Undergraduate Prospectus
2026 Entry

Your guide to degrees
and student life at UCL

UCL

Calling all ambitious thinkers

We're searching for independent-minded students with the courage to challenge convention and make a real difference to the future of this world.

Together, we form a diverse community of passionate visionaries, bold boundary-breakers and eternally curious minds.

As part of its accessibility mission, UCL is using **NaviLens Accessible QR codes** in its prospectus. These codes can be scanned from much further away, while moving and without the need to focus or frame the code. Simply download the NaviLens app to get started. The app works on both the **Android** and **Apple** operating systems and is completely accessible. The QR code at the centre can still be scanned using your camera or a standard QR reader.

Welcome to UCL

Why choose UCL?

Student life

Clockwise from far left: UCL Portico; Woburn Walk – a Georgian era pedestrian street in Bloomsbury and a regular sight in TV and film productions; The Marshgate building at UCL East; UCL Quadrangle; One Pool Street at UCL East; *Fragments of Memory* sculpture by Bouke de Vries in the Japanese Garden; Cruciform Building at night Centre: The Micrarium in UCL's Grant Museum of Zoology

What can I study?

Additional information

9th in the world

QS World University Rankings 2025

– World-leading, world-impacting research *

– 400+ degree programmes

– Students from more than 150 countries

– 32 Nobel laureates

– An award-winning sustainable university ^

– Over 430 student clubs and societies

– In the heart of London, the world's best student city **

– UCL graduates earn above the Russell Group and UK median average^^

* Research Excellence Framework (REF 2021)

^ People & Planet University League for environmental and ethical performance;
   QS World University Rankings: Sustainability 2025

** QS Best Student Cities 2018, 2019, 2022, 2023, 2024, 2025

^^ Three years following graduation, UCL undergraduate students earn 9.1% above the Russell Group median average and 24.1% above the UK median average excluding professions with standardised salary scales and all other subjects excluding Creative arts and design. (2021-22 Longitudinal Education Outcomes [LEO])

We're proud of our groundbreaking history, distinguished present and exciting future. UCL is a great place to be a student for so many reasons.

We have a proud heritage of radical ideas,
a reputation for game-changing research and a
unique multidisciplinary approach to problem solving.

UCL has confronted humanity's biggest issues since 1826. At that time, attending university was a rare privilege. If you weren't a man from a wealthy background and a member of the established church, higher education was off limits.

Our founders tore up that rule book. We were the first university in England to welcome students of any religion or social background. We were also the first in England to welcome women to university education.

We have challenged inequality ever since, and we hold a Silver Athena SWAN award in recognition of our progressive work practice. Each year, we invest £13.5 million in bursaries and activities to support students from diverse backgrounds to enter and succeed.

UCL is committed to widening access to higher education. Students who are domiciled in the UK and are from groups that are underrepresented at UCL may be eligible for a contextual offer as part of the Access UCL scheme (see p.88).

We have expanded from our beginnings in Bloomsbury with UCL East, a new campus on Queen Elizabeth Olympic Park in Stratford, East London, that is fit for the 21st century and beyond. With physical spaces that are publicly accessible and programmes built around working with local communities, this next chapter for UCL embodies our founding principles – to better understand global challenges by bringing together diverse viewpoints.

UCL200: Innovating since 1826

William Wilkins' neo-Grecian 12-column Corinthian portico has formed the heart of UCL's Bloomsbury campus since 1826

Since our founding we have continually innovated our teaching methods and we make research the cornerstone of our students' activity. Programmes such as Arts and Sciences BASc lead the way in interdisciplinary study and elsewhere, collaborative teaching methods are breaking down the boundaries between student and teacher, encouraging the thinkers of tomorrow.

In February 2026, we will begin the celebrations for our 200th anniversary, with an exciting year-long programme of activities and events. The UCL200 Programme will show our commitment to our core values, embrace our entrepreneurial spirit, inspire future leaders and contribute to a world where knowledge, research and innovation serve as a force for positive good.

As well as reflecting on our past, we will use the bicentenary to frame the future and share the type of organisation that we will become. We are working with our diverse UCL community to co-create and co-develop the UCL200 Programme, providing opportunities for our undergraduate and postgraduate student communities to get involved and make this milestone their own.

This is a unique occasion for our community and all UCL students will be provided with an unprecedented opportunity to experience a range of internal and public activities and educational opportunities across 2026.

Visit our website for more information on our bicentenary and how students can get involved: www.ucl.ac.uk/ucl200

Learn how to think – not what to think

We are here to further your knowledge, develop your skills of analysis and problem-solving and give you a truly global outlook that draws on diverse cultural perspectives.

Studying in London, you'll be living, learning and growing your network in one of the world's greatest cities. At UCL you'll have the chance to work alongside some of the world's leading researchers. They will drive you to think more analytically and independently – providing opportunities to undertake research activities of your own and create original output.

Learning as part of an international community of great minds, you will develop the cultural fluency and global outlook that are prized by employers.

Throughout your time here, you'll have many opportunities to shape our curriculum and how it's delivered. Our collaborative approach also helps build the essential skills that make UCL graduates so in-demand, such as communication, teamwork, negotiation, entrepreneurship and project management.

Scan the NaviLens QR code, or search: 'Discover UCL' in YouTube to find out more.

UCL staff and alumni have won at least one Nobel Prize each decade since the award began in 1901, with more than half of our 32 Nobel laureates born outside the UK.

Our Nobel laureates

RABINDRANATH TAGORE
(1861 – 1941)
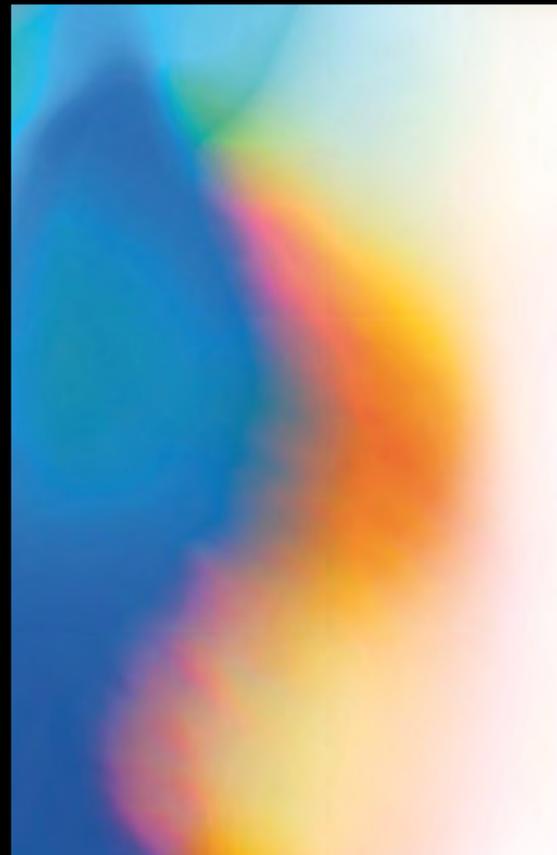

1904 – Chemistry
Sir William Ramsay
Discovered the noble gases: helium, argon, neon, krypton and xenon.

1913 – Literature
Rabindranath Tagore
Wrote profoundly sensitive, fresh and beautiful verse.

1915 – Physics
Sir William Henry Bragg
Analysed the structure of crystals using X-rays.

1921 – Chemistry
Frederick Soddy
Invented the concept of isotopes.

1922 – Physiology or Medicine
Archibald Vivian Hill
Founded biophysics.

1928 – Physics
Owen Willans Richardson
Discovered the law of thermionic emission.

1929 – Physiology or Medicine
Sir Frederick Gowland Hopkins
Discovered growth-stimulating vitamins.

1936 – Physiology or Medicine
Sir Henry Hallett Dale and Otto Loewi
Discovered neurotransmitters.

1938 – Physiology or Medicine
Corneille Jean Francois Heymans
Revealed how respiration is regulated.

1944 – Chemistry
Otto Hahn
Made discoveries leading to the development of nuclear technology.

1947 – Chemistry
Robert Robinson
Discovered the structure of morphine and strychnine.

1955 – Chemistry
Vincent du Vigneaud
Carried out the first synthesis of a polypeptide hormone, oxytocin.

1959 – Chemistry
Jaroslav Heyrovsky
Discovered polarography, widely used in clinical and environmental analysis.

1960 – Physiology or Medicine
Peter Brian Medawar
Discovered the key to successful organ and tissue transplantation.

1962 – Physiology or Medicine
Francis Harry Compton Crick
Discovered the molecular structure of nucleic acids (DNA).

1963 – Physiology or Medicine
Andrew Fielding Huxley
Revealed how activity is co-ordinated by a central nervous system.

1967 – Chemistry
George Porter (Baron Porter of Luddenham)
Devised flash photolysis to observe free radicals.

1970 – Physiology or Medicine
Sir Bernard Katz and Ulf Svante von Euler
Advanced remedies against nervous and mental disturbances.

1988 – Physiology or Medicine
Sir James Black
Discovered the first beta-blocker, propranolol.

1991 – Physiology or Medicine
Bert Sakmann
Discovered the role of ion channels in diseases, revolutionising cell biology.

2000 – Economics
James Heckman
Developed statistical analysis of individual and household behaviour.

2001 – Physiology or Medicine
Sir Paul Nurse
Enabled new avenues of research in tumour diagnostics and therapy.

2007 – Physiology or Medicine
Sir Martin Evans
Introduced gene modifications in mice.

2009 – Physics
Sir Charles Kao
Developed the transmission of light for optical communication.

2013 – Physics
Peter Higgs
Predicted the particle: the Higgs boson.

2013 – Physiology or Medicine
James Rothman
Revealed how substances are trafficked by vesicles in our cells.

2014 – Physiology or Medicine
John O'Keefe
Discovered the 'inner GPS' in the brain.

2020 – Physics
Sir Roger Penrose
Proved that the general theory of relativity predicts the formation of black holes.

2024 – Physics
Geoffrey E. Hinton
Made foundational discoveries and inventions that enable machine learning with artificial neural networks.

2024 – Chemistry
Sir Demis Hassabis
Predicted the three-dimensional structure of almost all 200 million known proteins using artificial intelligence.

Work / Projects Research / Studies / Experiments / Tests / Collaborations / Trials / Hypotheses / Excavations / Masterpieces in progress

UCL staff and students come from richly diverse backgrounds across the world. We use this truly global perspective to help solve the pressing issues of our times.

Our cutting-edge research has a real-world impact on everything from climate change to plastic pollution, infant mortality to social inequality.

In 2008 we established the UCL Grand Challenges, to stimulate and support cross-disciplinary research and develop holistic solutions to complex global problems. Since then we have brought together more than 850 researchers from 170 different centres, institutes and departments across UCL and provided more than £1.9m in funding to more than 440 projects.

We have set five new themes, beginning in 2023, in the fields of climate crisis, mental health and wellbeing, data-empowered societies, inequalities and intercultural communication. These challenges help us to translate our world-class research into real-world impact.

To join us scan the NaviLens QR code, or search: 'Made at UCL' to find out more.

Patterns of tree diversity across the world's tropical forests

A major international collaboration of 356 scientists led by UCL researchers has found almost identical patterns of tree diversity across the world's tropical forests. According to lead author Dr Declan Cooper (UCL Geography and UCL Centre for Biodiversity and Environmental Research), by focusing on understanding the commonest tree species, "we can probably predict how the whole forest will respond to today's rapid environmental changes."

New views of the Universe captured by the Euclid telescope

New images were captured by the European Space Agency's Euclid Telescope, whose optical camera was designed and built by an international team led by UCL researchers. The images showcasing galaxy clusters, free-floating planets and a star-framing region enveloped in interstellar dust were created by combining data from Euclid's two instruments: VIS, a visible light camera designed and developed over 16 years by Professor Mark Cropper (Mallard Space Science Laboratory at UCL) working with teams at UCL, Open University and across Europe, and the Near Infrared Spectrometer and Photometer (NISP).

Blood test could predict Parkinson's disease years before symtoms have developed

A team of researchers, led by scientists at UCL and University Medical Center Goettingen, Germany, have developed a simple blood test that uses artificial intelligence to predict Parkinson's disease, the world's fastest growing neurodegenerative disorder, up to seven years before the onset of symptoms. Professor Kevin Mills (UCL Great Ormond Street Institute of Child Health) said: "As new therapies become available to treat Parkison's, we need to diagnose patients before they have developed the symptoms. We cannot regrow our brain cells and…need to protect those that we have."

UCL students develop software to revolutionise computer use

Groundbreaking software that allows users to control their PC through their webcam using face and body movements has been developed by a team of UCL Computer Science students in collaboration with Intel, Microsoft, IBM and the NHS. As well as its clinical uses and for those with mobility issues, the software – which is freely available for individual downloads – can also be used for teaching and presenting in schools, universities and businesses, and by people playing Windows computer games.

A UCL education is a climate education. We are Generation One – a collective of people committed to a new era of positive climate action. By turning science and ideas into activity, we are working towards creating a positive, fair and progressive future. For us and for the generations to come. Join us.

To join us scan the NaviLens QR code, or search: 'UCL Generation One' to find out more.

Our students bring new thinking on climate action to their studies and everyday lives. The UCL experience provides a wealth of opportunities to take climate action while you're here and to develop as climate leaders when you go into the wider world.

We have launched a university-wide Grand Challenge on the climate crisis, which provides the focus to scale up our climate research and use this to support the way we tackle climate change through our operations.

We can all play our part. Get inspired by the extraordinary breadth of climate-focused activity taking place at UCL, find out about our Generation One campaign and how you can get involved.

Does the Earth have to be a fashion victim?

Every year, the fashion industry generates 10% of the world's global carbon emissions. It's why UCL scientists have pioneered a more sustainable method to help make propylene – a common ingredient in the fabrics and plastics of the clothes and shoes we wear.

Take action now

Visit a charity shop or try a swap shop when looking for a new outfit and reduce the 10,000 items of clothing sent to landfill every five minutes in the UK.

Trees matter, but just how much?

Trees are crucial to combating climate change. It's why we've developed 3D laser mapping to help measure how much carbon dioxide the world's trees absorb today – and predict how much they'll store in the future.

Take action now

Use your smartphone to help NASA measure the world's trees and find out how much carbon they store.

Artificial Intelligence (AI) - Climate Change friend or foe?

AI is being used by UCL researchers in work to track the environmental impact human activities have on the natural world, but is the use of AI an environmental hazard in itself?

Take action now

Give your inbox a clear-out to reduce the amount of cloud storage being used. Switch to ethical search engines like Ecosia and consider the physical resources AI platforms like ChatGPT use – writing a 100-word email using ChatGPT consumes aound 500 milliliters of water.

How far can we go with electric batteries?

Cars account for 18% of the UK's carbon emissions, so it's essential we move to electric vehicles. At UCL we're developing lithium-ion battery cells with a higher energy density to enable electric vehicles to go further in between charges.

Take action now

Walking, cycling and public transport are still the most climate-friendly modes of travel. If you do have a car, electric or otherwise, keep your car tyres fully inflated to improve fuel efficiency by up to 3%.

Supporting entrepreneurs

BoxxDocks

Startup BoxxDocks, supported by UCL, has developed a track and trace platform, helping distributors to boost efficiency and cut emissions. BoxxDocks is the brainchild of UCL alumnus James Della Valle (BSc Architecture 2020 and MSc Architecture 2023) and Alessandro Attanzio. BoxxDocks recently launched their solution with Sigma Pharmaceuticals, a UK leading pharmaceutical distributor and have expanded into Europe with Italy as their base of operations for the EU.

ZNotes

Education technology and social impact startup ZNotes, founded by UCL alumnus Zubair Junjunia (UCL Mathematics), has evolved into a global force, reaching over six million students. ZNotes addresses educational inequalities by giving millions of students across 190 countries unrestricted access to high-quality educational content. The platform has developed into a global community and empowers learners to become active contributors in the education system.

Your Juno

Dubbed "the Duolingo of money", Your Juno is helping to educate women and non-binary people on the topic of finances.
The platform, which consists of hundreds of online courses, covers everything from how to make your first investment to how to do your taxes. Founded by UCL alumna Margot de Broglie (UCL Economics, 2019) and her sister, the financial education app Your Juno already has over 65,000 users and has raised over £2.5 million in investment.

Whether you want to boost your employability, tackle global issues or start your own venture, we can help you develop entrepreneurial skills to achieve your goals.

Our tailored, free extracurricular entrepreneurship programme, run by UCL Innovation and Enterprise, provides you with the skills, knowledge and hands-on experience you need to make a difference in the world.

If you want to grow your own venture, join our equity free Hatchery incubator programme at BaseKX, UCL's dedicated entrepreneurship hub. Here you'll have access to the co-working space, advice and connections you need to succeed.

Scan the NaviLens QR code, or search: 'UCL entrepreneurship' to find out more.

We are investing in a university fit for the 21st century and beyond. At UCL you'll find all the cutting-edge facilities you need to achieve great things.

Cutting-edge facilities

We are over halfway through our 10-year, £1.25 billion investment in creating sustainable spaces and best-in-class facilities across London, giving our staff and students the tools to take their learning and discoveries further, with many award-winning projects in Bloomsbury already completed.

Designed entirely around our students' needs, our Student Centre includes 1,000 individual, group and open-plan study spaces, quiet contemplation areas and easy access to help and support at the dedicated Student Enquiries Centre.

Our UCL East campus includes state-of-the-art laboratories, fabrication workshops, collaboration areas and public spaces, providing facilities for cross-disciplinary research and open innovation, as well as new approaches to practical learning.

This world-class academic hub sits alongside contemporary student accommodation that provides an exciting student living experience in London's vibrant East End.

Right: Interior of UCL's Student Centre

Across UCL, we are creating an environment and student experience that encourages new ideas and invention and sparks creative connections.

Our creative culture

We are establishing a living laboratory of learning in an area committed to biodiversity throughout the parklands and waterways that run through the Olympic Park. Wander through the landscaped park with its wetlands and wildlife and you will soon find Hackney Wick, a lively destination day or night, with its quirky cafés, eateries, craft breweries and bars along the River Lea canal.

Left: Public art installation *Trēow of Time* by UCL alumni Larry Achiampong and David Blandy, commissioned for the central atrium of the Marshgate building on our UCL East campus, which opened in September 2023

Top: The landscaped parklands of UCL East

Right: The auto-icon of UCL's spiritual founder Jeremy Bentham is showcased in the public atrium of UCL's Student Centre

Below: Looking through to the sculptures of the Flaxman Gallery

UCL East is home to a 160-seat cinema and art installation spaces, while we also have a treasured venue in the Bloomsbury Theatre – which hosts plays, live music and comedy – as well as performances by our students and staff.

UCL's historic libraries, collections, museums and galleries – spanning everything from Egyptology to pathology, zoology to fine art – are actively used in teaching. The Grant Museum of Zoology, established on our Bloomsbury campus in 1828, reopened to the public in 2024 after an extensive improvement programme and includes new displays connecting the museum's collections to biodiversity and conservation research, as well as showcasing how UCL research is responding to the planetary crisis.

Scan the NaviLens QR code, or search: '<u>UCL Culture</u>' to find out more.

21

Our sustainable university

Main image, far left: Gordon Square, close to our Bloomsbury campus, is a popular place to relax

Our world-leading research, addressing the climate and ecological crises, informs the changes we're making here at UCL. We hope to inspire a generation of change makers to take the lead on climate and sustainability action across the world.

Sustainability is at the heart of how we operate. Ranked fifth in the world (and first in the UK) in environmental sustainability*, UCL's award-winning sustainable campus is powered by 100% renewable electricity and we send no waste to landfill.

UCL East has been designed with sustainability at its core: by turning rubble into skateboard ramps, harvesting rainwater, using low energy lighting and highly efficient mechanical ventilation, we have worked to minimise the carbon footprint of the campus.

We are developing our next sustainability plan that will further embed sustainability across UCL, encompassing carbon emissions reduction, fostering biodiversity and advancing sustainable education and research.

As a student at UCL, you will have the opportunity to join one of our many sustainability societies, learn climate leadership skills through our Sustainability Ambassador Programme, and join events such as our monthly clothes swap shops.

We offer nearly 4,000 sustainability modules across the courses offered at UCL and through our teaching programmes, we pass on our knowledge of sustainability best-practice to our students, to ensure that they become sustainability advocates to benefit the wider world.

*QS World University Rankings: Sustainability 2025

Scan the NaviLens QR code, or search: 'Change possible UCL' in YouTube to find out more.

London is your classroom

Bloomsbury itself is the historic home of Virginia Woolf and her 'Bloomsbury Group': writers, intellectuals, philosophers and artists who proudly challenged convention in both their lives and their work during the first half of the 20th century.

A wealth of knowledge and culture is on your doorstep at the world-renowned British Museum and British Library. And as part of London's 'Knowledge Quarter', we are surrounded by more than 75 academic, research, cultural, media and technology institutions of all shapes and sizes – from Google to the Charles Dickens Museum.

On Queen Elizabeth Olympic Park in Stratford, UCL joins partners the BBC, Sadler's Wells, UAL London College of Fashion and the V&A (Victoria and Albert Museum) at East Bank, a new destination for London, with world-class culture and education at its heart.

In addition to the new UCL East campus, the university has teaching locations across the capital, including The School of Management in Canary Wharf, which has new facilities due to open from 2026.

With easy transport links across London, to the rest of the UK and continental Europe, there's always something to do, see and learn.

Your life in London is a crucial part of your education and you will have the opportunity to study, live and play in not just one iconic part of London but two, with the opening of our campus in Stratford to complement our established home in Bloomsbury.

Enhancing your student experience

We are equipping the next generation of bold thinkers with valuable opportunities for collaborative exchange as they rise to meet humanity's greatest challenges.

Left: One Pool Street includes new self-catered halls for students

UCL East is a car-free site, with approximately 1,500 cycle spaces

Below: Public art installation *Gaia* by Luke Jerram is located in the central atrium of the Marshgate building on our UCL East campus and overlooked by the Media Suite

The UCL East campus is set within an innovation district that brings technology and biodiversity together to create the sustainable cities of the future. It is home to a range of new UCL research centres, where you can study our groundbreaking degree programmes, dedicated to tackling some of the biggest challenges facing the planet.

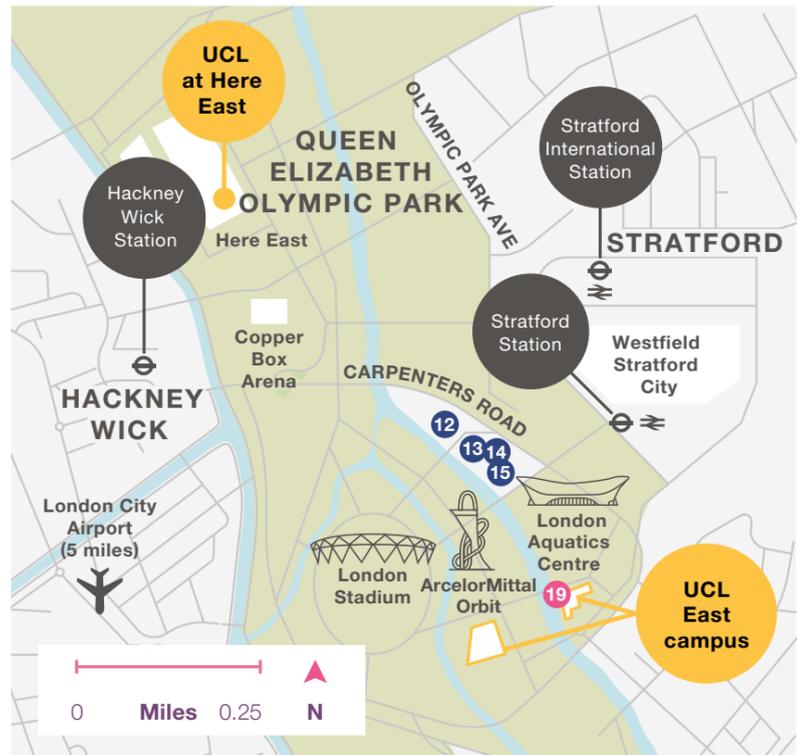

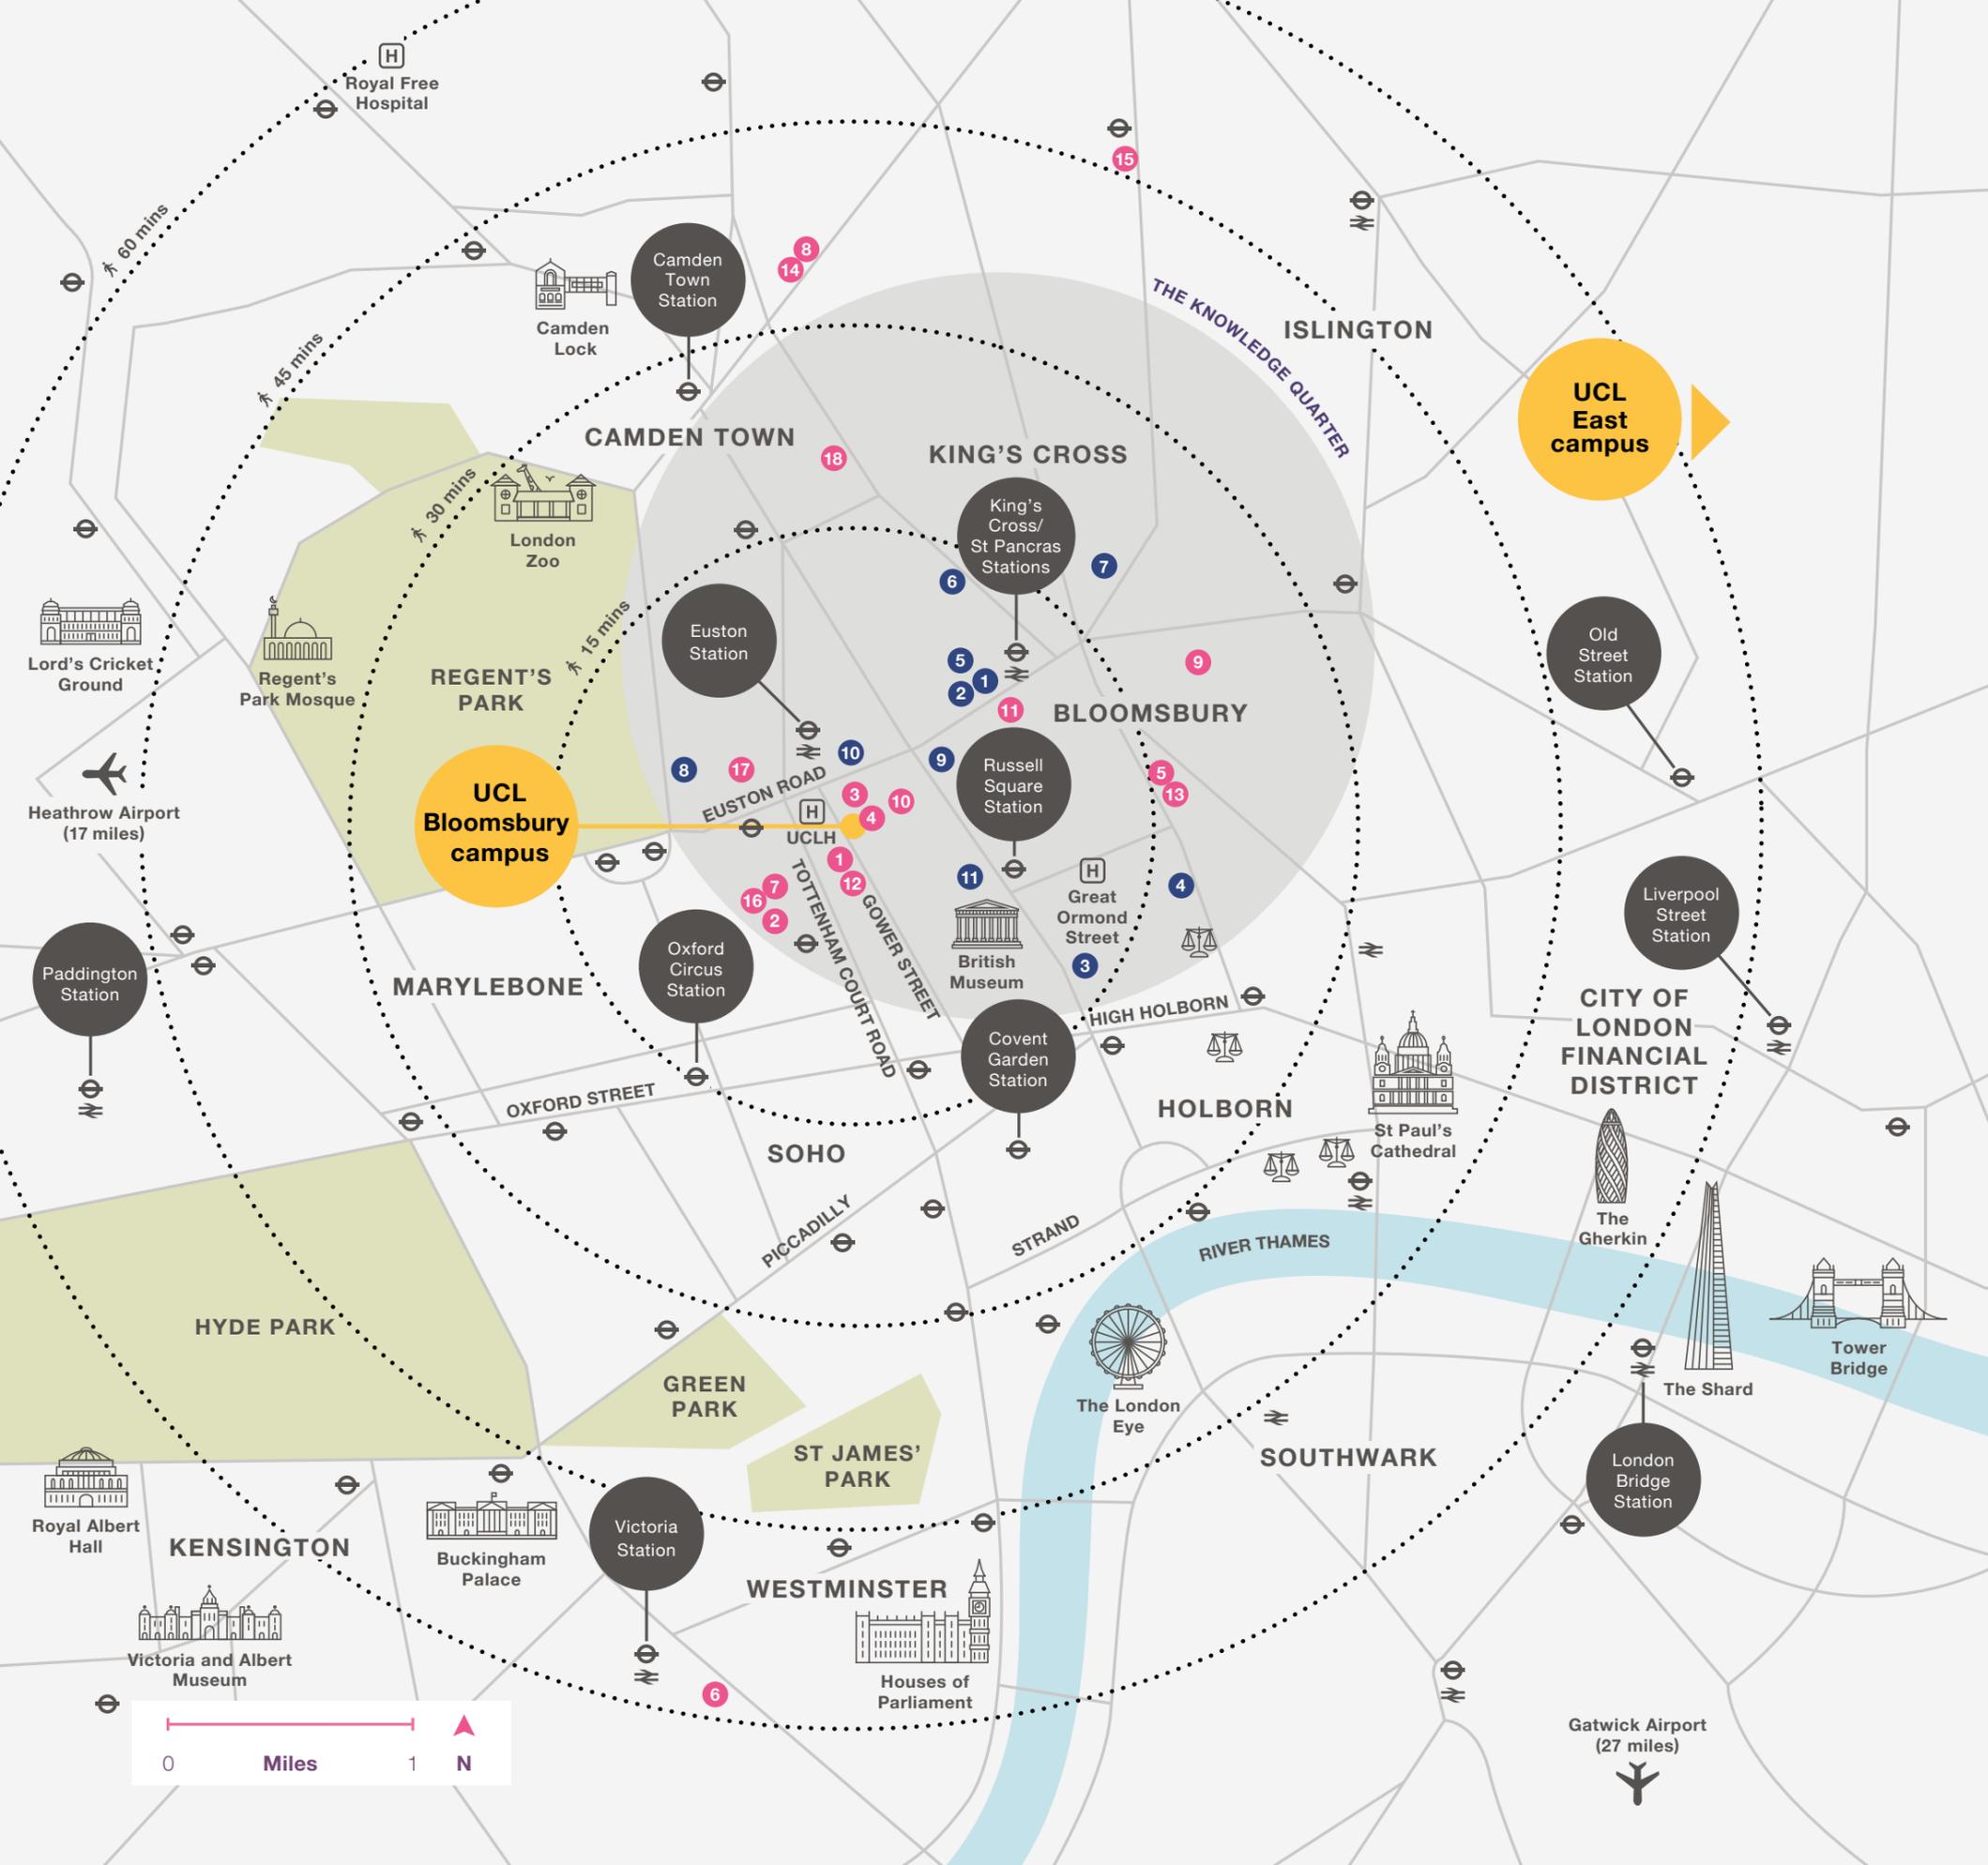

Our UCL East campus in Stratford is made for collaboration. Whatever you choose to study – our innovative programmes offer a wide choice of modules developed with experts from business and industry – you will have the chance to get involved in projects in the local community, making an impression beyond the laboratory or lecture theatre and giving you vital skills for the workplace.

Surrounded by diverse minds and different cultural perspectives, you'll make friends and create professional networks across a range of fields that will last throughout your lifetime and career.

A place to call home

Moving to a new city as a first-year undergraduate can be a major change, but you'll find a warm welcome at UCL.

Top: A shared kitchen at John Dodgson House

Left: Students enjoying a card game on moving in day

Right: Student Residence Advisers are available to help you throughout your time in UCL accommodation

Join our hugely diverse student community, and you'll make friends for life from all over the world at UCL. But first, you need a place to call home while you study. You will be prioritised for accommodation in your first year, as long as:

– you will be a single, first-year undergraduate, or are studying for a full academic year on Junior Year Abroad, Erasmus+ or Exchange programmes

– you apply for a single room (accommodation for couples and families is very limited)

– you have chosen UCL as your firm choice through UCAS by the deadline (currently 10 June of the cycle in which you applied)

– you submit your accommodation application online by the deadline (currently 10 June of the year of entry)

– you have not previously lived in London (inside the M25 motorway) while studying at a university or higher education institution. (This does not include attending school in London)

Demand for accommodation in London is high, so we recommend applying as soon as possible once applications open.

Types of accommodation available

– Catered accommodation in which meals are included (breakfast and an evening dinner from Monday to Friday and brunch on Saturday and Sunday). You also have access to a small kitchen to prepare meals outside these times

– Self-catered accommodation with shared kitchen facilities where you prepare your own meals. Flats are equipped with a cooker, refrigerator, freezer, kettle, toaster and microwave

All UCL accommodation (see maps on p28–29) is offered for 39 weeks and is located in central London (Zones 1 or 2 of London's public transport network).

The fees you pay vary depending on location and facilities. A guide to current fee ranges can be found on p92.

Students with additional requirements

UCL accommodation welcomes and supports applications from students with additional requirements. We will work with individuals to ensure they are allocated rooms that meet their needs.

This can include:

– Students with disabilities and health conditions

– Students that are care experienced or estranged. We will provide 365-day accommodation in the first year and, if needed, for subsequent years of study

Email accommodation@ucl.ac.uk for details.

Further details about accommodation can be found on p92.

Scan the NaviLens QR code, or search: 'UCL Students' Union' to find out more.

Through our Students' Union, you'll make lifelong memories and make the most of London.

A vibrant social life

As soon as you join UCL you become a member of the Students' Union and can start making the most of all the things it has to offer by joining any of the 430 student-led groups, including sports clubs, societies, liberation networks or volunteering projects. They're your social group on campus, your support network and route to experiences you won't find anywhere else.

With UCL's multi-million-pound investment in transforming student life, we're creating thousands more inclusive opportunities to play sport, explore the arts, volunteer and experience the amazing culture and diversity of our community.

TeamUCL is the collective name for all of our sports teams at UCL. They compete nationally against universities across the UK and there are lots of ways for you to get involved and play and train regularly. You can also stay active through the Union's social sport programme, disability sport programme, or no-experience-necessary Project Active programme.

Beyond clubs and societies, the Union can help you find volunteering opportunities in London, lead projects to make positive change and give you impartial advice and support when you need it most.
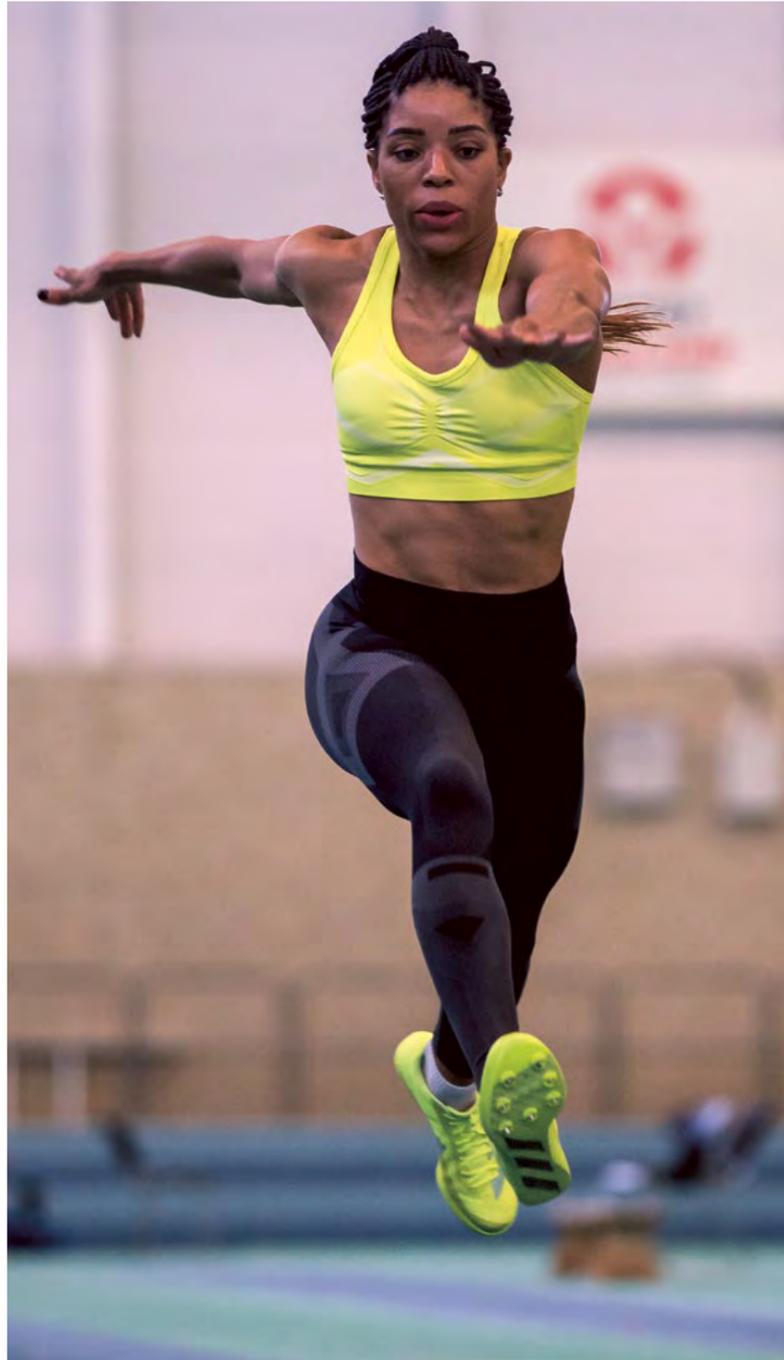

"The attitude at UCL is both fun and focused. You realise that the people you meet on your programme, in the Cloisters and halls will be future game-changers – as will you – and that is inspiring!"

Abigail Irozuru (Law LLB, 2012)
GB Olympic Long Jump Athlete
British Indoor Champion 2020

Our global community

As a UCL student, you become a lifelong member of a truly global community. Our extraordinary alumni, with their bold, brilliant and inquisitive minds, go on to discover and achieve remarkable things across the globe.

Over 350,000 UCL alumni live in more than 190 countries worldwide. We count Nobel Prize winners, poets, novelists, BAFTA winners, Olympians, inventors and Turner Prize-winning artists among our graduates.

From your first day at UCL, this network is there to support and inspire you. Experienced alumni volunteers provide guidance as mentors and share their insights through panel discussions, skills workshops and internship opportunities.

You will also have the chance to make valuable contacts to accelerate your career at alumni-led networking events and social gatherings, in the UK and overseas.

Wherever life takes you after graduation, UCL's global community will be there to support you. From social events and groups to professional development programmes, there's no shortage of ways to stay connected with people who will support you to reach your next goal.

We are here to support you through any challenges you face while studying here, beginning with a wealth of resources to help new students prepare and settle in – including useful newsletters, apps and guides.

Support when you need it

Our Transition Programme is designed to help you adapt to university life and includes access to a mentor and social sessions to help you find your feet. You'll also be assigned a Personal Tutor, who can give you academic guidance and steer you towards any help you might need on practical and personal matters.

New international students are invited to a series of online orientation events before they arrive in the UK, followed by in-person orientation events that run the week before term starts.

If you need more support, UCL Student Support and Wellbeing offers information, advice and services to help all our students thrive. This includes free, easy-to-access mental health and wellbeing advisers, counselling, disability assistance, events to help you look after yourself and much more. We also have a dedicated team of department-specific Student Advisers, who are on hand to support first-year undergraduates.

Scan the NaviLens QR code, or search: 'UCL wellbeing' to find out more.

Your future career

We take your future ambitions seriously and provide you with the support you need to realise your full potential. UCL graduates are in-demand and more than 700 employers attend our careers events every year.

At UCL our team of experienced careers professionals is dedicated to helping you find the right path to ensure success in your future career. We provide support to help you find graduate jobs or further study positions and advise you on the opportunities you have during your time at UCL.

From your first day at UCL and up to three years after you graduate, you can access:

Bespoke one-to-one advice

Whether you're starting out with general queries, exploring options, writing applications or want support with preparing for specific interviews, our range of different in-person and online appointments will provide tailored one-to-one support.

Our employer connections

We are connected to thousands of employers in the UK and around the world. Recruiters and employers engage with us throughout the year to participate in a range of career events and activities, as well as providing job opportunities for UCL students.

Confidence-boosting insights

There are regular opportunities, both on campus and online, to connect with employers and UCL alumni, where you can hear their perspectives on career paths and recruitment processes in a wide range of different sectors, as well as the skills and attributes you need to be successful.

Online resources

You'll find a wide range of curated resources related to your career planning, such as the Careers Discovery Feed, helping you to quickly identify key starting points for the areas you are researching.

### Opportunities to increase your employability

We know students gain a variety of skills through internships and work experience. The myUCLCareers jobs board is updated regularly with internships and graduate roles, as well as opportunities available in London, the rest of the UK and internationally. You can opt in to receive regular email updates about new jobs on the system that meet your preferences. We also offer resources and funding support for students who would like to undertake an internship in another country.

"I was given exactly the advice and support I was hoping to get… as well as lots of websites and resources to help me with internship applications, CV and cover letter writing. I walked out knowing exactly what my next steps were."

Chemistry BSc student, one-to-one appointment

Career destinations of UCL graduates 15 months after graduation*

This shows the first career destinations of UK/EU students 15 months after their graduation from UCL in 2022. The median starting salary of those graduates in full-time work is £34,500.

- High-skilled work (69%)
- Postgraduate study (12%)
- Other work (10%)
- Other^ (5%)
- Unemployed (5%)
- Other study (1%)

* All data taken from the Graduate Outcomes survey undertaken by the Higher Education Statistics Agency (HESA), looking at the destinations of UK and EU graduates in the 2021/22 cohort

^ 'Other' represents a grouping of activities in which personal circumstances or choice has influenced the graduate's immediate options, this includes those: travelling (e.g. taking a gap year); looking after the home or family/ temporarily sick or unable to work; not employed but not looking for employment, further study or training; permanently unable to work or retired

Faculty of Arts and Humanities

Our faculty spans traditional humanities and the creative arts: Arts and Sciences (Liberal Arts), English, European and International Social and Political Studies, Fine Art, Greek and Latin (Classics), Hebrew and Jewish Studies, Information Studies, Modern Languages and Philosophy.

– UCL's arts and humanities are ranked sixth in the world* and our ten departments offer more than 250 distinctive undergraduate degree programmes.

– Students have access to London's vast range of cultural organisations, including the British Library, British Museum, the National Gallery, the British Film Institute and the Tate galleries.

– The faculty's progressive approach to teaching and research is rooted in a vibrant, supportive and enabling community.

– We bring together over 30 languages to offer the widest range of language and language-related degrees in the UK.

* Times Higher Education World University Rankings by Subject 2024

Our world-leading faculties

UCL is split into several faculties. Whichever programme you choose, you'll be surrounded by fellow curious minds, learn from world-class academics and benefit from outstanding facilities. We provide a place to belong, be yourself and realise your potential.

Discover more about each faculty over the following pages.

You can find our programmes in:

The Bartlett Faculty of the Built Environment

Whether your ambition is to design better buildings, plan better cities, build sustainable communities, or help meet the challenge of climate change, the Bartlett could help you realise it.

- The Bartlett is the UK's largest multidisciplinary faculty of the built environment; it is ranked first in the world for architecture/built environment.*

- With a wealth of diverse resources, communities and history on our doorstep, our London setting puts us in a position to understand and directly impact the built environment field. We work with local communities and global organisations to find bold new solutions for pressing challenges facing London and cities around the world.

- The Bartlett Promise Scholarship helps to tackle the lack of diversity within the built environment by providing full funding and additional support for students from underrepresented groups.

* QS World University Rankings by Subject 2024

You can find our programmes in:

- Architecture, Construction and Planning p56

Faculty of Brain Sciences

A global leader in research and education in the mind, brain, vision and hearing. We use our expertise to solve some of the world's greatest health challenges, transforming society by reducing the burden of disease.

- UCL's Faculty of Brain Sciences is the best in the UK for neuroscience, psychiatry and psychology, with more than two thirds of our research in these areas rated as world-leading (4*).*

- We are home to some of the world's most influential and creative researchers in the field of brain sciences: 17 of our faculty's professors are named among the most influential in the world.^

- UCL is fifth in Europe for linguistics and fifth in the world for psychology.**

* Research Excellence Framework (2021)

- Psychology and Language Sciences p85

IOE, Faculty of Education and Society

The IOE has been ranked first in the world for education since 2014.* We offer a lens to examine society and understand more about the world, promoting equity and inclusion.

– Our research improves lives, from our study of early years education that has shaped policy around the world, to our collaborations with autistic people to translate research into action and our work with the United Nations to help address gender-based violence.

– Students are our most important collaborators. New ideas and new research are given meaning through your real-life experiences. Our graduates go on to influence future generations for the better, from individual lives to societal change.

– Whether in education or research, our work helps us to understand how and why people are different, what challenges this presents and what we can do to create a fairer, more just and more equitable society.

* QS World University Rankings by Subject 2014–2024

You can find our programmes in:
– Communications and Media p63
– Economics, Geography, Politics and Social Sciences p65
– Education p67
– Psychology and Language Sciences p85

Faculty of Engineering Sciences

Since its founding over 150 years ago, UCL Engineering has remained at the forefront of engineering innovation. We are uniquely interdisciplinary – home to courses across all of engineering, and beyond, including management, crime science and more.

– We do work that changes the world. Many essential technologies originated from studies and research projects at UCL, including the rapid production of vaccines, fibre-optic communications and the Internet infrastructure.

– We work closely with industrial partners, including Arup, Cisco, GSK, Google, Microsoft and Rolls Royce. This industry engagement provides our students with vital business skills, authentic experiences, and a network through which to kickstart their careers.

– We believe that good engineering happens when people with complementary skills work together. We've pioneered transformative approaches to education, such as the Integrated Engineering Programme (IEP) and the How to Change the World exercise, which encourages our students to think beyond disciplinary boundaries to solve global challenges collaboratively and creatively.
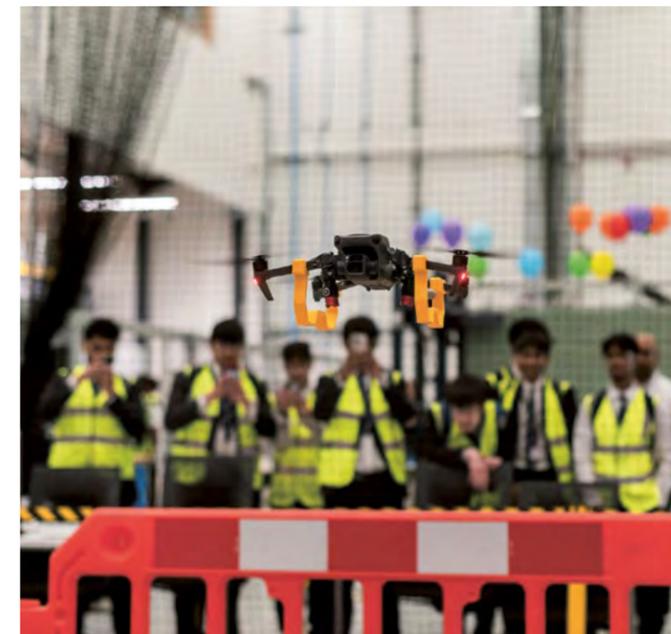

You can find our programmes in:
– Business and Management Studies p62
– Computer Science p64
– Economics, Geography, Politics and Social Sciences p65
– Engineering p68
– Physical Sciences p83

Faculty of Laws

UCL Laws is an inclusive law school for the world: a diverse and progressive community of academics, researchers, students and alumni embedded in a leading research-oriented university in the heart of legal London.

- UCL Laws is consistently listed as one of the top law schools in the world, including first in the UK.*
- We have a strong commitment to small-group teaching and student support, with excellent graduate outcomes from one of the most highly respected and recognised qualifying law degrees in the common law world.
- Our students make a valuable contribution to society by undertaking a wide range of pro bono voluntary opportunities, for example, through the award-winning Centre for Access to Justice, which offers free legal services to those otherwise unable to afford them.

* The Guardian University Guide 2025 Subject League Table

You can find our programmes in:
- Law p78

Faculty of Life Sciences

UCL Life Sciences offers an outstanding portfolio of programmes in biological and biomedical sciences, neuroscience, pharmacy, pharmacological and pharmaceutical sciences – studied in state-of-the-art facilities with world-renowned researchers and clinicians.

- Our world-class research institutes include the Centre for Biodiversity and Environment Research, the Institute for Healthy Ageing and the Sainsbury Wellcome Centre for Neural Circuits and Behaviour.
- UCL Life Sciences staff and students are actively engaged in research and innovation in global biodiversity, health, disease and pharmaceutics. Recent student entrepreneurs were awarded the Hult Prize, worth $1 million, for developing a sustainable and cost-saving approach to rice production.
- Associated with nine Nobel Prize winners over the years, today UCL Life Sciences continues to change the way we understand the world from the challenges of environmental change to the 3D printing of pharmaceuticals.

You can find our programmes in:
- Biological and Life Sciences p60
- Medicine, Health and Allied Subjects p81

Faculty of Mathematical and Physical Sciences

The faculty encompasses the logical, experimental and mathematical study of our universe. Frontline research feeds directly into our teaching programmes, and our students benefit from access to outstanding facilities.

- Many of our departments rank in the top 10 for the Mathematical and Physical Sciences in the UK.*
- Our students and academics have been part of exciting discoveries, including new supernovas, water on habitable planets and the first images of a black hole.
- We are proud to count Dame Kathleen Lonsdale, UCL scientist, Quaker and pacifist, as one of our inspiring alumni. She conducted groundbreaking research in crystallography and in 1945 was one of the first women ever to be elected a Fellow of the Royal Society.

* QS World University Rankings by Subject 2024

You can find our programmes in:

- Economics, Geography, Politics and Social Sciences p65
- Historical and Philosophical Studies p72

- Physical Sciences (Chemistry, Earth Sciences, Natural Sciences, Physics and Astronomy) p83

Faculty of Medical Sciences

We are at the forefront of fighting the world's biggest health problems, from COVID-19 to cancer. Study one of our exciting programmes to launch your career in fields including medicine, medical diagnostics, pharmaceuticals, and public health.

- UCL is ranked number one in London and sixth in the world for medicine.*
- Our MBBS is internationally renowned and our innovative BSc programmes are tailored to the needs of our changing world.
- Most of the BSc programmes in Medical Sciences have a shared first year. This gives you core knowledge and techniques, but also the flexibility to switch degrees if your interests change.
- Our groundbreaking research, leading academics and clinicians, cutting-edge facilities and outstanding partner hospitals and institutions create an unrivalled environment for medical sciences teaching and learning.

* QS World University Rankings by Subject 2024

You can find our programmes in:

- Biological and Life Sciences p60
- Medicine, Health and Allied Subjects p81

Faculty of Population Health Sciences

We offer a learning environment that is rooted in cutting-edge research and academic excellence. Our staff are at the forefront of advancing knowledge in infectious diseases, heart disease and cancer. They are also contributing to innovations within healthcare management and addressing the health impacts of climate change.

– Our Population Health Sciences degrees will teach you to understand and address the pressing health issues of our time, harnessing the power of data to drive impactful change.
– The new Business and Health degrees integrate core business and health skills. They provide an interdisciplinary education with real-world applications and the flexibility to specialise in healthcare management or health science.
– UCL is ranked third in the world for public health* and we are the top-rated university in the Russell Group for research in medicine, health and life sciences.^
– Our academics collaborate with world-renowned institutions including the World Health Organization, the NHS, Great Ormond Street Hospital and the Wellcome Trust, ensuring that the most up-to-date findings are being used to improve health systems and health outcomes around the world, as well as being taught in our classrooms.

* ShanghaiRanking Global Ranking of Academic Subjects 2024

^ Research Excellence Framework 2021

You can find our programmes in:
– Medicine, Health and Allied Subjects p81

Faculty of Social and Historical Sciences

Our departments and institutes – Anthropology, Archaeology, the Americas, Economics, Geography, History, History of Art and Political Science – explore the social, political, economic, cultural and environmental processes that shape our world.

– We are intellectually diverse and world-leading, with our social sciences subjects ranked 14th in the world and our arts and humanities disciplines ranked 6th.*
– Our academics develop cutting-edge, cross-disciplinary research and education that has positive, real-world impact. We'll challenge you to think in new ways, engage critically with global issues and look for creative solutions.
– Our students have unrivalled access to world-leading resources nearby, including the British Library, British Museum, the Wellcome Collection and the Warburg Institute, as well as on-site collections and remarkable facilities on campus.
– We're proud that 91% of our graduates achieve a positive destination following their studies. Many go into graduate-level work or higher study in a variety of sectors, including financial services, consultancy, the creative arts and law.^

Architecture, Construction and Planning

We're the Bartlett, UCL's Faculty of the Built Environment. We work with students from around the world to imagine, plan, design and create a better built environment.

Studying with us at the Bartlett is about the bigger picture. It's about excelling at an individual discipline within the context of many others and discovering specialisms, themes and passions that take you where you want to be. Whether your ambition is to design better buildings, plan better cities, build sustainable communities or help meet the challenge of climate change, our programmes could be a big step towards it.

❯ **First career destinations:**

Arts and Sciences

UCL's liberal Arts and Sciences (BASc) degrees provide enormous flexibility, allowing you to create a bespoke programme incorporating arts, social sciences and science subjects.

You'll choose a major and a minor route, one from Cultures/Societies and one from Health and Environment/Sciences and Engineering. You'll also study a language, plus 'core courses' specially designed to help you make links between different subject areas and provide you with the tools necessary for interdisciplinary study. An optional internship at the end of the second year will help to prepare you for the world of work. Innovative methods of teaching and assessment include vlogs, blogs and presentations.

❯ **First career destinations:**
- Business associate professionals
- Business and related research professionals
- Chartered and certified accountants
- Management consultants and business analysts
- Finance and investment analysts and advisors

Routes with broad areas of study:

Students can select one major route from the list below. If you choose an Arts major route you will then choose a Science minor route, and vice versa if you choose a Science major route.

Communications and Media

Our degrees set the benchmark for ambitious future communications and media professionals, combining the highest standards of academic and critical rigour with practice, state-of-the-art professional skills and an insight into a range of different communications and media.

Through our Media BA, you will reach an advanced level in film-making or in digital game and interactive media, or both: two of the most important media forms for the UK economy. You will develop your own projects using brand-new, cutting-edge media studios based at UCL East in Stratford, and will exhibit your work in the end-of degree show.

On our Communications BA, you will explore the significant developments in visual, multimodal and multisensory communication, including digital media and technology, intercultural, online and inclusive communication.

❯ **First career destinations:**
The first cohort of students admitted to the Media BA graduated in 2024. The first cohort of students admitted to the Communications BA are not due to graduate until 2028. Therefore, no first career destinations for students on these programmes are currently available.

Education

These degrees prepare students to take a lead role in understanding and transforming society through the multifaceted lens of education.

Education is at the heart of global efforts to create more fair and equal societies. These interdisciplinary degrees draw on sociology, philosophy, psychology, history, youth studies and sustainability, to provide our students with the critical tools necessary to reflect on education as a dynamic force at the centre of social, cultural and political change.

❯ **First career destinations:**

Engineering

Sir Charles Kao (Electronic and Electrical Engineering) won the Nobel Prize in 2009 for his work on low loss optical fibres and their application to global communication systems.

Engineers use insights and discoveries from across the academic spectrum to develop products and processes that truly change the world.

From vaccine manufacturing to designing ships and the distribution of sustainable energy, engineers solve problems for the good of humanity. Throughout your degree, you'll learn the fundamentals of engineering with a focus on cross-team working, real-world scenarios and developing professional skills. Whichever discipline you choose to specialise in, you'll be ready to make an impact in the world from the moment that you graduate.

English and Comparative Literature

With one of the most enduring and respected English departments in the country and an exceptional range of modern and ancient languages and interdisciplinary humanities on offer, UCL provides a stimulating environment for the study of literature and the creative arts.

Our degrees require you to undertake careful critical and creative reading, reflection and writing. We aim to develop your analytical and interpretative skills, allowing you to develop a sensitivity to subtext and context. Our new Creative Arts and Humanities BA – the first of its kind in the UK – is unique in bringing together creative writing, moving image and performance.

❯ **First career destinations:**

Fine Art and Art History

Whether you're a practitioner or a theorist, a creator or a critic, UCL offers outstanding staff, facilities and expertise across a variety of degree programmes in the prestigious Slade School of Fine Art and Department of History of Art.

A world-leading centre of scholarship in the history, practice and theory of art, our central location in London gives you easy access to national collections such as the Tate and National Gallery and a wealth of specialist and independent galleries and collections, not to mention UCL's own museums and collections, to inform and enrich your learning. The Slade's new Art and Technology BA, based at UCL East in Stratford, is focused on the interconnections between art and practice.

Historical and Philosophical Studies

This wide-ranging subject area covers everything from the history of the world, the ideas of philosophers – ancient and modern – and practical and analytical techniques for discovering how our ancestors lived.

Students on these degrees develop strong research and analytical skills and a sensitivity to different cultures and ideas. They learn to communicate effectively verbally, visually and in writing to diverse audiences. Studying these subjects could lead to careers in government and the civil service, international agencies and non-governmental organisations (NGOs), consultancy (economic, political risk and security, including within the AI sector and marketing) financial services, law, media, teaching, heritage and museums, as well as academia.

❯ **First career destinations:**

Languages and Cultural Studies

UCL offers a remarkable range of languages and associated cultural studies, including art, film, history, literature and linguistics, philology, philosophy and politics.
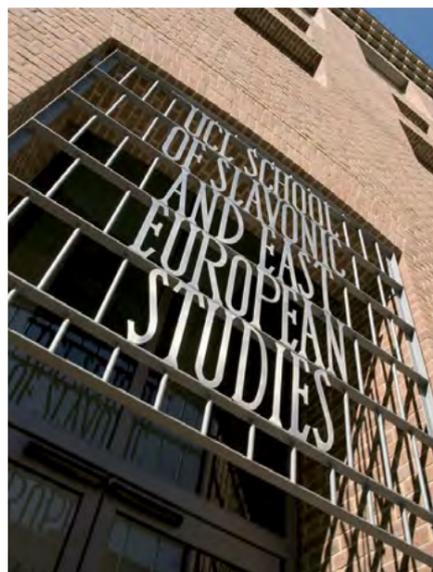

A degree in this area equips students with skills much sought after by employers, such as the ability to speak, understand and write in a foreign language; intercultural understanding; translation and communication skills; and critical and analytical rigour. You may choose languages that you have studied before or start others from scratch, depending on the programme. The year abroad, integral to most degrees, allows you to immerse yourself in another culture at one of our prestigious overseas partner institutions.

First career destinations:
– Authors, writers and translators
– Human resources and industrial relations officers
– Newspaper, periodical and podcast editors
– Protective service associate professionals
– Teachers of English as a Foreign Language

Related programmes can be found in:
– Arts and Sciences p58
– Economics, Geography, Politics and Social Sciences p65
– English and Comparative Literature p70
– Fine Art and Art History p71
– Historical and Philosophical Studies p72

Modern language combinations

This grid shows the range of languages that can be combined (subject to entry requirements and availability) to create a four-year degree programme. The final degree awarded on completion will reflect whatever combination you choose, for example, Bulgarian and French BA, Italian and Spanish BA.

You can combine the study of two languages on an equal basis; either two languages that you have already studied, or one language at beginner's level alongside one you already know.

French and Spanish are not available at beginner's level within these combinations. If you wish to study French or Spanish from beginner's level, you can apply for the Language and Culture BA (see below), where they are available as minor languages.

For most combinations, it is also possible to study two languages from beginner's level if you have an A level (or equivalent) in any modern foreign language.

If you wish to combine two Scandinavian languages, please see the Scandinavian Studies BA (see **p76**) or Icelandic BA (see **p76**).

For guidance on how to apply, as well as the UCAS code for each language combination, please see: ucl.ac.uk/prospectus.

Law

UCL Laws is consistently ranked as one of the UK's top law schools, recognised for the quality of its teaching by both students and the legal profession.

Through lectures, seminars and small group tutorial teaching, you can explore the principles of law and understand its role in governing the relations between the individual, the state, and society. You will be encouraged to develop a critical understanding of how the law works and how it can be changed. Students benefit from specialist career support and can choose to participate in an array of activities, including mooting, pro-bono opportunities and an exciting and varied events programme, organised in conjunction with the Student Law Society.

❯ **First career destinations:**
– Legal professionals
– Legal secretaries
– Management consultants and business analysts
– Solicitors and lawyers

Mathematics and Statistics

So many activities and industries – engineering and science, business and finance, data science and computing – depend, in large part, on mathematical and statistical insights.

Our programmes will encourage you to develop your imagination and critical thinking abilities. They will enhance your ability to think strategically and argue clearly. You will gain advanced quantitative and computing skills, as well as honing your logical, analytical and problem-solving abilities, giving you a wealth of options for your future career. Our graduates go into a diverse array of careers and a large proportion go on to further study in both theoretical and applied fields.

Did you know?

The mathematical physicist Sir Roger Penrose, who was awarded the Nobel Prize for Physics in 2020, graduated from UCL with a first-class degree in Mathematics.

Medicine, Health and Allied Subjects

Understanding human health, the causes of and contributors to disease and the treatment of disease, is fundamental to our society. It necessitates study across human biology, medicine and the social sciences, requires creativity and is intellectually demanding.

Physical Sciences

This area covers the natural sciences linked to the study of non-living systems, forces and properties of the cosmos – from molecules to galaxy clusters, from the Earth's core to the edge of the observable universe.
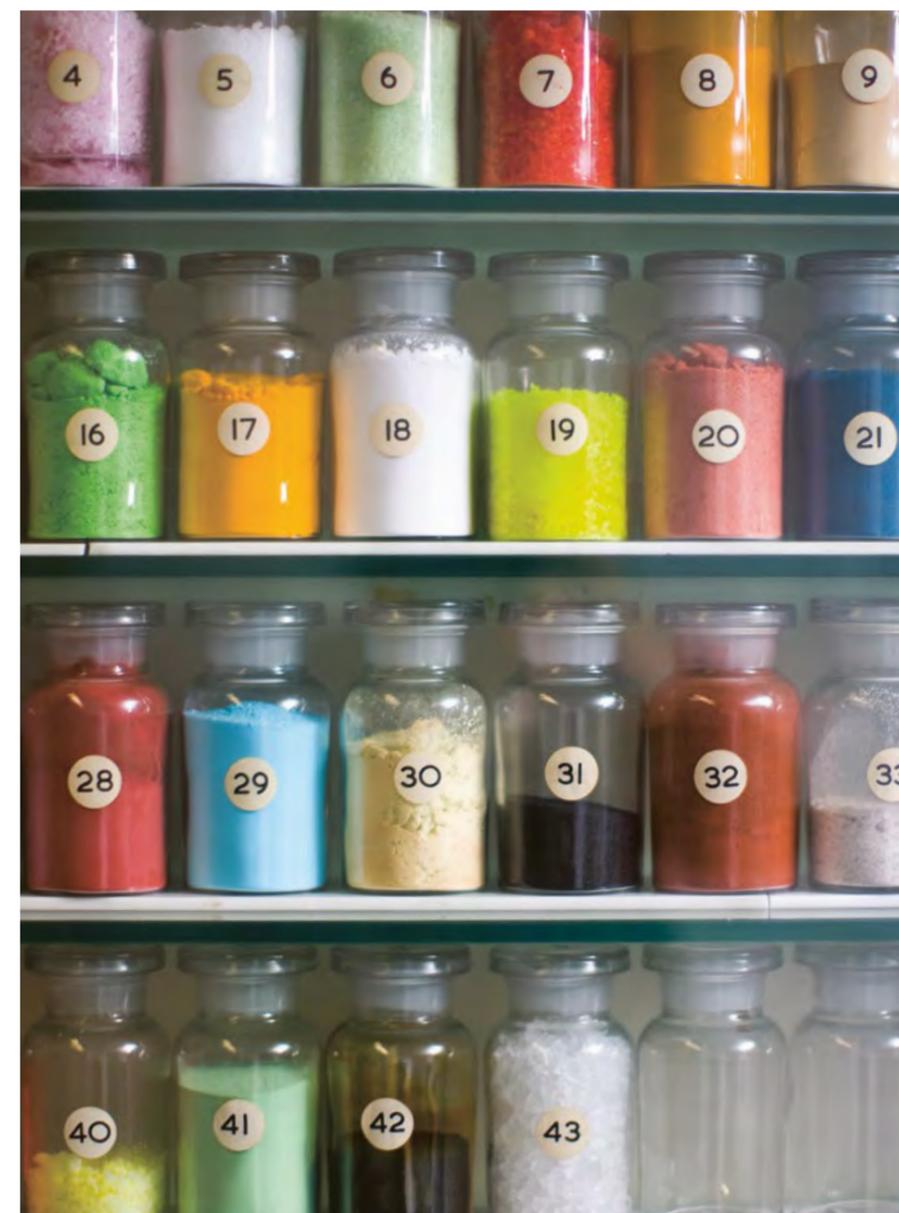

Study in these areas is renowned for developing highly sought-after analytical skills, the ability to undertake field and laboratory research and an understanding of mathematics and the principles and techniques of your chosen subject. A scientific training also equips you with practical transferable skills in rational argument and problem-solving, perfect for careers in areas such as research, design, development, computing, finance, planning and teaching.

❯ **First career destinations:**
– Actuaries, economists and statisticians
– Chartered and certified accountants
– Finance and investment analysts and advisers
– IT business analysts, architects and systems designers
– Management consultants and business analysts
– Programmers and software development professionals

Psychology and Language Sciences

UCL is a world leader in research and teaching of mind, behaviour and language.

Our researchers cover a range of disciplines such as cognition, neuroscience, linguistics, education, communication, neurological disorders, mental health, phonetics and development across the human lifespan. You will have the chance to acquire quantitative and qualitative skills by critically evaluating research data and conducting your own research studies. In addition to subject-specific skills you will also develop a range of highly transferable skills including problem-solving, communication, data analysis, writing for different audiences and critical thinking, which are essential for a range of graduate careers, which could include law, computing, healthcare, marketing, commerce and industry.

❯ **First career destinations:**
– Advertising and marketing associate professionals
– Human resources and industrial relations officers
– Management consultants and business analysts
– Psychologists

👁 **Related programmes can be found in:**
– Biological and Life Sciences p60
– Economics, Geography, Politics and Social Sciences p65
– Education p67
– Medicine, Health and Allied Subjects p81
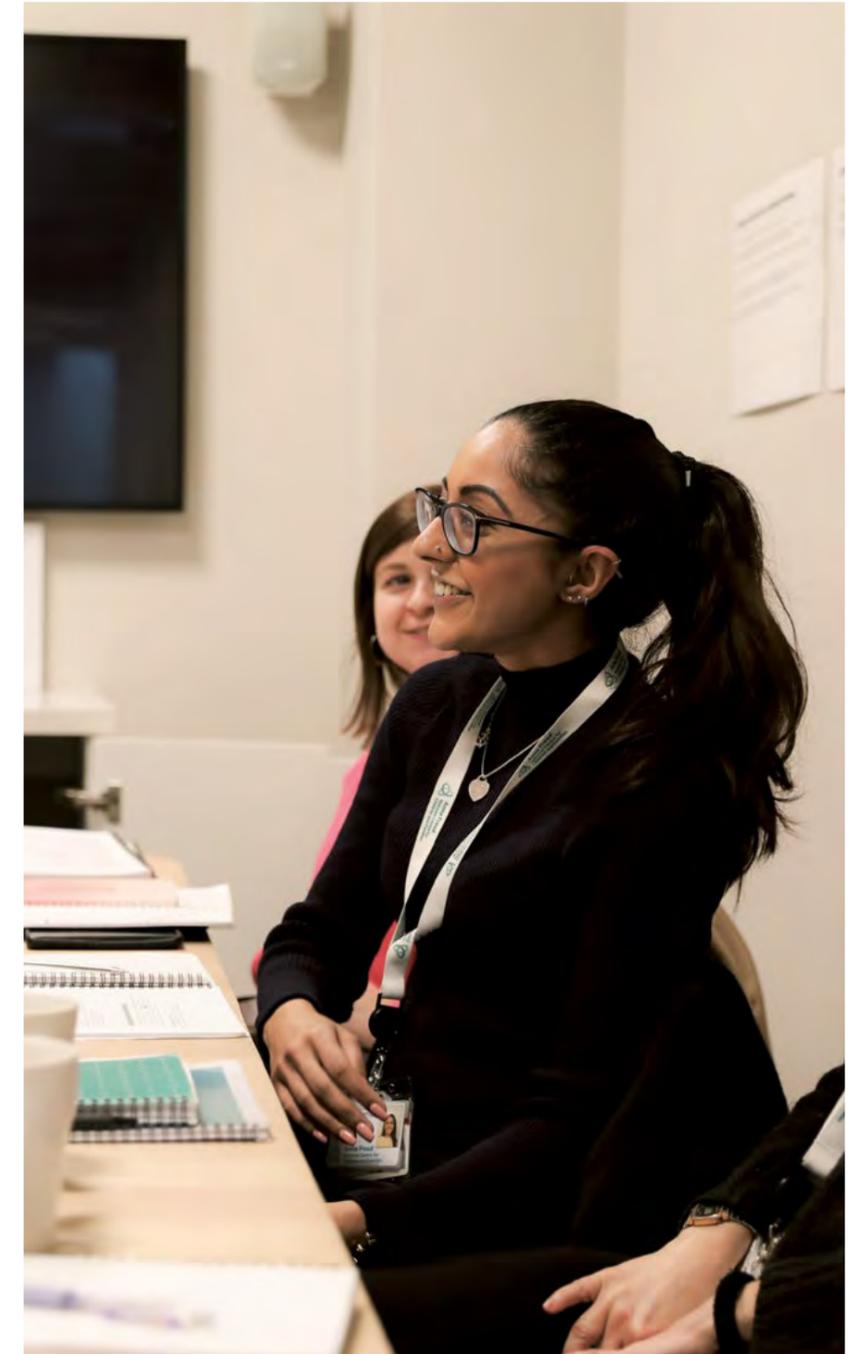

Programme symbols

Throughout the programme pages we've used the following symbols:

❯ **First career destinations**

This shows a selection of first career destinations for programmes in the section (excluding programmes from which the first cohort of students has not yet graduated), taken from the Graduate Outcomes survey carried out by the Higher Education Statistics Agency (HESA) for 2021/22. The survey looks at what UK/EU graduates have gone on to do approximately 15 months after graduating from UCL.

👁 **Related programmes**

Many of our degrees are interdisciplinary, working across two or more subject areas – so it's possible that you'll find programmes of interest in more than one section. We have indicated where there are overlaps so you can see the full choice of programmes available to you.

✈ **Study abroad**

Programmes with study abroad as an integral part of the curriculum – for example, programmes in the Languages section – are marked with this symbol. Please note that you may also choose to study abroad as an option within many other programmes too.

🧰 **Placement or internship opportunity**

This symbol indicates programmes where a placement or internship opportunity is an integral part of the curriculum – for example, the Pharmacy MPharm. Please note that many other programmes also offer optional placements or internships.

🏅 **Accreditation**

Many degrees are accredited by professional bodies, meaning that when you graduate you will either be eligible for membership, or will have fulfilled the academic requirements for membership, of the accrediting body. Our Law programmes are compliant with the QAA Subject Benchmark Statement for Law and contain the Foundations of Legal Knowledge. Completion of the Medicine MBBS BSc enables provisional General Medical Council (GMC) registration.

Choosing your university is a big decision

We know that the process can be daunting, so we've tried to make the information on the following pages as straightforward as possible. We've also provided details of where you can find more help and advice.

Entry requirements

We're seeking the brightest minds to join the UCL community and you must satisfy our specific entry requirements to study here.

For A levels, UCL typically makes offers in the range of A*A*A-ABB. For all programmes, you must have at least two A levels from our list of preferred subjects.

Please note that we do not consider General Studies, Critical Thinking or Global Perspectives and Research to meet the entry requirements for any of our programmes.

As well as A levels, we accept a wide range of other UK and overseas qualifications, for which requirements will be listed under each individual programme in the online prospectus.

Please note that for some programmes there may be additional admissions tests that will need to be taken. These will be indicated on the programme page in the online prospectus.

If you are not a national of a majority English speaking country (as defined by the UK Visas and Immigration, Home Office) you must provide recent evidence of your English proficiency. The English language requirements for each programme are shown on the relevant page in the online prospectus.

For more information about entry requirements (including GCSE requirements which vary across undergraduate programmes), accepted qualifications and English language requirements, see the NaviLens QR code above.

Access UCL – contextual offer

As part of our commitment to increasing participation from UK-based people in underrepresented groups, some students may be eligible for a contextual offer as part of the Access UCL scheme. The contextual offer will be a lower offer than the standard UCL offer and is listed under each programme on the online prospectus page. For more information on eligibility criteria for the Access UCL scheme, visit: **ucl.ac.uk/prospective-students/ undergraduate/access-ucl-scheme**

Engineering Foundation Year

The Engineering Foundation Year at UCL is for UK-based people who aspire to become an engineer but do not meet the standard entry requirements for UCL's undergraduate engineering degrees.

To be eligible to apply, you must be attending or have attended a UK state school for your Level 3 qualifications (unless you have refugee status) and live in an area that has a high level of financial, social or economic deprivation, or low progression to higher education. For more information on eligibility criteria for the Engineering Foundation Year programme, visit: **ucl.ac.uk/prospective-students/ undergraduate/degrees/engineering- foundation-year**

How to apply

If you're inspired by what we offer and meet our entry requirements, we look forward to reading your application. Here's what you need to do.

1. Find your degree programme

It's important to research the degree programmes and universities that interest you before you make your choices. You can find out detailed information about each of our programmes by visiting **ucl.ac.uk/ prospectus**. You could also attend one of our Open Days, see **ucl.ac.uk/open-days**

2. Apply online

Applications open 1 September 2025

Undergraduate applications to UCL are made through UCAS. Our UCAS code is **UCL U80**; there is no campus code. Advice on completing your application, including fees, is on the UCAS website: **ucas.com**

For more information about the application process, including deadlines, please see the NaviLens QR code above.

3. Considering your application

For more information on how we assess applications and when we will respond, please see the NaviLens QR code above.

The selection criteria may vary across programmes at UCL. Each programme page on the online prospectus will have specific selection criteria including information about interviews, selection events or open days (if relevant).

Admission to UCL

We strive to admit the academically brightest students to UCL, regardless of background – those who are enthusiastic and passionate about learning, and who will make a positive contribution to university life and gain the most from their years of study here. In fact, UCL was founded to open up education in England for the first time to those who had been excluded from it. That commitment remains as strong today as it was back in 1826.

Our Equality, Diversity and Inclusion Policy and Strategy underlies every aspect of our student selection process. We want to admit excellent students who are likely to complete their degree programme successfully and derive benefit from it, regardless of age, disability, ethnic origin, gender identity, marital status, sex, sexual orientation, number of dependants and religious or political beliefs. We positively encourage and welcome applications from members of underrepresented groups at UCL.

UCL's Access and Participation Plan (**ucl.ac.uk/access**) outlines our commitment to widening participation at UCL, including the Access UCL scheme (see p88).

Visa requirements

If you think you may require a visa to study in the UK, you should visit: **ucl.ac.uk/students/ immigration-and-visas** This provides more information about the types of visa, application processes and our requirements.

Fees

Our fees can vary depending on the modules you choose and your country of origin. Please take the time to familiarise yourself with the information below.

Tuition fees

UCL's annual tuition fee covers all elements of your tuition, registration and examination (field courses are not included). However, optional modules taken elsewhere in the University of London may attract an additional fee. Fees for accommodation are charged separately. UCL offers several 'Dual Degree' programmes where students spend half of their degree studying at UCL and the other half at a university overseas (these are distinct from Year Abroad or International programmes). In these cases, fees are payable to UCL for the time spent studying at UCL, and to the other host university for the time spent there. More details of these can be found at: **ucl.ac.uk/prospectus**

Please note that the information on this page applies to the 2025/26 academic year. Fees for 2026 entry will be published on the UCL Students website (**ucl.ac.uk/students/fees-and-funding**) as soon as they are available.

How tuition fees are classified

The level of fee will depend upon whether you're classed as a UK, Overseas or Islands student. You may already know into which category you fall but this will be confirmed if you are offered a place at UCL.

Tuition fees for UK students

UK undergraduate fees are currently (January 2025) set at £9,535 for UK students for the first year of study. Fees for UK undergraduates may be subject to increase for the year commencing 2026 and for each year of study thereafter.

UCL reserves the right to increase its fees in line with government policy (including on an annual basis during the programme). You are not required to pay upfront fees. You can apply to the Student Loans Company for a Tuition Fee Loan and your fees will be paid directly to UCL on your behalf. Loan repayments are only made once you have left university and are earning over £25,000 per year. Please see **gov.uk/student-finance** for further information.

Tuition fees for overseas students

For 2025 entry, UCL's tuition fees for overseas students range between £27,500 and £53,400 per year. The vast majority of our undergraduate programmes charge a fixed fee every year for overseas students (Medicine MBBS is an exception) and these won't change during your time with us, so you know upfront exactly how much you'll need to pay.

Sources of funding

University is an investment in your future. Depending on your circumstances, there are many sources of financial support to make higher education more accessible.

Sources of funding for UK students

- **Maintenance Loan from the Student Loans Company** – see **gov.uk/student-finance**

  For students from Scotland, Wales or Northern Ireland, there is a different process and funding package available: **Scotland** – see **saas.gov.uk Wales** – see **studentfinancewales.co.uk Northern Ireland** – see **studentfinanceni.co.uk**

  If you live in the Channel Islands or Isle of Man please contact your education authority for funding information.

- **UCL Undergraduate Bursary** – this is a means-tested bursary of up to £3,000 per year – see **ucl.ac.uk/scholarships**

- **UCL Scholarships** – we have a range of schemes available each year based on financial need and/or academic merit – see **ucl.ac.uk/scholarships**

- **Care Leaver and Estranged Student Bursary**, aimed at students who are care experienced or estranged from parent(s) – see **ucl.ac.uk/care-leaver-bursary**

- **Disabled Students' Allowance** – see **gov.uk/disabled-students-allowances-dsas**

- **Students with dependants** – see **gov.uk/student-finance/extra-help**

- **Employment** – there are plenty of opportunities to find varied and reasonably paid part-time work in London. UCL Careers and the Students' Union list opportunities on their websites.

Note for EU students: UK withdrawal from the European Union (EU)

The UK has now formally left the EU. Students covered by the EU Withdrawal Agreement may be able to access Tuition Fee Loans and Maintenance loans, depending on their status under the EU Settlement Scheme and their residency. See **ucl.ac.uk/scholarships** for more details.

Sources of funding for overseas students

- **UCL Scholarships** – we have a range of schemes available – see **ucl.ac.uk/scholarships**

- **External funding** – external (non-UCL) organisations also offer funding support – see **ucl.ac.uk/scholarships/external-funding** for examples.

- **Tuition Fee Loan and help with living costs for EU students** – you may be able to get a Tuition Fee Loan and help with living costs if you're from an EU country, Iceland, Liechtenstein, Norway or Switzerland – see **gov.uk/student-finance/eu-students** for more details.

- **Employment** – international students who require a visa or prior entry clearance are normally permitted to work for up to 20 hours per week during term time and full-time in the vacations. This restriction applies to voluntary as well as to paid employment – see **ukcisa.org.uk** for more information.

If you have financial problems during your degree

The UCL Financial Assistance Fund may be able to help if you experience unexpected financial hardship during your degree; there is also a short-term loan scheme for students whose funding has been delayed. Eligibility requirements apply – see **ucl.ac.uk/students/funding/financial-support** for more details.

For further information

A good starting point for further information about student finance is **gov.uk/student-finance** if you're a UK student, or your local Ministry of Education if you're an overseas student.

You can find out more about UCL fees and funding – see **ucl.ac.uk/students/fees-and-funding**

Your living expenses

Living costs may vary greatly from student to student, depending on individual needs and lifestyle. To guide you, UCL has estimations of how much students might spend on living costs – see **ucl.ac.uk/scholarships/how-much-does-it-cost-study-ucl**

Additional costs on some degree programmes

Students on certain degree programmes will incur costs in addition to their tuition fees; for example, for materials or books, or costs related to carrying out fieldwork. For details about possible programme-specific additional costs and other expenses, such as travel between campuses, please see the relevant programme page in the online prospectus.

Accommodation

Food and accommodation are one of the biggest costs of studying at university, so you need to choose your options carefully to suit your needs and budget.

All the information you need about the application process and details of all our accommodation can be found online (see the NaviLens QR code, above). The majority of the accommodation available is managed by UCL. Some accommodation is managed by partners such as the University of London or private operators.

What you get and what it might cost

For the 2024/25 academic session, location zones and pricing bands were introduced for UCL accommodation. This pricing system is designed to help you to budget easily and to understand the quality of the accommodation and the distance from Bloomsbury campus when applying through the UCL Accommodation Portal.

The fees you pay vary depending on location and facilities. All of our accommodation fees include room rental and the following:

– Use of communal areas
– Maintenance within your hall
– Cleaning of shared bathrooms, kitchens and communal areas
– Utility charges, including Wi-Fi
– Basic contents insurance
– 24/7 support.

Additionally, when you move into UCL accommodation, you will become a part of a vibrant UCL community led by residents. Residents in halls can meet other students through Flourish, our residential life programme, which offers activities such as theatre outings, day trips, inter-hall sports tournaments and more.

Each of our sites has experienced and knowledgeable managers, hall teams

and Student Residence Advisers (SRAs) available to help you throughout your time in UCL accommodation. They run activities such as quizzes, movie nights and karaoke, as well as offering peer-to-peer wellbeing support and signposting, ensuring you have an exceptional student experience. All of our accommodation has secure access, as your security and wellbeing is our main priority.

The most up to date information about the pricing of our accommodation and the rooms available can be found online (see NaviLens QR code, above). We aim to keep our costs as low as possible within the constraints of rising utility bills and the general cost of living.

Zone locations and pricing bands for the 2024/25 session are detailed below:

Zones are based on the location of the hall

Zone A - Within a 1.5 mile radius of the UCL Quad, Bloomsbury

Zone B - Between 1.5-5 miles from the UCL Quad, Bloomsbury

Zone C - Over 5 miles from the UCL Quad, Bloomsbury

The majority of UCL accommodation will fit within Zone A.

Bands are based on the building condition

Band 1 - Newest build or recently refurbished to a high standard

Band 2 - Less recently refurbished or not all areas refurbished

Band 3 - Halls yet to be refurbished

Band 4 - Budget friendly rooms in Halls

that have not been refurbished.

As a guide, fee ranges for the 2024/25 session were as follows:

UCL catered accommodation

– Single room):
£225.33 to £284.90 per week

UCL self-catered accommodation

– Single room:
£204.89 to £285.18 per week

– Single ensuite room:
£275.24 to £344.82 per week

Fees for UCL accommodation are updated yearly and appear online as soon as they are set. Fees for halls operated by the University of London are set in the spring of the year of entry.

Find out more at **ucl.ac.uk/accommodation** or **halls.london.ac.uk/accommodation**

After your first year

Most students look for privately rented accommodation in year two and beyond, often sharing with friends.

UCL partners with other providers such as University of London and private operators, that offer alternative accommodation available for returning students, the majority are located under four miles from our Bloomsbury campus. These rooms are offered at a special rate for UCL students, and so prices for the same properties may be higher on other websites.

Contact us at **accommodation@ucl.ac.uk** or @UCLAccommodation on Instagram and Facebook.

General index

Discover UCL for yourself

There's always something exciting going on at UCL and our central London location makes finding us easy. We look forward to meeting you.

Come to one of our Open Days

Our next UCL Undergraduate Open Days will be hosted both online and in person. Our Virtual Open Events, from 21 to 25 April 2025, are packed with subject admissions talks providing you an insight into our degree programmes. You will have the opportunity to speak to admissions staff and academic tutors and also interact with current students to find out what studying at UCL is really like.

Our in-person Open Days on 27 and 28 June 2025 will allow you to experience and explore the Bloomsbury and East campuses and meet with UCL staff and students.

See **ucl.ac.uk/openday** for more details.

To find out more about other opportunities to visit our campus, talk to student and staff, book a tour or details of Higher Education fairs, schools and country visits, visit **ucl.ac.uk/prospective-students**

If you'd like to find out more

If you have a general enquiry about UCL and our degree programmes, feel free to contact us:

study@ucl.ac.uk
+44 (0)20 3108 8520

Access and Widening Participation

UCL runs a range of summer schools, taster days and other activities for UK-based prospective students from underrepresented groups. To find out more, including the eligibility criteria for these, visit: **ucl.ac.uk/widening-participation**
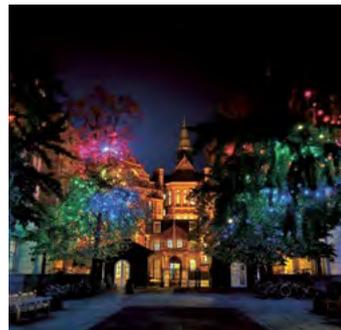

How to get to us

Whether you're coming from elsewhere in London, the UK or overseas, it's easy to get to us. See **ucl.ac.uk/maps/public-transport** for directions.

Scan the NaviLens QR code, or search: '**UCL Open Days**' to find out more

Featured here are some of our favourite entries for the **#LoveUCL** Instagram photography competition – where our students capture moments of UCL life.

Disclaimer

UCL has sought to ensure that the information given in this Undergraduate Prospectus is correct at the time of going to press but we cannot guarantee that it is accurate.

The information contained in this prospectus is subject to change. We may, for example, need to withdraw or vary any degree programme and/or alter entry requirements, fees, facilities and/or services described.

For the most up-to-date information, please see UCL's online Undergraduate Prospectus at **ucl.ac.uk/prospectus**. The online prospectus takes priority over this printed prospectus. As such, you must check the information in the online prospectus before accepting any offer of a place at UCL.

Consistently ranked as one of the top ten universities in the world*

* QS World University Rankings 2010–2025

As part of its accessibility mission, UCL is using **NaviLens Accessible QR codes** in its prospectus. These codes can be scanned from much further away, while moving and without the need to focus or frame the code. Simply download the NaviLens app to get started. The app works on both the **Android** and **Apple** operating systems and is completely accessible. The QR code at the centre can still be scanned using your camera or a standard QR reader.
