – those who are enthusiastic and passionate about learning, and who will make a positive contribution to university life and gain the most from their years of study here. In fact, UCL was founded to open up education in England for the first time to those who had been excluded from it. That commitment remains as strong today as it was back in 1826.

Our Equality, Diversity and Inclusion Policy and Strategy underlies every aspect of our student selection process. We want to admit excellent students who are likely to complete their degree programme successfully and derive benefit from it, regardless of age, disability, ethnic origin, gender identity, marital status, sex, sexual orientation, number of dependants and religious or political beliefs. We positively encourage and welcome applications from members of underrepresented groups at UCL.

UCL's Access and Participation Plan (ucl.ac.uk/access) outlines our commitment to widening participation at UCL, including the Access UCL scheme (see p88).

Visa requirements

If you think you may require a visa to study in the UK, you should visit: ucl.ac.uk/students/immigration-and-visas. This provides more information about the types of visa, application processes and our requirements.

Fees

Scan the NaviLens QR code, or search: 'UCL fees' to find out more.

Our fees can vary depending on your degree and fee status classification. Please take the time to familiarise yourself with the information below.

Tuition fees

UCL's annual tuition fee covers all elements of your tuition, registration and examination (field courses are not included). However, optional modules taken elsewhere in the University of London may attract an additional fee. Fees for accommodation are charged separately. UCL offers several 'Dual Degree' programmes where students spend half of their degree studying at UCL and the other half at a university overseas (these are distinct from Study Abroad or International courses). In these cases, fees are payable to UCL for the time spent studying at UCL, and to the other host university for the time spent there. More details of these can be found at: ucl.ac.uk/prospectus

Please note that the information on this page applies to the 2026/27 academic year. Fees for 2027 entry will be published on the UCL Students website (ucl.ac.uk/students/fees-and-funding) as soon as they are available.

How tuition fees are classified

The level of fee will depend upon whether you're classed as a UK, Overseas or Islands student. You may already know into which category you fall but this will be confirmed if you are offered a place at UCL.

Tuition fees for UK students

UK undergraduate fees are currently (January 2026) set at £9,790 (subject to parliamentary approval) for UK students for the first year of study. Fees for UK undergraduates may be subject to increase for the year commencing 2027 and for each year of study thereafter.

UCL reserves the right to increase its fees in line with government policy (including on an annual basis during the programme). You are not required to pay upfront fees. You can apply to the Student Loans Company for a Tuition Fee Loan and your fees will be paid directly to UCL on your behalf. Loan repayments are only made once you have left university and are earning over £25,000 per year. Please see gov.uk/student-finance for further information.

Tuition fees for overseas students

For 2026 entry, UCL's tuition fees for overseas students range between £29,500 and £57,400 per year. The vast majority of our undergraduate courses charge a fixed fee every year for overseas students (Medicine MBBS is an exception) and these won't change during your time with us, so you know upfront exactly how much you'll need to pay.

Sources of funding

Scan the NaviLens QR code, or search: 'UCL funding' to find out more.

University is an investment in your future. Depending on your circumstances, there are many sources of financial support to make higher education more accessible.

Sources of funding for UK students

- **Lifetime Learning Entitlement from the Student Loans Company** – see gov.uk/student-finance for information about the new form of Student Funding that starts in 2027.

For students from Scotland, Wales or Northern Ireland, there is a different process and funding package available:

Scotland – see saas.gov.uk
Wales – see studentfinancewales.co.uk
Northern Ireland – see studentfinancenir.co.uk

If you live in the Channel Islands or Isle of Man please contact your education authority for funding information.

- **UCL Undergraduate Bursary** – this is a means-tested bursary of up to £3,000 per year – see ucl.ac.uk/scholarships
- **UCL Scholarships** – we have a range of schemes available each year based on financial need and/or academic merit – see ucl.ac.uk/scholarships
- **Care Leaver and Estranged Student Bursary**, aimed at students who are care experienced or estranged from parent(s) – see ucl.ac.uk/scholarships/care-leaver-bursary
- **Disabled Students' Allowance** – see gov.uk/disabled-students-allowances-dsas
- **Students with dependants** – see gov.uk/student-finance/extra-help
- **Employment** – there are plenty of opportunities to find varied and reasonably paid part-time work in London. UCL Careers and the Students' Union list opportunities on their websites.

Note for EU students: UK withdrawal from the European Union (EU)

The UK has now formally left the EU. Students covered by the EU Withdrawal Agreement may be able to access Tuition Fee Loans and Maintenance loans, depending on their status under the EU Settlement Scheme and their residency. See ucl.ac.uk/scholarships for more details.

Sources of funding for overseas students

- **UCL Scholarships** – we have a range of schemes available – see ucl.ac.uk/scholarships
- **External funding** – external (non-UCL) organisations also offer funding support – see ucl.ac.uk/scholarships/external-funding for examples.
- **Tuition Fee Loan and help with living costs for EU students** – you may be able to get a Tuition Fee Loan and help with living costs if you're from an EU country, Iceland, Liechtenstein, Norway or Switzerland – see gov.uk/guidance/studying-in-the-uk-guidance-for-eu-students for more details.
- **Employment** – international students who require a visa or prior entry clearance are normally permitted to work for up to 20 hours per week during term time and full-time in the vacations. This restriction applies to voluntary as well as to paid employment – see ukcisa.org.uk for more information.

If you have financial problems during your degree

The UCL Financial Assistance Fund may be able to help if you experience unexpected financial hardship during your degree; there is also a short-term loan scheme for students whose funding has been delayed. Eligibility requirements apply – see ucl.ac.uk/students/funding/financial-support for more details.

For further information

A good starting point for further information about student finance is gov.uk/student-finance if you're a UK student, or your local Ministry of Education if you're an overseas student.

You can find out more about UCL fees and funding – see ucl.ac.uk/students/fees-and-funding

Your living expenses

Living costs may vary greatly from student to student, depending on individual needs and lifestyle. To guide you, UCL has estimations of how much students might spend on living costs – see ucl.ac.uk/scholarships/how-much-does-it-cost-study-ucl

Additional costs on some degree programmes

Students on certain degree courses will incur costs in addition to their tuition fees; for example, for materials or books, or costs related to carrying out fieldwork. For details about possible course-specific additional costs and other expenses, such as travel between campuses, please see the relevant course page in the online prospectus

Accommodation

Scan the NaviLens QR code, search 'UCL accommodation' or see p30–31 for more information.

Food and accommodation are the biggest costs of studying at university, so you need to choose your options carefully to suit your needs and budget.

All the information you need about the application process and details of all our accommodation can be found online (see the NaviLens QR code, above). The majority of the accommodation available is managed by UCL. Some accommodation is managed by partners such as the University of London or private operators.

What you get and what it might cost

UCL uses location zones and pricing bands to help you budget and to understand the quality of the accommodation and the distance from Bloomsbury campus when applying through the UCL Accommodation Portal.

The fees you pay vary depending on location and facilities. All of our accommodation fees include room rental and the following:

- Use of communal areas
- Maintenance within your hall
- Cleaning of shared bathrooms, kitchens and communal areas
- Utility charges, including Wi-Fi
- Basic contents insurance
- 24/7 support.

Additionally, when you move into UCL accommodation, you will become a part of a vibrant UCL community led by residents. Residents in halls can meet other students through Flourish, our residential life programme, which offers activities such as theatre outings, day trips, inter-hall sports tournaments and more.

Each of our sites has experienced and knowledgeable managers and hall teams available to help you throughout your time in UCL accommodation. At UCL managed halls there are Student Residence Advisors (SRAs)

that run activities such as quizzes, movie nights and karaoke, as well as offering peer-to-peer wellbeing support and signposting, ensuring you have an exceptional student experience. Each private provider has its own student support system in place. Additionally, all of our accommodation has secure access, as your security and wellbeing is our main priority.

The most up to date information about the pricing of our accommodation and the rooms available can be found online (see NaviLens QR code, above). We aim to keep our costs as low as possible within the constraints of rising utility bills and the general cost of living.

Zones are based on the location of the hall

- Zone A – within a 1.5 mile radius of the UCL Quad, Bloomsbury
- Zone B – between 1.5–5 miles from the UCL Quad, Bloomsbury
- Zone C – over 5 miles from the UCL Quad, Bloomsbury.

The majority of UCL accommodation will fit within Zone A.

Bands are based on the building condition

- Band 1 – newest build or recently refurbished to a high standard
- Band 2 – less recently refurbished or not all areas refurbished
- Band 3 – halls yet to be refurbished
- Band 4 – budget friendly rooms in halls that have not been refurbished.

As a guide, fee ranges for the 2025/26 session were as follows:

UCL catered accommodation

- Single room: £238.28 to £299.67 per week

UCL self-catered accommodation

- Single room: £211.26 to £297.99 per week
- Single ensuite room: £285.67 to £360.36 per week

Fees for UCL accommodation are updated yearly and appear online as soon as they are set. Fees for halls operated by the University of London are set in the spring of the year of entry.

Find out more at ucl.ac.uk/accommodation or halls.london.ac.uk/accommodation

After your first year

Returning students can book their place at UCL's purpose-built accommodation, urbanest Canary Wharf. It's the ideal choice to live with friends in modern flats, stay in UCL accommodation with all the support and community that brings, and budget more easily thanks to all-inclusive rents.

Students can also explore private rentals or rooms offered by trusted providers, available at special UCL rates that may be higher elsewhere.

Contact us at accommodation@ucl.ac.uk or @UCLAccommodation on Instagram and Facebook.

Discover UCL for yourself

There's always something exciting going on at UCL and our central London location makes finding us easy. We look forward to meeting you.

Come to one of our Open Days

Our next UCL Undergraduate Open Days will take place both online and on campus. Our Virtual Open Events will run from 17 to 26 March 2026, featuring a series of key sessions covering areas such as Accommodation, Admissions, and Funding. Following these, you will be able to join subject-specific admissions talks, offering valuable insight into our degree courses. Throughout the events, you will have the opportunity to speak with admissions staff and academic tutors, as well as engage with current UCL students to gain an authentic understanding of what studying here is really like. These sessions will continue into April 2026.

Our in-person Open Days on 26 and 27 June 2026 will allow you to experience and explore the Bloomsbury and East campuses and meet with UCL staff and students. See ucl.ac.uk/openday for more details.

To find out more about other opportunities to visit our campus, talk to student and staff, book a tour or details of Higher Education fairs, schools and country visits, visit ucl.ac.uk/prospective-students

If you'd like to find out more

If you have a general enquiry about UCL and our degree courses, feel free to contact us:

study@ucl.ac.uk
+44 (0)20 8059 0939

Access and Widening Participation

UCL runs a range of summer schools, taster days and other activities for UK-domiciled prospective students from underrepresented groups. To find out more, including the eligibility criteria for these, visit: ucl.ac.uk/widening-participation

How to get to us

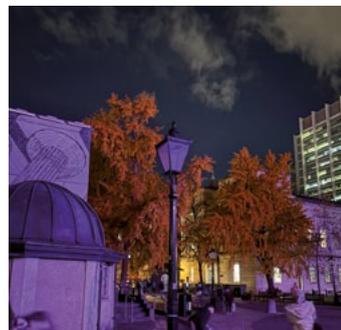

Whether you're coming from elsewhere in London, the UK or overseas, it's easy to get to us. See ucl.ac.uk/maps/public-transport for directions.

Scan the NaviLens QR code, or search: 'UCL Open Days' to find out more

Featured here are some of our favourite entries for the **#LoveUCL** Instagram photography competition – where our students capture moments of UCL life.
